On or around March 30, FWS plans to send to the *Federal Register* a proposed 4(d) rule for the Louisiana pinesnake, found in Louisiana and Texas. The 4(d) rule will allow routine forest management activities to proceed without need for permitting. Interested stakeholders include the forestry industry, state wildlife agencies, and Center for Biological Diversity. This action is not expected to be opposed and media coverage is expected to be neutral. Planned outreach includes a regional news release to all interested parties and the media. FWS plans to propose the 4(d) rule concurrent with the final listing rule, which is required by settlement agreement to publish in the *Federal Register* by April 4; therefore, FWS plans to submit the 4(d) rule by March 30.

In March, FWS plans to send to the *Federal Register* a notice of issuance for letters of authorizations issued in 2015, 2016 and 2017 under regulations authorizing the non-lethal, unintentional take of marine mammals in the Chukchi and Beaufort seas. This is an administrative action and is noncontroversial. No news release will be issued.

[UPDATE] On or before April 3, FWS plans to send to the *Federal Register* a notice seeking public review and comment on a draft Environmental Assessment (EA) describing the potential effects of issuing a proposed Incidental Take Permit (ITP) for construction and development activities in Thurston County, Washington. The project development site is 127 acres, and the conservation site is 64 acres. Species covered in the HCP include the threatened Olympia subspecies of the Mazama pocket gopher and the threatened Oregon spotted frog. UPC, LLC developed a draft Habitat Conservation Plan (HCP) and applied for a 15-year ITP. This is not controversial. This HCP is a single-site developer and independent from the HCP that FWS briefed ASFWP about on November 17. This applicant would like to move forward with development in advance of the completion of the Thurston County HCP. Local outreach is planned.

On or around April 5, FWS plans to send to the *Federal Register* a final determination on the proposal to list five Sri Lankan tarantula species (*Poecilotheria fasciata, P. ornata, P. smithi, P. subfusca, and P. vittataas*) as endangered. The species are in decline due to ongoing habitat loss, degradation, and the cumulative effects of this and other threat factors. This action is not expected to be controversial. Planned outreach will include web updates.

On or around April 10, FWS plans to send to the *Federal Register* a proposal to delist the Colorado butterfly plant due to recovery. This species is located in Colorado, Nebraska and Wyoming. This action is not expected to be opposed. Outreach plans include a regional regional news release and an if-asked Q&A. Key stakeholders include private landowners, F.E. Warren Air Force Base, the City of Fort Collins, Colorado, and the Bureau of Land Management.

On April 10, FWS will join the New York Historical Society for a reception that celebrates a new exhibit honoring the centennial of the Migratory Bird Treaty Act. The exhibit is open from April 6 - July 15 and focuses on three themes: history of the act, the connection between the act and the women's suffrage movement, and profiles and Audubon watercolors of 13 bird species that are currently protected under the act. FWS has partnered with the society to provide technical advice and loan historical items for the exhibit. FWS leadership will attend the reception and the agency will coordinate with HQ and the Society on media pitches, social media outreach and storytelling.

[UPDATE] Between April 16 and 30, FWS plans to send to the *Federal Register* a final rule removing regulations setting forth the provisions for two depredation orders for double-crested cormorants. FWS had used these standing orders to allow for lethal control of cormorants where they impact aquaculture and public resources; however, on May 25, 2016, the District Court for the District of Columbia ordered that both the Aquaculture Depredation Order and the Public Resources Depredation Order be vacated until FWS performs a new and legally adequate environmental assessment (EA) or environmental impact statement for national cormorant management orders in compliance with the requirements of the National Environmental Policy

Act (NEPA). This final rule administratively implements the court's decision. While the depredation orders no longer exist, on November 15, 2017, FWS provided some measure of relief to aquaculture facilities. It issued a final EA under NEPA, which allows aquaculture facility managers and property owners across 37 central and eastern states and the District of Columbia to apply for individual permits for lethal take of cormorants where they are impacting resources. This latest action is not controversial. If-asked talking points will be planned for outreach.

Awareness

[NEW] A "Petition for Review of Agency Action" was filed in U.S. District Court in Denver on February 13 related to the issuance of a nest disturbance permit under the Bald and Golden Eagle Protection Act (BGEPA). The Plaintiff (Front Range Nesting Bald Eagle Studies) is challenging that the Defendants' (FWS and DOI) application of a categorical exclusion under the National Environmental Policy Act (NEPA) for issuance of the permit, claiming that it violates NEPA, BGEPA, and the Administrative Procedures Act (APA). The permit under challenge was issued to Garrett Construction Company LLC on February 6 for potential nest disturbance in 2018 and 2019 during construction of an apartment complex. (02/21/18)

[NEW] The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participant under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to FWS for approval. FWS will work with the Comptroller's Office on this revision at the appropriate time. (02/21/18)

[NEW] Leander Independent School District in Texas has submitted a draft habitat conservation plan (HCP) and incidental take permit (ITP) on the proposed construction of a secondary access road in northwest Travis County. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. There is significant congressional interest, as well as strong opposition from other parties. Planned outreach when information is published includes issuing a news bulletin. A conference call was held with Senator Cornyn's (R-TX) staff to discuss the issue on December 11. (02/21/18)

[NEW] FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designed under section 10(j) of the ESA. In 2017 a Mexican wolf crossed the border into the United States in this area and then returned to Mexico. (02/21/18)

[NEW] As part of the Biological Opinion for the Everglades Restoration Transition Plan (ERTP) issued by FWS, on February 16, the Acting Regional Director for the FWS Southeast Region and the Director of Programs for the U.S. Army Corps of Engineers' (Corps) South Atlantic Division met with the Principals to ensure both the FWS and Corps are aligned in meeting the milestones of the ERTP. The ERTP is the plan that guides water movement across most of the Everglades landscape. (02/21/18)

[NEW] FWS will complete a modified pre-assessment screen (PAS) for the Stauffer National Priority List Sites (Stauffer Cold Creek [Syngenta], Stauffer LeMoyne [Akzo-Nobel]) Natural Resource Damage Assessment (NRDA) in Mobile County, Alabama, by the end of February. The previous PAS was signed in March 2017. The only change in the modified PAS is the inclusion of an additional potentially responsible party, Akzo-Nobel Chemical. Akzo-Nobel and Syngenta have shared responsibility for contamination, primarily in the form of mercury released from industrial processes, in the 650-acre Cold Creek Swamp which is adjacent to the sites of interest. The trustees will evaluate natural resource injuries resulting from the mercury releases in the Cold Creek Swamp and will determine if site-related mercury contamination has impacted natural resources in adjacent habitat. Akzo-Nobel is aware of the forthcoming NRDA and has expressed an interest in working cooperatively with the trustees during the assessment phase of the NRDA. (02/21/18)

FWS is working to help clarify and improve falconer access to golden eagles. Several existing regulatory means by which falconers can legally acquire golden eagles have been identified, and FWS is developing steps to ensure that if golden eagles become available through these means, the pool of eagle falconers across the U.S. can gain access to up to six eagles per year, which is compatible with the preservation of eagles and does not affect eagle allocations to tribes. Flyway Councils and tribes are being informed. If-asked talking points will be planned for outreach. (02/14/18)

FWS, along with Michigan Departments of Environmental Quality and Natural Resources, Michigan Attorney General, and the National Oceanic and Atmospheric Administration, act as trustees for natural resources affected by contaminants associated with the Kalamazoo River Superfund Site in Michigan. As part of a plan to restore lost resources at the site, trustees have begun work to remove the Alcott Street Dam on Portage Creek in Kalamazoo. Work includes removal of the dam and restoration of approximately 3,000 feet of Portage Creek. Benefits include increased fish movement and greater diversity of aquatic species in the river, improved wildlife habitat along the creek, and increased floodwater storage and decreased potential for downstream flooding. The activity was identified in a final restoration plan and environmental assessment. Trustees provided an overview of the project at a public meeting on February 1. Completion of the project is expected by the end of summer. (02/14/18)

On February 7, the California Department of Water Resources (CDWR) publicly announced the evaluation of a staged construction concept for the California WaterFix project. Under the staged approach, stage 1 would include a single water conveyance tunnel followed by construction of a second tunnel during stage 2 at a later point in time. The CDWR anticipates additional review under state and Federal environmental law can be completed between now and this fall. FWS signed a biological opinion for California WaterFix project addressing 16 listed species, including Delta smelt, in June 2017. FWS will be engaged as additional details are developed

over the coming months. While media extensively covered the altered tunnel plan announcement, no outlets contacted FWS for comment. (02/07/18)

After a 30-day public comment period, FWS has signed a Finding of No Significant Impact (FONSI) to allow U.S. Department of Agriculture (USDA) additional fever tick eradication methods on refuge lands. Through a Special Use Permit, USDA will be approved to treat white-tailed deer with ivermectin-treated corn and conduct experimental cattle grazing on Laguna Atascosa NWR and Lower Rio Grande Valley NWR lands that fall within established quarantine areas. Permitting USDA to conduct these fever tick management activities is consistent with invasive species control efforts, Cattle Fever Tick Eradication Program goals, and its adaptive management strategy to eradicate fever ticks within a quarantine area. FWS will continue to be fully engaged and is committed to cattle fever tick eradication in Texas. Outreach, during the week of February 12, will include congressional notifications. (02/14/18)

On January 31, the State Department reinitiated consultation under the Endangered Species Act for the Keystone XL Pipeline Project. The letter states that TransCanada will utilize the Mainline Alternative Route as approved by the Nebraska Public Service Commission in November 2017. The State Department has requested any new information on potentially impacted species along the new route. FWS's Nebraska Ecological Services Field Office is working with the State Department to discuss next steps. (02/14/18)

In March-June, U.S. Customs and Border Protection (CBP) plans a project to repair, maintain and improve a 10.6-mile section of the Baboquivari Road within the Pozo Verde Mountains northwest of Sasabe, Arizona. The project objective is to improve access to and therefore security along this section of the U.S.-Mexico border. The project will require FWS to supply water from a well on Buenos Aires NWR.FWS work and CBP will work together to ensure both agency's missions are being met.

Hi all,

Attached is our briefing paper and map in response to the Deputy Secretary's request regarding our construction account and the southern border. The map shows the Lower Rio Grande Valley NWR in green and the Santa Ana NWR in gray.

Please let us know if you have questions.

Thanks,

Laura

FWS HQ - Resource Protection Structures_4.18.2018.docx
19K

BRIEFING MEMORANDUM FOR THE PRINCIPLE DEPUTY DIRECTOR

DATE: April 18, 2018

FROM: Cynthia Martinez, Chief for the National Wildlife Refuge System

SUBJECT: Use of FY 2018 construction funds along the U.S.-Mexico border

Analyze the U.S Fish and Wildlife Service's authority to use construction appropriations to build resource protection structures along the U.S.-Mexico border.

BACKGROUND

The Deputy Secretary asked the U.S. Fish and Wildlife Service (FWS) to analyze and answer the question: "Does the U.S. Fish and Wildlife Service (FWS) have the ability to use FY 2018 construction appropriations account funding to build resource protection structures along the U.S.-Mexico border?"

The FY 2018 Omnibus includes a specific provision for the U.S. Custom and Border Protection against building a barrier in this area: "Sec. 230. None of the funds provided in this or any other Act shall be obligated for construction of a border barrier in the Santa Ana National Wildlife Refuge."

The FY 2018 Omnibus also provides FWS with a one-time $50 million increase "for the backlog of deferred maintenance" at refuges and hatcheries. FWS must submit a spend plan to Congress within 120 days of the enactment of the Omnibus.

DISCUSSION

The FY 2018 Omnibus (H.R. 1625) also provides Construction account funding for specific line-item construction projects that are approved by Congress. None of these projects are along the southern border. As directed in the Congressional Report, any change from this list must be submitted by the Department of the Interior as a reprogramming request for Congressional approval. For the Resource Management account, all reprogramming requests over $1 million or a 10 percent change in funding, annually, must be approved by Congress.

Based on appropriations law, FWS would have to submit a reprogramming request to Congress to build a resource protection structure along the U.S.-Mexico border on FWS lands. Congress would also have to approve the project if it were included in the spend plan for the $50 million increase for deferred maintenance. Nevertheless, the prohibition noted in the U.S. Custom and Border Protection section may extend to FWS and all Federal agencies funded through the FY 2018 Omnibus depending on Congressional intent.

Attachments:	DRAFT FY18Q4 OMB reg report (streamlined) (5.24.18).docx DRAFT FY18Q4 OMB reg report (showing changes from Q3) (5.24.18).docx Q4 Note to Reviewers.docx Q4 memo.docx

---

The finished OMB report. package is on your chair for review/surname, Kathy.

Charisa and Kashyap, this package is fast moving, and will be coming to you today.

See attached courtesy copy of the package. Note that both versions of the reg report are not in the hard copy package -- only the "streamlined" version is. The streamlined version shows what is coming forward during Q4. (The marked-up version shows differences between the Q4 and Q3 reports.)

Thanks,

Sara Prigan

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
‡1018-AU96 Endangered and Threatened Wildlife and Plants; Removing the Hawaiian Hawk from the List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will reopen the comment period on a proposal to delist the Hawaiian Hawk, found in Hawaii. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. *Note: This is a 13771 deregulatory action.*	Not subject to OMB review (7/6/18) (Not on previous list, but PR was)
‡1018-AU96 Endangered and Threatened Wildlife and Plants; Removing the Hawaiian Hawk from the List of Endangered and Threatened Wildlife 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to delist the Hawaiian Hawk, found in Hawaii. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. *Note: This is a 13771 deregulatory action.*	Not subject to OMB review (9/26/18) (Not on Q3, but on before Q3)
1018–AV82 Migratory Bird Permits; Revisions to Banding or Marking Permits 50 CFR 21	PR	Not significant. Not Major. Not court driven. **What the rule does:** We are revising our migratory bird banding and marking regulations to: (1) Reflect the transfer of authority for the Federal bird banding and marking permit program to the U.S. Geological Survey (USGS); (2) define the qualification guidelines for different levels of banding and marking authorization; and (3) address changes in banding and marking technology. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Eric Kershner, 703-358-2376.	9/28/18 NEW ACTION

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
‡1018–AW83 Revising Regulations Implementing the Wild Bird Conservation Act of 1992 50 CFR 15	PR	Not significant**.** Not major. Not court driven. **What the rule does:** This proposed rule will revise our regulations implementing the Wild Bird Conservation Act of 1992, which have not been substantively updated since 1993. We plan to revise these regulations in light of our experiences in implementing the legislation and regulations, and also to streamline and clarify certain aspects of the current regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Pamela Hall Scruggs, 703-358-2493.	9/28/18
1018–AY03 Endangered and Threatened Wildlife and Plants; Downlisting the Tidewater Goby 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the tidewater goby from endangered to threatened. The tidewater goby occurs in California and Oregon. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact**: Don Morgan, 703-358-2444.	Not subject to OMB review (9/28/18) NEW ACTION
‡1018–AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant**.** Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Pamela Hall Scruggs, 703-358-2493. OMB question in response to Q2 list: In Q1, this was expected to be ready for review in October of 2017. What is the cause of delays here? FWS response: Workload priorities.	9/28/18

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
‡1018–AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	**Significant.** Not major. Not court driven. **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	9/28/18
1018–BA33 Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts 50 CFR 80	FR	Not significant. Not major. Not court driven. **What the rule does:** This rule is part of a process for directing State fish and wildlife agencies on how they must receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, FWS distributes annual apportionments to States from trust funds derived from excise tax and fuel tax revenues. We address definitions, requirements for licenses counted for apportionment of Federal financial assistance, program income, and other related issues. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR. **Controversy:** None anticipated. State fish and wildlife agencies, as well as other partners, support this final rule and have been closely involved in its development. **Dates of any briefs provided to EOP:** None. **Contact:** Lisa Van Alstyne, 703-358-1705.	9/4/18 NEW STAGE

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018–BA43 Endangered and Threatened Wildlife and Plants; Delisting the Borax Lake Chub 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to remove the Borax lake chub from the Federal List of Endangered and Threatened Wildlife due to recovery. The Borax lake chub is found in Oregon. **Controversy:** None anticipated **Dates of any briefs provided to EOP:** None. **Contact**: Don Morgan, 703-358-2444. *Note: This is a 13771 deregulatory action.*	Not subject to OMB review (8/1/18)
1018–BA88 Migratory Bird Subsistence Harvest in Alaska; Exempting Subsistence Hunters From Duck Stamp Purchase 50 CFR 20, 32, 92	PR	Not significant. Not court driven. **What the rule does:** We propose to amend the regulations governing subsistence hunting of migratory birds in Alaska by adding an exemption for rural subsistence migratory bird hunters in Alaska to purchase a Duck Stamp. Doing so will comport with the intent of Congress as written in the Federal Duck Stamp Act of 2014. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. *Note: This is a 13771 deregulatory action.*	9/4/18 NEW ACTION
‡1018–BB27 Endangered and Threatened Wildlife and Plants; Listing Determination and Critical Habitat Designation for the Lesser Prairie-Chicken 50 CFR 17	PR	**Significant.** Not major. Not court driven. **What the rule does:** FWS will make a listing determination for the lesser prairie-chicken. The lesser prairie-chicken is a bird found in Colorado, Kansas, New Mexico, Oklahoma, and Texas. We will also, if found prudent and determinable, designate critical habitat for this species. **Controversy:** This species has a history of ESA litigation and is the subject of intensive interest from the past plaintiffs, petitioners, stakeholders, and local and state government officials, particularly the State wildlife agencies in the five range states. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/17/18

Abbreviations/symbols: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document; ‡ - Appeared on a 90-day list prior to Q318, and OMB concurred re E.O. 12866 significance determination.

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
‡1018–BB38, Subsistence Management Regulations for Public Lands in Alaska—2018–2019 and 2019–2020 Subsistence Taking of Wildlife Regulations 50 CFR 100; 36 CFR 242	FR	Not significant. Not major. Not court driven. **What the rule does:** This rulemaking will revise regulations for seasons, harvest limits, methods, and means related to taking of wildlife for subsistence uses in Alaska during the 2018–2019 and 2019–2020 regulatory years. The Federal Subsistence Board will also address customary and traditional use determinations for wildlife. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Theo Matuskowitz, 907-786-3867.	7/6/18 NEW STAGE
1018–BB41 Endangered and Threatened Wildlife and Plants; Delisting the Deseret Milk-vetch 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to delist the Deseret milkvetch, found in Utah. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact**: Don Morgan, 703-358-2444. *Note: This is a 13771 deregulatory action.*	Not subject to OMB review (9/28/18) NEW STAGE
‡1018–BB52 Endangered and Threatened Wildlife and Plants; Listing Determination for Two Stoneflies 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to list the meltwater lednian stonefly and western glacier stonefly as threatened species. The meltwater lednian stonefly is located in Montana, and the western glacier stonefly is located in Montana and Wyoming. We will also, if found prudent and determinable, designate critical habitat for these species under a separate rulemaking action (1018–BD56). **Controversy:** The State of Wyoming is opposed to listing the western glacier stonefly in Wyoming. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review (7/2/18)

Abbreviations/symbols: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document; ‡ - Appeared on a 90-day list prior to Q318, and OMB concurred re E.O. 12866 significance determination.

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018–BB73 Migratory Bird Hunting; Seasons and Bag and Possession Limits for Certain Migratory Game Birds for the 2018–2019 Season 50 CFR 20	FR	**Significant. Major.** Not court driven. **What the rule does:** This rule prescribes the hunting seasons, hours, areas, and daily bag and possession limits for migratory game bird seasons. Taking of migratory birds is prohibited unless specifically provided for by annual regulations. This rule permits the taking of designated species during the 2018–19 season. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel (703) 358-1967. *Note: This action is not subject to E.O. 13771, because it establishes annual harvest limits related to routine hunting or fishing.*	7/31/18 NEW STAGE
‡1018–BB77 Migratory Bird Permits; Removing a Depredation Order for Scrub Jays and Steller's Jays in Washington and Oregon 50 CFR 21	PR/ final actio n	Not significant. Not major. Not court driven. **What the rule does:** FWS is withdrawing a proposed rule to remove 50 CFR 21.46, a regulation that sets forth a depredation order for scrub jays and Steller's jays in Oregon and Washington. FWS had proposed to remove this regulation, as we had received no reports of activities undertaken under the provisions of section 21.46 in the last 10 years. However, we have recently received several reports under this depredation order, so we are now withdrawing the proposed rule. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Eric Kershner, 703-358-2376.	9/4/18

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
‡1018–BB78 Endangered and Threatened Wildlife and Plants; Listing Determination for the Wolverine 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to list the wolverine as a threatened species. The wolverine is located in California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming. **Controversy:** This species has a history of litigation on past ESA decisions. Former plaintiffs, past petitioners, Tribes, stakeholders (particularly State wildlife agencies in Idaho, Montana, Washington, and Wyoming), and the public will be highly interested in the outcome of our decision. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review (9/10/18) NEW STAGE
‡1018–BB98 Endangered and Threatened Wildlife and Plants; Nonessential Experimental Population of Red Wolves in North Carolina 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will publish a proposed rule to revise the existing Nonessential Experimental Population designation of red wolves (*Canis rufus*) in North Carolina under section 10(j) of the Endangered Species Act. **Controversy:** Potentially high due to current litigation regarding our current rule for the 10(j) population, and concerns of the state, private landowners, and environmental groups. **Dates of any briefs provided to EOP:** None. **Contact:** Lisa Ellis, 703-358-2307.	7/5/18
‡1018–BB99 Subsistence Management Regulations for Public Lands in Alaska; Subsistence Taking of Fish; Cook Inlet Area 50 CFR 100; 36 CFR 242	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to revise the regulations for seasons, harvest limits, methods and means for the subsistence taking of fish in the Cook Inlet of Alaska. This action would also reorganize specific regulations addressing the Kenai River, which would provide clarity for the public and allow the Federal Subsistence Board to correct regulatory conflicts that have arisen based on recent rulemaking. (This is a joint rulemaking between DOI/FWS and USDA/Forest Service.) **Controversy:** Senator Murkowski and Representative Young have expressed interest in this issue in the past; however, they have not recently contacted FWS about this issue. **Dates of any briefs provided to EOP:** None. **Contact:** Theo Matuskowitz, 907-786-3867.	7/6/18

Abbreviations/symbols: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document; ‡ - Appeared on a 90-day list prior to Q318, and OMB concurred re E.O. 12866 significance determination.

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
‡1018–BC03 Endangered and Threatened Wildlife and Plants; Delisting the Water Howellia 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to delist the water howellia due to recovery. The water howellia is found in California, Idaho, Montana, and Washington. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact**: Don Morgan, 703-358-2444. *Note: This is a 13771 deregulatory action.*	Not subject to OMB review (8/2/18)
1018–BC07 Refuge-Specific Hunting and Sport Fishing Regulations, 2018–2019 50 CFR 32	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to finalize a proposal to make additions to refuge-specific regulations and expand hunting and fishing opportunities for the 2018–19 hunting and sport fishing season. This action is part of an annual update for the National Wildlife Refuge System that ensures adequate public notice of openings and changes. We operate hunting and fishing programs on refuges to implement the National Wildlife Refuge System Improvement Act of 1997 directives to facilitate compatible priority wildlife-dependent recreational opportunities. **Controversy:** Some controversy is expected with regard to allowing hunting on refuges. **Dates of any briefs provided to EOP:** None. **Contact:** Katherine Harrigan, 703-358-2440.	8/15/18 NEW STAGE
‡1018–BC11 Endangered and Threatened Wildlife and Plants; Delisting the Interior Least Tern 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to delist the interior least tern due to recovery. The interior least tern is found in Arkansas, Colorado, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Mississippi, Missouri, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Tennessee, Texas, and Wyoming. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact**: Don Morgan, 703-358-2444. *Note: This is a 13771 deregulatory action.*	Not subject to OMB review (9/4/18)

Abbreviations/symbols: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document; ‡ - Appeared on a 90-day list prior to Q318, and OMB concurred re E.O. 12866 significance determination.

‡1018–BC12 Depredation Orders for Double-Crested Cormorants; Removal of Regulations 50 CFR 21	FR	Not significant. Not major. Court driven. **What the rule does:** On May 25, 2016, the District Court for the District of Columbia ordered that both the Aquaculture Depredation Order and the Public Resources Depredation Order for double-crested cormorants be vacated until FWS performs a new and legally adequate environmental assessment or environmental impact statement for national cormorant management orders in compliance with the requirements of the National Environmental Policy Act. The court concluded that FWS did not take careful enough consideration of the effects of the depredation orders on cormorant populations and other affected resources (fisheries, vulnerable species, and habitats) and failed to consider a range of reasonable alternatives in the remanded 2014 environmental assessment. Therefore, this rule removes the regulations setting forth the provisions of the orders at 50 CFR 21.47 and 21.48. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Eric Kershner, 703-358-2376.	9/4/18
‡1018–BC14 Endangered and Threatened Wildlife and Plants; Listing Determination and Critical Habitat Designation for the Panama City Crayfish 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will revise our proposed rule to list the Panama City crayfish as a threatened species to include a proposed critical habitat designation for the species. The Panama City crayfish is found in Florida. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	8/24/18

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018–BC16 Endangered and Threatened Wildlife and Plants; Listing Determination for the Trispot Darter 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to list the trispot darter as a threatened species. The trispot darter is a fish found in Alabama, Georgia, and Tennessee. We will also, if found prudent and determinable, designate critical habitat for this species under a separate rulemaking action (1018–BD40). **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review (9/13/18) NEW STAGE
‡1018–BC34 Endangered and Threatened Wildlife and Plants; Listing Determination and Critical Habitat Designation for the Wright's Marsh Thistle 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to list the Wright's marsh thistle as a threatened species. The Wright's marsh thistle is a plant found in New Mexico. We will also, if found prudent and determinable, designate critical habitat for this species. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/24/18
‡1018–BC44 Endangered and Threatened Wildlife and Plants; Listing Determination for the Candy Darter 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to list the candy darter as a threatened species. The candy darter is a fish found in Virginia and West Virginia. We will also, if found prudent and determinable, designate critical habitat for this species under a separate rulemaking action (1018–BD15). **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review (9/13/18)

Abbreviations/symbols: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document; ‡ - Appeared on a 90-day list prior to Q318, and OMB concurred re E.O. 12866 significance determination.

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
‡1018–BC52 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for the Barren's Topminnow 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will revise our proposed rule to list the Barren's topminnow as an endangered species to include a proposed critical habitat designation for the species. The Barren's topminnow is a fish found in Tennessee. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	8/24/18
‡1018–BC65 Establishing a Nonessential Experimental Population of the California Condor in the Pacific Northwest 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does**: FWS proposes to designate an area in the Pacific Northwest as a nonessential experimental population area for reintroduction of California condors. **Controversy:** None anticipated. **Dates of any briefs provided to EOP**: None. **Contact**: Lisa Ellis, 703-358-2307.	9/28/18
‡1018–BC67 List of Migratory Bird Species Protected by the Migratory Bird Treaty Act 50 CFR 10	PR	Not significant. Not major. Not court driven. **What the rule does**: This rulemaking is administrative in nature, to inform the public of the species protected by the Migratory Bird Treaty Act (MBTA). This proposed rule would update the list based on scientific changes to bird taxonomy (i.e., common names, scientific names, families, etc.). The list is formulated by the scientific community, specifically the American Ornithologists' Society's Check-list of North American Birds, for species that occur in North America. The list enables the public to know which species are protected and which are not, thereby preventing confusion and potential conservation and enforcement issues. **Controversy**: None anticipated. **Dates of any briefs provided to EOP**: None. **Contact**: Eric Kershner, 703-358-2376.	7/20/18

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
‡1018–BC71 Implementing the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES); Updates following the 16th and 17th Meetings of the Conference of the Parties (CoP16 and CoP17) 50 CFR 23	PR	Not significant. Not major. Not court driven. **What the rule does:** This proposed rule will revise regulations implementing CITES by incorporating provisions related to the results of CoP16 and CoP17. The revised regulations will help us more effectively promote species conservation, fulfill our responsibilities under CITES, and help those affected by CITES to understand how to conduct lawful international trade in wildlife and wildlife products. **Controversy:** None anticipated. These changes bring U.S. regulations in line with revisions adopted at the most recent COP. **Dates of any briefs provided to EOP:** None. **Contact:** Craig Hoover, 703-358-2162.	9/27/18
1018–BC72 Managing Resident Canada Goose Populations 50 CFR 21	FR	Not significant. Not major. Not court driven. **What the rule does**: FWS will finalize a proposal to amend the regulations governing control of resident Canada geese by removing the date restrictions on authorized destruction of resident Canada goose nests and eggs. **Controversy**: None anticipated. **Dates of any briefs provided to EOP**: None. **Contact**: Paul Padding, 301-497-5851. *Note: This is a 13771 deregulatory action.*	9/4/18 NEW STAGE

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018–BC75 Migratory Bird Management; Extending the Term of Certain Migratory Bird Permits 50 CFR 21	PR	Not Significant. Deregulatory. Not court driven. **What the rule does:** This proposed rule would extend the timeframe that certain types of permits for activities with migratory birds are valid. By extending that time, this rule would reduce the need for a permittee to apply to the Service for renewal, along with eliminating the fees associated with renewals for the specified types of permits. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Eric Kershner, 703-358-2376.	9/4/18 NEW ACTION
1018–BC76 Migratory Bird Management; Revision of General Exceptions to Permit Requirements 50 CFR 21	PR	Not Significant. Deregulatory. Not court driven. **What the rule does:** This proposed rule would allow certain identified entities to conduct certain activities that currently are authorized only through a migratory bird permit to conduct those activities without a permit. This would reduce the information collection and cost burden on these entities. Currently the Service's general exceptions to permit requirement regulations exempt State game departments, municipal game farms or parks, public museums, public zoological parks, accredited institutional members of the American Association of Zoological Parks and Aquariums, and public scientific or educational institutions from these permit requirements. The Service has received requests from other entities requesting that they, too, be considered for exemption. Currently the Service does not have a process to consider such a request. This rule would set standards and processes the Service would follow to determine if a requesting entity could be considered for and approved as exempt from the permit requirements. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Eric Kershner, 703-358-2376.	9/4/18 NEW ACTION

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018–BC78 Endangered and Threatened Wildlife and Plants; Downlisting the Golden Conure 50 CFR 17	PR	Not significant. Not major. Court driven: Proposal, 9/1/18, settlement agreement. **What the rule does:** FWS propose to reclassify the golden conure from endangered to threatened. This action will include a proposed 4(d) rule and a proposed technical correction to revise its scientific name. The golden conure is a parrot-like bird found in the south Amazon Basin in Brazil. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact**: Don Morgan, 703-358-2444. *Note: This is a 13771 deregulatory action.*	Not subject to OMB review (8/31/18) NEW ACTION
1018–BC80 Endangered and Threatened Wildlife and Plants; Delisting Running Buffalo Clover 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does**: FWS will propose to delist the running buffalo clover due to recovery. The running buffalo clover is located in Indiana, Kentucky, Missouri, Ohio, Pennsylvania, and West Virginia. **Controversy**: None anticipated. **Dates of any briefs provided to EOP**: None. **Contact:** Don Morgan, 703-358-2444. *Note: This is a 13771 deregulatory action.*	Not subject to OMB review (7/16/18) NEW ACTION
1018–BC82 Endangered and Threatened Wildlife and Plants; Listing Determination for Sri Lankan Tarantulas 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does**: FWS will make a final determination on a proposal to list five species of Sri Lankan tarantulas as endangered under the Endangered Species Act. These tarantulas are found in Sri Lanka. **Controversy**: None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review (7/6/18) NEW ACTION

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018–BC96 Subsistence Management Regulations for Public Lands in Alaska, Applicability and Scope; Tongass National Forest Submerged Lands 50 CFR 100; 36 CFR 242	PR	Not significant. Not major. Court driven. No deadline was assigned; however, we need to show the plaintiffs and the court that we are making progress. **What the rule does:** The U.S. District Court for Alaska in an October 17, 2011, order "enjoined" the United States "to promptly initiate regulatory proceedings for the purpose of implementing the subsistence provisions in title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) with respect to submerged public lands within Tongass National Forest" and directed entry of judgment. To comply with the order, the Federal Subsistence Board will initiate a regulatory proceeding to identify those submerged lands within the Tongass that did not pass to the State of Alaska at statehood and therefore are subject to the subsistence provisions of ANILCA. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Theo Matuskowitz, 907-786-3867.	8/27/18 NEW ACTION
1018–BC99 Endangered and Threatened Wildlife and Plants; Delisting the NCDE Grizzly Bear Population 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will consider delisting the Northern Continental Divide Ecosystem (NCDE) population of grizzly bears, found in Montana. **Controversy:** The proposal to delist the NCDE grizzly bear population will be high profile with many NGOs opposed to delisting portions of the listed entity in the lower 48. **Dates of any briefs provided to EOP:** None. **Contact**: Don Morgan, 703-358-2444. *Note: This is a 13771 deregulatory action.*	Not subject to OMB review (9/24/18) NEW ACTION
1018–BD00 Endangered and Threatened Wildlife and Plants; Downlisting the Beach Layia 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the beach layia from endangered to threatened. The beach layia occurs in California. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact**: Don Morgan, 703-358-2444.	Not subject to OMB review (9/24/18) NEW ACTION

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018–BD02 Endangered and Threatened Wildlife and Plants; Delisting the Nashville Crayfish 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to delist the Nashville crayfish, due to recovery. The Nashville crayfish is found in Tennessee. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact**: Don Morgan, 703-358-2444. *Note: This is a 13771 deregulatory action.* *Note: We had this as downlisting on Unified Agenda, but it has changed.*	Not subject to OMB review (9/12/18) NEW ACTION
1018–BD03 Endangered and Threatened Wildlife and Plants; Listing Determination for the Peary Caribou and Dolphin and Union Caribou 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does**: FWS will propose to list the Peary caribou and the Dolphin and Union caribou as threatened with a 4(d) rule that will exempt imports and interstate trade. These two caribou species are found in Canada. **Controversy**: None anticipated. **Dates of any briefs provided to EOP**: None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review (8/3/18) NEW ACTION
1018–BD08 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for the Yellow Lance 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to designate critical habitat for the yellow lance. The yellow lance is a mussel listed as a threatened species located in Maryland, North Carolina, South Carolina, and Virginia. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	8/24/18 NEW ACTION

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018–BD10 Migratory Bird Hunting; Proposed Frameworks for Migratory Game Bird Hunting Regulations for the 2019–2020 Hunting Season 50 CFR 20	PR	**Significant. Major.** Not court driven. **What the rule does:** This rule proposes the 2019–20 season hunting regulations for certain migratory game birds. We annually prescribe frameworks, or outer limits, for dates and times when hunting may occur, and the number of birds that may be taken and possessed in hunting seasons. These frameworks are necessary to allow State selections of seasons and limits and to allow recreational harvest at levels compatible with population and habitat conditions. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. *Note: This action is not subject to E.O. 13771, because it establishes annual harvest limits related to routine hunting or fishing.*	8/15/18 NEW ACTION
1018–BD12 Endangered and Threatened Wildlife and Plants; Listing Determination and Critical Habitat Designation for the Atlantic Pigtoe 50 CFR 17	PR	Not significant. Not major. Court driven: Proposal, 9/30/18, settlement agreement. **What the rule does:** FWS will propose to list the Atlantic pigtoe as a threatened species. The Atlantic pigtoe is a mussel found in Georgia, North Carolina, and Virginia. We will also, if found prudent and determinable, designate critical habitat for this species. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	8/17/18 NEW ACTION
1018–BD13 Endangered and Threatened Wildlife and Plants; Listing Determination for the Black-Capped Petrel 50 CFR 17	PR	Not significant. Not major. Court driven: Proposal, 9/30/18, settlement agreement. **What the rule does:** FWS will propose to list the black-capped petrel as a threatened species. The black-capped petrel is a bird found in Florida, Georgia, North Carolina, Puerto Rico, South Carolina, Virginia, and the Virgin Islands. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review (9/17/18) NEW ACTION

1018–BD45 Endangered and Threatened Wildlife and Plants; Downlisting the Morro and Chorro Shoulderhand Snails 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Morro and Chorro shoulderband snails from endangered to threatened. The Morro and Chorro shoulderband snails occur in California. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact**: Don Morgan, 703-358-2444.	Not subject to OMB review (9/28/18) NEW ACTION
‡1018–BD52 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for the Black Pine Snake 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will reopen the comment period on our proposal to designate critical habitat for the black pine snake found in Alabama and Mississippi. **Controversy:** None anticipated. **Dates of any briefs provided to EOP**: None. **Contact:** Sarah Quamme, 703-358-1796.	7/11/18 NEW ACTION
1018–BD53 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for the Sonoyta Mud Turtle 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to designate critical habitat for the Sonoyta mud turtle found in Arizona and Mexico. **Controversy:** This species occurs near the U.S.-Mexico border; however, no conflicts with border activities or potential border wall construction have been identified at this time. **Dates of any briefs provided to EOP**: None. **Contact:** Sarah Quamme, 703-358-1796.	7/25/18 NEW ACTION
1018–BD54 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for the Spring Pygmy Sunfish 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will reopen the comment period on our proposal to designate critical habitat for the spring pygmy sunfish, a fish found in Alabama. **Controversy:** None anticipated. **Dates of any briefs provided to EOP**: None. **Contact:** Sarah Quamme, 703-358-1796.	7/11/18 NEW ACTION

Abbreviations/symbols: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document; ‡ - Appeared on a 90-day list prior to Q318, and OMB concurred re E.O. 12866 significance determination.

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018–BD55 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for the Texas Hornshell 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to designate critical habitat for the Texas hornshell found in New Mexico, Texas, and Mexico. **Controversy:** None anticipated. **Dates of any briefs provided to EOP**: None. **Contact:** Sarah Quamme, 703-358-1796.	8/10/18 NEW ACTION
1018–BD56 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Two Stoneflies 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to designate critical habitat for the meltwater lednian stonefly and western glacier stonefly. The meltwater lednian stonefly is located in Montana, and the western glacier stonefly is located in Montana and Wyoming. We are also working on a final determination on a proposal to list the meltwater lednian stonefly and western glacier stonefly as threatened species under a separate rulemaking action (1018–BB52). **Controversy:** The State of Wyoming is opposed to listing the western glacier stonefly in Wyoming. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	8/10/18 NEW ACTION
1018–BD57 Importation or Exportation of Fish or Wildlife; Shellfish and Fishery Products 50 CFR 14	PR	Not significant. Not major. Not court driven. **What the rule does:** We are issuing this proposed rule to add a definition of shellfish and fishery products to our regulations in 50 CFR part 14, which govern the importation, exportation, and transportation of wildlife. Current regulations at 50 CFR 14.92 provide exemptions to the import/export license requirements for certain shellfish and fishery products; this proposed rule would include additional types of shellfish to those currently included in the exemption. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	9/28/18 NEW ACTION

***DRAFT* U.S. Fish and Wildlife Service Regulations Ready for Review**

‡1018–AW83 Revising Regulations Implementing the Wild Bird Conservation Act of 1992 50 CFR 15	PR	Not significant**.** Not major. Not court driven. **What the rule does:** This proposed rule will revise our regulations implementing the Wild Bird Conservation Act of 1992, which have not been substantively updated since 1993. We plan to revise these regulations in light of our experiences in implementing the legislation and regulations, and also to streamline and clarify certain aspects of the current regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Pamela Hall Scruggs, 703-358-2493.	9/28/18 Not on Q3 but was on Q2
1018–AY03 Endangered and Threatened Wildlife and Plants; Downlisting the Tidewater Goby 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the tidewater goby from endangered to threatened. The tidewater goby occurs in California and Oregon. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact**: Don Morgan, 703-358-2444.	Not subject to OMB review (9/28/18) Not on report during this admin, so NEW ACTION
~~‡1018–AZ38~~ ~~Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Three Hawaiian Big Island Plant Species~~ ~~50 CFR 17~~	~~FR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS will designate critical habitat for three plant species on Hawaii Island and correct the maps for existing designations for an additional four species. FWS intends to exclude lands owned or managed by the Queen Liliuokalani Trust, the Department of Hawaiian Homelands, and other private landowners under section 4(b)(2) of the Endangered Species Act.~~ ~~**Controversy:** Resolved. FWS coordinated with the Queen Liliuokalani Trust, landowners, and government jurisdictions, and will exclude lands owned by these entities under section 4(b)(2) of the ESA.~~ ~~**Dates of any briefs provided to EOP**: OMB requested information pertaining to the amount of (1) unoccupied habitat, (2) estimated economic impacts, and (3) interagency consultation.~~ ~~**Contact:** Sarah Quamme, 703-358-1796.~~	~~5/31/18 Q3~~ Remove; expected to publish by June 2018

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
‡1018–AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant**.** Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Pamela Hall Scruggs, 703-358-2493. OMB question in response to Q2 list: In Q1, this was expected to be ready for review in October of 2017. What is the cause of delays here? FWS response: Workload priorities.	~~6/30/18 on Q3~~ 9/28/18
‡1018–AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	**Significant.** Not major. Not court driven. **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	9/28/18 Not on Q3, but on Q2

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018–BA33 Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts 50 CFR 80	FR	Not significant. Not major. Not court driven. **What the rule does:** This rule is part of a process for directing State fish and wildlife agencies on how they must receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, FWS distributes annual apportionments to States from trust funds derived from excise tax and fuel tax revenues. We address definitions, requirements for licenses counted for apportionment of Federal financial assistance, program income, and other related issues. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR. **Controversy:** None anticipated. State fish and wildlife agencies, as well as other partners, support this final rule and have been closely involved in its development. **Dates of any briefs provided to EOP:** None. **Contact:** Lisa Van Alstyne, 703-358-1705.	~~6/10/18 Q3~~ 9/4/18 NEW STAGE
1018–BA43 Endangered and Threatened Wildlife and Plants; Delisting the Borax Lake Chub 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to remove the Borax lake chub from the Federal List of Endangered and Threatened Wildlife due to recovery. The Borax lake chub is found in Oregon. **Controversy:** None anticipated **Dates of any briefs provided to EOP:** None. **Contact**: Don Morgan, 703-358-2444. *Note: This is a 13771 deregulatory action.*	Not subject to OMB review (8/1/18) Not on Q3, but on Q2 and prior

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018–BA88 Migratory Bird Subsistence Harvest in Alaska; Exempting Subsistence Hunters From Duck Stamp Purchase 50 CFR 20, 32, 92	PR	Not significant. Not court driven. **What the rule does:** We propose to amend the regulations governing subsistence hunting of migratory birds in Alaska by adding an exemption for rural subsistence migratory bird hunters in Alaska to purchase a Duck Stamp. Doing so will comport with the intent of Congress as written in the Federal Duck Stamp Act of 2014. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. *Note: This is a 13771 deregulatory action.*	9/4/18 NEW ACTION First appearance
‡1018–BB27 Endangered and Threatened Wildlife and Plants; Listing Determination and Critical Habitat Designation for the Lesser Prairie-Chicken 50 CFR 17	PR	**Significant.** Not major. Not court driven. **What the rule does:** FWS will make a listing determination for the lesser prairie-chicken. The lesser prairie-chicken is a bird found in Colorado, Kansas, New Mexico, Oklahoma, and Texas. We will also, if found prudent and determinable, designate critical habitat for this species. **Controversy:** This species has a history of ESA litigation and is the subject of intensive interest from the past plaintiffs, petitioners, stakeholders, and local and state government officials, particularly the State wildlife agencies in the five range states. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/17/18 Not on Q3, but was on Q2

Major.** Not court driven.~~ ~~**What the rule does:** FWS prescribes special migratory bird hunting regulations for certain tribes on Federal Indian reservations, off reservation trust lands, and ceded lands for the 2018–19 migratory bird hunting season.~~ ~~**Controversy:** None anticipated.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Ron Kokel, 703–358–1967.~~ ~~*Note: This action is not subject to E.O. 13771, because it establishes annual harvest limits related to routine hunting or fishing.*~~	~~5/15/18 on Q3~~ ~~NEW STAGE~~ Should be out before Q4; remove

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018–BB73 Migratory Bird Hunting; Seasons and Bag and Possession Limits for Certain Migratory Game Birds for the 2018–2019 Season 50 CFR 20	FR	**Significant. Major.** Not court driven. **What the rule does:** This rule prescribes the hunting seasons, hours, areas, and daily bag and possession limits for migratory game bird seasons. Taking of migratory birds is prohibited unless specifically provided for by annual regulations. This rule permits the taking of designated species during the 2018–19 season. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel (703) 358-1967. *Note: This action is not subject to E.O. 13771, because it establishes annual harvest limits related to routine hunting or fishing.*	~~6/30/18 Q3~~ 7/31/18 Q4 NEW STAGE
‡1018–BB77 Migratory Bird Permits; Removing a Depredation Order for Scrub Jays and Steller's Jays in Washington and Oregon 50 CFR 21	PR/ final actio n	Not significant. Not major. Not court driven. **What the rule does:** FWS is withdrawing a proposed rule to remove 50 CFR 21.46, a regulation that sets forth a depredation order for scrub jays and Steller's jays in Oregon and Washington. FWS had proposed to remove this regulation, as we had received no reports of activities undertaken under the provisions of section 21.46 in the last 10 years. However, we have recently received several reports under this depredation order, so we are now withdrawing the proposed rule. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Eric Kershner, 703-358-2376.	9/4/18 Not on Q3, but on earlier lists

‡1018–BC11 Endangered and Threatened Wildlife and Plants; Delisting the Interior Least Tern 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to delist the interior least tern due to recovery. The interior least tern is found in Arkansas, Colorado, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Mississippi, Missouri, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Tennessee, Texas, and Wyoming. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact**: Don Morgan, 703-358-2444. *Note: This is a 13771 deregulatory action.*	Not subject to OMB review (9/4/18) Not on Q3, but on Q2
‡1018–BC12 Depredation Orders for Double-Crested Cormorants; Removal of Regulations 50 CFR 21	FR	Not significant. Not major. Court driven. **What the rule does:** On May 25, 2016, the District Court for the District of Columbia ordered that both the Aquaculture Depredation Order and the Public Resources Depredation Order for double-crested cormorants be vacated until FWS performs a new and legally adequate environmental assessment or environmental impact statement for national cormorant management orders in compliance with the requirements of the National Environmental Policy Act. The court concluded that FWS did not take careful enough consideration of the effects of the depredation orders on cormorant populations and other affected resources (fisheries, vulnerable species, and habitats) and failed to consider a range of reasonable alternatives in the remanded 2014 environmental assessment. Therefore, this rule removes the regulations setting forth the provisions of the orders at 50 CFR 21.47 and 21.48. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Eric Kershner, 703-358-2376.	9/4/18 Not on Q3, but on earlier

‡1018–BC14 Endangered and Threatened Wildlife and Plants; Listing Determination and Critical Habitat Designation for the Panama City Crayfish 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will revise our proposed rule to list the Panama City crayfish as a threatened species to include a proposed critical habitat designation for the species. The Panama City crayfish is found in Florida. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	8/24/18 Not on Q3, but on earlier
1018–BC16 Endangered and Threatened Wildlife and Plants; Listing Determination for the Trispot Darter 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to list the trispot darter as a threatened species. The trispot darter is a fish found in Alabama, Georgia, and Tennessee. We will also, if found prudent and determinable, designate critical habitat for this species under a separate rulemaking action (1018–BD40). **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review (9/13/18) Not on Q3, but on earlier as PR NEW STAGE
‡1018–BC34 Endangered and Threatened Wildlife and Plants; Listing Determination and Critical Habitat Designation for the Wright's Marsh Thistle 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to list the Wright's marsh thistle as a threatened species. The Wright's marsh thistle is a plant found in New Mexico. We will also, if found prudent and determinable, designate critical habitat for this species. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/24/18 Not on Q3, but on Q1

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
‡1018–BC44 Endangered and Threatened Wildlife and Plants; Listing Determination for the Candy Darter 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to list the candy darter as a threatened species. The candy darter is a fish found in Virginia and West Virginia. We will also, if found prudent and determinable, designate critical habitat for this species under a separate rulemaking action (1018–BD15). **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review (9/13/18) Not on Q3, but on earlier (Q417)
‡1018–BC52 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for the Barren's Topminnow 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will revise our proposed rule to list the Barren's topminnow as an endangered species to include a proposed critical habitat designation for the species. The Barren's topminnow is a fish found in Tennessee. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	8/24/18 Not on Q3, but on earlier
‡1018–BC65 Establishing a Nonessential Experimental Population of the California Condor in the Pacific Northwest 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does**: FWS proposes to designate an area in the Pacific Northwest as a nonessential experimental population area for reintroduction of California condors. **Controversy:** None anticipated. **Dates of any briefs provided to EOP**: None. **Contact**: Lisa Ellis, 703-358-2307.	9/28/18 Not on Q3, but on earlier

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
‡1018–BC67 List of Migratory Bird Species Protected by the Migratory Bird Treaty Act 50 CFR 10	PR	Not significant. Not major. Not court driven. **What the rule does**: This rulemaking is administrative in nature, to inform the public of the species protected by the Migratory Bird Treaty Act (MBTA). This proposed rule would update the list based on scientific changes to bird taxonomy (i.e., common names, scientific names, families, etc.). The list is formulated by the scientific community, specifically the American Ornithologists' Society's Check-list of North American Birds, for species that occur in North America. The list enables the public to know which species are protected and which are not, thereby preventing confusion and potential conservation and enforcement issues. **Controversy**: None anticipated. **Dates of any briefs provided to EOP**: None. **Contact**: Eric Kershner, 703-358-2376.	~~6/30/18 Q3~~ 7/20/18
‡1018–BC71 Implementing the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES); Updates following the 16th and 17th Meetings of the Conference of the Parties (CoP16 and CoP17) 50 CFR 23	PR	Not significant. Not major. Not court driven. **What the rule does:** This proposed rule will revise regulations implementing CITES by incorporating provisions related to the results of CoP16 and CoP17. The revised regulations will help us more effectively promote species conservation, fulfill our responsibilities under CITES, and help those affected by CITES to understand how to conduct lawful international trade in wildlife and wildlife products. **Controversy:** None anticipated. These changes bring U.S. regulations in line with revisions adopted at the most recent COP. **Dates of any briefs provided to EOP:** None. **Contact:** Craig Hoover, 703-358-2162.	~~6/30/18~~ 9/27/18

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018–BC72 Managing Resident Canada Goose Populations 50 CFR 21	FR	Not significant. Not major. Not court driven. **What the rule does**: FWS will finalize a proposal to amend the regulations governing control of resident Canada geese by removing the date restrictions on authorized destruction of resident Canada goose nests and eggs. **Controversy**: None anticipated. **Dates of any briefs provided to EOP**: None. **Contact**: Paul Padding, 301-497-5851. *Note: This is a 13771 deregulatory action.*	9/4/18 NEW STAGE
~~1018–BC74~~ ~~Refuge-Specific Regulations; Public Use; Kenai National Wildlife Refuge~~ ~~50 CFR 36~~	~~ANPR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** We will initiate a rulemaking process that will consider changes to Kenai NWR public use regulations that were promulgated on May 5, 2016 (81 FR 27030).~~ ~~**Dates of any briefs provided to EOP:** None~~ ~~**Contact:** Ryan Mollnow, 907-786-3326~~	~~6/1/18 on Q3~~ ~~Not on list before Q3~~ Pushed to February 2019; remove
1018–BC75 Migratory Bird Management; Extending the Term of Certain Migratory Bird Permits 50 CFR 21	PR	Not Significant. Deregulatory. Not court driven. **What the rule does:** This proposed rule would extend the timeframe that certain types of permits for activities with migratory birds are valid. By extending that time, this rule would reduce the need for a permittee to apply to the Service for renewal, along with eliminating the fees associated with renewals for the specified types of permits. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Eric Kershner, 703-358-2376.	9/4/18 Q4 Not on Q3 or before NEW ACTION

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018–BC76 Migratory Bird Management; Revision of General Exceptions to Permit Requirements 50 CFR 21	PR	Not Significant. Deregulatory. Not court driven. **What the rule does:** This proposed rule would allow certain identified entities to conduct certain activities that currently are authorized only through a migratory bird permit to conduct those activities without a permit. This would reduce the information collection and cost burden on these entities. Currently the Service's general exceptions to permit requirement regulations exempt State game departments, municipal game farms or parks, public museums, public zoological parks, accredited institutional members of the American Association of Zoological Parks and Aquariums, and public scientific or educational institutions from these permit requirements. The Service has received requests from other entities requesting that they, too, be considered for exemption. Currently the Service does not have a process to consider such a request. This rule would set standards and processes the Service would follow to determine if a requesting entity could be considered for and approved as exempt from the permit requirements. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Eric Kershner, 703-358-2376.	9/4/18 Q4 Not on Q3 or before NEW ACTION
1018–BC78 Endangered and Threatened Wildlife and Plants; Downlisting the Golden Conure 50 CFR 17	PR	Not significant. Not major. Court driven: Proposal, 9/1/18, settlement agreement. **What the rule does:** FWS propose to reclassify the golden conure from endangered to threatened. This action will include a proposed 4(d) rule and a proposed technical correction to revise its scientific name. The golden conure is a parrot-like bird found in the south Amazon Basin in Brazil. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact**: Don Morgan, 703-358-2444. *Note: This is a 13771 deregulatory action.*	Not subject to OMB review (8/31/18 Q4) Not on Q3 or before NEW ACTION

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
~~‡1018–BC79 Endangered and Threatened Wildlife and Plants; Listing Determination for the Hyacinth Macaw 50 CFR 17~~	~~FR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does**: FWS will make a final determination on a proposal to list the hyacinth macaw as a threatened species under the Endangered Species Act. FWS will also make a final determination on a 4(d) rule that would exempt interstate trade. This bird species is found in Bolivia, Brazil, and Paraguay.~~ ~~**Controversy**: None anticipated.~~ ~~**Dates of any briefs provided to EOP**: None.~~ ~~**Contact**: Don Morgan, 703-358-2444.~~	Not subject to OMB review ~~(5/31/18 Q3)~~ Package is currently w/ SOL and is about to go to AES; may publish before Q4
1018–BC80 Endangered and Threatened Wildlife and Plants; Delisting Running Buffalo Clover 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does**: FWS will propose to delist the running buffalo clover due to recovery. The running buffalo clover is located in Indiana, Kentucky, Missouri, Ohio, Pennsylvania, and West Virginia. **Controversy**: None anticipated. **Dates of any briefs provided to EOP**: None. **Contact:** Don Morgan, 703-358-2444. *Note: This is a 13771 deregulatory action.*	Not subject to OMB review ~~(6/29/18)~~ 7/16/18 NEW ACTION
1018–BC82 Endangered and Threatened Wildlife and Plants; Listing Determination for Sri Lankan Tarantulas 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does**: FWS will make a final determination on a proposal to list five species of Sri Lankan tarantulas as endangered under the Endangered Species Act. These tarantulas are found in Sri Lanka. **Controversy**: None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review ~~(5/31/18 Q3)~~ (7/6/18 on Q4) NEW ACTION

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
~~‡1018-BC84~~ ~~Endangered and Threatened Wildlife and Plants; Listing Status of the Southern Selkirk Mountains Population of Woodland Caribou~~ ~~50 CFR 17~~	~~FR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does**: FWS is reaffirming endangered status for the southern mountain caribou distinct population segment (DPS) of woodland caribou *(Rangifer tarandus caribou)*. This determination amends the current listing of the southern Selkirk Mountains population of woodland caribou by defining the southern mountain caribou DPS, which includes the southern Selkirk Mountains population. We reaffirm the existing critical habitat for the DPS as previously defined; the amount is approximately 30,010 acres.~~ ~~**Controversy**: Some controversy is expected with regard to the amended listing, and we expect there will be local media interest.~~ ~~**Dates of any briefs provided to EOP**: None.~~ ~~**Contact**: Don Morgan, 703-358-2444.~~	Not subject to OMB review ~~(5/31/18 Q3)~~ With OES; will likely publish before Q4
~~1018-BC87~~ ~~Conservation of Endangered and Threatened Species; Revision of Regulations to Address Interagency Cooperation~~ ~~50 CFR 402~~	~~PR~~	~~**Significant.** Not major. Not court driven.~~ ~~**What the rule does:** Pursuant to the Endangered Species Act of 1973, FWS will propose to revise our interagency cooperation regulations to clarify and improve section 7 implementation.~~ ~~**Controversy:** Changes in ESA regulations are typically controversial.~~ ~~**Dates of any briefs provided to EOP**: None.~~ ~~**Contact:** Craig Aubrey, 703-358-2442.~~	~~5/1/18 on Q3~~ At OMB; remove

1018–BC96 Subsistence Management Regulations for Public Lands in Alaska, Applicability and Scope; Tongass National Forest Submerged Lands 50 CFR 100; 36 CFR 242	PR	Not significant. Not major. Court driven. No deadline was assigned; however, we need to show the plaintiffs and the court that we are making progress. **What the rule does:** The U.S. District Court for Alaska in an October 17, 2011, order "enjoined" the United States "to promptly initiate regulatory proceedings for the purpose of implementing the subsistence provisions in title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) with respect to submerged public lands within Tongass National Forest" and directed entry of judgment. To comply with the order, the Federal Subsistence Board will initiate a regulatory proceeding to identify those submerged lands within the Tongass that did not pass to the State of Alaska at statehood and therefore are subject to the subsistence provisions of ANILCA. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Theo Matuskowitz, 907-786-3867.	~~5/15/18 Q3~~ 8/27/18 Q4 NEW ACTION
1018–BC99 Endangered and Threatened Wildlife and Plants; Delisting the NCDE Grizzly Bear Population 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will consider delisting the Northern Continental Divide Ecosystem (NCDE) population of grizzly bears, found in Montana. **Controversy:** The proposal to delist the NCDE grizzly bear population will be high profile with many NGOs opposed to delisting portions of the listed entity in the lower 48. **Dates of any briefs provided to EOP:** None. **Contact**: Don Morgan, 703-358-2444. *Note: This is a 13771 deregulatory action.*	Not subject to OMB review (9/24/18) NEW ACTION
1018–BD00 Endangered and Threatened Wildlife and Plants; Downlisting the Beach Layia 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the beach layia from endangered to threatened. The beach layia occurs in California. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact**: Don Morgan, 703-358-2444. 1018–BD10 Migratory Bird Hunting; Proposed Frameworks for Migratory Game Bird Hunting Regulations for the 2019–2020 Hunting Season 50 CFR 20	PR	**Significant. Major.** Not court driven. **What the rule does:** This rule proposes the 2019–20 season hunting regulations for certain migratory game birds. We annually prescribe frameworks, or outer limits, for dates and times when hunting may occur, and the number of birds that may be taken and possessed in hunting seasons. These frameworks are necessary to allow State selections of seasons and limits and to allow recreational harvest at levels compatible with population and habitat conditions. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. *Note: This action is not subject to E.O. 13771, because it establishes annual harvest limits related to routine hunting or fishing.*	~~5/15/18 Q3~~ 8/15/18 Q4 NEW ACTION
1018–BD12 Endangered and Threatened Wildlife and Plants; Listing Determination and Critical Habitat Designation for the Atlantic Pigtoe 50 CFR 17	PR	Not significant. Not major. Court driven: Proposal, 9/30/18, settlement agreement. **What the rule does:** FWS will propose to list the Atlantic pigtoe as a threatened species. The Atlantic pigtoe is a mussel found in Georgia, North Carolina, and Virginia. We will also, if found prudent and determinable, designate critical habitat for this species. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	8/17/18 NEW ACTION

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018–BD56 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Two Stoneflies 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to designate critical habitat for the meltwater lednian stonefly and western glacier stonefly. The meltwater lednian stonefly is located in Montana, and the western glacier stonefly is located in Montana and Wyoming. We are also working on a final determination on a proposal to list the meltwater lednian stonefly and western glacier stonefly as threatened species under a separate rulemaking action (1018–BB52). **Controversy:** The State of Wyoming is opposed to listing the western glacier stonefly in Wyoming. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	8/10/18 NEW ACTION
1018–BD57 Importation or Exportation of Fish or Wildlife; Shellfish and Fishery Products 50 CFR 14	PR	Not significant. Not major. Not court driven. **What the rule does:** We are issuing this proposed rule to add a definition of shellfish and fishery products to our regulations in 50 CFR part 14, which govern the importation, exportation, and transportation of wildlife. Current regulations at 50 CFR 14.92 provide exemptions to the import/export license requirements for certain shellfish and fishery products; this proposed rule would include additional types of shellfish to those currently included in the exemption. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	NEW ACTION 9/28/18

NOTE TO REVIEWERS

Overview

The U.S. Fish and Wildlife Service (Service) hereby submits the Draft Regulatory Report to the Office of Management and Budget for the Fourth Quarter of Fiscal Year 2018. This table contains rulemaking actions that should be ready for review by the Department of the Interior (DOI) and OMB during the period July through September 2018. The Service respectfully submits this list in accordance with Executive Order 12866, "Regulatory Planning and Review."

Disclaimer

Cornerstone Government Affairs has assembled the following report to assist our clients in providing results from the 2018 midterm election and understanding the implication of those results. We are aware that some information in this report may quickly become dated, and this may have an effect on the validity of some of our forecasts. We offer this report to our clients and friends as our best effort to assist you in evaluating the challenges and opportunities ahead. This report will be updated periodically.

November 7, 2018 (Version 1, 4:00 p.m. ET)

Overview

Voters delivered a split verdict in a highly contested and contentious election. This was the first midterm election since 1982 in which the President's party gained seats in one body of Congress while losing seats in the other. While we continue to digest exit polling data, it seems that the political polarization of America continues. Are today's candidates pushing the electorate further to the political edge, or are they simply reflecting that very electorate? Whatever your view, it seems likely that this polarization will make the collaboration and compromise required to solve our nation's challenges even more difficult to achieve in the 116th Congress.

Democrats regained a majority of the U.S. House of Representatives at the same time Republicans expanded theirs in the U.S. Senate. While the Republican Party's defeat in the House was "conventional wisdom," it was salvaged in part by a Senate map that had the GOP defending an abnormally low number of seats and the Democrats defending multiple states that backed Trump in 2016, including Indiana, Missouri and North Dakota. Also dictating the tenor of Senate races was the aftermath of Brett Kavanaugh's confirmation to the Supreme Court. That bitterly divisive process served as a motivating factor on both sides of the political spectrum. Exit polling may help us understand if it was a net plus for the Republicans or the Democrats. Regardless, it certainly had an impact.

What else had an impact? Women. 2018 may forever be known as the Year of the Woman. A surge of female candidates produced a record-breaking number of women elected to Congress. Overwhelmingly, they were Democrats and contributed significantly to shifting control in the House of Representatives. Women also made significant inroads in gubernatorial races, most notably in Kansas and Michigan. Finally, and maybe most importantly, women accounted for a majority of voters in this year's midterm election (approximately 52 percent) and a majority of those voted for Democrats.

In a historical sense, midterms are always a referendum on the sitting president. In 36 of the last 39 midterm elections, the party in the White House has lost an average of 25 House seats in Congress. Suburban voters moved away from President Trump as Democrats appeared to pick up at least 26 seats and possibly as many as 37, when all votes are counted. Democratic gains were not limited to Congress, as the party seized control of enough Governor's mansions and state legislatures to put the parties on almost equal footing heading into the 2020 cycle. The Senate, meanwhile, was a different story, as Republicans picked up at least three seats, and possibly as many as four.

While many Democrats running in red states sought to localize their election and avoid directly confronting the Administration, President Trump was the animating force of the 2018 campaigns and in fact declared himself to be on the ballot. He campaigned aggressively across the swing states with a message designed to motivate his core supporters. While the President's efforts

brought significant energy to Republican campaigns, particularly in Senate races, the results were somewhat of a mixed bag depending on the geographic region of the country.

But if the 2018 election was a referendum on Trump, it is unclear if his politics, his style (see Twitter), his policies or a combination thereof was the driving factor. In the days leading up to the election, he made clear that our military forces—which are mobilizing to the southern border—are the first line of defense against the migrant caravan heading through Mexico to the United States. While this mobilization galvanized the right, it also complicated some Republicans' efforts to tout a message of economic prosperity in more moderate suburban battlegrounds where many of the House elections were decided.

While Republicans campaigned mostly on immigration and the strong economy, Democrats emphasized health care, particularly on the need to protect coverage of preexisting conditions. Exit polling demonstrates that health care was very important to voters and that by substantial margins they trusted Democrats more than Republicans on the issue. It was an ironic sequel to 2010, when Tea Party attacks on the Affordable Care Ace (aka Obamacare) brought Republicans the majority in the House.

With passions running high in both parties, turnout was stronger in 2018 than in any midterm election since the 1960s. With votes still to be counted, an estimated 113 million people cast their ballots this year, compared to 83 million in 2014. Americans also took unprecedented advantage of growing opportunities to vote before Election Day. This was particularly evident among youth voters (age 18 to 29), nearly twice as many of whom voted early this year than four years ago.

How do nonprofits, companies and institutions make sense of all this? At Cornerstone, we take pride that our firm has achieved unparalleled success for our clients by bringing to bear subject matter expertise, a keen understanding of process and active political engagement with policy makers on both sides of the aisle. While the split verdict by voters means divided government, with gridlock likely, Cornerstone will continue to position our clients for success.

And for those political junkies who will experience something of an election hangover now that the attack ads, calls, and knocks at the door are over, fear not. The 2020 presidential election campaign begins in earnest today.

Geoff Gonella
President & Managing Director
Cornerstone Government Affairs

U.S. House of Representatives

Democrats won the big prize of the midterms, gaining control of the House of Representatives for the first time in eight years. The result will completely upend the relationship between Congress and the Administration, as Democrats will gain the power to control the House calendar, conduct investigations, subpoena executive branch officials and schedule hearings. Pressure from the party's left wing to begin impeachment proceedings against President Trump will mount immediately, while moderates will warn against overreaching.

Key Takeaways

- Democrats capture majority, will confront Trump at every turn
- Narrow margin may present challenges
- Pelosi is the likely Speaker, but no shoo-in
- Democratic caucus becomes more diverse, younger and more female

The midterms were in large part a referendum on Trump. For months, Democrats had been counting the days until Nov. 6 for the chance to express their anger over his policies. Now that they control the House, they will attempt to stymie Trump's agenda at every turn. But their narrow margin of victory will also present challenges for the new majority, starting with leadership elections later this month. With an eye toward the 2020 presidential campaign, the party's progressive and center-left factions in the House could spend the next two years battling for the upper hand in shaping the Democratic platform.

House Republicans, meanwhile, will have opportunities of their own, as Democrats who won election in Trump-friendly districts will be wary of moving too far to the left. The GOP may find that several of their colleagues on the other side aisle may be willing to defect on controversial votes.

The changing demographics of the House will also be an interesting dynamic to watch in the 116th Congress. Overall, House Democrats will become more diverse, younger and more female, while Republicans maintained their demographic profile, albeit with a smaller conference. Add these trends to an already highly partisan environment, and the outlook is clear: The next two years in the House will be a bumpy ride.

Democratic Leadership

Under most circumstances, the Minority Leader of a party that takes over the House would automatically get a promotion to Speaker in the next Congress. While this is still the most likely scenario, Nancy Pelosi (D-CA) was a polarizing figure in the midterm elections and could face significant internal challenges in her bid to regain the Speaker's gavel she lost in 2011. Several newly elected Democrats made campaign commitments to vote against her for Speaker, and she

	115th	116th
Republican	237	193
Democrat	193	219
Not yet called	7	23

Source: National Journal Research

faced four defections at the floor vote in January 2017. Prior to his unexpected primary loss to Rep.-elect Alexandria Ocasio-Cortez in June 2018, Democratic Caucus Chairman Joe Crowley (D-NY) was eyed as a possible replacement. Following Crowley's defeat, however, there is no clear successor.

Pelosi, meanwhile, maintains a strong following of her own, thanks in no small part to her prodigious fundraising efforts. Democrats may choose to give her one more term as Speaker, in what she has already acknowledged could be a "transitional" role, before handing the gavel to someone else.

Pelosi's fate could directly affect that of the other top Democratic leaders, Democratic Whip Steny Hoyer (D-MD) and Assistant Democratic Leader James Clyburn (D-SC), who could also be pushed aside if Democrats opt for generational change. A vocal wing of young Members in the House Democratic Caucus has been pushing for new blood in leadership over the past two Congresses. That group—led by Reps. Tim Ryan (D-OH), Reuben Gallego (D-AZ), Seth Moulton (D-MA), Filemon Vela (D-TX), and others—backed Ryan's unsuccessful challenge to Pelosi before the start of the 115th Congress.

If Pelosi is deposed, the likeliest alternative might be one of her trusted lieutenants, such as Caucus Vice Chairwoman Linda Sánchez (D-CA) or Reps. Anna Eshoo (D-CA), Ben Ray Luján (D-NM), Cheri Bustos (D-IL), or Hakeem Jeffries (D-NY). A consensus fallback candidate like Reps. John Lewis (D-GA) or Don Beyer (D-VA) could also emerge for one of the top leadership spots.

Voting blocs within the Congressional Progressive Caucus, Congressional Black Caucus (CBC), Congressional Hispanic Caucus, and New Democrats will all play key roles in choosing new leaders and Committee assignments, as they seek diversity within the House Democratic power base. CBC Chairman Cedric Richmond (D-LA) recently laid down a marker, saying he expects one of its Members to hold at least one of the two top jobs next year.

Democrats have scheduled their internal elections for Nov. 28 and 29, although the official vote for Speaker on the floor of the House will not take place until January.

Republican Leadership

Republicans have set their leadership elections and organizing conference for Nov. 14 and 15. Majority Leader Kevin McCarthy (R-CA), who has been highly successful in raising funds for his GOP colleagues, will seek to remain the leader of the new minority. He will be challenged by Rep. Jim Jordan (R-OH), who announced his candidacy this morning. Current Whip Steve Scalise (R-LA) and Chief Deputy Whip Patrick McHenry (R-NC) are likely to remain in leadership. Rep. Cathy McMorris Rodgers (R-WA) may seek to keep her position as Conference Chairman, although Rep. Liz Cheney (R-WY) could jump into the race as well. Watch for Rep. Jason Smith (R-MO) to keep his position as conference secretary, and Reps. Mark Walker (R-NC) and Susan Brooks (R-IN) to seek the Vice Chair of the Republican Conference.

Legislative/Political Agenda

Republican control of the Senate will make it difficult for House Democrats to advance much of their legislative agenda. But the new majority may find occasional areas of agreement with Trump, with infrastructure, judicial reform and drug prices as likely possibilities. The potential for some form of immigration deal on Deferred Action for Childhood Arrivals (DACA), visa reform and border security could surprise onlookers in 2019.

Expect Democrats to prioritize legislative goals that are crucial to its base in advance of the 2020 presidential election, including health care and gun control, while conducting vigorous oversight of the Trump Administration. One of their first items of business will be to agree on new budget caps for FY 2020. (See Appropriations section for more details.)

Republicans, meanwhile, will be forced to adjust to life in the minority. Their path back to the majority will consist of trying to force Democrats to take as many difficult votes as possible.

Please refer to Appendix A for House election results, as of time of publication.

U.S. Senate

Republicans widened their majority in the Senate by at least three seats, putting the GOP on track for a 54-46 margin or better to start the next Congress. The Florida and Arizona races remained too close to call at time of publication. The special election in Mississippi to fill out the unexpired term of former Sen. Thad Cochran (R-MS) is headed to a runoff on Nov. 27, with Republicans favored to retain the seat.

Key Takeaways

- GOP picks up at least three seats
- McConnell to extend record as longest-serving Republican Leader
- Schumer remains top Democrat
- Expect the Senate to be the center for policy negotiations between a Democratic House and Republican White House

Senate Democrats faced a difficult task coming into the election, having to defend more than half of its caucus with limited opportunities to challenge incumbent Republicans. With 26 Democratic seats up for grabs (including one special election in Minnesota), and many of those in deep red states that backed President Trump in 2016, the landscape favored the GOP—and Republicans largely delivered. Looking ahead, Democrats will welcome a more favorable map in 2020, when they will defend only 12 seats compared with 21 held by Republicans.

Notable Results

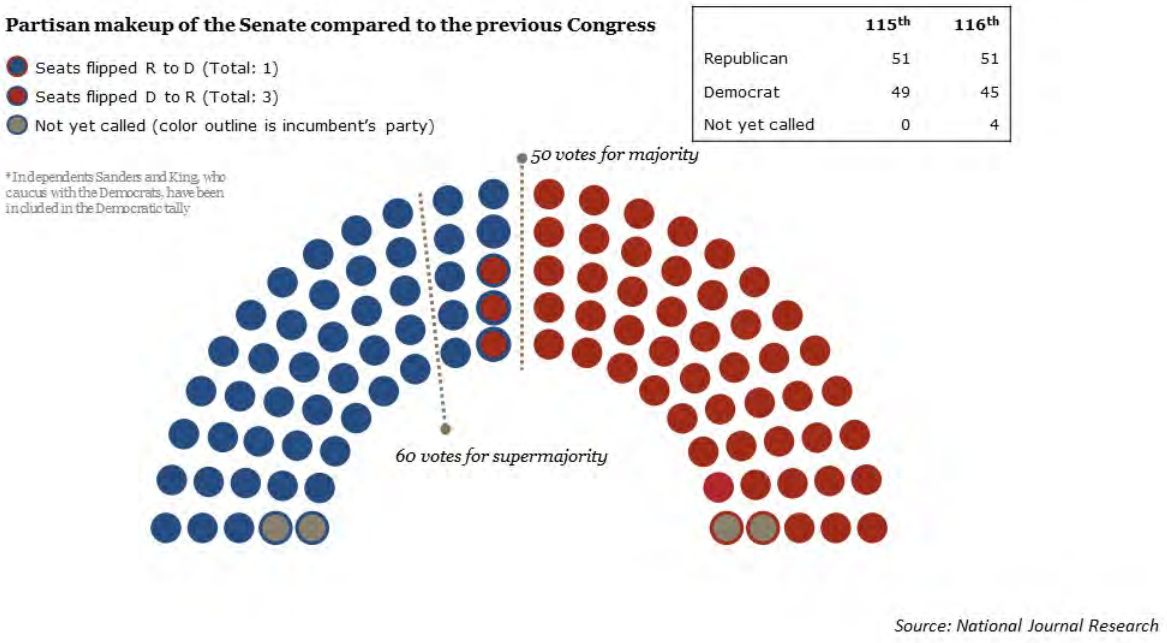
Republicans flipped at least three seats in the Senate. Rep. Kevin Cramer (R-ND) soundly defeated incumbent Sen. Heidi Heitkamp (D-ND). In a state that voted heavily for Trump, her poll numbers plummeted after voting no on Brett Kavanaugh's nomination to the U.S. Supreme Court. Former Indiana State Rep. Mike Braun won a decisive victory over Sen. Joe Donnelly (D-IN) in the Hoosier state, and Missouri Attorney General Josh Hawley (R) bested second-term Sen. Claire McCaskill (D) by six points.

Republicans were leading their Democratic opponents in two other Senate races that were too close to call at time of publication. In Florida, Gov. Rick Scott was narrowly ahead of three-term Sen. Bill Nelson in a race that saw more than $130 million in spending. And in Arizona, Rep. Martha McSally held a narrow lead over Rep. Kyrsten Sinema in the race to succeed retiring Sen. Jeff Flake (R). If neither lead changes, Republicans will end up with a net gain of four seats.

Other new additions to the Senate Republican Conference include Rep. Marsha Blackburn (R-TN), who defeated former Gov. Phil Bredesen by double-digits, and Mitt Romney, the former GOP presidential candidate, won handily in Utah.

The lone loss for a GOP incumbent came in Nevada, where one-term Rep. Jacky Rosen (D) upset Sen. Dean Heller in the Silver State. Although Sen. Cindy Hyde-Smith (R-MS) failed to get the 50

Composition of the 116th Congress: Senate



Source: National Journal Research

percent of the vote necessary to avoid a runoff, most pundits agree that she will prevail in the special election on Nov. 27.

Republican Leadership

Majority Leader Mitch McConnell (R-KY) surpassed Bob Dole's record as the longest serving Republican leader this year, and he will extend his service into the 116th Congress. Republican term limits rules will force Sen. John Cornyn (R-TX) to vacate his position as the Senate Republican Conference's Assistant Floor Leader (Whip). The caucus is expected to create a new role to allow Cornyn to maintain a leadership position by splitting his current Assistant Leader and Whip role into two distinct positions. That will allow others to move up a position: Sen. John Thune (R-SD) to Whip, Sen. John Barrasso (R-WY) to Conference Chair, and Sen. Roy Blunt (R-MO) to Policy Committee Chair.

The GOP Conference Vice Chair position would then be open, with Sens. Deb Fischer (R-NE), Joni Ernst (R-IA), Cory Gardner (R-CO) and Thom Tillis (R-NC) being the most frequently mentioned for the post. The National Republican Senatorial Committee Chairman post, currently held by Gardner, could return to Sen. Roger Wicker (R-MS), who held the post in 2015-2016. However, Sen.-elect Mitt Romney (R-UT) could use his national profile to benefit Republicans in that role.

Republican Legislative/Political Agenda

While McConnell's majority will have increased by at least three Members, the loss of the House will make the Republican Leader's job much harder. In the 115th Congress, the GOP-controlled

Congress achieved victories in tax reform, defense policy and appropriations. The Senate also confirmed 84 Article III judges nominated by President Trump: two to the U.S. Supreme Court, 29 to U.S. courts of appeals and 53 to U.S. district courts. Expect a continued emphasis in the Senate on judicial and executive branch confirmations, but momentum for some GOP agenda items will grind to a halt under a Democratic-controlled House.

The Senate will likely be the focal point for most policy debates, as it will serve as an intermediary of sorts between the Trump Administration and the Democratic majority in the House. One area of particular interest will be how Senate Republicans work with House Democrats on infrastructure legislation. Commonality of interests may be found on this issue, but resolving how to pay for infrastructure spending will be exceptionally difficult at best. Expect Senate Republicans to continue pressing on a host of agenda items such as surface transportation, telecommunications reforms and regulatory reforms.

Democratic Leadership

Though last night's results were disappointing for Senate Democrats, Sen. Chuck Schumer's (D-NY) position as Minority Leader is secure. Sens. Dick Durbin (D-IL), Patty Murray (D-WA), and Debbie Stabenow (D-MI) are also expected to remain in their respective leadership roles (Whip, Assistant Democratic Leader and Chairwoman of Policy and Communications Committee).

Democratic Legislative/Political Agenda

Democrats will continue to exert leverage in shaping policy due to the Republicans' lack of the 60 votes required by Senate rules to pass most legislation. Leader Schumer will focus his efforts on holding the caucus together while managing the individual interests—and ensuring attendance for key votes—of as many as nine Democrats considering a presidential run in 2020. Democrats are likely to join their House colleagues in pressing for legislation to reduce health care costs, particular for prescription drugs; promote college accessibility and skills training; and invest in infrastructure. A criminal justice reform bill, which passed the House earlier this year with support from scores of Democrats, is another possibility. The Democratic plan for a $1 trillion infrastructure package—offset by returning the top marginal tax rate to 39.6 percent—will be unpalatable to most Republicans.

2020

The map for 2020, a presidential election year, will be friendlier to Senate Democrats. Democrats' top pick-up targets for 2020 will be Sens. Cory Gardner (R-CO), Susan Collins (R-ME) and Thom Tillis (R-NC), and they will watch closely to see if Sens. Jim Inhofe (R-OK), Pat Roberts (R-KS), and Lamar Alexander (R-TN) decide to run again. Republicans will focus on taking back the seat held by Sen. Doug Jones (D-AL), and possibly challenging Sen. Mark Warner (D-VA), but will concentrate mostly on protecting incumbents and any open seat races they currently hold.

Please refer to Appendix B for Senate election results, as of time of publication.

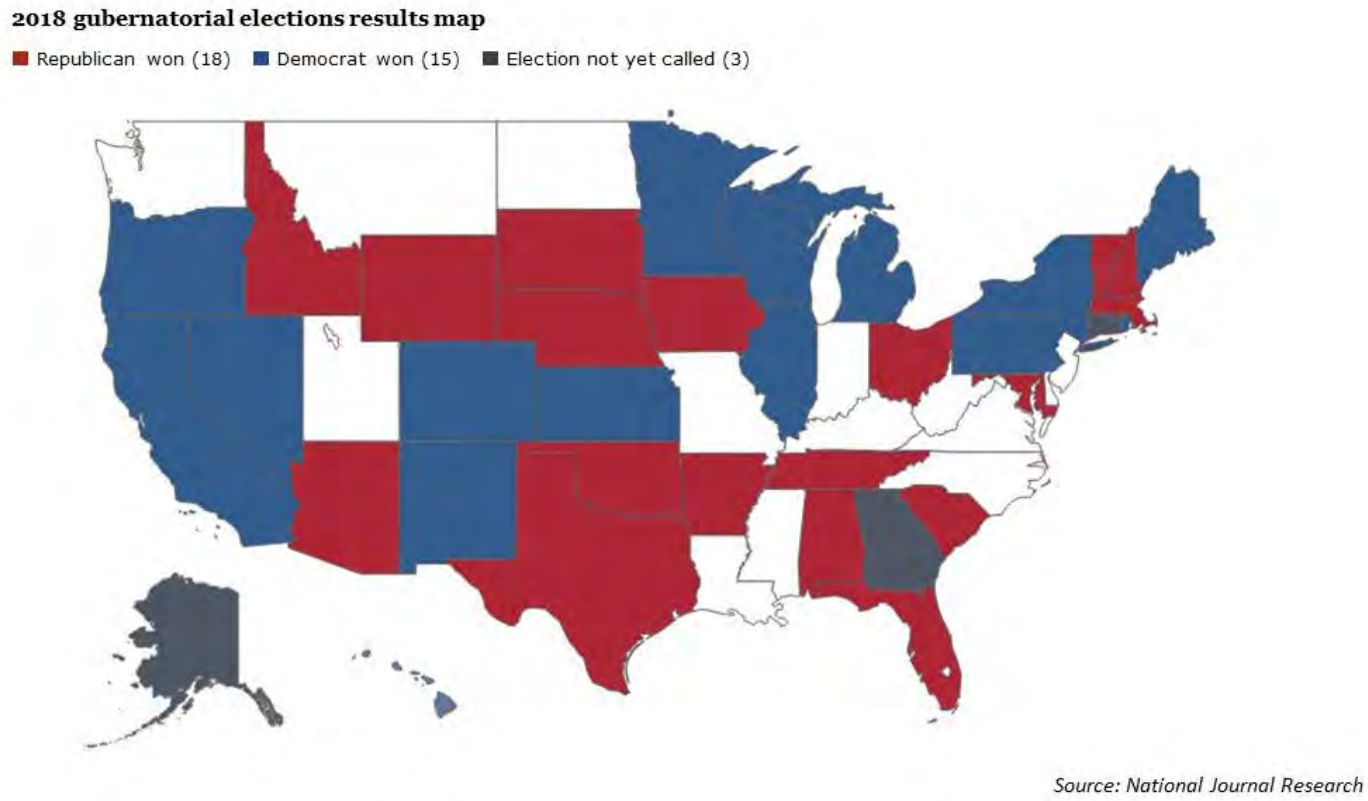
Governors

Gubernatorial races are always critical in their individual states, but this year's elections will reverberate throughout the nation for at least the next decade. In most of the 36 states where the executive mansion was up for grabs, newly elected governors will play a key role in drawing congressional districts in the wake of the 2020 decennial census.

Democrats improved their standing by picking up as many as seven states that had been held by Republicans. Prior to Election Day, Republicans held 33 Governor seats compared with only 16 Democrats and one Independent (Alaska Gov. Bill Walker). Projections are that the number of Republicans will drop to 27, compared with 23 Democrats. Overall, of the 36 contested races, Republicans are expected to win 20 gubernatorial races with Democrats winning 16.

Highlights for Democrats include winning in Kansas, where State Senator Laura Kelley (D) capitalized on GOP support to defeat Secretary of State Kris Kobach (R). Wisconsin Democrat Tony Evers, the state schools superintendent, appears to have defeated conservative favorite Gov. Scott Walker (R) who had previously staved off multiple recall attempts. Republican victories include the reelection of Governor Larry Hogan (R-MD) in an otherwise deep blue state of Maryland, and Governor Charlie Baker garnering support from Massachusetts Democrats and Independents to earn a second term. Even with sizable gains, Democrats were clearly – and emotionally – disappointed by Republican victories in Florida and Georgia.

Gubernatorial Races



Source: National Journal Research

NOTABLE DEMOCRATIC WINS

Connecticut: In a race between businessmen, Democrat Ned Lamont (D) defeated Bob Stefanowski (R) and will succeed Gov. Dannel Malloy (D). Lamont succeeded in tying Stefanowski to Trump, whose approval ratings sit below 40 percent in this deep blue state.
Growing the Connecticut economy and balancing the budget were the critical campaign issues.

Illinois: Businessman J.B. Pritzker (D) defeated Gov. Bruce Rauner (R). Pritzker led the race for most of the way, as he used his vast personal wealth to dominate campaign spending. Pritzker will inherit a state budget in disarray as well as challenges in Chicago, which has been buffeted by crime and social controversies.

Kansas: Secretary of State Kris Kobach (R) lost to State Sen. Laura Kelly (D) in one of the more divisive races of the election. Kobach, who gained attention for his tough stand on immigration and voter-fraud, was painted by Kelly as an acolyte of unpopular Gov. Sam Brownback (R). Kelly ran her race from the center, and as a result attracted the endorsement of many key Republican officials. She inherits a difficult budgetary environment.

Maine: State Attorney General Janet Mills (D) capitalized on the unpopularity of Gov. Paul LePage to defeat Republican entrepreneur Shawn Moody in a pickup for Democrats. Mills slammed LePage's decision to thwart Medicaid expansion in the state and cast herself as a fresh breeze of change.

Nevada: In another pickup for Democrats, Steve Sisolak (D), the Chairman of the Clark County Commission defeated State Attorney General Adam Laxalt (R) to succeed Gov. Brian Sandoval, who was term limited. Sisolak benefited from a moderate voter profile and a fractured Republican base that even split Laxalt's well-known family.

New Mexico: Rep. Michelle Lujan Grisham (D) defeated Rep. Steve Pearce (R) in the race to succeed Gov. Susana Martinez, a Republican. Immigration was a critical policy issue for Lujan Grisham, the Chairwoman of the Congressional Hispanic Caucus. Economic issues dominated as well, as one might expect in the state with the nation's second-highest poverty rate.

Oregon: Despite declining popular ratings, Gov. Kate Brown (D) defeated State Rep. Knute Buehler (R) in a state that has not elected a Republican as Governor since 1982. Brown overcame concerns about how she has dealt with a homelessness crisis and the state's pension deficit.

Wisconsin: Democrat Tony Evers, the state schools superintendent, defeated incumbent Gov. Scott Walker (R) in a state where Trump's approval ratings have dipped to 42 percent. Key issues included work requirements for Medicaid, trade tariffs and controversial economic development incentives for Foxxconn, a Taiwanese company.

NOTABLE REPUBLICAN WINS

Alaska: In a race made for a television drama series, former State Sen. Mike Dunleavy (R) defeated former Senator Mark Begich (D) despite Gov. Bill Walker's (I) late decision to abandon the three-way race and endorse Begich.

Florida: In a highly emotional loss for Democrats, former Rep. Ron DeSantis edged out Tallahassee Mayor Andrew Gillum (D) in the race to succeed Gov. Rick Scott (R). This was one of the most bitterly fought races in the nation, and presented clear contrasts with Gillum being backed by Sen. Bernie Sanders (D-VT), while DeSantis embraced Trump unapologetically. Gillum could not overcome the swirl of controversy stemming from an FBI investigation of corruption in Tallahassee, boosting DeSantis to victory.

Georgia: While both candidates admit there are still votes that need to be counted, Georgia's Secretary of State Brian Kemp (R) appears to be headed to victory over State Rep. Stacey Abrams. This race featured candidates from opposite ends of the political spectrum. The heated and nationally watched campaign was considered a true toss up from start to finish. Kemp's apparent victory puts him in line to succeed Republican Gov. Nathan Deal.

Iowa: Governor Kim Reynolds (R) ascended to the executive mansion in 2017 after former Gov. Terry Branstad (R) became the U.S. ambassador to China; and was elected Governor in her own right defeating financial services executive Fred Hubbell (D). Although Hubbell's prospects of winning seemed good, Reynolds momentum late in the campaign made the difference.

Ohio: In a major disappointment for Democrats, former U.S. Senator and current State Attorney General Mike DeWine (R) beat Richard Cordray (D) in the race to succeed Gov. John Kasich, who was term limited. Cordray, the former Director of the Consumer Financial Protection Bureau (CFPB) under President Obama, had battled DeWine in 2010 for Attorney General, and lost. While Cordray ran a campaign based on health care and his experience at the CFPB, it was not enough to prevail over DeWine, who appealed to Ohio voters by sticking to the moderate script of economic growth via limited government intervention.

South Dakota: At-Large Rep. Kristi Noem (R) defeated State Senate Minority Leader Billie Sutton (D) in the race to succeed Gov. Dennis Daugaard (R). Noem rode her popularity and experience serving South Dakota as their lone U.S. House member in Washington to victory.

Issue Areas

Agriculture

Whether Congress can reauthorize the farm bill before the end of the year is one of the most uncertain questions hanging over the lame duck session. The results of the 2018 election make that possibility even more speculative, as Democrats may prefer to delay negotiations until they control the House in the next Congress. However, each of the four principals of the House and Senate Agriculture Committees has expressed a desire to wrap up the bill now to avoid starting all over again in January. To that end, conferees have been working to bridge the significant differences between the House and Senate bills, which include funding for farm programs; changes to the Supplemental Nutrition Assistance Program (SNAP), including work requirements; and revamped conservation programs. Budgetary issues, including spending offsets to fund other programs, are also complicating the negotiations.

Key Takeaways

- It's do or die for the farm bill in the lame duck session – pressure is on to reach a bipartisan agreement
- Agriculture Committee leadership in Senate should remain same; Change in roles in House
- Key issues for 116th Congress include trade, farm bill implementation, oversight

If lawmakers are unable to pass a farm bill before the end of the year, focus will shift to passing an extension. In that scenario, Congress will be forced to begin anew in the 116th Congress. With control of the House, Democrats will likely prioritize SNAP and conservation programs in a new bill.

Among other issues affecting agriculture are consideration of the U.S.-Mexico-Canada Agreement and oversight of the Trump Administration's negotiations of bilateral free trade agreements with Japan, the United Kingdom, and the European Union. As the Trump Administration continues to pressure China to change its trade practices and enforce tariffs on steel and aluminum from all sources, there will be interest in providing additional relief from retaliatory actions that negatively impact agricultural sectors and rural communities dependent on agricultural exports. Additionally, Congress is expected to pass legislation to provide funding for producers affected by the hurricanes and wildfires in 2018 if funding is not provided during the lame duck session.

Senate Agriculture Committee

The 2018 election will result in few changes to the makeup of the Senate Agriculture Committee. As Republicans hold their majority in the Senate, Chairman Pat Roberts (R-KS) and Ranking Member Debbie Stabenow (D-MI) are expected to maintain their leadership positions. Sen. Deb Fischer (R-NE) won reelection and will likely keep her seat on the Committee. Sen. Cindy Hyde-Smith (R-MS) is expected to defeat her opponent in a Nov. 27 runoff election. If so, she is expected to preserve her seat on the Committee as well.

On the Democratic side, Sens. Amy Klobuchar (D-MN), Kirsten Gillibrand (D-NY), Tina Smith (D-MN), Sherrod Brown (D-OH) and Bob Casey (D-PA) prevailed and will likely to keep their seats on the Committee, but Sens. Heidi Heitkamp (D-ND) and Joe Donnelly (D-IN) were defeated.

House Agriculture Committee

On the House side, Agriculture Committee Ranking Member Collin Peterson (D-MN) is expected to take over as Chairman. (In the event that he does not do so, Rep. David Scott (D-GA) ranks number two in seniority.) With the retirement of Rep. Rick Nolan (D-MN), and Reps. Tim Walz (D-MN) and Michelle Lujan Grisham (D-NM) running for governor in their respective states, there will likely be open seats for new members.

With Democratic control of the House, expect increased representation from districts producing specialty crops and others representing urban areas with high participation in nutrition assistance programs. With Peterson as Chairman, the Committee would likely focus on oversight, biofuels and the impact of trade policies on agriculture. If Congress passes a farm bill, the Committee will likely carefully scrutinize the Department of Agriculture's implementation of the new law.

On the Republican side, Chairman Mike Conaway (R-TX) is expected to move over to Ranking Member. Rep. Jeff Denham (R-CA) is leading in his close race for reelection while Rep. John Faso (R-NY) lost his reelection bid.

Senate Appropriations Committee

As Republicans maintain the majority in the Senate, the Senate Agriculture Appropriations Subcommittee is likely to face little change. Sens. John Hoeven (R-ND) and Jeff Merkley (D-OR) are expected to maintain their leadership positions. If Sen. Hyde-Smith wins her runoff, Republican membership on the subcommittee would likely remain unchanged.

On the minority side, Sens. Dianne Feinstein (D-CA), Jon Tester (D-MT) and Tammy Baldwin (D-WI) defeated their Republican opponents and will retain their seats on the subcommittee.

House Appropriations Committee

As Democrats take control of the House, Rep. Sanford Bishop (D-GA) will likely move from Ranking Member to Chairman of the House Agriculture Appropriations Subcommittee. Bishop is mindful of the agricultural interests of his rural district and has a longstanding relationship with Agriculture Secretary Sonny Perdue, the former Governor of Georgia.
The Republican side of the subcommittee is more complicated, as current Chairman Robert Aderholt (R-AL) is one of several contenders for Ranking Member of the full Appropriations Committee. Additionally, House Republican Conference rules limit members to a combined six-

year term as chair or ranking member. Rep. Aderholt has reached the end of his six-year term as Subcommittee Chairman and would need a waiver to continue to serve as ranking member on the Agriculture Subcommittee. Given the likely shuffling of the Republican cardinals elsewhere, predicting who will serve as the next Ranking Member of the subcommittee is difficult. Several Members will not be returning. Rep. Thomas Rooney (R-FL) has retired from office and Reps. Kevin Yoder (R-KS) and David Young (R-IA) were defeated.

Appropriations

Key Takeaways

- Seven FY 2019 spending bills face uncertain future in lame duck session
- Job number one for FY 2020: agreeing on new budget caps
- Major turnover ahead for House Appropriations Committee
- "Regular order" to remain elusive

With the election results near complete, the focus now turns to the lame duck session of the 115th Congress. No agenda item will be as difficult to resolve as the final appropriations end-game for FY 2019.

Both the House and Senate Committees have accomplished much this year, having ushered through and finalized five appropriations bills thus far—covering nearly two-thirds of all discretionary activities and programs. All five measures were signed into law by President Trump before the end of the fiscal year—an achievement not seen in over 10 years. The measures contained increased dollar amounts for the top priorities of Democrats and Republicans alike, including funding for the Departments of Defense, Education and Health and Human Services, among others. While the Committees made great strides this year, and offered a rare glimpse of regular order, maintaining that momentum will prove challenging during the lame duck session. With a fast-approaching fiscal deadline of Dec. 7, when the current continuing resolution is set to expire, several landmines await, as some of the more contentious and politically difficult appropriations bills have yet to be finalized. Long-standing policy differences affecting the financial services and banking industries, environmental regulations, foreign aid and immigration policy top the list of unresolved items.

Providing relief to those impacted by and recovering from Hurricanes Florence and Michael will also be a major item of business for the Committees when Congress returns. Though initial down payments toward disaster recovery were enacted in September, final assessments of the damages had not been completed prior to the congressional recess. With a better picture of the long-term recovery needs slowly coming into focus, look for the Committees to provide a second disaster relief package as part of any year-end product.

Though there is much speculation about how the election results will affect the final FY 2019 negotiations, there is a path to closure for the remaining bills. It remains possible that most of them will be enacted before the end of the year, bundled into one catch-all package. While a partial government shutdown is not beyond the realm of possibility, especially if President Trump makes good on a veto threat over funding for a border wall, congressional leaders, particularly in the Senate, will try to avoid that scenario. Look for a bipartisan coalition of appropriators to advocate for completing the remaining bills and wiping the FY 2019 slate clean before the next Congress is sworn in.

Looking ahead to FY 2020 and beyond, several challenging issues confront the leaders of the appropriations panels.

Despite their accomplishments, the Committees will continue to face conservative backlash over higher spending levels and a perceived lack of transparency. While these concerns traditionally spawn no shortage of ideas on how to "reform" the appropriations process, the task of coming up with viable solutions this year has been left to a Joint Select Committee, co-chaired by Reps. Steve Womack (R-AR), the Chairman of the House Budget Committee, and Rep. Nita Lowey (D-NY), the Ranking Member of the House Appropriations Committee. Look for this Committee to meet on Nov. 15 to mark up a legislative package of reform proposals, and possibly to move legislation to the House floor during the lame duck session. A range of possibilities have been discussed, including moving from annual to biennial budgeting, changing the fiscal year deadlines, repealing House Budget Committee term limits, requiring increased budget transparency from the Office of Management and Budget and making passage of continuing resolutions and debt ceiling extensions automatic. Many of the more dramatic proposals are not likely to be adopted. The one exception seems to be biennial budgeting, but with one major caveat: Annual consideration of appropriations bills will continue.

Lastly, but certainly looming large over the Committees next year, is the return of sequester spending caps, now that the two-year budget deal covering FY 2018 and 2019 has expired. A remnant of the Budget Control Act of 2011, over $120 billion in cuts to current year spending levels are due to set in, both on the defense and nondefense side of the ledger. Trump is expected to adhere closely to the sequester levels for nondefense programs in his FY 2020 budget request, while offering only modest cuts to defense. While there is bipartisan agreement that sequester caps are unrealistic for today's budgetary needs, mustering the political will to address the problem quickly has so far been lacking. Partisan rancor and squabbling have been the norm, typically dragging out for months, and hamstringing the Committees from finishing their work in a timely fashion.

Please refer to Appendix D for the Congressional Budget Office's Baseline Budget Projections.

As has been the case for the three previous two-year budget deals over the last six years, expect to see the political standoff to revolve around the argument of parity, which the Democrats have traditionally leveraged to their advantage, resulting in substantial gains to the nondefense side of the ledger. With mounting concerns over the growth of the nation's deficits, projected to reach nearly $1 trillion in 2019, negotiations to address sequestration could linger for several months. As a result, the momentum of the past year will be difficult to replicate and regular order could remain elusive.

Senate Appropriations Committee

Look for the Appropriations Committee structure and leadership to remain relatively stable for the 116th Congress. Sen. Richard Shelby (R-AL) will remain Chairman, a position he assumed earlier this year following the retirement of Sen. Thad Cochran (R-MS). Sen. Patrick Leahy (D-VT) will continue to serve as Vice Chairman, the title given in recent years to the Ranking Member

on the Committee in the Senate. A wave of midsession shifts in the subcommittee chairmanships in 2018 due to Cochran's early retirement has placed several Senators in relatively new positions already. Six of the subcommittees, including the influential Defense, Commerce-Justice-Science, and Homeland Security panels, all have new chairmen at the helm, with less than a year of training under their belts. In addition, only one Committee Republican had a contested election—Sen. Cindy Hyde-Smith (R-MS)—and she is widely expected to retain her seat in a Nov. 27 runoff. These facts make major shifts on the Republican side of the Committee unlikely.

This overall stability will be key to the Committee's agenda moving forward. The close working relationship between Shelby and Leahy is expected to continue, with each side likely foregoing traditional partisan fights in the short term to reach long-term bipartisan consensus. This collegial way of doing business united the Committee and set the tone for its FY 2019 conference negotiations with the House—an approach that should continue in the 116th Congress.

House Appropriations Committee

Unlike in the Senate, expect major changes on the House Appropriations Committee. Rep. Nita Lowey (D-NY), the current Ranking Member, is in line to take the gavel and would be the first woman to hold that position. Her cardinals likewise are seasoned veterans, and will be aggressive in countering the President's agenda from day one—ready to do battle in what they anticipate will be his last two years in office. Most, if not all, of the current subcommittee ranking members will assume chairmanships in the majority.

The Republican side of the aisle, meanwhile, is decimated. The retirements of Appropriations Committee Chairman Rodney Frelinghuysen (R-NJ) and Committee member Rep. Tom Rooney (R-FL), the early departures of Reps. Charlie Dent (R-PA) and Evan Jenkins (R-WV), and the reelection losses of Reps. Kevin Yoder (R-KS), David Young (R-IA), John Culberson (R-TX) and Scott Taylor (R-VA) will have a major impact not only on the subcommittee rosters, but on the agenda, tone and seniority of the Committee itself. By the start of the 116th Congress, about 70 percent of the Republican members of the Committee will have turned over since 2010.

The full Committee Ranking Member slot is a wide-open race and rests in the hands of the Republican Steering Committee. The current Defense Subcommittee Chairwoman, Kay Granger (R-TX), is viewed as the frontrunner. The other two top contenders for the job are Reps. Tom Cole (R-OK) and Tom Graves (R-GA), in that order.

Expect to see a game of musical chairs among the Republican ranks on the subcommittees as well. In addition to the reelection losses and retirements mentioned above, there are two other wildcards to watch in the shuffle. Rep. Robert Aderholt (R-AL) has reached the end of his six-year term as Chairman of the Agriculture Subcommittee, and some speculate that he will opt not to seek a waiver but pursue a more high-profile subcommittee slot. In addition, Rep. Steve Womack (R-AR) has mused openly about leaving his Budget Committee post to assume a Ranking Member

position on an Appropriations subcommittee. Regardless, expect to see a sizeable number of fresh faces on the dais, with as many as six or seven subcommittees with new GOP leadership.

As for carrying out the Committee's business, look for Democrats to act aggressively to use the power of the purse to try to extract concessions from President Trump and attach policy riders to appropriations bills. They will also use budget hearings to conduct vigorous, and sometimes confrontational, oversight of the Federal agencies. The heightened political environment overall in the House, with a slew of investigations into the President and his Cabinet, will keep the Committee busy as well.

Democrats will prioritize spending for multiple programs that appeal to their base, particularly in the Labor, Health and Human Services, and Education Appropriations bill. Medical research, maternity care, nutrition, workforce development and education will remain areas of focus, as well as renewable fuel development, environmental protections and investments in infrastructure.

Cybersecurity

All eyes were on the cybersecurity of election systems across the country yesterday. With no known cases of vote tampering, attention today turns to cybersecurity policy and funding in the 116th Congress. Cybersecurity crosses the jurisdiction of several committees. In the civilian arena, the Homeland Security, Judiciary, Commerce, and Oversight and Government Reform committees will all see big changes in their membership this year, especially at the top. The same is true for the national security committees that oversee military cybersecurity policy and funding, mainly the Appropriations and Armed Services committees.

Key Takeaways

- Big changes in cybersecurity leadership in Congress
- Key issues to include cyber supply chain threats, foreign influence, critical infrastructure
- FY 2019 Homeland Security appropriations bill, with a direct impact on civilian cyber, still needs to be finalized

For the first time in a decade, the defense authorizations and appropriations acts for FY 2019, chock full of cybersecurity priorities for the military, were signed into law before the start of the fiscal year on Oct. 1, 2018. Leaders of the national security committees are looking toward the FY 2020 budget cycle to make their next mark on cybersecurity, in a military sense. At the same time, the Department of Homeland Security (DHS), the government's civilian lead for cybersecurity, is currently operating under a continuing resolution until Dec. 7, 2018. One of the first priorities during the lame duck session of Congress will be to try to pass a DHS budget for the remainder of the fiscal year. The battle over border wall funding could have a significant impact on the other parts of the DHS budget including cybersecurity, for everything from critical infrastructure protection to training to cyber threat detection and mitigation.

Senate Authorization Committees

Sen. Jim Inhofe (R-OK), who became chairman of the Senate Armed Services Committee (SASC) in September, will keep the gavel in the 116th Congress. A focus on military cybersecurity, including combatting the threats posed by Russia, China and Iran and the risks these countries and others pose to the military supply chain, will continue to dominate the National Defense Authorization Act for FY 2020. The election resulted in at least one and possibly two major losses at the top for Senate Democrats with longstanding knowledge of cybersecurity and positioned on critical authorizing committees, both military and civilian. The defeat of Sen. Claire McCaskill (D-MO) knocked out the second-most senior Member on the Cybersecurity Subcommittee on SASC. Her loss will also open up the Ranking Member slot on the Homeland Security and Governmental Affairs Committee. Sen. Bill Nelson (D-FL), meanwhile, was trailing at time of publication in his bid for reelection. Nelson’s absence would be significant, since he is the current Ranking Member on the Cybersecurity Subcommittee on SASC and also the Ranking Member of

the Commerce, Science and Transportation Committee; both committees include cybersecurity in their portfolios.

House Authorization Committees

As Rep. Adam Smith (D-WA) takes over as Chairman, expect the House Armed Services Committee to maintain a bipartisan focus on pushing the military and other administration leaders to offer a comprehensive military cybersecurity strategy. Top issues will include supply chain threats from U.S. adversaries, rules and oversight of sensitive cybersecurity military operations, and implementation of strong cyber protections for vulnerable military weapons and corresponding systems. In the civilian world of cybersecurity on Capitol Hill, there will be many changes in the committees of jurisdiction in the new Congress. Most current Chairmen are retiring, leaving many Ranking Member positions in the new Congress unclear. Rep. Bennie Thompson (D-MS) is expected to take over as Chairman of the Homeland Security Committee. Current Chairman Michael McCaul (R-TX) is term-limited from his Committee post and will step down at the end of the current Congress, leaving an open Ranking Member spot.

On the Judiciary Committee, Rep. Jerry Nadler (D-NY) is expected to take over as Chairman, succeeding Rep. Bob Goodlatte (R-VA), who is retiring at the end of this Congress. Goodlatte's departure will open up another Ranking Member slot. Rep. Elijah Cummings (D-MD) is expected to take over as Chairman of the Oversight and Government Reform Committee. Similarly, current Chairman Trey Gowdy (R-SC) is retiring, leaving another Ranking Member slot up for grabs. Rep. Frank Pallone (D-NJ) is expected to take over as Chairman of the Energy and Commerce Committee, while Rep. Greg Walden (R-OR) is expected to move over to Ranking Member. Rep. Marsha Blackburn (R-TN), Chairwoman of the Communications and Technology Subcommittee on the Energy and Commerce Committee, will vacate her post, after winning her bid for Senate. Races will be held in the coming days to fill these critical open positions for civilian cyber in Congress.

Senate Appropriations Committee

The Senate Appropriations Committee is a different story, where stability will reign when it comes to leadership in charge of cybersecurity funding, both military and civilian. Sen. Richard Shelby (R-AL) will continue to serve as Chairman of both the full Committee and the Defense Subcommittee, and Sen. Shelley Moore Capito (R-WV) will retain the top spot on the Homeland Security Subcommittee. On the Democratic side, Sen. Dick Durbin (D-IL) will continue as Ranking Member on Defense and Sen. Jon Tester (D-MT) will should remain the Ranking Member on Homeland Security. Robust, bipartisan support is expected to continue for cybersecurity funding for military programs. The outlook for cybersecurity in the Homeland bill is murkier, as it must compete for funding with border protection initiatives.

House Appropriations Committee

With Democrats taking back the House, there will be new leadership atop the Defense and Homeland Security Appropriations subcommittees, the two spending panels that deal most directly with cybersecurity. Rep. Pete Visclosky (D-IN) will switch from Ranking Member to Chairman of the Defense Subcommittee, which allocates funding for military cybersecurity needs. He will have a tough job of prioritizing what should be done first, given a recent government report that says the Department of Defense is just "beginning to grapple with the scale of vulnerabilities" to military systems. Rep. Lucille Roybal-Allard (D-CA) will likely move from Ranking Member to Chairwoman of the Homeland Security Subcommittee. This panel allocates funding for DHS, which is charged with coordinating cybersecurity within civilian government agencies and the private sector. The Homeland Security appropriations bill also provides funding for more controversial endeavors, like border security. Roybal-Allard will have to balance both needs for the safety of the nation.

Leadership on the Republican side is harder to predict. Current House Appropriations Committee Defense (HAC-D) Subcommittee Chairwoman Kay Granger (R-TX) is one of several Members vying for Ranking Member of the full Appropriations Committee. If successful, she will vacate the top slot on HAC-D. Several current Members of HAC-D, including Reps. Hal Rogers (R-KY), Robert Aderholt (R-AL), Ken Calvert (R-CA) and Tom Cole (R-OK), could compete to replace her. On the Homeland Security Subcommittee, the election loss of Chairman Kevin Yoder (R-KS) means the Ranking Member slot is up for grabs. Rep. John Culberson (R-TX) also lost his reelection bid, so next in line on the subcommittee are Reps. Chuck Fleischmann (R-TN), Andy Harris (R-MD) and Steven Palazzo (R-MS).

Defense

Fiscal uncertainty looms on the horizon for national security and defense. Debate over the defense and nondefense spending caps, along with the threat of sequester imposed by the Budget Control Act (BCA) of 2011, is scheduled to reappear in FY 2020. The President's defense budget request for FY 2020 will support the new National Defense Strategy. Although the request will likely be less than the FY 2019 appropriated level, it will likely ignore the much lower FY 2020 defense-spending cap prescribed in the BCA.

The newly minted National Defense Strategy prioritizes increased investment to counter near-peer competitors, as well as continue to deter and counter rogue regimes and defeat terrorist threats. Over the next two years, expect the Department of Defense (DoD) to focus efforts on building a more lethal force, strengthening alliances, at racting new partners and reforming the Department for greater performance and affordability.

Key Takeaways

- FY 2020 DoD budget request to support new National Defense Strategy
- Spending cap for FY 2020 is the big question mark
- Adam Smith takes helm as HASC Chairman
- Peter Visclosky takes helm as HAC-D Chairman
- Multi-Member GOP race for HAC-D Ranking Member

National security and defense policy issues will remain a priority in the 116th Congress. For the first time in 10 years, Congress enacted both the defense authorization and defense appropriations acts ahead of the new fiscal year. The Department of Defense has consistently complained about the negative impacts of receiving its appropriations halfway through the fiscal year, which caused uncertainty in programs and led to an increase in reprogramming actions. Congress will no doubt pay closer at ention to budget execution data, as well as scrutinize requests to reprogram funds, in this "normal" budget execution year.

The President remains outspoken on the need to prioritize defense spending. In order to do so, Congress and the Administration must figure out a way to increase the FY 2020 defense-spending cap. This will not be easy, as Democrats will prioritize domestic spending and insist on parity between defense and nondefense accounts. Look for a potentially drawn-out budget resolution process, which could set back the defense authorization and appropriations processes and timelines. (See Appropriations section for more information.)

In addition to regularly scheduled hearings on the DoD budget, its services and the Combatant Commands, expect additional hearings on acquisition reform, Authorization for Use of Military Force, DoD Audit, national security strategy, cyber threats, space force, investment in future technologies, readiness and personnel/force structure. There will also be increased debate on the size of the military to include personnel and equipment, need for another Base Realignment and Closure round, authorization for commitment of U.S. forces overseas and increased

oversight on military budget and operations. Look for the House defense oversight commit ees to significantly ramp-up scrutiny of the Pentagon.

Finally, there continues to be conjecture over the potential departure of Defense Secretary James Mattis. While both the President and Secretary Mattis maintain that he is staying, some continue to speculate he may depart sometime soon. Names of potential replacements currently being circulated include Senators Tom Cot on from Arkansas and Lindsey Graham from South Carolina, retired four-star Army General Jack Keane, former Treasury Department official David McCormick and former Senator Jim Talent of Missouri.

Senate Armed Services Committee

Under the chairmanship of Sen. Jim Inhofe (R-OK), who took the gavel of the Senate Armed Services Commit ee in September, expect a continued focus on rebuilding the military's capacity, capability and readiness. Chairman Inhofe will work closely with Ranking Member Jack Reed (D-RI) and all Members of the commit ee to push for on-time passage of the National Defense Authorization Act (NDAA). Look for continued investment into the training, maintenance and modernization accounts and a continued focus on acquisition reform as well as investment in research and development, depots, cyber and missile defense. The focus overseas will be on Russia and China and building strong partnerships through programs like Train & Equip with allies across the globe, including Africa. Budget restrictions will likely limit the Chairman's ability to simultaneously increase end strength, modernize the force and adequately fund readiness. Overall commit ee focus remains stable but the loss of Sens. Joe Donnelly (D-IN) and Claire McCaskill (D-MO) will result in the addition of new Democratic Members to the commit ee and the appointment of a new Ranking Member of the Strategic Forces Subcommit ee. Sen. Bill Nelson (D-FL) is currently trailing in his race by less than 0.5 percent, requiring a recount by Florida law. His loss would result in a new Ranking Member of the Cyber Subcommit ee.

House Armed Services Committee

As Rep. Adam Smith (D-WA) takes over as Chairman of the House Armed Services Commit ee, expect additional DoD oversight and a more critical look at defense spending levels. He will push for cuts based on a threat-and-budget-based assessment to U.S. national security. Chairman Smith will also seek to reduce expenditures on nuclear weapons, ensure a full and accountable DoD audit, increase oversight of military operations overseas, support alternative energy and climate change, increase emphasis on personnel issues and support another BRAC round. The focus overseas will be on Russia and China, a new war powers resolution, treaty obligations and a more limited U.S. role overseas. The change in control of the House and the retirement/loss of roughly a dozen Members on the HASC will result in the addition of up to a dozen Democratic Members and lit le to no change in Republican Members. This will also result in shuffling of some subcommit ee leadership to include the Personnel, Readiness, and Tactical Air and Land Forces Subcommit ees.

Senate Appropriations Committee

With the Senate remaining in GOP control for the next two years, look for stability in the Senate Defense Appropriations Subcommit ee with Chairman Richard Shelby (R-AL) and Ranking Member Dick Durbin (D-IL) staying in place. As Chairman of the full Senate Appropriations Commit ee, Shelby orchestrated a plan to pass the FY 2019 Defense Appropriations Act "on time," completing it ahead of the start of the new fiscal year for the first time in 10 years. Look for him to take a similar lead role in the 116th Congress, where he is likely to advocate for moving the defense appropriations bill through the commit ee and onto the Senate floor for a vote. Pairing it with the Labor, Health and Human Services Appropriations bill worked successfully in FY 2019, and may offer a path to enactment again in FY 2020. Commit ee membership will likely remain relatively stable.

House Appropriations Committee

As Democrats assume leadership of the House, they gain seats on and control of the House Defense Appropriations Subcommit ee (HAC-D). Rep. Peter Visclosky (D-IN), after serving as Ranking Member for the past six years, takes over as Chairman. He is likely to intensify scrutiny of the Department of Defense. Look for the HAC-D to increase the number of oversight hearings, closely examine the Department's reprogramming requests, prioritize the U.S. industrial base and ask more questions about the Administration's annual budget requests.

For the GOP, soon to be the minority party, the retirement of full Appropriations Chairman Rodney Frelinghuysen (R-NJ) will affect who becomes the Ranking Member of HAC-D in the 116th Congress. Current HAC-D Chairwoman Kay Granger (R-TX) is viewed as the potential front-runner in the race to become Ranking Member of the full commit ee. Should Granger move up, several current Members of the HAC-D will compete to be the Ranking Member of that subcommit ee. These could include Reps. Hal Rogers (R-KY), Robert Aderholt (R-AL), Ken Calvert (R-CA) and Tom Cole (R-OK).

Education

Democratic control of the House of Representatives may not lead to breakthroughs on big-ticket policy items, but a renewed focus on oversight of the Department of Education and Secretary Betsy DeVos should keep K-12 and higher education front and center in the new Congress.

Key Takeaways

- Oversight will be the name of the game for the House Education and Labor Committee under incoming Chairman Scott
- Higher education will be top policy focus of the authorizing committees
- Education funding to get a boost under incoming House Labor-HHS Chairwoman DeLauro

In addition to oversight, House Democrats will prioritize school construction within the context of a larger infrastructure bill. Rep. Bobby Scott (D-VA), who will take over as Chairman of what will likely be renamed the House Education and Labor Committee (currently the House Committee on Education and the Workforce), introduced the Rebuild America's Schools Act last May, and party leadership recently directed Committee Democrats to ready a school construction plan in advance of next year. This effort will be early on the Committee's legislative agenda. Chairman Scott may also look to prioritize legislation that seeks to identify and close gaps in educational equity and should give far more attention to early childhood education than did his predecessor, Rep. Virginia Foxx (R-NC).

Over the last few years, the Senate and House education committees have reauthorized many of the major K-12 and higher education bills—including the Every Student Succeeds Act (ESSA), Workforce Investment Act, Perkins Career and Technical Act—and have begun discussions on a number of the outstanding items, most notably the Higher Education Act (HEA), Education Sciences Reform Act and Individuals with Disabilities Education Act. It is unlikely that the committees will get the "leftovers" across the finish line in the 116th Congress, but there will be a legitimate effort to reauthorize the HEA. With at least two Members of the Senate Health, Education, Labor and Pensions (HELP) Committee expected to run for President, however, and with higher education being a major part of any Democratic platform, it remains difficult to see how the parties will put their differences aside on such a major issue—especially in a presidential election cycle.

House Education and Labor Committee

Scott and Foxx will swap the Chair and Ranking Member roles atop the House Education and Labor Committee, with Scott, a former civil rights lawyer, taking the gavel for the first time. Under his leadership, the Committee will prioritize oversight of the Education Department, particularly around civil rights, school climate, school safety, Title IX, for-profit education, and implementation of ESSA. Frequent oversight hearings and the potential for subpoenas should help shed light on the rationales behind some of the Department's recent administrative and

regulatory actions in the K-12 and higher education sectors, but it is unlikely that such scrutiny would push the Department to back off from its preferred policies.

The Education and Labor Committee has generally been one of the more transient House committees, and with at least eight members retiring or losing reelection, there should be plenty of new faces when the 116th Congress is seated in January. Notable departures from the Committee include Rep. Jared Polis (D-CO), a champion of charter schools who often crossed his party on issues related to K-12 education reform and won his bid for Colorado Governor this election cycle; Rep. Todd Rokita (R-IN), who chaired the subcommittee on Early Childhood, Elementary and Secondary Education; and Rep. Luke Messer (R-IN), a founder of the Congressional School Choice Caucus. Reps. Marcia Fudge (D-OH) and Mark Takano (D-CA) should continue to gain stature on the Democratic side of the dais, and one would expect Rep.-elect Jahana Hayes (D-CT), the 2016 National Teacher of the Year, to join the Committee following her election to Congress. Rep.-elect Donna Shalala (D-FL), a three-time college president, is another logical choice for Committee membership.

Senate HELP Committee

Sens. Lamar Alexander (R-TN) and Patty Murray (D-WA) will remain in their current roles atop the Senate HELP Committee, which, outside of the retirement of Sen. Orrin Hatch (R-UT), is expected to look as it did in the 115th Congress. The Committee's primary legislative priority continues to be a comprehensive rewrite of the HEA, but finding bipartisan consensus—let alone bicameral consensus—on such a topic will be difficult. Expect private talks and negotiations on HEA and a public focus on oversight of ESSA implementation.

Appropriations Committees

Outside of a swap in roles for Reps. Rosa DeLauro (D-CT) and Tom Cole (R-OK), there are no expected changes atop the House and Senate Labor, Health and Human Services, Education, and Related Agencies (Labor-HHS) Appropriations subcommittees. The four subcommittee leaders—DeLauro, Cole and Sen. Roy Blunt (R-MO) and Murray—are pragmatic members who prioritize results and during their time working together have proven to be more than able to reach bipartisan deals that they can sell to their respective caucuses.

Education funding may fair better under Chairwoman DeLauro than it did under Cole, who tended to prioritize the National Institutes of Health (NIH) over all other programs in the bill. DeLauro is more likely to balance any increases for NIH with education and child care priorities such as Title I Grants to Local Education Agencies, special education, Head Start and the Child Care and Development Block Grant. DeLauro may also attempt to use the Labor-HHS bill to push back on the Administration's decision to allow states and districts to use the Title IV block grant to arm teachers.

Energy & Environment

The Trump Administration's approach on energy and environmental policy so far has been one of deregulation and downsizing. That should continue over the next two years, with the President touting how the Administration's policies have fostered job creation and benefited consumers while placing the United States in strong standing as a global energy leader. As Democrats prepare to take the reins in the House, they are likely to challenge the Administration at every turn. The new House majority's agenda will include expanding renewable energy and investing in policy and technology to lessen the United States' carbon footprint while combating climate change. However, with divided control of Congress, there will be limited opportunity for them to alter the Administration's current course. Instead, expect much of their attention to focus on oversight of the Administration's regulations and industry practices that are intended to protect human health, clean air, water and wildlife.

Key Takeaways

- House Democrats to renew focus on climate change while scrutinizing Administration's regulatory policies
- Leadership on Capitol Hill to remain fairly stable
- Protecting and modernizing the nation's electricity grid will continue as key issue

Senate Authorization Committees

Sen. John Barrasso (R-WY) will move into his second term as Chairman of the Environment and Public Works Committee next Congress, with Sen. Tom Carper (D-DE) remaining as Ranking Member. Expect the Committee to continue to explore what the appropriate role should be for states when it comes to environmental regulations and clean-up. The microscope will also remain on the Environmental Protection Agency (EPA) as both parties present differing views on the agency's proper responsibilities and whether EPA is right-sized to fulfill its mission. Barrasso's priorities also include modernizing the Endangered Species Act (ESA).

The Senate Energy and Natural Resources Committee will continue under the leadership of Sen. Lisa Murkowski (R-AK) as Chairwoman while the Ranking Member position remains somewhat unclear. If Sen. Bill Nelson (D-FL) loses his reelection bid-his race was yet to be called-Sen. Maria Cantwell (D-WA), the current Ranking Member, could seek the top Democratic spot on the Senate Commerce, Science, and Transportation Committee. Should that switch occur, Sen. Joe Manchin (D-WV) will likely take her spot on the Committee. Expect the Committee to continue to consider the vulnerability of the electricity grid to cyber attacks as well as the overall complex and evolving web of how energy is generated, distributed and ultimately consumed. Sens. Murkowski and Cantwell also have much of their collaborative legislation, the Energy and Natural Resources Act, left unsettled. While several hydropower provisions of their bill were included in the Water Resources Development Act reauthorization, they have thus far been unable to reconcile much of the package with their House counterparts. Watch for some of the

remaining provisions to make their way into an end-of-the-year package during the lame duck session. Otherwise, with Democrats now in control of the House, they may find a more receptive audience to moving forward on unfinished business next Congress.

At the Commerce, Science, and Transportation Committee, there could be a shuffling of the deck. Sen. John Thune (R-SD), the current Chairman, is expected to pursue a Senate leadership slot in the next Congress. If his bid is successful, Sen. Roger Wicker (R-MS) could emerge as his successor on the Committee. As discussed above, Cantwell could take over as Ranking Member.

House Energy and Commerce Committee and House Natural Resources Committee

Rep. Frank Pallone (D-NJ) is expected to remain the top Democrat on the Energy and Commerce Committee and assume leadership as the Chairman, exchanging roles with Rep. Greg Walden (R-OR), who will now serve as Ranking Member. This Committee will be the primary venue in the House for the new majority to resurface the debate on climate change. Don't expect to see anything resembling the comprehensive cap-and-trade legislation that Democrats advanced last time they held control of the House, only to watch that effort stall in the Senate. Instead, look for them to promote the importance of concepts like the Clean Power Plan and the Paris Agreement, both policies the Trump Administration has abandoned without alternative solutions.

The Democratic agenda will also likely include attention to a variety of areas that Committee Democrats feel have gone largely ignored under Republican control. The EPA will have to prepare for a great deal of scrutiny about the management of the agency and the use of the agency's regulatory authority. This will include elevating issues raised last year with respect to the law passed in 2016 to amend the Toxic Substance Control Act (TSCA). Democrats who helped shepherd the new law into place have expressed concerns over the manner in which the agency is implementing certain reforms while at the same time ignoring some statutory obligations. Other priorities may include addressing safe drinking water funding and infrastructure, pesticide risk assessment policies and Corporate Average Fuel Economy (CAFE) standards—all areas where Democrats believe the Republican-controlled Congress fell short.

With Rep. Raúl Grijalva (D-AZ) set to take the helm as Chairman of the Natural Resources Committee, there will be additional attention from the House on climate change and the importance to participate as a global partner. Expect this to come with a spotlight on the current process and timing for oil and gas leasing. This will put Rep. Rob Bishop (R-UT), the new Ranking Member, in the position of defending recent policies that have streamlined permitting and leasing for exploration on federal lands. Grijalva's priorities will include the Hardrock Leasing and Reclamation Act, which he introduced this session. Among other things, this legislation creates new royalties on mining operations while directing revenues toward the clean-up of abandoned mines.

Senate Appropriations Committees

Leadership of the Interior, Environment, and Related Agencies subcommittee in the Senate is expected to remain stable under Chairwoman Lisa Murkowski (R-AK) and Ranking Member Tom Udall (D-NM). The same is expected at the Energy and Water Development subcommittee with Sen. Lamar Alexander (R-TN) staying on as Chairman and Sen. Dianne Feinstein (D-CA) as Ranking Member. Anticipate both subcommittees to reflect the dynamics of the Senate with a more balanced approach to funding and policy riders than their House counterparts. Look for the Interior and Environment subcommittee to recommend maintaining funding for EPA and the Department of Interior, with some increases beyond the President's budget request. The glaring difference between the House and Senate Energy and Water appropriations bills will likely be the continued standoff on providing funds for a nuclear waste storage repository at Yucca Mountain in Nevada.

House Appropriations Committees

Under Democratic control of the House, Rep. Marcy Kaptur (D-OH) and Rep. Mike Simpson (R-ID) will switch roles as Chairman and Ranking Member, respectively, of the Energy and Water Development and Related Agencies subcommittee. For the Interior and Environment subcommittee, current Ranking Member Betty McCollum (D-MN) is expected to take the gavel while the Ranking Member role remains less certain, pending the outcome of the race for Ranking Member of the full Committee. Should Rep. Ken Calvert (R-CA), who currently serves as the top Republican on the subcommittee, seek a different post, there could be interest from several Republicans for the top spot on Interior and Environment. Look for that list to possibly include Rep. Tom Cole (R-OK), given his interest in and connection to Indian tribes and public land issues. Expect funding priorities to reflect a shift toward more renewable energy technologies and away from fossil fuel research while strong levels should remain for water infrastructure and environmental clean-up initiatives. The new Democratic majority may also use appropriations bills to try to restrict the Trump Administration from using funds for certain activities.

Health

With Democrats taking control of the House, many of the hotly debated health issues in the 115th Congress should fall to the wayside. The threats to reform Medicaid into a block grant program or per capita reimbursement model will no longer be viable. And demands for increased oversight and reform of the 340B drug pricing should also diminish. However, these issues will not disappear from the radar, as the Department of Health and Human Services (HHS) could continue to exercise its authority in making programmatic changes that do not require approval from Congress.

Key Takeaways

- Democratic House means no more attempts to repeal ACA
- Power shifts to the Administration as agencies take the lead on new regulations
- NIH will remain a top spending priority
- House Democrats to lay the groundwork for "Medicare for All"

Through rulemaking, HHS will continue to address rising drug prices. Earlier this month, the agency proposed to pay for select Part B drugs based on the International Price Index. Additionally, Congress recently wrote to the Health Resources and Services Administration (HRSA) reminding the agency of existing authorities to make changes to the 340B drug pricing program. As such, it is expected that future changes to 340B are likely to come from HRSA rather than Congress. Given the increased activity by the Administration, a Democratic-controlled House will pursue an aggressive oversight agenda. Drug pricing, new Medicaid requirements and changes to the Affordable Care Act (ACA) could all be topics of intense oversight investigations and hearings.

Senate Finance Committee and Senate Health, Education, Labor and Pensions Committee

In the Senate, work on federal health programs is split between the Finance Committee and the Health, Education, Labor and Pensions (HELP) Committee. With the retirement of Sen. Orrin Hatch (R-UT), it is believed that Sen. Chuck Grassley (R-IA) will leave the chairmanship of the Senate Judiciary Committee and reclaim the gavel on the Finance Committee. Grassley last chaired the Committee in 2006 and is eligible to serve as Chairman for two more years. Sen. Ron Wyden (D-OR) will remain as the Committee's Ranking Member. Grassley has long been a champion of rural health care providers and ensuring access to quality rural health care services. He is also an advocate of increased transparency in the health care sector and has led legislative efforts to shed light on waste, fraud and abuse in federal health care programs. As the author of bipartisan legislation to address the high cost of prescription drugs, Grassley could be an ally to the Administration's efforts to reduce patients' out-of-pocket spending on pharmaceuticals.

Sen. Lamar Alexander (R-TN) will continue to serve as Chairman of the Senate HELP Committee, while Sen. Patty Murray (D-WA) will remain as Ranking Member. Having played a significant role

in the passage of the recent opioids bill, the SUPPORT for Patients and Communities Act, the Committee is expected to continue its focus on health care in rural America. As part of that conversation, it is widely expected that the Committee will study the use of telehealth and explore potential legislative changes to make broader implementation of telehealth a reality. Additionally, Chairman Alexander has been a leading Republican voice for amending the ACA to make health insurance premiums more affordable for those Americans purchasing coverage in the public exchanges.

House Energy and Commerce Committee and House Ways and Means Committee

In the House, the health care portfolio is divided between the Energy and Commerce Committee and the Ways and Means Committee. Change in party control means the committees will have new chairmen in the 116th Congress. However, familiar faces are expected to lead both panels. At the Energy and Commerce Committee, current Chairman Greg Walden (R-OR) should slide into the Ranking Member's slot, while current Ranking Member Frank Pallone (D-NJ) will wield the gavel. Pallone is a long-serving member on the Committee's Health Subcommittee, having served as Chairman during the passage of the ACA. As such, health issues will be a priority for the new Chairman. Democrats have already expressed a desire to address rising drug costs, although how the Committee drug pricing agenda matches up with the Administration's work remains to be seen. It is anticipated the Committee will pursue an aggressive oversight agenda. Medicaid work requirements and Medicaid waivers, in general, and the Administration's enforcement of the ACA will likely be on the docket in the near future.

Over the past year, the Energy and Commerce Committee has hosted numerous hearings to study the 340B drug pricing program. During these hearings, Democrats on the panel have offered more reserved changes to the program, including increased transparency from all stakeholders. With the change in panel leadership, the 340B program should recede into the background for the time being. However, any proposed changes to the program by HRSA would likely be thoroughly vetted by the Committee.

Finally, the Energy and Commerce Committee has jurisdiction over activities of the Food and Drug Administration. Chairman Pallone could lead efforts to closely examine the regulation of electronic cigarettes and vaping.

At the Ways and Means Committee, current Ranking Member Richard Neal (D-MA) will take the gavel from Chairman Kevin Brady (R-TX), who, with two years of eligibility remaining, will shift to the Ranking Member position. Similar to the Energy and Commerce Committee, the Ways and Means Committee is expected to examine the drivers behind rising drug costs. An aggressive oversight agenda with a particular focus on Administration proposals affecting the ACA will be a Committee focus. The Committee may also consider legislative solutions to improve care coordination and chronic care management, especially among the dual eligible population.

Both the Ways and Means Committee and the Energy and Commerce Committee have begun studying the rising maternal mortality rate. This issue has gained significant bipartisan interest and support. Pending legislation has already been considered at the Energy and Commerce Committee, and the issue will remain a priority for both committees into the 116th Congress.

Both committees could spend time exploring and/or laying the groundwork for a "Medicare for All" legislative proposal. A number of newly elected Democrats made "Medicare for All" a feature of their campaign platform, and several Democratic candidates for President in 2020 are expected to support it as well—even though, at the moment, there is no clear consensus about what this goal would actually entail. Look for Democrats in the House to begin exploring various forms of this proposal.

Senate Appropriations Committee

In the Senate, there are no expected changes in leadership of the Labor, Health and Human Services, Education, and Related Agencies (Labor-HHS) Subcommittee. Sen. Roy Blunt (R-MO) will remain Chairman, while Sen. Patty Murray (D-WA) will remain the Ranking Member. Funding for the National Institutes of Health (NIH) has been Blunt's top spending priority. Continuing to provide multibillion-dollar increases for this agency in an uncertain fiscal environment will be his most difficult challenge in the 116th Congress. Blunt and Murray have enjoyed a strong, bipartisan working relationship, and their collegiality is expected to continue.

House Appropriations Committee

On the House Appropriations Committee, Rep. Rosa DeLauro (D-CT) will move from Ranking Member to Chairwoman of the Labor-HHS Subcommittee. Current Chairman Tom Cole (R-OK) is expected to become the Ranking Member of Labor-HHS unless he succeeds in his bid for Ranking Member of the full Committee. DeLauro will advocate vigorously for the highest possible allocation for her subcommittee, whose portfolio includes many top Democratic funding priorities. Although she will likely continue the subcommittee's strong support for NIH, she will seek to spread spending increases across a wide range of programs in the bill, including early childhood education, child care, social services, public health, labor programs and many others.

Homeland Security

Funding for the border wall in the FY 2019 Homeland Security appropriations bill remains perhaps the most challenging issue hanging over the lame duck session. The House version of the bill includes $5 billion for this purpose, compared with $1.6 billion in the Senate version, and President Trump is threatening a veto if Congress doesn't appropriate the higher level. If the Federal government partially shuts down when the continuing resolution expires on Dec. 7, failure to reach an agreement on this issue will likely be a major reason why.

Debate over the border wall will only intensify during the 116th Congress, as the new, Democratic-controlled House will push back vigorously against Administration plans to dramatically increase funding. One of the most contentious issues of the midterm elections, border security will take center stage during the 2020 presidential campaign as well.

Key Takeaways

- Border wall funding is major sticking point for FY 2019 Homeland Security spending bill during the lame duck session
- Key issues for next Congress to include border security, immigration reform, UAVs, chemical and biological weapons
- Thompson to take over House Homeland Security Committee

Funding for the wall aside, the next Congress will have to grapple with a record number of immigrants who are seeking asylum. U.S. officials apprehended 396,579 people between ports of entry on the southwest border in fiscal year 2018, up from 303,916 the year before.

Transportation security will also remain a top priority. Although Congress reauthorized the Transportation Security Administration (TSA) in October, expect a continued focus on issues such as biometric entry and exit and identity verification. Other key issues will include cybersecurity, malicious use of unmanned aerial vehicles (UAVs), chemical and biological weapons and the use of artificial intelligence across the homeland security enterprise.

Senate Authorization Committees

Sen. Ron Johnson (R-WI) is expected to continue as Chairman of the Senate Homeland Security and Governmental Affairs Committee (HSGAC). Sen. Tom Carper (D-DE) will likely replace Sen. Claire McCaskill (D-MO) as Ranking Member following her election loss to Republican Josh Hawley. HSGAC shares jurisdiction over homeland security with the Commerce, Science and Transportation Committee and the Judiciary Committee. While there was significant momentum in the 115th Congress to pass a comprehensive reauthorization for the Department of Homeland Security (DHS), that goal proved elusive. It remains to be seen if the 116th Congress will attempt to consider a broader reauthorization or if stakeholders will be content with piecemeal legislation, as has been the norm since 2002.

House Homeland Security Committee

Rep. Bennie Thompson (D-MS), currently the Ranking Member of the House Homeland Security Committee, is expected to take the gavel in the 116th Congress. A Thompson-led Committee will focus on election security, UAVs, border security and the treatment of immigrants, while ramping up oversight of DHS in general. In particular, Thompson may question DHS officials about the Department's response to Puerto Rico in the aftermath of Hurricane Maria, as well as the Department's procurement practices, especially concerning small and disadvantaged businesses. As DHS expands its focus on vetting people, we can also expect increased attention to issues of privacy.

Leadership on the Republican side will change, as Chairman Michael McCaul (R-TX) is term limited on the Committee. Next in line is Rep. Mike Rogers (R-AL)—unless he is nominated to replace Heather Wilson as Air Force Secretary, as some have speculated will happen.

Senate Appropriations Committee

With Republicans holding control of the Senate, Sen. Shelley Moore Capito (R-WV) will remain Chairwoman of the Homeland Security Appropriations Subcommittee. The race in Montana is still too close to call, but if Sen. Jon Tester (D-MT) loses, his absence will create an open spot for the Ranking Member.

House Appropriations Committee

With Democrats controlling the House, Ranking Member Rep. Lucille Roybal-Allard (D-CA) will most likely take over the gavel as Chairwoman of the Homeland Security Appropriations Subcommittee. Long an advocate for the just and humane treatment of immigrants and refugees, Roybal-Allard will strongly oppose funding increases for a border wall or policies that promote the detention of individuals seeking asylum.

The Republican side is more uncertain, as Chairman Kevin Yoder (R-KS) was defeated in his reelection bid. With the loss of Yoder, add yet another vacancy to the roster of cardinals. Rep. Steve Womack (R-AR), Rep. Chuck Fleischmann (R-TN) will now move up in seniority and would be candidates for the open Ranking Member slot on the Subcommittee. Rep. Jaime Herrera Beutler (R-WA) is another candidate for the position, though her race has not been called yet.

International Affairs

Foreign affairs will remain a priority for both the 116th Congress and the Trump Administration as challenges arise across the globe. The list of geopolitical hot spots is long and growing: the South China Sea, Syria, Yemen, Venezuela and Afghanistan, to name a few. Tensions with Iran are on the rise, while evidence of Russian election interference continues to mount. Relations with North Korea remain a work in progress, and the recent brutal killing of journalist Jamal Khashoggi could upend the nation's relations with Saudi Arabia. Meanwhile, thousands are making their way from Central America in a caravan to the U.S.-Mexican border.

Key Takeaways

- FY 2019 SFOPS spending bill awaits resolution in the lame duck session
- President Trump likely to seek foreign aid cuts again in FY 2020 budget request
- Major leadership changes ahead for House and Senate authorizing committees

Funding to address some of these issues will be front and center during the lame duck session, as Congress attempts to complete negotiations on the FY 2019 State, Foreign Operations and Related Programs (SFOPS) Appropriations bill. Spending for the programs in this bill remains under a continuing resolution until Dec. 7 and could become subject to a partial government shutdown if Congress and the Administration fail to reach a deal.

Looking ahead to FY 2020, the Administration will likely continue to target foreign aid spending for major reductions in its budget request. And with Congress under divided control, finding common ground will become increasingly difficult.

The next Congress will also oversee the early days and appointment of the board of the new U.S. International Development Finance Corporation, which was established by passage of the BUILD Act in October. The new agency merges the U.S. Agency for International Development's (USAID) development finance programs with the Overseas Private Investment Corporation (OPIC) to facilitate sustainable, broad-based economic growth, poverty reduction and development.

Senate Foreign Relations Committee

There will be a new Chairman of the Senate Foreign Relations Committee following the pending retirement of Sen. Bob Corker (R-TN). Sen. Jim Risch (R-ID) is favored to take the gavel. Currently the Chairman of the Subcommittee on the Near East, South Asia, Central Asia and Counterterrorism, Risch is a strong supporter of President Trump and has come to his defense on issues such as North Korea, Russia and immigration. A Risch-led Committee will likely be more deferential to the Administration than it had been under Corker, who frequently challenged the Administration on its policies toward Russia and NATO and was a champion for global human

rights. Sen. Bob Menendez (D-NJ) survived a hard-fought reelection campaign and will remain Ranking Member of the Committee in the 116th Congress.

House Foreign Affairs Committee

With Democrats taking control of the House, House Foreign Affairs Committee Ranking Member Eliot Engel (D-NY) is all but guaranteed to take over as Chairman. Engel is staunchly pro-Israel and a hawk on Iran. He will likely use the Committee to take a stronger stance against Russia and intensify scrutiny of Saudi Arabia. He may also pursue investigations of Russia's influence on the 2016 and 2018 elections, and Trump's relationship with Russian President Vladimir Putin, as well as challenge the Administration on human rights.

On the Republican side, the race for Ranking Member will likely be contentious. Current Chairman Ed Royce (R-CA) is retiring at the end of this Congress. Of the most senior incumbents, Rep. Dana Rohrabacher (R-CA) was defeated in the midterms, and Rep. Chris Smith (R-NJ) was passed over for the gavel in 2012. The frontrunner is likely Rep. Michael McCaul (R-TX), who floated his name for the gavel earlier in the year. However, Freedom Caucus member Rep. Ted Yoho (R-FL) has made his intentions known.

Senate Appropriations Committee

With Republicans maintaining control of the Senate, expect stability on the SFOPS Appropriations Subcommittee, with Sen. Lindsey Graham (R-SC) remaining as Chairman and Sen. Patrick Leahy (D-VT) as Ranking Member. Over the past two budget cycles, Graham and Leahy have restored most of the significant cuts proposed by the Trump Administration to foreign aid.

House Appropriations Committee

Rep. Nita Lowey (D-NY), who is expected to take over as Chairwoman of the full House Appropriations Committee following the Democrats' recapture of the House, may also choose to lead the SFOPS Appropriations Subcommittee, of which she is currently the Ranking Member. If she gave up the subcommittee gavel, the likely beneficiary would be either Rep. Adam Schiff (D-CA) or Rep. Barbara Lee (D-CA). Rep. Hal Rogers, the current Chairman of the subcommittee, will likely move to Ranking Member unless there is a reshuffling of Republican cardinals following the race for Ranking Member of the full Committee.

Tax

Last year's passage of the 2017 Tax Cuts and Jobs Act ("2017 Tax Act") and its aftereffects will remain a central focus of the tax world following the 2018 midterms. As Treasury finalizes regulations and businesses continue to digest the effects of the bill during its first tax filing season in spring 2019, pressure will mount to legislatively address ambiguous or unexpected results of the bill left unresolved by the regulations.

Key Takeaways

- Lame duck session could be active on tax issues
- Implementation of 2017 Tax Cuts and Jobs Act to be a continued focus in next Congress
- Tax-writing committees may play supporting role on health care, infrastructure financing
- Expect a battle over Trump's tax returns

The lame duck session of the 115th Congress figures to be active on tax. There is bipartisan, bicameral interest in reconciling differences between House and Senate IRS reform legislation, passing retirement tax legislation (part of "Tax 2.0" in the House), and extending and potentially modifying a group of approximately 26 tax "extenders"—provisions that Congress often extends retroactively, most recently in the 2018 Bipartisan Budget Act. While less likely, there is also the potential for Congress to use the opportunity presented by a tax vehicle to take on other tax provisions, including: technical corrections to the 2017 Tax Act, outright policy changes to the 2017 Tax Act and other small-bore tax provisions for which sufficient pressure has been built up to act, particularly in the Senate. In addressing the so-called "grain glitch" or "co-op" pass-through fix within the March 2018 omnibus, Senate Democrats choreographed a potential path for tackling more complex and partisan tax policies in the 2018 lame duck. In this scenario, Senate Democrats could achieve some preferred tax policy victories (in March, it was a plus-up of the Low-Income Housing Tax Credit or LIHTC) in exchange for policies desired by Republicans (or both parties).

With a reconciliation vehicle available for FY 2019, there is the outside possibility that congressional Republicans may at empt a fast-track reconciliation process (or use the threat of one) during the lame duck session to advance controversial tax agenda items. Although the prospects for enactment into law at this time are very long, the Senate may also consider further extending temporary policies from the 2017 Tax Act, as advanced in the House as part of "Tax 2.0."

Although now under divided control, Congress will not stop legislating on tax. However, tax policy in the 116th Congress may play a supporting rather than central role in possible efforts to advance infrastructure, health and environmental legislation.

Senate Finance Committee

With Chairman Orrin Hatch (R-UT) retiring and Republicans holding the Senate, Sen. Chuck Grassley (R-IA) is the overwhelming favorite to retake the gavel at the Finance Commit ee after last handing it over to former Sen. Max Baucus (D-MT) in January 2007. Under Republican Conference rules, Grassley retains two years of eligibility as Chairman of Finance. Should a dramatic turn of events keep him at the Judiciary Commit ee he currently chairs, Sen. Mike Crapo (R-ID) would take the gavel.

As Chairman, Grassley may shake up the Commit ee's Republican senior staff while continuing to engage with Treasury on implementation of the 2017 Tax Act and with stakeholders on improvements and technical corrections to the law. The Commit ee may also engage on infrastructure, particularly on surface transportation financing, before the highway reauthorization bill (the FAST Act) expires at the end of FY 2020. Senate Democrats, led on tax by Minority Leader Chuck Schumer (D-NY) and Finance Commit ee Ranking Member Ron Wyden (D-OR), will likely continue to use pressure for improvements and changes to the 2017 Tax Act to try to extract concessions from the majority on small-scale tax policy items favored by the Senate Democratic Caucus.

A Republican-led Finance Commit ee may also have a role to play if, as expected, House Democrats demand to see President Trump's tax returns (see House Ways and Means section below). Legal and political debates over this issue may be muddy, and Chairman Grassley may find himself and his Members under pressure to support the President in declining to fully disclose documents requested by the House.

House Ways and Means Committee

Following Democrats' takeover of the House, current Ranking Member Richard Neal (D-MA) figures to take up the gavel of the Commit ee on Ways and Means for the first time, swapping roles with current Chairman Kevin Brady (R-TX). Neal has operated as a relative pragmatist for many years and is well-served by a deep and experienced staff, many of whom served in the House majority or the Senate in the past.

A Neal-led Commit ee may seek to advance Democratic campaign priorities such as conducting oversight activities over the Administration, rolling back the 2017 Tax Act, using the tax code to address income inequality, creating a "public option" for health care or some form of "Medicare for All," and advancing financing mechanisms for infrastructure or environmental policy. Chairman Neal may seek to kill two birds with one stone and use rollbacks of the 2017 Tax Act, such as increasing the corporate rate or limiting the top individual rate, to produce offsets for Democratic spending priorities.

In any event, Chairman Neal is likely to begin the 2019 legislative session by invoking authority under Section 6103 of the tax code to request President Trump's tax returns from Treasury,

beginning what will likely be a lengthy political and legal battle that could dominate the tax-writing committees throughout the 116th Congress and the 2020 election season.

Neal is a longtime champion of enhancing tax-favored retirement savings and expanding the Earned Income Tax Credit (EITC) to cover childless earners, and may take up legislation along those lines in the 116th. In the case of the EITC, Neal may pursue policies similar to Sen. Kamala Harris' (D-CA) proposed EITC expansion legislation.

House Democrats may also attempt to address climate change through the tax code. Democrats may pursue hearings on the subject, or work to generate consensus within the caucus on a range of possible approaches, including a revenue-positive carbon tax, a revenue-neutral carbon tax, or a tax-and-dividend approach, but would face challenges in attempting to return to their 2009 efforts on an emissions trading regime.

Brady's institutional expertise and collegial relationship with Neal may give him more influence than a typical House Ranking Member during the final two years of his tenure (as determined by Republican Conference rules). Expect to see several new Republican members on the Committee in the next Congress, as several current members will depart at the end of this term. Reps. Lloyd Smucker (R-PA), Jodey Arrington (R-TX) and Ron Estes (R-KS), among others, are contenders for those slots. Democrats will add several seats at the Committee, with names under possible consideration including Reps. Brad Schneider (D-IL), Gwen Moore (D-WI), Cedric Richmond (D-LA), Dan Kildee (D-MI) and Stephanie Murphy (D-FL).

Tech & Telecom

The outcome of the 2018 elections will have a significant impact on the Congressional approach to technology and telecommunications policy issues. The Commerce committees in both the House and Senate will have new leadership, and congressional scrutiny of the major technology and social media companies that began this year will only intensify during the 116th Congress, especially in the Democratic-controlled House. Debates over consumer protection and privacy could turn increasingly partisan. Other key issues in the next Congress will include data security, 5G deployment, election interference and rural broadband access. Expected turnover of key personnel in the Trump Administration, along with divided control of Congress, will complicate efforts to pass meaningful legislation.

Key Takeaways

- New Chairs for both House and Senate Commerce committees
- Key issues to include consumer privacy, 5G deployment, cyber security and election interference
- Scrutiny of major tech companies will intensify

Senate Commerce, Science and Transportation Committee

Sen. Roger Wicker (R-MS) is widely expected to become Chairman of the Senate Commerce, Science and Transportation Committee in the new Congress, succeeding Sen. John Thune (R-SD), who is expected to vacate the position to move into a Senate leadership role. Sen. Bill Nelson (D-FL) is locked in an extremely close race that looks to be undecided for a while, since a recount has been ordered. Should Nelson hold on to his seat, he will remain Ranking Member. Wicker and Nelson have a decent working relationship and should be able to agree on some mainstream issues.

If Nelson were to lose his race, Sen. Maria Cantwell (D-WA) could assume the Ranking Member position. Currently the Ranking Member on the Senate Energy and Natural Resources Committee, Cantwell may jump to Commerce because of the Committee's jurisdiction over many issues that directly impact the state of Washington. Wicker and Cantwell have not often worked together, so the dynamic between the two will be interesting and important to watch. However, both Senators have an extensive history of working across the aisle (Cantwell on certain tax provisions, and Wicker on numerous telecommunications, transportation and fisheries issues). Expect Chairman Wicker to roll out a series of hearings and policy initiatives in the first 100 days as part of his plan to hit the ground running. Regulatory reforms will also be a priority.

House Energy and Commerce Committee

Rep. Frank Pallone (D-NJ) will ascend to chair the House Energy and Commerce Committee next Congress. The Ranking Member will be Rep. Greg Walden (R-OR). Pallone and Walden generally get along well and are switching roles on the Committee. Formerly the Ranking Member of the Health Subcommittee, Pallone has more experience with health issues than technology. In fact, his personal office website does not list technology or telecommunications among his key issues of focus. Expect Rep. Mike Doyle (D-PA), the likely Chairman of the Communications and Technology Subcommittee, and Rep. Jan Schakowsky (D-IL), the likely Chairwoman of the Digital Commerce and Consumer Protection Subcommittee, to play key leadership roles.

One key change is expected on the Republican side, as Communications and Technology Subcommittee Chairman Marsha Blackburn (R-TN) will leave the House at the end of this term after winning her election to the Senate.

Net neutrality will be a prominent issue for House Democrats, even while the issue is before the courts. Look for oversight hearings on the Department of Commerce, Department of Energy, Department of Health and Human Services, the Federal Communications Commission and the Federal Trade Commission. Also expect oversight hearings regarding White House activities, such as Jared Kushner's Innovation Initiative. Additionally, House Democrats will prioritize privacy, data breaches and cybersecurity as key issues. Critical to the success of any of these initiatives will be whether Chairmen Pallone and Wicker can work together and how the White House will participate in the debate.

Appropriations Committees

Several House and Senate appropriations subcommittees are expected to consider technology and telecommunications funding in the 116th Congress, including Agriculture; Commerce, Justice, State; Defense; Financial Services; Homeland Security; and Labor, Health and Human Services, and Education. Key issues will include telecommunications in rural areas, technology supply chain management, telemedicine, cybersecurity and cyber espionage. Interestingly, the debate over border wall funding will be of particular interest to the technology sector. Since House Democrats are expected to vigorously oppose construction of an actual wall, a potential compromise could be a significant investment in products and services that can create a “virtual” wall via technology.

Trade

Upcoming big-ticket trade items for the 116th Congress include: pending ratification of the United States-Mexico-Canada Agreement (USMCA); consultations with Congress on trade negotiations with the European Union, the United Kingdom, and Japan; progress on trade discussions with China; and other ongoing actions concerning tariffs. Soon after the convening of the 116th Congress, congressional leaders will select members of the congressional advisory groups on negotiations to consult with and provide advice to the U.S. Trade Representative regarding the development of trade agreements and negotiating strategies.

Key Takeaways

- USMCA vote will be key trade issue for 116th Congress
- Grassley likely to take over as Chairman of Senate Finance Committee
- President Trump will now answer to Democratic leadership of House Ways and Means Committee on trade matters

While the Administration's trade policies maintain momentum in the Senate, President Trump's tactics will face increased scrutiny in a Democratic-controlled House of Representatives. The election results dim the outlook for a near-term trade accord with the Philippines given that country's record on human rights matters. With increasing concern about the President's use of congressionally delegated authority to levy tariffs, Democratic leaders promise to call upon Administration officials to testify on these trade policies—particularly concerning China—and demand that the Administration consult more with Congress on trade matters. However, party-line divisions on trade seem to be drawn somewhat differently now. Traditional critics of free trade have been supportive of some of the Administration's actions and the newly negotiated USMCA. It is unclear whether House Democrats will revert to more conventional positions on trade – or simply vote against Trump's trade priorities -- in the new Congress.

Senate Finance Committee

With the pending retirement of Senate Finance Committee Chairman Orrin Hatch (R-UT), Sen. Chuck Grassley (R-IA) will likely take over the gavel. In this event, Grassley would be giving up his chairmanship of the Judiciary Committee. Sen. Ron Wyden (D-OR), who has called the Trump Administration's record on trade "overhyped and under-delivered," will continue to serve as the Ranking Member of the Senate Finance Committee. Grassley, who has generally supported Trump's trade agenda, will likely use his powerful post on Senate Finance to address China's unfair trade practices and policies, including the theft of U.S. intellectual property. At the same time, he will try to ease disruptions from the use of tariffs in the U.S.-China trade dispute, including defending farmers who shoulder retaliatory tariffs. With regard to reducing trade barriers, look for Grassley's support in shepherding USMCA and other future trade accords through the congressional approval process.

Subcommittee on International Trade Ranking Member Sen. Bob Casey (D-PA), along with Sens. Debbie Stabenow (D-MI) and Ben Cardin (D-MD), all of whom also currently serve on the international trade subcommittee, won their reelection bids. However, the subcommittee will see changes as Sen. Claire McCaskill (D-MO) lost her reelection bid to Missouri Attorney General Josh Hawley (R), and Sen. Dean Heller (R-NV) lost his seat to Rep. Jacky Rosen (D-NV). The fate of Sen. Bill Nelson (D-FL) was too close to call at time of publication.

House Ways and Means Committee

The 116th Congress will see Democratic leaders take control of the House Ways and Means Committee, which has jurisdiction over international trade matters. Rep. Richard Neal (D-MA), the Ranking Member on the panel, will likely serve as next Chairman of the full Committee. With regard to Republican leadership on trade matters, look for current House Ways and Means Committee Chairman Kevin Brady (R-TX) to stay on as Ranking Member. Under Chairman Neal, who has criticized Republicans' disengagement on trade policy and lack of oversight over the continuing U.S.-China dispute, look for increased scrutiny of the President's trade discussions, a renewed focus on trade adjustment assistance to support U.S. workers through job retraining, and a push for trade policies that vigorously enforce worker rights and environmental protections. With regard to tariffs, look for a bipartisan push to streamline the exclusion process to relieve pressure on American businesses hurt by the crackdown on China; the recent Section 232 additional tariffs on steel and aluminum prompted more than 38,000 exclusion requests.

The Ways and Means Committee uses the "Martin Rule" to determine subcommittee membership and gavels based on full committee seniority. The top slot on the Trade Subcommittee would fall to the most senior Member who prefers to claim it. Rep. Sandy Levin (D-MI), the longstanding Democratic dean on trade policy who currently holds the Health Subcommittee gavel, retires at the end of this session. If Reps. Lloyd Doggett (D-TX) and John Lewis (D-GA) choose to maintain their leadership positions at the Tax Policy and Oversight subcommittees, respectively, Rep. Mike Thompson (D-CA) or Rep. John Larson (D-CT) are next in line to stake their claim to leadership at the Trade Subcommittee, with Reps. Earl Blumenauer (D-OR), Ron Kind (D-WI) and Bill Pascrell (D-NJ) also possible candidates for the top Trade slot.

Other slots held by Republican members of the Trade Subcommittee will open up. Trade Subcommittee Chairman Dave Reichert (R-WA) retires at the end of this session. Rep. Erik Paulsen (R-MN) lost his reelection bid to Twin Cities businessman Dean Phillips, and Rep. Kristi Noem (R-SD) won her bid for South Dakota Governor.

Senate Appropriations Committee

The Senate Appropriations Subcommittee on Commerce Justice, Science, and Related Agencies (CJS) funds important trade-related functions of the U.S. government, including the International Trade Administration (ITA), the U.S. International Trade Commission (USITC), and the office of the United States Trade Representative (USTR). Chairman Jerry Moran (R-KS) and Ranking

Member Jeanne Shaheen (D-NH) are expected to maintain their top slots on the subcommittee. Chairman Moran, who represents Kansan farmers bearing the brunt of tariff retaliation, will continue to urge the President to rapidly reduce trade conflicts with conventional U.S. allies to focus on issues related to China's unfair trade practices. Subcommittee members facing reelection in 2018 included Sens. Dianne Feinstein (D-CA) and Joe Manchin (D-WV), both of whom won their campaigns.

House Appropriations Committee

Rep. José Serrano (D-NY), the current Ranking Member on the subcommittee, is expected to take over as Chairman. Rep. Serrano, a supporter of imposing tariffs on countries that manipulate currency, will likely use the Chairman's gavel to call upon USTR to show a more vigorous and comprehensive strategy with regard to China. Democratic candidate and Houston lawyer Lizzie Fletcher is projected to defeat Rep. John Culberson (R-TX) opening up the top subcommittee slot for Republicans. As there will be several shifts to top Republican slots on the Appropriations committee due to the switch to Democratic control, it is hard to forecast who will replace Culberson as the CJS subcommittee top Republican.

Transportation & Infrastructure

Despite all the talk during the past 24 months about the possibility of major new investments in infrastructure, both from President Trump and Congress, political and fiscal realities have restrained policy makers from fulfilling promises in this area. Nevertheless, infrastructure remains an issue with strong bipartisan support and will remain on the short list of top agenda items in the coming year. Meanwhile, an upcoming deadline to reauthorize the highway bill will also bring transportation front and center in the 116th Congress.

Key Takeaways

- House Democrats to push infrastructure legislation, a possible opportunity to work with President Trump
- Reauthorization of FAST Act on tap for next Congress
- Major leadership changes ahead for key authorizing committees

The Trump Administration has continued to tout the benefits of Congress moving forward with an infrastructure package that could include forms of public-private partnerships and private investment through tax incentives. A combination of these incentives could attract investors willing to lend money to state and local governments to fund new infrastructure projects and address deferred maintenance of public assets like roads, bridges, airports, railroads, water systems and the like. A future infrastructure package could also address the depletion of the Highway Trust Fund, permitting and regulatory requirements, and innovative project finance methods. The new House Democratic majority, meanwhile, will put a priority on the oversight of labor agreements, consumer choice and price transparency, and transportation safety for motor carriers, the rail industry and pipelines. Expect House Democrats to start infrastructure hearings as early as January, with the goal of passing a bill by May.

The Fixing America's Surface Transportation (FAST) Act is scheduled to expire on Sept. 30, 2020. The House and Senate are likely to begin holding stakeholder hearings in the coming year in preparation for final passage of a bill sometime in 2020. Absent passage of a new bill, the nation's long-term funding for highways, public transportation, motor carrier safety, hazardous material safety, rail and research programs will expire. The process of considering the bill will provide a forum for the discussion of a number of other ground transportation-related items, including the AV Start Act and other driverless vehicle provisions. Any significant increases in public transportation infrastructure investment must contend with the solvency of the Highway Trust Fund. Leaders in the Administration and on Capitol Hill have proposed a number of possible solutions, including gas tax increases, new user fees based on vehicle miles traveled, funding from the general treasury, and imposition of a carbon tax. Most of these proposals fall under the jurisdiction of the House Ways and Means and Senate Finance committees, which may not be prepared to enter the policy debate without strong leadership from the White House.

With the recent passage of the Federal Aviation Administration (FAA) Reauthorization Act, there is no immediate pressure on Congress to address airports or airlines or any number of other relevant transportation stakeholders in the 116th Congress. However, Members may choose to conduct oversight of the bill's implementation, especially in the House.

The Senate will also move forward with the confirmation of nominees to still-vacant appointments at the FAA, Department of Transportation, National Highway Traffic Safety Administration, Federal Transit Administration, Surface Transportation Board, Amtrak's Board of Directors, and the Metropolitan Washington Airport Authority's board.

Senate Authorization Committees

Sen. John Thune (R-SD) is expected to pursue a Senate leadership slot in the next Congress. If he is successful, it will open up the chairmanship of the Senate Commerce, Science, and Transportation Committee, with Sen. Roger Wicker (R-MS) probably next in line. On the Democratic side, Sen. Bill Nelson's (D-FL) election is too close to call at the time of publication of this document. Should he prevail, Nelson will remain the Ranking Member of Senate Commerce. If he loses, however, Sen. Maria Cantwell (D-WA) is a leading contender to replace him. Sen. Amy Klobuchar (D-MN) could then become Ranking Member on the Subcommittee on Aviation Operations, Safety and Security.

Sen. John Barrasso (R-WY) will move into his second term as Chairman of the Environment and Public Works (EPW) Committee next Congress with Sen. Tom Carper (D-DE) remaining as Ranking Member. As the EPW Committee has primary jurisdiction over reauthorization of the FAST Act (along with the Banking Committee for transit issues, and the Finance Committee on revenue and trust fund issues), the ability of these two leaders to work across party lines will greatly affect progress on infrastructure policy. This pairing also well represents the divergence of views from rural areas where population centers are separated by long, less-traveled highways and those who represent more urban areas with greater reliance on mass transit and commuter rail systems.

House Transportation and Infrastructure Committee

Rep. Peter DeFazio (D-OR) will move from Ranking Member to Chairman of the House Transportation and Infrastructure Committee. Democratic leadership on at least one subcommittee will change, as Rep. Mike Capuano (D-MA), the Ranking Member on the Subcommittee on Railroads, Pipelines, and Hazardous Materials, was defeated in a primary and will not return in the 116th Congress. Rep. Rick Larsen (D-WA) is expected to take over as Chairman of the Subcommittee on Aviation, where he currently serves as Ranking Member. Priorities for a DeFazio-led Committee will include pursuing ways to finance investments in infrastructure, shoring up the Highway Trust fund, raising the cap on the Passenger Facility Charge (PFC), investigating the Federal Bureau of Investigation's headquarters consolidation

project, conducting oversight of the Federal Aviation Administration Reauthorization Act of 2018 and scrutinizing the President's real estate business interests.

Leadership on the Republican side of the Committee is uncertain, as Chairman Bill Shuster (R-PA) is retiring at the end of the current Congress. Rep. Sam Graves (R-MO) and Rep. Jeff Denham (R-CA) are his most likely replacements. Most of the subcommittees on the Republican side will also experience leadership turnover. Rep. Frank LoBiondo (R-NJ), the Chairman of the Subcommittee on Aviation, and Rep. Lou Barletta (R-PA), the Chairman of the Subcommittee on Economic Development, Public Buildings and Emergency Management, are both leaving the House at the end of this Congress. Depending on who wins the race for Ranking Member, either Graves (Highways and Transit) or Denham (Railroads, Pipelines, and Hazardous Materials) will give up a subcommittee panel.

Senate Appropriations Committee

Sen. Susan Collins (R-ME) will retain the chairmanship of the Subcommit ee on Transportation, Housing, and Urban Development (T-HUD), with Sen. Jack Reed (D-RI) remaining as Ranking Member. Collins' priorities will include lifting the PFC cap.

House Appropriations Committee

Rep. David Price (D-NC), the Ranking Member of the T-HUD subcommit ee, is expected to take the gavel, switching roles with Rep. Mario Díaz-Balart (R-FL), the current Chairman. Price's priorities include transportation maintenance, integrated regional and multimodal transportation planning and development, and high-speed rail systems.

View from the States

Georgia

Georgia voters cast their ballots in large numbers with 60.4 percent turnout. As of early Wednesday morning, Georgia Secretary of State Brian Kemp (R) was leading in the race for governor, though the margin was only 75,000 votes out of 3.87 million that were cast. The Democrat in the race, Stacey Abrams, has not conceded and vows to stay in the race until outstanding votes, absentee ballots and provisional ballots are counted. Abrams' campaign believes once those are tallied, a runoff will occur. Georgia law requires that a candidate must receive 50 percent plus one vote in order to win an election. Notably, Libertarian Ted Metz took .94 percent of the votes in the race for Governor. There will be a runoff for Secretary of State and Public Service Commission, though the remaining constitutional offices remained Republican.

Key Takeaways

- Georgia has been ranked as the #1 state in the nation in which to do business for the past six years and voters decided to continue this momentum
- GOP remains in control of House and Senate
- Likely GOP control of Governor

Governor

If Kemp emerges as the winner, Georgia would remain under total GOP control for at least the next two years. Rural Georgia was key to Kemp's success as voters outside of metro Atlanta overwhelmingly supported his candidacy. Kemp would be sworn in to office when the legislative session convenes on Jan. 14, 2019. Kemp's campaign focused on continuing current Republican Gov. Nathan Deal's legacy and keeping Georgia's status as the best state for business. Kemp would first focus on appointing agency heads and crafting a budget for his first year in office. As for Abrams, even if she falls short in the race for Governor, she is worth watching in the future as a star of the Democratic Party both statewide and nationally.

The GOP maintained control of almost every constitutional office with Lt. Gov. Geoff Duncan, Attorney General Chris Carr, and Agriculture Commissioner Gary all winning their races on Tuesday. State House Rep. Brad Raffensperger (R) and former Rep. John Barrow (D) will head to a runoff for Secretary of State. This election was crucial to the future control of the state as Kemp and the GOP-controlled Assembly will oversee redistricting in 2021 after the 2020 census is completed.

State Senate

Unlike the House, the makeup of the State Senate saw little change from yesterday's election. The GOP controlled 36 of 56 Senate seats and only lost two seats. The most competitive seats were in the Atlanta metro area, reflecting the trend toward Georgia turning purple. The more rural Senate districts continue to be overwhelmingly Republican. For the first time in 12 years,

the Senate will have a new presiding officer with Lt. Gov. Geoff Duncan taking the gavel. Duncan will replace current Republican Lt. Gov., Casey Cagle, who lost to Kemp in the GOP primary for Governor. The Senate leadership will likely remain the same with Senate President Pro Tempore Butch Miller (R) in charge of Senate Republicans.

State House

Most, if not all, of the competitive races were in the metro counties of Fulton, Cobb, and Gwinnett and saw a number of incumbents lose their seats. The House will see several new members when the 2019 session convenes on Jan. 14. House Republicans controlled 114 seats prior to election day and saw their number reduced by 10, leaving them with 104 members. This year, twelve sitting Chairmen announced their retirement or resignation, so Speaker David Ralston (R) will be busy appointing new members to Chairmanships as well as electing a new Majority Whip. The House has spent the past two years traveling the state to discuss the challenges of rural Georgia so expect to see a legislative effort focused on rural Georgia in the 2019 session.

Summary

Georgia voters came out in large numbers to vote. It appears likely Brian Kemp will edge out Stacey Abrams, meaning Georgians are hoping the state will continue to run as it has under retiring Governor Deal's leadership. With control of the Governor's office, House and Senate, the Republicans will be able to pursue their agenda with few obstacles in January. Their agenda is likely to include statewide highspeed broadband access, growing small businesses, teacher pay increases, and access to healthcare in rural areas.

Illinois

Illinois was the site for several targeted Congressional races and contested statewide elections, including an expensive race for Governor. Democrats scored big victories as they won every statewide office, picked up two new Congressional seats, two seats in the Illinois Senate and six seats in the State House of Representatives, with two additional seats in the state House too close to call. The results in Illinois were a tale of two electorates - the City of Chicago along with its close-in suburbs and the rest of the state. High voter turnout in and around Chicago served to help boost Democrats to victory in statewide and legislative races. Four of the most heavily contested races for the U.S. House were in Illinois. Two districts in the Chicago area switched from the Republicans to Democrats, while two districts farther away from Chicago remained in Republican hands.

Key Takeaways

- Blue wave was felt in elections around Illinois
- Two GOP congressional seats won by Democrats
- Dems take Governor's office with Pritzker win
- High voter turnout in Chicago, Cook county and Chicago suburbs
- Attention turns to Chicago elections for mayor and council

Governor

The most expensive campaign in Illinois history was the race for Governor between incumbent Republican Gov. Bruce Rauner and Democrat J.B. Pritzker. Pritzker declared victory on election night with a projected 54 percent of the vote to Rauner's 39 percent. Rauner was never able to gain steam due to voter fatigue over his four year fight with the General Assembly and Governor-elect Pritzker's ability to spend more in the race than Rauner. Pritzker poured $170 million of his personal wealth into the race. Almost $250 million in total was spent on the race.

Statewide Races

The closest statewide election was the race for Attorney General between Democrat Kwame Raoul, a State Senator from Chicago, and Erika Harold, an attorney and former Miss America from downstate Urbana. Harold asserted that she would be the only check on complete Democratic control of state government. Both sides spent heavily on the race but Raoul prevailed by a margin of 54 percent to 43 percent.

Other contested statewide elections included races for Comptroller, Treasurer and Secretary of State, with all three incumbent Democrats winning handily. Predictions are that Comptroller Susana Mendoza will announce her intention to run for Mayor of Chicago in the coming days.

State Senate

The Chicago suburbs saw the most action in Senate races where Democrats attempted to increase their super-majority by defeating incumbent and appointed Republicans. Democrats had a significant cash advantage throughout the campaign. The GOP had hoped to benefit from campaign donations from Gov. Rauner, but his contributions never materialized. This cash advantage, along with a favorable makeup of the seats up for election, resulted in the Senate Democrats picking up two seats. The makeup of the Senate will be 39 Democrats and 20 Republicans.

State House

All House seats in the state were up for election in 2018. Both House caucuses were confronted with two distinct electorates that could generally be defined by opinion of President Trump. In Chicago and the close in suburbs (or "collar counties") antipathy toward Trump ran high, creating significant headwinds for Republican candidates. Alternatively, downstate saw an electorate more supportive of Trump creating challenges for Democrats. Complicating this for Republicans was the poor showing by Gov. Rauner, whose inability to reach agreement with a Democratic legislature on budgets lead to widespread voter dissatisfaction with Republicans. Democrats in the House, led by longtime House Speaker Michael J. Madigan, were able to vastly outraise and outspend Republicans in almost every contest across the state. This financial advantage allowed Democrats to play offense in a number of GOP districts, resulting in Democratic gains of six seats, with two other seats too close to call.

Summary

Democrats will control the Governor's office and both chambers of the General Assembly in the upcoming session. Expectations will be heightened for a capital spending bill including infrastructure improvements around the state. The sources of new revenue will likely be a major point of contention in any new capital spending plan.

Iowa

Iowa has a reputation for reelecting incumbents, particularly at the federal and gubernatorial levels. While that trend held with the reelection of Governor Kim Reynolds (R) and Republicans keeping control of the State Legislature, two of Iowa's four incumbent Members of Congress were defeated. Reps. Rod Blum (R) and David Young (R) both lost to Democratic Challengers.

Among the issues to be considered for next year's Iowa General Assembly are likely to include personal and corporate tax reform, changes to Iowa's Medicaid system, access to mental health services, infrastructure, and water quality.

Key Takeaways

- Iowa Republicans maintained control of the state legislature
- Three of Iowa's four Congressional Seats now held by Democrats
- Kim Reynolds (R) is the first woman in Iowa's history to be elected governor

Governor

Current Gov. Kim Reynolds (R) was elected as Iowa's first elected female governor, defeating Des Moines businessman Fred Hubbell (D) by a margin of 50 to 47 percent. Reynolds assumed the governorship after Gov. Terry Branstad (R) resigned to become U.S. Ambassador to China. The race was not an easy win for Reynolds, as Hubbell brought extensive private sector and government service to the race, proved to be a prolific fundraiser, and spent over $6 million of his own money. Hubbell's fundraising helped even the financial playing field, which typically favor incumbents, to make the race highly competitive.

Congress

There are now more Democrats in Iowa delegation than Republicans. State Rep. Abby Finkenauer (D) defeated Blum and Cindy Axne (D) defeated Young (R). From the outset, Blum trailed Finkenauer in all public polling. Not convinced that Finkenauer would prevail until it was too late, national groups came to rescue Blum by investing substantial resources on his behalf in the final weeks of the campaign. Axne defeated incumbent David Young in Iowa's third district by 5,000 votes, winning 49 to 47 percent. This is the fourth time in six years this seat has changed hands. In two other congressional races, incumbents prevailed, with Dave Loebsack (D) and Steve King (R) beating Democratic challengers. King's race was highly targeted by Democrats to no avail.

State Senate

Republicans strengthened their majority in the Senate, with only half of the Iowa Senate seats up for reelection. Six of the races were open, while 10 races had Democratic incumbents and

nine races had Republican incumbents. Despite a difficult race of his own, Majority Leader Jack Whitver (R) led his caucus to an impressive victory, winning all but one Republican incumbent race and picking up three additional seats. Going into 2019, Republicans hold a 32 to 18 majority in the Senate. The leadership in the Senate is not expected to change with Majority Leader Whitver and Senate President Charles Schneider (R) remaining in their positions.

State House

Prior to the election, Republicans had a 59 to 41 majority in the Iowa House of Representatives. Confidence was high that Democrats would pick up seats in the House and possibly even the majority, but that proved to be too steep hill to surmount. After a hard-fought election, Republicans maintained a 54 to 46 majority. As with the Senate, House Leadership is expected to remain the same with Speaker Linda Upmeyer (R) and Majority Leader Chris Hagenow (R) leading the Republican caucus.

Other Statewide Races

Several other statewide races were highly competitive with both parties spending substantial resources. Republican incumbents Mike Naig and Paul Pate prevailed in the races for Secretary of Agriculture and Secretary of State, respectively. Democratic newcomer Rob Sand defeated Mary Moisman (R) in the race for State Auditor, while two Democratic incumbents, current Attorney General Tom Miller and State Treasurer Mike Fitzgerald, were reelected to their offices.

2020 Presidential Election

As the first state in the presidential primaries, Iowa voters have already been introduced to an array of Democratic candidates considering or who have already declared presidential bids. Potential 2020 candidates who have visited Iowa include Sen. Cory Booker (D-NJ), Sen. Amy Klobachar (D-MN), Sen. Kamala Harris (D-CA), Sen. Jeff Merkley (D-OR), Gov. Steve Bullock (D-MT), former Gov. Terry McAuliffe (D-VA), Gov. John Hickenlooper (D-CO), Rep. John Delaney (D-MD), Rep. Tim Ryan (D-OH), LA Mayor Eric Garcetti, billionaire Tom Steyer, lawyer Michael Avenatti and former Vice President Joe Biden.

In the 2016 presidential election, Iowa selected Donald J. Trump over Sec. Hilary Clinton by 10 points. The swing toward Democrats in the Congressional elections this year may indicate that Iowa could be open to Democrats taking it in the 2020 presidential. What's certain is that Iowa will maintain its status as a critical state in both the presidential primary and general elections.

Louisiana

Louisiana's Congressional Delegation, which includes Majority Whip Steve Scalise, was reelected with minimal opposition. On the ballot were several municipal elections, six constitutional amendments, and a special election to fill the seat of Secretary of State, as the previous occupant resigned over a sex scandal. Interim Secretary of State Kyle Ardoin (R) and Gwen Collins-Greenup (D) will meet in a runoff election on Dec. 8. Louisiana is one of several states with off-year elections, setting up 2019 as a pivotal year for the state to be a focus of national attention. U.S. Sen. John Kennedy (R) will announce by Dec. 1 whether he will run for Governor next year.

Key Takeaways

- State elections will be held in 2019
- Six vacancies in the State House due to members winning races for local office
- Lack of interest in running for office (a third of major offices on the previous ballot were decided without opposition)-expect this trend to continue

Congressional

With Democrats controlling the U.S. House, Rep. Cedric Richmond, the state's lone Democratic member, is poised to play a key role either in shaping his party's leadership. He is finishing his term as chair of the powerful Congressional Black Caucus (CBC) and last week sent a letter to the full Democratic Caucus stating that one of the top two positions (Speaker of the House or Majority Leader) should come from the CBC. For Republicans, Rep. Steve Scalise will likely continue in his role as the party's Whip, the number two position in leadership behind Minority Leader. The prevailing thinking is that there is no scenario where Scalise runs for Governor next year.

Governor

Democratic Gov. John Bel Edwards is expected to run for reelection and currently has a 60 percent favorability and in excess of $5 million in his campaign account. Wealthy businessman Eddie Rispone announced he will run for governor and has contributed $5 million of his personal wealth towards his efforts so far. Other Republicans reportedly considering bids for governor include Sen. Kennedy, Rep. Ralph Abraham, Attorney General Jeff Landry, and State Senator Sharon Hewitt. Sen. Kennedy released a poll in October showing him with a sizable lead over Edwards in a hypothetical match up.

The Legislature

Under Louisiana's jungle primary system, all candidates appear on the same ballot, regardless of party, and voters may vote for any candidate, regardless of their party affiliation. If no candidate

receives a majority of the votes during the primary election on Oct. 12, 2019, a runoff election will be held on Nov. 16, 2019, between the top two candidates in the primary.

While Republicans are bullish on growing their majorities in both chambers of the legislature, that optimism does not necessarily translate to the gubernatorial race. The campaign for governor is likely to be a heated and costly affair with the potential for national groups to put heavy resources into the state.

The biggest issues to be considered after the 2019 election will be the contemplation of a constitutional convention, congressional and legislative redistricting, and an anticipated state budget reform agenda.

State Senate

Term limits will force 16 of the state's 39 state senators to retire, although some may run for another office. At least two have already announced their intention to run for the state House of Representatives, moving back to the "lower" chamber. Only one seems to be interested in pursuing a statewide office. There will be significant jockeying for leadership of the Senate leading up to the 2019 election as current Senate President John Alario (R) is term-limited.

State House

As a result of State Representatives running for other offices, there will be at least six vacancies in the State House. Marcus Hunter and Chris Hazel became judges, Kenny Havard and Major Thibaut became Parish Presidents, Jeff Hall became a Mayor, and Bob Hensgens won a special election to become a State Senator.

Much like the Senate, the state House will also see the effects of term limits, which will force 34 of the 105 Representatives to retire or move on. Several will likely seek state Senate positions, but none have thus far expressed interest in running statewide. Interestingly, there have been 14 resignations or vacancies since Jan. 2016, the beginning of this term.

Maryland

Even though Maryland is a predominantly Democratic state, incumbent Republican Gov. Larry Hogan defeated Democratic challenger Ben Jealous by 13 points, marking the first time in half a century that a Republican governor has won reelection in Maryland. Maryland's Congressional Delegation had one open seat—won by Democrat David Trone—and the rest of the delegation won their bids for re-election.

Key Takeaways

- Incumbent Gov. Hogan (R) defeats Democrat Jealous with 56 percent
- GOP gains one seat in Senate, but Democrats keep veto-proof majority
- Democrats gain at least five seats in state House

In the General Assembly, Republicans made picked up one Senate seat and Democrats gained at least five in the House. Democratic majorities retain the ability to override Gov. Hogan's vetoes in both chambers. The Senate will see significant turnover in its leadership and Committee Chairs. Both Sen. Mike Miller and Del. Mike Busch will likely retain their gavels as the Presiding Officers of the Senate and House respectively.

Governor

Gov. Hogan won with an impressive 56 percent of the vote, defeating Democrat Ben Jealous. Hogan maintained a 67 percent approval rating among Marylanders, making him one of the most popular governors in the nation. Hogan enjoyed wide support from both the GOP and moderate Democrats in Maryland who approve of his across-the-aisle politics. Interestingly, Ben Jealous received more votes in this election than either Larry Hogan or his opponent Anthony Brown did in 2014, but he still lost overwhelmingly to the popular incumbent governor.

Hogan is likely to remain focused on issues such as tax relief, combatting Maryland's opioid crisis, and developing the Purple Line light rail in Montgomery County. The Hogan Administration will also seek increased public education funding and prioritize Chesapeake Bay restoration efforts. Hogan will be sworn in for a second term on Jan. 16, 2019.

State Senate

The Maryland Senate experience nearly 40 percent turnover in 2019 due to retirements and election results. Republicans sought to flip five seats, which would have blocked the Democrats' 29-vote supermajority in the Senate. While three Senate races still hinge on a difference of less than 1 percent, the chamber will still be strongly controlled by the Democrats. The Senate President has announced the four Major Standing Committee Chairs and Vice Chairs, with other assignments announced before Jan. 9.

State House

With the addition of at least five new Democratic held seats, Speaker Busch reversed the trend of declining Democratic seats since the early 2000s. A shakeup in the House is coming as a result of longtime Judiciary Committee Chairman Joe Vallario's defeat, Vice Chair of Economic Matters Sally Jameson's retirement, and Majority Leader Bill Frick leaving to run for Montgomery County Executive. The Speaker has announced that Del. Luke Clippinger will take over as Chairman of the Judiciary Committee and Del. Vanessa Atterberry as Vice Chair. Del. Kathleen Dumais will become Majority Leader.

