Subject: Maps of refuges on the Texas-Mexico border

Hi Lora,

Here is the response to your earlier inquiry received on February 5 and we apologize for the delay.

Per your request, attached are maps of the La Parida Banco Tract and the El Morillo Banco Tract of the Lower Rio Grande Valley National Wildlife Refuge located on the Texas-Mexico border. Please note that there is a preexisting levee easement held by the International Boundary and Water Commission, indicated in red on the attached maps. Where it crosses National Wildlife Refuge System administered lands, such easement existed prior to these tracts being acquired and added to the Refuge System.

Questions regarding the type of construction and timing are not determined by or within the authorities of the U.S. Fish and Wildlife Service, and we suggest contacting U.S. Customs and Border Protection (CBP) to address these types of questions. Here is a congressional affairs contact at CBP: (b) (6)(b) (6) - (b) (6)(b) (6)(b) (6)(b) (6) . This public CBP press release may also be helpful to your inquiry.

Attachments:

- Map 1 – Overview map of US-Mexico border
- Map 2 – Zoomed-in map of refuge tracts in Southeastern Texas
- Map 3 – Satellite image with basic overlay of La Parida Banco tract, levee, and the Rio Grande
- Map 4 – Satellite image with basic overlay of El Morillo Banco tract, levee, and the Rio Grande

Please let me know if you have any further questions

Best,

Devin Helfrich

Wilcox, Chris <chris_wilcox@fws.gov>

IAA with Border Protection for SBI $1M

Fay, Gillian <gillian_fay@fws.gov> Fri, Apr 5, 2019 at 2:03 PM
To: "Mcdonald, Shane" <shane_mcdonald@fws.gov>
Cc: Chris Wilcox <chris_wilcox@fws.gov>, Tate Fischer <tate_fischer@fws.gov>

Shane,
I have the IAA between FWS and CBP attached. I've had Ketti sign for Cynthia, and I signed electronically. Could you please sign as acting for Chris, and I'll get it to CBP so they can go through their signature process.

Hopefully we get word that the 0% was approved by the Director next week and I can get the WBS set up by the time CBP is finished with the IAA.

Thanks,
Gill

since 4/4 in DTS. As a final recovery plan, this does not have a FR notice associated with it and we don't normally bring final recovery plans into HQ for review but this one is a high-profile species that touches on border wall issues.

Thanks in advance for helping us get this one over the finish line. Don't hesitate to write or call if you have any questions or follow up on anything.

DTS NOTE TO REVIEWERS

DCN: 068832

Subject: Outreach Package for Final Recovery Plan for the Jaguar

Background: The Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar. Although the vast majority of the jaguar's population in the Americas is from Mexico to Argentina, this recovery plan focuses on its range in the American Southwest and Mexico, where the United States has the most jurisdiction.

Deadline for completing surname: The Notice of Availability announcing the posting of this final recovery plan to a FWS Region 2 website is targeted for being sent to the *Federal Register* on April 11, 2019. This date is flexible.

Materials: *Outreach plan, news release, FAQs*

Special considerations:

While recovery plans are non-regulatory guidance documents, this action will likely generate significant national and international attention, stakeholder interest and controversy. The jaguar is a charismatic megafauna and its northernmost range extends across the US-Mexico border to the US Southwest. **As such, this issue involves border wall issues.** (The recovery plan for the US includes two 'border dispersal corridors' in rugged, remote areas of Arizona).

Careful messaging has been crafted and prioritized in this outreach to detail political sensitivities and how the US portion of the jaguar's historic range represents just 1/10th of 1 percent of its 19-country range. Outreach to DOI, Congress, stakeholders and media should account for the potential for controversy and misconceptions around this issue.

Service and Binational Team Complete ESA Recovery Plan for America's Largest Wild Cat

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final Endangered Species Act (ESA) recovery plan for the jaguar, currently listed under the act at endangered. The plan provides a recovery framework and goals for improving the species' status throughout its entire 19-country range while focusing on the jaguar populations in northwestern Mexico and the southwestern United States.

The final recovery plan describes two large jaguar recovery units – the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina, and the Northwestern Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. More than 99 percent of the jaguar's range is in Central and South America, so the plan recognizes that countries within the PARU will be the principal contributors to its recovery. The Service will continue to promote jaguar recovery throughout the range of the jaguar, including continued funding support.

The Service has established strong working relationships with state and local partners, conservation groups and the Mexican government. The binational recovery team has not prescribed jaguar reintroductions in the United States but calls for focusing efforts on sustaining potential habitat. In addition, the plan calls for establishing at least two borderland dispersal corridors for jaguars' continued movement through remote, rugged habitat between the countries, eliminating poaching, and improving social acceptance of the jaguar to accommodate their return to the United States.

"The binational recovery team's scientific expertise in protecting the jaguar has been invaluable," said Amy Lueders, the Service's Southwest Regional Director. "We recognize the challenges involved in conserving and recovering a species with such an expansive international range, and the team has laid out a comprehensive plan with goals that are achievable and realistic. We look forward to continuing to work with our diverse partners on this effort within and outside the United States."

Loss of habitat, direct killing of the cats, and depletion of prey are the primary factors contributing to the jaguar's current status and decreasing population trend. Due to past habitat loss, it is unlikely that jaguars will be fully self-sustaining throughout their entire historical range. However, conservation of key jaguar populations and habitat -- including core breeding and connective areas -- will be critical to jaguar recovery. We anticipate it will take a minimum of 50 years to recover the jaguar.

Since 1996, seven individual male jaguars have been documented in the United States, all in southern Arizona and southwestern New Mexico. These jaguars are believed to have come from the nearest core area and breeding population, approximately 130 miles south of the U.S.-Mexico border in Sonora.

Across the jaguar's primary range in Latin America, the Service is actively working with countries and local partners to protect and recover the cat. Conservation efforts include providing incentives for protecting jaguar habitat and prey, education campaigns addressing misinformation and fears, and providing landowners with strategies for co-existing with jaguars.

Recovery plans are not regulatory but provide a framework for recovery of a species so protection under the ESA is no longer necessary. This recovery plan includes scientific information about the species and provides recovery criteria, conservation actions necessary for its recovery and delisting from the ESA and estimates of the time and cost to carry out the measures needed to achieve the plan's goal.

To achieve delisting, viable jaguar populations must be secured throughout their range. This will require protecting jaguar habitat quality and connectivity; providing incentives to protect jaguars and their habitat; reducing human-caused mortality of jaguars, particularly retaliatory killing due to livestock depredation; improving, enacting and/or enforcing effective laws that regulate illegal killing of jaguars, jaguar prey and habitat loss; securing adequate funding to implement recovery actions; and maintaining and developing partnerships in the Americas, particularly in Mexico. These protections must remain in place after delisting to ensure the long-term viability of the species.

The binational Jaguar Recovery Team includes representatives of CONANP (National Commission of Protected Areas in Mexico), CEDES (Commission of Ecology and Sustainable Development of the State of Sonora), U.S. Department of Agriculture APHIS Wildlife Services and U.S. Forest Service, Bureau of Land Management, U.S. Border Patrol, Arizona Game and Fish Department, New Mexico Department of Game and Fish, Tohono O'odham Nation, Altar Valley Conservation Alliance, Malpai Borderlands Group, Naturalia, Panthera and several ranchers, landowners, stakeholders and universities in Mexico and the United States. Additionally, the Conservation Planning Specialist Group and the Wildlife Conservation Society contributed substantially to technical aspects of the recovery plan.

The Jaguar Recovery Plan is available at: https://www.fws.gov/southwest/es/arizona/Jaguar.htm or by request from Field Supervisor, U.S. Fish and Wildlife Service, Arizona Ecological Services Office, 9828 North 31st Avenue, #C3, Phoenix, AZ 85051–2517; phone 602/242-0210.

*The U.S. Fish and Wildlife Service works with others to conserve, protect, and enhance fish, wildlife, plants, and their habitats for the continuing benefit of the American people. Questions and Answers: Final Recovery Plan for the Jaguar

Arizona Ecological Services Field Office **www.fws.gov/southwest/es/arizona/**

For Release: [Enter date here]
Contacts: Jeff Humphrey 602-242-0210

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, America's largest wild cat. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States and recommends site-specific conservation actions that contribute to jaguar recovery across its range.

Q: What does the jaguar recovery plan tell us?

A: Reversing the decline of the jaguar is possible, but it will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States south to Argentina. The final recovery plan sets goals for improving the species' status across its range and provides a framework for aligning stakeholder efforts to achieve recovery. Critical to the recovery of the jaguar is conservation of key jaguar habitat (including core areas and connective corridors) and populations. Due to past habitat loss, it is unlikely jaguars will be fully self-sustaining throughout their entire historical range. We anticipate that it will take a minimum of 50 years to recover the jaguar.

Q: What are the primary threats to the jaguar?

A: Loss of habitat, killing of individuals and depletion of prey throughout its range are the primary reasons for decreasing populations of jaguars. The recovery plan identifies conservation activities in every country and region for addressing each of these threats. It establishes goals for minimizing threats and for establishing viable populations throughout the jaguar's expansive range.

Q: What is a recovery plan?

A: Recovery plans are not regulatory but provide a framework for recovery of a species so protection under the ESA is no longer necessary. This recovery plan includes scientific information about the species and provides recovery criteria, conservation actions necessary for its recovery and delisting from the ESA and estimates of the time and cost to carry out the measures needed to achieve the plan's goal.

Q: What are the strategies for conserving and recovering the jaguar in the final recovery plan?

