Jenn,

The May 10 state comments in addition to the May 9 comments (attached) eviscerate the critical details necessary to maintain adequate demographic and linkage management. These are completely unacceptable. If the "leadership" agrees to these changes, it will eliminate adequate regulatory mechanisms, make the rule and CS legally indefensible, and destroy the cooperative management system we attempted to build. Acceptance of these changes will force me to publicly speak out on these threats to the secure future of the Yellowstone bears.

C
