Hey Rebecca,

The estimate in Schwartz et al. 2006 for % of initial observations of unique FCOY outside the RZ during 1990-2004 was 9.6%.

The estimate for % of initial observation of Unique FCOY outside the RZ during 2005-2013 would be 24.6%.

Take a look at the attached spreadsheet. If you want different periods you can adjust them as needed. All the numbers needed are included.

Sincerely,

Mark

P.S. I would prefer all the questions at once, and you come done and we address them together.

hey friends. friends that aren't busy at all. Who would I bug about updating this sentence?
I assume this has changed since 2004?

"The PCA includes approximately 84 to 90 percent of the population of female grizzly bears
with cubs (Schwartz et al. 2006b, pp. 64-66)."
thanks in advance & sorry Mark.