A: The recovery plan describes two large jaguar recovery units: the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina, and the Northwestern Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. The plan

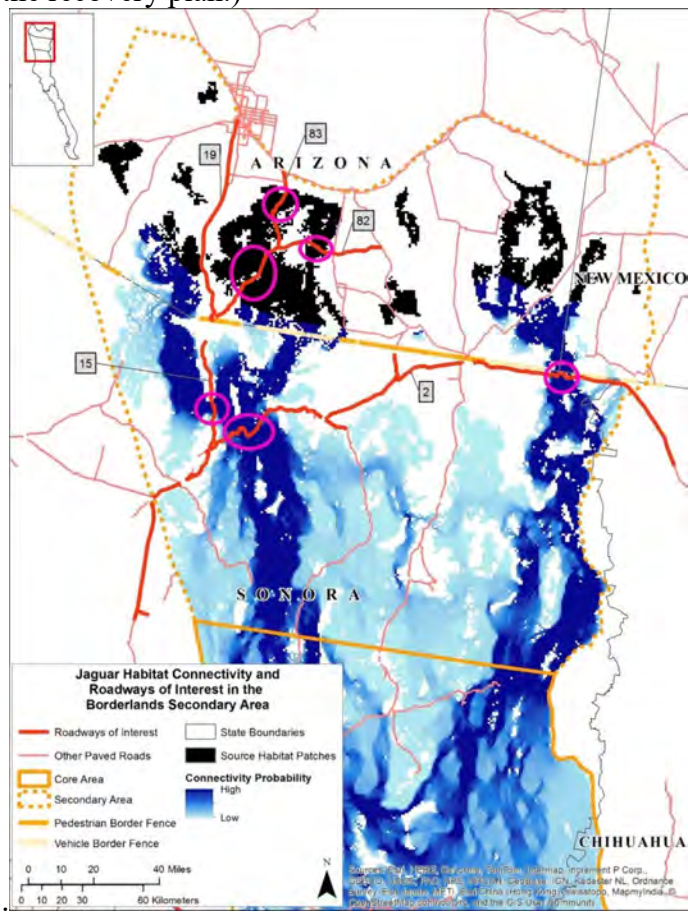
recognizes that countries within the PARU will be the principal contributors to jaguar recovery. As it has in the past, the Service will continue to promote jaguar recovery throughout the range of the jaguar.

The final recovery plan focuses on the NRU because this is where the Service has the most jurisdiction and has an established working relationship with Mexico. The NRU includes the jaguars that occupy the U.S. Southwest borderlands region. Since 1996, seven individual male jaguars have been documented in the United States (southern Arizona and southwestern New Mexico). These jaguars are believed to be expanding their range from the nearest core area and breeding population, which is approximately 130 miles south of the U.S.-Mexico border in Sonora. Recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity.

The binational recovery team has not prescribed jaguar reintroductions in the United States but focuses on efforts to sustain habitat, eliminate poaching, maintain at least two borderland dispersal corridors (see Figure 4 in the final recovery plan), and improve human social acceptance of the jaguar to accommodate jaguars that disperse into the United States.

Q: What are the borderland dispersal corridors referred to in the recovery plan and how critical are they to the recovery of jaguars in the United States?

A: Dispersal corridors are rugged, remote areas that presently male jaguars, presumably from the Sonora Core breeding area in Mexico, use to access secondary area habitat, a portion of which is in southern Arizona and New Mexico. These areas have been identified from habitat characteristics, historical records, recent sightings and photo monitoring in the United States and Mexico. (See Jaguar Habitat Connectivity and Identification of Potential Road Mitigation Locations in the NRU for the Jaguar report, as well as Figure 4 of the recovery plan.)



Continued jaguar access to habitat through transborder linkages is the sole mechanism identified in the recovery plan for continued jaguar occupation in the U.S. portion of the species' range. Maintaining this habitat connectivity is one of the recovery criteria for the Northwestern Recovery Unit. Research documents the importance of animal populations at the extremities of their ranges for the expansion and contraction of species' ranges and, ultimately, the long-term recovery of species.

These jaguar dispersal corridors are rugged and remote areas. Border interventions and operations in these areas, at present, are most practically addressed through surveillance and remote detection (electronics, towers, etc.). The U.S.-Mexico border is currently permeable to jaguar movement at these dispersal corridors. Continued work with the U.S. Customs and Border Protection (CBP) will remain important to allowing ongoing opportunities for cross-border movement of jaguars.

Q: How important is the recovery of jaguars in the United States to their overall recovery across their range?

A: The U.S. range of the jaguar represents the very northernmost edge of its 19-country range that extends all the way to South America. The U.S. range represents just one-tenth of 1 percent of its historic range.

Given that the jaguar is an international species with the vast majority of its range outside of the United States, primary actions to recover the jaguar will occur in other countries. Because more than 95 percent of the jaguar's habitat in the Northwestern Recovery Unit (NRU) is in Mexico, Mexico will be the primary contributor to the jaguar's recovery in the NRU. In the Pan-American Recovery Unit (PARU), countries within the jaguar's range will be the principal contributors to jaguar recovery.

The Service's limited resources are better applied to planning and on-the-ground implementation of conservation actions within the United States boundaries and in partnership with Mexico. Therefore, the Service and the Jaguar Recovery Team have established objective and measurable criteria for recovery and site-specific actions that, if implemented, will conserve viable jaguar populations in the northwestern portion of its range (e.g., the NRU). Priority is given to this unit because this is where the Service has the most jurisdiction, and we have an established working relationship with Mexico on issues of mutual concern.

Q: Was Customs and Border Patrol included in the developing of this plan?

A: Yes. U.S. Border Patrol (Tucson Sector) is represented on the Implementation Subgroup of the Jaguar Recovery Team. Other U.S. border area groups on the subgroup include ranchers, Malpais Borderlands Group, Altar Valley Conservation Alliance (ranching group), and state and federal land and wildlife managers.

Q: What are the actions and partnerships the Service is taking to support recovery of the jaguar in its primary range in 19 Central and South American countries?

A: In recent years, the Service's International Affairs Program has been at the forefront of supporting the conservation of jaguars throughout their range in Mexico, Central America and South America. During the past four years alone, we have supported 23 jaguar-related projects in 10 countries with more than $1 million in conservation funding. When jaguar habitat is conserved, many other species directly benefit.

In addition to providing incentives to protect habitat, many of the projects we support, seek to alleviate fears about jaguars in human communities through education. They also frequently provide

landowners with concrete strategies and methods that reduce conflict in such a way that humans and jaguars can co-exist. As a result, landowners are better able to protect their livelihoods and economic interests while helping protect jaguars. They achieve these goals by discouraging jaguars from coming into contact with their livestock, by reforesting areas of their land, and by helping maintain the species' natural prey populations. Based on project reporting to date, most landowners who employ jaguar-friendly ranching techniques see a dramatic reduction in attacks and subsequent livestock mortality. A project in Paraguay has reduced cattle mortality from jaguar attacks by 80-100 percent at 12 sites that cover an area more than 770 square miles. Another project in the Maya Biosphere of Guatemala has reduced cattle mortality from jaguar attacks by approximately 70 percent at 283 properties, covering about 11,603 hectares of land now under improved management.

Q: What are the requirements for a full recovery of the jaguar?

A: The approach in this Recovery Plan is as follows:

- Two recovery units are included, the Northwestern Recovery Unit (NRU) and the larger Pan-American Recovery Unit (PARU). The NRU extends from south-central Arizona and extreme southwestern New Mexico, United States, south to Colima, Mexico. The PARU encompasses 18 countries from Mexico to Argentina. These units are further divided into core, secondary, and peripheral areas.
- The status of and threats to jaguars in the PARU are summarized and general actions and criteria for addressing these threats and evaluating rangewide recovery are recommended.
- Detailed criteria and actions necessary to recover jaguar populations in the NRU are provided.

The Service will consider removing the jaguar from the ESA list due to recovery when <u>all</u> of the following conditions are met:

<u>A. PARU</u>

i. The status of the jaguar changes to Least Concern (LC) and is maintained under the IUCN Red List criteria (as defined by the World Conservation Union, http://www.iucnredlist.org) for at least 20 more years after first qualifying for LC, which would mean threats have been reduced so the jaguar population is no longer at risk of a $\geq$ 30 percent decline because its area of occupancy, extent of occurrence, and/or habitat quality, as well as actual or potential levels of exploitation, have been stable for at least 40 years.

<u>B. NRU</u>

i. Maintain approximately 60 percent occupancy (proportion of cells) in each of the Core Areas over 40 years (inclusive of the 20 years required to downlist).

ii. Over 40 years, genetic distance (e.g., F_{ST} or G_{ST}) between the Sonora and Jalisco Core Areas does not significantly increase, and inbreeding coefficients (F_{IS} or G_{IS}) within each of the Sonora and Jalisco Core Areas do not significantly increase.

iii. During a period of 40 years, the average of at least 30 percent of the adult population within the Sonora and Jalisco Core Areas are female (based on data gathered through surveying, monitoring, genetic analysis, etc.).

iv. Agency policies and regulations (including transportation siting and design), land-use regulations, and landowner agreements in Mexico are sufficient to ensure the network of ≥ 100-km^2 blocks (the minimum area capable of supporting at least three breeding females) of high-quality habitat and habitat connections between blocks within each Core Area (Sonora and Jalisco) will support genetically and demographically viable jaguar populations for the foreseeable future.

v. Agency policies and regulations (including transportation), land-use regulations, and landowner agreements in Mexico are sufficient to ensure landscape permeability will be maintained for jaguars within the Sinaloa Secondary Area.

vi. Agency policies and regulations (including transportation), land-use regulations, and landowner agreements in the United States and Mexico are sufficient to ensure landscape permeability, including at least two trans-border linkages, will be maintained for jaguars throughout the Borderlands Secondary Area.

vii. The threat of direct human killing of jaguars is decreased or maintained at sustainable levels as measured by acceptable evidence or an index.

viii. Effective federal, state, tribal, and/or local laws are in place in the NRU that ensure killing of jaguars is prohibited or regulated so viable populations of the species can be maintained.

