

Order Statement of Work  
Peer Review (without attribution) of the Scientific Findings in  
U.S. Fish and Wildlife Service's Proposed Rule Removing the Greater Yellowstone  
Ecosystem Population of Grizzly Bears From the Federal List of Endangered and Threatened  
Wildlife; Availability of Draft Recovery Plan Supplement: Revised Demographic Criteria  
and a Draft 2016 Conservation Strategy for this Population.

Date: March 22, 2016

## 1. Introduction/Background

Grizzly bears (*Ursus arctos horribilis*) in the lower 48 States were listed as a threatened species under the Endangered Species Act (ESA) in 1975. Excessive, unregulated human-caused mortality was the primary factor leading to grizzly bear decline. Today, grizzly bears in the lower 48 States persist in five separate ecosystems, including the Greater Yellowstone Ecosystem (GYE), with Yellowstone National Park at its core. Since their listing in 1975, the GYE population of grizzly bears has nearly tripled in size and more than doubled its range. On March 11, 2016, the U.S. Fish and Wildlife Service will publish a proposed rule to remove the Greater Yellowstone Ecosystem population of grizzly bears from the Endangered Species List. Concurrent with the proposed rule, we are proposing to update portions of the Recovery Plan: Demographic Recovery Criteria in the GYE and the Conservation Strategy based on new scientific analyses, information, and methods. The Conservation Strategy is the post-delisting management plan that will guide management in perpetuity after delisting.

To effectively manage human-caused mortality, the Service established demographic recovery criteria that are monitored by the Interagency Grizzly Bear Study Team. Some mortality is unavoidable in a dynamic system where hundreds of bears inhabit large areas of diverse habitat with several million human visitors and several hundred thousand residents. The objective of demographic recovery criteria is to ensure the long-term persistence of the GYE population of grizzly bears while allowing for human removal of some individuals when they become a threat to human safety or livestock.

The Conservation Strategy ~~should provide~~ all the habitat management specifics and population management specifics ~~to that will be in place and~~ implemented by all the agencies post-delisting. The threats analysis regarding the adequacy of regulatory mechanisms post-delisting in the proposed rule refers to the Conservation Strategy.

As part of the Service peer review policy we are requesting peer review of this proposed delisting rule, the draft Recovery Plan Supplement: Revised Demographic Criteria, and the draft 2016 Conservation Strategy.

## 2. Description of Review

We are seeking peer review on this proposed rule, the draft Recovery Plan Supplement: Revised Demographic Recovery Criteria, and the draft 2016 Conservation Strategy. The purpose of the review is to help us ensure that we have used the best scientific and commercial information

when we make our final decision as to whether the GYE grizzly bear population should be delisted. Thus, we are looking for independent scientific perspectives on the comprehensiveness, and logic of the 3 documents, as well as how well the technical conclusions are supported by the data and analyses. Additionally, they should focus their review on identifying and characterizing scientific uncertainties. Peer Reviewers should be advised that they are not to provide advice on policy.

### 3. Methods, Protocols and/or Scientific Standards

The independent peer reviewers shall be experienced senior-level ecologists, bear biologists, or population modelers, and bear managers who have previously conducted similar reviews or regularly provided reviews of research and conservation articles for the scientific literature. Reviewers must be well-versed in the demographic management of mammals, preferably bears or other carnivores. Conflicts of interest should generally be avoided (or minimized). Potential conflicts of interest might include: employment or strong affiliation with ~~The reviewers must be independent of~~ the Service, the States of Montana, Wyoming, or Idaho, the Interagency Grizzly Bear Study Team, ~~and~~ the Western Governors Association; ~~p.~~ Peer reviewers who have should not have offered a ~~public~~ opinion or a statement either for or against delisting; ~~and p.~~ Peer reviewers ~~cannot be~~ directly or indirectly employed by or associated in any way with any organization that has either litigated the federal government concerning grizzly bears or wolves or taken a position on one side or the other about recovery and delisting of grizzly bears or wolves. Where conflicts of interest (or the appearance thereof) are not avoidable (e.g., highly qualified reviewers in one of the above categories), potential conflicts of interest should be clearly disclosed. The contractor will be responsible for assigning an experienced, senior and well-qualified manager to lead this review and for the selection of ~~35~~ well-qualified, independent reviewers. The expertise of qualified reviewers shall include:

1. A Ph.D. or an M.S. (with significant experience) in Wildlife Ecology, Ecology, or Wildlife Management
2. Demonstrated experience working with the management of large carnivores, especially bears, and wildlife population management.
3. Expert knowledge of wildlife biology, wildlife management, demographic management of mammals (especially carnivores), wildlife population dynamics, or wildlife population modeling, as well as available literature on bears and other carnivores, ~~and the management of bears and other carnivores.~~
4. Experience as a peer reviewer for scientific publications.