The House will tilt more liberal than in the past which may contrast with Speaker Busch's less progressive agenda. The House will try to find common ground with Gov. Hogan to address challenges such as funding for K-12 education, health care costs, the opioid crisis, construction and infrastructure needs, and retiree health and pension benefits.

Summary

While Maryland is currently enjoying a comfortable budget surplus from a strong economy, expect Gov. Hogan to be pressured by the legislature to move forward with significant increases to education and other funding priorities.

Maryland's Congressional Delegation will become a significant factor in federal issues as the U.S. House of Representatives moved under Democratic control. Gov. Hogan has maintained an arm's length relationship with President Trump, yet federal actions play such a significant role in Maryland's economy that he will likely find it necessary to work more closely with the Delegation. Of note, Rep. Steny Hoyer (D) could again be elected Majority Leader and Rep. Elijah Cummings (D) will become Chairman of the House Committee on Oversight and Government Reform, where much of the Democrats efforts to hold Trump Administration accountable will occur.

Mississippi

Mississippi becomes the focus of national attention as it prepares for a U.S. Senate race to be decided in a runoff election Nov. 27. With only federal contests on the ballot this year, citizens of the Magnolia State had the rare opportunity to cast a vote in two U.S. Senate contests. Other Congressional incumbents easily won election as did the GOP candidate for an open House seat.

Key Takeaways

- Nov. 27 runoff election to fill remainder of Sen. Cochran's term
- 2019 elections for all statewide and legislative districts
- Major turnover among statewide offices in 2019

Rep. Bennie Thompson, the lone Democrat in the state's Congressional delegation, is poised to have a major role in the new House Majority as chairman of the Homeland Security Committee. In the Senate, the race to finish the remainder of Sen. Thad Cochran's term will go to a runoff between the incumbent Republican Sen. Cindy Hyde-Smith and former Democratic Rep. Mike Espy. Incumbent Sen. Roger Wicker easily won reelection and will likely take the gavel at the powerful Senate Commerce, Science and Transportation Committee.

Governor

In 2019, Mississippi will hold elections for all statewide, legislative, and local elected officials. A new governor will be elected as Republican Governor Phil Bryant is term limited from seeking reelection. Incumbent Republican Lt. Gov. Tate Reeves is likely to face off against Democratic Attorney General Jim Hood, in what will be a highly contested race. Hood is the only statewide elected Democrat and both he and Reeves should be well-financed for the 2019 campaign. In addition to a new Governor, it is expected many other statewide elected officials will turn over as well. The Lt. Gov., Attorney General, Secretary of State, and Treasurer are all likely to have new occupants in those offices. Republican State Auditor Shad White and Agriculture Commissioner Andy Gipson, who were both appointed by Gov. Phil Bryant to fill the remaining term of their respected vacated offices, will be testing their names on the statewide ballot for the first time. In addition, new faces are expected at the Public Service Commission and possibly the Mississippi Transportation Commission.

The Legislature

While the past three years have been relatively eventful given Republican supermajorities in both the House and Senate, the 2019 legislative session is not expected to include much contentious legislation. Expect a relatively quiet legislative session, outside of the customary appropriation bills that are passed on an annual basis. Among the few items which could bring lengthy debate are the ability for electric cooperatives to sell broadband services to its members

and the potential for a statewide teacher pay raise. Much attention will be focused toward the Mar. 1, 2019, filing deadline for legislative and statewide candidates.

State Senate

Mississippi Republicans currently hold a 33-19 supermajority in the state Senate and expect to maintain a majority following the 2019 elections. While several state Senators have already announced retirement or are seeking a higher office, those districts are expected to remain in Republican control. With Lt. Gov. Tate Reeves being term limited, a new president of the Senate will take the gavel in 2020. It is worth noting that Mississippi's Lt. Gov. has impressive constitutional authority and is empowered to appoint all Senators to each committee, appoint a Committee Chair irrespective of the majority party, and refer all bills to committee(s) of his or her choosing. One of the nation's longest serving legislators, Sen. Tommy Gollott is expected to run for reelection after 52 years in the Mississippi Legislature. Gollott, who has served in both the House and Senate has long dominated the political scene of the Mississippi Gulf Coast.

State House

Republicans have a 74 to 48 supermajority in the state house. The House of Representatives has seen quite a few members leave the chamber over the past few years due to resignations, retirements, or movement to higher office. Additional turnover is likely to continue with the 2019 elections; however, Republicans anticipate maintaining a majority for the 2020 session as well. Two-term Speaker of the House, Phillip Gunn, should remain the top House Republican in the next term and the majority of Republicans with powerful chairmanships are expected to return as well.

Texas

Texas voters continued a trend started in 1998 by electing Republicans to all 27 statewide offices. Resources and voter turnout activities for the Republican Governor and Lieutenant Governor campaigns spilled over to help carry incumbent Sen. Ted Cruz to victory. National attention and record fundraising for Democratic Rep. Beto O'Rourke's Senate bid, combined with President Trump's tepid 50 percent approval rating in Texas, forced Republicans to play defense to protect Cruz.

Key Takeaways

- GOP sweeps all statewide offices
- Sen. Ted Cruz re-elected
- Republicans maintain supermajority in state Senate
- GOP loses 12 State House seats but keeps majority

Campaign spending and turnout levels in Texas reached historic levels as hundreds of millions of dollars went towards a handful of competitive races. The three highest profile incumbents, Gov. Greg Abbott, Lt. Gov. Dan Patrick, and Sen. Cruz all emphasized the state's strong business climate—specifically in the energy sector, and the low tax and light regulatory environment for all sectors—in their appeals to voters. Overall turnout nearly reached 2016 presidential levels and Rep. O'Rourke came within three points of being the first Texas Democrat elected to the U.S. Senate since Lloyd Bentsen in 1988.

Governor

Gov. Abbott sailed to reelection by 14 points against a poorly-funded Democratic challenger, former Dallas County Sheriff Lupe Valdez. Gov. Abbott remains the most popular statewide elected official and one of the most popular governors in the country with an approval rating of 57 percent. He will be sworn in on Jan. 15. Despite the retirement of his occasional nemesis, House Speaker Joe Straus (R), Abbott is likely to face a contentious legislative session that will focus on issues such as school finance, property taxes, Medicaid spending, public education, college affordability, and use of the state's Rainy-Day Fund.

Gov. Abbott's hand in dealing with the Legislature will be somewhat strengthened by his convincing win and continued popularity (particularly with Republicans), as well as his efforts to protect down ballot candidates. However, he took the unprecedented step of endorsing and donating money to the primary challengers of three Republican incumbents in the Texas House of Representatives. Only one of his endorsed challengers beat the incumbent, and, as a result, Abbott has lost political capital. Abbott's ability to move his political agenda will largely depend on who the next Speaker is and whether the Governor is able to repair frayed relationships.

State Senate

The Texas Senate will seat 19 Republicans and 11 Democrats, a net loss of one seat for Republicans, who picked up a Democratic seat in a west Texas special election while losing two seats on Election Day. Lt. Gov. Dan Patrick (R) won re-election with just 51 percent of the vote but will exercise more authority in the Senate than in previous sessions as Republicans maintain the supermajority needed to advance their agenda.

Expect efforts to lower the franchise and property taxes, as well as enactment of a fiscally conservative state budget that still provides funding for infrastructure projects. Legislation to strengthen border security, reform school finance, and push controversial social issues will be on the agenda. Hovering over the entire legislative session will be the Hurricane Harvey recovery effort and related funding questions. Leadership has committed to spending some of the Rainy-Day Fund on this effort. The level of funding will depend on how much federal money is available and other competing demands placed on the fund.

State House

The House saw the most pronounced down ballot effect of O'Rourke's popularity in the state, with12 Republican incumbents losing their seats. The Republican-Democrat split in the House will move from 95 to 55 currently to 83 to 67 in the coming year, with most of the Republican casualties occurring in two large population centers, Houston and Dallas.

For the first time in a decade the House will be amid a high-profile Speaker's race brought on by the retirement of Speaker Joe Straus (R). Candidates for Speaker have been jockeying for votes from their colleagues and no consensus favorite has emerged yet. Since the Speaker appoints Committee Chairs and determines which legislation will move forward, it is difficult to divine exactly what the House agenda will be during the next session. Look for property tax relief, school finance reform, Medicaid expansion, debt obligations for state pensions, retiree health care, and infrastructure to be among priority items considered.

Appendix E – Key Trends

Interesting Data Points from the 2018 Elections:

- An estimated 113 million Americans voted in the 2018 midterm elections.
- 49% of eligible voters participated. In the last midterm election of 2014, only 36.4% of eligible voters participated.
- Projections indicate **2018 will be the most expensive midterm in history** with more than $5 billion spent.
- Women cast an estimated 52% of all votes. Women voted Democratic over Republican by almost 20% according to exit polling.
- Nearly a dozen congressional candidates raised more than $25 million during the 2018 cycle. 37 House Democratic candidates raised more than $4 million.
- A record 476 women filed to run for the House this cycle, shattering the previous all-time high of 298. A record 235 women won their party's nomination, and at least **96 women were elected to the House on Tuesday, an all-time high. The 116th Congress will see at least 117 women in office, also an all-time high**. Women currently make up approximately 20 percent of the 115th Congress (107 women—84 in the House and 23 in the Senate)—that figure will jump to at least 22 percent in the 116th.
- **More non-incumbent women were elected to Congress than ever before** (at least 31).
- If Nancy Pelosi (D-CA) retakes the Speaker's gavel, **she will be the first person to reclaim the position since Sam Rayburn in 1955.**
- Midterm elections generally move in the same direction. **The last midterm election where the President's party lost seats in one chamber of Congress but gained seats in the other occurred in 1982**, when Republicans lost 27 seats in the House and picked up a seat in the Senate.

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service
Region 2 Weekly Report

Through 9 November, 2018

Media Contacts

Title/Issue	Anticipated Publication Date	Current Status
The Arizona Republic	TBD	Producing article about Mt. Graham red squirrel population – namely the increase from 35 after the Fyre Fire to 67 in the most recent survey. Our expert Marit Alanen responded.
Cronkite News at Arizona PBS	TBD	Recorded TV interview regarding the Animal and Plant Health Inspection Service program that utilized the tamarisk leaf beetle for biological control of saltcedar in riparian areas and the effects it has had on the southwestern willow flycatcher. Flycatcher lead Greg Beatty is being interviewed.
Book author Peter Christie	TBD	Seeks to interview retired SAC Nick Chavez on illegal trade in exotic pets. Declined. Referred to Amy Jonach in HQ.
The Nation Magazine, John Washington	Mid November	Contacted Cabeza Prieta NWR regarding statistics on Rescue Beacons. Forwarded to U.S. Customs and Border Protection.

Book author Larkin Powell	TBD	Seeks information on warbler and vireo and birding near Ft. Hood for book manuscript on birding in the Plains states.
Arizona Highways Magazine	Fall/winter 2018	Writer is researching ocelots in Arizona and Arizona's possible contribution to species recovery.
Jimmy Tobias, freelance writer	TBD	Reporter contacted FWS inquiring about the lesser prairie-chicken and if the FWS had provided a species status recommendation to DOI.
Dean Russell Columbia Journalism School	TBD	Mexican wolf recovery and cross fostering
Sierra Magazine	TBD	Reporter contacted Valle de Oro NWR Refuge Manager for a story on the benefits of diversity of staff and programing

Week Ahead Schedule of Meetings, Hearings, and Travel

Nothing significant to report.

Endangered Species Act Recovery Actions

[*UPDATE*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late October. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[*NEW*] Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media is planned. Target date for submitting to the *Federal Register* is mid-December 2018.

Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. (See related DSL CCA/A entry in Recovery section below.)

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register, (awaiting DOI approval), a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike,

Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has submitted a permit application and a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the current Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA is currently being reviewed by FWS staff for biological sufficiency.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

engages children who are learning about nature virtually from a classroom, hospital room or medical facility. Recently, nearly 500 youth (ranging from 2nd to 5th grade) from 16 classes across Texas participated in the virtual nature program, including participants from a facility that serves sexually abused youth and their families.

Tishomingo National Wildlife Refuge in Oklahoma hosted a two day Youth Only controlled white-tailed deer hunt. Hunters under the age of sixteen were selected in a random drawing by the Oklahoma Department of Wildlife Conservation for this special hunt. Seventeen young hunters and their adult advisors turned out for the event, undaunted by the extreme rains and high water levels currently experienced at the Refuge. Eight deer were harvested, 7 doe and 1 buck. The hunt is sponsored by the U.S. Fish & Wildlife Service in partnership with the Oklahoma Department of Wildlife Conservation and offers young people a safe and meaningful hunting opportunity.

Deep Fork National Wildlife Refuge in Oklahoma and the Friends of Deep Fork hosted its first Blue Goose Day at the Refuge on October 20th. The Refuge partnered with the Oklahoma Department of Wildlife Conservation, Okmulgee High School National Honor Society, staff from other nearby Refuges and ES Offices, and local businesses to provide a day of outdoor recreation including constructing take home blue bird boxes, fishing for bluegill and catfish, identifying animal tracks, and practicing their aim at 3-D targets on the archery range. The Friends Group provided lunch and materials for the bluebird boxes. The Refuge provided equipment free to use (bows, arrows, bait, fishing poles, etc.) and the Oklahoma Department of Wildlife Conservation stocked the refuge pond with bluegill and provided additional fishing poles so participants could engage in angling, some for the first time. Each child received a free t-shirt and cup for coming to the event. The event and all activities were free and open to everyone. With a focus on family activities, staff commented that a majority of the attendees had never been to the refuge before. Approximately 75 people attended.

On Saturday October 20th, 2018, 20 volunteers with the Arizona Chapter of Safari Club International (AZSCI) volunteered their time and effort to prepare a group campsite on Buenos Aires NWR. The purpose of the group site is to support Big 6 activities. The creation of the site was to facilitate hosting the AZSCI and AZ Game and Fish Department (AZGFD) youth deer hunt camp on the refuge. This will help to promote youth hunter recruitment and retention as well as improve our partnership with AZGFD.

On November 6-7, Aransas National Wildlife Refuge in south Texas will host 25 veterans from the San Antonio, TX area at the first annual "Casting with Patriots" event sponsored by the U.S. Fish and Wildlife Service, Salvation Army, Bass Pro Shops, and Cabela's. The veterans will learn about America’s National Wildlife Refuges and their wildlife heritage. The focus of the event will be providing them opportunities for fishing both at the Refuge fishing pier and with

locally guided boats. For their convenience, the Refuge is also offering the veterans to stay in the Youth Environmental Training Area.

The U.S. Fish and Wildlife Service's Coastal Program in the Southwest Region is working with Duck Unlimited and the state of Texas to address barriers to individuals with disabilities for access to hunting opportunities. The Service and its partners hope to provide accessible infrastructure such as hunting blinds, boardwalks, and parking for migratory bird hunting sites on national wildlife refuges and state wildlife management areas along the Gulf Coast of Texas. Partners are currently in initial meetings and planning stages. The Service will provide updates as the project moves forward.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

To: PIC-PIO@listserv.gsa.gov

PIOs,

This morning, the President's FY 2018 Budget Blueprint was sent to Congress. The FY18 Blueprint includes an outline of the Administration's management priorities to make the Federal government operate more effectively, efficiently, and securely. As discussed in the Blueprint (excerpt is attached) the forthcoming President's Management Agenda (PMA) will set goals and take action to ensure that by 2020 we will be able to say:

- Federal agencies are managing programs and delivering critical services more effectively.
- Federal agencies are devoting a greater percentage of taxpayer dollars to mission achievement rather than costly, unproductive compliance activities.
- Federal agencies are more effective and efficient in supporting program outcomes.
- Agencies have been held accountable for improving performance.

OMB is currently developing guidance for implementing the workforce reduction plan and

recently released government reorganization EO, which will be aligned with the budget and performance timelines over the coming year. We look forward to engaging with you in the coming weeks and months to establish reform priorities and measures to track progress.

Best,

Dustin

MANAGEMENT

Making Government Work Again

The Federal Government can—and should—operate more effectively, efficiently, and securely. For decades, leaders on both sides of the aisle have talked about the need to make Government work better. The President is taking bold action now to make Government work again for the American people.

As one of his first acts as President, on January 23, 2017, the President issued a memorandum imposing a Federal "Hiring Freeze" and requiring a long-term plan to reduce the size of the Federal Government's workforce. In addition, on March 13, 2017, the President signed Executive Order 13781 establishing a "Comprehensive Plan for Reorganizing the Executive Branch," which set in motion the important work of reorganizing executive departments and agencies. These two actions are complementary and plans should reflect both Presidential actions. Legislation will be required before major reorganization of the Executive Branch can take place, but the White House is best situated to review and recommend changes to the Congress. In roughly a year, the Congress will receive from the President and the Director of the Office of Management and Budget (OMB) a comprehensive plan for reorganization proposals. The White House will work closely with congressional committees with jurisdiction over Government organization to ensure the needed reforms actually happen.

Simultaneously, the Administration will develop the President's Management Agenda focused on achieving significant improvements in the effectiveness of its core management functions. The President's Management Agenda will set goals in areas that are critical to improving the Federal Government's effectiveness, efficiency, cybersecurity, and accountability. The Administration will take action to ensure that by 2020 we will be able to say the following:

1. **Federal agencies are managing programs and delivering critical services more effectively.** The Administration will take an evidence-based approach to improving programs and services—using real, hard data to identify poorly performing organizations and programs. We will hold program managers accountable for improving performance and delivering high-quality and timely services to the American people and businesses. We will use all tools available and create new ones as needed to ensure the workforce is appropriately prepared.

2. **Federal agencies are devoting a greater percentage of taxpayer dollars to mission achievement rather than costly, unproductive compliance activities.** Past management improvement initiatives resulted in the creation of hundreds of guidance documents aimed at improving Government management by adding more requirements to information technology (IT), human capital, acquisition, financial management, and real property. Furthermore, these Government-wide policies often tie agencies' hands and keep managers from making commonsense decisions.

As a result, costs often increase without corresponding benefits. The Administration will roll back low-value activities and let managers manage, while holding them accountable for finding ways to reduce the cost of agency operations. As part of this effort, OMB will review requirements placed on agencies and identify areas to reduce obsolete, low-value requirements.

3. **Federal agencies are more effective and efficient in supporting program outcomes.** Delivering high-performing program results and services to citizens and businesses depends on effective and efficient mission support services. However, despite years of efforts to improve these critical management processes, managers remain frustrated with hiring methodologies that do not consistently bring in top talent, acquisition approaches that are too cumbersome, and IT that is outdated by the time it is deployed. The Administration will use available data to develop targeted solutions to problems Federal managers face, and begin fixing them directly by sharing and adopting leading practices from the private and public sectors. Among the areas that will be addressed are how agencies buy goods and services, hire talent, use their real property, pay their bills, and utilize technology.

4. **Agencies have been held accountable for improving performance.** All Federal agencies will be responsible for reporting critical performance metrics and showing demonstrable improvement. OMB will also regularly review agency progress in implementing these reforms to ensure there is consistent improvement.

Through this bold agenda, we will improve the effectiveness, efficiency, cybersecurity, and accountability of the Federal Government and make government work again.

GENERAL NOTES

1. All years referenced for economic data are calendar years unless otherwise noted. All years referenced for budget data are fiscal years unless otherwise noted.
2. At the time of this writing, only one of the annual appropriations bills for 2017 had been enacted (the Military Construction and Veterans Affairs Appropriations Act), as well as the Further Continuing and Security Assistance Appropriations Act, which provided 2017 discretionary funding for certain Department of Defense accounts; therefore, the programs provided for in the remaining 2017 annual appropriations bills were operating under a continuing resolution (Public Law 114-223, division C, as amended). For these programs, references to 2017 spending in the text and tables reflect the levels provided by the continuing resolution.
3. Details in the tables may not add to the totals due to rounding.

AMERICA FIRST

Beginning a New Chapter of American Greatness

A MESSAGE TO THE CONGRESS OF THE UNITED STATES:

The American people elected me to fight for their priorities in Washington, D.C. and deliver on my promise to protect our Nation. I fully intend to keep that promise.

One of the most important ways the Federal Government sets priorities is through the Budget of the United States.

Accordingly, I submit to the Congress this Budget Blueprint to reprioritize Federal spending so that it advances the safety and security of the American people.

Our aim is to meet the simple, but crucial demand of our citizens—a Government that puts the needs of its own people first. When we do that, we will set free the dreams of every American, and we will begin a new chapter of American greatness.

A budget that puts America first must make the safety of our people its number one priority—because without safety, there can be no prosperity.

That is why I have instructed my Budget Director, Mick Mulvaney, to craft a budget that emphasizes national security and public safety. That work is reflected in this Budget Blueprint. To keep Americans safe, we have made tough choices that have been put off for too long. But we have also made necessary investments that are long overdue.

My Budget Blueprint for 2018:

- provides for one of the largest increases in defense spending without increasing the debt;
- significantly increases the budget for immigration enforcement at the Department of Justice and the Department of Homeland Security;
- includes additional resources for a wall on the southern border with Mexico, immigration judges, expanded detention capacity, U.S. Attorneys, U.S. Immigration and Customs Enforcement, and Border Patrol;
- increases funding to address violent crime and reduces opioid abuse; and
- puts America first by keeping more of America's hard-earned tax dollars here at home.

The core of my first Budget Blueprint is the rebuilding of our Nation's military without adding to our Federal deficit. There is a $54 billion increase in defense spending in 2018 that is offset by targeted reductions elsewhere. This defense funding is vital to rebuilding and preparing our Armed Forces for the future.

We must ensure that our courageous servicemen and women have the tools they need to deter war, and when called upon to fight, do only one thing: Win.

In these dangerous times, this public safety and national security Budget Blueprint is a message to the world—a message of American strength, security, and resolve.

This Budget Blueprint follows through on my promise to focus on keeping Americans safe, keeping terrorists out of our country, and putting violent offenders behind bars.

The defense and public safety spending increases in this Budget Blueprint are offset and paid for by finding greater savings and efficiencies across the Federal Government. Our Budget Blueprint insists on $54 billion in reductions to non-Defense programs. We are going to do more with less, and make the Government lean and accountable to the people.

This includes deep cuts to foreign aid. It is time to prioritize the security and well-being of Americans, and to ask the rest of the world to step up and pay its fair share.

Many other Government agencies and departments will also experience cuts. These cuts are sensible and rational. Every agency and department will be driven to achieve greater efficiency and to eliminate wasteful spending in carrying out their honorable service to the American people.

I look forward to engaging the Congress and enacting this *America First Budget*.

Donald J. Trump

A Message from the Director, Office of Management and Budget

I am proud to introduce the "America First" Budget.

While recognizing this Blueprint is not the full Federal budget, it does provide lawmakers and the public with a view of the priorities of the President and his Administration.

The Federal budget is a complex document. However, working for a President committed to keeping his promises means my job is as simple as translating his words into numbers.

That is why you will find here a familiar focus on rebuilding and restoring our Nation's security. Under the Obama Administration, our shrinking military has been stretched far too thin. The military has been forced to make aging ships, planes, and other vehicles last well beyond their intended life spans. The President will reverse this dangerous trend. From rebuilding our Armed Forces to beefing up our border security and safeguarding our Nation's sovereignty, this Budget makes security priority one.

It does so while meeting another of the President's core commitments: addressing our Nation's priorities without sending future generations an even bigger credit card bill.

This 2018 Budget Blueprint will not add to the deficit. It has been crafted much the same way any American family creates its own budget while paying bills around their kitchen table; it makes hard choices.

The President's commitment to fiscal responsibility is historic. Not since early in President Reagan's first term have more tax dollars been saved and more Government inefficiency and waste been targeted. Every corner of the Federal budget is scrutinized, every program tested, every penny of taxpayer money watched over.

Our $20 trillion national debt is a crisis, not just for the Nation, but for every citizen. Each American's share of this debt is more than $60,000 and growing. It is a challenge of great stakes, but one the American people can solve. American families make tough decisions every day about their own budgets; it is time Washington does the same.

Mick Mulvaney

MAJOR AGENCY BUDGET HIGHLIGHTS

The 2018 Budget is being unveiled sequentially in that this Blueprint provides details only on our discretionary funding proposals. The full Budget that will be released later this spring will include our specific mandatory and tax proposals, as well as a full fiscal path.

For instance, the President has emphasized that one of his top priorities is modernizing the outdated infrastructure that the American public depends upon. To spearhead his infrastructure initiative, the President has tapped a group of infrastructure experts to evaluate investment options along with commonsense regulatory, administrative, organizational, and policy changes to encourage investment and speed project delivery. Through this initiative, the President is committed to making sure that taxpayer dollars are expended for the highest return projects and that all levels of government maximize leverage to get the best deals and exercise vigorous oversight. The Administration will provide more budgetary, tax, and legislative details in the coming months.

In the chapters that follow, Budget highlights are presented for major agencies. Consistent with the President's approach to move the Nation toward fiscal responsibility, the Budget eliminates and reduces hundreds of programs and focuses funding to redefine the proper role of the Federal Government.

The Budget also proposes to eliminate funding for other independent agencies, including: the African Development Foundation; the Appalachian Regional Commission; the Chemical Safety Board; the Corporation for National and Community Service; the Corporation for Public Broadcasting; the Delta Regional Authority; the Denali Commission; the Institute of Museum and Library Services; the Inter-American Foundation; the U.S. Trade and Development Agency; the Legal Services Corporation; the National Endowment for the Arts; the National Endowment for the Humanities; the Neighborhood Reinvestment Corporation; the Northern Border Regional Commission; the Overseas Private Investment Corporation; the United States Institute of Peace; the United States Interagency Council on Homelessness; and the Woodrow Wilson International Center for Scholars.

MANAGEMENT

Making Government Work Again

The Federal Government can—and should—operate more effectively, efficiently, and securely. For decades, leaders on both sides of the aisle have talked about the need to make Government work better. The President is taking bold action now to make Government work again for the American people.

As one of his first acts as President, on January 23, 2017, the President issued a memorandum imposing a Federal "Hiring Freeze" and requiring a long-term plan to reduce the size of the Federal Government's workforce. In addition, on March 13, 2017, the President signed Executive Order 13781 establishing a "Comprehensive Plan for Reorganizing the Executive Branch," which set in motion the important work of reorganizing executive departments and agencies. These two actions are complementary and plans should reflect both Presidential actions. Legislation will be required before major reorganization of the Executive Branch can take place, but the White House is best situated to review and recommend changes to the Congress. In roughly a year, the Congress will receive from the President and the Director of the Office of Management and Budget (OMB) a comprehensive plan for reorganization proposals. The White House will work closely with congressional committees with jurisdiction over Government organization to ensure the needed reforms actually happen.

Simultaneously, the Administration will develop the President's Management Agenda focused on achieving significant improvements in the effectiveness of its core management functions. The President's Management Agenda will set goals in areas that are critical to improving the Federal Government's effectiveness, efficiency, cybersecurity, and accountability. The Administration will take action to ensure that by 2020 we will be able to say the following:

1. **Federal agencies are managing programs and delivering critical services more effectively.** The Administration will take an evidence-based approach to improving programs and services—using real, hard data to identify poorly performing organizations and programs. We will hold program managers accountable for improving performance and delivering high-quality and timely services to the American people and businesses. We will use all tools available and create new ones as needed to ensure the workforce is appropriately prepared.

2. **Federal agencies are devoting a greater percentage of taxpayer dollars to mission achievement rather than costly, unproductive compliance activities.** Past management improvement initiatives resulted in the creation of hundreds of guidance documents aimed at improving Government management by adding more requirements to information technology (IT), human capital, acquisition, financial management, and real property. Furthermore, these Government-wide policies often tie agencies' hands and keep managers from making commonsense decisions.

As a result, costs often increase without corresponding benefits. The Administration will roll back low-value activities and let managers manage, while holding them accountable for finding ways to reduce the cost of agency operations. As part of this effort, OMB will review requirements placed on agencies and identify areas to reduce obsolete, low-value requirements.

3. **Federal agencies are more effective and efficient in supporting program outcomes.** Delivering high-performing program results and services to citizens and businesses depends on effective and efficient mission support services. However, despite years of efforts to improve these critical management processes, managers remain frustrated with hiring methodologies that do not consistently bring in top talent, acquisition approaches that are too cumbersome, and IT that is outdated by the time it is deployed. The Administration will use available data to develop targeted solutions to problems Federal managers face, and begin fixing them directly by sharing and adopting leading practices from the private and public sectors. Among the areas that will be addressed are how agencies buy goods and services, hire talent, use their real property, pay their bills, and utilize technology.

4. **Agencies have been held accountable for improving performance.** All Federal agencies will be responsible for reporting critical performance metrics and showing demonstrable improvement. OMB will also regularly review agency progress in implementing these reforms to ensure there is consistent improvement.

Through this bold agenda, we will improve the effectiveness, efficiency, cybersecurity, and accountability of the Federal Government and make government work again.

REGULATION

Cutting Burdensome Regulations

The American people deserve a regulatory system that works for them, not against them—a system that is both effective and efficient.

Each year, however, Federal agencies issue thousands of new regulations that, taken together, impose substantial burdens on American consumers and businesses big and small. These burdens function much like taxes that unnecessarily inhibit growth and employment. Many regulations, though well intentioned, do not achieve their intended outcomes, are not structured in the most cost-effective manner, and often have adverse, unanticipated consequences. Many more regulations that have been on the books for years—even if they made sense at the time—have gone unexamined and may no longer be effective or necessary.

The President is committed to fixing these problems by eliminating unnecessary and wasteful regulations. To that end, the President has already taken three significant steps:

1. **Regulatory freeze.** On January 20, 2017, the President's Chief of Staff issued a memorandum to all agencies, directing them to pull back any regulations that had been sent to, but not yet published by, the Office of the Federal Register; to not publish any new regulations unless approved by an Administration political appointee; and to delay the effective date of any pending regulations for 60 days to provide the Administration time to review and reconsider those regulations. Federal agencies responded by pulling back, delaying, and not publishing all possible regulations.

2. **Controlling costs and eliminating unnecessary regulations.** On January 30, 2017, the President signed Executive Order 13771, "Reducing Regulation and Controlling Regulatory Costs." This Executive Order represents a fundamental change in the regulatory state. It requires Federal agencies to eliminate at least two existing regulations for each new regulation they issue. It also requires agencies to ensure that for 2017, the total incremental cost of all new regulations be no greater than $0. For 2018 and beyond, the Order establishes and institutionalizes a disciplined process for imposing regulatory cost caps for each Federal agency.

   The significant structural reforms instituted by this Executive Order provide the necessary framework for Federal agencies to carry out the President's bold regulatory reform agenda.

3. **Enforcing the regulatory reform agenda.** As a successful businessman, the President knows that achievement requires accountability. That basic principle is the reason the President signed Executive Order 13777, "Enforcing the Regulatory Reform Agenda," on February 24, 2017. This Order establishes within each agency a Regulatory Reform Officer and a Regulatory Reform Task Force to carry out the President's regulatory reform priorities. These new teams will

work hard to identify regulations that eliminate jobs or inhibit job creation; are outdated, unnecessary, or ineffective; or impose costs that exceed benefits.

They will also be responsible for ensuring that agencies comply with the President's instruction to eliminate two regulations for each new regulation; impose no new incremental costs through regulation; and undertake efforts to repeal, replace, or modify existing regulations.

This Order builds upon a widely recognized and bi-partisan consensus that many existing regulations are likely to be ineffective and no longer necessary, and explicitly builds upon the retrospective review efforts initiated through Executive Order 13563. The difference, however, is accountability, and these teams will be a critical means by which Federal agencies will identify and cut regulations in a smart and efficient manner.

The President recently told Americans, "The era of empty talk is over." When it comes to regulatory reform, it is abundantly clear that the President means business. The President has put into place truly significant new structural mechanisms that will help to ensure that major regulatory reforms are finally achieved on behalf of the hardworking and forgotten men and women of America.

The Office of Information and Regulatory Affairs within OMB is already working hard to support the implementation of these critical new reforms, and it looks forward to making sure that they are fully and successfully implemented over the coming months and years.

DEPARTMENT OF AGRICULTURE

The Department of Agriculture (USDA) provides leadership to promote sustainable agricultural production, protect the long-term availability of food through innovative research, and safeguard the health and productivity of the Nation's forests, grasslands, and private working lands based on sound public policy and efficient management. USDA also works to ensure food safety, provide nutrition assistance, and support rural communities. The Budget request supports core Departmental and mission critical activities while streamlining, reducing, or eliminating duplicative, redundant, or lower priority programs where the Federal role competes with the private sector or other levels of government.

The President's 2018 Budget requests $17.9 billion for USDA, a $4.7 billion or 21 percent decrease from the 2017 annualized continuing resolution (CR) level (excluding funding for P.L. 480 Title II food aid which is reflected in the Department of State and USAID budget).

The President's 2018 Budget:

- Safeguards the Nation's supply of meat, poultry, and egg products by fully funding the Food Safety and Inspection Service, which employs more than 8,000 in-plant and other frontline personnel who protect public health in approximately 6,400 federally inspected slaughter and processing establishments nationwide.

- Provides $6.2 billion to serve all projected participants in the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC). WIC provides grants to States for supplemental foods, health care referrals, and nutrition education for low-income pregnant and postpartum women, infants, and children who are at nutritional risk.

- Fully funds wildland fire preparedness and suppression activities at $2.4 billion, 100 percent of the 10-year average for suppression operations, to ensure the resources necessary to protect life and property.

- Reduces funding for lower priority activities in the National Forest System, such as major new Federal land acquisition; instead, the Budget focuses on maintaining existing forests and grasslands.

- Continues to support farmer-focused research and extension partnerships at land-grant universities and provides about $350 million for USDA's flagship competitive research program. In addition, the Budget focuses in-house research funding within the Agricultural Research Service to the highest

priority agriculture and food issues such as increasing farming productivity, sustaining natural resources, including those within rural communities, and addressing food safety and nutrition priorities.

- Reduces funding for USDA's statistical capabilities, while maintaining core Departmental analytical functions, such as the funding necessary to complete the Census of Agriculture.

- Eliminates the duplicative Water and Wastewater loan and grant program, a savings of $498 million from the 2017 annualized CR level. Rural communities can be served by private sector financing or other Federal investments in rural water infrastructure, such as the Environmental Protection Agency's State Revolving Funds.

- Reduces staffing in USDA's Service Center Agencies to streamline county office operations, reflect reduced Rural Development workload, and encourage private sector conservation planning.

- Reduces duplicative and underperforming programs by eliminating discretionary activities of the Rural Business and Cooperative Service, a savings of $95 million from the 2017 annualized CR level.

- Eliminates the McGovern-Dole International Food for Education program, which lacks evidence that it is being effectively implemented to reduce food insecurity.

DEPARTMENT OF COMMERCE

The Department of Commerce promotes job creation and economic growth by ensuring fair and secure trade, providing the data necessary to support commerce, and fostering innovation by setting standards and conducting foundational research and development. The Budget prioritizes and protects investments in core Government functions such as preparing for the 2020 Decennial Census, providing the observational infrastructure and staff necessary to produce timely and accurate weather forecasts, supporting the Government's role in managing marine resources and ocean and coastal navigation, and enforcing laws that promote fair and secure trade. The Budget also reduces or eliminates grant programs that have limited impact and reflect an expansion beyond core missions of the bureaus.

The President's 2018 Budget requests $7.8 billion for the Department of Commerce, a $1.5 billion or 16 percent decrease from the 2017 annualized CR level.

The President's 2018 Budget:

- Strengthens the International Trade Administration's trade enforcement and compliance functions, including the anti-dumping and countervailing duty investigations, while rescaling the agency's export promotion and trade analysis activities.

- Provides $1.5 billion, an increase of more than $100 million, for the U.S. Census Bureau to continue preparations for the 2020 Decennial Census. This additional funding prioritizes fundamental investments in information technology and field infrastructure, which would allow the bureau to more effectively administer the 2020 Decennial Census.

- Consolidates the mission, policy support, and administrative functions of the Economics and Statistics Administration within the Bureau of Economic Analysis, the U.S. Census Bureau, and the Department of Commerce's Office of the Secretary.

- Eliminates the Economic Development Administration, which provides small grants with limited measurable impacts and duplicates other Federal programs, such as Rural Utilities Service grants at the U.S. Department of Agriculture and formula grants to States from the Department of Transportation. By terminating this agency, the Budget saves $221 million from the 2017 annualized CR level.

- Eliminates the Minority Business Development Agency, which is duplicative of other Federal, State, local, and private sector efforts that promote minority business entrepreneurship including Small Business Administration District Offices and Small Business Development Centers.

- Saves $124 million by discontinuing Federal funding for the Manufacturing Extension Partnership (MEP) program, which subsidizes up to half the cost of State centers, which provide consulting services to small- and medium-size manufacturers. By eliminating Federal funding, MEP centers would transition solely to non-Federal revenue sources, as was originally intended when the program was established.

- Zeroes out over $250 million in targeted National Oceanic and Atmospheric Administration (NOAA) grants and programs supporting coastal and marine management, research, and education including Sea Grant, which primarily benefit industry and State and local stakeholders. These programs are a lower priority than core functions maintained in the Budget such as surveys, charting, and fisheries management.

- Maintains the development of NOAA's current generation of polar orbiting and geostationary weather satellites, allowing the Joint Polar Satellite System and Geostationary Operational Environmental Satellite programs to remain on schedule in order to provide forecasters with critical weather data to help protect life and property.

- Achieves annual savings from NOAA's Polar Follow On satellite program from the current program of record by better reflecting the actual risk of a gap in polar satellite coverage, and provides additional opportunities to improve robustness of the low earth orbit satellite architecture by expanding the utilization of commercially provided data to improve weather models.

- Maintains National Weather Service forecasting capabilities by investing more than $1 billion while continuing to promote efficient and effective operations.

- Continues to support the National Telecommunications and Information Administration (NTIA) in representing the United States interest at multi-stakeholder forums on internet governance and digital commerce. The Budget supports the commercial sector's development of next generation wireless services by funding NTIA's mission of evaluating and ensuring the efficient use of spectrum by Government users.

DEPARTMENT OF DEFENSE

The Department of Defense (DOD) provides the military forces needed to deter war and to protect the security of the United States. The budget for DOD ends the depletion of our military and pursues peace through strength, honoring the Federal Government's first responsibility: to protect the Nation. It fully repeals the defense sequestration, while providing the needed resources for accelerating the defeat of the Islamic State of Iraq and Syria (ISIS) and for beginning to rebuild the U.S. Armed Forces.

The President's 2018 Budget requests $639 billion for DOD, a $52 billion increase from the 2017 annualized CR level. The total includes $574 billion for the base budget, a 10 percent increase from the 2017 annualized CR level, and $65 billion for Overseas Contingency Operations.

The President's 2018 Budget:

- Repeals the defense sequestration by restoring $52 billion to DOD, as well as $2 billion to other national defense programs outside DOD, for a $54 billion total increase for national defense discretionary budget authority above the sequestration level budget cap. When the Budget Control Act (BCA) of 2011 was enacted, the defense sequestration was not meant to occur, yet it has never been fully repealed. This has resulted in nearly $200 billion of national defense cuts since 2013 and over $200 billion of further projected cuts through 2021, relative to the original BCA caps alone. Reversing this indiscriminate neglect of the last administration is not only a fulfillment of the President's promise, but it is also a requirement if this Nation's security is to be maintained. The military's depletion under President Obama is our foremost challenge. The President's 2018 Budget ends the arbitrary depletion of our strength and security, and begins to rebuild the U.S. Armed Forces.

- Increases DOD's budget authority by $52 billion above the current 2017 level of $587 billion. This increase alone exceeds the entire defense budget of most countries, and would be one of the largest one-year DOD increases in American history. It is exceeded only by the peak increases of the Reagan Administration and a few of the largest defense increases during the World Wars and the conflicts in Korea, Vietnam, Iraq, and Afghanistan (in constant dollars, based on GDP chained price index). Unlike spending increases for war, which mostly consume resources in combat, the increases in the President's Budget primarily invest in a stronger military.

- Provides the resources needed to accelerate the defeat of ISIS. The Budget ensures that DOD has the tools to stop ISIS from posing a threat to the United States by funding the Department's critical efforts to strike ISIS targets, support our partners fighting on the ground, disrupt ISIS' external operations, and cut off its financing.

- Addresses urgent warfighting readiness needs. Fifteen years of conflict, accompanied in recent years by budget cuts, have stressed the Armed Forces. The President's Budget would ensure we remain the best led, best equipped, and most ready force in the world.

- Begins to rebuild the U.S. Armed Forces by addressing pressing shortfalls, such as insufficient stocks of critical munitions, personnel gaps, deferred maintenance and modernization, cyber vulnerabilities, and degraded facilities. The military must reset war losses, address recapitalization and maintenance requirements, and recover from years of deferred investment forced by budget cuts. The President's Budget would ensure the Armed Forces have the training, equipment, and infrastructure they need.

- Lays the groundwork for a larger, more capable, and more lethal joint force, driven by a new National Defense Strategy that recognizes the need for American superiority not only on land, at sea, in the air, and in space, but also in cyberspace. As the world has become more dangerous—through the rise of advanced potential adversaries, the spread of destructive technology, and the expansion of terrorism—our military has gotten smaller and its technological edge has eroded. The President's Budget begins to put an end to this trend, reversing force reductions and restoring critical investments.

- Initiates an ambitious reform agenda to build a military that is as effective and efficient as possible, and underscores the President's commitment to reduce the costs of military programs wherever feasible.

- Strengthens the U.S. Army by rebuilding readiness, reversing end strength reductions, and preparing for future challenges. This Budget is an initial step toward restoring an Army that has been stressed by high operational demand and constrained funding levels in recent years.

- Rebuilds the U.S. Navy to better address current and future threats by increasing the total number of ships. This Budget reflects a down payment on the President's commitment to expanding the fleet.

- Ensures a ready and fully equipped Marine Corps. The Budget lays the foundation for a force that meets the challenges of the 21st Century.

- Accelerates Air Force efforts to improve tactical air fleet readiness, ensure technical superiority, and repair aging infrastructure. Key investments in maintenance capacity, training systems, and additional F-35 Joint Strike Fighters would enable the Air Force, which is now the smallest it has been in history, to counter the growing number of complex threats from sophisticated state actors and transnational terrorist groups.

DEPARTMENT OF EDUCATION

The Department of Education promotes improving student achievement and access to opportunity in elementary, secondary, and postsecondary education. The Department would refocus its mission on supporting States and school districts in their efforts to provide high quality education to all our students. Also, it would focus on streamlining and simplifying funding for college, while continuing to help make college education more affordable. The 2018 Budget places power in the hands of parents and families to choose schools that are best for their children by investing an additional $1.4 billion in school choice programs. It continues support for the Nation's most vulnerable populations, such as students with disabilities. Overall, the Department would support these investments and carry out its core mission while lowering costs to the taxpayer by reducing or eliminating funding for programs that are not effective, that duplicate other efforts, or that do not serve national needs.

The President's 2018 Budget provides $59 billion in discretionary funding for the Department of Education, a $9 billion or 13 percent reduction below the 2017 annualized CR level.

The President's 2018 Budget:

- Increases investments in public and private school choice by $1.4 billion compared to the 2017 annualized CR level, ramping up to an annual total of $20 billion, and an estimated $100 billion including matching State and local funds. This additional investment in 2018 includes a $168 million increase for charter schools, $250 million for a new private school choice program, and a $1 billion increase for Title I, dedicated to encouraging districts to adopt a system of student-based budgeting and open enrollment that enables Federal, State, and local funding to follow the student to the public school of his or her choice.
- Maintains approximately $13 billion in funding for IDEA programs to support students with special education needs. This funding provides States, school districts, and other grantees with the resources needed to provide high quality special education and related services to students and young adults with disabilities.
- Eliminates the $2.4 billion Supporting Effective Instruction State Grants program, which is poorly targeted and spread thinly across thousands of districts with scant evidence of impact.
- Eliminates the 21st Century Community Learning Centers program, which supports before- and after-school programs as well as summer programs, resulting in savings of $1.2 billion from the 2017 annualized CR level. The programs lacks strong evidence of meeting its objectives, such as improving student achievement.

- Eliminates the Federal Supplemental Educational Opportunity Grant program, a less well-targeted way to deliver need-based aid than the Pell Grant program, to reduce complexity in financial student aid and save $732 million from the 2017 annualized CR level.
- Safeguards the Pell Grant program by level funding the discretionary appropriation while proposing a cancellation of $3.9 billion from unobligated carryover funding, leaving the Pell program on sound footing for the next decade.
- Protects support for Historically Black Colleges and Universities and Minority-Serving Institutions, which provide opportunities for communities that are often underserved, maintaining $492 million in funding for programs that serve high percentages of minority students.
- Reduces Federal Work-Study significantly and reforms the poorly-targeted allocation to ensure funds go to undergraduate students who would benefit most.
- Provides $808 million for the Federal TRIO Programs and $219 million for GEAR UP, resulting in savings of $193 million from the 2017 annualized CR level. Funding to TRIO programs is reduced in areas that have limited evidence on the overall effectiveness in improving student outcomes. The Budget funds GEAR UP continuation awards only, pending the completion of an upcoming rigorous evaluation of a portion of the program.
- Eliminates or reduces over 20 categorical programs that do not address national needs, duplicate other programs, or are more appropriately supported with State, local, or private funds, including Striving Readers, Teacher Quality Partnership, Impact Aid Support Payments for Federal Property, and International Education programs.

DEPARTMENT OF ENERGY

The Department of Energy (DOE) is charged with ensuring the Nation's security and prosperity by addressing its energy, environmental, and nuclear challenges through transformative science and technology solutions. The Budget for DOE demonstrates the Administration's commitment to reasserting the proper role of what has become a sprawling Federal Government and reducing deficit spending. It reflects an increased reliance on the private sector to fund later-stage research, development, and commercialization of energy technologies and focuses resources toward early-stage research and development. It emphasizes energy technologies best positioned to enable American energy independence and domestic job-growth in the near to mid-term. It also ensures continued progress on cleaning up sites contaminated from nuclear weapons production and energy research and includes a path forward to accelerate progress on the disposition of nuclear waste. At the same time, the Budget demonstrates the Administration's strong support for the United States' nuclear security enterprise and ensures that we have a nuclear force that is second to none.

The President's 2018 Budget requests $28.0 billion for DOE, a $1.7 billion or 5.6 percent decrease from the 2017 annualized CR level. The Budget would strengthen the Nation's nuclear capability by providing a $1.4 billion increase above the 2017 annualized CR level for the National Nuclear Security Administration, an 11 percent increase.

The President's 2018 Budget:

- Provides $120 million to restart licensing activities for the Yucca Mountain nuclear waste repository and initiate a robust interim storage program. These investments would accelerate progress on fulfilling the Federal Government's obligations to address nuclear waste, enhance national security, and reduce future taxpayer burden.
- Supports the goals of moving toward a responsive nuclear infrastructure and advancing the existing program of record for warhead life extension programs through elimination of defense sequestration for the National Nuclear Security Administration (NNSA).
- Enables NNSA to begin to address its critical infrastructure maintenance backlog.
- Protects human health and the environment by providing $6.5 billion to advance the Environmental Management program mission of cleaning up the legacy of waste and contamination from energy research and nuclear weapons production, including addressing excess facilities to support modernization of the nuclear security enterprise.
- Eliminates the Advanced Research Projects Agency-Energy, the Title 17 Innovative Technology Loan Guarantee Program, and the Advanced Technology Vehicle Manufacturing Program because

the private sector is better positioned to finance disruptive energy research and development and to commercialize innovative technologies.

- Ensures the Office of Science continues to invest in the highest priority basic science and energy research and development as well as operation and maintenance of existing scientific facilities for the community. This includes a savings of approximately $900 million compared to the 2017 annualized CR level.
- Focuses funding for the Office of Energy Efficiency and Renewable Energy, the Office of Nuclear Energy, the Office of Electricity Delivery and Energy Reliability, and the Fossil Energy Research and Development program on limited, early-stage applied energy research and development activities where the Federal role is stronger. In addition, the Budget eliminates the Weatherization Assistance Program and the State Energy Program to reduce Federal intervention in State-level energy policy and implementation. Collectively, these changes achieve a savings of approximately $2 billion from the 2017 annualized CR level.
- Supports the Office of Electricity Delivery and Energy Reliability's capacity to carry out cybersecurity and grid resiliency activities that would help harden and evolve critical grid infrastructure that the American people and the economy rely upon.
- Continues the necessary research, development, and construction to support the Navy's current nuclear fleet and enhance the capabilities of the future fleet.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

The Department of Health and Human Services (HHS) works to enhance the health and well-being of Americans by providing effective health and human services and by fostering sound, sustained advances in the sciences underlying medicine, public health, and social services. The Budget supports the core mission of HHS through the most efficient and effective health and human service programs. In 2018, HHS funds the highest priorities, such as: health services through community health centers, Ryan White HIV/AIDS providers, and the Indian Health Service; early care and education; and medical products review and innovation. In addition, it funds urgent public health issues, such as prescription drug overdose, and program integrity for Medicare and Medicaid. The Budget eliminates programs that are duplicative or have limited impact on public health and well-being. The Budget allows HHS to continue to support priority activities that reflect a new and sustainable approach to long-term fiscal stability across the Federal Government.

The President's 2018 Budget requests $69.0 billion for HHS, a $15.1 billion or 17.9 percent decrease from the 2017 annualized CR level. This funding level excludes certain mandatory spending changes but includes additional funds for program integrity and implementing the 21st Century CURES Act.

The President's 2018 Budget:

- Supports direct health care services, such as those delivered by community health centers, Ryan White HIV/AIDS providers, and the Indian Health Service. These safety net providers deliver critical health care services to low-income and vulnerable populations.
- Strengthens the integrity and sustainability of Medicare and Medicaid by investing in activities to prevent fraud, waste, and abuse and promote high quality and efficient health care. Additional funding for the Health Care Fraud and Abuse Control (HCFAC) program has allowed the Centers for Medicare & Medicaid Services in recent years to shift away from a "pay-and-chase" model toward identifying and preventing fraudulent or improper payments from being paid in the first place. The return on investment for the HCFAC account was $5 returned for every $1 expended from 2014-2016. The Budget proposes HCFAC discretionary funding of $751 million in 2018, which is $70 million higher than the 2017 annualized CR level.
- Supports efficient operations for Medicare, Medicaid, and the Children's Health Insurance Program and focuses spending on the highest priority activities necessary to effectively operate these programs.

- Supports substance abuse treatment services for the millions of Americans struggling with substance abuse disorders. The opioid epidemic, which took more than 33,000 lives in calendar year 2015, has a devastating effect on America's families and communities. In addition to funding Substance Abuse and Mental Health Services Administration substance abuse treatment activities, the Budget also includes a $500 million increase above 2016 enacted levels to expand opioid misuse prevention efforts and to increase access to treatment and recovery services to help Americans who are misusing opioids get the help they need.
- Recalibrates Food and Drug Administration (FDA) medical product user fees to over $2 billion in 2018, approximately $1 billion over the 2017 annualized CR level, and replaces the need for new budget authority to cover pre-market review costs. To complement the increase in medical product user fees, the Budget includes a package of administrative actions designed to achieve regulatory efficiency and speed the development of safe and effective medical products. In a constrained budget environment, industries that benefit from FDA's approval can and should pay for their share.
- Reduces the National Institutes of Health's (NIH) spending relative to the 2017 annualized CR level by $5.8 billion to $25.9 billion. The Budget includes a major reorganization of NIH's Institutes and Centers to help focus resources on the highest priority research and training activities, including: eliminating the Fogarty International Center; consolidating the Agency for Healthcare Research and Quality within NIH; and other consolidations and structural changes across NIH organizations and activities. The Budget also reduces administrative costs and rebalance Federal contributions to research funding.
- Reforms key public health, emergency preparedness, and prevention programs. For example, the Budget restructures similar HHS preparedness grants to reduce overlap and administrative costs and directs resources to States with the greatest need. The Budget also creates a new Federal Emergency Response Fund to rapidly respond to public health outbreaks, such as Zika Virus Disease. The Budget also reforms the Centers for Disease Control and Prevention through a new $500 million block grant to increase State flexibility and focus on the leading public health challenges specific to each State.
- Invests in mental health activities that are awarded to high-performing entities and focus on high priority areas, such as suicide prevention, serious mental illness, and children's mental health.
- Eliminates $403 million in health professions and nursing training programs, which lack evidence that they significantly improve the Nation's health workforce. The Budget continues to fund health workforce activities that provide scholarships and loan repayments in exchange for service in areas of the United States where there is a shortage of health professionals.
- Eliminates the discretionary programs within the Office of Community Services, including the Low Income Home Energy Assistance Program (LIHEAP) and the Community Services Block Grant (CSBG), a savings of $4.2 billion from the 2017 annualized CR level. Compared to other income support programs that serve similar populations, LIHEAP is a lower-impact program and is unable to demonstrate strong performance outcomes. CSBG funds services that are duplicative of other Federal programs, such as emergency food assistance and employment services, and is also a limited-impact program.

DEPARTMENT OF HOMELAND SECURITY

The Department of Homeland Security (DHS) has a vital mission: to secure the Nation from the many threats it faces. This requires the dedication of more than 240,000 employees in jobs that ensure the security of the U.S. borders, support the integrity of its immigration system, protect air travelers and national leaders, reduce the threat of cyber attacks, and stand prepared for emergency response and disaster recovery. The Budget prioritizes DHS law enforcement operations, proposes critical investments in frontline border security, and funds continued development of strong cybersecurity defenses. The Budget would aggressively implement the President's commitment to construct a physical wall along the southern border as directed by his January 25, 2017 Executive Order, and ensures robust funding for other important DHS missions.

The President's 2018 Budget requests $44.1 billion in net discretionary budget authority for DHS, a $2.8 billion or 6.8 percent increase from the 2017 annualized CR level. The Budget would allocate $4.5 billion in additional funding for programs to strengthen the security of the Nation's borders and enhance the integrity of its immigration system. This increased investment in the Nation's border security and immigration enforcement efforts now would ultimately save Federal resources in the future.

The President's 2018 Budget:

- Secures the borders of the United States by investing $2.6 billion in high-priority tactical infrastructure and border security technology, including funding to plan, design, and construct a physical wall along the southern border as directed by the President's January 25, 2017 Executive Order. This investment would strengthen border security, helping stem the flow of people and drugs illegally crossing the U.S. borders.

- Advances the President's plan to strengthen border security and immigration enforcement with $314 million to recruit, hire, and train 500 new Border Patrol Agents and 1,000 new Immigration and Customs Enforcement law enforcement personnel in 2018, plus associated support staff. These new personnel would improve the integrity of the immigration system by adding capacity to interdict those aliens attempting to cross the border illegally, as well as to identify and remove those already in the United States who entered illegally.

- Enhances enforcement of immigration laws by proposing an additional $1.5 billion above the 2017 annualized CR level for expanded detention, transportation, and removal of illegal immigrants.

These funds would ensure that DHS has sufficient detention capacity to hold prioritized aliens, including violent criminals and other dangerous individuals, as they are processed for removal.

- Invests $15 million to begin implementation of mandatory nationwide use of the E-Verify Program, an internet-based system that allows businesses to determine the eligibility of their new employees to work in the United States. This investment would strengthen the employment verification process and reduce unauthorized employment across the U.S.

- Safeguards cyberspace with $1.5 billion for DHS activities that protect Federal networks and critical infrastructure from an attack. Through a suite of advanced cyber security tools and more assertive defense of Government networks, DHS would share more cybersecurity incident information with other Federal agencies and the private sector, leading to faster responses to cybersecurity attacks directed at Federal networks and critical infrastructure.

- Restructures selected user fees for the Transportation Security Administration (TSA) and the National Flood Insurance Program (NFIP) to ensure that the cost of Government services is not subsidized by taxpayers who do not directly benefit from those programs. The Budget proposes to raise the Passenger Security Fee to recover 75 percent of the cost of TSA aviation security operations. The Budget proposes eliminating the discretionary appropriation for the NFIP's Flood Hazard Mapping Program, a savings of $190 million, to instead explore other more effective and fair means of funding flood mapping efforts.

- Eliminates or reduces State and local grant funding by $667 million for programs administered by the Federal Emergency Management Agency (FEMA) that are either unauthorized by the Congress, such as FEMA's Pre-Disaster Mitigation Grant Program, or that must provide more measurable results and ensure the Federal Government is not supplanting other stakeholders' responsibilities, such as the Homeland Security Grant Program. For that reason, the Budget also proposes establishing a 25 percent non-Federal cost match for FEMA preparedness grant awards that currently require no cost match. This is the same cost-sharing approach as FEMA's disaster recovery grants. The activities and acquisitions funded through these grant programs are primarily State and local functions.

- Eliminates and reduces unauthorized and underperforming programs administered by TSA in order to strengthen screening at airport security checkpoints, a savings of $80 million from the 2017 annualized CR level. These savings include reductions to the Visible Intermodal Prevention and Response program, which achieves few Federal law enforcement priorities, and elimination of TSA grants to State and local jurisdictions, a program intended to incentivize local law enforcement patrols that should already be a high priority for State and local partners. In addition, the Budget reflects TSA's decision in the summer of 2016 to eliminate the Behavior Detection Officer program, reassigning all of those personnel to front line airport security operations. Such efforts refocus TSA on its core mission of protecting travelers and ensuring Federal security standards are enforced throughout the transportation system.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

The Department of Housing and Urban Development (HUD) promotes decent, safe, and affordable housing for Americans and provides access to homeownership opportunities. This Budget reflects the President's commitment to fiscal responsibility while supporting critical functions that provide rental assistance to low-income and vulnerable households and help work-eligible families achieve self-sufficiency. The Budget also recognizes a greater role for State and local governments and the private sector to address community and economic development needs.

The President's 2018 Budget requests $40.7 billion in gross discretionary funding for HUD, a $6.2 billion or 13.2 percent decrease from the 2017 annualized CR level.

The President's 2018 Budget:

- Provides over $35 billion for HUD's rental assistance programs and proposes reforms that reduce costs while continuing to assist 4.5 million low-income households.

- Eliminates funding for the Community Development Block Grant program, a savings of $3 billion from the 2017 annualized CR level. The Federal Government has spent over $150 billion on this block grant since its inception in 1974, but the program is not well-targeted to the poorest populations and has not demonstrated results. The Budget devolves community and economic development activities to the State and local level, and redirects Federal resources to other activities.

- Promotes fiscal responsibility by eliminating funding for a number of lower priority programs, including the HOME Investment Partnerships Program, Choice Neighborhoods, and the Self-help Homeownership Opportunity Program, a savings of over $1.1 billion from the 2017 annualized CR level. State and local governments are better positioned to serve their communities based on local needs and priorities.

- Promotes healthy and lead-safe homes by providing $130 million, an increase of $20 million over the 2017 annualized CR level, for the mitigation of lead-based paint and other hazards in low-income homes, especially those in which children reside. This also funds enforcement, education, and research activities to further support this goal, all of which contributes to lower healthcare costs and increased productivity.

- Eliminates funding for Section 4 Capacity Building for Community Development and Affordable Housing, a savings of $35 million from the 2017 annualized CR level. This program is duplicative of efforts funded by philanthropy and other more flexible private sector investments.

- Supports homeownership through provision of Federal Housing Administration mortgage insurance programs.

DEPARTMENT OF THE INTERIOR

The Department of the Interior (DOI) is responsible for protecting and managing vast areas of U.S. lands and waters, providing scientific and other information about its natural resources, and meeting the Nation's trust responsibilities and other commitments to American Indians, Alaska Natives, and U.S.-affiliated island communities. The Budget requests an increase in funding for core energy development programs while supporting DOI's priority agency mission and trust responsibilities, including public safety, land conservation and revenue management. It eliminates funding for unnecessary or duplicative programs while reducing funds for lower priority activities, such as acquiring new lands.

The President's 2018 Budget requests $11.6 billion for DOI, a $1.5 billion or 12 percent decrease from the 2017 annualized CR level.

The President's 2018 Budget:

- Strengthens the Nation's energy security by increasing funding for DOI programs that support environmentally responsible development of energy on public lands and offshore waters. Combined with administrative reforms already in progress, this would allow DOI to streamline permitting processes and provide industry with access to the energy resources America needs, while ensuring taxpayers receive a fair return from the development of these public resources.

- Sustains funding for DOI's Office of Natural Resources Revenue, which manages the collection and disbursement of roughly $10 billion annually from mineral development, an important source of revenue to the Federal Treasury, States, and Indian mineral owners.

- Eliminates unnecessary, lower priority, or duplicative programs, including discretionary Abandoned Mine Land grants that overlap with existing mandatory grants, National Heritage Areas that are more appropriately funded locally, and National Wildlife Refuge fund payments to local governments that are duplicative of other payment programs.

- Supports stewardship capacity for land management operations of the National Park Service, Fish and Wildlife Service and Bureau of Land Management. The Budget streamlines operations while providing the necessary resources for DOI to continue to protect and conserve America's public lands and beautiful natural resources, provide access to public lands for the next generation of outdoor enthusiasts, and ensure visitor safety.

- Supports tribal sovereignty and self-determination across Indian Country by focusing on core funding and services to support ongoing tribal government operations. The Budget reduces funding for more recent demonstration projects and initiatives that only serve a few Tribes.

- Reduces funding for lower priority activities, such as new major acquisitions of Federal land. The Budget reduces land acquisition funding by more than $120 million from the 2017 annualized CR level and would instead focus available discretionary funds on investing in, and maintaining, existing national parks, refuges and public lands.

- Ensures that the National Park Service assets are preserved for future generations by increasing investment in deferred maintenance projects. Reduces funds for other DOI construction and major maintenance programs, which can rely on existing resources for 2018.

- Provides more than $900 million for DOI's U.S. Geological Survey to focus investments in essential science programs. This includes funding for the Landsat 9 ground system, as well as research and data collection that informs sustainable energy development, responsible resource management, and natural hazard risk reduction.

- Leverages taxpayer investment with public and private resources through wildlife conservation, historic preservation, and recreation grants. These voluntary programs encourage partnerships by providing matching funds that produce greater benefits to taxpayers for the Federal dollars invested.

- Budgets responsibly for wildland fire suppression expenses. The Budget would directly provide the full 10-year rolling average of suppression expenditures.

- Invests over $1 billion in safe, reliable, and efficient management of water resources throughout the western United States.

- Supports counties through discretionary funding for the Payments in Lieu of Taxes (PILT) program at a reduced level, but in line with average funding for PILT over the past decade.

DEPARTMENT OF JUSTICE

The Department of Justice is charged with enforcing the laws and defending the interests of the United States, ensuring public safety against foreign and domestic threats, providing Federal leadership in preventing and controlling crime, seeking just punishment for those guilty of unlawful behavior, and ensuring the fair and impartial administration of justice for all Americans. The budget for the Department of Justice saves taxpayer dollars by consolidating, reducing, streamlining, and making its programs and operations more efficient. The Budget also makes critical investments to confront terrorism, reduce violent crime, tackle the Nation's opioid epidemic, and combat illegal immigration.

The President's 2018 Budget requests $27.7 billion for the Department of Justice, a $1.1 billion or 3.8 percent decrease from the 2017 annualized CR level. This program level excludes mandatory spending changes involving the Crime Victims Fund and the Assets Forfeiture Fund. However, significant targeted increases would enhance the ability to address key issues, including public safety, law enforcement, and national security. Further, the Administration is concerned about so-called sanctuary jurisdictions and will be taking steps to mitigate the risk their actions pose to public safety.

The President's 2018 Budget:

- Strengthens counterterrorism, counterintelligence, and Federal law enforcement activities by providing an increase of $249 million, or 3 percent, above the 2017 annualized CR level for the Federal Bureau of Investigation (FBI). The FBI would devote resources toward its world-class cadre of special agents and intelligence analysts, as well as invest $61 million more to fight terrorism and combat foreign intelligence and cyber threats and address public safety and national security risks that result from malicious actors' use of encrypted products and services. In addition, the FBI would dedicate $35 million to gather and share intelligence data with partners and together with the Department of Defense (DOD) lead Federal efforts in biometric identity resolution, research, and development. The FBI would also spend an additional $9 million to provide accurate and timely response for firearms purchase background checks, and develop and refine evidence and data to target violent crime in some cities and communities.

- Supports efforts at the Department's law enforcement components by providing a combined increase of $175 million above the 2017 annualized CR level to target the worst of the worst criminal organizations and drug traffickers in order to address violent crime, gun-related deaths, and the opioid epidemic.

- Enhances national security and counterterrorism efforts by linking skilled prosecutors and intelligence attorneys with law enforcement investigations and the intelligence community to stay ahead of threats.

- Combats illegal entry and unlawful presence in the United States by providing an increase of nearly $80 million, or 19 percent, above the 2017 annualized CR level to hire 75 additional immigration judge teams to bolster and more efficiently adjudicate removal proceedings—bringing the total number of funded immigration judge teams to 449.

- Enhances border security and immigration enforcement by providing 60 additional border enforcement prosecutors and 40 deputy U.S. Marshals for the apprehension, transportation, and prosecution of criminal aliens.

- Supports the addition of 20 attorneys to pursue Federal efforts to obtain the land and holdings necessary to secure the Southwest border and another 20 attorneys and support staff for immigration litigation assistance.

- Assures the safety of the public and law enforcement officers by providing $171 million above the 2017 annualized CR level for additional short-term detention space to hold Federal detainees, including criminal aliens, parole violators, and other offenders awaiting trial or sentencing.

- Safeguards Federal grants to State, local, and tribal law enforcement and victims of crime to ensure greater safety for law enforcement personnel and the people they serve. Critical programs aimed at protecting the life and safety of State and local law enforcement personnel, including Preventing Violence Against Law Enforcement Officer Resilience and Survivability and the Bulletproof Vest Partnership, are protected.

- Eliminates approximately $700 million in unnecessary spending on outdated programs that either have met their goal or have exceeded their usefulness, including $210 million for the poorly targeted State Criminal Alien Assistance Program, in which two-thirds of the funding primarily reimburses four States for the cost of incarcerating certain illegal criminal aliens.

- Achieves savings of almost a billion dollars from the 2017 annualized CR level in Federal prison construction spending due to excess capacity resulting from an approximate 14 percent decrease in the prison population since 2013. However, the Budget provides $80 million above the 2017 annualized CR level for the activation of an existing facility to reduce high security Federal inmate overcrowding and a total of $113 million to repair and modernize outdated prisons.

- Increases bankruptcy-filing fees to produce an additional $150 million over the 2017 annualized CR level to ensure that those that use the bankruptcy court system pay for its oversight. By increasing quarterly filing fees, the total estimated United States Trustee Program offsetting receipts would reach $289 million in 2018.

DEPARTMENT OF LABOR

The Department of Labor fosters the welfare of wage earners, job seekers, and retirees by safeguarding their working conditions, benefits, and wages. With the need to rebuild the Nation's military without increasing the deficit, this Budget focuses the Department of Labor on its highest priority functions and disinvests in activities that are duplicative, unnecessary, unproven, or ineffective.

The President's 2018 Budget requests $9.6 billion for the Department of Labor, a $2.5 billion or 21 percent decrease from the 2017 annualized CR level.

The President's 2018 Budget:

- Expands Reemployment and Eligibility Assessments, an evidence-based activity that saves an average of $536 per claimant in unemployment insurance benefit costs by reducing improper payments and getting claimants back to work more quickly and at higher wages.

- Reduces funding for ineffective, duplicative, and peripheral job training grants. As part of this, eliminates the Senior Community Service Employment Program (SCSEP), for a savings of $434 million from the 2017 annualized CR level. SCSEP is ineffective in meeting its purpose of transitioning low-income unemployed seniors into unsubsidized jobs. As many as one-third of participants fail to complete the program and of those who do, only half successfully transition to unsubsidized employment.

- Focuses the Bureau of International Labor Affairs on ensuring that U.S. trade agreements are fair for American workers. The Budget eliminates the Bureau's largely noncompetitive and unproven grant funding, which would save at least $60 million from the 2017 annualized CR level.

- Improves Job Corps for the disadvantaged youth it serves by closing centers that do a poor job educating and preparing students for jobs.

- Decreases Federal support for job training and employment service formula grants, shifting more responsibility for funding these services to States, localities, and employers.

- Helps States expand apprenticeship, an evidence-based approach to preparing workers for jobs.

- Refocuses the Office of Disability Employment Policy, eliminating less critical technical assistance grants and launching an early intervention demonstration project to allow States to test and evaluate methods that help individuals with disabilities remain attached to or reconnect to the labor market.

- Eliminates the Occupational Safety and Health Administration's unproven training grants, yielding savings of almost $11 million from the 2017 annualized CR level and focusing the agency on its central work of keeping workers safe on the job.

DEPARTMENT OF STATE, USAID, AND TREASURY INTERNATIONAL PROGRAMS

The Department of State, the U.S. Agency for International Development (USAID), and the Department of the Treasury's International Programs help to advance the national security interests of the United States by building a more democratic, secure, and prosperous world. The Budget for the Department of State and USAID diplomatic and development activities is being refocused on priority strategic objectives and renewed attention is being placed on the appropriate U.S. share of international spending. In addition, the Budget seeks to reduce or end direct funding for international organizations whose missions do not substantially advance U.S. foreign policy interests, are duplicative, or are not well-managed. Additional steps will be taken to make the Department and USAID leaner, more efficient, and more effective. These steps to reduce foreign assistance free up funding for critical priorities here at home and put America first.

The President's 2018 Budget requests $25.6 billion in base funding for the Department of State and USAID, a $10.1 billion or 28 percent reduction from the 2017 annualized CR level. The Budget also requests $12.0 billion as Overseas Contingency Operations funding for extraordinary costs, primarily in war areas like Syria, Iraq, and Afghanistan, for an agency total of $37.6 billion. The 2018 Budget also requests $1.5 billion for Treasury International Programs, an $803 million or 35 percent reduction from the 2017 annualized CR level.

The President's 2018 Budget:

- Maintains robust funding levels for embassy security and other core diplomatic activities while implementing efficiencies. Consistent with the Benghazi Accountability Review Board recommendation, the Budget applies $2.2 billion toward new embassy construction and maintenance in 2018. Maintaining adequate embassy security levels requires the efficient and effective use of available resources to keep embassy employees safe.
- Provides $3.1 billion to meet the security assistance commitment to Israel, currently at an all-time high; ensuring that Israel has the ability to defend itself from threats and maintain its Qualitative Military Edge.
- Eliminates the Global Climate Change Initiative and fulfills the President's pledge to cease payments to the United Nations' (UN) climate change programs by eliminating U.S. funding related to the Green Climate Fund and its two precursor Climate Investment Funds.
- Provides sufficient resources on a path to fulfill the $1 billion U.S. pledge to Gavi, the Vaccine Alliance. This commitment helps support Gavi to vaccinate hundreds of millions of children in low-resource countries and save millions of lives.

- Provides sufficient resources to maintain current commitments and all current patient levels on HIV/AIDS treatment under the President's Emergency Plan for AIDS Relief (PEPFAR) and maintains funding for malaria programs. The Budget also meets U.S. commitments to the Global Fund for AIDS, Tuberculosis, and Malaria by providing 33 percent of projected contributions from all donors, consistent with the limit currently in law.
- Shifts some foreign military assistance from grants to loans in order to reduce costs for the U.S. taxpayer, while potentially allowing recipients to purchase more American-made weaponry with U.S. assistance, but on a repayable basis.
- Reduces funding to the UN and affiliated agencies, including UN peacekeeping and other international organizations, by setting the expectation that these organizations rein in costs and that the funding burden be shared more fairly among members. The amount the U.S. would contribute to the UN budget would be reduced and the U.S. would not contribute more than 25 percent for UN peacekeeping costs.
- Refocuses economic and development assistance to countries of greatest strategic importance to the U.S. and ensures the effectiveness of U.S. taxpayer investments by rightsizing funding across countries and sectors.
- Allows for significant funding of humanitarian assistance, including food aid, disaster, and refugee program funding. This would focus funding on the highest priority areas while asking the rest of the world to pay their fair share. The Budget eliminates the Emergency Refugee and Migration Assistance account, a duplicative and stovepiped account, and challenges international and non-governmental relief organizations to become more efficient and effective.
- Reduces funding for the Department of State's Educational and Cultural Exchange (ECE) Programs. ECE resources would focus on sustaining the flagship Fulbright Program, which forges lasting connections between Americans and emerging leaders around the globe.
- Improves efficiency by eliminating overlapping peacekeeping and security capacity building efforts and duplicative contingency programs, such as the Complex Crises Fund. The Budget also eliminates direct appropriations to small organizations that receive funding from other sources and can continue to operate without direct Federal funds, such as the East-West Center.
- Recognizes the need for State and USAID to pursue greater efficiencies through reorganization and consolidation in order to enable effective diplomacy and development.
- Reduces funding for multilateral development banks, including the World Bank, by approximately $650 million over three years compared to commitments made by the previous administration. Even with the proposed decreases, the U.S. would retain its current status as a top donor while saving taxpayer dollars.

DEPARTMENT OF TRANSPORTATION

The Department of Transportation (DOT) is responsible for ensuring a fast, safe, efficient, accessible, and convenient transportation system that meets our vital national interests and enhances the quality of life of the American people today, and into the future. The Budget request reflects a streamlined DOT that is focused on performing vital Federal safety oversight functions and investing in nationally and regionally significant transportation infrastructure projects. The Budget reduces or eliminates programs that are either inefficient, duplicative of other Federal efforts, or that involve activities that are better delivered by States, localities, or the private sector.

The President's 2018 Budget requests $16.2 billion for DOT's discretionary budget, a $2.4 billion or 13 percent decrease from the 2017 annualized CR level.

The President's 2018 Budget:

- Initiates a multi-year reauthorization proposal to shift the air traffic control function of the Federal Aviation Administration to an independent, non-governmental organization, making the system more efficient and innovative while maintaining safety. This would benefit the flying public and taxpayers overall.

- Restructures and reduces Federal subsidies to Amtrak to focus resources on the parts of the passenger rail system that provide meaningful transportation options within regions. The Budget terminates Federal support for Amtrak's long distance train services, which have long been inefficient and incur the vast majority of Amtrak's operating losses. This would allow Amtrak to focus on better managing its State-supported and Northeast Corridor train services.

- Limits funding for the Federal Transit Administration's Capital Investment Program (New Starts) to projects with existing full funding grant agreements only. Future investments in new transit projects would be funded by the localities that use and benefit from these localized projects.

- Eliminates funding for the Essential Air Service (EAS) program, which was originally conceived of as a temporary program nearly 40 years ago to provide subsidized commercial air service to rural airports. EAS flights are not full and have high subsidy costs per passenger. Several EAS-eligible communities are relatively close to major airports, and communities that have EAS could be served by other existing modes of transportation. This proposal would result in a discretionary savings of $175 million from the 2017 annualized CR level.

- Eliminates funding for the unauthorized TIGER discretionary grant program, which awards grants to projects that are generally eligible for funding under existing surface transportation formula programs, saving $499 million from the 2017 annualized CR level. Further, DOT's Nationally Significant Freight and Highway Projects grant program, authorized by the FAST Act of 2015, supports larger highway and multimodal freight projects with demonstrable national or regional benefits. This grant program is authorized at an annual average of $900 million through 2020.

DEPARTMENT OF THE TREASURY

The Department of the Treasury is charged with maintaining a strong economy, promoting conditions that enable economic growth and stability, protecting the integrity of the financial system, and managing the U.S. Government's finances and resources effectively. The Budget will bring renewed discipline to the Department by focusing resources on collecting revenue, managing the Nation's debt, protecting the financial system from threats, and combating financial crime and terrorism financing.

The President's 2018 Budget requests $12.1 billion in discretionary resources for the Department of the Treasury's domestic programs, a $519 million or 4.1 percent decrease from the 2017 annualized CR level. This program level excludes mandatory spending changes involving the Treasury Forfeiture Fund.

The President's 2018 Budget:

- Preserves key operations of the Internal Revenue Service (IRS) to ensure that the IRS could continue to combat identity theft, prevent fraud, and reduce the deficit through the effective enforcement and administration of tax laws. Diverting resources from antiquated operations that are still reliant on paper-based review in the era of electronic tax filing would achieve significant savings, a funding reduction of $239 million from the 2017 annualized CR level.

- Strengthens cybersecurity by investing in a Department-wide plan to strategically enhance existing security systems and preempt fragmentation of information technology management across the bureaus, positioning Treasury to anticipate and nimbly respond in the event of a cyberattack.

- Prioritizes funding for Treasury's array of economic enforcement tools. Key Treasury programs that freeze the accounts of terrorists and proliferators, implement sanctions on rogue nations, and link law enforcement agencies with financial institutions are critical to the continued safety and financial stability of the Nation.

- Eliminates funding for Community Development Financial Institutions (CDFI) Fund grants, a savings of $210 million from the 2017 annualized CR level. The CDFI Fund was created more than 20 years ago to jump-start a now mature industry where private institutions have ready access to the capital needed to extend credit and provide financial services to underserved communities.

- Empowers the Treasury Secretary, as Chairperson of the Financial Stability Oversight Council, to end taxpayer bailouts and foster economic growth by advancing financial regulatory reforms that promote market discipline and ensure the accountability of financial regulators.

- Shrinks the Federal workforce and increases its efficiency by redirecting resources away from duplicative policy offices to staff that manage the Nation's finances.

DEPARTMENT OF VETERANS AFFAIRS

The Department of Veterans Affairs (VA) provides health care and a wide variety of benefits to military veterans and their survivors. The 2018 Budget fulfills the President's commitment to the Nation's veterans by requesting the resources necessary to provide the support our veterans have earned through sacrifice and service to our Nation. The Budget significantly increases funding for VA Medical Care so that VA can continue to meet the ever-growing demand for health care services while building an integrated system of care that strengthens services within VA and makes effective use of community services. The Budget request includes increased funding for and extension of the Veterans Choice Program, making it easier for eligible veterans to access the medical care they need, close to home.

The President's 2018 Budget requests $78.9 billion in discretionary funding for VA, a $4.4 billion or 6 percent increase from the 2017 enacted level. The Budget also requests legislative authority and $3.5 billion in mandatory budget authority in 2018 to continue the Veterans Choice Program.

The President's 2018 Budget:

- Ensures the Nation's veterans receive high-quality health care and timely access to benefits and services. An estimated 11 million veterans participate in VA programs. This Budget provides the resources necessary to ensure veterans receive the care and support earned through their service to the Nation.
- Provides a $4.6 billion increase in discretionary funding for VA health care to improve patient access and timeliness of medical care services for over nine million enrolled veterans. This funding would enable the Department to provide a broad range of primary care, specialized care, and related medical and social support services to enrolled veterans, including services that are uniquely related to veterans' health and special needs.
- Extends and funds the Veterans Choice Program to ensure that every eligible veteran continues to have the choice to seek care at VA or through a private provider. Without action, this critical program will expire in August 2017, which would result in veterans having fewer choices of where to receive care.
- Supports VA programs that provide services to homeless and at-risk veterans and their families to help keep them safe and sheltered.
- Provides access to education benefits, enhanced services, and other programs to assist veterans' transition to civilian life. VA partners with other agencies to provide critical training, support services, and counseling throughout a veteran's transition and their post-military career.

- Continues critical investments aimed at optimizing productivity and transforming VA's claims processes. Provides resources to reduce the time required to process and adjudicate veterans' disability compensation claims.
- Invests in information technology to improve the efficiency and efficacy of VA services. Provides sufficient funding for sustainment, development, and modernization initiatives that would improve the quality of services provided to veterans and avoid the costs of maintaining outdated, inefficient systems.

ENVIRONMENTAL PROTECTION AGENCY

The Environmental Protection Agency (EPA) is responsible for protecting human health and the environment. The budget for EPA reflects the success of environmental protection efforts, a focus on core legal requirements, the important role of the States in implementing the Nation's environmental laws, and the President's priority to ease the burden of unnecessary Federal regulations that impose significant costs for workers and consumers without justifiable environmental benefits. This would result in approximately 3,200 fewer positions at the agency. EPA would primarily support States and Tribes in their important role protecting air, land, and water in the 21st Century.

The President's 2018 Budget requests $5.7 billion for the Environmental Protection Agency, a savings of $2.6 billion, or 31 percent, from the 2017 annualized CR level.

The President's 2018 Budget:

- Provides robust funding for critical drinking and wastewater infrastructure. These funding levels further the President's ongoing commitment to infrastructure repair and replacement and would allow States, municipalities, and private entities to continue to finance high priority infrastructure investments that protect human health. The Budget includes $2.3 billion for the State Revolving Funds, a $4 million increase over the 2017 annualized CR level. The Budget also provides $20 million for the Water Infrastructure Finance and Innovation Act program, equal to the funding provided in the 2017 annualized CR. This credit subsidy could potentially support $1 billion in direct Federal loans.
- Discontinues funding for the Clean Power Plan, international climate change programs, climate change research and partnership programs, and related efforts—saving over $100 million for the American taxpayer compared to 2017 annualized CR levels. Consistent with the President's America First Energy Plan, the Budget reorients EPA's air program to protect the air we breathe without unduly burdening the American economy.
- Reins in Superfund administrative costs and emphasizes efficiency efforts by funding the Hazardous Substance Superfund Account at $762 million, $330 million below the 2017 annualized CR level. The agency would prioritize the use of existing settlement funds to clean up hazardous waste sites and look for ways to remove some of the barriers that have delayed the program's ability to return sites to the community.
- Avoids duplication by concentrating EPA's enforcement of environmental protection violations on programs that are not delegated to States, while providing oversight to maintain consistency and assistance across State, local, and tribal programs. This reduces EPA's Office of Enforcement

and Compliance Assurance budget to $419 million, which is $129 million below the 2017 annualized CR level.

- Better targets EPA's Office of Research and Development (ORD) at a level of approximately $250 million, which would result in a savings of $233 million from the 2017 annualized CR level. ORD would prioritize activities that support decision-making related to core environmental statutory requirements, as opposed to extramural activities, such as providing STAR grants.
- Supports Categorical Grants with $597 million, a $482 million reduction below 2017 annualized CR levels. These lower levels are in line with the broader strategy of streamlining environmental protection. This funding level eliminates or substantially reduces Federal investment in State environmental activities that go beyond EPA's statutory requirements.
- Eliminates funding for specific regional efforts such as the Great Lakes Restoration Initiative, the Chesapeake Bay, and other geographic programs. These geographic program eliminations are $427 million lower than the 2017 annualized CR levels. The Budget returns the responsibility for funding local environmental efforts and programs to State and local entities, allowing EPA to focus on its highest national priorities.
- Eliminates more than 50 EPA programs, saving an additional $347 million compared to the 2017 annualized CR level. Lower priority and poorly performing programs and grants are not funded, nor are duplicative functions that can be absorbed into other programs or that are State and local responsibilities. Examples of eliminations in addition to those previously mentioned include: Energy Star; Targeted Airshed Grants; the Endocrine Disruptor Screening Program; and infrastructure assistance to Alaska Native Villages and the Mexico Border.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

The National Aeronautics and Space Administration (NASA) is responsible for increasing understanding of the universe and our place in it, advancing America's world-leading aerospace technology, inspiring the Nation, and opening the space frontier. The Budget increases cooperation with industry through the use of public-private partnerships, focuses the Nation's efforts on deep space exploration rather than Earth-centric research, and develops technologies that would help achieve U.S. space goals and benefit the economy.

The President's 2018 Budget requests $19.1 billion for NASA, a 0.8 percent decrease from the 2017 annualized CR level, with targeted increases consistent with the President's priorities.

The President's 2018 Budget:

- Supports and expands public-private partnerships as the foundation of future U.S. civilian space efforts. The Budget creates new opportunities for collaboration with industry on space station operations, supports public-private partnerships for deep-space habitation and exploration systems, funds data buys from companies operating small satellite constellations, and supports work with industry to develop and commercialize new space technologies.
- Paves the way for eventual over-land commercial supersonic flights and safer, more efficient air travel with a strong program of aeronautics research. The Budget provides $624 million for aeronautics research and development.
- Reinvigorates robotic exploration of the Solar System by providing $1.9 billion for the Planetary Science program, including funding for a mission to repeatedly fly by Jupiter's icy ocean moon Europa and a Mars rover that would launch in 2020. To preserve the balance of NASA's science portfolio and maintain flexibility to conduct missions that were determined to be more important by the science community, the Budget provides no funding for a multi-billion-dollar mission to land on Europa. The Budget also supports initiatives that use smaller, less expensive satellites to advance science in a cost-effective manner.
- Provides $3.7 billion for continued development of the Orion crew vehicle, Space Launch System, and associated ground system, to send American astronauts on deep-space missions. To accommodate increasing development costs, the Budget cancels the multi-billion-dollar Asteroid Redirect Mission. NASA will investigate approaches for reducing the costs of exploration missions to enable a more expansive exploration program.
- Provides $1.8 billion for a focused, balanced Earth science portfolio that supports the priorities of the science and applications communities, a savings of $102 million from the 2017 annualized CR level. The Budget terminates four Earth science missions (PACE, OCO-3, DSCOVR

Earth-viewing instruments, and CLARREO Pathfinder) and reduces funding for Earth science research grants.

- Eliminates the $115 million Office of Education, resulting in a more focused education effort through NASA's Science Mission Directorate. The Office of Education has experienced significant challenges in implementing a NASA-wide education strategy and is performing functions that are duplicative of other parts of the agency.
- Restructures a duplicative robotic satellite refueling demonstration mission to reduce its cost and better position it to support a nascent commercial satellite servicing industry, resulting in a savings of $88 million from the 2017 annualized CR level.
- Strengthens NASA's cybersecurity capabilities, safeguarding critical systems and data.

SMALL BUSINESS ADMINISTRATION

The Small Business Administration (SBA) ensures that small businesses have the tools and resources needed to start and develop their operations, drive U.S. competitiveness, and help grow the economy. The President is committed to assisting small businesses succeed through reducing the regulatory and tax burdens that can impede the development of small firms. The Budget increases efficiency through responsible reductions to redundant programs and by eliminating programs that deliver services better provided by the private sector.

The President's 2018 Budget requests $826.5 million for SBA, a $43.2 million or 5.0 percent decrease from the 2017 annualized CR level.

The President's 2018 Budget:

- Supports more than $45 billion in loan guarantees to assist America's small business owners with access to affordable capital to start or expand their businesses.
- Strengthens SBA's outreach center programs by reducing duplicative services, coordinating best practices, and investing in communities that would benefit from SBA's business center support. As a result, SBA would be better positioned to strengthen local partnerships and more efficiently serve program participants while achieving savings over the 2017 annualized CR level.
- Supports over $1 billion in disaster relief lending to businesses, homeowners, renters, and property owners to help American communities recover quickly in the wake of declared disasters. Through the disaster loan program, SBA is able to provide affordable, accessible, and immediate direct assistance to those hardest hit when disaster strikes.
- Achieves $12 million in cost savings from the 2017 annualized CR level through identifying and eliminating those SBA grant programs where the private sector provides effective mechanisms to foster local business development and investment. Eliminations include PRIME technical assistance grants, Regional Innovation Clusters, and Growth Accelerators.
- Provides training and support services for transitioning service members and veterans to promote entrepreneurship and business ownership. These programs help to fulfill the President's commitment to support the Nation's veterans by providing business counseling, lending, and contracting assistance.
- Maintains $28 million in microloan financing and technical assistance to help serve, strengthen, and sustain the smallest of small businesses and startups.
- Allows SBA to advocate and assist small businesses in accessing Federal contracts and small business research opportunities Government-wide.

Summary Tables

Table 1. Proposed Discretionary Caps for 2018 Budget

(Budget authority in billions of dollars)

	Caps	
	2017	**2018**
Current Law Base Caps: [1]		
Defense	551	549
Non-Defense	519	516
Total, Current Law Base Caps	**1,070**	**1,065**
Proposed Base Cap Changes: [2]		
Defense	*+25*	*+54*
Non-Defense	*–15*	*–54*
Total, Proposed Changes	***+10***	.....
Proposed Base Caps:		
Defense	576	603
Non-Defense	504	462
Total, Proposed Base Caps	**1,080**	**1,065**
Enacted and Proposed Cap Adjustments:		
Overseas Contingency Operations (OCO) [2]	89	77
Emergency Funding	3	.....
Program Integrity	2	2
Disaster Relief	8	7
Total, Cap Adjustments	**102**	**86**
Total, Discretionary Budget Authority	**1,181**	**1,151**
21st Century CURES appropriations [3]	*1*	*1*

[1] The caps presented here are equal to the levels specified for 2017 and 2018 in the Balanced Budget and Emergency Deficit Control Act of 1985, as amended (BBEDCA). The 2017 caps were revised in the Bipartisan Budget Act of 2015 and the 2018 caps include OMB estimates of Joint Committee enforcement (also known as "sequestration").

[2] The Administration proposes an increase in the existing defense caps for 2017 and 2018 that is offset with decreases to the non-defense caps. About 60 percent of the 2017 defense increase is offset by non-defense decreases in 2017 while the entire defense increase in 2018 is offset by non-defense decreases. An additional $5 billion in defense funding is proposed as OCO in 2017.

[3] The 21st Century CURES Act permitted funds to be appropriated each year for certain activities outside of the discretionary caps so long as the appropriations were specifically provided for the authorized purposes. These amounts are displayed outside of the discretionary totals for this reason.

Health and Human Services	*0.9*	*1.1*	*+0.2*	*+21.1%*

* $50 million or less.

[1] The 2017 CR/Enacted column reflects enacted appropriations and levels of continuing appropriations provided under the Continuing Appropriations Act, 2017 (Division C of Public Law 114–223, as amended by Division A of Public Law 114–254) that are due to expire on April 28. The levels presented here are the amounts OMB scores under the caps; therefore, the levels for 2017 may differ in total from those on Table 1.

[2] Enacted, continuing, and proposed changes in mandatory programs (CHIMPs) are included in both 2017 and 2018. Some agency presentations in this volume where noted reflect a program level that excludes these amounts.

[3] Funding for Food for Peace Title II Grants is included in the State, USAID, and Treasury International programs total. Although the funds are appropriated to the Department of Agriculture, the funds are administered by USAID.

[4] Funding from the Hospital Insurance and Supplementary Medical Insurance trust funds for administrative expenses incurred by the Social Security Administration that support the Medicare program are included in the Health and Human Services total and not in the Social Security Administration total.

[5] HUD receipt levels for 2018 are a placeholder and subject to change as detailed estimates under the Administration's economic and technical assumptions for the full Budget are finalized.

[6] The Balanced Budget and Emergency Deficit Control Act of 1985 authorizes an adjustment to the discretionary spending caps for appropriations that are designated by the Congress as being for "disaster relief" provided those appropriations are for activities carried out pursuant to a determination under the Robert T. Stafford Disaster Relief and Emergency Assistance Act. Currently, based on enacted and continuing appropriations, OMB estimates the total adjustment available for disaster funding for 2018 at $7,366 million. Further details, including any revisions necessary to account for final 2017 appropriations and the specific amounts of disaster relief funding requested for individual agencies in 2018 authorized to administer disaster relief programs, will be provided in subsequent Administration proposals.

[7] The 21st Century CURES Act permitted funds to be appropriated each year for certain activities outside of the discretionary caps so long as the appropriations were specifically provided for the authorized purposes. These amounts are displayed outside of the discretionary totals for this reason.

Table 3. Major 2018 Budget Changes from Current Law

(Budget authority in billions of dollars)

	2018 Caps [1]		Change:	
	Current Law [2]	Proposed	Dollars	Percent
Discretionary Categories:				
Defense	549	603	+54	+10%
Non-Defense	516	462	–54	–10%
Total, 2018 Base Caps	**1,065**	**1,065**	.....	.....

* $500 million or less.

[1] Only base funding caps are represented on this table and cap adjustments permitted by the Balanced Budget and Emergency Deficit Control Act of 1985 for overseas contingency operations, disaster relief, program integrity, and emergency requirements are excluded.

[2] The current law caps are equal to the levels specified for 2018 in the Balanced Budget and Emergency Deficit Control Act of 1985, including OMB estimates for Joint Committee enforcement (also known as "sequestration").

Table 4. Major 2017 Changes from Security Supplemental Request

(Budget authority in billions of dollars)

	2017 Caps		Change:	
	Current Law	Proposed [1]	Dollars	Percent
Discretionary Categories:				
Defense	551	576	+25	+5%
Non-Defense	519	504	–15	–3%
Major Changes:				
Border Wall and implementation of Executive Orders	.....	*3*	*+3*	*N/A*
Other Non-Defense programs	*519*	*501*	*–18*	*–3%*
Total, 2018 Base Caps	1,070	1,080	+10	+1%
Cap Adjustments:				
Defense Overseas Contingency Operations (OCO)	65	70	+5	+8%

[1] The Administration proposes an increase in the existing defense cap for 2017 that is partially offset with a decrease to the non-defense cap while an additional $5 billion defense request in 2017 is requested as OCO.

INFORMATION MEMORANDUM FOR THE DEPUTY ASSISTANT SECRETARY FOR FISH, WILDLIFE AND PARKS

DATE: February 19, 2019
FROM: Amy Lueders, Southwest Regional Director, U.S. Fish and Wildlife Service
SUBJECT: U.S. Fish and Wildlife Service Issues of Interest in Arizona

I. STATEMENT OF PURPOSE

Provide information on key U.S. Fish and Wildlife Service (FWS) issues of Congressional or other significant interest in the state of Arizona.

II. BACKGROUND

The State of Arizona is 113,998 square miles. The FWS has approximately 163 staff in the state that support the FWS mission through a number of programs. Arizona has nine National Wildlife Refuges that total 1.73 million acres and provide hunting and angling opportunities to visitors, as well as being actively engaged in recovering endangered species such as the Sonoran pronghorn. Arizona is home to the largest national wildlife refuge in the lower 48 states, Cabeza Prieta. The three National Fish Hatcheries spawn, raise and release imperiled desert fishes, as well as several trout species for angling, including the threatened Apache trout. The Arizona Ecological Services Field Office manages protection and recovery for 64 listed species in the state including the Mexican wolf, the lesser long-nosed bat, the Gila topminnow, the ocelot and the jaguar. Arizona is also home to the Navajo Nation Tribal Eagle aviary.

III. DISCUSSION

Mexican wolves

The Mexican gray wolf subspecies was listed as endangered under Endangered Species Act (ESA) in 1976; the subspecies-level listing was incorporated into a species-level listing of the gray wolf in 1978. The FWS established a nonessential experimental population (NEP) of the Mexican gray wolf in Arizona and New Mexico in 1998, with the first wolves released that year. In 2015, FWS separately listed the Mexican gray wolf subspecies as endangered and revised regulations for the NEP under ESA section 10(j). In 2017, FWS published a final revised recovery plan that was endorsed by the affected states. In January 2018, several environmental groups filed litigation against the final recovery plan. FWS and DOJ filed a motion to dismiss and are awaiting the judge's decision. The FWS continues to work with partners to further Mexican gray wolf recovery.

The 2017 annual population survey documents a minimum of 114 wolves in the wild. The 2018 survey results will be announced in March 2019. In 2018, there were 20 total wolf mortalities, which is most in a single year. In 2018, there were 99 total confirmed livestock depredations, which is 2.5 times above normal. We still consider this to be in normal levels, because we also had the highest number of collared wolves (~85), which helps us detect mortalities.

Arizona Water Settlement Act

The FWS is a Cooperating Agency with numerous federal, state, and local partners on the Arizona Water Settlement Act (AWSA), New Mexico Central Arizona Project Unit (NM Unit). Partners include Bureau of Reclamation, Forest Service, Bureau of Land Management, the New Mexico Interstate Stream Commission, the New Mexico Department of Game and Fish and the NM Unit. The AWSA allows New Mexico to divert an annual average of 14,000 acre-feet of water from the Gila and San Francisco basins (not to exceed 140,000 acre-feet over a 10-year period). Numerous ESA listed species occur in the project area. The AWSA includes provisions that allow funds to be expended on municipal water conservation and reclamation efforts. Currently, the Bureau of Reclamation is drafting an Environmental Impact Statement (EIS) and a Biological Assessment. The very complex analyses and documents are well underway but are behind schedule. The FWS is working closely with BOR on this project.

Drought Contingency Plan: Colorado River Basin

The Drought Contingency Plan (DCP) is a seven-basin state effort to adjust water allocations temporarily to combat impacts of the current drought. Water allocated in the lower basin is in danger of disruption should lake elevation in Lake Mead drop below 1,075 feet, resulting in a series of Shortage Criteria in which full water allocations will not be delivered. The state of Arizona is one of the first states to be most impacted by water withholding, and is overall a strong proponent of the DCP. It is predicted that Lake Mead elevations will dip below 1,071 by 2021 resulting in triggering Shortage Criteria. The FWS has long committed resources to coordinate with Federal, State and Tribal partners to address environmental ramifications of current river conditions or any DCP plan to provide ESA compliance where necessary. We are partners in the Glen Canyon Dam Adaptive Management Program and the Lower Colorado River Multi-Species Conservation Program (LCR MSCP); both of these provide environmental compliance for river operations and water allocations from Glen Canyon Dam to Mexico. ESA compliance by these programs are necessary to mitigate impacts to the four endangered Colorado River fishes, and at least five other listed terrestrial species that rely on the river corridor. The LCR MSCP is a large Section 7 and Section 10/HCP hybrid that provides ESA coverage for 57 Federal, State, and Tribal entities. This program addresses the needs of 27 species that either are listed under the ESA or are otherwise sensitive. At the request of LCR MSCP Steering Committee members, we are regularly meeting to discuss options for amending the existing program to cover additional compliance needs as a result of the DCP.

Border Barrier on Southern Arizona National Wildlife Refuges

Along Arizona's International Border with Mexico, National Wildlife Refuge (NWR) System lands have experienced significant habitat damage due to illegal border-related activities such as trail networks, litter, dumping, illegal roads and abandoned vehicles. In 2008, Customs and Border Protection (CBP) installed vehicle barriers or fencing in combination with monitoring and sensing technology which significantly reduced habitat damage and conflicts with the public. It is important to note that the barriers were developed to meet specific needs. The designs allow for limited movement of wildlife and do not restrict potential floodwaters at specific locations. Like other areas along the US/Mexican border, the combination of border barriers, surveillance towers, number of agents, and tactics used by CBP has been effective in reducing illegal activities occurring on Arizona's southern NWR's.

Cabeza Prieta National Wildlife Refuge: The 860,000-acre Cabeza Prieta NWR shares 56 miles of border with Mexico and exhibits both a 4-foot tall Normandy-style barrier and a 4-foot tall concrete bollard-style barrier. Both barriers are effective at prohibiting vehicles from crossing but allow wildlife passage. Prior to the border barrier installation, drug smugglers coming from Mexico created significant illegal roads, before abandoning the vehicles on refuge property. While not stopping foot traffic, the current border barriers have been very effective in stopping drug smuggling vehicles while still allowing for wildlife movement, including the endangered Sonoran pronghorn.

Buenos Aires National Wildlife Refuge: The 117,500-acre Buenos Aires NWR is located in south-central Arizona and shares about 5.26 miles of border with Mexico. A barbed wire barrier along the International Border separated the refuge from Mexico until 2007/2008, when Department of Homeland Security (DHS) contractors constructed a 15-foot tall iron and concrete bollard-style barrier along the south boundary of Buenos Aires NWR. While this style of barrier raised concern for migration patterns of large mammals such as jaguar, its installation has also created habitat benefits to the semi-desert grasslands. This DHS barrier allows for some water and wildlife movement, and provides the important tactical advantage of agents and surveillance towers being able to view potential opponents/threats through the barrier (rather than the view being obstructed by a solid barrier). The combination of towers, border barrier and CBP agents have significantly decreased the volume of discarded trash, allowed restoration of grassland conditions, and allowed safe public access into Buenos Aires NWR areas that were previously deemed dangerous and were therefore closed to public entry for over a decade.

San Bernardino National Wildlife Refuge: The 2,369-acre San Bernardino NWR is located in southeastern Arizona and shares about 2.65 miles of border with Mexico and utilizes a combination of vehicle barriers, surveillance towers, and CBP agents. San Bernardino NWR constructed a 4-foot tall iron and concrete bollard-style vehicle barrier along their south boundary in 2005 to prevent habitat-damaging vehicle incursions from Mexico. In 2008, DHS contractors constructed a 4-foot tall mix of iron Normandy-style barrier and iron and concrete bollard-style barrier along the U.S/Mexico border parallel to the existing NWR barrier. Both the San Bernardino NWR and DHS vehicle barriers allow water and wildlife movement.

Southern Arizona NWRs will continue to work with CBP on opportunities for border infrastructure that allows for international security as well as wildlife and habitat considerations.

No More Deaths – Humanitarian Aid on Cabeza Prieta National Wildlife Refuge

Cabeza Prieta NWR shares 56 miles of border with Mexico where illegal border crossings and drug smuggling are ongoing issues on USFWS lands. Humanitarian aid workers deposit supply caches for cross border violators along trails and within designated wilderness, often in conflict with USFWS regulations and CBP operations. To date, the refuge has permitted life-saving measures such as rescue beacons, 55-gallon water stations and blue flags at systems that provide water for wildlife. In July 2017, the access permit for Cabeza Prieta NWR, Barry M. Goldwater Range (DOD), and Sonoran Desert National Monument (BLM) was revised emphasizing current refuge regulation to remove all personal property. The USFWS issued nine citations to humanitarian aid workers in 2018 for driving in wilderness areas, abandonment of property, trespass and failing to obtain an access permit. All violators were involved in distributing supply caches in the wilderness area. The Assistant U.S. Attorney's Office is prosecuting these cases. In

January 2018, the first three defendants were found guilty on all counts. The remaining cases are pending trial.

Closure of Roads on Kofa National Wildlife Refuge

Mr. Allen Armstrong owns the Castle Dome and Hull Mine in-holdings within Kofa NWR. In 2017 he gated the Castle Dome Road that passes through his inholdings, preventing access to refuge lands via a route that had been available to the public for decades. His stated reasons for the closure were concerns about noise, dust, and traffic conflicts between refuge visitors and patrons to his Castle Dome Museum/Hull Mine. Mr. Armstrong has expressed no interest in providing an easement across his properties. The Castle Dome Road closure and potential closure of other roads significantly affect refuge staff and visitors. The FWS was able to come to an agreement with Mr. Armstrong that he will re-open the road until an alternative road is created. The FWS has initiated an Environmental Assessment (EA) for rerouting the Castle Dome Road with a goal of ensuring continued access for Refuge visitors and the least disruption to their traditional use. The FWS will continue efforts to maintain public access and anticipates completing the EA and moving forward with a proposed route in summer 2019.

Apache trout

FWS biologists are immersed in recovering threatened Apache trout in concert with the White Mountain Apache Tribe and Arizona Game and Fish Department and to providing many opportunities to angle for this rare yellow trout. The FWS's Arizona Fish and Wildlife Conservation Office staff seeks to expand Apache trout populations into waters where the fish naturally occurred in the past. Williams Creek National Fish Hatchery staff consults with geneticists at the Southwestern Native Fish and Aquatic Resources and Recovery Center in Dexter, New Mexico, to manage hatchery broodstock at the genetic level to maintain a robust captive stock. Apache trout is Arizona's state fish and lives naturally only in streams pouring off the White Mountains of eastern Arizona on the Ft. Apache Indian Reservation and Apache Sitgreaves National Forest. Angling for Apache trout generates excise taxes for the Wildlife and Sport Fish Restoration Program.

INFORMATION MEMORANDUM FOR THE DEPUTY ASSISTANT SECRETARY FOR FISH, WILDLIFE AND PARKS

DATE: February 19, 2019
FROM: Amy Lueders, Southwest Regional Director, U.S. Fish and Wildlife Service
SUBJECT: U.S. Fish and Wildlife Service Issues of Interest in New Mexico

I. STATEMENT OF PURPOSE

Provide information on key U.S. Fish and Wildlife Service (FWS) issues of Congressional or other significant interest in the state of New Mexico.

II. BACKGROUND

The State of New Mexico is 121,697 square miles. Albuquerque is home to the Southwest Regional Office. The FWS has approximately 343 staff in the state that support the FWS mission through a number of programs. New Mexico has nine National Wildlife Refuges that total 389,224 acres and provide hunting and angling opportunities. The Southwest Region's first urban refuge, Valle de Oro, is a 580-acre urban oasis on a former dairy farm. Sevilleta National Wildlife Refuge is the largest refuge in the state and home to the Sevilleta Wolf Management Facility. The Mora National Fish Hatchery has the only captive broodstock of threatened Gila trout. The New Mexico Ecological Services Field Office manages protection and recovery for 53 listed species in the State of New Mexico including the Mexican wolf, the New Mexico meadow jumping mouse, the Rio Grande silvery minnow, the lesser prairie-chicken and dunes sagebrush lizard. New Mexico is also home to the Pueblo of Zuni and Pueblo of Jemez Tribal Eagle aviaries.

III. DISCUSSION

Lesser Prairie-Chicken

In April 2014, FWS listed the lesser prairie-chicken (LPC) as threatened under the Endangered Species Act (ESA) with a special 4(d) rule providing ESA compliance for activities carried out under *The Lesser Prairie-Chicken Range-wide Conservation Plan* (RWP). In 2014, the Permian Basin Petroleum Association and four New Mexico counties filed a lawsuit challenging the listing rule. In 2015, a court vacated the rule; FWS did not appeal. Prior to the 2015 court ruling, FWS began work on a species status assessment (SSA) for the LPC to help inform future actions. The SSA included input from the five range states, the Western Association of Fish and Wildlife Agencies (WAFWA), and many other scientific experts. The SSA has undergone independent peer review and uses the best available information to characterize current science, threats, and conservation efforts. The results of the SSA are included within a draft SSA report that has not been publicly released. In 2016, FWS was again petitioned to list the LPC as endangered. FWS published a positive 90-day finding, but has not made a 12-month finding. On February 14, 2019, the petitioners (CBD, Defenders, and WEG) filed a notice of intent to sue FWS for failure to make a 12-month finding for the lesser prairie-chicken.

Mexican wolves

The Mexican gray wolf subspecies was listed as endangered under the Endangered Species Act in 1976; the subspecies-level listing was incorporated into a species-level listing of the gray wolf in 1978. The FWS established a nonessential experimental population (NEP) of the Mexican gray wolf in Arizona and New Mexico in 1998, with the first wolves released that year. In 2015, FWS separately listed the Mexican gray wolf subspecies as endangered and revised regulations for the NEP under ESA section 10(j). In 2017, FWS published a final revised recovery plan that was endorsed by the affected states. The FWS continues to work with partners to further Mexican gray wolf recovery.

The 2017 annual year-end population surveys documents a minimum of 114 wolves in the wild (2016 = 113, 2015 = 97). The 2018 survey results will be announced in March 2019. In 2018, there were a total of 99 confirmed livestock depredations, which is 2.5 times above normal (2017 = 28, 2016 = 50, 2015 = 49, 2014 = 30). In 2018, there were a total of 20 Mexican wolf mortalities, which is the highest in a single year. We still consider this to be in normal levels, because we also had the highest number of collared wolves (~85), which helps us detect mortalities.

Arizona Water Settlement Act

The FWS is a Cooperating Agency with numerous federal, state, and local partners on the Arizona Water Settlement Act (AWSA), New Mexico Central Arizona Project Unit (NM Unit). Partners include Bureau of Reclamation, Forest Service, Bureau of Land Management, the New Mexico Interstate Stream Commission, the New Mexico Department of Game and Fish and the NM Unit. The AWSA allows New Mexico to divert an annual average of 14,000 acre-feet of water from the Gila and San Francisco basins (not to exceed 140,000 acre-feet over a 10-year period). Numerous ESA listed species occur in the project area. The AWSA includes provisions that allow funds to be expended on municipal water conservation and reclamation efforts. Currently, the Bureau of Reclamation is drafting an Environmental Impact Statement (EIS) and a Biological Assessment. The very complex analyses and documents are well underway but are behind schedule. The FWS is working closely with BOR on this project.

Native American Eagle Aviary

In order to provide assistance to Federally Recognized Tribes within the United States, in accordance with 50 CFR 22, the ability to possess for religious use, live non-releasable eagles, the FWS Southwest Region, Migratory Bird Permit Office implemented the Native American Eagle Aviary Permit. Eagles housed in the aviaries are birds rescued from the wild because of sickness or injury and treated by wildlife rehabilitators, but the nature or severity of injuries prevent the birds from being returned to the wild. These eagles are then cared for, for the remainder of their lives at the aviary. Through the permitted aviary, Native Americans have an additional source of eagle feathers (through molting) for the cultural and religious needs. The Pueblo of Zuni, in 1990, was the first Tribe in the Nation to propose plans for a sanctuary to house non-releasable eagles for cultural and religious use. Currently the aviary houses 12 bald eagles and 15 golden eagles. The Pueblo of Jemez, located in the Jemez Reservation, was the second Tribe in New Mexico to receive an Eagle Aviary - Live permit. The Pueblo has two

satellite aviaries, each housing one golden eagle. Each satellite caretaker is a member of an Eagle Watching Society.

New Mexico Water Right on National Wildlife Refuges

Both the FWS and Bureau of Reclamation (Reclamation) have concerns that the New Mexico Office of the State Engineer's (NMOSE) administration of water rights used for environmental purposes is inaccurate and negatively impacts Federal interests. The Department of Interior's (DOI) Office of the Solicitor is coordinating an effort with the NMOSE to address DOI concerns regarding the State's administration of water rights that affect the following three National Wildlife Refuge System (NWRS) units:

Bitter Lake NWR: According to NMOSE, if this refuge changes the use of its water rights from agriculture to wetlands, this refuge may see a net reduction of 30% of its diversionary water rights. NMOSE has argued that wetland use is solely consumptive in nature. In fact, these wetlands consume about half as much water as required by a comparable agricultural operation.

Valle de Oro NWR: Similarly, NMOSE estimates that there will also be a 30% reduction to this refuge's water rights if water is used to manage wetlands and not for agriculture. Reclamation shares the refuge's concern as a co-owner of this refuge's water rights.

Bosque del Apache NWR: In NMOSE's files, this refuge's water right is defined as both an agricultural right and as a wetland flow-through right. This unresolved discrepancy has complicated efforts to defend the refuge's water rights. The DOI Solicitor's Office is engaged with both the FWS and Reclamation with these water right challenges and is coordinating this effort to resolve these issues with the NMOSE.

Gallinas River "inter se" phase of the State of New Mexico Pecos River General Stream Adjudication

The Gallinas River section of the Pecos River adjudication was initiated by the State of New Mexico in 1985 to make final determinations regarding the validity of water right claims in the Gallinas River basin, including water rights for the Las Vegas NWR. The adjudication has two broad phases: initial determination of water rights by the State Engineer and challenges or objections to those determinations in the "*inter se*" phase, which is now underway. Las Vegas NWR holds the largest water right in the basin but with a priority date of 1909, it is one of the most junior in the system. As part of the adjudication process, the Department of Justice (DOJ) and FWS will strive to ensure that water rights with more senior claims are adjudicated fairly so Las Vegas NWR receives water to which it is legally entitled. On average, Las Vegas NWR receives only about 25 percent of its entitled water. In March 2018, DOJ filed objections on behalf of the FWS to the State Engineer's findings on 41 (of approximately 2,000) claims associated with the Gallinas River. As part of the *inter se* process, which began in June of 2018, DOJ met with almost all water claimants to gather further evidence about their claimed water rights. The DOJ is now in the process of withdrawing or settling the majority of the FWS objections. Currently, DOJ expects it will only litigate the FWS objections to two or three remaining claims. The water rights holders impacted by the Gallinas adjudication may not fully understand the adjudication process and may have misconceptions about the FWS role. It is important to note the FWS is the only Federal agency in the adjudication and the only entity to have filed objections in the *inter se* phase.

Proposed Addition to Sevilleta National Wildlife Refuge

Mr. Gordon Herkenhoff owns Indian Hill Farms, adjacent to Sevilleta NWR. Approximately 600 acres are in cultivation and 650 acres support native upland habitat. Approximately 975 acres are east of I-25 and 275 acres lie west of I-25. The property includes a significant amount of pre-1907 water rights which are the most valuable and senior water rights recognized by the State of New Mexico and are rarely available for purchase. Addition of this property to Sevilleta NWR would advance wildlife habitat restoration of wetlands, uplands, and riparian corridors. It would also provide opportunities to expand recreational access. The FWS intends to utilize Migratory Bird Conservation Fund dollars to acquire the property as a phased, multi-year project, beginning in FY 2019.

Rio Mora National Wildlife Refuge

The Rio Mora National Wildlife Refuge and Conservation Area (CA), a 300,000-acre landscape conservation effort, is a partnership-driven initiative for the protection and enhancement (via acquisition of conservation easement or fee title interest or through technical assistance) of the 950,000-acre Mora River watershed in Mora, San Miguel and Colfax counties. Rio Mora NWR was established through initial donation of the 4,224-acre Wind River Ranch, which continues to support research, restoration, outreach, interpretation and environmental education in cooperation with the Denver Zoological Foundation (Denver Zoo), the Pueblo of Pojoaque, and New Mexico Highlands University. The $1.7 million startup funding provided by Thaw Charitable Trust to Denver Zoo was expended in 2017; the Denver Zoo is exploring grants and fund raising to continue their work on Rio Mora NWR and the FWS provides offices, equipment, fuel and housing to support the partnership. There is a Memorandum of Understanding between the FWS, Denver Zoo, the Pueblo of Pojoaque and New Mexico Highlands University. Additionally, the Biophilia Foundation's planned donation of the 3,300-acre Pritzlaff Ranch to the FWS is in the title-clearing phase. The ranch, which will become a unit of Rio Mora NWR and CA, is operated as a forest and watershed restoration and educational site for private citizens, public school and university students, local landowners, and environmental professionals.

Recovering Threatened Gila Trout

Mora National Fish Hatchery is a place of refuge for the rare Gila trout as well as where leading-edge science is employed for their betterment. The hatchery holds five genetically distinct lineages of Gila trout, native only to the uppermost reaches of the Gila River. Hatchery staff consults with geneticists at the Southwestern Native Fish and Aquatic Resources and Recovery Center in Dexter, New Mexico, to manage hatchery broodstock at the genetic level to maintain robust captive stocks. Hatchery staff work in concert with USFWS's New Mexico Fish and Wildlife Conservation Office, the New Mexico Department of Game and Fish and U.S. Forest Service to return Gila trout to streams occupied by the fish in the past. Expanding the trout's range is essential to eventual delisting and provides more fishing opportunities, which generates excise taxes for the Wildlife and Sport Fish Restoration Program.

---

Charisa,

We need to get the data call out for the 90-day list asap. Sara prepared a formal memo which should be downtown tomorrow, but she also prepared the following email for me to send out to the Deputies requesting input. Is it OK if I send it or do you want to send it?

Tina

From: **Prigan, Sara** <sara_prigan@fws.gov>
Date: Thu, Aug 10, 2017 at 4:03 PM
Subject: DRAFT 2 / EMAIL: Due Thursday, Aug. 24 -- Input for First Quarter 90-day List
To: Tina Campbell <tina_campbell@fws.gov>, "Wilkinson, Susan" <susan_wilkinson@fws.gov>

The Department has requested the Service's input for the quarterly regulatory report to the Office of Management and Budget for the first quarter of FY 2018 (October through December 2017).

Please provide your input via email to Sara Prigan in PPM (sara_prigan@fws.gov) no later than **Thursday, August 24, 2017**. Please cc Susan Wilkinson and Anissa Craghead.

The assignment is described in detail in this attachment, which you should read first:
CALL for FY18Q1 OMB reg report.docx

Also attached is the draft list. Please add your changes **USING TRACK CHANGES AND YELLOW HIGHLIGHTING** and then return to PPM.
Draft Q4 list filename:
DRAFT 90-Day List_Oct through Dec 2017_(Q118).docx

If you wish to create new RINs, we will need to obtain approval from the policy people up through the Secretary's office before we can create them. You will fill out **one** of the following attached forms to begin that process:
ESA RIN: Approval Request for New RIN (ESA Rule) (eff 07-01-17).docx
or

Non-ESA RIN: Approval Request for New RIN (non-ESA Rule) (eff 07-01-17).docx

Thanks in advance for helping us meet out deadline for getting our 90-day list to the Office of the Secretary, and if you have any questions, please don't hesitate contact one of us.

Tina

FWS Regulations Ready for Review from October through December 2017 (Q118)

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OES Review
‡1018-AY05 Removal of the Eastern Cougar from the List of Endangered and Threatened Wildlife 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to delist the eastern cougar, formerly found in eastern North America, due to extinction. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Finalizing in Region; to FWS Director's Office week of September 18 (per our Aug 4 update to OES)
‡1018-AZ02 Listing Determination for the Sonoyta Mud Turtle 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/21/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Sonoyta mud turtle as an endangered species under the Endangered Species Act. This turtle is found in freshwater habitats in Arizona, and also Mexico. **Controversy:** This species occurs near the U.S.-Mexico border; however, no conflicts with border activities or potential border wall construction have been identified at this time. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review Finalizing in HQ; to FWS Director's Office week of August 21 (per our Aug 4 update to OES)

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re E.O. 12866 significance determination.

FWS Regulations Ready for Review from October through December 2017 (Q118)

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OES Review
‡1018-AZ38 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Three Hawaiian Big Island Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will designate critical habitat for three plant species on Hawaii Island and correct the maps for existing designations for an additional four species. FWS intends to exclude lands owned or managed by the Queen Liliuokalani Trust, the Department of Hawaiian Homelands, and other private landowners under section 4(b)(2) of the Endangered Species Act. **Controversy:** Resolved. FWS coordinated with the Queen Liliuokalani Trust, landowners, and government jurisdictions, and will exclude lands owned by these entities under section 4(b)(2) of the Act. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/7/17 Finalizing in HQ; to FWS Director's Office week of August 21 (per our Aug 4 update to OES)
‡1018-AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant. Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Timothy J. Van Norman, 703-358-2350. OMB comment on Q417: Propose OMB RMO review since addressing fee increases. (Megan suggested we send a briefing paper.)	9/29/17 Pending final review within FWS; will be sent to FWS Director's Office in early September (per our Aug 4 update to OES)

‡1018-AZ69 Migratory Bird Permits; Control Order for Introduced Migratory Bird Species in Hawaii (Cattle Egrets and Barn Owls) 50 CFR 21	~~FR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** This rule will add a control order to apply to cattle egrets and barn owls, two introduced and invasive migratory bird species in Hawaii. The ranges of both species have expanded to occupy all of the Hawaiian islands. Both species have been found to prey on endemic endangered or threatened species. Without this order, control of the two species would require issuing depredation permits, which would add to State and Federal agency costs for control activities that will benefit listed species.~~ ~~**Controversy:** None.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Jerry Thompson (703) 358-2016.~~ ~~**OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."~~	~~7/7/17~~ Published 7/25/17 https://www.gpo.gov/fdsys/pkg/FR-2017-07-25/pdf/2017-15471.pdf

‡1018-AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	~~9/29/17~~ In development in the Bureau; expect to be ready for FWS surname in December 2017 (per our Aug 4 update to OES)

‡1018-BB22 Subsistence Management Regulations for Public Lands in Alaska—Applicability and Scope; Tongass National Forest Submerged Lands 50 CFR 100; 36 CFR 242	FR	Not significant. Not major. **Court driven. No deadline; however, FWS needs to show the plaintiffs and the court that progress is being made.** **What the rule does:** The U.S. District Court for Alaska, in an October 17, 2011, order, enjoined the United States "to promptly initiate regulatory proceedings for the purpose of implementing the subsistence provisions in Title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) with respect to submerged public lands within Tongass National Forest," and directed entry of judgment. To comply with the order, the Federal Subsistence Board (FWS/DOI and USDA/Forest Service, joint rulemaking) published a proposed rule to identify those submerged lands within the Tongass that did not pass to the State of Alaska at Statehood and therefore are subject to the subsistence provisions of ANILCA. DOI/FWS and USDA/Forest Service will now finalize the proposed rule. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Theo Matuskowitz, 907-786-3867.	8/15/17 Will go to SOL and Senior Advisor to the Secretary for Alaska on 8/8/17 (per our Aug 4 update to OES)
‡1018-BB24 Migratory Bird Subsistence Harvest in Alaska; Use of Inedible Bird Parts in Authentic Alaska Native Handicrafts for Sale 50 CFR 92	~~FR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS will amend the permanent subsistence migratory bird harvest regulations in Alaska to enable Alaska Natives to sell authentic native articles of handicraft or clothing that contain inedible byproducts from migratory birds that were taken for food during the Alaska migratory bird subsistence harvest season. These regulations were developed under a co-management process involving the Service, the Alaska Department of Fish and Game, and Alaska Native representatives.~~ ~~**Controversy:** None anticipated.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Donna Dewhurst, 907-786-3499.~~ ~~**OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."~~	~~7/01/17~~ Published 7/24/17 https://www.gpo.gov/fdsys/pkg/FR-2017-07-24/pdf/2017-15465.pdf

‡1018-BB73 Migratory Game Bird Hunting Regulations, 2018–19 50 CFR 20	~~PR~~	~~**Significant. Major.** Not court driven.~~ ~~**What the rule does:** This rule proposes to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. FWS annually prescribes outside limits (frameworks) within which States may select hunting seasons. This proposed rule provides the regulatory schedule, describes the proposed regulatory alternatives for the 2018–19 duck hunting seasons, requests proposals from Indian tribes that wish to establish special migratory game bird hunting regulations on Federal Indian reservations and ceded lands, and requests proposals for the 2019 spring and summer migratory bird subsistence season in Alaska. Migratory game bird hunting seasons provide opportunities for recreation and sustenance; aid Federal, State, and tribal governments in the management of migratory game birds; and permit harvests at levels compatible with migratory game bird population status and habitat conditions.~~ ~~**Controversy:** None.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Ron Kokel, 703-358-1967.~~ ~~**Note:** This action is not subject to EO 13771 (82 FR 9339, February 3, 2017) because it is issued with respect to routine hunting and fishing activities~~	~~7/15/17~~ Published 8/3/17 https://www.gpo.gov/fdsys/pkg/FR-2017-08-03/pdf/2017-16353.pdf

‡1018-BB76 Removal of the Monito Gecko from the Federal List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to remove the Monito gecko from the Federal List of Endangered and Threatened Wildlife due to recovery. The Monito gecko is endemic to the island of Monito, which is located 68 kilometers west of Puerto Rico. This determination is based on a thorough review of the best available scientific and commercial information, which indicates that the threats to this species have been eliminated or reduced to the point that the species no longer meets the definition of an endangered species or a threatened species under the Endangered Species Act. FWS will also make available a post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. ‡1018-BB79 Removal of the Black-Capped Vireo from the Federal List of Endangered and Threatened Wildlife; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove the black-capped vireo, a bird species, from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring (PDM) plan. The black-capped vireo breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states. **Controversy:** A number of public comments opposed the delisting of the black-capped vireo, including one from the Office of Travis County Judge and one from a national park. Those concerns may be reflected in comments FWS receives on the draft PDM. A number of partner agencies have indicated concerns about having the necessary funds to implement the ongoing management needs (e.g., cow-bird removal) and monitoring identified for their lands, which may also result in concerns about the viability of both the delisting and the PDM plan. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Finalizing in Region; to FWS Director's Office week of August 18 (per our Aug 4 update to OES)

‡1018-BC01 Reclassifying the Kirtland's warbler from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Kirtland's warbler from endangered to threatened, due to the impact of management actions in addressing the primary threats to the species and decreasing the overall magnitude of the primary threats. The Kirtland's warbler is found in Michigan, Wisconsin, South Carolina, and Florida in the United States; in Canada during the breeding season; and in the Bahamas during the winter period. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Moved goal publication FY18 Q1 10/10/17 ready for review (per our Aug 4 update to OES)

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re E.O. 12866 significance determination.

‡1018-BC09 Removal of the Foskett Speckled Dace from the List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to remove the Foskett speckled dace, a fish in Oregon, from the Federal List of Endangered and Threatened Wildlife due to recovery. This determination is based on a thorough review of the best available scientific and commercial information, which indicates that the threats to this species have been eliminated or reduced to the point that the species no longer meets the definition of an endangered species or a threatened species under the Endangered Species Act. We will also make available a post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP**: None. **Contact**: Don Morgan, 703-358-2444.	Not subject to OMB review Finalizing in Region; in HQ by mid-October; to FWS Director's Office early November; (FY18 Q1) (per our Aug 4 update to OES)

‡1018-BC64 Endangered and Threatened Wildlife and Plants; Technical Correction for Tonkin Snub-nosed Monkey 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** We are removing the endangered Tonkin snub-nosed monkey from certain regulations that apply only to primates that are listed as threatened species (50 CFR 17.40). Tonkin snub-nosed monkeys were included in these regulations when this species was listed as threatened. However, this species was reclassified as endangered in 1990. Therefore, the provisions of the regulations for threatened primates no longer apply to Tonkin snub-nosed monkeys, and, accordingly, we are correcting this error in the Code of Federal Regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Janine Van Norman, 703-358-2370	~~7/6/17~~ In review in the FWS Director's Office; will go to AS/FWP (per our Aug 4 update to OES)

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re E.O. 12866 significance determination.

Request for a Regulation Identifier Number (RIN)
for ESA Listing Determinations and Critical Habitat Designations
[List Rule Stage, Rule Citation, Rule Title]
[Popular Short Name, if applicable]

I. ESA RULE'S PURPOSE

[Check all that apply]

- ☐ **Listing**
- ☐ **Listing reclassification**
  - ☐ **uplisting**
  - ☐ **downlisting**
- ☐ **Delisting**
- ☐ **4(d) special rule**
- ☐ **Critical habitat designation**
- ☐ **Removal or revision of critical habitat designation**
- ☐ **Other**

If listing and CH are not being proposed concurrently, please explain. [Explain.]

II. NEED FOR ESA RULE

A. Petition? [Yes/No] **If so, who is the petitioner?** [Describe.]

B. Court order or settlement? [Describe.]

C. Other manner this action mandated by law? [If yes, provide citation and explanation.]

D. Part of the 7-year plan? [Yes/No]

E. Status review initiated by the agency? [Yes/No]

F. Current candidate? [Yes/No]

III. WHO RULE MAY AFFECT

A. International or Domestic Species?

B. What populations, groups, Indian tribes, States/regions, or organizations may be affected by this rule, and how? [Describe.]

C. What populations, groups, Indian tribes, States/regions, or organizations may be interested in this rule, and why? [Describe.]

IV. REGULATORY AGENDA AND 90-DAY LIST

A. Has this regulatory action previously had a RIN? If so:

1. **What was the previous RIN?** [Describe.]
2. **When was the previous RIN issued?** [Describe.]
3. **Under what circumstances was the previous RIN withdrawn?** [Describe.]

B. Has this regulatory action appeared on a 90-day list yet? [Yes/No] **If so, which 90-day list did it appear on?** [Provide month/year list covered.]

V. COMPLIANCE WITH REGULATORY REFORM INITIATIVE

[Skip this section if the action is a listing, delisting, or listing reclassification.]

A. Is this a significant new action, a non-significant new action, or a deregulatory action? [Identify.]

1. If this is a significant new action:

[Delisting or downlisting actions may be included under a. below, but not under b.]

a. What are the two deregulatory actions and their status? [Describe.]

b. What are the deregulatory actions that provide offsets to the costs? [Describe.]

2. If this is a de-regulatory action:

a. How is it a de-regulatory action (does it rescind, revise, or streamline)? [Describe.]

b. Is it included in the EO 13771 spreadsheet? [Yes/No.]

c. What is the estimated cost/burden saving, if known? [Provide estimate.]
[Skip this question if the action is a delisting or downlisting.]

3. Full or partial exemptions

a. Do you believe this regulatory action is fully or partially exempt from E.O. 13771? [Yes/No.] **If so, explain the basis. (See attachment for list of exemptions).** [Explain.]

b. Have you submitted an exemption request to the Office of the Executive Secretariat for presentation to OIRA[1] yet? [Yes/No.] **If so, what is the status of that request?** [Explain.]

B. How does this rule meet the goals of EO 13777?

EO 13777 Goals

Goal 1 - Identify regulations for repeal, replacement, or modification, considering (at a minimum) which regulations:

- Eliminate jobs, or inhibit job creation;
- Are outdated, unnecessary, or ineffective;
- Impose costs that exceed benefits;
- Create a serious inconsistency or otherwise interfere with regulatory reform;
- Are inconsistent with the requirements of laws or guidance intended to ensure and maximize the quality, objectivity, utility, and integrity of information disseminated by Federal agencies under the Paperwork Reduction Act; or
- Derive from or implement E.O.s or other Presidential directives that have been subsequently rescinded or substantially modified.

Continued on next page…

[1] *See* Q 33 of OMB OIRA's April 5, 2017, Guidance Implementing Executive Order 13771, Titled "Reducing Regulation and Controlling Regulatory Costs".

EO 13777 Goals (Continued from previous page)

Goal 2 - Improve implementation of existing regulatory initiatives and policies:

- E.O. 12866 (Regulatory Planning and Review), as amended
- E.O. 13771 (Reducing Regulation and Controlling Regulatory Costs)
- E.O. 13563 § 6 ("Retrospective Review")
- Termination…, of programs and activities that derive from or implement… documents… that have been rescinded.

[Describe.]

C. Have we received any comments on this regulatory action through the regulatory reform comment solicitation? [Describe.]

VI. COORDINATION

A. Identify any potentially affected Interior bureaus or offices and describe efforts to coordinate with them. [Identify and describe.]

B. Identify any potentially affected Federal or State agencies and describe efforts to coordinate with them. [Identify and describe.]

C. Identify whether this regulatory action potentially affects any Indian tribes and, if so, what consultation has taken place or is planned? [Identify and describe.]

D. Does this rule involve negotiated rulemaking or other collaborative rulemaking? [Identify and describe.]

VII. TIMING

A. Timeline: [Fill in dates.]

Action	Date (Estimated or Actual)	Is the deadline statutory or court ordered?
ANPRM		
NPRM		
Comment Period End		
Final Rule		
Final Rule Effective		

B. Are there any timing constraints? If so, what are the consequences of missing the deadline(s)?
[Describe what is driving each date – e.g., citation to a statutory deadline, and consequences of missing the date.]

VIII. PUBLIC COMMUNICATIONS

A. Are there any issues or controversy (e.g., litigation, high profile) related to this rule? [Identify and explain.]

B. How will this rule be announced to the public?

[Describe.]

IX. FURTHER INFORMATION

A. Background: [Briefly provide any background information, in understandable language, that will help a reader quickly understand what the document is trying to do and why, and any other useful additional information. Assume the reader knows little about the subject matter. Minimize use of acronyms or abbreviations and do not use them at all unless they are clearly defined.]

B. Primary contact for additional information:

Name: [List.]
Phone: [List.]
Email: [List.]

X. APPROVALS

This request is [___ approved / ___ denied] by the Director:

_____ _____
Director **Date**

***This request is [___ approved / ___ denied] by the Assistant Secretary*:**

_____ _____
Assistant Secretary **Date**

Potential Exemptions

Automatically Exempt

- Routine hunting & fishing regulations – Regulatory actions that are routine hunting and fishing actions that establish annual harvest limits are exempt from the requirement to be offset (and ineligible to be used as cost savings). This includes migratory bird hunting frameworks under the Migratory Bird Treaty Act and fishery management plans and amendments under the Magnuson-Stevens Fishery Conservation and Management Act. This exemption does not apply to regulatory actions that affect hunting and fishing activity that are not routine regulatory actions.[2]

Exempt with OIRA Determination

The following categories of EO 13771 regulatory actions may qualify for a full or partial exemption from EO 13771's requirements. These categories are not exhaustive. If the agency believes it qualifies for an exemption, it should submit an exemption request to OIRA prior to submitting the action to OMB for review under EO 12866 or prior to publication of the EO 13771 regulatory action if it was not subject to EO 12866 review.

- Expressly exempt – EO 13771 expressly exempts regulations issued with respect to a military, national security[3], or foreign affairs function, and regulations related to agency organization, management, or personnel. These actions qualify for a full exemption.

- Emergencies - EO 13771 regulatory actions addressing emergencies such as critical health, safety, financial, non-exempt national security matters, or for some other compelling reason, may qualify for an exemption. In most cases, exemptions for such rules will be granted with respect to the timing of required offsets, allowing the agency to address the emergency before identifying and issuing EO 13771 deregulatory actions. Agencies will generally still be required to offset such actions. If necessary, the costs of such actions, and the requirement to identify for repeal at least two existing regulations, will be moved to the subsequent fiscal year for purposes of determining EO 13771 compliance.

- Statutorily or judicially required - EO 13771 does not prevent agencies from issuing regulatory actions in order to comply with an imminent statutory or judicial deadline, even if they are not able to satisfy EO 13771 's requirements by the time of issuance. However, agencies will be required to offset any such EO 13771 regulatory actions as soon as practicable thereafter. In addition, this flexibility may not apply to discretionary provisions attached to EO 13771 regulatory actions required to comply with statutory or judicial deadlines.

- De minimis -EO 13771 regulatory actions with de minimis costs may qualify for an exemption. For example, if OIRA designates a proposed rule as significant under EO 12866 because it raises novel legal or policy issues, and the agency estimates the action would have present value costs of $50,000 spread over a large number of persons and/or entities, OIRA may exempt the action from some or all of the requirements of EO 13771.[4]

In addition, the following category may be exempt and agencies should submit an exemption request to OIRA in accordance with the process above.

- Income Transfer – A regulatory action may be exempt from E.O. 13771 Section 2's requirements if it causes only income transfers from taxpayers to program beneficiaries, establishes a new fee or changes the existing fee for a service without imposing new costs, or establishes new penalties or fines or changes those already in existence?[5]

[Bureau/Agency]
[Sub-agency, if applicable]

Request for a Regulation Identifier Number (RIN)
[List Rule Stage, Rule Citation, Rule Title]
[Popular Short Name, if applicable]

I. RULE'S PURPOSE

[Summarize, in one or two sentences, what the rule's purpose is.]

II. LEGAL AUTHORITY FOR RULE

[List the statutes or other legal authorities for this action.]

III. NEED FOR RULE

A. What is prompting this regulatory action? [Describe.]

B. How is this regulatory action in the public interest? [Describe.]

C. Is this action mandated by law? [If yes, provide citation and explanation.]

D. Is this action in response to litigation? [If yes, provide case information and explanation.]

E. Is this action a de-regulatory effort identified in an Executive Order or Secretary's Order? [If yes, provide citation and explanation.]

IV. WHO RULE MAY AFFECT

A. What populations, groups, Indian tribes, States/regions, or organizations may be affected by this rule, and how? [Describe.]

B. What populations, groups, Indian tribes, States/regions, or organizations may be interested in this rule, and why? [Describe.]

V. REGULATORY AGENDA AND 90-DAY LIST

A. Has this regulatory action previously had a RIN? If so:

1. **What was the previous RIN?** [Describe.]

2. **When was the previous RIN issued?** [Describe.]

3. **Under what circumstances was the previous RIN withdrawn?** [Describe.]

B. What is the bureau's recommended significance determination under E.O. 12866? Please ensure the recommendation is realistic and defensible to OIRA. [Significant or Non-Significant]

1. **If significant:**
   a. Identify the basis for significance: [Check.]
   - ☐ Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity,

competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities.

- ☐ Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency.
- ☐ Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof.
- ☐ Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive order.

b. Explain how this regulatory action meets the above basis for significance. [Explain.]

2. **Has this regulatory action appeared on a 90-day list yet?** [Yes/No] **If so:**

a. Which 90-day list did it appear on and was it under a prior RIN? [Provide month/year list covered and prior RIN, if applicable.]

b. Has OMB made a significance determination yet? [Yes/No]

c. If OMB determined the regulatory action is significant, explain OMB's rationale for the basis checked above (if different from above). [Explain.]

C. Is this regulatory action potentially major and economically significant? [Yes/No and Explain.]

D. Could this regulatory action have a significant effect on small entities (as defined under the Regulatory Flexibility Act)? [Yes/No and Explain.]

E. Does this regulatory action involve study, experiment, or survey requiring peer review under Information Quality Act? [Yes/No and Explain.]

F. Is there an information collection(s) associated with this document? [Yes/No]

- **If yes, does it have a currently approved OMB Control Number?** [Yes/No]
- **OMB Control Number(s):** [Yes/No]
- **Does it require a new OMB Control Number or a renewal of an existing approval?** [New/Renewal]
- **If a new number or renewal is required, what is the current status?** [Describe.]

VI. COMPLIANCE WITH REGULATORY REFORM INITIATIVE

A. Is this a significant new action, a non-significant new action, or a deregulatory action? [Identify.]

1. If this is a significant new action:

a. What are the two deregulatory actions and their status? [Describe.]

b. What are the deregulatory actions that provide offsets to the costs? [Describe which, if any, deregulatory actions you have identified as offsets or what your plans are for identifying deregulatory actions.]

2. If this is a de-regulatory action:

a. How is it a de-regulatory action (does it rescind, revise, or streamline)? [Describe.]

b. Is it included in the EO 13771 spreadsheet? [Yes/No.]

c. Is the expected source of the cost/burden saving a regulatory provision, an information collection burden reduction, or both? [Describe.]

d. What is the estimated cost/burden saving? [Provide any estimates or ranges of estimates you currently have or plans for estimating savings and when you expect to have the estimates available.]

3. Full or partial exemptions for significant new actions

a. Do you believe this regulatory action is fully or partially exempt from E.O. 13771? [Yes/No.] **If so, explain the basis. (See attachment for list of exemptions).** [Explain.]

b. Have you submitted an exemption request to the Office of the Executive Secretariat for presentation to OIRA[1] yet? [Yes/No.] **If so, what is the status of that request?** [Explain.]

B. How does this rule meet the goals of EO 13777?

EO 13777 Goals

Goal 1 - Identify regulations for repeal, replacement, or modification, considering (at a minimum) which:

- Eliminate jobs, or inhibit job creation;
- Are outdated, unnecessary, or ineffective;
- Impose costs that exceed benefits;
- Create a serious inconsistency or otherwise interfere with regulatory reform;
- Are inconsistent with the requirements of laws or guidance intended to ensure and maximize the quality, objectivity, utility, and integrity of information disseminated by Federal agencies under the Paperwork Reduction Act; or
- Derive from or implement E.O.s or other Presidential directives that have been subsequently rescinded or substantially modified.

Goal 2 - Improve implementation of existing regulatory initiatives and policies:

- E.O. 12866 (Regulatory Planning and Review), as amended
- E.O. 13771 (Reducing Regulation and Controlling Regulatory Costs)
- E.O. 13563 § 6 ("Retrospective Review")
- Termination…, of programs and activities that derive from or implement… documents… that have been rescinded.

[Describe.]

[1] *See* Q 33 of OMB OIRA's April 5, 2017, Guidance Implementing Executive Order 13771, Titled "Reducing Regulation and Controlling Regulatory Costs".

C. Have we received any comments on this regulatory action through the regulatory reform comment solicitation? [Identify the commenters and describe the nature of the comments.]

VII. COORDINATION

A. Identify any potentially affected Interior bureaus or offices and describe efforts to coordinate with them. [Identify and describe.]

B. Identify any potentially affected Federal, State, or local agencies and describe efforts to coordinate with them. [Identify and describe.]

C. Identify whether this regulatory action potentially affects any Indian tribes and, if so, what consultation has taken place or is planned? [Identify and describe.]

D. Does this rule involve negotiated rulemaking or other collaborative rulemaking? [Identify and describe.]

Call for FY17Q4 Quarterly Regulatory Report Input

The Office of the Executive Secretariat and Regulatory Affairs (OES) in the Department of the Interior (DOI) requests the Service's input for the quarterly regulatory report to the Office of Management and Budget (OMB) for the first quarter (Q4) of FY 2018 (**October through December 2017**). Please provide your input to the Division of Policy, Performance, and Management Programs (PPM) by **Thursday, August 24, 2017**.

Why do we do the quarterly report?

OMB will use the information on the report to decide which actions are "significant" as defined by Executive Order 12866 and, therefore, must be submitted to OMB for review.

What do I put on the quarterly report?

Use the attached draft report (filename **DRAFT 90-Day List_Oct through Dec 2017_(Q118).docx**). Do not delete anything in the file. Include all of the regulatory and policy documents that you project will complete Service and Department of the Interior (DOI) review during the October through December 2017 timeframe, whether or not the items have been on a previous quarterly report, **but please try to be realistic when identifying items for inclusion**. Also, provide updates for all items in the draft report.

What if I plan to begin work on a new rulemaking action?

NEW: Before PPM can assign a RIN for any new rule, we must get policy clearance up through the Secretary's Office. You should fill out one of the following forms for each new desired rule (i.e., rulemaking action that does not have a RIN yet):

- *ESA RINs:* **Approval Request for New RIN (ESA Rule) (eff 07-01-17).docx**
- *Non-ESA RINs:* **Approval Request for New RIN (non-ESA Rule) (eff_07-01-17).docx**

(We no longer have to do reg alert forms.)
However, please be aware that if your rule did not appear on the most recent published Unified Agenda, OMB must grant a waiver from Executive Order 13771 before PPM can include your action on this 90-day list. At this point in time, DOI will seek such a waiver from OMB only for extraordinary circumstances.

What format do I use to present my quarterly report input?

You may make your changes in the attached draft report and then email it back to PPM. **However, PLEASE USE TRACK CHANGES AND YELLOW HIGHLIGHTING. Do not delete anything.** Filename for attached draft report is **DRAFT 90-Day List_Oct through Dec 2017_(Q118).docx**.

- Please follow the format in the attached draft report, down to the use of line breaks, bold text, commas, etc.
- Text corrections can be pasted in or typed in, with track changes turned on.
- New entries can be pasted in, with track changes turned on.
- If you wants to remove an entire entry, just make a note in the final column to that effect, or use crossout-text formatting (as seen in some entries in the attached); do not delete using track changes.
- Each entry expected to be ready for OMB review during Q1 must have a specific date in the "Ready for Review" column that falls during Q1. This is the date the action would be ready for OMB review, which is also the date that you project the document to have cleared DOI. "Specific date" means, for example, rather than "Q1" or "mid-October," put in 10/18/17.
- If you have items from Q4 that have not completed OMB review yet, but you believe they will complete OMB review before October and thus do not need to be included again, please put a note to that effect in the right-hand column.
- If you have an action (i.e., one RIN) that will go through more than one stage during Q1 (i.e., separate stages under the same Regulation Identifier Number (RIN); e.g, proposed rule, final rule), include separate entries for each of the stages on your quarterly report input, i.e., each stage in a separate row.
- If you have items from Q4 that have not completed OMB review yet, but you believe they will complete OMB review before October, and they were **not** on the Q4 report, include them and put a note to that effect in the right-hand column.
- For actions that were on Q4 but are now being pushed forward, please try to put in the quarter in which the action will move forward.

What if I have to change my report input after I send it to PPM?

Be specific and clear about what the changes are. If you have only a handful of changes, send an email. If you have a larger number, you may resend your original table; **however, start with a clean document (no previous tracked changes or highlighting) and make sure all of the changes are shown with NEW tracked changes and yellow highlighting.**

Do I have to wait to get clearance through program officials before I send my report input to PPM?

No. To expedite collation of the all-FWS list, **please send your input to PPM at the same time you are clearing your data with the officials.** Then follow up later with forwarded email or other evidence of clearance from your program officials when it is available.

What if I have questions?

Please contact Sara Prigan via email at Sara_Prigan@fws.gov, or via phone at 703-358-2508. If Sara is out of the office, contact Susan Wilkinson, via email at Susan_Wilkinson@fws.gov or

phone at 703-358-2506, or Anissa Craghead, via email at Anissa_Craghead@fws.gov or phone at 703-358-2445.

To whom do I send my program's input?

Please send input via email to Sara Prigan in PPM (contact information above) by **Thursday, August 24, 2017**. Please cc Susan Wilkinson and Anissa Craghead.

Subject:	Re: DRAFT 2 / EMAIL: Due Thursday, Aug. 24 -- Input for First Quarter 90-day List
Date:	Thursday, August 10, 2017 2:52:16 PM
Attachments:	DRAFT 90-Day List_Oct through Dec 2017_(Q118).docx Approval Request for New RIN (ESA Rule) (eff 07-01-17).docx Approval Request for New RIN (non-ESA Rule) (eff 07-01-17).docx CALL for FY18Q1 OMB reg report.docx

---

Quick question - Is this only for AD deps, or RD deps as well?

The Department has requested the Service's input for the quarterly regulatory report to the Office of Management and Budget for the first quarter of FY 2018 (October through December 2017).

Please provide your input via email to Sara Prigan in PPM (sara_prigan@fws.gov) no later than **Thursday, August 24, 2017**. Please cc Susan Wilkinson and Anissa Craghead.

The assignment is described in detail in this attachment, which you should read first:

CALL for FY18Q1 OMB reg report.docx

Also attached is the draft list. Please add your changes **USING TRACK CHANGES AND YELLOW HIGHLIGHTING** and then return to PPM.
Draft Q4 list filename:

DRAFT 90-Day List_Oct through Dec 2017_(Q118).docx

If you wish to create new RINs, we will need to obtain approval from the policy people up through the Secretary's office before we can create them. You will fill out **one** of the following attached forms to begin that process:

ESA RIN: Approval Request for New RIN (ESA Rule) (eff 07-01-17).docx
or
Non-ESA RIN: Approval Request for New RIN (non-ESA Rule) (eff_07-01-17).docx

Thanks in advance for helping us meet out deadline for getting our 90-day list to the Office of the Secretary, and if you have any questions, please don't hesitate contact one of us.

FWS Regulations Ready for Review from October through December 2017 (Q118)

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OES Review
‡1018-AY05 Removal of the Eastern Cougar from the List of Endangered and Threatened Wildlife 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to delist the eastern cougar, formerly found in eastern North America, due to extinction. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Finalizing in Region; to FWS Director's Office week of September 18 (per our Aug 4 update to OES)
‡1018-AZ02 Listing Determination for the Sonoyta Mud Turtle 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/21/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Sonoyta mud turtle as an endangered species under the Endangered Species Act. This turtle is found in freshwater habitats in Arizona, and also Mexico. **Controversy:** This species occurs near the U.S.-Mexico border; however, no conflicts with border activities or potential border wall construction have been identified at this time. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review Finalizing in HQ; to FWS Director's Office week of August 21 (per our Aug 4 update to OES)

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re E.O. 12866 significance determination.

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OES Review
‡1018-AZ38 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Three Hawaiian Big Island Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will designate critical habitat for three plant species on Hawaii Island and correct the maps for existing designations for an additional four species. FWS intends to exclude lands owned or managed by the Queen Liliuokalani Trust, the Department of Hawaiian Homelands, and other private landowners under section 4(b)(2) of the Endangered Species Act. **Controversy:** Resolved. FWS coordinated with the Queen Liliuokalani Trust, landowners, and government jurisdictions, and will exclude lands owned by these entities under section 4(b)(2) of the Act. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/7/17 Finalizing in HQ; to FWS Director's Office week of August 21 (per our Aug 4 update to OES)
‡1018-AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant. Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Timothy J. Van Norman, 703-358-2350. OMB comment on Q417: Propose OMB RMO review since addressing fee increases. (Megan suggested we send a briefing paper.)	9/29/17 Pending final review within FWS; will be sent to FWS Director's Office in early September (per our Aug 4 update to OES)

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re E.O. 12866 significance determination.

‡1018-AZ69 Migratory Bird Permits; Control Order for Introduced Migratory Bird Species in Hawaii (Cattle Egrets and Barn Owls) 50 CFR 21	~~FR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** This rule will add a control order to apply to cattle egrets and barn owls, two introduced and invasive migratory bird species in Hawaii. The ranges of both species have expanded to occupy all of the Hawaiian islands. Both species have been found to prey on endemic endangered or threatened species. Without this order, control of the two species would require issuing depredation permits, which would add to State and Federal agency costs for control activities that will benefit listed species.~~ ~~**Controversy:** None.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Jerry Thompson (703) 358-2016.~~ ~~**OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."~~	~~7/7/17~~ Published 7/25/17 https://www.gpo.gov/fdsys/pkg/FR-2017-07-25/pdf/2017-15471.pdf

‡1018-AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	~~9/29/17~~ In development in the Bureau; expect to be ready for FWS surname in December 2017 (per our Aug 4 update to OES)

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re E.O. 12866 significance determination.

‡1018-BA31 Nonsubsistence Take of Wildlife, and Public Participation and Closure Procedures, on National Wildlife Refuges in Alaska 50 CFR 32 and 36	FR	Not significant. Not major. Not court driven. **What the rule does:** This final rule published August 5, 2016 (81 FR 52248) and became effective September 6, 2016. The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act, signed by the President on April 3, 2017 (Pub. L. 115–20). This action conforms to Pub. L. 115–20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the final rule was nullified under the Congressional Review Act. **Controversy:** The original rulemaking action was controversial. This action is congressionally directed. **Dates of any briefs provided to EOP:** None. **Contact:** Stephanie Brady, 907-306-7448. **OMB's comments in response to Q317 list:** OMB requested a briefing paper.	~~7/01/17~~ In bureau development; to FWS Director's Office week of 8/7/17 (per our Aug 4 update to OES)

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re E.O. 12866 significance determination.

‡1018-BA33 Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4 50 CFR 80	PR	Not significant. Not major. Not court driven. **What the rule does:** This is the first in a four-phase process for directing State fish and wildlife agencies on how they must receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, FWS distributes annual apportionments to States from trust funds derived from excise tax and fuel tax revenues. This phase would address definitions, requirements for licenses counted for apportionment of Federal financial assistance, program income, and other related issues. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR. **Controversy:** None anticipated. State fish and wildlife agencies, as well as other partners, support this final rule and have been closely involved in its development. **Dates of any briefs provided to EOP:** None. **Contact:** Lisa Van Alstyne, 703-358-1705.	7/5/17 Pending Office of the Secretary clearance (per our Aug 4 update to OES) Remove?

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re E.O. 12866 significance determination.

‡1018-BA43 Reclassifying the Borax Lake Chub from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Borax Lake chub from endangered to threatened. The primary threats to the species have been ameliorated; however, due to ongoing threats from geothermal development, FWS is proposing to reclassify the species to threatened status rather than delisting it. FWS is also proposing to correct the List of Endangered and Threatened Wildlife to reflect the current scientifically accepted taxonomy of this species as *Siphateles boraxobius* (=*Gila boraxobius*). **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. **OMB's comment in response to Q317 list:** "If the downlisting is accompanied with a reduction in regulatory burden (e.g., an Endangered Species Act section 4d rule), it is a deregulatory action under E.O. 13771."	Not subject to OMB review Finalizing in Region; in HQ by mid-October; to FWS Director's Office early November 2017 (per our Aug 4 update to OES)
‡1018-BA74 Listing Determination and Critical Habitat Designation for the Guadalupe Fescue 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/09/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Guadalupe fescue, a grass species found in Texas and Mexico, as an endangered species under the Endangered Species Act. FWS will also make a final determination on the designation of critical habitat for the Guadalupe fescue under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	~~8/18/17~~ Finalizing in HQ; to FWS Director's Office week of August 7 (per our Aug 4 update to OES)

‡1018-BA80 Removing Textual Descriptions of Critical Habitat Boundaries for Plants on the Hawaiian Islands 50 CFR 17	FR	Not Significant. Not major. Not court driven. **What the rule does:** This rule will remove the textual descriptions of the critical habitat boundaries from certain entries at 50 CFR 17.99 (plants on the Hawaiian Islands) that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease, or in any other way change the critical habitat designations from which we are removing the textual descriptions of boundaries. This action will save taxpayer resources. We are taking this action in accordance with our May 1, 2012, revision of the regulations related to publishing textual descriptions of critical habitat boundaries in the CFR and as part of our response to Executive Order 13563 (January 18, 2011), which directs Federal agencies to review their existing regulations and then to modify or streamline them in accordance with what they have learned. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Carey Galst, 703-358-1954.	~~8/31/17~~ Finalizing in HQ; to FWS Director's Office week of August 14 (per our Aug 4 update to OES)

‡1018-BB06 Migratory Bird Hunting; Approval of Corrosion-Inhibited Copper Shot as Nontoxic for Waterfowl Hunting 50 CFR 20	~~PR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** Environ-Metal, Inc., of Sweet Home, Oregon, has applied for approval of shot composed of copper as nontoxic for waterfowl hunting in the United States. The shot formulation is at least 99.9 percent copper by weight, with a corrosion-inhibiting coating to prevent release of copper into terrestrial or aquatic environments. FWS has reviewed the shot as required under the criteria in the nontoxic shot approval procedures in FWS regulations. FWS' proposed approval of this shot formulation would increase the number of nontoxic shot options for hunters of migratory waterfowl.~~ ~~**Controversy:** None anticipated.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Ron Kokel, 703-358-1967.~~ ~~**OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."~~	~~7/14/17~~ Cleared DOI 8/1/17; will be sent to OFR week of 8/7/17

‡1018-BB22 Subsistence Management Regulations for Public Lands in Alaska—Applicability and Scope; Tongass National Forest Submerged Lands 50 CFR 100; 36 CFR 242	FR	Not significant. Not major. **Court driven. No deadline; however, FWS needs to show the plaintiffs and the court that progress is being made.** **What the rule does:** The U.S. District Court for Alaska, in an October 17, 2011, order, enjoined the United States "to promptly initiate regulatory proceedings for the purpose of implementing the subsistence provisions in Title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) with respect to submerged public lands within Tongass National Forest," and directed entry of judgment. To comply with the order, the Federal Subsistence Board (FWS/DOI and USDA/Forest Service, joint rulemaking) published a proposed rule to identify those submerged lands within the Tongass that did not pass to the State of Alaska at Statehood and therefore are subject to the subsistence provisions of ANILCA. DOI/FWS and USDA/Forest Service will now finalize the proposed rule. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Theo Matuskowitz, 907-786-3867.	8/15/17 Will go to SOL and Senior Advisor to the Secretary for Alaska on 8/8/17 (per our Aug 4 update to OES)
‡1018-BB24 Migratory Bird Subsistence Harvest in Alaska; Use of Inedible Bird Parts in Authentic Alaska Native Handicrafts for Sale 50 CFR 92	~~FR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS will amend the permanent subsistence migratory bird harvest regulations in Alaska to enable Alaska Natives to sell authentic native articles of handicraft or clothing that contain inedible byproducts from migratory birds that were taken for food during the Alaska migratory bird subsistence harvest season. These regulations were developed under a co-management process involving the Service, the Alaska Department of Fish and Game, and Alaska Native representatives.~~ ~~**Controversy:** None anticipated.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Donna Dewhurst, 907-786-3499.~~ ~~**OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."~~	~~7/01/17~~ Published 7/24/17 https://www.gpo.gov/fdsys/pkg/FR-2017-07-24/pdf/2017-15465.pdf

‡1018-BB73 Migratory Game Bird Hunting Regulations, 2018–19 50 CFR 20	~~PR~~	~~**Significant. Major.** Not court driven.~~ ~~**What the rule does:** This rule proposes to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. FWS annually prescribes outside limits (frameworks) within which States may select hunting seasons. This proposed rule provides the regulatory schedule, describes the proposed regulatory alternatives for the 2018–19 duck hunting seasons, requests proposals from Indian tribes that wish to establish special migratory game bird hunting regulations on Federal Indian reservations and ceded lands, and requests proposals for the 2019 spring and summer migratory bird subsistence season in Alaska. Migratory game bird hunting seasons provide opportunities for recreation and sustenance; aid Federal, State, and tribal governments in the management of migratory game birds; and permit harvests at levels compatible with migratory game bird population status and habitat conditions.~~ ~~**Controversy:** None.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Ron Kokel, 703-358-1967.~~ ~~**Note:** This action is not subject to EO 13771 (82 FR 9339, February 3, 2017) because it is issued with respect to routine hunting and fishing activities~~	~~7/15/17~~ Published 8/3/17 https://www.gpo.gov/fdsys/pkg/FR-2017-08-03/pdf/2017-16353.pdf

‡1018-BB76 Removal of the Monito Gecko from the Federal List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to remove the Monito gecko from the Federal List of Endangered and Threatened Wildlife due to recovery. The Monito gecko is endemic to the island of Monito, which is located 68 kilometers west of Puerto Rico. This determination is based on a thorough review of the best available scientific and commercial information, which indicates that the threats to this species have been eliminated or reduced to the point that the species no longer meets the definition of an endangered species or a threatened species under the Endangered Species Act. FWS will also make available a post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Finalizing in Region; to FWS Director's Office week of October 16 (FY18 Q1) (per our Aug 4 update to OES)

‡1018-BB79 Removal of the Black-Capped Vireo from the Federal List of Endangered and Threatened Wildlife; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove the black-capped vireo, a bird species, from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring (PDM) plan. The black-capped vireo breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states. **Controversy:** A number of public comments opposed the delisting of the black-capped vireo, including one from the Office of Travis County Judge and one from a national park. Those concerns may be reflected in comments FWS receives on the draft PDM. A number of partner agencies have indicated concerns about having the necessary funds to implement the ongoing management needs (e.g., cow-bird removal) and monitoring identified for their lands, which may also result in concerns about the viability of both the delisting and the PDM plan. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Finalizing in Region; to FWS Director's Office week of August 18 (per our Aug 4 update to OES)

Request for a Regulation Identifier Number (RIN)
for ESA Listing Determinations and Critical Habitat Designations
[List Rule Stage, Rule Citation, Rule Title]
[Popular Short Name, if applicable]

I. ESA RULE'S PURPOSE

[Check all that apply]

- ☐ **Listing**
- ☐ **Listing reclassification**
  - ☐ **uplisting**
  - ☐ **downlisting**
- ☐ **Delisting**
- ☐ **4(d) special rule**
- ☐ **Critical habitat designation**
- ☐ **Removal or revision of critical habitat designation**
- ☐ **Other**

If listing and CH are not being proposed concurrently, please explain. [Explain.]

II. NEED FOR ESA RULE

A. Petition? [Yes/No] **If so, who is the petitioner?** [Describe.]

B. Court order or settlement? [Describe.]

C. Other manner this action mandated by law? [If yes, provide citation and explanation.]

D. Part of the 7-year plan? [Yes/No]

E. Status review initiated by the agency? [Yes/No]

F. Current candidate? [Yes/No]

III. WHO RULE MAY AFFECT

A. International or Domestic Species?

B. What populations, groups, Indian tribes, States/regions, or organizations may be affected by this rule, and how? [Describe.]

C. What populations, groups, Indian tribes, States/regions, or organizations may be interested in this rule, and why? [Describe.]

IV. REGULATORY AGENDA AND 90-DAY LIST

A. Has this regulatory action previously had a RIN? If so:

1. **What was the previous RIN?** [Describe.]
2. **When was the previous RIN issued?** [Describe.]
3. **Under what circumstances was the previous RIN withdrawn?** [Describe.]

B. Has this regulatory action appeared on a 90-day list yet? [Yes/No] **If so, which 90-day list did it appear on?** [Provide month/year list covered.]

V. COMPLIANCE WITH REGULATORY REFORM INITIATIVE

[Skip this section if the action is a listing, delisting, or listing reclassification.]

A. Is this a significant new action, a non-significant new action, or a deregulatory action? [Identify.]

1. If this is a significant new action:

[Delisting or downlisting actions may be included under a. below, but not under b.]

a. What are the two deregulatory actions and their status? [Describe.]

b. What are the deregulatory actions that provide offsets to the costs? [Describe.]

2. If this is a de-regulatory action:

a. How is it a de-regulatory action (does it rescind, revise, or streamline)? [Describe.]

b. Is it included in the EO 13771 spreadsheet? [Yes/No.]

c. What is the estimated cost/burden saving, if known? [Provide estimate.]
[Skip this question if the action is a delisting or downlisting.]

3. Full or partial exemptions

a. Do you believe this regulatory action is fully or partially exempt from E.O. 13771? [Yes/No.] **If so, explain the basis. (See attachment for list of exemptions).** [Explain.]

b. Have you submitted an exemption request to the Office of the Executive Secretariat for presentation to OIRA[1] yet? [Yes/No.] **If so, what is the status of that request?** [Explain.]

B. How does this rule meet the goals of EO 13777?

EO 13777 Goals

Goal 1 - Identify regulations for repeal, replacement, or modification, considering (at a minimum) which regulations:

- Eliminate jobs, or inhibit job creation;
- Are outdated, unnecessary, or ineffective;
- Impose costs that exceed benefits;
- Create a serious inconsistency or otherwise interfere with regulatory reform;
- Are inconsistent with the requirements of laws or guidance intended to ensure and maximize the quality, objectivity, utility, and integrity of information disseminated by Federal agencies under the Paperwork Reduction Act; or
- Derive from or implement E.O.s or other Presidential directives that have been subsequently rescinded or substantially modified.

Continued on next page…

[1] *See* Q 33 of OMB OIRA's April 5, 2017, Guidance Implementing Executive Order 13771, Titled "Reducing Regulation and Controlling Regulatory Costs".

EO 13777 Goals (Continued from previous page)

Goal 2 - Improve implementation of existing regulatory initiatives and policies:

- E.O. 12866 (Regulatory Planning and Review), as amended
- E.O. 13771 (Reducing Regulation and Controlling Regulatory Costs)
- E.O. 13563 § 6 ("Retrospective Review")
- Termination…, of programs and activities that derive from or implement… documents… that have been rescinded.

[Describe.]

C. Have we received any comments on this regulatory action through the regulatory reform comment solicitation? [Describe.]

VI. COORDINATION

A. Identify any potentially affected Interior bureaus or offices and describe efforts to coordinate with them. [Identify and describe.]

B. Identify any potentially affected Federal or State agencies and describe efforts to coordinate with them. [Identify and describe.]

C. Identify whether this regulatory action potentially affects any Indian tribes and, if so, what consultation has taken place or is planned? [Identify and describe.]

D. Does this rule involve negotiated rulemaking or other collaborative rulemaking? [Identify and describe.]

VII. TIMING

A. Timeline: [Fill in dates.]

Action	Date (Estimated or Actual)	Is the deadline statutory or court ordered?
ANPRM		
NPRM		
Comment Period End		
Final Rule		
Final Rule Effective		

B. Are there any timing constraints? If so, what are the consequences of missing the deadline(s)?
[Describe what is driving each date – e.g., citation to a statutory deadline, and consequences of missing the date.]

VIII. PUBLIC COMMUNICATIONS

A. Are there any issues or controversy (e.g., litigation, high profile) related to this rule? [Identify and explain.]

B. How will this rule be announced to the public?

[Describe.]

IX. FURTHER INFORMATION

A. Background: [Briefly provide any background information, in understandable language, that will help a reader quickly understand what the document is trying to do and why, and any other useful additional information. Assume the reader knows little about the subject matter. Minimize use of acronyms or abbreviations and do not use them at all unless they are clearly defined.]

B. Primary contact for additional information:

Name: [List.]
Phone: [List.]
Email: [List.]

X. APPROVALS

This request is [___ approved / ___ denied] by the Director:

_____ _____
Director **Date**

***This request is [___ approved / ___ denied] by the Assistant Secretary*:**

_____ _____
Assistant Secretary **Date**

Potential Exemptions

Automatically Exempt

- Routine hunting & fishing regulations – Regulatory actions that are routine hunting and fishing actions that establish annual harvest limits are exempt from the requirement to be offset (and ineligible to be used as cost savings). This includes migratory bird hunting frameworks under the Migratory Bird Treaty Act and fishery management plans and amendments under the Magnuson-Stevens Fishery Conservation and Management Act. This exemption does not apply to regulatory actions that affect hunting and fishing activity that are not routine regulatory actions.[2]

Exempt with OIRA Determination

The following categories of EO 13771 regulatory actions may qualify for a full or partial exemption from EO 13771's requirements. These categories are not exhaustive. If the agency believes it qualifies for an exemption, it should submit an exemption request to OIRA prior to submitting the action to OMB for review under EO 12866 or prior to publication of the EO 13771 regulatory action if it was not subject to EO 12866 review.

- Expressly exempt – EO 13771 expressly exempts regulations issued with respect to a military, national security[3], or foreign affairs function, and regulations related to agency organization, management, or personnel. These actions qualify for a full exemption.

- Emergencies - EO 13771 regulatory actions addressing emergencies such as critical health, safety, financial, non-exempt national security matters, or for some other compelling reason, may qualify for an exemption. In most cases, exemptions for such rules will be granted with respect to the timing of required offsets, allowing the agency to address the emergency before identifying and issuing EO 13771 deregulatory actions. Agencies will generally still be required to offset such actions. If necessary, the costs of such actions, and the requirement to identify for repeal at least two existing regulations, will be moved to the subsequent fiscal year for purposes of determining EO 13771 compliance.

- Statutorily or judicially required - EO 13771 does not prevent agencies from issuing regulatory actions in order to comply with an imminent statutory or judicial deadline, even if they are not able to satisfy EO 13771 's requirements by the time of issuance. However, agencies will be required to offset any such EO 13771 regulatory actions as soon as practicable thereafter. In addition, this flexibility may not apply to discretionary provisions attached to EO 13771 regulatory actions required to comply with statutory or judicial deadlines.

- De minimis -EO 13771 regulatory actions with de minimis costs may qualify for an exemption. For example, if OIRA designates a proposed rule as significant under EO 12866 because it raises novel legal or policy issues, and the agency estimates the action would have present value costs of $50,000 spread over a large number of persons and/or entities, OIRA may exempt the action from some or all of the requirements of EO 13771.[4]

In addition, the following category may be exempt and agencies should submit an exemption request to OIRA in accordance with the process above.

- Income Transfer – A regulatory action may be exempt from E.O. 13771 Section 2's requirements if it causes only income transfers from taxpayers to program beneficiaries, establishes a new fee or changes the existing fee for a service without imposing new costs, or establishes new penalties or fines or changes those already in existence?[5]

[Bureau/Agency]
[Sub-agency, if applicable]

Request for a Regulation Identifier Number (RIN)
[List Rule Stage, Rule Citation, Rule Title]
[Popular Short Name, if applicable]

I. RULE'S PURPOSE

[Summarize, in one or two sentences, what the rule's purpose is.]

II. LEGAL AUTHORITY FOR RULE

[List the statutes or other legal authorities for this action.]

III. NEED FOR RULE

A. What is prompting this regulatory action? [Describe.]

B. How is this regulatory action in the public interest? [Describe.]

C. Is this action mandated by law? [If yes, provide citation and explanation.]

D. Is this action in response to litigation? [If yes, provide case information and explanation.]

E. Is this action a de-regulatory effort identified in an Executive Order or Secretary's Order? [If yes, provide citation and explanation.]

IV. WHO RULE MAY AFFECT

A. What populations, groups, Indian tribes, States/regions, or organizations may be affected by this rule, and how? [Describe.]

B. What populations, groups, Indian tribes, States/regions, or organizations may be interested in this rule, and why? [Describe.]

V. REGULATORY AGENDA AND 90-DAY LIST

A. Has this regulatory action previously had a RIN? If so:

1. **What was the previous RIN?** [Describe.]

2. **When was the previous RIN issued?** [Describe.]

3. **Under what circumstances was the previous RIN withdrawn?** [Describe.]

B. What is the bureau's recommended significance determination under E.O. 12866? Please ensure the recommendation is realistic and defensible to OIRA. [Significant or Non-Significant]

1. **If significant:**
   a. Identify the basis for significance: [Check.]
   - ☐ Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity,

competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities.

- ☐ Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency.
- ☐ Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof.
- ☐ Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive order.

b. Explain how this regulatory action meets the above basis for significance. [Explain.]

2. **Has this regulatory action appeared on a 90-day list yet?** [Yes/No] **If so:**

a. Which 90-day list did it appear on and was it under a prior RIN? [Provide month/year list covered and prior RIN, if applicable.]

b. Has OMB made a significance determination yet? [Yes/No]

c. If OMB determined the regulatory action is significant, explain OMB's rationale for the basis checked above (if different from above). [Explain.]

C. Is this regulatory action potentially major and economically significant? [Yes/No and Explain.]

D. Could this regulatory action have a significant effect on small entities (as defined under the Regulatory Flexibility Act)? [Yes/No and Explain.]

E. Does this regulatory action involve study, experiment, or survey requiring peer review under Information Quality Act? [Yes/No and Explain.]

F. Is there an information collection(s) associated with this document? [Yes/No]

- **If yes, does it have a currently approved OMB Control Number?** [Yes/No]
- **OMB Control Number(s):** [Yes/No]
- **Does it require a new OMB Control Number or a renewal of an existing approval?** [New/Renewal]
- **If a new number or renewal is required, what is the current status?** [Describe.]

VI. COMPLIANCE WITH REGULATORY REFORM INITIATIVE

A. Is this a significant new action, a non-significant new action, or a deregulatory action? [Identify.]

1. If this is a significant new action:

a. What are the two deregulatory actions and their status? [Describe.]

b. What are the deregulatory actions that provide offsets to the costs? [Describe which, if any, deregulatory actions you have identified as offsets or what your plans are for identifying deregulatory actions.]

2. If this is a de-regulatory action:

a. How is it a de-regulatory action (does it rescind, revise, or streamline)? [Describe.]

b. Is it included in the EO 13771 spreadsheet? [Yes/No.]

c. Is the expected source of the cost/burden saving a regulatory provision, an information collection burden reduction, or both? [Describe.]

d. What is the estimated cost/burden saving? [Provide any estimates or ranges of estimates you currently have or plans for estimating savings and when you expect to have the estimates available.]

3. Full or partial exemptions for significant new actions

a. Do you believe this regulatory action is fully or partially exempt from E.O. 13771? [Yes/No.] **If so, explain the basis. (See attachment for list of exemptions).** [Explain.]

b. Have you submitted an exemption request to the Office of the Executive Secretariat for presentation to OIRA[1] yet? [Yes/No.] **If so, what is the status of that request?** [Explain.]

B. How does this rule meet the goals of EO 13777?

EO 13777 Goals

Goal 1 - Identify regulations for repeal, replacement, or modification, considering (at a minimum) which:

- Eliminate jobs, or inhibit job creation;
- Are outdated, unnecessary, or ineffective;
- Impose costs that exceed benefits;
- Create a serious inconsistency or otherwise interfere with regulatory reform;
- Are inconsistent with the requirements of laws or guidance intended to ensure and maximize the quality, objectivity, utility, and integrity of information disseminated by Federal agencies under the Paperwork Reduction Act; or
- Derive from or implement E.O.s or other Presidential directives that have been subsequently rescinded or substantially modified.

Goal 2 - Improve implementation of existing regulatory initiatives and policies:

- E.O. 12866 (Regulatory Planning and Review), as amended
- E.O. 13771 (Reducing Regulation and Controlling Regulatory Costs)
- E.O. 13563 § 6 ("Retrospective Review")
- Termination…, of programs and activities that derive from or implement… documents… that have been rescinded.

[Describe.]

[1] *See* Q 33 of OMB OIRA's April 5, 2017, Guidance Implementing Executive Order 13771, Titled "Reducing Regulation and Controlling Regulatory Costs".

C. Have we received any comments on this regulatory action through the regulatory reform comment solicitation? [Identify the commenters and describe the nature of the comments.]

VII. COORDINATION

A. Identify any potentially affected Interior bureaus or offices and describe efforts to coordinate with them. [Identify and describe.]

B. Identify any potentially affected Federal, State, or local agencies and describe efforts to coordinate with them. [Identify and describe.]

C. Identify whether this regulatory action potentially affects any Indian tribes and, if so, what consultation has taken place or is planned? [Identify and describe.]

D. Does this rule involve negotiated rulemaking or other collaborative rulemaking? [Identify and describe.]

VIII. TIMING

A. Timeline: [Fill in dates.]

Action	Date (Estimated or Actual)	Is the deadline statutory or court ordered?
ANPRM		
NPRM		
Comment Period End		
Final Rule		
Final Rule Effective		

B. Are there any timing constraints? If so, what are the consequences of missing the deadline(s)?
[Describe what is driving each date – e.g., citation to a statutory deadline, and consequences of missing the date.]

IX. PUBLIC COMMUNICATIONS

A. Are there any issues or controversy (e.g., litigation, high profile) related to this rule? [Identify and explain.]

B. How will this rulemaking (i.e., the fact that this rule is being pursued) be announced to the public?
[Describe.]

X. FURTHER INFORMATION

A. Background: [Briefly provide any background information, in understandable language, that will help a reader quickly understand what the document is trying to do and why, and any other useful additional information. Assume the reader knows little about the subject matter. Minimize use of acronyms or abbreviations and do not use them at all unless they are clearly defined.]

B. Primary contact for additional information:

Name: [List.]
Phone: [List.]
Email: [List.]

XI. APPROVALS

Assistant Secretary **Date**

Potential Exemptions

Automatically Exempt

- Routine hunting & fishing regulations – Regulatory actions that are routine hunting and fishing actions that establish annual harvest limits are exempt from the requirement to be offset (and ineligible to be used as cost savings). This includes migratory bird hunting frameworks under the Migratory Bird Treaty Act and fishery management plans and amendments under the Magnuson-Stevens Fishery Conservation and Management Act. This exemption does not apply to regulatory actions that affect hunting and fishing activity that are not routine regulatory actions.[2]

Exempt with OIRA Determination

The following categories of EO 13771 regulatory actions may qualify for a full or partial exemption from EO 13771's requirements. These categories are not exhaustive. If the agency believes it qualifies for an exemption, it should submit an exemption request to OIRA prior to submitting the action to OMB for review under EO 12866 or prior to publication of the EO 13771 regulatory action if it was not subject to EO 12866 review.

- Expressly exempt – EO 13771 expressly exempts regulations issued with respect to a military, national security[3], or foreign affairs function, and regulations related to agency organization, management, or personnel. These actions qualify for a full exemption.

- Emergencies - EO 13771 regulatory actions addressing emergencies such as critical health, safety, financial, non-exempt national security matters, or for some other compelling reason, may qualify for an exemption. In most cases, exemptions for such rules will be granted with respect to the timing of required offsets, allowing the agency to address the emergency before identifying and issuing EO 13771 deregulatory actions. Agencies will generally still be required to offset such actions. If necessary, the costs of such actions, and the requirement to identify for repeal at least two existing regulations, will be moved to the subsequent fiscal year for purposes of determining EO 13771 compliance.

- Statutorily or judicially required - EO 13771 does not prevent agencies from issuing regulatory actions in order to comply with an imminent statutory or judicial deadline, even if they are not able to satisfy EO 13771 's requirements by the time of issuance. However, agencies will be required to offset any such EO 13771 regulatory actions as soon as practicable thereafter. In addition, this flexibility may not apply to discretionary provisions attached to EO 13771 regulatory actions required to comply with statutory or judicial deadlines.

- De minimis -EO 13771 regulatory actions with de minimis costs may qualify for an exemption. For example, if OIRA designates a proposed rule as significant under EO 12866 because it raises novel legal or policy issues, and the agency estimates the action would have present value costs of $50,000 spread over a large number of persons and/or entities, OIRA may exempt the action from some or all of the requirements of EO 13 771.[4]

In addition, the following category may be exempt and agencies should submit an exemption request to OIRA in accordance with the process above.

- Income Transfer – A regulatory action may be exempt from E.O. 13771 Section 2's requirements if it causes only income transfers from taxpayers to program beneficiaries, establishes a new fee or changes the existing fee for a service without imposing new costs, or establishes new penalties or fines or changes those already in existence?[5]

Call for FY17Q4 Quarterly Regulatory Report Input

The Office of the Executive Secretariat and Regulatory Affairs (OES) in the Department of the Interior (DOI) requests the Service's input for the quarterly regulatory report to the Office of Management and Budget (OMB) for the first quarter (Q4) of FY 2018 (**October through December 2017**). Please provide your input to the Division of Policy, Performance, and Management Programs (PPM) by **Thursday, August 24, 2017**.

Why do we do the quarterly report?

OMB will use the information on the report to decide which actions are "significant" as defined by Executive Order 12866 and, therefore, must be submitted to OMB for review.

What do I put on the quarterly report?

Use the attached draft report (filename **DRAFT 90-Day List_Oct through Dec 2017_(Q118).docx**). Do not delete anything in the file. Include all of the regulatory and policy documents that you project will complete Service and Department of the Interior (DOI) review during the October through December 2017 timeframe, whether or not the items have been on a previous quarterly report, **but please try to be realistic when identifying items for inclusion**. Also, provide updates for all items in the draft report.

What if I plan to begin work on a new rulemaking action?

NEW: Before PPM can assign a RIN for any new rule, we must get policy clearance up through the Secretary's Office. You should fill out one of the following forms for each new desired rule (i.e., rulemaking action that does not have a RIN yet):

- *ESA RINs:* **Approval Request for New RIN (ESA Rule) (eff 07-01-17).docx**
- *Non-ESA RINs:* **Approval Request for New RIN (non-ESA Rule) (eff_07-01-17).docx**

(We no longer have to do reg alert forms.)
However, please be aware that if your rule did not appear on the most recent published Unified Agenda, OMB must grant a waiver from Executive Order 13771 before PPM can include your action on this 90-day list. At this point in time, DOI will seek such a waiver from OMB only for extraordinary circumstances.

What format do I use to present my quarterly report input?

You may make your changes in the attached draft report and then email it back to PPM. **However, PLEASE USE TRACK CHANGES AND YELLOW HIGHLIGHTING. Do not delete anything.** Filename for attached draft report is **DRAFT 90-Day List_Oct through Dec 2017_(Q118).docx**.

- Please follow the format in the attached draft report, down to the use of line breaks, bold text, commas, etc.
- Text corrections can be pasted in or typed in, with track changes turned on.
- New entries can be pasted in, with track changes turned on.
- If you wants to remove an entire entry, just make a note in the final column to that effect, or use crossout-text formatting (as seen in some entries in the attached); do not delete using track changes.
- Each entry expected to be ready for OMB review during Q1 must have a specific date in the "Ready for Review" column that falls during Q1. This is the date the action would be ready for OMB review, which is also the date that you project the document to have cleared DOI. "Specific date" means, for example, rather than "Q1" or "mid-October," put in 10/18/17.
- If you have items from Q4 that have not completed OMB review yet, but you believe they will complete OMB review before October and thus do not need to be included again, please put a note to that effect in the right-hand column.
- If you have an action (i.e., one RIN) that will go through more than one stage during Q1 (i.e., separate stages under the same Regulation Identifier Number (RIN); e.g, proposed rule, final rule), include separate entries for each of the stages on your quarterly report input, i.e., each stage in a separate row.
- If you have items from Q4 that have not completed OMB review yet, but you believe they will complete OMB review before October, and they were **not** on the Q4 report, include them and put a note to that effect in the right-hand column.
- For actions that were on Q4 but are now being pushed forward, please try to put in the quarter in which the action will move forward.

What if I have to change my report input after I send it to PPM?

Be specific and clear about what the changes are. If you have only a handful of changes, send an email. If you have a larger number, you may resend your original table; **however, start with a clean document (no previous tracked changes or highlighting) and make sure all of the changes are shown with NEW tracked changes and yellow highlighting.**

Do I have to wait to get clearance through program officials before I send my report input to PPM?

No. To expedite collation of the all-FWS list, **please send your input to PPM at the same time you are clearing your data with the officials.** Then follow up later with forwarded email or other evidence of clearance from your program officials when it is available.

What if I have questions?

Please contact Sara Prigan via email at Sara_Prigan@fws.gov, or via phone at 703-358-2508. If Sara is out of the office, contact Susan Wilkinson, via email at Susan_Wilkinson@fws.gov or

phone at 703-358-2506, or Anissa Craghead, via email at Anissa_Craghead@fws.gov or phone at 703-358-2445.

To whom do I send my program's input?

Please send input via email to Sara Prigan in PPM (contact information above) by **Thursday, August 24, 2017**. Please cc Susan Wilkinson and Anissa Craghead.

Subject:	Due Thursday, Aug. 24 -- Input for First Quarter 90-day List
Date:	Friday, August 11, 2017 3:02:29 PM
Attachments:	DRAFT 90-Day List_Oct through Dec 2017_(Q118).docx Approval Request for New RIN (ESA Rule) (eff 07-01-17).docx Approval Request for New RIN (non-ESA Rule) (eff 07-01-17).docx CALL for FY18Q1 OMB reg report.docx

---

Good afternoon-

The Department has requested the Service's input for the quarterly regulatory report to the Office of Management and Budget for the first quarter of FY 2018 (October through December 2017).

Please provide your input via email to Sara Prigan in PPM (sara_prigan@fws.gov) no later than **Thursday, August 24, 2017.** Please cc: Susan Wilkinson and Anissa Craghead. The assignment is described in detail in the *CALL for FY18Q1 OMB reg report* attachment, which you should read first.

Also attached is the draft list (*DRAFT 90-Day List_Oct through Dec 2017_(Q118)*). Please add your changes **USING TRACK CHANGES AND YELLOW HIGHLIGHTING** and then return to PPM.

