I originally got that information from the state's elk management plan in 2004 (attached) and Hamlin et al. (2009) for the area around YNP. For more recent updates since 2010, go to: <http://fwp.mt.gov/fishAndWildlife/management/elk/>.

PJ,

Do you know of a published reference for elk population numbers in the GYE?

Kerry,

I vaguely remember PJ mentioning that although some populations of elk are declining in the Greater Yellowstone Ecosystem others are increasing. Do you have a good reference that discusses this?

Thank you!