In addition, the reviewers should, to the extent possible, shall have no financial or other conflicts of interest with the outcome or implications of the report (reviewers should not be currently employed by the Service, the states of Montana, Wyoming, or Idaho or employed by or contracted by any organization that has either litigated or taken a position on grizzly bear recovery or delisting). Where conflicts of interest (or the appearance thereof) are not avoidable (as discussed above), potential conflicts of interest should be clearly disclosed.

The Service will have an opportunity to seek clarification on any review comments through the contractor (Task 003.1), for a period of 10 days, starting 60 days after the Service receives the

**Comment [SLW1]:** Potentially change once timeline is more firmly nailed down.

report reviews from the contractor. ~~The list of reviewers and the combined comments without attribution will be part of the final report and included in the Services' Administrative Record.~~

Peer Reviewers will provide individual, written responses. Peer Reviewers should be advised that their reviews, including their names and affiliations, will (1) be included in our administrative record, and (2) will be made available to the public. We will summarize and respond to the issues raised by the peer reviewers in the record.

Collectively, the review should cover, but not be limited to, the topics listed below. Individual reviewers should, at their own discretion, provide comments, criticisms, and ideas about any of the topics they feel qualified to comment on. The most valuable reviews will focus on how thoroughly and logically the topics have been treated, and how well the conclusions are supported by the data and analyses. Not all reviewers are required to address all issues noted below. Reviewers should comment on areas within their expertise, and may choose to abstain from other areas.

Proposed Rule:

1. Does the proposed rule provide adequate review and analysis of the factors relating to the persistence of the grizzly bear population in the GYE (demographics, habitat, disease and predation, and genetics)?
2. Are our assumptions and definition of suitable habitat logical and adequate?
3. Are the details for habitat management ~~and regulatory mechanisms~~ adequate in the proposed rule?
4. Is the management of discretionary mortality, including hunting, scientifically sound and sufficiently detailed?
5. Are the conclusions relating to the effects of changes in food resources on the GYE grizzly bears scientifically based and logical?
6. Is our explanation of density dependent effects versus whitebark pine decline driven effects scientifically sound?
7. Did we include all the necessary and pertinent literature to support our assumptions/arguments/conclusions?

Draft 2016 Conservation Strategy:

1. Are the habitat management mechanisms scientifically sound and sufficiently detailed in the draft 2016 Conservation Strategy?
2. Is the management of discretionary mortality, including hunting, scientifically sound and sufficiently clear and detailed so that managers can use this document to successfully implement mortality management in the future?
3. Is management to facilitate connectivity with other grizzly populations adequately addressed in the draft 2016 Conservation Strategy?
4. If implemented, is the Conservation Strategy adequate to reasonably ensure the long-term viability of the GYE grizzly bear population?
5. Did we include all the necessary and pertinent literature?

Draft Recovery Plan Supplement: Revised Demographic Criteria:

1. Please provide your scientific evaluation (e.g., explain the pros and cons) of the revised recovery goal's objective to managing to maintain the population around the 2002–2014 model-average Chao2 estimate of 674, by maintaining a population within the (95% CI range of= 600–757) (instead of stability or an increasing or decreasing population)
2. Please provide your scientific evaluation (e.g., explain the pros and cons) of monitoring the demographic criteria exclusively within the demographic monitoring area

**Comment [SLW2]:** Steve suggested pros and cons. I kind of like closer to what Chris had before. We are seeking peer review of the criterion. Pros and cons seems wishy washy. I tried to rephrase to avoid terms steve didn't like (is it "appropriate" to manage for this level; is this plan "reasonable"). Maybe this threads the needle.

In accordance with the agreement terms and Performance Work Statement, the contractor(s) is (are) reminded of the requirements to protect information and that services shall consist of unbiased assessments through proper management and enforcement of scientific integrity standards, to include the extent possible avoid or minimize conflict of interests. Where conflicts of interest (or the appearance thereof) are not avoidable (as discussed above), potential conflicts of interest should be clearly disclosed.