If you wish to create new RINs, we will need to obtain approval from the policy people up through the Secretary's office before we can create them. You will fill out one of the following attached forms to begin that process:

- ESA RIN: *Approval Request for New RIN (ESA Rule) (eff 07-01-17)*
- Non-ESA RIN: *Approval Request for New RIN (non-ESA Rule) (eff 07-01-17)*

Thanks in advance for helping us meet out deadline for getting our 90-day list to the Office of the Secretary, and if you have any questions, please don't hesitate contact Tina Campbell or her staff in PPM at 703-358-2676.

Have an extraordinary day!
Charisa

‡1018-AZ38 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Three Hawaiian Big Island Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will designate critical habitat for three plant species on Hawaii Island and correct the maps for existing designations for an additional four species. FWS intends to exclude lands owned or managed by the Queen Liliuokalani Trust, the Department of Hawaiian Homelands, and other private landowners under section 4(b)(2) of the Endangered Species Act. **Controversy:** Resolved. FWS coordinated with the Queen Liliuokalani Trust, landowners, and government jurisdictions, and will exclude lands owned by these entities under section 4(b)(2) of the Act. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/7/17 Finalizing in HQ; to FWS Director's Office week of August 21 (per our Aug 4 update to OES)
‡1018-AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant. Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Timothy J. Van Norman, 703-358-2350. OMB comment on Q417: Propose OMB RMO review since addressing fee increases. (Megan suggested we send a briefing paper.)	9/29/17 Pending final review within FWS; will be sent to FWS Director's Office in early September (per our Aug 4 update to OES)

‡1018-AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	~~9/29/17~~ In development in the Bureau; expect to be ready for FWS surname in December 2017 (per our Aug 4 update to OES)

‡1018-BA33 Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4 50 CFR 80	PR	Not significant. Not major. Not court driven. **What the rule does:** This is the first in a four-phase process for directing State fish and wildlife agencies on how they must receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, FWS distributes annual apportionments to States from trust funds derived from excise tax and fuel tax revenues. This phase would address definitions, requirements for licenses counted for apportionment of Federal financial assistance, program income, and other related issues. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR. **Controversy:** None anticipated. State fish and wildlife agencies, as well as other partners, support this final rule and have been closely involved in its development. **Dates of any briefs provided to EOP:** None. **Contact:** Lisa Van Alstyne, 703-358-1705.	7/5/17 Pending Office of the Secretary clearance (per our Aug 4 update to OES) Remove?

‡1018-BA43 Reclassifying the Borax Lake Chub from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Borax Lake chub from endangered to threatened. The primary threats to the species have been ameliorated; however, due to ongoing threats from geothermal development, FWS is proposing to reclassify the species to threatened status rather than delisting it. FWS is also proposing to correct the List of Endangered and Threatened Wildlife to reflect the current scientifically accepted taxonomy of this species as *Siphateles boraxobius* (=*Gila boraxobius*). **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. **OMB's comment in response to Q317 list:** "If the downlisting is accompanied with a reduction in regulatory burden (e.g., an Endangered Species Act section 4d rule), it is a deregulatory action under E.O. 13771."	Not subject to OMB review Finalizing in Region; in HQ by mid-October; to FWS Director's Office early November 2017 (per our Aug 4 update to OES)
‡1018-BA74 Listing Determination and Critical Habitat Designation for the Guadalupe Fescue 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/09/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Guadalupe fescue, a grass species found in Texas and Mexico, as an endangered species under the Endangered Species Act. FWS will also make a final determination on the designation of critical habitat for the Guadalupe fescue under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	~~8/18/17~~ Finalizing in HQ; to FWS Director's Office week of August 7 (per our Aug 4 update to OES)

‡1018-BA80 Removing Textual Descriptions of Critical Habitat Boundaries for Plants on the Hawaiian Islands 50 CFR 17	FR	Not Significant. Not major. Not court driven. **What the rule does:** This rule will remove the textual descriptions of the critical habitat boundaries from certain entries at 50 CFR 17.99 (plants on the Hawaiian Islands) that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease, or in any other way change the critical habitat designations from which we are removing the textual descriptions of boundaries. This action will save taxpayer resources. We are taking this action in accordance with our May 1, 2012, revision of the regulations related to publishing textual descriptions of critical habitat boundaries in the CFR and as part of our response to Executive Order 13563 (January 18, 2011), which directs Federal agencies to review their existing regulations and then to modify or streamline them in accordance with what they have learned. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Carey Galst, 703-358-1954.	~~8/31/17~~ Finalizing in HQ; to FWS Director's Office week of August 14 (per our Aug 4 update to OES)

‡1018-BB06 Migratory Bird Hunting; Approval of Corrosion-Inhibited Copper Shot as Nontoxic for Waterfowl Hunting 50 CFR 20	~~PR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** Environ-Metal, Inc., of Sweet Home, Oregon, has applied for approval of shot composed of copper as nontoxic for waterfowl hunting in the United States. The shot formulation is at least 99.9 percent copper by weight, with a corrosion-inhibiting coating to prevent release of copper into terrestrial or aquatic environments. FWS has reviewed the shot as required under the criteria in the nontoxic shot approval procedures in FWS regulations. FWS' proposed approval of this shot formulation would increase the number of nontoxic shot options for hunters of migratory waterfowl.~~ ~~**Controversy:** None anticipated.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Ron Kokel, 703-358-1967.~~ ~~**OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."~~	~~7/14/17~~ Cleared DOI 8/1/17; will be sent to OFR week of 8/7/17

‡1018-BB22 Subsistence Management Regulations for Public Lands in Alaska—Applicability and Scope; Tongass National Forest Submerged Lands 50 CFR 100; 36 CFR 242	FR	Not significant. Not major. **Court driven. No deadline; however, FWS needs to show the plaintiffs and the court that progress is being made.** **What the rule does:** The U.S. District Court for Alaska, in an October 17, 2011, order, enjoined the United States "to promptly initiate regulatory proceedings for the purpose of implementing the subsistence provisions in Title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) with respect to submerged public lands within Tongass National Forest," and directed entry of judgment. To comply with the order, the Federal Subsistence Board (FWS/DOI and USDA/Forest Service, joint rulemaking) published a proposed rule to identify those submerged lands within the Tongass that did not pass to the State of Alaska at Statehood and therefore are subject to the subsistence provisions of ANILCA. DOI/FWS and USDA/Forest Service will now finalize the proposed rule. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Theo Matuskowitz, 907-786-3867.	8/15/17 Will go to SOL and Senior Advisor to the Secretary for Alaska on 8/8/17 (per our Aug 4 update to OES)
‡1018-BB24 Migratory Bird Subsistence Harvest in Alaska; Use of Inedible Bird Parts in Authentic Alaska Native Handicrafts for Sale 50 CFR 92	~~FR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS will amend the permanent subsistence migratory bird harvest regulations in Alaska to enable Alaska Natives to sell authentic native articles of handicraft or clothing that contain inedible byproducts from migratory birds that were taken for food during the Alaska migratory bird subsistence harvest season. These regulations were developed under a co-management process involving the Service, the Alaska Department of Fish and Game, and Alaska Native representatives.~~ ~~**Controversy:** None anticipated.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Donna Dewhurst, 907-786-3499.~~ ~~**OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."~~	~~7/01/17~~ Published 7/24/17 https://www.gpo.gov/fdsys/pkg/FR-2017-07-24/pdf/2017-15465.pdf

‡1018-BB73 Migratory Game Bird Hunting Regulations, 2018–19 50 CFR 20	~~PR~~	~~**Significant. Major.** Not court driven.~~ ~~**What the rule does:** This rule proposes to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. FWS annually prescribes outside limits (frameworks) within which States may select hunting seasons. This proposed rule provides the regulatory schedule, describes the proposed regulatory alternatives for the 2018–19 duck hunting seasons, requests proposals from Indian tribes that wish to establish special migratory game bird hunting regulations on Federal Indian reservations and ceded lands, and requests proposals for the 2019 spring and summer migratory bird subsistence season in Alaska. Migratory game bird hunting seasons provide opportunities for recreation and sustenance; aid Federal, State, and tribal governments in the management of migratory game birds; and permit harvests at levels compatible with migratory game bird population status and habitat conditions.~~ ~~**Controversy:** None.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Ron Kokel, 703-358-1967.~~ ~~**Note:** This action is not subject to EO 13771 (82 FR 9339, February 3, 2017) because it is issued with respect to routine hunting and fishing activities~~	~~7/15/17~~ Published 8/3/17 https://www.gpo.gov/fdsys/pkg/FR-2017-08-03/pdf/2017-16353.pdf

Major.** Not court driven. **What the rule does:** Proposes to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. The U.S. Fish and Wildlife Service proposed in an earlier document to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. This supplement to the proposed rule provides the regulatory schedule, announces the Service Migratory Bird Regulations Committee and Flyway Council meetings, and provides Flyway Council recommendations resulting from the Council's March 2017 meetings. **Controversy:** None. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. **Note**: This action is not subject to EO 13771 (82 FR 9339, February 3, 2017) because it is issued with respect to routine hunting and fishing activities	8/15/17 To SOL week of 8/7/17; to FWS Director's Office for surname week of 8/14/17 (per our Aug 4 update to OES)

‡1018-BB75 Refuge-Specific Hunting and Sport Fishing Regulations, 2017–18 50 CFR 32	~~PR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS is proposing to make additions to refuge-specific regulations for the 2017–18 hunting and sport fishing season. This action is part of an annual update for the National Wildlife Refuge System that ensures adequate public notice of openings and changes. FWS operates hunting and fishing programs on refuges to implement the National Wildlife Refuge System Improvement Act of 1997 directives to facilitate compatible priority wildlife-dependent recreational opportunities.~~ ~~**Controversy:** Medium. Some oppose hunting on National Wildlife Refuges. However, failure to have regulations in place will cause issue/controversy with hunters.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Aaron Mize, 703-358-2678.~~ ~~**OMB's comment on Q317 list:** OMB requested a briefing paper.~~ ~~**Note**: This action is not subject to EO 13771 (82 FR 9339, February 3, 2017) because it is issued with respect to routine hunting and fishing activities~~	~~7/1/17~~ Published 8/10/17 https://www.gpo.gov/fdsys/pkg/FR-2017-08-10/pdf/2017-16374.pdf

‡1018-BB76 Removal of the Monito Gecko from the Federal List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to remove the Monito gecko from the Federal List of Endangered and Threatened Wildlife due to recovery. The Monito gecko is endemic to the island of Monito, which is located 68 kilometers west of Puerto Rico. This determination is based on a thorough review of the best available scientific and commercial information, which indicates that the threats to this species have been eliminated or reduced to the point that the species no longer meets the definition of an endangered species or a threatened species under the Endangered Species Act. FWS will also make available a post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Finalizing in Region; to FWS Director's Office week of October 16 (FY18 Q1) (per our Aug 4 update to OES)

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡1018-BB79 Removal of the Black-Capped Vireo from the Federal List of Endangered and Threatened Wildlife; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove the black-capped vireo, a bird species, from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring (PDM) plan. The black-capped vireo breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states. **Controversy:** A number of public comments opposed the delisting of the black-capped vireo, including one from the Office of Travis County Judge and one from a national park. Those concerns may be reflected in comments FWS receives on the draft PDM. A number of partner agencies have indicated concerns about having the necessary funds to implement the ongoing management needs (e.g., cow-bird removal) and monitoring identified for their lands, which may also result in concerns about the viability of both the delisting and the PDM plan. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Finalizing in Region; to FWS Director's Office week of August 18 (per our Aug 4 update to OES)

Request for a Regulation Identifier Number (RIN)
for ESA Listing Determinations and Critical Habitat Designations
[List Rule Stage, Rule Citation, Rule Title]
[Popular Short Name, if applicable]

I. ESA RULE'S PURPOSE

[Check all that apply]

- ☐ **Listing**
- ☐ **Listing reclassification**
  - ☐ **uplisting**
  - ☐ **downlisting**
- ☐ **Delisting**
- ☐ **4(d) special rule**
- ☐ **Critical habitat designation**
- ☐ **Removal or revision of critical habitat designation**
- ☐ **Other**

If listing and CH are not being proposed concurrently, please explain. [Explain.]

II. NEED FOR ESA RULE

A. Petition? [Yes/No] **If so, who is the petitioner?** [Describe.]

B. Court order or settlement? [Describe.]

C. Other manner this action mandated by law? [If yes, provide citation and explanation.]

D. Part of the 7-year plan? [Yes/No]

E. Status review initiated by the agency? [Yes/No]

F. Current candidate? [Yes/No]

III. WHO RULE MAY AFFECT

A. International or Domestic Species?

B. What populations, groups, Indian tribes, States/regions, or organizations may be affected by this rule, and how? [Describe.]

C. What populations, groups, Indian tribes, States/regions, or organizations may be interested in this rule, and why? [Describe.]

IV. REGULATORY AGENDA AND 90-DAY LIST

A. Has this regulatory action previously had a RIN? If so:

1. **What was the previous RIN?** [Describe.]
2. **When was the previous RIN issued?** [Describe.]
3. **Under what circumstances was the previous RIN withdrawn?** [Describe.]

B. Has this regulatory action appeared on a 90-day list yet? [Yes/No] **If so, which 90-day list did it appear on?** [Provide month/year list covered.]

V. COMPLIANCE WITH REGULATORY REFORM INITIATIVE

[Skip this section if the action is a listing, delisting, or listing reclassification.]

A. Is this a significant new action, a non-significant new action, or a deregulatory action? [Identify.]

1. If this is a significant new action:

[Delisting or downlisting actions may be included under a. below, but not under b.]

a. What are the two deregulatory actions and their status? [Describe.]

b. What are the deregulatory actions that provide offsets to the costs? [Describe.]

2. If this is a de-regulatory action:

a. How is it a de-regulatory action (does it rescind, revise, or streamline)? [Describe.]

b. Is it included in the EO 13771 spreadsheet? [Yes/No.]

c. What is the estimated cost/burden saving, if known? [Provide estimate.]
[Skip this question if the action is a delisting or downlisting.]

3. Full or partial exemptions

a. Do you believe this regulatory action is fully or partially exempt from E.O. 13771? [Yes/No.] **If so, explain the basis. (See attachment for list of exemptions).** [Explain.]

b. Have you submitted an exemption request to the Office of the Executive Secretariat for presentation to OIRA[1] yet? [Yes/No.] **If so, what is the status of that request?** [Explain.]

B. How does this rule meet the goals of EO 13777?

EO 13777 Goals

Goal 1 - Identify regulations for repeal, replacement, or modification, considering (at a minimum) which regulations:

- Eliminate jobs, or inhibit job creation;
- Are outdated, unnecessary, or ineffective;
- Impose costs that exceed benefits;
- Create a serious inconsistency or otherwise interfere with regulatory reform;
- Are inconsistent with the requirements of laws or guidance intended to ensure and maximize the quality, objectivity, utility, and integrity of information disseminated by Federal agencies under the Paperwork Reduction Act; or
- Derive from or implement E.O.s or other Presidential directives that have been subsequently rescinded or substantially modified.

Continued on next page…

[1] *See* Q 33 of OMB OIRA's April 5, 2017, Guidance Implementing Executive Order 13771, Titled "Reducing Regulation and Controlling Regulatory Costs".

EO 13777 Goals (Continued from previous page)

Goal 2 - Improve implementation of existing regulatory initiatives and policies:

- E.O. 12866 (Regulatory Planning and Review), as amended
- E.O. 13771 (Reducing Regulation and Controlling Regulatory Costs)
- E.O. 13563 § 6 ("Retrospective Review")
- Termination…, of programs and activities that derive from or implement… documents… that have been rescinded.

[Describe.]

C. Have we received any comments on this regulatory action through the regulatory reform comment solicitation? [Describe.]

VI. COORDINATION

A. Identify any potentially affected Interior bureaus or offices and describe efforts to coordinate with them. [Identify and describe.]

B. Identify any potentially affected Federal or State agencies and describe efforts to coordinate with them. [Identify and describe.]

C. Identify whether this regulatory action potentially affects any Indian tribes and, if so, what consultation has taken place or is planned? [Identify and describe.]

D. Does this rule involve negotiated rulemaking or other collaborative rulemaking? [Identify and describe.]

VII. TIMING

A. Timeline: [Fill in dates.]

Action	Date (Estimated or Actual)	Is the deadline statutory or court ordered?
ANPRM		
NPRM		
Comment Period End		
Final Rule		
Final Rule Effective		

B. Are there any timing constraints? If so, what are the consequences of missing the deadline(s)?
[Describe what is driving each date – e.g., citation to a statutory deadline, and consequences of missing the date.]

VIII. PUBLIC COMMUNICATIONS

A. Are there any issues or controversy (e.g., litigation, high profile) related to this rule? [Identify and explain.]

B. How will this rule be announced to the public?

[Describe.]

IX. FURTHER INFORMATION

A. Background: [Briefly provide any background information, in understandable language, that will help a reader quickly understand what the document is trying to do and why, and any other useful additional information. Assume the reader knows little about the subject matter. Minimize use of acronyms or abbreviations and do not use them at all unless they are clearly defined.]

B. Primary contact for additional information:

Potential Exemptions

Automatically Exempt

- Routine hunting & fishing regulations – Regulatory actions that are routine hunting and fishing actions that establish annual harvest limits are exempt from the requirement to be offset (and ineligible to be used as cost savings). This includes migratory bird hunting frameworks under the Migratory Bird Treaty Act and fishery management plans and amendments under the Magnuson-Stevens Fishery Conservation and Management Act. This exemption does not apply to regulatory actions that affect hunting and fishing activity that are not routine regulatory actions.[2]

Exempt with OIRA Determination

The following categories of EO 13771 regulatory actions may qualify for a full or partial exemption from EO 13771's requirements. These categories are not exhaustive. If the agency believes it qualifies for an exemption, it should submit an exemption request to OIRA prior to submitting the action to OMB for review under EO 12866 or prior to publication of the EO 13771 regulatory action if it was not subject to EO 12866 review.

- Expressly exempt – EO 13771 expressly exempts regulations issued with respect to a military, national security[3], or foreign affairs function, and regulations related to agency organization, management, or personnel. These actions qualify for a full exemption.

- Emergencies - EO 13771 regulatory actions addressing emergencies such as critical health, safety, financial, non-exempt national security matters, or for some other compelling reason, may qualify for an exemption. In most cases, exemptions for such rules will be granted with respect to the timing of required offsets, allowing the agency to address the emergency before identifying and issuing EO 13771 deregulatory actions. Agencies will generally still be required to offset such actions. If necessary, the costs of such actions, and the requirement to identify for repeal at least two existing regulations, will be moved to the subsequent fiscal year for purposes of determining EO 13771 compliance.

- Statutorily or judicially required - EO 13771 does not prevent agencies from issuing regulatory actions in order to comply with an imminent statutory or judicial deadline, even if they are not able to satisfy EO 13771 's requirements by the time of issuance. However, agencies will be required to offset any such EO 13771 regulatory actions as soon as practicable thereafter. In addition, this flexibility may not apply to discretionary provisions attached to EO 13771 regulatory actions required to comply with statutory or judicial deadlines.

- De minimis -EO 13771 regulatory actions with de minimis costs may qualify for an exemption. For example, if OIRA designates a proposed rule as significant under EO 12866 because it raises novel legal or policy issues, and the agency estimates the action would have present value costs of $50,000 spread over a large number of persons and/or entities, OIRA may exempt the action from some or all of the requirements of EO 13771.[4]

In addition, the following category may be exempt and agencies should submit an exemption request to OIRA in accordance with the process above.

- Income Transfer – A regulatory action may be exempt from E.O. 13771 Section 2's requirements if it causes only income transfers from taxpayers to program beneficiaries, establishes a new fee or changes the existing fee for a service without imposing new costs, or establishes new penalties or fines or changes those already in existence?[5]

[Bureau/Agency]
[Sub-agency, if applicable]

Request for a Regulation Identifier Number (RIN)
[List Rule Stage, Rule Citation, Rule Title]
[Popular Short Name, if applicable]

I. RULE'S PURPOSE

[Summarize, in one or two sentences, what the rule's purpose is.]

II. LEGAL AUTHORITY FOR RULE

[List the statutes or other legal authorities for this action.]

III. NEED FOR RULE

A. What is prompting this regulatory action? [Describe.]

B. How is this regulatory action in the public interest? [Describe.]

C. Is this action mandated by law? [If yes, provide citation and explanation.]

D. Is this action in response to litigation? [If yes, provide case information and explanation.]

E. Is this action a de-regulatory effort identified in an Executive Order or Secretary's Order? [If yes, provide citation and explanation.]

IV. WHO RULE MAY AFFECT

A. What populations, groups, Indian tribes, States/regions, or organizations may be affected by this rule, and how? [Describe.]

B. What populations, groups, Indian tribes, States/regions, or organizations may be interested in this rule, and why? [Describe.]

V. REGULATORY AGENDA AND 90-DAY LIST

A. Has this regulatory action previously had a RIN? If so:

1. **What was the previous RIN?** [Describe.]

2. **When was the previous RIN issued?** [Describe.]

3. **Under what circumstances was the previous RIN withdrawn?** [Describe.]

B. What is the bureau's recommended significance determination under E.O. 12866? Please ensure the recommendation is realistic and defensible to OIRA. [Significant or Non-Significant]

1. **If significant:**
   a. Identify the basis for significance: [Check.]
   - ☐ Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity,

competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities.

- ☐ Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency.
- ☐ Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof.
- ☐ Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive order.

b. Explain how this regulatory action meets the above basis for significance. [Explain.]

2. **Has this regulatory action appeared on a 90-day list yet?** [Yes/No] **If so:**

a. Which 90-day list did it appear on and was it under a prior RIN? [Provide month/year list covered and prior RIN, if applicable.]

b. Has OMB made a significance determination yet? [Yes/No]

c. If OMB determined the regulatory action is significant, explain OMB's rationale for the basis checked above (if different from above). [Explain.]

C. Is this regulatory action potentially major and economically significant? [Yes/No and Explain.]

D. Could this regulatory action have a significant effect on small entities (as defined under the Regulatory Flexibility Act)? [Yes/No and Explain.]

E. Does this regulatory action involve study, experiment, or survey requiring peer review under Information Quality Act? [Yes/No and Explain.]

F. Is there an information collection(s) associated with this document? [Yes/No]

- **If yes, does it have a currently approved OMB Control Number?** [Yes/No]
- **OMB Control Number(s):** [Yes/No]
- **Does it require a new OMB Control Number or a renewal of an existing approval?** [New/Renewal]
- **If a new number or renewal is required, what is the current status?** [Describe.]

VI. COMPLIANCE WITH REGULATORY REFORM INITIATIVE

A. Is this a significant new action, a non-significant new action, or a deregulatory action? [Identify.]

1. If this is a significant new action:

a. What are the two deregulatory actions and their status? [Describe.]

b. What are the deregulatory actions that provide offsets to the costs? [Describe which, if any, deregulatory actions you have identified as offsets or what your plans are for identifying deregulatory actions.]

2. If this is a de-regulatory action:

a. How is it a de-regulatory action (does it rescind, revise, or streamline)? [Describe.]

b. Is it included in the EO 13771 spreadsheet? [Yes/No.]

c. Is the expected source of the cost/burden saving a regulatory provision, an information collection burden reduction, or both? [Describe.]

d. What is the estimated cost/burden saving? [Provide any estimates or ranges of estimates you currently have or plans for estimating savings and when you expect to have the estimates available.]

3. Full or partial exemptions for significant new actions

a. Do you believe this regulatory action is fully or partially exempt from E.O. 13771? [Yes/No.] **If so, explain the basis. (See attachment for list of exemptions).** [Explain.]

b. Have you submitted an exemption request to the Office of the Executive Secretariat for presentation to OIRA[1] yet? [Yes/No.] **If so, what is the status of that request?** [Explain.]

B. How does this rule meet the goals of EO 13777?

EO 13777 Goals

Goal 1 - Identify regulations for repeal, replacement, or modification, considering (at a minimum) which:

- Eliminate jobs, or inhibit job creation;
- Are outdated, unnecessary, or ineffective;
- Impose costs that exceed benefits;
- Create a serious inconsistency or otherwise interfere with regulatory reform;
- Are inconsistent with the requirements of laws or guidance intended to ensure and maximize the quality, objectivity, utility, and integrity of information disseminated by Federal agencies under the Paperwork Reduction Act; or
- Derive from or implement E.O.s or other Presidential directives that have been subsequently rescinded or substantially modified.

Goal 2 - Improve implementation of existing regulatory initiatives and policies:

- E.O. 12866 (Regulatory Planning and Review), as amended
- E.O. 13771 (Reducing Regulation and Controlling Regulatory Costs)
- E.O. 13563 § 6 ("Retrospective Review")
- Termination…, of programs and activities that derive from or implement… documents… that have been rescinded.

[Describe.]

[1] *See* Q 33 of OMB OIRA's April 5, 2017, Guidance Implementing Executive Order 13771, Titled "Reducing Regulation and Controlling Regulatory Costs".

C. Have we received any comments on this regulatory action through the regulatory reform comment solicitation? [Identify the commenters and describe the nature of the comments.]

VII. COORDINATION

A. Identify any potentially affected Interior bureaus or offices and describe efforts to coordinate with them. [Identify and describe.]

B. Identify any potentially affected Federal, State, or local agencies and describe efforts to coordinate with them. [Identify and describe.]

C. Identify whether this regulatory action potentially affects any Indian tribes and, if so, what consultation has taken place or is planned? [Identify and describe.]

D. Does this rule involve negotiated rulemaking or other collaborative rulemaking? [Identify and describe.]

Potential Exemptions

Automatically Exempt

- Routine hunting & fishing regulations – Regulatory actions that are routine hunting and fishing actions that establish annual harvest limits are exempt from the requirement to be offset (and ineligible to be used as cost savings). This includes migratory bird hunting frameworks under the Migratory Bird Treaty Act and fishery management plans and amendments under the Magnuson-Stevens Fishery Conservation and Management Act. This exemption does not apply to regulatory actions that affect hunting and fishing activity that are not routine regulatory actions.[2]

Exempt with OIRA Determination

The following categories of EO 13771 regulatory actions may qualify for a full or partial exemption from EO 13771's requirements. These categories are not exhaustive. If the agency believes it qualifies for an exemption, it should submit an exemption request to OIRA prior to submitting the action to OMB for review under EO 12866 or prior to publication of the EO 13771 regulatory action if it was not subject to EO 12866 review.

- Expressly exempt – EO 13771 expressly exempts regulations issued with respect to a military, national security[3], or foreign affairs function, and regulations related to agency organization, management, or personnel. These actions qualify for a full exemption.

- Emergencies - EO 13771 regulatory actions addressing emergencies such as critical health, safety, financial, non-exempt national security matters, or for some other compelling reason, may qualify for an exemption. In most cases, exemptions for such rules will be granted with respect to the timing of required offsets, allowing the agency to address the emergency before identifying and issuing EO 13771 deregulatory actions. Agencies will generally still be required to offset such actions. If necessary, the costs of such actions, and the requirement to identify for repeal at least two existing regulations, will be moved to the subsequent fiscal year for purposes of determining EO 13771 compliance.

- Statutorily or judicially required - EO 13771 does not prevent agencies from issuing regulatory actions in order to comply with an imminent statutory or judicial deadline, even if they are not able to satisfy EO 13771 's requirements by the time of issuance. However, agencies will be required to offset any such EO 13771 regulatory actions as soon as practicable thereafter. In addition, this flexibility may not apply to discretionary provisions attached to EO 13771 regulatory actions required to comply with statutory or judicial deadlines.

- De minimis -EO 13771 regulatory actions with de minimis costs may qualify for an exemption. For example, if OIRA designates a proposed rule as significant under EO 12866 because it raises novel legal or policy issues, and the agency estimates the action would have present value costs of $50,000 spread over a large number of persons and/or entities, OIRA may exempt the action from some or all of the requirements of EO 13 771.[4]

In addition, the following category may be exempt and agencies should submit an exemption request to OIRA in accordance with the process above.

- Income Transfer – A regulatory action may be exempt from E.O. 13771 Section 2's requirements if it causes only income transfers from taxpayers to program beneficiaries, establishes a new fee or changes the existing fee for a service without imposing new costs, or establishes new penalties or fines or changes those already in existence?[5]

Call for FY17Q4 Quarterly Regulatory Report Input

The Office of the Executive Secretariat and Regulatory Affairs (OES) in the Department of the Interior (DOI) requests the Service's input for the quarterly regulatory report to the Office of Management and Budget (OMB) for the first quarter (Q4) of FY 2018 (**October through December 2017**). Please provide your input to the Division of Policy, Performance, and Management Programs (PPM) by **Thursday, August 24, 2017**.

Why do we do the quarterly report?

OMB will use the information on the report to decide which actions are "significant" as defined by Executive Order 12866 and, therefore, must be submitted to OMB for review.

What do I put on the quarterly report?

Use the attached draft report (filename **DRAFT 90-Day List_Oct through Dec 2017_(Q118).docx**). Do not delete anything in the file. Include all of the regulatory and policy documents that you project will complete Service and Department of the Interior (DOI) review during the October through December 2017 timeframe, whether or not the items have been on a previous quarterly report, **but please try to be realistic when identifying items for inclusion**. Also, provide updates for all items in the draft report.

What if I plan to begin work on a new rulemaking action?

NEW: Before PPM can assign a RIN for any new rule, we must get policy clearance up through the Secretary's Office. You should fill out one of the following forms for each new desired rule (i.e., rulemaking action that does not have a RIN yet):

- *ESA RINs:* **Approval Request for New RIN (ESA Rule) (eff 07-01-17).docx**
- *Non-ESA RINs:* **Approval Request for New RIN (non-ESA Rule) (eff_07-01-17).docx**

(We no longer have to do reg alert forms.)
However, please be aware that if your rule did not appear on the most recent published Unified Agenda, OMB must grant a waiver from Executive Order 13771 before PPM can include your action on this 90-day list. At this point in time, DOI will seek such a waiver from OMB only for extraordinary circumstances.

What format do I use to present my quarterly report input?

You may make your changes in the attached draft report and then email it back to PPM. **However, PLEASE USE TRACK CHANGES AND YELLOW HIGHLIGHTING. Do not delete anything.** Filename for attached draft report is **DRAFT 90-Day List_Oct through Dec 2017_(Q118).docx**.

- Please follow the format in the attached draft report, down to the use of line breaks, bold text, commas, etc.
- Text corrections can be pasted in or typed in, with track changes turned on.
- New entries can be pasted in, with track changes turned on.
- If you wants to remove an entire entry, just make a note in the final column to that effect, or use crossout-text formatting (as seen in some entries in the attached); do not delete using track changes.
- Each entry expected to be ready for OMB review during Q1 must have a specific date in the "Ready for Review" column that falls during Q1. This is the date the action would be ready for OMB review, which is also the date that you project the document to have cleared DOI. "Specific date" means, for example, rather than "Q1" or "mid-October," put in 10/18/17.
- If you have items from Q4 that have not completed OMB review yet, but you believe they will complete OMB review before October and thus do not need to be included again, please put a note to that effect in the right-hand column.
- If you have an action (i.e., one RIN) that will go through more than one stage during Q1 (i.e., separate stages under the same Regulation Identifier Number (RIN); e.g, proposed rule, final rule), include separate entries for each of the stages on your quarterly report input, i.e., each stage in a separate row.
- If you have items from Q4 that have not completed OMB review yet, but you believe they will complete OMB review before October, and they were **not** on the Q4 report, include them and put a note to that effect in the right-hand column.
- For actions that were on Q4 but are now being pushed forward, please try to put in the quarter in which the action will move forward.

What if I have to change my report input after I send it to PPM?

Be specific and clear about what the changes are. If you have only a handful of changes, send an email. If you have a larger number, you may resend your original table; **however, start with a clean document (no previous tracked changes or highlighting) and make sure all of the changes are shown with NEW tracked changes and yellow highlighting.**

Do I have to wait to get clearance through program officials before I send my report input to PPM?

No. To expedite collation of the all-FWS list, **please send your input to PPM at the same time you are clearing your data with the officials.** Then follow up later with forwarded email or other evidence of clearance from your program officials when it is available.

What if I have questions?

Please contact Sara Prigan via email at Sara_Prigan@fws.gov, or via phone at 703-358-2508. If Sara is out of the office, contact Susan Wilkinson, via email at Susan_Wilkinson@fws.gov or

phone at 703-358-2506, or Anissa Craghead, via email at Anissa_Craghead@fws.gov or phone at 703-358-2445.

To whom do I send my program's input?

Please send input via email to Sara Prigan in PPM (contact information above) by **Thursday, August 24, 2017**. Please cc Susan Wilkinson and Anissa Craghead.

From:	Prigan, Sara
To:	Stephanie Brady; Clifton Horton; Craig Hoover; Craig Martin; Edward Maillett; Eliza Savage; Jeff Rupert; Jeff Underwood; Julie Jackson; Katherine Garrity; Krista Holloway; Laurie Shaffer; Lisa Van Alstyne; Mark Phillips; Michael Murray; Mike Johnson; Ronald Kokel; Rosemarie Gnam; Sara Prigan; Sarah Mott; Susan Jewell; Susan Wilkinson; Theo Matuskowitz; Tim Vannorman; Tina Campbell; Eric Lawton; Wikoff, Peter; Brian Salem; Charles Hamilton; Zichlinsky, Marlene; Sara Ritter; Diane Bowen; Noguchi, Laura; Covington, Scott; Collette Thogerson; Barlow, Peter; Lewis Gorman; Charisa Morris; Jerry Thompson; Aaron Mize; Shannon Smith; Carl Millegan; Jillian Cohen; Mary Cogliano; Paul Beiriger; Valerie Fellows; Madonna Baucum; Ford, Larisa; Kershner, Eric; Kayla Miller
Subject:	DUE Thurs. 8/24 -- First Quarter FY18 OMB Regulatory Report
Date:	Monday, August 14, 2017 9:06:25 AM
Attachments:	Approval Request for New RIN (ESA Rule) (eff 07-01-17).docx Approval Request for New RIN (non-ESA Rule) (eff 07-01-17).docx DRAFT OMB reg rept_Oct through Dec 2017_(Q118) 8.11.17.docx CALL for FY18Q1 OMB reg report 8.11.17.docx

---

The Department has requested the Service's input for the quarterly regulatory report to the Office of Management and Budget (OMB) for the first quarter of FY 2018 (October through December 2017). You may have received this data request already through your chain of command. Just in case you did not, I am sending it out again so that you are made aware as soon as possible.

Please provide your input via email to Sara Prigan in PPM (sara_prigan@fws.gov) no later than **Thursday, August 24, 2017**. (Please cc Susan Wilkinson and Anissa Craghead.)

The assignment is described in detail in this attachment, which you should read first:

CALL for FY18Q1 OMB reg report 8.11.17.docx

Also attached is the draft list. Please add your changes **USING TRACK CHANGES AND YELLOW HIGHLIGHTING** and then email your list to PPM.
Draft Q1 FY18 OMB regulatory report filename:

DRAFT OMB reg rept_Oct through Dec 2017_(Q118) 8.11.17.docx

If you wish to create new RINs, we will need to obtain approval from the Service up through the Assistant Secretary before we can create them. Depending on what kind of action you are planning, please fill out **one** of the following two attached forms to begin that process:

ESA listing and/or critical habitat RIN:
Approval Request for New RIN (ESA Rule) (eff 07-01-17).docx
- or -
All other RINs:
Approval Request for New RIN (non-ESA Rule) (eff 07-01-17).docx

Thanks in advance for helping us meet our deadline for getting the Service's regulatory report to the Office of the Secretary.

If you have any questions, please don't hesitate contact one of us.

Thanks!

Sara Prigan
Division of Policy, Performance, and Management Programs
U.S. Fish and Wildlife Service
5275 Leesburg Pike, MS: BPHC
Falls Church, VA 22041-3803
Telephone: 703-358-2508

Request for a Regulation Identifier Number (RIN)
for ESA Listing Determinations and Critical Habitat Designations
[List Rule Stage, Rule Citation, Rule Title]
[Popular Short Name, if applicable]

I. ESA RULE'S PURPOSE

[Check all that apply]

- ☐ **Listing**
- ☐ **Listing reclassification**
  - ☐ **uplisting**
  - ☐ **downlisting**
- ☐ **Delisting**
- ☐ **4(d) special rule**
- ☐ **Critical habitat designation**
- ☐ **Removal or revision of critical habitat designation**
- ☐ **Other**

If listing and CH are not being proposed concurrently, please explain. [Explain.]

II. NEED FOR ESA RULE

A. Petition? [Yes/No] **If so, who is the petitioner?** [Describe.]

B. Court order or settlement? [Describe.]

C. Other manner this action mandated by law? [If yes, provide citation and explanation.]

D. Part of the 7-year plan? [Yes/No]

E. Status review initiated by the agency? [Yes/No]

F. Current candidate? [Yes/No]

III. WHO RULE MAY AFFECT

A. International or Domestic Species?

B. What populations, groups, Indian tribes, States/regions, or organizations may be affected by this rule, and how? [Describe.]

C. What populations, groups, Indian tribes, States/regions, or organizations may be interested in this rule, and why? [Describe.]

IV. REGULATORY AGENDA AND 90-DAY LIST

A. Has this regulatory action previously had a RIN? If so:

1. **What was the previous RIN?** [Describe.]
2. **When was the previous RIN issued?** [Describe.]
3. **Under what circumstances was the previous RIN withdrawn?** [Describe.]

B. Has this regulatory action appeared on a 90-day list yet? [Yes/No] **If so, which 90-day list did it appear on?** [Provide month/year list covered.]

V. COMPLIANCE WITH REGULATORY REFORM INITIATIVE

[Skip this section if the action is a listing, delisting, or listing reclassification.]

A. Is this a significant new action, a non-significant new action, or a deregulatory action? [Identify.]

1. If this is a significant new action:

[Delisting or downlisting actions may be included under a. below, but not under b.]

a. What are the two deregulatory actions and their status? [Describe.]

b. What are the deregulatory actions that provide offsets to the costs? [Describe.]

2. If this is a de-regulatory action:

a. How is it a de-regulatory action (does it rescind, revise, or streamline)? [Describe.]

b. Is it included in the EO 13771 spreadsheet? [Yes/No.]

c. What is the estimated cost/burden saving, if known? [Provide estimate.]
[Skip this question if the action is a delisting or downlisting.]

3. Full or partial exemptions

a. Do you believe this regulatory action is fully or partially exempt from E.O. 13771? [Yes/No.] **If so, explain the basis. (See attachment for list of exemptions).** [Explain.]

b. Have you submitted an exemption request to the Office of the Executive Secretariat for presentation to OIRA[1] yet? [Yes/No.] **If so, what is the status of that request?** [Explain.]

B. How does this rule meet the goals of EO 13777?

EO 13777 Goals

Goal 1 - Identify regulations for repeal, replacement, or modification, considering (at a minimum) which regulations:

- Eliminate jobs, or inhibit job creation;
- Are outdated, unnecessary, or ineffective;
- Impose costs that exceed benefits;
- Create a serious inconsistency or otherwise interfere with regulatory reform;
- Are inconsistent with the requirements of laws or guidance intended to ensure and maximize the quality, objectivity, utility, and integrity of information disseminated by Federal agencies under the Paperwork Reduction Act; or
- Derive from or implement E.O.s or other Presidential directives that have been subsequently rescinded or substantially modified.

Continued on next page…

[1] *See* Q 33 of OMB OIRA's April 5, 2017, Guidance Implementing Executive Order 13771, Titled "Reducing Regulation and Controlling Regulatory Costs".

EO 13777 Goals (Continued from previous page)

Goal 2 - Improve implementation of existing regulatory initiatives and policies:

- E.O. 12866 (Regulatory Planning and Review), as amended
- E.O. 13771 (Reducing Regulation and Controlling Regulatory Costs)
- E.O. 13563 § 6 ("Retrospective Review")
- Termination…, of programs and activities that derive from or implement… documents… that have been rescinded.

[Describe.]

C. Have we received any comments on this regulatory action through the regulatory reform comment solicitation? [Describe.]

VI. COORDINATION

A. Identify any potentially affected Interior bureaus or offices and describe efforts to coordinate with them. [Identify and describe.]

B. Identify any potentially affected Federal or State agencies and describe efforts to coordinate with them. [Identify and describe.]

C. Identify whether this regulatory action potentially affects any Indian tribes and, if so, what consultation has taken place or is planned? [Identify and describe.]

D. Does this rule involve negotiated rulemaking or other collaborative rulemaking? [Identify and describe.]

VII. TIMING

A. Timeline: [Fill in dates.]

Action	Date (Estimated or Actual)	Is the deadline statutory or court ordered?
ANPRM		
NPRM		
Comment Period End		
Final Rule		
Final Rule Effective		

B. Are there any timing constraints? If so, what are the consequences of missing the deadline(s)?
[Describe what is driving each date – e.g., citation to a statutory deadline, and consequences of missing the date.]

VIII. PUBLIC COMMUNICATIONS

A. Are there any issues or controversy (e.g., litigation, high profile) related to this rule? [Identify and explain.]

B. How will this rule be announced to the public?

[Describe.]

IX. FURTHER INFORMATION

A. Background: [Briefly provide any background information, in understandable language, that will help a reader quickly understand what the document is trying to do and why, and any other useful additional information. Assume the reader knows little about the subject matter. Minimize use of acronyms or abbreviations and do not use them at all unless they are clearly defined.]

B. Primary contact for additional information:

Name: [List.]
Phone: [List.]
Email: [List.]

Assistant Secretary **Date**

Potential Exemptions

Automatically Exempt

- Routine hunting & fishing regulations – Regulatory actions that are routine hunting and fishing actions that establish annual harvest limits are exempt from the requirement to be offset (and ineligible to be used as cost savings). This includes migratory bird hunting frameworks under the Migratory Bird Treaty Act and fishery management plans and amendments under the Magnuson-Stevens Fishery Conservation and Management Act. This exemption does not apply to regulatory actions that affect hunting and fishing activity that are not routine regulatory actions.[2]

Exempt with OIRA Determination

The following categories of EO 13771 regulatory actions may qualify for a full or partial exemption from EO 13771's requirements. These categories are not exhaustive. If the agency believes it qualifies for an exemption, it should submit an exemption request to OIRA prior to submitting the action to OMB for review under EO 12866 or prior to publication of the EO 13771 regulatory action if it was not subject to EO 12866 review.

- Expressly exempt – EO 13771 expressly exempts regulations issued with respect to a military, national security[3], or foreign affairs function, and regulations related to agency organization, management, or personnel. These actions qualify for a full exemption.

- Emergencies - EO 13771 regulatory actions addressing emergencies such as critical health, safety, financial, non-exempt national security matters, or for some other compelling reason, may qualify for an exemption. In most cases, exemptions for such rules will be granted with respect to the timing of required offsets, allowing the agency to address the emergency before identifying and issuing EO 13771 deregulatory actions. Agencies will generally still be required to offset such actions. If necessary, the costs of such actions, and the requirement to identify for repeal at least two existing regulations, will be moved to the subsequent fiscal year for purposes of determining EO 13771 compliance.

- Statutorily or judicially required - EO 13771 does not prevent agencies from issuing regulatory actions in order to comply with an imminent statutory or judicial deadline, even if they are not able to satisfy EO 13771 's requirements by the time of issuance. However, agencies will be required to offset any such EO 13771 regulatory actions as soon as practicable thereafter. In addition, this flexibility may not apply to discretionary provisions attached to EO 13771 regulatory actions required to comply with statutory or judicial deadlines.

- De minimis -EO 13771 regulatory actions with de minimis costs may qualify for an exemption. For example, if OIRA designates a proposed rule as significant under EO 12866 because it raises novel legal or policy issues, and the agency estimates the action would have present value costs of $50,000 spread over a large number of persons and/or entities, OIRA may exempt the action from some or all of the requirements of EO 13771.[4]

In addition, the following category may be exempt and agencies should submit an exemption request to OIRA in accordance with the process above.

- Income Transfer – A regulatory action may be exempt from E.O. 13771 Section 2's requirements if it causes only income transfers from taxpayers to program beneficiaries, establishes a new fee or changes the existing fee for a service without imposing new costs, or establishes new penalties or fines or changes those already in existence?[5]

[Bureau/Agency]
[Sub-agency, if applicable]

Request for a Regulation Identifier Number (RIN)
[List Rule Stage, Rule Citation, Rule Title]
[Popular Short Name, if applicable]

I. RULE'S PURPOSE

[Summarize, in one or two sentences, what the rule's purpose is.]

II. LEGAL AUTHORITY FOR RULE

[List the statutes or other legal authorities for this action.]

III. NEED FOR RULE

A. What is prompting this regulatory action? [Describe.]

B. How is this regulatory action in the public interest? [Describe.]

C. Is this action mandated by law? [If yes, provide citation and explanation.]

D. Is this action in response to litigation? [If yes, provide case information and explanation.]

E. Is this action a de-regulatory effort identified in an Executive Order or Secretary's Order? [If yes, provide citation and explanation.]

IV. WHO RULE MAY AFFECT

A. What populations, groups, Indian tribes, States/regions, or organizations may be affected by this rule, and how? [Describe.]

B. What populations, groups, Indian tribes, States/regions, or organizations may be interested in this rule, and why? [Describe.]

V. REGULATORY AGENDA AND 90-DAY LIST

A. Has this regulatory action previously had a RIN? If so:

1. **What was the previous RIN?** [Describe.]

2. **When was the previous RIN issued?** [Describe.]

3. **Under what circumstances was the previous RIN withdrawn?** [Describe.]

B. What is the bureau's recommended significance determination under E.O. 12866? Please ensure the recommendation is realistic and defensible to OIRA. [Significant or Non-Significant]

1. **If significant:**
   a. Identify the basis for significance: [Check.]
   - ☐ Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity,

competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities.

- ☐ Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency.
- ☐ Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof.
- ☐ Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive order.

b. Explain how this regulatory action meets the above basis for significance. [Explain.]

2. **Has this regulatory action appeared on a 90-day list yet?** [Yes/No] **If so:**

a. Which 90-day list did it appear on and was it under a prior RIN? [Provide month/year list covered and prior RIN, if applicable.]

b. Has OMB made a significance determination yet? [Yes/No]

c. If OMB determined the regulatory action is significant, explain OMB's rationale for the basis checked above (if different from above). [Explain.]

C. Is this regulatory action potentially major and economically significant? [Yes/No and Explain.]

D. Could this regulatory action have a significant effect on small entities (as defined under the Regulatory Flexibility Act)? [Yes/No and Explain.]

E. Does this regulatory action involve study, experiment, or survey requiring peer review under Information Quality Act? [Yes/No and Explain.]

F. Is there an information collection(s) associated with this document? [Yes/No]

- **If yes, does it have a currently approved OMB Control Number?** [Yes/No]
- **OMB Control Number(s):** [Yes/No]
- **Does it require a new OMB Control Number or a renewal of an existing approval?** [New/Renewal]
- **If a new number or renewal is required, what is the current status?** [Describe.]

VI. COMPLIANCE WITH REGULATORY REFORM INITIATIVE

A. Is this a significant new action, a non-significant new action, or a deregulatory action? [Identify.]

1. If this is a significant new action:

a. What are the two deregulatory actions and their status? [Describe.]

b. What are the deregulatory actions that provide offsets to the costs? [Describe which, if any, deregulatory actions you have identified as offsets or what your plans are for identifying deregulatory actions.]

2. If this is a de-regulatory action:

a. How is it a de-regulatory action (does it rescind, revise, or streamline)? [Describe.]

b. Is it included in the EO 13771 spreadsheet? [Yes/No.]

c. Is the expected source of the cost/burden saving a regulatory provision, an information collection burden reduction, or both? [Describe.]

d. What is the estimated cost/burden saving? [Provide any estimates or ranges of estimates you currently have or plans for estimating savings and when you expect to have the estimates available.]

3. Full or partial exemptions for significant new actions

a. Do you believe this regulatory action is fully or partially exempt from E.O. 13771? [Yes/No.] **If so, explain the basis. (See attachment for list of exemptions).** [Explain.]

b. Have you submitted an exemption request to the Office of the Executive Secretariat for presentation to OIRA[1] yet? [Yes/No.] **If so, what is the status of that request?** [Explain.]

B. How does this rule meet the goals of EO 13777?

EO 13777 Goals

Goal 1 - Identify regulations for repeal, replacement, or modification, considering (at a minimum) which:

- Eliminate jobs, or inhibit job creation;
- Are outdated, unnecessary, or ineffective;
- Impose costs that exceed benefits;
- Create a serious inconsistency or otherwise interfere with regulatory reform;
- Are inconsistent with the requirements of laws or guidance intended to ensure and maximize the quality, objectivity, utility, and integrity of information disseminated by Federal agencies under the Paperwork Reduction Act; or
- Derive from or implement E.O.s or other Presidential directives that have been subsequently rescinded or substantially modified.

Goal 2 - Improve implementation of existing regulatory initiatives and policies:

- E.O. 12866 (Regulatory Planning and Review), as amended
- E.O. 13771 (Reducing Regulation and Controlling Regulatory Costs)
- E.O. 13563 § 6 ("Retrospective Review")
- Termination…, of programs and activities that derive from or implement… documents… that have been rescinded.

[Describe.]

Potential Exemptions

Automatically Exempt

- Routine hunting & fishing regulations – Regulatory actions that are routine hunting and fishing actions that establish annual harvest limits are exempt from the requirement to be offset (and ineligible to be used as cost savings). This includes migratory bird hunting frameworks under the Migratory Bird Treaty Act and fishery management plans and amendments under the Magnuson-Stevens Fishery Conservation and Management Act. This exemption does not apply to regulatory actions that affect hunting and fishing activity that are not routine regulatory actions.[2]

Exempt with OIRA Determination

The following categories of EO 13771 regulatory actions may qualify for a full or partial exemption from EO 13771's requirements. These categories are not exhaustive. If the agency believes it qualifies for an exemption, it should submit an exemption request to OIRA prior to submitting the action to OMB for review under EO 12866 or prior to publication of the EO 13771 regulatory action if it was not subject to EO 12866 review.

- Expressly exempt – EO 13771 expressly exempts regulations issued with respect to a military, national security[3], or foreign affairs function, and regulations related to agency organization, management, or personnel. These actions qualify for a full exemption.

- Emergencies - EO 13771 regulatory actions addressing emergencies such as critical health, safety, financial, non-exempt national security matters, or for some other compelling reason, may qualify for an exemption. In most cases, exemptions for such rules will be granted with respect to the timing of required offsets, allowing the agency to address the emergency before identifying and issuing EO 13771 deregulatory actions. Agencies will generally still be required to offset such actions. If necessary, the costs of such actions, and the requirement to identify for repeal at least two existing regulations, will be moved to the subsequent fiscal year for purposes of determining EO 13771 compliance.

- Statutorily or judicially required - EO 13771 does not prevent agencies from issuing regulatory actions in order to comply with an imminent statutory or judicial deadline, even if they are not able to satisfy EO 13771 's requirements by the time of issuance. However, agencies will be required to offset any such EO 13771 regulatory actions as soon as practicable thereafter. In addition, this flexibility may not apply to discretionary provisions attached to EO 13771 regulatory actions required to comply with statutory or judicial deadlines.

- De minimis -EO 13771 regulatory actions with de minimis costs may qualify for an exemption. For example, if OIRA designates a proposed rule as significant under EO 12866 because it raises novel legal or policy issues, and the agency estimates the action would have present value costs of $50,000 spread over a large number of persons and/or entities, OIRA may exempt the action from some or all of the requirements of EO 13 771.[4]

In addition, the following category may be exempt and agencies should submit an exemption request to OIRA in accordance with the process above.

- Income Transfer – A regulatory action may be exempt from E.O. 13771 Section 2's requirements if it causes only income transfers from taxpayers to program beneficiaries, establishes a new fee or changes the existing fee for a service without imposing new costs, or establishes new penalties or fines or changes those already in existence?[5]

‡1018-AY05 Removal of the Eastern Cougar from the List of Endangered and Threatened Wildlife 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to delist the eastern cougar, formerly found in eastern North America, due to extinction. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Finalizing in Region; to FWS Director's Office week of September 18 (per our Aug 4 update to OES)
‡1018-AZ02 Listing Determination for the Sonoyta Mud Turtle 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/21/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Sonoyta mud turtle as an endangered species under the Endangered Species Act. This turtle is found in freshwater habitats in Arizona, and also Mexico. **Controversy:** This species occurs near the U.S.-Mexico border; however, no conflicts with border activities or potential border wall construction have been identified at this time. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review Finalizing in HQ; to FWS Director's Office week of August 21 (per our Aug 4 update to OES)

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡1018-AZ38 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Three Hawaiian Big Island Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will designate critical habitat for three plant species on Hawaii Island and correct the maps for existing designations for an additional four species. FWS intends to exclude lands owned or managed by the Queen Liliuokalani Trust, the Department of Hawaiian Homelands, and other private landowners under section 4(b)(2) of the Endangered Species Act. **Controversy:** Resolved. FWS coordinated with the Queen Liliuokalani Trust, landowners, and government jurisdictions, and will exclude lands owned by these entities under section 4(b)(2) of the Act. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/7/17 Finalizing in HQ; to FWS Director's Office week of August 21 (per our Aug 4 update to OES)
‡1018-AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant. Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Timothy J. Van Norman, 703-358-2350. OMB comment on Q417: Propose OMB RMO review since addressing fee increases. (Megan suggested we send a briefing paper.)	9/29/17 Pending final review within FWS; will be sent to FWS Director's Office in early September (per our Aug 4 update to OES)

‡1018-AZ69 Migratory Bird Permits; Control Order for Introduced Migratory Bird Species in Hawaii (Cattle Egrets and Barn Owls) 50 CFR 21	~~FR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** This rule will add a control order to apply to cattle egrets and barn owls, two introduced and invasive migratory bird species in Hawaii. The ranges of both species have expanded to occupy all of the Hawaiian islands. Both species have been found to prey on endemic endangered or threatened species. Without this order, control of the two species would require issuing depredation permits, which would add to State and Federal agency costs for control activities that will benefit listed species.~~ ~~**Controversy:** None.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Jerry Thompson (703) 358-2016.~~ ~~**OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."~~	~~7/7/17~~ Published 7/25/17 https://www.gpo.gov/fdsys/pkg/FR-2017-07-25/pdf/2017-15471.pdf

‡1018-AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	~~9/29/17~~ In development in the Bureau; expect to be ready for FWS surname in December 2017 (per our Aug 4 update to OES)

‡1018-BA80 Removing Textual Descriptions of Critical Habitat Boundaries for Plants on the Hawaiian Islands 50 CFR 17	FR	Not Significant. Not major. Not court driven. **What the rule does:** This rule will remove the textual descriptions of the critical habitat boundaries from certain entries at 50 CFR 17.99 (plants on the Hawaiian Islands) that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease, or in any other way change the critical habitat designations from which we are removing the textual descriptions of boundaries. This action will save taxpayer resources. We are taking this action in accordance with our May 1, 2012, revision of the regulations related to publishing textual descriptions of critical habitat boundaries in the CFR and as part of our response to Executive Order 13563 (January 18, 2011), which directs Federal agencies to review their existing regulations and then to modify or streamline them in accordance with what they have learned. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Carey Galst, 703-358-1954.	~~8/31/17~~ Finalizing in HQ; to FWS Director's Office week of August 14 (per our Aug 4 update to OES)

‡1018-BB06 Migratory Bird Hunting; Approval of Corrosion-Inhibited Copper Shot as Nontoxic for Waterfowl Hunting 50 CFR 20	~~PR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** Environ-Metal, Inc., of Sweet Home, Oregon, has applied for approval of shot composed of copper as nontoxic for waterfowl hunting in the United States. The shot formulation is at least 99.9 percent copper by weight, with a corrosion-inhibiting coating to prevent release of copper into terrestrial or aquatic environments. FWS has reviewed the shot as required under the criteria in the nontoxic shot approval procedures in FWS regulations. FWS' proposed approval of this shot formulation would increase the number of nontoxic shot options for hunters of migratory waterfowl.~~ ~~**Controversy:** None anticipated.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Ron Kokel, 703-358-1967.~~ ~~**OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."~~	~~7/14/17~~ Cleared DOI 8/1/17; will be sent to OFR week of 8/7/17

‡1018-BB22 Subsistence Management Regulations for Public Lands in Alaska—Applicability and Scope; Tongass National Forest Submerged Lands 50 CFR 100; 36 CFR 242	FR	Not significant. Not major. **Court driven. No deadline; however, FWS needs to show the plaintiffs and the court that progress is being made.** **What the rule does:** The U.S. District Court for Alaska, in an October 17, 2011, order, enjoined the United States "to promptly initiate regulatory proceedings for the purpose of implementing the subsistence provisions in Title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) with respect to submerged public lands within Tongass National Forest," and directed entry of judgment. To comply with the order, the Federal Subsistence Board (FWS/DOI and USDA/Forest Service, joint rulemaking) published a proposed rule to identify those submerged lands within the Tongass that did not pass to the State of Alaska at Statehood and therefore are subject to the subsistence provisions of ANILCA. DOI/FWS and USDA/Forest Service will now finalize the proposed rule. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Theo Matuskowitz, 907-786-3867.	8/15/17 Will go to SOL and Senior Advisor to the Secretary for Alaska on 8/8/17 (per our Aug 4 update to OES)
‡1018-BB24 Migratory Bird Subsistence Harvest in Alaska; Use of Inedible Bird Parts in Authentic Alaska Native Handicrafts for Sale 50 CFR 92	~~FR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS will amend the permanent subsistence migratory bird harvest regulations in Alaska to enable Alaska Natives to sell authentic native articles of handicraft or clothing that contain inedible byproducts from migratory birds that were taken for food during the Alaska migratory bird subsistence harvest season. These regulations were developed under a co-management process involving the Service, the Alaska Department of Fish and Game, and Alaska Native representatives.~~ ~~**Controversy:** None anticipated.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Donna Dewhurst, 907-786-3499.~~ ~~**OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."~~	~~7/01/17~~ Published 7/24/17 https://www.gpo.gov/fdsys/pkg/FR-2017-07-24/pdf/2017-15465.pdf

‡1018-BB73 Migratory Game Bird Hunting Regulations, 2018–19 50 CFR 20	~~PR~~	~~**Significant. Major.** Not court driven.~~ ~~**What the rule does:** This rule proposes to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. FWS annually prescribes outside limits (frameworks) within which States may select hunting seasons. This proposed rule provides the regulatory schedule, describes the proposed regulatory alternatives for the 2018–19 duck hunting seasons, requests proposals from Indian tribes that wish to establish special migratory game bird hunting regulations on Federal Indian reservations and ceded lands, and requests proposals for the 2019 spring and summer migratory bird subsistence season in Alaska. Migratory game bird hunting seasons provide opportunities for recreation and sustenance; aid Federal, State, and tribal governments in the management of migratory game birds; and permit harvests at levels compatible with migratory game bird population status and habitat conditions.~~ ~~**Controversy:** None.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Ron Kokel, 703-358-1967.~~ ~~**Note:** This action is not subject to EO 13771 (82 FR 9339, February 3, 2017) because it is issued with respect to routine hunting and fishing activities~~	~~7/15/17~~ Published 8/3/17 https://www.gpo.gov/fdsys/pkg/FR-2017-08-03/pdf/2017-16353.pdf

‡1018-BB76 Removal of the Monito Gecko from the Federal List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to remove the Monito gecko from the Federal List of Endangered and Threatened Wildlife due to recovery. The Monito gecko is endemic to the island of Monito, which is located 68 kilometers west of Puerto Rico. This determination is based on a thorough review of the best available scientific and commercial information, which indicates that the threats to this species have been eliminated or reduced to the point that the species no longer meets the definition of an endangered species or a threatened species under the Endangered Species Act. FWS will also make available a post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Finalizing in Region; to FWS Director's Office week of October 16 (FY18 Q1) (per our Aug 4 update to OES)

‡1018-BB79 Removal of the Black-Capped Vireo from the Federal List of Endangered and Threatened Wildlife; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove the black-capped vireo, a bird species, from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring (PDM) plan. The black-capped vireo breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states. **Controversy:** A number of public comments opposed the delisting of the black-capped vireo, including one from the Office of Travis County Judge and one from a national park. Those concerns may be reflected in comments FWS receives on the draft PDM. A number of partner agencies have indicated concerns about having the necessary funds to implement the ongoing management needs (e.g., cow-bird removal) and monitoring identified for their lands, which may also result in concerns about the viability of both the delisting and the PDM plan. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Finalizing in Region; to FWS Director's Office week of August 18 (per our Aug 4 update to OES)

FWS Regulations Ready for Review from October through December 2017 (Q118)

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OES Review
‡1018-BC16 (b)(5) DPP (b)(5) DPP (b)(5) DPP (b)(5) DPP (b)(5) DPP	PR	Not significant. Not major. **Court driven: PR, 9/30/17, settlement agreement for listing determination for trispot darter and bridled darter. PR, 9/30/18, settlement agreement for listing determination for holiday darter.** **What the rule does:** FWS will make a listing determination for the holiday darter, trispot darter, and bridled darter under the Endangered Species Act. These fish are found in Alabama, Georgia, and Tennessee. FWS will, if prudent and determinable, also propose to designate critical habitat for the holiday darter, trispot darter, and bridled darter under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. OMB comment on Q417: Sent Qs. We responded that critical habitat is not being proposed for these species at this time. If prudent and determinable, the critical habitat will be proposed under this RIN at a later stage. The requested information will be made available at that time. **Contact:** Sarah Quamme, 703-358-1796.	9/15/17 Finalizing in Region; in HQ by mid August; to FWS Director's Office week of September 4 (per our Aug 4 update to OES)

‡Appeared on a previous 90-day list; OMB concurred re E.O. 12866 significance determination.

Call for FY18 First Quarter OMB Quarterly Regulatory Report Input

The Office of the Executive Secretariat and Regulatory Affairs (OES) in the Department of the Interior (DOI) requests the Service's input for the quarterly regulatory report to the Office of Management and Budget (OMB) for the first quarter (Q1) of FY 2018 (**October through December 2017**). Please email your OMB regulatory report input, along with any "Approval Request for New RIN" forms, to the Division of Policy, Performance, and Management Programs (PPM) by **Thursday, August 24, 2017**.

Why do we do the quarterly report?

OMB will use the information on the report to decide which actions are "significant" as defined by Executive Order 12866 and, therefore, must be submitted to OMB for review.

What do I put on the quarterly report?

Include all of the regulatory and policy documents that you project will complete Service and Department of the Interior (DOI) review during the October through December 2017 timeframe, whether or not the items have been on a previous quarterly report, **but please try to be realistic when identifying items for inclusion**. Also, provide updates for **all** items in the draft report we are providing to you.

What if I plan to begin work on a new rulemaking action?

NEW: The Department has instituted a new process for obtaining new **Regulation Identifier Numbers (RINs)**. The new process requires that we obtain the approval of our Director's Office and Assistant Secretary before PPM can obtain a RIN for a new rulemaking action. OMB issues RINs to track all Federal rulemaking actions in the Unified Agenda of Regulatory and Deregulatory Actions (Unified Agenda). All entries on the quarterly regulatory report must have a RIN.

OES developed two new forms we must use to gather the information required to obtain a new RIN. One form is specifically for ESA listing determinations and/or critical habitat, and the other is for all other types of rulemaking actions. Once the forms are complete, they are considered to be for internal use only and should not be distributed outside the Federal Government.

We recognize that the forms are rather long, and that your staff may not be able to provide all of the information requested (e.g., many will not be able to populate the section regarding Compliance with Regulatory Reform Initiative). Our best advice is to complete as much of the form as possible.

PPM will submit the received forms to the Director's Office and then to the Assistant Secretary for Fish and Wildlife and Parks for approval or disapproval. All of the approved RIN requests will then be sent to OES. We will ask for RIN requests twice a year prior to each Unified Agenda cycle. If you need to request a RIN at other times, PPM will handle those requests on a case-by-case basis. Please note that we have not received a request for input for the Fall 2017 Unified Agenda, and we do not have any information on when we may be asked to provide input at this time.

If you wish to obtain a new RIN, please have your staff complete the appropriate form and submit it to Sara Prigan (sara_prigan@fws.gov) in PPM by August 24, 2017 (cc Susan Wilkinson and Anissa Cragead).

Fill out one of the following forms for each new desired rule (i.e., rulemaking action that does not have a RIN yet):

- *For ESA listing and/or critical habitat RINs:* **Approval Request for New RIN (ESA Rule) (eff 07-01-17).docx**
- *For all other types of RINs (e.g., non-ESA RINs):* **Approval Request for New RIN (non-ESA Rule) (eff 07-01-17).docx**

What format do I use to present my quarterly report input?

Use the format in the provided draft report (filename **DRAFT OMB reg rept Oct through Dec 2017 (Q118) 8.11.17.docx**).
You may make your changes in the attached draft report and then email it back to PPM. **However, PLEASE USE TRACK CHANGES AND YELLOW HIGHLIGHTING. Do not delete anything.**

- Please follow the format in the attached draft report, down to the use of line breaks, bold text, commas, etc.
- Text corrections can be pasted in or typed in, with track changes turned on. Please add yellow highlighting as well.
- New entries can be pasted in, with track changes turned on.
- If you wants to remove an entire entry, just make a note in the final column to that effect, or use crossout-text formatting (as seen in some entries in the attached); **do not delete**.
- Each entry expected to be ready for OMB review during Q1 must have a specific date in the "Ready for Review" column that falls during Q1. This is the date the action would be ready for OMB review, which is also the date that you project the document to have cleared DOI. "Specific date" means, for example, rather than "Q1" or "mid-October," put in 10/18/17.
- If you have items from Q4 that have not completed OMB review yet, but you believe they will complete OMB review before October and thus do not need to be included again, please put a note to that effect in the right-hand column. Do not delete them.
- If you have an action (i.e., one RIN) that will go through more than one stage during Q1 (i.e., separate stages under the same RIN; e.g, proposed rule, final rule), put each stage in a separate row.

- For actions that were on Q4 but are now being pushed forward, if possible please try to put in the quarter in which the action will move forward.

What if I have to change my report input after I send it to PPM?

Be specific and clear about what the changes are. If you have only a handful of changes, send an email describing them. If you have a larger number, you may resend your original table; **however, start with a clean document (no previous tracked changes or highlighting) and make sure all of the changes are shown with NEW tracked changes and blue highlighting.**

Do I have to wait to get clearance through program officials before I send my report input to PPM?

No. To expedite collation of the all-Service list, **please send your input to PPM at the same time you are clearing your data with the officials.** Then follow up later with forwarded email or other evidence of clearance from your program officials when it is available.

What if I have questions?

Please contact Sara Prigan via email at Sara_Prigan@fws.gov, or via phone at 703-358-2508; Susan Wilkinson, via email at Susan_Wilkinson@fws.gov or phone at 703-358-2506; or Anissa Craghead, via email at Anissa_Craghead@fws.gov or phone at 703-358-2445.

To whom do I send my program's input?

Please send regulatory report input, and any "Approval Request for New RIN" forms, via email to Sara Prigan in PPM (contact information above) by **Thursday, August 24, 2017**. Please cc Susan Wilkinson and Anissa Craghead.

Subject: Important Resource Information on Border Fence Impacts
Date: Monday, March 20, 2017 9:14:28 AM

Cynthia/Charisa

Region 2 folks have compiled a list of important resources that may be impacted by new border fence activities. This product was initiated after a meeting in MIB on the same subject which I described in an earlier email. I should have the finalized spreadsheet later today.

I am looking for some guidance on how we want to share with DHS. Do we provide to John Andrews. Do with need the AD's to approve before sharing?

---

Hello Charisa, Steve, and Jim,

Attached are the various documents that I've pulled together to capture all the great discussions that were had at last week's **USFWS Directorate Meeting**, which are:

- **Notes** (detailed notes)
- **AFWA - FWS Notes** (just the first half-day of discussions - the thinking was to share this document with AFWA)
- **Summary** (just the Action Items, Motions, and high-level highlights)

Pasted below are just the action items so that you have an immediate reference to them.

Please let me know what you think the next steps should be in terms of reviewing and disseminating this information.

Thanks!

Michael

--

ACTION ITEMS / MOTIONS

o **Action Item**: Prepare a shared letter of commitment between AFWA and USFWS to identify areas of common interest.

o **Action Item**: In the next AFWA newsletter, include information about Hunting and Fishing Chiefs to help connect state agencies to the Hunting and Fishing Chiefs

o **Action Item (AFWA)**: AFWA will delegate to staff the follow-up work on the items discussed today.

o **Action Item (AFWA)**: Task the Wildlife Policy with polling among the states for those existing agreements with FWS.

- **Action Item**: FWS and AFWA to provide feedback on draft policies and guideline document before the North American.

- **Action Item**: Calibrate the actions in the Secretarial Priorities with the Department's Strategic Plan

- **Action Item**: Go through the AFWA Committee list and put together Directorate leads and a plan for participating in the North American.

- **Action Item**: Submit nominations for the JAO Project Team (request to go out shortly).

- **Action Item**: Add the Regional Directors to the communications list for the S.O. 3356 implementation.

- **Motion** (Robyn Thorsen): agreement to fund proposals 1-4. Motion passed.

- **Action Item**: The proposal is for Brian Bloodsworth, Chris Nolin, and Shaun Sanchez to lead a small team that will be assigned to figure out how to pay for the enterprise investments, which will then be owned by the Director's Office.

- **Action Item**: Paul Rauch will re-send out the materials and put to a decision the furtherance of the EDC with the new charter, and then discuss this more at the next VTC.

Moderator: Steve Guertin

9:00am – 12:00pm
USFWS Directorate discussion with AFWA Executive Committee

Jim Kurth welcomed the group, particularly the state fish and wildlife agency colleagues. This morning, Greg Sheehan was called to a last minute meeting with Deputy Secretary Bernhardt.

9:00 ***Opening Remarks and Introductions***

Virgil Moore, Director, Idaho Fish and Game Department and President, Association of Fish and Wildlife Agencies

This gathering of the FWS Directorate and the Executive Committee for AFWA is unprecedented and welcomed. AFWA has proposed three topics to guide this morning's discussions: hunting/fishing access, landscape conservation, and collaborative governance. FWS has unique legal responsibilities for some species; by and large, state fish and wildlife agencies are responsible for managing fish and wildlife populations. The change in the Administration creates new opportunities for working together.

Greg Sheehan, Principal Deputy Director, United States Fish and Wildlife Service

Greg Sheehan welcomed the group. Greg talked about how he is able to speak from both sides of this group, having just a year ago been a member of the AFWA Executive Committee. The folks

and talent in this room represent the "best of the best" in fisheries and wildlife management, arguably in the world. From here on out, how do we cement these relationships? Now more than ever, we need to come together.

Collectively, we need to think about recruitment and retention. Nowadays, newer employees do not have the same long-term commitment to singular institutions as they once did. They move about more. There is also rampant urbanization, which is happening in every state in the country. ESA issues is an overlapping area with the states, as is sportsmen's access.

9:30 ***Topic One: SO 3356 and New Opportunities for Hunter and Angler Engagement***
AFWA Discussion Lead: Gordon Myers (NC)

Bob Broscheid: With Secretarial Order 3356, there is an opportunity to come up with a shared vision among partners with how the states can be helpful in implementing the S.O. This discussion should focus on high-level recommendations on what we can do together.

Steve Guertin gave an overview of the agency's work on S.O. 3347 and 3356. This is a big deal for FWS. We have met with both AFWA and the Recreational Boating and Fishing Foundation (RBFF) on this issue, including the idea of "First Catch" Centers. A focus of this work is returning veterans and people with disabilities. We also have an initiative, "Restoring the Refuges" that invests in access infrastructure.

We have reassigned one person in every Region as a Hunting and Fishing Chief, who will work individually with refuges to identify opportunities to enhance access. The other element is consistency with state regulations. For AFWA, we would like the Hunting and Fishing Chiefs to meet with the state fish and wildlife agency leadership to hear their suggestions and frustrations.

Jim Douglas: At some point, this initiative has to come down to the state level with a joint assessment of where things are right now. The collaboration needs to involve both FWS and the state. Paul Souza: This is becoming the signature issue for conservation for us right now. Another step is bringing in key partners (e.g., Ducks Unlimited, Trout Unlimited) to form a coalition around this issue. Jay Slack: Dave Chanda is working with NCTC to put together R3 training available to FWS, partners, and the states. Shaun Sanchez: On R3, we are tasking our people to go to the R3 Coordinators in the states and materials already developed to not reinvent the wheel. Paul Rauch: FWS needs to lead from behind on this; we want to be helpful.

Kelly Hepler: we all make value judgments in making regulations. We need to think about collective opportunities. Virgil Moore: we need to look at existing hunting and fishing rules and determine if there are problems that need to be addressed with deference to state laws. Noreen Walsh: it is not clear whether the Hunting and Fishing Chiefs are working with the states on the survey questions. Cynthia Martinez: we need to get through the assessment and start with quick wins to make hunting and fishing easier.

Glenn Normandeau: they have a process in New Hampshire for analyzing value-added efforts that could serve as a model. Nick Wiley: The earlier we engage, the better. There was a question about the authorities of the Hunting and Fishing Chiefs. Cynthia Martinez: The Chiefs have stayed in the Regions and report directly to Headquarters and are graded highly. Curt Melcher: One of the "elephants" in the room is predator management. We need to be able to direct market to our various constituencies, who have already showed interest in wildlife recreation.

- **Action Item**: Prepare a shared letter of commitment between AFWA and USFWS to identify areas of common interest.

- **Action Item**: In the next AFWA newsletter, include information about Hunting and Fishing Chiefs to help connect state agencies to the Hunting and Fishing Chiefs

Virgil Moore, Ron Regan, Greg Sheehan, and Jim Kurth signed an agreement to work together on the issues discussed at today's meeting.

10:15 ***Topic Two: Landscape Level Partnership Models***
AFWA Discussion Lead: Tony Wasely (NV)

To start off, there is great value to landscape-scale conservation and the value of partnerships. There are a myriad of successes in organizing landscape-scale conservation, including Joint Ventures, Landscape Conservation Cooperatives (LCCs), National Fish Habitat Partnerships, etc. There are really two key factors to success: 1) underlying science that is best if coproduced, 2) a partnership to implement that science with opportunities to leverage funding.

AFWA conducted a survey (49 of 50 states) with a question specific to LCCs. There was really a divided opinion in terms of the states that saw value in LCCs (about a 50/50 split). The President's Budget zeroed out the LCC program, and right now is a good time to have a broader discussion about what LCCs look like. How do we respond to these challenges? We recognize the special relationship between FWS and the state fish and wildlife agencies. There is $25 million for conservation in the LCC budget.

Some options that have been discussed with the Executive Committee include:

1) Nexus to State Wildlife Action Plans (SWAPs) and a species-at-risk approach. This may be in conflict with the self-directed nature of LCCs.
    a. One of the challenges with LCCs is their geography where states are in multiple LCCs.
2) Issue-specific LCC (more like Joint Ventures, e.g., Monarch butterflies)
3) Administering them through a regional association
    a. Previously, AFWA had a recommendation on governance that came from a Joint Task Force that was previously established

Certainly the discussion is not limited to LCCs, but we wanted to have sufficient time to address LCCs, which have value in supporting landscape-scale conservation.

Benjamin Tuggle: We would want to emphasize is the peer-to-peer relationship with the state fish and wildlife agency directors. One of our recommendations is to erase the artificial boundaries of the LCCs and let the issue define the boundary. We have primary responsibility for managing fish and wildlife resources on the landscape. The Service's role in the organizational structure is going to change – those resources being deployed are being directed by our mutual collaboration for specific issues in those geographies.

Paul Souza: We have great conservation capacity within the LCCs; how can we spend that money in a way that would maximize our returns? We can learn from our experiences and support these partnerships in ways that make sense. Benjamin Tuggle: What is fundamental is how we direct these resources for mutual benefits. Wendi Weber: In the Northeast, these partnerships have worked well together around shared issues, such as prelisting conservation. Gary Frazer: three years ago, the Western Governors Association (WGA) had a species-based effort that is going to use landscape approaches (i.e., integrating species conservation, forest health, invasive species, and other issues into a strategic approach). Other discussion points included that the other part of LCCs is engage those broader NGO collaborations, who are part of the SWAPs. LCCs were addressing both science and outreach, which created some challenges.

11:00 ***Topic Three: Collaborative Governance Models***
AFWA Discussion Lead: Virgil Moore (ID)

One of the areas AFWA is looking at is with collaboratives across the nation, and LCCs are part of that. With our senior status, we have all been involved with collaboratives, but have we tried to roll that up with any kind of analysis to drive better wildlife management? Collaboratives not only includes institutions such as the Joint Ventures as well as collaborative initiatives such as sage brush. We have to have respect, trust, and a science-based foundation. How do we as leaders precede with building the necessary elements to move forward?

One of the areas we have been working with the U.S. Forest Service and Christopher Moyer to look at every single MOU that exists between USFS and AFWA. We do not have the same level of MOUs with the FWS. AFWA would propose having more of these with the FWS.

Greg Sheehan: what often drives us apart is disagreement over policy issues. Paul Souza: The states are more nimble and better with public engagement. They are also more engaged with politics. Federal agencies tend to move slower but at least allows for engagement that results in better decisions. Tom Melius: MOUs should have some specifics. There is general support for more discussion on this idea. Sara Pauley: Need to set aside time to talk about what is it going to take for fish and wildlife management (i.e., science needs, social science, future look)? Benjamin

Tuggle: In-person discussions are an important part of this. MOUs can be haphazard at times. Jay Slack: Having routine communications and meetings are helpful.

Steve Guertin: There is talk at the Department of the Interior about "Joint Management Areas," and we have these conversations going on. Virgil Moore: What we are asking for is some sort of primacy given to us as leaders of fish and wildlife management in this nation. We have a number of agreements with other institutions, but we have nothing like that with FWS and your legal and sovereign responsibilities. There has been issues in the past in terms of "marching to the beat of the same drum." It's a plea to FWS as leadership for us both to think about this differently. Once we agree on the objectives, how it is implemented is less consequential (i.e., going up the mountain analogy). LCCs were an attempt at getting to common objectives but got bogged down it the process. Sage grouse is a good example of how we gave a governance structure to an issue that created a space for common objectives.

AFWA passed out a draft template for *Policies and Guidelines for Joint Governance Between [State Agency] and U.S. Fish and Wildlife Service*.

Noreen Walsh: If those of us who have co-responsibility over these issues cannot come together to make progress, then the challenges coming from the public are going to overtake us. An MOU is one way to put some structure around this, but we should consider other options such as reconvening this meeting. Nick Wiley: There should be a process for monitoring and amending the agreement. Within FWS, there is so much pressure for initiatives that the states often feel left behind. Kelly Hepler: We need to identify next steps with broader communication on all three topics. Jim Kurth: We need to build on the successes we already have. For example, we signed a policy in development with AFWA on refuge management.

Steve Guertin summarized the FWS interest in signing such an agreement where we identify common goals in the three areas discussed today with periodic review. Ron Regan: on the landscape discussion, we have not pinned it on the wall quite yet.

- **Action Item (AFWA)**: AFWA will delegate to staff the follow-up work on the items discussed today.

In terms of timing, the next meeting is the North American, which would be a point where there would be a check-in on this discussion in a more formal fashion.

- **Action Item (AFWA)**: Task the Wildlife Policy with polling among the states for those existing agreements with FWS.
- **Action Item**: FWS and AFWA to provide feedback on draft policies and guideline document before the North American.

Virgil Moore gave an official recognition to Nick Wiley for his service to President at AFWA.

11:45 R3 Update, John Frampton

Based on the preliminary results of the National Hunting and Fishing Survey, there is real risk for the decline of hunting, fishing, and shooting sports. The Council to Advance Hunting and Shooting Sports has identified recommendations and a national plan. A staff working with the Wildlife Management Institute (WMI) has organized workshops around the country. RBFF has also developed a plan for fishing. We are committed to working with FWS on this issue (perhaps an MOU is involved). There is a national R3 Symposium planned in Lincoln, Nebraska on May 21-23, 2018.

The group took a break to sign joint guidance on SWAPs.

BREAK FOR LUNCH

1:00pm – 3:00pm
Budget Updates, *Jim Kurth and Steve Guertin*
Additional Participants: Chris Nolin

Steve Guertin gave an overview of the current budget climate and the Administration's commitment to significant reductions in domestic programs. To meet the requirements for reductions while keeping on personnel and mission achievement, those reductions were applied to our portfolio of grant programs. For FY18, Congress had taken on different views that the President's budget. They restored field program services to the best that they could, and they were also able to restore some of the grant programs. On Science and the LCCs, there was a heated debate and in the end there were more supporters than not, and so funding was included.

On the FY19 Budget, the budget is in a state of flux. A budget was formulated based planning guidance with an emphasis on access, infrastructure, and energy. The passback from OMB drove down the budget even further another $70-80 million, which also included cuts to science and the Listing program. We do not know where it is going to come out. We are hopeful for an upward trend but should expect major cuts.

Chris Nolin handed out budget tables for FY18.

There was a question about infrastructure. Despite the Administration's interest in infrastructure and addressing maintenance backlogs, there has not been any move on that front. Jim Cason is coordinating an exercise related to public-private partnerships as an approach, which ties into the "Restoring the Refuges" initiative. Recently, there was an announcement of a $227 million investment in the Memorial Bridge, which was paid for through reprioritized funding within the National Park Service.

Ed Grace: the issue in Law Enforcement is to get the hiring through the hiring freeze. Jay Slack: Senate mark-up restored funding for NCTC, which is still struggling with salary costs. In the

budget, Migratory Birds and Fisheries are good. For Refuges (126X accounts), the House and Senate is holding steady, which means a decrease. Workforce planning continues with the Regional Refuge Chiefs. In Partners and Coastal (1121, 1124), these are programs that keeps getting hit. International Affairs is back to FY17 levels and the Arctic Council was funded.

For Ecological Services, it's a mix: for the Listing program, the Administration proposed a 50% decrease, which the House and Senate accepted. There is a risk for increased litigation with less responses to petitions. There was also a reduction in candidate conservation. For recovery, there was an increase in partnerships for captive breeding and augmentation work with zoos and aquariums. Janine Velasco: the Regions should be careful of the 1664 accounts, which are overspending for this year. There was a discussion about the FY18 Work Plan for Ecological Services and whether there are the resources in place to meet the deliverables in the plan.

Greg Siekaniec: where are we in terms of increased costs for benefits and then the analysis on attrition? Steve Guertin: we expected 400 people to leave, and only a couple of dozen have left. For FY19, we need to think about planning and communications. External Affairs has been tasked with a communications plan for the budget roll-out. It's important to communicate with employees even when there is not a lot of uncertainty. There was also a question about VERA/VSIP and the current status of that. Jay Slack: we should make a statement about where there would never be application of VERA/VSIP, which would be very helpful for employees in those areas. Robyn Thorsen: the attrition rate might be driven by folks just working longer.

Rebekah Giddings: On October 1 last year compared to this year, we pretty much are in the same place personnel-wise. We have 3,500 employees who are retirement eligible. Right now, we have 350 people with 36 years or more of service (i.e., likely to retire), and they are more in the GS-12 and 13 levels. Steve Guertin: There is an issue with transition planning (i.e., the "brain drain" issue). We are looking at a possible 10 to 20% turnover.

On a different note, we are also planning for a government shutdown, just in case.

3:00pm – 4:00pm
USFWS Priorities, *Greg Sheehan*

Greg provided an overview of the Secretary's Priorities and the step-down efforts for FWS priorities. The first three have to do with Ecological Services, and we are on track with them (minor changes could occur). The recovery of the black-capped vireo is a great conservation success. Mitigation policies are currently under review at the Departmental level's policy leadership. This includes a focus on NEPA (i.e., S.O. 3355). On the third priority, there is a discrepancy between the Department's Strategic Plan and the Secretarial Priorities document on the timing of a recovery outline.

- **Action Item**: Calibrate the actions in the Secretarial Priorities with the Department's Strategic Plan

On "Restoring the Refuges," there's a challenge in promoting this without an infrastructure package and the ongoing budget reductions. There are other ways that dollars can come to us (i.e., public-private partnerships). Amy Lueders: suggested to frame it more around assets that protect ecosystems (i.e., storm barriers from coastal habitat). Paul Souza: this is also about increasing hunting and fishing access that tells a bigger story. On the issue of adding fish hatcheries, they are part of the initiative but not the branding.

Wendi Weber had a question about "green infrastructure" and resilience. Chris Nolin: there is a Minority amendment in the supplemental to add money for resilience. Cynthia Martinez: the deferred maintenance list Noreen Walsh: we do have infrastructure issues at other facilities, such as the Black-footed Ferret Center and the Puerto Rican Parrot Facility. Greg Sheehan: Yes, it's much broader than refuges.

On hunting and fishing access, we are doing a lot to be responsive. Greg asked of the RDs: the recommendations of the Hunting and Fishing Chiefs might include some difficult things that refuge managers are not going to want do them for various reasons. At the RD level, the RDs should be firm in their support of these Hunting and Fishing Chiefs and their work – it's a priority of the Administration. The Hunting and Fishing Chiefs need to be communicating with the Regional Director's Office. We are asking the RDs not to task the Hunting and Fishing Chiefs in the way they normally would. If there is resistance, it's the responsibility of the RDs to manage that. Greg Siekaniec had a question about NEPA and litigation risk. Jim Kurth: we do better application of NEPA through the annual hunt/fish rule. In terms of population objectives, we defer to the environmental analysis on say the migratory bird framework or the SWAPs.

Paul Rauch: we don't want to lose sight of the number of hunters and not just the acreage of access. Shaun Sanchez: the Hunting and Fishing Chiefs are working with the Natural Resource Program Center and the Inventorying and Monitoring program on the social science and surveying aspect. Noreen Walsh: there needs to be constant communication between the Hunting and Fishing Chiefs and the RDs. Cynthia Martinez: We are trying to connect the dots.

On enhancing border protection, this was a significant issue of public interest. For FWS, we manage 150 miles along the southern border. Zack Gambill: Despite some joking around about Canada, there has been some terror cells that came into Montana from Canada, so broadly it's an issue for all borders. Cynthia Martinez: After the situation with Malhuer NWR, we established a risk and threat coordinator position. Jim Kurth: For the barrier, the Department of Homeland Security would need evoke a waiver. Amy Lueders: for any new construction, there is a plan to use a waiver. Janine Velasco: Appreciate the broader tone on the importance of safety.

We worked a fair amount this morning on the working with states piece. Paul Rauch: we have an opportunity with the upcoming North American meeting. One area we can really improve in is with the preparation for the AFWA Committee meetings (even coordination among ourselves).

- **Action Item**: Go through the AFWA Committee list and put together Directorate leads and a plan for participating in the North American.

Tom Melius: On working with Tribes, sometimes they prefer to work with FWS in a government-to-government context. We can always rely on the science. Paul Souza: there is much less structure on the Tribal piece. There is a new policy on tribal consultation and added training. Amy Lueders: there was a suggestion to split the issues of states and tribes in terms of the Secretary's Priorities. The issue of the ESA Joint Task Force (JTF) was brought up.

On working with industry, the Department organized an industry roundtable that is turning into an advisory group. DOI has hired Rick May to work on this issue full-time within the Office of the Secretary. On organizational transformation, there are still some unknowns in terms of moving operations out west. Fundamentally, this effort is still being looked at and ongoing. Steve Guertin: the new administrative reorganization approach is portable and mobile.

Greg Siekaniec: the Transformation Team had a number of recommendations broader than the administrative reorganization. Is any of that moving? Greg Sheehan: No, I haven't heard anything. Jim Kurth: we have stories to tell of the work that we do that support the Secretary's Priorities, particularly with our conservation stewardship legacy and being good neighbors. Let's keep the conservation work we do front and center with the Secretary.

Wednesday, December 6, 2017
Murie Conference Room (3N057), Breaks within scheduled sessions
Moderator: Jim Kurth

11:00am – 12:00pm
ABA Transformation, *Steve Guertin, Janine Velasco, Denise Sheehan, Ken Taylor, and Brian Bloodsworth*

We are moving forward with a reprogramming request to Congress to consolidate administrative programs into a shared service provider. The hiring freeze / approval process applies to these grade series throughout the organization. The Road Ahead – starting in December, we will assemble the Joint Administrative Officers (JAO) Project Team. There will be diverse representation on this team to include managers and other stakeholders. We will also pull together a more detailed implementation plan, particularly for merging the regional capacities. Through the summer, we will be moving this proposal through the appropriations process. By next spring, we plan to have initial deployment of the HQ functions, and over the following year we would focus on the Regions. This will take about two years to complete this process.

(b)(5) DPP(b)(5) DPP(b)(5) DPP

- **Action Item**: Submit nominations for the JAO Project Team (request to go out shortly).

There are two areas of follow-up work:

1) (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP
(b)(5) DPP
(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP
(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP.

2:00pm – 3:30pm
Meet and Greet with Jason Larrabee

Jason Larrabee has been with the Department for about 10 weeks now. Jason was born and raised in northern California and has hunted and fished his whole life. He spent 12 ½ years on Capitol Hill in policy and appropriations work. He was most recently the Chief of Staff for Representative Denham. Jason provided his cell phone number: (b) (6).

In terms of the Secretary's Priorities, there is a focus on access and making the "R" in recreation a little stronger. He wants all folks to enjoy all lands. The Secretary supports recreation with a leave no trace philosophy. The Secretary is also interested in thinking about the Department for the next 100 years. There is a lot of value in using technology and advancing what we do. We can reform government and make it work better for everyone.

Robyn Thorsen asked if there are going to be opportunities for the political officials to get out into the field, and Jason said there is a strong interest in that. Wendi Weber mentioned the

"Conservation Without Conflict" approach that involves the preclude the need to list (Jason is interested in learning more about this) [redacted] Jay Slack mentioned the R3 (Recruitment, Retention, Reengagement/Reinvestment) program with the states to get more people interested in the outdoors with hunting and fishing.

[redacted]

[redacted]

[redacted]

There was a general discussion about Departmental issues.

3:30pm – 5:00pm
Science Program, *Ben Tuggle and Seth Mott*

In addition, the Predator Rule was removed from Congressional review, which was removed from the Code of Federal Regulations in November.

On Hunting and Fishing, we are very focused on that. Aaron Mize has been reassigned as the Hunting and Fishing Chief overseeing the Regional H/F Chiefs (along with Kate Harrigan, Presidential Management Fellow) and Linh Phu has been assigned as the Coordinator for S.). 3356. Also, Alice Garret is working on "Restoring the Refuges."

- **Action Item**: Add the Regional Directors to the communications list for the S.O. 3356 implementation.

Amy Lueders: communicating successes for the hunting and fishing initiatives is going to be important. Shaun Sanchez: there are a lot of successes and stories that we should be telling.

International Affairs:

10:00am – 11:00pm
Report from the Deputies Group, *Shaun Sanchez*

The Deputies Group has been working on the FY18 Operations Plan and allocations. The three areas we are presenting to the Directorate are enterprise costs, national priority initiatives, and the investment proposals.

On enterprise costs, we are working on getting the reimburables squared away. Before anything gets added to enterprise costs, they would come back to the Deputies Group. The "what" is taken care of, and we are still working on the "how."

On investment proposals, we had been talking with what to do with FY18 carryover funding. We wanted to focus that funding into corporate investments (b)(5) DPP(b)(5) DPP

1:00pm – 2:00pm
Diversity, *Jim Kurth, Paul Rauch, Inez Uhl*

On hiring people with disabilities, we have about 10% participation in FWS, which is just below the goal of 12%. We are less successful with our efforts for people with "targeted disabilities."

Currently we are sitting at 17.7% of minority participation rate, and we have had a target of 20.6%. Last year, our accessions were 19.7% but our separations were 21.9%. This means that we are not reaching our goal and are actually going backwards. We should have hired 26% of minorities to move the needle closer to our goal.

Greg Sheehan had asked how we compare to the rest of the federal sector and Interior. DOI has 26.3% minority participation. FWS is second to last from the bottom in DOI (only USGS has a lower participation rate - 13.7%). Across the federal sector, it is 35.9%. There is a lack of representation of African Americans within DOI. Last year, we hired 66 minorities but lost 66 minorities.(b)(5) DPP

(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP

Becky Giddings: About this time last year, we started in a national hiring mode. We held off in June and July with the "fab four" series (i.e., mission area series) so that we could do a group hire. This was accomplished within 6 weeks. There were 72 positions posted and 67 people were hired; we shortened the amount of panels, and they were very aggressive with applicants (there were over 4,000 applicants). (b)(5)
(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP

One of the objectives of the national hiring approach was to get a more diverse applicant pool. The focus was limited to entry level positions among the "fab four" series (b)(5) DPP(b)(5) DPP
(b)(5) DPP They also standardized the PDs and vacancy announcements. They recruited from 20 specific colleges and universities.

Of the 4,000 applicants, there were 667 minorities, 2,286 identified as non-minorities (others not identified). There were 583 minorities who were qualified. Of those, 144 were referred (i.e., the best qualified category). We made 10 selections of minority candidates. From the other pool, 61 qualified, 53 were referred, and 3 were selected. There were minorities on the certificates at over 60 duty stations.

2:00pm – 3:00pm
Hurricane Update, *Cynthia Martinez, Terrina Harford*

Our resources were stretched incredibly thin with three hurricanes while being at a PL5 level for fire. It's incredible what we were able to do as a bureau. This was a "hyper active" hurricane season with three major hurricanes (Category 3 or higher) – Harvey (200 employees impacted, 26 stations), Irma (426 and 67), and Maria (61 and 11).

We responded with an Incident Management Team (IMT) with a measured, necessary, yet significant response. A total of 61 people and 24 pieces of equipment were deployed. IMT operated out of Balcones Canyonlands NWR. Amy Lueders: called out how well people in FWS took care of each other like a family. Six employees are still in temporary housing.

For Irma, we had a unique response requirement with the key deer population to think about. We deployed Spanish speaking law enforcement agents. When we have a diverse workforce, it makes us better for it and better federal partners. We had people in real need, particularly at Vieques, and FWS was there to help. Mike Oetker: with Irma, the flood damage was on the Atlantic coast with impacts to impacted species. Maria tested the capabilities with not only our agency but also FEMA. One of the populations of Puerto Rican parrots were decimated. Today, everything is still on emergency power and communications is a challenge. Cynthia Martinez: when you have a hurricane impacting an island, it's a whole different set of considerations.

At the same time, we were providing support at the federal level with a number of Emergency Support Functions (ESF) and Recovery Support Functions (RSF). At peak period, FWS provided over 50% of the DOI deployed personnel. Over 150 FWS personnel deployed to meet external and internal response needs. Keenan Adams is on an extended detail in Puerto Rico as part of the recovery efforts. The FWS Supplemental Request is for $210 million, which was submitted on November 21st. This was estimated based on projections of replacement value.

Now we are undergoing after-action review. Aviation will be an asset that will be used more in the future. Some pre-identified potential AAR themes include information management / reporting, intra-agency and inter-agency coordination, and financial/acquisition/administrative. They will also develop focused task forces, further use of IQCS/ROSS (database of responders) for All-Hazards, and full-time regional emergency management coordinators.

3:00pm – 4:00pm

FEVS Update, *Steve Guertin*

The Secretary has promoted the FEVS program as a measurement of how we are doing. There is a focus on the Department's work climate. The National Park Service has a concerted approach to address sexual harassment, and we can look to that as a model. Employee engagement matters, and we are getting after some of their primary concerns.

Our employee engagement effort is in its fourth year. We've built awareness and empowered leaders and managers and using the information to drive change. We have 60% participation in 2017. We are seeing positive, generally increasing scores in a transition year. (b)(5) DPP (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP (b)(5) DPP(b)(5) DPP

Moderator: Steve Guertin

9:00am – 12:00pm
USFWS Directorate discussion with AFWA Executive Committee

Jim Kurth welcomed the group, particularly the state fish and wildlife agency colleagues. This morning, Greg Sheehan was called to a last minute meeting with Deputy Secretary Bernhardt.

9:00 ***Opening Remarks and Introductions***

Virgil Moore, Director, Idaho Fish and Game Department and President, Association of Fish and Wildlife Agencies

This gathering of the FWS Directorate and the Executive Committee for AFWA is unprecedented and welcomed. AFWA has proposed three topics to guide this morning's discussions: hunting/fishing access, landscape conservation, and collaborative governance. FWS has unique legal responsibilities for some species; by and large, state fish and wildlife agencies are responsible for managing fish and wildlife populations. The change in the Administration creates new opportunities for working together.

Greg Sheehan, Principal Deputy Director, United States Fish and Wildlife Service

Greg Sheehan welcomed the group. Greg talked about how he is able to speak from both sides of this group, having just a year ago been a member of the AFWA Executive Committee. The folks

and talent in this room represent the "best of the best" in fisheries and wildlife management, arguably in the world. From here on out, how do we cement these relationships? Now more than ever, we need to come together.

Collectively, we need to think about recruitment and retention. Nowadays, newer employees do not have the same long-term commitment to singular institutions as they once did. They move about more. There is also rampant urbanization, which is happening in every state in the country. ESA issues is an overlapping area with the states, as is sportsmen's access.

9:30 ***Topic One: SO 3356 and New Opportunities for Hunter and Angler Engagement***
AFWA Discussion Lead: Gordon Myers (NC)

Bob Broscheid: With Secretarial Order 3356, there is an opportunity to come up with a shared vision among partners with how the states can be helpful in implementing the S.O. This discussion should focus on high-level recommendations on what we can do together.

Steve Guertin gave an overview of the agency's work on S.O. 3347 and 3356. This is a big deal for FWS. We have met with both AFWA and the Recreational Boating and Fishing Foundation (RBFF) on this issue, including the idea of "First Catch" Centers. A focus of this work is returning veterans and people with disabilities. We also have an initiative, "Restoring the Refuges" that invests in access infrastructure.

We have reassigned one person in every Region as a Hunting and Fishing Chief, who will work individually with refuges to identify opportunities to enhance access. The other element is consistency with state regulations. For AFWA, we would like the Hunting and Fishing Chiefs to meet with the state fish and wildlife agency leadership to hear their suggestions and frustrations.

Jim Douglas: At some point, this initiative has to come down to the state level with a joint assessment of where things are right now. The collaboration needs to involve both FWS and the state. Paul Souza: This is becoming the signature issue for conservation for us right now. Another step is bringing in key partners (e.g., Ducks Unlimited, Trout Unlimited) to form a coalition around this issue. Jay Slack: Dave Chanda is working with NCTC to put together R3 training available to FWS, partners, and the states. Shaun Sanchez: On R3, we are tasking our people to go to the R3 Coordinators in the states and materials already developed to not reinvent the wheel. Paul Rauch: FWS needs to lead from behind on this; we want to be helpful.

Kelly Hepler: we all make value judgments in making regulations. We need to think about collective opportunities. Virgil Moore: we need to look at existing hunting and fishing rules and determine if there are problems that need to be addressed with deference to state laws. Noreen Walsh: it is not clear whether the Hunting and Fishing Chiefs are working with the states on the survey questions. Cynthia Martinez: we need to get through the assessment and start with quick wins to make hunting and fishing easier.

Glenn Normandeau: they have a process in New Hampshire for analyzing value-added efforts that could serve as a model. Nick Wiley: The earlier we engage, the better. There was a question about the authorities of the Hunting and Fishing Chiefs. Cynthia Martinez: The Chiefs have stayed in the Regions and report directly to Headquarters and are graded highly. Curt Melcher: One of the "elephants" in the room is predator management. We need to be able to direct market to our various constituencies, who have already showed interest in wildlife recreation.

- **Action Item**: Prepare a shared letter of commitment between AFWA and USFWS to identify areas of common interest.

- **Action Item**: In the next AFWA newsletter, include information about Hunting and Fishing Chiefs to help connect state agencies to the Hunting and Fishing Chiefs

Virgil Moore, Ron Regan, Greg Sheehan, and Jim Kurth signed an agreement to work together on the issues discussed at today's meeting.

10:15 ***Topic Two: Landscape Level Partnership Models***
AFWA Discussion Lead: Tony Wasely (NV)

To start off, there is great value to landscape-scale conservation and the value of partnerships. There are a myriad of successes in organizing landscape-scale conservation, including Joint Ventures, Landscape Conservation Cooperatives (LCCs), National Fish Habitat Partnerships, etc. There are really two key factors to success: 1) underlying science that is best if coproduced, 2) a partnership to implement that science with opportunities to leverage funding.

AFWA conducted a survey (49 of 50 states) with a question specific to LCCs. There was really a divided opinion in terms of the states that saw value in LCCs (about a 50/50 split). The President's Budget zeroed out the LCC program, and right now is a good time to have a broader discussion about what LCCs look like. How do we respond to these challenges? We recognize the special relationship between FWS and the state fish and wildlife agencies. There is $25 million for conservation in the LCC budget.

Some options that have been discussed with the Executive Committee include:

1) Nexus to State Wildlife Action Plans (SWAPs) and a species-at-risk approach. This may be in conflict with the self-directed nature of LCCs.
    a. One of the challenges with LCCs is their geography where states are in multiple LCCs.
2) Issue-specific LCC (more like Joint Ventures, e.g., Monarch butterflies)
3) Administering them through a regional association
    a. Previously, AFWA had a recommendation on governance that came from a Joint Task Force that was previously established

Certainly the discussion is not limited to LCCs, but we wanted to have sufficient time to address LCCs, which have value in supporting landscape-scale conservation.

Benjamin Tuggle: We would want to emphasize is the peer-to-peer relationship with the state fish and wildlife agency directors. One of our recommendations is to erase the artificial boundaries of the LCCs and let the issue define the boundary. We have primary responsibility for managing fish and wildlife resources on the landscape. The Service's role in the organizational structure is going to change – those resources being deployed are being directed by our mutual collaboration for specific issues in those geographies.

Paul Souza: We have great conservation capacity within the LCCs; how can we spend that money in a way that would maximize our returns? We can learn from our experiences and support these partnerships in ways that make sense. Benjamin Tuggle: What is fundamental is how we direct these resources for mutual benefits. Wendi Weber: In the Northeast, these partnerships have worked well together around shared issues, such as prelisting conservation. Gary Frazer: three years ago, the Western Governors Association (WGA) had a species-based effort that is going to use landscape approaches (i.e., integrating species conservation, forest health, invasive species, and other issues into a strategic approach). Other discussion points included that the other part of LCCs is engage those broader NGO collaborations, who are part of the SWAPs. LCCs were addressing both science and outreach, which created some challenges.

11:00 ***Topic Three: Collaborative Governance Models***
AFWA Discussion Lead: Virgil Moore (ID)

One of the areas AFWA is looking at is with collaboratives across the nation, and LCCs are part of that. With our senior status, we have all been involved with collaboratives, but have we tried to roll that up with any kind of analysis to drive better wildlife management? Collaboratives not only includes institutions such as the Joint Ventures as well as collaborative initiatives such as sage brush. We have to have respect, trust, and a science-based foundation. How do we as leaders precede with building the necessary elements to move forward?

One of the areas we have been working with the U.S. Forest Service and Christopher Moyer to look at every single MOU that exists between USFS and AFWA. We do not have the same level of MOUs with the FWS. AFWA would propose having more of these with the FWS.

Greg Sheehan: what often drives us apart is disagreement over policy issues. Paul Souza: The states are more nimble and better with public engagement. They are also more engaged with politics. Federal agencies tend to move slower but at least allows for engagement that results in better decisions. Tom Melius: MOUs should have some specifics. There is general support for more discussion on this idea. Sara Pauley: Need to set aside time to talk about what is it going to take for fish and wildlife management (i.e., science needs, social science, future look)? Benjamin

Tuggle: In-person discussions are an important part of this. MOUs can be haphazard at times. Jay Slack: Having routine communications and meetings are helpful.

Steve Guertin: There is talk at the Department of the Interior about "Joint Management Areas," and we have these conversations going on. Virgil Moore: What we are asking for is some sort of primacy given to us as leaders of fish and wildlife management in this nation. We have a number of agreements with other institutions, but we have nothing like that with FWS and your legal and sovereign responsibilities. There has been issues in the past in terms of "marching to the beat of the same drum." It's a plea to FWS as leadership for us both to think about this differently. Once we agree on the objectives, how it is implemented is less consequential (i.e., going up the mountain analogy). LCCs were an attempt at getting to common objectives but got bogged down it the process. Sage grouse is a good example of how we gave a governance structure to an issue that created a space for common objectives.

AFWA passed out a draft template for *Policies and Guidelines for Joint Governance Between [State Agency] and U.S. Fish and Wildlife Service*.

Noreen Walsh: If those of us who have co-responsibility over these issues cannot come together to make progress, then the challenges coming from the public are going to overtake us. An MOU is one way to put some structure around this, but we should consider other options such as reconvening this meeting. Nick Wiley: There should be a process for monitoring and amending the agreement. Within FWS, there is so much pressure for initiatives that the states often feel left behind. Kelly Hepler: We need to identify next steps with broader communication on all three topics. Jim Kurth: We need to build on the successes we already have. For example, we signed a policy in development with AFWA on refuge management.

Steve Guertin summarized the FWS interest in signing such an agreement where we identify common goals in the three areas discussed today with periodic review. Ron Regan: on the landscape discussion, we have not pinned it on the wall quite yet.

- **Action Item (AFWA)**: AFWA will delegate to staff the follow-up work on the items discussed today.

In terms of timing, the next meeting is the North American, which would be a point where there would be a check-in on this discussion in a more formal fashion.

- **Action Item (AFWA)**: Task the Wildlife Policy with polling among the states for those existing agreements with FWS.
- **Action Item**: FWS and AFWA to provide feedback on draft policies and guideline document before the North American.

Virgil Moore gave an official recognition to Nick Wiley for his service to President at AFWA.

11:45 R3 Update, John Frampton

Based on the preliminary results of the National Hunting and Fishing Survey, there is real risk for the decline of hunting, fishing, and shooting sports. The Council to Advance Hunting and Shooting Sports has identified recommendations and a national plan. A staff working with the Wildlife Management Institute (WMI) has organized workshops around the country. RBFF has also developed a plan for fishing. We are committed to working with FWS on this issue (perhaps an MOU is involved). There is a national R3 Symposium planned in Lincoln, Nebraska on May 21-23, 2018.

The group took a break to sign joint guidance on SWAPs.

U.S. Fish and Wildlife Service Directorate Meeting
Skyline Headquarters in Falls Church in Virginia *December 5-7, 2017*

Tuesday, December 5, 2017
Rachel Carson Conference Room (1W104), Breaks within scheduled sessions
Moderator: Steve Guertin

9:00am – 12:00pm
USFWS Directorate discussion with AFWA Executive Committee

Jim Kurth welcomed the group, particularly the state fish and wildlife agency colleagues. Virgil Moore, Director, Idaho Fish and Game Department and President, Association of Fish and Wildlife Agencies and Greg Sheehan, Principal Deputy Director, United States Fish and Wildlife Service, gave remarks. The topics covered included:

Topic One: SO 3356 and New Opportunities for Hunter and Angler Engagement

- **Action Item**: Prepare a shared letter of commitment to identify areas of common interest.
- **Action Item**: In the next AFWA newsletter, include information about Hunting and Fishing Chiefs to help connect state agencies to the Hunting and Fishing Chiefs

Topic Two: Landscape Level Partnership Models

Topic Three: Collaborative Governance Models

- **Action Item (AFWA)**: AFWA will delegate to staff the follow-up work on the items discussed today.
- **Action Item (AFWA)**: Task the Wildlife Policy with polling among the states for those existing agreements with FWS.
- **Action Item**: FWS and AFWA to provide feedback on draft policies and guideline document before the North American.

John Frampton gave an update on R3 efforts.

1:00pm – 3:00pm
Budget Updates, *Jim Kurth and Steve Guertin*
Additional Participants: Chris Nolin

Steve Guertin gave an overview of the current budget climate and the Administration's commitment to significant reductions in domestic programs, and Chris Nolin handed out budget tables for FY18. FY19 was also discussed.

3:00pm – 4:00pm
USFWS Priorities, *Greg Sheehan*

Greg provided an overview of the Secretary's Priorities and the step-down efforts for FWS priorities.

- **Action Item**: Calibrate the actions in the Secretarial Priorities with the Department's Strategic Plan
- **Action Item**: Go through the AFWA Committee list and put together Directorate leads and a plan for participating in the North American.

Wednesday, December 6, 2017
Murie Conference Room (3N057), Breaks within scheduled sessions
Moderator: Jim Kurth

11:00am – 12:00pm
ABA Transformation, *Steve Guertin, Janine Velasco, Denise Sheehan, Ken Taylor, and Brian Bloodsworth*

We are moving forward with a reprogramming request to Congress to consolidate administrative programs into a shared service provider, including work with a contractor for implementation.

- **Action Item**: Submit nominations for the JAO Project Team (request to go out shortly).

There are two areas of follow-up work:
1) All of the items in "Analysis Required" is now part of "Inside Scope" even though they may not be fully considered.
2) We need to have clear criteria for what is decided to be centralized with clear decision points with the Deputies and the Directorate.

2:00pm – 3:30pm
Meet and Greet with Jason Larrabee

Jason Larrabee introduced him and they had a general discussion about Departmental issues.

3:30pm – 5:00pm
Science Program, *Ben Tuggle and Seth Mott*

The conversation continued as a follow-up to the landscape conservation discussion in the morning with AFWA. Several options were discussed but none were decided upon specifically.

Thursday, December 7, 2017
Murie Conference Room (3N057), Breaks within scheduled sessions
Moderators: Jim Kurth and Steve Guertin

8:30am – 10:00am
Regulatory Updates, *Cynthia Martinez, Gloria Bell, Gary Frazer and Jerome Ford*

Updates were provided from the National Wildlife Refuge System, Ecological Services, International Affairs, and Migratory Birds.

- **Action Item**: Add the Regional Directors to the communications list for the S.O. 3356 implementation.

10:00am – 11:00pm
Report from the Deputies Group, *Shaun Sanchez*

The Deputies Group has been working on the FY18 Operations Plan and allocations. The three areas we are presenting to the Directorate are enterprise costs, national priority initiatives, and the investment proposals.

- **Motion** (Robyn Thorsen): agreement to fund proposals 1-4. Motion passed.

Alternative Proposal: choose between the two methodologies (i.e., FTE and Carryover) and then leave it up to the programs how best to pay for it. There was an interest in the FTE approach being more equitable.

- **Action Item**: The proposal is for Brian Bloodsworth, Chris Nolin, and Shaun Sanchez to lead a small team that will be assigned to figure out how to pay for the enterprise investments, which will then be owned by the Director's Office.

On the national priority initiatives, Jim Kurth provided an overview of the current status.

11:00am – 12:00pm
Legislative Updates, *Barbara Wainman*

We provided a summary on the bills that are out there. We are not operating under "regular order." We would like to do more courtesy Congressional visits that are not focused on "hot-button" issues.

1:00pm – 2:00pm
Diversity, *Jim Kurth, Paul Rauch, Inez Uhl*

A progress report was provided from the Office of Diversity and Inclusion and the results of the national hiring process. The data from this effort shows that there is possible discrimination in that minorities were selected at half the rate of their Caucasian counterparts. The Executive Committee for Diversity will continue with a focus on implementing the Diversity and Inclusion Plan.

- **Action Item**: Paul Rauch will re-send out the materials and put to a decision the furtherance of the EDC with the new charter, and then discuss this more at the next VTC.

2:00pm – 3:00pm
Hurricane Update, *Cynthia Martinez, Terrina Harford*

Our resources were stretched incredibly thin with our agency's response to three hurricanes while also being at a PL5 level for fire. Now we are undergoing after-action review.

3:00pm – 4:00pm
FEVS Update, *Steve Guertin*

Our employee engagement effort is in its fourth year. We have 60% participation in 2017.
The Partnership for Public Service has just released its ranking of best places to work. DOI is #9 of 16 large agencies and FWS is #43 out of 150 across government (for comparison, USGS is #41, BLM is #115, and NPS is #128).

4:00pm – 4:30pm
Wrap-up, *Jim Kurth*

Meeting adjourned.

9:00am – 12:00pm
USFWS Directorate discussion with AFWA Executive Committee

Jim Kurth welcomed the group, particularly the state fish and wildlife agency colleagues. This morning, Greg Sheehan was called to a last minute meeting with Deputy Secretary Bernhardt.

9:00 ***Opening Remarks and Introductions***

Virgil Moore, Director, Idaho Fish and Game Department and President, Association of Fish and Wildlife Agencies

This gathering of the FWS Directorate and the Executive Committee for AFWA is unprecedented and welcomed. AFWA has proposed three topics to guide this morning's discussions: hunting/fishing access, landscape conservation, and collaborative governance. FWS has unique legal responsibilities for some species; by and large, state fish and wildlife agencies are responsible for managing fish and wildlife populations. The change in the Administration creates new opportunities for working together.

Greg Sheehan, Principal Deputy Director, United States Fish and Wildlife Service

Greg Sheehan welcomed the group. Greg talked about how he is able to speak from both sides of this group, having just a year ago been a member of the AFWA Executive Committee. The folks

and talent in this room represent the "best of the best" in fisheries and wildlife management, arguably in the world. From here on out, how do we cement these relationships? Now more than ever, we need to come together.

Collectively, we need to think about recruitment and retention. Nowadays, newer employees do not have the same long-term commitment to singular institutions as they once did. They move about more. There is also rampant urbanization, which is happening in every state in the country. ESA issues is an overlapping area with the states, as is sportsmen's access.

9:30 ***Topic One: SO 3356 and New Opportunities for Hunter and Angler Engagement***
AFWA Discussion Lead: Gordon Myers (NC)

Bob Broscheid: With Secretarial Order 3356, there is an opportunity to come up with a shared vision among partners with how the states can be helpful in implementing the S.O. This discussion should focus on high-level recommendations on what we can do together.

Steve Guertin gave an overview of the agency's work on S.O. 3347 and 3356. This is a big deal for FWS. We have met with both AFWA and the Recreational Boating and Fishing Foundation (RBFF) on this issue, including the idea of "First Catch" Centers. A focus of this work is returning veterans and people with disabilities. We also have an initiative, "Restoring the Refuges" that invests in access infrastructure.

We have reassigned one person in every Region as a Hunting and Fishing Chief, who will work individually with refuges to identify opportunities to enhance access. The other element is consistency with state regulations. For AFWA, we would like the Hunting and Fishing Chiefs to meet with the state fish and wildlife agency leadership to hear their suggestions and frustrations.

Jim Douglas: At some point, this initiative has to come down to the state level with a joint assessment of where things are right now. The collaboration needs to involve both FWS and the state. Paul Souza: This is becoming the signature issue for conservation for us right now. Another step is bringing in key partners (e.g., Ducks Unlimited, Trout Unlimited) to form a coalition around this issue. Jay Slack: Dave Chanda is working with NCTC to put together R3 training available to FWS, partners, and the states. Shaun Sanchez: On R3, we are tasking our people to go to the R3 Coordinators in the states and materials already developed to not reinvent the wheel. Paul Rauch: FWS needs to lead from behind on this; we want to be helpful.

Kelly Hepler: we all make value judgments in making regulations. We need to think about collective opportunities. Virgil Moore: we need to look at existing hunting and fishing rules and determine if there are problems that need to be addressed with deference to state laws. Noreen Walsh: it is not clear whether the Hunting and Fishing Chiefs are working with the states on the survey questions. Cynthia Martinez: we need to get through the assessment and start with quick wins to make hunting and fishing easier.

Glenn Normandeau: they have a process in New Hampshire for analyzing value-added efforts that could serve as a model. Nick Wiley: The earlier we engage, the better. There was a question about the authorities of the Hunting and Fishing Chiefs. Cynthia Martinez: The Chiefs have stayed in the Regions and report directly to Headquarters and are graded highly. Curt Melcher: One of the "elephants" in the room is predator management. We need to be able to direct market to our various constituencies, who have already showed interest in wildlife recreation.

- **Action Item**: Prepare a shared letter of commitment between AFWA and USFWS to identify areas of common interest.

- **Action Item**: In the next AFWA newsletter, include information about Hunting and Fishing Chiefs to help connect state agencies to the Hunting and Fishing Chiefs

Virgil Moore, Ron Regan, Greg Sheehan, and Jim Kurth signed an agreement to work together on the issues discussed at today's meeting.

10:15 ***Topic Two: Landscape Level Partnership Models***
AFWA Discussion Lead: Tony Wasely (NV)

To start off, there is great value to landscape-scale conservation and the value of partnerships. There are a myriad of successes in organizing landscape-scale conservation, including Joint Ventures, Landscape Conservation Cooperatives (LCCs), National Fish Habitat Partnerships, etc. There are really two key factors to success: 1) underlying science that is best if coproduced, 2) a partnership to implement that science with opportunities to leverage funding.

AFWA conducted a survey (49 of 50 states) with a question specific to LCCs. There was really a divided opinion in terms of the states that saw value in LCCs (about a 50/50 split). The President's Budget zeroed out the LCC program, and right now is a good time to have a broader discussion about what LCCs look like. How do we respond to these challenges? We recognize the special relationship between FWS and the state fish and wildlife agencies. There is $25 million for conservation in the LCC budget.

Some options that have been discussed with the Executive Committee include:

1) Nexus to State Wildlife Action Plans (SWAPs) and a species-at-risk approach. This may be in conflict with the self-directed nature of LCCs.
    a. One of the challenges with LCCs is their geography where states are in multiple LCCs.
2) Issue-specific LCC (more like Joint Ventures, e.g., Monarch butterflies)
3) Administering them through a regional association
    a. Previously, AFWA had a recommendation on governance that came from a Joint Task Force that was previously established

Certainly the discussion is not limited to LCCs, but we wanted to have sufficient time to address LCCs, which have value in supporting landscape-scale conservation.

Benjamin Tuggle: We would want to emphasize is the peer-to-peer relationship with the state fish and wildlife agency directors. One of our recommendations is to erase the artificial boundaries of the LCCs and let the issue define the boundary. We have primary responsibility for managing fish and wildlife resources on the landscape. The Service's role in the organizational structure is going to change – those resources being deployed are being directed by our mutual collaboration for specific issues in those geographies.

Paul Souza: We have great conservation capacity within the LCCs; how can we spend that money in a way that would maximize our returns? We can learn from our experiences and support these partnerships in ways that make sense. Benjamin Tuggle: What is fundamental is how we direct these resources for mutual benefits. Wendi Weber: In the Northeast, these partnerships have worked well together around shared issues, such as prelisting conservation. Gary Frazer: three years ago, the Western Governors Association (WGA) had a species-based effort that is going to use landscape approaches (i.e., integrating species conservation, forest health, invasive species, and other issues into a strategic approach). Other discussion points included that the other part of LCCs is engage those broader NGO collaborations, who are part of the SWAPs. LCCs were addressing both science and outreach, which created some challenges.

11:00 ***Topic Three: Collaborative Governance Models***
AFWA Discussion Lead: Virgil Moore (ID)

One of the areas AFWA is looking at is with collaboratives across the nation, and LCCs are part of that. With our senior status, we have all been involved with collaboratives, but have we tried to roll that up with any kind of analysis to drive better wildlife management? Collaboratives not only includes institutions such as the Joint Ventures as well as collaborative initiatives such as sage brush. We have to have respect, trust, and a science-based foundation. How do we as leaders precede with building the necessary elements to move forward?

One of the areas we have been working with the U.S. Forest Service and Christopher Moyer to look at every single MOU that exists between USFS and AFWA. We do not have the same level of MOUs with the FWS. AFWA would propose having more of these with the FWS.

Greg Sheehan: what often drives us apart is disagreement over policy issues. Paul Souza: The states are more nimble and better with public engagement. They are also more engaged with politics. Federal agencies tend to move slower but at least allows for engagement that results in better decisions. Tom Melius: MOUs should have some specifics. There is general support for more discussion on this idea. Sara Pauley: Need to set aside time to talk about what is it going to take for fish and wildlife management (i.e., science needs, social science, future look)? Benjamin

Tuggle: In-person discussions are an important part of this. MOUs can be haphazard at times. Jay Slack: Having routine communications and meetings are helpful.

Steve Guertin: There is talk at the Department of the Interior about "Joint Management Areas," and we have these conversations going on. Virgil Moore: What we are asking for is some sort of primacy given to us as leaders of fish and wildlife management in this nation. We have a number of agreements with other institutions, but we have nothing like that with FWS and your legal and sovereign responsibilities. There has been issues in the past in terms of "marching to the beat of the same drum." It's a plea to FWS as leadership for us both to think about this differently. Once we agree on the objectives, how it is implemented is less consequential (i.e., going up the mountain analogy). LCCs were an attempt at getting to common objectives but got bogged down it the process. Sage grouse is a good example of how we gave a governance structure to an issue that created a space for common objectives.

AFWA passed out a draft template for *Policies and Guidelines for Joint Governance Between [State Agency] and U.S. Fish and Wildlife Service*.

Noreen Walsh: If those of us who have co-responsibility over these issues cannot come together to make progress, then the challenges coming from the public are going to overtake us. An MOU is one way to put some structure around this, but we should consider other options such as reconvening this meeting. Nick Wiley: There should be a process for monitoring and amending the agreement. Within FWS, there is so much pressure for initiatives that the states often feel left behind. Kelly Hepler: We need to identify next steps with broader communication on all three topics. Jim Kurth: We need to build on the successes we already have. For example, we signed a policy in development with AFWA on refuge management.

Steve Guertin summarized the FWS interest in signing such an agreement where we identify common goals in the three areas discussed today with periodic review. Ron Regan: on the landscape discussion, we have not pinned it on the wall quite yet.

- **Action Item (AFWA)**: AFWA will delegate to staff the follow-up work on the items discussed today.

In terms of timing, the next meeting is the North American, which would be a point where there would be a check-in on this discussion in a more formal fashion.

- **Action Item (AFWA)**: Task the Wildlife Policy with polling among the states for those existing agreements with FWS.
- **Action Item**: FWS and AFWA to provide feedback on draft policies and guideline document before the North American.

Virgil Moore gave an official recognition to Nick Wiley for his service to President at AFWA.

11:45 R3 Update, John Frampton

Based on the preliminary results of the National Hunting and Fishing Survey, there is real risk for the decline of hunting, fishing, and shooting sports. The Council to Advance Hunting and Shooting Sports has identified recommendations and a national plan. A staff working with the Wildlife Management Institute (WMI) has organized workshops around the country. RBFF has also developed a plan for fishing. We are committed to working with FWS on this issue (perhaps an MOU is involved). There is a national R3 Symposium planned in Lincoln, Nebraska on May 21-23, 2018.

The group took a break to sign joint guidance on SWAPs.

BREAK FOR LUNCH

1:00pm – 3:00pm
Budget Updates, *Jim Kurth and Steve Guertin*
Additional Participants: Chris Nolin

Steve Guertin gave an overview of the current budget climate and the Administration's commitment to significant reductions in domestic programs. To meet the requirements for reductions while keeping on personnel and mission achievement, those reductions were applied to our portfolio of grant programs. For FY18, Congress had taken on different views that the President's budget. They restored field program services to the best that they could, and they were also able to restore some of the grant programs. On Science and the LCCs, there was a heated debate and in the end there were more supporters than not, and so funding was included.

On the FY19 Budget, the budget is in a state of flux. A budget was formulated based planning guidance with an emphasis on access, infrastructure, and energy. The passback from OMB drove down the budget even further another $70-80 million, which also included cuts to science and the Listing program. We do not know where it is going to come out. We are hopeful for an upward trend but should expect major cuts.

Chris Nolin handed out budget tables for FY18.

There was a question about infrastructure. Despite the Administration's interest in infrastructure and addressing maintenance backlogs, there has not been any move on that front. Jim Cason is coordinating an exercise related to public-private partnerships as an approach, which ties into the "Restoring the Refuges" initiative. Recently, there was an announcement of a $227 million investment in the Memorial Bridge, which was paid for through reprioritized funding within the National Park Service.

Ed Grace: the issue in Law Enforcement is to get the hiring through the hiring freeze. Jay Slack: Senate mark-up restored funding for NCTC, which is still struggling with salary costs. In the

budget, Migratory Birds and Fisheries are good. For Refuges (126X accounts), the House and Senate is holding steady, which means a decrease. Workforce planning continues with the Regional Refuge Chiefs. In Partners and Coastal (1121, 1124), these are programs that keeps getting hit. International Affairs is back to FY17 levels and the Arctic Council was funded.

For Ecological Services, it's a mix: for the Listing program, the Administration proposed a 50% decrease, which the House and Senate accepted. There is a risk for increased litigation with less responses to petitions. There was also a reduction in candidate conservation. For recovery, there was an increase in partnerships for captive breeding and augmentation work with zoos and aquariums. Janine Velasco: the Regions should be careful of the 1664 accounts, which are overspending for this year. There was a discussion about the FY18 Work Plan for Ecological Services and whether there are the resources in place to meet the deliverables in the plan.

Greg Siekaniec: where are we in terms of increased costs for benefits and then the analysis on attrition? Steve Guertin: we expected 400 people to leave, and only a couple of dozen have left. For FY19, we need to think about planning and communications. External Affairs has been tasked with a communications plan for the budget roll-out. It's important to communicate with employees even when there is not a lot of uncertainty. There was also a question about VERA/VSIP and the current status of that. Jay Slack: we should make a statement about where there would never be application of VERA/VSIP, which would be very helpful for employees in those areas. Robyn Thorsen: the attrition rate might be driven by folks just working longer.

Rebekah Giddings: On October 1 last year compared to this year, we pretty much are in the same place personnel-wise. We have 3,500 employees who are retirement eligible. Right now, we have 350 people with 36 years or more of service (i.e., likely to retire), and they are more in the GS-12 and 13 levels. Steve Guertin: There is an issue with transition planning (i.e., the "brain drain" issue). We are looking at a possible 10 to 20% turnover.

On a different note, we are also planning for a government shutdown, just in case.

3:00pm – 4:00pm
USFWS Priorities, *Greg Sheehan*

Greg provided an overview of the Secretary's Priorities and the step-down efforts for FWS priorities. The first three have to do with Ecological Services, and we are on track with them (minor changes could occur). The recovery of the black-capped vireo is a great conservation success. Mitigation policies are currently under review at the Departmental level's policy leadership. This includes a focus on NEPA (i.e., S.O. 3355). On the third priority, there is a discrepancy between the Department's Strategic Plan and the Secretarial Priorities document on the timing of a recovery outline.

- **Action Item**: Calibrate the actions in the Secretarial Priorities with the Department's Strategic Plan

On "Restoring the Refuges," there's a challenge in promoting this without an infrastructure package and the ongoing budget reductions. There are other ways that dollars can come to us (i.e., public-private partnerships). Amy Lueders: suggested to frame it more around assets that protect ecosystems (i.e., storm barriers from coastal habitat). Paul Souza: this is also about increasing hunting and fishing access that tells a bigger story. On the issue of adding fish hatcheries, they are part of the initiative but not the branding.

Wendi Weber had a question about "green infrastructure" and resilience. Chris Nolin: there is a Minority amendment in the supplemental to add money for resilience. Cynthia Martinez: the deferred maintenance list Noreen Walsh: we do have infrastructure issues at other facilities, such as the Black-footed Ferret Center and the Puerto Rican Parrot Facility. Greg Sheehan: Yes, it's much broader than refuges.

On hunting and fishing access, we are doing a lot to be responsive. Greg asked of the RDs: the recommendations of the Hunting and Fishing Chiefs might include some difficult things that refuge managers are not going to want do them for various reasons. At the RD level, the RDs should be firm in their support of these Hunting and Fishing Chiefs and their work – it's a priority of the Administration. The Hunting and Fishing Chiefs need to be communicating with the Regional Director's Office. We are asking the RDs not to task the Hunting and Fishing Chiefs in the way they normally would. If there is resistance, it's the responsibility of the RDs to manage that. Greg Siekaniec had a question about NEPA and litigation risk. Jim Kurth: we do better application of NEPA through the annual hunt/fish rule. In terms of population objectives, we defer to the environmental analysis on say the migratory bird framework or the SWAPs.

Paul Rauch: we don't want to lose sight of the number of hunters and not just the acreage of access. Shaun Sanchez: the Hunting and Fishing Chiefs are working with the Natural Resource Program Center and the Inventorying and Monitoring program on the social science and surveying aspect. Noreen Walsh: there needs to be constant communication between the Hunting and Fishing Chiefs and the RDs. Cynthia Martinez: We are trying to connect the dots.

On enhancing border protection, this was a significant issue of public interest. For FWS, we manage 150 miles along the southern border. Zack Gambill: Despite some joking around about Canada, there has been some terror cells that came into Montana from Canada, so broadly it's an issue for all borders. Cynthia Martinez: After the situation with Malhuer NWR, we established a risk and threat coordinator position. Jim Kurth: For the barrier, the Department of Homeland Security would need evoke a waiver. Amy Lueders: for any new construction, there is a plan to use a waiver. Janine Velasco: Appreciate the broader tone on the importance of safety.

We worked a fair amount this morning on the working with states piece. Paul Rauch: we have an opportunity with the upcoming North American meeting. One area we can really improve in is with the preparation for the AFWA Committee meetings (even coordination among ourselves).

- **Action Item**: Go through the AFWA Committee list and put together Directorate leads and a plan for participating in the North American.

Tom Melius: On working with Tribes, sometimes they prefer to work with FWS in a government-to-government context. We can always rely on the science. Paul Souza: there is much less structure on the Tribal piece. There is a new policy on tribal consultation and added training. Amy Lueders: there was a suggestion to split the issues of states and tribes in terms of the Secretary's Priorities. The issue of the ESA Joint Task Force (JTF) was brought up.

On working with industry, the Department organized an industry roundtable that is turning into an advisory group. DOI has hired Rick May to work on this issue full-time within the Office of the Secretary. On organizational transformation, there are still some unknowns in terms of moving operations out west. Fundamentally, this effort is still being looked at and ongoing. Steve Guertin: the new administrative reorganization approach is portable and mobile.

Greg Siekaniec: the Transformation Team had a number of recommendations broader than the administrative reorganization. Is any of that moving? Greg Sheehan: No, I haven't heard anything. Jim Kurth: we have stories to tell of the work that we do that support the Secretary's Priorities, particularly with our conservation stewardship legacy and being good neighbors. Let's keep the conservation work we do front and center with the Secretary.

Wednesday, December 6, 2017
Murie Conference Room (3N057), Breaks within scheduled sessions
Moderator: Jim Kurth

11:00am – 12:00pm
ABA Transformation, *Steve Guertin, Janine Velasco, Denise Sheehan, Ken Taylor, and Brian Bloodsworth*

We are moving forward with a reprogramming request to Congress to consolidate administrative programs into a shared service provider. The hiring freeze / approval process applies to these grade series throughout the organization. The Road Ahead – starting in December, we will assemble the Joint Administrative Officers (JAO) Project Team. There will be diverse representation on this team to include managers and other stakeholders. We will also pull together a more detailed implementation plan, particularly for merging the regional capacities. Through the summer, we will be moving this proposal through the appropriations process. By next spring, we plan to have initial deployment of the HQ functions, and over the following year we would focus on the Regions. This will take about two years to complete this process.

For today's discussions, we want to discuss what functions get included. "In Scope" include IT, (b)(5) DPP(b)(5) DPP(b)(5) DPP(

(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP

.

2:00pm – 3:30pm
Meet and Greet with Jason Larrabee

Jason Larrabee has been with the Department for about 10 weeks now. Jason was born and raised in northern California and has hunted and fished his whole life. He spent 12 ½ years on Capitol Hill in policy and appropriations work. He was most recently the Chief of Staff for Representative Denham. Jason provided his cell phone number: (b) (6)(b) (6)

In terms of the Secretary's Priorities, there is a focus on access and making the "R" in recreation a little stronger. He wants all folks to enjoy all lands. The Secretary supports recreation with a leave no trace philosophy. The Secretary is also interested in thinking about the Department for the next 100 years. There is a lot of value in using technology and advancing what we do. We can reform government and make it work better for everyone.

Robyn Thorsen asked if there are going to be opportunities for the political officials to get out into the field, and Jason said there is a strong interest in that. Wendi Weber mentioned the

"Conservation Without Conflict" approach that involves the preclude the need to list (Jason is interested in learning more about this). [redacted] Jay Slack mentioned the R3 (Recruitment, Retention, Reengagement/Reinvestment) program with the states to get more people interested in the outdoors with hunting and fishing.

[redacted]

[redacted]

[redacted]

There was a general discussion about Departmental issues.

3:30pm – 5:00pm
Science Program, *Ben Tuggle and Seth Mott*

(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP
In addition, the Predator Rule was removed from Congressional review, which was removed from the Code of Federal Regulations in November.

On Hunting and Fishing, we are very focused on that. Aaron Mize has been reassigned as the Hunting and Fishing Chief overseeing the Regional H/F Chiefs (along with Kate Harrigan, Presidential Management Fellow) and Linh Phu has been assigned as the Coordinator for S.). 3356. Also, Alice Garret is working on "Restoring the Refuges."

- **Action Item**: Add the Regional Directors to the communications list for the S.O. 3356 implementation.

Amy Lueders: communicating successes for the hunting and fishing initiatives is going to be important. Shaun Sanchez: there are a lot of successes and stories that we should be telling.

International Affairs:

(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP
(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP
(b)(5) DPP(b)(5) DPP

Ecological Services:

We published a notice that our mitigation policies are open for comment. The notice focuses on the mitigation goals, particularly the net conservation benefit piece. (b)(5) DPP(b)(5) DPP

[redacted]
We also put out a notice on CCAA policy regulations to make the issuance standard more clear and consistent with Safe Harbor Agreements.

[redacted]

On wolves, there is appropriations language specific to western Great Lakes and Wyoming wolves in addition to language related to using funding for management of Gray wolves. On red wolf, there is Senate language to provide a report-out given the failure of the species recovery.

Migratory Birds:

[redacted] They are working on a Heritage Stamp. A month ago, they published an EA on cormorants (take up to 50,000 birds). Finally, they are also working on Tribal Hunting Regulations that will hopefully publish next week. A couple of years ago, the Tribes from the Midwest said they should have access to 50% of the surplus given their treaty rights, which promulgated a negotiation with the Tribes. [redacted]

10:00am – 11:00pm
Report from the Deputies Group, *Shaun Sanchez*

The Deputies Group has been working on the FY18 Operations Plan and allocations. The three areas we are presenting to the Directorate are enterprise costs, national priority initiatives, and the investment proposals.

On enterprise costs, we are working on getting the reimburables squared away. Before anything gets added to enterprise costs, they would come back to the Deputies Group. The "what" is taken care of, and we are still working on the "how."

On investment proposals, we had been talking with what to do with FY18 carryover funding. We wanted to focus that funding into corporate investments [redacted]

[redacted]

[redacted]

[redacted]

- **Motion** (Robyn Thorsen): agreement to fund proposals 1-4. Motion passed.

[redacted]

[redacted]

- **Action Item**: The proposal is for Brian Bloodsworth, Chris Nolin, and Shaun Sanchez to lead a small team that will be assigned to figure out how to pay for the enterprise investments, which will then be owned by the Director's Office.

On the national priority initiatives, Jim Kurth provided an overview of the current status. For Gulf and Sage Grouse, these have now been appropriated. On monarchs, we agreed to a $4 million commitment every year for five years, which comes off the top. For NCTC, there currently is a budget proposal. There was agreement to support past decisions [redacted]

[redacted]

11:00am – 12:00pm
Legislative Updates, *Barbara Wainman*

We provided a summary on the bills that are out there.[redacted] he Senate is, as usual, more bipartisan. The Congressional Review Act was used to undo a number of rules from the last Administration. We work closely with the Budget Office on the appropriations riders.

We would like to do more courtesy Congressional visits that are not focused on "hot-button" issues. For example, there were about 15 visits around the cormorants issue that were very well received. Also, a lot of Members are reaching out directly to Greg Sheehan. We have also been working more with the Fish and Wildlife and Parks office, with whom there is now a weekly meeting related to communications. John Tanner is now the new director of the Office of Congressional and Legislative Affairs (OCL), who came from Senator Orrin Hatch's office. Micah Chambers is now the Deputy for OCL (he had been the acting director).

[redacted]

1:00pm – 2:00pm
Diversity, *Jim Kurth, Paul Rauch, Inez Uhl*

On hiring people with disabilities, we have about 10% participation in FWS, which is just below the goal of 12%. We are less successful with our efforts for people with "targeted disabilities."

Currently we are sitting at 17.7% of minority participation rate, and we have had a target of 20.6%. Last year, our accessions were 19.7% but our separations were 21.9%. This means that we are not reaching our goal and are actually going backwards. We should have hired 26% of minorities to move the needle closer to our goal.

Greg Sheehan had asked how we compare to the rest of the federal sector and Interior. DOI has 26.3% minority participation. FWS is second to last from the bottom in DOI (only USGS has a lower participation rate - 13.7%). Across the federal sector, it is 35.9%. There is a lack of representation of African Americans within DOI. Last year, we hired 66 minorities but lost 66 minorities.[redacted]

(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP

(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP
(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP

(b)(5) DPP: About this time last year, we started in a national hiring mode. We held off in June and July with the "fab four" series (i.e., mission area series) so that we could do a group hire. This was accomplished within 6 weeks. There were 72 positions posted and 67 people were hired; we shortened the amount of panels, and they were very aggressive with applicants (there were over 4,000 applicants). (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)

One of the objectives of the national hiring approach was to get a more diverse applicant pool. The focus was limited to entry level positions among the "fab four" series. (b)(5) DPP(b)(5) DPP(b)(5) DPP
(b)(5) DPP(b)(5) DPP They also standardized the PDs and vacancy announcements. They recruited from 20 specific colleges and universities.

Of the 4,000 applicants, there were 667 minorities, 2,286 identified as non-minorities (others not identified). There were 583 minorities who were qualified. Of those, 144 were referred (i.e., the best qualified category). We made 10 selections of minority candidates. From the other pool, 61 qualified, 53 were referred, and 3 were selected. There were minorities on the certificates at over 60 duty stations.

- **Action Item**: Paul Rauch will re-send out the materials and put to a decision the furtherance of the EDC with the new charter, and then discuss this more at the next VTC.

2:00pm – 3:00pm
Hurricane Update, *Cynthia Martinez, Terrina Harford*

Our resources were stretched incredibly thin with three hurricanes while being at a PL5 level for fire. It's incredible what we were able to do as a bureau. This was a "hyper active" hurricane season with three major hurricanes (Category 3 or higher) – Harvey (200 employees impacted, 26 stations), Irma (426 and 67), and Maria (61 and 11).

We responded with an Incident Management Team (IMT) with a measured, necessary, yet significant response. A total of 61 people and 24 pieces of equipment were deployed. IMT operated out of Balcones Canyonlands NWR. Amy Lueders: called out how well people in FWS took care of each other like a family. Six employees are still in temporary housing.

For Irma, we had a unique response requirement with the key deer population to think about. We deployed Spanish speaking law enforcement agents. When we have a diverse workforce, it makes us better for it and better federal partners. We had people in real need, particularly at Vieques, and FWS was there to help. Mike Oetker: with Irma, the flood damage was on the Atlantic coast with impacts to impacted species. Maria tested the capabilities with not only our agency but also FEMA. One of the populations of Puerto Rican parrots were decimated. Today, everything is still on emergency power and communications is a challenge. Cynthia Martinez: when you have a hurricane impacting an island, it's a whole different set of considerations.

At the same time, we were providing support at the federal level with a number of Emergency Support Functions (ESF) and Recovery Support Functions (RSF). At peak period, FWS provided over 50% of the DOI deployed personnel. Over 150 FWS personnel deployed to meet external and internal response needs. Keenan Adams is on an extended detail in Puerto Rico as part of the recovery efforts. The FWS Supplemental Request is for $210 million, which was submitted on November 21st. This was estimated based on projections of replacement value.

Now we are undergoing after-action review. Aviation will be an asset that will be used more in the future. Some pre-identified potential AAR themes include information management / reporting, intra-agency and inter-agency coordination, and financial/acquisition/administrative. They will also develop focused task forces, further use of IQCS/ROSS (database of responders) for All-Hazards, and full-time regional emergency management coordinators.

3:00pm – 4:00pm

FEVS Update, *Steve Guertin*

The Secretary has promoted the FEVS program as a measurement of how we are doing. There is a focus on the Department's work climate. The National Park Service has a concerted approach to address sexual harassment, and we can look to that as a model. Employee engagement matters, and we are getting after some of their primary concerns.

Our employee engagement effort is in its fourth year. We've built awareness and empowered leaders and managers and using the information to drive change. We have 60% participation in 2017. We are seeing positive, generally increasing scores in a transition year. (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP

(b)(5) DPP

The Partnership for Public Service has just released its ranking of best places to work. DOI is #9 of 16 large agencies and FWS is #43 out of 150 across government (for comparison, USGS is #41, BLM is #115, and NPS is #128). The Director's Memo is scheduled to go out on December 15th. We have a communications plan that will run from February – April in 2018. The next survey will be open May – June with results provided to the agencies in August.

Hi Charisa,

Did you get any response on this request related to the Directorate Meeting notes?

It's really kept me up at night, unsure of whether they live on in the minds and hearts of those who could benefit from their grace. LOL :-)

I've reattached the documents and copied Kashyap so that he's in the loop. Up to you guys on how to proceed.

cheers,

Michael

ACTION ITEMS / MOTIONS

- **Action Item**: Prepare a shared letter of commitment between AFWA and USFWS to identify areas of common interest.

- **Action Item**: In the next AFWA newsletter, include information about Hunting and Fishing Chiefs to help connect state agencies to the Hunting and Fishing Chiefs

- **Action Item (AFWA)**: AFWA will delegate to staff the follow-up work on the items discussed today.

- **Action Item (AFWA)**: Task the Wildlife Policy with polling among the states for those existing agreements with FWS.

- **Action Item**: FWS and AFWA to provide feedback on draft policies and guideline document before the North American.

- **Action Item**: Calibrate the actions in the Secretarial Priorities with the Department's Strategic Plan

- **Action Item**: Go through the AFWA Committee list and put together Directorate leads and a plan for participating in the North American.

- **Action Item**: Submit nominations for the JAO Project Team (request to go out shortly).

- **Action Item**: Add the Regional Directors to the communications list for the S.O. 3356 implementation.

- **Motion** (Robyn Thorsen): agreement to fund proposals 1-4. Motion passed.

- **Action Item**: The proposal is for Brian Bloodsworth, Chris Nolin, and Shaun Sanchez to lead a small team that will be assigned to figure out how to pay for the enterprise investments, which will then be owned by the Director's Office.

- **Action Item**: Paul Rauch will re-send out the materials and put to a decision the furtherance of the EDC with the new charter, and then discuss this more at the next VTC.

9:00am – 12:00pm
USFWS Directorate discussion with AFWA Executive Committee

Jim Kurth welcomed the group, particularly the state fish and wildlife agency colleagues. This morning, Greg Sheehan was called to a last minute meeting with Deputy Secretary Bernhardt.

9:00 ***Opening Remarks and Introductions***

Virgil Moore, Director, Idaho Fish and Game Department and President, Association of Fish and Wildlife Agencies

This gathering of the FWS Directorate and the Executive Committee for AFWA is unprecedented and welcomed. AFWA has proposed three topics to guide this morning's discussions: hunting/fishing access, landscape conservation, and collaborative governance. FWS has unique legal responsibilities for some species; by and large, state fish and wildlife agencies are responsible for managing fish and wildlife populations. The change in the Administration creates new opportunities for working together.

Greg Sheehan, Principal Deputy Director, United States Fish and Wildlife Service

Greg Sheehan welcomed the group. Greg talked about how he is able to speak from both sides of this group, having just a year ago been a member of the AFWA Executive Committee. The folks

and talent in this room represent the "best of the best" in fisheries and wildlife management, arguably in the world. From here on out, how do we cement these relationships? Now more than ever, we need to come together.

Collectively, we need to think about recruitment and retention. Nowadays, newer employees do not have the same long-term commitment to singular institutions as they once did. They move about more. There is also rampant urbanization, which is happening in every state in the country. ESA issues is an overlapping area with the states, as is sportsmen's access.

9:30 ***Topic One: SO 3356 and New Opportunities for Hunter and Angler Engagement***
AFWA Discussion Lead: Gordon Myers (NC)

Bob Broscheid: With Secretarial Order 3356, there is an opportunity to come up with a shared vision among partners with how the states can be helpful in implementing the S.O. This discussion should focus on high-level recommendations on what we can do together.

Steve Guertin gave an overview of the agency's work on S.O. 3347 and 3356. This is a big deal for FWS. We have met with both AFWA and the Recreational Boating and Fishing Foundation (RBFF) on this issue, including the idea of "First Catch" Centers. A focus of this work is returning veterans and people with disabilities. We also have an initiative, "Restoring the Refuges" that invests in access infrastructure.

We have reassigned one person in every Region as a Hunting and Fishing Chief, who will work individually with refuges to identify opportunities to enhance access. The other element is consistency with state regulations. For AFWA, we would like the Hunting and Fishing Chiefs to meet with the state fish and wildlife agency leadership to hear their suggestions and frustrations.

Jim Douglas: At some point, this initiative has to come down to the state level with a joint assessment of where things are right now. The collaboration needs to involve both FWS and the state. Paul Souza: This is becoming the signature issue for conservation for us right now. Another step is bringing in key partners (e.g., Ducks Unlimited, Trout Unlimited) to form a coalition around this issue. Jay Slack: Dave Chanda is working with NCTC to put together R3 training available to FWS, partners, and the states. Shaun Sanchez: On R3, we are tasking our people to go to the R3 Coordinators in the states and materials already developed to not reinvent the wheel. Paul Rauch: FWS needs to lead from behind on this; we want to be helpful.

Kelly Hepler: we all make value judgments in making regulations. We need to think about collective opportunities. Virgil Moore: we need to look at existing hunting and fishing rules and determine if there are problems that need to be addressed with deference to state laws. Noreen Walsh: it is not clear whether the Hunting and Fishing Chiefs are working with the states on the survey questions. Cynthia Martinez: we need to get through the assessment and start with quick wins to make hunting and fishing easier.

Glenn Normandeau: they have a process in New Hampshire for analyzing value-added efforts that could serve as a model. Nick Wiley: The earlier we engage, the better. There was a question about the authorities of the Hunting and Fishing Chiefs. Cynthia Martinez: The Chiefs have stayed in the Regions and report directly to Headquarters and are graded highly. Curt Melcher: One of the "elephants" in the room is predator management. We need to be able to direct market to our various constituencies, who have already showed interest in wildlife recreation.

- **Action Item**: Prepare a shared letter of commitment between AFWA and USFWS to identify areas of common interest.

- **Action Item**: In the next AFWA newsletter, include information about Hunting and Fishing Chiefs to help connect state agencies to the Hunting and Fishing Chiefs

Virgil Moore, Ron Regan, Greg Sheehan, and Jim Kurth signed an agreement to work together on the issues discussed at today's meeting.

10:15 ***Topic Two: Landscape Level Partnership Models***
AFWA Discussion Lead: Tony Wasely (NV)

To start off, there is great value to landscape-scale conservation and the value of partnerships. There are a myriad of successes in organizing landscape-scale conservation, including Joint Ventures, Landscape Conservation Cooperatives (LCCs), National Fish Habitat Partnerships, etc. There are really two key factors to success: 1) underlying science that is best if coproduced, 2) a partnership to implement that science with opportunities to leverage funding.

AFWA conducted a survey (49 of 50 states) with a question specific to LCCs. There was really a divided opinion in terms of the states that saw value in LCCs (about a 50/50 split). The President's Budget zeroed out the LCC program, and right now is a good time to have a broader discussion about what LCCs look like. How do we respond to these challenges? We recognize the special relationship between FWS and the state fish and wildlife agencies. There is $25 million for conservation in the LCC budget.

Some options that have been discussed with the Executive Committee include:

1) Nexus to State Wildlife Action Plans (SWAPs) and a species-at-risk approach. This may be in conflict with the self-directed nature of LCCs.
    a. One of the challenges with LCCs is their geography where states are in multiple LCCs.
2) Issue-specific LCC (more like Joint Ventures, e.g., Monarch butterflies)
3) Administering them through a regional association
    a. Previously, AFWA had a recommendation on governance that came from a Joint Task Force that was previously established

Certainly the discussion is not limited to LCCs, but we wanted to have sufficient time to address LCCs, which have value in supporting landscape-scale conservation.

Benjamin Tuggle: We would want to emphasize is the peer-to-peer relationship with the state fish and wildlife agency directors. One of our recommendations is to erase the artificial boundaries of the LCCs and let the issue define the boundary. We have primary responsibility for managing fish and wildlife resources on the landscape. The Service's role in the organizational structure is going to change – those resources being deployed are being directed by our mutual collaboration for specific issues in those geographies.

Paul Souza: We have great conservation capacity within the LCCs; how can we spend that money in a way that would maximize our returns? We can learn from our experiences and support these partnerships in ways that make sense. Benjamin Tuggle: What is fundamental is how we direct these resources for mutual benefits. Wendi Weber: In the Northeast, these partnerships have worked well together around shared issues, such as prelisting conservation. Gary Frazer: three years ago, the Western Governors Association (WGA) had a species-based effort that is going to use landscape approaches (i.e., integrating species conservation, forest health, invasive species, and other issues into a strategic approach). Other discussion points included that the other part of LCCs is engage those broader NGO collaborations, who are part of the SWAPs. LCCs were addressing both science and outreach, which created some challenges.

11:00 ***Topic Three: Collaborative Governance Models***
AFWA Discussion Lead: Virgil Moore (ID)

One of the areas AFWA is looking at is with collaboratives across the nation, and LCCs are part of that. With our senior status, we have all been involved with collaboratives, but have we tried to roll that up with any kind of analysis to drive better wildlife management? Collaboratives not only includes institutions such as the Joint Ventures as well as collaborative initiatives such as sage brush. We have to have respect, trust, and a science-based foundation. How do we as leaders precede with building the necessary elements to move forward?

One of the areas we have been working with the U.S. Forest Service and Christopher Moyer to look at every single MOU that exists between USFS and AFWA. We do not have the same level of MOUs with the FWS. AFWA would propose having more of these with the FWS.

Greg Sheehan: what often drives us apart is disagreement over policy issues. Paul Souza: The states are more nimble and better with public engagement. They are also more engaged with politics. Federal agencies tend to move slower but at least allows for engagement that results in better decisions. Tom Melius: MOUs should have some specifics. There is general support for more discussion on this idea. Sara Pauley: Need to set aside time to talk about what is it going to take for fish and wildlife management (i.e., science needs, social science, future look)? Benjamin

Tuggle: In-person discussions are an important part of this. MOUs can be haphazard at times. Jay Slack: Having routine communications and meetings are helpful.

Steve Guertin: There is talk at the Department of the Interior about "Joint Management Areas," and we have these conversations going on. Virgil Moore: What we are asking for is some sort of primacy given to us as leaders of fish and wildlife management in this nation. We have a number of agreements with other institutions, but we have nothing like that with FWS and your legal and sovereign responsibilities. There has been issues in the past in terms of "marching to the beat of the same drum." It's a plea to FWS as leadership for us both to think about this differently. Once we agree on the objectives, how it is implemented is less consequential (i.e., going up the mountain analogy). LCCs were an attempt at getting to common objectives but got bogged down it the process. Sage grouse is a good example of how we gave a governance structure to an issue that created a space for common objectives.

AFWA passed out a draft template for *Policies and Guidelines for Joint Governance Between [State Agency] and U.S. Fish and Wildlife Service*.

Noreen Walsh: If those of us who have co-responsibility over these issues cannot come together to make progress, then the challenges coming from the public are going to overtake us. An MOU is one way to put some structure around this, but we should consider other options such as reconvening this meeting. Nick Wiley: There should be a process for monitoring and amending the agreement. Within FWS, there is so much pressure for initiatives that the states often feel left behind. Kelly Hepler: We need to identify next steps with broader communication on all three topics. Jim Kurth: We need to build on the successes we already have. For example, we signed a policy in development with AFWA on refuge management.

Steve Guertin summarized the FWS interest in signing such an agreement where we identify common goals in the three areas discussed today with periodic review. Ron Regan: on the landscape discussion, we have not pinned it on the wall quite yet.

- **Action Item (AFWA)**: AFWA will delegate to staff the follow-up work on the items discussed today.

In terms of timing, the next meeting is the North American, which would be a point where there would be a check-in on this discussion in a more formal fashion.

- **Action Item (AFWA)**: Task the Wildlife Policy with polling among the states for those existing agreements with FWS.
- **Action Item**: FWS and AFWA to provide feedback on draft policies and guideline document before the North American.

Virgil Moore gave an official recognition to Nick Wiley for his service to President at AFWA.

11:45 R3 Update, John Frampton

Based on the preliminary results of the National Hunting and Fishing Survey, there is real risk for the decline of hunting, fishing, and shooting sports. The Council to Advance Hunting and Shooting Sports has identified recommendations and a national plan. A staff working with the Wildlife Management Institute (WMI) has organized workshops around the country. RBFF has also developed a plan for fishing. We are committed to working with FWS on this issue (perhaps an MOU is involved). There is a national R3 Symposium planned in Lincoln, Nebraska on May 21-23, 2018.

The group took a break to sign joint guidance on SWAPs.

Based on the preliminary results of the National Hunting and Fishing Survey, there is real risk for the decline of hunting, fishing, and shooting sports. The Council to Advance Hunting and Shooting Sports has identified recommendations and a national plan. A staff working with the Wildlife Management Institute (WMI) has organized workshops around the country. RBFF has also developed a plan for fishing. We are committed to working with FWS on this issue (perhaps an MOU is involved). There is a national R3 Symposium planned in Lincoln, Nebraska on May 21-23, 2018.

The group took a break to sign joint guidance on SWAPs.

BREAK FOR LUNCH

1:00pm – 3:00pm
Budget Updates, *Jim Kurth and Steve Guertin*
Additional Participants: Chris Nolin

Steve Guertin gave an overview of the current budget climate and the Administration's commitment to significant reductions in domestic programs. To meet the requirements for reductions while keeping on personnel and mission achievement, those reductions were applied to our portfolio of grant programs. For FY18, Congress had taken on different views that the President's budget. They restored field program services to the best that they could, and they were also able to restore some of the grant programs. On Science and the LCCs, there was a heated debate and in the end there were more supporters than not, and so funding was included.

On the FY19 Budget, the budget is in a state of flux. A budget was formulated based planning guidance with an emphasis on access, infrastructure, and energy. The passback from OMB drove down the budget even further another $70-80 million, which also included cuts to science and the Listing program. We do not know where it is going to come out. We are hopeful for an upward trend but should expect major cuts.

Chris Nolin handed out budget tables for FY18.

There was a question about infrastructure. Despite the Administration's interest in infrastructure and addressing maintenance backlogs, there has not been any move on that front. Jim Cason is coordinating an exercise related to public-private partnerships as an approach, which ties into the "Restoring the Refuges" initiative. Recently, there was an announcement of a $227 million investment in the Memorial Bridge, which was paid for through reprioritized funding within the National Park Service.

Ed Grace: the issue in Law Enforcement is to get the hiring through the hiring freeze. Jay Slack: Senate mark-up restored funding for NCTC, which is still struggling with salary costs. In the

budget, Migratory Birds and Fisheries are good. For Refuges (126X accounts), the House and Senate is holding steady, which means a decrease. Workforce planning continues with the Regional Refuge Chiefs. In Partners and Coastal (1121, 1124), these are programs that keeps getting hit. International Affairs is back to FY17 levels and the Arctic Council was funded.

For Ecological Services, it's a mix: for the Listing program, the Administration proposed a 50% decrease, which the House and Senate accepted. There is a risk for increased litigation with less responses to petitions. There was also a reduction in candidate conservation. For recovery, there was an increase in partnerships for captive breeding and augmentation work with zoos and aquariums. Janine Velasco: the Regions should be careful of the 1664 accounts, which are overspending for this year. There was a discussion about the FY18 Work Plan for Ecological Services and whether there are the resources in place to meet the deliverables in the plan.

Greg Siekaniec: where are we in terms of increased costs for benefits and then the analysis on attrition? Steve Guertin: we expected 400 people to leave, and only a couple of dozen have left. For FY19, we need to think about planning and communications. External Affairs has been tasked with a communications plan for the budget roll-out. It's important to communicate with employees even when there is not a lot of uncertainty. There was also a question about VERA/VSIP and the current status of that. Jay Slack: we should make a statement about where there would never be application of VERA/VSIP, which would be very helpful for employees in those areas. Robyn Thorsen: the attrition rate might be driven by folks just working longer.

Rebekah Giddings: On October 1 last year compared to this year, we pretty much are in the same place personnel-wise. We have 3,500 employees who are retirement eligible. Right now, we have 350 people with 36 years or more of service (i.e., likely to retire), and they are more in the GS-12 and 13 levels. Steve Guertin: There is an issue with transition planning (i.e., the "brain drain" issue). We are looking at a possible 10 to 20% turnover.

On a different note, we are also planning for a government shutdown, just in case.

3:00pm – 4:00pm
USFWS Priorities, *Greg Sheehan*

Greg provided an overview of the Secretary's Priorities and the step-down efforts for FWS priorities. The first three have to do with Ecological Services, and we are on track with them (minor changes could occur). The recovery of the black-capped vireo is a great conservation success. Mitigation policies are currently under review at the Departmental level's policy leadership. This includes a focus on NEPA (i.e., S.O. 3355). On the third priority, there is a discrepancy between the Department's Strategic Plan and the Secretarial Priorities document on the timing of a recovery outline.

- **Action Item**: Calibrate the actions in the Secretarial Priorities with the Department's Strategic Plan

On "Restoring the Refuges," there's a challenge in promoting this without an infrastructure package and the ongoing budget reductions. There are other ways that dollars can come to us (i.e., public-private partnerships). Amy Lueders: suggested to frame it more around assets that protect ecosystems (i.e., storm barriers from coastal habitat). Paul Souza: this is also about increasing hunting and fishing access that tells a bigger story. On the issue of adding fish hatcheries, they are part of the initiative but not the branding.

Wendi Weber had a question about "green infrastructure" and resilience. Chris Nolin: there is a Minority amendment in the supplemental to add money for resilience. Cynthia Martinez: the deferred maintenance list Noreen Walsh: we do have infrastructure issues at other facilities, such as the Black-footed Ferret Center and the Puerto Rican Parrot Facility. Greg Sheehan: Yes, it's much broader than refuges.

On hunting and fishing access, we are doing a lot to be responsive. Greg asked of the RDs: the recommendations of the Hunting and Fishing Chiefs might include some difficult things that refuge managers are not going to want do them for various reasons. At the RD level, the RDs should be firm in their support of these Hunting and Fishing Chiefs and their work – it's a priority of the Administration. The Hunting and Fishing Chiefs need to be communicating with the Regional Director's Office. We are asking the RDs not to task the Hunting and Fishing Chiefs in the way they normally would. If there is resistance, it's the responsibility of the RDs to manage that. Greg Siekaniec had a question about NEPA and litigation risk. Jim Kurth: we do better application of NEPA through the annual hunt/fish rule. In terms of population objectives, we defer to the environmental analysis on say the migratory bird framework or the SWAPs.

Paul Rauch: we don't want to lose sight of the number of hunters and not just the acreage of access. Shaun Sanchez: the Hunting and Fishing Chiefs are working with the Natural Resource Program Center and the Inventorying and Monitoring program on the social science and surveying aspect. Noreen Walsh: there needs to be constant communication between the Hunting and Fishing Chiefs and the RDs. Cynthia Martinez: We are trying to connect the dots.

On enhancing border protection, this was a significant issue of public interest. For FWS, we manage 150 miles along the southern border. Zack Gambill: Despite some joking around about Canada, there has been some terror cells that came into Montana from Canada, so broadly it's an issue for all borders. Cynthia Martinez: After the situation with Malhuer NWR, we established a risk and threat coordinator position. Jim Kurth: For the barrier, the Department of Homeland Security would need evoke a waiver. Amy Lueders: for any new construction, there is a plan to use a waiver. Janine Velasco: Appreciate the broader tone on the importance of safety.

We worked a fair amount this morning on the working with states piece. Paul Rauch: we have an opportunity with the upcoming North American meeting. One area we can really improve in is with the preparation for the AFWA Committee meetings (even coordination among ourselves).

- **Action Item**: Go through the AFWA Committee list and put together Directorate leads and a plan for participating in the North American.

Tom Melius: On working with Tribes, sometimes they prefer to work with FWS in a government-to-government context. We can always rely on the science. Paul Souza: there is much less structure on the Tribal piece. There is a new policy on tribal consultation and added training. Amy Lueders: there was a suggestion to split the issues of states and tribes in terms of the Secretary's Priorities. The issue of the ESA Joint Task Force (JTF) was brought up.

On working with industry, the Department organized an industry roundtable that is turning into an advisory group. DOI has hired Rick May to work on this issue full-time within the Office of the Secretary. On organizational transformation, there are still some unknowns in terms of moving operations out west. Fundamentally, this effort is still being looked at and ongoing. Steve Guertin: the new administrative reorganization approach is portable and mobile.

Greg Siekaniec: the Transformation Team had a number of recommendations broader than the administrative reorganization. Is any of that moving? Greg Sheehan: No, I haven't heard anything. Jim Kurth: we have stories to tell of the work that we do that support the Secretary's Priorities, particularly with our conservation stewardship legacy and being good neighbors. Let's keep the conservation work we do front and center with the Secretary.

Wednesday, December 6, 2017
Murie Conference Room (3N057), Breaks within scheduled sessions
Moderator: Jim Kurth

11:00am – 12:00pm
ABA Transformation, *Steve Guertin, Janine Velasco, Denise Sheehan, Ken Taylor, and Brian Bloodsworth*

We are moving forward with a reprogramming request to Congress to consolidate administrative programs into a shared service provider. The hiring freeze / approval process applies to these grade series throughout the organization. The Road Ahead – starting in December, we will assemble the Joint Administrative Officers (JAO) Project Team. There will be diverse representation on this team to include managers and other stakeholders. We will also pull together a more detailed implementation plan, particularly for merging the regional capacities. Through the summer, we will be moving this proposal through the appropriations process. By next spring, we plan to have initial deployment of the HQ functions, and over the following year we would focus on the Regions. This will take about two years to complete this process.

[redacted]

[redacted]

- **Action Item**: Submit nominations for the JAO Project Team (request to go out shortly).

There are two areas of follow-up work:

1) [redacted]

2:00pm – 3:30pm
Meet and Greet with Jason Larrabee

Jason Larrabee has been with the Department for about 10 weeks now. Jason was born and raised in northern California and has hunted and fished his whole life. He spent 12 ½ years on Capitol Hill in policy and appropriations work. He was most recently the Chief of Staff for Representative Denham. Jason provided his cell phone number [redacted].

In terms of the Secretary's Priorities, there is a focus on access and making the "R" in recreation a little stronger. He wants all folks to enjoy all lands. The Secretary supports recreation with a leave no trace philosophy. The Secretary is also interested in thinking about the Department for the next 100 years. There is a lot of value in using technology and advancing what we do. We can reform government and make it work better for everyone.

Robyn Thorsen asked if there are going to be opportunities for the political officials to get out into the field, and Jason said there is a strong interest in that. Wendi Weber mentioned the

"Conservation Without Conflict" approach that involves the preclude the need to list (Jason is interested in learning more about this). [redacted] Jay Slack mentioned the R3 (Recruitment, Retention, Reengagement/Reinvestment) program with the states to get more people interested in the outdoors with hunting and fishing.

[redacted]

[redacted]

[redacted] .

There was a general discussion about Departmental issues.

3:30pm – 5:00pm
Science Program, *Ben Tuggle and Seth Mott*

Thursday, December 7, 2017
Murie Conference Room (3N057), Breaks within scheduled sessions
Moderators: Jim Kurth and Steve Guertin

For the Holiday Breakfast, we served food to 350 people, collected over 200 toys for Toys for Tots (along with over $300 of donations), and sold 25 Federal Duck Stamps.

8:30am – 10:00am
Regulatory Updates, *Cynthia Martinez, Gloria Bell, Gary Frazer and Jerome Ford*

National Wildlife Refuge System:

(b)(5) DPP(b)(5) DPP(b)(5) DPP

[redacted]
We also put out a notice on CCAA policy regulations to make the issuance standard more clear and consistent with Safe Harbor Agreements.

[redacted]

On wolves, there is appropriations language specific to western Great Lakes and Wyoming wolves in addition to language related to using funding for management of Gray wolves. On red wolf, there is Senate language to provide a report-out given the failure of the species recovery.

Migratory Birds:

[redacted]. They are working on a Heritage Stamp. A month ago, they published an EA on cormorants (take up to 50,000 birds). Finally, they are also working on Tribal Hunting Regulations that will hopefully publish next week. A couple of years ago, the Tribes from the Midwest said they should have access to 50% of the surplus given their treaty rights, which promulgated a negotiation with the Tribes. [redacted]

10:00am – 11:00pm
Report from the Deputies Group, *Shaun Sanchez*

The Deputies Group has been working on the FY18 Operations Plan and allocations. The three areas we are presenting to the Directorate are enterprise costs, national priority initiatives, and the investment proposals.

On enterprise costs, we are working on getting the reimburables squared away. Before anything gets added to enterprise costs, they would come back to the Deputies Group. The "what" is taken care of, and we are still working on the "how."

On investment proposals, we had been talking with what to do with FY18 carryover funding. We wanted to focus that funding into corporate investments [redacted]

[redacted]

[redacted]

[redacted]

- **Motion** (Robyn Thorsen): agreement to fund proposals 1-4. Motion passed.

[redacted]

[redacted]

- **Action Item**: The proposal is for Brian Bloodsworth, Chris Nolin, and Shaun Sanchez to lead a small team that will be assigned to figure out how to pay for the enterprise investments, which will then be owned by the Director's Office.

On the national priority initiatives, Jim Kurth provided an overview of the current status. For Gulf and Sage Grouse, these have now been appropriated. On monarchs, we agreed to a $4 million commitment every year for five years, which comes off the top. For NCTC, there currently is a budget proposal. There was agreement to support past decisions. [redacted]

1:00pm – 2:00pm
Diversity, *Jim Kurth, Paul Rauch, Inez Uhl*

On hiring people with disabilities, we have about 10% participation in FWS, which is just below the goal of 12%. We are less successful with our efforts for people with "targeted disabilities."

Currently we are sitting at 17.7% of minority participation rate, and we have had a target of 20.6%. Last year, our accessions were 19.7% but our separations were 21.9%. This means that we are not reaching our goal and are actually going backwards. We should have hired 26% of minorities to move the needle closer to our goal.

Greg Sheehan had asked how we compare to the rest of the federal sector and Interior. DOI has 26.3% minority participation. FWS is second to last from the bottom in DOI (only USGS has a lower participation rate - 13.7%). Across the federal sector, it is 35.9%. There is a lack of representation of African Americans within DOI. Last year, we hired 66 minorities but lost 66 minorities.(b)(5) DPP

(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP

Becky Giddings: About this time last year, we started in a national hiring mode. We held off in June and July with the "fab four" series (i.e., mission area series) so that we could do a group hire. This was accomplished within 6 weeks. There were 72 positions posted and 67 people were hired; we shortened the amount of panels, and they were very aggressive with applicants (there were over 4,000 applicants). (
(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP
b
)

One of the objectives of the national hiring approach was to get a more diverse applicant pool. The focus was limited to entry level positions among the "fab four" series. (b)(5) DPP(b)(5) DPP(b)(5) DPP
(b)(5) DPP(b)(5) DPP They also standardized the PDs and vacancy announcements. They recruited from 20 specific colleges and universities.

Of the 4,000 applicants, there were 667 minorities, 2,286 identified as non-minorities (others not identified). There were 583 minorities who were qualified. Of those, 144 were referred (i.e., the best qualified category). We made 10 selections of minority candidates. From the other pool, 61 qualified, 53 were referred, and 3 were selected. There were minorities on the certificates at over 60 duty stations.

- **Action Item**: Paul Rauch will re-send out the materials and put to a decision the furtherance of the EDC with the new charter, and then discuss this more at the next VTC.

2:00pm – 3:00pm
Hurricane Update, *Cynthia Martinez, Terrina Harford*

Our resources were stretched incredibly thin with three hurricanes while being at a PL5 level for fire. It's incredible what we were able to do as a bureau. This was a "hyper active" hurricane season with three major hurricanes (Category 3 or higher) – Harvey (200 employees impacted, 26 stations), Irma (426 and 67), and Maria (61 and 11).

We responded with an Incident Management Team (IMT) with a measured, necessary, yet significant response. A total of 61 people and 24 pieces of equipment were deployed. IMT operated out of Balcones Canyonlands NWR. Amy Lueders: called out how well people in FWS took care of each other like a family. Six employees are still in temporary housing.

For Irma, we had a unique response requirement with the key deer population to think about. We deployed Spanish speaking law enforcement agents. When we have a diverse workforce, it makes us better for it and better federal partners. We had people in real need, particularly at Vieques, and FWS was there to help. Mike Oetker: with Irma, the flood damage was on the Atlantic coast with impacts to impacted species. Maria tested the capabilities with not only our agency but also FEMA. One of the populations of Puerto Rican parrots were decimated. Today, everything is still on emergency power and communications is a challenge. Cynthia Martinez: when you have a hurricane impacting an island, it's a whole different set of considerations.

At the same time, we were providing support at the federal level with a number of Emergency Support Functions (ESF) and Recovery Support Functions (RSF). At peak period, FWS provided over 50% of the DOI deployed personnel. Over 150 FWS personnel deployed to meet external and internal response needs. Keenan Adams is on an extended detail in Puerto Rico as part of the recovery efforts. The FWS Supplemental Request is for $210 million, which was submitted on November 21st. This was estimated based on projections of replacement value.

Now we are undergoing after-action review. Aviation will be an asset that will be used more in the future. Some pre-identified potential AAR themes include information management / reporting, intra-agency and inter-agency coordination, and financial/acquisition/administrative. They will also develop focused task forces, further use of IQCS/ROSS (database of responders) for All-Hazards, and full-time regional emergency management coordinators.

3:00pm – 4:00pm

FEVS Update, *Steve Guertin*

The Secretary has promoted the FEVS program as a measurement of how we are doing. There is a focus on the Department's work climate. The National Park Service has a concerted approach to address sexual harassment, and we can look to that as a model. Employee engagement matters, and we are getting after some of their primary concerns.

Our employee engagement effort is in its fourth year. We've built awareness and empowered leaders and managers and using the information to drive change. We have 60% participation in 2017. We are seeing positive, generally increasing scores in a transition year (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP

(b)(5) DPP

The Partnership for Public Service has just released its ranking of best places to work. DOI is #9 of 16 large agencies and FWS is #43 out of 150 across government (for comparison, USGS is #41, BLM is #115, and NPS is #128). The Director's Memo is scheduled to go out on December 15th. We have a communications plan that will run from February – April in 2018. The next survey will be open May – June with results provided to the agencies in August.

U.S. Fish and Wildlife Service Directorate Meeting
Skyline Headquarters in Falls Church in Virginia *December 5-7, 2017*

Tuesday, December 5, 2017
Rachel Carson Conference Room (1W104), Breaks within scheduled sessions
Moderator: Steve Guertin

9:00am – 12:00pm
USFWS Directorate discussion with AFWA Executive Committee

Jim Kurth welcomed the group, particularly the state fish and wildlife agency colleagues. Virgil Moore, Director, Idaho Fish and Game Department and President, Association of Fish and Wildlife Agencies and Greg Sheehan, Principal Deputy Director, United States Fish and Wildlife Service, gave remarks. The topics covered included:

Topic One: SO 3356 and New Opportunities for Hunter and Angler Engagement

- **Action Item**: Prepare a shared letter of commitment to identify areas of common interest.
- **Action Item**: In the next AFWA newsletter, include information about Hunting and Fishing Chiefs to help connect state agencies to the Hunting and Fishing Chiefs

Topic Two: Landscape Level Partnership Models

Topic Three: Collaborative Governance Models

- **Action Item (AFWA)**: AFWA will delegate to staff the follow-up work on the items discussed today.
- **Action Item (AFWA)**: Task the Wildlife Policy with polling among the states for those existing agreements with FWS.
- **Action Item**: FWS and AFWA to provide feedback on draft policies and guideline document before the North American.

John Frampton gave an update on R3 efforts.

1:00pm – 3:00pm
Budget Updates, *Jim Kurth and Steve Guertin*
Additional Participants: Chris Nolin

Steve Guertin gave an overview of the current budget climate and the Administration's commitment to significant reductions in domestic programs, and Chris Nolin handed out budget tables for FY18. FY19 was also discussed.

3:00pm – 4:00pm
USFWS Priorities, *Greg Sheehan*

Greg provided an overview of the Secretary's Priorities and the step-down efforts for FWS priorities.

- **Action Item**: Calibrate the actions in the Secretarial Priorities with the Department's Strategic Plan
- **Action Item**: Go through the AFWA Committee list and put together Directorate leads and a plan for participating in the North American.

Wednesday, December 6, 2017
Murie Conference Room (3N057), Breaks within scheduled sessions
Moderator: Jim Kurth

11:00am – 12:00pm
ABA Transformation, *Steve Guertin, Janine Velasco, Denise Sheehan, Ken Taylor, and Brian Bloodsworth*

We are moving forward with a reprogramming request to Congress to consolidate administrative programs into a shared service provider, including work with a contractor for implementation.

- **Action Item**: Submit nominations for the JAO Project Team (request to go out shortly).

There are two areas of follow-up work:
1) All of the items in "Analysis Required" is now part of "Inside Scope" even though they may not be fully considered.
2) We need to have clear criteria for what is decided to be centralized with clear decision points with the Deputies and the Directorate.

2:00pm – 3:30pm
Meet and Greet with Jason Larrabee

Jason Larrabee introduced him and they had a general discussion about Departmental issues.

3:30pm – 5:00pm
Science Program, *Ben Tuggle and Seth Mott*

The conversation continued as a follow-up to the landscape conservation discussion in the morning with AFWA. Several options were discussed but none were decided upon specifically.

Thursday, December 7, 2017
Murie Conference Room (3N057), Breaks within scheduled sessions
Moderators: Jim Kurth and Steve Guertin

8:30am – 10:00am
Regulatory Updates, *Cynthia Martinez, Gloria Bell, Gary Frazer and Jerome Ford*

Updates were provided from the National Wildlife Refuge System, Ecological Services, International Affairs, and Migratory Birds.

- **Action Item**: Add the Regional Directors to the communications list for the S.O. 3356 implementation.

10:00am – 11:00pm
Report from the Deputies Group, *Shaun Sanchez*

The Deputies Group has been working on the FY18 Operations Plan and allocations. The three areas we are presenting to the Directorate are enterprise costs, national priority initiatives, and the investment proposals.

- **Motion** (Robyn Thorsen): agreement to fund proposals 1-4. Motion passed.

Alternative Proposal: choose between the two methodologies (i.e., FTE and Carryover) and then leave it up to the programs how best to pay for it. There was an interest in the FTE approach being more equitable.

- **Action Item**: The proposal is for Brian Bloodsworth, Chris Nolin, and Shaun Sanchez to lead a small team that will be assigned to figure out how to pay for the enterprise investments, which will then be owned by the Director's Office.

On the national priority initiatives, Jim Kurth provided an overview of the current status.

11:00am – 12:00pm
Legislative Updates, *Barbara Wainman*

We provided a summary on the bills that are out there. We are not operating under "regular order." We would like to do more courtesy Congressional visits that are not focused on "hot-button" issues.

1:00pm – 2:00pm
Diversity, *Jim Kurth, Paul Rauch, Inez Uhl*

A progress report was provided from the Office of Diversity and Inclusion and the results of the national hiring process. The data from this effort shows that there is possible discrimination in that minorities were selected at half the rate of their Caucasian counterparts. The Executive Committee for Diversity will continue with a focus on implementing the Diversity and Inclusion Plan.

- **Action Item**: Paul Rauch will re-send out the materials and put to a decision the furtherance of the EDC with the new charter, and then discuss this more at the next VTC.

2:00pm – 3:00pm
Hurricane Update, *Cynthia Martinez, Terrina Harford*

Our resources were stretched incredibly thin with our agency's response to three hurricanes while also being at a PL5 level for fire. Now we are undergoing after-action review.

3:00pm – 4:00pm
FEVS Update, *Steve Guertin*

Our employee engagement effort is in its fourth year. We have 60% participation in 2017.
The Partnership for Public Service has just released its ranking of best places to work. DOI is #9 of 16 large agencies and FWS is #43 out of 150 across government (for comparison, USGS is #41, BLM is #115, and NPS is #128).

4:00pm – 4:30pm
Wrap-up, *Jim Kurth*

Meeting adjourned.

Rachel Carson Conference Room (1W104), Breaks within scheduled sessions
Moderator: Steve Guertin

9:00am – 12:00pm
USFWS Directorate discussion with AFWA Executive Committee

Jim Kurth welcomed the group, particularly the state fish and wildlife agency colleagues. This morning, Greg Sheehan was called to a last minute meeting with Deputy Secretary Bernhardt.

9:00 ***Opening Remarks and Introductions***

Virgil Moore, Director, Idaho Fish and Game Department and President, Association of Fish and Wildlife Agencies

This gathering of the FWS Directorate and the Executive Committee for AFWA is unprecedented and welcomed. AFWA has proposed three topics to guide this morning's discussions: hunting/fishing access, landscape conservation, and collaborative governance. FWS has unique legal responsibilities for some species; by and large, state fish and wildlife agencies are responsible for managing fish and wildlife populations. The change in the Administration creates new opportunities for working together.

Greg Sheehan, Principal Deputy Director, United States Fish and Wildlife Service

Greg Sheehan welcomed the group. Greg talked about how he is able to speak from both sides of this group, having just a year ago been a member of the AFWA Executive Committee. The folks

and talent in this room represent the "best of the best" in fisheries and wildlife management, arguably in the world. From here on out, how do we cement these relationships? Now more than ever, we need to come together.

Collectively, we need to think about recruitment and retention. Nowadays, newer employees do not have the same long-term commitment to singular institutions as they once did. They move about more. There is also rampant urbanization, which is happening in every state in the country. ESA issues is an overlapping area with the states, as is sportsmen's access.

9:30 ***Topic One: SO 3356 and New Opportunities for Hunter and Angler Engagement***
AFWA Discussion Lead: Gordon Myers (NC)

Bob Broscheid: With Secretarial Order 3356, there is an opportunity to come up with a shared vision among partners with how the states can be helpful in implementing the S.O. This discussion should focus on high-level recommendations on what we can do together.

Steve Guertin gave an overview of the agency's work on S.O. 3347 and 3356. This is a big deal for FWS. We have met with both AFWA and the Recreational Boating and Fishing Foundation (RBFF) on this issue, including the idea of "First Catch" Centers. A focus of this work is returning veterans and people with disabilities. We also have an initiative, "Restoring the Refuges" that invests in access infrastructure.

We have reassigned one person in every Region as a Hunting and Fishing Chief, who will work individually with refuges to identify opportunities to enhance access. The other element is consistency with state regulations. For AFWA, we would like the Hunting and Fishing Chiefs to meet with the state fish and wildlife agency leadership to hear their suggestions and frustrations.

Jim Douglas: At some point, this initiative has to come down to the state level with a joint assessment of where things are right now. The collaboration needs to involve both FWS and the state. Paul Souza: This is becoming the signature issue for conservation for us right now. Another step is bringing in key partners (e.g., Ducks Unlimited, Trout Unlimited) to form a coalition around this issue. Jay Slack: Dave Chanda is working with NCTC to put together R3 training available to FWS, partners, and the states. Shaun Sanchez: On R3, we are tasking our people to go to the R3 Coordinators in the states and materials already developed to not reinvent the wheel. Paul Rauch: FWS needs to lead from behind on this; we want to be helpful.

Kelly Hepler: we all make value judgments in making regulations. We need to think about collective opportunities. Virgil Moore: we need to look at existing hunting and fishing rules and determine if there are problems that need to be addressed with deference to state laws. Noreen Walsh: it is not clear whether the Hunting and Fishing Chiefs are working with the states on the survey questions. Cynthia Martinez: we need to get through the assessment and start with quick wins to make hunting and fishing easier.

Glenn Normandeau: they have a process in New Hampshire for analyzing value-added efforts that could serve as a model. Nick Wiley: The earlier we engage, the better. There was a question about the authorities of the Hunting and Fishing Chiefs. Cynthia Martinez: The Chiefs have stayed in the Regions and report directly to Headquarters and are graded highly. Curt Melcher: One of the "elephants" in the room is predator management. We need to be able to direct market to our various constituencies, who have already showed interest in wildlife recreation.

- **Action Item**: Prepare a shared letter of commitment between AFWA and USFWS to identify areas of common interest.

- **Action Item**: In the next AFWA newsletter, include information about Hunting and Fishing Chiefs to help connect state agencies to the Hunting and Fishing Chiefs

Virgil Moore, Ron Regan, Greg Sheehan, and Jim Kurth signed an agreement to work together on the issues discussed at today's meeting.