BASIC COMMUNICATIONS STRATEGY

FOR ROUTINE NON-CONTROVERSIAL ANNOUNCEMENTS

SECTION I: GENERAL INFORMATION

1. **Title:** Final Recovery Plan for the Jaguar

2. **DTS number** 068832

3. **What is the action triggering this communications plan?** *(Please explain in no more than three sentences)*

The Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar.

4. **What is the proposed date for this action? Why has it been selected? Is it flexible?**

Proposed date for the announcement is April 11, 2019. The plan was signed by the Southwest Regional Director in July 2018; however, the announcement was delayed to accommodate extensive review and inter-agency coordination. The April 11 date allows for a final review by headquarters, notification of DOI, and facilitation of a coordinated rollout by the Jaguar Recovery Team (state, NGO, tribal and international partners.)

5. **Which office is leading this communications effort and which other programs, regions or groups are involved?**

Region 2 External Affairs and Arizona Ecological Services Office. (The Conservation Planning Specialist Group and the Wildlife Conservation Society contributed substantially to technical aspects of the plan and will be available to contribute technical expertise.)

SECTION II: GOALS AND MESSAGES

6. **What story do we want to tell?**

Reversing the decline of the jaguar (America's largest cat) is possible, but it will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States south to Argentina. The final recovery plan

sets goals for improving the species' status across its range and provides a framework whereby all stakeholders can align their efforts to achieve recovery. Critical to the recovery of the jaguar is conservation of key jaguar habitat (including core habitat areas and corridors) and populations. Due to past habitat loss, it is unlikely jaguars will be fully self-sustaining throughout their entire historical range. We anticipate that it will take a minimum of 50 years to recover the jaguar.

7. What are our key messages? *(These should be top concepts that readers should take away, including an understanding of why this action matters and why they should care, not a list of facts, which should be placed in the appendix. List no more than four!)*

Primary messages:

- Reversing the decline of the jaguar -- America's largest wild cat -- is possible. It will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States to Argentina.
- Through the Endangered Species Act recovery planning process, nineteen nations and diverse conservation organizations are working together to protect this important and charismatic species.
- Primary threats to the jaguar throughout its range are loss of habitat, direct killing and depletion of its prey. The recovery plan identifies conservation activities in every country and region for addressing threats and sets goals for minimizing threats and establishing viable jaguar populations throughout their expansive range.
- The recovery plan proposes two corridors that are in remote and rugged countryside that can accommodate jaguar movements across the United States/Mexico border.
- Border interventions and operations in these areas, at present, are most practically addressed through surveillance and remote detection (electronics, towers, etc.). The U.S.-Mexico border is currently permeable to jaguar movement at these dispersal corridors, and continued work with the U.S. Customs and Border Protection (CBP) will remain important to allow for ongoing opportunities for cross-border movement of jaguars.

Secondary messages:

- The recovery plan describes two large jaguar recovery units – the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina and the Northwestern Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. *The plan recognizes that countries within the PARU will be the principal contributors to its recovery.* Through the NRU, the Service will continue to promote jaguar recovery throughout its range, as it has in the past.
- The final recovery plan focuses on the NRU because this is where the Service has legal jurisdiction. We also have close working relationships with Mexico on

behalf of the jaguar's recovery. The NRU includes jaguars that occupy the U.S. Southwest borderlands region. Since 1996, seven individual male jaguars have been documented in the United States (southern Arizona and southwestern New Mexico). These jaguars are believed to be expanding their range from the nearest core area and breeding population, which is approximately 130 miles south of the U.S.-Mexico border in Sonora. Recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity.

If-Asked Only Statements:

- The Service is working closely with federal and other partners to promote border security while protecting the jaguar and its habitat. The recovery plan proposes two corridors that are in particularly rugged countryside that can accommodate jaguar movements across the United States – Mexico border.
- The Service is not aware of any proposals to build new border fence on the Arizona border. Some existing fence is being replaced, but it is a direct replacement, not an upgrade from vehicle to pedestrian fence.]

The binational recovery team has not prescribed jaguar reintroductions in the United States. The recovery plan focuses on efforts to sustain habitat, eliminate poaching, maintain at least two borderland dispersal corridors, and improve human social acceptance of the jaguar to accommodate jaguars that disperse into the United States.

For additional background and approved messaging on role of CBP and the U.S. Border Patrol in the Jaguar Recovery Plan, see Appendix II below.

SECTION III: IMPLEMENTATION

8. Implementation timeline *(If not known, put TBD or the number of days/hours before/after the announcement*

Target Date	Tactic	Responsible
All times are in the Mountain (ET -2) time zone		
All dates and times are predicated on date determined for release of Final Recovery Plan		

At least 7 days prior to public announcement	Wildlife Conservation Society notification	Humphrey
2-3 days before announcement	Embargoed pitch to AP and/or national reporter(s)? Susan Montoya (AP)	Humphrey/Hires
Afternoon of signature (2 pm MT)	Notify New Mexico and Arizona fish and wildlife agency directors	Lueders or Millsap/Humphrey/McIntyre
Afternoon of signature (2 pm MT)	Notify AZ and NM congressional members, and congressional committees of anticipated availability	R2 Lesli Gray/CLA Alyssa Hausman
Afternoon of signature (2 pm MT)	Notify southern Arizona and New Mexico tribes of anticipated availability	Nystedt/Humphrey
Afternoon of signature (2 pm MT)	Confirm plan availability with recovery team member organizations	Alanen/Stanford
Morning after signature (8 am MT)	Post final recovery plan and news release to Arizona ES, ECOS, and R2 homepage	Kaplan/Crouse/ Campbell
Morning after signature (10 am MT)	Distribute news release to AZ, NM, Mexico, and international environmental news outlets	Humphrey
Morning after signature (10 am MT)	SMEs available for media response	Humphrey/Alanen/Stanford
Morning after signature (10 am MT)	Social media (Facebook) post	Barrus
Week after signature	[*Optional*] Provide written notification to affected parties, agencies	AESO

9. **Which communications tools are needed to support these strategies and tactics?** *(Be as specific as possible about the products identified and who will produce them)*

Tool	Responsible	Due Date
News Release	Humphrey	3/15/2019
Photos (www.flickr.com/photos/usfws_southwest/sets/72157632294203147/)	Humphrey	3/15/2019
"If-asked" border talking points	Humphrey	3/15/2019
Video support: www.fws.gov/southwest/es/arizona/Jaguar.htm	Humphrey	3/15/2019
Jaguar population maps	Alanen	3/15/2019
FAQs (FAQs presently in Item 7 (above) as if-asked only) can be converted into FAQs)	Humphrey	3/15/2019

10. **Social media plan** *(Provide a list of accounts to be used as well as sample hashtags, messages, multimedia and other links, etc. as appropriate)*

https://www.facebook.com/USFWSSouthwest?ref=mf

The Service and its partners in the binational Jaguar Recovery Team can recover the jaguar, but it will take time, effort and collaboration with partners across species' 19-country range. A recently released recovery plan sets goals for improving the species status across its range and provides a framework for achieving recovery.

Here in the Southwest, male jaguars from a core breeding population in Mexico occasionally occupy mountain ranges along our southern border with the country.

See more at: https://www.fws.gov/southwest/es/arizona/Jaguar.htm

11. **Stakeholder contact grids** *(For each, paste in a table that provides organization name, contact person, how the person will be contacted, phone or email address as appropriate and a name of the person who will be making contact)*

APPENDIX: ADDITIONAL BACKROUND INFORMATION AND MATERIALS

DO NOT PUT OTHER MATERIALS SUCH AS FAQs, NEWS RELEASE OR TALKING POINTS IN THIS SECTION. KEEP THOSE AS SEPARATE DOCUMENTS.

(Consider the following: What is the historical context? Does this relate to other issues that may not immediately be apparent (consider other programs and regions)? Is there a scientific basis to this issue? If so what is it?)

APPENDIX 1

Historical Context:

Following a 2009, Arizona District Court decision, FWS determined that developing a recovery plan for jaguars will contribute to their conservation (in recognition that most of the species' habitat and almost all individuals occur outside if the United States).

FWS reconfigured and expanded a binational Jaguar Recovery Team and charged them with developing a recovery outline, which they completed in April 2012. The FWS drew heavily from the data compiled in the recovery outline for the development of jaguar critical habitat designation (in the U.S.), which was finalized in March 2014.

Summary:

In 2010, a binational Jaguar Recovery Team was convened with experts and stakeholders from both the U.S. and Mexico to develop a jaguar recovery plan. The Recovery Plan considers the jaguar throughout its range, but primarily focuses on the Northwestern Recovery Unit (NRU), which extends from the southwestern U.S. to western Mexico. To achieve delisting, viable jaguar populations should be secured by protecting jaguars and their habitat; reducing human-caused mortality of jaguars, particularly retaliatory killing due to livestock depredation; improving, enacting, and/or enforcing effective laws that regulate illegal killing of jaguars, jaguar prey, and habitat loss; securing adequate funding to implement recovery actions; and maintaining and developing partnerships in the Americas, particularly in Mexico.

Regarding the role of the U.S. in recovering the jaguar, recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity. Actions to implement this involve identifying and mapping corridors and potential impediments to these linkages, along with developing and implementing strategies to maintain connectivity. Recovery actions to maintain connectivity and overall ecosystem/watershed health are ongoing in many areas in the U.S. by the U.S. Forest Service or Bureau of Land Management, where much of the linkage habitat into the U.S. occurs.

