[ESA Strategy Dates 1 for DOI.docx](#)

Hi Gary and Michael,

Gary, I'm still looking forward to our call.

In the interim, attached is a list of the items that I believe FWS (and in some cases BLM, NRCS and NOAA) added to the ESA Opportunities Strategy developed a few months ago. It would be helpful to get an update on these, particularly the items that are nearest in the timeline (mitigation policies, communications materials, petition regulations, etc.).

In general, these are a set of issues that I will end up asking about frequently so anything you can do to keep me up to date proactively would really help. In addition, there is a list of listing and CH decisions that were flagged for CEQ, OMB and the White House in the second document (attached). It would also be helpful to have any update on these decisions in advance, in particular just knowing when something is going to happen. To give an example, I was dinged when I wasn't aware of or able to let people know in advance about the 12-month finding on the monarch and instead it was learned about through the press.

Thanks,

Tim