10:15 ***Topic Two: Landscape Level Partnership Models***
AFWA Discussion Lead: Tony Wasely (NV)

To start off, there is great value to landscape-scale conservation and the value of partnerships. There are a myriad of successes in organizing landscape-scale conservation, including Joint Ventures, Landscape Conservation Cooperatives (LCCs), National Fish Habitat Partnerships, etc. There are really two key factors to success: 1) underlying science that is best if coproduced, 2) a partnership to implement that science with opportunities to leverage funding.

AFWA conducted a survey (49 of 50 states) with a question specific to LCCs. There was really a divided opinion in terms of the states that saw value in LCCs (about a 50/50 split). The President's Budget zeroed out the LCC program, and right now is a good time to have a broader discussion about what LCCs look like. How do we respond to these challenges? We recognize the special relationship between FWS and the state fish and wildlife agencies. There is $25 million for conservation in the LCC budget.

Some options that have been discussed with the Executive Committee include:

1) Nexus to State Wildlife Action Plans (SWAPs) and a species-at-risk approach. This may be in conflict with the self-directed nature of LCCs.
    a. One of the challenges with LCCs is their geography where states are in multiple LCCs.
2) Issue-specific LCC (more like Joint Ventures, e.g., Monarch butterflies)
3) Administering them through a regional association
    a. Previously, AFWA had a recommendation on governance that came from a Joint Task Force that was previously established

Certainly the discussion is not limited to LCCs, but we wanted to have sufficient time to address LCCs, which have value in supporting landscape-scale conservation.

Benjamin Tuggle: We would want to emphasize is the peer-to-peer relationship with the state fish and wildlife agency directors. One of our recommendations is to erase the artificial boundaries of the LCCs and let the issue define the boundary. We have primary responsibility for managing fish and wildlife resources on the landscape. The Service's role in the organizational structure is going to change – those resources being deployed are being directed by our mutual collaboration for specific issues in those geographies.

Paul Souza: We have great conservation capacity within the LCCs; how can we spend that money in a way that would maximize our returns? We can learn from our experiences and support these partnerships in ways that make sense. Benjamin Tuggle: What is fundamental is how we direct these resources for mutual benefits. Wendi Weber: In the Northeast, these partnerships have worked well together around shared issues, such as prelisting conservation. Gary Frazer: three years ago, the Western Governors Association (WGA) had a species-based effort that is going to use landscape approaches (i.e., integrating species conservation, forest health, invasive species, and other issues into a strategic approach). Other discussion points included that the other part of LCCs is engage those broader NGO collaborations, who are part of the SWAPs. LCCs were addressing both science and outreach, which created some challenges.

11:00 ***Topic Three: Collaborative Governance Models***
AFWA Discussion Lead: Virgil Moore (ID)

One of the areas AFWA is looking at is with collaboratives across the nation, and LCCs are part of that. With our senior status, we have all been involved with collaboratives, but have we tried to roll that up with any kind of analysis to drive better wildlife management? Collaboratives not only includes institutions such as the Joint Ventures as well as collaborative initiatives such as sage brush. We have to have respect, trust, and a science-based foundation. How do we as leaders precede with building the necessary elements to move forward?

One of the areas we have been working with the U.S. Forest Service and Christopher Moyer to look at every single MOU that exists between USFS and AFWA. We do not have the same level of MOUs with the FWS. AFWA would propose having more of these with the FWS.

Greg Sheehan: what often drives us apart is disagreement over policy issues. Paul Souza: The states are more nimble and better with public engagement. They are also more engaged with politics. Federal agencies tend to move slower but at least allows for engagement that results in better decisions. Tom Melius: MOUs should have some specifics. There is general support for more discussion on this idea. Sara Pauley: Need to set aside time to talk about what is it going to take for fish and wildlife management (i.e., science needs, social science, future look)? Benjamin

Tuggle: In-person discussions are an important part of this. MOUs can be haphazard at times. Jay Slack: Having routine communications and meetings are helpful.

Steve Guertin: There is talk at the Department of the Interior about "Joint Management Areas," and we have these conversations going on. Virgil Moore: What we are asking for is some sort of primacy given to us as leaders of fish and wildlife management in this nation. We have a number of agreements with other institutions, but we have nothing like that with FWS and your legal and sovereign responsibilities. There has been issues in the past in terms of "marching to the beat of the same drum." It's a plea to FWS as leadership for us both to think about this differently. Once we agree on the objectives, how it is implemented is less consequential (i.e., going up the mountain analogy). LCCs were an attempt at getting to common objectives but got bogged down it the process. Sage grouse is a good example of how we gave a governance structure to an issue that created a space for common objectives.

AFWA passed out a draft template for *Policies and Guidelines for Joint Governance Between [State Agency] and U.S. Fish and Wildlife Service*.

Noreen Walsh: If those of us who have co-responsibility over these issues cannot come together to make progress, then the challenges coming from the public are going to overtake us. An MOU is one way to put some structure around this, but we should consider other options such as reconvening this meeting. Nick Wiley: There should be a process for monitoring and amending the agreement. Within FWS, there is so much pressure for initiatives that the states often feel left behind. Kelly Hepler: We need to identify next steps with broader communication on all three topics. Jim Kurth: We need to build on the successes we already have. For example, we signed a policy in development with AFWA on refuge management.

Steve Guertin summarized the FWS interest in signing such an agreement where we identify common goals in the three areas discussed today with periodic review. Ron Regan: on the landscape discussion, we have not pinned it on the wall quite yet.

- **Action Item (AFWA)**: AFWA will delegate to staff the follow-up work on the items discussed today.

In terms of timing, the next meeting is the North American, which would be a point where there would be a check-in on this discussion in a more formal fashion.

- **Action Item (AFWA)**: Task the Wildlife Policy with polling among the states for those existing agreements with FWS.
- **Action Item**: FWS and AFWA to provide feedback on draft policies and guideline document before the North American.

Virgil Moore gave an official recognition to Nick Wiley for his service to President at AFWA.

11:45 R3 Update, John Frampton

Based on the preliminary results of the National Hunting and Fishing Survey, there is real risk for the decline of hunting, fishing, and shooting sports. The Council to Advance Hunting and Shooting Sports has identified recommendations and a national plan. A staff working with the Wildlife Management Institute (WMI) has organized workshops around the country. RBFF has also developed a plan for fishing. We are committed to working with FWS on this issue (perhaps an MOU is involved). There is a national R3 Symposium planned in Lincoln, Nebraska on May 21-23, 2018.

The group took a break to sign joint guidance on SWAPs.

Rachel Carson Conference Room (1W104), Breaks within scheduled sessions
Moderator: Steve Guertin

9:00am – 12:00pm
USFWS Directorate discussion with AFWA Executive Committee

Jim Kurth welcomed the group, particularly the state fish and wildlife agency colleagues. This morning, Greg Sheehan was called to a last minute meeting with Deputy Secretary Bernhardt.

9:00 ***Opening Remarks and Introductions***

Virgil Moore, Director, Idaho Fish and Game Department and President, Association of Fish and Wildlife Agencies

This gathering of the FWS Directorate and the Executive Committee for AFWA is unprecedented and welcomed. AFWA has proposed three topics to guide this morning's discussions: hunting/fishing access, landscape conservation, and collaborative governance. FWS has unique legal responsibilities for some species; by and large, state fish and wildlife agencies are responsible for managing fish and wildlife populations. The change in the Administration creates new opportunities for working together.

Greg Sheehan, Principal Deputy Director, United States Fish and Wildlife Service

Greg Sheehan welcomed the group. Greg talked about how he is able to speak from both sides of this group, having just a year ago been a member of the AFWA Executive Committee. The folks

and talent in this room represent the "best of the best" in fisheries and wildlife management, arguably in the world. From here on out, how do we cement these relationships? Now more than ever, we need to come together.

Collectively, we need to think about recruitment and retention. Nowadays, newer employees do not have the same long-term commitment to singular institutions as they once did. They move about more. There is also rampant urbanization, which is happening in every state in the country. ESA issues is an overlapping area with the states, as is sportsmen's access.

9:30 ***Topic One: SO 3356 and New Opportunities for Hunter and Angler Engagement***
AFWA Discussion Lead: Gordon Myers (NC)

Bob Broscheid: With Secretarial Order 3356, there is an opportunity to come up with a shared vision among partners with how the states can be helpful in implementing the S.O. This discussion should focus on high-level recommendations on what we can do together.

Steve Guertin gave an overview of the agency's work on S.O. 3347 and 3356. This is a big deal for FWS. We have met with both AFWA and the Recreational Boating and Fishing Foundation (RBFF) on this issue, including the idea of "First Catch" Centers. A focus of this work is returning veterans and people with disabilities. We also have an initiative, "Restoring the Refuges" that invests in access infrastructure.

We have reassigned one person in every Region as a Hunting and Fishing Chief, who will work individually with refuges to identify opportunities to enhance access. The other element is consistency with state regulations. For AFWA, we would like the Hunting and Fishing Chiefs to meet with the state fish and wildlife agency leadership to hear their suggestions and frustrations.

Jim Douglas: At some point, this initiative has to come down to the state level with a joint assessment of where things are right now. The collaboration needs to involve both FWS and the state. Paul Souza: This is becoming the signature issue for conservation for us right now. Another step is bringing in key partners (e.g., Ducks Unlimited, Trout Unlimited) to form a coalition around this issue. Jay Slack: Dave Chanda is working with NCTC to put together R3 training available to FWS, partners, and the states. Shaun Sanchez: On R3, we are tasking our people to go to the R3 Coordinators in the states and materials already developed to not reinvent the wheel. Paul Rauch: FWS needs to lead from behind on this; we want to be helpful.

Kelly Hepler: we all make value judgments in making regulations. We need to think about collective opportunities. Virgil Moore: we need to look at existing hunting and fishing rules and determine if there are problems that need to be addressed with deference to state laws. Noreen Walsh: it is not clear whether the Hunting and Fishing Chiefs are working with the states on the survey questions. Cynthia Martinez: we need to get through the assessment and start with quick wins to make hunting and fishing easier.

Glenn Normandeau: they have a process in New Hampshire for analyzing value-added efforts that could serve as a model. Nick Wiley: The earlier we engage, the better. There was a question about the authorities of the Hunting and Fishing Chiefs. Cynthia Martinez: The Chiefs have stayed in the Regions and report directly to Headquarters and are graded highly. Curt Melcher: One of the "elephants" in the room is predator management. We need to be able to direct market to our various constituencies, who have already showed interest in wildlife recreation.

- **Action Item**: Prepare a shared letter of commitment between AFWA and USFWS to identify areas of common interest.

- **Action Item**: In the next AFWA newsletter, include information about Hunting and Fishing Chiefs to help connect state agencies to the Hunting and Fishing Chiefs

Virgil Moore, Ron Regan, Greg Sheehan, and Jim Kurth signed an agreement to work together on the issues discussed at today's meeting.

10:15 ***Topic Two: Landscape Level Partnership Models***
AFWA Discussion Lead: Tony Wasely (NV)

To start off, there is great value to landscape-scale conservation and the value of partnerships. There are a myriad of successes in organizing landscape-scale conservation, including Joint Ventures, Landscape Conservation Cooperatives (LCCs), National Fish Habitat Partnerships, etc. There are really two key factors to success: 1) underlying science that is best if coproduced, 2) a partnership to implement that science with opportunities to leverage funding.

AFWA conducted a survey (49 of 50 states) with a question specific to LCCs. There was really a divided opinion in terms of the states that saw value in LCCs (about a 50/50 split). The President's Budget zeroed out the LCC program, and right now is a good time to have a broader discussion about what LCCs look like. How do we respond to these challenges? We recognize the special relationship between FWS and the state fish and wildlife agencies. There is $25 million for conservation in the LCC budget.

Some options that have been discussed with the Executive Committee include:

1) Nexus to State Wildlife Action Plans (SWAPs) and a species-at-risk approach. This may be in conflict with the self-directed nature of LCCs.
    a. One of the challenges with LCCs is their geography where states are in multiple LCCs.
2) Issue-specific LCC (more like Joint Ventures, e.g., Monarch butterflies)
3) Administering them through a regional association
    a. Previously, AFWA had a recommendation on governance that came from a Joint Task Force that was previously established

Certainly the discussion is not limited to LCCs, but we wanted to have sufficient time to address LCCs, which have value in supporting landscape-scale conservation.

Benjamin Tuggle: We would want to emphasize is the peer-to-peer relationship with the state fish and wildlife agency directors. One of our recommendations is to erase the artificial boundaries of the LCCs and let the issue define the boundary. We have primary responsibility for managing fish and wildlife resources on the landscape. The Service's role in the organizational structure is going to change – those resources being deployed are being directed by our mutual collaboration for specific issues in those geographies.

Paul Souza: We have great conservation capacity within the LCCs; how can we spend that money in a way that would maximize our returns? We can learn from our experiences and support these partnerships in ways that make sense. Benjamin Tuggle: What is fundamental is how we direct these resources for mutual benefits. Wendi Weber: In the Northeast, these partnerships have worked well together around shared issues, such as prelisting conservation. Gary Frazer: three years ago, the Western Governors Association (WGA) had a species-based effort that is going to use landscape approaches (i.e., integrating species conservation, forest health, invasive species, and other issues into a strategic approach). Other discussion points included that the other part of LCCs is engage those broader NGO collaborations, who are part of the SWAPs. LCCs were addressing both science and outreach, which created some challenges.

11:00 ***Topic Three: Collaborative Governance Models***
AFWA Discussion Lead: Virgil Moore (ID)

One of the areas AFWA is looking at is with collaboratives across the nation, and LCCs are part of that. With our senior status, we have all been involved with collaboratives, but have we tried to roll that up with any kind of analysis to drive better wildlife management? Collaboratives not only includes institutions such as the Joint Ventures as well as collaborative initiatives such as sage brush. We have to have respect, trust, and a science-based foundation. How do we as leaders precede with building the necessary elements to move forward?

One of the areas we have been working with the U.S. Forest Service and Christopher Moyer to look at every single MOU that exists between USFS and AFWA. We do not have the same level of MOUs with the FWS. AFWA would propose having more of these with the FWS.

Greg Sheehan: what often drives us apart is disagreement over policy issues. Paul Souza: The states are more nimble and better with public engagement. They are also more engaged with politics. Federal agencies tend to move slower but at least allows for engagement that results in better decisions. Tom Melius: MOUs should have some specifics. There is general support for more discussion on this idea. Sara Pauley: Need to set aside time to talk about what is it going to take for fish and wildlife management (i.e., science needs, social science, future look)? Benjamin

Tuggle: In-person discussions are an important part of this. MOUs can be haphazard at times. Jay Slack: Having routine communications and meetings are helpful.

Steve Guertin: There is talk at the Department of the Interior about "Joint Management Areas," and we have these conversations going on. Virgil Moore: What we are asking for is some sort of primacy given to us as leaders of fish and wildlife management in this nation. We have a number of agreements with other institutions, but we have nothing like that with FWS and your legal and sovereign responsibilities. There has been issues in the past in terms of "marching to the beat of the same drum." It's a plea to FWS as leadership for us both to think about this differently. Once we agree on the objectives, how it is implemented is less consequential (i.e., going up the mountain analogy). LCCs were an attempt at getting to common objectives but got bogged down it the process. Sage grouse is a good example of how we gave a governance structure to an issue that created a space for common objectives.

AFWA passed out a draft template for *Policies and Guidelines for Joint Governance Between [State Agency] and U.S. Fish and Wildlife Service*.

Noreen Walsh: If those of us who have co-responsibility over these issues cannot come together to make progress, then the challenges coming from the public are going to overtake us. An MOU is one way to put some structure around this, but we should consider other options such as reconvening this meeting. Nick Wiley: There should be a process for monitoring and amending the agreement. Within FWS, there is so much pressure for initiatives that the states often feel left behind. Kelly Hepler: We need to identify next steps with broader communication on all three topics. Jim Kurth: We need to build on the successes we already have. For example, we signed a policy in development with AFWA on refuge management.

Steve Guertin summarized the FWS interest in signing such an agreement where we identify common goals in the three areas discussed today with periodic review. Ron Regan: on the landscape discussion, we have not pinned it on the wall quite yet.

- **Action Item (AFWA)**: AFWA will delegate to staff the follow-up work on the items discussed today.

In terms of timing, the next meeting is the North American, which would be a point where there would be a check-in on this discussion in a more formal fashion.

- **Action Item (AFWA)**: Task the Wildlife Policy with polling among the states for those existing agreements with FWS.
- **Action Item**: FWS and AFWA to provide feedback on draft policies and guideline document before the North American.

Virgil Moore gave an official recognition to Nick Wiley for his service to President at AFWA.

11:45 R3 Update, John Frampton

Based on the preliminary results of the National Hunting and Fishing Survey, there is real risk for the decline of hunting, fishing, and shooting sports. The Council to Advance Hunting and Shooting Sports has identified recommendations and a national plan. A staff working with the Wildlife Management Institute (WMI) has organized workshops around the country. RBFF has also developed a plan for fishing. We are committed to working with FWS on this issue (perhaps an MOU is involved). There is a national R3 Symposium planned in Lincoln, Nebraska on May 21-23, 2018.

The group took a break to sign joint guidance on SWAPs.

BREAK FOR LUNCH

1:00pm – 3:00pm
Budget Updates, *Jim Kurth and Steve Guertin*
Additional Participants: Chris Nolin

Steve Guertin gave an overview of the current budget climate and the Administration's commitment to significant reductions in domestic programs. To meet the requirements for reductions while keeping on personnel and mission achievement, those reductions were applied to our portfolio of grant programs. For FY18, Congress had taken on different views that the President's budget. They restored field program services to the best that they could, and they were also able to restore some of the grant programs. On Science and the LCCs, there was a heated debate and in the end there were more supporters than not, and so funding was included.

On the FY19 Budget, the budget is in a state of flux. A budget was formulated based planning guidance with an emphasis on access, infrastructure, and energy. The passback from OMB drove down the budget even further another $70-80 million, which also included cuts to science and the Listing program. We do not know where it is going to come out. We are hopeful for an upward trend but should expect major cuts.

Chris Nolin handed out budget tables for FY18.

There was a question about infrastructure. Despite the Administration's interest in infrastructure and addressing maintenance backlogs, there has not been any move on that front. Jim Cason is coordinating an exercise related to public-private partnerships as an approach, which ties into the "Restoring the Refuges" initiative. Recently, there was an announcement of a $227 million investment in the Memorial Bridge, which was paid for through reprioritized funding within the National Park Service.

Ed Grace: the issue in Law Enforcement is to get the hiring through the hiring freeze. Jay Slack: Senate mark-up restored funding for NCTC, which is still struggling with salary costs. In the

budget, Migratory Birds and Fisheries are good. For Refuges (126X accounts), the House and Senate is holding steady, which means a decrease. Workforce planning continues with the Regional Refuge Chiefs. In Partners and Coastal (1121, 1124), these are programs that keeps getting hit. International Affairs is back to FY17 levels and the Arctic Council was funded.

For Ecological Services, it's a mix: for the Listing program, the Administration proposed a 50% decrease, which the House and Senate accepted. There is a risk for increased litigation with less responses to petitions. There was also a reduction in candidate conservation. For recovery, there was an increase in partnerships for captive breeding and augmentation work with zoos and aquariums. Janine Velasco: the Regions should be careful of the 1664 accounts, which are overspending for this year. There was a discussion about the FY18 Work Plan for Ecological Services and whether there are the resources in place to meet the deliverables in the plan.

Greg Siekaniec: where are we in terms of increased costs for benefits and then the analysis on attrition? Steve Guertin: we expected 400 people to leave, and only a couple of dozen have left. For FY19, we need to think about planning and communications. External Affairs has been tasked with a communications plan for the budget roll-out. It's important to communicate with employees even when there is not a lot of uncertainty. There was also a question about VERA/VSIP and the current status of that. Jay Slack: we should make a statement about where there would never be application of VERA/VSIP, which would be very helpful for employees in those areas. Robyn Thorsen: the attrition rate might be driven by folks just working longer.

Rebekah Giddings: On October 1 last year compared to this year, we pretty much are in the same place personnel-wise. We have 3,500 employees who are retirement eligible. Right now, we have 350 people with 36 years or more of service (i.e., likely to retire), and they are more in the GS-12 and 13 levels. Steve Guertin: There is an issue with transition planning (i.e., the "brain drain" issue). We are looking at a possible 10 to 20% turnover.

On a different note, we are also planning for a government shutdown, just in case.

3:00pm – 4:00pm
USFWS Priorities, *Greg Sheehan*

Greg provided an overview of the Secretary's Priorities and the step-down efforts for FWS priorities. The first three have to do with Ecological Services, and we are on track with them (minor changes could occur). The recovery of the black-capped vireo is a great conservation success. Mitigation policies are currently under review at the Departmental level's policy leadership. This includes a focus on NEPA (i.e., S.O. 3355). On the third priority, there is a discrepancy between the Department's Strategic Plan and the Secretarial Priorities document on the timing of a recovery outline.

- **Action Item**: Calibrate the actions in the Secretarial Priorities with the Department's Strategic Plan

On "Restoring the Refuges," there's a challenge in promoting this without an infrastructure package and the ongoing budget reductions. There are other ways that dollars can come to us (i.e., public-private partnerships). Amy Lueders: suggested to frame it more around assets that protect ecosystems (i.e., storm barriers from coastal habitat). Paul Souza: this is also about increasing hunting and fishing access that tells a bigger story. On the issue of adding fish hatcheries, they are part of the initiative but not the branding.

Wendi Weber had a question about "green infrastructure" and resilience. Chris Nolin: there is a Minority amendment in the supplemental to add money for resilience. Cynthia Martinez: the deferred maintenance list Noreen Walsh: we do have infrastructure issues at other facilities, such as the Black-footed Ferret Center and the Puerto Rican Parrot Facility. Greg Sheehan: Yes, it's much broader than refuges.

On hunting and fishing access, we are doing a lot to be responsive. Greg asked of the RDs: the recommendations of the Hunting and Fishing Chiefs might include some difficult things that refuge managers are not going to want do them for various reasons. At the RD level, the RDs should be firm in their support of these Hunting and Fishing Chiefs and their work – it's a priority of the Administration. The Hunting and Fishing Chiefs need to be communicating with the Regional Director's Office. We are asking the RDs not to task the Hunting and Fishing Chiefs in the way they normally would. If there is resistance, it's the responsibility of the RDs to manage that. Greg Siekaniec had a question about NEPA and litigation risk. Jim Kurth: we do better application of NEPA through the annual hunt/fish rule. In terms of population objectives, we defer to the environmental analysis on say the migratory bird framework or the SWAPs.

Paul Rauch: we don't want to lose sight of the number of hunters and not just the acreage of access. Shaun Sanchez: the Hunting and Fishing Chiefs are working with the Natural Resource Program Center and the Inventorying and Monitoring program on the social science and surveying aspect. Noreen Walsh: there needs to be constant communication between the Hunting and Fishing Chiefs and the RDs. Cynthia Martinez: We are trying to connect the dots.

On enhancing border protection, this was a significant issue of public interest. For FWS, we manage 150 miles along the southern border. Zack Gambill: Despite some joking around about Canada, there has been some terror cells that came into Montana from Canada, so broadly it's an issue for all borders. Cynthia Martinez: After the situation with Malhuer NWR, we established a risk and threat coordinator position. Jim Kurth: For the barrier, the Department of Homeland Security would need evoke a waiver. Amy Lueders: for any new construction, there is a plan to use a waiver. Janine Velasco: Appreciate the broader tone on the importance of safety.

We worked a fair amount this morning on the working with states piece. Paul Rauch: we have an opportunity with the upcoming North American meeting. One area we can really improve in is with the preparation for the AFWA Committee meetings (even coordination among ourselves).

- **Action Item**: Go through the AFWA Committee list and put together Directorate leads and a plan for participating in the North American.

Tom Melius: On working with Tribes, sometimes they prefer to work with FWS in a government-to-government context. We can always rely on the science. Paul Souza: there is much less structure on the Tribal piece. There is a new policy on tribal consultation and added training. Amy Lueders: there was a suggestion to split the issues of states and tribes in terms of the Secretary's Priorities. The issue of the ESA Joint Task Force (JTF) was brought up.

On working with industry, the Department organized an industry roundtable that is turning into an advisory group. DOI has hired Rick May to work on this issue full-time within the Office of the Secretary. On organizational transformation, there are still some unknowns in terms of moving operations out west. Fundamentally, this effort is still being looked at and ongoing. Steve Guertin: the new administrative reorganization approach is portable and mobile.

Greg Siekaniec: the Transformation Team had a number of recommendations broader than the administrative reorganization. Is any of that moving? Greg Sheehan: No, I haven't heard anything. Jim Kurth: we have stories to tell of the work that we do that support the Secretary's Priorities, particularly with our conservation stewardship legacy and being good neighbors. Let's keep the conservation work we do front and center with the Secretary.

Wednesday, December 6, 2017
Murie Conference Room (3N057), Breaks within scheduled sessions
Moderator: Jim Kurth

11:00am – 12:00pm
ABA Transformation, *Steve Guertin, Janine Velasco, Denise Sheehan, Ken Taylor, and Brian Bloodsworth*

We are moving forward with a reprogramming request to Congress to consolidate administrative programs into a shared service provider. The hiring freeze / approval process applies to these grade series throughout the organization. The Road Ahead – starting in December, we will assemble the Joint Administrative Officers (JAO) Project Team. There will be diverse representation on this team to include managers and other stakeholders. We will also pull together a more detailed implementation plan, particularly for merging the regional capacities. Through the summer, we will be moving this proposal through the appropriations process. By next spring, we plan to have initial deployment of the HQ functions, and over the following year we would focus on the Regions. This will take about two years to complete this process.

2:00pm – 3:30pm
Meet and Greet with Jason Larrabee

Jason Larrabee has been with the Department for about 10 weeks now. Jason was born and raised in northern California and has hunted and fished his whole life. He spent 12 ½ years on Capitol Hill in policy and appropriations work. He was most recently the Chief of Staff for Representative Denham. Jason provided his cell phone number: (b) (6)(b) (6).

In terms of the Secretary's Priorities, there is a focus on access and making the "R" in recreation a little stronger. He wants all folks to enjoy all lands. The Secretary supports recreation with a leave no trace philosophy. The Secretary is also interested in thinking about the Department for the next 100 years. There is a lot of value in using technology and advancing what we do. We can reform government and make it work better for everyone.

Robyn Thorsen asked if there are going to be opportunities for the political officials to get out into the field, and Jason said there is a strong interest in that. Wendi Weber mentioned the

"Conservation Without Conflict" approach that involves the preclude the need to list (Jason is interested in learning more about this). [redacted] Jay Slack mentioned the R3 (Recruitment, Retention, Reengagement/Reinvestment) program with the states to get more people interested in the outdoors with hunting and fishing.

[redacted]

[redacted]

[redacted]

There was a general discussion about Departmental issues.

3:30pm – 5:00pm
Science Program, *Ben Tuggle and Seth Mott*

Thursday, December 7, 2017
Murie Conference Room (3N057), Breaks within scheduled sessions
Moderators: Jim Kurth and Steve Guertin

For the Holiday Breakfast, we served food to 350 people, collected over 200 toys for Toys for Tots (along with over $300 of donations), and sold 25 Federal Duck Stamps.

8:30am – 10:00am
Regulatory Updates, *Cynthia Martinez, Gloria Bell, Gary Frazer and Jerome Ford*

National Wildlife Refuge System:

(b)(5) DPP(b)(5) DPP(b)(5) DPP

[redacted]
We also put out a notice on CCAA policy regulations to make the issuance standard more clear and consistent with Safe Harbor Agreements.

[redacted]

On wolves, there is appropriations language specific to western Great Lakes and Wyoming wolves in addition to language related to using funding for management of Gray wolves. On red wolf, there is Senate language to provide a report-out given the failure of the species recovery.

Migratory Birds:

[redacted] They are working on a Heritage Stamp. A month ago, they published an EA on cormorants (take up to 50,000 birds). Finally, they are also working on Tribal Hunting Regulations that will hopefully publish next week. A couple of years ago, the Tribes from the Midwest said they should have access to 50% of the surplus given their treaty rights, which promulgated a negotiation with the Tribes. [redacted]

10:00am – 11:00pm
Report from the Deputies Group, *Shaun Sanchez*

The Deputies Group has been working on the FY18 Operations Plan and allocations. The three areas we are presenting to the Directorate are enterprise costs, national priority initiatives, and the investment proposals.

On enterprise costs, we are working on getting the reimburables squared away. Before anything gets added to enterprise costs, they would come back to the Deputies Group. The "what" is taken care of, and we are still working on the "how."

On investment proposals, we had been talking with what to do with FY18 carryover funding. We wanted to focus that funding into corporate investments [redacted]

[redacted]

[redacted]

[redacted]

- **Motion** (Robyn Thorsen): agreement to fund proposals 1-4. Motion passed.

[redacted]

[redacted]

- **Action Item**: The proposal is for Brian Bloodsworth, Chris Nolin, and Shaun Sanchez to lead a small team that will be assigned to figure out how to pay for the enterprise investments, which will then be owned by the Director's Office.

On the national priority initiatives, Jim Kurth provided an overview of the current status. For Gulf and Sage Grouse, these have now been appropriated. On monarchs, we agreed to a $4 million commitment every year for five years, which comes off the top. For NCTC, there currently is a budget proposal. There was agreement to support past decisions. [redacted]

(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP
(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP

11:00am – 12:00pm
Legislative Updates, *Barbara Wainman*

We provided a summary on the bills that are out there. (b)(5) DPP(b)(5) DPP(b)(5) DPP
(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP
(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP

1:00pm – 2:00pm
Diversity, *Jim Kurth, Paul Rauch, Inez Uhl*

On hiring people with disabilities, we have about 10% participation in FWS, which is just below the goal of 12%. We are less successful with our efforts for people with "targeted disabilities."

Currently we are sitting at 17.7% of minority participation rate, and we have had a target of 20.6%. Last year, our accessions were 19.7% but our separations were 21.9%. This means that we are not reaching our goal and are actually going backwards. We should have hired 26% of minorities to move the needle closer to our goal.

Greg Sheehan had asked how we compare to the rest of the federal sector and Interior. DOI has 26.3% minority participation. FWS is second to last from the bottom in DOI (only USGS has a lower participation rate - 13.7%). Across the federal sector, it is 35.9%. There is a lack of representation of African Americans within DOI. Last year, we hired 66 minorities but lost 66 minorities.(b)(5) DPP

look at retention. It's not about "retaining" but about inspiring people to stay. Greg also had a request to (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP

(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP
(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP There was an Executive Committee for Diversity that was put together, who put together the Diversity and Inclusion Plan in 2011. In 2015, a revised plan was presented, but there was no oversight for it. Everything in the plan helps us to do our mission, and everything in this plan is for everybody.

(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP

(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP
(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP.

Becky Giddings: About this time last year, we started in a national hiring mode. We held off in June and July with the "fab four" series (i.e., mission area series) so that we could do a group hire. This was accomplished within 6 weeks. There were 72 positions posted and 67 people were hired; we shortened the amount of panels, and they were very aggressive with applicants (there were over 4,000 applicants). (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP

One of the objectives of the national hiring approach was to get a more diverse applicant pool. The focus was limited to entry level positions among the "fab four" series. (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP They also standardized the PDs and vacancy announcements. They recruited from 20 specific colleges and universities.

Of the 4,000 applicants, there were 667 minorities, 2,286 identified as non-minorities (others not identified). There were 583 minorities who were qualified. Of those, 144 were referred (i.e., the best qualified category). We made 10 selections of minority candidates. From the other pool, 61 qualified, 53 were referred, and 3 were selected. There were minorities on the certificates at over 60 duty stations.

- **Action Item**: Paul Rauch will re-send out the materials and put to a decision the furtherance of the EDC with the new charter, and then discuss this more at the next VTC.

2:00pm – 3:00pm
Hurricane Update, *Cynthia Martinez, Terrina Harford*

Our resources were stretched incredibly thin with three hurricanes while being at a PL5 level for fire. It's incredible what we were able to do as a bureau. This was a "hyper active" hurricane season with three major hurricanes (Category 3 or higher) – Harvey (200 employees impacted, 26 stations), Irma (426 and 67), and Maria (61 and 11).

We responded with an Incident Management Team (IMT) with a measured, necessary, yet significant response. A total of 61 people and 24 pieces of equipment were deployed. IMT operated out of Balcones Canyonlands NWR. Amy Lueders: called out how well people in FWS took care of each other like a family. Six employees are still in temporary housing.

For Irma, we had a unique response requirement with the key deer population to think about. We deployed Spanish speaking law enforcement agents. When we have a diverse workforce, it makes us better for it and better federal partners. We had people in real need, particularly at Vieques, and FWS was there to help. Mike Oetker: with Irma, the flood damage was on the Atlantic coast with impacts to impacted species. Maria tested the capabilities with not only our agency but also FEMA. One of the populations of Puerto Rican parrots were decimated. Today, everything is still on emergency power and communications is a challenge. Cynthia Martinez: when you have a hurricane impacting an island, it's a whole different set of considerations.

At the same time, we were providing support at the federal level with a number of Emergency Support Functions (ESF) and Recovery Support Functions (RSF). At peak period, FWS provided over 50% of the DOI deployed personnel. Over 150 FWS personnel deployed to meet external and internal response needs. Keenan Adams is on an extended detail in Puerto Rico as part of the recovery efforts. The FWS Supplemental Request is for $210 million, which was submitted on November 21st. This was estimated based on projections of replacement value.

Now we are undergoing after-action review. Aviation will be an asset that will be used more in the future. Some pre-identified potential AAR themes include information management / reporting, intra-agency and inter-agency coordination, and financial/acquisition/administrative. They will also develop focused task forces, further use of IQCS/ROSS (database of responders) for All-Hazards, and full-time regional emergency management coordinators.

3:00pm – 4:00pm

FEVS Update, *Steve Guertin*

The Secretary has promoted the FEVS program as a measurement of how we are doing. There is a focus on the Department's work climate. The National Park Service has a concerted approach to address sexual harassment, and we can look to that as a model. Employee engagement matters, and we are getting after some of their primary concerns.

Our employee engagement effort is in its fourth year. We've built awareness and empowered leaders and managers and using the information to drive change. We have 60% participation in 2017. We are seeing positive, generally increasing scores in a transition year. (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP

(b)(5) DPP

The Partnership for Public Service has just released its ranking of best places to work. DOI is #9 of 16 large agencies and FWS is #43 out of 150 across government (for comparison, USGS is #41, BLM is #115, and NPS is #128). The Director's Memo is scheduled to go out on December 15th. We have a communications plan that will run from February – April in 2018. The next survey will be open May – June with results provided to the agencies in August.

---

Good morning Jerome and Cynthia,

Please see your handywork in the attached meeting memo format, and Greg's question below on (b)(5) DPP and (b)(5) DPP

Do you want additional bullets or are you good as is?

Thanks,
Kashyap

Might they also want to discuss (b)(5) DPP and the (b)(5) DPP(b)(5) DPP? Lots of birding there that may be impacted depending on final decisions.

If so please add and otherwise I am fine as written.

Thanks
Greg

Downey

Pursuant to prior discussions, I would appreciate assistance in scheduling a meeting for David Yarnold, the president and chief executive officer of the National Audubon Society, with Secretary Zinke. The purpose of the meeting would be to allow these two leaders to get to know each other and to discuss major policy issues where there is a nexus between current initiatives of the Department and central tenets of birding conservation as represented by the over one million members of Audubon. Yarnold comes to DC on a regular basis and it would be my hope the Office of the Secretary could accommodate such a meeting during one of the upcoming visits. Currently, Yarnold's schedule for DC includes the following dates and time slots:

February 14th: He arrives at 1pm on 14th at DCA. Free remainder of the day.

February 16th: 10:15 am to 1 pm. We have Hill meetings scheduled but could be flexible. Departs to NYC at 2pm

February 27th: 1 pm to 6 pm.

February 28th: Flexible during the day.

Your consideration and attention to this request is greatly appreciated.

Thanks,

Gregg

United States Department of the Interior
Washington, D.C. 20240
MEETING MEMORANDUM FOR THE SECRETARY

DATE: March 19, 2018
TIME: March 21, 2018 at 2:15pm
FROM: Greg Sheehan, Principal Deputy Director, U.S. Fish and Wildlife Service
SUBJECT: Secretary Meeting with David Yarnold, President & CEO, Audubod Society

---

I. STATEMENT OF PURPOSE

To inform issues that may be raised by the National Audubon Society during their upcoming visit with the Secretary.

II. PARTICIPANTS

Internal
Secretary Zinke
Principal Deputy Director Sheehan
Downey Magallanes

External
David Yarnold

III. BACKGROUND

- The National Audubon Society has over 500 chapters and 1 million members
- The National Audubon Society has 5 main bird conservation initiatives
  1. **Bird Conservation**: Audubon is a consistent advocate for core laws protecting birds such as the Migratory Bird Treaty Act, Neotropical Migratory Bird Conservation Act, and Endangered Species Act, and also for the high-value bird habitat within the National Wildlife Refuge System. Audubon is currently focused on passing the Agreement for the Conservation of Albatrosses and Petrels, which would address persistent threats to some of the world's most imperiled birds.
  2. **Ecosystem Restoration**: Audubon advocates for protection and restoration of ecosystems from the Everglades to the Mississippi River to the sagebrush steppe.
  3. **Conservation Funding**: Audubon advocates for conservation programs with the greatest benefit for bird conservation, including State Wildlife Grants, the Land and Water Conservation Fund, the North American Wetlands Conservation Act, and the Neotropical Migratory Bird Conservation Act.
  4. **Climate and Energy**: Audubon's new climate modeling shows that 314 North American bird species are threatened with extinction due to climate change. Audubon advocates for policies that reduce greenhouse gas emissions, climate adaptation strategies that protect birds, and energy siting policies and practices that allow renewable energy to be deployed with minimal impacts on birds and their habitats.
  5. **Alaska Conservation**: Audubon is the only national conservation group with both a significant presence in the state and also full time lobbying representation in Washington, and has lobbied to protect the Arctic National Wildlife Refuge from drilling for more than 25 years.

IV. DISCUSSION

- The National Audubon Society may be interested in discussing their conservation initiatives and how they line up with the Secretary's priorities
- Audubon has expressed an interest in finding ways to work together with the Department and the Fish and Wildlife Service for bird conservation
- Concerns that have been raised by Audubon recently include:
  1. Decreases in DOI budget and impacts to bird conservation programs
  2. Changes in bird conservation policy (related to the Department's M-Opinion)
  3. The importance of public lands for bird conservation and the use of public lands for energy development where they overlap with Important Bird Areas designated by Audubon

V. TALKING POINTS/REMARKS

- Wildlife watching was the most popular recreational activity on refuges, attracting a new all-time high of 35.6 million participants.
- In 2017, 13.9 million refuge visitors took wildlife and nature photos, an increase of 80 percent in participation in the last five years.
- There are more than 700 species of birds on National Wildlife Refuges.
- More than 200 refuges were created specifically to protect, manage and restore habitat for migratory birds.
- In 2014, five national wildlife refuges earned places on a USA Today "10 best" list for bird-watching. https://www.fws.gov/refuges/news/RefugesPollHighBirding.html
  #3 of 10: Bosque del Apache
  #5: Aransas NWR
  #6: Sanibel Island/Ding Darling NWR
  #9: Lower Rio Grande Valley of Texas/Laguna Atascosa NWR and Santa Ana NWR

- In addition, local Audubon chapters often work closely with local refuges to organize bird walks, birding and nature festival field trips, presentations, and photography trips, and Audubon members also volunteer at refuges.

Kashyap,

We called them yesterday and asked what they wanted to cover. All those topics are in the BP. They can always ask about something we did not cover.

I am inclined to move the BP forward as is.

Jerome E. Ford
Assistant Director
Migratory Birds Program

Downey

Pursuant to prior discussions, I would appreciate assistance in scheduling a meeting for David Yarnold, the president and chief executive officer of the National Audubon Society, with Secretary Zinke. The purpose of the meeting would be to allow these two leaders to get to know each other and to discuss major policy issues where there is a nexus between current initiatives of the Department and central tenets of birding conservation as represented by the over one million members of Audubon. Yarnold comes to DC on a regular basis and it would be my hope the Office of the Secretary could accommodate such a meeting during one of the upcoming visits. Currently, Yarnold's schedule for DC includes the following dates and time slots:

February 14th: He arrives at 1pm on 14th at DCA. Free remainder of the day.

February 16th: 10:15 am to 1 pm. We have Hill meetings scheduled but could be flexible. Departs to NYC at 2pm

February 27th: 1 pm to 6 pm.

February 28th: Flexible during the day.

Your consideration and attention to this request is greatly appreciated.

Thanks,

Gregg

MigBird did touch base with the Audobon Society to coordinate anticipated topics and (b)(5) DPP didn't come up. We can of course come up with bullet TPs if that changes. (b)(5) DPP

Downey

Pursuant to prior discussions, I would appreciate assistance in scheduling a meeting for David Yarnold, the president and chief executive officer of the National Audubon Society, with Secretary Zinke. The purpose of the meeting would be to allow these two leaders to get to know each other and to discuss major policy issues where there is a nexus between current initiatives of the Department and central tenets of birding conservation as represented by the over one million members of Audubon. Yarnold comes to DC on a regular basis and it would be my hope the Office of the Secretary could accommodate such a meeting during one of the upcoming visits. Currently, Yarnold's schedule for DC includes the following dates and time slots:

February 14th: He arrives at 1pm on 14th at DCA. Free remainder of the day.

February 16th: 10:15 am to 1 pm. We have Hill meetings scheduled but could be flexible. Departs to NYC at 2pm

February 27th: 1 pm to 6 pm.

February 28th: Flexible during the day.

Your consideration and attention to this request is greatly appreciated.

Thanks,

Gregg

---

See this story from the Associated Press on the border wall and Lower Rio Grande. It has a rather interesting line from a local resident "Santa Ana was spared, but nothing else was."

(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP

FYI - the Park Service had this issue raised with them, but apparently dropped for now.

NATIONAL

On the lower Rio Grande, a glimpse at the border Trump wants

By NOMAAN MERCHANT and JOHN L. MONE Associated Press APRIL 16, 2018 — 4:08PM

ROMA, Texas — Stymied by Congress and the courts, President Donald Trump has struggled to make good on his signature campaign promises to build a wall and stop migrants. But there is at least one place where his vision is becoming reality: the sinuous lower Rio Grande Valley, scene of more unauthorized crossings than any other stretch between the Pacific Ocean and the Gulf of Mexico.

This week, as Texas National Guard troops were taking up positions on the state's southern edge at Trump's request, the head of U.S. Customs and Border Protection told lawmakers that the agency hopes to award contracts by September for border wall construction near where the Rio Grande meets the Gulf. And the U.S. government's efforts to identify and begin the seizure of private land along the river "are well underway," CBP Commissioner Kevin McAleenan told a congressional subcommittee Thursday.

Last month, Congress rejected Trump's request for up to $25 billion to build the full length of his coveted wall, but he did win funding for 33 miles (53 kilometers) of barriers in the Rio Grande Valley.

(http://stmedia.startribune.com/images/TRUMP_BORDER_WAL
JOHN MONE, ASSOCIATED PRESS

In this April 10, 2018, file frame from video, a National Guard troop watches over Rio Grande River on the border in Roma, Texas.

And while the Guard will eventually withdraw, a wall could change the region forever.

This stretch of border is the only place where the National Guard is deployed and where Congress funded the construction of new walls, instead of replacing or fortifying existing barriers.

The current plans call for up to 25 miles (40 kilometers) of construction in Hidalgo County, which includes the city of McAllen and already has segments of stop-and-start border fencing, some of it installed well north of the river.

The remaining construction would go in Starr County, further west. CBP last year issued a map that marked off several cities in the county for construction, including Roma and Rio Grande City.

Roma was built on the bluffs overlooking the Rio Grande and Ciudad Miguel Aleman on the southern side of what Mexicans call el Rio Bravo del Norte — the furious river of the north. From the bluffs, visitors can hear roosters clucking in Miguel Aleman and see schoolchildren and traffic crossing a tiny bridge.

A group of Guard members this month set up below the bluffs, with rifle-carrying soldiers holding binoculars and peering south over the river.

Trump says the Guard is necessary to guard the border until the wall can be built across the U.S.-Mexico border. His administration and Texas Gov. Greg Abbott, a fellow Republican, have cited a recent increase in the number of border crossings and what they say are more smugglers and gang members trying to enter the United States.

Many people who live on the American side of the river see the situation differently. They say their communities are safe from the cartel-linked violence that has ravaged northern Mexico. And many border crossers entering the U.S. turn themselves in and try

to seek asylum. They include thousands of adults and children fleeing violence and instability in Central America.

Scott Nicol, a longtime valley resident who is co-chair of the Sierra Club's Borderlands team, argued that both the Guard deployment and the wall fit into a mistaken national narrative that "everybody who lives here is part of one giant smuggling operation."

"If you go into a neighborhood and all the houses have burglar bars, you assume that neighborhood has a high burglary rate, instead of assuming there's a really good burglar bar salesman," Nicol said.

Nicol and other advocates are particularly worried about the lasting damage building a wall could do.

In some places, CBP wants to clear forests and brush to install roads and lighting. Advocates say that could destroy critical habitats and speed up erosion. A wall could potentially restrict the movement of animals and plant seeds.

Depending on how it's built, a wall could also make the region more susceptible to flooding. In a natural disaster, it might push more water into Mexico, a potential violation of a treaty between the two countries.

It would also seal off many border cities from the region's defining cultural and economic feature.

"The river is basically everything," said Jim Chapman, another local resident who is part of the group Friends of the Wildlife Corridor. "It sustains the human population and it sustains much of the wildlife."

In places like the Santa Ana National Wildlife Refuge, a dirt trail still leads visitors over a river levee and through a verdant forest with butterflies and birds. The trail ends at the north bank of the river.

CBP officials originally wanted to start construction on the Santa Ana levee, in part because the land is already owned by the government and the U.S. Department of Homeland Security can waive environmental reviews to build a wall. But Congress' March funding bill prohibits any construction in Santa Ana.

The agency has not said where it would start now. But advocates worry that to start construction sooner, CBP would target other refuge lands, including a collection of properties purchased over four decades known as the Lower Rio Grande Valley National Wildlife Refuge. Other environmentally sensitive areas like the National Butterfly Center also sit in the wall's potential path.

"Santa Ana was spared, but nothing else was," Chapman said.

Trump became the third U.S. president in a row to deploy the National Guard to the border. The law enforcement presence in South Texas aside from the Guard has grown steadily. The Border Patrol employs around 3,000 agents in the Rio Grande Valley, roughly eight times the number in 1992.

One former Guard member in a previous border security mission thinks the Guard can still help, but he questions the need for a border wall.

David Scott Kennedy served on the border as an Army National Guard member during Operation Jump Start, launched by former President George W. Bush in 2006. Kennedy was assigned to the McAllen area, watching border traffic and alerting Border Patrol agents when people were trying to cross. Sometimes he confronted them himself with the word "alto," Spanish for "stop."

In a recent interview, Kennedy said he still had fond memories of the agents he met and also gained a new respect for the struggles of migrants trying to cross the river. He said he supports the new Guard deployment, calling it a "fantastic idea."

But he said he laughs at the idea of a border wall.

"They'll find a way to get across," Kennedy said. "The border wall is, in my opinion, a waste of money. We should be doing other things."

Subject: Flexibility in FWS construction account

All,

The question has been posed as to the authority and the ability of FWS to use some of its FY 18 construction appropriations account funding to build resource protection structures along the US Mexican border. Apparently there is a 2 mile stretch of land in Texas that is in question.

Jean, can you please schedule a meeting on this topic with POB, FW&P, FWS, and (b)(6), (b)(7)(C) ?

Thanks,
Scott

Sorry if I was confusing. I intended them to be 2 separate papers, or at least to separate the argument clearly. The Santa Ana provision is all that is needed to say we cant do anything there. The other arguments apply to places other than Santa Ana - if for example they want to build a wall at Lower Rio Grande. I'm not sure that is clear in this version.

Draft

COMMITTEE ON THE JUDICIARY
SUBCOMMITTEE ON REGULATORY REFORM, COMMERCIAL AND ANTITRUST LAW

QUESTIONS FOR THE RECORD TO
JEFFREY H. WOOD
ACTING ASSISTANT ATTORNEY GENERAL
ENVIRONMENT AND NATURAL RESOURCES DIVISION

Questions submitted for the Record from Subcommittee Chairman Marino

1. According to a 2013 report by the Chamber of Commerce, six sue-and-settle regulations under the Clean Air Act and the Clean Water Act impose up to $101 billion in annual costs. These include the Utility MACT rule and Reconsideration of 2008 Ozone NAAQS. Does DOJ factor the potential cost impacts of its settlements into its decisions over whether and how to craft settlements?

RESPONSE: (b) (5) [redacted]

consideration of costs.

Questions submitted for the Record from Judiciary Ranking Member John Conyers, Jr.

1. In your prepared statement, you describe certain "course corrections in key areas within the purview" of your Division. One of these directives pertains to reducing regulatory burdens with regard to energy development. How is this directive compatible with the Administration's apparent priority to protect clean air and clean water? If the Obama Administration's Clean Power Plan were implemented, would that have helped to protect clean air and reduce global warming?

RESPONSE: (b) (5) [redacted]

2. What are your views about the Endangered Species Act?

RESPONSE: (b) (5) [redacted]

Questions submitted for the Record from Subcommittee Ranking Member Cicilline

1. In your written testimony, you state that your Division will be involved in the property

condemnation process necessary to construct the Southwest Border Wall.

RESPONSE: (b) (5) [redacted]

2. How many miles of Border Wall will need to be built? How many private properties will be needed to be confiscated for this project?

RESPONSE: (b) (5) [redacted]

3. How do you anticipate the Division's condemnation activity related to the Border Wall to affect low-income individuals, ranchers, or other persons who live along the border?

RESPONSE: (b) (5) [redacted]

4. Will the Border Wall impinge on any environmentally sensitive areas or impact any endangered species? If so, will construction of the Border Wall trump these environmental concerns?

RESPONSE: (b) (5) [redacted]

5. Will the ENRD comply with the National Environmental Policy Act, the Endangered

Species Act, and other applicable environmental protection statutes while acquiring privately owned lands for the purpose of constructing the Border Wall?

RESPONSE: (b) (5) [redacted]

Questions submitted for the Record from Ms. Pramila Jayapal

1. Since 2008, climate scientists in peer-reviewed research have recommended reducing atmospheric CO2 concentrations to 350ppm or less in order to avoid extreme risks of harm to current and future generations and irreversible climate change impacts, like sea level rise and species extinction. Since then, the two degree Celsius level of global warming above the preindustrial global average temperature was selected as a politically achievable target through the United Nations Framework Convention on Climate Change. How are you working within your division and with other agencies to ensure that this goal is met in order to prevent the negative public health and environmental impacts of climate change?

RESPONSE: (b) (5) [redacted]

Question#:	25
Topic:	Environmental Impact
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Mazie Hirono
Committee:	JUDICIARY (SENATE)

Question: According to the Fish and Wildlife Service, at least 89 endangered or threatened species, 108 species of migratory bird, and four national wildlife refuges could potentially be affected by activities along the border region.

Has CBP reviewed the environmental harms to wildlife, wildlands, and waterways that would be done by construction and maintenance of a border wall?

Response: (b)(5) [redacted]

[redacted]

Question: Does CBP have a plan in place to mitigate the damage done to the environment?

Response: (b) (5) [redacted]

Question#:	25
Topic:	Environmental Impact
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Mazie Hirono
Committee:	JUDICIARY (SENATE)

Question#:	1
Topic:	Border Apprehensions
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Charles E. Grassley
Committee:	JUDICIARY (SENATE)

Question: President Obama's lenient policies acted as a pull factor for illegal migration to the United States. People knew that they would unlikely be removed if they crossed the border. Thus, people were more willing to take the risk and come to the United States illegally under the Obama Administration.

Policies have changed under President Trump. The word is getting out that the United States is no longer going to tolerate illegal entry. If you enter the country illegally, you will be detained and you will be removed. This has forced Coyotes to raise their prices, according to one source, from $3,500 to $8,000. Additionally, would be illegal immigrants are deciding that their chances of success are not worth the risk.

The result has been a significant decrease in illegal migration in President Trump's first four months. In February, border apprehensions dropped by 35 percent from February 2016, March apprehensions dropped by 67 percent from March 2016, and April apprehensions have dropped 29 percent from April 2016.

Do you agree that President Trump's return to normal enforcement policies is a major reason for the decrease in border apprehensions and illegal entry to the United States?

Response: (b) (5)

[redacted]

Question#:	1
Topic:	Border Apprehensions
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Charles E. Grassley
Committee:	JUDICIARY (SENATE)

(b) (5)

[redacted]

Question#:	2
Topic:	Drug Trafficking
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Charles E. Grassley
Committee:	JUDICIARY (SENATE)

Question: Last May, Brandon Judd, President of the National Border Patrol Council, testified that the Mexican drug cartels controlled illegal activity along the Southern border, including the trafficking and smuggling of people and drugs. He said that 174,000 individuals who were apprehended in the Rio Grande Valley had all paid the Gulf Cartel around $5,000 to be smuggled into the U.S.

Mr. Judd also testified that Drug cartels were not making money off of only smuggling people, but creating holes in the border for easier drug trafficking. Instead of having illegal immigrants turn themselves in, they would cross illegally and continue going, to force Border Patrol to chase after them. This created holes in the border that the drug traffickers used to bring drugs through.

Are you seeing a decrease in drug trafficking at the Southern Border with the decrease in illegal migration?

Response: (b) (5) [redacted]

(b) (5) [redacted]

Question#:	2
Topic:	Drug Trafficking
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Charles E. Grassley
Committee:	JUDICIARY (SENATE)

(b) (5) [redacted]

Question#:	3
Topic:	Border Security Measures
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Charles E. Grassley
Committee:	JUDICIARY (SENATE)

Question: Our current law provides a lot of authorities that, if used, would secure our borders. In fact, the current administration's focus on the border security and immigration enforcement has already reduced illegal immigration significantly. In February, border apprehensions dropped by 35 percent from February 2016. March apprehensions dropped by 67 percent from March 2016.

Could you please explain what authorities you have under current law to secure the border and enforce our immigration laws?

Response: (b) (5) [redacted]

Question: Is any new legislation necessary to help your agency better enforce the law, or is this really just a matter of resources?

Response: (b) (5) [redacted]

Question#:	4
Topic:	Hiring Practices
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Charles E. Grassley
Committee:	JUDICIARY (SENATE)

Question: President Trump required DHS Secretary Kelly to hire 5,000 additional Border Patrol Agents in his executive order on Border Security and Immigration Enforcement Improvements. But in 2016 CBP's Assistant Commissioner of Human Resources testified that the agency was just "treading water" in terms of hiring. Years of under-funding has created a chronic cycle: the very lengthy hiring process, averaging 460 days, makes it impossible to overcome attrition, which is high because of low morale, and low morale is exacerbated by understaffing. It is not clear how CBP will be able to overcome these serious obstacles to increase staffing as President Trump demands.

One specific hiring problem has been with polygraphs. Records indicate that somewhere around sixty-five to seventy-five percent of CBP's applicants fail the polygraph test. I understand that some candidates show up with criminal records, and you aren't going to hire those individuals, but even some good candidates, who have prior law enforcement service, are not able to pass.

How many additional officers would you need to reach full operational control of the Southern border?

Response: (b) (5) [redacted]

Question: What can you do to expedite the hiring of new officers?

Response: (b) (5) [redacted]

Question#:	4
Topic:	Hiring Practices
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Charles E. Grassley
Committee:	JUDICIARY (SENATE)

(b) (5) [redacted]

Question: Why is CBP's polygraph so much harder to pass than other law enforcement polygraphs?

Response: (b) (5) [redacted]

Question#:	4
Topic:	Hiring Practices
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Charles E. Grassley
Committee:	JUDICIARY (SENATE)

- (b) (5) [redacted]

Question#:	5
Topic:	Need for Funding
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Charles E. Grassley
Committee:	JUDICIARY (SENATE)

Question: On February 20th, Secretary Kelly issued a memo that calls for enhanced enforcement of our immigration laws. It requires that immigrants be mandatorily detained, as required by the INA, it requires that parole be used only sparingly and only for significant humanitarian purposes and significant public benefit, as required by the INA, and it requires illegal entrants be returned to contiguous countries, as required by the INA. As I have mentioned already, these measures have already produced a reduction in illegal border crossings. The results of these actions shows that our current laws are sufficient to secure the border, what we need is funding. The Kelly memo asks for the hiring of 5,000 more border patrol agents and the building of a fence along the Southern Border, as required by the INA. These will require Congress to appropriate those funds.

How has CBP's workload increased in the last decade, and has CBP's funding been adequately increased in line with its workload?

Response: (b) (5)

Question#:	6
Topic:	Automated Entry and Exit Control System
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Charles E. Grassley
Committee:	JUDICIARY (SENATE)

Question: In 1996, Congress required the implementation of an automated entry and exit control system at all points of entry that would monitor people entering and exiting the U.S. Such a system would provide better monitoring of people in the U.S. on a nonimmigrant visa. Since 1996, Congress has repassed and reaffirmed the need for an automated exit and control system eight separate times.

Just this week, the Department of Homeland Security announced its calculation that 1.25 percent of people whose visa expired in 2016, are still in the country. Among those are 128,806, 0.6 percent, of people who participated in the Visa Waiver Program, but have not left the country. Another 79,818, or 5.48 percent of students and exchange visitors on an F,M, or J visa, have overstayed, of which 2.81 percent, or 40,949, are believed to still be in-country.

Is funding of an automated exit and entry control system a necessary tool to secure the border from visa overstays?

Response: (b) (5)

[redacted]

Question#:	7
Topic:	Uptick in Illegal Entry
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable John Cornyn
Committee:	JUDICIARY (SENATE)

Question: The number of border apprehensions has dropped significantly since January.

Are there any ports of entry or checkpoints where you have seen an uptick in illegal entry in light of stepped enforcement in other locations?

Response: (b) (5)

[redacted]

[redacted]

[redacted] (b) (5)

Question: Has DHS increased resources along the U.S. side of the Northern border in the more remote locations to help Canada stem the flow?

Response: (b) (5) [redacted]

Question#:	10
Topic:	Cross-border Law Enforcement Cooperation
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable John Cornyn
Committee:	JUDICIARY (SENATE)

Question: CBP has had a number of high profile seizures of drugs in the last few months (for example a recent seizure of liquid meth at the Hidalgo port of entry that had a street value of approximately $3.7 million).

CBP also has noted concerns with trafficking networks and Mexican transnational criminal organizations that control the majority of drug trafficking corridors, either directly or indirectly, mainly through the Tapachula Region of Mexico.

Has Mexican law enforcement been helpful in terms of interdicting drugs coming into the United or notifying U.S. officials of potential transit of illegal drugs?

Response: (b) (5) [redacted]

Question: If not, what is DHS doing to improve cross-border cooperation with Mexico to enhance our efforts to combat drug trafficking?

Response: (b) (5) [redacted]

(b) (5) [redacted]

Question#:	10
Topic:	Cross-border Law Enforcement Cooperation
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable John Cornyn
Committee:	JUDICIARY (SENATE)

(b) (5) [redacted]

Question: Do you think we need policy changes in our national intelligence priorities so that more national intelligence assets can be used to support the fight against these transnational criminal organizations?

Response: (b) (5) [redacted]

Question#:	11
Topic:	Department of Defense Aerostats
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable John Cornyn
Committee:	JUDICIARY (SENATE)

Question: We recently gave DHS funding to expand the use of government aerostats for surveillance on the Southern border. My understanding is that there are more than two dozen aerostats just sitting in Department of Defense (DoD) storage facilities that could be used for border security.

Is there an impediment to DHS securing these assets from DoD?

Response: (b) (5) [redacted]

Question: If not, when will DHS be able to acquire these assets and deploy them for use on the Southern Border?

Response: (b) (5) [redacted]

Question#:	12
Topic:	Restructuring
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable John Cornyn
Committee:	JUDICIARY (SENATE)

Question: There has been a lot of discussion about moving CBP's Air and Marine Operations under the Border Patrol to better support U.S. Border patrol in the field?

What are your thoughts about such a restructuring?

Do you think this would increase CBP efficiencies along the Southern border and better support the border security mission?

Response: (b) (5) [redacted]

Question#:	13
Topic:	Status of Current Hiring Efforts
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable John Cornyn
Committee:	JUDICIARY (SENATE)

Question: In his January 25 Executive Order, the President directed CBP to increase its workforce by 5,000 border patrol agents.

What is the status of CBP's current hiring efforts?

Response: (b) (5) [redacted]

Question: Has CBP been able to reallocate existing resources to the Southern border while it works towards increasing its current workforce?

Response: (b) (5) [redacted]

Question#:	13
Topic:	Status of Current Hiring Efforts
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable John Cornyn
Committee:	JUDICIARY (SENATE)

(b) (5) [redacted]

Question: When does CBP anticipate that all 5,000 new border patrol agents will be on board?

Response: (b) (5) [redacted]

Question#:	14
Topic:	Polygraph Requirement
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable John Cornyn
Committee:	JUDICIARY (SENATE)

Question: With the surge in hiring, some are concerned that CBP will "water down" or waive the mandatory polygraph requirement altogether. The New York Times published an article over the weekend highlighting "rogue" agents and criticism of the Administration for considering lowering hiring requirements.

Can you set the record straight and explain exactly what CBP's process limitations are as it relates to polygraphs?

Response: (b) (5) [redacted]

Question: There are a number of bills being considered that would allow CBP to hire veterans and other law enforcement personnel who have already had polygraphs administered by the military or their agencies. Do you think this change in hiring criteria will help CBP?

Question#:	14
Topic:	Polygraph Requirement
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable John Cornyn
Committee:	JUDICIARY (SENATE)

(b) (5)

[redacted]

(b) (5)

Question#:	15
Topic:	Infrastructure Improvements
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable John Cornyn
Committee:	JUDICIARY (SENATE)

Question: It's no secret that the infrastructure at our ports of entry is aging and that CBP needs more funding to build new facilities and maintain existing ones. That is why I was glad to see additional appropriations provided to DHS to address facilities maintenance.

Which ports of entry along the Southern border has CBP prioritized for infrastructure improvements in FY 2017?

Response: (b) (5)

[redacted]

Question: Which infrastructure projects does CBP consider critical and is there any additional legislative action that we can take to help address these priority projects?

Response: (b) (5)

[redacted]

Question#:	15
Topic:	Infrastructure Improvements
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable John Cornyn
Committee:	JUDICIARY (SENATE)

(b) (5)

(b) (5)

[redacted]

(b) (5)

Question#:	17
Topic:	Assaults on CBP Officers
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable John Cornyn
Committee:	JUDICIARY (SENATE)

Question: Earlier this month, the DHS Office of Inspector General was asked to review the number of assaults on CBP officers in the past 2 fiscal years.

What steps has CBP taken to better protect officers on the front line, especially on the Southern border?

Response: (b) (5) [redacted]

Question#:	18
Topic:	Agriculture
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable John Cornyn
Committee:	JUDICIARY (SENATE)

Question: When you mention border security, most people think only of pedestrian, passenger vehicle, or commercial truck traffic crossing into our POEs. But another component of CBP's job is to protect homeland from dangerous pests, animals, and other prohibited agricultural products that could do huge damage to our farmland. I see CBP has had successes with intercepts of this kind.

How is CBP currently resourced at the ports of entry to inspect incoming produce, livestock, and other plant life?

Response: (b) (5)

[redacted]

(b) (5)

Question#:	18
Topic:	Agriculture
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable John Cornyn

Committee:	JUDICIARY (SENATE)

(b) (5)

[redacted]

Question#:	20
Topic:	Travel Waivers
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Amy Klobuchar
Committee:	JUDICIARY (SENATE)

Question: The President's revised executive order targeting the refugee admissions program and banning travel from certain Muslim-majority countries authorizes U.S. Customs and Border Protection to make waivers in certain cases, including when denying entry would cause "undue hardship" and when the person's entry would be "in the national interest."

Although federal courts have blocked the implementation of this order, I would like to hear from you on how U.S. Customs and Border Protection would define the terms "undue hardship" and "in the national interest" with respect to processing these waivers?

Response: (b) (5) [redacted].

Question: How would U.S. Customs and Border Protection evaluate and issue these waivers on a case-by-case basis if the order were to take effect?

Response: (b) (5) [redacted]

Question#:	21
Topic:	Road Maintenance
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Jeff Flake
Committee:	JUDICIARY (SENATE)

Question: I generally hear positive reports from Arizonans about the good work of the Border Patrol. However, one complaint that I am sure you are aware of is road maintenance; we often hear from ranchers and others that the Border Patrol utilizes local roads for surveillance, but is unable to maintain the same roads. I have since requested a GAO study on border road deterioration and maintenance and look forward to its results. The FY17 Appropriations provided funding for both border road maintenance ($22,400,000) and border road construction ($77,400,000).

I understand there are limitations for CBP with regard to border road maintenance, but how will you prioritize utilizing these funds to maintain border roads used heavily by the Border Patrol?

Response: (b) (5) [redacted]

Question: Another issue I often hear about is border access for your agents. Arizona's rough terrain and intermittent roads hinder the ability of agents to apprehend criminal border crossers or drug runners in a timely fashion. How will new funding for border roads improve this situation?

Response: (b) (5) [redacted]

Question: What else can Congress do to assist in these efforts?

Response: (b) (5) [redacted]

Question#:	21
Topic:	Road Maintenance
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Jeff Flake
Committee:	JUDICIARY (SENATE)

Question#:	22
Topic:	Consulting with Local Land Owners
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Jeff Flake
Committee:	JUDICIARY (SENATE)

Question: Local stakeholders in Arizona whom call the U.S.-Mexico border their home need to be consulted during the debate on securing the border. In fact, border ranchers and landowners have greatly helped my staff and me to better understand the situation on the border.

What efforts have been made to consult with local landowners during the discussions on the wall and border security generally?

Response: (b) (5) [redacted].

Question: How can Congress ensure that our constituents are heard by the Border Patrol and that their ideas and suggestions are taken under consideration?

Response: (b) (5) [redacted]

Question#:	22
Topic:	Consulting with Local Land Owners
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Jeff Flake
Committee:	JUDICIARY (SENATE)

Question#:	23
Topic:	Border Wall Land
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Mazie Hirono
Committee:	JUDICIARY (SENATE)

Question: Following the passage of the Secure Fence Act in 2006, the U.S. built nearly 700 miles of fencing along federal land in California and Arizona. In Texas, however, most of the land along the U.S.-Mexico border is privately owned. When the government attempted to take parts of that land, many owners sued. The government has spent years litigating the issues, and nearly 100 cases are still open. According to the Government Accountability Office, only about one-third of the land on which the President's proposed border wall would sit is owned by the federal government or Native American tribes.

Does DHS plan to use eminent domain to procure the land it needs to build the border wall?

Response: (b) (5) [redacted]

Question: How much is the government prepared to spend fighting landowners in court?

Response: (b) (5) [redacted]

Question: Is there guidance in place to determine the appropriate amount of "just compensation" to which landowners subject to eminent domain are constitutionally entitled?

Response: (b) (5) [redacted]

Question#:	23
Topic:	Border Wall Land
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Mazie Hirono
Committee:	JUDICIARY (SENATE)

(b) (5) [redacted]

[redacted]

Question#:	24
Topic:	Mexican Reimbursement
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Mazie Hirono
Committee:	JUDICIARY (SENATE)

Question: Is it the Administration's position that Mexico will reimburse the U.S. for the costs of litigation and compensation to landowners?

(b) (5) [redacted]

Question#:	25
Topic:	Environmental Impact
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Mazie Hirono
Committee:	JUDICIARY (SENATE)

Question: According to the Fish and Wildlife Service, at least 89 endangered or threatened species, 108 species of migratory bird, and four national wildlife refuges could potentially be affected by activities along the border region.

Has CBP reviewed the environmental harms to wildlife, wildlands, and waterways that would be done by construction and maintenance of a border wall?

Response: (b) (5)

[redacted]

Question: Does CBP have a plan in place to mitigate the damage done to the environment?

Response: (b) (5)

[redacted]

Question#:	25
Topic:	Environmental Impact
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Mazie Hirono
Committee:	JUDICIARY (SENATE)

Question#:	26
Topic:	Hiring Time Reductions
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Mazie Hirono
Committee:	JUDICIARY (SENATE)

Question: Recently, the Trump administration ordered the hiring of 5,000 additional border agents to be "assigned to duty stations as soon as practicable." However, given current hiring and retirement rates at CBP, it has been reported that it could take more than ten years to meet that goal. CBP has reduced the amount of time it takes to recruit and hire agents from an average of 469 days in January 2016 to 165 days in March 2017.

What changes has CBP made to reduce hiring times so dramatically since last year?

Response: (b) (5)

[redacted]

Question: Are agents today less thoroughly vetted than they were a year ago?

Response: (b) (5)

[redacted]

Question#:	26
Topic:	Hiring Time Reductions
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Mazie Hirono
Committee:	JUDICIARY (SENATE)

Question: If so, then how can we assure that these changes will not compromise standards or otherwise impact the quality of hires at CBP? If not, then why did CBP not make these changes sooner?

(b) (5)

(b) (5)

Question#:	27
Topic:	Vetting Process Compromised
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Mazie Hirono
Committee:	JUDICIARY (SENATE)

Question: Can you assure the Committee with complete certainty that CBP's recent efforts to reduce hiring times will not compromise our vetting process for CBP hires?

(b) (5)

Question#:	28
Topic:	Agents Still Needed
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Mazie Hirono
Committee:	JUDICIARY (SENATE)

Question: With border apprehensions at a 40 year low, and lower this year than they have been at comparable points in each of the last five years, does it make sense for us to pour resources into border personnel, infrastructure, and surveillance? Is there a coherent strategy for the use of these funds?

Response: (b) (5)

Question#:	29
Topic:	Turning Away Asylum Seekers
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Mazie Hirono
Committee:	JUDICIARY (SENATE)

Question: The nonpartisan international human rights organization Human Rights First recently reported that CBP agents have been unlawfully turning away asylum seekers at the Mexican border, citing the Administration's executive order on border security from earlier this year as a justification for doing so.

Are you aware of these reports of instances where CBP agents have wrongfully turned away asylum seekers at the Mexican border?

Response: (b) (5) [redacted]

Question: What is CBP doing, if anything, to investigate whether these reports are accurate and remedy these cases if they are?

Response: (b) (5) [redacted]

Ecological Services - Listing (Calvert, Simpson, Cole, McCollum, Amodei, Stewart)

1. **How will the U.S. Fish and Wildlife Service prioritize its listing decisions with the proposed spending cuts for the ESA Listing Program? What impact will the reduction have on the Service's ability to meet statutory deadlines that could result in increased litigation if those deadlines are missed?**

Response

(b) (5)

[redacted]

2. **Why is the Service proposing to remove the listing subcaps?**

[redacted]

Border Wall *(Calvert, McCollum, Stewart)*

19. How will the border wall affect threatened and endangered species and critical habitat along the US and Mexico border?

Response

(b) (5)

[redacted]

20. What role with the Service play in reviewing and advising construction plans?

Response

(b) (5)

[redacted]

Delta Smelt (Calvert)

21. What is the status of implementing the Water Infrastructure Improvement for the Nation Act (WIIN) provisions? In particular, what is the status of the production of hatchery-raised Delta smelt?

Response

(b) (5)

[redacted]

[redacted]

<u>Wolves</u> (Simpson, McCollum, Calvert, Stewart)

22. The Service determined that wolves are biologically recovered in the Western Great Lakes, yet a federal court recently held against the Service's delisting rule. What are the Service's next steps in light of this ruling? How are you ensuring that ranchers are not unduly burdened by unnecessary federal protections for these predators?

Response

(b) (5)

[redacted]

[redacted]

-

23. Wolves under state management in eastern WA and OR are managed by the states, but wolves in the western portions of those states remain federally endangered. How is Service working to reduce the confusion and uncertainty facing landowners in these states?

Response

(b) (5)

[redacted]

(b) (5) [redacted]

***Mexican Wolves* (Stewart, Calvert)**

24. The Service recently completed the revised recovery plan for Mexican Wolves. The Service's plan puts most of the responsibility for recovering these wolves on the United States, even though the vast majority of the Mexican wolf's historical range is in Mexico. What role does Mexico play in the recovery of this population?

Response

(b) (5) [redacted]

25. Has the Service conducted genetic testing and made a determination that Mexican wolves qualify as a listable entity under the ESA?

Response

(b) (5) [redacted]

***Red Wolves* (McCollum)**

26. What are the Service's next steps for Red Wolf recovery?

Response

(b) (5) [redacted]

(b) (5) [redacted]

27. Has the Service conducted genetic testing and made a determination that red wolves qualify as a listable entity under the ESA?

Response

(b) (5) [redacted]

Utah Prairie Dog (Stewart, Calvert)

28. How can the Service improve efforts to accelerate the recovery of the Utah Prairie Dog? What is the Service doing to ensure stability for development activities?

Response

(b) (5) [redacted]

American Burying Beetle (Cole, Stewart)

29. What is the status of the Service's ESA status review and conservation plan for the American Burying Beetle?

Response

(b) (5) [redacted]

(b) (5) [redacted]

30. Mitigation for the American burying beetle is costly and the Service has already missed the deadline on a decision whether to delist the beetle. What should I tell my constituents who are deciding whether or not they should wait to start important infrastructure projects?

Response

(b) (5) [redacted]

Prebles and New Mexico Jumping Mice (Calvert)

31. What is the status of the Preble's Meadow Jumping Mouse?

Response

(b) (5) [redacted]

32. What is the status of the New Mexico Meadow Jumping Mouse?

Response

(b) (5) [redacted]

(b) (5)

[redacted]

Grizzly Bears (Simpson, McCollum, Udall, Calvert)

33. Several environmental groups are litigating the final delisting of grizzly bears in the Greater Yellowstone Ecosystem. Can you update us on that litigation and what it means for grizzly bear management in the GYE and the rest of the lower 48?

Response

(b) (5)

[redacted]

34. FWS recently had a public comment period on the delisting of the Grizzly Bear. What is the timeline for finalizing delisting of the Yellowstone population of Grizzly Bears? Please describe the transition process from Federal protection to state management of grizzlies in affected populations.

Response

(b) (5)

[redacted]

[redacted]

-

35. In December the Service solicited public comments on how the Western Great Lakes wolf court ruling affects the Greater Yellowstone Ecosystem grizzly DPS. What does this mean for grizzly bear management now and in the future?

Response

(b) (5)

[redacted]

Canada Lynx

36. Recently, the Service released a species status review for Canada lynx that suggests this species may be recovered. What are the findings of the review, and what are the next steps?

Response

(b) (5)

[redacted]

(b) (5) [redacted]

Dusky Gopher Frog

37. In light the question now before the Supreme Court, in Weyerhauser v. US Fish and Wildlife Service, does this Administration interpret the ESA to authorize the Service to designate private lands as "critical habitat" when it is not inhabited by the species and cannot supply suitable habitat without a radical change in land use?

Response

(b) (5) [redacted]

White-nose Syndrome (McCollum)

38. WNS continues to spread rapidly and is reported in 31 states and five Canadian provinces. Has this Administration slowed the effort to control the spread of this disease? If so, how does the Service envision addressing the devastation of affected bat species with its proposed reduction in funds?

Response

(b) (5) [redacted]

Environmental Response and Restoration

39. How will the U.S. Fish and Wildlife Service prioritize its spill response and natural resource damage assessment and restoration with the proposed spending cuts for the Environmental Response and Restoration Program?

Response

(b) (5)

[redacted]

40. Environmental Response and Restoration Program supports various priorities for the Secretary of the Interior, how may these priorities be affected with the proposed spending cuts?

Response

(b) (5)

[redacted]

41. The Service's Environmental Response and Restoration is premised on partnership with other Federal Agencies, States, and Tribes. What steps will the Service take to facilitate these partnerships?

Response

(b) (5)

[redacted]

(b) (5)

OCL Report with Notes

Hausman, Alyssa <alyssa_hausman@fws.gov> Fri, Jan 19, 2018 at 9:07 AM
To: Martin Kodis <martin_kodis@fws.gov>
Cc: Merra Howe <marian_howe@fws.gov>

Hi Marty,

I added notes to ES items in the weekly report and added a blurb on the TX hornshell listing since R2 wants to call members.

Let me know if you want any more info for your OCL meeting.

Also, no Elizabeth Mabry call scheduled yet, but I'll add Micah to the call invite and add you as well as an FYI.

Management Team
March 27, 2018

Thank You To:

- Kathy Korte, Rich Johnston and Zach Arnold for providing additional security for the Internal Wildlife Conservation Council (IWCC) meeting at the Main Interior Building on March 16.
- San Diego National Wildlife Refuge, CA, for hosting a memorable three-day meeting last week, including field trips, for the four funded Urban Wildlife Refuges.
- (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP
- Anna Fisher, Division of Refuge Law Enforcement, and the Division of Visitor Service and Communications for continued efforts to promote Refuge Law Enforcement. These activities were recognized by the Deputy Assistant Secretary for Law Enforcement during a Department of the Interior meeting on Refuge Law Enforcement.
- Samantha Fleming for her work to prepare background packages for the Division of Refuge Law Enforcement's National Hire Program candidates.
- Jo Ann Clark for her help in coordinating, prepping and participating in the Office of Federal Lands Highway transportation bill listening session in Atlanta last week. Also thanks to everyone who attended and represented the Service: Conrad Lamar, Steve Jackson, Keith Westlake and Carolyn Johnson.
- Dan Murphy from the Chesapeake Bay office for hosting staff from the Coastal & Marine Program and the National Wetlands Inventory. Dan showed the team several Coastal Wetland Grants and Coastal Program projects, including a nine-acre pollinator planting project that has been recently expanded to 25 acres with the support of the landowner. Also thank you to Marnie Pepper and Lisa Burh for sharing with team the work being done on nutria eradication.

Shaun Sanchez, Deputy Chief, National Wildlife Refuge System

- Cynthia Martinez is on leave this week and will be back on Monday.
- I spent yesterday at NCTC with our Wage Grade Academy.
- I'm in the office this week except for Thursday afternoon and Friday, March 29-30, when I'll be on leave.
- Monday through Thursday, April 2-5, I'm traveling to Boise, ID, to meet with our folks at the Fire Center.
- This is Jason Larrabee's last week as the Principal Deputy Assistant Secretary for Fish, Wildlife, and Parks. Bringing Monday, April 2, Susan Combs will be the Acting Assistant Secretary for Fish, Wildlife, and Parks.

Noah Matson, Acting Chief, Division of Natural Resources and Conservation Planning.

- More than 30 people participated in a three-day virtual Inventory and Monitoring Plan Workshop. The workshop included presentations from all regions on their innovations and challenges developing these plans. Peter Dratch was among the workshop organizers; follow-up related webinars are anticipated.

- (b)(5) DPP(b)(5) DPP(b)(5) DPP(

Devin Helfrich, Office of Congressional and Legislative Affairs

- The Keep our Refuges Operational Act, HR 3979, is expected to move in the Senate soon.
- Two highlights from the Omnibus appropriations action:
  - **Santa Ana National Wildlife Refuge**, TX, funding prohibition language included in the FY18 omnibus appropriations act: *"(c) None of the funds provided in this or any other Act shall be obligated for construction of a border barrier in the Santa Ana National Wildlife Refuge."*
  - **Green River National Wildlife Refuge**, KY, establishment language included in the FY18 omnibus Joint Explanatory Statement: *"The agreement directs the Service to approve the establishment of the Green River National Wildlife Refuge in the Green River Bottoms area near the confluence of the Green River and Ohio River in Henderson County, Kentucky. The refuge should consist of approximately 24,000 acres - to be acquired from willing landowners. The Service should partner with other stakeholders on establishment of the refuge and look for opportunities related to environmental mitigation for interstate bridge construction projects in the area. The Service is directed to wait to establish final boundaries of the refuge until the new 1-69 interstate bridge corridor is selected. Within 120 days of the date of enactment of this Act, the Service is directed to report to the Committees on its progress toward establishment of the refuge."*

Ron Salz, Chief Cartographer

- Bridget Flanders-Wanner of Region 1 and Mark Pelz of Region 8 are taking over for the recently-retired Jan Taylor as liaisons between the Natural Resources Leadership Team (NRLT) and the Management Action GIS team.
- Karen Rank sent the hunt unit mapping work plan to Shaun Sanchez and Aaron Mize. Thank you to Karen, Dan Konzek, Allen Gilbert, Richard Easterbrook and Sean Killen.
- Peter Harms has started a project to scan all the historic (1936-2000) Annual Land reports. We will store them in ServCat and include access via the Realty SharePoint site.
- In January 2018 Executive Order 13821 was signed to streamline and expedite the siting of broadband facilities in rural America. The Office of the Assistant Secretary for Lands and Minerals (ASLM) is leading the effort for DOI. Aurelia Skipwith, Assistant Secretary for Fish and Wildlife and Parks, asked the DOI agencies to attend a briefing by BLM, which demonstrated their work to date. Ken Fowler and I attended. The meeting included reps from NPS, BIA, BLM and ASLM. Ken and I will follow up on the data request. We feel we are in good position to assist, with data from Land Records System, Cadastral GIS and the mapped constructed real property.

Linh Phu, S.O. 3356 National Coordinator

- R3 (Recruitment, Retention, Reactivation) cross-programmatic coordination meeting with Refuge System, Fish & Aquatic Resources, WSFR, NCTC, and Human Dimensions staff.
- Finalizing Association of fish and Wildlife Agencies (AFWA) e-newsletter article to introduce the chiefs of hunting and fishing.
- Working to finalize the SO 3347 Implementation Plan.

- I will be on annual leave Thursday-Friday, March 29-30.

Laura Whorton, Acting Chief, Branch of Transportation

- An $11 million Federal Lands Access Program grant was awarded to Nevada State DOT in partnership with the Service, which is providing a $1 million match, to construct safety improvements for vehicles turning into and exiting Pahranagat National Wildlife Refuge. In the past several years, there have been five crashes by vehicles accessing the refuge along with numerous near misses. Injuries have resulted. By leveraging funds and partnering with the state DOT, the Service will be able to complete this high priority safety project, which is projected to cost more than six times the Region 8 allocation for Federal Lands Transportation Program funds.

Janet Bruner, Acting Chief, Division of Realty

- (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP (b)(5) DPP

David Robinson, Deputy Chief, Division of Budget, Performance and Workforce

- For HQ Only: Deadline for contracts over $500,000 are due by March 30.
- Some training dates for the Basic Financial Assistance Course have changed. The new training schedule can viewed online.

Rob Miller, Chief, Division of Facilities, Equipment and Transportation

- Brad and Scott are at Pahranagat National Wildlife Refuge, NV, with Art Shine this week. They are testing the draft annual condition assessment (ACA) tool with the field to get a better understanding of the workload associated with the requirements, and get input from Art on content and phasing of the ACA tool.

Linda Walker, Chief, Division of Visitor Services and Communications

- Plans are underway for a meeting of regional visitor services chiefs and HQ visitor services staff on April 17-19 at NCTC.

Jana Newman, Acting Director, Natural Resource Program Center

- The Wildlife Health office provided an update during the pre-North American Wildlife and Natural Resources Conference Fish and Wildlife Health Committee call.
- We are celebrating the one-year anniversary of the eradication of the New World screwworm from the Florida Key deer. An after-action meeting will be held in April to determine lessons learned and improve wildlife disease response in the future.
- (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP (b)(5) DPP (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP

- The Medicine Lake Baseline Air Quality study has been initiated. Air monitors have been set up by the BLM contractor, Colorado State University. This phase of the study will run until September. Thanks to Medicine Lake Refuge, MT, for assistance and for hosting the air monitoring site.
- Danielle Ross-Winslow traveled to San Diego, CA, last week for a meeting with the four funded Urban Wildlife Refuges and others. There were wide-ranging discussion about the Urban Wildlife Conservation Program, including how it contributes to meeting Secretarial Orders; how to measure outcomes; and learning from the refuges' efforts in how to connect with communities.
- Mark Chase and Natalie Sexton are attending the North American Wildlife and Natural Resources Conference in Norfolk, VA, March 26-30.
- The Monarch Evaluation Workshop will be held at USGS in Fort Collins, CO, April 3-5.

Robert Eaton, Deputy Chief, Branch of Fire Management

- The National Preparedness Level is at a 1 (Low)**.** The Southern Area is at a PL 2 (Moderate). The Southwest Area and the Rocky Mountain Area are both at a PL 1 (Low).
- Gillian Fay, Branch of Fire Management budget officer, is on a six-week detail to the Office of Wildland Fire (Department of the Interior) as budget officer from March 4-April 14.
- Ted Mason represented the Branch of Fire Management at the National Fire Operations & Safety Team (NFOST) meeting last week at Carolina Sandhills National Wildlife Refuge, SC.
- I will be in Boise, ID, this week, meeting with staff and other Interagency Fire Partners. Service firefighters responded to 8 wildfires on Service lands last week in Wisconsin (Necedah and Horicon Refuges), Puerto Rico (Vieques Refuge), Georgia (Okefenokee and Harris Neck Refuges), Florida (St. Johns Refuge) and Kansas (Quivira and Marais des Cygnes Refuges). The Cottonwood Fire on the Quivira Refuge burned approximately 1,502 acres.
- Prescribed fires were conducted last week on 14 refuges in Regions 3, 4 and 6: Iowa, Port Louisa Refuge; Indiana, Big Oaks Refuge; Minnesota, Sherburne Refuge; Wisconsin, Necedah Refuge; South Carolina, Carolina Sandhills Refuge; Georgia, Piedmont Refuge; Mississippi, Sam D. Hamilton Noxubee and Mississippi Sandhill Crane Refuges; Florida, Merritt Island Refuge; and Utah, Bear River Migratory Bird Refuge. Total acreage burned approximately **11,504.**
- Committed Service resources on assignment as of March 26: approximately 44.
- "All Agencies" Fires and Acres as of Friday, March 23:

Calendar Year to Date:	Fires: 9,649	Acres: 393,814
10 Year Average to Date:	Fires: 10,045	Acres: 409,593

Martha Nudel, Division of Visitor Services and Communications

- Send me your items for the April *News from Washington* by this Friday, March 30, or early next week.
- You can see an Open Spaces blog about Alaska Refuge Law Enforcement Chief Jim Hjelmgren and his community relations program online.

Subject:	For Today"s Pre-Brief -- Practice Q&As
Date:	Monday, May 13, 2019 9:56:41 AM
Attachments:	HNR Budget Hearing Q and A.docx

Hi Gary,

For the hearing pre-brief with Margaret this afternoon, we plan to go over the attached practice Q&As. We'll focus on the ESA-related Q&As today, which are in the beginning of the doc (after a few general Qs).

We won't be doing a mock hearing, just reviewing the most high-profile Qs that we want to make sure we review and discuss. Feel free to jump in during the pre-brief with your thoughts on what is most important/anything you want to discuss and review with her. And of course we always value your feedback on the suggested answers.

In addition to CLA, Taylor Playforth from OCL will likely attend, as well as Melisa Beaumont and Chris Nolin.

Thanks again for joining us today!

Cheers,

Lisa

Briefing Paper for Departmental Clearance of Federal Register Documents

I. Title of document: 90-Day Finding on a Petition to Remove the Bone Cave harvestman (*Texella reyesi*) From the List of Endangered and Threatened Wildlife

II. Popular short name, if applicable: Bone Cave harvestman 90-day finding

III. DCN: FR 2890

IV. RIN (for rules) or notice tracking number (for notices): FWS-R2-ES-2017-0018

V. Summary: This is a 90-day finding addressing a petition to remove the endangered Bone Cave harvestman (occurring in Texas) from the Federal lists of endangered and threatened species. Based on our review and evaluation, we find that the petition does not present substantial scientific or commercial information indicating that delisting of the Bone Cave harvestman may be warranted.

VI. Is timing critical? ☒ Yes ☐No If yes, answer the following questions. If no, go to VII.

a. What is the target date for the FR document to clear DOI? 3/24/2017

b. What is driving the timing? A December 22, 2016, court order to submit the 90-day finding to the **Federal Register** by March 31, 2017.

c. What happens if the deadline is missed? We would be held in contempt of court for missing the court-ordered deadline.

VII. Background: On June 2, 2014, we received a petition from John Yearwood, Kathryn Heidemann, Charles and Cheryl Shell, the Walter Sidney Shell Management Trust, the American Stewards of Liberty, and Steven W. Carothers requesting that we remove the endangered Bone Cave harvestman from the Federal List of Endangered and Threatened Wildlife. On June 1, 2015, the Service published a 90-day finding in the **Federal Register** (80 FR 30990) that the petition did not present substantial scientific or commercial information indicating that the petitioned action was warranted. On December 15, 2015, the American Stewards of Liberty, Charles and Cheryl Shell, Walter Sidney Shell Management Trust, Kathryn Heidemann, and Robert V. Harrison, Sr. challenged the 2015 90-day finding in Federal district court. The Service sought the court's permission to reconsider the 90-day finding. On December 22, 2016, the court ordered the Service to complete a new 90-day finding and deliver that finding to the **Federal Register** on or before March 31, 2017. This 90-day finding supersedes the Service's June 1, 2015, finding and is made pursuant to the court's December 22, 2016, order, the 2014 petition, and additional reference materials.

INFORMATION MEMORANDUM FOR THE DIRECTOR

FROM: Gary Frazer, Assistant Director, Endangered Species

CC: Regional Director, Southwest Region

SUBJECT: 90-day finding: Petition to delist the Bone Cave harvestman

I. INTRODUCTION

We are making a not-substantial 90-day finding on a petition to delist the Bone Cave harvestman (*Texella reyesi*), an endangered species that occurs in Texas. This action is based on our review of the information provided in the petition and is a statutory requirement under the Endangered Species Act.

---

Hi All,

Region 8 agrees with your assessment (their note below)

I received the attached edits from R2. These are fairly general in nature and actually lessen the CBP's commitment for post-construction habitat conservation/restoration. I have doubts about the value of these edits considering that they need to go through Casey and Greg for review, but will defer to you all. Please let me know if you would like to move the attached comments forward.

Thanks,
Alyssa

> **R8 ARD**: Since this is really written from CBP point of view, I don't really have any edits. It does appear to be accurate based on our current understanding. I also called our solicitor who has been in on some recent conversations with DHS. We had heard previously that CBP may invoke a waiver of requirements for environmental laws (which would mean they are not required to do ESA/NEPA compliance, and probably not mitigate). She says that CBP has not yet invoked a waiver; they indicate that their current plans are to move forward with compliance.

I think they are using these terms in a broader sense (i.e., we don't own the word "consultation"), so I think it's probably not worth commenting on. But I wanted to flag it for senior management.

FYI... they do mention IPaC.

Otherwise, no issues.

Craig

To: Jeff Newman <jeff_newman@fws.gov>, Craig Aubrey <craig_aubrey@fws.gov>

Hi Jeff and Craig,

The Department is circulating DHS QFRs from a recent hearing on southern border security. Questions 25 and 26 from Sen. Hirono (D-HI) discuss impacts to wildlife. Can you please take a look at those questions in the attached document and let me know if you have any concerns/proposed edits by COB today? I am also sending these to Regions 2 and 8.

Sorry for the tight deadline, and thank you!

DEPARTMENT OF THE INTERIOR
LEGISLATIVE COUNSEL REFERRAL

Subject: **HRG #60 - DHS Questions for the Record from 5/23/17 Hearing**

Re: Building America's Trust Through Border Security: Progress on the Southern Border

Attached for review, please find draft DHS (CBP) QFRs from a May 23rd hearing before the Senate Judiciary Committee's Immigration Subcommittee, titled "Building America's Trust Through Border Security: Progress on the Southern Border."

Question#:	25
Topic:	Environmental Impact
Hearing:	Building America's Trust Through Border Security: Progress on the Southern Border
Primary:	The Honorable Mazie Hirono
Committee:	JUDICIARY (SENATE)

Question: According to the Fish and Wildlife Service, at least 89 endangered or threatened species, 108 species of migratory bird, and four national wildlife refuges could potentially be affected by activities along the border region.

Has CBP reviewed the environmental harms to wildlife, wildlands, and waterways that would be done by construction and maintenance of a border wall?

My thoughts, recognizing that it's Tues evening and the briefing for Greg is Thurs morning:

If this is too much to assimilate in the time available, I would suggest you do your best with Greg and then polish further before taking it to the next level. We really don't have time to postpone this briefing again. -- GDF

Subject: Ted: draft PP for your review

Hi Ted: attached is the draft PP for Thursday's Vidyo with HQ on the recovery plan. I have incorporated comments based on our pre-brief today. Amy asked that you and Gary Frazer also take a look at it and provide any comments back to me.

Thanks

Brad,

I just spoke with Chris Nolan on this request. Please see the below short-notice request for a Briefing Paper on the Service's flexibility to construct resource protection structures along the Texas border. Would your group take the lead on this. I have included Noah (resource protection structure aspect) and Janet (holdings and map aspect).

I will try to find any language in Service authorizations regarding the topic.

Thanks for the update.

Please work with Cynthia's team to prepare a BP on this issue so we can provide a thorough response back up the line through Greg so he has the comprehensive background. There will probably be a meeting with the political leadership team and the SOL team. On a tight deadline.

- State the request
- Analyze and address the question "does the FWS have the ability to use some of its FY 18 construction appropriations account funding to build resource protection structures along the US Mexican border?" ie what is our construction appropriations language, does this give us any flexibility for this purpose, are there any other laws, regs, or policies that allow this use of the account or forbid this use of the account?
- List all the NWR holdings along the border in Texas and include a map (to respond to the particular statement about a two mile stretch in Texas)
- Include the language from the Homeland Security Bill: "SEC 230. (c) None of the funds provided in this or any other Act shall be obligated for construction of a border barrier in the Santa Ana National Wildlife Refuge."

Brad,

I just spoke with Chris Nolan on this request. Please see the below short-notice request for a Briefing Paper on the Service's flexibility to construct resource protection structures along the Texas border. Would your group take the lead on this. I have included Noah (resource protection structure aspect) and Janet (holdings and map aspect).

I will try to find any language in Service authorizations regarding the topic.

DAVID C. ROBINSON
Deputy Chief
HQ NWRS Division of Budget, Performance, and Workforce

U.S. FISH AND WILDLIFE SERVICE HEADQUARTERS

Thanks for the update.

Please work with Cynthia's team to prepare a BP on this issue so we can provide a thorough response back up the line through Greg so he has the comprehensive background. There will probably be a meeting with the political leadership team and the SOL team. On a tight deadline.

- State the request
- Analyze and address the question "does the FWS have the ability to use some of its FY 18 construction appropriations account funding to build resource protection structures along the US Mexican border?" ie what is our construction appropriations language, does this give us any flexibility for this purpose, are there any other laws, regs, or policies that allow this use of the account or forbid this use of the account?
- List all the NWR holdings along the border in Texas and include a map (to respond to the particular statement about a two mile stretch in Texas)
- Include the language from the Homeland Security Bill: "SEC 230. (c) None of the funds provided in this or any other Act shall be obligated for construction of a border barrier in the Santa Ana National Wildlife Refuge."

On Tue, Apr 17, 2018 at 4:57 PM, Nolin, Chris <chris_nolin@fws.gov> wrote:

> I assume this is Santa Ana NWR? We don't have too many refuges on the border in Texas. If it is that, we have a specific provision against building a barrier there in the Homeland Security Bill: "SEC 230. (c) None of the funds provided in this or any other Act shall be obligated for construction of a border barrier in the Santa Ana National Wildlife Refuge."

Subject: Flexibility in FWS construction account

All,

The question has been posed as to the authority and the ability of FWS to use some of its FY 18 construction appropriations account funding to build resource protection structures along the US Mexican border. Apparently there is a 2 mile stretch of land in Texas that is in question.

Jean, can you please schedule a meeting on this topic with POB, FW&P, FWS, and (b)(6), (b)(7)(C) ?

Thanks,
Scott

Ok. David stopped in and said he was mainly wanting to see if we can check to see if there might be any policies or something in the CCP for Santa Ana that might prevent the construction. Sounds like he has others working the other components of the question, but the local on the ground management was his question....If it was legal, would there be something else that might be a barrier....

Thanks for the update.

Please work with Cynthia's team to prepare a BP on this issue so we can provide a thorough response back up the line through Greg so he has the comprehensive background. There will probably be a meeting with the political leadership team and the SOL team. On a tight deadline.

- State the request
- Analyze and address the question "does the FWS have the ability to use some of its FY 18 construction appropriations account funding to build resource protection structures along the US Mexican border?" ie what is our construction appropriations language, does this give us any flexibility for this purpose, are there any other laws, regs, or policies that allow this use of the account or forbid this use of the account?
- List all the NWR holdings along the border in Texas and include a map (to respond to the particular statement about a two mile stretch in Texas)
- Include the language from the Homeland Security Bill: "SEC 230. (c) None of the funds provided in this or any other Act shall be obligated for construction of a border barrier in the Santa Ana National Wildlife Refuge."

Subject: Flexibility in FWS construction account

All,

The question has been posed as to the authority and the ability of FWS to use some of its FY 18 construction appropriations account funding to build resource protection structures along the US Mexican border. Apparently there is a 2 mile stretch of land in Texas that is in question.

Jean, can you please schedule a meeting on this topic with POB, FW&P, FWS, and (b)(6), (b)(7)(C) ?

Thanks,
Scott

Hi all,

Attached is a draft response to this question. Thanks to Brad, Marilyn, (b)(6), (b)(7), and Ken for their input. Is anything missing? Not clear? Anything else? Ken is working on the map.

(b)(6), (b)(7), I didn't include the part about the levee that runs through the refuge potentially being owned by the International Border Wall Commission since our map didn't show that and our SAMMS records said we owned it. But if there's additional information we can point to that corrects our records, then we can add that part back in.

Thanks,

Laura

Thanks for the update.

Please work with Cynthia's team to prepare a BP on this issue so we can provide a thorough response back up the line through Greg so he has the comprehensive background. There will probably be a meeting with the political leadership team and the SOL team. On a tight deadline.

- State the request
- Analyze and address the question "does the FWS have the ability to use some of its FY 18 construction appropriations account funding to build resource protection structures along the US Mexican border?" ie what is our construction appropriations language, does this give us any flexibility for this purpose, are there any other laws, regs, or policies that allow this use of the account or forbid this use of the account?
- List all the NWR holdings along the border in Texas and include a map (to respond to the particular statement about a two mile stretch in Texas)
- Include the language from the Homeland Security Bill: "SEC

230. (c) None of the funds provided in this or any other Act shall be obligated for construction of a border barrier in the Santa Ana National Wildlife Refuge."

Subject:	Re: Flexibility in FWS construction account

All,

I believe we need to address the requirement for FWS to submit an operations plan for Congressional approval for the$50 million. This provides the option for FWS to request any projects. This goes against the appropriators intent since the funding is intended to address reported DM backlog. However, if we are submitting other projects that are full or partial capital improvement, we will have a tough time justifying why a these structures are different from the new construction requests in the 1002 area.

Thanks!

I agree that we should discuss the $50M since that seems to be the target.

Thank you for pulling this together!

Subject: Re: Flexibility in FWS construction account

The DHS budget language seems to prohibit any federal agency from building a barrier at Santa Ana, if that's what they're talking about. Otherwise, I'd be surprised if there's actual language that would prohibit us from spending construction dollars on a "resource protection barrier." The question is....why would we do that? Not our mission to construct vehicle or pedestrian barriers along the border, although I could envision a scenario where we might support vehicle barriers to protect sensitive areas. In fact we have at Cabeza and Buenos Aires (and San Bernardino too I think). Complicated question, but we have so many other needs for our limited construction dollars, I would not think its wise to spend it that way. But yes, definitely a Solicitor question.

Brad,

I just spoke with Chris Nolan on this request. Please see the below short-notice request for a Briefing Paper on the Service's flexibility to construct resource protection structures along the Texas border. Would your group take the lead on this. I have included Noah (resource protection structure aspect) and Janet (holdings and map aspect).

I will try to find any language in Service authorizations regarding the topic.

Thanks for the update.

Please work with Cynthia's team to prepare a BP on this issue so we can provide a thorough response back up the line through Greg so he has the comprehensive background. There will probably be a meeting with the political leadership team

and the SOL team. On a tight deadline.

- State the request
- Analyze and address the question "does the FWS have the ability to use some of its FY 18 construction appropriations account funding to build resource protection structures along the US Mexican border?" ie what is our construction appropriations language, does this give us any flexibility for this purpose, are there any other laws, regs, or policies that allow this use of the account or forbid this use of the account?
- List all the NWR holdings along the border in Texas and include a map (to respond to the particular statement about a two mile stretch in Texas)
- Include the language from the Homeland Security Bill: "SEC 230. (c) None of the funds provided in this or any other Act shall be obligated for construction of a border barrier in the Santa Ana National Wildlife Refuge."

Subject: Flexibility in FWS construction account

All,

The question has been posed as to the authority and the ability of FWS to use some of its FY 18 construction appropriations account funding to build resource protection structures along the US Mexican border. Apparently there is a 2 mile stretch of land in Texas that is in question.

Jean, can you please schedule a meeting on this topic with POB, FW&P, FWS, and Brent Range?

Thanks,
Scott

Thanks Laura.

The brief accurately cites the way forward if we need to make room in the FY 18 Construction Line-Item projects -- a Congressional reprogramming. If we pursue a Congressional then we should try to accommodate "bumped" projects in the $50 Construction-DM funding, to the extent that they are DM.

Subject: Re: Flexibility in FWS construction account

Hi all,

Attached is a draft response to this question. Thanks to Brad, Marilyn, Rod, and Ken for their input. Is anything missing? Not clear? Anything else? Ken is working on the map.

Rod, I didn't include the part about the levee that runs through the refuge potentially being owned by the International Border Wall Commission since our map didn't show that and our SAMMS records said we owned it. But if there's additional information we can point to that corrects our records, then we can add that part back in.

Thanks,

Laura

Subject: Flexibility in FWS construction account

All,

The question has been posed as to the authority and the ability of FWS to use some of its FY 18 construction appropriations account funding to build resource protection structures along the US Mexican border. Apparently there is a 2 mile stretch of land in Texas that is in question.

Jean, can you please schedule a meeting on this topic with POB, FW&P, FWS, and Brent Range?

Thanks,
Scott

I can also step out of my meeting in DC on Thursday to jump on a call if necessary.
Benjamin travels to HQ next Tuesday and may be available to meet or participate on a call from HQ.
Please let us know when you all would like to set up a call/meeting and one or both of us will do our best to participate even from the road.
Take care,
Joy

Hi all,

Attached is a draft response to this question. Thanks to Brad, Marilyn, (b)(6), (b)(7) (b)(6), (b)(7) (b)(6), (b)(7), and Ken for their input. Is anything missing? Not clear? Anything else? Ken is working on the map.

(b)(6), (b)(7) (b)(6), (b)(7) (b)(6), (b)(7), I didn't include the part about the levee that runs through the refuge potentially being owned by the International Border Wall Commission since our map didn't show that and our SAMMS records said we owned it. But if there's additional information we can point to that corrects our records, then we can add that part back in.

Thanks,

Laura

Thanks for the update.

Please work with Cynthia's team to prepare a BP on this issue so we can provide a thorough response back up the line through Greg so he has the comprehensive background. There will probably be a meeting with the political leadership team and the SOL team. On a tight deadline.

- State the request
- Analyze and address the question "does the FWS have the ability to use some of its FY 18 construction appropriations account funding to build resource protection structures along the US Mexican border?" ie what is our construction appropriations language, does this give us any flexibility for this purpose, are there any other laws, regs, or policies that allow this use of the account or forbid this use of the account?
- List all the NWR holdings along the border in Texas and include a map (to respond to the particular statement about a two mile stretch in Texas)
- Include the language from the Homeland Security Bill: "SEC 230. (c) None of the funds provided in this or any other Act shall be obligated for construction of a border barrier in the Santa Ana National Wildlife Refuge."

On Tue, Apr 17, 2018 at 4:57 PM, Nolin, Chris <chris_nolin@fws.gov> wrote:

> I assume this is Santa Ana NWR? We don't have too many refuges on the border in Texas. If it is that, we have a specific provision against building a barrier there in the Homeland Security Bill: "SEC 230. (c) None of the funds provided in this or any other Act shall be obligated for construction of a border barrier in the Santa Ana National Wildlife Refuge."

Subject: Flexibility in FWS construction account

All,

The question has been posed as to the authority and the ability of FWS to use some of its FY 18 construction appropriations account funding to build resource protection structures along the US Mexican border. Apparently there is a 2 mile stretch of land in Texas that is in question.

Jean, can you please schedule a meeting on this topic with POB, FW&P, FWS, and (b)(6), (b)(7)(C) ?

Thanks,
Scott

To: PIC-PIO@listserv.gsa.gov

PIOs,

This morning, the President's FY 2018 Budget Blueprint was sent to Congress. The FY18 Blueprint includes an outline of the Administration's management priorities to make the Federal government operate more effectively, efficiently, and securely. As discussed in the Blueprint (excerpt is attached) the forthcoming President's Management Agenda (PMA) will set goals and take action to ensure that by 2020 we will be able to say:

- Federal agencies are managing programs and delivering critical services more effectively.
- Federal agencies are devoting a greater percentage of taxpayer dollars to mission achievement rather than costly, unproductive compliance activities.
- Federal agencies are more effective and efficient in supporting program outcomes.
- Agencies have been held accountable for improving performance.

OMB is currently developing guidance for implementing the workforce reduction plan and

recently released government reorganization EO, which will be aligned with the budget and performance timelines over the coming year. We look forward to engaging with you in the coming weeks and months to establish reform priorities and measures to track progress.

Best,

Dustin

MANAGEMENT

Making Government Work Again

The Federal Government can—and should—operate more effectively, efficiently, and securely. For decades, leaders on both sides of the aisle have talked about the need to make Government work better. The President is taking bold action now to make Government work again for the American people.

As one of his first acts as President, on January 23, 2017, the President issued a memorandum imposing a Federal "Hiring Freeze" and requiring a long-term plan to reduce the size of the Federal Government's workforce. In addition, on March 13, 2017, the President signed Executive Order 13781 establishing a "Comprehensive Plan for Reorganizing the Executive Branch," which set in motion the important work of reorganizing executive departments and agencies. These two actions are complementary and plans should reflect both Presidential actions. Legislation will be required before major reorganization of the Executive Branch can take place, but the White House is best situated to review and recommend changes to the Congress. In roughly a year, the Congress will receive from the President and the Director of the Office of Management and Budget (OMB) a comprehensive plan for reorganization proposals. The White House will work closely with congressional committees with jurisdiction over Government organization to ensure the needed reforms actually happen.

Simultaneously, the Administration will develop the President's Management Agenda focused on achieving significant improvements in the effectiveness of its core management functions. The President's Management Agenda will set goals in areas that are critical to improving the Federal Government's effectiveness, efficiency, cybersecurity, and accountability. The Administration will take action to ensure that by 2020 we will be able to say the following:

1. **Federal agencies are managing programs and delivering critical services more effectively.** The Administration will take an evidence-based approach to improving programs and services—using real, hard data to identify poorly performing organizations and programs. We will hold program managers accountable for improving performance and delivering high-quality and timely services to the American people and businesses. We will use all tools available and create new ones as needed to ensure the workforce is appropriately prepared.

2. **Federal agencies are devoting a greater percentage of taxpayer dollars to mission achievement rather than costly, unproductive compliance activities.** Past management improvement initiatives resulted in the creation of hundreds of guidance documents aimed at improving Government management by adding more requirements to information technology (IT), human capital, acquisition, financial management, and real property. Furthermore, these Government-wide policies often tie agencies' hands and keep managers from making commonsense decisions.

As a result, costs often increase without corresponding benefits. The Administration will roll back low-value activities and let managers manage, while holding them accountable for finding ways to reduce the cost of agency operations. As part of this effort, OMB will review requirements placed on agencies and identify areas to reduce obsolete, low-value requirements.

3. **Federal agencies are more effective and efficient in supporting program outcomes.** Delivering high-performing program results and services to citizens and businesses depends on effective and efficient mission support services. However, despite years of efforts to improve these critical management processes, managers remain frustrated with hiring methodologies that do not consistently bring in top talent, acquisition approaches that are too cumbersome, and IT that is outdated by the time it is deployed. The Administration will use available data to develop targeted solutions to problems Federal managers face, and begin fixing them directly by sharing and adopting leading practices from the private and public sectors. Among the areas that will be addressed are how agencies buy goods and services, hire talent, use their real property, pay their bills, and utilize technology.

4. **Agencies have been held accountable for improving performance.** All Federal agencies will be responsible for reporting critical performance metrics and showing demonstrable improvement. OMB will also regularly review agency progress in implementing these reforms to ensure there is consistent improvement.

Through this bold agenda, we will improve the effectiveness, efficiency, cybersecurity, and accountability of the Federal Government and make government work again.

GENERAL NOTES

1. All years referenced for economic data are calendar years unless otherwise noted. All years referenced for budget data are fiscal years unless otherwise noted.
2. At the time of this writing, only one of the annual appropriations bills for 2017 had been enacted (the Military Construction and Veterans Affairs Appropriations Act), as well as the Further Continuing and Security Assistance Appropriations Act, which provided 2017 discretionary funding for certain Department of Defense accounts; therefore, the programs provided for in the remaining 2017 annual appropriations bills were operating under a continuing resolution (Public Law 114-223, division C, as amended). For these programs, references to 2017 spending in the text and tables reflect the levels provided by the continuing resolution.
3. Details in the tables may not add to the totals due to rounding.

AMERICA FIRST

Beginning a New Chapter of American Greatness

A MESSAGE TO THE CONGRESS OF THE UNITED STATES:

The American people elected me to fight for their priorities in Washington, D.C. and deliver on my promise to protect our Nation. I fully intend to keep that promise.

One of the most important ways the Federal Government sets priorities is through the Budget of the United States.

Accordingly, I submit to the Congress this Budget Blueprint to reprioritize Federal spending so that it advances the safety and security of the American people.

Our aim is to meet the simple, but crucial demand of our citizens—a Government that puts the needs of its own people first. When we do that, we will set free the dreams of every American, and we will begin a new chapter of American greatness.

A budget that puts America first must make the safety of our people its number one priority—because without safety, there can be no prosperity.

That is why I have instructed my Budget Director, Mick Mulvaney, to craft a budget that emphasizes national security and public safety. That work is reflected in this Budget Blueprint. To keep Americans safe, we have made tough choices that have been put off for too long. But we have also made necessary investments that are long overdue.

My Budget Blueprint for 2018:

- provides for one of the largest increases in defense spending without increasing the debt;
- significantly increases the budget for immigration enforcement at the Department of Justice and the Department of Homeland Security;
- includes additional resources for a wall on the southern border with Mexico, immigration judges, expanded detention capacity, U.S. Attorneys, U.S. Immigration and Customs Enforcement, and Border Patrol;
- increases funding to address violent crime and reduces opioid abuse; and
- puts America first by keeping more of America's hard-earned tax dollars here at home.

The core of my first Budget Blueprint is the rebuilding of our Nation's military without adding to our Federal deficit. There is a $54 billion increase in defense spending in 2018 that is offset by targeted reductions elsewhere. This defense funding is vital to rebuilding and preparing our Armed Forces for the future.

We must ensure that our courageous servicemen and women have the tools they need to deter war, and when called upon to fight, do only one thing: Win.

In these dangerous times, this public safety and national security Budget Blueprint is a message to the world—a message of American strength, security, and resolve.

This Budget Blueprint follows through on my promise to focus on keeping Americans safe, keeping terrorists out of our country, and putting violent offenders behind bars.

The defense and public safety spending increases in this Budget Blueprint are offset and paid for by finding greater savings and efficiencies across the Federal Government. Our Budget Blueprint insists on $54 billion in reductions to non-Defense programs. We are going to do more with less, and make the Government lean and accountable to the people.

This includes deep cuts to foreign aid. It is time to prioritize the security and well-being of Americans, and to ask the rest of the world to step up and pay its fair share.

Many other Government agencies and departments will also experience cuts. These cuts are sensible and rational. Every agency and department will be driven to achieve greater efficiency and to eliminate wasteful spending in carrying out their honorable service to the American people.

I look forward to engaging the Congress and enacting this *America First Budget*.

Donald J. Trump

A Message from the Director, Office of Management and Budget

I am proud to introduce the "America First" Budget.

While recognizing this Blueprint is not the full Federal budget, it does provide lawmakers and the public with a view of the priorities of the President and his Administration.

The Federal budget is a complex document. However, working for a President committed to keeping his promises means my job is as simple as translating his words into numbers.

That is why you will find here a familiar focus on rebuilding and restoring our Nation's security. Under the Obama Administration, our shrinking military has been stretched far too thin. The military has been forced to make aging ships, planes, and other vehicles last well beyond their intended life spans. The President will reverse this dangerous trend. From rebuilding our Armed Forces to beefing up our border security and safeguarding our Nation's sovereignty, this Budget makes security priority one.

It does so while meeting another of the President's core commitments: addressing our Nation's priorities without sending future generations an even bigger credit card bill.

This 2018 Budget Blueprint will not add to the deficit. It has been crafted much the same way any American family creates its own budget while paying bills around their kitchen table; it makes hard choices.

The President's commitment to fiscal responsibility is historic. Not since early in President Reagan's first term have more tax dollars been saved and more Government inefficiency and waste been targeted. Every corner of the Federal budget is scrutinized, every program tested, every penny of taxpayer money watched over.

Our $20 trillion national debt is a crisis, not just for the Nation, but for every citizen. Each American's share of this debt is more than $60,000 and growing. It is a challenge of great stakes, but one the American people can solve. American families make tough decisions every day about their own budgets; it is time Washington does the same.

Mick Mulvaney

MAJOR AGENCY BUDGET HIGHLIGHTS

The 2018 Budget is being unveiled sequentially in that this Blueprint provides details only on our discretionary funding proposals. The full Budget that will be released later this spring will include our specific mandatory and tax proposals, as well as a full fiscal path.

For instance, the President has emphasized that one of his top priorities is modernizing the outdated infrastructure that the American public depends upon. To spearhead his infrastructure initiative, the President has tapped a group of infrastructure experts to evaluate investment options along with commonsense regulatory, administrative, organizational, and policy changes to encourage investment and speed project delivery. Through this initiative, the President is committed to making sure that taxpayer dollars are expended for the highest return projects and that all levels of government maximize leverage to get the best deals and exercise vigorous oversight. The Administration will provide more budgetary, tax, and legislative details in the coming months.

In the chapters that follow, Budget highlights are presented for major agencies. Consistent with the President's approach to move the Nation toward fiscal responsibility, the Budget eliminates and reduces hundreds of programs and focuses funding to redefine the proper role of the Federal Government.

The Budget also proposes to eliminate funding for other independent agencies, including: the African Development Foundation; the Appalachian Regional Commission; the Chemical Safety Board; the Corporation for National and Community Service; the Corporation for Public Broadcasting; the Delta Regional Authority; the Denali Commission; the Institute of Museum and Library Services; the Inter-American Foundation; the U.S. Trade and Development Agency; the Legal Services Corporation; the National Endowment for the Arts; the National Endowment for the Humanities; the Neighborhood Reinvestment Corporation; the Northern Border Regional Commission; the Overseas Private Investment Corporation; the United States Institute of Peace; the United States Interagency Council on Homelessness; and the Woodrow Wilson International Center for Scholars.

MANAGEMENT

Making Government Work Again

The Federal Government can—and should—operate more effectively, efficiently, and securely. For decades, leaders on both sides of the aisle have talked about the need to make Government work better. The President is taking bold action now to make Government work again for the American people.

As one of his first acts as President, on January 23, 2017, the President issued a memorandum imposing a Federal "Hiring Freeze" and requiring a long-term plan to reduce the size of the Federal Government's workforce. In addition, on March 13, 2017, the President signed Executive Order 13781 establishing a "Comprehensive Plan for Reorganizing the Executive Branch," which set in motion the important work of reorganizing executive departments and agencies. These two actions are complementary and plans should reflect both Presidential actions. Legislation will be required before major reorganization of the Executive Branch can take place, but the White House is best situated to review and recommend changes to the Congress. In roughly a year, the Congress will receive from the President and the Director of the Office of Management and Budget (OMB) a comprehensive plan for reorganization proposals. The White House will work closely with congressional committees with jurisdiction over Government organization to ensure the needed reforms actually happen.

Simultaneously, the Administration will develop the President's Management Agenda focused on achieving significant improvements in the effectiveness of its core management functions. The President's Management Agenda will set goals in areas that are critical to improving the Federal Government's effectiveness, efficiency, cybersecurity, and accountability. The Administration will take action to ensure that by 2020 we will be able to say the following:

1. **Federal agencies are managing programs and delivering critical services more effectively.** The Administration will take an evidence-based approach to improving programs and services—using real, hard data to identify poorly performing organizations and programs. We will hold program managers accountable for improving performance and delivering high-quality and timely services to the American people and businesses. We will use all tools available and create new ones as needed to ensure the workforce is appropriately prepared.

2. **Federal agencies are devoting a greater percentage of taxpayer dollars to mission achievement rather than costly, unproductive compliance activities.** Past management improvement initiatives resulted in the creation of hundreds of guidance documents aimed at improving Government management by adding more requirements to information technology (IT), human capital, acquisition, financial management, and real property. Furthermore, these Government-wide policies often tie agencies' hands and keep managers from making commonsense decisions.

As a result, costs often increase without corresponding benefits. The Administration will roll back low-value activities and let managers manage, while holding them accountable for finding ways to reduce the cost of agency operations. As part of this effort, OMB will review requirements placed on agencies and identify areas to reduce obsolete, low-value requirements.

3. **Federal agencies are more effective and efficient in supporting program outcomes.** Delivering high-performing program results and services to citizens and businesses depends on effective and efficient mission support services. However, despite years of efforts to improve these critical management processes, managers remain frustrated with hiring methodologies that do not consistently bring in top talent, acquisition approaches that are too cumbersome, and IT that is outdated by the time it is deployed. The Administration will use available data to develop targeted solutions to problems Federal managers face, and begin fixing them directly by sharing and adopting leading practices from the private and public sectors. Among the areas that will be addressed are how agencies buy goods and services, hire talent, use their real property, pay their bills, and utilize technology.

4. **Agencies have been held accountable for improving performance.** All Federal agencies will be responsible for reporting critical performance metrics and showing demonstrable improvement. OMB will also regularly review agency progress in implementing these reforms to ensure there is consistent improvement.

Through this bold agenda, we will improve the effectiveness, efficiency, cybersecurity, and accountability of the Federal Government and make government work again.

REGULATION

Cutting Burdensome Regulations

The American people deserve a regulatory system that works for them, not against them—a system that is both effective and efficient.

Each year, however, Federal agencies issue thousands of new regulations that, taken together, impose substantial burdens on American consumers and businesses big and small. These burdens function much like taxes that unnecessarily inhibit growth and employment. Many regulations, though well intentioned, do not achieve their intended outcomes, are not structured in the most cost-effective manner, and often have adverse, unanticipated consequences. Many more regulations that have been on the books for years—even if they made sense at the time—have gone unexamined and may no longer be effective or necessary.

The President is committed to fixing these problems by eliminating unnecessary and wasteful regulations. To that end, the President has already taken three significant steps:

1. **Regulatory freeze.** On January 20, 2017, the President's Chief of Staff issued a memorandum to all agencies, directing them to pull back any regulations that had been sent to, but not yet published by, the Office of the Federal Register; to not publish any new regulations unless approved by an Administration political appointee; and to delay the effective date of any pending regulations for 60 days to provide the Administration time to review and reconsider those regulations. Federal agencies responded by pulling back, delaying, and not publishing all possible regulations.

2. **Controlling costs and eliminating unnecessary regulations.** On January 30, 2017, the President signed Executive Order 13771, "Reducing Regulation and Controlling Regulatory Costs." This Executive Order represents a fundamental change in the regulatory state. It requires Federal agencies to eliminate at least two existing regulations for each new regulation they issue. It also requires agencies to ensure that for 2017, the total incremental cost of all new regulations be no greater than $0. For 2018 and beyond, the Order establishes and institutionalizes a disciplined process for imposing regulatory cost caps for each Federal agency.

   The significant structural reforms instituted by this Executive Order provide the necessary framework for Federal agencies to carry out the President's bold regulatory reform agenda.

3. **Enforcing the regulatory reform agenda.** As a successful businessman, the President knows that achievement requires accountability. That basic principle is the reason the President signed Executive Order 13777, "Enforcing the Regulatory Reform Agenda," on February 24, 2017. This Order establishes within each agency a Regulatory Reform Officer and a Regulatory Reform Task Force to carry out the President's regulatory reform priorities. These new teams will

work hard to identify regulations that eliminate jobs or inhibit job creation; are outdated, unnecessary, or ineffective; or impose costs that exceed benefits.

They will also be responsible for ensuring that agencies comply with the President's instruction to eliminate two regulations for each new regulation; impose no new incremental costs through regulation; and undertake efforts to repeal, replace, or modify existing regulations.

This Order builds upon a widely recognized and bi-partisan consensus that many existing regulations are likely to be ineffective and no longer necessary, and explicitly builds upon the retrospective review efforts initiated through Executive Order 13563. The difference, however, is accountability, and these teams will be a critical means by which Federal agencies will identify and cut regulations in a smart and efficient manner.

The President recently told Americans, "The era of empty talk is over." When it comes to regulatory reform, it is abundantly clear that the President means business. The President has put into place truly significant new structural mechanisms that will help to ensure that major regulatory reforms are finally achieved on behalf of the hardworking and forgotten men and women of America.

The Office of Information and Regulatory Affairs within OMB is already working hard to support the implementation of these critical new reforms, and it looks forward to making sure that they are fully and successfully implemented over the coming months and years.

DEPARTMENT OF AGRICULTURE

The Department of Agriculture (USDA) provides leadership to promote sustainable agricultural production, protect the long-term availability of food through innovative research, and safeguard the health and productivity of the Nation's forests, grasslands, and private working lands based on sound public policy and efficient management. USDA also works to ensure food safety, provide nutrition assistance, and support rural communities. The Budget request supports core Departmental and mission critical activities while streamlining, reducing, or eliminating duplicative, redundant, or lower priority programs where the Federal role competes with the private sector or other levels of government.

The President's 2018 Budget requests $17.9 billion for USDA, a $4.7 billion or 21 percent decrease from the 2017 annualized continuing resolution (CR) level (excluding funding for P.L. 480 Title II food aid which is reflected in the Department of State and USAID budget).

The President's 2018 Budget:

- Safeguards the Nation's supply of meat, poultry, and egg products by fully funding the Food Safety and Inspection Service, which employs more than 8,000 in-plant and other frontline personnel who protect public health in approximately 6,400 federally inspected slaughter and processing establishments nationwide.

- Provides $6.2 billion to serve all projected participants in the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC). WIC provides grants to States for supplemental foods, health care referrals, and nutrition education for low-income pregnant and postpartum women, infants, and children who are at nutritional risk.

- Fully funds wildland fire preparedness and suppression activities at $2.4 billion, 100 percent of the 10-year average for suppression operations, to ensure the resources necessary to protect life and property.

- Reduces funding for lower priority activities in the National Forest System, such as major new Federal land acquisition; instead, the Budget focuses on maintaining existing forests and grasslands.

- Continues to support farmer-focused research and extension partnerships at land-grant universities and provides about $350 million for USDA's flagship competitive research program. In addition, the Budget focuses in-house research funding within the Agricultural Research Service to the highest

priority agriculture and food issues such as increasing farming productivity, sustaining natural resources, including those within rural communities, and addressing food safety and nutrition priorities.

- Reduces funding for USDA's statistical capabilities, while maintaining core Departmental analytical functions, such as the funding necessary to complete the Census of Agriculture.

- Eliminates the duplicative Water and Wastewater loan and grant program, a savings of $498 million from the 2017 annualized CR level. Rural communities can be served by private sector financing or other Federal investments in rural water infrastructure, such as the Environmental Protection Agency's State Revolving Funds.

- Reduces staffing in USDA's Service Center Agencies to streamline county office operations, reflect reduced Rural Development workload, and encourage private sector conservation planning.

- Reduces duplicative and underperforming programs by eliminating discretionary activities of the Rural Business and Cooperative Service, a savings of $95 million from the 2017 annualized CR level.

- Eliminates the McGovern-Dole International Food for Education program, which lacks evidence that it is being effectively implemented to reduce food insecurity.

DEPARTMENT OF COMMERCE

The Department of Commerce promotes job creation and economic growth by ensuring fair and secure trade, providing the data necessary to support commerce, and fostering innovation by setting standards and conducting foundational research and development. The Budget prioritizes and protects investments in core Government functions such as preparing for the 2020 Decennial Census, providing the observational infrastructure and staff necessary to produce timely and accurate weather forecasts, supporting the Government's role in managing marine resources and ocean and coastal navigation, and enforcing laws that promote fair and secure trade. The Budget also reduces or eliminates grant programs that have limited impact and reflect an expansion beyond core missions of the bureaus.

The President's 2018 Budget requests $7.8 billion for the Department of Commerce, a $1.5 billion or 16 percent decrease from the 2017 annualized CR level.

The President's 2018 Budget:

- Strengthens the International Trade Administration's trade enforcement and compliance functions, including the anti-dumping and countervailing duty investigations, while rescaling the agency's export promotion and trade analysis activities.

- Provides $1.5 billion, an increase of more than $100 million, for the U.S. Census Bureau to continue preparations for the 2020 Decennial Census. This additional funding prioritizes fundamental investments in information technology and field infrastructure, which would allow the bureau to more effectively administer the 2020 Decennial Census.

- Consolidates the mission, policy support, and administrative functions of the Economics and Statistics Administration within the Bureau of Economic Analysis, the U.S. Census Bureau, and the Department of Commerce's Office of the Secretary.

- Eliminates the Economic Development Administration, which provides small grants with limited measurable impacts and duplicates other Federal programs, such as Rural Utilities Service grants at the U.S. Department of Agriculture and formula grants to States from the Department of Transportation. By terminating this agency, the Budget saves $221 million from the 2017 annualized CR level.

- Eliminates the Minority Business Development Agency, which is duplicative of other Federal, State, local, and private sector efforts that promote minority business entrepreneurship including Small Business Administration District Offices and Small Business Development Centers.

- Saves $124 million by discontinuing Federal funding for the Manufacturing Extension Partnership (MEP) program, which subsidizes up to half the cost of State centers, which provide consulting services to small- and medium-size manufacturers. By eliminating Federal funding, MEP centers would transition solely to non-Federal revenue sources, as was originally intended when the program was established.

- Zeroes out over $250 million in targeted National Oceanic and Atmospheric Administration (NOAA) grants and programs supporting coastal and marine management, research, and education including Sea Grant, which primarily benefit industry and State and local stakeholders. These programs are a lower priority than core functions maintained in the Budget such as surveys, charting, and fisheries management.

- Maintains the development of NOAA's current generation of polar orbiting and geostationary weather satellites, allowing the Joint Polar Satellite System and Geostationary Operational Environmental Satellite programs to remain on schedule in order to provide forecasters with critical weather data to help protect life and property.

- Achieves annual savings from NOAA's Polar Follow On satellite program from the current program of record by better reflecting the actual risk of a gap in polar satellite coverage, and provides additional opportunities to improve robustness of the low earth orbit satellite architecture by expanding the utilization of commercially provided data to improve weather models.

- Maintains National Weather Service forecasting capabilities by investing more than $1 billion while continuing to promote efficient and effective operations.

- Continues to support the National Telecommunications and Information Administration (NTIA) in representing the United States interest at multi-stakeholder forums on internet governance and digital commerce. The Budget supports the commercial sector's development of next generation wireless services by funding NTIA's mission of evaluating and ensuring the efficient use of spectrum by Government users.

DEPARTMENT OF DEFENSE

The Department of Defense (DOD) provides the military forces needed to deter war and to protect the security of the United States. The budget for DOD ends the depletion of our military and pursues peace through strength, honoring the Federal Government's first responsibility: to protect the Nation. It fully repeals the defense sequestration, while providing the needed resources for accelerating the defeat of the Islamic State of Iraq and Syria (ISIS) and for beginning to rebuild the U.S. Armed Forces.

The President's 2018 Budget requests $639 billion for DOD, a $52 billion increase from the 2017 annualized CR level. The total includes $574 billion for the base budget, a 10 percent increase from the 2017 annualized CR level, and $65 billion for Overseas Contingency Operations.

The President's 2018 Budget:

- Repeals the defense sequestration by restoring $52 billion to DOD, as well as $2 billion to other national defense programs outside DOD, for a $54 billion total increase for national defense discretionary budget authority above the sequestration level budget cap. When the Budget Control Act (BCA) of 2011 was enacted, the defense sequestration was not meant to occur, yet it has never been fully repealed. This has resulted in nearly $200 billion of national defense cuts since 2013 and over $200 billion of further projected cuts through 2021, relative to the original BCA caps alone. Reversing this indiscriminate neglect of the last administration is not only a fulfillment of the President's promise, but it is also a requirement if this Nation's security is to be maintained. The military's depletion under President Obama is our foremost challenge. The President's 2018 Budget ends the arbitrary depletion of our strength and security, and begins to rebuild the U.S. Armed Forces.

- Increases DOD's budget authority by $52 billion above the current 2017 level of $587 billion. This increase alone exceeds the entire defense budget of most countries, and would be one of the largest one-year DOD increases in American history. It is exceeded only by the peak increases of the Reagan Administration and a few of the largest defense increases during the World Wars and the conflicts in Korea, Vietnam, Iraq, and Afghanistan (in constant dollars, based on GDP chained price index). Unlike spending increases for war, which mostly consume resources in combat, the increases in the President's Budget primarily invest in a stronger military.

- Provides the resources needed to accelerate the defeat of ISIS. The Budget ensures that DOD has the tools to stop ISIS from posing a threat to the United States by funding the Department's critical efforts to strike ISIS targets, support our partners fighting on the ground, disrupt ISIS' external operations, and cut off its financing.

- Addresses urgent warfighting readiness needs. Fifteen years of conflict, accompanied in recent years by budget cuts, have stressed the Armed Forces. The President's Budget would ensure we remain the best led, best equipped, and most ready force in the world.

- Begins to rebuild the U.S. Armed Forces by addressing pressing shortfalls, such as insufficient stocks of critical munitions, personnel gaps, deferred maintenance and modernization, cyber vulnerabilities, and degraded facilities. The military must reset war losses, address recapitalization and maintenance requirements, and recover from years of deferred investment forced by budget cuts. The President's Budget would ensure the Armed Forces have the training, equipment, and infrastructure they need.

- Lays the groundwork for a larger, more capable, and more lethal joint force, driven by a new National Defense Strategy that recognizes the need for American superiority not only on land, at sea, in the air, and in space, but also in cyberspace. As the world has become more dangerous—through the rise of advanced potential adversaries, the spread of destructive technology, and the expansion of terrorism—our military has gotten smaller and its technological edge has eroded. The President's Budget begins to put an end to this trend, reversing force reductions and restoring critical investments.

- Initiates an ambitious reform agenda to build a military that is as effective and efficient as possible, and underscores the President's commitment to reduce the costs of military programs wherever feasible.

- Strengthens the U.S. Army by rebuilding readiness, reversing end strength reductions, and preparing for future challenges. This Budget is an initial step toward restoring an Army that has been stressed by high operational demand and constrained funding levels in recent years.

- Rebuilds the U.S. Navy to better address current and future threats by increasing the total number of ships. This Budget reflects a down payment on the President's commitment to expanding the fleet.

- Ensures a ready and fully equipped Marine Corps. The Budget lays the foundation for a force that meets the challenges of the 21st Century.

- Accelerates Air Force efforts to improve tactical air fleet readiness, ensure technical superiority, and repair aging infrastructure. Key investments in maintenance capacity, training systems, and additional F-35 Joint Strike Fighters would enable the Air Force, which is now the smallest it has been in history, to counter the growing number of complex threats from sophisticated state actors and transnational terrorist groups.

DEPARTMENT OF EDUCATION

The Department of Education promotes improving student achievement and access to opportunity in elementary, secondary, and postsecondary education. The Department would refocus its mission on supporting States and school districts in their efforts to provide high quality education to all our students. Also, it would focus on streamlining and simplifying funding for college, while continuing to help make college education more affordable. The 2018 Budget places power in the hands of parents and families to choose schools that are best for their children by investing an additional $1.4 billion in school choice programs. It continues support for the Nation's most vulnerable populations, such as students with disabilities. Overall, the Department would support these investments and carry out its core mission while lowering costs to the taxpayer by reducing or eliminating funding for programs that are not effective, that duplicate other efforts, or that do not serve national needs.

The President's 2018 Budget provides $59 billion in discretionary funding for the Department of Education, a $9 billion or 13 percent reduction below the 2017 annualized CR level.

The President's 2018 Budget:

- Increases investments in public and private school choice by $1.4 billion compared to the 2017 annualized CR level, ramping up to an annual total of $20 billion, and an estimated $100 billion including matching State and local funds. This additional investment in 2018 includes a $168 million increase for charter schools, $250 million for a new private school choice program, and a $1 billion increase for Title I, dedicated to encouraging districts to adopt a system of student-based budgeting and open enrollment that enables Federal, State, and local funding to follow the student to the public school of his or her choice.
- Maintains approximately $13 billion in funding for IDEA programs to support students with special education needs. This funding provides States, school districts, and other grantees with the resources needed to provide high quality special education and related services to students and young adults with disabilities.
- Eliminates the $2.4 billion Supporting Effective Instruction State Grants program, which is poorly targeted and spread thinly across thousands of districts with scant evidence of impact.
- Eliminates the 21st Century Community Learning Centers program, which supports before- and after-school programs as well as summer programs, resulting in savings of $1.2 billion from the 2017 annualized CR level. The programs lacks strong evidence of meeting its objectives, such as improving student achievement.

- Eliminates the Federal Supplemental Educational Opportunity Grant program, a less well-targeted way to deliver need-based aid than the Pell Grant program, to reduce complexity in financial student aid and save $732 million from the 2017 annualized CR level.
- Safeguards the Pell Grant program by level funding the discretionary appropriation while proposing a cancellation of $3.9 billion from unobligated carryover funding, leaving the Pell program on sound footing for the next decade.
- Protects support for Historically Black Colleges and Universities and Minority-Serving Institutions, which provide opportunities for communities that are often underserved, maintaining $492 million in funding for programs that serve high percentages of minority students.
- Reduces Federal Work-Study significantly and reforms the poorly-targeted allocation to ensure funds go to undergraduate students who would benefit most.
- Provides $808 million for the Federal TRIO Programs and $219 million for GEAR UP, resulting in savings of $193 million from the 2017 annualized CR level. Funding to TRIO programs is reduced in areas that have limited evidence on the overall effectiveness in improving student outcomes. The Budget funds GEAR UP continuation awards only, pending the completion of an upcoming rigorous evaluation of a portion of the program.
- Eliminates or reduces over 20 categorical programs that do not address national needs, duplicate other programs, or are more appropriately supported with State, local, or private funds, including Striving Readers, Teacher Quality Partnership, Impact Aid Support Payments for Federal Property, and International Education programs.

DEPARTMENT OF ENERGY

The Department of Energy (DOE) is charged with ensuring the Nation's security and prosperity by addressing its energy, environmental, and nuclear challenges through transformative science and technology solutions. The Budget for DOE demonstrates the Administration's commitment to reasserting the proper role of what has become a sprawling Federal Government and reducing deficit spending. It reflects an increased reliance on the private sector to fund later-stage research, development, and commercialization of energy technologies and focuses resources toward early-stage research and development. It emphasizes energy technologies best positioned to enable American energy independence and domestic job-growth in the near to mid-term. It also ensures continued progress on cleaning up sites contaminated from nuclear weapons production and energy research and includes a path forward to accelerate progress on the disposition of nuclear waste. At the same time, the Budget demonstrates the Administration's strong support for the United States' nuclear security enterprise and ensures that we have a nuclear force that is second to none.

The President's 2018 Budget requests $28.0 billion for DOE, a $1.7 billion or 5.6 percent decrease from the 2017 annualized CR level. The Budget would strengthen the Nation's nuclear capability by providing a $1.4 billion increase above the 2017 annualized CR level for the National Nuclear Security Administration, an 11 percent increase.

The President's 2018 Budget:

- Provides $120 million to restart licensing activities for the Yucca Mountain nuclear waste repository and initiate a robust interim storage program. These investments would accelerate progress on fulfilling the Federal Government's obligations to address nuclear waste, enhance national security, and reduce future taxpayer burden.
- Supports the goals of moving toward a responsive nuclear infrastructure and advancing the existing program of record for warhead life extension programs through elimination of defense sequestration for the National Nuclear Security Administration (NNSA).
- Enables NNSA to begin to address its critical infrastructure maintenance backlog.
- Protects human health and the environment by providing $6.5 billion to advance the Environmental Management program mission of cleaning up the legacy of waste and contamination from energy research and nuclear weapons production, including addressing excess facilities to support modernization of the nuclear security enterprise.
- Eliminates the Advanced Research Projects Agency-Energy, the Title 17 Innovative Technology Loan Guarantee Program, and the Advanced Technology Vehicle Manufacturing Program because

the private sector is better positioned to finance disruptive energy research and development and to commercialize innovative technologies.

- Ensures the Office of Science continues to invest in the highest priority basic science and energy research and development as well as operation and maintenance of existing scientific facilities for the community. This includes a savings of approximately $900 million compared to the 2017 annualized CR level.
- Focuses funding for the Office of Energy Efficiency and Renewable Energy, the Office of Nuclear Energy, the Office of Electricity Delivery and Energy Reliability, and the Fossil Energy Research and Development program on limited, early-stage applied energy research and development activities where the Federal role is stronger. In addition, the Budget eliminates the Weatherization Assistance Program and the State Energy Program to reduce Federal intervention in State-level energy policy and implementation. Collectively, these changes achieve a savings of approximately $2 billion from the 2017 annualized CR level.
- Supports the Office of Electricity Delivery and Energy Reliability's capacity to carry out cybersecurity and grid resiliency activities that would help harden and evolve critical grid infrastructure that the American people and the economy rely upon.
- Continues the necessary research, development, and construction to support the Navy's current nuclear fleet and enhance the capabilities of the future fleet.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

The Department of Health and Human Services (HHS) works to enhance the health and well-being of Americans by providing effective health and human services and by fostering sound, sustained advances in the sciences underlying medicine, public health, and social services. The Budget supports the core mission of HHS through the most efficient and effective health and human service programs. In 2018, HHS funds the highest priorities, such as: health services through community health centers, Ryan White HIV/AIDS providers, and the Indian Health Service; early care and education; and medical products review and innovation. In addition, it funds urgent public health issues, such as prescription drug overdose, and program integrity for Medicare and Medicaid. The Budget eliminates programs that are duplicative or have limited impact on public health and well-being. The Budget allows HHS to continue to support priority activities that reflect a new and sustainable approach to long-term fiscal stability across the Federal Government.

The President's 2018 Budget requests $69.0 billion for HHS, a $15.1 billion or 17.9 percent decrease from the 2017 annualized CR level. This funding level excludes certain mandatory spending changes but includes additional funds for program integrity and implementing the 21st Century CURES Act.

The President's 2018 Budget:

- Supports direct health care services, such as those delivered by community health centers, Ryan White HIV/AIDS providers, and the Indian Health Service. These safety net providers deliver critical health care services to low-income and vulnerable populations.
- Strengthens the integrity and sustainability of Medicare and Medicaid by investing in activities to prevent fraud, waste, and abuse and promote high quality and efficient health care. Additional funding for the Health Care Fraud and Abuse Control (HCFAC) program has allowed the Centers for Medicare & Medicaid Services in recent years to shift away from a "pay-and-chase" model toward identifying and preventing fraudulent or improper payments from being paid in the first place. The return on investment for the HCFAC account was $5 returned for every $1 expended from 2014-2016. The Budget proposes HCFAC discretionary funding of $751 million in 2018, which is $70 million higher than the 2017 annualized CR level.
- Supports efficient operations for Medicare, Medicaid, and the Children's Health Insurance Program and focuses spending on the highest priority activities necessary to effectively operate these programs.

- Supports substance abuse treatment services for the millions of Americans struggling with substance abuse disorders. The opioid epidemic, which took more than 33,000 lives in calendar year 2015, has a devastating effect on America's families and communities. In addition to funding Substance Abuse and Mental Health Services Administration substance abuse treatment activities, the Budget also includes a $500 million increase above 2016 enacted levels to expand opioid misuse prevention efforts and to increase access to treatment and recovery services to help Americans who are misusing opioids get the help they need.
- Recalibrates Food and Drug Administration (FDA) medical product user fees to over $2 billion in 2018, approximately $1 billion over the 2017 annualized CR level, and replaces the need for new budget authority to cover pre-market review costs. To complement the increase in medical product user fees, the Budget includes a package of administrative actions designed to achieve regulatory efficiency and speed the development of safe and effective medical products. In a constrained budget environment, industries that benefit from FDA's approval can and should pay for their share.
- Reduces the National Institutes of Health's (NIH) spending relative to the 2017 annualized CR level by $5.8 billion to $25.9 billion. The Budget includes a major reorganization of NIH's Institutes and Centers to help focus resources on the highest priority research and training activities, including: eliminating the Fogarty International Center; consolidating the Agency for Healthcare Research and Quality within NIH; and other consolidations and structural changes across NIH organizations and activities. The Budget also reduces administrative costs and rebalance Federal contributions to research funding.
- Reforms key public health, emergency preparedness, and prevention programs. For example, the Budget restructures similar HHS preparedness grants to reduce overlap and administrative costs and directs resources to States with the greatest need. The Budget also creates a new Federal Emergency Response Fund to rapidly respond to public health outbreaks, such as Zika Virus Disease. The Budget also reforms the Centers for Disease Control and Prevention through a new $500 million block grant to increase State flexibility and focus on the leading public health challenges specific to each State.
- Invests in mental health activities that are awarded to high-performing entities and focus on high priority areas, such as suicide prevention, serious mental illness, and children's mental health.
- Eliminates $403 million in health professions and nursing training programs, which lack evidence that they significantly improve the Nation's health workforce. The Budget continues to fund health workforce activities that provide scholarships and loan repayments in exchange for service in areas of the United States where there is a shortage of health professionals.
- Eliminates the discretionary programs within the Office of Community Services, including the Low Income Home Energy Assistance Program (LIHEAP) and the Community Services Block Grant (CSBG), a savings of $4.2 billion from the 2017 annualized CR level. Compared to other income support programs that serve similar populations, LIHEAP is a lower-impact program and is unable to demonstrate strong performance outcomes. CSBG funds services that are duplicative of other Federal programs, such as emergency food assistance and employment services, and is also a limited-impact program.

DEPARTMENT OF HOMELAND SECURITY

The Department of Homeland Security (DHS) has a vital mission: to secure the Nation from the many threats it faces. This requires the dedication of more than 240,000 employees in jobs that ensure the security of the U.S. borders, support the integrity of its immigration system, protect air travelers and national leaders, reduce the threat of cyber attacks, and stand prepared for emergency response and disaster recovery. The Budget prioritizes DHS law enforcement operations, proposes critical investments in frontline border security, and funds continued development of strong cybersecurity defenses. The Budget would aggressively implement the President's commitment to construct a physical wall along the southern border as directed by his January 25, 2017 Executive Order, and ensures robust funding for other important DHS missions.

The President's 2018 Budget requests $44.1 billion in net discretionary budget authority for DHS, a $2.8 billion or 6.8 percent increase from the 2017 annualized CR level. The Budget would allocate $4.5 billion in additional funding for programs to strengthen the security of the Nation's borders and enhance the integrity of its immigration system. This increased investment in the Nation's border security and immigration enforcement efforts now would ultimately save Federal resources in the future.

The President's 2018 Budget:

- Secures the borders of the United States by investing $2.6 billion in high-priority tactical infrastructure and border security technology, including funding to plan, design, and construct a physical wall along the southern border as directed by the President's January 25, 2017 Executive Order. This investment would strengthen border security, helping stem the flow of people and drugs illegally crossing the U.S. borders.

- Advances the President's plan to strengthen border security and immigration enforcement with $314 million to recruit, hire, and train 500 new Border Patrol Agents and 1,000 new Immigration and Customs Enforcement law enforcement personnel in 2018, plus associated support staff. These new personnel would improve the integrity of the immigration system by adding capacity to interdict those aliens attempting to cross the border illegally, as well as to identify and remove those already in the United States who entered illegally.

- Enhances enforcement of immigration laws by proposing an additional $1.5 billion above the 2017 annualized CR level for expanded detention, transportation, and removal of illegal immigrants.

These funds would ensure that DHS has sufficient detention capacity to hold prioritized aliens, including violent criminals and other dangerous individuals, as they are processed for removal.

- Invests $15 million to begin implementation of mandatory nationwide use of the E-Verify Program, an internet-based system that allows businesses to determine the eligibility of their new employees to work in the United States. This investment would strengthen the employment verification process and reduce unauthorized employment across the U.S.

- Safeguards cyberspace with $1.5 billion for DHS activities that protect Federal networks and critical infrastructure from an attack. Through a suite of advanced cyber security tools and more assertive defense of Government networks, DHS would share more cybersecurity incident information with other Federal agencies and the private sector, leading to faster responses to cybersecurity attacks directed at Federal networks and critical infrastructure.

- Restructures selected user fees for the Transportation Security Administration (TSA) and the National Flood Insurance Program (NFIP) to ensure that the cost of Government services is not subsidized by taxpayers who do not directly benefit from those programs. The Budget proposes to raise the Passenger Security Fee to recover 75 percent of the cost of TSA aviation security operations. The Budget proposes eliminating the discretionary appropriation for the NFIP's Flood Hazard Mapping Program, a savings of $190 million, to instead explore other more effective and fair means of funding flood mapping efforts.

- Eliminates or reduces State and local grant funding by $667 million for programs administered by the Federal Emergency Management Agency (FEMA) that are either unauthorized by the Congress, such as FEMA's Pre-Disaster Mitigation Grant Program, or that must provide more measurable results and ensure the Federal Government is not supplanting other stakeholders' responsibilities, such as the Homeland Security Grant Program. For that reason, the Budget also proposes establishing a 25 percent non-Federal cost match for FEMA preparedness grant awards that currently require no cost match. This is the same cost-sharing approach as FEMA's disaster recovery grants. The activities and acquisitions funded through these grant programs are primarily State and local functions.

- Eliminates and reduces unauthorized and underperforming programs administered by TSA in order to strengthen screening at airport security checkpoints, a savings of $80 million from the 2017 annualized CR level. These savings include reductions to the Visible Intermodal Prevention and Response program, which achieves few Federal law enforcement priorities, and elimination of TSA grants to State and local jurisdictions, a program intended to incentivize local law enforcement patrols that should already be a high priority for State and local partners. In addition, the Budget reflects TSA's decision in the summer of 2016 to eliminate the Behavior Detection Officer program, reassigning all of those personnel to front line airport security operations. Such efforts refocus TSA on its core mission of protecting travelers and ensuring Federal security standards are enforced throughout the transportation system.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

The Department of Housing and Urban Development (HUD) promotes decent, safe, and affordable housing for Americans and provides access to homeownership opportunities. This Budget reflects the President's commitment to fiscal responsibility while supporting critical functions that provide rental assistance to low-income and vulnerable households and help work-eligible families achieve self-sufficiency. The Budget also recognizes a greater role for State and local governments and the private sector to address community and economic development needs.

The President's 2018 Budget requests $40.7 billion in gross discretionary funding for HUD, a $6.2 billion or 13.2 percent decrease from the 2017 annualized CR level.

The President's 2018 Budget:

- Provides over $35 billion for HUD's rental assistance programs and proposes reforms that reduce costs while continuing to assist 4.5 million low-income households.

- Eliminates funding for the Community Development Block Grant program, a savings of $3 billion from the 2017 annualized CR level. The Federal Government has spent over $150 billion on this block grant since its inception in 1974, but the program is not well-targeted to the poorest populations and has not demonstrated results. The Budget devolves community and economic development activities to the State and local level, and redirects Federal resources to other activities.

- Promotes fiscal responsibility by eliminating funding for a number of lower priority programs, including the HOME Investment Partnerships Program, Choice Neighborhoods, and the Self-help Homeownership Opportunity Program, a savings of over $1.1 billion from the 2017 annualized CR level. State and local governments are better positioned to serve their communities based on local needs and priorities.

- Promotes healthy and lead-safe homes by providing $130 million, an increase of $20 million over the 2017 annualized CR level, for the mitigation of lead-based paint and other hazards in low-income homes, especially those in which children reside. This also funds enforcement, education, and research activities to further support this goal, all of which contributes to lower healthcare costs and increased productivity.

- Eliminates funding for Section 4 Capacity Building for Community Development and Affordable Housing, a savings of $35 million from the 2017 annualized CR level. This program is duplicative of efforts funded by philanthropy and other more flexible private sector investments.

- Supports homeownership through provision of Federal Housing Administration mortgage insurance programs.

DEPARTMENT OF THE INTERIOR

The Department of the Interior (DOI) is responsible for protecting and managing vast areas of U.S. lands and waters, providing scientific and other information about its natural resources, and meeting the Nation's trust responsibilities and other commitments to American Indians, Alaska Natives, and U.S.-affiliated island communities. The Budget requests an increase in funding for core energy development programs while supporting DOI's priority agency mission and trust responsibilities, including public safety, land conservation and revenue management. It eliminates funding for unnecessary or duplicative programs while reducing funds for lower priority activities, such as acquiring new lands.

The President's 2018 Budget requests $11.6 billion for DOI, a $1.5 billion or 12 percent decrease from the 2017 annualized CR level.

The President's 2018 Budget:

- Strengthens the Nation's energy security by increasing funding for DOI programs that support environmentally responsible development of energy on public lands and offshore waters. Combined with administrative reforms already in progress, this would allow DOI to streamline permitting processes and provide industry with access to the energy resources America needs, while ensuring taxpayers receive a fair return from the development of these public resources.

- Sustains funding for DOI's Office of Natural Resources Revenue, which manages the collection and disbursement of roughly $10 billion annually from mineral development, an important source of revenue to the Federal Treasury, States, and Indian mineral owners.

- Eliminates unnecessary, lower priority, or duplicative programs, including discretionary Abandoned Mine Land grants that overlap with existing mandatory grants, National Heritage Areas that are more appropriately funded locally, and National Wildlife Refuge fund payments to local governments that are duplicative of other payment programs.

- Supports stewardship capacity for land management operations of the National Park Service, Fish and Wildlife Service and Bureau of Land Management. The Budget streamlines operations while providing the necessary resources for DOI to continue to protect and conserve America's public lands and beautiful natural resources, provide access to public lands for the next generation of outdoor enthusiasts, and ensure visitor safety.

- Supports tribal sovereignty and self-determination across Indian Country by focusing on core funding and services to support ongoing tribal government operations. The Budget reduces funding for more recent demonstration projects and initiatives that only serve a few Tribes.

- Reduces funding for lower priority activities, such as new major acquisitions of Federal land. The Budget reduces land acquisition funding by more than $120 million from the 2017 annualized CR level and would instead focus available discretionary funds on investing in, and maintaining, existing national parks, refuges and public lands.

- Ensures that the National Park Service assets are preserved for future generations by increasing investment in deferred maintenance projects. Reduces funds for other DOI construction and major maintenance programs, which can rely on existing resources for 2018.

- Provides more than $900 million for DOI's U.S. Geological Survey to focus investments in essential science programs. This includes funding for the Landsat 9 ground system, as well as research and data collection that informs sustainable energy development, responsible resource management, and natural hazard risk reduction.

- Leverages taxpayer investment with public and private resources through wildlife conservation, historic preservation, and recreation grants. These voluntary programs encourage partnerships by providing matching funds that produce greater benefits to taxpayers for the Federal dollars invested.

- Budgets responsibly for wildland fire suppression expenses. The Budget would directly provide the full 10-year rolling average of suppression expenditures.

- Invests over $1 billion in safe, reliable, and efficient management of water resources throughout the western United States.

- Supports counties through discretionary funding for the Payments in Lieu of Taxes (PILT) program at a reduced level, but in line with average funding for PILT over the past decade.

DEPARTMENT OF JUSTICE

The Department of Justice is charged with enforcing the laws and defending the interests of the United States, ensuring public safety against foreign and domestic threats, providing Federal leadership in preventing and controlling crime, seeking just punishment for those guilty of unlawful behavior, and ensuring the fair and impartial administration of justice for all Americans. The budget for the Department of Justice saves taxpayer dollars by consolidating, reducing, streamlining, and making its programs and operations more efficient. The Budget also makes critical investments to confront terrorism, reduce violent crime, tackle the Nation's opioid epidemic, and combat illegal immigration.

The President's 2018 Budget requests $27.7 billion for the Department of Justice, a $1.1 billion or 3.8 percent decrease from the 2017 annualized CR level. This program level excludes mandatory spending changes involving the Crime Victims Fund and the Assets Forfeiture Fund. However, significant targeted increases would enhance the ability to address key issues, including public safety, law enforcement, and national security. Further, the Administration is concerned about so-called sanctuary jurisdictions and will be taking steps to mitigate the risk their actions pose to public safety.

The President's 2018 Budget:

- Strengthens counterterrorism, counterintelligence, and Federal law enforcement activities by providing an increase of $249 million, or 3 percent, above the 2017 annualized CR level for the Federal Bureau of Investigation (FBI). The FBI would devote resources toward its world-class cadre of special agents and intelligence analysts, as well as invest $61 million more to fight terrorism and combat foreign intelligence and cyber threats and address public safety and national security risks that result from malicious actors' use of encrypted products and services. In addition, the FBI would dedicate $35 million to gather and share intelligence data with partners and together with the Department of Defense (DOD) lead Federal efforts in biometric identity resolution, research, and development. The FBI would also spend an additional $9 million to provide accurate and timely response for firearms purchase background checks, and develop and refine evidence and data to target violent crime in some cities and communities.

- Supports efforts at the Department's law enforcement components by providing a combined increase of $175 million above the 2017 annualized CR level to target the worst of the worst criminal organizations and drug traffickers in order to address violent crime, gun-related deaths, and the opioid epidemic.

- Enhances national security and counterterrorism efforts by linking skilled prosecutors and intelligence attorneys with law enforcement investigations and the intelligence community to stay ahead of threats.

- Combats illegal entry and unlawful presence in the United States by providing an increase of nearly $80 million, or 19 percent, above the 2017 annualized CR level to hire 75 additional immigration judge teams to bolster and more efficiently adjudicate removal proceedings—bringing the total number of funded immigration judge teams to 449.

- Enhances border security and immigration enforcement by providing 60 additional border enforcement prosecutors and 40 deputy U.S. Marshals for the apprehension, transportation, and prosecution of criminal aliens.

- Supports the addition of 20 attorneys to pursue Federal efforts to obtain the land and holdings necessary to secure the Southwest border and another 20 attorneys and support staff for immigration litigation assistance.

- Assures the safety of the public and law enforcement officers by providing $171 million above the 2017 annualized CR level for additional short-term detention space to hold Federal detainees, including criminal aliens, parole violators, and other offenders awaiting trial or sentencing.

- Safeguards Federal grants to State, local, and tribal law enforcement and victims of crime to ensure greater safety for law enforcement personnel and the people they serve. Critical programs aimed at protecting the life and safety of State and local law enforcement personnel, including Preventing Violence Against Law Enforcement Officer Resilience and Survivability and the Bulletproof Vest Partnership, are protected.

- Eliminates approximately $700 million in unnecessary spending on outdated programs that either have met their goal or have exceeded their usefulness, including $210 million for the poorly targeted State Criminal Alien Assistance Program, in which two-thirds of the funding primarily reimburses four States for the cost of incarcerating certain illegal criminal aliens.

- Achieves savings of almost a billion dollars from the 2017 annualized CR level in Federal prison construction spending due to excess capacity resulting from an approximate 14 percent decrease in the prison population since 2013. However, the Budget provides $80 million above the 2017 annualized CR level for the activation of an existing facility to reduce high security Federal inmate overcrowding and a total of $113 million to repair and modernize outdated prisons.

- Increases bankruptcy-filing fees to produce an additional $150 million over the 2017 annualized CR level to ensure that those that use the bankruptcy court system pay for its oversight. By increasing quarterly filing fees, the total estimated United States Trustee Program offsetting receipts would reach $289 million in 2018.

DEPARTMENT OF LABOR

The Department of Labor fosters the welfare of wage earners, job seekers, and retirees by safeguarding their working conditions, benefits, and wages. With the need to rebuild the Nation's military without increasing the deficit, this Budget focuses the Department of Labor on its highest priority functions and disinvests in activities that are duplicative, unnecessary, unproven, or ineffective.

The President's 2018 Budget requests $9.6 billion for the Department of Labor, a $2.5 billion or 21 percent decrease from the 2017 annualized CR level.

The President's 2018 Budget:

- Expands Reemployment and Eligibility Assessments, an evidence-based activity that saves an average of $536 per claimant in unemployment insurance benefit costs by reducing improper payments and getting claimants back to work more quickly and at higher wages.

- Reduces funding for ineffective, duplicative, and peripheral job training grants. As part of this, eliminates the Senior Community Service Employment Program (SCSEP), for a savings of $434 million from the 2017 annualized CR level. SCSEP is ineffective in meeting its purpose of transitioning low-income unemployed seniors into unsubsidized jobs. As many as one-third of participants fail to complete the program and of those who do, only half successfully transition to unsubsidized employment.

- Focuses the Bureau of International Labor Affairs on ensuring that U.S. trade agreements are fair for American workers. The Budget eliminates the Bureau's largely noncompetitive and unproven grant funding, which would save at least $60 million from the 2017 annualized CR level.

- Improves Job Corps for the disadvantaged youth it serves by closing centers that do a poor job educating and preparing students for jobs.

- Decreases Federal support for job training and employment service formula grants, shifting more responsibility for funding these services to States, localities, and employers.

- Helps States expand apprenticeship, an evidence-based approach to preparing workers for jobs.

- Refocuses the Office of Disability Employment Policy, eliminating less critical technical assistance grants and launching an early intervention demonstration project to allow States to test and evaluate methods that help individuals with disabilities remain attached to or reconnect to the labor market.

- Eliminates the Occupational Safety and Health Administration's unproven training grants, yielding savings of almost $11 million from the 2017 annualized CR level and focusing the agency on its central work of keeping workers safe on the job.

DEPARTMENT OF STATE, USAID, AND TREASURY INTERNATIONAL PROGRAMS

The Department of State, the U.S. Agency for International Development (USAID), and the Department of the Treasury's International Programs help to advance the national security interests of the United States by building a more democratic, secure, and prosperous world. The Budget for the Department of State and USAID diplomatic and development activities is being refocused on priority strategic objectives and renewed attention is being placed on the appropriate U.S. share of international spending. In addition, the Budget seeks to reduce or end direct funding for international organizations whose missions do not substantially advance U.S. foreign policy interests, are duplicative, or are not well-managed. Additional steps will be taken to make the Department and USAID leaner, more efficient, and more effective. These steps to reduce foreign assistance free up funding for critical priorities here at home and put America first.

The President's 2018 Budget requests $25.6 billion in base funding for the Department of State and USAID, a $10.1 billion or 28 percent reduction from the 2017 annualized CR level. The Budget also requests $12.0 billion as Overseas Contingency Operations funding for extraordinary costs, primarily in war areas like Syria, Iraq, and Afghanistan, for an agency total of $37.6 billion. The 2018 Budget also requests $1.5 billion for Treasury International Programs, an $803 million or 35 percent reduction from the 2017 annualized CR level.

The President's 2018 Budget:

- Maintains robust funding levels for embassy security and other core diplomatic activities while implementing efficiencies. Consistent with the Benghazi Accountability Review Board recommendation, the Budget applies $2.2 billion toward new embassy construction and maintenance in 2018. Maintaining adequate embassy security levels requires the efficient and effective use of available resources to keep embassy employees safe.
- Provides $3.1 billion to meet the security assistance commitment to Israel, currently at an all-time high; ensuring that Israel has the ability to defend itself from threats and maintain its Qualitative Military Edge.
- Eliminates the Global Climate Change Initiative and fulfills the President's pledge to cease payments to the United Nations' (UN) climate change programs by eliminating U.S. funding related to the Green Climate Fund and its two precursor Climate Investment Funds.
- Provides sufficient resources on a path to fulfill the $1 billion U.S. pledge to Gavi, the Vaccine Alliance. This commitment helps support Gavi to vaccinate hundreds of millions of children in low-resource countries and save millions of lives.

- Provides sufficient resources to maintain current commitments and all current patient levels on HIV/AIDS treatment under the President's Emergency Plan for AIDS Relief (PEPFAR) and maintains funding for malaria programs. The Budget also meets U.S. commitments to the Global Fund for AIDS, Tuberculosis, and Malaria by providing 33 percent of projected contributions from all donors, consistent with the limit currently in law.
- Shifts some foreign military assistance from grants to loans in order to reduce costs for the U.S. taxpayer, while potentially allowing recipients to purchase more American-made weaponry with U.S. assistance, but on a repayable basis.
- Reduces funding to the UN and affiliated agencies, including UN peacekeeping and other international organizations, by setting the expectation that these organizations rein in costs and that the funding burden be shared more fairly among members. The amount the U.S. would contribute to the UN budget would be reduced and the U.S. would not contribute more than 25 percent for UN peacekeeping costs.
- Refocuses economic and development assistance to countries of greatest strategic importance to the U.S. and ensures the effectiveness of U.S. taxpayer investments by rightsizing funding across countries and sectors.
- Allows for significant funding of humanitarian assistance, including food aid, disaster, and refugee program funding. This would focus funding on the highest priority areas while asking the rest of the world to pay their fair share. The Budget eliminates the Emergency Refugee and Migration Assistance account, a duplicative and stovepiped account, and challenges international and non-governmental relief organizations to become more efficient and effective.
- Reduces funding for the Department of State's Educational and Cultural Exchange (ECE) Programs. ECE resources would focus on sustaining the flagship Fulbright Program, which forges lasting connections between Americans and emerging leaders around the globe.
- Improves efficiency by eliminating overlapping peacekeeping and security capacity building efforts and duplicative contingency programs, such as the Complex Crises Fund. The Budget also eliminates direct appropriations to small organizations that receive funding from other sources and can continue to operate without direct Federal funds, such as the East-West Center.
- Recognizes the need for State and USAID to pursue greater efficiencies through reorganization and consolidation in order to enable effective diplomacy and development.
- Reduces funding for multilateral development banks, including the World Bank, by approximately $650 million over three years compared to commitments made by the previous administration. Even with the proposed decreases, the U.S. would retain its current status as a top donor while saving taxpayer dollars.

DEPARTMENT OF TRANSPORTATION

The Department of Transportation (DOT) is responsible for ensuring a fast, safe, efficient, accessible, and convenient transportation system that meets our vital national interests and enhances the quality of life of the American people today, and into the future. The Budget request reflects a streamlined DOT that is focused on performing vital Federal safety oversight functions and investing in nationally and regionally significant transportation infrastructure projects. The Budget reduces or eliminates programs that are either inefficient, duplicative of other Federal efforts, or that involve activities that are better delivered by States, localities, or the private sector.

The President's 2018 Budget requests $16.2 billion for DOT's discretionary budget, a $2.4 billion or 13 percent decrease from the 2017 annualized CR level.

The President's 2018 Budget:

- Initiates a multi-year reauthorization proposal to shift the air traffic control function of the Federal Aviation Administration to an independent, non-governmental organization, making the system more efficient and innovative while maintaining safety. This would benefit the flying public and taxpayers overall.

- Restructures and reduces Federal subsidies to Amtrak to focus resources on the parts of the passenger rail system that provide meaningful transportation options within regions. The Budget terminates Federal support for Amtrak's long distance train services, which have long been inefficient and incur the vast majority of Amtrak's operating losses. This would allow Amtrak to focus on better managing its State-supported and Northeast Corridor train services.

- Limits funding for the Federal Transit Administration's Capital Investment Program (New Starts) to projects with existing full funding grant agreements only. Future investments in new transit projects would be funded by the localities that use and benefit from these localized projects.

- Eliminates funding for the Essential Air Service (EAS) program, which was originally conceived of as a temporary program nearly 40 years ago to provide subsidized commercial air service to rural airports. EAS flights are not full and have high subsidy costs per passenger. Several EAS-eligible communities are relatively close to major airports, and communities that have EAS could be served by other existing modes of transportation. This proposal would result in a discretionary savings of $175 million from the 2017 annualized CR level.

- Eliminates funding for the unauthorized TIGER discretionary grant program, which awards grants to projects that are generally eligible for funding under existing surface transportation formula programs, saving $499 million from the 2017 annualized CR level. Further, DOT's Nationally Significant Freight and Highway Projects grant program, authorized by the FAST Act of 2015, supports larger highway and multimodal freight projects with demonstrable national or regional benefits. This grant program is authorized at an annual average of $900 million through 2020.

DEPARTMENT OF THE TREASURY

The Department of the Treasury is charged with maintaining a strong economy, promoting conditions that enable economic growth and stability, protecting the integrity of the financial system, and managing the U.S. Government's finances and resources effectively. The Budget will bring renewed discipline to the Department by focusing resources on collecting revenue, managing the Nation's debt, protecting the financial system from threats, and combating financial crime and terrorism financing.

The President's 2018 Budget requests $12.1 billion in discretionary resources for the Department of the Treasury's domestic programs, a $519 million or 4.1 percent decrease from the 2017 annualized CR level. This program level excludes mandatory spending changes involving the Treasury Forfeiture Fund.

The President's 2018 Budget:

- Preserves key operations of the Internal Revenue Service (IRS) to ensure that the IRS could continue to combat identity theft, prevent fraud, and reduce the deficit through the effective enforcement and administration of tax laws. Diverting resources from antiquated operations that are still reliant on paper-based review in the era of electronic tax filing would achieve significant savings, a funding reduction of $239 million from the 2017 annualized CR level.

- Strengthens cybersecurity by investing in a Department-wide plan to strategically enhance existing security systems and preempt fragmentation of information technology management across the bureaus, positioning Treasury to anticipate and nimbly respond in the event of a cyberattack.

- Prioritizes funding for Treasury's array of economic enforcement tools. Key Treasury programs that freeze the accounts of terrorists and proliferators, implement sanctions on rogue nations, and link law enforcement agencies with financial institutions are critical to the continued safety and financial stability of the Nation.

- Eliminates funding for Community Development Financial Institutions (CDFI) Fund grants, a savings of $210 million from the 2017 annualized CR level. The CDFI Fund was created more than 20 years ago to jump-start a now mature industry where private institutions have ready access to the capital needed to extend credit and provide financial services to underserved communities.

- Empowers the Treasury Secretary, as Chairperson of the Financial Stability Oversight Council, to end taxpayer bailouts and foster economic growth by advancing financial regulatory reforms that promote market discipline and ensure the accountability of financial regulators.

- Shrinks the Federal workforce and increases its efficiency by redirecting resources away from duplicative policy offices to staff that manage the Nation's finances.

DEPARTMENT OF VETERANS AFFAIRS

The Department of Veterans Affairs (VA) provides health care and a wide variety of benefits to military veterans and their survivors. The 2018 Budget fulfills the President's commitment to the Nation's veterans by requesting the resources necessary to provide the support our veterans have earned through sacrifice and service to our Nation. The Budget significantly increases funding for VA Medical Care so that VA can continue to meet the ever-growing demand for health care services while building an integrated system of care that strengthens services within VA and makes effective use of community services. The Budget request includes increased funding for and extension of the Veterans Choice Program, making it easier for eligible veterans to access the medical care they need, close to home.

The President's 2018 Budget requests $78.9 billion in discretionary funding for VA, a $4.4 billion or 6 percent increase from the 2017 enacted level. The Budget also requests legislative authority and $3.5 billion in mandatory budget authority in 2018 to continue the Veterans Choice Program.

The President's 2018 Budget:

- Ensures the Nation's veterans receive high-quality health care and timely access to benefits and services. An estimated 11 million veterans participate in VA programs. This Budget provides the resources necessary to ensure veterans receive the care and support earned through their service to the Nation.
- Provides a $4.6 billion increase in discretionary funding for VA health care to improve patient access and timeliness of medical care services for over nine million enrolled veterans. This funding would enable the Department to provide a broad range of primary care, specialized care, and related medical and social support services to enrolled veterans, including services that are uniquely related to veterans' health and special needs.
- Extends and funds the Veterans Choice Program to ensure that every eligible veteran continues to have the choice to seek care at VA or through a private provider. Without action, this critical program will expire in August 2017, which would result in veterans having fewer choices of where to receive care.
- Supports VA programs that provide services to homeless and at-risk veterans and their families to help keep them safe and sheltered.
- Provides access to education benefits, enhanced services, and other programs to assist veterans' transition to civilian life. VA partners with other agencies to provide critical training, support services, and counseling throughout a veteran's transition and their post-military career.

- Continues critical investments aimed at optimizing productivity and transforming VA's claims processes. Provides resources to reduce the time required to process and adjudicate veterans' disability compensation claims.
- Invests in information technology to improve the efficiency and efficacy of VA services. Provides sufficient funding for sustainment, development, and modernization initiatives that would improve the quality of services provided to veterans and avoid the costs of maintaining outdated, inefficient systems.

ENVIRONMENTAL PROTECTION AGENCY

The Environmental Protection Agency (EPA) is responsible for protecting human health and the environment. The budget for EPA reflects the success of environmental protection efforts, a focus on core legal requirements, the important role of the States in implementing the Nation's environmental laws, and the President's priority to ease the burden of unnecessary Federal regulations that impose significant costs for workers and consumers without justifiable environmental benefits. This would result in approximately 3,200 fewer positions at the agency. EPA would primarily support States and Tribes in their important role protecting air, land, and water in the 21st Century.

The President's 2018 Budget requests $5.7 billion for the Environmental Protection Agency, a savings of $2.6 billion, or 31 percent, from the 2017 annualized CR level.

The President's 2018 Budget:

- Provides robust funding for critical drinking and wastewater infrastructure. These funding levels further the President's ongoing commitment to infrastructure repair and replacement and would allow States, municipalities, and private entities to continue to finance high priority infrastructure investments that protect human health. The Budget includes $2.3 billion for the State Revolving Funds, a $4 million increase over the 2017 annualized CR level. The Budget also provides $20 million for the Water Infrastructure Finance and Innovation Act program, equal to the funding provided in the 2017 annualized CR. This credit subsidy could potentially support $1 billion in direct Federal loans.
- Discontinues funding for the Clean Power Plan, international climate change programs, climate change research and partnership programs, and related efforts—saving over $100 million for the American taxpayer compared to 2017 annualized CR levels. Consistent with the President's America First Energy Plan, the Budget reorients EPA's air program to protect the air we breathe without unduly burdening the American economy.
- Reins in Superfund administrative costs and emphasizes efficiency efforts by funding the Hazardous Substance Superfund Account at $762 million, $330 million below the 2017 annualized CR level. The agency would prioritize the use of existing settlement funds to clean up hazardous waste sites and look for ways to remove some of the barriers that have delayed the program's ability to return sites to the community.
- Avoids duplication by concentrating EPA's enforcement of environmental protection violations on programs that are not delegated to States, while providing oversight to maintain consistency and assistance across State, local, and tribal programs. This reduces EPA's Office of Enforcement

and Compliance Assurance budget to $419 million, which is $129 million below the 2017 annualized CR level.

- Better targets EPA's Office of Research and Development (ORD) at a level of approximately $250 million, which would result in a savings of $233 million from the 2017 annualized CR level. ORD would prioritize activities that support decision-making related to core environmental statutory requirements, as opposed to extramural activities, such as providing STAR grants.
- Supports Categorical Grants with $597 million, a $482 million reduction below 2017 annualized CR levels. These lower levels are in line with the broader strategy of streamlining environmental protection. This funding level eliminates or substantially reduces Federal investment in State environmental activities that go beyond EPA's statutory requirements.
- Eliminates funding for specific regional efforts such as the Great Lakes Restoration Initiative, the Chesapeake Bay, and other geographic programs. These geographic program eliminations are $427 million lower than the 2017 annualized CR levels. The Budget returns the responsibility for funding local environmental efforts and programs to State and local entities, allowing EPA to focus on its highest national priorities.
- Eliminates more than 50 EPA programs, saving an additional $347 million compared to the 2017 annualized CR level. Lower priority and poorly performing programs and grants are not funded, nor are duplicative functions that can be absorbed into other programs or that are State and local responsibilities. Examples of eliminations in addition to those previously mentioned include: Energy Star; Targeted Airshed Grants; the Endocrine Disruptor Screening Program; and infrastructure assistance to Alaska Native Villages and the Mexico Border.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

The National Aeronautics and Space Administration (NASA) is responsible for increasing understanding of the universe and our place in it, advancing America's world-leading aerospace technology, inspiring the Nation, and opening the space frontier. The Budget increases cooperation with industry through the use of public-private partnerships, focuses the Nation's efforts on deep space exploration rather than Earth-centric research, and develops technologies that would help achieve U.S. space goals and benefit the economy.

The President's 2018 Budget requests $19.1 billion for NASA, a 0.8 percent decrease from the 2017 annualized CR level, with targeted increases consistent with the President's priorities.

The President's 2018 Budget:

- Supports and expands public-private partnerships as the foundation of future U.S. civilian space efforts. The Budget creates new opportunities for collaboration with industry on space station operations, supports public-private partnerships for deep-space habitation and exploration systems, funds data buys from companies operating small satellite constellations, and supports work with industry to develop and commercialize new space technologies.
- Paves the way for eventual over-land commercial supersonic flights and safer, more efficient air travel with a strong program of aeronautics research. The Budget provides $624 million for aeronautics research and development.
- Reinvigorates robotic exploration of the Solar System by providing $1.9 billion for the Planetary Science program, including funding for a mission to repeatedly fly by Jupiter's icy ocean moon Europa and a Mars rover that would launch in 2020. To preserve the balance of NASA's science portfolio and maintain flexibility to conduct missions that were determined to be more important by the science community, the Budget provides no funding for a multi-billion-dollar mission to land on Europa. The Budget also supports initiatives that use smaller, less expensive satellites to advance science in a cost-effective manner.
- Provides $3.7 billion for continued development of the Orion crew vehicle, Space Launch System, and associated ground system, to send American astronauts on deep-space missions. To accommodate increasing development costs, the Budget cancels the multi-billion-dollar Asteroid Redirect Mission. NASA will investigate approaches for reducing the costs of exploration missions to enable a more expansive exploration program.
- Provides $1.8 billion for a focused, balanced Earth science portfolio that supports the priorities of the science and applications communities, a savings of $102 million from the 2017 annualized CR level. The Budget terminates four Earth science missions (PACE, OCO-3, DSCOVR

Earth-viewing instruments, and CLARREO Pathfinder) and reduces funding for Earth science research grants.

- Eliminates the $115 million Office of Education, resulting in a more focused education effort through NASA's Science Mission Directorate. The Office of Education has experienced significant challenges in implementing a NASA-wide education strategy and is performing functions that are duplicative of other parts of the agency.
- Restructures a duplicative robotic satellite refueling demonstration mission to reduce its cost and better position it to support a nascent commercial satellite servicing industry, resulting in a savings of $88 million from the 2017 annualized CR level.
- Strengthens NASA's cybersecurity capabilities, safeguarding critical systems and data.

SMALL BUSINESS ADMINISTRATION

The Small Business Administration (SBA) ensures that small businesses have the tools and resources needed to start and develop their operations, drive U.S. competitiveness, and help grow the economy. The President is committed to assisting small businesses succeed through reducing the regulatory and tax burdens that can impede the development of small firms. The Budget increases efficiency through responsible reductions to redundant programs and by eliminating programs that deliver services better provided by the private sector.

The President's 2018 Budget requests $826.5 million for SBA, a $43.2 million or 5.0 percent decrease from the 2017 annualized CR level.

The President's 2018 Budget:

- Supports more than $45 billion in loan guarantees to assist America's small business owners with access to affordable capital to start or expand their businesses.
- Strengthens SBA's outreach center programs by reducing duplicative services, coordinating best practices, and investing in communities that would benefit from SBA's business center support. As a result, SBA would be better positioned to strengthen local partnerships and more efficiently serve program participants while achieving savings over the 2017 annualized CR level.
- Supports over $1 billion in disaster relief lending to businesses, homeowners, renters, and property owners to help American communities recover quickly in the wake of declared disasters. Through the disaster loan program, SBA is able to provide affordable, accessible, and immediate direct assistance to those hardest hit when disaster strikes.
- Achieves $12 million in cost savings from the 2017 annualized CR level through identifying and eliminating those SBA grant programs where the private sector provides effective mechanisms to foster local business development and investment. Eliminations include PRIME technical assistance grants, Regional Innovation Clusters, and Growth Accelerators.
- Provides training and support services for transitioning service members and veterans to promote entrepreneurship and business ownership. These programs help to fulfill the President's commitment to support the Nation's veterans by providing business counseling, lending, and contracting assistance.
- Maintains $28 million in microloan financing and technical assistance to help serve, strengthen, and sustain the smallest of small businesses and startups.
- Allows SBA to advocate and assist small businesses in accessing Federal contracts and small business research opportunities Government-wide.

Summary Tables

Table 1. Proposed Discretionary Caps for 2018 Budget

(Budget authority in billions of dollars)

	Caps	
	2017	**2018**
Current Law Base Caps: [1]		
Defense	551	549
Non-Defense	519	516
Total, Current Law Base Caps	**1,070**	**1,065**
Proposed Base Cap Changes: [2]		
Defense	*+25*	*+54*
Non-Defense	*–15*	*–54*
Total, Proposed Changes	***+10***	.....
Proposed Base Caps:		
Defense	576	603
Non-Defense	504	462
Total, Proposed Base Caps	**1,080**	**1,065**
Enacted and Proposed Cap Adjustments:		
Overseas Contingency Operations (OCO) [2]	89	77
Emergency Funding	3	.....
Program Integrity	2	2
Disaster Relief	8	7
Total, Cap Adjustments	**102**	**86**
Total, Discretionary Budget Authority	**1,181**	**1,151**
21st Century CURES appropriations [3]	*1*	*1*

[1] The caps presented here are equal to the levels specified for 2017 and 2018 in the Balanced Budget and Emergency Deficit Control Act of 1985, as amended (BBEDCA). The 2017 caps were revised in the Bipartisan Budget Act of 2015 and the 2018 caps include OMB estimates of Joint Committee enforcement (also known as "sequestration").

[2] The Administration proposes an increase in the existing defense caps for 2017 and 2018 that is offset with decreases to the non-defense caps. About 60 percent of the 2017 defense increase is offset by non-defense decreases in 2017 while the entire defense increase in 2018 is offset by non-defense decreases. An additional $5 billion in defense funding is proposed as OCO in 2017.

[3] The 21st Century CURES Act permitted funds to be appropriated each year for certain activities outside of the discretionary caps so long as the appropriations were specifically provided for the authorized purposes. These amounts are displayed outside of the discretionary totals for this reason.

Health and Human Services	*0.9*	*1.1*	*+0.2*	*+21.1%*

* $50 million or less.

[1] The 2017 CR/Enacted column reflects enacted appropriations and levels of continuing appropriations provided under the Continuing Appropriations Act, 2017 (Division C of Public Law 114–223, as amended by Division A of Public Law 114–254) that are due to expire on April 28. The levels presented here are the amounts OMB scores under the caps; therefore, the levels for 2017 may differ in total from those on Table 1.

[2] Enacted, continuing, and proposed changes in mandatory programs (CHIMPs) are included in both 2017 and 2018. Some agency presentations in this volume where noted reflect a program level that excludes these amounts.

[3] Funding for Food for Peace Title II Grants is included in the State, USAID, and Treasury International programs total. Although the funds are appropriated to the Department of Agriculture, the funds are administered by USAID.

[4] Funding from the Hospital Insurance and Supplementary Medical Insurance trust funds for administrative expenses incurred by the Social Security Administration that support the Medicare program are included in the Health and Human Services total and not in the Social Security Administration total.

[5] HUD receipt levels for 2018 are a placeholder and subject to change as detailed estimates under the Administration's economic and technical assumptions for the full Budget are finalized.

[6] The Balanced Budget and Emergency Deficit Control Act of 1985 authorizes an adjustment to the discretionary spending caps for appropriations that are designated by the Congress as being for "disaster relief" provided those appropriations are for activities carried out pursuant to a determination under the Robert T. Stafford Disaster Relief and Emergency Assistance Act. Currently, based on enacted and continuing appropriations, OMB estimates the total adjustment available for disaster funding for 2018 at $7,366 million. Further details, including any revisions necessary to account for final 2017 appropriations and the specific amounts of disaster relief funding requested for individual agencies in 2018 authorized to administer disaster relief programs, will be provided in subsequent Administration proposals.

[7] The 21st Century CURES Act permitted funds to be appropriated each year for certain activities outside of the discretionary caps so long as the appropriations were specifically provided for the authorized purposes. These amounts are displayed outside of the discretionary totals for this reason.