We received over 13,000 public comments on the draft Recovery Plan. We requested five peer reviews and received comments from two, both from Mexico. We also received comments from the Arizona Game and Fish Department, New Mexico Game and Fish Department, and the San Carlos Apache Tribe. We incorporated all substantive comments into the final Recovery Plan. If we did not incorporate substantive comments, we responded to them in our response to comments documents. Review of the Recovery Plan was also coordinated with the New Mexico Ecological Services Field Office, and Buenos Aires and San Bernardino National Wildlife Refuges.

MAIN DECISION OR MESSAGE: Due to past habitat loss, it is unlikely that jaguars will be fully self-sustaining throughout their historical range; however, conservation of key jaguar habitat and populations in their current range will be critical to the recovery of jaguars. We anticipate that it will take a minimum of 50 years to recover the jaguar. The estimated cost to recovery is $605,648,000 (among 19 countries over 50 years).

APPENDIX II

Jaguar Recovery Plan - Customs and Border Protection/U.S. Border Patrol Involvement
August 31, 2018

Customs and Border Protection (CBP) via U.S. Border Patrol (USBP) has been involved through all phases of jaguar draft and final recovery plan planning processes. In 2010, at the inception of the binational Jaguar Recovery Team (JRT), USBP was invited to serve as a member of the Implementation Subgroup of the JRT, as an official representative of USBP. Since 2010, USBP has had a member on the JRT through the present (Charles Trost).

CBP also has significantly financially supported several projects, described in Table 3 of the Jaguar Recovery Plan (JRP), that were conducted to inform important content for the Plan and implement recovery actions identified in the JRP. These projects include genetics studies, habitat modeling, jaguar surveying and monitoring, citizen science education and outreach, rancher incentives, road crossing designs, citizen attitude surveys, and portions of Population Viability Analyses (PVA and PHVA) (see Table 3 below).

USBP participated in many meetings to discuss and prepare the JRP, and did not express significant concerns about border issues. In the spirit of cooperation, CBP permitted FWS and Jaguar Recovery Team to use their GIS layers of the border to develop a map that illustrates degrees of border permeability (no fences, including a vehicle or pedestrian fence), and this information is illustrated on Figure 4 of the JRP. Both this figure and the JRP indicate that portions of the border are currently permeable to jaguar movement and that continued work between FWS and CBP will remain important to allow for ongoing opportunities for cross-border jaguar movement.

As part of outreach on the JRP, CBP was informed of the option to comment during the public comment period, and did not provide any comments. Throughout the development of the JRP, CBP has had opportunities to address border issues and through these and related actions CBP's and BP's concerns have been fully incorporated into the Jaguar Recovery Plan.

Table 3. Summary of U.S. Customs and Border Protection-funded projects and their conservation benefit to jaguars. NRU = Northwestern Recovery Unit for the jaguar. USFWS = U.S. Fish and Wildlife Service. Final reports of these projects can be found at https://www.fws.gov/southwest/es/arizona/Jaguar.htm.

Project	Final Deliverable(s)	Purpose/Conservation Benefit
Genetics	*Jaguar taxonomy and genetic diversity for southern Arizona, U.S., and Sonora, Mexico*	Investigates unique genetic diversity of jaguars at the northern edge of the range and answers taxonomic question of whether or not northern jaguars are a distinct subspecies
PVAs	*Population Viability Analysis for the Jaguar (Panthera onca) in the Northwestern Range*	Describes demographic viability of the jaguar metapopulation defined as the NRU
PVAs (cont.)	*Addendum: Population Viability Analysis for the Jaguar (Panthera onca) in the Northwestern Range*	Describes the structure, implementation, and interpretation of a new set of demographic simulations of jaguar population viability in core areas of the NRU
Habitat Modeling	*Digital Mapping in Support of Recovery Planning for the Northern Jaguar*	Assisted USFWS in digital mapping aspects of recovery planning for the northern jaguar (habitat models used in population viability analyses, above, and Recovery Outline for the Jaguar)
	Jaguar Habitat Modeling and Database Update	Updates jaguar database with additional observations, conducts analyses of different selections of jaguar observations, produces five revised versions of the habitat model (habitat models used in population viability analyses, above, as well as this Recovery Plan)
	jaguardata.info	Converts jaguar observations database to web-based platform allowing stakeholders, general public, and scientific community to search and access jaguar data; provides an interface for administrators to add, edit, and delete jaguar observations in the NRU
Jaguar Survey and Monitoring (U.S. portion of NRU)	*Jaguar Surveying and Monitoring in the United States: Final Report*	Culver (2016) provides results and analyses of the two-year investigation of jaguars, prey base, and habitat in the U.S. portion of the NRU to inform recovery planning; multiple photos of one jaguar (and three ocelots) provided to USFWS and posted on USFWS Flickr site
Jaguar Survey and Monitoring (Tohono O'odham Nation; TON)	*Jaguar Surveying and Monitoring on the Tohono O'odham Nation*	Provides results and analyses of surveys for jaguars and ocelots on the TON to inform recovery planning

Citizen Science, Education, Outreach, and Grant Writing	*Citizen Science Teams*	Developed and implementing a citizen science program to survey and monitor for jaguars within the U.S. portion of the NRU
	K-12 Jaguar Educational Curricula	Developed and implementing formal educational curricula on jaguar and ocelot conservation for different educational levels to promote an understanding of feline conservation
Citizen Science, Education, Outreach, and Grant Writing (cont.)	*Jaguar Conservation Outreach*	Developed and presented a PowerPoint presentation on jaguar and ocelot biology and conservation for the general public to promote an understanding of feline conservation
	Education and Outreach Materials	Developed posters, stickers, etc. to promote jaguar conservation within the NRU
	Grant Writing	Applied for funding opportunities to continue aspects of jaguar survey and monitoring effort currently being conducted, to continue and/or expand the volunteer citizen science program, and to continue and/or expand public outreach and school education programs
Rancher Incentive Program	*Complete Project Overview*	See http://udallcenter.arizona.edu/jaguarproject/ for project summary, additional information, and reports
	Assessment of Rancher Knowledge	Pilot assessment of nine ranch owner/manager's knowledge of jaguar conservation issues
	Ranch Owner/Manager Survey Questionnaire	Survey of ranch owner/manager knowledge about and attitudes toward jaguar conservation issues
	Results of Ranch Owner/Manager Survey Questionnaire	Summary of survey results included in Results of Rancher Workshops report (below); comprehensive analysis of data still to be published
	Report on PES sources	Conducted research policy analysis of payment for ecosystem services (PES) program and analysis of jaguar-friendly ranch management options for distribution; available at http://extension.arizona.edu/pubs/payments-ecosystem-services-southern-arizona-ranchers
	Rancher Workshops	Developed workshops to enhance rancher knowledge of jaguar conservation, jaguar friendly ranch management practices, and conservation incentive programs; as well as receive feedback from ranchers regarding incentive programs that may generate participation

	Brochures	Provides a simple program of actions for landowners to implement for promoting jaguar conservation on their lands
Survey of Residents' Attitudes on Jaguar Conservation	*Results of Survey of Residents' Attitudes on Jaguar Conservation*	Provides insights into attitudes, mores, and level of knowledge of stakeholders in the U.S. portion of the NRU regarding jaguars to understand what is needed from a social perspective to create an environment that is conducive to jaguar conservation
Jaguar Survey and Monitoring Protocol	*Review of Jaguar Survey and Monitoring Techniques and Methodologies* (English and Spanish)	Provides a review of literature on jaguar and, as appropriate, other large felid survey and monitoring techniques and methodologies
	Jaguar Survey and Monitoring Protocol (English and Spanish)	Provides a jaguar survey and monitoring protocol applicable in measuring occupancy recovery criteria (3.3.1.B.i. and 3.3.2.B.i.) in the NRU, as well as other areas rangewide
Review and Develop Recommendations for Road Crossing Designs	*Review of Road Passage Designs for Jaguars*	Conducts a review of enhancements (e.g., underpasses, overpasses, guiding fences, etc.) that allow for passage of large carnivores, particularly jaguars, across road corridors
	Road Passage Design Recommendations (English and Spanish)	Develops recommendations for enhancements (e.g., underpasses, overpasses, guiding fences, etc.) that allow for passage of jaguars across road corridors that would be effective in a variety of different habitat types in the NRU
	Road Passage Location Recommendations (English and Spanish)	Identifies potential areas in the NRU where enhancements (e.g., underpasses, overpasses, guiding fences, etc.) would improve the passage of jaguars across different types of road corridors that would be effective in a variety of different habitat types

