Importance: High

Hi Gary, Bob,

We wanted to get you this letter regarding the DPS issue before tomorrow's meeting so you have a chance to review it. I truly apologize for sending it after office hours and on short notice, Noah and I had a bit of a miscommunication and he was traveling all day today and yesterday. I thought it got sent yesterday, my mistake.

We just want to really emphasize how important the DPS issue is in the context of grizzly recovery in the remainder of the species' range, and we hope that we can work with you on a solution that can address this concern. I will bring a few hard copies of the letter as well tomorrow.

Thanks in advance,

Brett