Table 3. Major 2018 Budget Changes from Current Law

(Budget authority in billions of dollars)

	2018 Caps [1]		Change:	
	Current Law [2]	Proposed	Dollars	Percent
Discretionary Categories:				
Defense	549	603	+54	+10%
Non-Defense	516	462	–54	–10%
Total, 2018 Base Caps	**1,065**	**1,065**	.....	.....

* $500 million or less.

[1] Only base funding caps are represented on this table and cap adjustments permitted by the Balanced Budget and Emergency Deficit Control Act of 1985 for overseas contingency operations, disaster relief, program integrity, and emergency requirements are excluded.

[2] The current law caps are equal to the levels specified for 2018 in the Balanced Budget and Emergency Deficit Control Act of 1985, including OMB estimates for Joint Committee enforcement (also known as "sequestration").

Table 4. Major 2017 Changes from Security Supplemental Request

(Budget authority in billions of dollars)

	2017 Caps		Change:	
	Current Law	Proposed [1]	Dollars	Percent
Discretionary Categories:				
Defense	551	576	+25	+5%
Non-Defense	519	504	–15	–3%
Major Changes:				
Border Wall and implementation of Executive Orders	.....	*3*	*+3*	*N/A*
Other Non-Defense programs	*519*	*501*	*–18*	*–3%*
Total, 2018 Base Caps	1,070	1,080	+10	+1%
Cap Adjustments:				
Defense Overseas Contingency Operations (OCO)	65	70	+5	+8%

[1] The Administration proposes an increase in the existing defense cap for 2017 that is partially offset with a decrease to the non-defense cap while an additional $5 billion defense request in 2017 is requested as OCO.

Thanks Patrice-

It is interesting, but for context, can someone explain what environmental compliance has been done for the existing thousands of miles of wall? Did the DHS do NEPA, NHPA and consultation Section 7 on those projects or were they exempt for national security reasons? Just a brief summary would be appreciated.

Thanks,

Glenn

All,

I found the below-linked complaint today on CBD's website. They and Rep. Grijalva are suing DHS under NEPA relating to DHS's border security activities, including the proposed border wall. We are not a party. The allegations are generally that the NEPA analysis needs to be updated and does not sufficiently address various effects of DHS's actions, especially on listed species and other wildlife. The complaint also briefly states Sec. 7 claims, but says an NOI was sent (which I have not received, nor been able to find) about a week ago. After the 60 days runs and if DHS has not remedied the alleged Sec. 7 violations, plaintiffs will amend the complaint to add ESA claims.

Well, I haven't been able to read the complaint in full and word for word, but I think from what I skimmed that:

1) it was clear that the plaintiffs are not only targeting the wall (which does have the statutory waivers that DHS could use - looks like from the 2006 Act that someone cited), but the whole border security program / slate of stuff that's going on along the southern border and saying that DHS didn't consult. I *think* only the wall is exempt from enviro review, so this was a smart move by plaintiffs to make the scope of their complaint broader

2) it sounded like DHS did some NEPA analysis about 15 years ago (2001?) on their border security operations, but it wasn't sufficient and was stale, according to the complaint

Hope this helps. Let me know if you or your coordinators need a more detailed summary.

All, here is the NOI mentioned in the complaint. It came today and pertains to DHS's actions on southern border security programming, but does not allege any claims against FWS. Specifically, it alleges that DHS did not consult with us on its programming, nor did it do any conservation as per 7(a)(1), for many listed species and CH in the southern border region. Note that it does not specifically target the proposed border wall, but is much broader sweeping than that. I assume CBD will be amending their complaint to add these claims; hard to believe DHS would be able to get its act together to agree to consult within 60 days.

Re: Notice of Violations of the Endangered Species Act in Relation to Department of Homeland Security U.S.-Mexico Border Enforcement Program

Dear Secretaries Kelly and Zinke, Acting Director Kurth, and Acting Commissioner McAleenan:

On behalf of Center for Biological Diversity, we hereby provide notice, pursuant to Section 11(g)[1] of the Endangered Species Act[2] ("ESA") that the Department of Homeland Security ("DHS") and its component agency U.S. Customs and Border Protection ("CBP") are in violation of Section 7(a)(2) of the ESA[3] for its failure to consult with U.S. Fish and Wildlife Service ("FWS") in order to ensure its U.S.-Mexico border enforcement program does not jeopardize the continued existence of impacted threatened or endangered species, or result in the destruction or adverse modification of their critical habitat.

The Center for Biological Diversity ("Center") is a non-profit, public interest environmental organization headquartered in Tucson, with numerous offices throughout the United States, as well as in Baja California Sur, Mexico, dedicated to the protection of native species and their habitats through science, policy, and environmental law. The Center has more than 1.1 million members and on-line activists.

The Center has long advocated for better incorporation of environmental considerations into DHS border security planning and decisionmaking, and our ESA advocacy has resulted in

[1] 16 U.S.C. § 1540(g)
[2] 16 U.S.C. § 1531 *et seq.*
[3] 16 U.S.C. § 1536(a)(2)

the protection of numerous threatened and endangered species within the borderlands region, and the designation of hundreds of thousands of acres of their critical habitat.

The threshold for triggering an agency's section 7 consultation duties is low—if an action "may affect" a listed species or critical habitat, consultation is required.[4] DHS, however, has never completed consultation with FWS on the many threatened and endangered species and designated critical habitats that may be impacted by the southern border enforcement program.

A. The Endangered Species Act

The ESA is "the most comprehensive legislation for the preservation of endangered species ever enacted by any nation."[5] Its fundamental purposes are "to provide a means whereby the ecosystems upon which endangered species and threatened species depend may be conserved [and] to provide a program for the conservation of such endangered species and threatened species . . . ."[6] To achieve these objectives, the ESA directs FWS (or National Marine Fisheries Service) to determine which species of plants and animals are "threatened" and "endangered" and place them on the endangered species list.[7] An "endangered" or "threatened" species is one "in danger of extinction throughout all or a significant portion of its range," or "likely to become endangered in the near future throughout all or a significant portion of its range," respectively.[8]

Once a species is listed, the ESA provides a variety of procedural and substantive protections to ensure not only the species' continued survival, but its ultimate recovery. One central protection, Section 7(a)(2), mandates that all federal agencies avoid actions that: (1) jeopardize listed species; or (2) destroy or adversely modify designated critical habitat.[9] Federal agency actions include those projects or programs "authorized, funded, or carried out by such agency."[10] To comply with these Section 7(a)(2) safeguards, the federal agency taking action and FWS take part in a cooperative analysis of potential impacts to listed species and their designated critical habitat known as a consultation process.

First, the agency must obtain "a list of any listed or proposed species or designated or proposed critical habitat that may be present in the action area" from FWS.[11] If a species or critical habitat may be present, the agency must prepare a biological assessment to determine whether the proposed action "may affect" or "is not likely to adversely affect" any listed species or critical habitat.[12] If the agency determines, with the concurrence of the wildlife agency, that the action is not likely to adversely affect a listed species, formal consultation is not required.[13]

---

[4] 50 C.F.R. § 402.14(a).
[5] *TVA v. Hill*, 437 U.S. 180 (1978).
[6] 16 U.S.C. § 1531(b).
[7] *Id.* § 1533.
[8] *Id.* § 1532(6), (20).
[9] *Id.* § 1536(a)(2)
[10] 50 C.F.R. § 402.02.
[11] 16 U.S.C. § 1536(c)(1); 50 C.F.R. § 402.12(c)–(d).
[12] 16 U.S.C. § 1536(c)(1); 50 C.F.R. §§ 402.12(f), 402.14(a), (b)(1).
[13] *Id.* § 402.14(a).

Federal agencies must initiate formal consultation with FWS when their actions "may affect" a listed species or designated critical habitat.[14] The standard for consultation is low: "[a]ny possible effect, whether beneficial, benign, adverse, or of an undetermined character, triggers the formal consultation requirement."[15] Effects that must be considered as part of this inquiry include "direct and indirect effects of an action on the species or critical habitat, together with the effects of other activities that are interrelated or interdependent with that action, that will be added to the environmental baseline."[16] Indirect effects are "those that are caused by the proposed action and are later in time, but still are reasonably certain to occur."[17]

Through the formal consultation process, FWS prepares a "biological opinion" as to whether the action jeopardizes the species or destroys or adversely modifies critical habitat and, if so, suggests "reasonable and prudent alternatives."[18] During the consultation process, both agencies must "use the best scientific and commercial data available."[19]

In addition to duties under Section 7(a)(2), federal agencies are required under ESA Section 7(a)(1) to "utilize their authority for the conservation [*i.e.* recovery] of endangered species and threatened species."[20] As stated by the Ninth Circuit, agencies have an "affirmative obligation[] to conserve under section 7(a)(1)."[21]

Finally, Section 9 of the ESA prohibits the "taking" of any endangered species.[22] The ESA defines the term "take" broadly to include "harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct."[23] "Take" includes indirect as well as direct harm and need not be purposeful.[24] The ESA provides a limited exception to the prohibition on take under Section 9 for taking that is in compliance with an incidental take statement ("ITS").[25] Any take of a listed species that is not in compliance with an ITS violates Section 9.[26]

B. DHS U.S.-Mexico Border Enforcement Program

In 1994, the U.S. Border Patrol ("USBP") (now incorporated into CBP) issued its "prevention through deterrence" strategy and programmatic southern border enforcement plan. This coherent national plan, which persists today, represented the first time in its 70 year history that USBP developed a border control strategy. Recognizing that the intensification and expansion of border enforcement efforts would be implemented through numerous individual federal actions with myriad synergistic and cumulative environmental impacts throughout the U.S.-Mexico border region, the Department of Justice (under which Immigration and Naturalization Service ("INS") used to be housed, prior to its abolishment and the creation of DHS) prepared a programmatic environmental impact statement in 1994 ("1994 PEIS") and a 2001 supplemental programmatic environmental impact statement ("2001 SPEIS") pursuant to the National Environmental Policy Act ("NEPA")[27] for the southern border enforcement program.[28]

The 1994 PEIS and 2001 SPEIS analysis for the southern enforcement program considered a wide variety of USBP activities conducted within 50 miles of the U.S.-Mexico border, including:

Operational activities: the deployment and stationing of agents; USBP ground patrols, including patrols by foot, horseback, truck, motorcycle, and ATV; USBP air patrols, including patrols by fixed winged aircraft and helicopter.

Engineering activities: often taken in cooperation with Department of Defense agencies including U.S. Army Corps of Engineers and Joint Task Force-North, including large infrastructure projects such as border fences and walls, road construction and reconstruction, training facilities, and other buildings, as well as installation of high-intensity stadium lighting, checkpoints, and other portable measures.

Technological activities: for example, the installation of training ground sensors and remote video surveillance systems.

In the wake of the September 11, 2001 terrorist attacks, DHS was created and took over the border enforcement responsibilities of the former INS, and Congress vested DHS with significantly increased appropriations and aggressive mandates to secure the southern border. In response, DHS, largely through CBP, has deployed thousands of new enforcement agents,

---

[27] 42 U.S.C. 4321 et seq.

[28] NEPA requires that an EIS "shall" be supplemented when the "agency makes substantial changes in the proposed action" *or* "significant new circumstances or information" arises that is relevant to the environmental impacts of the action. 40 C.F.R. § 1502.9(c)(1)(ii). DHS has unlawfully not updated its programmatic environmental analysis for the U.S.-Mexico border enforcement program since late 2001, more than 15 years ago, despite the clear presence of both regulatory factors compelling the preparation of supplemental environmental analysis. Unlike the ESA allegations alleged herein, prior notice of NEPA violations is not required prior to filing suit.

increased off-road vehicle patrols, constructed or reconstructed thousands of miles of roads, erected hundreds of miles of border walls and fencing, and installed stadium lighting, radio towers, and remote sensors, among other actions. In a comprehensive 2016 overview of border security efforts, Congressional Research Service noted that under "a variety of indicators, the United States has substantially expanded border enforcement resources over the last three decades. *Particularly since 2001*, such increases include border security appropriations, personnel, fencing and infrastructure, and surveillance technology." Congressional Research Service, "Border Security: Ports of Entry" (April 19, 2016) (emphasis added).

For example, annual border enforcement appropriations grew from $263 million in FY 1990 to $1.4 billion FY 2002. Since 9/11 and the creation of DHS, annual appropriations increased again by an additional 170 percent, to $3.8 billion in FY 2015. Consequently, CBP is better staffed today than at any time in its history. In the five year time period 2004-2009 alone, CBP doubled the number of agents from approximately 10,000 to more than 20,000 agents.

The extent and location of fencing and infrastructure construction also illustrates the rapid expansion of the DHS southern border enforcement program and the potential impacts this rapidly expanding program may have on threatened and endangered species, and their designated critical habitat. Since 2001, border wall and barrier construction has been driven by newly enacted legislation, including the REAL ID Act of 2005 (P.L. 109-13, div. B), the Secure Fence Act of 2006 (P.L. 109-367), and the Consolidated Appropriations Act, 2008 (P.L. 110-161, div. E). Collectively, these laws direct DHS to construct "not less than 700 miles" of border fencing (not necessarily walls). 8 U.S.C. § 1103 *note*. As of May 2015, DHS had installed a total of 653 miles of border fencing (353 miles of primary pedestrian fencing, 300 miles of vehicle fencing, and 36 miles of secondary fencing behind the primary fencing, and 14 miles of tertiary fencing behind the secondary fence.

The 2016 election of Donald Trump has resulted in new expansions of the DHS southern border enforcement program that will likely further intensify impacts on threatened and endangered species and their designated critical habitat. Within days of taking office, on January 25, 2017 President Trump issued an Executive Order directing DHS to "secure the southern border of the United States through the immediate construction of a physical wall on the southern border." The E.O. defines "wall" to mean "a contiguous, physical wall or other similarly secure, contiguous, and impassable physical barrier." (Sec. 3(e)).

The E.O. also addresses other aspects of the border enforcement program that would have significant environmental effects. For example, Section 5 directs the DHS Secretary to "take all appropriate action and allocate all legally available resources to immediately construct, operate, control, or establish contracts to construct, operate, or control facilities to detain aliens at or near the border with Mexico," Section 8 directs the DHS Secretary, through the CBP Commissioner, "to hire 5,000 additional [CBP] agents," and to take "all appropriate action to ensure such agents enter on duty and are assigned to duty stations as soon as is practicable," and Section 12 of the E.O. authorizes DHS to enter federal lands, including National Parks, National Forests, Wilderness areas, and other protected federal lands, without constraint.

C. Threatened and Endangered Species and Critical Habitat in the U.S.-Mexico Borderlands

Although DHS has not conducted programmatic ESA consultation on its southern border enforcement program, the agency's predecessor INS did consider listed species during the previous programmatic NEPA analyses. Those NEPA documents confirm that the U.S.-Mexico borderland area (specifically, the 50-mile zone considered as the "action area") harbors great plant and wildlife diversity generally, as well as a high concentration of threatened and endangered species. The domestic ranges of many listed species are restricted solely to the southern borderlands regions, including the jaguar—largest cat species in the Americas.

Since the preparation of the 2001 SPEIS, several additional species have been listed under the ESA, including the yellow-billed cuckoo (western DPS) and Chiricahua leopard frog. In addition, FWS has finalized ESA critical habitat designations within 50 miles of the U.S.-Mexico border for 27 species since 2001:

i. Otay tarplant (threatened): 67 Fed. Reg. 76,030 (Dec. 10, 2002);

ii. Cushenbury oxytheca (endangered): 67 Fed. Reg. 78,570 (Dec. 24, 2002);

iii. Mexican spotted owl (threatened): 69 Fed. Reg. 53,182 (Aug. 31, 2004);

iv. Gila Chub (endangered): 70 Fed. Reg. 66,664 (Nov. 2, 2005);

v. Laguna Mountains skipper (endangered): 71 Fed. Reg. 74,592 (Dec. 12, 2006);

vi. Mexican flannelbush (endangered): 72 Fed. Reg. 54,984 (Sept. 27, 2007);

vii. San Diego fairy shrimp (endangered): 72 Fed. Reg. 70,648 (Dec. 12, 2007);

viii. Coastal California gnatcatcher (threatened): 72 Fed. Reg. 72,010 (Dec. 19, 2007);

ix. Peirson's milk-vetch (threatened): 73 Fed. Reg. 8,748 (Feb. 14, 2008);

x. Devils River minnow (threatened): 73 Fed. Reg. 46,988 (Aug. 12, 2008);

xi. San Bernardino bluegrass (endangered): 73 Fed. Reg. 47,706 (Aug. 14, 2008);

xii. San Diego thornmint (threatened): 73 Fed. Reg. 50,454 (Aug. 26, 2008);

xiii. Bighorn sheep (peninsular ranges DPS) (endangered): 74 Fed. Reg. 17,288 (April 14, 2009);

xiv. Piping plover (Texas wintering population) (threatened): 74 Fed. Reg. 23,476 (May 19, 2009);

xv. Quino checkerspot butterfly (endangered): 74 Fed. Reg. 28,776 (June 17, 2009);

xvi. Spreading navarretia (threatened): 75 Fed. Reg. 62,192 (Oct. 7, 2010);

xvii. San Diego ambrosia (endangered): 75 Fed. Reg. 74,546 (Nov. 30, 2010);

xviii. Thread-leaved brodiaea (threatened): 76 Fed. Reg. 6,848 (Feb. 8, 2011)

xix. Arroyo toad (endangered): 76 Fed. Reg. 7,245 (Feb. 9, 2011);

xx. Willowy monardella (endangered): 77 Fed. Reg. 13,394 (March 6, 2012);

xxi. Chiricahua leopard frog (threatened): 77 Fed. Reg. 16,324 (March 20, 2012);

xxii. Western snowy plover (Pacific DPS) (threatened): 77 Fed. Reg. 36,728 (June 19, 2012);

xxiii. Riverside fairy shrimp (endangered): 77 Fed. Reg. 72,070 (Dec. 4, 2012);

xxiv. Southwestern willow flycatcher (endangered): 78 Fed. Reg. 344 (Jan. 3, 2013);

xxv. Tidewater goby (endangered): 78 Fed. Reg. 8,746 (Feb. 12, 2013);

xxvi. Jaguar (endangered): 79 Fed. Reg. 12,572 (March 5, 2014);

xxvii. Acuna cactus (endangered): 81 Fed. Reg. 55,266 (August 18, 2016)

Nearly all of these 27 species with newly designated critical habitat rely on habitat in both the United States and Mexico, and DHS operations undertaken as part of the southern border enforcement program have been documented to negatively impair many of the species. *See, e.g.* Peirson's milkvetch (construction and maintenance of facilities by USBP, and other monitoring and enforcement activities of USBP involving vehicular operations on the Dunes, having negative impacts); jaguar (special management considerations needed "to alleviate the effects of border-related activities, allowing for some level of permeability so that jaguars may pass through the U.S.-Mexico border"); acuna cactus (recommending that USBP "minimize construction of new border control facilities, roads, towers, or fences"; special management considerations needed to address off-road border-related human disturbances); arroyo toad (borderlands subunit "may require special management considerations or protection to address threats from [USBP] activities").

D. DHS's Violations of the Endangered Species Act

Consultation under Section 7 is required whenever a discretionary agency action "may affect" any listed species or its critical habitat.[29] ESA implementing regulations define "action" as "all activities *or programs* of any kind authorized, funded, or carried out . . . by Federal agencies."[30] It is unquestionable that the DHS southern border enforcement program directly, indirectly, and cumulatively impacts many threatened and endangered species. Despite the clear presence of many listed species, the documented impact of DHS border enforcement activities on many of those species, and the significant number of new species listing and new critical habitat designations for threatened and endangered species within the borderlands, DHS has failed to initiate or complete ESA section 7 (a)(2) consultation with FWS in order to ensure that the ongoing implementation of the southern border enforcement program does not jeopardize the continued existence of any listed species or adversely modify or destroy the designated critical habitat for any of those species.

In addition, DHS has failed to take any affirmative action to conserve the many threatened and endangered species impacted by its southern border enforcement program. Accordingly, DHS is violating Section 7 (a)(1) and 7(a)(2) of the ESA.

E. Conclusion

Thank you for your attention to the allegations contained in this notice letter. Should DHS fail to remedy these violations of law within 60 days, the Center for Biological Diversity intends to pursue this matter in Federal District Court. Please contact Brian Segee at (805) 750-8852 should you wish to discuss this notice letter in further detail.

Subject: Fwd: Call for Agenda Items for 04/20/17 Call
Date: Monday, April 17, 2017 8:58:39 PM

Hey Gina and Lois,

Here are a few items I'd love to hear about on the ARD call:

- update on hiring, details, and laterals
- process for energy, infrastructure, and border wall HQ review
- FY17 budget, shutdown prospects, & FY18 budget

HQ perspectives always helpful.

Thanks,
Seth

Ecological Services Assistant Regional Director Monthly Call

Thursday, April 20 from 2:00-3:00 p.m. EST

Agenda

Phone Number: 866-712-9351

Passcode: 476832

I. Opening Remarks – Gary

II. FY17 Budget, Shutdown Prospects and FY18 Budget - Gary

III. De/Down Listing Work Plan – Gary

IV. Update on Energy, Infrastructure, and Border Wall Departmental Review - Gary

V. Update on Changes to the Unified Agenda – Gina

VI. Department Review of Grants and Cooperative Agreements – Gina

VII. Update on Hiring, Details, and Laterals – Gina

VIII. Update on June ARD Meeting in Alaska - Mary

IX. Regional Updates – All

---

Hi Folks,

We have comments on two Environmental Review proposed projects ready to submit to OEPC. Before we submit for inclusion in the DOI comments, I want to run our comments by you to determine if they need HQ review. Such as, are the Service's comments considered controversial?

Based on the interim guidance on energy, infrastructure and border wall projects from Gary Frazer on the April ARD call, we believe our comments on these two proposed projects won't result in significant delays or increases to the cost of either project, or be considered controversial or politically sensitive, e.g. Mx wolves, LPC, ABB, and/or be brought to the attention of the Secretary's office.

The summaries are provided below. Service comments on both are due to OEPC by May 8, 2017.

ER 17/0104: Review of Notice of Application for Preliminary Permit for Hydropower production, Caddo Dam Hydroelectric Project on Cypress Bayou, FERC No. 14838-000, Louisiana. Because this is a preliminary permit and the study design and operational schedule are currently incomplete, our comments are general. The Service's draft response is attached.

ER 15/0108 Review of Revised Draft EIS for the proposed Lower Bois d'Arc Creek Reservoir project, Fannin County, TX. The Service, Ecological Services Arlington, TX field office is a Cooperating Agency and has been engaged with the Corps of Engineers the past several years to evaluate the proposed project and coordinate mitigation requirements. Our review and comments address why the proposed mitigation plan does not fully compensate for the fish, wildlife and migratory bird habitat loss, and likely result in a net loss of fish and wildlife resources.

Craig: I looked at these. They seem to be fairly standard. I wouldn't think that they would rise to the level of needing to be briefed up. And they are due today.

-Ben

by you to determine if they need HQ review. Such as, are the Service's comments considered controversial?

Based on the interim guidance on energy, infrastructure and border wall projects from Gary Frazer on the April ARD call, we believe our comments on these two proposed projects won't result in significant delays or increases to the cost of either project, or be considered controversial or politically sensitive, e.g. Mx wolves, LPC, ABB, and/or be brought to the attention of the Secretary's office.

The summaries are provided below. Service comments on both are due to OEPC by May 8, 2017.

ER 17/0104: Review of Notice of Application for Preliminary Permit for Hydropower production, Caddo Dam Hydroelectric Project on Cypress Bayou, FERC No. 14838-000, Louisiana. Because this is a preliminary permit and the study design and operational schedule are currently incomplete, our comments are general. The Service's draft response is attached.

ER 15/0108 Review of Revised Draft EIS for the proposed Lower Bois d'Arc Creek Reservoir project, Fannin County, TX. The Service, Ecological Services Arlington, TX field office is a Cooperating Agency and has been engaged with the Corps of Engineers the past several years to evaluate the proposed project and coordinate mitigation requirements. Our review and comments address why the proposed mitigation plan does not fully compensate for the fish, wildlife and migratory bird habitat loss, and likely result in a net loss of fish and wildlife resources.

Hello Nikki and Charisa,

These are the ES briefing papers with updated target dates. I have uploaded most briefing papers to DTS, but did not have editing rights to FR2922. I also attached the updated briefing papers to this email because I figured it would be easier to print and replace in hard copy packages (as Tina Campbell suggested she and Charisa discussed yesterday).

<u>At Exec Sec</u>

Briefing Paper for Departmental Clearance of Federal Register Documents

I. Title of document: Endangered and Threatened Wildlife and Plants; Pima Pineapple Cactus Draft Recovery Plan

II. Popular short name, if applicable: Pima Pineapple Cactus Draft Recovery Plan

III. DCN: FR00002808

IV. RIN (for rules) or notice tracking number (for notices): FWS–R2–ES–2016–N203

V. Summary: We announce that our Pima pineapple cactus draft recovery plan is available. The cactus is listed as endangered under the Endangered Species Act of 1973, as amended. This plant species is currently found in southern Arizona and in northern Sonora, Mexico. The draft recovery plan includes specific recovery objectives and criteria to be met in order to enable us to remove this species from the list of endangered and threatened wildlife and plants. A proposed border wall is not anticipated to impede the recovery of the Pima pineapple cactus. We request that local, State, and Federal agencies, Tribes, and the public review and comment. We will also accept any new species status information throughout its range to assist with recovery plan finalization.

VI. Is timing critical? ☐Yes ☒ No

a. What is the target date, and (if applicable) "no later than" (NLT) date, for the FR document to clear DOI? Target date 6/02/2017

b. What is driving the timing?

c. What happens if the deadline is missed?

VII. Background: Section 4(f) of the Act requires us to provide public notice and an opportunity for public review and comment during recovery plan development. The draft recovery plan focuses on conserving and enhancing habitat quality, protecting the population, managing threats, monitoring progress, and building partnerships to facilitate recovery. We invite written comments on the draft recovery plan. In particular, we are interested in additional information regarding the current threats to the species and the costs associated with implementing the recommended recovery actions.

VIII. Is this a **high-profile** or **controversial** action? ☐Yes ☒ No

a. What are the **significant issues**?

b. **Who will care**, and **how strongly** will they care?

IX. Communications: Dear Interested Party letters will be sent out.

X. Is there an information collection associated with this document? ☐ Yes ☒ No

a. Does the document have any approved OMB control number? ☐Yes ☐ No

If yes, the OMB control number is:

a. Does the document require ☐ a new OMB control number or ☐renewal of an existing approval?

If a new number or renewal is required, what is the current status?

XI. For rulemaking actions only: Has this action, in its current stage, been on a 90-day List? ☐Yes ☐No

If yes, on which 90-day List did it first appear in its current stage? N/A

Did OIRA provide comments or change the significance? ☐Yes ☐No

If yes, summarize comments and resolution: N/A

XII. Approval is requested to send the document to:

☒ The Office of the Federal Register for publication, or

☐OIRA for review.

HOT PROJECT
See message below.

I need you t to print out all these Briefing Papers then track down the hard copy packages and replace the old BP with the new BP.

If you can get this done this afternoon... awesome! Especially the ones up in EX SEC.

Thanks! :)

Send me an email when it's done

Major Infrastructure Project
2017

Project Name: Boardman to Hemingway Transmission Line (B2H)

Project Sponsor: Idaho Power Company

Project Description

- **Sector:** Transmission Line
- **Lead Agency:** Department of Energy
- **Any Identifying Project Numbers:** NA
- **Location:** Oregon and Idaho
- **Estimated Cost: >$**100 million
- **Other:** NA

FWS Involvement

- **Region:** 1
- **Field Office:** Oregon FO
- **Status of FWS Involvement:** Ongoing involvement is primarily technical assistance, guidance, and coordination to facilitate completion of other permitting agencies' (BLM and State of Oregon) review and decision-making processes and, in the longer term (if applicable), assisting the project sponsor and agencies in effectively constructing and implementing the project.
- **Project Timeline:** Formal regulatory review and findings (ESA section 7 consultation) completed January 2017.

Major Infrastructure Project
2017

Project Name: BPA I-5 Corridor Reinforcement Project

Project Sponsor: Bonneville Power Administration

Project Description

- **Sector:** Restoration
- **Lead Agency:** Bonneville Power Administration
- **Any Identifying Project Numbers:** NA
- **Location:** Washington
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region**: 1
- **Field Office:** Washington FO
- **Status of FWS Involvement:** FWS expects next steps in ESA Section 7 consultation to occur once BPA delivers additional field information to quantify impacts to habitat for listed species, impacts to other completed ESA Section 7 consultations, and details of mitigation planning to offset impacts to listed species.
- **Project Timeline:** BPA and FWS staff are waiting for guidance from BPA management on whether to complete the project planning or terminate the project. This direction is anticipated in May 2017. Completion of the consultation will take approximately 6 weeks following receipt of this information from BPA.

Major Infrastructure Project
2017

Project Name: Jordan Cove-Pacific Connector LNG Terminal and Pipeline (JCPC)

Project Sponsor: Veresen Inc. and Williams Gas Pipeline Company

Project Description

- **Sector:** Pipeline
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers:** FERC Docket No. PF17-4
- **Location:** Oregon
- **Estimated Cost: >$**100 million
- **Other:** Pipeline wholly within Oregon; LNG export component of project is FERC nexus.

FWS Involvement

- **Region:** 1
- **Field Office:** Oregon FO
- **Status of FWS Involvement:** FWS currently minimally involved because 1) project is in FERC pre-filing stage and 2) materials from FWS technical assistance and review of previous versions of the project remain applicable. Future FWS involvement will primarily entail ESA section 7 consultation with permitting agencies (FERC, U.S. Army Corps of Engineers, USDA Forest Service and BLM), including technical assistance for development of those agencies' biological assessment (BA), review and approval of the BA, and analyses and determinations in a FWS Biological Opinion. These activities are anticipated to begin later in FY2017 or early FY2018. However, specific timing, substance, and outcomes of this involvement are contingent on FERC-controlled schedule and on disclosure by FERC and JCPC of new information about project details, impacts, and conservation measures compared to previous iterations of the project.
- **Project Timeline:** FWS involvement will continue into 2018

Major Infrastructure Project
2017

Project Name: Millennium Bulk Terminals Coal Export Terminal

Project Sponsor: Millenium Bulk Terminals Longview LLC

Project Description

- **Sector:** Energy
- **Lead Agency:** U.S. Army Corps of Engineers.
- **Any Identifying Project Numbers:** NA
- **Location:** Washington
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region: 1**
- **Field Office:** Washington FO
- **Status of FWS Involvement:** FWS received a Biological Assessment and consultation request on 1/25/2017, but upon review determined that it did not concur with all of the effect determinations and that the information provided is insufficient for initiating formal consultation. FWS is in the process of communicating information needs to the applicant and ACOE in the form of a non-concurrence letter. Once the necessary information is received FWS will initiate consultation. Consultation should conclude in 135 days.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: Rota Harbor Modification Feasibility Study

Project Sponsor: U.S. Army Corps of Engineers

Project Description

- **Sector:** Transportation
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** NA
- **Location:** Rota Island, Commonwealth of the Northern Marianas Islands
- **Estimated Cost: >$**100 million
- **Other:** NA

FWS Involvement

- **Region:** 1
- **Field Office:** Pacific Islands FWO
- **Status of FWS Involvement:** Currently minimal because project is in the initial Fish and Wildlife Coordination Act investigation phase. Due date to complete the feasibility study is June 2017, assuming there are no extensions.
- **Project Timeline**: Unknown due to project status, but likely no sooner than June 2018.

Major Infrastructure Project
2017

Project Name: Skookumchuck Wind Energy Project

Project Sponsor: Renewable Energy Systems (RES)

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** NA
- **Any Identifying Project Numbers:** NA
- **Location:** Lewis and Thurston counties**,** Washington
- **Estimated Cost:** >$100 million
- **Other:** The project site is on private timberlands owned by the Weyerhaeuser Timber Company. Approximately 50 wind turbines are anticipated at this site.

FWS Involvement

- **Region: 1**
- **Field Office:** Washington FO
- **Status of FWS Involvement:** FWS is involved because RES desires an ESA Section 10 Incidental Take Permit for the marbled murrelet, and also a bald and golden eagle permit. FWS has been providing technical assistance for their Habitat Conservation Plan for approximately one year. This spring, FWS is planning to publish a Notice of Intent in the Federal Register to conduct public scoping for an Environmental Impact Statement.
- **Project Timeline:** RES states they would like project completion in 2018.

Major Infrastructure Project
2017

Project Name: Tinian Harbor Modification Feasibility Study

Project Sponsor: U.S. Army Corps of Engineers

Project Description

- **Sector:** Transportation
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** NA
- **Location:** Tinian Island, Commonwealth of the Northern Marianas Islands
- **Estimated Cost: >$**100 million
- **Other:** NA

FWS Involvement

- **Region:** 1
- **Field Office:** Pacific Islands FWO
- **Status of FWS Involvement:** Currently minimal because project is in the initial Fish and Wildlife Coordination Act investigation phase. Due date to complete the feasibility study is June 2017, assuming there are no extensions.
- **Project Timeline**: Unknown due to project status, but likely no sooner than June 2018.

Major Infrastructure Project
2017

Project Name: Yakima River Basin Integrated Water Resource Management Plan (Integrated Plan)

Project Sponsor: Bureau of Reclamation (BOR) and the Washington State Department of Ecology (WDOE).

Project Description

- **Sector:** Water Supply
- **Lead Agency:** BOR and WDOE
- **Any Identifying Project Numbers:** NA
- **Location:** Yakima River Basin, Washington
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region: 1**
- **Field Office:** Washington FO
- **Status of FWS Involvement:** FWS has been working with BOR and the WDOE regarding the Yakima River Basin Integrated Water Resource Management Plan (Integrated Plan) since 2011. The Integrated Plan is a 30-year comprehensive plan that addresses a variety of water resource and ecosystem issues affecting fish passage; habitat; and agricultural, municipal, and domestic water supplies in the Yakima River basin. Due to long term nature and the size and complexity of the Integrated Plan, a phased approach to the implementation of the Integrated Plan is required. Individual projects advanced as part of the Integrated Plan are tiered to the Program-level consultation, NEPA, and Fish and Wildlife Coordination Act Report. To date, several "early action" projects have been implemented from 2013 to 2016. These include: (1) irrigation diversion consolidations, (2) geotechnical drilling investigations, (3) water bank transfers, (4) Cle Elum Pool Raise, and (5) habitat improvement projects
- **Project Timeline:** Ongoing until 2043.

Major Infrastructure Project
2017

Project Name: North South Corridor

Project Sponsor: Arizona Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** NA
- **Location:** Maricopa, Pinal, and Pima counties, Arizona
- **Estimated Cost:** Anticipated costs > $100 million, planning and construction combined
- **Other:** The Federal Highway Administration and Arizona Department of Transportation are currently conducting the environmental review under the NEPA process for the proposed North South Corridor Project which entails the construction of a new freeway from the Town of Picacho, located between Phoenix and Tucson, Arizona, to Apache Junction, located east of Phoenix, Arizona. The project is designed to accommodate traffic increases between Tucson and Phoenix. The North South Corridor project has been in the planning stages since 2013.

FWS Involvement

- **Region:** 2
- **Field Office:** Arizona ESFO
- **Status of FWS Involvement:** FWS is a Cooperating Agency under NEPA, providing technical assistance on avoiding and minimizing impacts to trust resources. There will likely be a need for ESA section 7 consultation later in the planning process.
- **Project Timeline:** Unknown, early in planning process.

Major Infrastructure Project
2017

Project Name: Second Access to South Padre Island

Project Sponsor: Texas Department of Transportation, and Cameron County Regional Mobility Authority

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** FHWA-TX-EIS-09-02-D
- **Location:** South Padre Island over Laguna Madre, Cameron County to Willacy County, Texas
- **Estimated Cost:** The 2015 Final EIS estimated project cost at $631,350,000
- **Other:** Length of the proposed bridge, including approach roads is 17 miles, extending from the mainland location at FM 510 in Cameron County across the Laguna Madre to connection with State Park Road 100/Ocean Boulevard on South Padre Island.

FWS Involvement

- **Region:** 2
- **Field Office:** Texas Coastal Ecological Services Field Office
- **Status of FWS Involvement:** FWS will review NEPA and Clean Water Act 404 permit documents. FWS will also complete a consultation for the US Army Corp of Engineers under section 7 of the ESA.
- **Project Timeline:** Anticipate receipt of Biological Assessment to initiate section 7 consultation in 3-6 months.

Major Infrastructure Project
2017

Project Name: World Trade International Bridge Expansion in Laredo, Texas

Project Sponsor: City of Laredo and bridge owner

Project Description

- **Sector:** Transportation
- **Lead Agency:** State Department, International Boundary and Water Commission
- **Any Identifying Project Numbers:** NA
- **Location:** Rio Grande at Laredo, Webb County, TX
- **Estimated Cost:** The total cost of this project will be over $100,000,000 based upon the following estimates: 2015 Texas Department of Transportation report on Texas-Mexico International Bridges, estimates cost for the GSA facilities at over $19.5 million and the roadway improvement costs related to the World Trade International Bridge were estimated at approximately $93 million.
- **Other:** The plan includes expanding the current 8 lanes to 16 lanes in order to expedite the flow of goods across the border and reduce traffic congestion. Alongside the improvements of the World Trade Bridge; exit lanes to Bob Bullock-Loop 20 and Interstate 35 will also need to be improved.

FWS Involvement

- **Region:** 2
- **Field Office:** Texas Coastal Ecological Services Field Office
- **Status of FWS Involvement:** Providing technical assistance to the development of the Supplemental Environmental Assessment to be prepared to amend existing Presidential Permit
- **Project Timeline:** Start meeting with agencies March 13, 2017. The completion of the project will depend on the final plans that are accepted.

Major Infrastructure Project
2017

Project Name: **Texas Central High-Speed Railway (or "TCR")**

Project Sponsor: Texas Central Partners, LLC

Project Description

- **Sector**: Transportation/Rail
- **Lead agency**: Federal Railroad Administration
- **Project Numbers**: NA
- **Location**: The proposed route runs through Dallas, Ellis, Navarro, Freestone, Limestone, Leon, Madison, Grimes, Waller, Harris counties, Texas
- **Estimated cost**: estimated costs in excess of $10 billion

FWS Involvement

- **Region**: 2
- **Field Office**: Texas Coastal and Arlington ESFOs
    - **Lead Field Office**: Texas Coastal ESFO
- **Status of FWS Involvement**: The Texas Coastal ESFO staff reviewed species-specific information and assessment of survey protocol for portions of the rail alignment(s) potentially affecting the following species: large-fruited sand-verbena (*Abronia macrocarpa*), Navasota ladies'-tresses (*Spiranthes parksii*), and Houston toad (*Bufo houstonensis).* Starting in Fall 2016, Texas Coastal ESFO staff coordinated with the FWS-Texas Department of Transportation biologist/liaison regarding potential impacts to fish and wildlife trust resources. Our involvement is anticipated to extend into 2019, if effects to listed species are likely. This is due to potential consultation procedures pursuant to Section 7 of the Endangered Species Act.
- **Project Timeline**: The lead federal agency is developing an Environmental Impact Statement under NEPA, and a draft EIS is anticipated within a year. The Texas Coastal ESFO has been involved with this project since 2011. Alignment changes to this project are anticipated therefore, work will likely continue into spring/summer 2019 and include species surveys.

Major Infrastructure Project
2017

Project Name: Salt Bayou Beach Nourishment and Intracoastal Waterway Syphons

Project Sponsor: Jefferson County, Texas

Project Description

- **Sector:** Transportation/Coastal Resiliency
- **Lead Agency:** U.S. Fish and Wildlife Service & Texas Parks and Wildlife
- **Any Identifying Project Numbers:** Permit No: SWG-2015-00444.
- **Location:** Jefferson, Galveston, and Chambers counties, Texas
- **Estimated Cost:** Approximately $100 Million
- **Other:** Project is essential to maintaining freshwater marsh conditions on over 60,000 acres of coastal marsh. Most of this marsh is protected by Sea Rim State Park, J.D Murphy Wildlife Management Area and McFaddin National Wildlife Refuge. This huge marsh complex is in eminent danger of disappearing without this effort. This marsh was proven to be the primary factor of protecting the City of Port Author and a major portion of the petrochemical refinery capacity in the U.S. from tropical storm flooding during Hurricane Ike in 2008. Once restored, this marsh will protect refineries responsible for half the aviation fuel produced in US. More than 20 percent of the nation's fuel is refined behind this 60,000 acre marsh. This marsh also protects one of the busiest portions of the Gulf Intracoastal Waterway and the busiest military port in world.
  Project includes leveeing up 40,000 acre marsh and protecting levee with offshore sands and installing several giant syphons across the Gulf Intracoastal Waterway.

FWS Involvement

- **Region:** Region 2
- **Field Office:** McFaddin National Wildlife Refuge and Texas Coastal ESFO
  - **Lead Field Office:** McFaddin National Wildlife Refuge
- **Status of FWS Involvement:** Advisory and significant portions of project will occur on McFaddin National Wildlife Refuge
- **Project Timeline:** Work will begin on portions of project this May and will continue over next several years.

Major Infrastructure Project
2017

Project Name: Texas Coastal Storm Surge Reduction and Ecological Restoration Feasibility Study

Project Sponsor: Texas General Land Office for the study
No local sponsor for construction has been identified

Project Description

- **Sector:** Transportation/Waterborne Shipping
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** NA
- **Location:** Entire Texas coast
- **Estimated Cost:** The study is $19.1 million; however construction costs are expected to be several billion dollars.
- **Other:** This study aims to protect the nation's commercial interests with respect to oil refineries infrastructure and the import and export of goods and commodities.

FWS Involvement

- **Region:** 2
- **Field Office:** Texas Coastal Ecological Services Field Office
- **Status of FWS Involvement:** Advisory in the planning process
- **Project Timeline:** The final U.S. Army Corps of Engineers' report to the Chief Engineer is expected in 2020, however our involvement will conclude in 2019. FWS will also be involved in any necessary ESA section 7 consultations related to construction.

Major Infrastructure Project
2017

Project Name: The Houston Ship Channel Improvement Project

Project Sponsor: The Port of Houston Authority

Project Description

- **Sector:** Transportation/Waterborne Shipping
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** NA
- **Location:** Harris and Chambers counties, Texas
- **Estimated Cost:** The Study will finalize in 2020 at a cost of $19.1 million. Project is not clearly defined, however the construction costs equate to $500 million to $1 billion for improvements.
- **Other:** U.S. Army Corps of Engineers is working to identify widening and deepening measures aimed at providing safer passage for larger vessels, increased mooring capacities for emergency and poor weather conditions, and bend easing opportunities, along the entire Houston Ship Channel.

FWS Involvement

- **Region:** 2
- **Field Office:** Texas Coastal Ecological Services Field Office
- **Status of FWS Involvement:** The FWS provides technical assistance and makes recommendations for the development of an environmentally sound project through Planning Aid Letters and Fish and Wildlife Coordination Act Reports. Our recommendations often focus on the conservation of listed species and migratory birds; however, FWS does provide recommendations and comments on project alternatives that help conserve other fish and wildlife resources as necessary. FWS will also be involved in any necessary section 7 consultations under ESA
- **Project Timeline:** Study will conclude in 2020. There is no timeline for construction.

Major Infrastructure Project
2017

Project Name: Matagorda Ship Channel Improvement Project

Project Sponsor: Port of Calhoun Navigation District

Project Description

- **Sector:** Transportation/Waterborne Shipping
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** NA
- **Location:** Matagorda County, Texas
- **Estimated Cost:** Greater than $100 million
- **Other:** The U.S. Army Corps of Engineers and the local sponsor decided to revisit the 2009 project in hopes of increasing channel depth and width and to create a new dredged material management plan. Environmental Impacts are expected to increase as a result of the channel changes.

FWS Involvement

- **Region: 2**
- **Field Office:** Texas Coastal Ecological Services Field Office
- **Status of FWS Involvement:** The FWS will provide technical guidance expertise during the planning phases. FWS will also be involved in any necessary ESA section 7 consultations.
- **Project Timeline:** Study completion date is late 2020

Major Infrastructure Project
2017

Project Name: Gulf Intercoastal Waterway Brazos River Floodgates and Colorado River Locks Systems Feasibility Study

Project Sponsor: U.S. Army Corps of Engineers

Project Description

- **Sector:** Transportation/Waterborne Shipping
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** NA
- **Location:** Brazos and Colorado River intersections along the Gulf Intercoastal Waterway
- **Estimated Cost:** $500 million to $1 billion
- **Other:** The study will identify environmentally responsible alternatives for replacing the floodgate/lock structures and will develop alternatives to maintain 40 miles of channel and shorelines along the Gulf Intercostal Waterway.

FWS Involvement

- **Region: 2**
- **Field Office:** Texas Coastal Ecological Services Office
- **Status of FWS Involvement:** The FWS will provide technical guidance and expertise regarding impacts to fish and wildlife trust resources. The FWS will also be involved in any necessary ESA section 7 consultations.
- **Project Timeline:** The study will finalize in 2019 with a U.S. Army Corps of Engineers Chief's report and final recommendations

Major Infrastructure Project
2017

Project Name: Vista Ridge Regional Water Supply

Project Sponsor: Central Texas Regional Water Supply Corporation

Project Description

- **Sector:** Municipal
- **Lead Agency:** Army Corps of Engineers
- **Any Identifying Project Numbers:** NA
- **Location:** Burleson, Lee, Bastrop, Caldwell, Guadalupe, Comal, and Bexar counties, Texas
- **Estimated Cost:** Estimated between $884 million and $3.4 billion
- **Other:** 142-mile raw water pipeline

FWS Involvement

- **Region:** Region 2
- **Field Office:** Austin Ecological Services Field Office
- **Status of FWS Involvement:** Formal section 7 consultation under the Endangered Species Act was initiated in November 2016.
- **Project Timeline:** Final Biological Opinion will be issued in April 2017.

Major Infrastructure Project
2017

Project Name: Arizona Water Settlement Act – Public Law 108–451—Dec. 10, 2004

Project Sponsor: New Mexico Central Arizona Project Unit

Project Description

- **Sector:** Water/Diversion and Storage
- **Lead Agency:** Bureau of Reclamation
- **Any Identifying Project Numbers:** NA
- **Location:** Grant and Hidalgo counties, New Mexico
- **Estimated Cost:** $128 million Federal funds
- **Other:** Part of the Arizona Water Settlement Act will provide 14,000 acre-feet of water for agricultural or municipal use within the two New Mexico counties.

FWS Involvement

- **Region:** 2
- **Field Office:** New Mexico Ecological Services Field Office and Arizona Ecological Services Field Office
    - **Lead Field Office:** New Mexico Ecological Services Field Office
- **Status of FWS Involvement:** FWS is providing technical assistance and in informal consultation under ESA, Fish and Wildlife Coordination Act, and NEPA.
- **Project Timeline:** Record of Decision by December 31, 2019. No project defined at this time, so no timeline can be projected for FWS products (biological opinion and Fish and Wildlife Coordination Report) delivery.

Major Infrastructure Project
2017

Project Name: Annova Liquefied Natural Gas Facility

Project Sponsor: Exelon with Annova LNG

Project Description

- **Sector:** Energy
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers:** FERC Docket No. PF15-15-000
- **Location:** Port of Brownsville, Cameron County, Texas
- **Estimated Cost:** $3 billion
- **Other:** Natural gas liquefaction facility to liquefy domestic natural gas for export to international markets via ocean-going vessels. Maximum output at optimal operating conditions of 6.95 million tons per annum (mtpa). Liquefaction facility on a 731-acre parcel leased from the Port of Brownsville. Location and size of feed gas pipeline for the facility via an intrastate natural gas pipeline not identified by Annova to date.

FWS Involvement

- **Region:** 2
- **Field Office:** Texas Coastal Ecological Services Field Office
- **Status of FWS Involvement:** As a Cooperating Agency under NEPA, FWS will review EIS and complete Section 7 ESA Consultation. FWS will review and provide comments and recommendations to U.S. Army Corps of Engineers (USACE) for required Section 10 and 404 permits to be issued by USACE.
- **Project Timeline:** FERC anticipates license issuance mid-2018. USACE anticipates concurrent permit authorization.

Major Infrastructure Project
2017

Project Name: Texas Liquefied Natural Gas Facility

Project Sponsor: Texas LNG Company

Project Description

- **Sector:** Energy/Natural Gas
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers:** FERC Docket No. PF15-14-000
- **Location:** Port of Brownsville, Cameron County, TX
- **Estimated Cost:** >$100 million
- **Other:** Natural gas liquefaction facility to liquefy domestic natural gas for export to Asian markets via ocean-going vessels. Maximum output at optimal operating conditions of 4 million tons per annum (mtpa). Liquefaction facility on a 625-acre parcel leased from the Port of Brownsville. Location and size of feed gas pipeline for the facility via an intrastate natural gas pipeline not identified by Texas LNG to date.

FWS Involvement

- **Region:** 2
- **Field Office:** Texas Coastal Ecological Services Field Office
- **Status of FWS Involvement:** Cooperating Agency under NEPA, Application filed 3/31/16. Will review EIS and complete Section 7 ESA consultation. Will review and provide comments and recommendations to U.S. Army Corps of Engineers (USACE) for required Section 10 and 404 permits to be issued by USACE.
- **Project Timeline:** According to project sponsor, Phase 1 (2 mtpa) will begin production in 2022. Phase 2, anticipated to begin production in 2022/2023 depending on market demand, will increase capacity by additional 2 mtpa.

Major Infrastructure Project
2017

Project Name: Rio Grande Liquefied Natural Gas Facility and Rio Bravo Pipeline Project

Project Sponsor: Next Decade, LLC

Project Description

- **Sector:** Energy/Natural Gas
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers:** FERC Docket No. PF15-20-000
- **Location:** Terminal in Port of Brownsville, Cameron County, TX. Pipelines from Agua Dulce, Nueces County, TX to Brownsville, Cameron County, TX
- **Estimated Cost:** No figure found on cost of construction of the Rio Grande Liquefied Natural Gas Facility. The Federal Energy Regulatory Commission (FERC) application reports that the Rio Bravo Pipeline (for the Rio Grande LNG Terminal) will have a total cost of $2,173,362,909.
- **Other:** Natural gas liquefaction facility to liquefy domestic natural gas for export, via ocean going LNG vessels (with capacities ranging from 125,000 cubic meters to 185,000 cubic meters), to international markets. Also, LNG loaded onto trucks at the Terminal will be used solely for the purpose of supplying LNG to truck fueling facilities in South Texas and will not be re-gasified and reintroduced into the United States of America ("U.S.") natural gas pipeline system. Maximum output of the facility at optimal operating conditions is 27 million tons per annum (mtpa). Liquefaction facility on a 984-acre parcel leased from the Port of Brownsville. Sponsor will also construct the feed gas pipelines. The intrastate, feed gas pipelines, identified as Rio Bravo Pipeline Project include twin 42-inch outside diameter natural gas pipelines, sharing a 137-mile-long right-of-way. The ancillary facilities include a header system, compressor stations, mainline valves, and pigging facilities. The pipelines will extend from the Agua Dulce Hub in Nueces County, transecting Kleberg, Jim Wells, Kenedy, Willacy, and Cameron counties to the liquefaction facility on the Brownsville Ship Channel in Cameron County.

FWS Involvement

- **Region:** 2
- **Field Office:** Texas Coastal Ecological Services Field Office
- **Status of FWS Involvement:** The FWS is a Cooperating Agency under National Environmental Policy Act. FWS will provide information for the development of the Environmental Impact Statement (EIS) and review both the draft and final EIS. FERC will consult with the FWS under section 7 of the ESA. FWS will also review and provide comments and recommendations to U.S. Army Corps of Engineers (USACE) for the required Section 10 and 404 permits to be issued by USACE.
- **Project Timeline:** The application for a FERC license was filed on 5/05/16. FERC anticipates license issuance in mid-2018

Major Infrastructure Project
2017

Project Name: Valley Crossing Pipeline – Spectra Energy U.S./Mexico Pipeline

Project Sponsor: Enbridge, formerly Spectra Energy

Project Description

- **Sector:** Energy/Natural Gas
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers:** FERC Docket No. CP17-19-000
- **Location:** Agua Dulce, Nueces County, TX to Brownsville, Cameron County, TX
- **Estimated Cost**: Estimated investment $1.5 billion
- **Other:** The 42-inch diameter natural gas export pipeline would be constructed to interconnect with a pipeline, sponsored by Mexico's state-owned utility, CFE. Interconnection site, to be permitted by Federal Energy Regulatory Commission (FERC), is located in the Gulf of Mexico. Pipeline would have the capacity of carrying 2.6 billion cubic feet per day of natural gas.

FWS Involvement

- **Region:** 2
- **Field Office:** Texas Coastal Ecological Services Field Office
- **Status of FWS Involvement:** Will review NEPA documents and Clean Water Act section 404 and International Boundary and Water Commission permit documents. A section 7 consultation under the ESA will also be conducted with the FWS.
- **Project Timeline:** According to sponsor, completion of project is anticipated to be October 2018.

Major Infrastructure Projects
2017

Project Name: **Cheniere Midcontinent Supply Header Interstate Pipeline (MIDSHIP)**

Project Sponsor: Cheniere Midstream Holdings, Incorporated (Inc.), a subsidiary of Cheniere Energy Inc., Houston, Texas.

Project Description

- **Sector**: Energy/Natural Gas
- **Lead Agency**: Federal Energy Regulatory Commission (FERC)
- **Any Identifying Project Numbers**: NA
- **Location**: Bryan, Canadian, Carter, Garvin, Grady, Johnston, Kingfisher, and Stephens counties, Oklahoma
- **Estimated Cost**: Unknown, but one estimate (Matt Barr with Cheniere) put the cost at $1 billion.
- **Other**: Construction of 200 miles of 30-inch or 36-inch diameter, new-build natural gas pipeline. Project includes 3 metering stations, eight receipt meters and one lateral pipeline. This pipeline would provide a capacity of up to 1,400 million cubic feet per day (MMcf/d).

FWS Involvement

- **Region**: 2
- **Field Office**: Oklahoma Ecological Services Field Office (ESFO)
- **Status of FWS Involvement**: Principally National Environmental Policy Act (NEPA) and Endangered Species Act (ESA) consultation. The FWS has provided initial review responses (February 2017), including lack of concurrence with not likely to adversely affect determinations on certain species. Sponsor is preparing project revisions and conducting species surveys to address ESA issues. Sponsor and FWS are scheduling conference call to discuss new information.
- **Timeline for Completion of FWS Involvement**: Cheniere has proposed to file their FERC application in May 2017 with construction estimated to begin in the summer of 2018. Assuming construction begins in the summer of 2018, FWS involvement should end on or about that date.

Major Infrastructure Project
2017

Project Name: Heart of Texas Wind Energy Habitat Conservation Plan

Project Sponsor: Renewable Energy Systems Ltd / Heart of Texas, LLC.

Project Description

- **Sector:** Wind Energy/Renewable
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers:** FR Notice FWS-R2-ES-2016-N212; Permit # TE-13632C
- **Location:** McCulloch County, Texas
- **Estimated Cost:** $260 million.
- **Other:** The project is the installation and operation of up to 70 wind turbines to generate 2 to 3.5 megawatts of electricity. The wind farm will be location on 10,762 acres of private land. The incidental take permit will be for the black-capped vireo on approximately 725 acres. The proposed mitigation property is onsite.

FWS Involvement

- **Region**: 2
- **Field Office:** Austin Ecological Services Field Office
- **Status of FWS Involvement:** The Federal Register Notice will be reviewed in HQ following preparation of a briefing paper and information memo for the BLPS Chief. Once it is published in the Federal Register a 30 day public review period will begin.
- **Project Timeline:** A permitting decision is anticipated by August 2017.

Major Infrastructure Projects
2017

Project Name: **Frontier City Wind Project**

Project Sponsor: Energy Renewal Partners and Duke Energy

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: NA
- **Any Identifying Project Numbers**: NA
- **Location**: Kay County, Oklahoma
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the turbine. This project, when complete, would total 119 turbines.
- **Other**: Consists of three phases. Phase one is operational (61 turbines), phase two is on hold due to issues with Federal Aviation Administration, and phase three (58 turbines) is in initial stages of evaluation. Tier 4 post construction studies at phase one began in June 2016.

FWS Involvement

- **Region**: Region 2
- **Field Office**: Oklahoma ESFO and Migratory Birds RO
    - **Lead Field Office, if more than one involved:** Oklahoma ESFO
- **Status of FWS Involvement**: Advisory only at this point. Anticipate sponsor will apply for Eagle Take Permit but submission date is unknown.
- **Timeline for Completion of FWS Involvement**: Unknown.

Major Infrastructure Projects
2017

Project Name: **Sundance Wind Project**

Project Sponsor: TradeWind Energy

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: NA
- **Any Identifying Project Numbers**: NA
- **Location**: Alfalfa and Woods counties, Oklahoma
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the turbine. This project, if both phases are completed, would total 376 turbines.
- **Other**: Consists of two phases -- phase one (200 turbines) and phase two (176 turbines).

FWS Involvement

- **Region**: Region 2
    - **Lead Region, if more than one involved:** NA
- **Field Office**: Oklahoma ESFO and Migratory Birds RO
    - **Lead Field Office, if more than one involved:** Oklahoma ESFO
- **Status of FWS Involvement**: Advisory only at this point. Anticipate sponsor will need Eagle Take Permit. Initial eagle surveys have been completed.
- **Timeline for Completion of FWS Involvement**: Unknown. Information available to the FWS indicates construction will initiate in 2017.

Major Infrastructure Projects
2017

Project Name: **Red Dirt Wind Project**

Project Sponsor: TradeWind Energy

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: NA
- **Any Identifying Project Numbers**: NA
- **Location**: Logan and Kingfisher counties, Oklahoma
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the turbine. This project, when complete, would total 130 turbines.
- **Other**: Project will generate 300 MW of energy.

FWS Involvement

- **Region**: Region 2
- **Field Office**: Oklahoma ESFO and Migratory Birds RO
    - **Lead Field Office, if more than one involved:** Oklahoma ESFO
- **Status of FWS Involvement**: Advisory only at this point. Sponsor has completed Tier 3 studies. The FWS is awaiting a draft Eagle Conservation Plan and a Bird and draft Bat Conservation Strategy. Documents expected in March/April 2017. Construction is slated to begin in Spring 2017.
- **Timeline for Completion of FWS Involvement**: Unknown.

Major Infrastructure Projects
2017

Project Name: **Thunder Ranch Wind Farm**

Project Sponsor: TradeWind Energy

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: NA
- **Any Identifying Project Numbers**: NA
- **Location**: Noble, Kay and Garfield counties, Oklahoma
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the turbine. This project, when complete, would total 130 turbines.
- **Other**: Project will generate 300 MW of energy. Eagle studies are complete. Numerous eagles and nests were observed.

FWS Involvement

- **Region**: Region 2
- **Field Office**: Oklahoma ESFO and Migratory Birds RO
    - **Lead Field Office, if more than one involved:** Oklahoma ESFO
- **Status of FWS Involvement**: Advisory only at this point. Anticipate sponsor will apply for Eagle Take Permit but submission date is unknown.
- **Timeline for Completion of FWS Involvement**: Unknown.

Major Infrastructure Projects
2017

Project Name: **Chisholm View Wind Project**

Project Sponsor: TradeWind Energy, but may have recently been sold to Enel Energy

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: NA
- **Any Identifying Project Numbers**: NA
- **Location**: Garfield and Grant counties, Oklahoma
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the installed generator. This project is believed to consist of 130 turbines.
- **Other**: Consists of two phases but FWS is unable to confirm. Phase one may already have been constructed.

FWS Involvement

- **Region**: Region 2
- **Field Office**: Oklahoma ESFO and Migratory Birds RO
    - **Lead Field Office, if more than one involved:** Oklahoma ESFO
- **Status of FWS Involvement**: Advisory only at this point.
- **Timeline for Completion of FWS Involvement**: Unknown. Information available to the FWS indicates construction will initiate in 2017.

Major Infrastructure Projects
2017

Project Name: **Blue North Wind Farm**

Project Sponsor: TradeWind Energy

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: NA
- **Any Identifying Project Numbers**: NA
- **Location**: Caddo County, Oklahoma
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the generator hub. This project has proposed to construct 75 to 100 turbines.
- **Other**: NA

FWS Involvement

- **Region**: Region 2
- **Field Office**: Oklahoma ESFO and Migratory Birds RO
    - **Lead Field Office, if more than one involved:** Oklahoma ESFO
- **Status of FWS Involvement**: Advisory only at this point. Tier 3 studies have been completed but FWS has not yet been provided with the study results.
- **Timeline for Completion of FWS Involvement**: Unknown. Information available to the FWS indicates project will be operational by 2018.

Major Infrastructure Projects
2017

Project Name: **Blue South Wind Project**

Project Sponsor: TradeWind Energy

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: NA
- **Any Identifying Project Numbers**: NA
- **Location**: Caddo County, Oklahoma
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the generator hub. This project has proposed to construct 75 to 100 turbines.
- **Other**: NA

FWS Involvement

- **Region**: Region 2
- **Field Office**: Oklahoma ESFO and Migratory Birds RO
    - **Lead Field Office, if more than one involved:** Oklahoma ESFO
- **Status of FWS Involvement**: Advisory only at this point. Tier 3 studies have been completed but FWS has not yet been provided with the study results.
- **Timeline for Completion of FWS Involvement**: Unknown. Information available to the FWS indicates project will be operational by 2018.

Major Infrastructure Projects
2017

Project Name: **Limestone Bluff Wind Farm**

Project Sponsor: TradeWind Energy

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: NA
- **Any Identifying Project Numbers**: NA
- **Location**: Caddo County, Oklahoma
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the generator hub. This project has proposed to construct 75 to 100 turbines.
- **Other**: NA

FWS Involvement

- **Region**: Region 2
- **Field Office**: Oklahoma ESFO and Migratory Birds RO
    - **Lead Field Office, if more than one involved:** Oklahoma ESFO
- **Status of FWS Involvement**: Advisory only at this point. Status as of early 2017 was "on hold."
- **Timeline for Completion of FWS Involvement**: Unknown. Project not currently moving forward. Reasons for current status were not provided to FWS.

Major Infrastructure Projects
2017

Project Name: **South Ridge 1 Wind Project**

Project Sponsor: Apex Energy

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: NA
- **Any Identifying Project Numbers**: NA
- **Location**: Blaine County, Oklahoma
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the generator hub. This project has proposed to construct 150 turbines.
- **Other**: NA

FWS Involvement

- **Region**: Region 2
- **Field Office**: Oklahoma ESFO and Migratory Birds RO
    - **Lead Field Office, if more than one involved:** Oklahoma ESFO
- **Status of FWS Involvement**: Advisory only at this point. Project is believed to be conducting Tier 3 studies. Future involvement depends on outcome of Tier 3 studies.
- **Timeline for Completion of FWS Involvement**: Unknown. Plans were to meet with project sponsor in early 2017. Awaiting information from project sponsor. Information available to the FWS indicates project will be operational by 2018.

Major Infrastructure Projects
2017

Project Name: **Rock Falls Wind Project**

Project Sponsor: EDF Renewable Energy

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: NA
- **Any Identifying Project Numbers**: NA
- **Location**: Kay and Grant counties, Oklahoma
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the generator hub. This project has proposed to construct 182 turbines.
- **Other**: Project is in two phases. The first phase is expected to total 154 MW of generation and is expected to be operational by late 2017. The second phase will be larger and provide an estimated generation capacity of 300 MW. Commercial operation date is reportedly sometime in 2018.

FWS Involvement

- **Region**: Region 2
- **Field Office**: Oklahoma ESFO and Migratory Birds RO
    - **Lead Field Office, if more than one involved:** Oklahoma ESFO
- **Status of FWS Involvement**: Advisory only at this point.
- **Timeline for Completion of FWS Involvement**: Unknown. Information available to the FWS indicates entire project will be operational by 2018.

Major Infrastructure Projects
2017

Project Name: **Bergen Ranch Wind Project**

Project Sponsor: Apex Clean Energy

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: NA
- **Any Identifying Project Numbers**: NA
- **Location**: Johnston, Murray and Pontotoc counties, Oklahoma
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the generator hub. This project has proposed to construct 130 turbines.
- **Other**: NA

FWS Involvement

- **Region**: Region 2
- **Field Office**: Oklahoma ESFO and Migratory Birds RO
    - **Lead Field Office, if more than one involved:** Oklahoma ESFO
- **Status of FWS Involvement**: Advisory only at this point. Habitat Conservation Plan and section 10 permit may be needed for the American burying beetle, depending on results of surveys. Project site also has considerable potential for occupancy by bald eagles. The FWS also is awaiting the results of eagle surveys. Plans were to meet with project sponsor once the wildlife studies were complete.
- **Timeline for Completion of FWS Involvement**: Unknown. A meeting is unlikely before late summer 2017. Construction/operational date is unknown.

Major Infrastructure Projects
2017

Project Name: **Fire Wheel Wind Project**

Project Sponsor: Hitchland Wind Land Developments

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: None
- **Any Identifying Project Numbers**: NA
- **Location**: Texas County, Oklahoma; Hansford, Sherman, and Ochiltree counties, Texas
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the generator hub. This project has proposed to construct a total of 1,000 turbines.
- **Other**: Project will be developed in five phases, two in Oklahoma (300 to 350 turbines) and three in Texas (600 to 650 turbines).

FWS Involvement

- **Region**: Region 2
- **Field Office**: Oklahoma ESFO; Arlington ESFO; and Migratory Birds - RO.
    - **Lead Field Office, if more than one involved:** Oklahoma ESFO (Lead for Oklahoma phases); Arlington ESFO, (Lead for Texas phases)
- **Status of FWS Involvement**: Advisory only at this point. Phase one is anticipated to be operational in 2017. No information is available on the other phases.
- **Timeline for Completion of FWS Involvement**: Unknown. Information available to the FWS indicates phase one of project will be operational in 2017.

Major Infrastructure Projects
2017

Project Name: **White Rock Wind Farm**

Project Sponsor: Calpine Corporation

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: NA
- **Any Identifying Project Numbers**: NA
- **Location**: Caddo County, Oklahoma
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the generator hub. This project has proposed to construct 109 turbines.
- **Other**: NA

FWS Involvement

- **Region**: Region 2
- **Field Office**: Oklahoma ESFO and Migratory Birds RO
    - **Lead Field Office, if more than one involved:** Oklahoma ESFO
- **Status of FWS Involvement**: Advisory only at this point. Status of project and FWS involvement unknown.
- **Timeline for Completion of FWS Involvement**: Unknown. No information available.

Major Infrastructure Projects
2017

Project Name: **Horizon Hill Wind Project**

Project Sponsor: Calpine Corporation

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: NA
- **Any Identifying Project Numbers**: NA
- **Location**: Kingfisher and Logan counties, Oklahoma
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the generator hub. This project has proposed to construct 88 turbines.
- **Other**: NA

FWS Involvement

- **Region**: Region 2
- **Field Office**: Oklahoma ESFO and Migratory Birds RO
    - **Lead Field Office, if more than one involved:** Oklahoma ESFO
- **Status of FWS Involvement**: Advisory only at this point. Status of project and FWS involvement unknown.
- **Timeline for Completion of FWS Involvement**: Unknown. No information available.

Major Infrastructure Projects
2017

Project Name: **States Edge Wind Farm**

Project Sponsor: Invenergy

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: NA
- **Any Identifying Project Numbers**: NA
- **Location**: Cimarron and Texas counties, Oklahoma
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the generator hub. This project has proposed to construct 1,000 turbines.
- **Other**: Project likely to be developed in phases.

FWS Involvement

- **Region**: Region 2
- **Field Office**: Oklahoma ESFO and Migratory Birds RO
    - **Lead Field Office, if more than one involved:** Oklahoma ESFO
- **Status of FWS Involvement**: Advisory only at this point. Project is believed to be at Tier one.
- **Timeline for Completion of FWS Involvement**: Unknown. No information available. The FWS last met with sponsor's consultant in fall of 2016.

Major Infrastructure Projects
2017

Project Name: **Turkey Creek Wind Project**

Project Sponsor: NextEra Energy Resources

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: NA
- **Any Identifying Project Numbers**: NA
- **Location**: Alfalfa County, Oklahoma
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the generator hub. This project has proposed to construct 120 turbines.
- **Other**: Project is located immediately south of Great Salt Plains National Wildlife Refuge within the heart of the whooping crane migration corridor. Company has agreed to move proposed turbines to the east of the refuge but turbines remain in the central portion of the migration corridor. The sponsor has limited ability to relocate to the east due to the presence of Kegelman Unit of Vance Air Force Base. Kegelman is a single runway used to conduct touch and go landings of military aircraft.

FWS Involvement

- **Region**: Region 2
- **Field Office**: Tulsa, Oklahoma (Lead); Salt Plains National Wildlife Refuge; and Migratory Birds RO
    - **Lead Field Office, if more than one involved:** Oklahoma ESFO
- **Status of FWS Involvement**: Advisory only at this point. However, due to concerns regarding potential collision hazard for endangered whooping cranes and migratory waterfowl, project location has been adjusted. A habitat conservation plan and associated section 10 permit may be needed, pending results of additional studies.
- **Timeline for Completion of FWS Involvement**: Unknown. The FWS is awaiting additional survey data from sponsor and sponsor's consultant.

Major Infrastructure Projects
2017

Project Name: **Nemaha/Osage/Amshore Wind Project**

Project Sponsor: Duke Energy

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: None
- **Any Identifying Project Numbers**: NA
- **Location**: Osage County, Oklahoma
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the generator hub. This project has proposed to construct about 60 3.3 MW turbines.
- **Other**: NA

FWS Involvement

- **Region**: Region 2
- **Field Office**: Oklahoma ESFO and Migratory Birds RO
  - **Lead Field Office, if more than one involved:** Oklahoma ESFO
- **Status of FWS Involvement**: Advisory only at this point. Status of project and FWS involvement unknown. Preliminary pre-construction information (Tier 3 data) was provided in February 2017 but project has since been put on hold.
- **Timeline for Completion of FWS Involvement**: Unknown. No information available. Osage Nation is believed to be in opposition to proposed project. Project is on hold.

Major Infrastructure Projects
2017

Project Name: **Caddo Wind Project**

Project Sponsor: Apex Clean Energy

Project Description

- **Sector**: Wind Energy/Renewable
- **Lead Agency**: NA
- **Any Identifying Project Numbers**: NA
- **Location**: Caddo County, Oklahoma
- **Estimated Cost**: Unknown but each turbine is estimated to cost $1-2 million per turbine depending on size of the generator hub. This project has proposed to construct 130 turbines.
- **Other**:

FWS Involvement

- **Region**: Region 2
- **Field Office**: Oklahoma ESFO and Migratory Birds RO
    - **Lead Field Office, if more than one involved:** Oklahoma ESFO
- **Status of FWS Involvement**: Advisory only at this point. Sponsor and consultant have presented the results of the first year of Tier 3 studies in late 2016.
- **Timeline for Completion of FWS Involvement**: Unknown. Construction is expected to begin in 2018.

Major Infrastructure Projects
2017

Project Name: **Clean Line Plains and Eastern Transmission Line**

Project Sponsor: Clean Line Energy Partners, LLC, Houston, TX.

Project Description

- **Sector**: Energy/Transmission
- **Lead Agency**: Department of Energy, the FWS is a cooperating agency
- **Any Identifying Project Numbers**: DOE/EIS-0486
- **Location**: Texas, Beaver, Harper, Woodward, Major, Garfield, Kingfisher, Logan, Payne, Lincoln, Creek, Okmulgee, Muskogee, and Sequoyah counties in Oklahoma; Hansford, Ochiltree and Sherman counties in Texas; Pope, Conway, Crawford, Franklin, Johnson, Van Buren, Cleburne, White, Jackson, Cross, Poinsett and Mississippi counties in Arkansas; and, Shelby and Tipton counties in Tennessee.
- **Estimated Cost**: $2.5 billion according to Clean Line Energy
- **Other**: Clean Line proposes to construct and operate an overhead ± 600-kilovolt (kV) high voltage direct current electric (HVDC) transmission system and associated facilities with the capacity to deliver approximately 3,500 megawatts of power primarily from renewable energy generation facilities in the Oklahoma and Texas Panhandle regions to load-serving entities in the Mid-South and Southeast United States via an interconnection in Arkansas and an interconnection with the TVA in Tennessee. Major facilities associated with the proposed Project include converter stations, an approximate 721.5-mile long HVDC transmission line; an alternating current (AC) collection system; and both permanent and temporary access roads.

FWS Involvement

- **Region**: Region 2 and Region 4
  - **Lead Region:** Region 2
- **Field Office**: Oklahoma ESFO; Arkansas ESFO; Tennessee ESFO; and Migratory Birds RO
  - **Lead Field Office:** Oklahoma ESFO
- **Status of FWS Involvement**: Primarily NEPA, ESA consultation and migratory bird conservation (Avian Protection Plan). The Final EIS is dated October 2015 and the Record of Decision was published on March 31, 2016. A Biological Opinion was completed (November 20, 2015), but FWS is still awaiting information from DOE and Clean Line with respect to concluding section 7 consultation. Clean Line and DOE are currently conducting surveys to refine take estimate provided in biological opinion. Although a Mitigation Action Plan has been published (October 2016), the FWS is awaiting detailed information regarding mitigation for impacts to federally-listed species.
- **Timeline for Completion of FWS Involvement**: Unknown. The EIS was finalized in October 2015 and a biological opinion under section 7 of the ESA was completed in November 2015. However neither DOE nor Clean Line has submitted final documents required to complete the consultation process.

Major Infrastructure Project
2017

Project Name: Southline Transmission Project

Project Sponsor: Bureau of Land Management

Project Description

- **Sector:** Energy/Transmission
- **Lead Agency:** Bureau of Land Management
- **Any Identifying Project Numbers:** NA
- **Location:** Dona Ana, Luna, Grant, and Hidalgo counties, New Mexico, and Cochise, Pima, and Pinal counties, Arizona
- **Estimated Cost:** Anticipated costs > $100 million, planning and construction combined
- **Other:** Southline Transmission, LLC, proposes constructing, operating, and maintaining a high-voltage power line in two segments totaling approximately 360 miles. The first segment would be a new double circuit 345-kilovolt line from a substation in Afton, New Mexico (south of Las Cruces), to a substation in Apache, Arizona (south of Willcox). This approximately 240-mile segment would provide up to 1,000 megawatts of initial rated capacity. The second segment would be an upgrading and rebuilding of about 120 miles of existing transmission lines between the Apache substation and the Saguaro substation, northwest of Tucson. It would provide capacity for an additional 1,000 megawatts of electricity.

FWS Involvement

- **Region:** 2
- **Field Office:** Arizona and New Mexico ESFO
    - **Lead Field Office, if more than one involved:** Arizona ESFO
- **Status of FWS Involvement:** Section 7 consultation and reinitiation were completed in November 2015; current involvement anticipated to be advisory at the point construction is initiated related to implementation of the BO.
- **Project Timeline:** Unknown, waiting on BLM decision to determine further involvement in the project.

Major Infrastructure Project
2017

Project Name: SunZia Transmission Line

Project Sponsor: SunZia Transmission, LLC

Project Description

- **Sector:** Transmission
- **Lead Agency:** BLM
- **Any Identifying Project Numbers:** BLM/NM/PL-13-04-1610
- **Location:** Arizona and New Mexico
- **Estimated Cost:** $2 Billion
- **Other:** The Project consists of the construction, operation, and maintenance of two parallel overhead 500 kV transmission lines located on Federal, State, and private lands from the proposed SunZia East Substation in Lincoln County, New Mexico, to the existing Pinal Central Substation in Pinal County, Arizona. The length of the transmission lines in the preferred alternative would be 515 miles in length. Three segments, totaling five miles of the Project in Socorro and Torrance counties in New Mexico, will be buried in order to mitigate impacts to military operations at White Sands Missile Range. The impacts of burial have been analyzed in a Mitigation Proposal Environmental Assessment (EA) that has also been approved. The Project has the potential to add 3,000 to 4,500 megawatts of added electric capacity to the desert southwest region of the United States.

FWS Involvement

- **Region:** Region 2
- **Field Office:** Migratory Bird, Refuges, and Ecological Services in Regional Office, Arizona and New Mexico Ecological Services Office
    - **Lead Field Office, if more than one involved:** Migratory Birds
- **Status of FWS Involvement:** Section 7 consultation was completed in 2013. Currently, advising Project proponent on mitigation for Migratory Birds issues identified in the Environmental Impact Statement and developing an Implementing Agreement for the implementation of the mitigation
- **Project Timeline:** Involvement for mitigation and the Implementation Agreement will likely be completed by May 2017. The FWS will be indirectly involved with some aspects of mitigation, which could extend to 2067 (50 years).

Major Infrastructure Project
2017

Project Name: Columbia Pipeline Group Multi State Habitat Conservation Plan

Project Sponsor: Columbia Pipeline Group

Project Description

- **Sector:** Natural Gas Pipeline
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers:** Fish and Wildlife Permit TE02636A-0; multiple project numbers for other agencies
- **Location:** 333 counties across 14 states (DE, IN, KY, LA, MD, MS, NJ, NY, NC, OH, PA, TN, VA, WV)
- **Estimated Cost:** More than $100 million
- **Other:** Approximately 15,562 miles in length, plus 12 counties where storage fields occur equaling approximately 9,783,207 acres; includes many current and future projects in this area for up to 50 years.

FWS Involvement

- **Region:** Regions 3, 4, and 5
  - **Lead Region:** 3 (Regional Office is lead)
- **Field Offices:** Indiana FO, Chesapeake Bay FO, Cookeville Tennessee FO, Jackson Mississippi FO, Kentucky FO, Louisiana FO, New Jersey FO, New York FO, Ohio FO, Pennsylvania FO, Southwestern Virginia FO, Virginia FO, West Virginia FO
  - **Lead Field Office:** No Lead Field Office (R3 RO is lead)
- **Status of FWS Involvement:** NiSource Inc., a natural gas distribution company, approached FWS about streamlining consultations (~400 per year) in 2005. NiSource worked with the FWS to develop the NiSource Multi-Species Habitat Conservation Plan (HCP). An incidental take permit was issued under Section 10(a)(1)(B) of the ESA in 2013, taking effect in January 2014. In mid-2015 the Columbia Pipeline Group (CPG) split from NiSource Inc., into a separate company and the permit was officially transferred from NiSource to CPG in 2016.

  The CPG HCP provides incidental take coverage for 11 species, and includes another 32 species that do not require take authorization for covered activities. Covered activities include most CPG operations, maintenance, and new construction within the covered lands. The HCP provides required ESA consultation for covered activities impacts to covered species. In 2015, 300 projects impacting over 50,000 acres were conducted under the MSHCP, which would have otherwise required consultation. A similar pace is expected to continue annually. FWS monitors CPG compliance with their HCP, provides technical assistance, and provides training and coordination for federal agencies regarding how CPG is meeting its ESA requirements.

  Some covered activities may affect species not covered by the HCP and some CPG projects include areas outside the HCP covered lands. These projects require additional consultation on a project by project basis, generally led at the FO level. The HCP does not address all impacts to migratory birds and some projects require additional consultation.
- **Project Timeline:** Implementation of the HCP is ongoing and anticipated to continue through 2064. Additional consultations associated with the HCP for species and activities not covered are dependent on when CPG initiates projects and each has an independent timeline.

Major Infrastructure Project
2017

Project Name: District 4 – McCluggage Bridge (US 150)

Project Sponsor: Illinois Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** NA
- **Location:** Peoria, Peoria County, Illinois
- **Estimated Cost:** ~ $115 million

FWS Involvement

- **Region:** 3
- **Field Office:** Illinois-Iowa FO
- **Status of FWS Involvement:** Project is in the NEPA Merger Process with potentially multiple FWS authorities.
- **Project Timeline:** Record of Decision or Finding of No Significant Impact Summer 2017

Major Infrastructure Project
2017

Project Name: District 5 – Eastside Highway

Project Sponsor: Illinois Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** NA
- **Location:** Bloomington, McClean County, Illinois
- **Estimated Cost:** ~ $200 million

FWS Involvement

- **Region:** 3
- **Field Office:** Illinois-Iowa
- **Status of FWS Involvement:** Project is in the NEPA Merger Process with potentially multiple FWS authorities.
- **Project Timeline:** Record of Decision or Finding of No Significant Impact Fall 2017

Major Infrastructure Project
2017

Project Name: District 6 – Florence Bridge

Project Sponsor: Illinois Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** NA
- **Location:** Florence, Scott County, Illinois
- **Estimated Cost:** ~ $115 million

FWS Involvement

- **Region:** 3
- **Field Office:** Illinois-Iowa
- **Status of FWS Involvement:** Project is in the NEPA Merger Process with potentially multiple FWS authorities.
- **Project Timeline:** Final Environmental Impact Statement Summer of 2019, Record of Decision or Finding of No Significant Impact Fall 2019

Major Infrastructure Project
2017

Project Name: District 6 – I-55 in Springfield, IL – add lane + interchange reconfigurations

Project Sponsor: Illinois Department of Natural Resources

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** NA
- **Location:** Springfield, Sangamon County, Illinois
- **Estimated Cost:** ~ $200 million
- **Other:** NA

FWS Involvement

- **Region:** 3
- **Field Office:** Illinois-Iowa
- **Status of FWS Involvement:** Project is in the NEPA Merger Process with potentially multiple FWS authorities.
- **Project Timeline:** Final Environmental Impact Statement 2017, Record of Decision or Finding of No Significant Impact 2017

Major Infrastructure Project
2017

Project Name: District 7 – US 51 – add lanes

Project Sponsor: Illinois Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** NA
- **Location:** Pana to Centralia, (Christian, Clinton, Jefferson, Marion, and Washington counties, Illinois
- **Estimated Cost:** > $500 million
- **Other:** NA

FWS Involvement

- **Region:** 3
- **Field Office:** Illinois-Iowa
- **Status of FWS Involvement:** Project is in the NEPA Merger Process with potentially multiple FWS authorities.
- **Project Timeline:** Final Environmental Impact Statement Summer 2018, Record of Decision or Finding of No Significant Impact Fall 2018

Major Infrastructure Project
2017

Project Name: District 9 – Shawnee Parkway

Project Sponsor: Illinois Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** NA
- **Location:** Alexander, Pulaski, and Union counties, Illinois
- **Estimated Cost:** ~ $250 million
- **Other:** NA

FWS Involvement

- **Region:** 3
- **Field Office:** Illinois-Iowa
- **Status of FWS Involvement:** Project is in the NEPA Merger Process with potentially multiple FWS authorities.
- **Project Timeline:** Draft Environmental Impact Statement Summer 2017, Final EIS Fall 2017, and Record of Decision or Finding of No Significant Impact Fall 2017

Major Infrastructure Project
2017

Project Name: I-74 Bridge Replacement Project

Project Sponsor: Iowa Department of Transportation and Illinois Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** NA
- **Location:** Bettendorf, Scott County, Iowa; Moline, Rock Island County, Illinois
- **Estimated Cost:** ~ $1.2 billion
- **Other:** NA

FWS Involvement

- **Region:** 3
- **Field Office:** Illinois-Iowa
- **Status of FWS Involvement:** Project has complete Record of Decision but ongoing reevaluations due to project changes on the Iowa side have occurred since the 2009 ROD. Endangered Species Act consultation continues: an amendment to the Biological Opinion is currently being prepared. Coordination on mitigation and monitoring delivery is ongoing.
  Project Timeline: Construction to begin Summer of 2017

Major Infrastructure Project
2017

Project Name: Spire STL

Project Sponsor: Spire STL Pipeline Company, LLC / Spire Inc. (formerly Laclede Group)

Project Description

- **Sector:** Natural Gas Pipeline
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers:** PF16-9-000, CP17-40-000
- **Location:** Illinois, Missouri
- **Estimated Cost:** $220 million
- **Other:** Estimated 933 acres of affected habitat (371 permanently maintained for ROW)

FWS Involvement

- **Region:** 3
- **Field Office:** Illinois-Iowa, Missouri
    - **Lead Field Office, if more than one involved:** Illinois-Iowa (Regional Office is lead)
- **Status of FWS Involvement:** FWS is participating in environmental review under NEPA and is currently providing feedback on proposed threated and endangered species surveys and preliminary determinations through the informal Section 7 consultation process. Official correspondence has been transmitted to GAI Consultants December 2016, providing technical assistance on threatened and endangered species, bald eagles, and migratory birds.
- **Project Timeline:** 1/26/17 - Spire STL applied for FERC certificate. Environmental Assessment from FERC pending

Major Infrastructure Project
2017

Project Name: MidAmerican Energy Wind XI

Project Sponsor: MidAmerican Energy

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** NA
- **Any Identifying Project Numbers:** NA
- **Location:** Iowa – Multiple counties
- **Estimated Cost:** $3.6 Billion
- **Other:** The goal of the project is to develop an additional 2000 megawatts of wind energy capacity. This will enable MidAmerican to produce 89 percent of energy sold to Iowa customers from renewable energy.

FWS Involvement

- **Region:** 3
- **Field Office:** Illinois-Iowa
- **Status of FWS Involvement:** MidAmerican Energy is following the coordination outlined in the Land Based Wind Energy Guidelines. The Illinois-Iowa Field Office is providing expertise and information needed by the company to inform their due diligence. MidAmerican Energy has also indicated that they will be requesting endangered species incidental take authorization from the FWS. FWS is providing technical expertise for the development of the habitat conservation plan, i.e., the permit application document. When the habitat conservation plan is completed, FWS will conduct the required NEPA analysis, solicit public comment, and develop the Biological Opinion for the permit.
- **Project Timeline:** The habitat conservation plan will likely be developed between now and second quarter of 2018. A permit decision is expected to be made by second quarter of 2019.

Major Infrastructure Project
2017

Project Name: Robert C Byrd Hydroelectric Project

Project Sponsor: City of Wadsworth, OH / American Municipal Power

Project Description

- **Sector:** Hydroelectric Power
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers:** FERC Project No. 12796-004
- **Location:** Ohio, West Virginia
- **Estimated Cost:** $437 million

FWS Involvement

- **Region:** 3 and 5
    - **Lead Region:** 3
- **Field Office:** Ohio FO, West Virginia FO
    - **Lead Field Office:** Ohio FO
- **Status of FWS Involvement:**
    - FWS participated in environmental review under NEPA.
    - 7/11/14 FERC requested concurrence with effects determination
    - 8/7/14 FWS issued non-concurrence and requested additional information
    - 1/28/15 FERC requested concurrence with effects determination
    - 2/26/15 FWS issued non-concurrence and requested additional information
    - 3/11/15 FERC requested concurrence with effects determination or to initiate formal consultation
    - 4/15 – 12/16 FWS and FERC corresponded (generally, FWS requested additional information)
    - 6/24/16 FWS filed motion to intervene with FERC
    - 2/6/17 FERC requested concurrence with effects determination or to initiate formal consultation
    - 3/3/17 FWS sent letter initiating formal consultation
    - **Project Timeline:** 7/2014 - Draft Environmental Assessment; 1/2015 - Final Environmental Assessment; 6/21/17 – Biological Opinion expected

Major Infrastructure Project
2017

Project Name: Blue Creek Wind Farm Habitat Conservation Plan

Project Sponsor: Avangrid Renewables, LLC

Project Description

- **Sector:** Wind Power
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers:** NA
- **Location:** Paulding and VanWert counties, Ohio
- **Estimated Cost:** ~$100 million
- **Other:** 304 MW

FWS Involvement

- **Region:** 3
- **Field Office:** Ohio
- **Status of FWS Involvement:**
    - Avangrid is developing a Habitat Conservation Plan (HCP) to cover incidental take of the Indiana bat (*Myotis sodalis*) and Northern long-eared bat (*Myotis septentrionalis*) from operation of this existing wind project.
    - A draft HCP was submitted to FWS on January, 2017.
    - FWS will provide comments by March 17, 2017.
    - FWS anticipates completing an Environmental Assessment (EA) to satisfy NEPA for this project. The EA will be subject to a 60-day public review and comment period. If the HCP meets issuance criteria and the EA finds no significant impact, FWS may issue an incidental take permit under Section 10(a)(1)(B) of the Endangered Species Act.
- **Project Timeline:** Pending completion of the Applicant's draft HCP, a draft EA will likely be completed by Dec. 2017.

Major Infrastructure Project
2017

Project Name: Timber Road II & III Wind Facility

Project Sponsor: EDP Renewables North America LLC

Project Description

- **Sector:** Wind Power
- **Lead Agency:** Ohio Power Siting Board (OPSB, state agency) and FWS
- **Any Identifying Project Numbers:** NA
- **Location:** Paulding County Ohio
- **Estimated Cost:** ~ $309 million (based on the number of turbines and the approximate cost of a turbine)
- **Other:** 200 MW

FWS Involvement

- **Region:** 3
- **Field Office:** Ohio
- **Status of FWS Involvement:** EDP is developing a Habitat Conservation Plan (HCP) to cover both phases II and III of this project. Timber Road II is constructed, while III is still waiting on a permit from the OPSB.
- **Project Timeline:** EPD anticipates completing its HCP and receiving the OPSB permit during the summer of 2017.

Major Infrastructure Project
2017

Project Name: Buckeye Wind Habitat Conservation Plan

Project Sponsor: EverPower Wind, LLC

Project Description

- **Sector:** Wind Power
- **Lead Agency:** FWS
- **Any Identifying Project Numbers:** NA
- **Location:** Champaign County, Ohio
- **Estimated Cost:** ~$200 million
- **Other:** 250 MW

FWS Involvement

- **Region:** 3
- **Field Office:** Ohio
- **Status of FWS Involvement:**
    - Buckeye Wind developed a Habitat Conservation Plan (HCP) to cover incidental take of Indiana bats (*Myotis sodalis*), from construction and operation of this proposed wind project.
    - FWS completed an Environmental Impact Statement (EIS) and Record of Decision (ROD) and issued an Incidental Take Permit (ITP) for the project in 2013.
    - On September 20, 2013, Union Neighbors United filed a complaint, alleging that the issuance of the ITP was arbitrary, capricious, and not in accordance with NEPA and the ESA.
    - On March 18, 2015, the District Court denied Union Neighbors' motion ruling in favor of the FWS. Union Neighbors appealed.
    - In August 2016 the D.C Circuit Court held that FWS failed to comply with its NEPA obligations but also held that FWS complied with its ESA obligations.
    - In response to the Court's decision, the FWS will draft a Supplemental EIS (SEIS) which evaluates one or more additional alternatives that result in less take of Indiana bats and publish it for public comment. Upon the issuance of the final SEIS Record of Decision FWS will undertake any necessary supplemental ESA analysis.
- **Project Timeline:** Publication of an SEIS by December 2017

Major Infrastructure Project
2017

Project Name: Icebreaker Wind

Project Sponsor: Lake Erie Energy Development Co. (LEEDCo)

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** Department of Energy
- **Any Identifying Project Numbers:** DOE/EA-2045
- **Location:** Lake Erie offshore of Cleveland, OH
- **Estimated Cost:** $124 million
- **Other:** 6 turbines, 20.7 MW capacity

FWS Involvement

- **Region:** 3
- **Field Office:** Ohio (Regional Office is lead)
- **Status of FWS Involvement:**
    - August 2016 - FWS requested to advise on 2010 studies; most of the studies' results were not usable due to technical and sampling errors. Began making recommendations to LEEDCo for improved studies after meeting with LEEDCo
    - October 16, 2016 - Letter sent to DOE with recommendation to use EIS instead of Environmental Assessment due to precedent setting nature of the project and the degree of uncertainty in the impacts.
    - December 12-14, 2016 - Met with LEEDCo and Ohio Department of Natural Resources to discuss options for pre- and post-construction monitoring.
    - February 28, 2016 - FWS and ODNR send letter to OH power siting board with recommendations.
    - Current - Discussions continue for pre- and post-construction
- **Project Timeline:**
    - 2008 - project proposed
    - 2010 - Radar and acoustic monitoring attempts based on recommendations from FWS and ODNR
    - 2018 - Anticipated start of construction (pending permits from Ohio Power Siting Board, Ohio EPA, U.S. Army Corps of Engineers, and U.S. Coast Guard). Not all permit applications submitted yet.
    - Continuing: Advising LEEDCo and Ohio Power Siting Board on pre- and post-construction impact monitoring needs for the location.

Major Infrastructure Project
2017

Project Name: Brent Spence Bridge

Project Sponsor: Ohio Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Ohio DOT (via NEPA assignment from FHWA)
- **Any Identifying Project Numbers:** Ohio DOT Project Identification (PID) 75119
- **Location:** Ohio River (from Hamilton County, OH to Kenton County, KY
- **Estimated Cost:** $12.5B
- **Other:** Replacing existing bridge to improve safety and capacity

FWS Involvement

- **Region:** 3 and 4
  - **Lead Region:** 3
- **Field Office:** Ohio and Kentucky
  - **Lead Field Office:** Ohio
- **Status of FWS Involvement:**
  - Uncertain but anticipated ESA Section 7 consultation on federally listed mussels. Consultation could be formal or informal if a mussel survey is conducted, depending on survey results. If a survey is not conducted and presence is assumed by the DOT, formal consultation is anticipated.
  - Consultation on other listed species, if necessary, is expected to be informal, based on prior project coordination (2005-2014). Previous coordination included technical assistance under ESA section 7; review of Conceptual Analysis Study; review of Section 4(f) Study (via DOI Environmental Review); Ohio Field Office acceptance of request for involvement as Participating Agency.
  - Authorities: NEPA, ESA
- **Project Timeline:** According to the DOT, the project has been on hold awaiting funding. This is a large, complex project that, even if funded immediately, would likely not engage FWS for one or two years (as substantial associated actions would need to occur before major bridge construction could commence). Earliest potential Biological Assessment submission anticipated, if necessary, would be late summer or fall 2018, with BO issued within 135 days of receiving the BA from ODOT.

Major Infrastructure Project
2017

Project Name: NEXUS Gas Transmission Project and Texas Eastern Appalachian Lease Project (TEAL)

Project Sponsor: NEXUS Gas Transmission, LLC (owned by Spectra Energy Partners, LP [merged and renamed as Enbridge Inc. as of 2/17] and DTE Energy Company), Texas Eastern Transmission, LP

Project Description

- **Sector:** Natural Gas Pipeline
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers:** CP16-22-000, CP16-23-000, CP16-24-000, CP16-102-000
- **Location:** Ohio and Michigan
- **Estimated Cost:** $2 billion
- **Other:** 347 acres of forested uplands directly impacted, 0 acres indirectly impacted (fragmentation)

FWS Involvement

- **Region:** 3
- **Field Office:** Ohio, Michigan (Regional Office is lead)
    - **Lead Field Office, if more than one involved:** NA
- **Status of FWS Involvement:**
    - FWS participated in environmental review under NEPA.
    - 1/27/16 – 5/4/16 - FWS gave recommendations for mitigation of impacts to migratory birds and listed species and iteratively revised recommendations to incorporate NEXUS's comments and updated data.
    - 6/23/16 - FWS and NEXUS entered into MOU regarding conservation measures for migratory birds and listed species
    - 10/20/16 - Entered ESA formal consultation with FERC.
    - 12/14/16 – Formal consultation concluded with non-jeopardy BO.
    - 1/30/17 – FWS notified FERC that FWS considered the impacts to migratory birds to be fully mitigated.
    - FWS continuing to consult regarding potential summer clearing in some areas if certificate is issued.
- **Project Timeline:**
    - 11/2016 - FERC FEIS issued
    - 12/14/16 – FWS BO issued
    - FERC certificate pending (cannot be issued without quorum of commissioners)

Major Infrastructure Project
2017

Project Name: Greentown-Reynolds Project

Project Sponsor: Northern Indiana Public Service Company (NIPSCO) and Pioneer Transmission

Project Description

- **Sector:** Transmission Line
- **Lead Agency:** NA
- **Any Identifying Project Numbers:** NA
- **Location:** Indiana
- **Estimated Cost:** >$100 million
- **Other:** 46 acres upland forest directly impacted, 0 acres indirectly impacted

FWS Involvement

- **Region:** 3
- **Field Office:** Indiana (Regional Office is lead)
- **Status of FWS Involvement:**
  - 9/17/15 – 2/27/17 - FWS gave recommendations for mitigation of impacts to migratory birds and listed species and iteratively revised recommendations to incorporate NIPSCO's comments and updated data.
- **Project Timeline:**
  - MOU between NIPSCO and FWS regarding conservation measures for migratory birds and listed species is in draft form (waiting for NIPSCO's comments as of 3/7/17).
  - Technical Assistance Letter regarding listed species impacts anticipated following MOU.

Major Infrastructure Project
2017

Project Name: I-69 new interstate, Section 6, Martinsville to Indianapolis, Indiana

Project Sponsor: Indiana Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** NA
- **Location:** Marion, Johnson, and Morgan counties, Indiana
- **Estimated Cost:** $500+ million

FWS Involvement

- **Region:** 3 and 4
  - **Lead Region:** 3
- **Field Office:** Indiana and Kentucky
  - **Lead Field Office:** Indiana
- **Status of FWS Involvement:** Tiered project; will be reviewing for NEPA and consulting under Section 7
- **Project Timeline:** Consultation to occur this FY

Major Infrastructure Project
2017

Project Name: West Lake Corridor Project

Project Sponsor: Northern Indiana Commuter Transportation District (NICTD)

Project Description

- **Sector:** Transportation (commuter rail)
- **Lead Agency:** Federal Transit Administration
- **Any Identifying Project Numbers:** NA
- **Location:** Lake County, Indiana and Cook County, Illinois
- **Estimated Cost:** Between $590 million and $660 million for construction

FWS Involvement

- **Region:** 3
- **Field Office:** Indiana /Northern Indiana Suboffice
- **Status of FWS Involvement:** FWS reviewed the Draft Environmental Impact Statement during December 2016-January 2017; the document adequately addressed impacts on natural resources so no comments were necessary. There are no impacts on endangered species (Endangered Species Act of 1973, as amended) or migratory birds (Migratory Bird Treaty Act) because the project area is urban and has been developed for well over 100 years; an existing abandoned railroad corridor will be utilized for the majority of the project.
- **Project Timeline:** The Final EIS and ROD are due in mid-2017; detailed project engineering will occur during 2018 through 2020; construction is proposed from mid-2020 through mid-2022, with operation beginning in mid-2022. Additional FWS involvement is not anticipated until 2020 when Clean Water Act Section 404 permits for bridges over the West Branch Little Calumet River and West Branch Grand Calumet River and associated wetlands are expected to be Public Noticed.

Major Infrastructure Project
2017

Project Name: Bluff Point Wind Energy Center

Project Sponsor: Bluff Point Wind LLC, a subsidiary of NextEra Energy Resources LLC

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers:** NA
- **Location:** Jay and Randolph counties, Indiana
- **Estimated Cost:** >$100,000,000
- **Other:** The Bluff Point Wind Energy Center (Project) consists of 57 wind turbines and associated facilities and has a total generating capacity of approximately 120 MW. The Project is located on private land in east-central Indiana in Jay and Randolph counties. Commercial operation of the project is expected to begin in December 2017.

  During project development and early coordination with the FWS, the Bluff Point Wind LLC determined that the project could pose a risk to Indiana bats (*Myotis sodalis*) and northern long-eared bats (*Myotis septentrionalis*). The Indiana bat and northern long-eared bat are species listed as endangered and threatened, respectively, under the Endangered Species Act (ESA). Based on determination of risk to these federally listed bats, Bluff Point Wind LLC decided to prepare a Habitat Conservation Plan (HCP) in support of an Incidental Take Permit (ITP) application, as required under Section 10 of the ESA.

FWS Involvement

- **Region:** 3
- **Field Office:** Indiana
- **Status of FWS Involvement:** The Indiana Field Office is currently reviewing a draft Habitat Conservation Plan for the Bluff Point Wind Energy Center.
- **Project Timeline:** Bluff Point Wind LLC has not yet established an expected timeline for completing the ITP application process.

Major Infrastructure Project
2017

Project Name: I-75 Reconstruction

Project Sponsor: Michigan Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** NA
- **Location:** Southeast Michigan (Detroit Metro)
- **Estimated Cost:** Segment 1- $116.5 Million, Segment 2 - $96 million

FWS Involvement

- **Region:** 3
- **Field Office:** Michigan
- **Status of FWS Involvement:** ESA Technical Assistance, Section 7 Informal Consultation
- **Project Timeline:** Construction Underway. 2014 Technical Assistance for Indiana and Northern long-eared bats; 2016 Informal Consultation (received 9-1-16; concluded 9-8-16).

Major Infrastructure Project
2017

Project Name: Deerfield Wind

Project Sponsor: Renewable Energy Systems

Project Description

- **Sector:** Wind energy
- **Lead Agency:** NA
- **Any Identifying Project Numbers:** NA
- **Location:** Huron County, Michigan
- **Estimated Cost:** >$100 million
- **Other:** 110 2MW and 2.2MW turbines

FWS Involvement

- **Region:** 3
- **Field Office:** Michigan
- **Status of FWS Involvement:** Coordination through the FWS "Land-Based Wind Energy Guidelines" tiered approach (e.g., sponsor developing a Bird and Bat Conservation Strategy) as well as possible permitting pursuant the Bald and Golden Eagle Protection Act.
- **Project Timeline:** Commercial operation is scheduled for early 2017. FWS involvement will likely conclude after project is constructed and post-construction wildlife studies are completed.

Major Infrastructure Project
2017

Project Name: Apple Blossom Wind

Project Sponsor: Sempra U.S. Gas & Power

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** NA
- **Any Identifying Project Numbers:** NA
- **Location:** Huron County, Michigan
- **Estimated Cost:** >$100 million
- **Other:** ~93 MW (27-29 turbines)

FWS Involvement

- **Region:** 3
- **Field Office:** Michigan
- **Status of FWS Involvement:** Coordination through the FWS's "Land-Based Wind Energy Guidelines" tired approach (e.g., Sponsor developing a Bird and Bat Conservation Strategy) as well as possible permitting pursuant the Bald and Golden Eagle Protection Act.

- **Project Timeline:** Minor construction started in the fall of 2016 and is expected to resume March or April of 2017. FWS involvement will likely conclude after the project is constructed and post-construction wildlife studies are completed.

Major Infrastructure Project
2017

Project Name: High Prairie Wind Energy Facility

Project Sponsor: Terra-Gen

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers:** NA
- **Location:** Schuyler County, Missouri
- **Estimated Cost:** estimated $600 million
- **Other:** Approximately 400 MW wind farm across over 60,000 acres

FWS Involvement

- **Region:** 3
- **Field Office:** Missouri (Lead), Illinois/Iowa
- **Status of FWS Involvement:** Providing technical assistance to developer; help determine need for HCP for the Indiana bat, northern long-eared bat (maybe other bat species) and/or an Eagle Take Permit pursuant to BGEPA. Developer currently conducting preconstruction surveys per FWS Wind Energy Guidance. There are historic records of listed bats species in project area. The developer will likely apply for HCP/ITP for listed bats.
- **Project Timeline:** Anticipate construction beginning in 2019 with project online in January 2020. FWS involvement schedule will depend on a decision from the developer to pursue and HCP/ITP or Eagle Take Permit.

Major Infrastructure Project
2017

Project Name: Rock Creek Wind Energy Facility

Project Sponsor: Enel Green Power North America, Inc., and Tradewind Energy Inc.

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers:** NA
- **Location:** Atchison, Nodaway and Holt counties, Missouri
- **Estimated Cost:** estimated $575 to $700 million
- **Other:** A 350 MW wind project covering approximately 60,000 acres adjacent to and existing wind farm. Surrounds Missouri Department of Conservation's Tarkio Prairie Natural Area.

FWS Involvement

- **Region:** 3
- **Field Office:** Missouri and Illinois/Iowa
    - **Lead Field Office:** Missouri
- **Status of FWS Involvement:** Providing technical assistance to developer; worked through Wind Energy Guidance for wildlife (MBTA, ESA) to identify concerns and develop post-construction monitoring plan, BGEPA Eagle Take Permit - applicant revising eagle permit application consistent with 2016 regulations and expect to process permit this spring/summer**.**
- **Project Timeline:** Anticipate operational in 2018. FWS expects to issue an Eagle Take Permit in summer 2017.

Major Infrastructure Project
2017

Project Name: Osborn Wind Energy Facility

Project Sponsor: NextEra, Inc.

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers:** NA
- **Location:** DeKalb County, Missouri
- **Estimated Cost:** >$200 million
- **Other:** A 200MW project covering approximately 60,000 acres. Adjacent to three sides of Missouri Dept. of Conservation's Pony Express Conservation Area.

FWS Involvement

- **Region:** 3
- **Field Office:** Missouri and Illinois/Iowa
    - **Lead Field Office:** Missouri
- **Status of FWS Involvement:** Providing technical assistance to developer; working through Wind Energy Guidance for wildlife (MBTA, ESA) to identify concerns and develop post-construction monitoring plan. There are historic records of listed bats. The company apparently completed pre-construction surveys but has not yet submitted results to FWS and Missouri Dept. of Conservation. FWS is continuing evaluation of potential effects to listed species and may recommend an HCP/ITP. Developer is currently not pursuing an HCP/ITP. Developer has committed to compensatory mitigation for forested habitat losses early in project construction (several years ago).
- **Project Timeline:** Just became operational this year. Timeline for FWS involvement is unknown at this time – will depend on developer pursuing an HCP/ITP as recommended.

Major Infrastructure Project
2017

Project Name: Clear Creek Wind Energy Facility

Project Sponsor: Tenaska, Inc.

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers:** NA
- **Location:** Nodaway County, Missouri
- **Estimated Cost**: estimated $200 to $300 million
- **Other:** Approximately 200 MW wind project over 30,000 acres.

FWS Involvement

- **Region:** 3
- **Field Office:** Missouri and Illinois/Iowa
    - **Lead Field Office:** Missouri
- **Status of FWS Involvement:** Providing technical assistance to developer; working through Wind Energy Guidance for wildlife (MBTA, ESA) to identify concerns and develop post-construction monitoring plan. There are historic records of listed bats. The company is conducting preconstruction surveys for birds, bats, and eagles.
- **Project Timeline:** Early in planning stage, anticipate operational late 2019 or early 2020. FWS will provide recommendations by the end of 2018.

Major Infrastructure Project
2017

Project Name: Brickyard Hill Wind Energy Facility

Project Sponsor: EDF Renewable Energy

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers:** NA
- **Location:** Atchison County, Missouri
- **Estimated Cost:** estimated $225 to $300 million
- **Other:** Approximately 150 MW project over 40,000 acres. Adjacent to existing wind facility and overlapping state conservation focus area.

FWS Involvement

- **Region:** 3
- **Field Office:** Missouri and Illinois/Iowa
    - **Lead Field Office:** Missouri
- **Status of FWS Involvement:** Providing technical assistance to developer; working through Wind Energy Guidance for wildlife (MBTA, ESA) to identify concerns and develop post-construction monitoring plan. There are historic records of listed bats. The company is conducting preconstruction surveys for birds, bats, and eagles.
- **Project Timeline:** Anticipate project construction in summer of 2018. FWS will provide recommendations by the end of 2017.

Major Infrastructure Project
2017

Project Name: Green Hills Wind Energy Facility

Project Sponsor: Capital Power Corporation and AV3windpower, Inc.

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers:** NA
- **Location:** Sullivan County, Missouri
- **Estimated Cost:** estimated $150 million
- **Other:** A 77.5 MW project covering approximately 9,500 acres.

FWS Involvement

- **Region:** 3
- **Field Office:** Missouri and Illinois/Iowa
    - **Lead Field Office:** Missouri
- **Status of FWS Involvement:** Providing technical assistance to developer; working through Wind Energy Guidance for wildlife (MBTA, ESA) to identify concerns and develop post-construction monitoring plan, historic records of listed bats. The company is conducting preconstruction surveys for birds, bats, and eagles. This area has high historic listed bat use. The developer will likely pursue an HCP/ITP and possible Eagle Take Permit.
- **Project Timeline:** Anticipate operational last half 2019. FWS will provide recommendations during the fall/winter of 2017.

Major Infrastructure Project
2017

Project Name: Audrain Wind Energy Facility

Project Sponsor: EDP Renewables, Inc.

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers:** NA
- **Location:** Audrain County, Missouri
- **Estimated Cost**: estimated $125-175 million
- **Other:** Approximately 100MW project covering approximately 15,000 acres

FWS Involvement

- **Region:** 3
- **Field Office:** Missouri and Illinois/Iowa
    - **Lead Field Office:** Missouri
- **Status of FWS Involvement:** Providing technical assistance to developer; working through Wind Energy Guidance for wildlife (MBTA, ESA) to identify concerns and develop post-construction monitoring plan. The area has historic records of listed bats. The company is conducting preconstruction surveys for birds, bats, and eagles.
- **Project Timeline:** Anticipate operation in 2019. FWS will provide recommendations during the fall/winter of 2017.

Major Infrastructure Project
2017

Project Name: **King Lake Energy Facility**

Project Sponsor: Unknown (Consultant – WEST, Inc.)

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers:** NA
- **Location:** DeKalb and Gentry counties, Missouri
- **Estimated Cost:** Unknown
- **Other:** Unknown size, current boundary adjacent to existing wind facility and would surround Missouri Department of Conservation's King Lake Conservation Area

FWS Involvement

- **Region:** 3
- **Field Office:** Missouri and Illinois/Iowa
    - **Lead Field Office:** Missouri
- **Status of FWS Involvement:** Initial contact via consultant, FWS provided basic area resource information.
- **Project Timeline:** Unknown at this time

Major Infrastructure Project
2017

Project Name: Mark Twain Transmission Project

Project Sponsor: Ameren

Project Description

- **Sector:** Transmission
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** NA
- **Location:** Missouri – Marion, Shelby, Knox, Adair, Schuyler counties
- **Estimated Cost:** estimated >$100M
- **Other:** 100 miles of new line, plus one substation

FWS Involvement

- **Region:** 3
- **Field Office:** Missouri
- **Status of FWS Involvement:** ESA Consultation for listed bats; small COE handle so likely need for section 7 and section 10
- **Project Timeline:** Bat surveys were conducted summer 2016 and Indiana bats were present along most of the ROW (maternity and non-maternity). Previous timeline was in-service date of September 2018, but there has been no communication from Ameren recently following conclusion of bat surveys and discussions with COE about jurisdiction. The timeline has likely shifted to later in-service date. FWS has recommended the company purse an HCP/ITP because the COE will not include effects to listed bats in areas outside of their jurisdiction in the section 7 consultation

Major Infrastructure Project
2017

Project Name: Grain Belt Express Clean Line Transmission Project

Project Sponsor: Clean Line Energy

Project Description

- **Sector:** Transmission
- **Lead Agency:** Currently U.S. Army Corps of Engineers. However, the Federal Energy Regulatory Commission would be the lead if the agency decides to sponsor the project under section 1222 under the Energy Policy Act of 2005 (an application has been filed by Clean Line).
- **Any Identifying Project Numbers: NA**
- **Location:** Kansas, Missouri, Illinois, Indiana; exact route within these states TBD
- **Estimated Cost:** $2 billion
- **Other:** This is a new 780-mile overhead direct current transmission line that will deliver approximately 4,000 megawatts of low-cost wind power from western Kansas to Missouri, Illinois, Indiana and neighboring states.

FWS Involvement

- **Region:** 3 and 6
  - **Lead Region:** 3
- **Field Office:** Missouri, Illinois/Iowa, Kansas
  - **Lead Field Office:** Missouri
- **Status of FWS Involvement:** Clean Line representatives began coordination with FWS in 2010 regarding the proposed line. Discussions to date have focused on routing the line to minimize impacts to federally listed species and compliance with relevant Federal statutes (Endangered Species Act, Bald and Golden Eagle Protection Act, and Migratory Bird Treaty Act). The consultation process (section 7 consultation vs. section 10(a)(1)(B) of the Endangered Species Act) may depend on whether FERC decides to sponsor the project.
- **Project Timeline**: TBD and contingent on approval by the Missouri Public Service Commission or sponsorship by FERC.

Major Infrastructure Project
2017

Project Name: Metro Blue Line (Bottineau Light Rail)

Project Sponsor: Federal Transit Administration

Project Description

- **Sector:** Transportation – Light Rail
- **Lead Agency:** Federal Transit Administration
- **Any Identifying Project Numbers:** NA
- **Location:** Hennepin County, Minnesota
- **Estimated Cost:** $1.5 Billion

FWS Involvement

- **Region:** 3
- **Field Office:** Minnesota-Wisconsin
- **Status of FWS Involvement:** Comments under NEPA and Migratory birds completed. ESA consultation completed for northern long-eared bat but may need to reinitiate consultation if rusty patched bumble bee is listed on March 21, 2017; impacts to the species are anticipated to be avoidable.
- **Project Timeline:** Project impacts for the bee, if any, will be assessed at the time of listing (March 21, 2017) once a new habitat connectivity model is generated to identify any high potential zones within the action area.

Major Infrastructure Project
2017

Project Name: Metro Green Line (Southwest Light Rail)

Project Sponsor: Federal Transit Administration

Project Description

- **Sector:** Transportation – Light Rail
- **Lead Agency:** Federal Transit Administration
- **Any Identifying Project Numbers:** NA
- **Location:** Hennepin County, Minnesota
- **Estimated Cost:** $1.9 Billion

FWS Involvement

- **Region:** 3
- **Field Office:** Minnesota-Wisconsin
- **Status of FWS Involvement:** Comments under NEPA and Migratory birds completed. ESA consultation completed for northern long-eared bat but may need to reinitiate consultation if rusty patched bumble bee is listed on March 21, 2017; impacts to the species are anticipated to be avoidable.
- **Project Timeline:** Project impacts for the bee, if any, will be assessed at the time of listing (March 21, 2017) once a new habitat connectivity model is generated to identify any high potential zones within the action area.

Major Infrastructure Project
2017

Project Name: Tisch Mills Wind

Project Sponsor: Capital Power

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** NA
- **Any Identifying Project Numbers:** NA
- **Location:** near Tisch Mills, Wisconsin
- **Estimated Cost:** >$100 million
- **Other:** 12,000 acres of long term leases acquired for siting turbines. Up to 75 turbines with capacity of 75-150 MW.

FWS Involvement

- **Region:** 3
- **Field Office:** Minnesota-Wisconsin (Regional Office is lead)
- **Status of FWS Involvement:**
    - Advising Capital Power on pre- and post-construction impact monitoring needs for the location.
    - February 21, 2017: Met with Capital Power and provided results of radar and bat studies on migrants within and in the vicinity of the project site. Site was under previous ownership and recently (2014) acquired by Capital Power, which is attempting to determine feasibility and scale of potential wind energy projects in the area. Capital Power provided results of previous owners' pre-construction surveys as well as current data gathering efforts on eagles, other raptors, and bats.
    - FWS continuing to provide recommendations regarding impacts to bats and migratory birds.
- **Project Timeline:** Capital Power estimates late 2019 or early 2020 estimated operation date.

Major Infrastructure Project
2017

Project Name: Madison Beltline

Project Sponsor: Federal Highway Administration (FHWA)

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration (FHWA)
- **Any Identifying Project Numbers:** NA
- **Location:** Dane County, Wisconsin
- **Estimated Cost:** $1.6 Billion

FWS Involvement

- **Region:** 3
- **Field Office:** Minnesota-Wisconsin
- **Status of FWS Involvement:** Comments under NEPA and Migratory birds are not anticipated. ESA consultation may necessary if rusty patched bumble bee is listed on March 21, 2017; impacts to the species are anticipated to be avoidable.
- **Project Timeline:** Project impacts for the bee, if any, will be assessed at the time of listing (March 21, 2017) once a new habitat connectivity model is generated to identify any high potential zones within the action area.

Major Infrastructure Project
2017

Project Name: Cardinal-Hickory Creek Transmission Line Project

Project Sponsor: Rural Utility Service

Project Description

- **Sector:** Transmission Line – 345 kilovolt
- **Lead Agency:** Rural Utility Service
- **Any Identifying Project Numbers:** NA
- **Location:** Dubuque County, Iowa; Dane, Grant, Iowa and Lafayette counties, Wisconsin
- **Estimated Cost:** $500 Million

FWS Involvement

- **Region:** R3
- **Field Office:** Minnesota/Wisconsin Field Office
- **Status of FWS Involvement:** Participating agency for NEPA EIS – in development. ESA consultation is anticipated.
- **Project Timeline:** Project impacts for the bee, if any, will be assessed at the time of listing (March 21, 2017) once a new habitat connectivity model is generated to identify any high potential zones within the action area.

Major Infrastructure Project
2017

Project Name: Tier 1 EIS I-39-90-94

Project Sponsor: Wisconsin Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Wisconsin Department of Transportation
- **Any Identifying Project Numbers:** NA
- **Location:** Dubuque County, Iowa; Dane, Grant, Iowa and Lafayette counties, Wisconsin
- **Estimated Cost:** $500 Million

FWS Involvement

- **Region:** 3
- **Field Office:** Minnesota-Wisconsin
- **Status of FWS Involvement:** Not involved at the moment.
- **Project Timeline:** Final Tier 1 EIS anticipated in 2018. ESA consultation is anticipated at Chippewa River crossing for impacts to federally listed mussels.

Major Infrastructure Project
2017

Project Name: Line 3 Replacement

Project Sponsor: Enbridge, Inc.

Project Description

- **Sector:** Oil Pipeline
- **Lead Agency:** none (some U.S. Army Corps of Engineers permits for stream crossings)
- **Any Identifying Project Numbers:** NA
- **Location:** Minnesota, North Dakota, Wisconsin
- **Estimated Cost:** $2.6 billion

FWS Involvement

- **Region:** 3, 6
  - **Lead Region:** 3
- **Field Office:** North Dakota, Minnesota (R3 Regional Office is lead)
- **Status of FWS Involvement:**
  - June 2015 until February 2017: At Enbridge's request, FWS gave recommendations for mitigation of impacts to migratory birds and listed species for Segment 18 of the Line 3 Project (the section in WI, which has independent utility from the rest of the project) and iteratively revised recommendations to incorporate Enbridge's comments and updated data.
  - 2/9/17 - FWS signed an MOU with Enbridge re: conservation measures for migratory birds for Segment 18 of the Line 3 Project.
  - **Project Timeline:** Unknown at this time. Anticipate introductory meeting to discuss project in March 2017.

Major Infrastructure Project
2017

Project Name: I-10 BayWay Widening and Mobile River Bridge, Mobile, Alabama

Project Sponsor: Alabama Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** FHWA
- **Project Number:** DPI-0030(005)
- **Location:** Mobile County, Alabama
- **Estimated Cost:** $855 Million

FWS Involvement

- **Region:** 4
- **Field Office:** Alabama Ecological Services
- **Status of FWS Involvement:** Section 7 ESA formal consultation (Biological Opinion issued 2003)
- **Project Timeline:** Awaiting new Biological Assessment for potential impacts to a new species considered since project was proposed. Potential amendment to BO based on BA findings. No projected start date because of funding.

Major Infrastructure Project
2017

Project Name: Birmingham Northern Beltline

Project Sponsor: Alabama Department of Transportation

Project Description

- **Sector:**Transportation
- **Lead Agency:** FHWA
- **Project Number:** HPPF-APDF 1602(538)
- **Location:** Jefferson County, Alabama
- **Estimated Cost:** $3.9 Billion

FWS Involvement

- **Region:** 4
- **Field Office:** Alabama Ecological Services
- **Status of FWS Involvement:** Section 7 ESA Consultation; Only a 3 mile segment of the 52 mile long project has been completed to date and processed with an informal consultation.
- **Project Timeline:** Project being completed in short segments because of funding; therefore, project completion date is unknown.

Major Infrastructure Project
2017

Project Name: US 98 Bypass

Project Sponsor: Alabama Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** FHWA
- **Project Number:** NH 0210(013)
- **Location:** Mobile County, Alabama
- **Estimated Cost:** $112 Million

FWS Involvement

- **Region:** 4
- **Field Office:** Alabama Ecological Services
- **Status of FWS Involvement:** Section 7 ESA formal consultation (Biological Opinion issued 2004)
- **Project Timeline:** No date exists for completion of this project. Project was started and stopped before completion due to litigation. Funding has now become the primary issue with completion.

Major Infrastructure Project
2017

Project Name: Gulf Coast Parkway

Project Sponsor: Florida Department of Transportation.

Project Description

- **Sector:** Transportation
- **Lead Agency:** Florida Department of Transportation
- **Any Identifying Project Numbers:**
- **Location:** Gulf Coast Florida
- **Estimated Cost**: Unknown
- **Other:** NA

FWS Involvement

- **Region: 4**
- **Field Office:** Panama City Field Office
- **Status of FWS Involvement:** This is a new 29-mile roadway extending from US 98 in Gulf County to US 231 in Bay County, Florida. The FWS has participated in early planning through Florida's Efficient Transportation Decision Making (ETDM) process and the NEPA process since 2007. FWS is currently working with FDOT to wrap up NEPA and resolve issues under dispute; this involvement should be completed by fall 2017. Once NEPA is complete, section 7 consultation will be initiated. FWS will probably recommend that FDOT complete a conference opinion on the petitioned Panama City crayfish.
- **Project Timeline:** Summer 2018

Major Infrastructure Project
2017

Project Name: SR 87 Connector Road

Project Sponsor: Florida Department of Transportation.

Project Description

- **Sector:** Transportation
- **Lead Agency:** Florida Department of Transportation
- **Any Identifying Project Numbers:**
- **Location:** Gulf Coast Florida
- **Estimated Cost**: Unknown
- **Other:** NA

FWS Involvement

- **Region: 4**
- **Field Office:** Panama City Field Office
- **Status of FWS Involvement:** This is a new 14-mile connector road from SR 87S at US 90 east of Milton to SR 87N north of Milton in Santa Rosa County, Florida. The biological opinion (BO) has been completed, but is likely to require modifications once the construction contract is let.
- **Project Timeline:** December 2018

Major Infrastructure Project
2017

Project Name: US 98 Brooks Bridge Replacement

Project Sponsor: Florida Department of Transportation.

Project Description

- **Sector:** Transportation
- **Lead Agency:** Florida Department of Transportation
- **Any Identifying Project Numbers:**
- **Location:** Gulf Coast Florida
- **Estimated Cost**: Unknown
- **Other:** NA

FWS Involvement

- **Region: 4**
- **Field Office:** Panama City Field Office
- **Status of FWS Involvement:** This project is the replacement of a 0.8-mile bridge from Okaloosa Island to Fort Walton Beach in Okaloosa County, Florida. The FWS is currently coordinating with FDOT and their contractors and are awaiting the Biological Assessment. Formal consultation is likely to be initiated to address impacts to Gulf sturgeon.
- **Project Timeline:** December 2017

Major Infrastructure Project
2017

Project Name: West Bay Parkway (SR 388)

Project Sponsor: Florida Department of Transportation.

Project Description

- **Sector:** Transportation
- **Lead Agency:** Florida Department of Transportation
- **Any Identifying Project Numbers:**
- **Location:** Gulf Coast Florida
- **Estimated Cost**: Unknown
- **Other:** NA

FWS Involvement

- **Region: 4**
- **Field Office:** Panama City Field Office
- **Status of FWS Involvement:** This includes expanding existing roadway and extending the road on new alignment from SR 77 Bay County to US 98 in Walton County. FWS is currently working with FDOT to wrap up NEPA and resolve issues under dispute; this involvement should be completed by fall 2017. Consultation will likely be concluded informally.
- **Project Timeline:** December 2017

Major Infrastructure Project
2017

Project Name: Dalton Expansion pipeline

Project Sponsor: Williams Transcontinental Gas Pipe Line Company, L.L.C. (Transco)

Project Description: 106-mile natural gas pipeline lateral connecting Williams' existing Transco natural gas pipeline in central Georgia to an existing electric generating facility in north Georgia

- **Sector: Natural Gas Pipeline**
- **Lead Agency: FERC**
- **Any Identifying Project Numbers:** Docket CP15-117
- **Location:** Coweta, Carroll, Douglas, Paulding, Bartow, Gordon, Murray counties, Georgia
- **Estimated Cost:** Approximately $106 Million
- **Other:** NA

FWS Involvement

- **Region:** 4
- **Field Office:** Georgia ES, Athens, GA
- **Status of FWS Involvement:** FWS and partners worked closely with Transco to identify areas with listed or rare species, suggest alternative routes, and suggest modifications to construction methods to minimize impacts on 12 listed aquatic and terrestrial fish, animals, and plants. FWS and the FERC completed formal consultation for impacts to listed species under Section 7 of the ESA May 11, 2016 (consultation initiated April 28 = 13 days) -- consultation time was significantly reduced due to prior coordination between Transco and FWS during project design phases.
- **Project Timeline:** The pipeline currently is being constructed, and FWS, Transco, and the FERC continue to coordinate/consult on potential impacts associated with unforeseen alterations in project timing and installation. FWS involvement will not conclude until 10 years after project completion, when monitoring of restoration actions at streams excavated for pipeline installation (and, if necessary, implementation of appropriate remedial action) is completed, as required under the BO's RPMs/ITCs.

Major Infrastructure Project
2017

Project Name: Richland Creek Reservoir

Project Sponsor: Paulding County Water System

Project Description

- **Sector:** Drinking Water
- **Lead Agency:** U.S. Army Corps of Engineers, Savannah District
- **Any Identifying Project Numbers:** USACE Permit # 200701410
- **Location:** Paulding County, Georgia
- **Estimated Cost:** >$100M
- **Other:** NA

FWS Involvement

- **Region:** 4
- **Field Office:** Georgia ES, Athens, GA
- **Status of FWS Involvement:** The USACOE and applicant consulted early with FWS to determine potential impacts to trust resources and measures to reduce those impacts. FWS and the USACOE completed formal consultation, under Section 7 of the ESA, to evaluate on impacts of the project on listed fish in March 2013. FWS and the USACOE later consulted informally on project impacts when the Northern long-eared bat was listed in April 2015 -- surveys commissioned by the applicant did not locate this threatened species on site, and consultation again concluded June 16, 2015.
- **Project Timeline**: Groundbreaking for access roads was September 2015. The dam has not yet been constructed, and no listed species habitat has been inundated. FWS involvement will continue through the life of the project; our BO included RPMs/ITCs to (1) install USGS real time gages to document State and Federal mandated withdrawal rates from the Etowah River, pool elevation in the reservoir, and water quality and quantity in Richland Creek below the reservoir; and (2) sample permanent biological monitoring stations at specific sites and specific timeframes in Richland Creek and provide FWS with fish community biomass and composition data to evaluate impacts associated with reservoir construction and operation.

Major Infrastructure Project
2017

Project Name: Russell Creek Reservoir

Project Sponsor: Etowah Water and Sewer Authority

Project Description

- **Sector:** Drinking Water
- **Lead Agency:** Corps of Engineers, Savannah District
- **Any Identifying Project Numbers:** USACE Permit 200700907
- **Location:** Dawson County, Georgia
- **Estimated Cost:** >$100M
- **Other:** NA

FWS Involvement

- **Region:** 4
- **Field Office:** Georgia ES, Athens, GA
- **Status of FWS Involvement:** The USACOE and applicant consulted early with FWS to determine potential impacts to trust resources and measures to reduce those impacts. FWS and the USACOE completed formal consultation, under Section 7 of the ESA, to evaluate on impacts of the project on listed fish in July 2013. FWS and the USACOE later consulted informally on project impacts when the Northern long-eared bat was listed in April 2015 -- the biological opinion was quickly revised in July 2015, after EWSA stated tree clearing would occur during periods when female bats were not rearing young.
- **Project Timeline**: No work has occurred on the reservoir. If it is constructed, FWS involvement will continue through the life of the project; our BO included RPMs/ITCs to sample permanent biological monitoring stations at specific sites and specific timeframes in Richland Creek and the Etowah River and provide FWS with fish community biomass and composition data to evaluate impacts associated with reservoir construction and operation.

Major Infrastructure Project
2017

Project Name: Atlanta-Chattanooga High Speed Ground Transportation Project (HGST)

Project Sponsor: Georgia Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Railroad Administration
- **Any Identifying Project Numbers:** T001684 (GDOT Project Identification)
- **Location:** Georgia Counties: Bartow, Catoosa, Chattooga, Cherokee, Clayton, Cobb, Douglas, Floyd, Fulton, Gordon, Murray, Paulding, Polk, Walker, Whitfield; Tennessee County: Hamilton.
- **Estimated Cost:** $8.76B-10.42B
- **Other:** 110-Mile High-Speed Ground Transportation Corridor from Atlanta to Chattanooga. To maintain and enhance the economic vitality of the two anchor cities and throughout the Project Area, the mobility of those traveling within the Project Area requires improvement. With greater regional mobility connections to Atlanta and Hartsfield-Jackson Atlanta International Airport (HJAIA), a connection to the national and global economy would be realized for Chattanooga and Northwest Georgia.

FWS Involvement

- **Region:** 4
- **Field Office:** Georgia ES
- **Status of FWS Involvement:** On-going.
    - August 22, 2007. A Notice of Intent was published in the Federal Register (Vol. 72, No. 162, Pages: 47121-47122) that the FHWA and FRA will be jointly preparing an Environmental Impact Statement with
    - GDOT and TDOT on the impacts related to the proposed project.
    - July 26, 2010. FWS sent a letter to GDOT, accepting the role as a participating agency in the project planning process.
    - October 19, 2010. FWS participated in a meeting focused on introducing the project to participating agencies.
    - November 19, 2010. FWS submitted a letter to GDOT in response to their early coordination request, listing endangered and threatened species concerns related to the proposed project alignments.
    - October 31, 2016. Review of Tier 1 Draft EIS, comments submitted in a letter to FRA (FWS Log# 04EG1000-2017-TA-0134).
- **Project Timeline:** Project timeline not known.

Major Infrastructure Project
2017

Project Name: Summerville Bypass and Widening US 27 / SR 1

Project Sponsor: Georgia Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** 621082 (GDOT Project Identification)
- **Location:** Chattooga County, Georgia
- **Estimated Cost:** ~$113M

Other: reconstruction and relocation of a segment of SR1/US27 from CR 329 to Taylor Ridge then on new location to existing SR1/US27 near East Trion. The gross length of the project is 8.0 miles. The original concept called for a 4 lane, 44' depressed median beginning at CR 329 northward one-half mile, then transitioned to a· 14' flushed median for approximately one mile, then at the crest of Taylor Ridge transitioned to a 4' median for approximately 0.7 mile. From this point the proposed typical section called for a 44' depressed median for the remainder of the project. The concept has been revised to call for two 12' lanes in each direction with a 44' depressed median from CR 329 extending northward for 870', then transitions to a 14.5' median barrier for 5800'. Then it will proceed northeasterly on new location to continue the four-lane highway along Taylor's Ridge to bypass the town of Summerville and then return to the existing alignment of SR1/US2. This project is a route designated as part of the Governor's Road Improvement Program (GRIP). Originally adopted in 1989 by the Georgia General Assembly, GRIP is a system of 19 proposed economic development highways in Georgia. 328 miles of the 352-mile US 27 corridor are completed or currently under construction. Estimated cost to complete the remaining portions of the corridor project: $391M.

FWS Involvement

- **Region:** 4
- **Field Office:** Georgia ES
- **Status of FWS Involvement:** On-going.
    - 1996-2016. Continued coordination to assess impacts to species under ESA and impacts related to FWCA.
- **Project Timeline:** Project estimated start date: 2023.

Major Infrastructure Project
2017

Project Name: SR 20 Improvements

Project Sponsor: Georgia Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highways Administration and U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** 0014131 0014132 0014133 0002862 0003681 0003682 621350 0002626 (GDOT Project Identification)
- **Location:** Bartow, Cherokee and Forsyth counties, Georgia.
- **Estimated Cost:** ~$300M +
- **Other:** The SR 20 Improvements project area extends for approximately 24 miles, between I-575 in Canton and SR 400 in Cumming.

FWS Involvement

- **Region:** 4
- **Field Office:** Georgia ES
- **Status of FWS Involvement:** On-going.
    - December 19, 2013. FWS submits a letter to be a Cooperating Agency.
    - December 8, 2015. GDOT released a notice that the project would be funded through funds secured from the State's Transportation Funding Act of 2015. Federal lead transferred at this time to U.S. Army Corps of Engineers.
    - March 1, 2017. FWS received Practical Alternatives Report.
- **Project Timeline:** Project estimated start date: 2019.

Major Infrastructure Project
2017

Project Name: State Route 5 Improvements and McCaysville Bypass

Project Sponsor: Georgia Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** 621340 620490 (GDOT Project Identification)
- **Location:** Fannin County Georgia, Polk County, Tennessee
- **Estimated Cost:** ~$100M
- **Other:** State Route 5 from State Route 2/Blue Ridge to proposed McCaysville Bypass (621340) and McCaysville Bypass (620490). The proposed project corridor is approximately 11 miles long.

FWS Involvement

- **Region:** Region 4
- **Field Office:** Georgia ES
- **Status of FWS Involvement:** On-going.
    - 2016. FWS participated in early coordination and comments related to potential species impacts.
- **Project Timeline:** Project estimated start date: 2020.

Major Infrastructure Project
2017

Project Name: Widening and Improvements to U.S. Highway 441/State Route 15

Project Sponsor: Georgia Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** 122090 (GDOT Project Identification)
- **Location:** Rabun County, Georgia
- **Estimated Cost:** ~$100M
- **Other:** Widening and improvements to U.S. Highway 441/State Route 15 from CS 500/Clayburn Road, just inside Clayton's northern limit Rabun County, Georgia, northward to the North Carolina state line. This project is a route designated as part of the Governor's Road Improvement Program (GRIP). Originally adopted in 1989 by the Georgia General Assembly, GRIP is a system of 19 proposed economic development highways in Georgia. 228 miles of the 371-mile US 441corridor are completed or currently under construction. Estimated cost to complete the remaining portions of the corridor project: $797M.

FWS Involvement

- **Region:** Region 4
- **Field Office:** Georgia ES
- **Status of FWS Involvement:** On-going.
    - 1994. FWS began coordination on the project with GDOT.
    - March 3, 2016. FWS submitted FWCA comments to Federal Highway Administration.
    - May 16, 2016. FWS completed informal section 7 consultation for Small Whorled Pogonia
    - July 11, 2016. FWS submitted a BO related to project impacts on listed bats.
- **Project Timeline:** Project estimated start date: 2019.

Major Infrastructure Project
2017

Project Name: South Calhoun Bypass

Project Sponsor: Georgia Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** 662510 610870 (GDOT Project Identification)
- **Location:**
- **Estimated Cost:** ~$100M
- **Other:** South Calhoun Bypass; connecting State Route 53 southwest of Calhoun to State Route 53 east of Calhoun (PI 662510) and construction of a full diamond interchange for Union Grove Road at Interstate 75 (PI 610870)

FWS Involvement

- **Region:** 4
- **Field Office:** Georgia ES
- **Status of FWS Involvement:** On-going.
    - 2004. FWS begins coordination on the project.
    - 2004-2016. FWS participates in continued coordination related to project activities.
    - June 10, 2011. FWS submitted FWCA comments to Federal Highway Administration.
    - January 20, 2016. FWS submitted a BO related to project impacts on listed bats.
    - 2016 – 2017. FWS has continued to participate in coordination related to changes in project activities.
- **Project Timeline:** Project estimated start date: currently under construction, expected completion date June 30, 2021.

Major Infrastructure Project
2017

Project Name: State Route 515 & 2/ U.S. Highway 76 improvements and Young Harris Bypass

Project Sponsor: Georgia Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** 122900 (GDOT Project Identification)
- **Location:** Towns and Union counties, Georgia.
- **Estimated Cost:** ~$100M
- **Other:** The project proposes the widening and reconstruction of State Route (SR) 515/United States Highway (US) 76 in Union and Towns counties, Georgia, from City Street (CS) 2898/Young Harris Street in Blairsville to just north of County Road (CR) 153/Timberline Drive in Young Harris. SR 515/US 76 is also part of Corridor A of the Appalachian Development Highway System (ADHS). The ADHS was authorized by Congress in 1965 and was designed to generate economic development in the previously isolated Appalachian region. In addition, SR 515/US 76 is a route designated as part of the Governor's Road Improvement Program (GRIP). Originally adopted in 1989 by the Georgia General Assembly, GRIP is a system of 19 proposed economic development highways in Georgia. 75 miles of the 76-mile Appalachian Developmental Highway corridor are completed or currently under construction. Estimated cost to complete the remaining portions of the corridor project: $13.7M.

FWS Involvement

- **Region:** 4
- **Field Office:** Georgia ES
- **Status of FWS Involvement:** On-going.
    - 2007. FWS begins coordination on the project.
    - 2007-2017. FWS participates in continued coordination related to project activities.
    - February 21 and 22, 2017. FWS received a request to initiate formal Section 7 for listed bats, informal Section 7 for listed plants, and to provide comment related to FWCA.
- **Project Timeline:** Project estimated start date: 2020.

Major Infrastructure Project
2017

Project Name: Rome-Cartersville Development Corridor (formerly US 411 Connector)

Project Sponsor: Georgia Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** 661950 (GDOT Project Identification)
- **Location:** Bartow County, Georgia
- **Estimated Cost:** ~$200M
- **Other:** Rome-Cartersville Development Corridor. Formerly referred to as the US 411 Connector project. US 411 Connector from State Route 20/3/U.S. Highway 41 to Interstate-75. This project provides a new US 411 to I-75 connection by constructing a 7.31 mile long freeway on new location between the existing US 411/US 41 interchange and existing SR 20 east of I-75, with a new interchange at I-75. An interchange with existing US 411 is also proposed. 24 bridges are on the project.

FWS Involvement

- **Region:** 4
- **Field Office:** Georgia ES
- **Status of FWS Involvement:** On-going.
    - Coordination for this project has not occurred since 2013.
- **Project Timeline:** Project estimated start date: 2051

Major Infrastructure Project
2017

Project Name: State Route 92 Widening

Project Sponsor: Georgia Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** 621720 0007692 0006857 0006866 0006862 731865 (GDOT Project Identification)
- **Location:** Cobb and Paulding counties, Georgia.
- **Estimated Cost:** ~$180M
- **Other:** State Route 92 widening from just north of State Route 120 to Old Burnt Hickory Road in Cobb and Paulding counties. ~$72 mil. Estimated construction start 2025. Additional improvements (0006857 0006866 0006862 731865) along this corridor add ~$108 mil of project dollars, construction beginning in 2018. The proposed project would begin just north of SR 120 and extend into Paulding and Cobb counties along the existing SR 92 alignment to Old Burnt Hickory Road. The project typical section is projected to be 4-lanes with a raised median and curb and gutter. A sidewalk or multi-use path is also proposed. Roundabouts will be proposed as intersection improvements at Due West Road, Due West Street, and Old Burnt Hickory Road. The project is approximately 8 miles long.

FWS Involvement

- **Region:** 4
- **Field Office:** Georgia ES
- **Status of FWS Involvement:** On-going
    - 2005. FWS started coordination on this project.
    - 2005-2016. FWS participated in continued coordination related to project activities.
- **Project Timeline:** Project estimated start date: 2018

Major Infrastructure Project
2017

Project Name: Tybee Island Causeway

Project Sponsor: Georgia Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** 0010560 (GDOT Project Identification)
- **Location:** Tybee Island, Georgia
- **Estimated Cost:** ~$82M (included because of high profile nature with GA legislators).
- **Other:** This project proposes to improve US 80/SR 26 from West of Bull River to East of Lazeretto Creek. Replacement and widening of the existing bridges is proposed to add shoulders for safety and to accommodate pedestrian and bicycle traffic. Wide paved shoulders are proposed for safety and to accommodate bicycles. This route is the only access to Tybee Island and serves as the only hurricane and emergency route. This project is almost entirely within the boundary of the Fort Pulaski National Monument/park. There is a Bicycle/pedestrian trail (McQueens Trail) parallel to the project and connections are proposed from the bridges to this trail.

FWS Involvement

- **Region:** 4
- **Field Office:** Georgia ES
- **Status of FWS Involvement:** On-going.
    - FWS participated in continued coordination related to project activities.
- **Project Timeline:** Project estimated start date: 2026

Major Infrastructure Project
2017

Project Name: U.S. Highway 1 / State Route 4 Improvements

Project Sponsor: Georgia Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** 522180 522190 522220 522200 (GDOT Project Identification)
- **Location:** Appling and Toombs counties, Georgia.
- **Estimated Cost:** ~$175M
- **Other:** Widening and reconstruction of US Highway 1/State Route 4. The approved concept for EDS-545(23) in Appling and Toombs counties is proposed to widen and reconstruct US 1/SR 4 from Plant Hatch in Appling County to SR 56 in Toombs County. At the beginning of the project, US 1/SR 4 would be widened on the east side to have four lanes with a 32-44 ft grassed median (32' from the beginning of the project to south of SR 147). The widening would continue on the east side to the end of the project at SR 56, the beginning of EDS-545(24) in Toombs County. Existing right-of-way along US 1/SR 4 varies from 100 feet to 200 feet. The proposed right-of-way would vary from 184 feet to 253 feet for the length of the project. The speed design is 55 mph, and access would be by permit. New parallel bridge structures will be constructed over the Altamaha River, Altamaha River Overflow, Williams Creek, and Cobb Creek. (The existing bridges at these locations will be rehabilitated and widened under bridge project numbers.). This project is a route designated as part of the Governor's Road Improvement Program (GRIP). Originally adopted in 1989 by the Georgia General Assembly, GRIP is a system of 19 proposed economic development highways in Georgia. 197 miles of the 331-mile US 1 corridor are completed or currently under construction. Estimated cost to complete the remaining portions of the corridor project: $794M.

FWS Involvement

- **Region:** 4
- **Field Office:** Georgia ES
- **Status of FWS Involvement:** On-going
    - FWS participated in continued coordination related to project activities.
- **Project Timeline:** Project estimated start date: 2020.

Major Infrastructure Project
2017

Project Name: State Route 38 / U.S. Highway 84 widening

Project Sponsor: Georgia Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** 0012845 422120 522770 522775 522780 (GDOT Project Identification)
- **Location:** Clinch and Ware counties, Georgia.
- **Estimated Cost:** ~$175M
- **Other:** The project begins just west of Greasy Branch and ends just west of CR88/Ruskin Road. The project will also replace the existing bridges at Greasy Branch, Little Alligator Creek, and Big Alligator Creek (PI#522775). 0012845 proposes to widen US84/SR38 from 2 to 4 lanes with a 32-foot depressed, grassed median. The proposed alignment follows the existing highway for the length of the project. The project begins at Peagler Crossing Road and ends at Fire Tower Road. This project is a route designated as part of the Governor's Road Improvement Program (GRIP). Originally adopted in 1989 by the Georgia General Assembly, GRIP is a system of 19 proposed economic development highways in Georgia. 259 miles of the 259-mile US 84 corridor are completed or currently under construction. Estimated cost to complete the remaining portions of the corridor project: $0M.

FWS Involvement

- **Region:** 4
- **Field Office:** Georgia ES
- **Status of FWS Involvement:** On-going
    - Section 7 and FWCA coordination completed. FWS will continue to communicate with GDOT and the federal lead related to changes in project activities.
- **Project Timeline:** Project estimated start date: currently under construction.

Major Infrastructure Project
2017

Project Name: State Route 96 corridor improvements

Project Sponsor: Georgia Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** 0007251 322460 322470 (GDOT Project Identification)
- **Location:** Peach, Houston, and Twiggs counties, Georgia.
- **Estimated Cost:** ~$150M
- **Other:** State Route 96 corridor widening from the existing two lanes to the proposed four lanes, from Interstate-75 to Interstate-16. The project will also reconstruct the interchange of I-16 and SR 96. The existing bridge spanning I-16 will be replaced and SR 96 will be widened to 4 lanes with a raised median. Interchange lighting will be installed with the project's construction.

FWS Involvement

- **Region:** Region 4
- **Field Office:** Georgia ES
- **Status of FWS Involvement:** On-going.
    - Section 7 and FWCA coordination completed. FWS will continue to communicate with GDOT and the federal lead related to changes in project activities.
- **Project Timeline:** Project estimated start date: some parts of this project are under construction.

Major Infrastructure Project
2017

Project Name: **Savannah Harbor Expansion Project (SHEP)**

Project Sponsor: Dept. of Commerce, U.S. Army Corps of Engineers (federal sponsors), Georgia Department of Transportation and Georgia Ports Authority (non-federal sponsors)

Project Description

- **Sector:** Transportation
- **Lead Agency:** Dept. of Commerce, USACE
- **Any Identifying Project Numbers:** NA
- **Location:** Savannah Harbor, GA
- **Estimated Cost: 702+M**
- **Other:** The WRDA of 1990 authorized the U.S. Army Corps of Engineers to construct the SHEP after receiving approval from the Department of Interior (FWS), Department of Commerce, and EPA that the associated mitigation plan adequately addressed the potential environmental impacts. After 16 years of analysis a plan was approved. SHEP's budgeted cost is $702M (FY 2014 price levels), over 40 percent of the cost is for the mitigation of impacts, mostly environmental. No federal construction dollars have been budgeted yet. The State of Georgia has a Project Partnership Agreement with the USACOE to accelerated use of the Georgia portion of the funding to allow the construction to begin.

FWS Involvement

- **Region** 4
- **Field Office:** Georgia ES, Charleston ES
    - **Lead Field Office, if more than one involved:** Georgia ES
- **Status of FWS Involvement:** On-going
- FWS is currently involved in reviewing and commenting on revisions to various SHEP plans; Supplemental Environmental Assessments and work plans. This will last until near the time construction is complete, currently projected for January 2021. Also FWS participates in the Interagency Coordination Team for SHEP monitoring and adaptive management. This will last at least 10 years after construction is complete to insure effects of the SHEP are as projected.
- **Project Timeline:** Timeline for completion of FWS involvement: The FWS will be involved with at least some aspect of the SHEP through year 2031.

Major Infrastructure Project
2017

Project Name: Atlanta-Charlotte High Speed Ground Transportation Project (HGST)

Project Sponsor: Georgia Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Railroad Administration
- **Any Identifying Project Numbers:** NA
- **Location**: Northern Georgia, Northern SC and vicinity of Charlotte, NC
- **Estimated Cost:** capital costs $2.5B, unknown complete cost
- **Other:** The Atlanta to Charlotte Passenger Rail Corridor Investment Plan (PRCIP) is an extension of the Southeast High-Speed Rail Corridor (SEHSR), which is under development from Charlotte to Washington, D.C. The extension from Charlotte, would travel southeast through portions of South Carolina and into Atlanta. The Atlanta to Charlotte Passenger Rail Corridor Investment Plan project was awarded a federal High Speed Intercity Passenger Rail grant in 2010, which funded most of the project. The Georgia Department of Transportation contributed additional "match" funding.

FWS Involvement

- **Region**: 4
- **Field Office:** Georgia ES
- **Status of FWS Involvement:** On-going. 2013. Initial Scoping meeting for the project. Upcoming review of Draft EIS
- **Project Timeline:** 2017 Draft EIS available.

Major Infrastructure Project
2017

Project Name: I-69 Bridge over the Ohio River

Project Sponsor: Federal Highway Administration, Indiana Department of Transportation; Kentucky Transportation Cabinet (KYTC)

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration, Indiana
- **Any Identifying Project Numbers:** KYTC 2-1088
- **Location:** Henderson County, Kentucky; Vanderburgh County, Indiana
- **Estimated Cost:** Greater than 100 million
- **Other:** NA

FWS Involvement

- **Region:** 3 and 4
  - **Lead Region, if more than one involved:** not identified at this time
- **Field Office:** Kentucky Field Office; Indiana Field Office
  - **Lead Field Office, if more than one involved:** not identified at this time
- **Status of FWS Involvement:** FWS technical assistance and early coordination in the form of meetings. FWS review and comment (3/6/17) on the FWHA NOI to prepare an Environmental Impact Statement.
- **Project Timeline:** Per KYTC, submittal of a Biological Assessment is anticipated in the fall of 2017 for ESA review by the FWS. A draft EIS is anticipated spring of 2018. Initiation and completion of ESA consultation cannot be determined at this time.

Major Infrastructure Project
2017

Project Name: I-75 Widening

Project Sponsor: Federal Highway Administration, Kentucky Transportation Cabinet (KYTC)

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** KYTC 8-6.1, 8-6.2, 8-6.3
- **Location:** Rockcastle County, Kentucky
- **Estimated Cost:** Greater than 100 million
- **Other:** Widening Interstate to Six Lanes

FWS Involvement

- **Region:** 4
- **Field Office:** Kentucky Field Office
- **Status of FWS Involvement:** ESA informal consultation completed November 4, 2016 on KYTC 8-6.3 section. Continued FWS involvement is ongoing including technical assistance and ESA consultation for the remaining KYTC 8-6.1 and 8-6.2 sections
- **Project Timeline:** KYTC intends to complete presence/absence surveys for sections 8-6.1 and .2 during the summer of 2017. Submittal of a Biological Assessment is anticipated in the fall of 2017 for ESA review by the FWS. ESA consultation is expected to be completed fall/winter 2017.

Major Infrastructure Project
2017

Project Name: Kentucky Lock Addition Project

Project Sponsor: U.S. Army Corps of Engineers – Nashville District

Project Description

- **Sector:** Transportation (by water)
- **Lead Agency:** U.S. Army Corps of Engineers – Nashville District
- **Any Identifying Project Numbers:** FWS#2016-B-0469
- **Location:** Marshall and Livingston counties, KY
- **Estimated Cost:** $1.25 billion
- **Other:** NA

FWS Involvement

- **Region:** 4
- **Field Office:** Kentucky Field Office
- **Status of FWS Involvement:** ESA consultation regarding potential impacts to aquatic fauna. Biological Opinion completed. FWS is involved in an ongoing, minor modification of the BO and mussel monitoring through project construction.

Project Timeline: The BO completed in 2016. A minor modification of the project will require a minor modification of the BO that is expected to be completed

Major Infrastructure Project
2017

Project Name: Letcher County Prison

Project Sponsor: Federal Bureau of Prisons

Project Description

- **Sector:** Prison (construction)
- **Lead Agency:** Federal Bureau of Prisons
- **Any Identifying Project Numbers:** NA
- **Location:** Letcher County, KY
- **Estimated Cost:** $160,000,000
- **Other:** NA

FWS Involvement

- **Region:** 4
- **Field Office:** Kentucky Field Office
- **Status of FWS Involvement:** The Bureau of Prisons has submitted a draft Biological Assessment to the Kentucky Field Office to address ESA species and is expected to initiate formal consultation in early April 2017.
- **Project Timeline:** The Bureau of Prisons has requested a response from the Kentucky Field Office to the draft BA by the end of March at which time it is expected that they will initiate formal consultation. Formal consultation is expected to be completed in 2017.

Major Infrastructure Project
2017

Project Name: Olmsted Lock and Dam Project

Project Sponsor: U.S. Army Corps of Engineers – Louisville District & Inland Waterways Trust Fund

Project Description

- **Sector:** Transportation (by water)
- **Lead Agency:** U.S. Army Corps of Engineers – Louisville District
- **Any Identifying Project Numbers:** NA
- **Location:** Ballard County, KY and Pulaski County, IL
- **Estimated Cost:** $2.96 billion
- **Other:** NA

FWS Involvement

- **Region:** 4
- **Field Office:** Kentucky Field Office
- **Status of FWS Involvement:** ESA consultation regarding potential impacts to aquatic fauna has been completed. A Biological Opinion was completed by the Tennessee FO when project was initiated. FWS expects ongoing consultation on an as needed basis until the project is completed in 2023 to 2028 related to federally listed species, primarily freshwater mussels.
- **Project Timeline:** A BO was completed in 2003. FWS expects re-initiation of consultation with the USACOE in 2017-2019 due to recent listings of additional species under the ESA. Re-initiation may be informal or formal

Major Infrastructure Project
2017

Project Name: The Tennessee Gas Abandonment and Capacity Project (ACR) and Utica Marcellus Texas Pipeline Project (UMTP)

Project Sponsor: Tennessee Gas Pipeline Company, L.L.C. and Utica Marcellus Texas Pipeline, LLC

Project Description

- **Sector:** Pipelines
- **Lead Agency:** Federal Energy Regulatory Commission and U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** FERC Docket No.CP15-88-000
- **Location:** multi-state – see below
- **Estimated Cost:** >$100 million
- **Other:** Project includes: (1) abandonment of 964 miles of mainline pipeline facilities between Louisiana and Ohio; (2) construction and operation of new and replacement pipelines totaling about 15.5 miles in Ohio, Kentucky, Tennessee, and Mississippi; (3) construction of four new natural gas compressor stations in Ohio; (4) construction of two new compressor units at an existing compressor station in Kentucky; (5) construction of one new compressor unit at an approved compressor station in Kentucky (6) construction of approximately 28 miles of greenfield lateral/collector lines in Ohio, (7) construction of a 200-acre tank storage facility and pump station in in Ohio; and (8) construction of approximately 202 miles of greenfield pipeline in Louisiana and Texas.

FWS Involvement

- **Region:** 2, 3, 4
- **Lead Region:** 4
- **Field Office:** Many, multiple-states
- **Lead Field office:** Kentucky Field Office
- **Status of FWS Involvement:** ESA section 7 consultation
- **Project Timeline:** Due to the pending nature of certain species-specific surveys and effects determinations, the FWS cannot provide an estimated completion date for Endangered Species Act consultation at this time. Upon receipt of the required information, the FWS will evaluate the potential effects of the Project on these species.

Major Infrastructure Project
2017

Project Name: US 51 Bridge Replacement

Project Sponsor: Federal Highway Administration, Kentucky Transportation Cabinet (KYTC)

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** KYTC 1-1140.01
- **Location:** Ballard County, Kentucky
- **Estimated Cost:** Greater than 100 million
- **Other:** Replace bridge and approaches over the Ohio River near Cairo, Kentucky

FWS Involvement

- **Region:** 4
- **Field Office:** Kentucky Field Office
- **Status of FWS Involvement:** ESA consultation process has not officially begun with the FWS at this time.
- **Project Timeline:** This project has been identified in the KYTC six year plan (2016-2022); however, no schedule and/or timeline have been identified yet per coordination with KYTC.

Major Infrastructure Project
2017

Project Name: Wolf Creek Dam/Lake Cumberland Return to Historical Pool Level Operations

Project Sponsor: U.S. Army Corps of Engineers, Nashville District

Project Description

- **Sector:** Dam repair
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** FWS 2008-B-0075
- **Location:** Russell County, Kentucky
- **Estimated Cost:** 100 million +
- **Other:** An emergency draw-down of Lake Cumberland was facilitated in 2007 to conduct repairs on the Wolf Creek Dam; this project involved returning the lake to historical pool level operations. The action area included Wolf Creek Dam, Lake Cumberland, and those riverine, riparian, and upland habitats associated with the Cumberland River mainstem and its tributaries upstream of Wolf Creek Dam, subject to temporary and/or permanent inundation.

FWS Involvement

- **Region:** 4
- **Field Office:** Kentucky Field Office
- **Status of FWS Involvement:** The drawdown of the lake exposed previously un-documented areas that were inhabited by the federally-endangered duskytail darter (*Etheostoma percnurum*). These areas were likely to be temporarily-to-permanently re-inundated by a return to historical lake operations; therefore, the USACOE determined the action "may affect, was likely to adversely affect" the species and requested formal consultation. Though the project is complete, FWS will continue to oversee implementation of the conservation measures (as described below) through 2024.
- **Project Timeline:** Formal consultation was initiated on February 13, 2014 and a final non-jeopardy biological opinion was issued by FWS on March 24, 2014. The USACOE accepted the BO on April 17, 2014 and immediately began returning Lake Cumberland to historical pool elevation. Lake Cumberland now operates at the historical pool elevation of 723 feet. Conservation measures described within the proposed action are undergoing active implementation and include the capture and holding of duskytail darters from the affected sites for propagation, three habitat improvement projects to improve water quality within duskytail darter projects, and following, as much as conditions allow, the Top SEPA Curve during the filling cycle until the habitat improvement projects are complete. Annual monitoring of the affected areas is also on-going.

Major Infrastructure Project
2017

Project Name: Reconstruction of KY 32

Project Sponsor: Federal Highway Administration, Kentucky Transportation Cabinet (KYTC)

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** KYTC 9-192
- **Location:** Elliott and Rowan counties, Kentucky
- **Estimated Cost:** Greater than 100 million
- **Other:** NA

FWS Involvement

- **Region:** 4
- **Field Office:** Kentucky Field Office
- **Status of FWS Involvement:** ESA Section 7 formal consultation regarding adverse effects on federally-listed bats.
- **Project Timeline:** Currently the project has no letting date for construction. A Draft Biological Opinion has been completed and is in the review process. Formal consultation is expected to be completed in March 2017.

Major Infrastructure Project
2017

Project Name: Venture Global Calcasieu Pass Terminal and TransCameron Pipeline Project

Project Sponsor: Venture Global Calcasieu Pass, LLC (Venture Global) and TransCameron Pipeline, LLC (TransCameron)

Project Description

- **Sector:** Pipelines
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers:** CP15-550-000
- **Location:** Calcasieu River/Pass in Cameron Parish, Louisiana
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 4
- **Field Office:** Louisiana Field Office
- **Status of FWS Involvement:** FWS concluded an Endangered Species Act Section 7 informal consultation with FERC via official letter dated September 24, 2015. Through that correspondence, FWS concurred with "not likely to adversely affect" determinations for West Indian manatee, red knot, and piping plover. Migratory bird habitat impact assessments and associated mitigation considerations are currently being coordinated between FWS and the project proponent. FWS recent correspondence with FERC regarding those assessments occurred on February 6, 2017, and FWS biologists conducted a site inspection of the proposed impact area on February 23, 2017.
- **Project Timeline:** An estimated completion date is not available at this time.

Major Infrastructure Project
2017

Project Name: Red River L&D No. 4

Project Sponsor: BOST3 Hydroelectric Company, LLC (BOST3)

Project Description

- **Sector:** Hydropower
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers:** FERC Project Number 12756
- **Location:** Natchitoches Parish, LA
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 4
- **Field Office:** Louisiana Field Office
- **Status of FWS Involvement:** The project proponent is continuing to coordinate with FERC regarding their license application. FWS has conducted Endangered Species Act Section 7 informal consultation regarding interior least tern, pallid sturgeon, and northern long-eared bat with FERC via emails and official letters over the last 14 years. FWS will continue to coordinate with FERC and the license applicant in a timely manner as requests for such coordination are submitted to our office.
- **Project Timeline:** An estimated completion date is not available at this time.

Major Infrastructure Project
2017

Project Name: Tier One Baton Rouge Loop Toll Facility

Project Sponsor: Federal Highway Administration

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers:** F.A.P. Project No. H008732
- **Location:** Baton Rouge, LA
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 4
- **Field Office:** Louisiana Field Office
- **Status of FWS Involvement:** FWS corresponded with FHWA regarding Endangered Species Act Section 7 requirements via official letter dated March 10, 2009, including information regarding potential project impacts to the Alabama (inflated) heelsplitter mussel, the Atlantic (Gulf) sturgeon, West Indian manatee, and pallid sturgeon. FWS provided additional comments regarding potential impacts to jurisdictional wetlands and migratory birds in an official letter dated December 21, 2011. FWS will continue to coordinate with FHWA in a timely manner as requests for such coordination are submitted to our office.
- **Project Timeline:** An estimated completion date is not available at this time.

Major Infrastructure Project
2017

Project Name: **I-10 to US 61 in St. John the Baptist Parish**

Project Sponsor: Federal Highway Administration

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers**: F.A.P. Project No. H004891
- **Location:** St. John the Baptist Parish, Louisiana
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region**: 4
- **Field Office:** Louisiana Field Office
- **Status of FWS Involvement:** FWS has attended multiple meetings and provided written comments in an official letter dated December 20, 2013, in response to a Preliminary Draft Environmental Impact Statement for the proposed project. FWS expressed concerns regarding the reduction of project alternatives at that time and requested that all less-damaging practicable alternatives be included in forthcoming environmental analyses. That sentiment was reiterated in a May 12, 2015, email to the environmental consulting firm representing FHWA. FWS will continue to coordinate with FHWA in a timely manner as requests for such coordination are submitted to our office.
- **Project Timeline:** An estimated completion date is not available at this time.

Major Infrastructure Project
2017

Project Name: Mid-Barataria Sediment Diversion

Project Sponsor: Coastal Protection and Restoration Authority (Louisiana)

Project Description

- **Sector:** Ecosystem Restoration
- **Lead Agency:** U.S. Army Corps of Engineers, New Orleans District.
- **Location:** Jefferson, Plaquemine, and Lafourche Parishes, Louisiana
- **Estimated Cost:** $102,345,700
- **Other:** The diversion is expected to restore at least 20,000 acres of coastal wetlands over 50 years by restoring Mississippi River flows to the adjacent estuary.

FWS Involvement

- **Region:** 4
- **Field Office:** Louisiana Field Office
- **Status of FWS Involvement:** FWS has agreed to be a cooperating agency for the NEPA analysis. FWS involvement would include providing a draft and final Fish and Wildlife Coordination Act report on the permit, NEPA comments on the draft and final EIS, and preparation of a Biological Opinion. Also the FWS is the Lead Federal Agency as a trustee under OPA. Assistance in preparing a Migratory Bird Conservation Plan is a possibility.
- **Project Timeline:** The timeline is currently being developed.

Major Infrastructure Project
2017

Project Name: **Gulf LNG Liquefaction Project**

Project Sponsor: Gulf LNG Liquefaction Company, LLC and Gulf LNG Energy, LLC

Project Description

- **Sector:** Pipeline
- **Lead Agency:** Federal Energy Regulatory Commission (FERC)
- **Any Identifying Project Numbers:** CP15-521-000
- **Location:** Pascagoula, Jackson County, Mississippi
- **Estimated Cost:** Estimated >$100 million
- **Other:** This project is proposing to construct natural gas liquefaction and liquid natural gas (LNG) export facilities at an existing LNG import terminal.

FWS Involvement

- **Region:** Region 4
- **Field Office:** Jackson, Mississippi Ecological Services Field Office
- **Status of FWS Involvement:** Coordination under the Endangered Species Act, Fish and Wildlife Coordination Act, Migratory Bird Treaty Act, and Bald and Golden Eagle Protection Act. To date our agency has coordinated with FERC and the applicant during FERC's pre-filing process. Our office has submitted comments regarding a number of different wetland mitigation options under the Fish and Wildlife Coordination Act review process. Additionally, our office has submitted preliminary information relative to potential impacts to federally listed species, migratory birds, and bald eagles. Our office will submit additional information on these issues once FERC's final environmental document is received within the allotted time allowed.
- **Project Timeline:** FERC received an incomplete application on 06/19/2015 is waiting on additional information from the applicant to complete the application. Once FERC receives a complete application, FERC will publish its final environmental document. Once that final environmental document is published, FWS will coordinate with FERC within the allotted time outlined in an agreed-upon timetable.

Major Infrastructure Project
2017

Project Name: Port Bienville Railroad Project

Project Sponsor: Hancock County Port and Harbor Commission

Project Description

- **Sector:** Surface Transportation
- **Lead Agency:** Department of Transportation/ Federal Railroad Administration
- **Any Identifying Project Numbers:** FRA-0023-00(003)/105494 101000-102000; TAILS# 2013-I-210, 2016-CPA-068
- **Location:** Hancock and Pearl River counties, Mississippi
- **Estimated Cost:** Unknown
- **Other:** Approximately 24-mile freight rail connecting the Port Bienville Railroad and the Norfolk Southern rail line near Interstate 59, north of the National Aeronautics and Space Administration's John C. Stennis Space Center.

FWS Involvement

- **Region:** 4
- **Field Office:** Mississippi
- **Status of FWS Involvement:** Endangered Species Act Consultation: species list provided 12/16/2014 and updated on 11/10/2016. Agreed to be a Cooperating Agency in development of EIS on 02/19/2016.
- **Project Timeline:** An estimated completion date is not available at this time. A draft Environmental Impact Statement is being prepared with an anticipated release date of March 2017.

Major Infrastructure Project
2017

Project Name: RDU runway reconstruction in Wake Co

Project Sponsor: North Carolina Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** NCDOT
- **Any Identifying Project Numbers:** AV-5700
- **Location:** Wake County, North Carolina
- **Estimated Cost:** > $100 million

FWS Involvement

- **Region: 4**
- **Field Office:** North Carolina Raleigh/Asheville
- **Status of FWS Involvement:** North Carolina Department of Transportation Merger Process. The Merger is a process to streamline the project development and permitting processes, agreed to by the USACE, NCDENR (DWQ, DCM), FHWA and NCDOT and supported by other stakeholder agencies and local units of government. To this effect, the Merger process provides a forum for appropriate agency representatives to discuss and reach consensus on ways to facilitate meeting the regulatory requirements of Section 404 of the Clean Water Act during the NEPA/SEPA decision-making phase of transportation projects. The Merger Process allows agency representatives to work more efficiently (quicker and comprehensive evaluation and resolution of issues) by providing a common forum for them to discuss and find ways to comply with key elements of their agency's mission. The merger process helps to document how competing agency mandates are balanced during a shared decision-making process, which results in agency representatives reaching a "compromise based decision" to the regulatory and individual agency mandates.
- **Project Timeline:** TBD by NCDOT - see Merger Process timeline information.

Major Infrastructure Project
2017

Project Name: Bonner Bridge and NC 12 Improvements in Dare Co

Project Sponsor: North Carolina Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** NCDOT
- **Any Identifying Project Numbers:** B-2500
- **Location:** Wake County, North Carolina
- **Estimated Cost:** > $100 million

FWS Involvement

- **Region: 4**
- **Field Office:** North Carolina Raleigh/Asheville
- **Status of FWS Involvement:** North Carolina Department of Transportation Merger Process. The Merger is a process to streamline the project development and permitting processes, agreed to by the USACE, NCDENR (DWQ, DCM), FHWA and NCDOT and supported by other stakeholder agencies and local units of government. To this effect, the Merger process provides a forum for appropriate agency representatives to discuss and reach consensus on ways to facilitate meeting the regulatory requirements of Section 404 of the Clean Water Act during the NEPA/SEPA decision-making phase of transportation projects. The Merger Process allows agency representatives to work more efficiently (quicker and comprehensive evaluation and resolution of issues) by providing a common forum for them to discuss and find ways to comply with key elements of their agency's mission. The merger process helps to document how competing agency mandates are balanced during a shared decision-making process, which results in agency representatives reaching a "compromise based decision" to the regulatory and individual agency mandates.
- **Project Timeline:** TBD by NCDOT - see Merger Process timeline information.

Major Infrastructure Project
2017

Project Name: I-85 pavement rehab in Vance/Warren Co

Project Sponsor: North Carolina Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** NCDOT
- **Any Identifying Project Numbers:** I-0914
- **Location:** Wake County, North Carolina
- **Estimated Cost:** Vance and Warren counties, North Carolina

FWS Involvement

- **Region: 4**
- **Field Office:** North Carolina Raleigh/Asheville
- **Status of FWS Involvement:** North Carolina Department of Transportation Merger Process. The Merger is a process to streamline the project development and permitting processes, agreed to by the USACE, NCDENR (DWQ, DCM), FHWA and NCDOT and supported by other stakeholder agencies and local units of government. To this effect, the Merger process provides a forum for appropriate agency representatives to discuss and reach consensus on ways to facilitate meeting the regulatory requirements of Section 404 of the Clean Water Act during the NEPA/SEPA decision-making phase of transportation projects. The Merger Process allows agency representatives to work more efficiently (quicker and comprehensive evaluation and resolution of issues) by providing a common forum for them to discuss and find ways to comply with key elements of their agency's mission. The merger process helps to document how competing agency mandates are balanced during a shared decision-making process, which results in agency representatives reaching a "compromise based decision" to the regulatory and individual agency mandates.
- **Project Timeline:** TBD by NCDOT - see Merger Process timeline information.

Major Infrastructure Project
2017

Project Name: Widen I-40 in Durham/Orange Co

Project Sponsor: North Carolina Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** NCDOT
- **Any Identifying Project Numbers:** I-3306
- **Location:** Durham and Orange counties, North Carolina
- **Estimated Cost:** > $100 million

FWS Involvement

- **Region: 4**
- **Field Office:** North Carolina Raleigh/Asheville
- **Status of FWS Involvement:** North Carolina Department of Transportation Merger Process. The Merger is a process to streamline the project development and permitting processes, agreed to by the USACE, NCDENR (DWQ, DCM), FHWA and NCDOT and supported by other stakeholder agencies and local units of government. To this effect, the Merger process provides a forum for appropriate agency representatives to discuss and reach consensus on ways to facilitate meeting the regulatory requirements of Section 404 of the Clean Water Act during the NEPA/SEPA decision-making phase of transportation projects. The Merger Process allows agency representatives to work more efficiently (quicker and comprehensive evaluation and resolution of issues) by providing a common forum for them to discuss and find ways to comply with key elements of their agency's mission. The merger process helps to document how competing agency mandates are balanced during a shared decision-making process, which results in agency representatives reaching a "compromise based decision" to the regulatory and individual agency mandates.
- **Project Timeline:** TBD by NCDOT - see Merger Process timeline information

Major Infrastructure Project
2017

Project Name: Widen I-40 in Johnston/Wake Co

Project Sponsor: North Carolina Department of Transportation

The Merger Process allows agency representatives to work more efficiently (quicker and comprehensive evaluation and resolution of issues) by providing a common forum for them to discuss and find ways to comply with key elements of their agency's mission. The merger process helps to document how competing agency mandates are balanced during a shared decision-making process, which results in agency representatives reaching a "compromise based decision" to the regulatory and individual agency mandates.
- **Project Timeline:** TBD by NCDOT - see Merger Process timeline information

Major Infrastructure Project
2017

Project Name: Completion of Wilmington Bypass in Brunswick Co

Project Sponsor: North Carolina Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** NCDOT
- **Any Identifying Project Numbers:** R-2633
- **Location:** Brunswick County, North Carolina
- **Estimated Cost:** > $100 million

FWS Involvement

- **Region: 4**
- **Field Office:** North Carolina Raleigh/Asheville
- **Status of FWS Involvement:** North Carolina Department of Transportation Merger Process. The Merger is a process to streamline the project development and permitting processes, agreed to by the USACE, NCDENR (DWQ, DCM), FHWA and NCDOT and supported by other stakeholder agencies and local units of government. To this effect, the Merger process provides a forum for appropriate agency representatives to discuss and reach consensus on ways to facilitate meeting the regulatory requirements of Section 404 of the Clean Water Act during the NEPA/SEPA decision-making phase of transportation projects. The Merger Process allows agency representatives to work more efficiently (quicker and comprehensive evaluation and resolution of issues) by providing a common forum for them to discuss and find ways to comply with key elements of their agency's mission. The merger process helps to document how competing agency mandates are balanced during a shared decision-making process, which results in agency representatives reaching a "compromise based decision" to the regulatory and individual agency mandates.

- **Status of FWS Involvement:** North Carolina Department of Transportation Merger Process. The Merger is a process to streamline the project development and permitting processes, agreed to by the USACE, NCDENR (DWQ, DCM), FHWA and NCDOT and supported by other stakeholder agencies and local units of government. To this effect, the Merger process provides a forum for appropriate agency representatives to discuss and reach consensus on ways to facilitate meeting the regulatory requirements of Section 404 of the Clean Water Act during the NEPA/SEPA decision-making phase of transportation projects. The Merger Process allows agency representatives to work more efficiently (quicker and comprehensive evaluation and resolution of issues) by providing a common forum for them to discuss and find ways to comply with key elements of their agency's mission. The merger process helps to document how competing agency mandates are balanced during a shared decision-making process, which results in agency representatives reaching a "compromise based decision" to the regulatory and individual agency mandates.

Project Sponsor: North Carolina Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** NCDOT
- **Any Identifying Project Numbers:** U-2509
- **Location:** Charlotte, North Carolina
- **Estimated Cost:** > $100 million

FWS Involvement

- **Region: 4**
- **Field Office:** North Carolina Raleigh/Asheville
- **Status of FWS Involvement:** North Carolina Department of Transportation Merger Process. The Merger is a process to streamline the project development and permitting processes, agreed to by the USACE, NCDENR (DWQ, DCM), FHWA and NCDOT and supported by other stakeholder agencies and local units of government. To this effect, the Merger process provides a forum for appropriate agency representatives to discuss and reach consensus on ways to facilitate meeting the regulatory requirements of Section 404 of the Clean Water Act during the NEPA/SEPA decision-making phase of transportation projects. The Merger Process allows agency representatives to work more efficiently (quicker and comprehensive evaluation and resolution of issues) by providing a common forum for them to discuss and find ways to comply with key elements of their agency's mission. The merger process helps to document how competing agency mandates are balanced during a shared decision-making process, which results in agency representatives reaching a "compromise based decision" to the regulatory and individual agency mandates.
- **Project Timeline:** TBD by NCDOT - see Merger Process timeline information

Major Infrastructure Project
2017

Project Name: US 74 Independence Blvd Brookshire Freeway to Idlewild Rd add additional lanes

Project Sponsor: North Carolina Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** NCDOT
- **Any Identifying Project Numbers:** U-0209
- **Location:** North Carolina
- **Estimated Cost:** > $100 million

FWS Involvement

- **Region: 4**
- **Field Office:** North Carolina Raleigh/Asheville
- **Status of FWS Involvement:** North Carolina Department of Transportation Merger Process. The Merger is a process to streamline the project development and permitting processes, agreed to by the USACE, NCDENR (DWQ, DCM), FHWA and NCDOT and supported by other stakeholder agencies and local units of government. - **Project Timeline:** TBD by NCDOT - see Merger Process timeline information

Major Infrastructure Project
2017

Project Name: Timbermill Wind

Project Sponsor*:* Timbermill Wind, LLC (Apex Clean Energy Holdings, LLC)

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** USACE (CWA 404) or FWS (BGEPA Programmatic Take Permit)
- **Any Identifying Project Numbers:** NA (at this time)
- **Location:** Chowan and Perquimans County, NC
- **Estimated Cost:** Exact cost unknown, but $100 million or more
- **Other:** Up to 105 turbines on 13,350 acres, as much as 300 Megawatts

FWS Involvement

- **Region:** 4 and the Eagle Technical Assistance Team
    - **Lead Region, if more than one involved:** 4
- **Field Office:** Raleigh ES FO, Region 4 Migratory Bird Division
    - **Lead Field Office:** Raleigh ES
- **Status of FWS Involvement:** The Raleigh Ecological Services FO and Region 4 Migratory Bird Division met with Apex on multiple dates from 2014 to present, to discuss and review pre-construction monitoring in accordance with the FWS Land Based Wind Energy Guidelines and Eagle Conservation Plan Guidelines. No Formal ESA consultation is expected, but FWS anticipates need for a BGEPA Programmatic Take Permit (PTP).
- **Project Timeline:** Apex submitted a Final Eagle Conservation Plan (ECP) on 11/4/16. FWS provided comments to the ECP on 2/3/17. Application for a BGEPA PTP is anticipated in FY 2017. Pre-construction coordination and consultation is expected into 2018 (including ESA Section 7 Consultation for a CWA 404 Permit, and potential issuance of a BGEPA PTP). Post-construction monitoring and coordination expected through 2022 or beyond.

Major Infrastructure Project
2017

Project Name: Little Alligator Wind

Project Sponsor: Renewable Energy Systems Americas Inc.

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** USACE (CWA 404) or FWS (BGEPA Programmatic Take Permit)
- **Any Identifying Project Numbers:** NA (at this time)
- **Location:** Tyrrell County, NC
- **Estimated Cost:** Exact cost unknown, but $100 million or more
- **Other:** Up to 37 turbines on 10,546 acres, as much as 130 Megawatts

FWS Involvement

- **Region:** 4
- **Field Office:** Raleigh ES FO, Region 4 Migratory Bird Division
- **Status of FWS Involvement:** The Raleigh Ecological Services FO and Region 4 Migratory Bird Division have coordinated with RES-Americas on pre-construction surveys since 2015. The company will continue surveys and coordination with the FWS in the next year or two. No Formal ESA consultation is expected, but the project may need a BGEPA Programmatic Take Permit (PTP).
- **Project Timeline:** The Raleigh Ecological Services FO and Region 4 Migratory Bird Division met with RES-Americas on November 4, 2015 and March 7, 2017, to discuss the first year of pre-construction monitoring in accordance with the FWS Land Based Wind Energy Guidelines and Eagle Conservation Plan Guidelines. FWS expects to continue with pre-construction coordination into 2019 (including ESA Section 7 Consultation for a CWA 404 Permit, and potential issuance of a BGEPA PTP). Post-construction monitoring and coordination is expected through 2022 or beyond.

Major Infrastructure Project
2017

Project Name: Pantego Wind

Project Sponsor: Invenergy, LLC

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** USACE (CWA 404) or FWS (BGEPA Programmatic Take Permit)
- **Any Identifying Project Numbers:** NA (at this time)
- **Location:** Beaufort County, NC
- **Estimated Cost:** Exact cost unknown, but is $100 million or more
- **Other:** Up to 49 turbines on 11,000 acres, as much as 80 Megawatts

FWS Involvement

- **Region:** 4
- **Field Office:** Raleigh ES FO, Region 4 Migratory Bird Division, Pocosin Lakes NWR
    - **Lead Field Office:** Raleigh ES
- **Status of FWS Involvement:** The Raleigh ES FO, Region 4 Migratory Bird Division, and Pocosin Lakes NWR met with Invenergy in 2012 and 2014, to discuss/review pre-construction monitoring in accordance with the FWS Land Based Wind Energy Guidelines and Eagle Conservation Plan Guidelines. No Formal ESA consultation is expected, but FWS anticipates need for a BGEPA Programmatic Take Permit (PTP).
- **Project Timeline:** The Raleigh ES FO and Region 4 Migratory Bird Division met with Invenergy, LLC most recently on May 27, 2014, to discuss pre-construction monitoring progress and next steps. There has been no contact with the project sponsor since that date. If the project sponsor moves forward with the project, FWS anticipates continued pre-construction coordination (including ESA Section 7 Consultation for a CWA 404 Permit, and potential issuance of a BGEPA take permit) for up to 18 additional months, and post-construction monitoring and coordination after the project is constructed.

Major Infrastructure Project
2017

Project Name: Amazon Wind Farm U.S. East (formerly Desert Wind)

Project Sponsor: Avangrid Renewables (formerly Iberdrola Renewables)

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** NA
- **Any Identifying Project Numbers:** NA (at this time)
- **Location:** Perquimans and Pasquotank counties, NC
- **Estimated Cost:** Exact cost unknown, but is $100 million or more
- **Other:** Currently 104 turbines, 208 Megawatts (when fully built out, 150 turbines and 300 Megawatts)

FWS Involvement

- **Region:** 4
- **Field Office:** Raleigh ES FO, Region 4 Migratory Bird Division
    - **Lead Field Office:** Raleigh ES
- **Status of FWS Involvement:** The Raleigh ES FO and Region 4 Migratory Bird Division coordinated with the project sponsor from 2010 to 2012 on potential effects to listed species, migratory birds, and waterfowl. No formal ESA consultation or BGEPA Programmatic Take Permit was needed at that time. In 2016, the Raleigh ES FO coordinated with the project sponsor to determine potential effects to the newly-listed northern long-eared bat (NLEB).
- **Project Timeline:** The Raleigh ES FO coordinated with Avangrid's consultant in January 2016 on pre-construction monitoring for NLEB. No NLEB were recorded on the project site. The FWS involvement is completed, except for post-construction monitoring review. Post – construction monitoring is expected to continue until 2020 or beyond. The FWS will continue to coordinate review of post-construction monitoring methods and results with the project sponsor and its consultants.

Major Infrastructure Project
2017

Project Name: CSX Carolina Connector Cargo Terminal

Project Sponsor: CSX Railroad

Project Description

- **Sector:** Transportation
- **Lead Agency:** U.S. Army Corps of Engineers (CWA 404)
- **Any Identifying Project Numbers:** None yet
- **Location:** Edgecombe County, NC
- **Estimated Cost:** $160 million
- **Other:** Estimated 550 acres total. This facility will sort and re-route cargo arriving via trains and trucks for delivery.

FWS Involvement

- **Region:** 4
- **Field Office:** Raleigh, NC
- **Status of FWS Involvement:** The Raleigh Field Office has been meeting with CSX and their consultants since early 2016 regarding their desire to site an intermodal terminal in NC. FWS contacted CSX's consultants when the project was first proposed at a site in Johnston Co, NC due to its proximity to an important stream, Little River, for the federally-listed endangered dwarf wedgemussel and Tar River spinymussel. FWS expressed our concern and interest in working cooperatively on the project. That site was removed from consideration due to the public opposition. As they chose the new location, CSX's consultants worked with FWS on potential concerns. The current site is very near Swift Creek, a stream with dwarf wedgemussel and Tar River spinymussel, however the site drains away from that stream. As part of the project, there may be some rail improvements needed across Swift Creek. For this reason, FWS has discussed various methods which could lead to a "no effect" or a "may affect, not likely to adversely affect" determination during their ESA Section 7 consultation. At this, all discussions have been informal and no detailed plans have been distributed for review.
- **Project Timeline:** CSX hopes to break ground during the first quarter of 2018.

