Attached are two tables, one containing those species that we have identified for proposed or final de-listing or downlisting with associated target dates, and the second a table of all 53 species for which 5 year reviews indicate that a downlisting/delisting proposal is warranted. -- GDF

Michael and Gary,

My apologies but I will no longer be able to come down to DOI for our meeting this morning. We could do the meeting by phone if you wanted to just call me (202-456-3486) or I'm happy to reschedule anytime after 3 pm today.

I've also attached a reformatted list of what I think are the approximately 90 species in the US (and territories) identified by FWS as either (final or proposed) recovered or removed from the candidate list because of conservation actions and planning.

Thanks,

Tim