**4. Required Service (Work) Items - Task Line Item Numbers (TLIN):** As described in the agreement's Performance Work Statement, paragraph 2B, the below TLINs are required in the performance of this requirement. The TLINs are different, but interrelated to the tasks listed in task/deliverable and payment schedule:

TLIN 001: Selecting for peer reviews or review panels, or for task orders to provide scientific support.

TLIN 002: Organizing, structuring, leading, and managing the scientific reviews and task order products.

TLIN 003: Managing and producing a final ~~report~~ product.

TLIN 004: Responding to any follow-up questions from the Service on original review comments (not to exceed 10 consecutive days)

TLIN 005: Maintaining an official record for peer reviews or task orders.

## 5. Deliverables

The following deliverables are in addition to the agreement's Performance Work Statement paragraph 3, which states, "The Contractor shall provide the COR with three key deliverables:

(1) Proposed Timeline, (2) Original ~~and summarized individual~~ scientific reviews and a transmittal letter to the Service (to Regional Director, Noreen Walsh), and (3) Complete Official Record."

There are no additional deliverables. However, the contractor will be required to respond to questions, inquiries, or other related requests after the contract expiration date, and final acceptance, as needed. These request(s) will be by the Contracting Officer

Representative (in coordination with the Contracting Officer). Inquiries or requests are limited to the products provided, and work performed under this contract (order).

Responses include, but not limited to: phone calls, written responses, and/or meetings.

Review comments by the Contracting Officer Representative will be provided to the contractor via the Contracting Officer.

## 6. Task Schedule.

The period of performance shall not exceed the contract expiration date without a contract modification. In accordance with the terms of the contract, the contractor shall notify the Contracting Officer of any delays. Delays by the Government or Contractor must be rectified by accelerating the next deliverable on a one to one basis (i.e., if the delay was 2 days then the next deliverable must be submitted 2 days early). Deliverables that fall on a holiday or weekend must be delivered on the first work day after the weekend or holiday. The period of performance (contract expiration date) includes all possible holidays or weekend deliveries:

TASK/DELIVERABLE	CALENDAR DAYS AFTER AWARD
Task 1: Contracting Officer and COR will provide access to materials needed for the review	3
Task 2: The contractor(s) shall conduct a thorough, objective peer review of the Service Proposed Rule Removing the Greater Yellowstone Ecosystem Population of Grizzly Bears From the Federal List of Endangered and Threatened Wildlife; Availability of Draft Recovery Plan Supplement: Revised Demographic Criteria and a Draft 2016 Conservation Strategy for this Population.	17 (14 days)
Task 3: The contractor(s) will provide <del>4 to 65</del> expert peer reviews <del>(combined without attribution) and a transmittal letter to the Service (to Regional Director, Noreen Walsh) all applicable official records to the project manager</del>	22 ( 5 days)
Task 4: <del>The project manager facilitates specific follow-up questions/answers between the Service and the reviewers (task limited to a 10-day period, 60 days after delivering initial review comments to the Service). The project manager summarizes the individual peer reviews and prepares a summary report for the Service</del>	29-32 (7-10 days )
Task 5: <del>The project manager will provide all applicable official records to the project manager. The project manager facilitates specific follow up questions/answers between the Service and the reviewers, without attribution (task limited to a 10-day period, 60 days after delivering initial review comments to the Service).</del>	39-42 (10 days )
Task 6: <del>Final report and official record is submitted to the Service</del>	45 (6 days ) DEADLINE is May 10, 2016

Comment [SLW3]: Modify later???

Comment [SLW4]: Increasingly thinking this will have to be extended. Let's not worry about May 10<sup>th</sup> too much, in light of this likely reality. Another 30 to 45 days likely.

## 7. Official Administrative Record

The preparation of an official administrative record is required.

## 8. Information Sources

The key information sources (~~estimated total of 150 pages~~) and links for this review will include the three documents referenced in the Notice of Availability published in the Federal Register: (1) the Proposed Rule Removing the Greater Yellowstone Ecosystem Population of Grizzly Bears From the Federal List of Endangered and Threatened Wildlife; (2) the draft Grizzly Bear Recovery Plan Supplement: Revised Demographic Criteria for the Greater Yellowstone Ecosystem population; and (3) the draft 2016 Conservation Strategy for the Greater Yellowstone Ecosystem population. Pertinent literature for each document will be provided.