Major Infrastructure Project
2017

Project Name: Interstate 73

Project Sponsor*:* Federal Highway Administration and SC Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** FHWA
- **Any Identifying Project Numbers:** USACE-SAC-2008-1333-DIS
- **Location:** Multiple Counties – Horry, Marion, Dillon, and Marlboro counties in SC; Richmond County, NC
- **Estimated Cost:** over $2.5 billion
- **Other:** New interstate approximately 75 miles in length from Hamlet, NC to Conway, SC. However, project split into two phases. The southern phase will connect the existing I-95 near Dillon, SC, to Conway, SC. The northern phase will connect I-95 in Dillon, SC to the existing I-73/74 near Hamlet, NC.

FWS Involvement

- **Region:** 4
- **Field Office:** SC Ecological Services, Raleigh Field Office
    - **Lead Field Office:** SC Ecological Services
- **Status of FWS Involvement:** Served as a Cooperating Agency in development of EIS. Submitted NEPA comments. Performed section 7 (informal review). Provided comments via FWCA to USACE section 404 permitting.
- **Project Timeline:** Southern phase BA, October 2007; Northern phase BA July 2008; Final EIS September 2008; USACE public notice (both phases) January 2011: anticipated USACE permit issuance (both phases) July 2017

Major Infrastructure Project
2017

Project Name: Interstate 526 (Mark Clark Expressway)

Project Sponsor*:* Federal Highway Administration and SC Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** FHWA
- **Any Identifying Project Numbers:** FWS 04ES1000-2008-CPA-0207
- **Location:** Charleston County, SC
- **Estimated Cost:** over $750 Million
- **Other:** Proposed to complete the final leg (approximately 6 miles) of the Mark Clark Expressway encircling the City of Charleston, SC. Very controversial project, highly contested by NGOs and some local politicians.

FWS Involvement

- **Region:** 4
- **Field Office:** SC Ecological Services
- **Status of FWS Involvement:** Served as a Participating Agency in development of the draft EIS and two supplemental EISs and provided comments on them. Concurred with a Not Likely to Adversely Affect finding for all listed species in the area.
- **Project Timeline:** A draft EIS and two supplemental DEISs have been issued; however due to the controversy around this project and a lack of funding the timeline for additional analysis and project completion is unknown at this time.

Major Infrastructure Project
2017

Project Name: Carolina Bays Parkway – Northern Extension

Project Sponsor: Federal Highway Administration and SC Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** FHWA
- **Any Identifying Project Numbers:** None at this time, project will have first multiagency meeting in March 2017
- **Location:** Multiple Counties – Horry, SC and Brunswick County, NC
- **Estimated Cost:** Unknown but likely to exceed $100 million
- **Other:** Approximately 8 miles in length from end of S-31 near Little River, SC to US 17 in Brunswick County, NC

FWS Involvement

- **Region:** 4
- **Field Office:** Raleigh Field Office, SC Ecological Services
    - **Lead Field Office:** Raleigh Field Office
- **Status of FWS Involvement:** First meeting to discuss project in March 2017.
- **Project Timeline:** Unknown at this time

Major Infrastructure Project
2017

Project Name: Center Hill Dam Safety Project

Project Sponsor: U.S. Army Corps of Engineers

Project Description

- **Sector:** Hydropower
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** NA
- **Location:** Middle Tennessee, near Smithville
- **Estimated Cost:** $352.9 million
- **Other:** This project was to repair major structural problems with a hydro dam.

FWS Involvement

- **Region:** 4
- **Field Office:** Tennessee Ecological Services Field Office
- **Status of FWS Involvement:** ESA consultation, FWCA technical assistance. ESA consultation is complete. Routine reviews of permits ongoing, monitoring of implementation of committed-to conservation measures and BMPs.
- **Project Timeline:** FWS involvement should be complete at end of CY17.

Major Infrastructure Project
2017

Project Name: Chickamauga Lock Replacement Project

Project Sponsor: U.S. Army Corps of Engineers, TVA, Inland Waterways Trust Fund

Project Description

- **Sector:** Navigation/Transportation (water)
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** NA
- **Location:** Hamilton County, TN (Tennessee River)
- **Estimated Cost:** $100 million+
- **Other:** NA

FWS Involvement

- **Region:** 4
- **Field Office:** Tennessee Ecological Services Field Office
- **Status of FWS Involvement:** ESA consultation, FWCA technical assistance. Biological Opinion is complete. A great deal of coordination is ongoing, including reviews of permits, monitoring of implementation to ensure compliance with BO, technical assistance, etc.
- **Project Timeline:** Uncertain when construction and coordination will be completed.

Major Infrastructure Project
2017

Project Name: Clinch River Small Modular Nuclear Reactor

Project Sponsor: Tennessee Valley Authority

Project Description

- **Sector:** Nuclear Power Generation
- **Lead Agency:** Tennessee Valley Authority or Nuclear Regulatory Commission
- **Any Identifying Project Numbers:** NA
- **Location:** Roane County, TN
- **Estimated Cost:** $100 million+
- **Other:** NA

FWS Involvement

- **Region:** 4
- **Field Office:** Tennessee Ecological Services Field Office
- **Status of FWS Involvement:** Review of NEPA documents, ESA consultation
- **Project Timeline:** NEPA scoping May 2017, early ESA consultation 2017, no target date for completion yet.

Major Infrastructure Project
2017

Project Name: **Cooper Ridge Surface Mine**

Project Sponsor: Kopper Glo Mining

Project Description

- **Sector:** Subsurface Coal Extraction
- **Lead Agency:** Office of Surface Mining and Reclamation
- **Any Identifying Project Numbers:** OSMRE Permit #3270
- **Location:** Claiborne County, Tennessee
- **Estimated Cost:** >$100 million
- **Other:** Estimated production is 3.2 million tons of coal for the duration of the permit. This would result in an anticipated economic return of 112 million dollars.

FWS Involvement

- **Region:** 4
- **Field Office:** Tennessee Ecological Services Field Office
- **Status of FWS Involvement:** Monitoring and technical assistance on implementation of Terms and Conditions of BO
- **Project Timeline:** Biological Opinion sent to OSMRE on 22 Feb 2017.

Major Infrastructure Project
2017

Project Name: Crab Orchard Wind Project

Project Sponsor: Apex Clean Energy

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** Possibly TVA (if they purchase the power)
- **Any Identifying Project Numbers:** NA
- **Location:** Cumberland County, TN
- **Estimated Cost:** $100 million+
- **Other:** In Tier 2 studies now. 1000+ acre project.

FWS Involvement

- **Region:** 4
- **Field Office:** Tennessee Ecological Services Field Office
- **Status of FWS Involvement:** Review of NEPA documents, ESA consultation or HCP (if TVA doesn't purchase power), coordination and technical assistance in implementing Wind Energy Guidelines.
- **Project Timeline:** Construction 2017, operational end of CY 2018. They are far behind schedule. Have not entered into consultation yet and are not able to give an estimated timeline.

Major Infrastructure Project
2017

Project Name: Proposed Roach Creek Mountain Surface Mine

Project Sponsor: Clear Energy Corporation

Project Description

- **Sector:** Subsurface Coal Extraction
- **Lead Agency:** Office of Surface Mining and Reclamation
- **Any Identifying Project Numbers:** OSMRE Permit# 3261
- **Location:** Scott County, Tennessee
- **Estimated Cost:** $100 million +
- **Other:** If the proposed mining operation meets SMCRA permitting requirements and is authorized, OSMRE staff indicates that the coal produced from this site would be in excess of $100 million dollars.

FWS Involvement

- **Region:** 4
- **Field Office:** Tennessee Ecological Services Field Office
- **Status of FWS Involvement:** Awaiting effects determination from OSMRE. Tentative LIWA meeting has been informally discussed.
- **Project Timeline:** No timeline has been set for review of this project. Awaiting additional project information at this time. It is anticipated that the project would require formal consultation.

Major Infrastructure Project
2017

Project Name: Corridor K (U.S. 64)

Project Sponsor: Tennessee Department of Transportation (TDOT)

Project Description

- **Sector:** Transportation
- **Lead Agency:** FHWA
- **Any Identifying Project Numbers:** TDOT PIN# 102420.00
- **Location:** Polk County, TN
- **Estimated Cost:** $199 Million- 1.3 Billion
- **Other:** NA

FWS Involvement

- **Region:** 4
- **Field Office:** Tennessee FO
- **Status of FWS Involvement:** Tennessee Environmental Streamlining Agreement Review and ESA coordination ongoing, no Biological Assessment or Biological Opinion yet
- **Project Timeline:** Record of Decision by Fall 2017

Major Infrastructure Project
2017

Project Name: Volunteer Wind Project

Project Sponsor: Apex Clean Energy

Project Description

- **Sector:** Wind energy
- **Lead Agency:** Possibly TVA (if they purchase the power)
- **Any Identifying Project Numbers:**
- **Location:** Gibson County, TN
- **Estimated Cost:** $100 million+
- **Other:**

FWS Involvement

- **Region:** 4
- **Field Office:** Tennessee Ecological Services Field Office
- **Status of FWS Involvement:** Review of NEPA documents, ESA consultation or HCP (if TVA doesn't purchase power), coordination and technical assistance in implementing Wind Energy Guidelines.
- **Project Timeline:** Construction 2017, operational end of CY 2018. They are far behind schedule. Have not entered into consultation yet and are not able to give an estimated timeline.

Major Infrastructure Project
2017

Project Name: Allegheny Tunnel

Project Sponsor: Pennsylvania Department of Transportation

Project Description

- **Sector**: Transportation
- **Lead Agency:** Pennsylvania Department of Transportation
- **Any Identifying Project Numbers**: NA
- **Location:** Pennsylvania
- **Estimated Cost:** >$100 million
- **Other:** Pennsylvania Turnpike

FWS Involvement

- **Region:** 5
- **Field Office:** Pennsylvania FO
- **Status of FWS Involvement:** Technical assistance, MBTA, ESA formal consultation should conclude in 2017 - waiting on information from the applicant.
- **Project Timeline:** Technical Assistance is ongoing, consultation has not been initiated; therefore, there is no timeline.

Major Infrastructure Project
2017

Project Name: Atlantic Coast Pipeline/Supply Header Project

Project Sponsor: Dominion Power Company

Project Description

- **Sector:** Natural Gas Pipelines
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers:** CP15-554, CP15-554-001, CP15-555
- **Location:** West Virginia, Virginia, North Carolina
- **Estimated Cost:** $5,000,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** West Virginia, Virginia FOs
    - **Lead Field Office, if more than one involved:** West Virginia FO.
- **Status of FWS Involvement:** Technical assistance, MBTA, ESA Section 7 consultation. FWS has not received a complete Biological Assessment to date but will prepare a BO when it has.
- **Project Timeline:** Project planning is ongoing.

Major Infrastructure Project
2017

Project Name: Atlantic Sunrise

Project Sponsor: Williams/Transco

Project Description

- **Sector**: Natural Gas Pipeline
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers**: CP15-138
- **Location:** Pennsylvania
- **Estimated Cost: >**$100 million
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** Pennsylvania FO
- **Status of FWS Involvement:** Technical assistance, MBTA, informal ESA consultation concluded on December 22, 2016; however, now working on additional survey for new portals that were found in late 2016/early 2017.
- **Project Timeline:** If consultation needs to be reinitiated it is believed that it should conclude mid-2017.

Major Infrastructure Project
2017

Project Name: Baltimore-Washington Superconducting Maglev Project

Project Sponsor: Federal Railroad Administration and Maryland Transportation Authority

Project Description

- **Sector**: Transportation
- **Lead Agency:** Federal Railroad Administration
- **Any Identifying Project Numbers**: NA
- **Location:** Maryland
- **Estimated Cost:** $10,000,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** Chesapeake Bay FO
- **Status of FWS Involvement** Technical assistance, FWCA and ESA consultation are on-going.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: Bay State Wind

Project Sponsor: DONG Energy/Eversource Energy

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** Bureau of Ocean Energy Management
- **Any Identifying Project Numbers:** NA
- **Location:** Massachusetts
- **Estimated Cost:** >$100 Million
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** New England FO
- **Status of FWS Involvement:** Technical assistance
- **Project Timeline:** Project is in very early planning stage.

Major Infrastructure Project
2017

Project Name: Bluestone Dam Safety Project

Project Sponsor: U.S. Army Corps of Engineers

Project Description

- **Sector**: Dam Safety
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers**: NA
- **Location:** West Virginia
- **Estimated Cost:** $300,000,000
- **Other:** Dam Modification Project

FWS Involvement

- **Region:** 5
- **Field Office:** West Virginia FO
- **Status of FWS Involvement:** Technical assistance, ESA, FWCA. FWCA Report submitted on March 1, 2017, USACOE is finalizing EIS
- **Project Timeline:** EIS should be finalized soon.

Major Infrastructure Project
2017

Project Name: Central Susquehanna Valley Transportation (CSVT)

Project Sponsor: FHWA**,** Pennsylvania Department of Transportation

Project Description

- **Sector**: Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers**: NA
- **Location:** Pennsylvania
- **Estimated Cost: >**$100 million
- **Other:** Pennsylvania Turnpike

FWS Involvement

- **Region:** 5
- **Field Office:** Pennsylvania FO
- **Status of FWS Involvement:** Technical assistance, MBTA, ESA formal consultation should conclude in 2017 - waiting on information from the applicant.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: Chesapeake Bay TMDL Program

Project Sponsor: Maryland State Highway Administration

Project Description

- **Sector**: Transportation
- **Lead Agency:** Maryland State Highway Administration
- **Any Identifying Project Numbers**: NA
- **Location:** Maryland
- **Estimated Cost:** $600,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** Chesapeake Bay FO
- **Status of FWS Involvement** Technical assistance, FWCA, and ESA consultation are on-going.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: Constitution Pipeline

Project Sponsor: Williams

Project Description

- **Sector:** Natural Gas Pipeline
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers:** CP13-499
- **Location:** New Jersey, Pennsylvania
- **Estimated Cost:** $800,000,000
- **Other: :** NA

FWS Involvement

- **Region:** 5
- **Field Office:** New York and Pennsylvania FOs
    - **Lead Field Office, if more than one involved:** New York FO**.**
- **Status of FWS Involvement:** Technical assistance, CWA, FWCA, ESA, MBTA
- **Project Timeline:** Project in late planning status.

Major Infrastructure Project
2017

Project Name: Corps Civil Works Project

Project Sponsor: U.S. Army Corps of Engineers

Project Description

- **Sector:** Coastal Resilience/Environmental Restoration
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** NA
- **Location:** New Jersey, New York
- **Estimated Cost:** $500,000,000
- **Other:** Hudson/Raritan Estuary Comprehensive Restoration Plan

FWS Involvement

- **Region:** 5
- **Field Office:** New Jersey
    - **Lead Field Office, if more than one involved:**
- **Status of FWS Involvement:** Technical assistance, CWA, FWCA, ESA
- **Project Timeline:** Project is in early planning status.

Major Infrastructure Project
2017

Project Name: Corps Operations and Maintenance Dredging and Beach Nourishment Program

Project Sponsor: U.S. Army Corps of Engineers

Project Description

- **Sector:** Transportation and Coastal Resilience
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** NA
- **Location:** New Jersey, Pennsylvania
- **Estimated Cost:** $1,300,000,000
- **Other:** Dredging of Federal Navigation Projects in NJ Harbor and the Atlantic Coat of NJ

FWS Involvement

- **Region:** 5
- **Field Office:** New Jersey and Pennsylvania
    - **Lead Field Office, if more than one involved:** None identified**.**
- **Status of FWS Involvement:** Technical assistance, CWA, FWCA, ESA
- **Project Timeline:** Project is ongoing.

Major Infrastructure Project
2017

Project Name: Gilboa Dam Restoration

Project Sponsor: New York State Department of Environmental Conservation

Project Description

- **Sector**: Dam Safety
- **Lead Agency:** New York State Department of Environmental Conservation
- **Any Identifying Project Numbers**: NA
- **Location:** New York
- **Estimated Cost:** $400,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** New York FO
- **Status of FWS Involvement** BGEPA permitting guidance.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: Goethals Bridge Replacement

Project Sponsor: FHWA/NJDOT/NYSDOT

Project Description

- **Sector:** Transportation
- **Lead Agency:** FHWA
- **Any Identifying Project Numbers:**
- **Location:** New York and New Jersey
- **Estimated Cost: $**15,000,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** New Jersey
    - **Lead Field Office, if more than one involved:**
- **Status of FWS Involvement:** Technical assistance, mitigation compliance
- **Project Timeline:** FWCA/ESA/CWA complete. Mitigation compliance on-going.

Major Infrastructure Project
2017

Project Name: HUD Rebuild by Design 2

Project Sponsor: Stormwater Infrastructure - Levee Construction, Hoboken

Project Description

- **Sector:** Coastal Resilience
- **Lead Agency:** FHWA
- **Any Identifying Project Numbers:** NA
- **Location:** New Jersey
- **Estimated Cost:** $230,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** New Jersey
    - **Lead Field Office, if more than one involved:**
- **Status of FWS Involvement:** Technical assistance, CWA, FWCA, ESA
- **Project Timeline:** Project is in early planning status.

Major Infrastructure Project
2017

Project Name: HUD Rebuild by Design 1

Project Sponsor: Stormwater Infrastructure - Levee Construction, Meadowlands

Project Description

- **Sector:** Coastal Resilience
- **Lead Agency:** FHWA
- **Any Identifying Project Numbers:** NA
- **Location:** New Jersey
- **Estimated Cost: $ 150,000,000**
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** New Jersey
    - **Lead Field Office, if more than one involved:**
- **Status of FWS Involvement:** Technical assistance, CWA, FWCA, ESA
- **Project Timeline:** Project is in early planning status.

Major Infrastructure Project
2017

Project Name: I-270 / Watkins Mill Interchange Construction

Project Sponsor: Federal Highway Administration and Maryland State Highway Administration

Project Description

- **Sector**: Transportation
- **Lead Agency:** FHWA
- **Any Identifying Project Numbers**: NA
- **Location:** Maryland
- **Estimated Cost:** $150,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** Chesapeake Bay FO
- **Status of FWS Involvement** FWCA work complete, mitigation compliance on-going.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: I-495 / Greenbelt Metro Interchange Improvement

Project Sponsor: Federal Highway Administration and Maryland State Highway Administration

Project Description

- **Sector**: Transportation
- **Lead Agency:** FHWA
- **Any Identifying Project Numbers**: NA
- **Location:** Maryland
- **Estimated Cost:** $185,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** Chesapeake Bay FO
- **Status of FWS Involvement** FWCA ongoing.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: I-695 Outer Loop Widening

Project Sponsor: Federal Highway Administration and Maryland State Highway Administration

Project Description

- **Sector**: Transportation
- **Lead Agency:** FHWA
- **Any Identifying Project Numbers**: NA
- **Location:** Maryland
- **Estimated Cost:** $100,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** Chesapeake Bay FO
- **Status of FWS Involvement** FWCA ongoing.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: Laurel Mountain

Project Sponsor: AES

Project Description

- **Sector**: Wind Energy
- **Lead Agency:** NA
- **Any Identifying Project Numbers**: NA
- **Location:** West Virginia
- **Estimated Cost:** $127,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** West Virginia FO
- **Status of FWS Involvement:** ESA involvement: preparing a Habitat Conservation Plan.
- **Project Timeline:** Project planning is ongoing.

Major Infrastructure Project
2017

Project Name: Leach Xpress Project/Rayne XPress Expansion Project

Project Sponsor: Columbia Pipeline Group

Project Description

- **Sector:** Natural Gas Pipelines
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers:** CP15-514
- **Location:** Ohio, West Virginia, Pennsylvania
- **Estimated Cost:** $1,400,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** Ohio FO
- **Status of FWS Involvement:** Technical assistance, ESA Section 7 consultation completed, MBTA ongoing.
- **Project Timeline:** Project planning is ongoing.

Major Infrastructure Project
2017

Project Name: MD 4 / Suitland Parkway New Interchange

Project Sponsor: Federal Highway Administration and Maryland State Highway Administration

Project Description

- **Sector**: Transportation
- **Lead Agency:** FHWA
- **Any Identifying Project Numbers**: NA
- **Location:** Maryland
- **Estimated Cost:** $140,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** Chesapeake Bay FO
- **Status of FWS Involvement** FWCA work complete, mitigation compliance on-going.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: MD 175 Widening and Interchange Improvements

Project Sponsor: Federal Highway Administration and Maryland State Highway Administration

Project Description

- **Sector**: Transportation
- **Lead Agency:** FHWA
- **Any Identifying Project Numbers**: NA
- **Location:** Maryland
- **Estimated Cost:** $185,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** Chesapeake Bay FO
- **Status of FWS Involvement** FWCA and mitigation on-going.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: MD 404 Dualization

Project Sponsor: Federal Highway Administration and Maryland State Highway Administration

Project Description

- **Sector**: Transportation
- **Lead Agency:** FHWA
- **Any Identifying Project Numbers**: NA
- **Location:** Maryland
- **Estimated Cost:** $160,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** Chesapeake Bay FO
- **Status of FWS Involvement:** Technical assistance, FWCA, ESA consultation complete.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: Mineville Pumped Storage

Project Sponsor: Moriah

Project Description

- **Sector**: Hydroelectric
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers**: P-12635
- **Location:** New York
- **Estimated Cost:** $260,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** New York FO
- **Status of FWS Involvement** Technical assistance, FWCA, and ESA consultation are on-going.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: Mon/Fayette PA Route 51 to I-376

Project Sponsor: Federal Highway Administration

Project Description

- **Sector**: Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers**: NA
- **Location:** Pennsylvania
- **Estimated Cost:** >$100 million
- **Other:** Pennsylvania Turnpike

FWS Involvement

- **Region:** 5
- **Field Office:** Pennsylvania FO
- **Status of FWS Involvement:** Technical assistance, MBTA, ESA.
- **Project Timeline:** Technical Assistance is ongoing, consultation has not been initiated; therefore, there is no timeline

Major Infrastructure Project
2017

Project Name: Montgomery Locks and Dam Hydroelectric Project

Project Sponsor: Solia 6 LLC

Project Description

- **Sector**: Hydroelectric Power
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers**: P-13768
- **Location:** Pennsylvania
- **Estimated Cost:** $129,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** Pennsylvania FO
- **Status of FWS Involvement:** Technical assistance, FWCA, ESA consultation complete.
- **Project Timeline:** License issuance expected in 1 to 2 months.

Major Infrastructure Project
2017

Project Name: Mountain Valley Pipeline

Project Sponsor: Mountain Valley Pipeline LLC

Project Description

- **Sector:** Natural Gas Pipelines
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers:** CP16-10-000 and CP16-13-000
- **Location:** West Virginia, Virginia
- **Estimated Cost:** $3,500,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** West Virginia, Virginia FOs
    - **Lead Field Office, if more than one involved:** West Virginia FO.
- **Status of FWS Involvement:** Technical assistance, MBTA, ESA Section 7 consultation. FWS has not received a complete Biological Assessment to date but will prepare a BO when it has.
- **Project Timeline:** Project planning is ongoing.

Major Infrastructure Project
2017

Project Name: Mountaineer XPress Project

Project Sponsor: Columbia Pipeline Group

Project Description

- **Sector**: Natural Gas Pipeline
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers**: CP16-357
- **Location:** West Virginia
- **Estimated Cost:** $1,800,000,000
- **Other:** Dam Modification Project

FWS Involvement

- **Region:** 5
- **Field Office:** West Virginia FO
- **Status of FWS Involvement:** Technical assistance, MBTA, informal ESA consultation is ongoing
- **Project Timeline:** Section 7 is ongoing.

Major Infrastructure Project
2017

Project Name: Mt. Storm II

Project Sponsor: Nextera Energy

Project Description

- **Sector**: Wind Energy
- **Lead Agency:** NA
- **Any Identifying Project Numbers**: NA
- **Location:** West Virginia
- **Estimated Cost:** $130,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** West Virginia FO
- **Status of FWS Involvement:** Technical assistance, MBTA, informal ESA consultation is still ongoing.
- **Project Timeline:** Project planning is ongoing.

Major Infrastructure Project
2017

Project Name: New Chesapeake Bay Bridge Crossing

Project Sponsor: Federal Highway Administration and Maryland Transportation Authority

Project Description

- **Sector**: Transportation
- **Lead Agency:** Maryland State Highway Administration
- **Any Identifying Project Numbers**: NA
- **Location:** Maryland
- **Estimated Cost: >**$100 million
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** Chesapeake Bay FO
- **Status of FWS Involvement** Technical assistance, FWCA, and ESA consultation are on-going.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: New Creek

Project Sponsor: Enbridge

Project Description

- **Sector**: Wind Energy
- **Lead Agency:** NA
- **Any Identifying Project Numbers**: NA
- **Location:** West Virginia
- **Estimated Cost:** $130,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** West Virginia FO
- **Status of FWS Involvement:** Technical assistance, MBTA, ESA informal consultation is still ongoing.
- **Project Timeline:** Project planning is ongoing.

Major Infrastructure Project
2017

Project Name: North Anna Power Station, Unit 3

Project Sponsor: Dominion Power Company

Project Description

- **Sector:** Nuclear Energy
- **Lead Agency:** Nuclear Regulatory Commission
- **Any Identifying Project Numbers:** NA
- **Location:** Virginia
- **Estimated Cost:** $19,000,000,000
- **Other:** Additional Nuclear Reactor

FWS Involvement

- **Region:** 5
- **Field Office:** Virginia FO
- **Status of FWS Involvement:** Technical assistance, informal ESA consultation ongoing while project construction details are worked out.
- **Project Timeline:** Project planning is ongoing.

Major Infrastructure Project
2017

Project Name: Northern Access 2016

Project Sponsor: National Fuel

Project Description

- **Sector**: Natural Gas Pipeline
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers**: CP15-115
- **Location:** Pennsylvania, New Jersey, New York
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** Pennsylvania FO
- **Status of FWS Involvement:** Technical assistance, MBTA, ESA. FWS is waiting for FERC to submit the 4(d) Rule Streamlined Consultation Form. Project will conclude within 15 days of receiving the letter.
- **Project Timeline:** FWS waiting for FERC to submit the 4(d) Rule Streamlined Consultation Form. Project will conclude within 15 days of receiving the letter.

Major Infrastructure Project
2017

Project Name: Northern Pass

Project Sponsor: Department of Energy

Project Description

- **Sector:** Transmission Lines
- **Lead Agency:** Department of Energy
- **Any Identifying Project Numbers:** NA
- **Location:** New Hampshire
- **Estimated Cost:** $1,600,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** New England FO
- **Status of FWS Involvement:** Technical assistance, MBTA, ESA Section 7 consultation.
- **Project Timeline:** DOE is finalizing EIS and BA.

Major Infrastructure Project
2017

Project Name: Peace Bridge/Customs Plaza

Project Sponsor: Peace Bridge Authority

Project Description

- **Sector**: Transportation
- **Lead Agency:** Department of State
- **Any Identifying Project Numbers**: NA
- **Location:** New York
- **Estimated Cost: >**$100 million
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** New York FO
- **Status of FWS Involvement** Technical assistance, FWCA, and MBTA.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: PennEast Pipeline

Project Sponsor: PennEast Pipeline Company, LLC

Project Description

- **Sector:** Pipelines
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers:** CP15-558
- **Location:** New Jersey, Pennsylvania
- **Estimated Cost:** $125,000,000
- **Other: :** NA

FWS Involvement

- **Region:** 5
- **Field Office:** New Jersey and Pennsylvania FOs
    - **Lead Field Office, if more than one involved:** Pennsylvania FO**.**
- **Status of FWS Involvement:** Technical assistance, CWA, FWCA, ESA, MBTA
- **Project Timeline:** Project is ongoing.

Major Infrastructure Project
2017

Project Name: Pilgrim Pipeline

Project Sponsor: Pilgrim Partners

Project Description

- **Sector**: Pipeline
- **Lead Agency:** New York State Thruway Authority, (gasoline pipeline)
- **Any Identifying Project Numbers**: NA
- **Location:** New York, New Jersey
- **Estimated Cost:** $900,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** New York FO
- **Status of FWS Involvement** Technical assistance, FWCA, and ESA consultation are on-going.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: Sunoco Pipeline LP PA Pipeline

Project Sponsor: Sunoco

Project Description

- **Sector**: Pipelines
- **Lead Agency:** NA
- **Any Identifying Project Numbers**: NA
- **Location:** Pennsylvania
- **Estimated Cost: >**$100 million
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** Pennsylvania FO
- **Status of FWS Involvement:** Technical assistance, MBTA.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: US 219 Upgrade

Project Sponsor: Federal Highway Administration and Maryland State Highway Administration

Project Description

- **Sector**: Transportation
- **Lead Agency:** FHWA
- **Any Identifying Project Numbers**: NA
- **Location:** Maryland
- **Estimated Cost:** $100,000,000
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** Chesapeake Bay FO
- **Status of FWS Involvement:** Technical assistance, FWCA, ESA consultation complete.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: US 301 Nice Bridge Improvement over Potomac River

Project Sponsor: Federal Highway Administration and Maryland Transportation Authority

Project Description

- **Sector**: Transportation
- **Lead Agency:** FHWA
- **Any Identifying Project Numbers**: NA
- **Location:** Maryland
- **Estimated Cost:** $765 million
- **Other:** NA

FWS Involvement

- **Region:** 5
- **Field Office:** Chesapeake Bay FO
- **Status of FWS Involvement** FWCA and mitigation on-going.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: WB XPress Pipeline

Project Sponsor: Columbia Pipeline Group

Project Description

- **Sector:** Pipelines
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers:** CP16-38
- **Location:** West Virginia, Virginia
- **Estimated Cost:** $850,000,000
- **Other:** Capacity Enhancements/New Interconnects

FWS Involvement

- **Region:** 5
- **Field Office:** West Virginia FO
- **Status of FWS Involvement:** Technical assistance, ESA Section 7 consultation.
- **Project Timeline:** Project is in very early planning stage.

Major Infrastructure Project
2017

Project Name: Crossing Trails Wind

Project Sponsor: EDP Renewables

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** No federal nexus - NA
- **Any Identifying Project Numbers:** NA
- **Location:** Kit Carson and Cheyenne counties, Colorado
- **Estimated Cost:** Over $100 million
- **Other:** 150-400 MW, 40-145 turbines (Initial phase, 100-260 MW 29-75 turbines)

FWS Involvement

- **Region:** 6
- **Field Office:** Colorado - Lakewood
- **Status of FWS Involvement:** Migratory Bird/Bat Conservation Plan, possible Eagle Take Permit, etc. FWS Authorities involved include ESA, MBTA and BGEPA.
- **Project Timeline:** Discussions/recommendations on environmental studies and project design in 2017-2018. Will review/make recommendations on turbine layout, determine need for eagle take permit, and discuss post-monitoring studies in 2018 -2020 and beyond.

Major Infrastructure Project
2017

Project Name: Gross Reservoir Hydroelectric & Gross Reservoir Enlargement [Moffat] Project

Project Sponsor: Denver Water Company

Project Description

- **Sector:** Hydropower and Water Supply
- **Lead Agency:** Federal Energy Regulatory Commission and U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** FERC No. 2035-099; Corps NO. NWO-2002-80762-DEN
- **Location:** Boulder County, Colorado
- **Estimated Cost:** $380 million
- **Other:** 77,000 acre-feet increase in water storage, annual generation increase of 4.4 gigawatt hrs, addition of 55 acres (private, USFS, and Denver Water land), removal of 321 acres USFS land and 68 acres Denver Water land.

FWS Involvement

- **Region:** 6
- **Field Office:** Colorado - Lakewood
- **Status of FWS Involvement:** Review and comment on amendment to FERC License and close involvement with USACE/Denver Water as Denver Water implements the Terms and Conditions of the Project BO issued June 17, 2016.
- **Project Timeline:** Possibly 2017-2025

Major Infrastructure Project
2017

Project Name: Rush Creek Wind I and II

Project Sponsor: Xcel Energy

Project Description

- **Sector:** Wind Energy and Transmission
- **Lead Agency:** No federal nexus - NA
- **Any Identifying Project Numbers:** NA
- **Location:** Elbert, Arapahoe, Lincoln, Kit Carson, and Cheyenne counties, Colorado
- **Estimated Cost:** $1 billion
- **Other:** Up to 600 MW, 300 turbines, 90-mile transmission line

FWS Involvement

- **Region:** 6
- **Field Office:** Colorado - Lakewood
- **Status of FWS Involvement:** Migratory Bird/Bat Conservation Plan, possible Eagle Take Permit, etc. FWS Authorities involved include MBTA and BGEPA. Ongoing discussions with developer on wind turbine micro-siting.
- **Project Timeline:** Ongoing discussions on project design/construction in 2017; then post-construction monitoring (and ECP?) discussions in 2017- 2018 and possibly beyond.

Major Infrastructure Project
2017

Project Name: Seaman Water Supply [Expansion] Project

Project Sponsor: City of Greeley

Project Description

- **Sector:** Water Supply
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** Unknown
- **Location:** Larimer County, Colorado
- **Estimated Cost:** $100 million
- **Other:** 48,000 acre-feet increase in water storage.

FWS Involvement

- **Region:** 6
- **Field Office:** Colorado –Lakewood
- **Status of FWS Involvement:** Begin NEPA review/comment on DEIS as a cooperating agency; eventual ESA consultation and project review/recommendations per MBTA and BGEPA.
- **Project Timeline:** 2017-2019 (Expansion is targeted for design in 2028 and construction by 2030).

Major Infrastructure Project
2017

Project Name: **Pratt Wind Energy Project**

Project Sponsor: Next Era Energy Resources

Project Description

- **Sector**: Wind Energy
- **Lead Agency**: U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location**: Pratt County, Kansas
- **Estimated Cost**: Cost not disclosed; assumed greater than $100 million because it costs an estimated $1.3 to $2.2 million per megawatt (MW) of nameplate capacity installed.
- **Other**: Estimated nameplate capacity of 218 MW

FWS Involvement

- **Region**: 6
- **Field Office**: Kansas Ecological Services Field Office (KSEFO) and Region 6 Division of Migratory Birds
- **Status of FWS Involvement**: No federal nexus, so no Section 7 Consultation. Technical assistance in evaluation of risk of take under Endangered Species Act for consideration of Section 10 Habitat Conservation Plan (HCP), or under Bald and Golden Eagle Protection Act for consideration of Eagle Conservation Plan (ECP)/Eagle Incidental Take Permit. Technical assistance for avoidance planning for compliance with Migratory Bird Treaty Act. Frequency and timeline of engagement varies based on company actions; FWS is responsive to requests. No HCP or ECP applications expected.
- **Project Timeline**: Estimated commercial operation date by end of 2018.

Major Infrastructure Project
2017

Project Name: **Flat Ridge 4 Wind Energy Project**

Project Sponsor: Sempra Infrastructure

Project Description

- **Sector**: Wind Energy
- **Lead Agency**: U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location**: Harper and Kingman counties, Kansas
- **Estimated Cost**: Cost not disclosed; assumed greater than $100 million because it costs an estimated $1.3 to $2.2 million per megawatt (MW) of nameplate capacity installed.
- **Other**: Estimated nameplate capacity of 134 MW

FWS Involvement

- **Region**: 6
- **Field Office**: Kansas Ecological Services Field Office (KSEFO) and Region 6 Division of Migratory Birds
- **Status of FWS Involvement**: No federal nexus, so no Section 7 Consultation. Technical assistance in evaluation of risk of take under Endangered Species Act for consideration of Section 10 Habitat Conservation Plan (HCP), or under Bald and Golden Eagle Protection Act for consideration of Eagle Conservation Plan (ECP)/Eagle Incidental Take Permit. Technical assistance for avoidance planning for compliance with Migratory Bird Treaty Act. Frequency and timeline of engagement varies based on company actions; FWS is responsive to requests. No HCP or ECP applications expected.
- **Project Timeline**: Estimated commercial operation date by end of 2019

Major Infrastructure Project
2017

Project Name: **Rush County Wind Energy Project (formerly Post Rock Wind Project)**

Project Sponsor: EDP Renewables North America (EDPR)

Project Description

- **Sector**: Wind Energy
- **Lead Agency**: U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location**: Rush County, Kansas
- **Estimated Cost**: Cost not disclosed; assumed greater than $100 million because it costs an estimated $1.3 to $2.2 million per megawatt (MW) of nameplate capacity installed.
- **Other**: Estimated nameplate capacity of 300 MW

FWS Involvement

- **Region**: 6
- **Field Office**: Kansas Ecological Services Field Office (KSEFO) and Region 6 Division of Migratory Birds
- **Status of FWS Involvement**: No federal nexus, so no Section 7 Consultation. Technical assistance in evaluation of risk of take under Endangered Species Act for consideration of Section 10 Habitat Conservation Plan (HCP), or under Bald and Golden Eagle Protection Act for consideration of Eagle Conservation Plan (ECP)/Eagle Incidental Take Permit. Technical assistance for avoidance planning for compliance with Migratory Bird Treaty Act. Frequency and timeline of engagement varies based on company actions; FWS is responsive to requests. No HCP or ECP applications expected.
- **Project Timeline**: Estimated commercial operation date by end of 2018

Major Infrastructure Project
2017

Project Name: **Cloud County Wind Energy Project**

Project Sponsor: Unknown; contacted by consultant

Project Description

- **Sector**: Wind Energy
- **Lead Agency**: U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location**: Cloud County, Kansas
- **Estimated Cost**: Cost not disclosed; assumed greater than $100 million because it costs an estimated $1.3 to $2.2 million per megawatt (MW) of nameplate capacity installed.
- **Other**: Estimated nameplate capacity of 200 MW

FWS Involvement

- **Region**: 6
- **Field Office**: Kansas Ecological Services Field Office (KSEFO) and Region 6 Division of Migratory Birds
- **Status of FWS Involvement**: No federal nexus, so no Section 7 Consultation. Technical assistance in evaluation of risk of take under Endangered Species Act for consideration of Section 10 Habitat Conservation Plan (HCP), or under Bald and Golden Eagle Protection Act for consideration of Eagle Conservation Plan (ECP)/Eagle Incidental Take Permit. Technical assistance for avoidance planning for compliance with Migratory Bird Treaty Act. Frequency and timeline of engagement varies based on company actions; FWS is responsive to requests. No HCP or ECP applications expected.
- **Project Timeline**: Estimated commercial operation date unknown

Major Infrastructure Project
2017

Project Name: **Wild Plains Wind Energy Project**

Project Sponsor: Tradewind Energy, Inc.

Project Description

- **Sector**: Wind Energy
- **Lead Agency**: U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location**: Sumner County, Kansas
- **Estimated Cost**: Cost not disclosed; assumed greater than $100 million because it costs an estimated $1.3 to $2.2 million per megawatt (MW) of nameplate capacity installed.
- **Other**: Estimated nameplate capacity of 100-200 MW

FWS Involvement

- **Region**: 6
- **Field Office**: Kansas Ecological Services Field Office (KSEFO) and Region 6 Division of Migratory Birds
- **Status of FWS Involvement**: No federal nexus, so no Section 7 Consultation. Technical assistance in evaluation of risk of take under Endangered Species Act for consideration of Section 10 Habitat Conservation Plan (HCP), or under Bald and Golden Eagle Protection Act for consideration of Eagle Conservation Plan (ECP)/Eagle Incidental Take Permit. Technical assistance for avoidance planning for compliance with Migratory Bird Treaty Act. Frequency and timeline of engagement varies based on company actions; FWS is responsive to requests. Company is actively working towards development of an Eagle Conservation Plan to support application for an Eagle Incidental Take Permit. No HCP application expected.
- **Project Timeline**: Estimated commercial operation date late 2019. Company has just initiated collection of data in field studies for the ECP, so final eagle risk assessment is expected to be provided to the FWS by mid-2019.

Major Infrastructure Project
2017

Project Name: **Diamond Vista Wind Energy Project**

Project Sponsor: Tradewind Energy, Inc.

Project Description

- **Sector**: Wind Energy
- **Lead Agency**: U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location**: Dickinson, Marion, and McPherson counties, Kansas
- **Estimated Cost**: Cost not disclosed; assumed greater than $100 million because it costs an estimated $1.3 to $2.2 million per megawatt (MW) of nameplate capacity installed.
- **Other**: Estimated nameplate capacity of 300 MW

FWS Involvement

- **Region**: 6
- **Field Office**: Kansas Ecological Services Field Office (KSEFO) and Region 6 Division of Migratory Birds
- **Status of FWS Involvement**: No federal nexus, so no Section 7 Consultation. Technical assistance in evaluation of risk of take under Endangered Species Act for consideration of Section 10 Habitat Conservation Plan (HCP), or under Bald and Golden Eagle Protection Act for consideration of Eagle Conservation Plan (ECP)/Eagle Incidental Take Permit. Technical assistance for avoidance planning for compliance with Migratory Bird Treaty Act. Frequency and timeline of engagement varies based on company actions; FWS is responsive to requests. No HCP or ECP applications expected.
- **Project Timeline**: Estimated commercial operation date April 2017

Major Infrastructure Project
2017

Project Name: **Solomon Forks Wind Energy Project**

Project Sponsor: Infinity Renewables

Project Description

- **Sector**: Wind Energy
- **Lead Agency**: U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location**: Thomas County, Kansas
- **Estimated Cost**: Cost not disclosed; assumed greater than $100 million because it costs an estimated $1.3 to $2.2 million per megawatt (MW) of nameplate capacity installed.
- **Other**: Estimated nameplate capacity is unknown; but expected to be at least 100 MW

FWS Involvement

- **Region** 6
- **Field Office**: Kansas Ecological Services Field Office (KSEFO) and Region 6 Division of Migratory Birds
- **Status of FWS Involvement**: No federal nexus, so no Section 7 Consultation. Technical assistance in evaluation of risk of take under Endangered Species Act for consideration of Section 10 Habitat Conservation Plan (HCP), or under Bald and Golden Eagle Protection Act for consideration of Eagle Conservation Plan (ECP)/Eagle Incidental Take Permit. Technical assistance for avoidance planning for compliance with Migratory Bird Treaty Act. Frequency and timeline of engagement varies based on company actions; FWS is responsive to requests. No HCP or ECP applications expected.
- **Project Timeline**: Estimated commercial operation date unknown

Major Infrastructure Project
2017

Project Name: Reading Wind Energy Project

Project Sponsor: Renewable Energy Systems (RES)

Project Description

- **Sector**: Wind Energy
- **Lead Agency**: U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location**: Lyon and Osage counties, Kansas
- **Estimated Cost**: Cost not disclosed; assumed greater than $100 million because it costs an estimated $1.3 to $2.2 million per megawatt (MW) of nameplate capacity installed.
- **Other**: Estimated nameplate capacity is 200 MW

FWS Involvement

- **Region**: 6
- **Field Office**: Kansas Ecological Services Field Office (KSEFO) and Region 6 Division of Migratory Birds
- **Status of FWS Involvement**: No federal nexus, so no Section 7 Consultation. Technical assistance in evaluation of risk of take under Endangered Species Act for consideration of Section 10 Habitat Conservation Plan (HCP), or under Bald and Golden Eagle Protection Act for consideration of Eagle Conservation Plan (ECP)/Eagle Incidental Take Permit. Technical assistance for avoidance planning for compliance with Migratory Bird Treaty Act. Frequency and timeline of engagement varies based on company actions; FWS is responsive to requests. No HCP or ECP applications expected.
- **Project Timeline**: Estimated commercial operation date 2018

Major Infrastructure Project
2017

Project Name: **Waverly Wind Energy Project**

Project Sponsor: EDF Renewable Energy

Project Description

- **Sector**: Wind Energy
- **Lead Agency**: U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location**: Ness and Trego counties, Kansas
- **Estimated Cost**: Cost not disclosed; assumed greater than $100 million because it costs an estimated $1.3 to $2.2 million per megawatt (MW) of nameplate capacity installed.
- **Other**: Estimated nameplate capacity is 199 MW

FWS Involvement

- **Region** 6
- **Field Office**: Kansas Ecological Services Field Office (KSEFO) and Region 6 Division of Migratory Birds
    - **Lead Office**: Region 6 Division of Migratory Birds
- **Status of FWS Involvement**: No federal nexus, so no Section 7 Consultation. Technical assistance in evaluation of risk of take under Endangered Species Act for consideration of Section 10 Habitat Conservation Plan (HCP), or under Bald and Golden Eagle Protection Act for consideration of Eagle Conservation Plan (ECP)/Eagle Incidental Take Permit. Technical assistance for avoidance planning for compliance with Migratory Bird Treaty Act. Frequency and timeline of engagement varies based on company actions; FWS is responsive to requests. Company is actively working towards development of an Eagle Conservation Plan to support application for an Eagle Incidental Take Permit. No HCP application expected.
- **Project Timeline**: Project already constructed, but company is working on ECP. Current ECP timeline is currently unknown.

Major Infrastructure Project
2017

Project Name: **Argyle Creek Wind Energy Project**

Project Sponsor: Invenergy

Project Description

- **Sector**: Wind Energy
- **Lead Agency**: U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location**: Sumner County, Kansas
- **Estimated Cost**: Cost not disclosed; assumed greater than $100 million because it costs an estimated $1.3 to $2.2 million per megawatt (MW) of nameplate capacity installed.
- **Other**: Estimated nameplate capacity is 150 MW

FWS Involvement

- **Region**: 6
- **Field Office**: Kansas Ecological Services Field Office (KSEFO) and Region 6 Division of Migratory Birds
- **Status of FWS Involvement**: No federal nexus, so no Section 7 Consultation. Technical assistance in evaluation of risk of take under Endangered Species Act for consideration of Section 10 Habitat Conservation Plan (HCP), or under Bald and Golden Eagle Protection Act for consideration of Eagle Conservation Plan (ECP)/Eagle Incidental Take Permit. Technical assistance for avoidance planning for compliance with Migratory Bird Treaty Act. Frequency and timeline of engagement varies based on company actions; FWS is responsive to requests. No HCP or ECP applications expected.
- **Project Timeline**: Estimated commercial operation date is 2019.

Major Infrastructure Project
2017

Project Name: **Moran Wind Energy Project**

Project Sponsor: EDP Renewables North America

Project Description

- **Sector**: Wind Energy
- **Lead Agency**: U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location**: Allen County, Kansas
- **Estimated Cost**: Cost not disclosed; assumed greater than $100 million because it costs an estimated $1.3 to $2.2 million per megawatt (MW) of nameplate capacity installed.
- **Other**: Estimated nameplate capacity unknown, but expected at 200 MW

FWS Involvement

- **Region**: 6
- **Field Office**: Kansas Ecological Services Field Office (KSEFO) and Region 6 Division of Migratory Birds
- **Status of FWS Involvement**: No federal nexus, so no Section 7 Consultation. Technical assistance in evaluation of risk of take under Endangered Species Act for consideration of Section 10 Habitat Conservation Plan (HCP), or under Bald and Golden Eagle Protection Act for consideration of Eagle Conservation Plan (ECP)/Eagle Incidental Take Permit. Technical assistance for avoidance planning for compliance with Migratory Bird Treaty Act. Frequency and timeline of engagement varies based on company actions; FWS is responsive to requests. Potential for application for HCP or ECP undetermined.
- **Project Timeline**: Estimated commercial operation date is unknown. Initial project review meeting scheduled for March 2017.

Major Infrastructure Project
2017

Project Name: Pioneer Creek Wind Energy Project

Project Sponsor: Infinity Renewables

Project Description

- **Sector**: Wind Energy
- **Lead Agency**: U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location**: Ford County, Kansas
- **Estimated Cost**: Cost not disclosed; assumed greater than $100 million because it costs an estimated $1.3 to $2.2 million per megawatt (MW) of nameplate capacity installed.
- **Other**: Estimated nameplate capacity unknown, but expected at 200 MW

FWS Involvement

- **Region:** 6
- **Field Office**: Kansas Ecological Services Field Office (KSEFO) and Region 6 Division of Migratory Birds
- **Status of FWS Involvement**: No federal nexus, so no Section 7 Consultation. Technical assistance in evaluation of risk of take under Endangered Species Act for consideration of Section 10 Habitat Conservation Plan (HCP), or under Bald and Golden Eagle Protection Act for consideration of Eagle Conservation Plan (ECP)/Eagle Incidental Take Permit. Technical assistance for avoidance planning for compliance with Migratory Bird Treaty Act. Frequency and timeline of engagement varies based on company actions; FWS is responsive to requests. No HCP or ECP applications expected.
- **Project Timeline**: Estimated commercial operation date is unknown.

Major Infrastructure Project
2017

Project Name: **Grain Belt Express High Voltage Direct Current Transmission Project**

Project Sponsor: Clean Line Energy Partners

Project Description

- **Sector**: Transmission line
- **Lead Agency**: U.S. Fish and Wildlife Service; other federal, state and local agencies involved
- **Any Identifying Project Numbers**: NA
- **Location**: Kansas, Missouri, Indiana and Illinois
- **Estimated Cost**: Cost estimated at $2 billion.
- **Other**: 780 mile overhead direct current transmission line with approximately 4,000 MW deliverable capacity being constructed to facilitate an estimated $7 billion dollars in new wind energy development.

FWS Involvement

- **Region**: 6 and 3
    - **Lead Region, if more than one involved**: 3
- **Field Office**: Kansas Ecological Services Field Office (KSEFO), Illinois ESFO, and Missouri ESFO
    - **Lead Field Office, if more than one involved**: Missouri ESFO
- **Status of FWS Involvement**: No federal nexus, so no Section 7 Consultation. Technical assistance in evaluation of risk of take under Endangered Species Act for consideration of Section 10 Habitat Conservation Plan (HCP), or under Bald and Golden Eagle Protection Act for consideration of Eagle Conservation Plan (ECP)/Eagle Incidental Take Permit. Technical assistance for avoidance planning for compliance with Migratory Bird Treaty Act. Frequency and timeline of engagement varies based on company actions; FWS is responsive to requests. No HCP or ECP applications expected.
- **Project Timeline**: Construction is estimated to begin in 2018 or 2019.

Major Infrastructure Project
2017

Project Name: Beaver Hill Wind Project

Project Sponsor: Exelon Generation

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers:** NA
- **Location:** Wibaux County, Montana
- **Estimated Cost:** > $100 million
- **Other:** Primarily private land (Two State sections being evaluated), 100 MW, up to 40 total turbines

FWS Involvement

- **Region**: 6
- **Field Office:** Montana Field Office, Helena and Division of Migratory Birds, Denver
- **Status of FWS Involvement:** Attended several meetings/calls with proponent regarding project and trust resource concerns; issued letter to proponent. Anticipate Bird and Bat Conservation Strategy (BBCS) development (Mig Birds and MT FO). Authorities: ESA, MBTA, BGEPA, NEPA
- **Project Timeline:** Anticipate BBCS development (Mig Birds and MT FO), and coordination regarding sage-grouse mitigation (MT FO) through 2017/2018. Construction commencement proposed 2017.

Major Infrastructure Project
2017

Project Name: Clearwater Wind Project

Project Sponsor: Orion Renewable Energy Group

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers:** NA
- **Location:** Custer, Rosebud, Garfield, Prairie counties, Montana
- **Estimated Cost:** > $500 million
- **Other:** 100 percent private land, 700 MW, up to 400 total turbines, 80-mile generation OH tie-in line

FWS Involvement

- **Region**: 6
- **Field Office:** Montana Field Office, Helena and Division of Migratory Birds, Denver
- **Status of FWS Involvement:** Attended several meetings/calls with proponent regarding project and trust resource concerns; issued letter to proponent; proponent has elected to pursue Eagle Take Permit. Anticipate ECP and BBCS development (Mig Birds and MT FO), and coordination regarding sage-grouse mitigation (MT FO). Authorities: ESA, MBTA, BGEPA, NEPA
- **Project Timeline:** Anticipate ECP and BBCS development (Mig Birds and MT FO), intra-service S7 consultation (Mig Birds and MT FO) and coordination regarding sage-grouse mitigation (MT FO) through 2017/2018. Construction commencement proposed 2017.

Major Infrastructure Project
2017

Project Name: Cloud Peak Energy Coal Projects; Spring Creek Mine and Youngs Creek Mine

Project Sponsor: Cloud Peak Energy / Spring Creek Coal

Project Description

- **Sector:** Coal Mine Expansion and Infrastructure
- **Lead Agency:** BLM, U.S. Army Corps of Engineers, possibly OSMRE
- **Any Identifying Project Numbers:** NA
- **Location:** Big Horn County, Montana and Sheridan County, WY
- **Estimated Cost:** > $100 million
- **Other:** BLM EIS (MT): Combined proposed Spring Creek Coal Mine activities: 4 proposed actions related to coal mining at the Spring Creek Mine in Big Horn County, Montana. Proposed actions involve potential sale of two tracts of Federal coal through lease-by-application and lease modification application. Both applications cover proposed additions to an existing federal coal lease at the Spring Creek Mine. Also includes proposed amendments to an existing land use permit to maintain access to mine monitoring and gauging stations and an existing land use lease to provide room for the placement of overburden and infrastructure.

  Corps 404 Permit (MT and WY): Combined proposed new Youngs Creek Coal Mine (Sheridan County, Wyoming) and Spring Creek Coal Mine 9-mile haul road construction (Big Horn County, Montana) and rail spur project (Sheridan County, Wyoming, and Big Horn County, Montana.)

FWS Involvement

- **Region:** 6
- **Field Office:** Montana Field Office for MT, Wyoming Field Office for WY
  - **Lead Field Office, if more than one involved:** NA
- **Status of FWS Involvement:** BLM EIS (MT): Met with proponent late 2016, provided written comments on species of concern conservation plan late 2016, submitted EIS scoping comments to BLM early 2017. Corps 404 Permit (MT/WY): submitted joint WYFO/MTFO comments to USACOE on 404 permit application early 2017. Authorities: ESA, MBTA, BGEPA, NEPA, CWA
- **Project Timeline:** Anticipated comment on BLM's Spring Creek Coal EIS 2017/2018. Anticipated interaction with proponent and other agencies re Youngs Creek Mine, haul road, and rail spur 2017/2018 (project proposed to occur between 2019 and 2046, with reclamation beginning in 2051).

Major Infrastructure Project
2017

Project Name: Cedar Creek Anticline CO2 Pipeline and Enhanced Oil Recovery Project

Project Sponsor: Denbury Resources, Inc.

Project Description

- **Sector:** Pipeline and Oil Recovery
- **Lead Agency:** Bureau of Land Management
- **Any Identifying Project Numbers:** NA
- **Location:** SE Montana
- **Estimated Cost:** $220 million
- **Other:** 110 miles long

FWS Involvement

- **Region:** 6
- **Field Office:** Montana Field Office
- **Status of FWS Involvement:** Introductory only thus far; applicant currently working with BLM regarding ROW grant. BLM conducting NEPA (EA). Anticipate S7 consultation and coordination regarding migratory birds and eagles. Authorities: ESA, MBTA, BGEPA
- **Project Timeline:** No meetings currently planned with FWS – but likely. NEPA (3rd party contractor) to begin April 2017 and be finalized by 1/1/19; proposed construction 8/1/2019 to 11/15/2019.

Major Infrastructure Project
2017

Project Name: Gordon Butte Pumped Hydro Project

Project Sponsor: Absaroka Energy, LLC

Project Description

- **Sector:** Hydroelectric Power
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers:** FERC Project Number 13642
- **Location:** Meagher County, Montana
- **Estimated Cost:** $900 million
- **Other:** Private land, 400 MW, new six mile 230 kV OH tie-in line, closed-loop pumped storage hydro facility

FWS Involvement

- **Region:** 6
- **Field Office:** Montana Field Office, Helena
- **Status of FWS Involvement**: Attended several meetings/calls with proponent regarding project and trust resource concerns; issued letter to proponent. Anticipate intermittent coordination with project proponent regarding bald eagle nesting in project vicinity (MT FO). Authorities: ESA, MBTA, BGEPA
- **Project Timeline:** FERC license issued in December 2016. Anticipate coordination regarding bald eagle nesting and powerline marking (MT FO) through 2017 and 2018.

Major Infrastructure Project
2017

Project Name: Hungry Horse Power Plant Modernization (Hydroelectric Dam)

Project Sponsor: U.S. Bureau of Reclamation (NEPA); Bonneville Power Administration (funding).

Project Description

- **Sector:** Hydroelectric Power
- **Lead Agency:** U.S. Bureau of Reclamation and Bonneville Power Administration
- **Any Identifying Project Numbers:** NA
- **Location:** Flathead County, Montana, South Fork Flathead River
- **Estimated Cost:** $200M
- **Other:** Rehabilitation and upgrade of up to 4 turbines for the 428 megawatt Hungry Horse hydroelectric facility.

FWS Involvement

- **Region:** 6
- **Field Office:** Montana ES
- **Status of FWS Involvement:** ESA consultation. Minor NEPA comment submitted in 2016. Awaiting Biological Assessment addressing Bull Trout.
- **Project Timeline:** Work could potentially begin in 2017 and continue to 2025

Major Infrastructure Project
2017

Project Name: Mud Springs Wind Project

Project Sponsor: EverPower Wind Holdings, Inc.

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers:** NA
- **Location:** Carbon County, Montana
- **Estimated Cost:** > $100 million
- **Other:** 100 percent private land, 240 MW, up to 96 total turbines in 3 phases, 14-mile generation OH tie-in line

FWS Involvement

- **Region:** 6
- **Field Office:** Montana Field Office, Helena and Division of Migratory Birds, Denver
- **Status of FWS Involvement:** Attended several meetings/calls with proponent regarding project and trust resource concerns; issued multiple letters to proponent; proponent has elected to pursue Eagle Take Permit. Ongoing work on EA (3rd party contractor) in association with Eagle Take Permit (Mig Birds lead). Anticipate ECP and BBCS development (Mig Birds and MT FO), intra-service S7 consultation (Mig Birds and MT FO) and coordination regarding sage-grouse mitigation (MT FO). Authorities: ESA, MBTA, BGEPA, NEPA
- **Project Timeline:** Ongoing work on EA in association with Eagle Take Permit (Mig Birds lead). Anticipate ECP and BBCS development (Mig Birds and MT FO), intra-service S7 consultation (Mig Birds and MT FO) and coordination regarding sage-grouse mitigation (MT FO) through 2017/2018. Construction commencement proposed late2017; desire to be fully operational by Q4 2018.

Major Infrastructure Project
2017

Project Name: Rim Rock Wind Project

Project Sponsor: NaturEner Rim Rock Wind Energy, LLC

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers:** NA
- **Location:** Glacier and Toole counties, Montana
- **Estimated Cost: >** $100 million
- **Other:** Project constructed and operational as of December 2012; 100 percent on private land, 189 MW, 126 turbines, 6.85-mile generation OH tie-in line

FWS Involvement

- **Region:** 6
- **Field Office:** Montana Field Office, Helena and Division of Migratory Birds, Denver
- **Status of FWS Involvement:** Attended several pre-construction meetings/calls with proponent regarding project and trust resource concerns and BBCS development; issued letters to proponent; proponent has elected to pursue Eagle Take Permit post-construction. Eagle Take Permit Application and Eagle Conservation Plan received 2/15/2017. Authorities: ESA, MBTA, BGEPA, NEPA
- **Project Timeline:** Anticipated work on EA in association with Eagle Take Permit (Migratory Birds lead). Anticipate ECP modification (Migratory Birds and MT FO), intra-service S7 consultation (Mig Birds and MT FO) through 2017/2018.

Major Infrastructure Project
2017

Project Name: R-Project Transmission Line

Project Sponsor: Nebraska Public Power District

Project Description

- **Sector:** Transmission
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers:** NA
- **Location:** Nebraska
- **Estimated Cost:** $363 million
- **Other:** Project is construction of a 225-mile-long, 345 kilovolt transmission line

FWS Involvement

- **Region:** 6
- **Field Office:** Nebraska Ecological Services Field Office
- **Status of FWS Involvement:** Preparation of EIS for Section 10 Habitat Conservation Plan (HCP). Authorities involved include ESA, MBTA, and BGEPA. DEIS and DHCP completed and ready for public review pending FR publication of NOA
- **Project Timeline:** Anticipated. 5/3/2017: NOA published in FR; 7/1/2017: End of Public comment Period; 9/1/2017: FEIS prepared, public and internal comments addressed; 9/1/2017: NOA announcing FEIS published in FR; 10/1/2017: ROD published in the FR, FWS involvement concludes then.

Major Infrastructure Project
2017

Project Name: Master Development Plan

Project Sponsor: Continental Resources and Slawson Exploration

Project Description

- **Sector:** Oil and Gas Exploration
- **Lead Agency:** USDA Forest Service
- **Any Identifying Project Numbers:** NA
- **Location:** McKenzie County, ND
- **Estimated Cost:** $245 million
- **Other:** 49 oil and gas wells on Federal Lands (Dakota Prairie Grasslands)

FWS Involvement

- **Region:** 6
- **Field Office:** ND
- **Status of FWS Involvement:**
    - July 2016: NDFO conducted on-site reviews
    - December 2016: NDFO received a request for formal consultation. The FWS expects to deliver the biological opinion in April 2017.
- **Project Timeline:**
    - Estimated start of construction: 2017

Major Infrastructure Project
2017

Project Name: Mouse River Enhanced Flood Protection Project

Project Sponsor: The Souris River Joint Water Board

Project Description

- **Sector:** Flood Control
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** NA
- **Location:** Minot, ND
- **Estimated Cost:** $1 billion (full program through 2039)
- **Other:** NA

FWS Involvement

- **Region:** 6
- **Field Office: ND**
- **Status of FWS Involvement:**
    - 2016: FWS began coordination with the USACE and Souris River Joint Board assisting sponsors and permitting authorities in project design for the Draft Programmatic EIS (released November 2016) pursuant to NEPA. The FWS also provided recommendations to the sponsors and USACE to minimize impacts and achieve regulatory (time) certainty under the Endangered Species Act.
- **Project Timeline:**
    - Estimated start of construction: first phase, 2017

Major Infrastructure Project
2017

Project Name: Upland Pipeline

Project Sponsor: Upland Pipeline, LLC, subsidiary of TransCanada

Project Description

- **Sector:** Oil Pipeline
- **Lead Agency:** State Department
- **Any Identifying Project Numbers:** NA
- **Location:** North Dakota
- **Estimated Cost:** $300 million
- **Other:** U.S. portion only; pipeline extends into Canada

FWS Involvement

- **Region:** 6
- **Field Office: ND**
- **Status of FWS Involvement:**
    - August 2016: NDFO received NOI to prepare an EIS
    - February 2017: initial meeting (phone call) between the State Department and NDFO discussing Endangered Species Act approach. The FWS provided the recommendation to pursue section 7 consultation. The State Department is considering the FWS recommendation but indicated more interest in advising TransCanada to seek a section 10 HCP if incidental take is anticipated.
- **Project Timeline:**
    - Estimated in-service date is 2020

Major Infrastructure Project
2017

Project Name: U.S. Highway 85 Improvement: I94 to Watford City, North Dakota

Project Sponsor: The Federal Highway Administration and North Dakota Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration and ND Department of Transportation
- **Any Identifying Project Numbers:** NA
- **Location:** Western North Dakota
- **Estimated Cost:** $500 million
- **Other:** 67 miles long

FWS Involvement

- **Region**: 6
- **Field Office:** ND
- **Status of FWS Involvement:**
    - 2015: The FWS began coordination and planning discussions with the sponsors to develop a timeline and deliverables pursuant to the National Environmental Policy Act and Endangered Species Act compliance activities.
    - 2016/17: The FWS is assisting the ND Game and Fish and the project sponsors in assessing the need for wildlife crossings and designing the roadway to be wildlife friendly.
- **Project Timeline:**
    - Estimated start of construction: 2018

Major Infrastructure Project
2017

Project Name: Lake Powell Pipeline

Project Sponsor: Utah Division of Water Resources

Project Description

- **Sector:** Hydroelectric Power
- **Lead Agency:** Federal Energy Regulatory Commission (FERC)
- **Any Identifying Project Numbers:** FERC Project No. 12966
- **Location:** Kane and Washington counties, Utah and Coconino and Mohave counties, Arizona
- **Estimated Cost:** $1-3 billion
- **Other:** Transfer of 84,000 acre-feet of water from Lake Powell to Kane and Washington counties, Utah via pipeline and using topography of pipeline route to create pumped storage hydroelectric capacity of 300 megawatts (35 megawatts peaking power).

FWS Involvement

- **Regions:** 6 and 2
  - **Lead Region, if more than one involved:** 6
- **Field Offices:** Utah and Arizona
  - **Lead Field Office, if more than one involved:** Utah
- **Status of FWS Involvement:** Comments on draft study plans and review of Preliminary Licensing Plan and Draft Study Reports prior to submittal to FERC. Awaiting draft Biological Assessment and draft Environmental Impact Statement from FERC.
- **Project Timeline:** Unknown at this time. Project construction anticipated to start in 2025.

Major Infrastructure Project
2017

Project Name: Milford Wind Energy Facility

Project Sponsor: SunEdison, Inc.

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** Bureau of Land Management
- **Location:** Beaver and Millard counties, Utah
- **Other:** The facility was constructed in phases from 2008-2011. It is current operating as a 306 MW facility with 165 turbines.

FWS Involvement

- **Regions:** 6
- **Field Offices:** Utah Ecological Services Field Office
- **Status of FWS Involvement:** FWS reviewed and edited the Eagle Conservation Plan (ECP). FWS participates in Wildlife Working Group meetings to discuss conservation measures, research, and data and will continue to work with the company on their ECP and potential eagle permit.
- **Project Timeline:** Post-construction; on-going meetings and reviews.

Major Infrastructure Project
2017

Project Name: Apex Woods Canyon Wind Energy Facility

Project Sponsor: Apex Clean Energy, Inc.

Project Description

- **Sector:** Renewable Energy: Wind
- **Lead Agency:** Private
- **Location:** Utah and Carbon counties, Utah
- **Other:** The 101 MW facility will include met towers, turbines, roads, and transmission capacity.

FWS Involvement

- **Regions:** 6
- **Field Offices:** Utah Ecological Services Field Office
- **Status of FWS Involvement:** FWS met with the company and provided initial recommendations to follow the Wind Energy Guidelines, Eagle Conservation Plan Guidance, and Bird and Bat Conservation Strategies for siting, construction, and operations. FWS is preparing a letter to the company about the concern of impacts to migratory birds, including eagles, and greater sage-grouse.
- **Project Timeline:** Construction should occur in 2020.

Major Infrastructure Project
2017

Project Name: State Route 30

Project Sponsor: Utah Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Location:** Box Elder and Cache counties, Utah
- **Other:** UDOT is proposing to construct and maintain a multi-lane (up to 5 lanes with turning lanes) highway along 17.5 miles of existing 2 lane highway. The purpose of the project is for increased capacity and safety. The project bisects Cutler Marsh, an important wetland for migratory birds.

FWS Involvement

- **Regions:** 6
- **Field Offices:** Utah
- **Status of FWS Involvement:** FWS is a participating agency, reviewing NEPA documents, environmental reports, and biological assessments.
- **Project Timeline:** UDOT (through MOU with Fed Highways) is drafting an EIS and has not yet released it to agencies.

Major Infrastructure Project
2017

Project Name: West Davis Corridor

Project Sponsor: Federal Highway Administration & Utah Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration (FHWA)
- **Any Identifying Project Numbers:** FHWA-UT-EIS-13-02-D
- **Location:** Davis and Weber counties, Utah
- **Estimated Cost:** $600 million
- **Other:** Combination four-lane divided highway and five-lane arterial, 20 to 24 miles long, depending on selected alternative.

FWS Involvement

- **Region:** 6
- **Field Office:** Utah Ecological Services Field Office
- **Status of FWS Involvement:** FWS is participating as a cooperating agency in the review of NEPA documents. The proposed highway is located adjacent to the Great Salt Lake, an important migratory bird resource that is part of the Western Hemispheric Shorebird Reserve Network, a distinction afforded to only seven areas in the lower 48 states. The FWS Utah Ecological Services Field Office has participated in numerous agency meetings and field reviews since 2010 to evaluate alternative alignments. FWS reviewed and provided comments to FHWA on the Draft Environmental Impact Statement in August 2013. FWS received several draft chapters of the Final EIS from FHWA on January 30, 2017, and provided comments and recommendations on the proposed action's impacts to wetlands and wildlife resources on March 6, 2017.
- **Project Timeline:** The NEPA process for the West Davis Corridor began in 2010. FHWA plans to complete the Final EIS/ROD by summer 2017.

Major Infrastructure Project
2017

Project Name: Alton Coal Mine

Project Sponsor: Alton Coal

Project Description

- **Sector:** Coal
- **Lead Agency:** Bureau of Land Management
- **Any Identifying Project Numbers:** NA
- **Location:** Kane County, Utah
- **Estimated Cost:** >$100 million
- **Other:** The Proposed Action would include approximately 3,576 acres, of which approximately 2,280 acres are federal surface and mineral estate and 1,296 acres are split estate; private surface estate and federal mineral estate. Recoverable portions of in-place coal reserves would be mined over approximately 25 years using surface-mining methods.

FWS Involvement

- **Region:** 6
- **Field Office:** Utah Ecological Services Field Office
- **Status of FWS Involvement:** FWS commented on a Draft Environmental Impact Statement (DEIS) in January 2012, and an Administrative Supplemental Draft Environmental Impact Statement (ASDEIS) for the project in August 2013. FWS is in the process of reviewing a mitigation plan submitted to BLM by Alton Coal. The FWS primary trust resource in the area is the greater sage-grouse.
- **Project Timeline:** BLM anticipated completion date not known.

Major Infrastructure Project
2017

Project Name: Crescent Point Energy Utah Federal-Tribal Well Development Project

Project Sponsor: Crescent Point Energy U.S. Corp

Project Description

- **Sector:** Oil and Gas
- **Lead Agency:** Bureau of Land Management, Vernal Field Office, Utah
- **Any Identifying Project Numbers:** NA
- **Location:** Uinta Basin, Uintah and Duchesne counties, Utah
- **Estimated Cost:** >$100 million
- **Other:** Crescent Point proposes to drill up to 3,925 new oil and gas wells and build 863 miles of roads; 693 miles of pipelines co-located with roads; 170 miles of cross-country pipelines; 400 miles of trunk pipelines; 5 salt water disposal wells; 5 produced water treatment facilities; 20 central tank batteries; 4 gas processing plants; 8 oil storage areas, and 4 equipment storage areas.

FWS Involvement

- **Region:** 6
- **Field Office:** Utah Ecological Services Field Office
- **Status of FWS Involvement:** The FWS agreed to be recognized as a cooperating agency in a letter transmittal dated January 28, 2016. FWS attended a cooperators scoping meeting on April 25, 2016, and on May 20, 2016, provided comments on chapters 1 and 2 of BLM's Administrative Draft EIS.
- **Project Timeline:** A Proposed Action was submitted to BLM October 15, 2015. A Draft EIS will be prepared in mid-2017. The Final EIS will be prepared and reviewed in early- to mid-2018. The Record of Decision is expected by September 2018.

Major Infrastructure Project
2017

Project Name: Chokecherry Sierra Madre Wind Energy Project

Project Sponsor: Power Company of Wyoming

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** Bureau of Land Management
- **Any Identifying Project Numbers:** WYW-167155 (BLM right-of-way)
- **Location:** Carbon County, Wyoming
- **Estimated Cost:** $5,000,000,000
- **Other:** Up to 1,000 turbines producing up to 3,000 megawatts of power, constructed in two phases

FWS Involvement

- **Region:** 6
- **Field Office:** Wyoming Field Office (Ecological Services), working closely with the Migratory Bird Management Office in Lakewood
- **Status of FWS Involvement:**
    - Includes review of BLM NEPA documents, ESA consultation, FWS NEPA and government to government consultation to issue eagle take permits (ETP).
    - Authorities include the ESA, MBTA, and BGEPA.
    - BA received on 8/27/12 and BO rendered on 9/5/12.
    - FWS reviewed BLM's final EIS and draft record of decision (ROD) in 2012; Secretary Ken Salazar signed the BLM ROD on 10/9/12.
    - December 2013, BLM initiated EA1 (first of several EAs tiered to the EIS) for infrastructure components and FWS initiated EIS for an eagle take permit; BLM and FWS coordinated closely on NEPA documents, including biweekly conference calls; BLM issued final decision record and finding of no new significant impact (FONNSI) for EA1 on 12/23/14;
    - BLM initiated EA2 for site-specific analysis of the first 500 turbines April 2015; BLM issued a FONNSI and ROD for EA2 on 1/18/17;
    - FWS issued a draft EIS for issuing ETPs on 4/29/16, a final EIS on 12/9/16, and a final ROD on 1/20/17;
    - FWS issued a standard ETP on 3/9/17 to cover disturbance take of eagles during construction of the infrastructure components and the first 500 turbines;
- **Project Timeline:**
    - FWS anticipates issuing a programmatic ETP for operation of the first 500 turbines in 2017. FWS will review annual reports required by the eagle take permits. Construction expected 2017 through 2019 for first phase.
    - Anticipate PCW will apply for ETP in 2017 to cover operation of the second 500 turbines, and BLM and FWS will likely cooperate on developing one EA.

Major Infrastructure Project
2017

Project Name: Converse County Oil and Gas Project

Project Sponsor: EOG Resources, Anadarko Petroleum, Chesapeake Energy Corporation, RKI Exploration and Production, Samson Resources, SM Energy.

Project Description

- **Sector:** Oil and Gas
- **Lead Agency:** Bureau of Land Management
- **Any Identifying Project Numbers:** NA
- **Location:** Converse County, Wyoming
- **Estimated Cost: $**40,000,000,000
- **Other:** Project area- 1,501,707 acres. The majority of the federal mineral estate (808,154 acres) is located below private surface lands (split-estate). Total 5,000 oil and gas wells over 10 years, up to 1,500 well pads with up to 16 wells per well pad. Includes pipelines for oil and gas, condensate, and water, utility lines, roads, compressor stations..

FWS Involvement

- **Region:** 6
- **Field Office:** Wyoming Ecological Services Field Office
- **Status of FWS Involvement:** Cooperating agency since 2016. Provided NEPA review-scoping, PDEIS review, and alternatives development. Development of Migratory Bird Conservation Plan in partnership with BLM, U.S. Forest Service and Operator Group (draft including compensatory mitigation for impacts to migratory bird habitats under MBTA, Bald and Golden Eagle Protection Act, EO 13186 and the MOU between FWS and BLM.
- **Project Timeline:** Draft PDEIS cooperator review: April 2017. Review of proposed changes to DEIS cooperator review: late 2017. Notice of Availability for Final EIS cooperators review: winter 2017-2108. ROD 2018. Potential ESA consultation in 2017.

Major Infrastructure Project
2017

Project Name: Greater Crossbow Oil and Gas Project

Project Sponsor: EOG Resources

Project Description

- **Sector:** Oil and Gas
- **Lead Agency:** Bureau of Land Management
- **Any Identifying Project Numbers:** NA
- **Location:** Converse and Campbell counties, Wyoming
- **Estimated Cost:** $12,000,000,000
- **Other:** Project surface area-119,104 acres. Total 1,500 oil and gas wells over 10 years, up to 100 optimized development well pads with up to 22 wells per well pad. Includes pipelines for oil and gas, condensate, water, and utility lines.

FWS Involvement

- **Region:** 6
- **Field Office:** Wyoming Ecological Services Field Office
- **Status of FWS Involvement:** Cooperating agency since 2015. Provided NEPA review-scoping, DEIS review, alternative development. Development of Migratory Bird Conservation Plan in partnership with Bureau of Land Management, U.S. Forest Service BLM, EOG Resources (draft and final including compensatory mitigation for impacts to migratory bird habitats under MBTA, Bald and Golden Eagle Protection Act, EO 13186 and the MOU between FWS and BLM.
- **Project Timeline:** Draft EIS cooperator review: July 2017. Notice of Availability for Draft EIS: Jan 2018. Final EIS cooperator review: late 2018. Notice of Availability for Final EIS: early 2019. Record of Decision: mid 2019. Future potential ESA consultation in 2017.

Major Infrastructure Project
2017

Project Name: Energy Gateway South Transmission Line

Project Sponsor: Rocky Mountain Power (PacifiCorp)

Project Description

- **Sector:** Transmission
- **Lead Agency:** Bureau of Land Management
- **Project Numbers:** NA
- **Location:** Wyoming, Colorado, and Utah (approximately 400 miles)
- **Estimated Cost:** approximately $2 million/mile = approximately $800 million
- **Other:** 1,500 MW, 416 miles of 500 kV AC transmission line in southern Wyoming, northwestern Colorado, and northern Utah.

FWS Involvement

- **Region:** 6
- **Field Offices:** Wyoming ESFO, Grand Junction CO ESFO, and Utah ESFO
    - **Lead Field Office:** Wyoming ESFO
- **Status of FWS Involvement:** Cooperating agency since 2009. Provided detailed comments on: (a) NEPA documents (administrative and draft EIS, administrative and final EIS, and administrative and supplemental EIS); (b) section 7 consultation under ESA (draft and final BA, draft and final BO); (c) greater sage-grouse (GRSG) avoidance, minimization, and mitigation (GRSG direct effects habitat equivalency analysis (HEA) and quantification of indirect effect); and (d) migratory bird compensatory mitigation plan (draft and final migratory bird conservation plan, including compensatory mitigation for impacts to migratory bird habitats under MBTA, EO 13186 and the 2010 MOU between FWS and BLM, and BLM IM-WY2013-005).
- **Project Timeline:** 2008: BLM received ROW permit application, FWS assisted with developing mitigation plan, FWS commented on draft and final EIS; submitted final BO in January 2016; ROD signed by BLM in December 2016; anticipated in service 2020 - 2024

Major Infrastructure Project
2017

Project Name: Gateway West Transmission Line

Project Sponsor: Rocky Mountain Power and Idaho Power (PacifiCorp)

Project Description

- **Sector:** Transmission
- **Lead Agency:** Bureau of Land Management
- **Project Numbers:** NA
- **Location:** Wyoming and Idaho (approximately 1,000 miles)
- **Estimated Cost:** approximately $2 million/mile = approximately $2 billion
- **Other:** 147.4 miles of 230 kV AC line in Wyoming, 5.1 miles of 345-kV AC line in Wyoming, and 871.6 miles of 500 kV AC line in Wyoming and Idaho.

FWS Involvement

- **Regions:** Regions 6 and 1
  - **Lead Region:** Region 6
- **Field Offices:** Wyoming ESFO and Idaho FWS
  - **Lead Field Office:** Wyoming ESFO
- **Status of FWS Involvement:** Cooperating agency since 2010. Provided detailed comments on: **(a)** NEPA documents (administrative and draft EIS, administrative and final EIS, and administrative and supplemental EIS); **(b)** section 7 consultation under ESA (draft and final BA, draft and final BO); **(c)** greater sage-grouse (GRSG) avoidance, minimization, and mitigation (GRSG direct effects habitat equivalency analysis (HEA) and quantification of indirect effect); and **(d)** migratory bird compensatory mitigation plan (draft and final migratory bird conservation plan, including compensatory mitigation for impacts to migratory bird habitats under MBTA, EO 13186 and the 2010 MOU between FWS and BLM, and BLM IM-WY2013-005).
- **Project Timeline:** 2008: BLM received ROW permit application; FWS provided final BO in September 2013; BLM signed ROD for segments 1-7 and 10 in WY and ID in November 2013; 10/7/16: Final supplemental EIS available; 12/13/16: BLM requested consultation on segments 8 and 9; FWS final BO in December 2016; BLM signed ROD for segments 8 and 9 in Idaho in January 2017. Project estimated to be in service 2019-2024. FWS and BLM still in discussions about future surveys for Ute ladies'-tresses orchid.

Major Infrastructure Project
2017

Project Name: Moneta Divide Natural Gas and Oil Development Project

Project Sponsor: Encana Oil and Gas Inc., Burlington Oil and Gas Company

Project Description

- **Sector:** Oil and Gas
- **Lead Agency:** Bureau of Land Management
- **Any Identifying Project Numbers:** NA
- **Location:** Fremont and Natrona counties, Wyoming
- **Estimated Cost:** $34,000,000,000
- **Other:** Project surface area-265,152 acres. Total 4,250 oil and gas wells over 15 years. Includes pipelines for oil and gas, condensate, water, and utility lines, roads, compressor stations.

FWS Involvement

- **Region:** 6
- **Field Office:** Wyoming Ecological Services Field Office
- **Status of FWS Involvement:** Cooperating agency since 2013. Provided NEPA review including scoping comments, preliminary DEIS review, and alternatives development. Provided recommendations and discussion on compensatory mitigation for impacts to migratory birds under MBTA, Bald and Golden Eagle Protection Act, EO 13186, and the MOU between FWS and BLM; threatened and endangered species under the ESA.
- **Project Timeline:** Draft EIS cooperator review: summer 2017. Notice of Availability for Draft EIS: Jan 2018. ROD estimated 2018. Potential ESA consultation in 2017.

Major Construction Activity
2017

Project Name: Normally Pressured Lance Gas Development Project

Project Sponsor: Encana Oil and Gas Inc.

Project Description

- **Sector:** Oil and Gas
- **Lead Agency:** Bureau of Land Management
- **Any Identifying Project Numbers:** NA
- **Location:** Fremont and Sweetwater counties, Wyoming
- **Estimated Cost:** $680,000,000
- **Other:** Project area-70,155 acres. 85 gas wells. Includes roads, pipelines, compressor stations.

FWS Involvement

- **Region:** 6
- **Field Office:** Wyoming Ecological Service Field Office
- **Status of FWS Involvement:** Cooperating agency since 2013. Provided NEPA review-scoping, Alternative and Proposed DEIS review, alternatives review**.** Discussed ESA impacts to listed species, pollinator conservation, migratory birds under the MBTA, EO13186, Bald and Golden Eagle Protection Act, and MOU between FWS and BLM.
- **Project Timeline:** Possible ESA section 7 consultation in 2017. Cooperator review of DEIS in 2017. ROD estimated 2018.

Major Construction Activity
2017

Project Name: Riley Ridge to Natrona CO_2 Pipeline

Project Sponsor: Denbury Resources Inc.

Project Description

- **Sector: P**ipeline
- **Lead Agency:** BLM
- **Any Identifying Project Numbers:** NA
- **Location:** Fremont, Sublette, Sweetwater, and Natrona counties, Wyoming
- **Estimated Cost:** 833,280,000
- **Other:** 224 mile pipeline, with sweetening plant

FWS Involvement

- **Region:** 6
- **Field Office:** Wyoming Ecological Service Field Office
- **Status of FWS Involvement:** Cooperating agency since 2014. Provided NEPA review-scoping, Alternative and Proposed DEIS review, alternatives review**.** Discussed ESA impacts to threatened and endangered species, pollinator conservation, migratory birds under the MBTA, EO13186, Bald and Golden Eagle Protection Act, and MOU between BLM and FWS.
- **Project Timeline:** Possible ESA section 7 consultation in 2017. Cooperator review of DEIS late 2017. ROD estimated 2018.

Major Infrastructure Project
2017

Project Name: North I-25 ROD1 Revision and ROD4

Project Sponsor: Colorado Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highways Administration
- **Any Identifying Project Numbers:** IM 0253-255 (21506) and IM 0253-179
- **Location:** I-25 from Denver Union Station to State Highway 14 near Fort Collins, Colorado.
- **Estimated Cost:** $230 million
- **Other:** NA

FWS Involvement

- **Region:** 6
- **Field Office:** Colorado - Lakewood
- **Status of FWS Involvement:** A programmatic biological opinion on the corridor was completed October 13, 2011. Since that time, we have been working with CDOT and FHWA to ensure that projects proposed under that programmatic BO fit within its terms.
- **Project Timeline:** Should be completed April 2017

Major Infrastructure Project
2017

Project Name: Northern Integrated Supply Project (NISP)

Project Sponsor: Northern Colorado Water Conservancy District

Project Description

- **Sector:** Water Supply
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** Corps File No. 200380509
- **Location:** Larimer and Weld counties, Colorado
- **Estimated Cost:** $933 million - $1.37 billion
- **Other:** Glade Reservoir, 170,000 acre-feet (af); Galeton Reservoir, 46,000 af.

FWS Involvement

- **Region:** 6
- **Field Office:** Colorado - Lakewood
- **Status of FWS Involvement:** ESA/reinitiation of formal consultation for Platte species affected by water depletions and close involvement with USACE/Northern as Northern implements the Terms and Conditions of the Project BO issued in October 2007.
- **Project Timeline:** Possibly 2017-2025

Major Infrastructure Project
2017

Project Name: Liberty Development and Production Plan (Liberty)

Project Sponsor: Hilcorp Alaska, LCC

Project Description

- **Sector:** Oil and Gas, pipeline
- **Lead Agency:** Bureau of Ocean Energy Management (BOEM)
- **Any Identifying Project Numbers:** BOEM-2015-0068 and BOEM-2015-0096
- **Location:** Beaufort Sea Outer Continental Shelf (OCS); North Slope Borough, Alaska
- **Estimated Cost:** >$100 million
- **Other**: Liberty concerns an oil and gas lease unit located within Foggy Island Bay, six miles offshore in the Alaska OCS zone of the Beaufort Sea. The Proposed Action consists of an offshore, artificial island (~24 acres at seafloor) The onshore project footprint – including above-ground pipeline (1.5 miles), ice roads (~30 miles requiring 60 million gallons of water/year for 2 years of construction, 4.3 million gallons/year for ~20 years of operations, and ~20 million gallons/year for 2 years of decommissioning), gravel mine site (~21 acres), and gravel pads – is located within the North Slope Borough.

FWS Involvement

- **Region:** 7
- **Field Office:** Fairbanks Fish and Wildlife Field Office (FWFO) (lead), Marine Mammal Management Office (MMM)
- **Status of FWS Involvement:** Cooperating Agency
  National Environmental Policy Act (NEPA): FWS has provided input on alternatives and reviewed preliminary drafts of the Environmental Impact Statement (EIS). FWS is currently reviewing the Draft EIS and providing comments to BOEM, prior to public review. The Draft EIS will undergo BOEM internal review and revision prior to the public notice and review period.
  Endangered Species Act (ESA): Section 7 consultation will be necessary due to presence of spectacled eiders, polar bears, and polar bear critical habitat in the project area. Steller's eiders and Pacific walrus may also occur in the area, although the project is at the edge of both species' ranges.
  Marine Mammal Protection Act (MMPA): Harassment authorization will likely be necessary.
- **Project Timeline:** The Liberty Project is subject to a FAST Act schedule. Involvement anticipated through September 2018.

Major Infrastructure Project
2017

Project Name: Sterling Highway Milepost 45 to 60 Project

Project Sponsor: Alaska Department of Transportation and Public Facilities (ADOT & PF)

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration (FHWA)
- **Any Identifying Project Numbers:** NA
- **Location:** Kenai Peninsula Borough, Alaska
- **Estimated Cost:** This is a Federal Aid Highway project, and Federal Highway Trust Funds are anticipated to cover 90 percent of costs, with the State covering 10 percent. Depending upon the alternative selected, the project is estimated to cost between $250-304 million (estimated in 2014 dollars). Once the project moves into design, cost estimates will be refined in greater detail
- **Other:** NA

FWS Involvement

- **Region:** 7
- **Field Office:** Kenai National Wildlife Refuge (Kenai NWR); Regional Office; Kenai FWFO; and Anchorage FWFO
    - **Lead Field Office:** Kenai NWR
- **Status of FWS Involvement:** Cooperating Agency

  NEPA: FWS is a Cooperating Agency and has extensively participated in public and agency outreach and formal scoping meetings, reviewed and provided substantive comments on the Draft EIS, Draft Supplemental EIS, Draft Section 4(f) Evaluation, Preliminary Final EIS and Final Section 4(f) Evaluation. As some work is to occur on the Kenai NWR, FWS will authorize any activities on land managed by FWS, via a Special Use Permit.
  ESA: No impacts to listed species are anticipated from this project.
- **Project Timeline:** This is an on-going project. Neither the Final EIS nor the Record of Decision have been completed.

Major Infrastructure Project
2017

Project Name: Alaska Liquefied Natural Gas Project (AK LNG)

Project Sponsor: Alaska Gasline Development Corporation

Project Description

- **Sector:** Pipeline
- **Lead Agency:** Federal Energy Regulatory Commission **(**FERC)
- **Any Identifying Project Numbers:** FERC docket no. PF14-21 (prefiling documents)
- **Location:** Alaska. Project crosses multiple boroughs from Prudhoe Bay south to Nikiski: North Slope Borough, Yukon-Koyukuk Census Area, Fairbanks North Star Borough, Denali Borough, Matanuska-Susitna Borough, and Kenai Peninsula Borough
- **Estimated Cost:** $45-65 billion
- **Other:** The Proposed Action consists of transmission lines to a gas treatment plant at Prudhoe Bay, a pipeline transporting gas from the North Slope to Southcentral Alaska (~800 miles, mostly buried), multiple compressor stations, a gas liquefaction facility, and a marine LNG terminal. The Proposed Action would involve construction of extensive new infrastructure, including roads, pads, airstrips, helipads, rail spurs, gravel mine sites, heater and meter stations for the pipeline, man camps, and disposal sites.

FWS Involvement

- **Region:** Region 7
- **Field Office:** Fairbanks FWFO, Anchorage FWFO, MMM Office
- **Lead Field Office:** Fairbanks FWFO
- **Status of FWS Involvement:** Cooperating Agency
  NEPA: FWS is a Cooperating Agency and has participated in multiple reviews of draft resource reports (part of the EIS).
  ESA: Section 7 consultation will be necessary due to presence of spectacled eiders, polar bears, and polar bear critical habitat at the north end of the project. At the southern end of the project, northern sea otters and their critical habitat, Steller's eider, and short-tailed albatross may be present. A nonexperimental population of wood bison occurs in Interior Alaska, in areas that would be crossed by the pipeline.
  MMPA: Harassment authorization may be necessary
- **Project Timeline:** Project is currently in pre-filing phase. Involvement through 2020.
  NEPA: Comments on draft resource reports filed with FERC on 3/3/2015. Comments on second draft Resource Reports filed with FERC 9/26/2016. A Draft EIS is anticipated by October 2017. Final EIS is anticipated between November 2017 and May 2018. Project proponent anticipates FERC order in the third quarter of 2018, with notices to proceed in the third quarter of 2019.

Major Infrastructure Project
2017

Project Name: Alaska Standalone Pipeline (ASAP)

Project Sponsor: Alaska Gasline Development Corporation

Project Description

- **Sector:** Pipeline
- **Lead Agency:** U.S. Army Corps of Engineers (USACE)
- **Any Identifying Project Numbers:** POA-2009-651
- **Location:** Alaska. Project crosses several boroughs from Prudhoe Bay south to Point MacKenzie: North Slope Borough, Yukon-Koyukuk Census Area, Fairbanks North Star Borough, Denali Borough, and Matanuska-Susitna Borough
- **Estimated Cost:** >$100 million
- **Other:** The Proposed Action consists of a central gas conditioning facility at Prudhoe Bay, a mainline transmission pipeline (~737 miles, mostly buried), 1-2 compressor, a straddle and off-take facility, a Cook Inlet Natural Gas Liquid Extraction Plant (NGLEP) facility, 3 meter stations, and other permanent facilities. The project would include a pipeline lateral to Fairbanks (~34 miles).

FWS Involvement

- **Region:** 7
- **Field Office:** Fairbanks FWFO, Anchorage FWFO, MMM Office
    - **Lead Field Office:** Fairbanks FWFO
- **Status of FWS Involvement:** Cooperating Agency
  NEPA: FWS is a Cooperating Agency and has participated in multiple reviews of draft EISs. The FFWFO participates in regular cooperators' calls. The FFWFO and AFWFO have advised the project proponent on their Migratory Bird Conservation Plan.
  ESA: Section 7 consultation will be necessary due to presence of spectacled eiders, polar bears, and polar bear critical habitat at the north end of the project. Steller's eiders and Pacific walrus may also occur in the northern portion of the project area. At the southern end of the project, northern sea otters may be present. A nonexperimental population of wood bison occurs in Interior Alaska, in areas that would be crossed by the pipeline.
  MMPA: Harassment authorization may be necessary
- **Project Timeline:** Ongoing through unknown date.
  NEPA: Scoping comments provided to USACE in March of 2010; final EIS published October 2012. Supplemental EIS is currently in progress. Comments on preliminary draft Supplemental EIS provided to USACE from FWS. Revised draft SEIS became available February 2, 2017, but no further agency review is anticipated.
  ESA: A Biological Opinion (BO) was completed in 2012, for project described in 2012 FEIS. A Biological Assessment (BA) reflecting the current project was received February 8, 2017. The FWS is beginning re-initiation of the ESA Section 7 consultation.

Major Infrastructure Project
2017

Project Name: Kake to Petersburg Transmission Project

Project Sponsor: Alaska Energy Authority

Project Description

- **Sector:** Transmission
- **Lead Agency:** USDA Forest Service (USFS)
- **Any Identifying Project Numbers:** NA
- **Location:** Southeast Alaska (from Kake to Petersburg)
- **Estimated Cost:** >$100M
- **Other:** Proposed project is a 50-75-mile transmission line (depending on the alternative selected) to connect the village of Kake on Kupreaof Island to the power grid of Petersburg and Wrangell, which is fed primarily by the Tyee Hydropower facility on the Southeast Alaska mainland. The Kake-Petersburg Intertie would be used to transmit surplus hydroelectric power from Southeast Alaska Power Agency to the electric system in Kake, thereby offsetting the existing diesel generation while lowering and stabilizing the cost of electricity in Kake.

FWS Involvement

- **Region:** 7
- **Field Office:** Anchorage FWFO
- **Status of FWS Involvement:** FWS has conducted eagle nest surveys over a portion of one alternative route. There have been no additional requests for FWS technical assistance.
  NEPA: FWS anticipates a request for scoping issues as the next step.
  ESA: At this time no impacts to listed species are anticipated from this project.
- **Project Timeline:** This is an on-going project and the future timeline is unclear. NEPA scoping is anticipated in 2017, Draft EIS in 2018, Record of Decision and final permits in 2018 or 2019. Negotiating environmental mitigation will likely occur in 2018 and bald eagle take permits possibly in 2018.

Major Infrastructure Project
2017

Project Name: Haines Highway Reconstruction

Project Sponsor: Alaska Department of Transportation and Public Facilities (ADOT & PF)

Project Description

- **Sector:** Transportation
- **Lead Agency:** ADOT&PF
- **Any Identifying Project Numbers:** NA
- **Location:** Haines, Alaska
- **Estimated Cost:** $100M
- **Other:** Upgrade of 22 miles of highway along the Chilkat River. Includes one major bridge replacement.

FWS Involvement

- **Region:** 7
- **Field Office:** Anchorage FWFO
- **Status of FWS Involvement:**
  NEPA: FWS has provided technical assistance with impact avoidance, minimization, and compensation through the NEPA review, participated on numerous field trips and meetings, and provided comments on Draft EIS. Currently reviewing mitigation package associated with 404 permit under the Clean Water Act. Anticipate review of eagle take permit application (under the Bald and Golden Eagle Act) through spring/summer 2017. Expect additional NEPA and modification of 404 permit as future phases are designed.
  ESA: At this time no impacts to listed species are anticipated from this project.

- **Project Timeline:** Will provide comments on 404 permit notice in March 2017. Additional NEPA likely for future phases in 2018 and beyond.

Major Infrastructure Project
2017

Project Name: Ambler Mining District Industrial Access Project (Ambler Road)

Project Sponsor: Alaska Industrial Development and Export Authority (AIDEA)

Project Description

- **Sector:** Transportation
- **Lead Agency:** Bureau of Land Management (BLM), with heavy National Park Service (NPS) involvement
- **Any Identifying Project Numbers:** NA
- **Location:** Northwest Arctic Borough, Alaska
- **Estimated Cost:** $346.5 million
- **Other:** Proposed construction of ~211 mile industrial road from the Dalton Highway, just north of Bettles, west, just shy of Ambler and north of Shungnak to provide surface access to the Ambler Mining District through Gates of the Arctic National Park.

FWS Involvement

- **Region:** 7
- **Field Office:** Fairbanks FWFO
- **Status of FWS Involvement:** Participated in agency scoping meetings, but NEPA process not yet initiated.
  NEPA: FWS will have a review role due to anticipated impacts to wetlands and aquatic resources, essential fish habitat (EFH), migratory birds, and potential impacts to refuge resources. A migratory bird conservation plan may be requested.
  ESA: Project is south of the Brooks Range. No anticipated effects to listed species anticipated. A nonexperimental population of wood bison occurs in Interior Alaska, but their range is outside the project area.
- **Project Timeline:** Notice of Intent is anticipated March-May 2017. Timeline to be determined. Project is currently in the public scoping phase, and AIDEA and BLM are in the process of finalizing the EIS scope of work for a third party contractor.

Major Infrastructure Project
2017

Project Name: Greater Moose's Tooth-2 (GMT-2)

Project Sponsor: ConocoPhillips Alaska Incorporated (CPAI)

Project Description

- **Sector:** Oil and Gas
- **Lead Agency:** Bureau of Land Management and U.S. Army Corps of Engineers
- **Any Identifying Project Numbers:** NA
- **Location:** National Petroleum Reserve-Alaska (NPR-A)
- **Estimated Cost:** >$1billion
- **Other:** Construction and operation of a drill site in NPR-A with ancillary facilities to support oil and gas extraction. Site is located 20 miles southwest of the CPAI-operated Alpine Central Facility (CD-1).

FWS Involvement

- **Region:** 7
- **Field Office:** Fairbanks FWFO (lead), MMM Office
- **Status of FWS Involvement:** Cooperating Agency on BLM's Supplemental EIS. MMPA: Harassment authorization is necessary. CPAI has received authorizations for the past and current seasons. They will likely need authorizations for future season.
- **Project Timeline:** Notice of Intent published August 2016, currently in public comment phase for GMT-2 Draft SEIS. Final SEIS is scheduled for early 2018.

Major Infrastructure Project
2017

Project Name: Nunushuk Development

Project Sponsor: Armstrong Energy LLC.

Project Description

- **Sector:** Oil and Gas
- **Lead Agency:** U.S. Army Corps of Engineers (USACE)
- **Any Identifying Project Numbers:** NA
- **Location:** North Slope Borough, Alaska, (52 miles west of Deadhorse and 6.5 miles from Nuiqsut).
- **Estimated Cost:** >$100 million
- **Other:** Proposed project will target hydrocarbon deposits in the Alpine C and Nanushuk reservoirs. The project involves construction of a pads for drill site 1, a central processing facility, drill site 2, drill site 3, an operations center pad, infield pipelines and roads, export/ import pipeline from the development, a tie-in pad, and potable water system.

FWS Involvement

- **Region:** 7
- **Field Office:** Fairbanks FWFO (lead), MMM Office
- **Status of FWS Involvement:** Cooperating Agency
  NEPA: The public scoping period for the EIS closed. The USACE, with input from Cooperating Agencies, is developing and conducting impact evaluations on project alternatives.
  ESA: Once the project is in a later phase the FWS will also conduct a section 7 analysis on the potential impacts to listed eiders, polar bears, and designated polar bear critical habitat.
  MMPA: Armstrong Energy LLC has received authorizations for the past and current seasons. They will likely need authorizations for future season.
- **Project Timeline:** Timeline to be determined, but the NEPA process is well underway.

Major Infrastructure Project
2017

Project Name: Caelus Energy - Smith Bay

Project Sponsor: Caelus Energy

Project Description

- **Sector:** Oil and Gas
- **Lead Agency:** U.S. Army Corps of Engineers, Bureau of Land Management, State of Alaska
- **Any Identifying Project Numbers:** NA
- **Location:** North Slope Borough, Alaska, offshore State of Alaska Marine waters, National Petroleum Reserve-Alaska.
- **Estimated Cost:** >$100 million
- **Other:** Project is in very early stages (exploration and early design).

FWS Involvement

- **Region:** 7
- **Field Office:** Fairbanks FWFO (lead), MMM Office
- **Status of FWS Involvement:** Provided information to applicant on resources in the area. Provided input on exploration phase.
  MMPA: Caelus Energy has received authorizations for the past and current seasons. They will likely need authorizations for future season.
- **Project Timeline:** Unknown, applicant in pre-design phase.

Major Infrastructure Project
2017

Project Name: Susitna-Watana Hydroelectric Project

Project Sponsor: State of Alaska, Alaska Energy Authority (AEA)

Project Description

- **Sector:** Hydroelectric Power
- **Lead Agency:** Federal Energy Regulatory Commission
- **Project Number:** FERC Project Number 14241
- **Location:** Matanuska-Susitna Borough, Susitna River basin, 87 river miles from Talkeetna, Alaska.
- **Estimated Cost:** $5.66 billion
- **Other:** Proposed location Susitna Rivermile 184, > 703-foot high dam, 42-mile long and 2-mile wide reservoir, and a 2,800,000 MWh capacity.

FWS Involvement

- **Region:** 7
- **Field Office:** Anchorage FO
- **Status of FWS Involvement:**
  Participation and review during the Project's FERC integrated licensing process beginning in December 2011. The FERC study plan determination of initial Project studies was scheduled for March 10, 2017. The State and AEA have requested that the license process be held in abeyance after FERC issues the study plan determination.
  ESA: At this time no impacts to listed species are anticipated from this project.
- **Project Timeline:** The current FERC licensing process schedule ends with the March 10, 2017 initial study plan determination.

Major Infrastructure Project
2017

Project Name: Aiya Solar Energy Project

Project Sponsors: First Solar and Las Vegas Paiute Tribe

Project Description

- **Sector:** Solar Energy
- **Lead Agency:** Bureau of Indian Affairs)
- **Any Identifying Project Numbers**: NA
- **Location:** Clark County, Nevada (Moapa River Indian Reservation)
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Southern Nevada FO
- **Status of FWS Involvement:** Biological Opinion issued, construction currently on hold. Tortoise clearance and translocation not begun. Anticipate frequent coordination with the Tribe and its consultants during construction and implementation of mitigation measures.
- **Project Timeline:** Specific dates not currently available; anticipate development will begin in 2018.

Major Infrastructure Project
2017

Project Name: Battle Creek Salmon and Steelhead Restoration Project

Project Sponsor: Pacific Gas and Electric Company

Project Description

- **Sector**: Water Supply
- **Lead Agency:** Federal Energy Regulatory Commission
- **Any Identifying Project Numbers**: FERC Project Number 1121
- **Location:** California
- **Estimated Cost:** >$100 million
- **Other:** The restoration project has strong support from many of California's agricultural and municipal water entities as well as commercial and recreational fisherman.

FWS Involvement

- **Region:** 8
- **Field Office:** Red Bluff FO
- **Status of FWS Involvement: FWS** reviewing a PG&E application to amend its FERC license. The license amendment is part of a multi-agency private / public collaboration to implement the Battle Creek Salmon and Steelhead Restoration Project. In addition, FWS is reviewing PG&E's Facility Maintenance Plan, Bureau of Reclamation's construction designs, and Endangered Species Act documents associated with National Marine Fisheries Service listed species. FWS also provides technical information and field assistance based on long-term monitoring of the salmon and steelhead that will be restored. FWS will review additional permits or documents including Clean Water Act Water Quality Certification, Endangered Species Act Biological Opinions, and construction bid documents. After construction is complete FWS will work with PG&E to insure that the new facilities and stream flows are performing as designed.
- **Project Timeline:** FWS has been working with PG&E and other agencies on the restoration project since 1999. FWS will continue to work with the PG&E and state and federal agencies for the next four years until the construction project is complete.

Major Infrastructure Project
2017

Project Name: Butte County Habitat Conservation Plan (HCP) and Natural Community Conservation Plan

Project Sponsors: County of Butte, City of Oroville, City of Chico, City of Biggs, City of Gridley, Butte County Association of Governments (BCAG), California Department of Transportation (Caltrans), Western Canal Water District (WCWD), Biggs-West Gridley Water District, Butte Water District, and Richvale Irrigation District

Project Description

- **Sector:** Water, Sewer, Electric, Gas, Roads, and Bridges.
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location:** Butte County , California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Sacramento FO
- **Status of FWS Involvement:** Endangered Species Act and National Environmental Policy Act compliance is underway. Sponsors are revising the draft HCP based on extensive public comments. Sponsors and FWS will recirculate a revised draft HCP and draft EIS once revisions are complete**.**
- **Project Timeline:** Estimate Incidental Take Permit issued in summer 2018. Various projects will occur over a 50-year term. FWS, other State and Federal agencies that issue permits (FWS, USACOE, NMFS, California Department of Fish and Wildlife, etc.) related to the HCP will assist the Sponsors with implementing their HCP over the 50-year permit term.

Major Infrastructure Project
2017

Project Name: Calam Monterey Peninsula Water Supply Project

Project Sponsors: California American Water Company (Calam), Monterey Bay National Marine Sanctuary (MBNMS)

Project Description

- **Sector:** Water Supply
- **Lead Agency:** California Public Utilities Commission (CPUC)
- **Any Identifying Project Numbers**: NA
- **Location:** Monterey County, California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Ventura FO
- **Status of FWS Involvement:** FWS has been involved in informal ESA section 7 consultation for several years. FWS issued a concurrence letter for an initial testing phase of the project on July 7, 2014. Currently reviewing portions of the National Environmental Policy Act/California Environmental Quality Act (NEPA/CEQA) document for the full-scale project (available for public comment until March 29, 2017), but do not expect to make formal comments under NEPA/CEQA. FWS available to consult informally, as needed, and awaits MBNMS's initiation of formal consultation pursuant to section 7 of the ESA.
- **Project Timeline:** MBNMS will likely initiate formal consultation in the spring of 2017, with FWS completing a biological opinion in the fall of 2017.

Major Infrastructure Project
2017

Project Name: California Flats Solar Project

Project Sponsor: California Flats Solar, LLC

Project Description

- **Sector:** Solar Energy
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers**: NA
- **Location:** Monterey and San Luis Obispo counties, California
- **Estimated Cost:** >$100 million
- **Other:** 280-megawatt photovoltaic solar generation facility on 2,363 acres.

FWS Involvement

- **Region:** 8
- **Field Office:** Ventura FO
- **Status of FWS Involvement:** FWS issued a Biological Opinion on November 19, 2015, under ESA section 7 consultation. Incidental take was exempted for construction, maintenance, and operations of the project through 2018, which is the date when the ACOE determined their jurisdictional authority ends. California Flats Solar, LLC has developed a low-effect habitat conservation plan (HCP) and has applied for an Incidental Take Permit (ITP) for incidental take of four species during the 30-year operation and maintenance of the project. FWS has reviewed the HCP and supporting documents and has made a preliminary determination that issuance of the permit qualifies for a categorical exclusion under NEPA. The HCP mitigation strategy of avoidance and minimization of effects to species, and habitat preservation and management meets the standard for ITP issuance.
- **Project Timeline:** FWS is working to publish the Notice of Availability of the proposed HCP in the Federal Register for public comment with anticipated publication in the spring or summer 2017. FWS expects to have all compliance documents complete and a permit decision approximately one month after completion of the public review period, which is anticipated to be completed by late summer or fall 2017.

Major Infrastructure Project
2017

Project Name: California High Speed Rail, Palmdale to Burbank Section

Project Sponsor: California High Speed Rail Authority, Federal Rail Authority

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Rail Authority
- **Any Identifying Project Numbers**: NA
- **Location:** Los Angeles County, California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Carlsbad FO
- **Status of FWS Involvement:** FWS has been actively coordinating with the California High Speed Rail Authority prior to initiating consultation to address potential effects to multiple federally listed species.
- **Project Timeline:** Section 7 consultation to be initiated in 2017.

Major Infrastructure Project
2017

Project Name: California High-Speed Rail

Project Sponsor: Federal Railroad Administration (on behalf of the California High Speed Rail Authority)

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Railroad Administration
- **Any Identifying Project Numbers:**
- **Location:** Central California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Sacramento, Ventura and Carlsbad FOs
- **Status of FWS Involvement:** The project is comprised of 8 segments. Biological opinions were issued for two segments: Merced to Fresno, and Fresno to Bakersfield. The six additional segments are in planning. The system is being constructed under design-build contracts, which defers final design until later in the process. As a result, our initial biological opinions are issued when designs are only 10-15 percent complete for each segment. This approach leads to substantive design changes and multiple consultation reinitiations as design plans are finalized along each segment. FWS and the Authority are working on revised biological assessments for the first two segments to address species and impacts not accounted for in the initial biological opinions; reinitiation will begin in FY2017.
- **Project Timeline:** The schedule for completing the biological opinions for the remaining 6 segments is not known at this time. Technical assistance for these segments is ongoing. Biological assessments for the San Jose and San Francisco segments are expected in spring/summer 2018. FWS involvement will be ongoing

Major Infrastructure Project
2017

Project Name: California WaterFix

Project Sponsor: Bureau of Reclamation and California Department of Water Resources (CDWR)

Project Description

- **Sector**: Water Supply
- **Lead Agency:** Bureau of Reclamation
- **Any Identifying Project Numbers**: NA
- **Location:** California
- **Estimated Cost:** >$100 million
- **Other:** CDWR proposes to construct, operate, and maintain new water conveyance facilities in the Sacramento–San Joaquin River Delta and modify operations of existing facilities.

FWS Involvement

- **Region:** 8
- **Field Office:** San Francisco Bay-Delta FO
- **Status of FWS Involvement:** Expecting to finalize a programmatic biological opinion in 2017.
- **Project Timeline:** Section 7 consultations and ongoing technical assistance through the end of the construction phase (2030).

Major Infrastructure Project
2017

Project Name: Clark, Lincoln, and White Pine Counties Groundwater Development Project

Project Sponsors: Southern Nevada Water Authority (SNWA)

Project Description

- **Sector:** Water Supply
- **Lead Agency:** Bureau of Land Management
- **Any Identifying Project Numbers**: NA
- **Location:** Clark, Lincoln, and White Pine counties, Nevada
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Southern Nevada FO
- **Status of FWS Involvement:** FWS issued a Biological and Conference Opinion in November 2012 pursuant to section 7 of the Endangered Species Act. This Opinion had both programmatic (for future groundwater development and lateral pipelines) and project-specific (for main pipeline) consultation elements. BLM will consult with FWS on tiered aspects of the project before groundwater development occurs. SNWA has indicated that they will be developing a Migratory Bird Conservation Plan in conjunction with FWS, and a final, approved plan will be completed before the Notice to Proceed is issued. FWS was a Cooperating Agency in the programmatic National Environmental Policy Act (NEPA) process for this project, and will likely continue to work closely with BLM, when the latter moves into tiered NEPA for the lateral pipelines and groundwater development. Additionally, FWS is one of four DOI bureaus working with SNWA to develop and implement monitoring plans for future groundwater development under DOI-SNWA Stipulated Agreements related to SNWA's water rights.
- **Project Timeline:** Project timeline is uncertain. The award of SNWA's water rights has been remanded back to the Nevada State Engineer for administrative hearings, scheduled for fall 2017. Resolution of litigation is still pending on BLM's December 2012 Record of Decision, and the subsequent issuance of a Right-of-Way to SNWA for the main pipeline.

Major Infrastructure Project
2017

Project Name: Desert Quartzite Solar Energy Project

Project Sponsor: Desert Quartzite, LLC (a wholly owned subsidiary of First Solar Development Inc.)

Project Description

- **Sector:** Solar Energy
- **Lead Agency:** Bureau of Land Management (BLM)
- **Any Identifying Project Numbers**: NA
- **Location:** Riverside County, California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Carlsbad and Palm Springs FOs
- **Status of FWS Involvement:** FWS is coordinating with BLM and providing ongoing technical assistance as warranted on biological survey protocols and reports, and review of the project-specific Bird and Bat Conservation Strategy. FWS anticipates a request for formal consultation under section 7 of the ESA for up to four different species: desert tortoise, southwestern willow flycatcher**,** yellow-billed cuckoo, and Ridgway's rail
- **Project Timeline:** Pre-project environmental surveys complete with the Administrative Draft Environmental Impact Statement/Report in progress. Projected completion date for the Final EIS/EIR is early 2018. Initiation of formal section 7 consultation with FWS is anticipated in 2018. Includes environmental compliance monitoring for a minimum of two years post-construction.

Major Infrastructure Project
2017

Project Name: Dry Lake Solar Energy Zone Project

Project Sponsors: First Solar, NV Energy, Invenergy

Project Description

- **Sector:** Solar Energy
- **Lead Agency:** Bureau of Land Management (BLM)
- **Any Identifying Project Numbers**: NA
- **Location:** Clark County, Nevada
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Southern Nevada FO
- **Status of FWS Involvement:** Section 7 consultation has been completed on all projects, and FWS continues to track mitigation implementation and compliance. Other ongoing FWS involvement includes continuing to monitor translocated desert tortoises on the Playa Solar Project as well as pre-construction coordination, tortoise translocation and monitoring at other projects.
- **Project Timeline:** Playa Solar 80 percent complete; others to begin construction in 2017.

Major Infrastructure Project
2017

Project Name: El Camino Real Bridge Replacement Project in San Diego County

Project Sponsor: California Department of Transportation (Caltrans)

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers**: NA
- **Location:** San Diego County, California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Carlsbad FO
- **Status of FWS Involvement:** Caltrans initiated Endangered Species Act section 7 formal consultation with FWS on this project to address potential effects to federally endangered least Bell's vireo and light-footed Ridgway's rail.
- **Project Timeline:** Caltrans initiated consultation on this project in March 2016. FWS will provide the amended Biological Opinion to Caltrans, if they regain their delegated federal authorities, or to the Federal Highway Administration upon request.

Major Infrastructure Project
2017

Project Name: Golden Hills North Wind Energy Center Repowering Project

Project Sponsor: NextEra Energy Resources

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers**: NA
- **Location:** Alameda County, California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Sacramento FO
- **Status of FWS Involvement:** The field office is currently working out the project details with the ACOE, including finalizing the project description and conservation measures.
- **Project Timeline:** Unknown at this time, but the formal consultation is likely to be completed in FY2017. The timeline depends on the ACOE finalizing the project description.

Major Infrastructure Project
2017

Project Name: Highway 1 HOV Lanes

Project Sponsor: California Department of Transportation (Caltrans)

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers**: NA
- **Location:** Santa Cruz County, California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Ventura FO
- **Status of FWS Involvement:** Currently in the technical assistance phase. The biological assessment and request for formal consultation is expected late spring or early summer 2017.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: I Street Bridge Replacement Project

Project Sponsor: California Department of Transportation (Caltrans), City of Sacramento, City of West Sacramento

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers**: NA
- **Location:** Sacramento and Yolo counties, California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** San Francisco Bay-Delta FO
- **Status of FWS Involvement:** Formal Consultation. Biological Opinion drafted, changes added by Caltrans need to be incorporated. Waiting on agreement between Caltrans and Federal Highway Administration to be able to finalize and issue Biological Opinion
- **Project Timeline:** Issuance of Biological Opinion is on hold due to agreement issues between Federal Highway Administration and Caltrans.

Major Infrastructure Project
2017

Project Name: I-5 North Coast Corridor San Elijo Lagoon Restoration Project in San Diego County

Project Sponsor: San Elijo Lagoon Conservancy, California Department of Transportation, San Diego Association of Governments

Project Description

- **Sector:** Transportation/Restoration
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers**: NA
- **Location:** San Diego County, California
- **Estimated Cost:** >$100 million
- **Other:** The project is mitigation for the I-5 North Coast Corridor Project (I-5 NCC), and the California Coastal Commission permit for the I-5 NCC Project requires that the restoration project proceed concurrently with the transportation project.

FWS Involvement

- **Region:** 8
- **Field Office:** Carlsbad FO
- **Status of FWS Involvement:** A request for formal ESA section 7 consultation was received from the USACOE on February 16, 2017, to address potential effects to the following federally listed species: western snowy plover, California least tern, light-footed Ridgway's rail, southwestern willow flycatcher, and coastal California gnatcatcher.
- **Project Timeline:** The Biological Opinion is anticipated to be completed by June 30, 2017.

Major Infrastructure Project
2017

Project Name: Interstate 10 Corridor Project (I-10 CP)

Project Sponsor: Caltrans and San Bernardino County Transportation Authority (SBCTA)

Project Description

- **Sector:** Transportation
- **Lead Agency:** Caltrans, on behalf of Federal Highway Administration (FHWA)
- **Any Identifying Project Numbers**: NA
- **Location:** San Bernardino County, California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Carlsbad and Palm Springs FOs
- **Status of FWS Involvement:** FWS expecting to conclude informal Endangered Species Act section 7 consultation by concurring with a Caltrans/FHWA "not likely to adversely affect" determination for road widening and three of the interchange improvements. The fourth interchange (Pepper Avenue) will affect the endangered Delhi Sands flower-loving fly. There is a 2006 Biological Opinion that addressed the improvement of the Pepper Avenue interchange, but the project analyzed was not built. Caltrans requested reinitiation of consultation to address the revised interchange footprint. FWS will provide the amended Biological Opinion to Caltrans, once they regain their delegated federal authorities, or to the Federal Highway Administration upon request.
- **Project Timeline:** FWS received the informal consultation request letter on March 9, 2017, and expects to provide concurrence by the end of March 2017. Amending the Biological Opinion should conclude in May 2017.

Major Infrastructure Project
2017

Project Name: Last Chance Grade

Project Sponsor: California Department of Transportation (Caltrans)

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers**: NA
- **Location:** Del Norte County, California
- **Estimated Cost:** >$100 million
- **Other:** Located approximately 10 miles south of Crescent City, CA

FWS Involvement

- **Region:** 8
- **Field Office:** Arcata FO
- **Status of FWS Involvement:** Currently providing technical assistance on the proposed route alternatives, and attending regular meetings with Caltrans, other regulatory agencies, and Tribes to discuss potential impacts of the project alternatives to listed species and their habitats.
- **Project Timeline:** Earliest request for formal consultation is at least two years away depending on when the preferred alternative(s) is selected. Caltrans expects that all environmental permitting will take approximately 6-8 years to finalize.

Major Infrastructure Project
2017

Project Name: Los Vaqueros Expansion II (LVE II)

Project Sponsor: Bureau of Reclamation and Contra Costa Water District

Project Description

- **Sector**: Water Storage
- **Lead Agency:** Bureau of Reclamation
- **Any Identifying Project Numbers**: NA
- **Location:** Contra Costa **C**ounty, California
- **Estimated Cost:** >$100 million
- **Other:** Feasibility Study of proposed project to further enlarge Los Vaqueros Dam and Reservoir to provide additional water for Contra Costa County Water District and possibly others.

FWS Involvement

- **Region:** 8
- **Field Office:** San Francisco Bay-Delta FO
- **Status of FWS Involvement:** FWS has completed a final Fish and Wildlife Coordination Act §2(b) for the initial dam enlargement, the proposal for enlargement of the dam and reservoir will require an addendum to the existing Fish and Wildlife Coordination Act §2(b) Report. Reclamation will need to consult under §7 of the Endangered Species Act on the effects of the additional enlargement.
- **Project Timeline:** FWS should be providing a draft Fish and Wildlife Coordination Act §2(b) addendum for this project by the end of the fiscal year, after that to be determined.

Major Infrastructure Project
2017

Project Name: Lost Hills Solar

Project Sponsor: Consolidated Edison Development, Inc. (ConEd) through Consolidated Edison Development Lost Hills Solar, LLC

Project Description

- **Sector:** Solar Energy
- **Lead Agency:** NA
- **Any Identifying Project Numbers**: NA
- **Location:** Kern County , California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Sacramento FO
- **Status of FWS Involvement:** Con Ed is developing a Habitat Conservation Plan (HCP) and the Environmental Assessment, which are currently under Regional Solicitor review. Once Regional Solicitor review is completed, the documents will be submitted to the Federal Register for public review and comment. There will be a 30-day public review, followed by responses to comments and issuance of the Incidental Take Permit (ITP).
- **Project Timeline:** Estimated ITP issuance is June 2017.

Major Infrastructure Project
2017

Project Name: Measure M2 Habitat Conservation Plan

Project Sponsor: Orange County Transportation Authority

Project Description

- **Sector:** Transportation
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location:** Orange County, California
- **Estimated Cost:** >$100 million
- **Other:** The Measure M2 HCP addresses multiple freeway improvement projects in Orange County, CA.

FWS Involvement

- **Region:** 8
- **Field Office:** Carlsbad FO
- **Status of FWS Involvement:** The Final Environmental Impact Statement for the Measure M2 HCP is awaiting publication in the Federal Register, currently scheduled for late March 2017.
- **Project Timeline:** FWS will complete the Endangered Species Act Incidental Take Permit decision process by approximately May 1, 2017. Remaining analyses to complete for the FWS's permitting decision on the HCP include the Biological Opinion, Findings, and Record of Decision.

Major Infrastructure Project
2017

Project Name: New Bullards Bar Flood Control Outlet

Project Sponsor: California Department of Water Resources, Yuba County Water Agency

Project Description

- **Sector**: Flood Control
- **Lead Agency:** California Department of Water Resources
- **Any Identifying Project Numbers**: FERC Project Number 2246
- **Location:** Yuba County, California
- **Estimated Cost:** >$100 million
- **Other:** Yuba County Water Agency is proposing a New Flood Control Outlet at New Bullards Bar Dam.

FWS Involvement

- **Region:** 8
- **Field Office:** San Francisco Bay-Delta FO
- **Status of FWS Involvement:** . Ongoing as related to Federal Energy Regulatory Commission license.
- **Project Timeline:** Ongoing with current completion goal date of 2026.

Major Infrastructure Project
2017

Project Name: North-of-the-Delta Offstream Storage Investigation (NODOS or Sites Reservoir)

Project Sponsor: Bureau of Reclamation and the Sites Reservoir Joint Authority

Project Description

- **Sector**: Water Storage
- **Lead Agency:** Bureau of Reclamation
- **Any Identifying Project Numbers**: NA
- **Location:** Colusa County, California
- **Estimated Cost:** >$100 million
- **Other:** Feasibility Study of proposed project to construct a new 1.8 million acre-foot reservoir to inundate Antelope Valley, including the construction of nine saddle dams, a regulating reservoir, and a pipeline to the Sacramento River.

FWS Involvement

- **Region:** 8
- **Field Office:** San Francisco Bay-Delta FO
- **Status of FWS Involvement:** No contact with the project proponents since 2012. The proposed project will require Fish and Wildlife Coordination Act §2(b) Report and effects mitigation, formal consultation under §7 of the Endangered Species Act on the effects of the proposed project, and an eagle conservation plan under the Bald and Golden Eagle Protection Act.
- **Project Timeline:** No information at this time; to be determined, currently no project schedule has been provided to the FWS.

Major Infrastructure Project
2017

Project Name: Palen Solar Photovoltaic Project

Project Sponsor: Palen Solar III, LLC (a wholly owned subsidiary of EDF Renewable Energy)

Project Description

- **Sector:** Solar Energy
- **Lead Agency:** Bureau of Land Management (BLM)
- **Any Identifying Project Numbers**: NA
- **Location:** Eastern Riverside County, California (~10 miles east of Desert Center, CA)
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Carlsbad FO
- **Status of FWS Involvement:** FWS is coordinating with BLM and providing ongoing technical assistance as warranted for this project. Examples include review of biological survey protocols and reports, and review of the project-specific Bird and Bat Conservation Strategy. FWS anticipates a request for formal consultation under section 7 of the ESA for up to four species: desert tortoise, southwestern willow flycatcher**,** yellow-billed cuckoo, and Yuma clapper rail (Ridgway's rail).
- **Project Timeline:** Pre-project environmental surveys are complete. The Administrative Draft Supplemental Environmental Impact Statement/Report is under review by BLM and the cooperating agencies with initiation of formal consultation under section 7 of the ESA anticipated in late 2017. Include environmental compliance monitoring for a minimum of two years post-construction.

Major Infrastructure Project
2017

Project Name: Panoche Valley Solar Farm Project

Project Sponsor: Panoche Valley Solar, LLC

Project Description

- **Sector:** Solar Energy
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers**: NA
- **Location:** San Benito County, California
- **Estimated Cost:** >$100 million
- **Other:** 247-megawatt photovoltaic solar generation facility on 2,154 acres.

FWS Involvement

- **Region:** 8
- **Field Office:** Ventura FO
- **Status of FWS Involvement:** FWS issued a biological opinion under ESA section 7 on March 8, 2016. The biological opinion exempts incidental take for four species for construction, maintenance, and operation of the project for 30 years. On April 15, 2016, several environmental groups filed a lawsuit in the U.S. District Court alleging the FWS's biological opinion failed to utilize the best available scientific data and would jeopardize the recovery of the San Joaquin kit fox, blunt-nosed leopard lizard, and giant kangaroo rat. The court ruled against the plaintiff's request for a preliminary injunction. On October 25, 2016, the plaintiffs agreed to dismiss the case without prejudice while the ACOE is reinitiating section 7 consultation. FWS is coordinating with the Office of the Solicitor and Department of Justice during the reinitiation of consultation to address any potential legal concerns.
- **Project Timeline:** The ACOE requested reinitiation of formal consultation on December 12, 2016. The project is continuing construction during reinitiation. FWS is drafting a new Biological Opinion and is expected to complete the consultation in April 2017.

Major Infrastructure Project
2017

Project Name: Placer County Habitat Conservation Plan (HCP) and Natural Community Conservation Plan

Project Sponsors: Placer County Planning Department, Placer Resource Conservation District, City of Lincoln, Placer County Water Agency, and the South Placer Regional Transportation Authority

Project Description

- **Sector:** Water, Sewer, Electric, Gas, Roads, and Bridges.
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location:** Placer County , California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Sacramento FO
- **Status of FWS Involvement:** Endangered Species Act and National Environmental Policy Act compliance is underway. The Sponsors, State and Federal agencies are finalizing the draft HCP and draft Environmental Impact Statement; it is anticipated these will be noticed in the Federal Register for public review and comment in 2017.
- **Project Timeline:** Estimated the Incidental Take Permit will be issued in spring of 2018. Various projects will occur over a 50-year term. FWS and other State and Federal agencies that issue permits (FWS, USACOE, NMFS, California Department of Fish and Wildlife, etc.) related to the HCP will assist the Sponsors with implementation of their HCP over the 50-year permit term.

Major Infrastructure Project
2017

Project Name: Placer State Route 65 Capacity and Operational Improvements

Project Sponsor: California Department of Transportation (Caltrans), Federal Highway Administration

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Highway Administration
- **Any Identifying Project Numbers**: NA
- **Location:** Placer County, CA
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Sacramento FO
- **Status of FWS Involvement:** Currently providing technical assistance. Formal section 7 consultation to begin later in 2017. Biological Assessment not yet received.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: Repair of Oroville Dam/Spillway from February 2017 Damage

Project Sponsor: California Department of Water Resources

Project Description

- **Sector**: Hydropower/Restoration
- **Lead Agency:** California Department of Water Resources
- **Any Identifying Project Numbers**: FERC Project Number 2100
- **Location:** Butte County, California
- **Estimated Cost:** >$100 million
- **Other:** Oroville Dam and Spillway sustained significant damage in February 2017 during flood control operations. Emergency repairs are underway. Design and planning activities for a long-term fix are expected to occur later this year.

FWS Involvement

- **Region:** 8
- **Field Office:** San Francisco Bay-Delta FO
- **Status of FWS Involvement:** Repair work is underway now and will be handled through Endangered Species Act emergency consultation procedures. Anticipate long-term repairs to be subject to Section 7 consultation.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: Sacramento Municipal Utility District Operations and Maintenance Habitat Conservation Plan (HCP)

Project Sponsors: Sacramento Municipal Utility District

Project Description

- **Sector:** Water, Sewer, Electric, Gas, Roads, and Bidges.
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location:** Sacramento County , California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Sacramento FO
- **Status of FWS Involvement:** SMUD and the FWS are preparing the draft HCP and draft Environmental Impact Statement.
- **Project Timeline:** FWS estimates issuing the Incidental Take Permit in winter of 2018. Various projects will occur over a 30-year permit term. FWS will assist the permittee with implementation of its HCP over the 30-year permit term.

Major Infrastructure Project
2017

Project Name: Sacramento River Bank Protection Project

Project Sponsor: State of California's Central Valley Flood Protection Board

Project Description

- **Sector:** Restoration/Flood Control
- **Lead Agency:** U.S. Army Corps of Engineers
- **Any Identifying Project Numbers**: NA
- **Location:** Sacramento River, California
- **Estimated Cost:** >$100 million
- **Other:** The project, authorized in 1960, is a long-term flood risk management project designed to enhance public safety, and help protect property along the Sacramento River and its tributaries. The Sacramento River has a history of flooding due to a number of contributing factors. The goal of the project is to evaluate levees bordering the river, and reduce stream bank erosion along them to minimize the threat of flooding. The original authorization approved rehabilitation of 430,000 linear feet of levee. The 1974 Water Resources Development Act added 405,000 linear feet of bank protection, and a 2007 bill authorized another 80,000 linear feet for a total of 915,000 linear feet.

FWS Involvement

- **Region:** 8
- **Field Office:** Sacramento FO
- **Status of FWS Involvement: FWS** involvement includes ESA section 7 consultation, and preparation of a Fish and Wildlife Coordination Act (FWCA) report. The draft FWCA report was provided October 12, 2012.
- **Project Timeline:** A revised Biological Assessment for the last 80,000 linear foot addition to the project was received on January 26, 2017. FWS anticipates completing the section 7 consultation by the end of the calendar year 2017. The final FWCA report is expected to be completed in early 2018.

Major Infrastructure Project
2017

Project Name: San Dieguito Double Track and Platform in San Diego County

Project Sponsor: Federal Railroad Administration, San Diego Association of Governments

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Railroad Administration
- **Any Identifying Project Numbers**: NA
- **Location:** San Diego County, California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Carlsbad FO
- **Status of FWS Involvement:** FWS conducting pre-ESA section 7 consultation coordination with the project proponents regarding potential effects to federally listed species, including the following: western snowy plover, California least tern, light-footed Ridgway's rail, and coastal California gnatcatcher.
- **Project Timeline:** Formal consultation has not been initiated, but FWS anticipates that it will be initiated within the next 18 months.

Major Infrastructure Project
2017

Project Name: San Francisco Bay Clean Water, Pollution Prevention, and Habitat Restoration Measure (Measure AA)

Project Sponsor: San Francisco Bay Restoration Authority

Project Description

- **Sector**: Restoration
- **Lead Agency:** Unknown
- **Any Identifying Project Numbers**: NA
- **Location:** San Francisco Bay, California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** San Francisco Bay-Delta FO
- **Status of FWS Involvement:** Development of guidelines; the Tidal Marsh Recovery Implementation Team is assisting in development of BMPs and restoration proposals.
- **Project Timeline:** 20 years (2016 to 2037).

Major Infrastructure Project
2017

Project Name: San Joaquin River Restoration Program (SJRRP)

Project Sponsor: Bureau of Reclamation, National Marine Fisheries Service, U.S. Fish and Wildlife Service, California Department of Fish and Wildlife, and California Department of Water Resources

Project Description

- **Sector**: Restoration
- **Lead Agency:** Bureau of Reclamation
- **Any Identifying Project Numbers**: NA
- **Location:** San Joaquin River, California
- **Estimated Cost:** >$100 million
- **Other:** Program implementing the 2006 NRDC, et al v. Kirk Rodgers Settlement, providing for the restoration of Chinook salmon to the San Joaquin River.

FWS Involvement

- **Region:** 8
- **Field Office:** San Francisco Bay-Delta FO
- **Status of FWS Involvement:** Ongoing as an implementing partner in the Settlement.
- **Project Timeline:** Ongoing with current completion goal date of 2030.

Major Infrastructure Project
2017

Project Name: San Luis Low Point Improvement Project (SLLPIP)

Project Sponsor: Bureau of Reclamation and Santa Clara Valley Water District

Project Description

- **Sector**: Water Storage
- **Lead Agency:** Bureau of Reclamation
- **Any Identifying Project Numbers**: NA
- **Location:** Santa Clara County, California
- **Estimated Cost:** >$100 million
- **Other:** Feasibility Study that includes proposed project to enlarge Sisk Dam and San Luis Reservoir to provide additional south of the Delta water storage and reduce the effects of low point water quality for Santa Clara Valley Water District.

FWS Involvement

- **Region:** 8
- **Field Office:** San Francisco Bay-Delta FO
- **Status of FWS Involvement:** FWS has completed a draft Fish and Wildlife Coordination Act §2(b) for the initial proposed project alternatives, additional alternatives have been added since that time. FWS will need to revise the existing draft Fish and Wildlife Coordination Act §2(b) Report to include the two additional alternatives. Reclamation will need to consult under section 7 of the Endangered Species Act on the effects of the proposed project.
- **Project Timeline:** The FWS should be providing a draft Fish and Wildlife Coordination Act §2(b) Report for this project by the end of the fiscal year, after that to be determined.

Major Infrastructure Project
2017

Project Name: San Luis Transmission Project

Project Sponsor: Western Area Power Administration

Project Description

- **Sector:** Transmission
- **Lead Agency:** Western Area Power Administration
- **Any Identifying Project Numbers**: NA
- **Location:** Alameda, San Joaquin, Stanislaus, and Merced counties, California
- **Estimated Cost:** >$100 million
- **Other:** Transmission line is 94 miles in length

FWS Involvement

- **Region:** 8
- **Field Office:** Sacramento FO
- **Status of FWS Involvement:** FWS issued a Draft Biological Opinion to WAPA on March 2, 2017, for their review and comment.
- **Project Timeline:** A final Biological Opinion will be issued to WAPA by March 18, 2017.

Major Infrastructure Project
2017

Project Name: SDG&E/SoCalGas Rainbow–San Diego 36-inch (Line 3602) Natural Gas Pipeline and Pipeline 1600 Safety Enhancement Project

Project Sponsor: San Diego Gas and Electric Company

Project Description

- **Sector:** Pipeline
- **Lead Agency:** California Public Utilities Commission
- **Any Identifying Project Numbers**: NA
- **Location:** San Diego County, CA
- **Estimated Cost:** >$100 million
- **Other:** The project is replacement of an old gas line running from Rainbow, California to Marine Corps Air Station Miramar.

FWS Involvement

- **Region:** 8
- **Field Office:** Carlsbad FO
- **Status of FWS Involvement:** Pre-project coordination and technical assistance with SDG&E, California Public Utilities Commission, and Marine Corps Air Station Miramar.
- **Project Timeline:** This is a new project; FWS has met with both SDG&E and CPUC during pre-consultation coordination for the project. It is anticipated a request for formal consultation will be received in 2017.

Major Infrastructure Project
2017

Project Name: Shasta Lake Water Resource Investigation (SLWRI or Shasta Raise)

Project Sponsor: Bureau of Reclamation

Project Description

- **Sector**: Hydropower/Water Storage
- **Lead Agency:** Bureau of Reclamation
- **Any Identifying Project Numbers**: NA
- **Location:** Shasta County, California
- **Estimated Cost:** >$100 million
- **Other:** Federal feasibility study of a proposed project to enlarge Shasta Dam and Shasta Reservoir.

FWS Involvement

- **Region:** 8
- **Field Office:** San Francisco Bay-Delta FO
- **Status of FWS Involvement:** FWS has completed a final draft Fish and Wildlife Coordination Act §2(b) Report for the proposed project. If the proposed project is authorized by Congress, then the Fish and Wildlife Coordination Act §2(b) Report will be finalized, including recommendations for mitigation. Reclamation will need to initiate formal consultation under §7 of the Endangered Species Act, and the FWS will provide a Biological Opinion for the project.
- **Project Timeline:** Unknown at this time.

Major Infrastructure Project
2017

Project Name: Snow Mountain Solar Energy Project

Project Sponsors: First Solar and Las Vegas Paiute Tribe

Project Description

- **Sector:** Solar Energy
- **Lead Agency:** Bureau of Indian Affairs
- **Any Identifying Project Numbers**: NA
- **Location:** Clark County, Nevada (Las Vegas Paiute Reservation)
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Southern Nevada FO
- **Status of FWS Involvement:** Technical assistance and pre-ESA section 7 consultation activities, including desert tortoise survey and mitigation planning for this project on hold at this time.
- **Project Timeline:** Specific dates not available; project on hold awaiting purchase power agreement, but anticipate formal section 7 consultation will begin by the end of calendar year 2017.

Major Infrastructure Project
2017

Project Name: Solano County Habitat Conservation Plan (HCP)

Project Sponsors: Solano County Water Agency, City of Vacaville, City of Fairfield, Suisun City, City of Vallejo, Solano County Irrigation District, Maine Prairie Water District, City of Rio Vista, City of Dixon, Reclamation District 2068, Dixon Resource Conservation District (RCD), Dixon Regional Watershed Joint Power's Authority, Vallejo Sanitation and Flood Control District, and Fairfield-Suisun Sewer District

Project Description

- **Sector:** Water, Sewer, Electric, Gas, Roads, Bridges, and Flood Control
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location:** Solano County , California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Sacramento FO
- **Status of FWS Involvement:** Sponsors and the FWS are finalizing the draft HCP and draft Environmental Impact Statement.
- **Project Timeline:** FWS estimates issuance of the Incidental Take Permit in fall of 2018. Various projects will occur over a 50-year term. FWS will assist the Sponsors with implementation of their HCP over the 50-year permit term.

Major Infrastructure Project
2017

Project Name: Sorrento to Miramar Double Track Phase 2 in San Diego County

Project Sponsor: Federal Railroad Administration, San Diego Association of Governments

Project Description

- **Sector:** Transportation
- **Lead Agency:** Federal Railroad Administration
- **Any Identifying Project Numbers**: NA
- **Location:** San Diego County, California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Carlsbad FO
- **Status of FWS Involvement:** Formal section 7 consultation initiated on June 12, 2015, to address potential effects to the following federally listed species: coastal California gnatcatcher, least Bell's vireo, southwestern willow flycatcher, San Diego fairy shrimp, and Riverside fairy shrimp.
- **Project Timeline:** The Biological Opinion is anticipated to be completed no later than June 2017.

Major Infrastructure Project
2017

Project Name: South Bay Salt Pond Restoration Project, Phase 2

Project Sponsor: Don Edwards San Francisco Bay National Wildlife Refuge (Refuge) and the California State Coastal Conservancy

Project Description

- **Sector**: Restoration
- **Lead Agency:** U.S. Fish and Wildlife Service and California Department of Fish and Wildlife
- **Any Identifying Project Numbers**: NA
- **Location:** San Francisco, California
- **Estimated Cost:** >$100 million
- **Other:** Largest wetland restoration project on the West Coast, encompassing 15,100 acres of the former Cargill Inc. salt ponds in South San Francisco Bay, which were acquired by a public-private partnership for restoration and management by the FWS and the California Department of Fish and Wildlife in 2003. The Refuge and the California State Coastal Conservancy propose to continue implementing the South Bay Salt Pond Restoration Project through the construction, operation, and maintenance of selected ponds as part of Phase 2 project activities that cover approximately 2,200 acres on the Refuge.

FWS Involvement

- **Region:** 8
- **Field Office:** San Francisco Bay-Delta FO
- **Status of FWS Involvement:** Formal consultation: Review of Biological Assessment, issuance of Biological Opinion
- **Project Timeline:** Formal consultation initiated on February 21, 2017; biological opinion due by July 6, 2017.

Major Infrastructure Project
2017

Project Name: South Sacramento County Habitat Conservation Plan (HCP)

Project Sponsors: County of Sacramento, City of Galt, City of Rancho Cordova, the Sacramento County Water Agency and the Capital Southeast Connector Joint Powers Authority

Project Description

- **Sector:** Water, Sewer, Electric, Gas, Roads, and Bridges.
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location:** Sacramento County , California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Sacramento FO
- **Status of FWS Involvement:** The draft HCP and draft Environmental Impact Statement have been completed and will be ready for public review following publication of the Notice of Availability (NOA) in the Federal Register.
- **Project Timeline:** The NOA will be submitted for approval for publication in the Federal Register in March or April 2017. FWS estimates issuing permits in winter of 2018. Various projects will occur over a 30- or 50-year term. FWS will assist the Sponsors with implementation of their HCP over the permit term.

Major Infrastructure Project
2017

Project Name: Southern California Edison (SCE) Company Transmission Line Rating Remediation Project, Rector-Vestal No. 1 & 2, Magunden-Vestal No. 1 & 2, Antelope-Magunden No. 1

Project Sponsor: Southern California Edison

Project Description

- **Sector:** Transmission
- **Lead Agency:** Unknown
- **Any Identifying Project Numbers**: NA
- **Location:** Tulare, Kern and Los Angeles counties , California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Sacramento FO
- **Status of FWS Involvement:** FWS is providing technical assistance on the project staging, activities, alignment, and avoidance and minimization measures.
- **Project Timeline:** Completion expected in 2018.

Major Infrastructure Project
2017

Project Name: SR-241 SR-91 Express Lane Connectors Project in Orange County

Project Sponsor: Transportation Corridor Agencies, California Department of Transportation

Project Description

- **Sector:** Transportation
- **Lead Agency:** California Department of Transportation
- **Any Identifying Project Numbers**: NA
- **Location:** Orange County, California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Carlsbad FO
- **Status of FWS Involvement:** A request for formal ESA section 7 consultation was received from Caltrans on January 3, 2017, to address potential effects to the federally threatened coastal California gnatcatcher.
- **Project Timeline:** The Biological Opinion will be completed in May 2017. FWS will provide the amended Biological Opinion to Caltrans, if they regain their delegated federal authorities, or the Federal Highway Administration upon request.

Major Infrastructure Project
2017

Project Name: Strauss Wind Energy Project (formerly Lompoc Wind Energy Project and Cabrillo Wind Project)

Project Sponsor: Bay Ware Wind, LLC

Project Description

- **Sector:** Wind Energy
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location:** Santa Barbara County, California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Ventura FO
- **Status of FWS Involvement:** In December 2016, Bay Ware and its consultant (Sapphos Environmental) initiated coordination with Region 8 Migratory Birds, and the Ventura Fish and Wildlife Office which is ongoing.
- **Project Timeline:** Bay Ware contacted the FWS Region 8 Migratory Birds office regarding avian studies in the area in December 2016. The Ventura Fish and Wildlife Office was involved in previous iterations of the project with a different sponsor. Actual project timelines are unknown at this time.

Major Infrastructure Project
2017

Project Name: Upper San Joaquin River Basin Storage Investigation (USJRBSI or Temperance Flat Reservoir)

Project Sponsor: Bureau of Reclamation and San Joaquin Valley Water Infrastructure Authority

Project Description

- **Sector**: Water Storage
- **Lead Agency:** Bureau of Reclamation
- **Any Identifying Project Numbers**: NA
- **Location:** Fresno and Madera counties, California
- **Estimated Cost:** >$100 million
- **Other:** Federal feasibility study of proposed project to build a new dam on the San Joaquin River upstream of Millerton Reservoir and inundate the San Joaquin River Gorge creating the Temperance Flat Reservoir.

FWS Involvement

- **Region:** 8
- **Field Office:** San Francisco Bay-Delta FO
- **Status of FWS Involvement:** FWS has completed a final draft Fish and Wildlife Coordination Act §2(b) Report for the proposed project. If the proposed project is authorized by Congress, then the Fish and Wildlife Coordination Act §2(b) Report will be finalized, including recommendations for mitigation. Reclamation will need to initiate formal consultation under §7 of the Endangered Species Act, and the FWS will provide a Biological Opinion for the project.
- **Project Timeline:** To be determined, currently no project schedule has been provided to FWS.

Major Infrastructure Project
2017

Project Name: Valley Electric Solar Energy Project

Project Sponsors: Valley Electric Association

Project Description

- **Sector:** Solar Energy
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location:** Nye County, NV (Pahrump area)
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Southern Nevada FO
- **Status of FWS Involvement:** HCP finalized and Incidental Take Permit issued. Construction complete. FWS involved in working with Valley Electric Association to develop a study to determine suitability of solar project sites for desert tortoises after construction and implement other mitigation to include tortoise monitoring and habitat restoration.
- **Project Timeline:** Specific dates not available; anticipate working with sponsor for at least the next five years.

Major Infrastructure Project
2017

Project Name: Yellow Pine Solar Project

Project Sponsors: Nextera

Project Description

- **Sector:** Solar Energy
- **Lead Agency:** Bureau of Land Management (BLM)
- **Any Identifying Project Numbers**: NA
- **Location:** Clark County, Nevada
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Southern Nevada FO
- **Status of FWS Involvement:** Pre-section 7 consultation activities, including desert tortoise survey and mitigation planning.
- **Project Timeline:** Specific dates not available, but anticipate consultation will begin by the end of calendar year 2017.

Major Infrastructure Project
2017

Project Name: Yolo County Habitat Conservation Plan (HCP) and Natural Community Conservation Plan

Project Sponsors: Yolo County, City of Davis, City of West Sacramento, City of Winters, and City of Woodland.

Project Description

- **Sector:** Water, Sewer, Electric, Gas, Roads, and Bridges
- **Lead Agency:** U.S. Fish and Wildlife Service
- **Any Identifying Project Numbers**: NA
- **Location:** Yolo County , California
- **Estimated Cost:** >$100 million
- **Other:** NA

FWS Involvement

- **Region:** 8
- **Field Office:** Sacramento FO
- **Status of FWS Involvement:** The draft HCP and draft Environmental Impact Statement have been completed and will be ready for public review following completion of review by FWS Region 8, and subsequent publication of a Notice of Availability (NOA) in the Federal Register.
- **Project Timeline:** FWS anticipates that the NOA will be submitted for approval for publication in the Federal Register in March or April 2017. FWS estimates issuing the Incidental Take Permit in fall of 2018. Various projects will occur over a 50-year term. FWS and the California Department of Fish and Wildlife will assist the Sponsors with implementation of their HCP over the 50-year permit term.

FWS/D/XXXXXX

Memorandum

To: Service Directorate

From: Director

Subject: Required Correspondence Review – submitting items to the Document Tracking System Early Action Reporting database (DTS EAR)

Per the Secretary of Interior's April 12, 2017 memorandum, "Managing Grants, Cooperative Agreements, and Other Significant Decisions," bureau heads and office directors are required to report proposed Records of Decision (RODs) or other decisions with nationwide, regional, or statewide impact to the Office of the Secretary to enable an assessment of the overall functioning of the Department's critical programs. A copy of the memorandum communicating this new requirement is attached (attachment A).

Additionally, Regional and Headquarter (HQ) Programs should alert the Director's Office of any actions that may be: 1) controversial with stakeholders (any type of project or action), or 2) likely to add significant cost or delay to infrastructure, energy, or border projects that are priorities of this Administration. The objective in both circumstances is to give the Director's office advance notification of actions that would likely rise to the attention of the Secretary.

The U.S. Fish and Wildlife Service (FWS) has created a new database in the Document Tracking System (DTS) to facilitate the submission of materials to both the Office of the Secretary and the Director's Office. The *Early Action Request* (EAR) database is an early review tool that can be used to obtain Director's Office or Departmental review and surname for the actions outlined below. This memorandum offers guidance on what types of information should seek review, as well as submission instructions.

1) Items for Review by the Office of the Secretary

The procedures outlined below are temporary and are being implemented to assist the Secretary in understanding how each agency makes important decisions to advance the mission of the Department of the Interior, and to ensure coordination with the Office of Communications for significant announcements.

In accordance with the April 12, 2017, Secretarial memorandum, proposed RODs and proposed decisions that are not termed "ROD" but that have nationwide, regional, or statewide impact shall be submitted to the Secretary prior to issuance. All materials should be uploaded to the DTS EAR database via their respective Regional or HQ program and routed for Secretarial review, through the Director and Assistant Secretary. A decision should not be issued until the Office of the Secretary has reviewed the report and provided clearance.

For each uploaded DTS EAR record for Secretarial review, please include a Correspondence Memo with the following information (Attachment B):

1. Originating office
2. Title of decision document
3. One paragraph summary of proposed decision
4. Need and deadline (if any) for issuance
5. Positions of affected stakeholders. Highlight whether the decision is potentially controversial.
6. Other relevant considerations

Each DTS package should include, as appropriate, the draft action or decision document. Given the high volume of decision documents being reviewed by the Deputy Secretary's office, please build in appropriate time (potentially several weeks) into your planning.

2) Items for Review by the Director's Office

Items that are controversial with stakeholders or likely to add significant cost or delay to infrastructure, energy, or border projects that are priorities of this Administration will likely rise to the attention of the Secretary. We ask that you please identify these actions and submit them to the Director's Office as an early alert.

The starting point in identifying infrastructure, energy, or border projects that are priorities of this Administration is the list of "major infrastructure projects" that each Region submitted in mid-March 2017 (Attachment C).

Please note that not all Service actions on infrastructure, energy, or border projects need to be reviewed by the Director's office before transmittal. The vast majority of actions on these projects can and should proceed without review by the Director's office. Regional and HQ programs should exercise their judgment in identifying projects or actions that may be controversial. The sensitivity could be related to the species affected (e.g., Mexican wolf, red wolf, greater sage-grouse, manatee), the type of project (e.g., border wall, pipeline), or the political attention received to date (e.g., departmental, gubernatorial, congressional).

Director's Office early alerts should include a briefing paper along with any relevant correspondence or documents. All materials should be uploaded to the DTS EAR database via

their respective Regional or HQ program and routed for Director's Office review. A decision should not be issued until the Director's Office has reviewed and responded. Every effort will be made to respond to early alerts in a timely manner.

If you have questions about either of these review procedures, or need assistance in follow up on any submittals, please contact Charisa Morris, Chief of Staff, at (202) 208-3843.

THE SECRETARY OF THE INTERIOR
WASHINGTON

APR 17 2017

Memorandum

To: Assistant Secretaries
Heads of Bureaus and Office Directors

From: Secretary

Subject: Managing Grants, Cooperative Agreements, and Other Significant Decisions

A hallmark of my management of the Department of the Interior (Department) will be empowering local managers to make responsible decisions. Local managers are closest to the public we serve and to the precious resources we manage on their behalf. I also have a duty to learn about the Department's operations as I take the helm of the ship. Only by understanding the varied operations will I be able to lead this great Department in fulfilling its important mission on behalf of the American people.

The Department annually distributes $5.5 billion in grants and cooperative agreements to a variety of grantees and cooperators to advance mission objectives. In order to help me to understand the immense impact grants and cooperative agreements have on the mission delivery of the Department, I am directing implementation of the following temporary procedures for processing grants and cooperative agreements:

> Effective immediately, bureau heads and office directors will use the attached template to report all planned Fiscal Year (FY) 2017 grants and cooperative agreements of $100,000 or more before final award. The reports should be submitted through the Assistant Secretaries to Mr. James Cason, who has been delegated the authority of the Deputy Secretary. The Office of Acquisition and Property Management will assist Mr. Cason in reviewing these reports. No grants should be awarded until the review has been completed. You will be notified about your clearance to proceed with awards following this review.

In addition, to better assess the overall functioning of the Department's critical programs:

> Each bureau head and office director shall ensure that their office obtains proposed records of decisions (RODs) and uses the attached template to report on proposed decisions prior to issuance. Proposed decisions that are not termed "ROD" but have nationwide, regional, or statewide impact shall also be reported using the template. All reports should be submitted to Mr. Cason. A decision should not be issued until he has reviewed the report and provided clearance.

The above procedures are temporary and are being implemented to assist me in understanding how we make important decisions to advance the mission of the Department, assess how we are

aligning our grants and cooperative agreements to Department priorities, and to assure coordination with the Office of Communications for significant announcements. The review and processing of grants, cooperative agreements, and RODs will return to their regular order as soon as possible.

Director, PAM

Template for Data Call on Fiscal Year 2017 Grants and Cooperative Agreement Awards

The Department of the Interior leadership is establishing a new process, as of April 10, 2017, for reviewing all planned Fiscal Year (FY) 2017 grants and cooperative agreements of $100,000 or more before final award. The purpose is to better understand priorities being addressed, opportunities for addressing new priorities, and for significant announcements. Please use the following template to provide information for each grant or cooperative agreement totaling $100,000 or more to be awarded in FY 2017. Please submit the information to Mr. Jim Cason as you prepare grants and cooperative agreements for award, following clearance through bureau heads and assistant secretaries. You will be notified about clearance to proceed with awards following this review.

Information requested:

1. bureau or office
2. name of grant or cooperative agreement and anticipated issue date (month/year)
3. catalog of Federal domestic assistance (CFDA) number
4. purpose of grant or cooperative agreement
5. mandatory or discretionary nature of grant or cooperative agreement (if mandatory, cite authority)
6. current priorities being addressed by the grant or cooperative agreement
7. flexibility to direct grant or cooperative agreement to new priorities
8. source of funds
9. amount of grant or cooperative agreement and expected total value
10. targeted recipients/awardees
11. location of recipients/awardees
12. potential media interest

Template for Data Call on Proposed Records of Decision and Other Significant Decision Documents

Please use the following template to provide information for each proposed Record of Decision or other decision with nationwide, regional, or statewide impact. Please submit the completed information through your assistant secretary to Mr. Jim Cason. You will be notified of your clearance to proceed with issuance of a decision following the review.

Information requested:

1. bureau or office
2. title of document
3. one paragraph summary of proposed decision
4. need and deadline (if any) for issuance
5. positions of affected stakeholders
6. other relevant considerations

Memorandum

To: Deputy Service Directorate

From: Director

Subject: Required Correspondence Review – submitting items to the Document Tracking System Early Action Reporting database (DTS EAR)

Per the Secretary of Interior's April 12, 2017 memorandum, "Managing Grants, Cooperative Agreements, and Other Significant Decisions," bureau heads and office directors are required to report proposed Records of Decision (RODs) or other decisions with nationwide, regional, or statewide impact to the Office of the Secretary to enable an assessment of the overall functioning of the Department's critical programs. A copy of the memorandum communicating this new requirement is attached (attachment A).

Additionally, Regional and Headquarter (HQ) Programs should alert the Director's Office of any actions that may be: 1) controversial with stakeholders (any type of project or action), or 2) likely to add significant cost or delay to infrastructure, energy, or border projects that are priorities of this Administration. The objective in both circumstances is to give the Director's office advance notification of actions that would likely rise to the attention of the Secretary.

The U.S. Fish and Wildlife Service (FWS) has created a new database in the Document Tracking System (DTS) to facilitate the submission of materials to both the Office of the Secretary and the Director's Office. The *Early Action Request* (EAR) database is an early review tool that can be used to obtain Director's Office or Departmental review and surname for the actions outlined below. This memorandum offers guidance on what types of information should seek review, as well as submission instructions.

1) Items for Review by the Office of the Secretary

The procedures outlined below are temporary and are being implemented to assist the Secretary in understanding how each agency makes important decisions to advance the mission of the Department of the Interior, and to ensure coordination with the Office of Communications for significant announcements.

In accordance with the April 12, 2017, Secretarial memorandum, proposed RODs and proposed decisions that are not termed "ROD" but that have nationwide, regional, or statewide impact shall be submitted to the Secretary prior to issuance. All materials should be uploaded to the DTS EAR database via their respective Regional or HQ program and routed for Secretarial review, through the Director and Assistant Secretary. A decision should not be issued until the Office of the Secretary has reviewed the report and provided clearance.

For each uploaded DTS EAR record for Secretarial review, please include a Correspondence Memo with the following information (Attachment B):

1. Originating office
2. Title of decision document
3. One paragraph summary of proposed decision
4. Need and deadline (if any) for issuance
5. Positions of affected stakeholders. Highlight whether the decision is potentially controversial.
6. Other relevant considerations

Each DTS package should include, as appropriate, the draft action or decision document. Given the high volume of decision documents being reviewed by the Deputy Secretary's office, please build in appropriate time (potentially several weeks) into your planning.

2) Items for Review by the Director's Office

Items that are controversial with stakeholders or likely to add significant cost or delay to infrastructure, energy, or border projects that are priorities of this Administration will likely rise to the attention of the Secretary. We ask that you please identify these actions and submit them to the Director's Office as an early alert.

The starting point in identifying infrastructure, energy, or border projects that are priorities of this Administration is the list of "major infrastructure projects" that each Region submitted in mid-March 2017 (Attachment C).

Please note that not all Service actions on infrastructure, energy, or border projects need to be reviewed by the Director's office before transmittal. The vast majority of actions on these projects can and should proceed without review by the Director's office. Regional and HQ programs should exercise their judgment in identifying projects or actions that may be controversial. The sensitivity could be related to the species affected (e.g., Mexican wolf, red wolf, greater sage-grouse, manatee), the type of project (e.g., border wall, pipeline), or the political attention received to date (e.g., departmental, gubernatorial, congressional).

Director's Office early alerts should include a briefing paper along with any relevant correspondence or documents. All materials should be uploaded to the DTS EAR database via

their respective Regional or HQ program and routed for Director's Office review. A decision should not be issued until the Director's Office has reviewed and responded. Every effort will be made to respond to early alerts in a timely manner.

If you have questions about either of these review procedures, or need assistance in follow up on any submittals, please contact Charisa Morris, Chief of Staff, at (202) 208-3843.

ISSUE: Road Closures by Private Land Owner on Kofa National Wildlife Refuge

I. ISSUE BACKGROUND

- In 2016, Allen Armstrong who owns several in-holdings on Kofa National Wildlife Refuge (Refuge), stated he would be gating and closing a road passing through his property.
- This potential closure and others he is considering would significantly impair public access to much of the eastern part of the Refuge since these roads have been used for decades by recreationists. Additionally, the U.S. Fish and Wildlife Service (FWS) relies on these roads for access to remote portions of the Refuge. Closure of the roads would add hours to some trips and require other trips to be conducted overnight.
- The FWS attempted to reach agreement with Mr. Armstrong on possible solutions that may include potential acquisition of easement or fee-title interests on portions of the roads. Mr. Armstrong was not interested in an easement and preferred that the FWS construct an alternate new road to maintain visitor access to the Refuge.
- Soon afterwards, Mr. Armstrong acquired power of attorney for two additional private inholdings held by Dean Weingarten and stated he would close road access there as well. Mr. Armstrong has expressed willingness to sell interest in Mr. Weingarten's properties to the FWS but contingent on Mr. Armstrong dictating the purchase price, identifying the route for a new road around the Castle Dome and Hull Mine properties, and the FWS signing a purchase contract in less than a month.
- The FWS has received a number of calls from affected visitors concerned that access via roads that had been used since prior to Refuge establishment are now closed. In October 2016, Mr. Armstrong agreed to unlock the gates to allow through-access for the public.

II. POSITION of INTERESTED PARTIES

- Mr. Armstrong contacted Senator McCain in November 2016 to express his frustration over the issue. The Refuge responded to Mr. Armstrong and expressed continued willingness to discuss potential solutions.

III. RECENT CONGRESSIONAL ACTIVITY

- There has been no congressional interest in this issue since November 2016.

IV. NEXT STEPS/ OUTLOOK

- FWS continues to meet with all vested stakeholders to evaluate alternate routes that do not cross privately-owned lands but provide similar access to the Refuge for the thousands of visitors who have frequented these areas for decades.

ISSUE: Status of National Wildlife Refuges along the Arizona/Mexico International Border

I. ISSUE BACKGROUND

- Within Arizona, Cabeza Prieta National Wildlife Refuge (NWR) shares 56 miles of border with Mexico and Buenos Aires NWR shares approximately 7.5 miles, necessitating the presence of Customs and Border Protection (CBP) for border security.
- On April 1, 2008, then Department of Homeland Security (DHS) Secretary, Michael Chertoff, waived certain environmental statutes, as authorized by the Illegal Immigration Reform and Immigrant Responsibility Act, to ensure access to Department of the Interior (DOI)-managed lands, including national wildlife refuges and other lands for border security projects, allowing building of border barriers and access roads along 670 miles of the U.S.-Mexico border.
- In addition, DOI and the DHS have an existing agreement that calls for close collaboration on refuge lands and provides for mitigation of impacts to wildlife.
- The U.S. Fish and Wildlife Service (FWS) coordinates closely with CBP on border-related issues and infrastructure project design, installation, and operation in an effort to minimize detrimental impacts to fish and wildlife and ensure the FWS mission is accomplished in concert with the DHS national security mission.
- The FWS employees working on the border continue to face resource protection challenges related to border narcotics smuggling, human trafficking, CBP off-road emergency pursuits, and humanitarian aid groups illegally depositing materials on NWR lands.

II. POSITION of INTERESTED PARTIES

- The international border continues to be an area of high interest in the media, among various advocacy groups, and in the political realm. Humanitarian aid volunteers continue to provide caches of supplies for undocumented aliens along trails and within designated wilderness, often in conflict with FWS policy and complicating CBP operations. Wilderness advocacy groups continue to express concern over border-related incursions in wilderness and impacts to natural resources. Cabeza Prieta NWR has experienced a recent increase in Freedom of Information Act requests from wilderness advocates and the media.

III. RECENT CONGRESSIONAL ACTIVITY

- No recent congressional activity has occurred related to the Arizona/Mexico international border

IV. NEXT STEPS/ OUTLOOK

- In coordination with other DOI land management agencies, the FWS continues to cooperate closely with the DHS and CBP in an effort to integrate the missions of the two departments and ensure conservation of FWS trust resources and to address illegal cross-border traffic activity on public lands.
- Cabeza Prieta and Buenos Aires NWRs continue to work with other DOI land managers to develop a consistent approach to addressing humanitarian aid groups operating outside of DOI policy and FWS regulations.

BUREAU: U.S. Fish and Wildlife Service
MEMBER: Senators Udall and Heinrich, Representative Lujan- Grisham (NM)
ISSUE: Valle de Oro National Wildlife Refuge – Community Partnerships and Engagement

I. ISSUE BACKGROUND

- In September 2012, the U.S. Fish and Wildlife Service (FWS) established Valle de Oro National Wildlife Refuge (Refuge) in the Albuquerque metropolitan area.
- The purchase of a former dairy farm (570 acres and associated water rights) to establish the Refuge was completed in 2015 and required $18.5 million, including $8.9 million of non-Federal funds from Bernalillo County, State of New Mexico, Albuquerque Metropolitan Arroyo Flood Control Authority (AMAFCA), National Fish and Wildlife Foundation, and local partners. Other Federal partners have included: Bureau of Reclamation who contributed $2.9 million and will continue to partner on habitat restoration and the Land and Water Conservation Fund which provided $6.6 million.
- This is the first Refuge in the Southwest Region founded on community partnerships and engagement. As such, the Refuge was named the FWS's 3rd "Million-dollar Refuge" receiving $1 million in base funding.
- The Refuge and other Federal agencies and partner organizations are providing first-hand experiences in nature through meaningful employment of youth on various conservation lands.
- The Refuge is working closely with Kirtland Air Force Base (AFB) and the Federal Aviation Administration to minimize potential for bird strike hazards associated with proximity of the Refuge to the Albuquerque International Sunport and Kirtland AFB.
- The Refuge partnered with Bernalillo County to secure $12.5 million in Federal Lands Access Program Funds to improve access to the Refuge from surrounding neighborhoods.
- In 2016, the Refuge reached 6,000 youth through educational programs and 5,000 community members through special events and outreach. The Refuge provides: (1) opportunities for environmental education for a diverse under-served public, (2) conservation of valuable senior water rights for recovery of listed species, (3) recognition of intrinsic Middle Rio Grande historical and cultural resource values, and (4) expanded recreation on the Rio Grande corridor.

II. POSITION of INTERESTED PARTIES

- The Refuge has had a significant positive impact on the local community and greater Albuquerque area. Senators Udall, Heinrich and Representative Lujan-Grisham have been engaged since Refuge establishment.

III. RECENT CONGRESSIONAL ACTIVITY

- Senators Udall and Heinrich and Representative Lujan-Grisham have all visited the Refuge on multiple occasions.
- The Refuge has continued to keep representatives updated as progress continues.

IV. NEXT STEPS/ OUTLOOK

- In 2016, $3.4 million was secured to begin design and construction of visitor use facilities. In 2017, the remaining $3.1 million was secured. A solicitation to hire a design/build contract firm is currently being reviewed and is slated to go out for bid September 2017.
- On July 18, 2017 the Refuge released their Environmental Assessment for the Restoration, Activities, and Site Plan and will hold a public meeting on August 2, 2017 to solicit community feedback. Eight Cooperating agencies are also expected to review and respond.

Date Monday, July 17, 2017

BUREAU: U.S. Fish and Wildlife Service
MEMBER: Senators McCain, Flake and Representative Gosar (AZ)
ISSUE: Recreational Boating on Havasu National Wildlife Refuge

I. ISSUE BACKGROUND

- On May 20, 2015, the U.S. Fish and Wildlife Service (FWS) announced a change in boating restrictions at Havasu National Wildlife Refuge (Refuge). The Refuge extended an existing 17-mile zone (including no personal watercraft, waterskiing, and no-wake in backwaters) to include an additional ½-mile backwater to address resource and safety concerns and user conflicts.
- The management action taken on May 20, 2015, was enacted with the intention of protecting migratory birds and ensuring the safety of Refuge visitors engaged in boating activities, including kayaking, canoeing, birdwatching, hunting, and fishing.
- Enforcement of boating restrictions on the Refuge, including portions of the Colorado River, is authorized by existing Federal regulations.
- In April 2016, the FWS released a draft Compatibility Determination (CD) for recreational boating on the Refuge. Public meetings were held on May 2 and 3, 2016. After considering public input, the FWS withdrew the draft CD.
- A Memorandum of Understanding (MOU) was finalized in 2014 among the Refuge Manager, Lake Havasu City leaders, land management agencies, and local tribes in which they agreed to coordinate management decisions within their jurisdictions on the Colorado River.
- The FWS management action of May 20, 2015, was not coordinated pursuant to the MOU; an oversight the FWS considers contrary to the collaborative intent of the partnership.
- Effective February 1, 2017, the FWS rescinded the additional ½-mile restriction enacted on May 20, 2015, in an effort to work with signatories of the MOU and cooperatively address the concerns of a diversity of recreational users.

II. POSITION of INTERESTED PARTIES

- Constituents contacted Representatives McCain and Gosar to voice their concerns with the May 20, 2015 management action and draft CD.

III. RECENT CONGRESSIONAL ACTIVITY

- Representative Gosar attended and spoke at public meetings in 2016 and a congressional staff person for Senator McCain was present. Representative Gosar has been actively engaged in this issue.

IV. NEXT STEPS/OUTLOOK

- The Refuge Manager continues to meet with signatories of the 2014 MOU and vested stakeholders to communicate management actions.
- The FWS is preparing a new draft recreational boating CD for public comment beginning on August 1, 2017. A public meeting will be held in August and announced via media outlets.
- The FWS remains committed to ensuring the safety of all recreational users and is committed to ongoing communication with the public and our partners to ensure a diversity of safe recreational uses while supporting the conservation objectives and mission of the agency.

Date Monday, July 17, 2017

BUREAU: U.A. Fish and Wildlife Service (FWS)
MEMBER:
ISSUE: Amity Pueblo National Historic Preservation Act Consultation and Mitigation

ISSUE/BACKGROUND

- The U.S. Fish and Wildlife Service (Service) provided Sport Fish Restoration grant funds to the Arizona Game and Fish Department (AGFD) for an approved project to construct a fishing pond on State land near Eagar, Arizona, on March 21, 2011. AGFD began excavation for the fishing pond on April 27, 2011. Excavation work unexpectedly uncovered Native American burials and disturbed numerous artifacts.
- The Service initiated Government-to-Government consultation with the Pueblo of Acoma, Pueblo of Laguna, Pueblo of Zuni, Hopi Tribe, Navajo Nation, White Mountain Apache Tribe and the San Carlos Apache Tribe. The Pueblo of Zuni became the lead tribe. The Pueblo of Acoma and Hopi Tribe also remained in the consultation.
- A fully executed National Historic Preservation Act Section 106 Memorandum of Agreement was signed in April 2016 by the Service, AGFD, National Council on Historic Preservation, Pueblo of Zuni, Pueblo of Acoma, The Archaeological Conservancy (TAC) and Society of American Archaeologists. This document served as a blueprint for restoration and repatriation.
- AGFD contracted with the Northland Research Inc. (NRI) who identified, recorded, and recovered all human remains, faunal remains, and artifacts that were exposed on the surface within the project area. NRI excavated test units in the berms to acquire baseline data for future work and assessed the integrity of the 23 documented features. They were mapped and photographed. A Pueblo of Zuni Tribal archeologist served as monitor.
- NRI then sifted and cataloged materials in the berm and spoil pile. Members of the Pueblo of Zuni and Pueblo of Acoma served as monitors.
- AGFD returned the screened soil to the excavated area and then smoothed, contoured, and hydro-seeded the area with native grasses.
- A Reburial Consultation was held by the Arizona State Museum with the Tribes and other parties.
- On November 4, 2016, the Zuni and Acoma Pueblo elders and an Acoma medicine man conducted a ceremony to guide their ancestors and interned all of the human remains and artifacts.

POSITION OF INTERESTED PARTIES

- The Tribal members were steadfast in opposition to scientific discovery, which would have further disturbed the site. The Service and AGFD supported the Tribes and consequently, the Arizona State Historic Preservation Office (SHPO) resigned from the consultation because they believed they would commit a dereliction of duty if they did not require scientific discovery. The Service asked the National Council on Historic Preservation to step into the consultation in place of SHPO, which they did. The Council's participation allowed the parties to come to a resolution and prevented further disturbance of the burial site.

NEXT STEPS/OUTLOOK

- The Arizona Game and Fish Commission owns the Amity Pueblo site. With the Tribes consent, AGFD is working to transfer ownership of Amity Pueblo to TAC to be protected in perpetuity.

7/19/2017

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Representative Steve Pearce (NM-02)
ISSUE: Balancing Protection for Chiricahua leopard frog Habitat and Access to Water for Livestock and Recreation on Forest Service Lands

I. ISSUE BACKGROUND

- On June 28, 2017, FWS received an informal inquiry from Rep Pearce's Office regarding concerns about grazing allotments on U.S. Forest Service (USFS) lands and potential loss of access to water due to protections for the Chiricahua leopard frog (CLF).
- The Chiricahua leopard frog (CLF) was listed as threatened in 2002 with critical habitat designated in 2012. The species was determined to be present in Beaver Creek in 2007.
- The USFS signed a Decision Notice for a grazing allotment in 1999, which contained the provision, "A half mile of fence will be built around the perennial section of Beaver Creek to mitigate impacts to potential threatened and endangered species habitat." The Notice also stated that "A half mile of fence would be built around the perennial section of Beaver Creek on National Forest System Lands to mitigate impacts to potential threatened and endangered fish habitat."
- The permittee worked with USFS to install the fence on the grazing allotment around 10 years ago. The fence was subsequently damaged by a large rain event and is, according to the USFS, no longer effective at excluding cattle from the riparian area.
- The USFS is currently working with the permittee to have the fence repaired/rebuilt in such a way as to continue to protect the riparian habitat (and associated species), while still ensuring reasonable access to water for his livestock and ungulates in the area. The USFS shared that they met with the permittee on site on April 18, 2017, to discuss options, and again on June 9, 2017. On July 13, 2017, the parties met again with the purpose of flagging the location of a proposed swing gate/fence system on USFS lands.
- The USFS briefed FWS on the outcomes of these meetings and indicated that they will be requesting consultation on the proposed "Beaver Creek Riparian Improvement Project" in the near future; however FWS has not received an official request to date.

II. POSITION of INTERESTED PARTIES

- The permittee contacted Rep Pearce in April, prior to meeting with the Forest Service to develop access options. Recent meetings appear to have been productive with full involvement between the USFS and the permittee. At this point, FWS has not been formally involved, but expects to be in consultation with the USFS in the near future.

III. RECENT CONGRESSIONAL ACTIVITY

- Rep Pearce's Office contacted FWS informally for an update on June 28, 2017.

IV. NEXT STEPS/ OUTLOOK

- FWS anticipates participating in formal consultation with the Forest Service to provide technical expertise and assistance in providing a fence that is compatible with the species and provides livestock with access to water in the near future.

Date Monday, July 17, 2017

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Representative Steve Pearce (NM – 02)
ISSUE: Balancing Protection for New Mexico Meadow Jumping Mouse Habitat and Access to Water for Livestock and Recreation

I. ISSUE BACKGROUND

- The New Mexico meadow jumping mouse (NMMJM) is a small mammal. Its historical distribution likely included riparian wetlands along streams in the Sangre de Cristo and San Juan Mountains from southern Colorado to central New Mexico, including the Jemez and Sacramento Mountains and the Rio Grande valley from Espanola to Bosque del Apache National Wildlife Refuge (Refuge), and into parts of the White Mountains in eastern Arizona.
- Based upon historical (1980s and 1990s) and current data (2005 to present), the distribution and abundance of the NMMJM has declined significantly range-wide.
- In 2016, the U.S. Fish and Wildlife Service (FWS) designated approximately 13,973 acres along 169.3 miles of flowing streams, ditches and canals as Critical Habitat for the NMMJM in eight units within Colfax, Mora, Otero, Sandoval and Socorro Counties in New Mexico; Las Animas, Archuleta and La Plata Counties in Colorado; and Greenlee and Apache Counties in Arizona.
- Of the 13,973 acres designated as Critical Habitat, 62.4% occurs on Federal lands, 9.8% on State lands, and 27.8% on private lands. Of the 62.4% occurring on Federal lands, 88.4% occur on National Forest System lands and the remaining 11.4% occur on Bosque del Apache National Wildlife Refuge.
- Water that flows through the Refuge is being managed to maintain riparian habitat in areas occupied by the NMMJM as well as providing habitat for waterfowl and other wildlife species while still delivering the flows required for downstream water rights.
- The USFS is working with grazing permittees to creatively manage livestock to ensure adequate access to water for livestock while still protecting NMMJM habitat. This is accomplished through a combination of fencing, swing gates, water lanes, development of alternative water sources, placement of processing corrals and movement corridors, pasture rotation and other techniques.
- State and Federal land managers are also actively managing recreation use in NMMJM habitat to minimize conflicts and as well as taking steps to minimize the effects of wildfire suppression in occupied areas.
- Surveys have been undertaken in potentially occupied tribal lands in partnership with Northern Arizona University and some contractors.
- The FWS continues to play an active role in providing technical assistance and expediting Section 7 consultations for projects which support habitat protection, riparian health, and continued provision of water for grazing, recreation and satisfying downstream water rights.
- The FWS is also working with researchers to encourage data collection to improve our understanding of the NMMJM, its habitat and distribution. Regions 6 and 2 recently completed a draft programmatic biological opinion to support the permitting of field investigations throughout the species' range. We expect to finalize the document in the next few months so it will be in place in advance of next year's field season.

II. POSITION of INTERESTED PARTIES

- Some permittees and recreationists are displeased with restricted access to riparian areas, springs and streams in NMMJM critical habitat and occupied areas. Other permittees and members of the public are generally supportive as long as alternative methods of access are provided.

III. RECENT CONGRESSIONAL ACTIVITY

- June 26, 2017 verbal briefing to Senator Udall's staff on the NMMJM and the working relationship between the FWS and USFS in identifying strategies to balance habitat protection and water use.

IV. NEXT STEPS/ OUTLOOK

- The FWS will continue to work with Federal, State and tribal land managers to proactively protect NMMJM habitat in ways consistent with agency missions and other legal requirements.

Date July 17, 2017

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: New Mexico and Texas Delegation
ISSUE: Status update for the Texas Hornshell

I. ISSUE BACKGROUND

- The Texas hornshell, a freshwater mussel native to the Rio Grande drainage in Texas and New Mexico as well as south along Mexican gulf coastal river systems, was proposed as an endangered species on August 10, 2016 (81 FR 52796). Overall, there are five known remaining populations of Texas hornshell, comprising approximately 15 percent of the species' historical range in the United States.
- The primary factors affecting Texas hornshell are river fragmentation due to habitat inundation by impoundments and alterations of the natural streamflow regime and degradation of water quality within its range.
- Our final listing determination is based on the best available science including the recently completed Species Status Assessment that included input and review from academia and state agencies.
- The Service is working to complete two Candidate Conservation Agreements with Assurances (CCAA) (for private and State lands) and a Candidate Conservation Agreement (for Federal lands) on the Black and Delaware Rivers. These agreements include private landowners, the local irrigation district, oil and gas companies, water sellers, the State of New Mexico, Texas, and others. The CCAAs are voluntary and provide non-federal landowners and developers the opportunity to implement conservation practices that address specific threats with assurances that, if the species is listed, they can continue to manage their land as outlined in their agreements with no additional requirements.
- In Texas, The Nature Conservancy and Texas Parks and Wildlife Department (TPWD) are managing their lands in the Devils River watershed to reduce sediment inputs and contaminants, thereby benefitting the Texas hornshell and other aquatic species. Research, focused on helping improve the understanding of the species, is being funded by the Office of the Texas Comptroller.

II. POSITION of INTERESTED PARTIES

- Public hearings were held on the proposed rule in Laredo, Texas, on June 13, 2017 and in Carlsbad, New Mexico on June 15, 2017.
- The states of New Mexico and Texas do not support listing Texas hornshell as endangered, but have not overtly opposed its listing. We have worked with the New Mexico Department of Game and Fish, the TPWD, and the Texas Comptroller of Public Accounts extensively throughout the SSA, proposed listing, and final listing processes.

III. RECENT CONGRESSIONAL ACTIVITY

- The Service received a letter from Congressman Pearce (NM) on October 11, 2016, requesting an extension. The Service responded to the letter on October 27, 2016, with information on future opportunities to provide public comments.
- The Service notified the Texas and New Mexico congressional delegations of the proposed listing, public hearings and draft CCA and CCAA.

IV. NEXT STEPS/ OUTLOOK

- We anticipate that we will have a final decision on the Texas hornshell CCA and CCAA in early August.
- A final listing rule or withdrawal of the proposal is due to the Federal Register by August 10, 2017. Congressional offices and partners will be notified when the final rule is ready for Federal Register publication.
- We will continue to work with the States of New Mexico and Texas, landowners, industry, and other partners on conservation efforts for the Texas hornshell.

BUREAU: U.S. Fish and Wildlife Service (FWS)
PREPARED FOR: U.S. Secretary of the Interior
ISSUE: 12-Month Finding/Proposed Rule to Downlist the Kuenzler Hedgehog Cactus

I. ISSUE BACKGROUND

- Kuenzler hedgehog cactus was listed as an endangered species on October 26, 1979, without critical habitat (44 FR 61924).
- A species recovery plan was approved on March 28, 1985. Criteria to downlist the species include the protecting, maintaining and enhancing existing natural populations; cactus numbers increasing to approximately 5,000 individuals; and maintaining that population level for five consecutive years.
- In 2005, we completed a five-year review that recommended downlisting, as the cactus is more widely distributed and abundant than originally thought.
- On July 16, 2012, we received a petition from the Pacific Legal Foundation, Jim Chilton, the New Mexico Cattle Growers Association, New Mexico Farm and Livestock Bureau, New Mexico Federal Lands Council, and Texas Farm Bureau to downlist the Kuenzler hedgehog cactus.
- On September 9, 2013, the U.S. Fish and Wildlife Service issued a 90-day finding indicating that downlisting/delisting Kuenzler hedgehog cactus may be warranted. Per Headquarters' guidance, we completed a new five-year review that recommended downlisting, completed on December 1, 2016. It is the supporting document for the combined 12-month finding and proposed rule to downlist, published in the Federal Register on January 6, 2017. Public comment period ended March 7, 2017.
- The FWS will publish a final rule by January 6, 2018.

II. POSITION of INTERESTED PARTIES

- We considered expert opinion from three appropriate independent specialists regarding the proposed rule's science to ensure our delisting decision is based on scientifically sound data, assumptions and analyses during the public comment period.

III. RECENT CONGRESSIONAL ACTIVITY

- None

IV. NEXT STEPS/ OUTLOOK

- The FWS will publish a final rule by January 6, 2018.

Date July 19, 2017

BUREAU: U.S. Fish and Wildlife Service (FWS)
PREPARED FOR: U.S. Secretary of the Interior
ISSUE: Decision to Propose Delisting for the Gila chub (*Gila intermedia)* and Its Critical Habitat Due to Taxonomic Status Change

I. ISSUE BACKGROUND

- Gila chub was listed as an endangered species with critical habitat in 2005 (70 FR 66664). Headwater chub (*Gila nigra*) and the Lower Colorado River basin distinct population segment of roundtail chub (*Gila robusta)* were proposed for listing in 2015 (80 FR 60754).
- In September 2016, the Committee on Names of Fishes, a joint committee of the American Fisheries Society and American Society of Ichthyologists and Herpetologists (the Societies) issued a draft manuscript indicating that "no morphological or genetic data define populations of *Gila* in the lower Colorado River basin as members of more than one species", and "that the data available support recognition of only one species of *Gila*, the roundtail chub, *Gila robusta*".
- In April 2017, the FWS agreed with the single species conclusion and withdrew our proposed rule to list headwater chub and the distinct population segment of roundtail chub (82 FR 16981).
- This single species conclusion also indicates the currently listed Gila Chub is no longer a valid species per the Endangered Species Act.
- A draft proposed delisting rule has been forwarded to Headquarters and is under review.