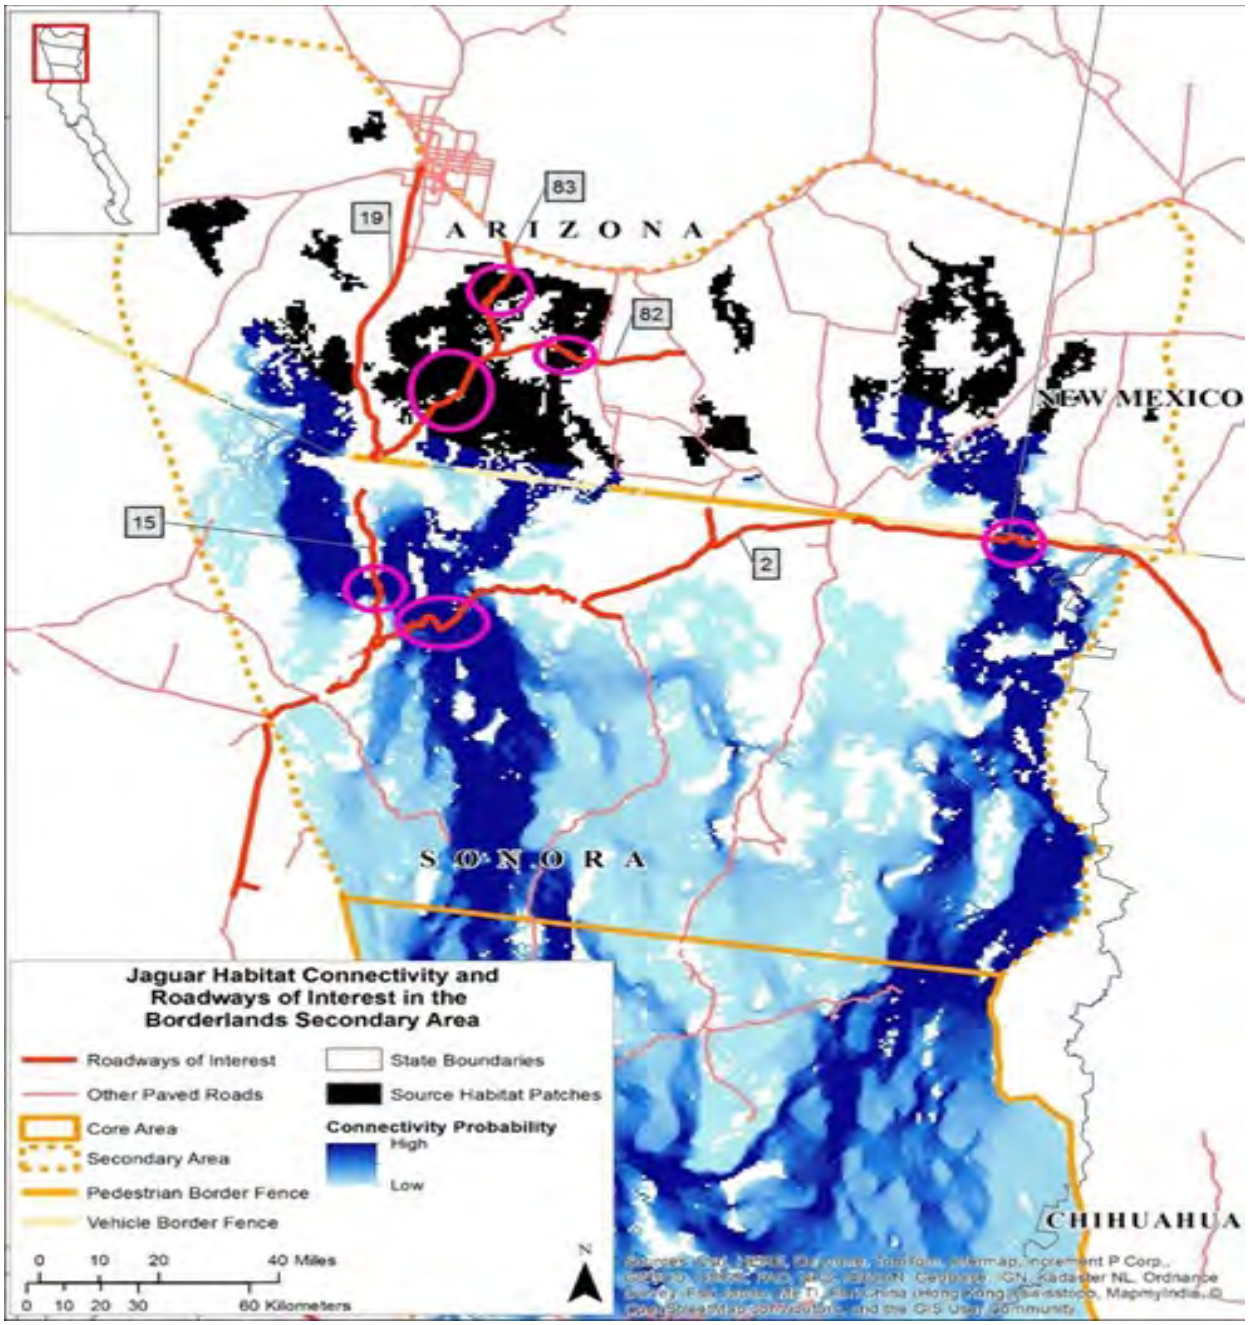

Figure 4. Map of habitat connectivity and roadways of interest in the Borderlands Secondary Area as modeled by Stoner et al. (2015) (some road segments in densely populated areas omitted). A visual examination of this connectivity model, which extends across the entirety of the Northwestern Recovery Unit, reveals three corridors that extend across the U.S.-Mexico border. These corridors are intersected by Mexico Federal Highways 2 and 15. U.S. State Routes 82 and 83 also intersect with "source" habitat patches (used for modeling purposes), which may impact jaguar habitat connectivity. These areas are good candidates for further assessment to determine the potential for road crossing mitigation structures.

Hi Charisa,

Please see attached requested items, for announcing the final jaguar recovery plan. Let me know you think they'd also like to see the actual final recovery plan as a PDF (it's a fairly large file). Thanks,

Brian

DTS NOTE TO REVIEWERS

DCN: 068832

Subject: Outreach Package for Final Recovery Plan for the Jaguar

Background: The Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar. Although the vast majority of the jaguar's population in the Americas is from Mexico to Argentina, this recovery plan focuses on its range in the American Southwest and Mexico, where the United States has the most jurisdiction.

Deadline for completing surname: The Notice of Availability announcing the posting of this final recovery plan to a FWS Region 2 website is targeted for being sent to the *Federal Register* on April 11, 2019. This date is flexible.

Materials: *Outreach plan, news release, FAQs*

Special considerations:

While recovery plans are non-regulatory guidance documents, this action will likely generate significant national and international attention, stakeholder interest and controversy. The jaguar is a charismatic megafauna and its northernmost range extends across the US-Mexico border to the US Southwest. **As such, this issue involves border wall issues.** (The recovery plan for the US includes two 'border dispersal corridors' in rugged, remote areas of Arizona).

Careful messaging has been crafted and prioritized in this outreach to detail political sensitivities and how the US portion of the jaguar's historic range represents just 1/10th of 1 percent of its 19-country range. Outreach to DOI, Congress, stakeholders and media should account for the potential for controversy and misconceptions around this issue.

Service and Binational Team Complete ESA Recovery Plan for America's Largest Wild Cat

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final Endangered Species Act (ESA) recovery plan for the jaguar, currently listed under the act at endangered. The plan provides a recovery framework and goals for improving the species' status throughout its entire 19-country range while focusing on the jaguar populations in northwestern Mexico and the southwestern United States.

The final recovery plan describes two large jaguar recovery units – the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina, and the Northwestern Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. More than 99 percent of the jaguar's range is in Central and South America, so the plan recognizes that countries within the PARU will be the principal contributors to its recovery. The Service will continue to promote jaguar recovery throughout the range of the jaguar, including continued funding support.

The Service has established strong working relationships with state and local partners, conservation groups and the Mexican government. The binational recovery team has not prescribed jaguar reintroductions in the United States but calls for focusing efforts on sustaining potential habitat. In addition, the plan calls for establishing at least two borderland dispersal corridors for jaguars' continued movement through remote, rugged habitat between the countries, eliminating poaching, and improving social acceptance of the jaguar to accommodate their return to the United States.

"The binational recovery team's scientific expertise in protecting the jaguar has been invaluable," said Amy Lueders, the Service's Southwest Regional Director. "We recognize the challenges involved in conserving and recovering a species with such an expansive international range, and the team has laid out a comprehensive plan with goals that are achievable and realistic. We look forward to continuing to work with our diverse partners on this effort within and outside the United States."

Loss of habitat, direct killing of the cats, and depletion of prey are the primary factors contributing to the jaguar's current status and decreasing population trend. Due to past habitat loss, it is unlikely that jaguars will be fully self-sustaining throughout their entire historical range. However, conservation of key jaguar populations and habitat -- including core breeding and connective areas -- will be critical to jaguar recovery. We anticipate it will take a minimum of 50 years to recover the jaguar.

Since 1996, seven individual male jaguars have been documented in the United States, all in southern Arizona and southwestern New Mexico. These jaguars are believed to have come from the nearest core area and breeding population, approximately 130 miles south of the U.S.-Mexico border in Sonora.

Across the jaguar's primary range in Latin America, the Service is actively working with countries and local partners to protect and recover the cat. Conservation efforts include providing incentives for protecting jaguar habitat and prey, education campaigns addressing misinformation and fears, and providing landowners with strategies for co-existing with jaguars.

Recovery plans are not regulatory but provide a framework for recovery of a species so protection under the ESA is no longer necessary. This recovery plan includes scientific information about the species and provides recovery criteria, conservation actions necessary for its recovery and delisting from the ESA and estimates of the time and cost to carry out the measures needed to achieve the plan's goal.

To achieve delisting, viable jaguar populations must be secured throughout their range. This will require protecting jaguar habitat quality and connectivity; providing incentives to protect jaguars and their habitat; reducing human-caused mortality of jaguars, particularly retaliatory killing due to livestock depredation; improving, enacting and/or enforcing effective laws that regulate illegal killing of jaguars, jaguar prey and habitat loss; securing adequate funding to implement recovery actions; and maintaining and developing partnerships in the Americas, particularly in Mexico. These protections must remain in place after delisting to ensure the long-term viability of the species.

The binational Jaguar Recovery Team includes representatives of CONANP (National Commission of Protected Areas in Mexico), CEDES (Commission of Ecology and Sustainable Development of the State of Sonora), U.S. Department of Agriculture APHIS Wildlife Services and U.S. Forest Service, Bureau of Land Management, U.S. Border Patrol, Arizona Game and Fish Department, New Mexico Department of Game and Fish, Tohono O'odham Nation, Altar Valley Conservation Alliance, Malpai Borderlands Group, Naturalia, Panthera and several ranchers, landowners, stakeholders and universities in Mexico and the United States. Additionally, the Conservation Planning Specialist Group and the Wildlife Conservation Society contributed substantially to technical aspects of the recovery plan.

