Thanks! I'm digging through the servers now. They probably are here, it'll just take me a little bit more familiarization with the storage structure to find it haha

Forwarded you message about telemetry...

If you haven't taken a look yet, you need to dig into the PRT report for the Panther Protection Program and it's associated GIS layers. I know at least the report is on file in Vero...hopefully the spatial layers for the maps we produced are also.

Hey,

I'm really starting to dig into this East Collier Multispecies HCP and got my hands onto their spatial data for preserve areas and activity areas. (b) (5)

While accessing the data we have on our GIS server, I realized our most recent shapefiles we have for denning information is 2012, territory information is from 2009, and the telemetry data we have ends in 2013.

To your knowledge is there more recent data at our disposal to build a more contemporaneous picture with?

Thank you,

Ken