II. POSITION of INTERESTED PARTIES

- The Arizona Game and Fish Department initially requested that the Societies review the taxonomy of headwater, Gila, and roundtail chub, and support recognition of one species and delisting of Gila chub.
- The New Mexico Department of Game and Fish supports recognition of one species of chub as *Gila robusta.*
- Some researchers and geneticists dispute this conclusive finding, instead there is more than one species within the *Gila robusta* complex.

III. RECENT CONGRESSIONAL ACTIVITY

- Congressman Pearce (NM) requested information on the proposed listings; however, he was satisfied when we withdrew them from listing consideration.

IV. NEXT STEPS/ OUTLOOK

- FWS anticipates proposing a delisting rule for Gila chub.
- FWS has taken steps to initiate a status review of the new taxonomic entity rangewide in both the upper and lower basins of the Colorado River within the next 2 to 4 years, as committed to in the April 2017 withdrawal.

BUREAU: U.S. Fish and Wildlife Service (FWS)
PREPARED FOR: U.S. Secretary of the Interior
ISSUE: Jaguar Draft Recovery Plan

I. ISSUE BACKGROUND

- The jaguar is currently listed as an endangered species throughout its range under the Endangered Species Act, with critical habitat designated in the U.S. Jaguars are also listed as endangered by The Republic of Mexico.
- The bi-national (U.S.-Mexico) Jaguar Recovery Team and the Service have prepared a draft recovery plan for the jaguar. The Jaguar Recovery Team members represent management agencies, vested stakeholder groups, and universities in Mexico, Arizona, and New Mexico, along with tribal representation from the Tohono O'odham Nation.
- The June 29, 2016, draft recovery plan addresses recovery for the species throughout its range, but focuses primarily on the Northwestern Recovery Unit, which encompasses portions of the southwestern U.S. and northwestern Mexico.
- Jaguars historically ranged from the southern U.S. to central Argentina. Currently, they range from the southwestern U.S. to northern Argentina, and are found in all historically occupied countries except for El Salvador and Uruguay.
- The main contribution of the southwestern U.S. to the recovery of the jaguar is as a secondary area to accommodate dispersing jaguars.
- The draft recovery plan contains recovery criteria based on stabilizing and protecting current populations and habitat, as well as reducing threats to the species. To achieve delisting, viable jaguar populations should be secured throughout their range by removing, reducing, and mitigating the primary threats to the jaguar (habitat loss and fragmentation, illegal killing, and unsustainable depletion of jaguar prey resources).
- Since 2011, three male jaguars have been documented in southern Arizona through motion-sensor camera monitoring.

II. POSITION of INTERESTED PARTIES

- This draft recovery plan complies with a March 30, 2009, agreement between the Center for Biological Diversity, Defenders of Wildlife, and the U.S. Fish and Wildlife Service concerning designation of critical habitat and development of a recovery plan for a transnational and transboundary species that has over 99 percent of its range currently outside of the U.S. Also, as part of compliance with this agreement, the Jaguar Recovery Outline was posted April 18, 2012.
- Some U.S. environmental organizations recommend extending the Northwestern Recovery Unit to include habitat north of Interstate 10 and establishing a population of breeding jaguars in the U.S., thereby increasing the role the FWS should play in jaguar recovery.

III. RECENT CONGRESSIONAL ACTIVITY

- No Congressional activity

IV. NEXT STEPS/ OUTLOOK

- Review comments from peer reviewers, the public, agencies, Tribes, and Mexican cooperators.
- Complete final recovery plan by November 2017.

Date Wednesday, July 19, 2017

BUREAU: U.S. Fish and Wildlife Service
MEMBER: Senators McCain and Flake, Representative Grijalva (AZ)
ISSUE: Status of National Wildlife Refuges along the Arizona/Mexico International Border

I. ISSUE BACKGROUND

- Within Arizona, Cabeza Prieta National Wildlife Refuge (NWR) shares 56 miles of border with Mexico and Buenos Aires NWR shares approximately 7.5 miles, necessitating the presence of Customs and Border Protection (CBP) for border security.
- On April 1, 2008, the Department of Homeland Security (DHS) waived certain environmental statutes, as authorized by the Illegal Immigration Reform and Immigrant Responsibility Act, to ensure access to Department of the Interior (DOI)-managed lands, including national wildlife refuges and other lands for border security projects, allowing building of border barriers and access roads along 670 miles of the U.S.-Mexico border.
- In addition, DOI and the DHS have an existing agreement that calls for close collaboration on refuge lands and provides for mitigation of impacts to wildlife.
- The U.S. Fish and Wildlife Service (FWS) coordinates closely with CBP on border-related issues and infrastructure project design, installation, and operation in an effort to minimize detrimental impacts to fish and wildlife and ensure the FWS mission is accomplished in concert with the DHS national security mission.
- The FWS continues to face resource protection challenges related to border narcotics smuggling, human trafficking, CBP off-road emergency pursuits, and humanitarian aid groups illegally depositing materials on NWR lands.

II. POSITION of INTERESTED PARTIES

- The international border continues to be an area of high interest in the media, among various advocacy groups, and in the political realm. Humanitarian aid volunteers (No More Deaths) continue to provide caches of supplies for undocumented aliens along trails and within designated wilderness, often in conflict with FWS policy and complicating CBP operations. Wilderness advocacy groups continue to express concern over border-related incursions in wilderness and impacts to natural resources. Cabeza Prieta NWR has experienced a recent increase in Freedom of Information Act requests from wilderness advocates and the media.

III. RECENT CONGRESSIONAL ACTIVITY

- FWS is not aware of any recent congressional activity related to the Arizona/Mexico international border.

IV. NEXT STEPS/ OUTLOOK

- In coordination with other DOI land management agencies, the FWS continues to cooperate closely with the DHS and CBP in an effort to integrate the missions of the two departments and ensure conservation of FWS trust resources and to address illegal cross-border traffic activity on public lands.
- Cabeza Prieta and Buenos Aires NWRs continue to work with other DOI land managers to develop a consistent approach to addressing humanitarian aid groups operating outside of DOI policy and FWS regulations.

Date Monday, July 17, 2017

BUREAU: U.S. Fish and Wildlife Service (FWS)
PREPARED FOR: U.S. Secretary of the Interior
ISSUE: Mexican Wolf Draft Recovery Plan, First Revision

I. ISSUE BACKGROUND

- On June 29, 2017, FWS announced the availability of the Mexican Wolf Draft Recovery Plan, First Revision. During the public comment period, FWS is seeking review and comment of the draft plan from local, State, and Federal agencies; Mexican government agencies; Tribes; and the public. The draft plan is also undergoing peer review.
- The comment period is open from June 30, 2017 through August 29, 2017. To answer questions on the draft plan and provide an additional opportunity to receive written comments, we are holding public information meetings at the following locations and dates (note that these are informal meetings, not hearings):
    - July 18, 2017 (6 to 9pm): Flagstaff, Arizona
    - July 19, 2017 (6 to 9pm): Pinetop, Arizona
    - July 20, 2017 (6 to 9pm): Truth or Consequences, New Mexico
    - July 22, 2017 (2 to 5pm): Albuquerque, New Mexico
- The draft plan guides Mexican wolf recovery efforts by the FWS and its partners, with the ultimate goal of removing this endangered wolf subspecies from Endangered Species Act protections and returning management to the appropriate states and tribes.
- The recovery strategy outlined in the draft plan is to establish two Mexican wolf populations distributed in core areas within the subspecies' historical range in the United States and Mexico. This strategy addresses the threats to the species, including the extinction risk associated with small population size and the loss of genetic diversity. The draft plan provides estimates of the time and resources required to carry out this strategy and the associated measures needed to achieve the plan's goal.
- At the time of recovery, the Service expects Mexican wolf populations to be stable or increasing in abundance, well-distributed geographically in core areas within their historical range, and genetically diverse.
- In the U.S., the recovery strategy will focus on the area south of I-40 in Arizona and New Mexico in the area designated as the Mexican Wolf Experimental Population Area. The FWS has been reestablishing a population of Mexican wolves in this area since 1998. In Mexico, recovery is focused in the Sierra Madre Occidental in the states of Sonora, Chihuahua, and Durango. Mexico began reestablishing Mexican wolves in 2011.
- The current Mexican Wolf Recovery Plan was signed in 1982; however, it did not include criteria for recovery and delisting. In April 2016, the Service signed a Settlement Agreement with the Arizona Game and Fish Department and Defenders of Wildlife to complete a final revised Mexican Wolf Recovery Plan by the end of November 2017.

II. POSITION of INTERESTED PARTIES

- The States of Arizona, Utah, Colorado, and New Mexico; the Forest Service; and government agencies in Mexico assisted in the development of the recovery plan. They expressed satisfaction with the recovery strategy in the draft plan.
- Although hunters and guides are concerned that Mexican wolves will affect their livelihoods, the target population is below the threshold where effects on elk and deer herds have been documented. Livestock industry and hunters and guides are concerned

that Mexican wolves will affect their livelihoods. To address such concerns, the FWS has put in place the Mexican wolf/Livestock Council which directs disbursement of funds to offset effects of Mexican wolves on livestock.

- Academicians and environmental groups are concerned that the plan is not sufficient to ensure recovery. However, the FWS based the development of the draft plan on the best scientific information available, which was used to develop a population viability model and a habitat suitability model. With these models, we assessed the recovery strategy to ensure that the two populations each achieved 90 percent probability of persistence over 100 years and retained 90 percent of the gene diversity in the captive population.
- To ensure that we are able to address public comments and meet the court settlement date of November 2017, we will not be extending the comment period beyond August 2017 or holding additional public information meetings. Additional hearings or an extension of the comment period would not be possible without an extension of the court settlement which we believe is unlikely to be supported by plaintiffs.

III. RECENT CONGRESSIONAL ACTIVITY

- On April 7, 2016, we received a letter from seven Members (four Senators) regarding the status of a recovery plan. FWS provided advance notification about availability of the draft plan to Members and key partners. Notifications were well received.

IV. NEXT STEPS/ OUTLOOK

- FWS will review and consider all information gained from the public comment period and public meetings. The Final revised Recovery Plan is anticipated to be completed by the end of November 2017.

BUREAU: U.S. Fish and Wildlife Service
PREPARED FOR: U.S. Secretary of the Interior
ISSUE: Lesser Prairie-Chicken Species Status Assessment Update

I. ISSUE BACKGROUND

- The lesser prairie-chicken is a medium-sized grouse that occurs in short- and mixed-grass prairies in Colorado, Kansas, New Mexico, Oklahoma, and Texas. The Fish and Wildlife Service (Service) recognizes that long-term lesser prairie-chicken conservation relies on our continued cooperation and coordination with State, Federal and private partners.
- The lesser prairie-chicken was listed as a threatened species under the Endangered Species Act in 2014 after decades of habitat and population declines. The Service initiated a Species Status Assessment (SSA) in the spring of 2015, following its listing, to inform recovery planning and critical habitat designation. In September 2015, the U.S. District Court for the Western District of Texas vacated the listing and directed that the species be removed from the List.
- Following the removal of the lesser prairie-chicken as a threatened species, we adapted the SSA to inform future conservation efforts and inform a finding on a petition to list the bird.
- On September 8, 2016, the Service received a petition to re-list the lesser prairie-chicken. On November 30, 2016, the Service published a 90-day petition finding that the petition presented "substantial information" indicating that the petitioned action may be warranted.
- The lesser prairie-chicken SSA will provide a biological risk assessment using the best available information on threats and conservation to evaluate the lesser prairie-chicken's current condition and forecast its future biological status. To assist us in our lesser prairie-chicken SSA, we formed a working group to provide scientific input on species ecology, threats and conservation. The working group includes state wildlife agency representatives from across the species' five-state range and from the Western Association of Fish and Wildlife Agencies' (WAFWA), the Natural Resource Conservation Service, and several academics. The Service has provided the working group with preliminary partial drafts of the SSA report and throughout this process we have addressed their comments.

II. POSITION of INTERESTED PARTIES

- The lesser prairie-chicken is a species which greatly interests agencies, industry, Non-Governmental Organizations, and private land-owners. The Service strongly encourages continued participation in existing species conservation and monitoring activities including the Service-endorsed WAFWA Range-wide Conservation Plan, which we believe provides a net conservation benefit for the bird.

III. RECENT CONGRESSIONAL ACTIVITY

- None

IV. NEXT STEPS/ OUTLOOK

- In late August provide a draft SSA report to our working group and peer reviewers for review.
- In fall of 2017 address peer and working group reviewer comments and finalize the SSA report.
- Utilize information and analysis in the SSA report to inform a policy recommendation and discussions of future conservation efforts for the lesser prairie-chicken with our partners.

All,

CBD has filed an amended complaint in this matter (against DHS and CBP only). They filed July 7. It brings claims under NEPA and FOIA (for failure to respond to its FOIA requests). This complaint challenges both the border wall prototypes, as well as a planned project to replace border wall and fence segments in the San Diego area.

http://www.biologicaldiversity.org/campaigns/border_wall/pdfs/Center_v_DHS_prototype_and_wall_extension_amended_complaint.pdf

On the same day, CBD noticed additional Section 7 claims (as to the wall/fence replacement; also only against DHS and CBP), alleging failure to consult. I received the NOI today in hard copy, but an electronic version is here:

http://www.biologicaldiversity.org/campaigns/border_wall/pdfs/ESA_NOI_SD_border_wall_replacement_2017_07_07.pdf

> All,
>
> Please find linked below an NOI that CBD sent to DHS and Customs and Border Protection yesterday. We are not named at this time. DHS and CBP have put out RFPs for prototypes for border wall segments in San Diego County. CBD's letter alleges that DHS and CBP did not consult with us under Sec 7 on the projects, nor did they comply with NEPA. Apparently, the projects could affect many listed species and CH such as coastal CA flycatcher, San Diego and Riverside fairy shrimp, Otay tarplant, and Quino checkerspot butterfly.

FishBites Report

FWS biologist receives Ruby Award

- **Topic:** This week, Kathy Robertson, fish and wildlife biologist with the FWS Arizona Ecological Services Office, officially received her prized Ruby Award. Robertson was nationally recognized by the International Partnering Institute (IPI) for her efforts collaborating with the Forest Service to develop conservation measures for endangered species earlier this year. The task was development of a transportation expansion project is on the US 60: Oak Flat to Miami, Arizona. The team "demonstrated a commitment to the partnering process, achieved excellent results and delivered an outstanding project." This project includes road improvements that will impact nearly 30 acres of undisturbed Forest Service land – much of it is habitat for the endangered Arizona hedgehog cactus. Collaboratively, conservation measures were developed to ensure protection of this endangered species, while enabling the project to move forward.
- **Supportive stakeholders:** FWS, U.S. Forest Service, Arizona Highway Department, Resolution Copper Mining, LLC and IPI
- **Impacted locations:** Central Arizona

Media Contact Report

- **Media publication:** New York Times, Michael Hardy, reporter
- **Topic:** Planned public protest against proposed Border Wall
- **Publication date**: Anticipating publication following protest on Sunday, Aug. 13
- **Current Status:** Reporter is planning to cover the protest scheduled to occur at the FWS Santa Ana National Wildlife Refuge this weekend. The reporter was provided the DOI approved statement and referred to CBP. FWS and CBP staff are prepared to be on site during the protest. FWS will share the DOI approved statement with media present at the protest along with a list of contacts from the various agencies.

Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel

August 10 – FWS met with a staffer from Senator Cornyn's Office at Santa Ana National Wildlife Refuge. DHS BP joined the informal briefing. (R2- Southwest Region)

August 17 – FWS Havasu National Wildlife Refuge (AZ) holding public listening session on revised draft Compatibility Determination (CD) for recreational boating. Comment period closes August 30. See Refuges for details. (R2 – Southwest Region)

August 18 – FWS closes comment period for draft Environmental Assessment for Valle de Oro National Wildlife Refuge. See Refuges for details. (R2 – Southwest Region)

Hot Topics - Week Ahead Announcements and Actions

In August – FWS anticipates publishing a notice announcing the receipt and consideration of applications for permits under the approved Industry Conservation Plan for American Burying Beetle in Oklahoma. See ES Items of Note for details. (R2 - Southwest Region)

In August – FWS expects to receive the final results of the Western Association of Fish and Wildlife Agencies (WAFWA) aerial surveys for the lesser prairie chicken. (R2 – Southwest Region)

August 29 – FWS closes comment period on Mexican Wolf draft revision of recovery plan. (R2 – Southwest Region)

Upcoming Workshops & Meetings

August 14 to August 17 – Scoping Meetings on Lower Colorado River Authority Transmission Habitat Conservation Plan, Texas. See ES items of Note for details. (R2 – Southwest Region)

September 1 – The Outdoors Alliance for kids expressed interest in having an event on FWS Valle de Oro National Wildlife Refuge to celebrate the third year of the Every Kid in a Park pass. See Refuges for details. (R2 – Southwest Region)

Endangered Species Act Recovery Actions

UPDATED: Mexican Wolf Draft Recovery Plan, First Revision (draft recovery plan). FWS announced the availability of the draft recovery plan on June 30. The comment period ends August 29. Public meetings were held at the following dates and locations: July18, Flagstaff, Arizona (120 people); July 19, Pinetop, Arizona (45 people); July 20, Truth or Consequences, New Mexico (130 people); and July 22, in Albuquerque, New Mexico (80 People). Each event had about 30 to 40 demonstrators in front of the meeting location. Paul Kienzle, Chairman, New Mexico State Game Commission presented a comment on his personal standing saying he supported the intent of the recovery plan and looked forward to working together. Meetings saw mixed support in favor and against recovery efforts. During the public comment period, FWS will continue seeking review and comment on the peer-reviewed draft revision from local, State, and Federal agencies; Tribes; and the public, in both the United States and Mexico. Due to the high level of visibility and controversy on Mexican wolf recovery in general, extensive outreach is on-going, including personal phone calls, email reminders, public meetings and updated web postings. Follow up briefings after the comment period closes are being planned. (R2 – Southwest Region)

REPEAT: In late October, FWS will publish a 12-month finding on the listing status of the southwestern willow flycatcher. Pacific Legal Foundation petitioned FWS to delist the flycatcher and in March 2016 we published a 90-day finding that the petition included substantial information, primarily regarding the subspecies' taxonomy. Upon robust consideration of the petition and the flycatchers' classification, the Southwest Region is completing a 12-month finding that delisting of the southwestern willow flycatcher is not warranted. Outreach is being planned – including a news release and Congressional notifications via email. Interest expected to be moderate. No controversy anticipated. (R2 – Southwest Region)

REPEAT: Houston Toad Safe Harbor Agreement – This Fall, FWS expects to announce the approval of the Texas Parks and Wildlife Department (TPWD) enhancement of survival permit pursuant to section 10(a)(1)(A) of the Endangered Species Act, as well as the 30-year Programmatic Safe Harbor Agreement (SHA) for the Houston toad between TPWD and FWS. The agreement will cover voluntary activities to restore, maintain, enhance, or create habitat for the endangered Houston toad in the following nine Texas counties: Austin, Bastrop, Burleson, Colorado, Lavaca, Lee, Leon, Milam and Robertson. Congressional interest from Rep McCaul (R TX Dist10) based on impacts from 2011 Bastrop fire. A conference call was held with Rep McCaul's Office to provide an update on the SHA in late July. A site visit is tentatively being planned to occur in September. Outreach planned – Congressional notification via email, a news release will be issued and posts will be made on the web and through Social media. (No FRN required). (R2 – Southwest Region)

REPEAT: American Burying Beetle Species Status Assessment - FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed in early September. In June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

Endangered Species Act Listing Actions

UPDATED: FWS announced on August 10, a 6-month extension of the final determination of whether to add the Texas hornshell a freshwater mussel species from New Mexico, Texas, and Mexico, to the List of Endangered and Threatened Wildlife. FWS is also reopening the comment period on the proposed rule to list the species, for an additional 30 days. FWS is taking this action to extend the final determination based on substantial disagreement regarding the status of Texas hornshell in Mexico. FWS will submit a final listing determination to the Federal Register on or before February 10, 2018. Historically, the Texas hornshell occurred in New Mexico, Texas and Mexico. However, the population has declined notably throughout its range and it currently occupies about 15% of its U.S. historical range. The Texas hornshell was designated a candidate in 2001 and FWS was petitioned to list the species in 2004. FWS published a proposed rule to list the Texas hornshell as endangered on August 10, 2016. On July 6, 2017, FWS announced the availability of a draft Candidate Conservation Agreement and Candidate Conservation Agreement with Assurances (CCA/CCAA) that would cover the Texas hornshell and four other species. The public comment period for the draft CCA / CCAA closed on August 7. Local interest is anticipated. A news release was issued and information was posted on Facebook at the time of publication in the *Federal Register*. Ranking 3. (R2-Southwest Region)

REPEAT: In September – FWS anticipates sending to the *Federal Register* 12-month findings on petitions including one to list the San Felipe gambusia, a Texas fish. (R4 – Southeast Region, R2 – Southwest Region (lead)

REPEAT: FWS anticipates publishing a final determination on the proposal to list the Sonoyta mud turtle as endangered under the Endangered Species Act on or before September 21. The Sonoyta mud turtle occurs in the U.S. only at Organ Pipe Cactus National Monument in southern Arizona, and four locations in the Rio Sonoyta basin in Sonora Mexico. Controversy level is low. A communications strategy news release and set of FAQs are being drafted. (R2 – Southwest)

UPDATED: Lesser Prairie-Chicken Species Status Assessment – FWS anticipates a Species Status Assessment (SSA) for the lesser prairie-chicken (LPC) will be completed by the end of the calendar year. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. USGS, through its Open File Report (OFR), made available the population model it prepared for FWS. The population model represents one component of the SSA and will be considered alongside of all other available information. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. The Lesser Prairie Chicken Advisory Council is scheduled for a conference call the week of August 7. The agenda includes the FWS SSA, Industry Updates, and Conservation Updates. (R2 Southwest Region & R6 Mountain-Prairie Region)

Other Ecological Services Items of Note

NEW: Villages at Vigneto Development Endangered Species Act Consultation [Arizona] – FWS Arizona Ecological Services is undergoing ESA section 7 consultation with Army Corps of Engineers regarding a planned 12,200-acre, 28,000-home development near the San Pedro River in southern Arizona and a 141-acre off-site mitigation project on the river. The FWS and Corps have not reached agreement during section 7 consultations. This is primarily due to the Corps' view of the Clean Water Act (CWA) Scope of Effects (which includes only the fill of WOTUS and limited indirect impacts) versus the ESA regulations' requirement to consult on the Action Area (which includes all areas to be directly and indirectly affected by the action, including interdependent and interrelated actions (including water use)). While the developer has agreed to FWS's guidance and non-jeopardy draft biological opinion, the Corps wants to limit consultation to the narrower fill of WOTUS and the mitigation parcel. Six-plaintiff litigation filed against the Corps on this project/issue is pending. Local and regional media have covered the story; if the consultation on the project is elevated at a policy level, national media interest is anticipated.

UPDATED: Scoping Meetings on Lower Colorado River Authority Transmission Habitat Conservation Plan, Texas – On July 31, FWS published in the *Federal Register* a Notice of Intent to prepare a draft National Environmental Policy Act (NEPA) Analysis on the proposed Lower Colorado River Authority Transmission Services Corporation's (applicant's) Habitat Conservation Plan on July 31, 2017. The Habitat Conservation Plan and incidental take permit from FWS, if issued, will provide the applicant with compliance under the Endangered Species Act for activities, including construction and maintenance, of their electric transmission lines throughout Texas. Four public scoping meetings will be held in Texas in August. A news bulletin was issued and information was posted on Facebook after the notice published in the *Federal Register*. The dates and locations for the open houses are as follows:

- August 14, Owen R. Hopkins Library, Corpus Christi, Texas, from 5-7 pm
- August 15, LCRA Dalchau Service Ctr., Austin, Texas, from 6-8 pm

- August 17, MLK Community Center, Midland, Texas, from 6-8 pm
- August 21, Staybridge Suites, College Station, Texas, from 6-8 pm

(Region 2 –Southwest)

Late September – FWS anticipates publishing a notice announcing the receipt of application and consideration of an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake.

Late September – FWS anticipates publishing a notice announcing the receipt and consideration of an application for a permit for the draft Leander Independent School District Habitat Conservation Plan and draft NEPA analysis for a proposed access road through the Balcones Canyonlands Conservation Program's preserve system in Texas.

REPEAT: The now-contained Frye Fire encompassed approximately 48,301 acres of Mt. Graham in the Pinaleño Mountains, Coronado National Forest (CNF), in southeastern Arizona. Burn-severity mapping indicates the majority of the fire was of low severity; however, two areas known for their relatively high Mount Graham Red Squirrel (MGRS) densities burned at high severity. (The MGRS occurs only on (is endemic to) this sky island mountain. The MGRS population was estimated to be only 252 animals in Fall 2016.) A total of 78% of the MGRS's occupied range is within the Frye Fire perimeter, with another 18% within the 2004 Nuttall-Gibson Fire perimeter. Access is currently limited due to flooding, washouts, and debris flows on the road, so reconnaissance is difficult. The Arizona Ecological Services Field Office is working with partners to gain access and determine the fire's effects on MGRS. Significant resources will likely be required to move forward with the subspecies' conservation and recovery. (Information submitted in previous reports.) (R2 – Southwest Region)

REPEAT: Lesser Prairie-Chicken (LPC) Aerial Survey - FWS expects to formally receive the official results of the Western Association of Fish and Wildlife Agencies (WAFWA) aerial surveys for the LPC in the near future. WAFWA issued a news release on June 29, 2017, publically announcing the results of the survey. The announcement confirms an increase in the range-wide population estimate due to favorable precipitation patterns over the past few years across the Great Plains. WAFWA noted LPC population increase/decreases are very closely tied to precipitation patterns across the Great Plains, and stated there may be a fluctuation in numbers from year to year. FWS also recognizes the importance of continuing annual reviews to examine long-term population trends and gain an accurate population assessment of the LPC. (R2-Southwest Region and R6- Mountain Prairie Region)

UPDATED: Texas Hornshell Candidate Conservation Agreement and two Candidate Conservation Agreement with Assurances –FWS announced consideration of a draft Candidate Conservation Agreement (CCA), draft Candidate Conservation Agreement with Assurances (CCAA), and draft environmental assessment for the Texas hornshell (proposed for listing) and other covered species (Rio Grande River cooter, gray redhorse, blue sucker and Pecos springsnail), and an enhancement of survival permit application under the Endangered Species Act submitted by the Center of Excellence on August 7. The covered area would include portions of Eddy County, New Mexico, and Culberson County, Texas. The CCA, CCAA, and the associated section 10(a)(1)(A) enhancement of survival permit will have duration of 30 years.

The FWS's New Mexico Ecological Field Office has been working for several years with the applicant to develop the CCAA on non-Federal lands and the applicant and the Bureau of Land Management to develop the CCA on Federal lands. The proposed listing of the Texas hornshell may be controversial in both Texas and southern New Mexico. A six month extension will be published on the final listing determination by August 10, 2017. A news release and FAQs were distributed to the states, partners, congressional staff and media and the notice was published inthe *Federal Register* on July 6. Substantial local stakeholder outreach has been conducted for CCA / CCAA. (R2-Southwest Region)

REPEAT: FWS anticipates publishing two notices announcing the receipt and consideration of applications for permits under the approved Industry Conservation Plan for American Burying Beetle in Oklahoma. These applicants cover incidental take of American Burying Beetle for Oil and Gas development, extraction, and transport within the species range in eastern Oklahoma. This conservation plan reduces the time in acquiring an incidental take permit to 45 to 60 days depending on publication of the *Federal Register* Notice. These notices are published on regular basis as companies apply for incidental take coverage under this conservation plan. (R2 Southwest Region)

NEW: Leander Independent School District (LISD) ITP – In the coming weeks, FWS will announce in the *Federal Register* a Notice of Intent to prepare a draft National Environmental Policy Act (NEPA) Analysis on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. Recently LISD submitted a draft habitat conservation plan and incidental take permit (ITP). The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Local interest is anticipated. Outreach, including issuing a news bulletin, will occur at time of publication in the *Federal Register*. (R2 – Southwest Region)

NEW: Delaware River (TX/NM) Spill - On August 1st the FWS was notified that there was a ruptured pipeline that spilled approximately 18,000 barrels of produced water mixed with some oil into the Delaware River. The spill occurred in Texas upstream of where the Delaware flows into New Mexico. The company, Cimarex, sent out cleanup crews that deployed booms. A large pulse of chlorides was released into the river, but most of the oil was contained at the spill site. No sign of oil has reached the occupied site for the Texas hornshell (proposed endangered), though produced water with high chlorides did flow through that site. Texas Parks and Wildlife Department (TPWD) reported that 155 fish were killed in the event, near the spill. FWS and New Mexico Game and Fish are not planning to survey for Texas hornshell until water quality tests confirm that it is safe to do so. (R2-Southwest Region)

REPEAT: San Antonio HCP, Texas – FWS anticipates publishing a Notice of Availability in August a draft Habitat Conservation Plan and Incidental Take Permit request from the San Antonio Water Systems for the incidental take of five federally-listed karst invertebrates (collectively the Covered Karst Invertebrates): Madla's Cave meshweaver; Robber Baron Cave meshweaver; Braken Bat Cave meshweaver; and two species of ground beetles with no common names (Rhadine infernalis and Rhadine exilis). The Covered Karst Invertebrates are associated

with the construction of two water pipelines in Bexar County, Texas. Once issued, the permit would be in place for 15 years. Controversy anticipated being low. Minimal outreach, including issuing a news bulletin locally is planned at time of publication in the *Federal Register*. Congressional Offices will be notified via email, a news release will be issued as well as web postings. (R2 – Southwest Region)

REPEAT: Barton Springs Edwards Aquifer Conservation District (BSEACD) ITP - FWS announced on July 17, receipt of an application for a section 10(a)(1)(B) incidental take permit (ITP), pursuant to the Endangered Species Act, from the BSEACD. The application is for the incidental take of the federally listed Barton Springs salamander and the Austin blind salamander for pumping withdrawals within the Barton Springs segment of the Edwards Aquifer (Aquifer) implemented, authorized, or permitted by BSEACD in portions of Travis and Hays Counties, Texas. FWS also anticipates releasing a draft Environmental Impact Statement (dEIS) analyzing the effects of issuing a proposed incidental take permit based on the draft Habitat Conservation Plan. A public meeting will be held on August 22, 2017, from 6 to 8 pm at the BSEACD office, in Austin, Texas. Local interest anticipated. Outreach, including issuing a news bulletin locally was provided at time of publication in the *Federal Register*. (R2 – Southwest Region)

REPEAT: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review this summer (August). The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in December 2017. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2-Southwest)

National Wildlife Refuge Actions

NEW: The Outdoors Alliance for kids expressed interest in having an event to celebrate the third year of the Every Kid in a Park pass on FWS Valle de Oro National Wildlife Refuge in Albuquerque, New Mexico, September 1. The Outdoors Alliance is hoping to have Senator Heinrich (D NM) as a guest speaker, along with representation from other federal agency partners (National Park Service, Forest Service and the Bureau of Land Management, as well as nonprofit partners (friends group, Wilderness Society, Sierra Club, Middle Rio Grande E3 Alliance). Focus of the event will be on benefits to students. Fourth graders will receive park passes during the event. Educational activities are also planned. Open to the media and the public. The Outdoor Alliance, in coordination with partners, will conduct outreach. On July 10, Senator Heinrich (D NM) introduced S.1522, Every Kid Outdoors Act. (R2 – Southwest Region)

NEW: On August 9, 2017, FWS met with representatives U.S. Customs and Border Protection (CBP) met to consider the potential for locating rescue beacons to a remote area of the Cabeza Prieta National Wildlife Refuge. This is an area where more than a dozen human remains of illegal border crossers (CBVs) have been recovered over the past several years. The presence of rescue beacons – a prefabricated 4 X 4 ft. concrete base on which a 20 ft. tall steel pole, topped

with a blue light visible for 10 miles, is bolted and powered by a solar panel – will allow individuals to press a button and be rescued by CBP within an hour. While the affected area is located within designated wilderness, the improved efficiency and effectiveness of search and rescue operations and subsequent reduction in deaths is expected to not only have a significant life-savings affect, but would reduce impacts to designated wilderness. The agencies anticipate having a final decision within the next 30 to 60 days. (R2 – Southwest Region)

REPEAT: FWS Valle de Oro National Wildlife Refuge Draft EA – On July 18, FWS made a draft Environmental Assessment (EA) for FWS Valle de Oro National Wildlife Refuge in Albuquerque, New Mexico, available for public review for 30 days. FWS held a public meeting on August 2, to provide interested parties an opportunity to learn more about the EA. More than 100 people attended the meeting, including staffers from Senators Udall (D NM), Heinrich (D NM) and Rep Michelle Lujan-Grisham (D NM Dist. 1). The majority of comments heard are in favor of the EA. Prior to releasing the draft, FWS consulted with vested partners to develop the draft EA, including Kirtland Air Force Base (KAFB) and the Federal Aviation Administration. As the urban refuge is in close proximity to the base's flight path, KAFB had concerns associated with potential aircraft bird strikes. Of primary concern was related to the habitat restoration plans for seasonal wetlands. KAFB believes wetlands may attract large-bodied birds (geese, cranes and ducks) to travel in flight patterns. FWS intends to continue coordinating with the Federal Aviation Administration and KAFB throughout this process to minimize concerns of wildlife hazards (aircraft bird strikes). On July 13, FWS met with Kirtland to discuss final edits to the draft before making it available to the public. Advance notifications made to Senators Heinrich (D NM) and Udall (D NM) and to Rep. Michelle Lujan-Grisham. A news release was issued to the media and posted online. Bulletins and fliers are posted and shared with partners and the Friends group. The public comment closes August 18. (R2 – Southwest Region)

REPEAT: Havasu National Wildlife Refuge Revised Draft Recreational Boating Compatibility Determination (CD) – FWS Havasu National Wildlife Refuge (AZ) announced availability of a revised draft Compatibility Determination (CD) for recreational boating on the Refuge on July 27. Comments are being accepted for 30-days, with the public comment period closing on August 30. A previous version was pulled from consideration after the FWS received a substantial number of public comments seeking reconsideration on the draft. The FWS determined more deliberation was required and an updated draft was developed. FWS will host a Public Listening Session in Lake Havasu City, Arizona on August 17. The media (Havasu News) received a copy of the draft from one of the members of the MOU. FWS is in the process of conducting outreach - Partners, and vested parties, including members of the MOU group, as well as Members of the Arizona Delegation received periodic updates and an advance copy of the draft CD. A news release and social media postings are being developed and will be posted in advance of the public comment period. Public notification is scheduled for next week. (R2 – Southwest Region)

UPDATED: Fever Ticks Continue to be a Threat to Cattle Industry in Texas – FWS met with Texas Animal Health Commission (TAHC) and U.S. Department of Agriculture-Animal and Plant Health inspection Service regarding fever tick treatment at the Laguna Atascosa National Wildlife Refuge on August 8. A summary of the report will be available in the near future. FWS is committed to continuing discussions and proactive actions in cooperation with the USDA, the Texas Animal Health Commission, private ranchers and others to aid in the battle to combat the

fever tick. The fever tick is detrimental to the Texas cattle industry and can be spread by cattle and deer. It may also potentially be spread by an invasive exotic species (the nilgai, an Asian antelope). The FWS Laguna Atascosa NWR remains under quarantine at this time. Proactive measures to combat the fever tick include a Nilgai herd reduction plan and prescribed burns in select areas. Additionally, FWS, in consultation with the USDA, issued a biological opinion (BO) in January 2016 for use of Ivermectin-laced corn outside of FWS Refuge lands. The BO discusses potential effects to ocelots, jaguarundis, and aplomado falcons from use of Ivermectin-laced corn in deer feeders to treat ticks on deer on private property. Local media interest remains high. High Congressional interest from Senator Cornyn (R TX), Rep. Conaway, Rep. Vela (D TX Dist. 34), and the House Agriculture Committee. Members have requested periodic updates. (Background previously reported in August 2016 and earlier.) (R2 – Southwest Region)

REPEAT: Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require the transportation of water from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade / replace pump and water delivery components to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

REPEAT: Border Coordination: Road Construction - On March 20, FWS was contacted by the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to coordinate an upcoming road construction project for a 5.9-mile portion of the Presumido Canyon Road through the Baboquivari Mountains, scheduled to begin in January 2018. The project will require water for the construction, and U.S. Customs and Border Protection (CBP) will perform maintenance of an FWS pump and water well in return for increased use of the FWS-owned well. (R2 – Southwest Region)

REPEAT: Border Coordination: Communication Towers - On April 18, FWS and U.S. Customs and Border Protection (CBP) discussed advance planning for Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers (IFTP) located on and adjacent to the Buenos Aries National Wildlife Refuge. A total of two communication towers and four surveillance towers on the refuge would be affected, with the goal of upgrading technology and providing a more robust foundation – all within the original impact areas. Work is proposed to begin in January 2018 dependent upon completion of planning, engineering, and permitting. Follow-up conversations with FWS have occurred to determine the necessary special use permitting process. (R2 – Southwest Region)

REPEAT: Border Coordination: Restoration of roadways – On April 20, FWS was contacted by a U.S. Customs and Border Protection (CBP) contractor, to begin maintenance and repair on Buenos Aires National Wildlife Refuge on both the Garcia Road and Fresnal Road. The objective is to restore the roadways to a safe driving condition for both FWS and U.S. Border Patrol. Best Management Practices involved in the project include: performing work only within the existing road footprint; introducing no materials to the refuge; using designated parking,

staging areas, and vehicle turnouts; washing equipment to minimize introduction of non-native species; and utilizing drip pans at staging and parking areas to minimize the effects of potential fuel or oil leaks. (R2 – Southwest Region)

REPEAT: Group Seeking to Aid Border Crossers – On June 1, FWS was informally notified that the U.S. Attorney's Office is seeking a meeting between FWS, Park Service and volunteers with the humanitarian group, No More Deaths. A formal request has not been received and no date is set for a meeting. On April 28, FWS met with representatives of No More Deaths (NMD Group), a humanitarian group based out of southern Arizona. Members of the NMD Group routinely place food, clothing and water on the landscape to aid stranded border crossers. This leads to an accumulation of debris scattered within the Refuge. The NMD Group wants to expand on these efforts to include leaving items in remote sites including designated wilderness areas. This group is seeking permission for off-road access in areas closed to public vehicle use. (The NMD Group understands that failure to have authorization could result in a citation.) During the meeting, the NMD Group also shared that in addition to leaving food and water, members of the group execute search-and-rescue efforts in response to requests from family members. This could result in the attempted recovery of human remains. FWS informed the NMD Group that there are a number of rescue beacons on the FWS Cabeza Prieta National Wildlife Refuge that are continuously monitored by the Border Patrol. When a rescue beacon is activated, there is immediate assistance by trained emergency response teams to include life-flight rescues out, if needed. Border Patrol also regularly patrols the area with staff highly trained in search and rescue. Additionally, FWS shared that law enforcement considers human remains found on the Refuge part of a potential crime scene. If discovered, these remains must not be disturbed until the area is investigated by the Pima County Sherriff's Office. (R2 – Southwest Region)

Fish and Aquatic Conservation
Nothing significant to report.

Migratory Birds
Nothing significant to report.

Science Applications
Nothing significant to report

Wildlife and Sport Fish Restoration
Nothing significant to report.

Tribal Consultation
REPEAT: Havasu National Wildlife Refuge Sacramento Wash Project - FWS seeking formal consultation on the Environmental Assessment for the Sacramento Wash Project at Havasu NWR with the Fort Mojave and Hualapai Tribes. No dates set. (R2 – Southwest Region)

REPEAT: Inter-Tribal Wildlife Summits - FWS is planning to host two additional Tribal Wildlife Summits, one in Arizona (October 3-5) and in New Mexico (November 7-9). These summits will include aspects of all FWS Divisions, including the Endangered Species Act, with a portion of the summit devoted to law enforcement training to assist Tribal Game Wardens and other Tribal agents. International Game Warden magazine, Spring 2017, published a story on the

FWS law enforcement training for Native American conservation officers. (R2 – Southwest Region)

Date:	Thursday, August 17, 2017 5:08:54 PM
Attachments:	FWS R2 Weekly Report FishBites 01September2017.docx

Hi all,
Attached is the Southwest Region's submission for the Weekly Report. Also included in the attached file is our contributions for FishBites and our significant Media Contacts.

The Havasu public information meeting is going very well. Low attendance. No controversy. The Mayor of Lake Havasu City and Penny Pew, District staffer from Rep Gosar's Office, attended. Good one-on-one conversations. The meeting will conclude in another hour.

Please let me know if you have any questions or need additional information.

Best,
Chris

FishBites Report

Expanded Hunting Opportunities in Oklahoma

- **Topic**: This week, FWS's Sequoyah National Wildlife Refuge near Vian, Oklahoma is proposing to expand public hunting opportunities on the Refuge through a new "Big Game, Upland Game, and Feral Hog Hunting Plan." The proposal is now available for a 30 day public review and comment in the Federal Register. See Refuges for details.
- **Supportive Stakeholders:** Oklahoma Department of Wildlife Conservation; local, regional, and national hunting community
- **Impacted Locations:** Vian, Oklahoma and other areas

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
NPR Proposed border wall at Santa Ana NWR	Week of Aug 14	Reporter requested interview, either on the record on background. No interviews by FWS being granted at this time. Official statement shared with Reporter. Reporter attended protest this past weekend. More stories planned on proposed wall.
AZ Central Mexican wolf draft plan	Week of Aug 14	Reporter requested some answers to questions regarding the Mexican wolf draft recovery plan, first revision. The questions revolved around the Mexican wolves historical range, ranchers having telemetry receivers, and the livestock depredation compensation programs.
KVOI radio Mexican wolf draft plan	Week of Aug 14	Reporter interviewed member of the Mexican Wolf Team for an on-air radio interview with KVOI radio out of Tucson, AZ. The interview focused on the Mexican wolf draft recovery plan.
Texas Tribune Dunes sagebrush lizard	Week of Aug 14	Reporter asked about information in the Texas Comptroller's July Report for the Dunes sagebrush lizard Texas Conservation Plan related to sand mining activities in west Texas.
Community Impact News LCRA Scoping Meeting	Week of August 14	Reporter attended Austin, Texas public meeting. She had questions related to the LCRA Scoping process and the habitat conservation plan process.
3 media Havasu NWR draft CD	August 18	Three reporters attended the Lake Havasu City, Arizona public meeting on the revised draft CD for Havasu National Wildlife Refuge. Media: Today's News Herald, Arizona Wildlife Outfitters (freelancer), and Needles Desert Star.

Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel

August 14 to August 21 – FWS holding scoping meetings on Lower Colorado River Authority Transmission Habitat Conservation Plan, Texas. See Other ES Items of Note. (R2 – Southwest Region)

August 17 – FWS Havasu National Wildlife Refuge (AZ) held a public listening session on revised draft Compatibility Determination (CD) for recreational boating. Draft CD being well received in the community. Comment period closes August 30. See Refuges for details. (R2 – Southwest Region)

August 18 – FWS closes comment period for draft Environmental Assessment for Valle de Oro National Wildlife Refuge. See Refuges for details. (R2 – Southwest Region)

August 22 - FWS will hold a public meeting regarding the application for a section 10(a)(1)(B) incidental take permit (ITP) from Barton Springs Edwards Aquifer Conservation District (BSEACD) ITP. See Other ES Items of Note. (R2 – Southwest Region)

September 1 – The Outdoors Alliance for kids expressed interest in having an event on FWS Valle de Oro National Wildlife Refuge to celebrate the third year of the Every Kid in a Park pass. See Refuges for details. (R2 – Southwest Region)

Hot Topics - Week Ahead Announcements and Actions

August 18 – FWS anticipates publishing a notice announcing the receipt and consideration of applications for permits under the approved Industry Conservation Plan for American Burying Beetle in Oklahoma. See ES Items of Note for details. (R2 - Southwest Region)

In August – FWS expects to receive the final results of the Western Association of Fish and Wildlife Agencies (WAFWA) aerial surveys for the lesser prairie chicken. (R2 – Southwest Region)

August 29 – FWS closes comment period on Mexican Wolf draft revision of recovery plan. (R2 – Southwest Region)

Upcoming Workshops & Meetings

August 14 to August 21 – Scoping Meetings on Lower Colorado River Authority Transmission Habitat Conservation Plan, Texas currently taking place. See ES items of Note for details. (R2 – Southwest Region)

Endangered Species Act Recovery Actions

NEW: Guadalupe fescue final listing and critical habitat determinations: In September the FWS will publish a final listing and critical habitat determination for Guadalupe fescue. On September 9, 2016, the FWS published a proposal to list Guadalupe fescue as an endangered

species and designate critical habitat. The plant occurs entirely in Big Bend National Park, Brewster County, Texas. We received no requests for a public hearing and we received no substantive public comments after two public comment periods. The final rule will list Guadalupe fescue as endangered and designate approximately 7,815 acres of critical habitat. Outreach is planned including the distribution of a news release and FAQ, as well as posts on the web and social media. (R2-Southwest Region)

REPEAT: Mexican Wolf Draft Recovery Plan, First Revision (draft recovery plan). FWS announced the availability of the draft recovery plan on June 30. The comment period ends August 29. Public meetings were held at the following dates and locations: July18, Flagstaff, Arizona (120 people); July 19, Pinetop, Arizona (45 people); July 20, Truth or Consequences, New Mexico (130 people); and July 22, in Albuquerque, New Mexico (80 People). Each event had about 30 to 40 demonstrators in front of the meeting location. Paul Kienzle, Chairman, New Mexico State Game Commission presented a comment on his personal standing saying he supported the intent of the recovery plan and looked forward to working together. Meetings saw mixed support in favor and against recovery efforts. During the public comment period, FWS will continue seeking review and comment on the peer-reviewed draft revision from local, State, and Federal agencies; Tribes; and the public, in both the United States and Mexico. Due to the high level of visibility and controversy on Mexican wolf recovery in general, extensive outreach is on-going, including personal phone calls, email reminders, public meetings and updated web postings. Follow up briefings after the comment period closes are being planned. (R2 – Southwest Region)

REPEAT: In late October, FWS will publish a 12-month finding on the listing status of the southwestern willow flycatcher. Pacific Legal Foundation petitioned FWS to delist the flycatcher and in March 2016 we published a 90-day finding that the petition included substantial information, primarily regarding the subspecies' taxonomy. Upon robust consideration of the petition and the flycatchers' classification, the Southwest Region is completing a 12-month finding that delisting of the southwestern willow flycatcher is not warranted. Outreach is being planned – including a news release and Congressional notifications via email. Interest expected to be moderate. No controversy anticipated. (R2 – Southwest Region)

REPEAT: Houston Toad Safe Harbor Agreement – This Fall, FWS expects to announce the approval of the Texas Parks and Wildlife Department (TPWD) enhancement of survival permit pursuant to section 10(a)(1)(A) of the Endangered Species Act, as well as the 30-year Programmatic Safe Harbor Agreement (SHA) for the Houston toad between TPWD and FWS. The agreement will cover voluntary activities to restore, maintain, enhance, or create habitat for the endangered Houston toad in the following nine Texas counties: Austin, Bastrop, Burleson, Colorado, Lavaca, Lee, Leon, Milam and Robertson. Congressional interest from Rep McCaul (R TX Dist10) based on impacts from 2011 Bastrop fire. A conference call was held with Rep McCaul's Office to provide an update on the SHA in late July. A site visit is tentatively being planned to occur in September. Outreach planned – Congressional notification via email, a news release will be issued and posts will be made on the web and through Social media. (No FRN required). (R2 – Southwest Region)

REPEAT: American Burying Beetle Species Status Assessment - FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed in early September. In June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

Endangered Species Act Listing Actions

REPEAT: FWS announced on August 10, a 6-month extension of the final determination of whether to add the Texas hornshell a freshwater mussel species from New Mexico, Texas, and Mexico, to the List of Endangered and Threatened Wildlife. FWS is also reopening the comment period on the proposed rule to list the species, for an additional 30 days. FWS is taking this action to extend the final determination based on substantial disagreement regarding the status of Texas hornshell in Mexico. FWS will submit a final listing determination to the Federal Register on or before February 10, 2018. Historically, the Texas hornshell occurred in New Mexico, Texas and Mexico. However, the population has declined notably throughout its range and it currently occupies about 15% of its U.S. historical range. The Texas hornshell was designated a candidate in 2001 and FWS was petitioned to list the species in 2004. FWS published a proposed rule to list the Texas hornshell as endangered on August 10, 2016. On July 6, 2017, FWS announced the availability of a draft Candidate Conservation Agreement and Candidate Conservation Agreement with Assurances (CCA/CCAA) that would cover the Texas hornshell and four other species. The public comment period for the draft CCA / CCAA closed on August 7. Local interest is anticipated. A news release was issued and information was posted on Facebook at the time of publication in the *Federal Register*. Ranking 3. (R2-Southwest Region)

REPEAT: In September – FWS anticipates sending to the *Federal Register* 12-month findings on petitions including one to list the San Felipe gambusia, a Texas fish. (R4 – Southeast Region, R2 – Southwest Region (lead)

REPEAT: FWS anticipates publishing a final determination on the proposal to list the Sonoyta mud turtle as endangered under the Endangered Species Act on or before September 21. The Sonoyta mud turtle occurs in the U.S. only at Organ Pipe Cactus National Monument in southern Arizona, and four locations in the Rio Sonoyta basin in Sonora Mexico. Controversy level is low. A communications strategy news release and set of FAQs are being drafted. (R2 – Southwest)

UPDATED: Lesser Prairie-Chicken Species Status Assessment – FWS anticipates a Species Status Assessment (SSA) for the lesser prairie-chicken (LPC) will be completed by the end of the calendar year. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. USGS, through its Open File Report (OFR), made available the population model it prepared for FWS. The population model represents one component of the SSA and will be considered alongside of

all other available information. On August 25, the draft SSA report will be will be sent to our external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) that we've been coordinating with throughout development of the SSA. The following week, August 28, the draft report will be sent out for external, independent scientific peer review through a third-party contractor. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. The Lesser Prairie Chicken Advisory Council is scheduled for a conference call the week of August 7. The agenda includes the FWS SSA, Industry Updates, and Conservation Updates. (R2 Southwest Region & R6 Mountain-Prairie Region)

Other Ecological Services Items of Note

NEW: Bone Cave Harvestman Species Status Assessment – FWS Austin Ecological Services Office completed a draft species status assessment for the Bone Cave harvestman. The assessment will be sent out for external, independent scientific peer review in the coming weeks. Concurrently with peer review of the species status assessment, FWS will host representatives from the City of Austin, Texas Parks and Wildlife Department, Travis County, and Williamson County to detail the methodology used to analyze ecological conditions at sites occupied by the Bone Cave harvestman. Comments and information provided by the peer review and site analysis meeting will be incorporated into the species status assessment. The final species status assessment will inform a 5-year review to be completed for the Bone Cave harvestman in fiscal year 2018. (R2-Southwest Region)

UPDATED: Villages at Vigneto Development Endangered Species Act Consultation [Arizona] – FWS Arizona Ecological Services is undergoing ESA section 7 consultation with Army Corps of Engineers regarding a planned 12,200-acre, 28,000-home development near the San Pedro River in southern Arizona and a 141-acre off-site mitigation project on the river. The FWS and Corps continue to disagree on the scope of effects (which the Corps insists includes only the fill of WOTUS and limited indirect impacts; we and our counsel believe the ESA regulations' require consultation on all areas to be directly and indirectly affected by the action, including interdependent and interrelated actions (including water use)). The applicant's counsel agrees with the Corps' position and the Corps is considering elevating the issue. Six-plaintiff litigation filed against the Corps on this project/issue is pending. Local and regional media have covered the story; if the consultation on the project is elevated at a policy level, national media interest is anticipated. (R2 – Southwest Region)

UPDATED: FWS currently holding scoping meetings on Lower Colorado River Authority Transmission Habitat Conservation Plan, Texas – On July 31, FWS published in the *Federal Register* a Notice of Intent to prepare a draft National Environmental Policy Act (NEPA) Analysis on the proposed Lower Colorado River Authority Transmission Services Corporation's (applicant's) Habitat Conservation Plan. The Habitat Conservation Plan and incidental take permit from FWS, if issued, will provide the applicant with compliance under the Endangered Species Act for activities, including construction and maintenance, of their electric transmission lines throughout Texas. Four public scoping meetings will be held in Texas in August. A news bulletin was issued and information was posted on Facebook after the notice published in the *Federal Register*. The public meetings in Corpus Christi and Austin, Texas, were lightly attended

by the public and there was no controversy. The dates and locations for the open houses are as follows:

- August 14, Owen R. Hopkins Library, Corpus Christi, Texas, from 5-7 pm
- August 15, LCRA Dalchau Service Ctr., Austin, Texas, from 6-8 pm
- August 17, MLK Community Center, Midland, Texas, from 6-8 pm
- August 21, Staybridge Suites, College Station, Texas, from 6-8 pm

(Region 2 –Southwest)

REPEAT: In early October – FWS anticipates publishing a notice announcing the receipt of application and consideration of an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake.

REPEAT: Lesser Prairie-Chicken (LPC) Aerial Survey - FWS expects to formally receive the official results of the Western Association of Fish and Wildlife Agencies (WAFWA) aerial surveys for the LPC in the near future. WAFWA issued a news release on June 29, 2017, publically announcing the results of the survey. The announcement confirms an increase in the range-wide population estimate due to favorable precipitation patterns over the past few years across the Great Plains. WAFWA noted LPC population increase/decreases are very closely tied to precipitation patterns across the Great Plains, and stated there may be a fluctuation in numbers from year to year. FWS also recognizes the importance of continuing annual reviews to examine long-term population trends and gain an accurate population assessment of the LPC. (R2-Southwest Region and R6- Mountain Prairie Region)

UPDATED: Texas Hornshell Candidate Conservation Agreement and two Candidate Conservation Agreement with Assurances – FWS announced consideration of a draft Candidate Conservation Agreement (CCA), draft Candidate Conservation Agreement with Assurances (CCAA), and draft environmental assessment for the Texas hornshell (proposed for listing) and other covered species (Rio Grande River cooter, gray redhorse, blue sucker and Pecos springsnail), and an enhancement of survival permit application under the Endangered Species Act submitted by the Center of Excellence on July 6. The covered area would include portions of Eddy County, New Mexico, and Culberson County, Texas. The CCA, CCAA, and the associated section 10(a)(1)(A) enhancement of survival permit will have duration of 30 years. The FWS's New Mexico Ecological Field Office has been working for several years with the applicant to develop the CCAA on non-Federal lands and the applicant and the Bureau of Land Management to develop the CCA on Federal lands. (The proposed listing of the Texas hornshell may be controversial in both Texas and southern New Mexico. A six month extension will be on the final listing determination was published on August 10, 2017.) A news release and FAQs were distributed to the states, partners, congressional staff and media and the notice was published inthe *Federal Register* on July 6. Substantial local stakeholder outreach has been conducted for CCA / CCAA. (R2-Southwest Region)

REPEAT: Delaware River (TX/NM) Spill - On August 1st the FWS was notified that there was a ruptured pipeline that spilled approximately 18,000 barrels of produced water mixed with some oil into the Delaware River. The spill occurred in Texas upstream of where the Delaware flows into New Mexico. The company, Cimarex, sent out cleanup crews that deployed booms. A large pulse of chlorides was released into the river, but most of the oil was contained at the spill

site. No sign of oil has reached the occupied site for the Texas hornshell (proposed endangered), though produced water with high chlorides did flow through that site. Texas Parks and Wildlife Department (TPWD) reported that 155 fish were killed in the event, near the spill. FWS and New Mexico Game and Fish are not planning to survey for Texas hornshell until water quality tests confirm that it is safe to do so. (R2-Southwest Region)

UPDATED: FWS anticipates publishing two notices announcing the receipt and consideration of applications for permits under the approved Industry Conservation Plan for American Burying Beetle in Oklahoma. These applicants cover incidental take of American Burying Beetle for Oil and Gas development, extraction, and transport within the species range in eastern Oklahoma. This conservation plan reduces the time in acquiring an incidental take permit. With the 30 day public review, some permits may take longer (up to 105 days). These notices are published in the *Federal Register* on regular basis as companies apply for incidental take coverage under this conservation plan. (R2 Southwest Region)

UPDATED: Leander Independent School District (LISD) ITP – In the coming weeks, FWS will announce in the *Federal Register* a Notice of Intent to prepare a draft National Environmental Policy Act (NEPA) Environmental Assessment on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. Recently LISD submitted a draft habitat conservation plan and incidental take permit (ITP). The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Local interest is anticipated. Outreach, including issuing a news bulletin, will occur at time of publication in the *Federal Register*. (R2 – Southwest Region)

UPDATED: San Antonio HCP, Texas – FWS anticipates publishing a Notice of Availability in early September a draft Habitat Conservation Plan and Incidental Take Permit request from the San Antonio Water Systems for the incidental take of five federally-listed karst invertebrates (collectively the Covered Karst Invertebrates): Madla's Cave meshweaver; Robber Baron Cave meshweaver; Braken Bat Cave meshweaver; and two species of ground beetles with no common names (Rhadine infernalis and Rhadine exilis). The Covered Karst Invertebrates are associated with the construction of two water pipelines in Bexar County, Texas. Once issued, the permit would be in place for 15 years. Controversy anticipated being low. Minimal outreach, including issuing a news bulletin locally is planned at time of publication in the *Federal Register*. Congressional Offices will be notified via email, a news release will be issued as well as web postings. (R2 – Southwest Region)

UPDATED: Barton Springs Edwards Aquifer Conservation District (BSEACD) ITP - FWS will hold a public meeting on August 22 regarding the application for a section 10(a)(1)(B) incidental take permit (ITP), pursuant to the Endangered Species Act, from the BSEACD. The application is for the incidental take of the federally listed Barton Springs salamander and the Austin blind salamander for pumping withdrawals within the Barton Springs segment of the Edwards Aquifer (Aquifer) implemented, authorized, or permitted by BSEACD in portions of Travis and Hays Counties, Texas. FWS also anticipates releasing a draft Environmental Impact Statement (dEIS) analyzing the effects of issuing a proposed incidental take permit based on the draft Habitat

Conservation Plan. A public meeting will be held on August 22, 2017, from 6 to 8 pm at the BSEACD office, in Austin, Texas. Local interest anticipated. Outreach, including issuing a news bulletin locally on July 17, was conducted following publication in the *Federal Register*. (R2 – Southwest Region)

REPEAT: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review this summer (August). The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in December 2017. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2-Southwest)

National Wildlife Refuge Actions

NEW: Expanded Hunting Opportunities in Oklahoma - This week, FWS's Sequoyah National Wildlife Refuge near Vian, Oklahoma is proposing to expand public hunting opportunities on the Refuge through a new "Big Game, Upland Game, and Feral Hog Hunting Plan." Currently, the Refuge conducts white-tailed deer hunts through the Oklahoma Department of Wildlife Conservation's controlled hunt program. The Hunt Plan proposes an additional 8,029 acres of the Refuge be opened to these deer hunts. The Refuge also currently offers rabbit and squirrel hunting (upland game). The Hunt Plan proposes an additional 1,193 acres of the Refuge be opened to upland game hunting. Lastly, it proposes hunters participating in big game hunting and upland game hunting be allowed incidental take of feral hogs (no bag limit). The proposal is now available for a 30 day public review and comment in the Federal Register. Stakeholders include the Oklahoma Department of Wildlife Conservation, local, regional, and national hunting community. Not expected to be controversial. Potentially of Congressional interest to entire Oklahoma delegation (Senators Inhofe (R) and Lankford (R)).

REPEAT: The Outdoors Alliance for kids expressed interest in having an event to celebrate the third year of the Every Kid in a Park pass on FWS Valle de Oro National Wildlife Refuge in Albuquerque, New Mexico, September 1. The Outdoors Alliance is hoping to have Senator Heinrich (D NM) as a guest speaker, along with representation from other federal agency partners (National Park Service, Forest Service and the Bureau of Land Management, as well as nonprofit partners (friends group, Wilderness Society, Sierra Club, Middle Rio Grande E3 Alliance). Focus of the event will be on benefits to students. Fourth graders will receive park passes during the event. Educational activities are also planned. Open to the media and the public. The Outdoor Alliance, in coordination with partners, will conduct outreach. On July 10, Senator Heinrich (D NM) introduced S.1522, Every Kid Outdoors Act. (R2 – Southwest Region)

REPEAT: FWS Valle de Oro National Wildlife Refuge Draft EA – On July 18, FWS made a draft Environmental Assessment (EA) for FWS Valle de Oro National Wildlife Refuge in Albuquerque, New Mexico, available for public review for 30 days. FWS held a public meeting on August 2, to provide interested parties an opportunity to learn more about the EA. More than

100 people attended the meeting, including staffers from Senators Udall (D NM), Heinrich (D NM) and Rep Michelle Lujan-Grisham (D NM Dist. 1). The majority of comments heard are in favor of the EA. Prior to releasing the draft, FWS consulted with vested partners to develop the draft EA, including Kirtland Air Force Base (KAFB) and the Federal Aviation Administration. As the urban refuge is in close proximity to the base's flight path, KAFB had concerns associated with potential aircraft bird strikes. Of primary concern was related to the habitat restoration plans for seasonal wetlands. KAFB believes wetlands may attract large-bodied birds (geese, cranes and ducks) to travel in flight patterns. FWS intends to continue coordinating with the Federal Aviation Administration and KAFB throughout this process to minimize concerns of wildlife hazards (aircraft bird strikes). On July 13, FWS met with Kirtland to discuss final edits to the draft before making it available to the public. Advance notifications made to Senators Heinrich (D NM) and Udall (D NM) and to Rep. Michelle Lujan-Grisham. A news release was issued to the media and posted online. Bulletins and fliers are posted and shared with partners and the Friends group. The public comment closes August 18. (R2 – Southwest Region)

UPDATED: [As of 5:01pm (AZ) on August 17.] Havasu National Wildlife Refuge Revised Draft Recreational Boating Compatibility Determination (CD) – FWS holding public information meeting on August 17 on the Havasu National Wildlife Refuge (AZ) revised draft Compatibility Determination (CD) for recreational boating. The draft CD was made available for comment on July 27. Comments are being accepted for 30-days, with the public comment period closing on August 30. A previous version was pulled from consideration after the FWS received a substantial number of public comments seeking reconsideration on the draft. The FWS determined more deliberation was required and an updated draft was developed. The media (Havasu News) received a copy of the draft from one of the members of the MOU. FWS has been actively conducting outreach - Partners, and vested parties, including members of the MOU group, as well as Members of the Arizona Delegation receive periodic updates and advance information. The early part of the public meeting from noon to 4:30p was lightly attended, with favorable comments. Rep Gosar's Office sent a representative. The Mayor of Lake Havasu City attended in a show of support of the draft CD. A final tally and summary of the meeting that ends at 6pm will be submitted later. A news release and social media postings were posted in advance of the public comment period, along with FAQs, maps and other information in addition to the draft CD. (R2 – Southwest Region)

REPEAT: Fever Ticks Continue to be a Threat to Cattle Industry in Texas – FWS met with Texas Animal Health Commission (TAHC) and U.S. Department of Agriculture-Animal and Plant Health inspection Service regarding fever tick treatment at the Laguna Atascosa National Wildlife Refuge on August 8. A summary of the report will be available in the near future. FWS is committed to continuing discussions and proactive actions in cooperation with the USDA, the Texas Animal Health Commission, private ranchers and others to aid in the battle to combat the fever tick. The fever tick is detrimental to the Texas cattle industry and can be spread by cattle and deer. It may also potentially be spread by an invasive exotic species (the nilgai, an Asian antelope). The FWS Laguna Atascosa NWR remains under quarantine at this time. Proactive measures to combat the fever tick include a Nilgai herd reduction plan and prescribed burns in select areas. Additionally, FWS, in consultation with the USDA, issued a biological opinion (BO) in January 2016 for use of Ivermectin-laced corn outside of FWS Refuge lands. The BO discusses potential effects to ocelots, jaguarundis, and aplomado falcons from use of Ivermectin-

laced corn in deer feeders to treat ticks on deer on private property. Local media interest remains high. High Congressional interest from Senator Cornyn (R TX), Rep. Conaway, Rep. Vela (D TX Dist. 34), and the House Agriculture Committee. Members have requested periodic updates. (Background previously reported in August 2016 and earlier.) (R2 – Southwest Region)

Border-Related Activities

REPEAT: On August 9, 2017, FWS met with representatives of U.S. Customs and Border Protection (CBP) to consider the potential for locating rescue beacons to a remote area of the Cabeza Prieta National Wildlife Refuge. This is an area where more than a dozen human remains of illegal border crossers (CBVs) have been recovered over the past several years. The presence of rescue beacons – a prefabricated 4 X 4 ft. concrete base on which a 20 ft. tall steel pole, topped with a blue light visible for 10 miles, is bolted and powered by a solar panel – will allow individuals to press a button and be rescued by CBP within an hour. While the affected area is located within designated wilderness, the improved efficiency and effectiveness of search and rescue operations and subsequent reduction in deaths is expected to not only have a significant life-savings affect, but would reduce impacts to designated wilderness. The agencies anticipate having a final decision within the next 30 to 60 days. (R2 – Southwest Region)

REPEAT: Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require the transportation of water from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade / replace pump and water delivery components to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

REPEAT: Border Coordination: Road Construction - On March 20, FWS was contacted by the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to coordinate an upcoming road construction project for a 5.9-mile portion of the Presumido Canyon Road through the Baboquivari Mountains, scheduled to begin in January 2018. The project will require water for the construction, and U.S. Customs and Border Protection (CBP) will perform maintenance of an FWS pump and water well in return for increased use of the FWS-owned well. (R2 – Southwest Region)

REPEAT: Border Coordination: Communication Towers - On April 18, FWS and U.S. Customs and Border Protection (CBP) discussed advance planning for Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers (IFTP) located on and adjacent to the Buenos Aries National Wildlife Refuge. A total of two communication towers and four surveillance towers on the refuge would be affected, with the goal of upgrading technology and providing a more robust foundation – all within the original impact areas. Work is proposed to begin in January 2018 dependent upon completion of planning, engineering, and permitting. Follow-up conversations with FWS have occurred to determine the necessary special use permitting process. (R2 – Southwest Region)

REPEAT: Border Coordination: Restoration of roadways – On April 20, FWS was contacted by a U.S. Customs and Border Protection (CBP) contractor, to begin maintenance and repair on Buenos Aires National Wildlife Refuge on both the Garcia Road and Fresnal Road. The objective is to restore the roadways to a safe driving condition for both FWS and U.S. Border Patrol. Best Management Practices involved in the project include: performing work only within the existing road footprint; introducing no materials to the refuge; using designated parking, staging areas, and vehicle turnouts; washing equipment to minimize introduction of non-native species; and utilizing drip pans at staging and parking areas to minimize the effects of potential fuel or oil leaks. (R2 – Southwest Region)

REPEAT: Group Seeking to Aid Border Crossers – On June 1, FWS was informally notified that the U.S. Attorney's Office is seeking a meeting between FWS, Park Service and volunteers with the humanitarian group, No More Deaths. A formal request has not been received and no date is set for a meeting. On April 28, FWS met with representatives of No More Deaths (NMD Group), a humanitarian group based out of southern Arizona. Members of the NMD Group routinely place food, clothing and water on the landscape to aid stranded border crossers. This leads to an accumulation of debris scattered within the Refuge. The NMD Group wants to expand on these efforts to include leaving items in remote sites including designated wilderness areas. This group is seeking permission for off-road access in areas closed to public vehicle use. (The NMD Group understands that failure to have authorization could result in a citation.) During the meeting, the NMD Group also shared that in addition to leaving food and water, members of the group execute search-and-rescue efforts in response to requests from family members. This could result in the attempted recovery of human remains. FWS informed the NMD Group that there are a number of rescue beacons on the FWS Cabeza Prieta National Wildlife Refuge that are continuously monitored by the Border Patrol. When a rescue beacon is activated, there is immediate assistance by trained emergency response teams to include life-flight rescues out, if needed. Border Patrol also regularly patrols the area with staff highly trained in search and rescue. Additionally, FWS shared that law enforcement considers human remains found on the Refuge part of a potential crime scene. If discovered, these remains must not be disturbed until the area is investigated by the Pima County Sherriff's Office. (R2 – Southwest Region)

Fish and Aquatic Conservation
Nothing significant to report.

Migratory Birds
Nothing significant to report.

Science Applications
Nothing significant to report

Wildlife and Sport Fish Restoration
Nothing significant to report.

Tribal Consultation
REPEAT: Inter-Tribal Wildlife Summits - FWS is planning to host two additional Tribal Wildlife Summits, one in Arizona (October 3-5) and in New Mexico (November 7-9). These summits will include aspects of all FWS Divisions, including the Endangered Species Act, with a

portion of the summit devoted to law enforcement training to assist Tribal Game Wardens and other Tribal agents. International Game Warden magazine, Spring 2017, published a story on the FWS law enforcement training for Native American conservation officers. (R2 – Southwest Region)

Hi Ben,

We prepared 17 briefing papers for the Secretary's budget hearings that would be useful for the SOL nominee's background on current issues, which are attached.

We would also recommend that you check with Chris Salotti in OCL, if you haven't already, to see if they have background that was prepared for confirmation hearings.

We are looking to create a list of questions that our nominee might get asked that relate to FWS (mostly ESA, probably, but other issues as well (e.g., MBTA, refuge hunting). Of course, we will focus on legal issues, but anything you have off the shelf that we could borrow from would be helpful.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: McCollum, Udall, Feinstein, Stewart, Bishop
ISSUE: Southwest Border Law Enforcement and Conservation Issues

I. ISSUE BACKGROUND

- There are eight National Wildlife Refuges along the U.S.-Mexico border, three in Texas, two in California and three in Arizona. FWS has 18 Federal Wildlife Officers (FWO) that cover these refuges.
- The FWOs at border refuges provide safety and security for visitors and protect fish, wildlife, cultural, and archaeological resources. Additionally, working closely with DHS, they address border issues that spill onto refuges, including drug and human trafficking and fatalities of undocumented immigrants.
- These refuges also face increased habitat degradation from significant amounts of human trash and waste left on site, escaped camp fires, sewage spills, and trail and road erosion. Additional trash is generated on Arizona border refuges by humanitarian organizations who, contrary to refuge regulations, leave stock piles of food, water, and clothing for illegal border crossers.
- Many native animals, like pronghorn antelope and ocelots, migrate across the Southwest border; physical barriers could also affect movement of wildlife and could affect surface water movement, causing local flooding.
- Sec. 102. of the REAL ID Act (P.L. 109-13), signed into law in 2005, gives the Department of Homeland Security authority to waive most environmental laws, including the National Environmental Policy Act (NEPA) and Endangered Species Act (ESA), to ensure expeditious construction of barriers and roads.

II. POSITION of INTERESTED PARTIES

- Some Congressional Members have expressed concern about the cost of expanding and maintain a wall along the border, and the impact it may have on conservation of species and habitat in the area.

III. RECENT CONGRESSIONAL ACTIVITY

- Congress released a bill on April 30, 2017, that does not include funding for the border wall.
- Other Members have explained how effective border security protects the environment by deterring illegal activity and border crossings.

IV. NEXT STEPS/ OUTLOOK

- It is anticipated that the Administration's FY 2018 Budget Request will include a request for funding for the border wall.

---

Dear all,
Please see attached the Southwest Region's contributions for FishBites, Media Contacts and the Weekly Report.

I have returned from travel and will be in the office in the morning. Please let me know if you have any questions or need any additional information.

Best,
Chris

Christine R. Tincher
Congressional Liaison / Public Affairs Specialist
U.S. Fish & Wildlife Service - Southwest Region
New Mexico * Arizona * Texas * Oklahoma

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service
Through September 15, 2017

FishBites Report

Full Extent of Damage from Hurricane Harvey yet to be known

- **Topic**: Numerous FWS facilities and national wildlife refuges along the Gulf Coast of Texas remain closed due to impacts from Hurricane Harvey. There is little relief at this point as the area continues to be hit with unprecedented rainfall. All FWS employees who work and live in the area are accounted for and safe. Many of these employees were evacuated (damage to their homes and full loss of personal belongings is not yet known). Damage assessments to FWS lands and facilities will be conducted once conditions are deemed safe. Currently the impacted areas are inaccessible. It is anticipated that access to these areas may not occur for up to two weeks. Hurricane Harvey made landfall late Friday, August 25, at Rockport, Texas as a *Category 4 hurricane*. Facilities and offices will remain closed until further notice. FWS will post updates and issue reopening notices when the areas are cleared. Recognizing the impacts of these tropical rains expand far beyond the resources managed by FWS, the agency is providing all possible support to the incident command team, and is prepared to deploy all available resources as needed to aid in rescue operations and recovery.
- **Supportive Stakeholders:** The entire Nation has eyes on impacts from this natural disaster, Members of Congress, other federal and state agencies and many others
- **Impacted Locations:** Greatly impacted southern Texas along the coast and other areas

FWS Valle de Oro National Wildlife Refuge Draft EA

- Topic: On August 30, FWS completed the Environmental Assessment for the first named urban FWS refuge in the Southwest - the Valle de Oro National Wildlife Refuge, Albuquerque, New Mexico. The EA lays out a range of management alternatives for fulfilling the refuge's purpose while analyzing environmental impacts of each alternative, providing refuge history and incorporating public comments. Considered by many to be an "oasis," this urban refuge is situated just outside the City of Albuquerque, alongside the Rio Grande River. Comprised of 570 acres - and significant water rights - this urban jewel provides a place for people to get outside and truly enjoy nature in their own "backyard." Additionally, acquisition of the water rights is expected to greatly aid in the restoration of the Middle Rio Grande.
- **Supportive Stakeholders:** Tremendous support from the New Mexico Delegation – Senators Udall and Heinrich and Rep Michelle Lujan-Grisham (D NM Dist 1), Bureau of Reclamation, other many other partners, the local community and nearby school districts
- **Impacted Locations:** Albuquerque, New Mexico

FWS Sequoyah National Wildlife Refuge to open more land to hunting

- **Topic**: FWS Sequoyah National Wildlife Refuge in eastern Oklahoma, near Vian is proposing expanding hunting on an additional 8,029 acres for white-tailed deer hunts. Another 1,193 acres is proposed to be open to rabbit and squirrel hunting. Also, big game and upland game hunters is being proposed to allow a no-bag-limit take of feral hogs. The comment period on this proposal ends September 11. If approved, the new hunting

areas would be put in effect for the 2018-19 hunting season. The Refuge conducts white-tailed deer hunts through the Oklahoma Department of Wildlife Conservation's controlled hunt program.

- **Supportive Stakeholders:** The Oklahoma Department of Wildlife Conservation, local hunting community and supported by Congressional Members in Oklahoma
- **Impacted Locations:** Oklahoma

Increased hunter access to FWS public lands

- **Topic:** FWS Buenos Aires National Wildlife Refuge re-opened 3,500 acres along the southern border to hunting. These lands were closed to all public use/visitation in 2006 due to national security concerns along the border. The area was re-opened to the public in 2015 for recreational use/visitation, but remained closed to hunting. This area is now open to hunting effective August 14. The Arizona archery deer season opened August 25.
- **Supportive Stakeholders:** Arizona Game and Fish Department, local hunting community and Congressional Members in Arizona
- **Impacted Locations:** Buenos Aires NWR, Sasabe, Arizona

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
Multiple media Sonoran Desert bald eagle	Expecting coverage to continue for next couple of weeks	9th Circuit rules against endangered status for Sonoran Desert bald eagles. FWS is deferring all inquiries to the Department of Justice.
National Geographic Border Wall/ocelots	Unknown	Reporter with National Geographic Magazine contacted FWS seeking information on ocelot recovery efforts in Texas. Information was provided on ocelot conservation program. Reporter had follow up questions about potential border wall impacts on ocelots and was provided official/approved statement.
Media Topic		

Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel

September 5 – FWS Refuge Manager meeting with Rep Michelle Lujan-Grisham's (D NM Dist 1) District Director to provide a tour of the urban refuge, Valle de Oro National Wildlife Refuge (R2 – Southwest Region)

September 13 – FWS meeting with Leander School District (HCP applicant) regarding a proposal for secondary access through a preserve. See ES Items of note for details. (R2 – Southwest Region)

Hot Topics - Week Ahead Announcements and Actions

See Hurricane Harvey news above.

FWS plans to remove the endangered Gila chub and its critical habitat from the Federal List of Endangered and Threatened Wildlife due to taxonomic change in the coming weeks. See ESA Recovery Actions for details. (Delisting: R2-Southwest Region. SSA: Regions 2 and 6.)

August 28 - The 9th Circuit Court of Appeals affirmed FWS' 2012 decision that bald eagles residing in the Sonoran Desert are not a distinct population segment eligible for listing under the ESA. See details under ESA Listing Actions (R2- Southwest Region)

August 29 – FWS closed the comment period on Mexican Wolf draft revision of recovery plan. FWS received more than 9,400 comments. The New Mexico Department of Game Commission voted to support the recovery plan. The Arizona Game and Fish Department is seeking clarification on the States' role. (R2 – Southwest Region)

August 30 – FWS joined the Forest Service and grazing permittee in a tour of a Lincoln National Forest grazing allotment following a request by Robert MacGregor, Legislative Assistant with the Office of Rep Pearce (R NM Dist 2), to discuss New Mexico Meadow jumping mouse. Rep Pearce is seeking resolution to the concerns of the permittee that will also meet the needs of species and its critical habitat. (R2 – Southwest Region)

In September – FWS expects to receive the final results of the Western Association of Fish and Wildlife Agencies (WAFWA) aerial surveys for the lesser prairie chicken. (R2 – Southwest Region)

Upcoming Workshops & Meetings

September 18-22 – FWS, the U.S. Forest Service and Arizona Game and Fish Department are conducting the annual census of the Mount Graham red squirrel. See more in previous reports. (R2 – Southwest Region)

September 19 – FWS was invited by the City of Brownsville, Texas to participate in an Eco Tourism media and legislative tour in Hidalgo and Cameron counties. See Refuges for details. (R2 – Southwest Region)

Endangered Species Act Recovery Actions

NEW: DELISTING - FWS plans to remove the endangered Gila chub and its critical habitat from the Federal List of Endangered and Threatened Wildlife due to taxonomic change. Gila chub was listed with critical habitat in Arizona in 2005. In April 2017, FWS withdrew a proposal to list the headwater and roundtail chubs as a result of new taxonomic information that the two former species and the Gila chub are a single species (identified as the roundtail chub). (Conducting section 7 consultation and ongoing recovery efforts for Gila chub – a taxon that is no longer recognized – is problematic.) FWS is initiating a status assessment of the now larger taxon of roundtail chub throughout its five-state range. Objections from some taxonomists, desert fishes professionals and environmental groups are anticipated. Communications planning is under development. (Delisting: R2-Southwest Region. SSA: Regions 2 and 6.)

UPDATED: Mexican Wolf Draft Recovery Plan, First Revision (draft recovery plan). The comment period for the draft revision of the Mexican Wolf Recovery Plan closed August 29. FWS estimates receiving more than 9,400 comments. On August 23, the New Mexico State Game Commission (NMSGC) voted to support the recovery plan (6 to 1). The Arizona Game and Fish Department is seeking clarification on the role the States will play in recovery and release of wolves. Public meetings were held at the following dates and locations: July18, Flagstaff, Arizona (120 people); July 19, Pinetop, Arizona (45 people); July 20, Truth or Consequences, New Mexico (130 people); and July 22, in Albuquerque, New Mexico (80 People). Each event had about 30 to 40 demonstrators in front of the meeting location. Paul Kienzle, Chairman, NMSGC presented a comment on his personal standing saying he supported the intent of the recovery plan and looked forward to working together. Meetings saw mixed support in favor and against recovery efforts. During the public comment period, FWS will continue seeking review and comment on the peer-reviewed draft revision from local, State, and Federal agencies; Tribes; and the public, in both the United States and Mexico. Due to the high level of visibility and controversy on Mexican wolf recovery in general, extensive outreach is on-going, including personal phone calls, email reminders, public meetings and updated web postings. Follow up briefings after the comment period closes are being planned. FWS anticipates the final plan will be completed by the end of November. (R2 – Southwest Region)

UPDATED: American Burying Beetle Species Status Assessment and 12-month finding – FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed prior to the issuance of a 12-month finding which is expected at the end of 2017. In June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

REPEAT: In late October, FWS will publish a 12-month finding on the listing status of the southwestern willow flycatcher. Pacific Legal Foundation petitioned FWS to delist the flycatcher

and in March 2016 we published a 90-day finding that the petition included substantial information, primarily regarding the subspecies' taxonomy. Upon robust consideration of the petition and the flycatchers' classification, the Southwest Region is completing a 12-month finding that delisting of the southwestern willow flycatcher is not warranted. Outreach is being planned – including a news release and Congressional notifications via email. Interest expected to be moderate. No controversy anticipated. (R2 – Southwest Region)

REPEAT: Houston Toad Safe Harbor Agreement – This Fall, FWS expects to announce the approval of the Texas Parks and Wildlife Department (TPWD) enhancement of survival permit pursuant to section 10(a)(1)(A) of the Endangered Species Act, as well as the 30-year Programmatic Safe Harbor Agreement (SHA) for the Houston toad between TPWD and FWS. The agreement will cover voluntary activities to restore, maintain, enhance, or create habitat for the endangered Houston toad in the following nine Texas counties: Austin, Bastrop, Burleson, Colorado, Lavaca, Lee, Leon, Milam and Robertson. Congressional interest from Rep McCaul (R TX Dist10) based on impacts from 2011 Bastrop fire. A conference call was held with Rep McCaul's Office to provide an update on the SHA in late July. A site visit is tentatively being planned to occur in September. Outreach planned – Congressional notification via email, a news release will be issued and posts will be made on the web and through Social media. (No FRN required). (R2 – Southwest Region)

Endangered Species Act Listing Actions

NEW: On August 28, the 9th U.S. Circuit Court of Appeals "affirmed the district court's summary judgment in favor of the U.S. Fish and Wildlife Service in an action brought by plaintiff environmental groups challenging the FWS's determination that the Sonoran Desert Area bald eagle was not a distinct population segment eligible for listing under the Endangered Species Act. In order to qualify as "distinct," the population segment must be both discrete and significant." In 2012, FWS determined that the Sonoran Desert Area bald eagle is a discrete population, but was not ecologically or biologically significant. Read the entire Opinion by Judge W. Fletcher at: http://cdn.ca9.uscourts.gov/datastore/opinions/2017/08/28/14-17513.pdf (R2 - Southwest Region)

NEW: FWS plans to remove the endangered Gila chub and its critical habitat from the Federal List of Endangered and Threatened Wildlife due to taxonomic change. Gila chub was listed with critical habitat in Arizona in 2005. In April 2017, FWS withdrew a proposal to list the headwater and roundtail chubs as a result of new taxonomic information that the two former species and the Gila chub are a single species (identified as the roundtail chub). (Conducting section 7 consultation and ongoing recovery efforts for Gila chub – a taxon that is no longer recognized – is problematic.) Following proposing to delist the Gila chub, FWS will conduct a status assessment of the now larger taxon of roundtail chub throughout its five-state range. Objection from some taxonomists, desert fishes professionals and environmental groups is anticipated. Communications planning is under development. (Delisitng: R2-Southwest Region. SSA: Regions 2 and 6)

UPDATED: Lesser Prairie-Chicken Species Status Assessment – FWS anticipates a Species Status Assessment (SSA) for the lesser prairie-chicken (LPC) will be completed by the end of the calendar year. FWS began work on a Species Status Assessment in the spring of 2015, prior

to the court ruling that vacated the listing of the LPC and the petition to relist the species. USGS, through its Open File Report (OFR), made available the population model it prepared for FWS. The population model represents one component of the SSA and will be considered alongside of all other available information. On August 25, the draft SSA report was sent to an external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) that FWS has been coordinating with throughout development of the SSA. The following week, August 28, the draft report will be sent out for external, independent scientific peer review through a third-party contractor. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. (R2 Southwest Region & R6 Mountain-Prairie Region)

REPEAT: Guadalupe fescue final listing and critical habitat determinations: In September the FWS will publish a final listing and critical habitat determination for Guadalupe fescue. On September 9, 2016, the FWS published a proposal to list Guadalupe fescue as an endangered species and designate critical habitat. The plant occurs entirely in Big Bend National Park, Brewster County, Texas. We received no requests for a public hearing and we received no substantive public comments after two public comment periods. The final rule will list Guadalupe fescue as endangered and designate approximately 7,815 acres of critical habitat. Outreach is planned including the distribution of a news release and FAQ, as well as posts on the web and social media. (R2-Southwest Region)

REPEAT: In September – FWS anticipates sending to the *Federal Register* 12-month findings on petitions including one to list the San Felipe gambusia, a Texas fish. (R4 – Southeast Region, R2 – Southwest Region (lead)

REPEAT: FWS anticipates publishing a final determination on the proposal to list the Sonoyta mud turtle as endangered under the Endangered Species Act on or before September 21. The Sonoyta mud turtle occurs in the U.S. only at Organ Pipe Cactus National Monument in southern Arizona, and four locations in the Rio Sonoyta basin in Sonora Mexico. Controversy level is low. A communications strategy news release and set of FAQs are completed. (R2 – Southwest)

Other Ecological Services Items of Note

NEW: FWS Partners with Steve Harvey Foundation, Texas – In late September or early October, the FWS Arlington Ecological Services Field Office will partner with the Steve Harvey Foundation and the Texas Parks and Wildlife Department to take a group of young Dallas boys fishing at a local pond. Over the last five years, the FWS and the Steve Harvey Foundation have partnered on a number of events aimed at getting inner city youth engaged in outdoor experiences. Supportive Stakeholders include The Steve Harvey Foundation, hunting and fishing community, and the Texas Parks and Wildlife Department (R2 – Southwest Region)

REPEAT: Leander Independent School District (LISD) ITP – In the coming weeks, FWS will announce in the *Federal Register* a Notice of Intent to prepare a draft National Environmental Policy Act (NEPA) Environmental Assessment on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. Recently LISD submitted a draft habitat conservation plan and incidental take permit (ITP). The HCP and ITP, if issued by FWS, will provide the applicant

with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. A meeting with the applicant is taking place on September 13. Local interest is anticipated. Of significant Congressional interest. Outreach, including issuing a news bulletin, will occur at time of publication in the *Federal Register*. (R2 – Southwest Region)

REPEAT: Texas Hornshell Candidate Conservation Agreement and two Candidate Conservation Agreement with Assurances – FWS announced consideration of a draft Candidate Conservation Agreement (CCA), draft Candidate Conservation Agreements with Assurances (CCAAs), and draft environmental assessment for the Texas hornshell (proposed for listing) and other covered species (Rio Grande River cooter, gray redhorse, blue sucker and Pecos springsnail), and an enhancement of survival permit application under the Endangered Species Act submitted by the Center of Excellence and New Mexico State Land Office on July 6. The covered area would include portions of Eddy County, New Mexico, and Culberson County, Texas. The CCA, CCAAs, and the associated section 10(a)(1)(A) enhancement of survival permits will have duration of 30 years. FWS's New Mexico Ecological Field Office has been working for several years with the applicants to develop the CCAAs on non-Federal lands; and the Bureau of Land Management to develop the CCA on Federal lands. (The proposed listing of the Texas hornshell may be controversial in both Texas and southern New Mexico. A six month extension on the final listing determination was published on August 10, 2017.) A news release and FAQs were distributed to the states, partners, congressional staff and media and the notice was published in the *Federal Register* on July 6. Substantial local stakeholder outreach has been conducted for CCA / CCAAs. A decision on the CCA / CCAAs is anticipated before September 15, 2017. A news release and FAQs will be shared with the states, partners, congressional staff and media. A *Federal Register* notice is not published with the final CCA/As. (R2-Southwest Region)

REPEAT: Delaware River (TX/NM) Spill - On August 1, FWS was notified that there was a ruptured pipeline that spilled approximately 18,000 barrels of produced water mixed with some oil into the Delaware River. The spill occurred in Texas upstream of where the Delaware flows into New Mexico. The company, Cimarex, sent out cleanup crews that deployed booms. A large pulse of chlorides was released into the river, but most of the oil was contained at the spill site. No sign of oil has reached the occupied site for the Texas hornshell (proposed endangered), though produced water with high chlorides did flow through that site. Texas Parks and Wildlife Department (TPWD) reported that 155 fish were killed in the event, near the spill. FWS and New Mexico Game and Fish are not planning to survey for Texas hornshell until water quality tests confirm that it is safe to do so. (R2-Southwest Region)

REPEAT: Bone Cave Harvestman Species Status Assessment – FWS Austin Ecological Services Office completed a draft species status assessment for the Bone Cave harvestman. The assessment will be sent out for external, independent scientific peer review in the coming weeks. Concurrently with peer review of the species status assessment, FWS will host representatives from the City of Austin, Texas Parks and Wildlife Department, Travis County, and Williamson County to detail the methodology used to analyze ecological conditions at sites occupied by the Bone Cave harvestman. Comments and information provided by the peer review and site analysis meeting will be incorporated into the species status assessment. The final

species status assessment will inform a 5-year review to be completed for the Bone Cave harvestman in fiscal year 2018. (R2-Southwest Region)

REPEAT: Villages at Vigneto Development Endangered Species Act Consultation [Arizona] – FWS Arizona Ecological Services is undergoing ESA section 7 consultation with Army Corps of Engineers regarding a planned 12,200-acre, 28,000-home development near the San Pedro River in southern Arizona and a 141-acre off-site mitigation project on the river. The FWS and Corps continue to disagree on the scope of effects (which the Corps insists includes only the fill of WOTUS and limited indirect impacts; we and our counsel believe the ESA regulations' require consultation on all areas to be directly and indirectly affected by the action, including interdependent and interrelated actions (including water use)). The applicant's counsel agrees with the Corps' position and the Corps is considering elevating the issue. Six-plaintiff litigation filed against the Corps on this project/issue is pending. Local and regional media have covered the story; if the consultation on the project is elevated at a policy level, national media interest is anticipated. (R2 – Southwest Region)

REPEAT: In early October – FWS anticipates publishing a notice announcing the receipt of application and consideration of an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake.

REPEAT: Lesser Prairie-Chicken (LPC) Aerial Survey - FWS expects to formally receive the official results of the Western Association of Fish and Wildlife Agencies (WAFWA) aerial surveys for the LPC in the near future. WAFWA issued a news release on June 29, 2017, publically announcing the results of the survey. The announcement confirms an increase in the range-wide population estimate due to favorable precipitation patterns over the past few years across the Great Plains. WAFWA noted LPC population increase/decreases are very closely tied to precipitation patterns across the Great Plains, and stated there may be a fluctuation in numbers from year to year. FWS also recognizes the importance of continuing annual reviews to examine long-term population trends and gain an accurate population assessment of the LPC. (R2-Southwest Region and R6- Mountain Prairie Region)

REPEAT: FWS anticipates publishing two notices announcing the receipt and consideration of applications for permits under the approved Industry Conservation Plan for American Burying Beetle in Oklahoma. These applicants cover incidental take of American Burying Beetle for Oil and Gas development, extraction, and transport within the species range in eastern Oklahoma. This conservation plan reduces the time in acquiring an incidental take permit. With the 30 day public review, some permits may take longer (up to 105 days). These notices are published in the *Federal Register* on regular basis as companies apply for incidental take coverage under this conservation plan. (R2 Southwest Region)

REPEAT: San Antonio HCP, Texas – FWS anticipates publishing a Notice of Availability in early September a draft Habitat Conservation Plan and Incidental Take Permit request from the San Antonio Water Systems for the incidental take of five federally-listed karst invertebrates (collectively the Covered Karst Invertebrates): Madla's Cave meshweaver; Robber Baron Cave meshweaver; Braken Bat Cave meshweaver; and two species of ground beetles with no common names (Rhadine infernalis and Rhadine exilis). The Covered Karst Invertebrates are associated

with the construction of two water pipelines in Bexar County, Texas. Once issued, the permit would be in place for 15 years. Controversy anticipated being low. Minimal outreach, including issuing a news bulletin locally is planned at time of publication in the *Federal Register*. Congressional Offices will be notified via email, a news release will be issued as well as web postings. (R2 – Southwest Region)

REPEAT: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review this summer (August). The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in December 2017. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2-Southwest)

National Wildlife Refuge Actions

NEW: See Hurricane Harvey information above.

UPDATED: FWS Valle de Oro National Wildlife Refuge EA Signed on August 30 – On July 18, FWS made a draft Environmental Assessment (EA) for FWS Valle de Oro National Wildlife Refuge in Albuquerque, New Mexico, available for public review for 30 days. FWS held a public meeting on August 2, to provide interested parties an opportunity to learn more about the EA. More than 100 people attended the meeting, including staffers from Senators Udall (D NM), Heinrich (D NM) and Rep Michelle Lujan-Grisham (D NM Dist. 1). The majority of comments heard are in favor of the EA. Prior to releasing the draft, FWS consulted with vested partners to develop the draft EA, including Kirtland Air Force Base (KAFB) and the Federal Aviation Administration. As the urban refuge is in close proximity to the base's flight path, KAFB had concerns associated with potential aircraft bird strikes. Of primary concern was related to the habitat restoration plans for seasonal wetlands. KAFB believes wetlands may attract large-bodied birds (geese, cranes and ducks) to travel in flight patterns. FWS intends to continue coordinating with the Federal Aviation Administration and KAFB throughout this process to minimize concerns of wildlife hazards (aircraft bird strikes). On July 13, FWS met with Kirtland to discuss final edits to the draft before making it available to the public. Advance notifications made to Senators Heinrich (D NM) and Udall (D NM) and to Rep. Michelle Lujan-Grisham. A news release was issued to the media and posted online. Bulletins and fliers are posted and shared with partners and the Friends group. The public comment closed August 18 and the EA was signed on August 30. (R2 – Southwest Region)

REPEAT: FWS participating in the annual Oklahoma Wildlife Expo September 23-24. The Expo celebrates Oklahoma's natural diversity and opportunities for the sporting enthusiasts and newcomers. From camping and outdoor skills to shooting sports, fishing and bird watching, Expo visitors have an opportunity to try their hands at two days of fun in the outdoors. Held annually in Guthrie, Oklahoma, the event is hosted by the Oklahoma Department of Wildlife Conservation. Other partners include all FWS Oklahoma national wildlife refuges, National Wild

Turkey Federation, Quail Forever/Pheasants Forever, Ducks Unlimited, Friends of the Wichitas, and numerous other partners. More than 42,000 participants are expected to attend this event. Learn more at: https://www.wildlifedepartment.com/expo (R2 - Southwest Region)

REPEAT: FWS was invited by the City of Brownsville, Texas to participate in an Eco Tourism media and legislative tour in Hidalgo and Cameron counties on September 19. The City is seeking inclusion of the FWS Bahia Grande Unit (Laguna Atascosa National Wildlife Refuge) as part of the tour. The City has inviting all the area State Reps/Senators and Rep Filemon Vela (D TX Dist 34). The tour is proposed to begin in Harlingen (Mckelvey Park), with a stop at Rio Hondo (Kayak and Arroyo Trail opportunities), before proceeding to Laguna Vista. The next proposed stop is of the FWS Bahia Grande Unit. The tour concludes at Palo Alto. The objective is to discuss how the "Active Plan and Active Tourism" play a role in each community. Background information on Bahia Grande Unit: In the year 2000, FWS Laguna Atascosa National Wildlife Refuge acquired the 21,700-acre Bahia Grande Unit located between the towns of Laguna Vista and Brownsville, Texas. Almost half of the unit is wetlands, including the 6,500 acre Bahia Grande basin for which the tract of land was named. (R2 – Southwest Region)

UPDATED: Expanded Hunting Opportunities in Oklahoma - This week, FWS's Sequoyah National Wildlife Refuge near Vian, Oklahoma is proposing to expand public hunting opportunities on the Refuge through a new "Big Game, Upland Game, and Feral Hog Hunting Plan." Currently, the Refuge conducts white-tailed deer hunts through the Oklahoma Department of Wildlife Conservation's controlled hunt program. The Hunt Plan proposes an additional 8,029 acres of the Refuge be opened to these deer hunts. The Refuge also currently offers rabbit and squirrel hunting (upland game). The Hunt Plan proposes an additional 1,193 acres of the Refuge be opened to upland game hunting. Lastly, it proposes hunters participating in big game hunting and upland game hunting be allowed incidental take of feral hogs (no bag limit). The proposal is now available for a 30 day public review and comment in the Federal Register. Stakeholders include the Oklahoma Department of Wildlife Conservation, local, regional, and national hunting community. Not expected to be controversial. The comment period ends September 11. Potentially of Congressional interest to entire Oklahoma delegation (Senators Inhofe (R) and Lankford (R)).

Border-Related Activities

REPEAT: On August 9, 2017, FWS met with representatives of U.S. Customs and Border Protection (CBP) to consider the potential for locating rescue beacons to a remote area of the Cabeza Prieta National Wildlife Refuge. This is an area where more than a dozen human remains of illegal border crossers have been recovered over the past several years. The presence of rescue beacons – a prefabricated 4 X 4 ft. concrete base on which a 20 ft. tall steel pole, topped with a blue light visible for 10 miles, is bolted and powered by a solar panel – will allow individuals to press a button and be rescued by CBP within an hour. While the affected area is located within designated wilderness, the improved efficiency and effectiveness of search and rescue operations and subsequent reduction in deaths is expected to not only have a significant life-savings affect, but would reduce impacts to designated wilderness. The agencies anticipate having a final decision within the next 30 to 60 days. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a

FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require transporting water from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade / replace pump and water delivery components to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Road Construction - On March 20, FWS was contacted by the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to coordinate an upcoming road construction project for a 5.9-mile portion of the Presumido Canyon Road through the Baboquivari Mountains, scheduled to begin in January 2018. The project will require water for the construction, and U.S. Customs and Border Protection (CBP) will perform maintenance of an FWS pump and water well in return for increased use of the FWS-owned well. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Communication Towers - On April 18, FWS and U.S. Customs and Border Protection (CBP) discussed advance planning for Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge would be affected, with the goal of upgrading technology and providing a more robust foundation – all within the original impact areas. Work is proposed to begin in January 2018 dependent upon completion of planning, engineering, and permitting. Follow-up conversations with FWS have occurred to determine the necessary special use permitting process. (R2 – Southwest Region)

Fish and Aquatic Conservation

REPEAT: FWS San Marcos Aquatic Resource Center will host a kids fishing day on October 21 in Texas.

Migratory Birds

Nothing significant to report.

Science Applications

Nothing significant to report

Wildlife and Sport Fish Restoration

Nothing significant to report.

Tribal Consultation

REPEAT: Inter-Tribal Wildlife Summits - FWS is planning to host two Tribal Wildlife Summits, one in Arizona (October 3-5) and in New Mexico (November 7-9). These summits will include aspects of all FWS Divisions, including the Endangered Species Act, with a portion of the summit devoted to law enforcement training to assist Tribal Game Wardens and other Tribal agents. International Game Warden magazine, Spring 2017, published a story on the FWS law enforcement training for Native American conservation officers. (R2 – Southwest Region)

Subject:	R2 - Southwest Region Weekly Report Submission - September 21, 2017
Date:	Thursday, September 7, 2017 4:30:36 PM
Attachments:	FWS R2 Weekly Report FishBites 21September2017.docx

Dear all,
Please see attached the Southwest Region's contributions for FishBites, Media Contacts and the Weekly Report. We now have a website dedicated to housing updated information on Hurricane Harvey. Information on the website along with a brief summary of current status is included in the attached file. Also included is a highlight on an exceptional app pulled together by our Refuges Division of Biological Sciences to gain accurate information on impacts from the tropical storms in Texas and now in Florida. A larger story is being written on this effort and will be available soon.

Please let me know if you need additional information or if you have any questions.

Best,
Chris

Christine R. Tincher
Congressional Liaison / Public Affairs Specialist
U.S. Fish & Wildlife Service - Southwest Region
New Mexico * Arizona * Texas * Oklahoma

U.S. Fish and Wildlife Service
Through September 21, 2017

FishBites Report

FWS has an App for that – Data Captured in Real Time Enables Ability to Assess Damage from Tropical Storms

- **Topic**: Getting a full understanding of the damage caused by Hurricane Harvey and the aftermath of floodwaters quickly and accurately is critical. Through a bit of ingenuity, FWS staff developed an app for data collection that can easily be used on location through a smart device. No additional equipment on the ground is required. This amazing tool was used by the incident team and provided critical real-time information to others for immediate access and analyzing. Learning about the app created and used in the Southwest Region (R2), the Southeast Region (R4) asked for assistance in assessing potential impacts from Hurricane Irma. In less than 24 hours, dedicated R2 staff established an R4 Rapid Hurricane Assessment Group, an operations dashboard and created a blank feature service that is ready for data collection by a smart device. As early as September 6, the incident command team was able to obtain assets data.
- **Supportive Stakeholders:** National support anticipated, including full support from Congressional Members, other federal and state agencies, and partners as well as local community and many others
- **Impacted Locations:** Coastal Texas and Florida

Hawaiian Hawk Hatched at Comanche Nation Aviary Turns One

- **Topic**: Just over a year old now, "Wahine" (Hawaiian for "little girl") is the first-ever female Hawaiian Hawk to be hatched in captivity. The Hawaiian Hawk is an endangered species and native only to its namesake state. Wahine's parents were among several pairs brought to the mainland from Hawaii in 1997, to breed in captivity. They are the last of the captive adults and arrived at the Sia' Comanche aviary, in Oklahoma, in 2015. Studying these rare captive hawks advances our scientific knowledge, and may also benefit the species in the wild, long-term. Sia' is one of six Tribal Eagle Aviaries in the Southwest Region and the first Tribal Non-Eagle Feather Repository in the United States. The Comanche Nation aviary and Sia' are authorized under the Migratory Bird Act, administered by the FWS. (Note photo is copyright protected and will require consent for external use.) Read the rest of the story in the Birding Wire at: http://www.birdingwire.com/features/232017\
- **Supportive Stakeholders:** Comanche Nation and Sia', Federally-recognized Tribes whose members can obtain feathers and bird parts for religious purposes via the non-eagle feather repository at Sia' in Oklahoma (or a second repository, Liberty Wildlife, in Arizona). Oklahoma Delegation and others, including partners involved in avian rescue operations, permitted falconers and zoos.
- **Impacted Locations:** Sia' Comanche aviary and non-eagle feather repository are located in Oklahoma. Both help meet FWS' Trust responsibilities across the Nation.

FWS Partners with Steve Harvey Foundation to Take Urban Youth Fishing, Texas

- **Topic**: In a nod to hunting and fishing day, the FWS Arlington Ecological Services Field Office will partner with the Steve Harvey Foundation and the Texas Parks and Wildlife Department to take a group of young Dallas boys fishing at a local pond on September 30. For the last five years, the FWS has partnered with the Steve Harvey Foundation on a number of events aimed at getting inner city youth engaged in outdoor experiences.
- **Supportive Stakeholders:** The Steve Harvey Foundation, hunting and fishing community, and the Texas Parks and Wildlife Department
- **Impacted Location:** Local urban area in Texas (R2 – Southwest Region)

FWS and Texas Parks and Wildlife Department and Private Landowners Celebrate Safe Harbor Agreement

- **Topic**: FWS values working together with partners to achieve conservation success. On Wednesday, October 4, 2017, FWS and the Texas Parks and Wildlife Department, alongside private landowners are holding a celebratory signing event on private land in Bastrop County, Texas (near Austin, Texas). The event is in recognition of the signing of the Houston Toad Safe Harbor Agreement. The Houston toad is one of Texas' most critically endangered species. The programmatic Safe Harbor Agreement provides an efficient and streamlined voluntary tool for landowners interested in participating in Houston toad conservation actions.
- **Supportive Stakeholders:** Bastrop County, Texas, private landowners, Houston Zoo and Texas Parks and Wildlife Department
- **Impacted Locations:** Bastrop County, Texas

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
60 Minutes Zoo breeding program (Wolf)	Filming done in June. Expected to air soon.	60 minutes is preparing to air a segment on breeding programs in zoos in the near future. Filming and interviews were completed in June 2017. The Mexican wolf recovery program was featured during one interview as a good example of how zoos help recovery of species. The film crew captured video of pups born in captivity that were later part of a cross-fostering effort. FWS was contacted for background information.
CBS News Jaguar	Ca 9/21	CBS SF Bureau is in early investigation of jaguar sightings and subject matter experts for background on camera interviews in Arizona and Mexico
Santa Fe New Mexican Wolf	Sept. 7	Mexican Wolf Recovery Plan – article with State Legislature comments http://www.santafenewmexican.com/news/local_news/new-mexico-dems-call-federal-government-s-wolf-recovery-plan/article_b0f9d90b-9cef-56f0-9c2e-9d4c62013ffd.html

Popular Science Magazine Whooping cranes	Possibly October or November	Freelance science journalist of the Popular Science monthly publication contacted FWS with an inquiry on migrating population of whooping cranes. Based on hurricane impacts, will whooping cranes return to the Aransas Natural Wildlife Refuge in October? No changes in the crane's wintering migration are expected to occur.

Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel

September 13 – FWS meeting with Leander School District (HCP applicant) regarding a proposal for secondary access through a preserve. See ES Items of note for details. (R2 – Southwest Region)

September 20 – FWS meeting with the National Forest Owners Association in proactive approach to advance the conservation of at-risk species on forest lands in eastern Texas and southeastern Oklahoma. See ES Items of Note for details. (R2 – Southwest Region)

September 22 – FWS contacted by Border Patrol requesting a joint meeting with Deputy Commissioner Vitiello at the Santa Ana National Wildlife Refuge in Texas. (R2 – Southwest Region)

September 23 - Hunting / Fishing Day Celebration - FWS Participates in Grand Opening of Cabela's in Albuquerque, New Mexico. See WSFR below for details. (R2 – Southwest Region

Hot Topics - Week Ahead Announcements and Actions

Hurricane Impacts in Texas - Numerous Service facilities and lands were in the path of the storm or are predicted to be in coming days, and remain closed at this time. A brief summary of impacts from Hurricane Harvey can be found under Refuges. More updates are posted on the FWS Southwest webpage at: https://www.fws.gov/southwest/hurricaneinfo/index.htmnews

September 23 is National Hunting and Fishing Day – See table at the end of report for a list of connecting with nature events taking place in the Southwest.

FWS plans to remove the endangered Gila chub and its critical habitat from the Federal List of Endangered and Threatened Wildlife due to taxonomic change in the coming weeks. See ESA Recovery Actions for details. (Delisting: R2-Southwest Region. SSA: Regions 2 and 6.)

September 7 – FWS received the final results of the Western Association of Fish and Wildlife Agencies (WAFWA) aerial surveys for the lesser prairie chicken. (R2 – Southwest Region)

On or before September 21 - FWS anticipates publishing a final determination on the proposal to list the Sonoyta mud turtle as endangered under the Endangered Species Act. (R2 – Southwest Region)

Upcoming Workshops & Meetings

September 18-22 – FWS, the U.S. Forest Service and Arizona Game and Fish Department are conducting the annual census of the Mount Graham red squirrel. See more in previous reports. (R2 – Southwest Region)

September 19 – FWS was invited by the City of Brownsville, Texas to participate in an Eco Tourism media and legislative tour in Hidalgo and Cameron counties. See Refuges for details. (R2 – Southwest Region)

September 23-24 – FWS participating in the annual Oklahoma Wildlife Expo in Oklahoma. See details under Refuges. (R2 – Southwest Region)

Endangered Species Act Recovery Actions

UPDATED: FWS joined the Forest Service and grazing permittee in a tour of a Lincoln National Forest grazing allotment following a request by Robert MacGregor, Legislative Assistant with the Office of Rep Pearce (R NM Dist 2), to discuss New Mexico Meadow jumping mouse. Rep Pearce is seeking resolution to the concerns of the permittee that will also meet the needs of species and its critical habitat. A follow up call with information from a biological opinion is tentatively planned to occur in early September. (R2 – Southwest Region)

UPDATED: Mexican Wolf Draft Recovery Plan, First Revision (draft recovery plan). The comment period for the draft revision of the Mexican Wolf Recovery Plan closed August 29. FWS estimates receiving more than **92,000 comments**, this number includes signed petitions. On August 23, the New Mexico State Game Commission (NMSGC) voted to support the recovery plan (6 to 1). The Arizona Game and Fish Department is seeking clarification on the role the States will play in recovery and release of wolves. During the public comment period, FWS will continue seeking review and comment on the peer-reviewed draft revision from local, State, and Federal agencies; Tribes; and the public, in both the United States and Mexico. Due to the high level of visibility and controversy on Mexican wolf recovery in general, extensive outreach is on-going, including personal phone calls, email reminders, public meetings and updated web postings. Follow up briefings are being planned. FWS is under a Court settlement agreement to complete the final plan by November 11, 2017. Representative Pearce sent a letter to FWS regarding the recovery plan on September 6, 2017 and an article expressing concerns about the wolf population being able to thrive by members within the New Mexico State legislature was published on September 7, 2017. (R2 – Southwest Region)

REPEAT: American Burying Beetle Species Status Assessment and 12-month finding – FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed prior to the issuance of a 12-month finding which is expected at the end of 2017. In June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America

filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

REPEAT: In late October, FWS will publish a 12-month finding on the listing status of the southwestern willow flycatcher. Pacific Legal Foundation petitioned FWS to delist the flycatcher and in March 2016 we published a 90-day finding that the petition included substantial information, primarily regarding the subspecies' taxonomy. Upon robust consideration of the petition and the flycatchers' classification, the Southwest Region is completing a 12-month finding that delisting of the southwestern willow flycatcher is not warranted. Outreach is being planned – including a news release and Congressional notifications via email. Interest expected to be moderate. No controversy anticipated. (R2 – Southwest Region)

REPEAT: Houston Toad Safe Harbor Agreement – This Fall, FWS expects to announce the approval of the Texas Parks and Wildlife Department (TPWD) enhancement of survival permit pursuant to section 10(a)(1)(A) of the Endangered Species Act, as well as the 30-year Programmatic Safe Harbor Agreement (SHA) for the Houston toad between TPWD and FWS. The agreement will cover voluntary activities to restore, maintain, enhance, or create habitat for the endangered Houston toad in the following nine Texas counties: Austin, Bastrop, Burleson, Colorado, Lavaca, Lee, Leon, Milam and Robertson. Congressional interest from Rep McCaul (R TX Dist10) based on impacts from 2011 Bastrop fire. A conference call was held with Rep McCaul's Office to provide an update on the SHA in late July. A site visit is tentatively being planned to occur in September. Outreach planned – Congressional notification via email, a news release will be issued and posts will be made on the web and through Social media. (No FRN required). (R2 – Southwest Region)

Endangered Species Act Listing Actions

UPDATED: Lesser Prairie-Chicken Species Status Assessment – FWS anticipates a Species Status Assessment (SSA) for the lesser prairie-chicken (LPC) will be completed by the end of the calendar year. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. USGS, through its Open File Report (OFR), made available the population model it prepared for FWS. The population model represents one component of the SSA and will be considered alongside of all other available information. On August 25, the draft SSA report was sent to an external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) that FWS has been coordinating with throughout development of the SSA. On August 29, the draft report was sent out for external, independent scientific peer review through a third-party contractor. Comments are due back on October 10, 2017. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. (R2 Southwest Region & R6 Mountain-Prairie Region)

UPDATED: Guadalupe fescue final listing and critical habitat determinations: On September 8, FWS published a final listing and critical habitat determination for Guadalupe fescue. On September 9, 2016, the FWS published a proposal to list Guadalupe fescue as an endangered species and designate critical habitat. The plant occurs entirely in Big Bend National Park, Brewster County, Texas. We received no requests for a public hearing and we received no substantive public comments after two public comment periods. The final rule will list

Guadalupe fescue as endangered and designate approximately 7,815 acres of critical habitat. Outreach included the distribution of a news release and FAQ, as well as posts on the web and social media. (R2-Southwest Region)

REPEAT: DELISTING - FWS plans to remove the endangered Gila chub and its critical habitat from the Federal List of Endangered and Threatened Wildlife due to taxonomic change. Gila chub was listed with critical habitat in Arizona in 2005. In April 2017, FWS withdrew a proposal to list the headwater and roundtail chubs as a result of new taxonomic information that the two former species and the Gila chub are a single species (identified as the roundtail chub). (Conducting section 7 consultation and ongoing recovery efforts for Gila chub – a taxon that is no longer recognized – is problematic.) Following proposing to delist the Gila chub, FWS will conduct a status assessment of the now larger taxon of roundtail chub throughout its five-state range. Objection from some taxonomists, desert fishes professionals and environmental groups is anticipated. Communications planning is under development. (Delisitng: R2-Southwest Region. SSA: Regions 2 and 6)

REPEAT: In September – FWS anticipates sending to the *Federal Register* 12-month findings on petitions including one to list the San Felipe gambusia, a Texas fish. (R4 – Southeast Region, R2 – Southwest Region (lead)

REPEAT: FWS anticipates publishing a final determination on the proposal to list the Sonoyta mud turtle as endangered under the Endangered Species Act on or before September 21. The Sonoyta mud turtle occurs in the U.S. only at Organ Pipe Cactus National Monument in southern Arizona, and four locations in the Rio Sonoyta basin in Sonora Mexico. Controversy level is low. A communications strategy news release and set of FAQs are completed. (R2 – Southwest Region)

Other Ecological Services Items of Note

NEW: Proactive Initiative with National Alliance of Forest Owners Member Companies Kick Off Meeting. On Wednesday, September 20, the National Alliance of Forest Owners (NAFO), U.S. Fish and Wildlife Service, Texas Parks and Wildlife Department, Oklahoma Department of Wildlife, and the Texas Comptrollers Office are hosting a kick off meeting with support from member companies of NAFO to advance the conservation of at-risk species on forest lands in eastern Texas and southeastern Oklahoma. National Alliance of Forest Owners, Texas Parks and Wildlife Department, Texas Department of Transportation, Texas Comptrollers Office, Oklahoma Department of Wildlife, and Oklahoma Department of Transportation. Southeastern Oklahoma and East Texas (R2 – Southwest Region)

UPDATED: FWS Partners with Steve Harvey Foundation, Texas to Take Urban Youth Fishing – On September 30, the FWS Arlington Ecological Services Field Office will partner with the Steve Harvey Foundation and the Texas Parks and Wildlife Department to take a group of young Dallas boys fishing at a local pond. Over the last five years, the FWS and the Steve Harvey Foundation have partnered on a number of events aimed at getting inner city youth engaged in outdoor experiences. Supportive Stakeholders include The Steve Harvey Foundation, hunting and fishing community, and the Texas Parks and Wildlife Department (R2 – Southwest Region)

UPDATED: The now-extinguished Frye Fire encompassed approximately 48,301 acres of Mt. Graham in the Pinaleño Mountains, Coronado National Forest (CNF), in southeastern Arizona. Burn-severity mapping indicates the majority of the fire was of low severity; however, two areas known for their relatively high Mount Graham Red Squirrel (MGRS) densities burned at high severity. (The MGRS occurs only on (is endemic to) this sky island mountain. The MGRS population was estimated to be only 252 animals in Fall 2016.) A total of 78% of the MGRS's occupied range is within the Frye Fire perimeter, with another 18% within the 2004 Nuttall-Gibson Fire perimeter. Access is currently limited due to flooding, washouts, and debris flows on the road, so reconnaissance is difficult. The Arizona Ecological Services Field Office and partners gain access for an initial reconnaissance of the fire's effects on MGRS. Sept. 18-22 FWS, CNF and Arizona Game and Fish Department are conducting the annual census of the Mount Graham red squirrel and their winter-store food middens. Forest Service is developing a Biological Assessment of their fire response efforts to conduct an emergency section 7 consultation. Significant resources will likely be required to move forward with the subspecies' conservation and recovery. (Information submitted in previous reports.) (R2 – Southwest Region)

UPDATED: Texas Hornshell Candidate Conservation Agreement and two Candidate Conservation Agreement with Assurances – FWS announced on July 6, consideration of a draft Candidate Conservation Agreement (CCA), draft Candidate Conservation Agreements with Assurances (CCAAs), and draft environmental assessment for the Texas hornshell (proposed for listing) and other covered species (Rio Grande River cooter, gray redhorse, blue sucker and Pecos springsnail), and an enhancement of survival permit application under the Endangered Species Act submitted by the Center of Excellence and New Mexico State Land Office on July 6. The covered area would include portions of Eddy County, New Mexico, and Culberson County, Texas. The CCA, CCAAs, and the associated section 10(a)(1)(A) enhancement of survival permits will have duration of 30 years. FWS's New Mexico Ecological Field Office has been working for several years with the applicants to develop the CCAAs on non-Federal lands; and the Bureau of Land Management to develop the CCA on Federal lands. (The proposed listing of the Texas hornshell may be controversial in both Texas and southern New Mexico. A six month extension on the final listing determination was published on August 10, 2017.) Substantial local stakeholder outreach has been conducted for CCA / CCAAs. A decision on the CCA / CCAAs is anticipated before September 22, 2017. A news release and FAQs will be shared with the states, partners, congressional staff and media. A *Federal Register* notice is not published with the final CCA/As. (R2-Southwest Region)

UPDATED: Lesser Prairie-Chicken (LPC) Aerial Survey – FWS received the official results of the Western Association of Fish and Wildlife Agencies (WAFWA) aerial surveys for the LPC on September 7. The results of the survey confirm an increase in the range-wide population estimate due to favorable precipitation patterns over the past few years across the Great Plains. WAFWA noted LPC population increase/decreases are very closely tied to precipitation patterns across the Great Plains, and stated there may be a fluctuation in numbers from year to year. FWS also recognizes the importance of continuing annual reviews to examine long-term population trends and gain an accurate population assessment of the LPC. (R2-Southwest Region and R6- Mountain Prairie Region)

UPDATED: American Burying Beetle ICP – FWS published a notice on September 5, to open a 30-day comment period on incidental take permit applications for Plains All American Pipeline, L.P. and Reach Energy Limited under the approved Industry Conservation Plan for American Burying Beetle in Oklahoma. These permit applications are to cover incidental take of American Burying Beetle for Oil and Gas development, extraction, and transport within the species range in eastern Oklahoma. This conservation plan reduces the time in acquiring an incidental take permit. The comment period closes on October 5, 2017. FWS anticipates making a permit decision within 60 days, but some permits may take longer (up to 105 days). FWS is drafting a notice for additional application for publication before the end of October. These notices are published in the *Federal Register* on regular basis as companies apply for incidental take coverage under this conservation plan. (R2 Southwest Region)

UPDATED: San Antonio HCP, Texas – FWS anticipates publishing a Notice of Availability in late September a draft Habitat Conservation Plan and Incidental Take Permit request from the San Antonio Water Systems for the incidental take of five federally-listed karst invertebrates (collectively the Covered Karst Invertebrates): Madla's Cave meshweaver; Robber Baron Cave meshweaver; Braken Bat Cave meshweaver; and two species of ground beetles with no common names (Rhadine infernalis and Rhadine exilis). The Covered Karst Invertebrates are associated with the construction of two water pipelines in Bexar County, Texas. Once issued, the permit would be in place for 15 years. Controversy anticipated being low. Minimal outreach, including issuing a news bulletin locally is planned at time of publication in the *Federal Register*. Congressional Offices will be notified via email, a news release will be issued as well as web postings. (R2 – Southwest Region)

REPEAT: Leander Independent School District (LISD) ITP – In the coming weeks, FWS will announce in the *Federal Register* a Notice of Intent to prepare a draft National Environmental Policy Act (NEPA) Environmental Assessment on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. Recently LISD submitted a draft habitat conservation plan and incidental take permit (ITP). The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. A meeting with the applicant is taking place on September 13. Local interest is anticipated in the outcome of this project. It is also of significant Congressional interest. Outreach, including issuing a news bulletin, will occur at time of publication in the *Federal Register*. (R2 – Southwest Region)

REPEAT: Bone Cave Harvestman Species Status Assessment – FWS Austin Ecological Services Office completed a draft species status assessment for the Bone Cave harvestman. The assessment will be sent out for external, independent scientific peer review in the coming weeks. Concurrently with peer review of the species status assessment, FWS will host representatives from the City of Austin, Texas Parks and Wildlife Department, Travis County, and Williamson County to detail the methodology used to analyze ecological conditions at sites occupied by the Bone Cave harvestman. Comments and information provided by the peer review and site analysis meeting will be incorporated into the species status assessment. The final species status assessment will inform a 5-year review to be completed for the Bone Cave harvestman in fiscal year 2018. (R2-Southwest Region)

REPEAT: In October – FWS anticipates publishing a notice announcing the receipt of application and consideration of an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake.

REPEAT: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review this summer. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in December 2017. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2-Southwest)

National Wildlife Refuge Actions

UPDATED: (Submitted as FishBite last week.) Hurricane Harvey - As the impacts from this storm event continue to unfold, public and staff safety remain the number one priority for the U.S. Fish and Wildlife Service. Numerous Service facilities and lands were in the path of the storm or are predicted to be in coming days, and remain closed at this time. Full Extent of Damage from Hurricane Harvey yet to be known. There is little relief at this point as the area continues to be hit with unprecedented rainfall. All FWS employees who work and live in the area are accounted for and safe. Many of these employees were evacuated (damage to their homes and full loss of personal belongings is not yet known). Damage assessments to FWS lands and facilities will be conducted once conditions are deemed safe. Currently the impacted areas are inaccessible. It is anticipated that access to these areas may not occur for up to two weeks. Hurricane Harvey made landfall late Friday, August 25, at Rockport, Texas as a *Category 4 hurricane*. Facilities and offices will remain closed until further notice. FWS will post updates and issue reopening notices when the areas are cleared. Recognizing the impacts of these tropical rains expand far beyond the resources managed by FWS, the agency is providing all possible support to the incident command team, and is prepared to deploy all available resources as needed to aid in rescue operations and recovery. The entire Nation has eyes on impacts from this natural disaster, Members of Congress, other federal and state agencies and many others. Greatly impacted southern Texas along the coast and other areas. More updates are posted on the FWS Southwest webpage at: https://www.fws.gov/southwest/hurricaneinfo/index.htmnews
Currently closed facilities/offices include:

- Aransas National Wildlife Refuge (including Matagorda Island)
- Big Boggy National Wildlife Refuge
- San Bernard National Wildlife Refuge
- Brazoria National Wildlife Refuge
- Anahuac National Wildlife Refuge
- Moody National Wildlife Refuge
- McFaddin National Wildlife Refuge
- Texas Point National Wildlife Refuge
- Limited public access at Trinity River National Wildlife Refuge – Main Office open, all

refuge lands closed due to widespread flooding (see details below)
(R2 – Southwest Region)

NEW: FWS Trinity River National Wildlife Refuge Closed to Public Use due to flooding – FWS Trinity River National Wildlife Refuge will be closed to all public use until further notice due to impacts from widespread flooding in south Texas. The earliest anticipated date for the Refuge to re-open is September 15. Severe flooding at the FWS Champion Lake Public Use Area may be closed for an extended time due to damage to the levee and road culvert issues. Due to the flooding, FWS has extended the period for accepting hunt applications September 9. The National Public Lands Day cleanup event at Trinty River NWR has been cancelled. FWS has an office open in Liberty, Texas. High public use area of interest to recreationists, including hunting community, local community and Congressional Members in Southern Texas.

NEW: FWS Southwest Region Celebrates Refuge Week. See table at end of document with a list of upcoming public events. (R2 – Southwest Region)

REPEAT: FWS participating in the annual Oklahoma Wildlife Expo September 23-24. The Expo celebrates Oklahoma's natural diversity and opportunities for the sporting enthusiasts and newcomers. From camping and outdoor skills to shooting sports, fishing and bird watching, Expo visitors have an opportunity to try their hands at two days of fun in the outdoors. Held annually in Guthrie, Oklahoma, the event is hosted by the Oklahoma Department of Wildlife Conservation. Other partners include all FWS Oklahoma national wildlife refuges, National Wild Turkey Federation, Quail Forever/Pheasants Forever, Ducks Unlimited, Friends of the Wichitas, and numerous other partners. More than 42,000 participants are expected to attend this event. Learn more at: https://www.wildlifedepartment.com/expo (R2 - Southwest Region)

REPEAT: FWS was invited by the City of Brownsville, Texas to participate in an Eco Tourism media and legislative tour in Hidalgo and Cameron counties on September 19. The City is seeking inclusion of the FWS Bahia Grande Unit (Laguna Atascosa National Wildlife Refuge) as part of the tour. The City has inviting all the area State Reps/Senators and Rep Filemon Vela (D TX Dist 34). The tour is proposed to begin in Harlingen (Mckelvey Park), with a stop at Rio Hondo (Kayak and Arroyo Trail opportunities), before proceeding to Laguna Vista. The next proposed stop is of the FWS Bahia Grande Unit. The tour concludes at Palo Alto. The objective is to discuss how the "Active Plan and Active Tourism" play a role in each community. Background information on Bahia Grande Unit: In the year 2000, FWS Laguna Atascosa National Wildlife Refuge acquired the 21,700-acre Bahia Grande Unit located between the towns of Laguna Vista and Brownsville, Texas. Almost half of the unit is wetlands, including the 6,500 acre Bahia Grande basin for which the tract of land was named. (R2 – Southwest Region)

Border-Related Activities

REPEAT: On August 9, 2017, FWS met with representatives of U.S. Customs and Border Protection (CBP) to consider the potential for locating rescue beacons to a remote area of the Cabeza Prieta National Wildlife Refuge. This is an area where more than a dozen human remains of illegal border crossers have been recovered over the past several years. The presence of rescue beacons – a prefabricated 4 X 4 ft. concrete base on which a 20 ft. tall steel pole, topped with a blue light visible for 10 miles, is bolted and powered by a solar panel – will allow individuals to press a button and be rescued by CBP within an hour. While the affected area is

located within designated wilderness, the improved efficiency and effectiveness of search and rescue operations and subsequent reduction in deaths is expected to not only have a significant life-savings affect, but would reduce impacts to designated wilderness. The agencies anticipate having a final decision within the next 30 to 60 days. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require transporting water from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade / replace pump and water delivery components to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Road Construction - On March 20, FWS was contacted by the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to coordinate an upcoming road construction project for a 5.9-mile portion of the Presumido Canyon Road through the Baboquivari Mountains, scheduled to begin in January 2018. The project will require water for the construction, and U.S. Customs and Border Protection (CBP) will perform maintenance of an FWS pump and water well in return for increased use of the FWS-owned well. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Communication Towers - On April 18, FWS and U.S. Customs and Border Protection (CBP) discussed advance planning for Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge would be affected, with the goal of upgrading technology and providing a more robust foundation – all within the original impact areas. Work is proposed to begin in January 2018 dependent upon completion of planning, engineering, and permitting. Follow-up conversations with FWS have occurred to determine the necessary special use permitting process. (R2 – Southwest Region)

Fish and Aquatic Conservation

REPEAT: FWS San Marcos Aquatic Resource Center will host a kids fishing day on October 21 in Texas.

Migratory Birds

Nothing significant to report.

Science Applications

Nothing significant to report

Wildlife and Sport Fish Restoration

September 23 - Hunting Fishing Day Celebration - FWS is participating in the Grand Opening of Cabela's in Albuquerque, New Mexico. FWS Southwest Region WSFR Chief, Cliff Schleusner,

will join Albuquerque Mayor Berry and Mary Cabela at a ribbon-cutting event, opening the doors to the newest Cabela's store in New Mexico. The hunting and angling community will see a permanent FWS display that highlights work in conservation in New Mexico and beyond. The grand opening coincides with National Hunting and Fishing Day on September 23. The event will include threatened Gila trout on display in a living stream from Mora National Fish Hatchery. The species was federally endangered until 2006, and opened to angling in 2007, after a 50-year hiatus. Conservation endeavors now offer adventurous anglers a change to catch the rare copper-colored trout. Of great interest to the hunting and fishing community and many others. (R2 – Southwest Region)

Tribal Consultation

REPEAT: Inter-Tribal Wildlife Summits - FWS is planning to host two Tribal Wildlife Summits, one in Arizona (October 3-5) and in New Mexico (November 7-9). These summits will include aspects of all FWS Divisions, including the Endangered Species Act, with a portion of the summit devoted to law enforcement training to assist Tribal Game Wardens and other Tribal agents. International Game Warden magazine, Spring 2017, published a story on the FWS law enforcement training for Native American conservation officers. (R2 – Southwest Region)

Through October 13, 2017

FishBites Report

Houston Toad Safe Harbor Agreement

- **Topic**: FWS and the Texas Parks and Wildlife Department host an event at Rancho Zunzun in Bastrop County, Texas (near Austin, Texas), to celebrate the signing of the Houston Toad Safe Harbor Agreement on October 4, 2017. The 30-year Programmatic Safe Harbor Agreement for the Houston toad covers voluntary activities to restore, maintain, enhance, or create habitat for the endangered Houston toad in the following nine Texas counties: Austin, Bastrop, Burleson, Colorado, Lavaca, Lee, Leon, Milam and Robertson. See details below. (R2 – Southwest Region)
- **Supportive Stakeholders:** TPWD, private landowners, industry, local elected officials, state and county partners and Congressional members.
- **Impacted Location:** Austin, Bastrop, Burleson, Colorado, Lavaca, Lee, Leon, Milam and Robertson counties in Texas

"See With a Hunter's Heart"

- **Topic**: FWS pitches a story from the ardent perspective of a hunter – "Hunters describe their full immersion experience in varying degrees as connecting with the fruits of the land in ways that can't come from other endeavors. Philosophers from Socrates to Ortega y Gassett to Leopold considered that the experience of hunting as clarifying for the mind. Hunters fully immerse themselves as not just an observer of nature, but one who is in nature." Read more of this engaging writing on the Outdoor Wire at: http://www.theoutdoorwire.com/features/232056 or in the Sporting Classics at: http://sportingclassicsdaily.com/hunters-heart/
- **Supportive Stakeholders:** Conservation partners, outdoor enthusiasts, hunting community
- **Impacted Location:** Any place individuals can hunt and be one with nature.

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
Outdoor News LPC	Sept. 26	Continued interest (relatively low) in the 12-month Finding schedule for lesser prairie chicken from Outdoor News publications.
Texas Observer and others DSL	Stories already published	Renewed interest in the Dunes Sagebrush Lizard - "Destruction of Lizard's West Texas Habitat 10 Times Worse Than Previously Thought" - Texas Observer - "Report: Sand miners disturbing threatened West Texas lizard's habitat"- Texas Tribune - "Sand mines draw scrutiny over lizard, Environmental group

		reports habitat loss" – Odessa Online
Multiple media Rosemont Mine - BO	Published Sept 25 – anticipating future coverage	Law360, KNAU/NPR, Arizona Public Media, Arizona Daily Star, et. al. sought comment on Center for Biological Diversity suit over the FWS's 2106 Biological Opinion on Rosemont Mine development south of Tucson. (press release largely targeted to jaguar). FWS does not comment on pending or on-going litigation. FWS background materials (developed in 2016) was available to many inquirers.
Multiple Media Wolf recovery plan	Sept 27	Cally Carswell, Freelance Science and Environmental Journalist | Santa Fe, New Mexico. Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel

September 28 - Tribal Alliance for Pollinators Inaugural Event: Sulphur, Oklahoma. See Tribal Consultation below for details. (R2 – Southwest Region)

Hot Topics - Week Ahead Announcements and Actions

Hurricane Impacts in Texas - Updates are posted on the FWS Southwest webpage at: https://www.fws.gov/southwest/hurricaneinfo/index.htmnews

September 30 – FWS partners with the Steve Harvey Foundation and the Texas Parks and Wildlife Department to take a group of young Dallas boys fishing at a local pond. See ES Items of Note for details. (R2 – Southwest Region)

September 30 – Twenty-first release of California Condors. See ESA Recovery Actions below. . (R2 – Southwest Region)

September 30 - National Public Lands Day celebrations. See table at the end of report for a list of events taking place in the Southwest. (R2 – Southwest Region)

In late September FWS will be sent out for external, independent scientific peer review a draft species status assessment for the Bone Cave harvestman. See ES Items of Note. (R2 – Southwest Region)

In early October, FWS anticipates publishing a Notice of Availability for a draft Habitat Conservation Plan request from the San Antonio Water Systems. See ES Items of Note for details. (R2 – Southwest Region)

Through October 8 – Texas Pollinator BioBlitz is currently taking place on FWS National Wildlife Refuges and other locations in Texas. See ES Items of Note below. (R2 – Southwest Region)

October 14 - FWS is hosting the annual Rio Reforestation event on the Lower Rio Grande Valley National Wildlife Refuge in Texas. See Refuges for details. (R2 – Southwest Region)

October 15 – FWS Havasu NWR will close the public comment period on the draft Environmental Assessment for the Sacramento Wash Improvements Project. See Refuges for details. (R2 – Southwest Region)

Upcoming Workshops & Meetings

October 4 - FWS and the Texas Parks and Wildlife Department kickoff the Houston Toad Safe Harbor Agreement in McDade, Texas, at the first property to enroll under the Agreement. See details under ESA Recovery Actions. (R2 – Southwest Region)

October 18 – FWS is tentatively proposing to co-host a Mussel 101 Congressional briefing for District staffers with the Texas Parks and Wildlife Department. Final date and location TBD. (R2 – Southwest Region)

October 18 – Tentatively proposed - Consultation meeting with the White Mountain Apache Tribe in Arizona to discuss Statement of Relations with incoming Regional Director. Details will be available as meeting is firmed up. (R2 – Southwest Region)

October 21 – A media conference regarding the proposed border wall is tentatively being planned by the local community at or near FWS Santa Ana National Wildlife Refuge. See Border-related Activities for details. (R2 – Southwest Region)

October and November – Meet and Greet meetings will be arranged between incoming Regional Director and Members in the District, when possible. (R2 – Southwest Region)

Endangered Species Act Recovery Actions

UPDATED: The Center for Biological Diversity filed a lawsuit (Federal District Court – Tucson) on September 25, regarding a biological opinion (BO) issued on the proposed Rosemont copper mine project in the Santa Rita Mountains, south of Tucson, Arizona, and potential impacts to jaguar (one had been extensively monitored on the project area) and other endangered and threatened species. (To learn more about the lawsuit, visit the Center for Biological Diversity's website) The document in question is the Final Reinitiated BO requested by the U.S. Forest Service (Action Agency) by submittal of the Supplemental Biological Assessment on May 25, 2015. The non-jeopardy BO provides information on the potential incidental take, and as applicable destruction or adverse modification of critical habitat, of the

following species: the endangered desert pupfish, Gila chub, Gila topminnow, jaguar, ocelot, lesser long-nosed bat, southwestern willow flycatcher, Huachuca water umbel, and Pima pineapple cactus as well as the threatened western yellow-billed cuckoo, Chiricahua leopard frog and northern Mexican gartersnake. FWS completed its initial BO in Oct. 2013, and reinitiated consultation after receiving new hydrological modeling information, additional species listings, and confirmation of ocelot presence in the area. The reinitiated BO was completed on April 16, 2016, and later amended on April 28, 2016. The Amended BO issued by the FWS' website. (R2 - Southwest Region)

UPDATED: Mexican Wolf Draft Recovery Plan, First Revision (draft recovery plan) – The comment period for the draft revision of the Mexican Wolf Recovery Plan closed August 29. FWS estimates receiving more than **101,009 comments**, this number includes signed petitions. On August 23, the New Mexico State Game Commission (NMSGC) voted to support the recovery plan (6 to 1). The Arizona Game and Fish Department and New Mexico Department of Game and Fish are seeking clarification on the role the States will play in recovery and release of wolves. FWS met with the Chairman of the New Mexico State Game Commission and the Director of New Mexico Department of Game and Fish on September 7, to discuss moving forward with Mexican wolf recovery, including releases of Mexican wolves in New Mexico. The State is considering rejoining as a partner agency in Mexican wolf recovery. The Chairman requested a presentation to the Commission on permits for importation and release of Mexican wolves on December 20, 2017. Due to the high level of visibility and controversy on Mexican wolf recovery in general, extensive outreach is on-going, including personal phone calls, email reminders and updated web postings. Follow up briefings are being planned in early November. FWS is under a Court settlement agreement to complete the final plan by the end of November 2017. (R2 – Southwest Region)

UPDATED: Houston Toad Safe Harbor Agreement – In early October, FWS expects to announce the approval of the Texas Parks and Wildlife Department (TPWD) enhancement of survival permit pursuant to section 10(a)(1)(A) of the Endangered Species Act, as well as the 30-year Programmatic Safe Harbor Agreement (SHA) for the Houston toad between TPWD and FWS. The agreement will cover voluntary activities to restore, maintain, enhance, or create habitat for the endangered Houston toad in the following nine Texas counties: Austin, Bastrop, Burleson, Colorado, Lavaca, Lee, Leon, Milam and Robertson. On October 4, 2017, TPWD and FWS will host an event at Rancho Zunzun, Ms. Roxanne Hernandez's property in Bastrop County, Texas (near Austin, Texas), to celebrate the signing of the Houston Toad Safe Harbor Agreement. Local congressional offices, local elected officials, partners and media will be invited. Outreach on the October 4 event has occurred – Save the Date announcements sent to Congressionals and partners. Additional outreach planned to announce the availability of the Safe Harbor Agreement including Congressional notification via email, a news release will be issued and posts will be made on the web and through Social media. (No FRN required). (R2 – Southwest Region)

UPDATED: In late October, or early November, FWS will publish a 12-month finding on the listing status of the southwestern willow flycatcher. Pacific Legal Foundation petitioned FWS to delist the flycatcher and in March 2016 we published a 90-day finding that the petition included substantial information, primarily regarding the subspecies' taxonomy. Upon robust

consideration of the petition and the flycatchers' classification, the Southwest Region is completing a 12-month finding that delisting of the southwestern willow flycatcher is not warranted. Outreach is being planned – including a news release and Congressional notifications via email. Interest expected to be moderate. No controversy anticipated. (R2 – Southwest Region)

REPEAT: On September 30, FWS, The Peregrine Fund and cooperating agencies will release to the wild two or three California condors in Vermilion Cliffs National Monument in northern Arizona. The public is invited to observe the 21st annual release from a viewing area where spotting scopes will be set up and project personnel will be available to answer questions. The release coincides with National Public Lands Day. There are presently 74 condors in the wild in the canyon country of northern Arizona and southern Utah. (R2 – Southwest Region)

REPEAT: American Burying Beetle Species Status Assessment and 12-month finding – FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed prior to the issuance of a 12-month finding which is expected at the end of 2017. In June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

Endangered Species Act Listing Actions

REPEAT: FWS anticipates sending to the *Federal Register* 12-month findings on petitions including one to list the San Felipe gambusia, a Texas fish this Fall. (R4 – Southeast Region, R2 – Southwest Region (lead)

REPEAT: Lesser Prairie-Chicken Species Status Assessment – FWS anticipates a Species Status Assessment (SSA) for the lesser prairie-chicken (LPC) will be completed by the end of the calendar year. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. USGS, through its Open File Report (OFR), made available the population model it prepared for FWS. The population model represents one component of the SSA and will be considered alongside of all other available information. On August 25, the draft SSA report was sent to an external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) that FWS has been coordinating with throughout development of the SSA. On August 29, the draft report was sent out for external, independent scientific peer review through a third-party contractor. Comments are due back on October 10, 2017. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. (R2 Southwest Region & R6 Mountain-Prairie Region)

REPEAT: DELISTING - FWS plans to remove the endangered Gila chub and its critical habitat from the Federal List of Endangered and Threatened Wildlife due to taxonomic change. Gila

chub was listed with critical habitat in Arizona in 2005. In April 2017, FWS withdrew a proposal to list the headwater and roundtail chubs as a result of new taxonomic information that the two former species and the Gila chub are a single species (identified as the roundtail chub). (Conducting section 7 consultation and ongoing recovery efforts for Gila chub – a taxon that is no longer recognized – is problematic.) Following proposing to delist the Gila chub, FWS will conduct a status assessment of the now larger taxon of roundtail chub throughout its five-state range. Objection from some taxonomists, desert fishes professionals and environmental groups is anticipated. Communications planning is under development. (Delisitng: R2-Southwest Region. SSA: Regions 2 and 6)

Other Ecological Services Items of Note

UPDATED: Texas Pollinator BioBlitz - Led by the Texas Parks and Wildlife Department, FWS along with a variety of other natural resource agencies and Non-Government organizations, are planning the second annual Texas Pollinator BioBlitz. The event will be held September 23 through October 8, 2017. Outreach and educational events covering monarchs and other pollinators will be held on FWS National Wildlife Refuges, state and city parks, botanical gardens, zoos, and other public venues. The BioBlitz serves as an opportunity for the public to engage in monarch and pollinator conservation and to serve as a citizen scientist. For details on Pollinator BioBlitz events and more, visit: https://tpwd.texas.gov/education/bioblitz (R2 – Southwest Region)

UPDATED: Leander Independent School District (LISD) ITP – FWS will announce in the *Federal Register* a Notice of Intent to prepare a draft National Environmental Policy Act (NEPA) Environmental Assessment on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas after consultation efforts are completed. LISD submitted a draft habitat conservation plan and incidental take permit (ITP). The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties. A follow up meeting is proposed to occur on Oct. 3. This may be followed with a site visit at a future date. Local interest anticipated. It has significant Congressional interest, as well as strong opposition from other parties. In support, DOI received a Congressional Inquiry dated June 16 from Texas Representatives McCaul, Carter, Flores, Smith and Williams and a September 25, letter from Senators Cornyn and Cruz. Congressional briefings are being proposed. Additional outreach, including issuing a news bulletin, will occur at time of publication in the *Federal Register*. (R2 – Southwest Region)

UPDATED: Since November 2016, BLM motion activated cameras in southern Arizona's Dos Cabezas Mountains and Chiricahua Mountains area have captured four photo images of what is believed to be the same male jaguar. The Center for Biological Diversity obtained video of a jaguar in the Chiricahua area and issued a press announcement. The Arizona Game and Fish Department specialists have since determined that the video and still photos are indeed of the same animal by utilizing spot recognition. (FWS – Southwest Region)

UPDATED: FWS, Coronado National Forest (CNF), Arizona Game and Fish Department, and the Phoenix Zoo conducted an annual census of the Mount Graham red squirrel (MGRS) and their winter-store food caches (called middens) September 18-20. Results will be available mid- to late October, but preliminary impressions suggest the squirrel and its habitat (including middens) were heavily impacted by the now-extinguished Frye Fire that began earlier this summer. The MGRS occurs only on (is endemic to) Mt. Graham in the Pinaleño Mountains, CNF, in southeastern Arizona. The MGRS population was estimated to be only 252 animals in Fall 2016. The Frye Fire encompassed approximately 48,443 acres of the Pinaleño Mountains, and included an estimated 78% of the MGRS's occupied range within its perimeter, with another 18% within the 2004 Nuttall-Gibson Fire perimeter. Portions of the MGRS's habitat were destroyed by high-severity burn, although even in areas of low- to moderate-severity burn, some middens were partially or completely destroyed. The Forest Service is developing a Biological Assessment of their fire response efforts to conduct an emergency section 7 consultation. MGRS experts and partners are working together to determine the path forward. Significant resources will likely be required to move forward with the subspecies' conservation and recovery. (Additional background submitted in previous reports.) (R2 – Southwest Region)

UPDATED: Bone Cave Harvestman Species Status Assessment – FWS Austin Ecological Services Office completed a draft species status assessment for the Bone Cave harvestman. The assessment will be sent out for external, independent scientific peer review in late September. Concurrently with peer review of the species status assessment, FWS will host representatives from the City of Austin, Texas Parks and Wildlife Department, Travis County, and Williamson County to detail the methodology used to analyze ecological conditions at sites occupied by the Bone Cave harvestman. Comments and information provided by the peer review and site analysis meeting will be incorporated into the species status assessment. The final species status assessment will inform a 5-year review to be completed for the Bone Cave harvestman in fiscal year 2018. (R2-Southwest Region)

UPDATED: Texas Hornshell Candidate Conservation Agreement and two Candidate Conservation Agreement with Assurances – The week of October 2, FWS anticipates signing a Candidate Conservation Agreement (CCA), draft Candidate Conservation Agreements with Assurances (CCAAs), and environmental assessment for the Texas hornshell (proposed for listing) and other covered species (Rio Grande River cooter, gray redhorse, blue sucker and Pecos springsnail), and an enhancement of survival permit under the Endangered Species Act. (Application was submitted by the Center of Excellence and New Mexico State Land Office on July 6.) The covered area will include portions of Eddy County, New Mexico, and Culberson County, Texas. The CCA, CCAAs, and the associated section 10(a)(1)(A) enhancement of survival permits will have duration of 30 years. FWS's New Mexico Ecological Field Office has been working for several years with the applicants to develop the CCAAs on non-Federal lands; and the Bureau of Land Management to develop the CCA on Federal lands. (The proposed listing of the Texas hornshell may be controversial in both Texas and southern New Mexico. A six month extension on the final listing determination was published on August 10, 2017.) Substantial local stakeholder outreach has been conducted for CCA / CCAAs. A news release and FAQs will be shared with the states, partners, congressional staff and media. (A *Federal Register* notice is not published with the final CCA/As.) (R2-Southwest Region)

REPEAT: FWS participating in the Texas Monarch Summit. Taking place November 1-2, this event will serve as a technical working meeting to develop quantitative goals for monarch conservation across the state. Participation is by invitation only. FWS participants include Katie Boyer (on the planning committee), Cyndee Watson (Texas PFW Program Coordinator), Chris Best (Texas State Botanist), and Leah Murray (SMARC Botanist). (R2 – Southwest Region)

REPEAT: Monarch Joint Venture annual meeting takes place November 7-9, in San Antonio, Texas on the UT-San Antonio campus. These meetings provide an opportunity for all Monarch Joint Venture partners to collaborate on the annual Monarch Conservation Implementation Plan which guides national and international priorities. (All FWS)

REPEAT: FWS will join the Southern Core States for the monarch meeting taking place in Oklahoma City November 29 and December 1. This is a ~12 person working meeting with representatives from the state fish and game agencies to develop similar quantitative goals for the entire southern core geography. Kelly Meyers and Katie Boyer are the FWS representatives attending this meeting. (All FWS)

REPEAT: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review this Fall. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in December 2017. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2-Southwest)

REPEAT: FWS Partners with Steve Harvey Foundation, Texas to Take Urban Youth Fishing – On September 30, the FWS Arlington Ecological Services Field Office will partner with the Steve Harvey Foundation and the Texas Parks and Wildlife Department to take a group of young Dallas boys fishing at a local pond. Over the last five years, the FWS and the Steve Harvey Foundation have partnered on a number of events aimed at getting inner city youth engaged in outdoor experiences. Supportive Stakeholders include The Steve Harvey Foundation, hunting and fishing community, and the Texas Parks and Wildlife Department (R2 – Southwest Region)

REPEAT: American Burying Beetle ICP – FWS published a notice on September 5, to open a 30-day comment period on incidental take permit applications for Plains All American Pipeline, L.P. and Reach Energy Limited under the approved Industry Conservation Plan for American Burying Beetle in Oklahoma. These permit applications are to cover incidental take of American Burying Beetle for Oil and Gas development, extraction, and transport within the species range in eastern Oklahoma. This conservation plan reduces the time in acquiring an incidental take permit. The comment period closes on October 5, 2017. FWS anticipates making a permit decision within 60 days, but some permits may take longer (up to 105 days). FWS is drafting a notice for additional application for publication before the end of October. These notices are

published in the *Federal Register* on regular basis as companies apply for incidental take coverage under this conservation plan. (R2 Southwest Region)

REPEAT: San Antonio HCP, Texas – FWS anticipates publishing a Notice of Availability in late September or early October for a draft Habitat Conservation Plan and Incidental Take Permit request from the San Antonio Water Systems for the incidental take of five federally-listed karst invertebrates (collectively the Covered Karst Invertebrates): Madla's Cave meshweaver; Robber Baron Cave meshweaver; Braken Bat Cave meshweaver; and two species of ground beetles with no common names (Rhadine infernalis and Rhadine exilis). The Covered Karst Invertebrates are associated with the construction of two water pipelines in Bexar County, Texas. Once issued, the permit would be in place for 15 years. Controversy anticipated being low. Minimal outreach, including issuing a news bulletin locally is planned at time of publication in the *Federal Register*. Congressional Offices will be notified via email, a news release will be issued as well as web postings. (R2 – Southwest Region)

REPEAT: In October – FWS anticipates publishing a notice announcing the receipt of application and consideration of an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake. Outreach will consist of notifying stakeholders. (R2-Southwest Region)

National Wildlife Refuge Actions

September 23 through October 8 – Texas Pollinator BioBlitz takes place on various Refuges in Texas. See ES Items of Note above for details. (R2 – Southwest Region)

NEW: The FWS Havasu National Wildlife Refuge will close the public comment period for the draft Environmental Assessment on the proposed Sacramento Wash Right-of-way (ROW) improvement Project. The draft EA was opened for public review on September 15. The purpose of the proposed action is to consider issuance of a ROW permit to Mohave County, Arizona. The objective of the County's project is to restore Sacramento Wash to its historical drainage patterns to reduce the significant sediment transported and deposited on Oatman Highway and at Sacramento Wash outfall in Topock Bay, within the FWS Havasu National Wildlife Refuge. The location of the proposed project is in Mohave County, Arizona, on lands administered by FWS and adjacent to Oatman Highway. Potential local controversy and of Congressional interest. (R2 – Southwest Region)

NEW: FWS celebrates the Sevilleta National Wildlife Refuge through a series of Ten Minute Talks on a variety of subjects, including reduction of prairie dogs, bats: nature's unsung heroes, and a turtle's tale: staying cool in a hot world. The informal talks will be held on the north patio on October 21. Tours of the Sevilleta Field Station, operated by the University of New Mexico in collaboration with FWS' Sevilleta National Wildlife Refuge, will take place immediately after the informal talks. Also taking place during the celebratory event are birding walks along the Rio Grande, hikes, exhibitions with live animals, and live music. This family-friendly, fun-filled day is open to the public and media. Most activities are free, however some events require early registration and may require a fee. (R2 – Southwest Region)

NEW: On September 25, 2017, Representative Mark Wayne Mullin's District staffer Eddie Dempsey stopped by the FWS Tishomingo National Wildlife Refuge in Oklahoma to check on

the progress of the construction plans for the new visitor center and maintenance shop proposed to replace infrastructure destroyed in the 2015 floods. FWS is working on developing a Memorandum of Agreement with the State Historical Preservation Office, Oklahoma Archaeological Survey, U.S. Army Corps of Engineers, and the Chickasaw Nation, which will allow forward movement on the new construction. FWS anticipates the MOA could be in place by December 2017, or earlier. (R2 – Southwest Region)

REPEAT: FWS is hosting the annual Rio Reforestation event on October 14, on the Lower Rio Grande Valley National Wildlife Refuge in Texas. This event is open to all individuals interested in restoring natural habitats, with special invitations being extended to teachers, students, parents, scouting organizations as well as the general public. FWS is seeking 1,000 volunteers to plant seedlings for 32 species of trees and shrubs on 17 acres of refuge land on the La Sal Del Rey tract. Visit on line for more information on the Rio Reforestation 2017 event.

REPEAT: September 30 - FWS celebrating National Public Lands Day and the 5th Birthday of the Valle de Oro National Wildlife Refuge, an urban refuge outside of Albuquerque, New Mexico. This free, family-friendly festival is open to the public and the media. (R2 – Southwest Region)

REPEAT: National Wildlife Refuge System Improvement Act Celebrates 20 Years – FWS will join the celebration of the 20th anniversary of the National Wildlife Refuge System Improvement Act on October 12-13, 2017. Friends of the New Mexico's National Wildlife Refuges are gathering at Valle de Oro National Wildlife Refuge for the start of the two-day celebration. In the afternoon, the event moves to Sevilleta NWR. On Day 2, the festivities continue at Bosque del Apache NWR on October 13. Congressional representatives, other dignitaries, and FWS Refuge managers are invited to speak the morning of Day 1. Open to the media and the public. (R2 – Southwest Region)

REPEAT: FWS Southwest Region Celebrates Refuge Week. See table at end of document with a list of upcoming public events. (R2 – Southwest Region)

Border-Related Activities

NEW: A media conference regarding the proposed border wall is tentatively being planned by the local community on Saturday, October 21, 2017. The event is proposed to occur at or near the FWS Santa Ana National Wildlife Refuge (FWS is not a participant). If the event takes place, it is estimated that 50 to 65 individuals could be in attendance, including 18 Mayors from local towns of the Rio Grande Valley (the nearest City to the Refuge is Alamo, Texas). It is anticipated the local community will have signed resolutions against the proposed project. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require transporting water from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade /

replace pump and water delivery components to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Road Construction - On March 20, FWS was contacted by the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to coordinate an upcoming road construction project for a 5.9-mile portion of the Presumido Canyon Road through the Baboquivari Mountains, scheduled to begin in January 2018. The project will require water for the construction, and U.S. Customs and Border Protection (CBP) will perform maintenance of an FWS pump and water well in return for increased use of the FWS-owned well. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Communication Towers - On April 18, FWS and U.S. Customs and Border Protection (CBP) discussed advance planning for Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge would be affected, with the goal of upgrading technology and providing a more robust foundation – all within the original impact areas. Work is proposed to begin in January 2018 dependent upon completion of planning, engineering, and permitting. Follow-up conversations with FWS have occurred to determine the necessary special use permitting process. (R2 – Southwest Region)

Fish and Aquatic Conservation

NEW: The Arizona Game and Fish Department has temporarily closed Frye Creek to fishing in order to evaluate and restore a population of Gila trout following widespread habitat damage on Mt. Graham due to this past summer's Frye Fire and ensuing flooding. The State agency intends to reopen the stream to fishing once habitat is suitable for stocking of Gila trout and a population is established that can sustain angling pressure. See more information on the Frye Fire under ES Items of Note (Mt Graham Red Squirrel). (R2 – Southwest Region)

REPEAT: FWS San Marcos Aquatic Resource Center will host a kids fishing day on October 21 in Texas.

Migratory Birds

Nothing significant to report.

Science Applications

Nothing significant to report

Wildlife and Sport Fish Restoration

See FishBites – Feature providing the perspective of a hunter.

UPDATED: September 23 - Hunting Fishing Day Celebration - FWS participated in the Grand Opening of Cabela's in Albuquerque, New Mexico. FWS Southwest Region WSFR Chief, Cliff Schleusner, joined Albuquerque Mayor Berry and Mary Cabela at a ribbon-cutting event, opening the doors to the newest Cabela's store in New Mexico. The hunting and angling community will see a permanent FWS display that highlights work in conservation in New

Mexico and beyond. The grand opening coincides with National Hunting and Fishing Day. The event included threatened Gila trout on display in a living stream from Mora National Fish Hatchery. The species was federally endangered until 2006, and opened to angling in 2007, after a 50-year hiatus. Conservation endeavors now offer adventurous anglers a change to catch the rare copper-colored trout. Of great interest to the hunting and fishing community and many others. (R2 – Southwest Region)

Tribal Consultation

NEW: October 18 – FWS is tentatively proposing to co-host a Mussel 101 Congressional briefing for District staffers with the Texas Parks and Wildlife Department. Final date and location in Texas TBD. (R2 – Southwest Region)

NEW: The Inter Tribal Council of Arizona is planning a November meeting and is interested in discussing the revised Native American Policy and implementation in the Southwest Region. Date and location in Arizona TBD.

REPEAT: FWS grant supports the Tribal Alliance for Pollinators Inaugural Event in Sulphur, Oklahoma on September 28, 2017. The Learning Center at the Euchee Butterfly Farm, Monarch Watch, and the Chickasaw Nation will host the Inaugural Event of the Tribal Alliance for Pollinators (TAP). The TAP is envisioned as an innovative consortium whose goal is to provide technical support to Tribes in Oklahoma and throughout North America seeking to restore native plants to their Tribal lands. This new initiative will unite native peoples in promoting habitat restoration for monarchs, pollinators, and native grassland ecosystems, which will also benefit cultural traditions. The Inaugural Event will take place at the Chickasaw Nation's Cultural Center and will celebrate the success of Tribes already completing monarch habitat restoration projects through the Tribal Environmental Action for Monarchs as well as formally announce the creation of the TAP. FWS Southwest Region completed a grant agreement to assist in establishment and facilitation of the TAP and will present an award to the Chickasaw Nation at the event. (R2 – Southwest Region)

REPEAT: Inter-Tribal ESA Training - FWS is planning to host two Tribal Wildlife Summits, one in Arizona (October 3-5) and in New Mexico (November 7-9). These summits will include aspects of all FWS Divisions, including the Endangered Species Act, with a portion of the summit devoted to law enforcement training to assist Tribal Game Wardens and other Tribal agents. International Game Warden magazine, Spring 2017, published a story on the FWS law enforcement training for Native American conservation officers. (R2 – Southwest Region)

REPEAT: FWS and the Gila River Indian Community (GRIC) are hosting a workshop for tribes on pollinators and monarch butterflies at the GRIC's Huhugam Heritage Center, Chandler, Arizona (Southeast of Phoenix) on October 31 and November 1, 2017. On day two, there will be a hands-on planting of monarch and pollinator plants in a pollinator garden. (R2 – Southwest Region)

FWS Hooks Families on Fishing – Family Fish Camps Planned on National Wildlife Refuges

- **Topic**: FWS is gearing up to become a First Catch Center in partnership with the Recreational Boating and Fishing Foundation and the local non-profit organization Fishings' Future, in Texas. As a First Catch Center the FWS Laguna Atascosa National Wildlife Refuge will be offering several Family Fish Camps each year to provide local families with the basic knowledge and skills to start fishing. FWS, in partnership with the Texas Parks and Wildlife Department, is offering training for individuals to become certified angler to assist with the Family Fish Camps. The first training takes place on Saturday, October 21. Read more at: http://www.valleymorningstar.com/news/local_news/article_4b1a0700-9ce5-11e7-bdf7-8b879f686e62.html. (R2 – Southwest Region)
- **Supportive Stakeholders:** Texas Parks and Wildlife Department, outdoor enthusiasts, anglers, Recreational Boating and Fishing Foundation and others
- **Impacted Location:** state

Private Land Owners Sign Safe Harbor Agreement to Help Conserve Critically Endangered Houston Toad - Texas

- **Topic**: FWS and the Texas Parks and Wildlife Department joined with several other partners to kickoff a signed agreement that provides a brighter future for the Houston toad, one of the first amphibians to be protected under the Endangered Species Act and one of Texas' most critically endangered species. The kickoff event was held on October 4 to announce the newly signed Safe Harbor Agreement, a voluntary program involving private landowners in important conservation efforts. The event was in Bastrop County, Texas, at Rancho Zunzun, the first property to enroll in the Safe Harbor Agreement. Thirty people in attendance, including members of the media. See details under ESA Recovery Actions. (R2 – Southwest Region)
- **Supportive Stakeholders:** Texas Parks and Wildlife Department, working with Bastrop County, the Houston Zoo, Texas State University, nonprofit groups and other partners.
- **Impacted Location:** Bastrop County, Texas

FWS Partners with Steve Harvey Foundation, Texas to Take Urban Youth Fishing

- **Topic**: FWS Arlington Ecological Services Field Office partnered with the Steve Harvey Foundation and Texas Parks and Wildlife Department (TPWD) to take 25 Dallas, Texas area boys fishing at Cedar Hill State Park on September 30, 2017. For many of the young men this was their first fishing experience and they were excited to spend the afternoon learning about fishing and being outside. One of the goals of the Steve Harvey Foundation is to introduce and pair children with community leaders as mentors; through group and one-on-one mentoring programs. Over the last five years, the USFWS, TPWD and the Steve Harvey Foundation have partnered on a number of events aimed at getting inner city youth engaged in outdoor experiences. (R2 – Southwest Region)

- **Supportive Stakeholders:** The Steve Harvey Foundation, hunting and fishing community, and the Texas Parks and Wildlife Department
- **Impacted Location:** Dallas, Texas

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
The Independent Wolf	Oct 3	Feature on White Mountain Animal Hospital veterinarian, Ole Alcumbrac after returning from a Mexican wolf capture at the Springerville Airport on Jan. 26, 2017. The operation was a joint venture with the U.S. Fish and Wildlife and the Arizona Department of Game and Fish. Read more at: http://www.wmicentral.com/news/pinetop_lakeside/local-wild--life-vet-is-a-man-of-many/article_cec02e7d-8e36-525c-b482-3719900c2ea6.html
KUNM Wolf	Oct. 12 8 to 9a MT	Megan Kamerick is hosting a live call in show on KUNM in Albuquerque, New Mexico. The program will focus on the Mexican wolf recovery plan. Potential questions from callers could touch on topics such as livestock depredation, genetic diversity, and habitat area. John Oakleaf, Mexican wolf recovery program field coordinator, will be the FWS representative on the call-in program. http://kunm.org/people/megan-kamerick
Outdoor Channel Wolf	Oct 16 or 23	The Outdoor Channel program "Wild Ops" will feature the Mexican wolf on Oct. 23. The episode is expected to include footage of USFWS Mexican wolf recovery team during their 2016 (Jan - Feb 2017) annual count and survey. See ES Items of Note for details.

Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel

October 3-5 - FWS held the first of two Tribal Wildlife ESA training events in the Southwest Region in Arizona. There were 27 Tribal members from several Tribes in Arizona in attendance. A second Tribal Wildlife ESA training will be held in New Mexico (November 7-9). See Tribal Consultations for details. (R2 – Southwest Region)

Through October 8 – Texas Pollinator BioBlitz is currently taking place on FWS National Wildlife Refuges and other locations in Texas. See ES Items of Note below. (R2 – Southwest Region)

October 8-14FWS celebrates National Wildlife Refuge Week. See list of events below for activies in the Southwest.

October 12-13 - FWS Southwest Region joins the celebration of the 20th anniversary of the National Wildlife Refuge System Improvement Act. See Refuges for details. (R2 – Southwest Region)

October 14 - FWS is hosting the annual Rio Reforestation event on the Lower Rio Grande Valley National Wildlife Refuge in Texas. See Refuges for details. (R2 – Southwest Region)

October 18 – FWS is tentatively proposing to co-host a Mussel 101 Congressional briefing for District staffers with the Texas Parks and Wildlife Department. Final date and location TBD. (R2 – Southwest Region)

October 18 – Tentatively proposed - Consultation meeting with the White Mountain Apache Tribe in Arizona to discuss Statement of Relations with incoming Regional Director. Details will be available as meeting is firmed up. (R2 – Southwest Region)

Hot Topics - Week Ahead Announcements and Actions

Hurricane Impacts in Texas - Updates are posted on the FWS Southwest webpage at: https://www.fws.gov/southwest/hurricaneinfo/index.htmnews

In late September FWS will be sent out for external, independent scientific peer review a draft species status assessment for the Bone Cave harvestman. See ES Items of Note. (R2 – Southwest Region)

In early October, FWS anticipates publishing a Notice of Availability for a draft Habitat Conservation Plan request from the San Antonio Water Systems. See ES Items of Note for details. (R2 – Southwest Region)

In early October, FWS anticipates signing a Candidate Conservation Agreement, draft Candidate Conservation Agreements with Assurances, and environmental assessment for the Texas hornshell. See ES Items of Note for details. (R2 – Southwest Region)

October 5, 2017 – FWS is closing the 30-day comment period on an incidental take permit under the American Burying Beetle ICP for Plains All American Pipeline, L.P. and Reach Energy Limited in Oklahoma. See ES Items of Note for details. (R2 – Southwest Region)

October 10 – FWS anticipates receipt of peer-reviewed comments on the Lesser Prairie-Chicken Species Status Assessment. See ESA Listing Actions for details. (R2 – Southwest Region)

October 15 – FWS Havasu NWR will close the public comment period on the draft Environmental Assessment for the Sacramento Wash Improvements Project. See Refuges for details. (R2 – Southwest Region)

Upcoming Workshops & Meetings

October 21 – A media conference regarding the proposed border wall is tentatively being planned by the local community at or near FWS Santa Ana National Wildlife Refuge. See Border-related Activities for details. (R2 – Southwest Region)

October and November – Meet and Greet meetings will be arranged between incoming Regional Director and Members in the District, when possible. (R2 – Southwest Region)

Endangered Species Act Recovery Actions

UPDATED: Houston Toad Safe Harbor Agreement – On October 4, FWS announced the approval of the Texas Parks and Wildlife Department (TPWD) enhancement of survival permit pursuant to section 10(a)(1)(A) of the Endangered Species Act, as well as the 30-year Programmatic Safe Harbor Agreement (SHA) for the Houston toad between TPWD and FWS. The agreement covers voluntary activities to restore, maintain, enhance, or create habitat for the endangered Houston toad in the following nine Texas counties: Austin, Bastrop, Burleson, Colorado, Lavaca, Lee, Leon, Milam and Robertson. TPWD and FWS hosted an event at Rancho Zunzun, Ms. Roxanne Hernandez's property in Bastrop County, Texas (near Austin, Texas), to kick off the Houston Toad Programmatic Safe Harbor Agreement. Local congressional offices, local elected officials, partners and media were invited. Outreach on the October 4 event has occurred – Save the Date announcements sent to Congressionals and partners. Additional outreach was conducted to announce the availability of the Safe Harbor Agreement including Congressional notification via email, a news release was issued and posted online. Additional posts completed through Social media. (R2 – Southwest Region)

REPEAT: The Center for Biological Diversity filed a lawsuit (Federal District Court – Tucson) on September 25, regarding a biological opinion (BO) issued on the proposed Rosemont copper mine project in the Santa Rita Mountains, south of Tucson, Arizona, and potential impacts to jaguar (one had been extensively monitored on the project area) and other endangered and threatened species. (To learn more about the lawsuit, visit the Center for Biological Diversity's website) The document in question is the Final Reinitiated BO requested by the U.S. Forest Service (Action Agency) by submittal of the Supplemental Biological Assessment on May 25, 2015. The non-jeopardy BO provides information on the potential incidental take, and as applicable destruction or adverse modification of critical habitat, of the following species: the endangered desert pupfish, Gila chub, Gila topminnow, jaguar, ocelot, lesser long-nosed bat, southwestern willow flycatcher, Huachuca water umbel, and Pima pineapple cactus as well

as the threatened western yellow-billed cuckoo, Chiricahua leopard frog and northern Mexican gartersnake. FWS completed its initial BO in Oct. 2013, and reinitiated consultation after receiving new hydrological modeling information, additional species listings, and confirmation of ocelot presence in the area. The reinitiated BO was completed on April 16, 2016, and later amended on April 28, 2016. The Amended BO issued by the FWS' website. (R2 - Southwest Region)

REPEAT: Mexican Wolf Draft Recovery Plan, First Revision (draft recovery plan) – The comment period for the draft revision of the Mexican Wolf Recovery Plan closed August 29. FWS estimates receiving more than **101,009 comments**, this number includes signed petitions. On August 23, the New Mexico State Game Commission (NMSGC) voted to support the recovery plan (6 to 1). The Arizona Game and Fish Department and New Mexico Department of Game and Fish are seeking clarification on the role the States will play in recovery and release of wolves. FWS met with the Chairman of the New Mexico State Game Commission and the Director of New Mexico Department of Game and Fish on September 7, to discuss moving forward with Mexican wolf recovery, including releases of Mexican wolves in New Mexico. The State is considering rejoining as a partner agency in Mexican wolf recovery. The Chairman requested a presentation to the Commission on permits for importation and release of Mexican wolves on December 20, 2017. Due to the high level of visibility and controversy on Mexican wolf recovery in general, extensive outreach is on-going, including personal phone calls, email reminders and updated web postings. Follow up briefings are being planned in early November. FWS is under a Court settlement agreement to complete the final plan by the end of November 2017. (R2 – Southwest Region)

REPEAT: In late October, or early November, FWS will publish a 12-month finding on the listing status of the southwestern willow flycatcher. Pacific Legal Foundation petitioned FWS to delist the flycatcher and in March 2016 we published a 90-day finding that the petition included substantial information, primarily regarding the subspecies' taxonomy. Upon robust consideration of the petition and the flycatchers' classification, the Southwest Region is completing a 12-month finding that delisting of the southwestern willow flycatcher is not warranted. Outreach is being planned – including a news release and Congressional notifications via email. Interest expected to be moderate. No controversy anticipated. (R2 – Southwest Region)

REPEAT: On September 30, FWS, The Peregrine Fund and cooperating agencies will release to the wild two or three California condors in Vermilion Cliffs National Monument in northern Arizona. The public is invited to observe the 21st annual release from a viewing area where spotting scopes will be set up and project personnel will be available to answer questions. The release coincides with National Public Lands Day. There are presently 74 condors in the wild in the canyon country of northern Arizona and southern Utah. (R2 – Southwest Region)

REPEAT: American Burying Beetle Species Status Assessment and 12-month finding – FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed prior to the issuance of a 12-month finding which is expected at the end of 2017. In June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all

available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

Endangered Species Act Listing Actions

UPDATED: On October 6, the 12-month findings on petitions including one to list the San Felipe gambusia, a Texas fish will be published in the *Federal Register*. (R4 – Southeast Region, R2 – Southwest Region (lead)

UPDATED: Lesser Prairie-Chicken Species Status Assessment – FWS anticipates a Species Status Assessment (SSA) for the lesser prairie-chicken (LPC) will be completed by the end of the calendar year. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. USGS, through its Open File Report (OFR), made available the population model it prepared for FWS. The population model represents one component of the SSA and will be considered alongside of all other available information. On August 25, the draft SSA report was sent to an external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) that FWS has been coordinating with throughout development of the SSA. On August 29, the draft report was sent out for external, independent scientific peer review through a third-party contractor. Comments are due back on October 10, 2017. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the States, and others to plan a face-to-face coordination meeting. WAFWA finalized permanent conservation agreements with three private landowners to conserve 3,682 acres of lesser prairie-chicken habitat in the shortgrass ecoregion of northwestern Kansas. The parcels are located near the 17,290-acre Smoky Valley Ranch, which is owned and managed by The Nature Conservancy. (R2 Southwest Region & R6 Mountain-Prairie Region)

REPEAT: DELISTING - FWS plans to remove the endangered Gila chub and its critical habitat from the Federal List of Endangered and Threatened Wildlife due to taxonomic change. Gila chub was listed with critical habitat in Arizona in 2005. In April 2017, FWS withdrew a proposal to list the headwater and roundtail chubs as a result of new taxonomic information that the two former species and the Gila chub are a single species (identified as the roundtail chub). (Conducting section 7 consultation and ongoing recovery efforts for Gila chub – a taxon that is no longer recognized – is problematic.) Following proposing to delist the Gila chub, FWS will conduct a status assessment of the now larger taxon of roundtail chub throughout its five-state range. Objection from some taxonomists, desert fishes professionals and environmental groups is anticipated. Communications planning is under development. (Delisitng: R2-Southwest Region. SSA: Regions 2 and 6)

Other Ecological Services Items of Note

NEW: On October 16 or 23, FWS anticipates The Outdoor Channel will be airing a program titled "Wild Ops," which will feature the USFWS Mexican wolf recovery team during their 2016 (Jan - Feb 2017) annual count and survey. PROGRAM SYNOPSIS: "On Wild Ops, a crack team of veterinarians, muggers and pilots attempt to capture, study and relocate wild animals. Utilizing helicopters, snowmobiles, ATVs, radio-collars, dart guns, ropes, nets, hobbles and mobile ER units, these wildlife wranglers chase a wide variety of wildlife: deer, moose, elk, wolves, pronghorn, and bighorn sheep, to name a few. Once captured, the Wild Ops team administers necessary medicines and tracking devices to ensure the health of the individual animal and the entire species for generations to come. The host of the Wild Ops program is Dr. Peter "Ole" Alcumbrac. He's the Director of Wildlife Health Services, which specializes in immobilization and capture of native and exotic species. He provides clinical and consultation services for private and public collections." As a Consulting Veterinarian for the Arizona Game and Fish Department, The White Mountain Apache Tribe and the US Fish and Wildlife Service, Dr. Alcumbrac has been a key member of the Mexican Wolf Recovery Program, the Sonoran Pronghorn Antelope Recovery Team and Bighorn Sheep disease studies. Since 1992, Dr. Alcumbrac has owned and operated a mixed animal and exotic practice in Arizona with Staff of five veterinarians, providing treatment to more than 15,000 animals. He is a recipient of the Award of Excellence from the Arizona Game and Fish Commission. (R2 – Southwest Region)

UPDATED: Texas Pollinator BioBlitz - Led by the Texas Parks and Wildlife Department, FWS along with a variety of other natural resource agencies and Non-Government organizations, are planning the second annual Texas Pollinator BioBlitz. Opening the doors on September 23, the event continues through October 8, 2017. Outreach and educational events covering monarchs and other pollinators will be held on FWS National Wildlife Refuges, state and city parks, botanical gardens, zoos, and other public venues. The BioBlitz serves as an opportunity for the public to engage in monarch and pollinator conservation and to serve as a citizen scientist. For details on Pollinator BioBlitz events and more, visit: https://tpwd.texas.gov/education/bioblitz (R2 – Southwest Region)

REPEAT: Leander Independent School District (LISD) ITP – FWS will announce in the *Federal Register* a Notice of Intent to prepare a draft National Environmental Policy Act (NEPA) Environmental Assessment on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas after consultation efforts are completed. LISD submitted a draft habitat conservation plan and incidental take permit (ITP). The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties. A follow up meeting is proposed to occur on Oct. 3. This may be followed with a site visit at a future date. Local interest anticipated. It has significant Congressional interest, as well as strong opposition from other parties. In support, DOI received a Congressional Inquiry dated June 16 from Texas Representatives McCaul, Carter, Flores, Smith and Williams and a September 25, letter from Senators Cornyn and Cruz. Congressional briefings are being proposed. Additional outreach, including issuing a news bulletin, will occur at time of publication in the *Federal Register*. (R2 – Southwest Region)

REPEAT: Since November 2016, BLM motion activated cameras in southern Arizona's Dos Cabezas Mountains and Chiricahua Mountains area have captured four photo images of what is believed to be the same male jaguar. The Center for Biological Diversity obtained video of a jaguar in the Chiricahua area and issued a press announcement. The Arizona Game and Fish Department specialists have since determined that the video and still photos are indeed of the same animal by utilizing spot recognition. (FWS – Southwest Region)

REPEAT: FWS, Coronado National Forest (CNF), Arizona Game and Fish Department, and the Phoenix Zoo conducted an annual census of the Mount Graham red squirrel (MGRS) and their winter-store food caches (called middens) September 18-20. Results will be available mid- to late October, but preliminary impressions suggest the squirrel and its habitat (including middens) were heavily impacted by the now-extinguished Frye Fire that began earlier this summer. The MGRS occurs only on (is endemic to) Mt. Graham in the Pinaleño Mountains, CNF, in southeastern Arizona. The MGRS population was estimated to be only 252 animals in Fall 2016. The Frye Fire encompassed approximately 48,443 acres of the Pinaleño Mountains, and included an estimated 78% of the MGRS's occupied range within its perimeter, with another 18% within the 2004 Nuttall-Gibson Fire perimeter. Portions of the MGRS's habitat were destroyed by high-severity burn, although even in areas of low- to moderate-severity burn, some middens were partially or completely destroyed. The Forest Service is developing a Biological Assessment of their fire response efforts to conduct an emergency section 7 consultation. MGRS experts and partners are working together to determine the path forward. Significant resources will likely be required to move forward with the subspecies' conservation and recovery. (Additional background submitted in previous reports.) (R2 – Southwest Region)

REPEAT: Bone Cave Harvestman Species Status Assessment – FWS Austin Ecological Services Office completed a draft species status assessment for the Bone Cave harvestman. The assessment will be sent out for external, independent scientific peer review in late September. Concurrently with peer review of the species status assessment, FWS will host representatives from the City of Austin, Texas Parks and Wildlife Department, Travis County, and Williamson County to detail the methodology used to analyze ecological conditions at sites occupied by the Bone Cave harvestman. Comments and information provided by the peer review and site analysis meeting will be incorporated into the species status assessment. The final species status assessment will inform a 5-year review to be completed for the Bone Cave harvestman in fiscal year 2018. (R2-Southwest Region)

REPEAT: Texas Hornshell Candidate Conservation Agreement and two Candidate Conservation Agreement with Assurances – The week of October 2, FWS anticipates signing a Candidate Conservation Agreement (CCA), draft Candidate Conservation Agreements with Assurances (CCAAs), and environmental assessment for the Texas hornshell (proposed for listing) and other covered species (Rio Grande River cooter, gray redhorse, blue sucker and Pecos springsnail), and an enhancement of survival permit under the Endangered Species Act. (Application was submitted by the Center of Excellence and New Mexico State Land Office on July 6.) The covered area will include portions of Eddy County, New Mexico, and Culberson County, Texas. The CCA, CCAAs, and the associated section 10(a)(1)(A) enhancement of survival permits will have duration of 30 years. FWS's New Mexico Ecological Field Office has been working for several years with the applicants to develop the CCAAs on

non-Federal lands; and the Bureau of Land Management to develop the CCA on Federal lands. (The proposed listing of the Texas hornshell may be controversial in both Texas and southern New Mexico. A six month extension on the final listing determination was published on August 10, 2017.) Substantial local stakeholder outreach has been conducted for CCA / CCAAs. A news release and FAQs will be shared with the states, partners, congressional staff and media. (A *Federal Register* notice is not published with the final CCA/As.) (R2-Southwest Region)

REPEAT: FWS participating in the Texas Monarch Summit. Taking place November 1-2, this event will serve as a technical working meeting to develop quantitative goals for monarch conservation across the state. Participation is by invitation only. FWS participants include Katie Boyer (on the planning committee), Cyndee Watson (Texas PFW Program Coordinator), Chris Best (Texas State Botanist), and Leah Murray (SMARC Botanist). (R2 – Southwest Region)

REPEAT: Monarch Joint Venture annual meeting takes place November 7-9, in San Antonio, Texas on the UT-San Antonio campus. These meetings provide an opportunity for all Monarch Joint Venture partners to collaborate on the annual Monarch Conservation Implementation Plan which guides national and international priorities. (All FWS)

REPEAT: FWS will join the Southern Core States for the monarch meeting taking place in Oklahoma City November 29 and December 1. This is a ~12 person working meeting with representatives from the state fish and game agencies to develop similar quantitative goals for the entire southern core geography. Kelly Meyers and Katie Boyer are the FWS representatives attending this meeting. (All FWS)

REPEAT: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review this Fall. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in December 2017. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2-Southwest)

REPEAT: American Burying Beetle ICP – FWS published a notice on September 5, to open a 30-day comment period on incidental take permit applications for Plains All American Pipeline, L.P. and Reach Energy Limited under the approved Industry Conservation Plan for American Burying Beetle in Oklahoma. These permit applications are to cover incidental take of American Burying Beetle for Oil and Gas development, extraction, and transport within the species range in eastern Oklahoma. This conservation plan reduces the time in acquiring an incidental take permit. The comment period closes on October 5, 2017. FWS anticipates making a permit decision within 60 days, but some permits may take longer (up to 105 days). FWS is drafting a notice for additional application for publication before the end of October. These notices are published in the *Federal Register* on regular basis as companies apply for incidental take coverage under this conservation plan. (R2 Southwest Region)

REPEAT: San Antonio HCP, Texas – FWS anticipates publishing a Notice of Availability in late September or early October for a draft Habitat Conservation Plan and Incidental Take Permit request from the San Antonio Water Systems for the incidental take of five federally-listed karst invertebrates (collectively the Covered Karst Invertebrates): Madla's Cave meshweaver; Robber Baron Cave meshweaver; Braken Bat Cave meshweaver; and two species of ground beetles with no common names (Rhadine infernalis and Rhadine exilis). The Covered Karst Invertebrates are associated with the construction of two water pipelines in Bexar County, Texas. Once issued, the permit would be in place for 15 years. Controversy anticipated being low. Minimal outreach, including issuing a news bulletin locally is planned at time of publication in the *Federal Register*. Congressional Offices will be notified via email, a news release will be issued as well as web postings. (R2 – Southwest Region)

REPEAT: In October – FWS anticipates publishing a notice announcing the receipt of application and consideration of an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake. Outreach will consist of notifying stakeholders. (R2-Southwest Region)

National Wildlife Refuge Actions

Continuing through October 8 – Texas Pollinator BioBlitz takes place on various Refuges in Texas. See ES Items of Note above for details. (R2 – Southwest Region)

REPEAT: The FWS Havasu National Wildlife Refuge will close the public comment period for the draft Environmental Assessment on the proposed Sacramento Wash Right-of-way (ROW) improvement Project. The draft EA was opened for public review on September 15. The purpose of the proposed action is to consider issuance of a ROW permit to Mohave County, Arizona. The objective of the County's project is to restore Sacramento Wash to its historical drainage patterns to reduce the significant sediment transported and deposited on Oatman Highway and at Sacramento Wash outfall in Topock Bay, within the FWS Havasu National Wildlife Refuge. The location of the proposed project is in Mohave County, Arizona, on lands administered by FWS and adjacent to Oatman Highway. Potential local controversy and of Congressional interest. (R2 – Southwest Region)

REPEAT: FWS celebrates the Sevilleta National Wildlife Refuge through a series of Ten Minute Talks on a variety of subjects, including reduction of prairie dogs, bats: nature's unsung heroes, and a turtle's tale: staying cool in a hot world. The informal talks will be held on the north patio on October 21. Tours of the Sevilleta Field Station, operated by the University of New Mexico in collaboration with FWS' Sevilleta National Wildlife Refuge, will take place immediately after the informal talks. Also taking place during the celebratory event are birding walks along the Rio Grande, hikes, exhibitions with live animals, and live music. This family-friendly, fun-filled day is open to the public and media. Most activities are free, however some events require early registration and may require a fee. (R2 – Southwest Region)

REPEAT: On September 25, 2017, Representative Mark Wayne Mullin's District staffer Eddie Dempsey stopped by the FWS Tishomingo National Wildlife Refuge in Oklahoma to check on the progress of the construction plans for the new visitor center and maintenance shop proposed to replace infrastructure destroyed in the 2015 floods. FWS is working on developing a

Memorandum of Agreement with the State Historical Preservation Office, Oklahoma Archaeological Survey, U.S. Army Corps of Engineers, and the Chickasaw Nation, which will allow forward movement on the new construction. FWS anticipates the MOA could be in place by December 2017, or earlier. (R2 – Southwest Region)

REPEAT: FWS is hosting the annual Rio Reforestation event on October 14, on the Lower Rio Grande Valley National Wildlife Refuge in Texas. This event is open to all individuals interested in restoring natural habitats, with special invitations being extended to teachers, students, parents, scouting organizations as well as the general public. FWS is seeking 1,000 volunteers to plant seedlings for 32 species of trees and shrubs on 17 acres of refuge land on the La Sal Del Rey tract. Visit on line for more information on the Rio Reforestation 2017 event.