The Jaguar Recovery Plan is available at: https://www.fws.gov/southwest/es/arizona/Jaguar.htm or by request from Field Supervisor, U.S. Fish and Wildlife Service, Arizona Ecological Services Office, 9828 North 31st Avenue, #C3, Phoenix, AZ 85051–2517; phone 602/242-0210.

Questions and Answers: Final Recovery Plan for the Jaguar

Arizona Ecological Services Field Office **www.fws.gov/southwest/es/arizona/**

For Release: [Enter date here]
Contacts: Jeff Humphrey 602-242-0210

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, America's largest wild cat. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States and recommends site-specific conservation actions that contribute to jaguar recovery across its range.

Q: What does the jaguar recovery plan tell us?

A: Reversing the decline of the jaguar is possible, but it will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States south to Argentina. The final recovery plan sets goals for improving the species' status across its range and provides a framework for aligning stakeholder efforts to achieve recovery. Critical to the recovery of the jaguar is conservation of key jaguar habitat (including core areas and connective corridors) and populations. Due to past habitat loss, it is unlikely jaguars will be fully self-sustaining throughout their entire historical range. We anticipate that it will take a minimum of 50 years to recover the jaguar.

Q: What are the primary threats to the jaguar?

A: Loss of habitat, killing of individuals and depletion of prey throughout its range are the primary reasons for decreasing populations of jaguars. The recovery plan identifies conservation activities in every country and region for addressing each of these threats. It establishes goals for minimizing threats and for establishing viable populations throughout the jaguar's expansive range.

Q: What is a recovery plan?

A: Recovery plans are not regulatory but provide a framework for recovery of a species so protection under the ESA is no longer necessary. This recovery plan includes scientific information about the species and provides recovery criteria, conservation actions necessary for its recovery and delisting from the ESA and estimates of the time and cost to carry out the measures needed to achieve the plan's goal.

Q: What are the strategies for conserving and recovering the jaguar in the final recovery plan?

A: The recovery plan describes two large jaguar recovery units: the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina, and the Northwestern Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. The plan

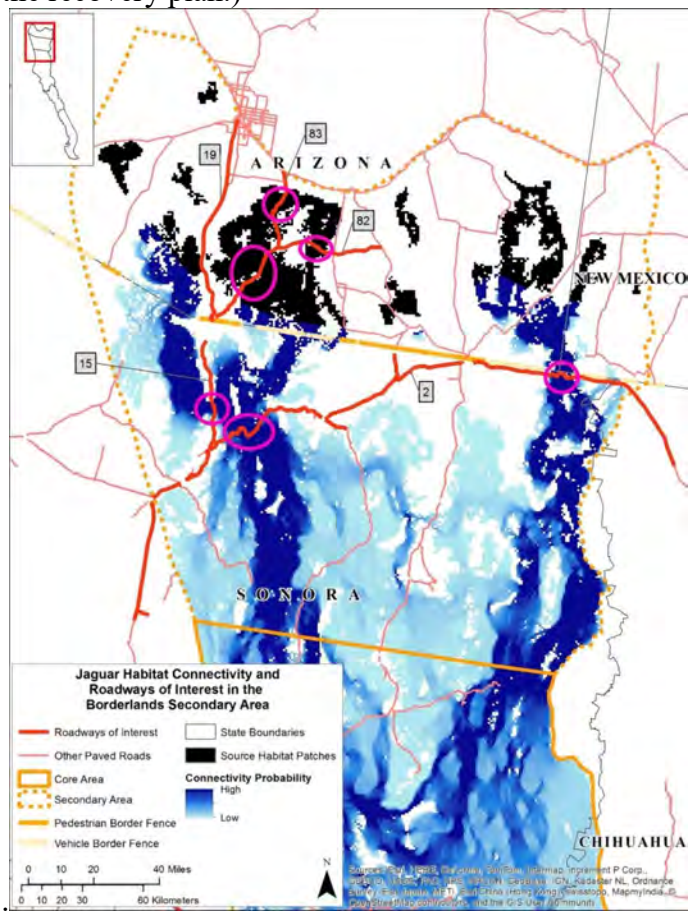
recognizes that countries within the PARU will be the principal contributors to jaguar recovery. As it has in the past, the Service will continue to promote jaguar recovery throughout the range of the jaguar.

The final recovery plan focuses on the NRU because this is where the Service has the most jurisdiction and has an established working relationship with Mexico. The NRU includes the jaguars that occupy the U.S. Southwest borderlands region. Since 1996, seven individual male jaguars have been documented in the United States (southern Arizona and southwestern New Mexico). These jaguars are believed to be expanding their range from the nearest core area and breeding population, which is approximately 130 miles south of the U.S.-Mexico border in Sonora. Recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity.

The binational recovery team has not prescribed jaguar reintroductions in the United States but focuses on efforts to sustain habitat, eliminate poaching, maintain at least two borderland dispersal corridors (see Figure 4 in the final recovery plan), and improve human social acceptance of the jaguar to accommodate jaguars that disperse into the United States.

Q: What are the borderland dispersal corridors referred to in the recovery plan and how critical are they to the recovery of jaguars in the United States?

A: Dispersal corridors are rugged, remote areas that presently male jaguars, presumably from the Sonora Core breeding area in Mexico, use to access secondary area habitat, a portion of which is in southern Arizona and New Mexico. These areas have been identified from habitat characteristics, historical records, recent sightings and photo monitoring in the United States and Mexico. (See Jaguar Habitat Connectivity and Identification of Potential Road Mitigation Locations in the NRU for the Jaguar report, as well as Figure 4 of the recovery plan.)



Continued jaguar access to habitat through transborder linkages is the sole mechanism identified in the recovery plan for continued jaguar occupation in the U.S. portion of the species' range. Maintaining this habitat connectivity is one of the recovery criteria for the Northwestern Recovery Unit. Research documents the importance of animal populations at the extremities of their ranges for the expansion and contraction of species' ranges and, ultimately, the long-term recovery of species.

These jaguar dispersal corridors are rugged and remote areas. Border interventions and operations in these areas, at present, are most practically addressed through surveillance and remote detection (electronics, towers, etc.). The U.S.-Mexico border is currently permeable to jaguar movement at these dispersal corridors. Continued work with the U.S. Customs and Border Protection (CBP) will remain important to allowing ongoing opportunities for cross-border movement of jaguars.

Q: How important is the recovery of jaguars in the United States to their overall recovery across their range?

A: The U.S. range of the jaguar represents the very northernmost edge of its 19-country range that extends all the way to South America. The U.S. range represents just one-tenth of 1 percent of its historic range.

Given that the jaguar is an international species with the vast majority of its range outside of the United States, primary actions to recover the jaguar will occur in other countries. Because more than 95 percent of the jaguar's habitat in the Northwestern Recovery Unit (NRU) is in Mexico, Mexico will be the primary contributor to the jaguar's recovery in the NRU. In the Pan-American Recovery Unit (PARU), countries within the jaguar's range will be the principal contributors to jaguar recovery.

The Service's limited resources are better applied to planning and on-the-ground implementation of conservation actions within the United States boundaries and in partnership with Mexico. Therefore, the Service and the Jaguar Recovery Team have established objective and measurable criteria for recovery and site-specific actions that, if implemented, will conserve viable jaguar populations in the northwestern portion of its range (e.g., the NRU). Priority is given to this unit because this is where the Service has the most jurisdiction, and we have an established working relationship with Mexico on issues of mutual concern.

Q: Was Customs and Border Patrol included in the developing of this plan?

A: Yes. U.S. Border Patrol (Tucson Sector) is represented on the Implementation Subgroup of the Jaguar Recovery Team. Other U.S. border area groups on the subgroup include ranchers, Malpais Borderlands Group, Altar Valley Conservation Alliance (ranching group), and state and federal land and wildlife managers.

Q: What are the actions and partnerships the Service is taking to support recovery of the jaguar in its primary range in 19 Central and South American countries?

A: In recent years, the Service's International Affairs Program has been at the forefront of supporting the conservation of jaguars throughout their range in Mexico, Central America and South America. During the past four years alone, we have supported 23 jaguar-related projects in 10 countries with more than $1 million in conservation funding. When jaguar habitat is conserved, many other species directly benefit.

In addition to providing incentives to protect habitat, many of the projects we support, seek to alleviate fears about jaguars in human communities through education. They also frequently provide

landowners with concrete strategies and methods that reduce conflict in such a way that humans and jaguars can co-exist. As a result, landowners are better able to protect their livelihoods and economic interests while helping protect jaguars. They achieve these goals by discouraging jaguars from coming into contact with their livestock, by reforesting areas of their land, and by helping maintain the species' natural prey populations. Based on project reporting to date, most landowners who employ jaguar-friendly ranching techniques see a dramatic reduction in attacks and subsequent livestock mortality. A project in Paraguay has reduced cattle mortality from jaguar attacks by 80-100 percent at 12 sites that cover an area more than 770 square miles. Another project in the Maya Biosphere of Guatemala has reduced cattle mortality from jaguar attacks by approximately 70 percent at 283 properties, covering about 11,603 hectares of land now under improved management.

Q: What are the requirements for a full recovery of the jaguar?

A: The approach in this Recovery Plan is as follows:

- Two recovery units are included, the Northwestern Recovery Unit (NRU) and the larger Pan-American Recovery Unit (PARU). The NRU extends from south-central Arizona and extreme southwestern New Mexico, United States, south to Colima, Mexico. The PARU encompasses 18 countries from Mexico to Argentina. These units are further divided into core, secondary, and peripheral areas.
- The status of and threats to jaguars in the PARU are summarized and general actions and criteria for addressing these threats and evaluating rangewide recovery are recommended.
- Detailed criteria and actions necessary to recover jaguar populations in the NRU are provided.