## 9. Payment Schedule:

~~In accordance with and in addition to the agreement, the contractor will submit invoices via the Internet Payment Platform (IPP) (see agreement). Invoices that do not coincide with a deliverable shall be submitted with a brief status report (not to exceed 1 page). The status report will detail the period of performance, the services performed during the period, key personnel involved, and percentage of the task(s) complete, if other than 100%. Partial payment for task(s) that are not 100% complete will be paid in an amount up to, but not to exceed, 65% of the task's total cost. For instance, if the total cost of the project is \$100.00, 100% of task 2 related cost would be \$10.00. If task 2 is 75% complete, the invoice amount will not exceed 65% or \$6.50.~~

The payment schedule is as follows: 100 percent upon completion of Task 6 above.

**Comment [SLW5]:** Do we need this; see below suggestion. Why make this more complicated than it needs to be. This is a very simple, short timeline assignment.

<b>TASK/DELIVERABLE</b>	<b>% OF EFFORT &amp; PRICE</b>
<del>Task 1: Contracting Officer and COR will provide access to materials needed for the review</del>	<del>0-0</del>
<del>Task 2: The contractor(s) shall review appropriate information that will assist in their review.</del>	<del>10%-0</del>
<del>Task 3: The contractor(s) shall conduct a thorough, objective peer review of the Service Proposed Rule Removing the Greater Yellowstone Ecosystem Population of Grizzly Bears From the Federal List of Endangered and Threatened Wildlife; Availability of Draft Recovery Plan Supplement: Revised Demographic Criteria and a Draft 2016 Conservation Strategy for this Population.</del>	<del>30%</del>
<del>Task 4: The contractor(s) will provide their individual review, and all applicable official records to the project manager</del>	<del>0%</del>
<del>Task 5: The project manager summarizes the individual peer reviews and prepares a summary report for the Service.</del>	<del>10%</del> <b>60%</b>
<del>Task 6: The project manager receives follow up questions from the Service on any review comment, obtains the reviewers reply and provides the reply comment, without attribution to the Service (limited to a 10 day period)</del>	<del>5%</del>

**Comment [SLW6]:** Delete? Seems unnecessary. Why not just pay them at the end. Its such a short, concise action.

If we retain, needs to be updated to be consistent with the tasks above (which were modified)

Task 8: Final report and official record is submitted to the Service	
Total	100%

#### 10. Points of Contact:

**Contracting Officer**, Mr. Steve Gess. Mr. Gess's phone number is 303-236-4334 or email: [steve\\_gess@fws.gov](mailto:steve_gess@fws.gov).

**Contracting Officer's Technical Expert**: Marjorie Nelson, who can be reached at 303-236-4258 or [marjorie\\_nelson@fws.gov](mailto:marjorie_nelson@fws.gov)**Project Leaders**: Dr. Chris Servheen, Grizzly Bear Recovery Coordinator and Dr. Jennifer Fortin **Mailing Address**: University Hall, Room 309, Missoula, Montana 59812 **Telephone**: 406.243.4903 **Email**: [chris\\_servheen@fws.gov](mailto:chris_servheen@fws.gov)

#### 11. List of Enclosures/Attachments

- 1) Proposed Rule Removing the Greater Yellowstone Ecosystem Population of Grizzly Bears From the Federal List of Endangered and Threatened Wildlife;
- 2) Draft Recovery Plan Supplement: Revised Demographic Criteria
- 3) Draft 2016 Conservation Strategy for this Population
- 4) Electronic copies of literature cited in each of the above documents

Comment [SLW7]: Lit cited.

#### 12. Evaluation Criteria (This paragraph will be deleted upon award)

This requirement will be awarded based on best value. Best value will take into consideration price (to include the level of effort applied to each major task), approach (to include the labor categories, TLINs applied to each major task, and the reviewer's resumes (raptor or eagle ecologist/statistician/modeler having performed similar reviews) (reference paragraph 3).

Price must detail cost in accordance with the agreement. The approach must include a detailed/proposed schedule (timeline), and the disciplines/skill mix of reviewers. The approach should be no more than 2 pages (8 1/2" x 11", 12 point font), excluding information on costs. All contractors must propose ~~four (4) to six (6)~~ five reviewers ~~and indicate (separately) the additional cost for a fifth reviewer.~~ Be sure to include the discipline/skills of all reviewers (e.g., a resume or CV). ~~The fifth and sixth reviewers are considered optional and subject to a determination by the Government and subject to the availability of funds.~~