REPEAT: National Wildlife Refuge System Improvement Act Celebrates 20 Years – FWS Southwest Region joins the celebration of the 20th anniversary of the National Wildlife Refuge System Improvement Act on October 12-13, 2017. Friends of the New Mexico's National Wildlife Refuges are gathering at Valle de Oro National Wildlife Refuge for the start of the two-day celebration. In the afternoon, the event moves to Sevilleta NWR. On Day 2, the festivities continue at Bosque del Apache NWR on October 13. Congressional representatives, other dignitaries, and FWS Refuge managers are invited to speak the morning of Day 1. Open to the media and the public. (R2 – Southwest Region)

REPEAT: FWS Southwest Region Celebrates Refuge Week. See table at end of document with a list of upcoming public events. (R2 – Southwest Region)

Border-Related Activities

REPEAT: A media conference regarding the proposed border wall is tentatively being planned by the local community on Saturday, October 21, 2017. The event is proposed to occur at or near the FWS Santa Ana National Wildlife Refuge (FWS is not a participant). If the event takes place, it is estimated that 50 to 65 individuals could be in attendance, including 18 Mayors from local towns of the Rio Grande Valley (the nearest City to the Refuge is Alamo, Texas). It is anticipated the local community will have signed resolutions against the proposed project. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require transporting water from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade / replace pump and water delivery components to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Road Construction - On March 20, FWS was contacted by the U.S. Border Patrol & Air and Marine Program Management Office (BPAM

PMO) to coordinate an upcoming road construction project for a 5.9-mile portion of the Presumido Canyon Road through the Baboquivari Mountains, scheduled to begin in January 2018. The project will require water for the construction, and U.S. Customs and Border Protection (CBP) will perform maintenance of an FWS pump and water well in return for increased use of the FWS-owned well. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Communication Towers - On April 18, FWS and U.S. Customs and Border Protection (CBP) discussed advance planning for Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge would be affected, with the goal of upgrading technology and providing a more robust foundation – all within the original impact areas. Work is proposed to begin in January 2018 dependent upon completion of planning, engineering, and permitting. Follow-up conversations with FWS have occurred to determine the necessary special use permitting process. (R2 – Southwest Region)

Fish and Aquatic Conservation

REPEAT: The Arizona Game and Fish Department has temporarily closed Frye Creek to fishing in order to evaluate and restore a population of Gila trout following widespread habitat damage on Mt. Graham due to this past summer's Frye Fire and ensuing flooding. The State agency intends to reopen the stream to fishing once habitat is suitable for stocking of Gila trout and a population is established that can sustain angling pressure. See more information on the Frye Fire under ES Items of Note (Mt Graham Red Squirrel). (R2 – Southwest Region)

REPEAT: FWS San Marcos Aquatic Resource Center will host a kids fishing day on October 21 in Texas.

Migratory Birds

Nothing significant to report.

Science Applications

Nothing significant to report

Wildlife and Sport Fish Restoration

Nothing significant to report

Tribal Consultation

UPDATED: Inter-Tribal ESA Training - FWS hosted the first of two Tribal Wildlife ESA training events to be offered in the Southwest Region in Arizona (October 3-5). The second ESA training event will occur in New Mexico (November 7-9). These Tribal training events include aspects of all FWS Divisions, including the Endangered Species Act, with a portion of the summit devoted to law enforcement training to assist Tribal Game Wardens and other Tribal agents. International Game Warden magazine, Spring 2017, published a story on the FWS law enforcement training for Native American conservation officers. (R2 – Southwest Region)

REPEAT: October 18 – FWS is tentatively proposing to co-host a Mussel 101 Congressional briefing for District staffers with the Texas Parks and Wildlife Department. Final date and location in Texas TBD. (R2 – Southwest Region)

REPEAT: The Inter Tribal Council of Arizona is planning a November meeting and is interested in discussing the revised Native American Policy and implementation in the Southwest Region. Date and location in Arizona TBD.

REPEAT: FWS grant supports the Tribal Alliance for Pollinators Inaugural Event in Sulphur, Oklahoma on September 28, 2017. The Learning Center at the Euchee Butterfly Farm, Monarch Watch, and the Chickasaw Nation will host the Inaugural Event of the Tribal Alliance for Pollinators (TAP). The TAP is envisioned as an innovative consortium whose goal is to provide technical support to Tribes in Oklahoma and throughout North America seeking to restore native plants to their Tribal lands. This new initiative will unite native peoples in promoting habitat restoration for monarchs, pollinators, and native grassland ecosystems, which will also benefit cultural traditions. The Inaugural Event will take place at the Chickasaw Nation's Cultural Center and will celebrate the success of Tribes already completing monarch habitat restoration projects through the Tribal Environmental Action for Monarchs as well as formally announce the creation of the TAP. FWS Southwest Region completed a grant agreement to assist in establishment and facilitation of the TAP and will present an award to the Chickasaw Nation at the event. (R2 – Southwest Region)

REPEAT: FWS and the Gila River Indian Community (GRIC) are hosting a workshop for tribes on pollinators and monarch butterflies at the GRIC's Huhugam Heritage Center, Chandler, Arizona (Southeast of Phoenix) on October 31 and November 1, 2017. On day two, there will be a hands-on planting of monarch and pollinator plants in a pollinator garden. (R2 – Southwest Region)

Subject:	Doc Review - NPS, FWS
Date:	Wednesday, October 11, 2017 4:58:27 PM
Attachments:	FWS.zip NPS.zip

Jason, Aurelia and Greg. Hope you're all doing well. I've attached two groups of documents to this email. I referenced them this morning in the politicals meeting. These are one-pagers for the secretary to have for his member meetings with HNR and HAC-I. They were created at the bureau level and have not been edited by a political. I need you all to determine who is responsible for the political reviews and get the edited versions back to me by COB Friday. If you separate FWS and Parks and I get two separate responses, that's fine. Just need them by Friday night. Once we get them back from you all, we will be working on them with PMB and up to the front office. Thanks and let me know who I should expect them from...cause I will bug you. haha

Micah

Office of the Secretary of the Interior

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Multiple Member interest
ISSUE: Oil and Gas Development in the Arctic National Wildlife Refuge

I. ISSUE BACKGROUND

- The Alaska National Interest Lands Conservation Act (ANILCA) of 1980 created the 19 million acre Arctic National Wildlife Refuge (Arctic Refuge).
- Section 1002 of ANILCA required DOI to conduct a resource assessment, completed in 1987, of the 1.5 million acre Arctic Refuge coastal plain area (1002 Area) located adjacent to the Beaufort Sea.
- In the 1987 assessment, the Secretary recommended that Congress consider leasing the 1002 Area for oil and gas. In 2009, the USGS determined the area had a mean estimate of 10.35 billion barrels of technically recoverable oil with 80 to 90 percent of that volume being economically recoverable.
- The Arctic Refuge's initial Comprehensive Conservation Plan (CCP), completed in 1988, recognized the coastal plain as a critical calving area for the Porcupine caribou herd, which are an important subsistence resource for Alaska Native people.
- A revised CCP with a final EIS was completed on April 3, 2015. It recommended designating 12 million acres of the Arctic Refuge as Wilderness, including the 1002 Area. Additionally, four rivers were recommended for inclusion into the National Wild and Scenic Rivers System.

II. POSITION of INTERESTED PARTIES

- The Alaska delegation supports leasing the coastal plain for oil and gas development.
- The State of Alaska, North Slope Borough, Arctic Slope Regional Corporation, and other development interests oppose the proposed Wilderness and Wild and Scenic River designations in the Arctic Refuge.
- The Native Gwich'in people, as well as environmental and conservation groups, support permanent wilderness designation.
- The majority of public comments on the 2015 CCP supported wilderness designation.

III. RECENT CONGRESSIONAL ACTIVITY

- In the 115th Congress, Sen. Markey (D-MA) introduced S. 820, and Rep. Huffman (D-CA-2) introduced H.R. 1889, nearly identical bills which would designate 1.6 million acres of the Arctic Refuge as wilderness.
- Sen. Murkowski (R-AK) introduced S. 49, and Rep. Young (R-AK) introduced H.R.49, which would both allow oil and gas leasing in the coastal plain of the Arctic Refuge.
- The Senate and House FY18 Budget Resolutions contain instructions for obtaining $1 and $5 billion in revenue to the Senate Energy and Natural Resources and House Natural Resources Committees respectively.

IV. NEXT STEPS/ OUTLOOK

- The Department included a legislative proposal in the FY 2018 President's Budget to open the coastal plain to oil and gas leasing. The first lease sales are projected to be in 2022 or 2023. A second lease sale would occur four years later.
- A FY18 Congressional Budget Resolution could pave the way for opening the 1002 Area.

October 2017

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Thompson, Portman, Stabenow, Bergman, Franken, Duckworth, McCollum, Joyce, Kaptur
ISSUE: Asian Carp

I. ISSUE BACKGROUND

- Bighead, Black, and Silver carps (Asian carp) are listed as injurious wildlife under the Lacey Act (18 USC 42) and may not be imported or transported between the continental U.S., the District of Columbia, Hawaii, Puerto Rico, or any other territory of the U.S.
- FWS works with state and federal agency partners to implement the national *Management and Control Plan for Bighead, Black, Grass, and Silver Carps in the United States* (Plan), which addresses Asian carp issues across the nation. The Plan was written by the Asian Carp Working Group of the Aquatic Nuisance Species Task Force (ANSTF). It was approved by the ANSTF in 2007.
- FWS and the U.S. Environmental Protection Agency (EPA) co-chair the 27-member Asian Carp Regional Coordinating Committee (ACRCC), which develops an annual Action Plan with activities funded through agency base appropriations and Great Lakes Restoration Initiative funding.
- FWS leads federal implementation of the Water Resources Reform and Development Act (WRRDA) Sec. 1039, which calls for increased inter-agency collaboration to prevent the spread of Asian carp in the Upper Mississippi (UMRB) and Ohio River (ORB) Basins.

II. POSITION of INTERESTED PARTIES

- Asian carp are a high-priority for the Great Lakes Task Force, other Members from the Great Lakes, UMRB and ORB, State leadership, conservation groups, and the media.
- Rep. McCollum (D-MN-4) has an interest in actions conducted in support of WRRDA and efforts focused on the UMRB, especially in Minnesota.
- Sens. Portman (R-OH) and Stabenow (D-MI) and Reps. Kaptur (D-OH-9) and Joyce (R-OH-14) have an interest in actions conducted in the Chicago Area Waterway System (CAWS) and secondary pathways to protect the Great Lakes.

III. RECENT CONGRESSIONAL ACTIVITY

- Sens. Stabenow and Portman held a Great Lakes Task Force meeting to discuss actions within the Midwest on Asian carp. FWS presented. Fourteen Members attended.
- FWS testified in March 2017 before the Senate Environment and Public Works Committee hearing, *"Examining Innovative Solutions to Control Invasive Species and Promote Wildlife Conservation".*
- FWS delivered the ANSTF's 2015 Report to Congress.
- July, 2017: In response to a silver carp being found above the last electrical barrier before Lake Michigan, FWS led a Congressional briefing on the 2017 Asian Carp Monitoring and Response Plan and the Upper Illinois Waterway Contingency Response Plan.

IV. NEXT STEPS/ OUTLOOK

- Deliver WRRDA 2016 Report to Congress. With OMB for clearance.
- The FY 2018 request for FWS's Asian carp effort is $7,885,000.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Bergman, Westerman, Gosar, Cochran, Leahy
ISSUE: Cormorant Depredation of Fish in Southeast, Northeast, and Midwestern States

I. ISSUE BACKGROUND

- Double-crested cormorants are fish-eating birds that are protected under the Migratory Bird Treaty Act (MBTA). The MBTA prohibits the take (killing, capture, selling, trading, transport, etc.) of protected migratory bird species without prior authorization.
- Cormorants congregate in the southern states in the fall and winter, where they impact aquaculture facilities. In the spring and summer, cormorants congregate in northern states where they are perceived to be a competitor to fishermen for wild free-swimming fish.
- In May 2016, the U.S. District Court for the District of Columbia vacated two FWS Depredation Orders that previously allowed for the lethal take of cormorants, citing inadequate NEPA documentation.

II. POSITION OF INTERESTED PARTIES

- Senate Appropriations Committee Chairman Thad Cochran and other Members representing affected southern states (AL, AR, LA, MS, NC) have urged the FWS to allow for the take of cormorants before they return to southern aquaculture facilities.
- Members from Northeast and Midwest states (MI, MN, NH, NY, VT) have urged the FWS to address cormorant impacts on wild free-swimming fish that are perceived to effect commercial and recreational fisheries in their states.

III. RECENT CONGRESSIONAL ACTIVITY

- In the 115th Congress, Rep. Crawford and Sen. Cotton introduced companion bills, H.R. 368 and S. 219, cosponsored by Members from AR, AL, MS, and NC, to address cormorant impacts on aquaculture by reinstating the FWS Depredation Order that the U.S. District Court vacated.
- The FY 2017 appropriations conference report directed the FWS to expedite NEPA documents that would allow the agency to issue cormorant depredation permits per the direction of the U.S. District Court.
- On July 22, 2017 Rep. Bergman used his time during a House Natural Resources Committee to ask Sec. Zinke to address the cormorant and wild fish issue in his district.

IV. NEXT STEPS / OUTLOOK

- FWS and USDA are completing a NEPA Environmental Assessment to evaluate options for lethal take permits for aquaculture facilities, among other circumstances, which is expected to be completed by the end of October.
- FWS will also review the science and options for lethal take permits involving cormorants and their potential damage to recreational and commercial fishing, including by working with state fish and wildlife agencies to collect and share data. This process is expected to take at least a year.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Murkowski, Bishop, Cantwell, Grijalva
ISSUE: FWS' Deferred Maintenance Backlog

I. ISSUE BACKGROUND

- Over 51 million people visited FWS hatcheries and refuges last year, including hunters, anglers, birders, and other outdoor recreationists.
- FWS real property assets include: 6,500 buildings; 8,600 water management structures; nearly 14,000 roads, bridges, and dams; and 10,500 "other" structures.
- Inadequate investments in asset maintenance have led to failing infrastructure and a deferred maintenance backlog at the FWS.
- While the FWS has reduced its backlog since 2010, a current FWS deferred maintenance (DM) backlog of approximately $1.4 billion remains.

II. POSITION of INTERESTED PARTIES

- There is congressional interest in addressing the DM backlog at the FWS, and across the Department of the Interior.
- Chairman Rob Bishop (R-UT) and other Members have taken the position that funding the Department's DM backlog should be prioritized, specifically over new land acquisition funding.
- Chairwoman Murkowski (R-AK) has emphasized public-private partnerships to address DM funding.
- Ranking Members Cantwell (D-WA) and Grijalva (D-AZ) are supportive of DM funding.

III. RECENT CONGRESSIONAL ACTIVITY

- The House Natural Resources Committee included addressing the DM backlog in the Committee's oversight plan for the 115th Congress.
- Chairwoman Murkowski's Senate Energy and Natural Resources Committee hosted staff briefings in March on the DM backlog where FWS and other Bureaus presented.
- Chairwoman Murkowski held a hearing in March on the topic of "opportunities to improve and expand infrastructure important to federal lands, recreation, water, and resources" where she highlighted addressing the Department's DM backlog.

IV. NEXT STEPS/ OUTLOOK

- The President's FY18 budget request emphasizes DM funding, requesting $41.0 million in Refuge DM and $10.2 million in Hatchery DM.
- The House-passed FY18 omnibus appropriations bill increased Refuge DM by $1.3 million to $42.3 million and added $3.0 million to Hatchery DM for a total of $13.2 million.
- Outside of the annual appropriations process, Congress and the Administration are considering a separate infrastructure package that would likely include provisions to address the FWS's and the Department's DM.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Bishop, Grijalva, Huffman, Calvert
ISSUE: Delisting/Downlisting 3-Year Plan

I. ISSUE BACKGROUND

- In order to recognize success in recovering species under the Endangered Species Act (ESA), keep the lists of endangered and threatened wildlife and plant species accurate and up-to-date, and focus conservation resources on those species most in need, the FWS reviews the status of listed species every five years, and responds to petitions received from the public to determine whether listed species should be reclassified from endangered to threatened (downlisted) or removed from the list (delisted).
- The FWS has developed a national workplan reflecting our schedule for actions addressing 5-year status review recommendations and substantive petitions to downlist and delist species over the next three years.
- The workplan was developed to provide greater clarity and predictability regarding the timing of eventual downlisting and delisting determinations to state wildlife agencies, non-profit organizations, and other stakeholders and partners.
- A species' inclusion in this workplan does not mean that a final decision has been made to downlist or delist.

II. POSITION of INTERESTED PARTIES

- There is congressional interest in focusing ESA recovery funding on activities that are inherently federal, such as 5-year reviews and status changes.

III. RECENT CONGRESSIONAL ACTIVITY

- The House FY 2018 Interior Appropriations bill contains $85,570,000 for ESA recovery activities, including $3,000,000 for delisting and downlisting activities.
- The House FY 2018 Interior Appropriations Committee Report directed the Service to complete all five-year reviews within the period required by law, and, for any determination on the basis of such review whether a species should be delisted, downlisted, or uplisted, promulgate an associated regulation prior to initiating the next status review for such species.

III. NEXT STEPS

- To keep the public informed of our progress in recovering species, the FWS plans to periodically update this work plan to reflect our consideration of new information over time, new status reviews initiated as a result of petitions, and new recommendations resulting from our 5-year reviews.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Feinstein, McCarthy, Calvert, McClintock, Denham, LaMalfa, Costa, Huffman
ISSUE: Delta Smelt, 08 Biological Opinion, California WaterFix Consultation, FISH Act

I. ISSUE BACKGROUND

- The threatened Delta smelt is a small fish endemic to the San Francisco Bay-Delta that completes its entire one-year lifecycle in and near where fresh and salt water mix in the estuary. The Bay-Delta has been altered by land use changes, water development, and invasive species, reducing the amount of high quality habitat available for Delta smelt.
- Record-low abundance of Delta smelt reflects decades of habitat change, competition and predation from invasive species, and the recent multi-year drought.
- In 2008, FWS issued a jeopardy Biological Opinion (BiOp) on the operation of the Central Valley Project and State Water Project. FWS included a Reasonable and Prudent Alternative (RPA), affecting the amount of water that can be used from the system, to avoid jeopardy and adverse modification, which remains in place today.
- The WaterFix project represents the State of California's plan to upgrade outdated infrastructure in the Delta to secure water supplies and improve the Delta's ecosystem. FWS finalized the WaterFix BiOp in June 2017.

II. POSITION of INTERESTED PARTIES

- Water export restrictions to protect Delta smelt are opposed by agricultural and municipal water users, but supported by environmental groups and fishing interests.
- WaterFix is supported by a number of agricultural and municipal interests and the State of California, but opposed by many environmental groups (who have filed litigation challenging the WaterFix BiOp) and local landowners. The Westlands Water District Board recently voted against participating in WaterFix stating that the project is not financially viable.

III. RECENT CONGRESSIONAL ACTIVITY

- FWS is working with partners to implement the requirements contained in the 2016 WIIN (Water Infrastructure Improvements for the Nation) Act, which contained a requirement to develop and expand captive breeding capability.
- This month, Congressmen Calvert, LaMalfa, and others introduced the Federally Integrated Species Health (FISH) Act to consolidate management and regulation of the Endangered Species Act (ESA) with the FWS. This would essentially transfer authority over ESA-listed marine mammals and anadromous fish, such as salmon, from the National Marine Fisheries Service to FWS.

IV. NEXT STEPS/ OUTLOOK

- Last August, a multi-year process, led by Bureau of Reclamation with federal and state partners, began to develop a new BiOp to find balance between the needs of agriculture, municipalities and conservation.
- FWS approved Reclamation's proposal to modify implementation of RPA Action 4 from the 2008 BiOp in October 2017, which is intended to maintain the low salinity zone in specific locations in the estuary during the fall in wet and above normal water years.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Bishop, McClintock, Pearce, Grijalva, Tsongas, Beyer, Huffman
ISSUE: ESA Reform and Legislation

I. ISSUE BACKGROUND

- In this Congress, the EPW Committee and HNR Committee have expressed an interest in moving legislation that would amend the ESA, and have held related oversight hearings.
- Hearings and oversight in the 114th Congress centered on the role of litigation and settlements, use of data, transparency in decision-making, policies for designating critical habitat, and barriers to recovery.
- FWS is participating in a multi-year process led by the Western Governors' Association (WGA) to examine species conservation and the ESA and to identify actions to improve the statute or its implementation.

II. POSITION of INTERESTED PARTIES

- Last June, the WGA passed a resolution urging Congress to reauthorize the ESA, including several principles to reform the law.
- This March, the National Governor's Association adopted a policy similar to the WGA.
- The Association of Fish and Wildlife Agencies has participated in discussions on ESA reform, including an April EPW staff briefing with other state officials.
- Chairman Bishop (R-UT-1) has expressed strong interest in reforming the ESA.
- Ranking Member Grijalva (D-AZ-3) is opposed to reforming the ESA.

III. RECENT CONGRESSIONAL ACTIVITY

- H.R. 3916 (Calvert: R-CA) – Would transfer management of ESA-listed anadromous fish (salmon, sturgeon, etc.) from NOAA Fisheries to FWS. HNR Subcommittee legislative hearing is scheduled for Oct. 12. DOI statement for the record supports the bill.
- FWS Acting Director Greg Sheehan testified in July before HNR generally in support of 5 bills to amend the ESA. All 5 bills passed out of HNR on Oct. 4.
    - H.R. 424 – Gray Wolf State Management Act (Peterson: D-MN) – Reinstates delisting of Western Great Lakes and WY wolves.
    - H.R. 717 – Listing Reform Act (Olson: R-TX) – Requires economic analysis at listing for threatened species, gives flexibility to prioritize petitions, removes 90-day and 12-month deadlines.
    - H.R. 1274 – State, Tribal, and Local Species Transparency and Recovery Act (Newhouse: R-WA) – Requires data transparency, requires all data be provided to states prior to listing, defines best available data to include state & local.
    - H.R. 2603 – Saving America's Endangered Species (SAVES) Act (Gohmert: R-TX) -- Nonnative species in U.S. not considered listed under ESA.
    - H.R. 3131 – Endangered Species Litigation Reasonableness Act (Huizenga: R-MI) – Would tie ESA fee awards to EAJA cap of $125/hr

IV. NEXT STEPS/ OUTLOOK

- The WGA issued recommendations for ESA reform over the summer.
- We anticipate continued oversight and legislative activity from HNR and EPW regarding ESA implementation and modernization.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Bishop, Lamborn, Labrador, Tipton, Cheney, Barrasso, Risch, Daines, Calvert, Stewart, Simpson, Amodei, Lee
ISSUE: Greater sage-grouse

I. ISSUE BACKGROUND

- In 2010, FWS made the greater sage-grouse a candidate for listing under the Endangered Species Act. In response, the Bureau of Land Management (BLM) and Forest Service (USFS) worked with the states to develop a land use strategy to conserve and restore sagebrush habitat across the species' range.
- In 2015, citing the federal land use strategy and associated rangeland fire strategy, along with state and private lands conservation efforts, FWS determined that the greater sage-grouse was not warranted for listing under the ESA.
- The 2015 "not warranted" finding included a commitment to revisit the status of the species in 5 years, a commitment made to strengthen the defensibility of that finding.
- FWS and a coalition of public and private partners, particularly the states, have built a durable, collaborative effort to conserve sagebrush-dependent species, avoid future listing of those species, and secure a healthy sagebrush ecosystem for people and wildlife.
- BLM and USFS amended or revised nearly 100 resource and land management plans to improve protections for sage-grouse and sagebrush habitat.
- All states have sage-grouse plans; some interface seamlessly with the federal plans. States have management responsibility for the species and are leading the larger effort to proactively conserve the larger sagebrush ecosystem.
- In August 2017, Secretary Zinke received a report from the Department's Sage-Grouse Review Team regarding possible plan and policy modifications to complement state efforts to improve greater sage-grouse conservation and economic development on public lands, as required by Secretarial Order 3353.

II. POSITION of INTERESTED PARTIES

- Some conservation groups were critical of the FWS' not-warranted determination; others were highly supportive.
- Some industry and trade groups have filed litigation opposing the federal plans.

III. RECENT CONGRESSIONAL ACTIVITY

- In the 115th Congress, legislation seeks to provide state management over federal land management plans and delay future action to list the sage-grouse. Sponsors include Sens. Risch (R-ID), Lee (R-UT), and Daines (R-MT) and Reps. Simpson (R-ID), Amodei (R-NV), Gosar (R-AZ), Stewart (R-UT), Tipton (R-CO), and Cheney (R-WY).
- The FY17 Omnibus appropriations bill bars FWS from expending any funds for status reviews, listing determinations, or rulemakings regarding the greater sage-grouse.

IV. NEXT STEPS/ OUTLOOK

- FWS will continue to provide technical assistance to public and private partners as they implement sage-grouse conservation measures. FWS will also continue to support collaborative efforts to conserve the larger sagebrush ecosystem.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Tester, Daines, Simpson, McCollum, Barrasso, Risch, Labrador, Cheney, Grijalva, Newhouse
ISSUE: Grizzly Bears

I. ISSUE BACKGROUND

- In 1975, FWS listed the grizzly bear as threatened in the lower 48 states.
- FWS organizes grizzly bears into six recovery zones/ecosystems to allow for targeted recovery efforts. Recovery zones include parts of WA, ID, MT, and WY.
- In March 2007, FWS finalized a rule to establish the Greater Yellowstone Ecosystem grizzly bear distinct population segment (DPS) and to delist this DPS due to recovery. Courts overturned this rule in 2009, reinstating ESA protections for Yellowstone bears.
- In June 2017, FWS published a new final rule to delist the Yellowstone DPS. The rule does not change the threatened status of the remaining grizzly bears in the lower 48 states. FWS has received several complaints from environmental groups and tribal interests challenging the rule.
- In early 2017, the National Park Service and FWS published a draft Environmental Impact Statement on alternatives to restore grizzly bear in the North Cascades Recovery Unit. Alternatives range from no action to the establishment of a population of grizzly bears in the North Cascades Ecosystem.

II. POSITION of INTERESTED PARTIES

- Most members of Congress and federal and state agencies supported the delisting of the Yellowstone grizzly bear DPS.
- Almost all Tribes contacted stated strong opposition to delisting grizzly bears in the Yellowstone ecosystem.
- Several environmental groups have been outspoken in their opposition to delisting.

III. RECENT CONGRESSIONAL ACTIVITY

- Senators Daines (R-MT), Barrasso (R-WY), Enzi (R-WY), Rep. Cheney (R-WY), and House Natural Resources Chairman Bishop (R-UT) issued statements supporting the final delisting of the Yellowstone grizzly bear.
- Rep. Grijalva (D-AZ-3) opposed delisting, citing tribal rights and hunting concerns.
- Rep. Newhouse (R-WA-4) has expressed opposition to potential restoration of grizzly bears in the North Cascades. His office remains engaged with FWS on the issue.

IV. NEXT STEPS/ OUTLOOK

- The comment period on the North Cascades draft EIS closed in April 2017. Next steps include analyzing comments, developing a final EIS, and issuing a Record of Decision.
- In August 2017, in regards to delisting wolves in the Western Great Lakes, a court ruled that FWS failed to reasonably analyze or consider: (1) the impacts of partial delisting; and, (2) historical range loss on the already listed species. FWS must pursue any future proposals to delist a grizzly bear DPS in the context of that ruling. This is most relevant to the Northern Continental Divide Ecosystem recovery zone in northern Montana.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Frelinghuysen
ISSUE: Highlands Conservation Act

I. ISSUE BACKGROUND

- The Highlands Conservation Act (HCA) was enacted in 2004 to provide assistance to States to preserve and protect high quality conservation land in the 3.4 million acre Highlands region of New York, New Jersey, Pennsylvania and Connecticut.
- The program was first funded in 2007. The program also received funding in 2008, 2009, 2010, 2012, 2015, 2016, and 2017.
- In FY 2016, Congress increased the appropriation "up to $10 million," and included administrative funding to the FWS, which had not been provided in several years. FWS works with the U.S. Forest Service and the four states to identify projects that meet the intent of the law to conserve important habitat in the Highlands region.
- To date, more than $26 million in Federal funds has been allocated to the four states for land acquisition. These funds have resulted in the permanent protection of over 6,200 acres and leveraged non-Federal funds at a nearly 3:1 ratio.
- Funding for the program comes from the Land and Water Conservation Fund.
- There is no funding for Highlands in the FY 2018 President's Budget.

II. POSITION of INTERESTED PARTIES

- The Highlands Coalition is comprised of more than 200 national, regional, state and local organizations that work collaboratively with state agencies, the U.S. Forest Service and FWS to implement critical conservation in the Highlands region. This broad coalition has yielded sustained congressional support.
- House Appropriations Interior Subcommittee Chairman Frelinghuysen is a champion of the program which also has bi-partisan support across all four states.

III. RECENT CONGRESSIONAL ACTIVITY

- Chairman Frelinghuysen introduced H.R. 1281(S. 1627, Sen. Gillibrand [D-NY]) to reauthorize the law through 2021. No Congressional action has been taken to date.

IV. NEXT STEPS

- FWS is working with the U.S. Forest Service on a Memorandum of Understanding to solidify roles and responsibilities for administering the grant program.
- August, 2017: FWS announced funding distribution of $2,420,000 to each of the four states. Announcements of funding to states were sent to Congressional offices.
- The 2018 President's Budget did not include funding for Highlands.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Murkowski, Young
ISSUE: Izembek National Wildlife Refuge and King Cove Road

I. ISSUE BACKGROUND

- This issue centers on construction of a road through wilderness areas of the Izembek Refuge to provide access to an all-weather airport for the community of King Cove, AK.
- Congress previously appropriated funds to upgrade the local medical clinic, improve the King Cove airstrip, and enhance a marine transportation link between the communities of King Cove and Cold Bay.
- The Omnibus Public Land Management Act of 2009 directed the Secretary to develop an EIS to evaluate a three-party land exchange between the federal government, the State of Alaska, and the King Cove Corporation for the purpose of constructing a road between King Cove and Cold Bay, which has an existing all-weather airport.
- As part of the proposed land exchange, about 56,000 acres owned by the State and King Cove Corporation would be transferred to the Izembek and Alaska Peninsula Refuges.
- The proposed King Cove road would cross designated wilderness in the Izembek Refuge, potentially creating adverse impacts to high value habitat.
- In December 2013, as required by the 2009 law, former Interior Secretary Jewell issued a final decision that found the land exchange was not in the public interest.

II. POSITION of INTERESTED PARTIES

- The Alaska Congressional Delegation strongly supports the road and land exchange.
- The communities of King Cove and Cold Bay support the land exchange and road.
- Wilderness and environmental groups strongly oppose a road due to the impact to pristine habitat and the precedent set.
- Some Alaska Natives and subsistence users in the Yukon Delta also oppose the road.

III. RECENT CONGRESSIONAL ACTIVITY

- Senator Murkowski included policy language in the FY16 and FY17 Interior-Environment appropriations bills that would require a land transfer at Izembek. The language was not ultimately included in the final FY16 or FY17 appropriations bills.
- At the time of drafting, the FY18 Senate appropriations bill was not yet released.
- This year, bills were introduced by Sen. Murkowski (S. 101) and Rep. Young (H.R. 218) to provide a land exchange for the construction of a road between the two communities. H.R. 218 passed the House on July 20, 2017.

IV. NEXT STEPS/ OUTLOOK

- Next steps depend on whether the land exchange is with the State of Alaska or Native Corporation. For example, if land is exchanged with the Native Corporation, the Alaska Native Claims Settlement Act (ANCSA) Section 22(g) and its implementing regulation, 50 CFR 25.21, stipulates that Alaska Native Village Corporation lands within the boundaries of a National Wildlife Refuge established prior to ANCSA are subject to National Wildlife Refuge System compatibility requirements. If land is exchanged with the State of Alaska, then a National Environmental Policy Act EIS is likely required, unless new statute dictates otherwise.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Gohmert, Westerman, Johnson, Denham, and Tsongas
ISSUE: D.C. Circuit Decision on FWS Interpretation of Lacey Act Interstate Transport Prohibition

I. ISSUE BACKGROUND

- Under the Lacey Act (18 U.S.C. §42), the Secretary of the Interior is authorized to regulate the importation and transport between the continental U.S., the District of Columbia, Hawaii, Puerto Rico, or any other territory of the U.S., of species determined to be injurious to human beings, the interests of agriculture, horticulture or forestry, or to wildlife or wildlife resources of the U.S. FWS has long interpreted the language related to shipment of injurious species to prohibit transportation of injurious species between states within the continental U.S.
- The U.S. Association of Reptile Keepers (USARK) filed a lawsuit in December 2013 challenging FWS authority. The District Court for the District of Columbia found that 18 U.S.C. § 42(a)(1) does not prohibit interstate transport of injurious wildlife between states within the continental U.S. and enjoined FWS from implementing that provision with respect to two species at issue in the litigation. FWS appealed this decision.
- On April 7, 2017, the U.S. Court of Appeals for the District of Columbia Circuit affirmed the District Court's judgment and held that FWS lacks authority pursuant to the Lacey Act to prohibit shipments of injurious species between states within the continental U.S.

II. POSITION of INTERESTED PARTIES

- Aquaculture and live animal trade industries have expressed support for the Appellate Court's decision.
- The Association of Fish and Wildlife Agencies has concerns regarding the FWS losing its ability to regulate the interstate transport of injurious species between States within the continental U.S.
- Senator Gillibrand (D-NY) has an interest in revising the injurious species listing process

III. RECENT CONGRESSIONAL ACTIVITY

- Rep. Gohmert (R-TX-1) introduced HR 1807 - Public Water Supply Invasive Species Compliance Act of 2017 (companion bill in the Senate, S. 789 sponsored by Sen. Cruz (R-TX)), exempting certain water transfers between public water supplies located on, along, or across the boundaries of Texas, Arkansas, and Louisiana from the Lacey Act. Reps. Westerman (R-AR-4) and Mike Johnson (R-LA-4), who are on the House Natural Resources Committee, are co-sponsors. The bill was passed out of committee.
- October, 2017: Senator Gillibrand (D-NY) had a press conference on the emerald ash borer beetle in the Adirondacks, mentioning the injurious species listing process. Gillibrand has previously introduced legislation to reform this process. Reintroduction of this legislation is likely to occur this session; but, it has not yet happened.

IV. NEXT STEPS/ OUTLOOK

- FWS did not seek additional appeals and as a result of this decision the FWS may no longer place any limitation on transport of injurious wildlife across the 49 continental states

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Gardner, Cole, Calvert, Gohmert, Pearce, Tipton
ISSUE: Lesser Prairie-Chicken

I. ISSUE BACKGROUND

- In April 2014, FWS listed the lesser prairie-chicken as threatened under the Endangered Species Act (ESA) and concurrently finalized a special rule under section 4(d) of the ESA that established compliance with the State-led Range-wide Conservation Plan as also being ESA compliant.
- In June 2014, the Permian Basin Petroleum Association and four New Mexico counties filed a lawsuit challenging the FWS's final rule to list the lesser prairie-chicken. Separate lawsuits were filed by other plaintiffs, including environmental groups.
- In September 2015, a U.S. District Court ruled on the Permian Basin lawsuit and vacated the FWS's listing rule. The Government decided not to appeal.
- Prior to the 2015 court ruling, FWS began work on a species status assessment for the lesser prairie-chicken, with input from the five range states. The goal of the status assessment was to synthesize the best available science to inform recovery planning and conservation actions.
- In September 2016, FWS was petitioned to list the lesser prairie-chicken as endangered. FWS found the petition to be substantial. The status assessment will also serve to inform the 12 month finding on that petition.

II. POSITION of INTERESTED PARTIES

- The Western Association of Fish and Wildlife Agencies (WAFWA), in partnership with New Mexico, Colorado, Kansas, Oklahoma and Texas, created *The Lesser Prairie-Chicken Range-wide Conservation Plan* to develop a conservation and mitigation strategy for the species. FWS will incorporate WAFWA's 2016 Annual Report into the status assessment, along with 2017 population survey results.
- Several Members of Congress disagreed with FWS's 2014 decision to list the lesser prairie-chicken under the ESA.

III. RECENT CONGRESSIONAL ACTIVITY

- In the 114th Congress, Rep. Lucas (R-OK) filed an amendment to the House National Defense Authorization Act (NDAA) to prohibit listing the bird under the ESA; the amendment was withdrawn. Similar language was included in other NDAA amendments, appropriations bills, and a standalone bill.
- There has been no relevant legislation introduced in the 115th Congress.

IV. NEXT STEPS/ OUTLOOK

- FWS anticipates completing the status assessment in 2017, though exact timing depends on recommendations and comments received from peer and Working Group reviewers. The status assessment will inform future decisions related to the bird. Coordination with the States, WAFWA and others is expected to continue.
- FWS did not meet the deadline for the 12-month finding on the petition to list (September 8, 2017). The finding is expected after completion of the status assessment and will fully consider the conservation actions underway.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Murkowski, Simpson
ISSUE: FWS Mitigation Policy Status

I. ISSUE BACKGROUND

- The FWS has used a mitigation policy since 1981 to guide agency recommendations on mitigating the adverse impacts of land and water development projects on fish, wildlife, plants, and their habitats.
- In 2016, FWS finalized revisions to the 1981 policy. Notably, the scope of the revised policy expanded to address all resources for which FWS has authority to require or recommend mitigation, including those listed under the Endangered Species Act (ESA).
- In December 2016, the FWS finalized the ESA compensatory mitigation policy, a more detailed, ESA-specific stepdown of the revised Service-wide mitigation policy.
- These policies were consistent with the Presidential Memorandum entitled *Mitigating Impacts on Natural Resources from Development and Encouraging Related Private Investment* (PM) (November 3, 2015) and with Secretarial Order 3330, *Improving Mitigation Policies and Practices of the Department of the Interior* (October 31, 2013).
- A March 28, 2017, Executive Order (EO) rescinded the 2015 PM and directed all agencies to identify affected agency actions (including existing regulations, orders, and policies) and, as appropriate, suspend, revise, or rescind them.
- Sec. Order (SO) 3349 (March 29, 2017) implements the March 2017 EO. It revoked SO 3330 and required the Deputy Secretary to inform the Bureaus whether to proceed with reconsideration, modification, or rescission of actions related to the PM or SO 3330.

II. POSITION of INTERESTED PARTIES

- Sen. Murkowski (R-AK) strongly opposed the 2016 revised mitigation policy and sent a letter to former FWS Director Ashe urging him to retract it, expressing concern about its standard and the impact of the policy on smaller entities, such as Alaska Native communities, who want to develop resources on their lands.
- At a March 2016 Senate Energy and Natural Resources Committee hearing, the State of Alaska expressed concerns with the PM and requested its revision to incorporate the Alaska Native Settlement Claims Act and Alaska National Interest Lands Conservation.
- Response from State agencies varied; FWS received comments from States both supporting and expressing concerns with the policies.
- In some cases, industry had concerns that the policies were an attempt to create new authority for FWS.

III. RECENT CONGRESSIONAL ACTIVITY

- Rep. Newhouse (R-WA) introduced two resolutions to disapprove the two FWS mitigation policies through the Congressional Review Act (CRA), but no further action has been taken on them.

IV. NEXT STEPS

- Consistent with SO 3349, this October, FWS will solicit public comment on the policies. Based on comments received, FWS will decide whether and how to revise the policies.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: McCollum, Udall, Feinstein, Stewart, Bishop
ISSUE: Southwest Border Law Enforcement and Conservation Issues

I. ISSUE BACKGROUND

- There are eight National Wildlife Refuges along the U.S.-Mexico border, three in Texas, two in California and three in Arizona. FWS has 18 Federal Wildlife Officers (FWO) that cover these refuges.
- Santa Ana National Wildlife Refuge sits along the U.S.-Mexico border in Texas, and has been identified as a location for early preparations for border wall construction. The Refuge has been visited this year by Senator Cornyn's (R-TX) staff and Representative O'Rourke (D-TX-16). Senator Cruz (R-TX) has expressed an interest in visiting the refuge as well.
- The FWOs at border refuges provide safety and security for visitors and protect fish, wildlife, cultural, and archaeological resources. Additionally, working closely with DHS, they address border issues that spill onto refuges, including drug and human trafficking and fatalities of undocumented immigrants.
- These refuges also face increased habitat degradation from significant amounts of human trash and waste left on site, escaped camp fires, sewage spills, and trail and road erosion. Additional trash is generated on Arizona border refuges by humanitarian organizations who, contrary to refuge regulations, leave stock piles of food, water, and clothing for illegal border crossers.
- Many native animals, like pronghorn antelope and ocelots, migrate across the Southwest border; physical barriers could also affect movement of wildlife and could affect surface water movement, causing local flooding.
- Sec. 102. of the REAL ID Act (P.L. 109-13), signed into law in 2005, gives the Department of Homeland Security authority to waive most environmental laws, including NEPA and the ESA, to ensure expeditious construction of barriers and roads.

II. POSITION of INTERESTED PARTIES

- Some Congressional Members have expressed concern about the cost of expanding and maintain a wall along the border, and the impact it may have on species and habitat in the area, as well as the impact on public lands, including National Wildlife Refuges.
- Other Members have explained how effective border security protects the environment by deterring illegal activity and border crossings.

III. RECENT CONGRESSIONAL ACTIVITY

- On October 4, the House Homeland Security Committee passed the Border Security for America Act (H.R. 3548), which includes a $10 billion authorization for construction of a U.S.-Mexico border wall.
- On July 27, the House passed the Make America Secure Appropriations Act of 2018 (H.R. 3219), which includes $1.6 billion in funding for construction of the border wall.

IV. NEXT STEPS/ OUTLOOK

- Congress will continue to debate funding for the border wall.
- The President's FY18 budget request includes $1.6 billion for border wall construction.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Senator Murkowski (R-AK), Representative Don Young (R-AK-AL)
ISSUE: Alaska Native-Crafted Walrus Ivory

I. ISSUE BACKGROUND

- In 2016, FWS finalized regulations to prohibit most commercial domestic trade in African elephant ivory. Also, several states (including California, New Jersey, Hawaii, and Nevada) have taken steps to ban the intrastate purchase and sale of ivory (some including walrus and other types of ivory). Some state ivory bans have provisions that exempt items expressly authorized by federal law, license, or permit. At least 8 more states are considering such measures.
- Alaska Native artists are expressing concern to the Alaska Congressional delegation about loss of sales, because consumers are nervous about buying ivory and confusion over federal and state laws governing the sale of ivory.
- The U.S. does not prohibit the sale, purchase, import, export, or transport of genuine, Alaska Native-crafted walrus ivory pieces, and these may be brought into the lower 48 states by individual consumers or shipped to retail stores.
- In May of 2017, DOI announced the release of a brochure, coordinated by DOI's Indian Arts and Crafts Board (Board) and FWS to inform consumers and Alaska Native artists about walrus conservation, relevant laws, and how law enforcement recognizes walrus ivory and distinguishes it from elephant ivory.
- This brochure is being distributed online, through DOI venues, and has been offered to cruise lines and other tourism outlets. Related advertisement has also been published.
- FWS ensures its law enforcement officers are fully knowledgeable about identifying elephant vs. walrus ivory during inspections of imports and exports.
- FWS also works closely with the Board to investigate and pursue cases of counterfeit Native arts and crafts that violate the Indian Arts and Crafts Act, including several in AK.
- On October 4, 2017, the Service announced a "not warranted" finding for listing of walrus under the ESA.

II. POSITION of INTERESTED PARTIES

- The Alaska delegation has expressed concern about the impact of the elephant ivory ban and state ivory bans on the sales of genuine Alaska Native-crafted walrus ivory.
- Members are pleased with the efforts of FWS and the Board to inform consumers and artists about the importance of Native American arts and crafts, and the legality of the sale of Alaska Native-crafted walrus ivory, as well as our efforts to enforce the Indian Arts and Crafts Act.

III. RECENT CONGRESSIONAL ACTIVITY

- This issue was raised by Senator Murkowski during the June 21, 2017 Senate Interior Appropriations hearing for FY 2018.
- FWS and the Board have met on this issue with staff of the three AK delegation offices.

IV. NEXT STEPS/ OUTLOOK

- The Department will continue to work to increase awareness and provide best information about relevant Federal laws.
- During the FY 2018 Senate Interior appropriations hearing, the Secretary committed to a Secretarial Order and to convene a working group on the matter.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Young, Grijalva, Beyer, Flake, Portman, McCollum, Udall
ISSUE: Combating Wildlife Trafficking

I. ISSUE BACKGROUND

- FWS (via DOI) is a co-chair, along with the State Department and Department of Justice, of the interagency Task Force on Wildlife Trafficking.
- In 2016, Congress passed the bipartisan, bicameral END Wildlife Trafficking Act, which codified the Task Force, National Strategy, and Implementation Plan, and included additional requirements of federal agencies.
- In 2016, FWS finalized regulations to prohibit most commercial domestic trade in African elephant ivory. Exemptions for antiques and items containing small amounts of ivory were included to allow for the continued trade in items that do not impact conservation of African elephants.
- In February 2017, the President signed an Executive Order on Transnational Organized Crime, which states the U.S. shall address threats to national security from transnational criminal organizations involved in a variety of activities, including wildlife trafficking.
- FWS has stationed law enforcement special agents at U.S. embassies as international attachés to address wildlife trafficking in key nations.

II. POSITION of INTERESTED PARTIES

- Combating wildlife trafficking has strong bipartisan support in Congress.
- Several Members of Congress are also supportive of FWS' broader international conservation and wildlife law enforcement work.
- Some Members have sought to limit FWS authority to restrict elephant ivory trade.

III. RECENT CONGRESSIONAL ACTIVITY

- In the 115th Congress, there have been several bills introduced that address wildlife trafficking and international conservation, including:
    - H.R. 227, sponsored by Rep. Young (R-AK-AL) reauthorizes the Multinational Species Conservation Funds (Funds).
    - H.R. 1247, sponsored by Rep. Donovan (R-NY-11), and S. 480, sponsored by Sen. Portman (R-OH), reauthorize the Tiger Stamp.
    - S. 826, sponsored by Sen. Barrasso (R-WY), reauthorizes the Funds and creates a prize competition to address wildlife trafficking.
    - H.R. 226, sponsored by Rep. Young (R-AK-AL), would allow for the commercial trade of African elephant ivory.

IV. NEXT STEPS/OUTLOOK

- The Task Force continues to implement the END Wildlife Trafficking Act. FWS and State have taken the lead in developing a list of countries of concern due to wildlife trafficking. This list will be included in a report due to Congress in early October.
- We expect less focus on wildlife trafficking issues in this Congress given the passage of the END Wildlife Trafficking Act in the 114th Congress. However, there are still Members who are focused on this issue who will pursue events, briefings, and additional legislation.
- In FY 2018, the Service requests $8.9 million specifically dedicated for combating wildlife trafficking.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Barrasso, Flake, Heinrich, Gardner, Stabenow, Franken, Wyden, Merkley, Udall, McCollum, Stewart, Pearce, Gosar, Bishop, Tipton, Bergman, Cheney, Rouzer
ISSUE: Wolves

I. ISSUE BACKGROUND

- FWS believes the wolf is recovered under the ESA, and has attempted to delist it nationwide, except for the Mexican wolf and the red wolf subspecies.
- In 2014, final rules delisting **Gray wolves** in Wyoming and in the Western Great Lakes (WGL) were vacated by separate District Court judges; ESA protections were reinstated for these populations. FWS appealed both of these rulings.
- In March 2017, a court ruled in favor of FWS delisting WY wolves and, in April, the FWS reinstated its previous Wyoming delisting rule.
- In August 2017, a court ruled against FWS delisting of WGL wolves; Wolves remain federally endangered in WI and MI and threatened in MN.
- Wolves are under state management in eastern WA and OR, but wolves in the western portions of those states remain endangered, limiting management options.
- In January 2015, FWS separately listed the **Mexican wolf** as endangered and revised regulations for the nonessential experimental population under ESA section 10(j).
- In 2016, New Mexico sued FWS to enjoin release of Mexican wolves without state permits. An injunction was issued, but vacated upon appeal in April 2017. FWS is reviewing comments on the draft revised recovery plan for the Mexican wolf subspecies.
- **Red wolves** are listed as endangered and exist in the wild as a non-essential, experimental population (NEP) in eastern NC. In September 2016, after a review of the red wolf recovery program, FWS announced plans to propose changes to the NEP management, expand the captive population, and revise the recovery plan.

II. POSITION of INTERESTED PARTIES

- The environmental community largely opposes actions to lessen protections for wolves.
- States support efforts to delist wolves, and to prevent and compensate for depredation.

III. RECENT CONGRESSIONAL ACTIVITY

- 115th Congress Legislation: S. 368, Requires revised recovery plan for Mexican wolves (Sen. Flake); S. 164 and H.R. 424, Reinstates FWS final rules delisting wolves in Wyoming and WGL (Sen. Barrasso and Reps. Cheney, Labrador, Simpson, Bergman). Similar language is included in sportsmen's legislation and the House appropriations bill.
- In July 2017, Acting FWS Director Sheehan testified in support of H.R. 424.
- In the 114th Congress, the House Natural Resources Committee held an oversight hearing on Federal management of gray, Mexican, and red wolves.
- Rep. Newhouse sought to delist wolves in OR, WA, UT, and NV in the 114th Congress.

IV. NEXT STEPS/ OUTLOOK

- FWS is examining next steps for gray wolf management, in light of WGL court ruling.
- FWS will revise the recovery plan for Mexican wolves by the end of November 2017.
- FWS will soon initiate a NEPA evaluation of revisions to the NEP for red wolves in NC.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Daines, Tester, Merkley, Kilmer, Simpson
ISSUE: Dreissenid Mussel Discovery in Montana near Columbia River Headwaters

I. ISSUE BACKGROUND

- Zebra mussels and quagga mussels (Dreissenids) have since spread throughout the Great Lakes region, south along the Mississippi River and to areas west of the Mississippi. In January 2007, the first population of Dreissenid mussels west of the 100th Meridian was discovered in Lake Mead. Both species are easily spread between water bodies by watercraft, and cause damage to water-based infrastructure that is estimated to be in the hundreds of millions of dollars.
- In October 2016, Dreissenids (microscopic larvae called veligers) were detected for the first time in the upper Missouri River Basin in Montana, near the headwaters of the Columbia River.

II. POSITION of INTERESTED PARTIES

- The Montana Governor has declared an environmental disaster. The Idaho legislature and governor responded by enacting emergency state supplemental funding.
- The Montana Legislature called for development of the Upper Columbia Conservation Commission to address threats of Dreissenid mussels. DOI bureaus have been asked to participate.

III. RECENT CONGRESSIONAL ACTIVITY

- The QZAP was developed by the Western Regional Panel and approved by the ANSTF in 2010, and is the Department of Interior (DOI) roadmap for this issue. The FWS works with other DOI Bureaus, the U.S. Army Corps of Engineers, States, and partners to support boat inspection and decontamination, early warning systems, and training.
- Congress has appropriated approximately $2 million per year since FY 2010 to support this effort.

IV. NEXT STEPS

- The FWS Region 6 dive team specializes in Dreissenid mussel detection. They deployed to both Canyon Ferry and Tiber Reservoirs in Montana as well as the Columbia River Basin Team rapid response test exercise in Washington.
- In FY16 and FY 17, FWS allocated about $930,000 each year to partners through grants for projects to control the spread of invasive mussels in the western U.S. under the *Quagga-Zebra Mussel Action Plan for Western U.S. Waters* (QZAP), with emphasis on containment and prevention. FY 2018 Budget Request included $2 million for support.
- FWS delivers $1 million of the QZAP funding to states and regional groups with Aquatic Nuisance Species (ANS) plans which have been signed by the respective governor and approved by the ANS Task Force (ANSTF). In FY17, each approved plan was awarded $46,715. Montana received an additional $16K from FWS R6 to support veliger detection.
- July 2017: DOI announced the "Safeguarding the West from Invasive Species" package to address the Columbia River Basin and other uninfested Western waters, to help better integrate government efforts to stop the spread of invasive mussels.

Alaska Federal/State Wildlife Management

Bureau: National Park Service
Member: State Delegation

Key Points:

- The NPS final rule implementing several changes in sport hunting practices allowed in Alaska's national preserves was published in the Federal Register on 9/15/15.
- Hunting practices that were prohibited include the take of brown and black bears over bait (including the use of human food and garbage), the take of bear cubs and sows at den sites while using artificial light, and the take of wolf and coyote pups during the denning season (May 1 - August 9).
- During a lengthy public comment process, about 120,000 comments were received. Over 99% of the comments favored the proposed rule.
- The vast majority of state hunting regulations, and all federal subsistence hunting in national preserves, were unchanged by the final rule.
- Alaska has about 21 million acres of national preserves open to sport hunting; all were established in 1980.

Background:

- The final rule responded to changes in State of Alaska hunting regulations (which generally, but not exclusively, govern sport hunting on national preserves). NPS repeatedly requested the Alaska Board of Game to exempt national preserves from liberalized methods for taking predators, primarily wolves and bears.
- The board left the predator hunting methods in place, and NPS responded for several years with specific and repeated one-year prohibitions in preserves through Superintendent's Compendiums. The State suggested several times that restrictions were more appropriately addressed in federal rulemaking.
- After proposing this rule, NPS held 26 public hearings, as well as tribal government-to-government consultations, during the 121-day comment period.
- The State opposed the rule, asserting: (1) wildlife management and allocation of game in Alaska—including NPS preserves—should be the state's responsibility alone, and (2) federal action is only justified to maintain healthy or viable wildlife populations.
- The 2015 rule also implemented changes unrelated to the State's focus on predator reduction, including: a prohibition on intentionally obstructing or hindering people lawfully hunting or trapping; a simplified procedure for implementing closures or restrictions in NPS areas; an update of regulations to reflect federal assumption of the management of subsistence hunting and fishing from Alaska in the 1990s; an allowance for the use of native species as bait for fishing in accordance with applicable federal and non-conflicting State law; and, a prohibition on the sport hunting of swimming caribou, and on using dogs to assist in hunting black bears.

Current Status:

- All elements of the final rule have been in effect since January 1, 2016.
- On January 13, 2017, the State, Safari Club, and Alaska Professional Hunters Association sued the NPS and the U.S, Fish & Wildlife Service, which had promulgated separate, but similar, regulations.

- In July 2017, the Department of the Interior instructed the NPS to revisit the 2015 rulemaking. A notice of intent was sent to the Department to announce the reconsideration of the 2015 rule and is expected to be published in the Federal Register sometime this fall.

Last Updated: October 4, 2017

Arlington Memorial Bridge Rehabilitation

Member: **Rep. Eleanor Holmes Norton (D-DC)**
Park/Program: **George Washington Memorial Parkway**

Arlington Memorial Bridge Rehabilitation Project Update

- Without full rehabilitation, the Federal Highway Administration (FHWA) estimates that Arlington Memorial Bridge (AMB) will not be safe for traffic by 2021.
- NPS planned to complete the project in two phases at a total cost of $262 million (Phase I: $166 million, Phase II: $96 million) with a construction duration of 4.35 years (or longer depending on availability of future appropriations).
- Due to favorable bid conditions, NPS anticipates awarding the full rehabilitation by November 2017 which will reduce the construction duration by 1.5 years and save $35.05 million.

	Phase 1 $	Phase 1 %	Phase 2 $	Total $
DOT FASTLane Grant	90,000,000	56%		90,000,000
DC and VA Transportation Funds			30,000,000	30,000,000
NPS Transportation Funds	36,800,000	23%	36,950,000	73,750,000
NPS Construction Funds	33,200,000	21%		33,200,000
Total	**160,000,000**	**100%**	**66,950,000**	**226,950,000**

- The NPS was awarded a $90 million USDOT FY 2016 FASTLANE grant for Phase I. The grant can only fund up to 60 percent of the project, and requires at least 20 percent (Phase 1: $33.2 million) be funded from sources other than Titles 23/49.
- NPS has received approval to reprogram $15M from its FY17 Line Item Construction (LIC) program towards the non-Title 23/49 match requirement. The remaining $18.2M has been submitted as NPS's top priority LIC project in in the President's FY18 Budget.
- The NPS plans to fund the balance of Phase I and to fund Phase II from FLTP, including $30M from VA and DC transferred to NPS as required by the Consolidated Appropriations Act of 2017.

Background

- The historic Arlington Memorial Bridge spanning the Potomac River in Washington DC was constructed in 1932 and is owned and maintained by the National Park Service. The structure serves as an iconic national treasure which links the west end of the National Mall with the Arlington Cemetery at the footstep of our Nation's Capital.
- This bridge is in the worst condition of all high volume urban federally owned bridges across the country (10,300 federally owned bridges). It is one of the highest traffic volume bridges and currently the most costly to rehabilitate. It is also one of the oldest bridges and is listed on the National Register of Historic Places.

Current:

- The NPS has formulated a financial plan to award both phases by the absolute deadline of November 14th. Awarding by the deadline reducing the construction duration from 1550 days to 1,000 days,[1] approximately one and one-half years and saves $35.05 million compared to original total project cost estimate.

Contact Person: Doug Jacobs, Associate Regional Director, National Capital Region, (202) 619-7038

Last Updated: October 3, 2017

[1] . The total contract duration would be 1000 calendar days if all of the options are awarded at the same time as the base contract The maximum time could be increased by up to 550 days to allow for flexibility to award multiple options as funding becomes available, but is a trade-off delaying completion up to one and one-half years

Centennial Summary and Achievements

Bureau: National Park Service
Member: General Interest

Key Points

- 2016 marked the 100th anniversary of the National Park Service (NPS), offering an opportunity expand public engagement and prepare for a new century of stewardship, preservation and conservation.
- The overarching goal of the NPS Centennial was to connect with and create the next generation of park visitors, supporters and advocates.
- NPS and the National Park Foundation launched the Find Your Park public awareness campaign in April 2015. No appropriated funds were used for the campaign.
- Additional major initiatives included the Every Kid in a Park program providing free access to parks for all 4th graders; and the Centennial Challenge program, which leveraged philanthropic funds to support improvement projects in parks.

Background

- Throughout the centennial, NPS park partners, non-profit organizations, concessioners, and other stakeholders were engaged in our celebrations, national programs, and the Find Your Park campaign, including a representative stakeholder advisory group.
- More than 160 members of Congress joined the honorary Congressional Friends of the NPS Centennial to celebrate the NPS Centennial and public lands.
- The Find Your Park campaign had extensive media reach - 16.8 billion campaign impressions (print media, digital and social media, out-of-home media such as billboards, media coverage, etc.), and one in four millennials recalled seeing Find Your Park.
- Visitation to national park in 2016 increased by 7.7% over 2015, and digital followers of NPS and NPF national accounts totaled more than 1.3 million since spring of 2015.
- In 2016, more than 180 youth interns served as Centennial Volunteer Ambassadors, working in parks and programs across the country.

Current Status:

- More than 100,000 Every Kid in a Park passes were redeemed at NPS sites in FY 2016 and 198,000 in FY 2017 as of August 31.
- The successful Centennial Volunteer Ambassadors program is continuing -- they are now called Community Volunteer Ambassadors.
- In FY 2017, $20 million was appropriated for the Centennial Challenge program, which will build on the previous year's successes leveraging $35 million in non-federal philanthropic support.
- The Find Your Park campaign is continuing in 2017 and 2018 focusing on building awareness for lesser-known parks and stories throughout the system.
- While the 2017 numbers won't be confirmed until next year, visitation appears to be up in many parks again this year.

Deferred Maintenance (Maintenance Backlog)

Bureau: National Park Service
Member: General Interest

Key Points:

- The NPS owns and/or manages approximately 76,000 constructed assets valued at more than $157 billion. Many of these assets date back several decades and were constructed by the Civilian Conservation Corps or through the Mission 66 program. 51% of the asset portfolio was constructed prior to 1966.
- As of September 30, 2016, the deferred maintenance backlog is approximately $11.3 billion**.** Approximately 44% of the total asset portfolio has no reported deferred maintenance and over 50% of the cataloged deferred maintenance is associated with transportation assets.
- Approximately 70-80% of the total cost of ownership for a facility asset is found in operations and maintenance and restoration and disposal activities. Only 20-30% of the total cost of ownership is reflected in initial design and construction of the asset.

Background:

- The NPS completed implementation of an enterprise asset management program in 2003. This system catalogs the portfolio of real property asset across the National Park System and identifies work requirements (including deferred maintenance) through a work order structure. Most assets are identified in the system using industry standard "asset categories," however, over 18,000 relatively unique features such as monuments, fortifications, and picnic areas are also catalogued.
- In FY 2012, the NPS implemented the Capital Investment Strategy which directs limited appropriated resources toward the highest priority assets to improve their condition.
- NPS has prioritized facility assets in "bands" based on relative importance in meeting mission objectives. Approximately 1/3 of NPS total assets have been determined to be critical or very important to meeting mission and/or park operational needs. The deferred maintenance for these assets is valued at $8.3 billion.
- Since 1980, 4,572 assets with a deferred maintenance value of $862 million were added to the inventory. Most of these assets were acquired through the addition of new parks.

Current Status:

- In FY 2017, the NPS invested over $700 million across the system to address facility repair and improvement needs. This includes funds from the Highway Trust Fund through the US Department of Transportation directed at transportation assets.
- Other deliberate efforts by the NPS to more effectively manage the maintenance backlog have included disposition of assets, utilization of leasing authorities, philanthropic efforts, a focused commitment from fee revenues, and assuring deferred maintenance is addressed by concession operators for assigned facilities.

Everglades Ecosystem Restoration

Bureau: National Park Service
Member: General Interest

Key Points:

- Interagency activities for restoration of the Everglades have been underway since the 1970s.
- These are large scale, long-term water management projects—such as the Modified Water Deliveries (MWD) project and the Canal 111 (C-111) South Dade project—approved by Congress in 1989, and the Tamiami Trail Next Steps project in 2011.
- Similar large scale water quality treatment projects (focused on reducing nutrients entering the Everglades) began in 1994 following the settlement of a 1988 federal lawsuit.
- In 1996, Congress created the South Florida Ecosystem Restoration Task Force in recognition of the magnitude of the restoration problems and the critical importance of partnerships with federal, state, tribal, and local governments.
- These initial efforts led to passage of the Comprehensive Everglades Restoration Plan (CERP), a collection of over 50 infrastructure projects developed over decades of collaboration by scientists, policy makers, and affiliated stakeholders.
- CERP is a watershed-scale federal & state partnership to restore/preserve/protect the south Florida ecosystem and sustain water supply & flood protection for South Florida's economy.

Background:

- Expanding urban and agricultural development since the 1880s reduced the natural Everglades ecosystem to half of its original size; restoring water depths, flooding durations, and water quality will help to preserve the remaining native habitats and species.
- Restoration efforts also help sustain system-wide water availability, making south Florida more resilient to rainfall variations, sea level rise, and salt water intrusion.

Current Status:

- Several foundation projects—such as the MWD, C-111, and Tamiami Trail Next Steps Phase I projects—are scheduled to be complete between 2018 and 2020.
- The first phase of water quality improvements was completed in 2012, and the second phase, the Restoration Strategies project, will have construction complete in 2025.
- CERP infrastructure projects have been approved by Congress in phases: four 1st Generation CERP projects were approved in 2007; four 2nd Generation CERP projects were approved in the 2014; and two 3rd Generation CERP projects were just approved in 2016.
- The recently authorized Central Everglades Planning Project (CEPP) will reduce harmful discharges to the northern estuaries by redirecting flows from Lake Okeechobee southward back into the Everglades, but is dependent on DOI's completion of the Tamiami Trail Next Steps Phase II project.
- The current estimated total cost for the combined CERP and non-CERP projects is approximately $19 billion, with construction extending into the 2040s.

Last Updated: October 2, 2017

FY 2018 Budget Overview, National Park Service

Key Points

- The FY 2018 President's Budget Request for NPS discretionary funding is $2.55 billion, a $378.5 million, and 12.9 percent decrease from FY 2017 enacted.
  - NPS budget priorities balance daily park and program operations with long-term investments. Park operations continue to be strained by increasing visitation and other responsibilities, compounded by years of fixed cost absorption and FTE losses. Despite recent funding increases that have supported long-term priorities, primarily deferred maintenance, the NPS still lacks sufficient funds to maintain its large portfolio of assets and to make substantial gains on its $11.3 billion deferred maintenance backlog.
  - Decreases include reductions to all parks and program management (-$148.0 million), maintenance project funding (-$42.1 million), non-maintenance project funding (-$30.7 million), historic preservation grant funding (-$29.8 million) and land acquisition funding (-$28.8 million), as well as elimination of funding for National Heritage Areas (-$18.8 million).
  - Increases include +$14.2 million to support construction projects, planning and execution, +$8.0 million for direct support for Abandoned Mineral Land and Demolition/Disposal projects, +$25.7 million for fixed costs, and +$1.1 million for responsibilities at newly established units.
  - The request funds 7.2 percent fewer FTE (-1,410) than FY 2017 actual usage. Since 2011, the NPS workforce has decreased by 11 percent, while visitation has increased by 19 percent.
  - The budget also proposes a shift of $90 million from discretionary to mandatory funding for State conservation grants.
  - In order to meet reduced funding levels, many parks would need to reduce services that impact the visitor experience. This may include shorter seasons, reduced operating hours at visitor centers, fewer seasonal rangers to interact with the public, and diminished capacity for resource and visitor protection. As a result, the NPS expects moderate declines in performance metrics on natural and cultural resource stewardship, and visitor satisfaction.
- The House of Representatives passed H.R. 3354 on September 14, 2017, that would provide FY 2018 appropriations for the NPS. Senate action on the bill has yet to occur.
  - The NPS would receive discretionary appropriations of $2.89 billion, a decrease of $44.8 million (-1.5 percent) from the FY 2017 Enacted level of $2.93 billion. The bill is $333.7 million (13.1 percent) above the FY 2018 President's Budget request of $2.55 billion.
- The National Park Service Centennial Act (P.L. 114-289) created several authorities relating to permanent appropriations that the NPS is currently implementing.
  - The National Park Foundation will create an endowment to which $10 million of recreation fee revenue from the sale of Senior Passes will be deposited annually, to fund activities that further the mission and purposes of the NPS.
  - Senior Pass revenues in excess of $10 million will go to a newly established National Park Centennial Challenge Fund, to be the Federal match to leverage private sector partnership that fund signature projects and programs. The budget estimates the Federal match at $15.0 million in 2018.

- The Visitor Experience Improvement Authority allows the NPS to award commercial services contracts whose proceeds will go to a revolving fund supporting management and enhancement of commercial visitor services and facilities, as well as payment of possessory interest and leasehold surrender interest.

FY 2018 Budget Overview, National Park Service (cont.)

Background

The National Park Service budget contains six discretionary appropriations and an annual proposal to rescind contract authority. The NPS also has several major permanent appropriations and two major allocation accounts. Finally, the NPS has offsetting collections and reimbursable activity. The major appropriations and allocations are described in greater detail below.

Discretionary Appropriations

National Park Service ($000) – Discretionary Appropriations	FY 2016 Actual	FY 2017 Enacted	FY 2018 President's Budget	FY 2018 House Mark
Operation of the National Park System	2,369,596	2,425,018	2,225,485	2,421,723
Centennial Challenge	15,000	20,000	14,971	15,000
National Recreation and Preservation	62,632	62,638	37,001	59,629
Historic Preservation Fund	65,410	80,910	51,100	82,910
Construction	192,937	209,353	226,529	219,844
Land Acquisition and State Assistance	173,670	162,029	26,380	116,075
LWCF Contract Authority Rescission	-27,960	-28,000	-28,020	-28,020
Total, Discretionary Budget Authority	**2,851,285**	**2,931,948**	**2,553,446**	**2,887,161**

The **Operation of the National Park System (ONPS)** appropriation supports the operations of our Nation's national parks, trails, wild and scenic rivers, and central support offices. Funding covers all aspects of park operations and is classified under distinct budget activities comprising the major components of the ONPS appropriation. These include Park Management and External Administrative Costs.

The **Park Management** activity covers the management and operation of park areas and servicewide programs, supporting recurring operations and competitive project funding. This activity contains the following subactivities, and the funding is allocated according to the NPS Park and Program Summary, which is included in the FY 2018 Budget Justification:

- **Resource Stewardship** encompasses natural and cultural resource management, as well as funding for restoration of the Everglades ecosystem.

- **Visitor Services** includes educational and interpretive programs and the management of commercial services to enhance the visitor's experience.
- **Park Protection** provides for the protection of park resources, visitors, and staff, including the United States Park Police and public health operations.
- **Facility Operations and Maintenance** encompasses the operations and maintenance of buildings, and other facilities.
- **Park Support** covers the management, oversight, internal controls and administrative operations for park areas, and servicewide programs.

The **External Administrative Costs** activity provides for administrative support requirements primarily determined by parties outside the NPS and managed centrally to ensure performance efficiency. These support all activities and programs of the NPS and include worker's compensation payments, GSA office space leases, the DOI Working Capital Fund, and others.

The **Centennial Challenge** appropriation leverages federal funding at least 1:1 with non-federal donations to accomplish projects that reduce deferred maintenance, enhance visitor services, and improve natural and cultural resource protection at national parks.

The **National Recreation and Preservation (NR&P)** appropriation is the backbone of the NPS technical and financial assistance programs. The collection of relatively small programs reaches broadly to support natural and cultural resource preservation and recreation. Each of the programs is focused on different resources and needs, largely outside the National Park System.

The **Historic Preservation Fund (HPF)** appropriation supports grant programs to state historic preservation offices (SHPOs), Tribal historic preservation offices (THPOs), and others, to facilitate the preservation of the nation's historic and cultural resources. This appropriation is funded by the Historic Preservation Fund.

The **Construction** appropriation provides for major maintenance and rehabilitation of park facilities and infrastructure, including compliance, design, and support to carry out large-scale asset management and infrastructure investment, as well as Congressionally-directed resource studies and planning for parks and programs.

The **Land Acquisition and State Assistance (LASA)** appropriation, funded by the Land and Water Conservation Fund (LWCF), provides for the acquisition of land and interests in land to preserve the values of congressionally authorized areas within the National Park System for public use and enjoyment. It also supports partnerships with state and local agencies through grants to create and protect a nationwide system of public spaces. These complement the mission of the NPS by providing educational, recreational, and conservation benefits to the public.

Permanent Appropriations

National Park Service Permanent Appropriations ($000)	FY 2016 Actual	FY 2017 Estimate	FY 2018 Estimate
Recreation Fee Permanent Appropriation	290,682	281,900	285,078
Other Permanent Appropriations	201,263	208,487	213,011
Miscellaneous Trust Funds	56,128	75,003	71,003
Land Acquisition and State Assistance - GOMESA	89	319	0

Land Acquisition and State Assistance - Mandatory	0	0	90,000
Construction Mandatory - Helium Act	0	0	20,000
LWCF Contract Authority	27,960	27,960	28,020
Total, Discretionary Budget Authority	**576,122**	**593,669**	**707,112**

The **Recreation Fee Permanent Appropriation** includes several permanent authorities, most notably the recreation entrance and use fees authorized by the Federal Lands Recreation Enhancement Act (FLREA, P.L. 108-447) in 2005. The FY 2018 budget proposes appropriations language to extend this authorization through FY 2019 and a legislative proposal for permanent reauthorization. Fee revenues are used for high-priority visitor service and facility maintenance projects. Up to 80 percent may be retained for use by the collecting park, with the remainder for servicewide use. Beginning in FY 2018, NPS policy will be to dedicate at least 55 percent of retained revenue to projects that address deferred maintenance and related infrastructure needs.

The **Other Permanent Appropriations** include permanent authorities largely derived from receipt sources. These include park concession franchise fees and improvement accounts, the park buildings lease and maintenance fund, operation and maintenance of quarters, and special use fees. These also include contributions for US Park Police annuity benefits, made from a permanent, indefinite appropriation at the Treasury Department.

The **Miscellaneous Trust Funds** include donated funds consistent with legislative authority and the wishes of the grantors for federally matched signature projects and programs, non-matched donated funds consistent with legislative authority and grantor wishes, and funds to preserve the birthplace of Abraham Lincoln available from an endowment established for that purpose.

The **Mandatory Construction – Helium** account was established by the Helium Stewardship Act of 2013 (P.L. 113-40). It authorized mandatory funding in FY 2018 and FY 2019 to support the federal share of deferred maintenance and other infrastructure deficiency projects; projects require a minimum 1:1 non-federal match.

The **Mandatory Land Acquisition and State Assistance – GOMESA** is funded by qualified Outer Continental Shelf lease revenues, including revenue from a small portion of the Gulf of Mexico that was newly opened for leasing by the Gulf of Mexico Energy Security Act (GOMESA, P.L. 109-432). The FY 2018 President's Budget proposes to replace the formula for allocating receipts to the LWCF State Grants program established by GOMESA with a comparable permanent appropriation, derived from the LWCF, of $90.0 million in 2018.

Allocation Accounts

Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations. The NPS' major allocation accounts are Transportation and Wildland Fire.

The **Federal Lands Transportation Program** was continued under the 2015 FAST Act, including increased funding for the NPS program. The NPS received an allocation of $276 million in FY 2017, up from $240 million in prior years. The authorization will rise incrementally to $300 million over the life of the FAST Act, through 2020.

The NPS receives an allocation from the **DOI Wildland Fire Management** appropriation; funds support fire management programs at NPS units, as well as central office management. Major programs include Preparedness and Hazardous Fuels Reduction, which support operations and planned projects, as well as Suppression, which funds NPS response to wildfires.

LWCF - Federal Land Acquisition

Bureau: National Park Service
Member: General Interest

Key Points:

- The NPS Federal Land Acquisition program is funded by the Land and Water Conservation Fund (LWCF). Although funding for the LWCF, derived from Outer Continental Shelf (OCS) mineral leasing receipts, is authorized at $900 million annually it requires an annual appropriation to be utilized.
- The LWCF expired on September 30, 2015, but was extended for 3 years in the Consolidated Appropriations Act, 2016, until September 30, 2018. In FY 2018, the Departments of the Interior and Agriculture will review options for reauthorization.
- NPS Federal acquisition of land or interests in land must be within a park's authorized boundary and owner willingness to sell cannot be definitively determined until the United States obtains an appraisal, tenders an offer to the owner (to acquire the land or interest in land), and completes negotiations with the owner.
- The NPS maintains a list of lands that have been identified for acquisition through the General Management Plan and Land Protection Plan process. As of November 2016, the land acquisition backlog of funding needs totals $2.1562 billion for 1,603,758 acres in 12,111 tracts.

Background:

- The backlog is a list of privately owned lands within authorized boundaries of the National Park System that have been identified for acquisition and for which appropriated funds are not available.
- The backlog lists only those acres and tracts for which the plans recommend purchase.
- Lands expected to be acquired by donation/exchange are omitted from the backlog, as are privately owned lands that are, at present, adequately protected.
- The major criteria used to prioritize land acquisitions are: threat to the resource; preservation of the resource; visitor use facility accommodation; commitment has been made to acquire; involvement of partners, non-profit groups, or availability of matching funds; continuation of an ongoing effort; recreational opportunities; hardship of the owner; existence of legislative authority to acquire; local and congressional support for the project; ability to obligate appropriated funds; regional priority of the project; economic escalation or inflation factors; and the type of the unit.

Current Status:

- The backlog is continually changing due to acquisitions of land, changes in use from compatible to incompatible, boundary expansions, and new units being created.
- Currently, there is no project funding for FY 2018.
- If the FY 2018 proposal is approved, mandatory LWCF funding would also be provided for non-Federal land acquisition programs: State Conservation Grants, the American Battlefield Protection Program land acquisition grants, and the Urban Parks and Recreation Recovery grants.

LWCF - State Conservation Grants Program

Bureau: National Park Service
Member: General Interest

Key Points:

- The LWCF State Conservation Grants Program provides matching grants (50/50) to States and Territories (and through states to local units of government) to plan, acquire, and develop public lands for outdoor recreation purposes to improve quality of life and the health and vitality of present and future generations.
- Starting in 2009, LWCF appropriations for this program have been supplemented by revenues from certain Outer Continental Shelf (OCS) oil and gas leases in the Gulf of Mexico (GOMESA, P.L. 109-432). The NPS State Conservation Grants Federal Land Acquisition program is funded by the Land and Water Conservation Fund (LWCF). Although funding for the LWCF, derived from Outer Continental Shelf mineral leasing receipts, is authorized at $900 million annually, it requires annual appropriation.
- Under this Act, 12.5% of OCS revenues are distributed to states for conservation purposes through the State Conservation Grants program. GOMESA receipts are projected to increase significantly from nearly $310,000 in 2017 to $70.0 million in 2018 due to expanded leasing in the Gulf of Mexico, and are expected to reach $125 million annually in the out years.
- Market fluctuations and difficulties predicting receipt totals has resulted in a proposal included in the FY 2018 budget to replace the formula for allocating receipts to the LWCF State Grants program established by GOMESA with a comparable permanent appropriation, derived from the LWCF, of $90.0 million in 2018, increasing to $125.0 million in 2022 and each year thereafter.
- All grant-assisted parks are protected from conversion to non-recreation uses in perpetuity unless approved by the Secretary under specific conditions.

Background:

- Since 1965, over 43,000 projects have been approved, awarding over $4.1 billion in federal financial assistance to State and local recipients.
- More than 30,000 public park areas will be monitored in partnership with the States to ensure continued public use and accessibility, and an estimated 50-75 parkland conversions authorized by Section 6(f)(3) of the LWCF Act will be resolved in FY 2017. Across the country there are increasing pressures to convert parkland to other uses.
- In FY 2017, in partnership with the States and Territories, NPS awarded 333 individual Grant Awards totaling $75.2 million in federal LWCF funding. Of the individual grants awarded, the majority, 86%, are for development or rehabilitation of outdoor recreation facilities, while 10% will be used to acquire recreational lands and 4% will support statewide recreation planning efforts.

Current Status:

- For FY 2018 the President has requested $90.0 million for the State Conservation Grants Program (a decrease of $16.6 million from FY17 requested/enacted) and included a proposal to shift funding from discretionary to mandatory appropriations.

Newly Established Units

Bureau: National Park Service
Member: General Interest

Key Points

- The NPS is taking a deliberate approach to developing operations at its newest units, as compared to past political and budget environments.
- In the first budget request following creation of a new unit, the NPS typically requests $180,000 to support a superintendent or site manager and basic start-up costs. Until Congress appropriates funding for new units, the NPS will not begin operating the new units in the traditional sense. Employees from the regional office or neighboring parks may be detailed in to provide intermediate support, but permanent, long-term operations do not begin.
- Since 2000, 39 new units have been established in the national park system; of which 19 have been designated through a Presidential Proclamation citing the authority promulgated in the Antiquities Act (54 USC 320301).

Background

- Assuming Congress funds the $180,000 as requested, the new superintendent/site manager position will then begin developing the plan to build permanent operations, including identification of investments needed with one-time project funds.
- The delay between creation of a new unit and permanent funding for expected operations often causes frustration with stakeholders and partners of the new units.
- As more new units have been added to the System, the NPS has prioritized stair-step increases in operational funds for new units to ensure they reach minimal operating levels; this has been done at the expense of other parks and program needs within tight budgets for operational funding.
- Since 2000, 39 new units have been established in the national park system; of these, 19 have been designated through the Antiquities Act, including 15 since 2009: Fort Monroe, Harriet Tubman Underground Railroad, Cesar E. Chavez, First State, Charles Young Buffalo Soldiers, Pullman, Honouliuli, Waco Mammoth, Castle Mountains, Belmont-Paul Women's Equality, Stonewall, Katahdin Woods and Waters, Birmingham Civil Rights, Freedom Riders, and Reconstruction Era National Monuments.
- These new national park units seek to connect with new audiences as the units often represent untold stories of American history; they commemorate specific events (Freedom Riders NM), influential Americans (Cesar E. Chavez and Charles Young Buffalo Soldiers NMs), or entire movements (Belmont-Paul Women's Equality and Stonewall NMs). Issues range from farm workers' rights; to the first American colony; to the fight for equal rights for African Americans, the LGBT community, and women.
- To reduce the burden on the federal government, many of the recently authorized units are managed in cooperation with partners. For example, Manhattan Project NHP located in New Mexico, Tennessee, and Washington, tells the story of the people, events, science, and engineering that led to the creation of the atomic bomb, is managed in partnership with the Department of Energy. Additionally, Harriet Tubman Underground Railroad NHP in Maryland, which tells the story of one woman's role in an entire movement to guide enslaved people north to freedom, is managed in partnership with the state of Maryland.

Current Status

- The FY 2018 President's Budget requested $1.1 million in funding for initial support ($180,000 each) for Birmingham Civil Rights, Castle Mountains, Freedom Riders, Katahdin Woods and Waters, Reconstruction Era, and Stonewall national monuments; all of which were authorized or established after the FY 2017 President's Budget Request was published in February 2016.
- As of October 2017, there are 23 pending Special Resource Studies that are evaluating the feasibility of new park units. Congress directs NPS through legislation to undertake studies of sites to provide analysis about the resource qualities at the site and alternatives for protection. The special resource and other study processes are designed to provide Congress with information used in the legislative process of designating a new unit.

[1] This unit is a site within National Capital Parks-East for which site-level budget data is not available. The total for National Capital Parks-East is presented here.

[2] These units are sites within the National Mall & Memorial Parks for which site-level budget data is not available. The total for the National Mall & Memorial Parks is presented here.

[3] In the FY 2018 President's Request, funding information for Harriet Tubman Underground Railroad NM and Harriet Tubman NHP were shown on the same row.

[4] Formerly designated Sewall-Belmont NHS, an affiliated area of the National Park System.

Partnerships & Philanthropy

Bureau: National Park Service
Member: General Interest

Key Points

- The NPS accomplishes much of its mission through partnerships with individuals; organizations; tribal, state, and local governments; and other federal agencies, and with philanthropic support.
- By entering into public-private partnerships, the NPS receives valuable assistance in the form of educational programs, visitor services, recreation, search-and-rescue operations, habitat restoration, scientific and scholarly research, ecosystem management, cooperative management, and a host of other activities.
- Philanthropic support is an important supplement—not a replacement—for federal appropriations. It comes in the form of donated funds, and as volunteerism, in-kind support, and the donation of talent to supplement the work of NPS employees.
- Philanthropic support allows the NPS to react more quickly to resource protection or visitor needs than typical federal funding cycles may permit.
- The recent NPS Centennial and the accompanying fundraising and "Find Your Park" marketing campaigns have increased interest in partnering with/donating to the NPS.
- The release of "Director's Order 21: Donations and Philanthropic Partnerships" on December 28, 2016, has made it easier for the NPS to work with a broader range of philanthropic partners. The NPS is also exploring new ways to expand its public private partnerships beyond philanthropy.

Background

- Over the last 100 years, private philanthropy has played a major role in creating and improving parks and programs. This support often comes from individuals, corporations, foundations, or non-profit Friends Groups who fundraise on behalf of the NPS. In 2016, the 212 Friends Groups provided over $300 million in support to the NPS.
- High profile parks are often able to develop successful philanthropic or public-private partnerships to assist in the accomplishment of the NPS mission. The NPS is exploring new models for attracting outside support and gaining access to private sector insights and investment so more parks and programs may benefit.

Current Status

- The NPS is working with the DOI Solicitor's Office and Ethics Office to provide guidance on the most common questions raised by NPS employees engaged in philanthropy and partnerships.
- The reference manual that accompanies DO-21 will be developed throughout 2017. The manual will provide information to implement DO-21.
- The NPS is developing new "collaborative clinics" and partnership training workshops to improve employee proficiency in working with partners and funders.

Sexual Harassment Response

Bureau: National Park Service
Member: General Interest

Key Points:

- Since November 2016, the Office of Inspector General (OIG) issued several reports related to sexual harassment and retaliation in the National Park Service
- The results from the winter Work Environment Survey indicate that 17.6% of women in the NPS experienced sexual harassment in the last year; this statistic mirrors findings from a 2016 MSPB study where 18% of females reported being harassed
- The NPS will implement key actions to ensure a sustained and comprehensive response to prevent and respond to cases of sexual harassment.

Background:

- The following actions have occurred in the last 16 months
    - The NPS Equal Employment Opportunity now reports to the NPS Director.
    - All managers were required to take Prohibited Personnel Practices and Whistleblower training by June 15th. All employees were required to complete online sexual harassment awareness and NO FEAR Act training by the end of 2017.
    - Two Ombuds have gathered 1,700 comments from 650 employees.
    - A comprehensive Work Environment Survey was issued to all employees.
    - The NPS created the Women's Employee Resource Group (WERG). This group provides peer support and offered bystander intervention training

In the next 15 months:

- The results from the Workplace Environment Survey will be widely shared.
- A new anti-harassment Director's Order will be implemented that will clarify responsibilities and detail a consistent process to ensure accountability.
- All employees will receive training on how to report and respond to allegations of harassment in accordance with the new Director's Order and reference manual.
- All NPS managers will complete Civil Treatment for Leaders training.
- 13 sessions of Bystander Intervention training will be offered to 429 participants and 120 NPS employees will be trained to instruct Bystander Intervention training.
- 15 peer facilitators will conduct 150 listening sessions. Feedback from listening sessions will provide qualitative data to inform management decisions.
- Additional Employee Relations/Labor Relations and Ethics staff will be hired to increase capacity and ensure appropriate responses to incidents of harassment.
- NPS will develop a holistic data collection process and use this information to make data-driven decisions and track and share progress.
- NPS will create and provide materials to new and current employees about preventing and reporting harassment as part of a service-wide approach to consistent onboarding.

Subject:	Updated BPs for Micah Chambers OCL on FWS Issues
Date:	Thursday, October 12, 2017 10:26:14 AM
Attachments:	FWS BPs UPDATED.zip

Hello,

Greg asked me to send you this zip file with updated versions of the briefing papers that Micah Chambers sent to you and him asking for edits. Greg has reviewed all of these.

I've copied Thomas Garcia in case you need hard copies of these.

Thanks!

Michael

ISSUE: Oil and Gas Development in the Arctic National Wildlife Refuge

I. ISSUE BACKGROUND

- The Alaska National Interest Lands Conservation Act (ANILCA) of 1980 created the 19 million acre Arctic National Wildlife Refuge (Arctic Refuge).
- Section 1002 of ANILCA required DOI to conduct a resource assessment, completed in 1987, of the 1.5 million acre Arctic Refuge coastal plain area (1002 Area) located adjacent to the Beaufort Sea.
- In the 1987 assessment, the Secretary recommended that Congress consider leasing the 1002 Area for oil and gas. In 2009, the USGS determined the area had a mean estimate of 10.35 billion barrels of technically recoverable oil with 80 to 90 percent of that volume being economically recoverable.
- The Arctic Refuge's initial Comprehensive Conservation Plan (CCP), completed in 1988, recognized the coastal plain as a critical calving area for the Porcupine caribou herd, which are an important subsistence resource for Alaska Native people.
- A revised CCP with a final EIS was completed on April 3, 2015. It recommended designating 12 million acres of the Arctic Refuge as Wilderness, including the 1002 Area. Additionally, four rivers were recommended for inclusion into the National Wild and Scenic Rivers System.

II. POSITION of INTERESTED PARTIES

- The Alaska delegation supports leasing the coastal plain for oil and gas development.
- The State of Alaska, North Slope Borough, Arctic Slope Regional Corporation, and other development interests oppose the proposed Wilderness and Wild and Scenic River designations in the Arctic Refuge.
- The Native Gwich'in people, as well as environmental and conservation groups, support permanent wilderness designation.
- The majority of public comments on the 2015 CCP supported wilderness designation.

III. RECENT CONGRESSIONAL ACTIVITY

- In the 115th Congress, Sen. Markey (D-MA) introduced S. 820, and Rep. Huffman (D-CA-2) introduced H.R. 1889, nearly identical bills which would designate 1.6 million acres of the Arctic Refuge as wilderness.
- Sen. Murkowski (R-AK) introduced S. 49, and Rep. Young (R-AK) introduced H.R.49, which would both allow oil and gas leasing in the coastal plain of the Arctic Refuge.
- The Senate and House FY18 Budget Resolutions contain instructions for obtaining $1 and $5 billion in revenue to the Senate Energy and Natural Resources and House Natural Resources Committees respectively.

IV. NEXT STEPS/ OUTLOOK

- The Department included a legislative proposal in the FY 2018 President's Budget to open the coastal plain to oil and gas leasing. The first lease sales are projected to be in 2022 or 2023. A second lease sale would occur four years later.
- A FY18 Congressional Budget Resolution could pave the way for opening the 1002 Area.

October 2017

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Thompson, Portman, Stabenow, Bergman, Franken, Duckworth, McCollum, Joyce, Kaptur
ISSUE: Asian Carp

I. ISSUE BACKGROUND

- Bighead, Black, and Silver carps (Asian carp) are listed as injurious wildlife under the Lacey Act (18 USC 42) and may not be imported or transported between the continental U.S., the District of Columbia, Hawaii, Puerto Rico, or any other territory of the U.S.
- FWS works with state and federal agency partners to implement the national *Management and Control Plan for Bighead, Black, Grass, and Silver Carps in the United States* (Plan), which addresses Asian carp issues across the nation. The Plan was written by the Asian Carp Working Group of the Aquatic Nuisance Species Task Force (ANSTF). It was approved by the ANSTF in 2007.
- FWS and the U.S. Environmental Protection Agency (EPA) co-chair the 27-member Asian Carp Regional Coordinating Committee (ACRCC), which develops an annual Action Plan with activities funded through agency base appropriations and Great Lakes Restoration Initiative funding.
- FWS leads federal implementation of the Water Resources Reform and Development Act (WRRDA) Sec. 1039, which calls for increased inter-agency collaboration to prevent the spread of Asian carp in the Upper Mississippi (UMRB) and Ohio River (ORB) Basins.

II. POSITION of INTERESTED PARTIES

- Asian carp are a high-priority for the Great Lakes Task Force, other Members from the Great Lakes, UMRB and ORB, State leadership, conservation groups, and the media.
- Rep. McCollum (D-MN-4) has an interest in actions conducted in support of WRRDA and efforts focused on the UMRB, especially in Minnesota.
- Sens. Portman (R-OH) and Stabenow (D-MI) and Reps. Kaptur (D-OH-9) and Joyce (R-OH-14) have an interest in actions conducted in the Chicago Area Waterway System (CAWS) and secondary pathways to protect the Great Lakes.

III. RECENT CONGRESSIONAL ACTIVITY

- Sens. Stabenow and Portman held a Great Lakes Task Force meeting to discuss actions within the Midwest on Asian carp. FWS presented. Fourteen Members attended.
- FWS testified in March 2017 before the Senate Environment and Public Works Committee hearing, *"Examining Innovative Solutions to Control Invasive Species and Promote Wildlife Conservation".*
- FWS delivered the ANSTF's 2015 Report to Congress.
- July, 2017: In response to a silver carp being found above the last electrical barrier before Lake Michigan, FWS led a Congressional briefing on the 2017 Asian Carp Monitoring and Response Plan and the Upper Illinois Waterway Contingency Response Plan.

IV. NEXT STEPS/ OUTLOOK

- Deliver WRRDA 2016 Report to Congress. With OMB for clearance.
- The FY 2018 request for FWS's Asian carp effort is $7,885,000.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Bergman, Westerman, Gosar, Cochran, Leahy
ISSUE: Cormorant Depredation of Fish in Southeast, Northeast, and Midwestern States

I. ISSUE BACKGROUND

- Double-crested cormorants are fish-eating birds that are protected under the Migratory Bird Treaty Act (MBTA). The MBTA prohibits the take (killing, capture, selling, trading, transport, etc.) of protected migratory bird species without prior authorization.
- Cormorants congregate in the southern states in the fall and winter, where they impact aquaculture facilities. In the spring and summer, cormorants congregate in northern states where they are perceived to be a competitor to fishermen for wild free-swimming fish.
- In May 2016, the U.S. District Court for the District of Columbia vacated two FWS Depredation Orders that previously allowed for the lethal take of cormorants, citing inadequate NEPA documentation.

II. POSITION OF INTERESTED PARTIES

- Senate Appropriations Committee Chairman Thad Cochran and other Members representing affected southern states (AL, AR, LA, MS, NC) have urged the FWS to allow for the take of cormorants before they return to southern aquaculture facilities.
- Members from Northeast and Midwest states (MI, MN, NH, NY, VT) have urged the FWS to address cormorant impacts on wild free-swimming fish that are perceived to effect commercial and recreational fisheries in their states.

III. RECENT CONGRESSIONAL ACTIVITY

- In the 115th Congress, Rep. Crawford and Sen. Cotton introduced companion bills, H.R. 368 and S. 219, cosponsored by Members from AR, AL, MS, and NC, to address cormorant impacts on aquaculture by reinstating the FWS Depredation Order that the U.S. District Court vacated.
- The FY 2017 appropriations conference report directed the FWS to expedite NEPA documents that would allow the agency to issue cormorant depredation permits per the direction of the U.S. District Court.
- On July 22, 2017 Rep. Bergman used his time during a House Natural Resources Committee to ask Sec. Zinke to address the cormorant and wild fish issue in his district.

IV. NEXT STEPS / OUTLOOK

- FWS and USDA are completing a NEPA Environmental Assessment to evaluate options for lethal take permits for aquaculture facilities, among other circumstances, which is expected to be completed by the end of October.
- FWS will also review the science and options for lethal take permits involving cormorants and their potential damage to recreational and commercial fishing, including by working with state fish and wildlife agencies to collect and share data. This process is expected to take at least a year.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Murkowski, Bishop, Cantwell, Grijalva
ISSUE: FWS' Deferred Maintenance Backlog

I. ISSUE BACKGROUND

- Over 51 million people visited FWS hatcheries and refuges last year, including hunters, anglers, birders, and other outdoor recreationists.
- FWS real property assets include: 6,500 buildings; 8,600 water management structures; nearly 14,000 roads, bridges, and dams; and 10,500 "other" structures.
- Inadequate investments in asset maintenance have led to failing infrastructure and a deferred maintenance backlog at the FWS.
- While the FWS has reduced its backlog since 2010, a current FWS deferred maintenance (DM) backlog of approximately $1.4 billion remains.

II. POSITION of INTERESTED PARTIES

- There is congressional interest in addressing the DM backlog at the FWS, and across the Department of the Interior.
- Chairman Rob Bishop (R-UT) and other Members have taken the position that funding the Department's DM backlog should be prioritized, specifically over new land acquisition funding.
- Chairwoman Murkowski (R-AK) has emphasized public-private partnerships to address DM funding.
- Ranking Members Cantwell (D-WA) and Grijalva (D-AZ) are supportive of DM funding.

III. RECENT CONGRESSIONAL ACTIVITY

- The House Natural Resources Committee included addressing the DM backlog in the Committee's oversight plan for the 115th Congress.
- Chairwoman Murkowski's Senate Energy and Natural Resources Committee hosted staff briefings in March on the DM backlog where FWS and other Bureaus presented.
- Chairwoman Murkowski held a hearing in March on the topic of "opportunities to improve and expand infrastructure important to federal lands, recreation, water, and resources" where she highlighted addressing the Department's DM backlog.

IV. NEXT STEPS/ OUTLOOK

- The President's FY18 budget request emphasizes DM funding, requesting $41.0 million in Refuge DM and $10.2 million in Hatchery DM.
- The House-passed FY18 omnibus appropriations bill increased Refuge DM by $1.3 million to $42.3 million and added $3.0 million to Hatchery DM for a total of $13.2 million.
- Outside of the annual appropriations process, Congress and the Administration are considering a separate infrastructure package that would likely include provisions to address the FWS's and the Department's DM.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Bishop, Grijalva, Huffman, Calvert
ISSUE: Delisting/Downlisting 3-Year Plan

I. ISSUE BACKGROUND

- In order to recognize success in recovering species under the Endangered Species Act (ESA), keep the lists of endangered and threatened wildlife and plant species accurate and up-to-date, and focus conservation resources on those species most in need, the FWS reviews the status of listed species every five years, and responds to petitions received from the public to determine whether listed species should be reclassified from endangered to threatened (downlisted) or removed from the list (delisted).
- The FWS has developed a national workplan reflecting our schedule for actions addressing 5-year status review recommendations and substantive petitions to downlist and delist species over the next three years.
- The workplan was developed to provide greater clarity and predictability regarding the timing of eventual downlisting and delisting determinations to state wildlife agencies, non-profit organizations, and other stakeholders and partners.
- A species' inclusion in this workplan does not mean that a final decision has been made to downlist or delist.

II. POSITION of INTERESTED PARTIES

- There is congressional interest in focusing ESA recovery funding on activities that are inherently federal, such as 5-year reviews and status changes.

III. RECENT CONGRESSIONAL ACTIVITY

- The House FY 2018 Interior Appropriations bill contains $85,570,000 for ESA recovery activities, including $3,000,000 for delisting and downlisting activities.
- The House FY 2018 Interior Appropriations Committee Report directed the Service to complete all five-year reviews within the period required by law, and, for any determination on the basis of such review whether a species should be delisted, downlisted, or uplisted, promulgate an associated regulation prior to initiating the next status review for such species.

III. NEXT STEPS

- To keep the public informed of our progress in recovering species, the FWS plans to periodically update this work plan to reflect our consideration of new information over time, new status reviews initiated as a result of petitions, and new recommendations resulting from our 5-year reviews.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Feinstein, McCarthy, Calvert, McClintock, Denham, LaMalfa, Costa, Huffman
ISSUE: Delta Smelt, 08 Biological Opinion, California WaterFix Consultation, FISH Act

I. ISSUE BACKGROUND

- The threatened Delta smelt is a small fish endemic to the San Francisco Bay-Delta that completes its entire one-year lifecycle in and near where fresh and salt water mix in the estuary. The Bay-Delta has been altered by land use changes, water development, and invasive species, reducing the amount of high quality habitat available for Delta smelt.
- Record-low abundance of Delta smelt reflects decades of habitat change, competition and predation from invasive species, and the recent multi-year drought.
- In 2008, FWS issued a jeopardy Biological Opinion (BiOp) on the operation of the Central Valley Project and State Water Project. FWS included a Reasonable and Prudent Alternative (RPA), affecting the amount of water that can be used from the system, to avoid jeopardy and adverse modification, which remains in place today.
- The WaterFix project represents the State of California's plan to upgrade outdated infrastructure in the Delta to secure water supplies and improve the Delta's ecosystem. FWS finalized the WaterFix BiOp in June 2017.

II. POSITION of INTERESTED PARTIES

- Water export restrictions to protect Delta smelt are opposed by agricultural and municipal water users, but supported by environmental groups and fishing interests.
- WaterFix is supported by a number of agricultural and municipal interests and the State of California, but opposed by many environmental groups (who have filed litigation challenging the WaterFix BiOp) and local landowners. The Westlands Water District Board recently voted against participating in WaterFix stating that the project is not financially viable.

III. RECENT CONGRESSIONAL ACTIVITY

- FWS is working with partners to implement the requirements contained in the 2016 WIIN (Water Infrastructure Improvements for the Nation) Act, which contained a requirement to develop and expand captive breeding capability.
- In October 2017, Congressmen Calvert, LaMalfa, and others introduced the Federally Integrated Species Health (FISH) Act to consolidate management and regulation of the Endangered Species Act (ESA) with the FWS. This would essentially transfer authority over ESA-listed marine mammals and anadromous fish, such as salmon, from the National Marine Fisheries Service to FWS.

IV. NEXT STEPS/ OUTLOOK

- In August 2016, a multi-year process, led by Bureau of Reclamation with federal and state partners, began to develop a new BiOp to find balance between the needs of agriculture, municipalities and conservation.
- FWS approved Reclamation's proposal to modify implementation of RPA Action 4 from the 2008 BiOp in October 2017, which is intended to maintain the low salinity zone in specific locations in the estuary during the fall in wet and above normal water years.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Bishop, McClintock, Pearce, Grijalva, Tsongas, Beyer, Huffman
ISSUE: ESA Reform and Legislation

I. ISSUE BACKGROUND

- In this Congress, the EPW Committee and HNR Committee have expressed an interest in moving legislation that would amend the ESA, and have held related oversight hearings.
- Hearings and oversight in the 114th Congress centered on the role of litigation and settlements, use of data, transparency in decision-making, policies for designating critical habitat, and barriers to recovery.
- FWS is participating in a multi-year process led by the Western Governors' Association (WGA) to examine species conservation and the ESA and to identify actions to improve the statute or its implementation.

II. POSITION of INTERESTED PARTIES

- Last June, the WGA passed a resolution urging Congress to reauthorize the ESA, including several principles to reform the law.
- This March, the National Governor's Association adopted a policy similar to the WGA.
- The Association of Fish and Wildlife Agencies has participated in discussions on ESA reform, including an April EPW staff briefing with other state officials.
- Chairman Bishop (R-UT-1) has expressed strong interest in reforming the ESA.
- Ranking Member Grijalva (D-AZ-3) is opposed to reforming the ESA.

III. RECENT CONGRESSIONAL ACTIVITY

- H.R. 3916 (Calvert: R-CA) – Would transfer management of ESA-listed anadromous fish (salmon, sturgeon, etc.) from NOAA Fisheries to FWS. HNR Subcommittee legislative hearing is scheduled for Oct. 12. DOI statement for the record supports the bill.
- FWS Principal Deputy Director Greg Sheehan testified in July before HNR generally in support of 5 bills to amend the ESA. All 5 bills passed out of HNR on Oct. 4.
    - H.R. 424 – Gray Wolf State Management Act (Peterson: D-MN) – Reinstates delisting of Western Great Lakes and WY wolves.
    - H.R. 717 – Listing Reform Act (Olson: R-TX) – Requires economic analysis at listing for threatened species, gives flexibility to prioritize petitions, removes 90-day and 12-month deadlines.
    - H.R. 1274 – State, Tribal, and Local Species Transparency and Recovery Act (Newhouse: R-WA) – Requires data transparency, requires all data be provided to states prior to listing, defines best available data to include state & local.
    - H.R. 2603 – Saving America's Endangered Species (SAVES) Act (Gohmert: R-TX) -- Nonnative species in U.S. not considered listed under ESA.
    - H.R. 3131 – Endangered Species Litigation Reasonableness Act (Huizenga: R-MI) – Would tie ESA fee awards to EAJA cap of $125/hr

IV. NEXT STEPS/ OUTLOOK

- The WGA issued recommendations for ESA reform over the summer.
- We anticipate continued oversight and legislative activity from HNR and EPW regarding ESA implementation and modernization.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Bishop, Lamborn, Labrador, Tipton, Cheney, Barrasso, Risch, Daines, Calvert, Stewart, Simpson, Amodei, Lee
ISSUE: Greater sage-grouse

I. ISSUE BACKGROUND

- In 2010, FWS made the greater sage-grouse a candidate for listing under the Endangered Species Act. In response, the Bureau of Land Management (BLM) and Forest Service (USFS) worked with the states to develop a land use strategy to conserve and restore sagebrush habitat across the species' range.
- In 2015, citing the federal land use strategy and associated rangeland fire strategy, along with state and private lands conservation efforts, FWS determined that the greater sage-grouse was not warranted for listing under the ESA.
- The 2015 "not warranted" finding included a commitment to revisit the status of the species in 5 years, a commitment made to strengthen the defensibility of that finding.
- FWS and a coalition of public and private partners, particularly the states, have built a durable, collaborative effort to conserve sagebrush-dependent species, avoid future listing of those species, and secure a healthy sagebrush ecosystem for people and wildlife.
- BLM and USFS amended or revised nearly 100 resource and land management plans to improve protections for sage-grouse and sagebrush habitat.
- All states have sage-grouse plans; some interface seamlessly with the federal plans. States have management responsibility for the species and are leading the larger effort to proactively conserve the larger sagebrush ecosystem.
- In August 2017, Secretary Zinke received a report from the Department's Sage-Grouse Review Team regarding possible plan and policy modifications to complement state efforts to improve greater sage-grouse conservation and economic development on public lands, as required by Secretarial Order 3353.

II. POSITION of INTERESTED PARTIES

- Some conservation groups were critical of the FWS' not-warranted determination; others were highly supportive.
- Some industry and trade groups have filed litigation opposing the federal plans.

III. RECENT CONGRESSIONAL ACTIVITY

- In the 115th Congress, legislation seeks to provide state management over federal land management plans and delay future action to list the sage-grouse. Sponsors include Sens. Risch (R-ID), Lee (R-UT), and Daines (R-MT) and Reps. Simpson (R-ID), Amodei (R-NV), Gosar (R-AZ), Stewart (R-UT), Tipton (R-CO), and Cheney (R-WY).
- The FY17 Omnibus appropriations bill bars FWS from expending any funds for status reviews, listing determinations, or rulemakings regarding the greater sage-grouse.

IV. NEXT STEPS/ OUTLOOK

- FWS will continue to provide technical assistance to public and private partners as they implement sage-grouse conservation measures. FWS will also continue to support collaborative efforts to conserve the larger sagebrush ecosystem.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Tester, Daines, Simpson, McCollum, Barrasso, Risch, Labrador, Cheney, Grijalva, Newhouse
ISSUE: Grizzly Bears

I. ISSUE BACKGROUND

- In 1975, FWS listed the grizzly bear as threatened in the lower 48 states.
- FWS organizes grizzly bears into six recovery zones/ecosystems to allow for targeted recovery efforts. Recovery zones include parts of WA, ID, MT, and WY.
- In March 2007, FWS finalized a rule to establish the Greater Yellowstone Ecosystem grizzly bear distinct population segment (DPS) and to delist this DPS due to recovery. Courts overturned this rule in 2009, reinstating ESA protections for Yellowstone bears.
- In June 2017, FWS published a new final rule to delist the Yellowstone DPS. The rule does not change the threatened status of the remaining grizzly bears in the lower 48 states. FWS has received several complaints from environmental groups and tribal interests challenging the rule.
- In early 2017, the National Park Service and FWS published a draft Environmental Impact Statement on alternatives to restore grizzly bear in the North Cascades Recovery Unit. Alternatives range from no action to the establishment of a population of grizzly bears in the North Cascades Ecosystem.

II. POSITION of INTERESTED PARTIES

- Most members of Congress and federal and state agencies supported the delisting of the Yellowstone grizzly bear DPS.
- Tribes had varying opinions regarding delisting and some had strong opposition to delisting grizzly bears in the Yellowstone ecosystem.
- Several environmental groups have been outspoken in their opposition to delisting.

III. RECENT CONGRESSIONAL ACTIVITY

- Senators Daines (R-MT), Barrasso (R-WY), Enzi (R-WY), Rep. Cheney (R-WY), and House Natural Resources Chairman Bishop (R-UT) issued statements supporting the final delisting of the Yellowstone grizzly bear.
- Rep. Grijalva (D-AZ-3) opposed delisting, citing tribal rights and hunting concerns.
- Rep. Newhouse (R-WA-4) has expressed opposition to potential restoration of grizzly bears in the North Cascades. His office remains engaged with FWS on the issue.

IV. NEXT STEPS/ OUTLOOK

- The comment period on the North Cascades draft EIS closed in April 2017. Next steps include analyzing comments, developing a final EIS, and issuing a Record of Decision.
- In August 2017, in regards to delisting wolves in the Western Great Lakes, a court ruled that FWS failed to reasonably analyze or consider: (1) the impacts of partial delisting; and, (2) historical range loss on the already listed species. FWS will pursue any future proposals to delist a grizzly bear DPS in the context of that ruling. This is most relevant to the Northern Continental Divide Ecosystem recovery zone in northern Montana.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Frelinghuysen
ISSUE: Highlands Conservation Act

I. ISSUE BACKGROUND

- The Highlands Conservation Act (HCA) was enacted in 2004 to provide assistance to States to preserve and protect high quality conservation land in the 3.4 million acre Highlands region of New York, New Jersey, Pennsylvania and Connecticut.
- The program was first funded in 2007. The program also received funding in 2008, 2009, 2010, 2012, 2015, 2016, and 2017.
- In FY 2016, Congress increased the appropriation "up to $10 million," and included administrative funding to the FWS, which had not been provided in several years. FWS works with the U.S. Forest Service and the four states to identify projects that meet the intent of the law to conserve important habitat in the Highlands region.
- To date, more than $26 million in Federal funds has been allocated to the four states for land acquisition. These funds have resulted in the permanent protection of over 6,200 acres and leveraged non-Federal funds at a nearly 3:1 ratio.
- Funding for the program comes from the Land and Water Conservation Fund.
- There is no funding for Highlands in the FY 2018 President's Budget.

II. POSITION of INTERESTED PARTIES

- The Highlands Coalition is comprised of more than 200 national, regional, state and local organizations that work collaboratively with state agencies, the U.S. Forest Service and FWS to implement critical conservation in the Highlands region. This broad coalition has yielded sustained congressional support.
- House Appropriations Interior Subcommittee Chairman Frelinghuysen is a champion of the program which also has bi-partisan support across all four states.

III. RECENT CONGRESSIONAL ACTIVITY

- Chairman Frelinghuysen introduced H.R. 1281(S. 1627, Sen. Gillibrand [D-NY]) to reauthorize the law through 2021. No Congressional action has been taken to date.

IV. NEXT STEPS

- FWS is working with the U.S. Forest Service on a Memorandum of Understanding to solidify roles and responsibilities for administering the grant program.
- August 2017: FWS announced funding distribution of $2,420,000 to each of the four states. Announcements of funding to states were sent to Congressional offices.
- The 2018 President's Budget did not include funding for Highlands.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Murkowski, Young
ISSUE: Izembek National Wildlife Refuge and King Cove Road

I. ISSUE BACKGROUND

- This issue centers on construction of a road through wilderness areas of the Izembek Refuge to provide access to an all-weather airport for the community of King Cove, AK.
- Congress previously appropriated funds to upgrade the local medical clinic, improve the King Cove airstrip, and enhance a marine transportation link between the communities of King Cove and Cold Bay.
- The Omnibus Public Land Management Act of 2009 directed the Secretary to develop an EIS to evaluate a three-party land exchange between the federal government, the State of Alaska, and the King Cove Corporation for the purpose of constructing a road between King Cove and Cold Bay, which has an existing all-weather airport.
- As part of the proposed land exchange, about 56,000 acres owned by the State and King Cove Corporation would be transferred to the Izembek and Alaska Peninsula Refuges.
- The proposed King Cove road would cross designated wilderness in the Izembek Refuge, potentially creating adverse impacts to high value habitat.
- In December 2013, as required by the 2009 law, former Interior Secretary Jewell issued a final decision that found the land exchange was not in the public interest.

II. POSITION of INTERESTED PARTIES

- The Alaska Congressional Delegation strongly supports the road and land exchange.
- The communities of King Cove and Cold Bay support the land exchange and road.
- Wilderness and environmental groups strongly oppose a road due to the impacts to fish and wildlife habitat.
- Some Alaska Natives and subsistence users in the Yukon Delta also oppose the road.

III. RECENT CONGRESSIONAL ACTIVITY

- Senator Murkowski included policy language in the FY16 and FY17 Interior-Environment appropriations bills that would require a land transfer at Izembek. The language was not ultimately included in the final FY16 or FY17 appropriations bills.
- At the time of drafting, the FY18 Senate appropriations bill was not yet released.
- This year, bills were introduced by Sen. Murkowski (S. 101) and Rep. Young (H.R. 218) to provide a land exchange for the construction of a road between the two communities. H.R. 218 passed the House on July 20, 2017.

IV. NEXT STEPS/ OUTLOOK

- Next steps depend on whether the land exchange is with the State of Alaska or Native Corporation. For example, if land is exchanged with the Native Corporation, the Alaska Native Claims Settlement Act (ANCSA) Section 22(g) and its implementing regulation, 50 CFR 25.21, stipulates that Alaska Native Village Corporation lands within the boundaries of a National Wildlife Refuge established prior to ANCSA are subject to National Wildlife Refuge System compatibility requirements. If land is exchanged with the State of Alaska, then a National Environmental Policy Act EIS is likely required, unless new statute dictates otherwise.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Gohmert, Westerman, Johnson, Denham, and Tsongas
ISSUE: D.C. Circuit Decision on FWS Interpretation of Lacey Act Interstate Transport Prohibition

I. ISSUE BACKGROUND

- Under the Lacey Act (18 U.S.C. §42), the Secretary of the Interior is authorized to regulate the importation and transport between the continental U.S., the District of Columbia, Hawaii, Puerto Rico, or any other territory of the U.S., of species determined to be injurious to human beings, the interests of agriculture, horticulture or forestry, or to wildlife or wildlife resources of the U.S. FWS has long interpreted the language related to shipment of injurious species to prohibit transportation of injurious species between states within the continental U.S.
- The U.S. Association of Reptile Keepers (USARK) filed a lawsuit in December 2013 challenging FWS authority. The District Court for the District of Columbia found that 18 U.S.C. § 42(a)(1) does not prohibit interstate transport of injurious wildlife between states within the continental U.S. and enjoined FWS from implementing that provision with respect to two species at issue in the litigation. FWS appealed this decision.
- On April 7, 2017, the U.S. Court of Appeals for the District of Columbia Circuit affirmed the District Court's judgment and held that FWS lacks authority pursuant to the Lacey Act to prohibit shipments of injurious species between states within the continental U.S.

II. POSITION of INTERESTED PARTIES

- Aquaculture and live animal trade industries have expressed support for the Appellate Court's decision.
- The Association of Fish and Wildlife Agencies has concerns regarding the FWS losing its ability to regulate the interstate transport of injurious species between States within the continental U.S.
- Senator Gillibrand (D-NY) has an interest in revising the injurious species listing process

III. RECENT CONGRESSIONAL ACTIVITY

- Rep. Gohmert (R-TX-1) introduced HR 1807 - Public Water Supply Invasive Species Compliance Act of 2017 (companion bill in the Senate, S. 789 sponsored by Sen. Cruz (R-TX)), exempting certain water transfers between public water supplies located on, along, or across the boundaries of Texas, Arkansas, and Louisiana from the Lacey Act. Reps. Westerman (R-AR-4) and Mike Johnson (R-LA-4), who are on the House Natural Resources Committee, are co-sponsors. The bill was passed out of committee.
- October, 2017: Senator Gillibrand (D-NY) had a press conference on the emerald ash borer beetle in the Adirondacks, mentioning the injurious species listing process. Gillibrand has previously introduced legislation to reform this process. Reintroduction of this legislation is likely to occur this session; but, it has not yet happened.

IV. NEXT STEPS/ OUTLOOK

- FWS did not seek additional appeals and as a result of this decision the FWS may no longer place any limitation on transport of injurious wildlife across the 49 continental states

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Gardner, Cole, Calvert, Gohmert, Pearce, Tipton
ISSUE: Lesser Prairie-Chicken

I. ISSUE BACKGROUND

- In April 2014, FWS listed the lesser prairie-chicken as threatened under the Endangered Species Act (ESA) and concurrently finalized a special rule under section 4(d) of the ESA that established compliance with the State-led Range-wide Conservation Plan as also being ESA compliant.
- In June 2014, the Permian Basin Petroleum Association and four New Mexico counties filed a lawsuit challenging the FWS's final rule to list the lesser prairie-chicken. Separate lawsuits were filed by other plaintiffs, including environmental groups.
- In September 2015, a U.S. District Court ruled on the Permian Basin lawsuit and vacated the FWS's listing rule. The Government decided not to appeal.
- Prior to the 2015 court ruling, FWS began work on a species status assessment for the lesser prairie-chicken, with input from the five range states. The goal of the status assessment was to synthesize the best available science to inform recovery planning and conservation actions.
- In September 2016, FWS was petitioned to list the lesser prairie-chicken as endangered. FWS found the petition to be substantial. The status assessment will also serve to inform the 12 month finding on that petition.

II. POSITION of INTERESTED PARTIES

- The Western Association of Fish and Wildlife Agencies (WAFWA), in partnership with New Mexico, Colorado, Kansas, Oklahoma and Texas, created *The Lesser Prairie-Chicken Range-wide Conservation Plan* to develop a conservation and mitigation strategy for the species. FWS will incorporate WAFWA's 2016 Annual Report into the status assessment, along with 2017 population survey results.
- Several Members of Congress disagreed with FWS's 2014 decision to list the lesser prairie-chicken under the ESA.

III. RECENT CONGRESSIONAL ACTIVITY

- In the 114th Congress, Rep. Lucas (R-OK) filed an amendment to the House National Defense Authorization Act (NDAA) to prohibit listing the bird under the ESA; the amendment was withdrawn. Similar language was included in other NDAA amendments, appropriations bills, and a standalone bill.
- There has been no relevant legislation introduced in the 115th Congress.

IV. NEXT STEPS/ OUTLOOK

- FWS anticipates completing the status assessment in 2017, though exact timing depends on recommendations and comments received from peer and Working Group reviewers. The status assessment will inform future decisions related to the bird. Coordination with the States, WAFWA and others is expected to continue.
- FWS did not meet the deadline for the 12-month finding on the petition to list (September 8, 2017). The finding is expected after completion of the status assessment and will fully consider the conservation actions underway.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Murkowski, Simpson
ISSUE: FWS Mitigation Policy Status

I. ISSUE BACKGROUND

- The FWS has used a mitigation policy since 1981 to guide agency recommendations on mitigating the adverse impacts of land and water development projects on fish, wildlife, plants, and their habitats.
- In 2016, FWS finalized revisions to the 1981 policy. Notably, the scope of the revised policy expanded to address all resources for which FWS has authority to require or recommend mitigation, including those listed under the Endangered Species Act (ESA).
- In December 2016, the FWS finalized the ESA compensatory mitigation policy, a more detailed, ESA-specific stepdown of the revised Service-wide mitigation policy.
- These policies were consistent with the Presidential Memorandum entitled *Mitigating Impacts on Natural Resources from Development and Encouraging Related Private Investment* (PM) (November 3, 2015) and with Secretarial Order 3330, *Improving Mitigation Policies and Practices of the Department of the Interior* (October 31, 2013).
- A March 28, 2017, Executive Order (EO) rescinded the 2015 PM and directed all agencies to identify affected agency actions (including existing regulations, orders, and policies) and, as appropriate, suspend, revise, or rescind them.
- Sec. Order (SO) 3349 (March 29, 2017) implements the March 2017 EO. It revoked SO 3330 and required the Deputy Secretary to inform the Bureaus whether to proceed with reconsideration, modification, or rescission of actions related to the PM or SO 3330.

II. POSITION of INTERESTED PARTIES

- Sen. Murkowski (R-AK) strongly opposed the 2016 revised mitigation policy and sent a letter to former FWS Director Ashe urging him to retract it, expressing concern about its standard and the impact of the policy on smaller entities, such as Alaska Native communities, who want to develop resources on their lands.
- At a March 2016 Senate Energy and Natural Resources Committee hearing, the State of Alaska expressed concerns with the PM and requested its revision to incorporate the Alaska Native Settlement Claims Act and Alaska National Interest Lands Conservation.
- Response from State agencies varied; FWS received comments from States both supporting and expressing concerns with the policies.
- In some cases, industry had concerns that the policies were an attempt to create new authority for FWS.

III. RECENT CONGRESSIONAL ACTIVITY

- Rep. Newhouse (R-WA) introduced two resolutions to disapprove the two FWS mitigation policies through the Congressional Review Act (CRA), but no further action has been taken on them.

IV. NEXT STEPS

- Consistent with SO 3349, this October, FWS will solicit public comment on the policies. Based on comments received, FWS will contemplate next steps on the policies.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: McCollum, Udall, Feinstein, Stewart, Bishop
ISSUE: Southwest Border Law Enforcement and Conservation Issues

I. ISSUE BACKGROUND

- There are eight National Wildlife Refuges along the U.S.-Mexico border, three in Texas, two in California and three in Arizona. FWS has 18 Federal Wildlife Officers (FWO) that cover these refuges.
- Santa Ana National Wildlife Refuge sits along the U.S.-Mexico border in Texas, and has been identified as a location for early preparations for border wall construction. The Refuge has been visited this year by Senator Cornyn's (R-TX) staff and Representative O'Rourke (D-TX-16). Senator Cruz (R-TX) has expressed an interest in visiting the refuge as well.
- The FWOs at border refuges provide safety and security for visitors and protect fish, wildlife, cultural, and archaeological resources. Additionally, working closely with DHS, they address border issues that spill onto refuges, including drug and human trafficking and fatalities of undocumented immigrants.
- These refuges also face increased habitat degradation from significant amounts of human trash and waste left on site, escaped camp fires, sewage spills, and trail and road erosion. Additional trash is generated on Arizona border refuges by humanitarian organizations who, contrary to refuge regulations, leave stock piles of food, water, and clothing for illegal border crossers.
- Many native animals, like pronghorn antelope and ocelots, migrate across the Southwest border; physical barriers could also affect movement of wildlife and could affect surface water movement, causing local flooding.
- Sec. 102. of the REAL ID Act (P.L. 109-13), signed into law in 2005, gives the Department of Homeland Security authority to waive most environmental laws, including NEPA and the ESA, to ensure expeditious construction of barriers and roads.

II. POSITION of INTERESTED PARTIES

- Some Congressional Members have expressed concern about the cost of expanding and maintain a wall along the border, and the impact it may have on species and habitat in the area, as well as the impact on public lands, including National Wildlife Refuges.
- Other Members have explained how effective border security protects the environment by deterring illegal activity and border crossings.

III. RECENT CONGRESSIONAL ACTIVITY

- On October 4, the House Homeland Security Committee passed the Border Security for America Act (H.R. 3548), which includes a $10 billion authorization for construction of a U.S.-Mexico border wall.
- On July 27, the House passed the Make America Secure Appropriations Act of 2018 (H.R. 3219), which includes $1.6 billion in funding for construction of the border wall.

IV. NEXT STEPS/ OUTLOOK

- Congress will continue to debate funding for the border wall.
- The President's FY18 budget request includes $1.6 billion for border wall construction.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Senator Murkowski (R-AK), Representative Don Young (R-AK-AL)
ISSUE: Alaska Native-Crafted Walrus Ivory

I. ISSUE BACKGROUND

- In 2016, FWS finalized regulations to prohibit most commercial domestic trade in African elephant ivory. Also, several states (including California, New Jersey, Hawaii, and Nevada) have taken steps to ban the intrastate purchase and sale of ivory (some including walrus and other types of ivory). Some state ivory bans have provisions that exempt items expressly authorized by federal law, license, or permit. At least 8 more states are considering such measures.
- Alaska Native artists are expressing concern to the Alaska Congressional delegation about loss of sales, because consumers are nervous about buying ivory and confusion over federal and state laws governing the sale of ivory.
- The U.S. does not prohibit the sale, purchase, import, export, or transport of genuine, Alaska Native-crafted walrus ivory pieces, and these may be brought into the lower 48 states by individual consumers or shipped to retail stores.
- In May of 2017, DOI announced the release of a brochure, coordinated by DOI's Indian Arts and Crafts Board (Board) and FWS to inform consumers and Alaska Native artists about walrus conservation, relevant laws, and how law enforcement recognizes walrus ivory and distinguishes it from elephant ivory.
- This brochure is being distributed online, through DOI venues, and has been offered to cruise lines and other tourism outlets. Related advertisement has also been published.
- FWS ensures its law enforcement officers are fully knowledgeable about identifying elephant vs. walrus ivory during inspections of imports and exports.
- FWS also works closely with the Board to investigate and pursue cases of counterfeit Native arts and crafts that violate the Indian Arts and Crafts Act, including several in AK.
- On October 4, 2017, the Service announced a "not warranted" finding for listing of walrus under the ESA.

II. POSITION of INTERESTED PARTIES

- The Alaska delegation has expressed concern about the impact of the elephant ivory ban and state ivory bans on the sales of genuine Alaska Native-crafted walrus ivory.
- Members are pleased with the efforts of FWS and the Board to inform consumers and artists about the importance of Native American arts and crafts, and the legality of the sale of Alaska Native-crafted walrus ivory, as well as our efforts to enforce the Indian Arts and Crafts Act.

III. RECENT CONGRESSIONAL ACTIVITY

- This issue was raised by Senator Murkowski during the June 21, 2017 Senate Interior Appropriations hearing for FY 2018.
- FWS and the Board have met on this issue with staff of the three AK delegation offices.

IV. NEXT STEPS/ OUTLOOK

- The Department will continue to work to increase awareness and provide best information about relevant Federal laws.
- During the FY 2018 Senate Interior appropriations hearing, the Secretary committed to a Secretarial Order and to convene a working group on the matter.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Young, Grijalva, Beyer, Flake, Portman, McCollum, Udall
ISSUE: Combating Wildlife Trafficking

I. ISSUE BACKGROUND

- FWS (via DOI) is a co-chair, along with the State Department and Department of Justice, of the interagency Task Force on Wildlife Trafficking.
- In 2016, Congress passed the bipartisan, bicameral END Wildlife Trafficking Act, which codified the Task Force, National Strategy, and Implementation Plan, and included additional requirements of federal agencies.
- In 2016, FWS finalized regulations to prohibit most commercial domestic trade in African elephant ivory. Exemptions for antiques and items containing small amounts of ivory were included to allow for the continued trade in items that do not impact conservation of African elephants.
- In February 2017, the President signed an Executive Order on Transnational Organized Crime, which states the U.S. shall address threats to national security from transnational criminal organizations involved in a variety of activities, including wildlife trafficking.
- FWS has stationed law enforcement special agents at U.S. embassies as international attachés to address wildlife trafficking in key nations.

II. POSITION of INTERESTED PARTIES

- Combating wildlife trafficking has strong bipartisan support in Congress.
- Several Members of Congress are also supportive of FWS' broader international conservation and wildlife law enforcement work.
- Some Members have sought to limit FWS authority to restrict elephant ivory trade.

III. RECENT CONGRESSIONAL ACTIVITY

- In the 115th Congress, there have been several bills introduced that address wildlife trafficking and international conservation, including:
    - H.R. 227, sponsored by Rep. Young (R-AK-AL) reauthorizes the Multinational Species Conservation Funds (Funds).
    - H.R. 1247, sponsored by Rep. Donovan (R-NY-11), and S. 480, sponsored by Sen. Portman (R-OH), reauthorize the Tiger Stamp.
    - S. 826, sponsored by Sen. Barrasso (R-WY), reauthorizes the Funds and creates a prize competition to address wildlife trafficking.
    - H.R. 226, sponsored by Rep. Young (R-AK-AL), would allow for the commercial trade of African elephant ivory.

IV. NEXT STEPS/OUTLOOK

- The Task Force continues to implement the END Wildlife Trafficking Act. FWS and State have taken the lead in developing a list of countries of concern due to wildlife trafficking. This list will be included in a report due to Congress in early October.
- We expect less focus on wildlife trafficking issues in this Congress given the passage of the END Wildlife Trafficking Act in the 114th Congress. However, there are still Members who are focused on this issue who will pursue events, briefings, and additional legislation.
- In FY 2018, the Service requests $8.9 million specifically dedicated for combating wildlife trafficking.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Barrasso, Flake, Heinrich, Gardner, Stabenow, Franken, Wyden, Merkley, Udall, McCollum, Stewart, Pearce, Gosar, Bishop, Tipton, Bergman, Cheney, Rouzer
ISSUE: Wolves

I. ISSUE BACKGROUND

- FWS believes the wolf is recovered under the ESA, and has attempted to delist it nationwide, except for the Mexican wolf and the red wolf subspecies.
- In 2014, final rules delisting **Gray wolves** in Wyoming and in the Western Great Lakes (WGL) were vacated by separate District Court judges; ESA protections were reinstated for these populations. FWS appealed both of these rulings.
- In March 2017, a court ruled in favor of FWS delisting WY wolves and, in April, the FWS reinstated its previous Wyoming delisting rule.
- In August 2017, a court ruled against FWS delisting of WGL wolves; Wolves remain federally endangered in WI and MI and threatened in MN.
- Wolves are under state management in eastern WA and OR, but wolves in the western portions of those states remain endangered, limiting management options.
- In January 2015, FWS separately listed the **Mexican wolf** as endangered and revised regulations for the nonessential experimental population under ESA section 10(j).
- In 2016, New Mexico sued FWS to enjoin release of Mexican wolves without state permits. An injunction was issued, but vacated upon appeal in April 2017. FWS is reviewing comments on the draft revised recovery plan for the Mexican wolf subspecies.
- **Red wolves** are listed as endangered and exist in the wild as a non-essential, experimental population (NEP) in eastern NC. In September 2016, after a review of the red wolf recovery program, FWS announced plans to propose changes to the NEP management, expand the captive population, and revise the recovery plan.

II. POSITION of INTERESTED PARTIES

- The environmental community largely opposes actions to lessen protections for wolves.
- States support efforts to delist wolves, and to prevent and compensate for depredation.

III. RECENT CONGRESSIONAL ACTIVITY

- 115th Congress Legislation: S. 368, Requires revised recovery plan for Mexican wolves (Sen. Flake); S. 164 and H.R. 424, Reinstates FWS final rules delisting wolves in Wyoming and WGL (Sen. Barrasso and Reps. Cheney, Labrador, Simpson, Bergman). Similar language is included in sportsmen's legislation and the House appropriations bill.
- In July 2017, FWS Principal Deputy Director Sheehan testified in support of H.R. 424.
- In the 114th Congress, the House Natural Resources Committee held an oversight hearing on Federal management of gray, Mexican, and red wolves.
- Rep. Newhouse sought to delist wolves in OR, WA, UT, and NV in the 114th Congress.

IV. NEXT STEPS/ OUTLOOK

- FWS is examining next steps for gray wolf management, in light of WGL court ruling.
- FWS will revise the recovery plan for Mexican wolves by the end of November 2017.
- FWS will soon initiate a NEPA evaluation of revisions to the NEP for red wolves in NC.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Daines, Tester, Merkley, Kilmer, Simpson
ISSUE: Dreissenid Mussel Discovery in Montana near Columbia River Headwaters

I. ISSUE BACKGROUND

- Zebra mussels and quagga mussels (Dreissenids) have since spread throughout the Great Lakes region, south along the Mississippi River and to areas west of the Mississippi. In January 2007, the first population of Dreissenid mussels west of the 100th Meridian was discovered in Lake Mead. Both species are easily spread between water bodies by watercraft, and cause damage to water-based infrastructure that is estimated to be in the hundreds of millions of dollars.
- In October 2016, Dreissenids (microscopic larvae called veligers) were detected for the first time in the upper Missouri River Basin in Montana, near the headwaters of the Columbia River.

II. POSITION of INTERESTED PARTIES

- The Montana Governor has declared an environmental disaster. The Idaho legislature and governor responded by enacting emergency state supplemental funding.
- The Montana Legislature called for development of the Upper Columbia Conservation Commission to address threats of Dreissenid mussels. DOI bureaus have been asked to participate.

III. RECENT CONGRESSIONAL ACTIVITY

- The QZAP was developed by the Western Regional Panel and approved by the ANSTF in 2010, and is the Department of Interior (DOI) roadmap for this issue. The FWS works with other DOI Bureaus, the U.S. Army Corps of Engineers, States, and partners to support boat inspection and decontamination, early warning systems, and training.
- Congress has appropriated approximately $2 million per year since FY 2010 to support this effort.

IV. NEXT STEPS

- The FWS Region 6 dive team specializes in Dreissenid mussel detection. They deployed to both Canyon Ferry and Tiber Reservoirs in Montana as well as the Columbia River Basin Team rapid response test exercise in Washington.
- In FY16 and FY 17, FWS allocated about $930,000 each year to partners through grants for projects to control the spread of invasive mussels in the western U.S. under the *Quagga-Zebra Mussel Action Plan for Western U.S. Waters* (QZAP), with emphasis on containment and prevention. FY 2018 Budget Request included $2 million for support.
- FWS delivers $1 million of the QZAP funding to states and regional groups with Aquatic Nuisance Species (ANS) plans which have been signed by the respective governor and approved by the ANS Task Force (ANSTF). In FY17, each approved plan was awarded $46,715. Montana received an additional $16K from FWS R6 to support veliger detection.
- July 2017: DOI announced the "Safeguarding the West from Invasive Species" package to address the Columbia River Basin and other uninfested Western waters, to help better integrate government efforts to stop the spread of invasive mussels.

ISSUE: Oil and Gas Development in the Arctic National Wildlife Refuge

I. ISSUE BACKGROUND

- The Alaska National Interest Lands Conservation Act (ANILCA) of 1980 created the 19 million acre Arctic National Wildlife Refuge (Arctic Refuge).
- Section 1002 of ANILCA required DOI to conduct a resource assessment, completed in 1987, of the 1.5 million acre Arctic Refuge coastal plain area (1002 Area) located adjacent to the Beaufort Sea.
- In the 1987 assessment, the Secretary recommended that Congress consider leasing the 1002 Area for oil and gas. In 2009, the USGS determined the area had a mean estimate of 10.35 billion barrels of technically recoverable oil with 80 to 90 percent of that volume being economically recoverable.
- The Arctic Refuge's initial Comprehensive Conservation Plan (CCP), completed in 1988, recognized the coastal plain as a critical calving area for the Porcupine caribou herd, which are an important subsistence resource for Alaska Native people.
- A revised CCP with a final EIS was completed on April 3, 2015. It recommended designating 12 million acres of the Arctic Refuge as Wilderness, including the 1002 Area. Additionally, four rivers were recommended for inclusion into the National Wild and Scenic Rivers System.

II. POSITION of INTERESTED PARTIES

- The Alaska delegation supports leasing the coastal plain for oil and gas development.
- The State of Alaska, North Slope Borough, Arctic Slope Regional Corporation, and other development interests oppose the proposed Wilderness and Wild and Scenic River designations in the Arctic Refuge.
- The Native Gwich'in people, as well as environmental and conservation groups, support permanent wilderness designation.
- The majority of public comments on the 2015 CCP supported wilderness designation.

III. RECENT CONGRESSIONAL ACTIVITY

- In the 115th Congress, Sen. Markey (D-MA) introduced S. 820, and Rep. Huffman (D-CA-2) introduced H.R. 1889, nearly identical bills which would designate 1.6 million acres of the Arctic Refuge as wilderness.
- Sen. Murkowski (R-AK) introduced S. 49, and Rep. Young (R-AK) introduced H.R.49, which would both allow oil and gas leasing in the coastal plain of the Arctic Refuge.
- The Senate and House FY18 Budget Resolutions contain instructions for obtaining $1 and $5 billion in revenue to the Senate Energy and Natural Resources and House Natural Resources Committees respectively.

IV. NEXT STEPS/ OUTLOOK

- The Department included a legislative proposal in the FY 2018 President's Budget to open the coastal plain to oil and gas leasing. The first lease sales are projected to be in 2022 or 2023. A second lease sale would occur four years later.
- A FY18 Congressional Budget Resolution could pave the way for opening the 1002 Area.

October 2017

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Thompson, Portman, Stabenow, Bergman, Franken, Duckworth, McCollum, Joyce, Kaptur
ISSUE: Asian Carp

I. ISSUE BACKGROUND

- Bighead, Black, and Silver carps (Asian carp) are listed as injurious wildlife under the Lacey Act (18 USC 42) and may not be imported or transported between the continental U.S., the District of Columbia, Hawaii, Puerto Rico, or any other territory of the U.S.
- FWS works with state and federal agency partners to implement the national *Management and Control Plan for Bighead, Black, Grass, and Silver Carps in the United States* (Plan), which addresses Asian carp issues across the nation. The Plan was written by the Asian Carp Working Group of the Aquatic Nuisance Species Task Force (ANSTF). It was approved by the ANSTF in 2007.
- FWS and the U.S. Environmental Protection Agency (EPA) co-chair the 27-member Asian Carp Regional Coordinating Committee (ACRCC), which develops an annual Action Plan with activities funded through agency base appropriations and Great Lakes Restoration Initiative funding.
- FWS leads federal implementation of the Water Resources Reform and Development Act (WRRDA) Sec. 1039, which calls for increased inter-agency collaboration to prevent the spread of Asian carp in the Upper Mississippi (UMRB) and Ohio River (ORB) Basins.

II. POSITION of INTERESTED PARTIES

- Asian carp are a high-priority for the Great Lakes Task Force, other Members from the Great Lakes, UMRB and ORB, State leadership, conservation groups, and the media.
- Rep. McCollum (D-MN-4) has an interest in actions conducted in support of WRRDA and efforts focused on the UMRB, especially in Minnesota.
- Sens. Portman (R-OH) and Stabenow (D-MI) and Reps. Kaptur (D-OH-9) and Joyce (R-OH-14) have an interest in actions conducted in the Chicago Area Waterway System (CAWS) and secondary pathways to protect the Great Lakes.

III. RECENT CONGRESSIONAL ACTIVITY

- Sens. Stabenow and Portman held a Great Lakes Task Force meeting to discuss actions within the Midwest on Asian carp. FWS presented. Fourteen Members attended.
- FWS testified in March 2017 before the Senate Environment and Public Works Committee hearing, *"Examining Innovative Solutions to Control Invasive Species and Promote Wildlife Conservation".*
- FWS delivered the ANSTF's 2015 Report to Congress.
- July, 2017: In response to a silver carp being found above the last electrical barrier before Lake Michigan, FWS led a Congressional briefing on the 2017 Asian Carp Monitoring and Response Plan and the Upper Illinois Waterway Contingency Response Plan.

IV. NEXT STEPS/ OUTLOOK

- Deliver WRRDA 2016 Report to Congress. With OMB for clearance.
- The FY 2018 request for FWS's Asian carp effort is $7,885,000.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Bergman, Westerman, Gosar, Cochran, Leahy
ISSUE: Cormorant Depredation of Fish in Southeast, Northeast, and Midwestern States

I. ISSUE BACKGROUND

- Double-crested cormorants are fish-eating birds that are protected under the Migratory Bird Treaty Act (MBTA). The MBTA prohibits the take (killing, capture, selling, trading, transport, etc.) of protected migratory bird species without prior authorization.
- Cormorants congregate in the southern states in the fall and winter, where they impact aquaculture facilities. In the spring and summer, cormorants congregate in northern states where they are perceived to be a competitor to fishermen for wild free-swimming fish.
- In May 2016, the U.S. District Court for the District of Columbia vacated two FWS Depredation Orders that previously allowed for the lethal take of cormorants, citing inadequate NEPA documentation.

II. POSITION OF INTERESTED PARTIES

- Senate Appropriations Committee Chairman Thad Cochran and other Members representing affected southern states (AL, AR, LA, MS, NC) have urged the FWS to allow for the take of cormorants before they return to southern aquaculture facilities.
- Members from Northeast and Midwest states (MI, MN, NH, NY, VT) have urged the FWS to address cormorant impacts on wild free-swimming fish that are perceived to effect commercial and recreational fisheries in their states.

III. RECENT CONGRESSIONAL ACTIVITY

- In the 115th Congress, Rep. Crawford and Sen. Cotton introduced companion bills, H.R. 368 and S. 219, cosponsored by Members from AR, AL, MS, and NC, to address cormorant impacts on aquaculture by reinstating the FWS Depredation Order that the U.S. District Court vacated.
- The FY 2017 appropriations conference report directed the FWS to expedite NEPA documents that would allow the agency to issue cormorant depredation permits per the direction of the U.S. District Court.
- On July 22, 2017 Rep. Bergman used his time during a House Natural Resources Committee to ask Sec. Zinke to address the cormorant and wild fish issue in his district.

IV. NEXT STEPS / OUTLOOK

- FWS and USDA are completing a NEPA Environmental Assessment to evaluate options for lethal take permits for aquaculture facilities, among other circumstances, which is expected to be completed by the end of October.
- FWS will also review the science and options for lethal take permits involving cormorants and their potential damage to recreational and commercial fishing, including by working with state fish and wildlife agencies to collect and share data. This process is expected to take at least a year.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Murkowski, Bishop, Cantwell, Grijalva
ISSUE: FWS' Deferred Maintenance Backlog

I. ISSUE BACKGROUND

- Over 51 million people visited FWS hatcheries and refuges last year, including hunters, anglers, birders, and other outdoor recreationists.
- FWS real property assets include: 6,500 buildings; 8,600 water management structures; nearly 14,000 roads, bridges, and dams; and 10,500 "other" structures.
- Inadequate investments in asset maintenance have led to failing infrastructure and a deferred maintenance backlog at the FWS.
- While the FWS has reduced its backlog since 2010, a current FWS deferred maintenance (DM) backlog of approximately $1.4 billion remains.

II. POSITION of INTERESTED PARTIES

- There is congressional interest in addressing the DM backlog at the FWS, and across the Department of the Interior.
- Chairman Rob Bishop (R-UT) and other Members have taken the position that funding the Department's DM backlog should be prioritized, specifically over new land acquisition funding.
- Chairwoman Murkowski (R-AK) has emphasized public-private partnerships to address DM funding.
- Ranking Members Cantwell (D-WA) and Grijalva (D-AZ) are supportive of DM funding.

III. RECENT CONGRESSIONAL ACTIVITY

- The House Natural Resources Committee included addressing the DM backlog in the Committee's oversight plan for the 115th Congress.
- Chairwoman Murkowski's Senate Energy and Natural Resources Committee hosted staff briefings in March on the DM backlog where FWS and other Bureaus presented.
- Chairwoman Murkowski held a hearing in March on the topic of "opportunities to improve and expand infrastructure important to federal lands, recreation, water, and resources" where she highlighted addressing the Department's DM backlog.

IV. NEXT STEPS/ OUTLOOK

- The President's FY18 budget request emphasizes DM funding, requesting $41.0 million in Refuge DM and $10.2 million in Hatchery DM.
- The House-passed FY18 omnibus appropriations bill increased Refuge DM by $1.3 million to $42.3 million and added $3.0 million to Hatchery DM for a total of $13.2 million.
- Outside of the annual appropriations process, Congress and the Administration are considering a separate infrastructure package that would likely include provisions to address the FWS's and the Department's DM.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Bishop, Grijalva, Huffman, Calvert
ISSUE: Delisting/Downlisting 3-Year Plan

I. ISSUE BACKGROUND

- In order to recognize success in recovering species under the Endangered Species Act (ESA), keep the lists of endangered and threatened wildlife and plant species accurate and up-to-date, and focus conservation resources on those species most in need, the FWS reviews the status of listed species every five years, and responds to petitions received from the public to determine whether listed species should be reclassified from endangered to threatened (downlisted) or removed from the list (delisted).
- The FWS has developed a national workplan reflecting our schedule for actions addressing 5-year status review recommendations and substantive petitions to downlist and delist species over the next three years.
- The workplan was developed to provide greater clarity and predictability regarding the timing of eventual downlisting and delisting determinations to state wildlife agencies, non-profit organizations, and other stakeholders and partners.
- A species' inclusion in this workplan does not mean that a final decision has been made to downlist or delist.

II. POSITION of INTERESTED PARTIES

- There is congressional interest in focusing ESA recovery funding on activities that are inherently federal, such as 5-year reviews and status changes.

III. RECENT CONGRESSIONAL ACTIVITY

- The House FY 2018 Interior Appropriations bill contains $85,570,000 for ESA recovery activities, including $3,000,000 for delisting and downlisting activities.
- The House FY 2018 Interior Appropriations Committee Report directed the Service to complete all five-year reviews within the period required by law, and, for any determination on the basis of such review whether a species should be delisted, downlisted, or uplisted, promulgate an associated regulation prior to initiating the next status review for such species.

III. NEXT STEPS

- To keep the public informed of our progress in recovering species, the FWS plans to periodically update this work plan to reflect our consideration of new information over time, new status reviews initiated as a result of petitions, and new recommendations resulting from our 5-year reviews.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Feinstein, McCarthy, Calvert, McClintock, Denham, LaMalfa, Costa, Huffman
ISSUE: Delta Smelt, 08 Biological Opinion, California WaterFix Consultation, FISH Act

I. ISSUE BACKGROUND

- The threatened Delta smelt is a small fish endemic to the San Francisco Bay-Delta that completes its entire one-year lifecycle in and near where fresh and salt water mix in the estuary. The Bay-Delta has been altered by land use changes, water development, and invasive species, reducing the amount of high quality habitat available for Delta smelt.
- Record-low abundance of Delta smelt reflects decades of habitat change, competition and predation from invasive species, and the recent multi-year drought.
- In 2008, FWS issued a jeopardy Biological Opinion (BiOp) on the operation of the Central Valley Project and State Water Project. FWS included a Reasonable and Prudent Alternative (RPA), affecting the amount of water that can be used from the system, to avoid jeopardy and adverse modification, which remains in place today.
- The WaterFix project represents the State of California's plan to upgrade outdated infrastructure in the Delta to secure water supplies and improve the Delta's ecosystem. FWS finalized the WaterFix BiOp in June 2017.

II. POSITION of INTERESTED PARTIES

- Water export restrictions to protect Delta smelt are opposed by agricultural and municipal water users, but supported by environmental groups and fishing interests.
- WaterFix is supported by a number of agricultural and municipal interests and the State of California, but opposed by many environmental groups (who have filed litigation challenging the WaterFix BiOp) and local landowners. The Westlands Water District Board recently voted against participating in WaterFix stating that the project is not financially viable.

III. RECENT CONGRESSIONAL ACTIVITY

- FWS is working with partners to implement the requirements contained in the 2016 WIIN (Water Infrastructure Improvements for the Nation) Act, which contained a requirement to develop and expand captive breeding capability.
- In October 2017, Congressmen Calvert, LaMalfa, and others introduced the Federally Integrated Species Health (FISH) Act to consolidate management and regulation of the Endangered Species Act (ESA) with the FWS. This would essentially transfer authority over ESA-listed marine mammals and anadromous fish, such as salmon, from the National Marine Fisheries Service to FWS.

IV. NEXT STEPS/ OUTLOOK

- In August 2016, a multi-year process, led by Bureau of Reclamation with federal and state partners, began to develop a new BiOp to find balance between the needs of agriculture, municipalities and conservation.
- FWS approved Reclamation's proposal to modify implementation of RPA Action 4 from the 2008 BiOp in October 2017, which is intended to maintain the low salinity zone in specific locations in the estuary during the fall in wet and above normal water years.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Bishop, McClintock, Pearce, Grijalva, Tsongas, Beyer, Huffman
ISSUE: ESA Reform and Legislation

I. ISSUE BACKGROUND

- In this Congress, the EPW Committee and HNR Committee have expressed an interest in moving legislation that would amend the ESA, and have held related oversight hearings.
- Hearings and oversight in the 114th Congress centered on the role of litigation and settlements, use of data, transparency in decision-making, policies for designating critical habitat, and barriers to recovery.
- FWS is participating in a multi-year process led by the Western Governors' Association (WGA) to examine species conservation and the ESA and to identify actions to improve the statute or its implementation.

II. POSITION of INTERESTED PARTIES

- Last June, the WGA passed a resolution urging Congress to reauthorize the ESA, including several principles to reform the law.
- This March, the National Governor's Association adopted a policy similar to the WGA.
- The Association of Fish and Wildlife Agencies has participated in discussions on ESA reform, including an April EPW staff briefing with other state officials.
- Chairman Bishop (R-UT-1) has expressed strong interest in reforming the ESA.
- Ranking Member Grijalva (D-AZ-3) is opposed to reforming the ESA.

III. RECENT CONGRESSIONAL ACTIVITY

- H.R. 3916 (Calvert: R-CA) – Would transfer management of ESA-listed anadromous fish (salmon, sturgeon, etc.) from NOAA Fisheries to FWS. HNR Subcommittee legislative hearing is scheduled for Oct. 12. DOI statement for the record supports the bill.
- FWS Principal Deputy Director Greg Sheehan testified in July before HNR generally in support of 5 bills to amend the ESA. All 5 bills passed out of HNR on Oct. 4.
    - H.R. 424 – Gray Wolf State Management Act (Peterson: D-MN) – Reinstates delisting of Western Great Lakes and WY wolves.
    - H.R. 717 – Listing Reform Act (Olson: R-TX) – Requires economic analysis at listing for threatened species, gives flexibility to prioritize petitions, removes 90-day and 12-month deadlines.
    - H.R. 1274 – State, Tribal, and Local Species Transparency and Recovery Act (Newhouse: R-WA) – Requires data transparency, requires all data be provided to states prior to listing, defines best available data to include state & local.
    - H.R. 2603 – Saving America's Endangered Species (SAVES) Act (Gohmert: R-TX) -- Nonnative species in U.S. not considered listed under ESA.
    - H.R. 3131 – Endangered Species Litigation Reasonableness Act (Huizenga: R-MI) – Would tie ESA fee awards to EAJA cap of $125/hr

IV. NEXT STEPS/ OUTLOOK

- The WGA issued recommendations for ESA reform over the summer.
- We anticipate continued oversight and legislative activity from HNR and EPW regarding ESA implementation and modernization.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Bishop, Lamborn, Labrador, Tipton, Cheney, Barrasso, Risch, Daines, Calvert, Stewart, Simpson, Amodei, Lee
ISSUE: Greater sage-grouse

I. ISSUE BACKGROUND

- In 2010, FWS made the greater sage-grouse a candidate for listing under the Endangered Species Act. In response, the Bureau of Land Management (BLM) and Forest Service (USFS) worked with the states to develop a land use strategy to conserve and restore sagebrush habitat across the species' range.
- In 2015, citing the federal land use strategy and associated rangeland fire strategy, along with state and private lands conservation efforts, FWS determined that the greater sage-grouse was not warranted for listing under the ESA.
- The 2015 "not warranted" finding included a commitment to revisit the status of the species in 5 years, a commitment made to strengthen the defensibility of that finding.
- FWS and a coalition of public and private partners, particularly the states, have built a durable, collaborative effort to conserve sagebrush-dependent species, avoid future listing of those species, and secure a healthy sagebrush ecosystem for people and wildlife.
- BLM and USFS amended or revised nearly 100 resource and land management plans to improve protections for sage-grouse and sagebrush habitat.
- All states have sage-grouse plans; some interface seamlessly with the federal plans. States have management responsibility for the species and are leading the larger effort to proactively conserve the larger sagebrush ecosystem.
- In August 2017, Secretary Zinke received a report from the Department's Sage-Grouse Review Team regarding possible plan and policy modifications to complement state efforts to improve greater sage-grouse conservation and economic development on public lands, as required by Secretarial Order 3353.

II. POSITION of INTERESTED PARTIES

- Some conservation groups were critical of the FWS' not-warranted determination; others were highly supportive.
- Some industry and trade groups have filed litigation opposing the federal plans.

III. RECENT CONGRESSIONAL ACTIVITY

- In the 115th Congress, legislation seeks to provide state management over federal land management plans and delay future action to list the sage-grouse. Sponsors include Sens. Risch (R-ID), Lee (R-UT), and Daines (R-MT) and Reps. Simpson (R-ID), Amodei (R-NV), Gosar (R-AZ), Stewart (R-UT), Tipton (R-CO), and Cheney (R-WY).
- The FY17 Omnibus appropriations bill bars FWS from expending any funds for status reviews, listing determinations, or rulemakings regarding the greater sage-grouse.

IV. NEXT STEPS/ OUTLOOK

- FWS will continue to provide technical assistance to public and private partners as they implement sage-grouse conservation measures. FWS will also continue to support collaborative efforts to conserve the larger sagebrush ecosystem.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Tester, Daines, Simpson, McCollum, Barrasso, Risch, Labrador, Cheney, Grijalva, Newhouse
ISSUE: Grizzly Bears

I. ISSUE BACKGROUND

- In 1975, FWS listed the grizzly bear as threatened in the lower 48 states.
- FWS organizes grizzly bears into six recovery zones/ecosystems to allow for targeted recovery efforts. Recovery zones include parts of WA, ID, MT, and WY.
- In March 2007, FWS finalized a rule to establish the Greater Yellowstone Ecosystem grizzly bear distinct population segment (DPS) and to delist this DPS due to recovery. Courts overturned this rule in 2009, reinstating ESA protections for Yellowstone bears.
- In June 2017, FWS published a new final rule to delist the Yellowstone DPS. The rule does not change the threatened status of the remaining grizzly bears in the lower 48 states. FWS has received several complaints from environmental groups and tribal interests challenging the rule.
- In early 2017, the National Park Service and FWS published a draft Environmental Impact Statement on alternatives to restore grizzly bear in the North Cascades Recovery Unit. Alternatives range from no action to the establishment of a population of grizzly bears in the North Cascades Ecosystem.

II. POSITION of INTERESTED PARTIES

- Most members of Congress and federal and state agencies supported the delisting of the Yellowstone grizzly bear DPS.
- Tribes had varying opinions regarding delisting and some had strong opposition to delisting grizzly bears in the Yellowstone ecosystem.
- Several environmental groups have been outspoken in their opposition to delisting.

III. RECENT CONGRESSIONAL ACTIVITY

- Senators Daines (R-MT), Barrasso (R-WY), Enzi (R-WY), Rep. Cheney (R-WY), and House Natural Resources Chairman Bishop (R-UT) issued statements supporting the final delisting of the Yellowstone grizzly bear.
- Rep. Grijalva (D-AZ-3) opposed delisting, citing tribal rights and hunting concerns.
- Rep. Newhouse (R-WA-4) has expressed opposition to potential restoration of grizzly bears in the North Cascades. His office remains engaged with FWS on the issue.

IV. NEXT STEPS/ OUTLOOK

- The comment period on the North Cascades draft EIS closed in April 2017. Next steps include analyzing comments, developing a final EIS, and issuing a Record of Decision.
- In August 2017, in regards to delisting wolves in the Western Great Lakes, a court ruled that FWS failed to reasonably analyze or consider: (1) the impacts of partial delisting; and, (2) historical range loss on the already listed species. FWS will pursue any future proposals to delist a grizzly bear DPS in the context of that ruling. This is most relevant to the Northern Continental Divide Ecosystem recovery zone in northern Montana.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Frelinghuysen
ISSUE: Highlands Conservation Act

I. ISSUE BACKGROUND

- The Highlands Conservation Act (HCA) was enacted in 2004 to provide assistance to States to preserve and protect high quality conservation land in the 3.4 million acre Highlands region of New York, New Jersey, Pennsylvania and Connecticut.
- The program was first funded in 2007. The program also received funding in 2008, 2009, 2010, 2012, 2015, 2016, and 2017.
- In FY 2016, Congress increased the appropriation "up to $10 million," and included administrative funding to the FWS, which had not been provided in several years. FWS works with the U.S. Forest Service and the four states to identify projects that meet the intent of the law to conserve important habitat in the Highlands region.
- To date, more than $26 million in Federal funds has been allocated to the four states for land acquisition. These funds have resulted in the permanent protection of over 6,200 acres and leveraged non-Federal funds at a nearly 3:1 ratio.
- Funding for the program comes from the Land and Water Conservation Fund.
- There is no funding for Highlands in the FY 2018 President's Budget.

II. POSITION of INTERESTED PARTIES

- The Highlands Coalition is comprised of more than 200 national, regional, state and local organizations that work collaboratively with state agencies, the U.S. Forest Service and FWS to implement critical conservation in the Highlands region. This broad coalition has yielded sustained congressional support.
- House Appropriations Interior Subcommittee Chairman Frelinghuysen is a champion of the program which also has bi-partisan support across all four states.

III. RECENT CONGRESSIONAL ACTIVITY

- Chairman Frelinghuysen introduced H.R. 1281(S. 1627, Sen. Gillibrand [D-NY]) to reauthorize the law through 2021. No Congressional action has been taken to date.

IV. NEXT STEPS

- FWS is working with the U.S. Forest Service on a Memorandum of Understanding to solidify roles and responsibilities for administering the grant program.
- August 2017: FWS announced funding distribution of $2,420,000 to each of the four states. Announcements of funding to states were sent to Congressional offices.
- The 2018 President's Budget did not include funding for Highlands.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Murkowski, Young
ISSUE: Izembek National Wildlife Refuge and King Cove Road

I. ISSUE BACKGROUND

- This issue centers on construction of a road through wilderness areas of the Izembek Refuge to provide access to an all-weather airport for the community of King Cove, AK.
- Congress previously appropriated funds to upgrade the local medical clinic, improve the King Cove airstrip, and enhance a marine transportation link between the communities of King Cove and Cold Bay.
- The Omnibus Public Land Management Act of 2009 directed the Secretary to develop an EIS to evaluate a three-party land exchange between the federal government, the State of Alaska, and the King Cove Corporation for the purpose of constructing a road between King Cove and Cold Bay, which has an existing all-weather airport.
- As part of the proposed land exchange, about 56,000 acres owned by the State and King Cove Corporation would be transferred to the Izembek and Alaska Peninsula Refuges.
- The proposed King Cove road would cross designated wilderness in the Izembek Refuge, potentially creating adverse impacts to high value habitat.
- In December 2013, as required by the 2009 law, former Interior Secretary Jewell issued a final decision that found the land exchange was not in the public interest.

II. POSITION of INTERESTED PARTIES

- The Alaska Congressional Delegation strongly supports the road and land exchange.
- The communities of King Cove and Cold Bay support the land exchange and road.
- Wilderness and environmental groups strongly oppose a road due to the impacts to fish and wildlife habitat.
- Some Alaska Natives and subsistence users in the Yukon Delta also oppose the road.

III. RECENT CONGRESSIONAL ACTIVITY

- Senator Murkowski included policy language in the FY16 and FY17 Interior-Environment appropriations bills that would require a land transfer at Izembek. The language was not ultimately included in the final FY16 or FY17 appropriations bills.
- At the time of drafting, the FY18 Senate appropriations bill was not yet released.
- This year, bills were introduced by Sen. Murkowski (S. 101) and Rep. Young (H.R. 218) to provide a land exchange for the construction of a road between the two communities. H.R. 218 passed the House on July 20, 2017.

IV. NEXT STEPS/ OUTLOOK

- Next steps depend on whether the land exchange is with the State of Alaska or Native Corporation. For example, if land is exchanged with the Native Corporation, the Alaska Native Claims Settlement Act (ANCSA) Section 22(g) and its implementing regulation, 50 CFR 25.21, stipulates that Alaska Native Village Corporation lands within the boundaries of a National Wildlife Refuge established prior to ANCSA are subject to National Wildlife Refuge System compatibility requirements. If land is exchanged with the State of Alaska, then a National Environmental Policy Act EIS is likely required, unless new statute dictates otherwise.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Gohmert, Westerman, Johnson, Denham, and Tsongas
ISSUE: D.C. Circuit Decision on FWS Interpretation of Lacey Act Interstate Transport Prohibition

I. ISSUE BACKGROUND

- Under the Lacey Act (18 U.S.C. §42), the Secretary of the Interior is authorized to regulate the importation and transport between the continental U.S., the District of Columbia, Hawaii, Puerto Rico, or any other territory of the U.S., of species determined to be injurious to human beings, the interests of agriculture, horticulture or forestry, or to wildlife or wildlife resources of the U.S. FWS has long interpreted the language related to shipment of injurious species to prohibit transportation of injurious species between states within the continental U.S.
- The U.S. Association of Reptile Keepers (USARK) filed a lawsuit in December 2013 challenging FWS authority. The District Court for the District of Columbia found that 18 U.S.C. § 42(a)(1) does not prohibit interstate transport of injurious wildlife between states within the continental U.S. and enjoined FWS from implementing that provision with respect to two species at issue in the litigation. FWS appealed this decision.
- On April 7, 2017, the U.S. Court of Appeals for the District of Columbia Circuit affirmed the District Court's judgment and held that FWS lacks authority pursuant to the Lacey Act to prohibit shipments of injurious species between states within the continental U.S.

II. POSITION of INTERESTED PARTIES

- Aquaculture and live animal trade industries have expressed support for the Appellate Court's decision.
- The Association of Fish and Wildlife Agencies has concerns regarding the FWS losing its ability to regulate the interstate transport of injurious species between States within the continental U.S.
- Senator Gillibrand (D-NY) has an interest in revising the injurious species listing process

III. RECENT CONGRESSIONAL ACTIVITY

- Rep. Gohmert (R-TX-1) introduced HR 1807 - Public Water Supply Invasive Species Compliance Act of 2017 (companion bill in the Senate, S. 789 sponsored by Sen. Cruz (R-TX)), exempting certain water transfers between public water supplies located on, along, or across the boundaries of Texas, Arkansas, and Louisiana from the Lacey Act. Reps. Westerman (R-AR-4) and Mike Johnson (R-LA-4), who are on the House Natural Resources Committee, are co-sponsors. The bill was passed out of committee.
- October, 2017: Senator Gillibrand (D-NY) had a press conference on the emerald ash borer beetle in the Adirondacks, mentioning the injurious species listing process. Gillibrand has previously introduced legislation to reform this process. Reintroduction of this legislation is likely to occur this session; but, it has not yet happened.

IV. NEXT STEPS/ OUTLOOK

- FWS did not seek additional appeals and as a result of this decision the FWS may no longer place any limitation on transport of injurious wildlife across the 49 continental states

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Gardner, Cole, Calvert, Gohmert, Pearce, Tipton
ISSUE: Lesser Prairie-Chicken

I. ISSUE BACKGROUND

- In April 2014, FWS listed the lesser prairie-chicken as threatened under the Endangered Species Act (ESA) and concurrently finalized a special rule under section 4(d) of the ESA that established compliance with the State-led Range-wide Conservation Plan as also being ESA compliant.
- In June 2014, the Permian Basin Petroleum Association and four New Mexico counties filed a lawsuit challenging the FWS's final rule to list the lesser prairie-chicken. Separate lawsuits were filed by other plaintiffs, including environmental groups.
- In September 2015, a U.S. District Court ruled on the Permian Basin lawsuit and vacated the FWS's listing rule. The Government decided not to appeal.
- Prior to the 2015 court ruling, FWS began work on a species status assessment for the lesser prairie-chicken, with input from the five range states. The goal of the status assessment was to synthesize the best available science to inform recovery planning and conservation actions.
- In September 2016, FWS was petitioned to list the lesser prairie-chicken as endangered. FWS found the petition to be substantial. The status assessment will also serve to inform the 12 month finding on that petition.

II. POSITION of INTERESTED PARTIES

- The Western Association of Fish and Wildlife Agencies (WAFWA), in partnership with New Mexico, Colorado, Kansas, Oklahoma and Texas, created *The Lesser Prairie-Chicken Range-wide Conservation Plan* to develop a conservation and mitigation strategy for the species. FWS will incorporate WAFWA's 2016 Annual Report into the status assessment, along with 2017 population survey results.
- Several Members of Congress disagreed with FWS's 2014 decision to list the lesser prairie-chicken under the ESA.

III. RECENT CONGRESSIONAL ACTIVITY

- In the 114th Congress, Rep. Lucas (R-OK) filed an amendment to the House National Defense Authorization Act (NDAA) to prohibit listing the bird under the ESA; the amendment was withdrawn. Similar language was included in other NDAA amendments, appropriations bills, and a standalone bill.
- There has been no relevant legislation introduced in the 115th Congress.

IV. NEXT STEPS/ OUTLOOK

- FWS anticipates completing the status assessment in 2017, though exact timing depends on recommendations and comments received from peer and Working Group reviewers. The status assessment will inform future decisions related to the bird. Coordination with the States, WAFWA and others is expected to continue.
- FWS did not meet the deadline for the 12-month finding on the petition to list (September 8, 2017). The finding is expected after completion of the status assessment and will fully consider the conservation actions underway.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Murkowski, Simpson
ISSUE: FWS Mitigation Policy Status

I. ISSUE BACKGROUND

- The FWS has used a mitigation policy since 1981 to guide agency recommendations on mitigating the adverse impacts of land and water development projects on fish, wildlife, plants, and their habitats.
- In 2016, FWS finalized revisions to the 1981 policy. Notably, the scope of the revised policy expanded to address all resources for which FWS has authority to require or recommend mitigation, including those listed under the Endangered Species Act (ESA).
- In December 2016, the FWS finalized the ESA compensatory mitigation policy, a more detailed, ESA-specific stepdown of the revised Service-wide mitigation policy.
- These policies were consistent with the Presidential Memorandum entitled *Mitigating Impacts on Natural Resources from Development and Encouraging Related Private Investment* (PM) (November 3, 2015) and with Secretarial Order 3330, *Improving Mitigation Policies and Practices of the Department of the Interior* (October 31, 2013).
- A March 28, 2017, Executive Order (EO) rescinded the 2015 PM and directed all agencies to identify affected agency actions (including existing regulations, orders, and policies) and, as appropriate, suspend, revise, or rescind them.
- Sec. Order (SO) 3349 (March 29, 2017) implements the March 2017 EO. It revoked SO 3330 and required the Deputy Secretary to inform the Bureaus whether to proceed with reconsideration, modification, or rescission of actions related to the PM or SO 3330.

II. POSITION of INTERESTED PARTIES

- Sen. Murkowski (R-AK) strongly opposed the 2016 revised mitigation policy and sent a letter to former FWS Director Ashe urging him to retract it, expressing concern about its standard and the impact of the policy on smaller entities, such as Alaska Native communities, who want to develop resources on their lands.
- At a March 2016 Senate Energy and Natural Resources Committee hearing, the State of Alaska expressed concerns with the PM and requested its revision to incorporate the Alaska Native Settlement Claims Act and Alaska National Interest Lands Conservation.
- Response from State agencies varied; FWS received comments from States both supporting and expressing concerns with the policies.
- In some cases, industry had concerns that the policies were an attempt to create new authority for FWS.

III. RECENT CONGRESSIONAL ACTIVITY

- Rep. Newhouse (R-WA) introduced two resolutions to disapprove the two FWS mitigation policies through the Congressional Review Act (CRA), but no further action has been taken on them.

IV. NEXT STEPS

- Consistent with SO 3349, this October, FWS will solicit public comment on the policies. Based on comments received, FWS will contemplate next steps on the policies.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: McCollum, Udall, Feinstein, Stewart, Bishop
ISSUE: Southwest Border Law Enforcement and Conservation Issues

I. ISSUE BACKGROUND

- There are eight National Wildlife Refuges along the U.S.-Mexico border, three in Texas, two in California and three in Arizona. FWS has 18 Federal Wildlife Officers (FWO) that cover these refuges.
- Santa Ana National Wildlife Refuge sits along the U.S.-Mexico border in Texas, and has been identified as a location for early preparations for border wall construction. The Refuge has been visited this year by Senator Cornyn's (R-TX) staff and Representative O'Rourke (D-TX-16). Senator Cruz (R-TX) has expressed an interest in visiting the refuge as well.
- The FWOs at border refuges provide safety and security for visitors and protect fish, wildlife, cultural, and archaeological resources. Additionally, working closely with DHS, they address border issues that spill onto refuges, including drug and human trafficking and fatalities of undocumented immigrants.
- These refuges also face increased habitat degradation from significant amounts of human trash and waste left on site, escaped camp fires, sewage spills, and trail and road erosion. Additional trash is generated on Arizona border refuges by humanitarian organizations who, contrary to refuge regulations, leave stock piles of food, water, and clothing for illegal border crossers.
- Many native animals, like pronghorn antelope and ocelots, migrate across the Southwest border; physical barriers could also affect movement of wildlife and could affect surface water movement, causing local flooding.
- Sec. 102. of the REAL ID Act (P.L. 109-13), signed into law in 2005, gives the Department of Homeland Security authority to waive most environmental laws, including NEPA and the ESA, to ensure expeditious construction of barriers and roads.

II. POSITION of INTERESTED PARTIES

- Some Congressional Members have expressed concern about the cost of expanding and maintain a wall along the border, and the impact it may have on species and habitat in the area, as well as the impact on public lands, including National Wildlife Refuges.
- Other Members have explained how effective border security protects the environment by deterring illegal activity and border crossings.

III. RECENT CONGRESSIONAL ACTIVITY

- On October 4, the House Homeland Security Committee passed the Border Security for America Act (H.R. 3548), which includes a $10 billion authorization for construction of a U.S.-Mexico border wall.
- On July 27, the House passed the Make America Secure Appropriations Act of 2018 (H.R. 3219), which includes $1.6 billion in funding for construction of the border wall.

IV. NEXT STEPS/ OUTLOOK

- Congress will continue to debate funding for the border wall.
- The President's FY18 budget request includes $1.6 billion for border wall construction.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Senator Murkowski (R-AK), Representative Don Young (R-AK-AL)
ISSUE: Alaska Native-Crafted Walrus Ivory

I. ISSUE BACKGROUND

- In 2016, FWS finalized regulations to prohibit most commercial domestic trade in African elephant ivory. Also, several states (including California, New Jersey, Hawaii, and Nevada) have taken steps to ban the intrastate purchase and sale of ivory (some including walrus and other types of ivory). Some state ivory bans have provisions that exempt items expressly authorized by federal law, license, or permit. At least 8 more states are considering such measures.
- Alaska Native artists are expressing concern to the Alaska Congressional delegation about loss of sales, because consumers are nervous about buying ivory and confusion over federal and state laws governing the sale of ivory.
- The U.S. does not prohibit the sale, purchase, import, export, or transport of genuine, Alaska Native-crafted walrus ivory pieces, and these may be brought into the lower 48 states by individual consumers or shipped to retail stores.
- In May of 2017, DOI announced the release of a brochure, coordinated by DOI's Indian Arts and Crafts Board (Board) and FWS to inform consumers and Alaska Native artists about walrus conservation, relevant laws, and how law enforcement recognizes walrus ivory and distinguishes it from elephant ivory.
- This brochure is being distributed online, through DOI venues, and has been offered to cruise lines and other tourism outlets. Related advertisement has also been published.
- FWS ensures its law enforcement officers are fully knowledgeable about identifying elephant vs. walrus ivory during inspections of imports and exports.
- FWS also works closely with the Board to investigate and pursue cases of counterfeit Native arts and crafts that violate the Indian Arts and Crafts Act, including several in AK.
- On October 4, 2017, the Service announced a "not warranted" finding for listing of walrus under the ESA.

II. POSITION of INTERESTED PARTIES

- The Alaska delegation has expressed concern about the impact of the elephant ivory ban and state ivory bans on the sales of genuine Alaska Native-crafted walrus ivory.
- Members are pleased with the efforts of FWS and the Board to inform consumers and artists about the importance of Native American arts and crafts, and the legality of the sale of Alaska Native-crafted walrus ivory, as well as our efforts to enforce the Indian Arts and Crafts Act.

III. RECENT CONGRESSIONAL ACTIVITY

- This issue was raised by Senator Murkowski during the June 21, 2017 Senate Interior Appropriations hearing for FY 2018.
- FWS and the Board have met on this issue with staff of the three AK delegation offices.

IV. NEXT STEPS/ OUTLOOK

- The Department will continue to work to increase awareness and provide best information about relevant Federal laws.
- During the FY 2018 Senate Interior appropriations hearing, the Secretary committed to a Secretarial Order and to convene a working group on the matter.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Young, Grijalva, Beyer, Flake, Portman, McCollum, Udall
ISSUE: Combating Wildlife Trafficking

I. ISSUE BACKGROUND

- FWS (via DOI) is a co-chair, along with the State Department and Department of Justice, of the interagency Task Force on Wildlife Trafficking.
- In 2016, Congress passed the bipartisan, bicameral END Wildlife Trafficking Act, which codified the Task Force, National Strategy, and Implementation Plan, and included additional requirements of federal agencies.
- In 2016, FWS finalized regulations to prohibit most commercial domestic trade in African elephant ivory. Exemptions for antiques and items containing small amounts of ivory were included to allow for the continued trade in items that do not impact conservation of African elephants.
- In February 2017, the President signed an Executive Order on Transnational Organized Crime, which states the U.S. shall address threats to national security from transnational criminal organizations involved in a variety of activities, including wildlife trafficking.
- FWS has stationed law enforcement special agents at U.S. embassies as international attachés to address wildlife trafficking in key nations.

II. POSITION of INTERESTED PARTIES

- Combating wildlife trafficking has strong bipartisan support in Congress.
- Several Members of Congress are also supportive of FWS' broader international conservation and wildlife law enforcement work.
- Some Members have sought to limit FWS authority to restrict elephant ivory trade.

III. RECENT CONGRESSIONAL ACTIVITY

- In the 115th Congress, there have been several bills introduced that address wildlife trafficking and international conservation, including:
    - H.R. 227, sponsored by Rep. Young (R-AK-AL) reauthorizes the Multinational Species Conservation Funds (Funds).
    - H.R. 1247, sponsored by Rep. Donovan (R-NY-11), and S. 480, sponsored by Sen. Portman (R-OH), reauthorize the Tiger Stamp.
    - S. 826, sponsored by Sen. Barrasso (R-WY), reauthorizes the Funds and creates a prize competition to address wildlife trafficking.
    - H.R. 226, sponsored by Rep. Young (R-AK-AL), would allow for the commercial trade of African elephant ivory.

IV. NEXT STEPS/OUTLOOK

- The Task Force continues to implement the END Wildlife Trafficking Act. FWS and State have taken the lead in developing a list of countries of concern due to wildlife trafficking. This list will be included in a report due to Congress in early October.
- We expect less focus on wildlife trafficking issues in this Congress given the passage of the END Wildlife Trafficking Act in the 114th Congress. However, there are still Members who are focused on this issue who will pursue events, briefings, and additional legislation.
- In FY 2018, the Service requests $8.9 million specifically dedicated for combating wildlife trafficking.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Barrasso, Flake, Heinrich, Gardner, Stabenow, Franken, Wyden, Merkley, Udall, McCollum, Stewart, Pearce, Gosar, Bishop, Tipton, Bergman, Cheney, Rouzer
ISSUE: Wolves

I. ISSUE BACKGROUND

- FWS believes the wolf is recovered under the ESA, and has attempted to delist it nationwide, except for the Mexican wolf and the red wolf subspecies.
- In 2014, final rules delisting **Gray wolves** in Wyoming and in the Western Great Lakes (WGL) were vacated by separate District Court judges; ESA protections were reinstated for these populations. FWS appealed both of these rulings.
- In March 2017, a court ruled in favor of FWS delisting WY wolves and, in April, the FWS reinstated its previous Wyoming delisting rule.
- In August 2017, a court ruled against FWS delisting of WGL wolves; Wolves remain federally endangered in WI and MI and threatened in MN.
- Wolves are under state management in eastern WA and OR, but wolves in the western portions of those states remain endangered, limiting management options.
- In January 2015, FWS separately listed the **Mexican wolf** as endangered and revised regulations for the nonessential experimental population under ESA section 10(j).
- In 2016, New Mexico sued FWS to enjoin release of Mexican wolves without state permits. An injunction was issued, but vacated upon appeal in April 2017. FWS is reviewing comments on the draft revised recovery plan for the Mexican wolf subspecies.
- **Red wolves** are listed as endangered and exist in the wild as a non-essential, experimental population (NEP) in eastern NC. In September 2016, after a review of the red wolf recovery program, FWS announced plans to propose changes to the NEP management, expand the captive population, and revise the recovery plan.

II. POSITION of INTERESTED PARTIES

- The environmental community largely opposes actions to lessen protections for wolves.
- States support efforts to delist wolves, and to prevent and compensate for depredation.

III. RECENT CONGRESSIONAL ACTIVITY

- 115th Congress Legislation: S. 368, Requires revised recovery plan for Mexican wolves (Sen. Flake); S. 164 and H.R. 424, Reinstates FWS final rules delisting wolves in Wyoming and WGL (Sen. Barrasso and Reps. Cheney, Labrador, Simpson, Bergman). Similar language is included in sportsmen's legislation and the House appropriations bill.
- In July 2017, FWS Principal Deputy Director Sheehan testified in support of H.R. 424.
- In the 114th Congress, the House Natural Resources Committee held an oversight hearing on Federal management of gray, Mexican, and red wolves.
- Rep. Newhouse sought to delist wolves in OR, WA, UT, and NV in the 114th Congress.

IV. NEXT STEPS/ OUTLOOK

- FWS is examining next steps for gray wolf management, in light of WGL court ruling.
- FWS will revise the recovery plan for Mexican wolves by the end of November 2017.
- FWS will soon initiate a NEPA evaluation of revisions to the NEP for red wolves in NC.

BUREAU: U.S. Fish and Wildlife Service (FWS)
MEMBER: Daines, Tester, Merkley, Kilmer, Simpson
ISSUE: Dreissenid Mussel Discovery in Montana near Columbia River Headwaters

I. ISSUE BACKGROUND

- Zebra mussels and quagga mussels (Dreissenids) have since spread throughout the Great Lakes region, south along the Mississippi River and to areas west of the Mississippi. In January 2007, the first population of Dreissenid mussels west of the 100th Meridian was discovered in Lake Mead. Both species are easily spread between water bodies by watercraft, and cause damage to water-based infrastructure that is estimated to be in the hundreds of millions of dollars.
- In October 2016, Dreissenids (microscopic larvae called veligers) were detected for the first time in the upper Missouri River Basin in Montana, near the headwaters of the Columbia River.

II. POSITION of INTERESTED PARTIES

- The Montana Governor has declared an environmental disaster. The Idaho legislature and governor responded by enacting emergency state supplemental funding.
- The Montana Legislature called for development of the Upper Columbia Conservation Commission to address threats of Dreissenid mussels. DOI bureaus have been asked to participate.

III. RECENT CONGRESSIONAL ACTIVITY

- The QZAP was developed by the Western Regional Panel and approved by the ANSTF in 2010, and is the Department of Interior (DOI) roadmap for this issue. The FWS works with other DOI Bureaus, the U.S. Army Corps of Engineers, States, and partners to support boat inspection and decontamination, early warning systems, and training.
- Congress has appropriated approximately $2 million per year since FY 2010 to support this effort.

IV. NEXT STEPS

- The FWS Region 6 dive team specializes in Dreissenid mussel detection. They deployed to both Canyon Ferry and Tiber Reservoirs in Montana as well as the Columbia River Basin Team rapid response test exercise in Washington.
- In FY16 and FY 17, FWS allocated about $930,000 each year to partners through grants for projects to control the spread of invasive mussels in the western U.S. under the *Quagga-Zebra Mussel Action Plan for Western U.S. Waters* (QZAP), with emphasis on containment and prevention. FY 2018 Budget Request included $2 million for support.
- FWS delivers $1 million of the QZAP funding to states and regional groups with Aquatic Nuisance Species (ANS) plans which have been signed by the respective governor and approved by the ANS Task Force (ANSTF). In FY17, each approved plan was awarded $46,715. Montana received an additional $16K from FWS R6 to support veliger detection.
- July 2017: DOI announced the "Safeguarding the West from Invasive Species" package to address the Columbia River Basin and other uninfested Western waters, to help better integrate government efforts to stop the spread of invasive mussels.