The Service will consider removing the jaguar from the ESA list due to recovery when <u>all</u> of the following conditions are met:

<u>A. PARU</u>

i. The status of the jaguar changes to Least Concern (LC) and is maintained under the IUCN Red List criteria (as defined by the World Conservation Union, http://www.iucnredlist.org) for at least 20 more years after first qualifying for LC, which would mean threats have been reduced so the jaguar population is no longer at risk of a $\geq$ 30 percent decline because its area of occupancy, extent of occurrence, and/or habitat quality, as well as actual or potential levels of exploitation, have been stable for at least 40 years.

<u>B. NRU</u>

i. Maintain approximately 60 percent occupancy (proportion of cells) in each of the Core Areas over 40 years (inclusive of the 20 years required to downlist).

ii. Over 40 years, genetic distance (e.g., F_{ST} or G_{ST}) between the Sonora and Jalisco Core Areas does not significantly increase, and inbreeding coefficients (F_{IS} or G_{IS}) within each of the Sonora and Jalisco Core Areas do not significantly increase.

iii. During a period of 40 years, the average of at least 30 percent of the adult population within the Sonora and Jalisco Core Areas are female (based on data gathered through surveying, monitoring, genetic analysis, etc.).

iv. Agency policies and regulations (including transportation siting and design), land-use regulations, and landowner agreements in Mexico are sufficient to ensure the network of ≥ 100-km^2 blocks (the minimum area capable of supporting at least three breeding females) of high-quality habitat and habitat connections between blocks within each Core Area (Sonora and Jalisco) will support genetically and demographically viable jaguar populations for the foreseeable future.

v. Agency policies and regulations (including transportation), land-use regulations, and landowner agreements in Mexico are sufficient to ensure landscape permeability will be maintained for jaguars within the Sinaloa Secondary Area.

vi. Agency policies and regulations (including transportation), land-use regulations, and landowner agreements in the United States and Mexico are sufficient to ensure landscape permeability, including at least two trans-border linkages, will be maintained for jaguars throughout the Borderlands Secondary Area.

vii. The threat of direct human killing of jaguars is decreased or maintained at sustainable levels as measured by acceptable evidence or an index.

viii. Effective federal, state, tribal, and/or local laws are in place in the NRU that ensure killing of jaguars is prohibited or regulated so viable populations of the species can be maintained.

BASIC COMMUNICATIONS STRATEGY

FOR ROUTINE NON-CONTROVERSIAL ANNOUNCEMENTS

SECTION I: GENERAL INFORMATION

1. **Title:** Final Recovery Plan for the Jaguar

2. **DTS number** 068832

3. **What is the action triggering this communications plan?** *(Please explain in no more than three sentences)*

The Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar.

4. **What is the proposed date for this action? Why has it been selected? Is it flexible?**

Proposed date for the announcement is April 11, 2019. The plan was signed by the Southwest Regional Director in July 2018; however, the announcement was delayed to accommodate extensive review and inter-agency coordination. The April 11 date allows for a final review by headquarters, notification of DOI, and facilitation of a coordinated rollout by the Jaguar Recovery Team (state, NGO, tribal and international partners.)

5. **Which office is leading this communications effort and which other programs, regions or groups are involved?**

Region 2 External Affairs and Arizona Ecological Services Office. (The Conservation Planning Specialist Group and the Wildlife Conservation Society contributed substantially to technical aspects of the plan and will be available to contribute technical expertise.)

SECTION II: GOALS AND MESSAGES

6. **What story do we want to tell?**

Reversing the decline of the jaguar (America's largest cat) is possible, but it will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States south to Argentina. The final recovery plan

sets goals for improving the species' status across its range and provides a framework whereby all stakeholders can align their efforts to achieve recovery. Critical to the recovery of the jaguar is conservation of key jaguar habitat (including core habitat areas and corridors) and populations. Due to past habitat loss, it is unlikely jaguars will be fully self-sustaining throughout their entire historical range. We anticipate that it will take a minimum of 50 years to recover the jaguar.

7. What are our key messages? *(These should be top concepts that readers should take away, including an understanding of why this action matters and why they should care, not a list of facts, which should be placed in the appendix. List no more than four!)*

Primary messages:

- Reversing the decline of the jaguar -- America's largest wild cat -- is possible. It will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States to Argentina.
- Through the Endangered Species Act recovery planning process, nineteen nations and diverse conservation organizations are working together to protect this important and charismatic species.
- Primary threats to the jaguar throughout its range are loss of habitat, direct killing and depletion of its prey. The recovery plan identifies conservation activities in every country and region for addressing threats and sets goals for minimizing threats and establishing viable jaguar populations throughout their expansive range.
- The recovery plan proposes two corridors that are in remote and rugged countryside that can accommodate jaguar movements across the United States/Mexico border.
- Border interventions and operations in these areas, at present, are most practically addressed through surveillance and remote detection (electronics, towers, etc.). The U.S.-Mexico border is currently permeable to jaguar movement at these dispersal corridors, and continued work with the U.S. Customs and Border Protection (CBP) will remain important to allow for ongoing opportunities for cross-border movement of jaguars.

Secondary messages:

- The recovery plan describes two large jaguar recovery units – the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina and the Northwestern Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. *The plan recognizes that countries within the PARU will be the principal contributors to its recovery.* Through the NRU, the Service will continue to promote jaguar recovery throughout its range, as it has in the past.
- The final recovery plan focuses on the NRU because this is where the Service has legal jurisdiction. We also have close working relationships with Mexico on

behalf of the jaguar's recovery. The NRU includes jaguars that occupy the U.S. Southwest borderlands region. Since 1996, seven individual male jaguars have been documented in the United States (southern Arizona and southwestern New Mexico). These jaguars are believed to be expanding their range from the nearest core area and breeding population, which is approximately 130 miles south of the U.S.-Mexico border in Sonora. Recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity.

If-Asked Only Statements:

- The Service is working closely with federal and other partners to promote border security while protecting the jaguar and its habitat. The recovery plan proposes two corridors that are in particularly rugged countryside that can accommodate jaguar movements across the United States – Mexico border.
- The Service is not aware of any proposals to build new border fence on the Arizona border. Some existing fence is being replaced, but it is a direct replacement, not an upgrade from vehicle to pedestrian fence.]

The binational recovery team has not prescribed jaguar reintroductions in the United States. The recovery plan focuses on efforts to sustain habitat, eliminate poaching, maintain at least two borderland dispersal corridors, and improve human social acceptance of the jaguar to accommodate jaguars that disperse into the United States.

For additional background and approved messaging on role of CBP and the U.S. Border Patrol in the Jaguar Recovery Plan, see Appendix II below.

SECTION III: IMPLEMENTATION

8. Implementation timeline *(If not known, put TBD or the number of days/hours before/after the announcement*

Target Date	Tactic	Responsible
All times are in the Mountain (ET -2) time zone		
All dates and times are predicated on date determined for release of Final Recovery Plan		

At least 7 days prior to public announcement	Wildlife Conservation Society notification	Humphrey
2-3 days before announcement	Embargoed pitch to AP and/or national reporter(s)? Susan Montoya (AP)	Humphrey/Hires
Afternoon of signature (2 pm MT)	Notify New Mexico and Arizona fish and wildlife agency directors	Lueders or Millsap/Humphrey/McIntyre
Afternoon of signature (2 pm MT)	Notify AZ and NM congressional members, and congressional committees of anticipated availability	R2 Lesli Gray/CLA Alyssa Hausman
Afternoon of signature (2 pm MT)	Notify southern Arizona and New Mexico tribes of anticipated availability	Nystedt/Humphrey
Afternoon of signature (2 pm MT)	Confirm plan availability with recovery team member organizations	Alanen/Stanford
Morning after signature (8 am MT)	Post final recovery plan and news release to Arizona ES, ECOS, and R2 homepage	Kaplan/Crouse/ Campbell
Morning after signature (10 am MT)	Distribute news release to AZ, NM, Mexico, and international environmental news outlets	Humphrey
Morning after signature (10 am MT)	SMEs available for media response	Humphrey/Alanen/Stanford
Morning after signature (10 am MT)	Social media (Facebook) post	Barrus
Week after signature	[*Optional*] Provide written notification to affected parties, agencies	AESO

9. **Which communications tools are needed to support these strategies and tactics?** *(Be as specific as possible about the products identified and who will produce them)*

Tool	Responsible	Due Date
News Release	Humphrey	3/15/2019
Photos (www.flickr.com/photos/usfws_southwest/sets/72157632294203147/)	Humphrey	3/15/2019
"If-asked" border talking points	Humphrey	3/15/2019
Video support: www.fws.gov/southwest/es/arizona/Jaguar.htm	Humphrey	3/15/2019
Jaguar population maps	Alanen	3/15/2019
FAQs (FAQs presently in Item 7 (above) as if-asked only) can be converted into FAQs)	Humphrey	3/15/2019

10. **Social media plan** *(Provide a list of accounts to be used as well as sample hashtags, messages, multimedia and other links, etc. as appropriate)*

https://www.facebook.com/USFWSSouthwest?ref=mf

The Service and its partners in the binational Jaguar Recovery Team can recover the jaguar, but it will take time, effort and collaboration with partners across species' 19-country range. A recently released recovery plan sets goals for improving the species status across its range and provides a framework for achieving recovery.

Here in the Southwest, male jaguars from a core breeding population in Mexico occasionally occupy mountain ranges along our southern border with the country.

