Thanks Chris - any guidance is much appreciated. We will take a careful look at this. Meanwhile I plan to contact Jennifer to give her a general idea of where I am in this process and discuss our general approach. I am passing on my revisions of Chapter 3 to IGBST for a first crack at review. I especially want their input on monitoring high caloric food; because the repercussions will fall directly on IGBST, I want make certain they are completed vested in any modification to the text. Most of the changes are in the text only and do not affect content. Also I inserted more recent literature findings and citings where warranted. But I will be communicating all of this directly with Jennifer so that any changes to the CS text will be reflected and justified in the proposed rule. Thanks for your support with this.

Dan and Lisa,

Attached is a "guide" for you to consider how any changes you make in the habitat section of the CS will impact the proposed rule. Hopefully, this will help you be aware of any domino effects from changes you may make in the CS on our conclusions in the rule.

Chris