See more at: https://www.fws.gov/southwest/es/arizona/Jaguar.htm

11. **Stakeholder contact grids** *(For each, paste in a table that provides organization name, contact person, how the person will be contacted, phone or email address as appropriate and a name of the person who will be making contact)*

APPENDIX: ADDITIONAL BACKROUND INFORMATION AND MATERIALS

DO NOT PUT OTHER MATERIALS SUCH AS FAQs, NEWS RELEASE OR TALKING POINTS IN THIS SECTION. KEEP THOSE AS SEPARATE DOCUMENTS.

(Consider the following: What is the historical context? Does this relate to other issues that may not immediately be apparent (consider other programs and regions)? Is there a scientific basis to this issue? If so what is it?)

APPENDIX 1

Historical Context:

Following a 2009, Arizona District Court decision, FWS determined that developing a recovery plan for jaguars will contribute to their conservation (in recognition that most of the species' habitat and almost all individuals occur outside if the United States).

FWS reconfigured and expanded a binational Jaguar Recovery Team and charged them with developing a recovery outline, which they completed in April 2012. The FWS drew heavily from the data compiled in the recovery outline for the development of jaguar critical habitat designation (in the U.S.), which was finalized in March 2014.

Summary:

In 2010, a binational Jaguar Recovery Team was convened with experts and stakeholders from both the U.S. and Mexico to develop a jaguar recovery plan. The Recovery Plan considers the jaguar throughout its range, but primarily focuses on the Northwestern Recovery Unit (NRU), which extends from the southwestern U.S. to western Mexico. To achieve delisting, viable jaguar populations should be secured by protecting jaguars and their habitat; reducing human-caused mortality of jaguars, particularly retaliatory killing due to livestock depredation; improving, enacting, and/or enforcing effective laws that regulate illegal killing of jaguars, jaguar prey, and habitat loss; securing adequate funding to implement recovery actions; and maintaining and developing partnerships in the Americas, particularly in Mexico.

Regarding the role of the U.S. in recovering the jaguar, recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity. Actions to implement this involve identifying and mapping corridors and potential impediments to these linkages, along with developing and implementing strategies to maintain connectivity. Recovery actions to maintain connectivity and overall ecosystem/watershed health are ongoing in many areas in the U.S. by the U.S. Forest Service or Bureau of Land Management, where much of the linkage habitat into the U.S. occurs.

We received over 13,000 public comments on the draft Recovery Plan. We requested five peer reviews and received comments from two, both from Mexico. We also received comments from the Arizona Game and Fish Department, New Mexico Game and Fish Department, and the San Carlos Apache Tribe. We incorporated all substantive comments into the final Recovery Plan. If we did not incorporate substantive comments, we responded to them in our response to comments documents. Review of the Recovery Plan was also coordinated with the New Mexico Ecological Services Field Office, and Buenos Aires and San Bernardino National Wildlife Refuges.

MAIN DECISION OR MESSAGE: Due to past habitat loss, it is unlikely that jaguars will be fully self-sustaining throughout their historical range; however, conservation of key jaguar habitat and populations in their current range will be critical to the recovery of jaguars. We anticipate that it will take a minimum of 50 years to recover the jaguar. The estimated cost to recovery is $605,648,000 (among 19 countries over 50 years).

APPENDIX II

Jaguar Recovery Plan - Customs and Border Protection/U.S. Border Patrol Involvement
August 31, 2018

Customs and Border Protection (CBP) via U.S. Border Patrol (USBP) has been involved through all phases of jaguar draft and final recovery plan planning processes. In 2010, at the inception of the binational Jaguar Recovery Team (JRT), USBP was invited to serve as a member of the Implementation Subgroup of the JRT, as an official representative of USBP. Since 2010, USBP has had a member on the JRT through the present (Charles Trost).

CBP also has significantly financially supported several projects, described in Table 3 of the Jaguar Recovery Plan (JRP), that were conducted to inform important content for the Plan and implement recovery actions identified in the JRP. These projects include genetics studies, habitat modeling, jaguar surveying and monitoring, citizen science education and outreach, rancher incentives, road crossing designs, citizen attitude surveys, and portions of Population Viability Analyses (PVA and PHVA) (see Table 3 below).

USBP participated in many meetings to discuss and prepare the JRP, and did not express significant concerns about border issues. In the spirit of cooperation, CBP permitted FWS and Jaguar Recovery Team to use their GIS layers of the border to develop a map that illustrates degrees of border permeability (no fences, including a vehicle or pedestrian fence), and this information is illustrated on Figure 4 of the JRP. Both this figure and the JRP indicate that portions of the border are currently permeable to jaguar movement and that continued work between FWS and CBP will remain important to allow for ongoing opportunities for cross-border jaguar movement.

As part of outreach on the JRP, CBP was informed of the option to comment during the public comment period, and did not provide any comments. Throughout the development of the JRP, CBP has had opportunities to address border issues and through these and related actions CBP's and BP's concerns have been fully incorporated into the Jaguar Recovery Plan.

Table 3. Summary of U.S. Customs and Border Protection-funded projects and their conservation benefit to jaguars. NRU = Northwestern Recovery Unit for the jaguar. USFWS = U.S. Fish and Wildlife Service. Final reports of these projects can be found at https://www.fws.gov/southwest/es/arizona/Jaguar.htm.

Project	Final Deliverable(s)	Purpose/Conservation Benefit
Genetics	*Jaguar taxonomy and genetic diversity for southern Arizona, U.S., and Sonora, Mexico*	Investigates unique genetic diversity of jaguars at the northern edge of the range and answers taxonomic question of whether or not northern jaguars are a distinct subspecies
PVAs	*Population Viability Analysis for the Jaguar (Panthera onca) in the Northwestern Range*	Describes demographic viability of the jaguar metapopulation defined as the NRU
PVAs (cont.)	*Addendum: Population Viability Analysis for the Jaguar (Panthera onca) in the Northwestern Range*	Describes the structure, implementation, and interpretation of a new set of demographic simulations of jaguar population viability in core areas of the NRU
Habitat Modeling	*Digital Mapping in Support of Recovery Planning for the Northern Jaguar*	Assisted USFWS in digital mapping aspects of recovery planning for the northern jaguar (habitat models used in population viability analyses, above, and Recovery Outline for the Jaguar)
	Jaguar Habitat Modeling and Database Update	Updates jaguar database with additional observations, conducts analyses of different selections of jaguar observations, produces five revised versions of the habitat model (habitat models used in population viability analyses, above, as well as this Recovery Plan)
	jaguardata.info	Converts jaguar observations database to web-based platform allowing stakeholders, general public, and scientific community to search and access jaguar data; provides an interface for administrators to add, edit, and delete jaguar observations in the NRU
Jaguar Survey and Monitoring (U.S. portion of NRU)	*Jaguar Surveying and Monitoring in the United States: Final Report*	Culver (2016) provides results and analyses of the two-year investigation of jaguars, prey base, and habitat in the U.S. portion of the NRU to inform recovery planning; multiple photos of one jaguar (and three ocelots) provided to USFWS and posted on USFWS Flickr site
Jaguar Survey and Monitoring (Tohono O'odham Nation; TON)	*Jaguar Surveying and Monitoring on the Tohono O'odham Nation*	Provides results and analyses of surveys for jaguars and ocelots on the TON to inform recovery planning

Citizen Science, Education, Outreach, and Grant Writing	*Citizen Science Teams*	Developed and implementing a citizen science program to survey and monitor for jaguars within the U.S. portion of the NRU
	K-12 Jaguar Educational Curricula	Developed and implementing formal educational curricula on jaguar and ocelot conservation for different educational levels to promote an understanding of feline conservation
Citizen Science, Education, Outreach, and Grant Writing (cont.)	*Jaguar Conservation Outreach*	Developed and presented a PowerPoint presentation on jaguar and ocelot biology and conservation for the general public to promote an understanding of feline conservation
	Education and Outreach Materials	Developed posters, stickers, etc. to promote jaguar conservation within the NRU
	Grant Writing	Applied for funding opportunities to continue aspects of jaguar survey and monitoring effort currently being conducted, to continue and/or expand the volunteer citizen science program, and to continue and/or expand public outreach and school education programs
Rancher Incentive Program	*Complete Project Overview*	See http://udallcenter.arizona.edu/jaguarproject/ for project summary, additional information, and reports
	Assessment of Rancher Knowledge	Pilot assessment of nine ranch owner/manager's knowledge of jaguar conservation issues
	Ranch Owner/Manager Survey Questionnaire	Survey of ranch owner/manager knowledge about and attitudes toward jaguar conservation issues
	Results of Ranch Owner/Manager Survey Questionnaire	Summary of survey results included in Results of Rancher Workshops report (below); comprehensive analysis of data still to be published
	Report on PES sources	Conducted research policy analysis of payment for ecosystem services (PES) program and analysis of jaguar-friendly ranch management options for distribution; available at http://extension.arizona.edu/pubs/payments-ecosystem-services-southern-arizona-ranchers
	Rancher Workshops	Developed workshops to enhance rancher knowledge of jaguar conservation, jaguar friendly ranch management practices, and conservation incentive programs; as well as receive feedback from ranchers regarding incentive programs that may generate participation

	Brochures	Provides a simple program of actions for landowners to implement for promoting jaguar conservation on their lands
Survey of Residents' Attitudes on Jaguar Conservation	*Results of Survey of Residents' Attitudes on Jaguar Conservation*	Provides insights into attitudes, mores, and level of knowledge of stakeholders in the U.S. portion of the NRU regarding jaguars to understand what is needed from a social perspective to create an environment that is conducive to jaguar conservation
Jaguar Survey and Monitoring Protocol	*Review of Jaguar Survey and Monitoring Techniques and Methodologies* (English and Spanish)	Provides a review of literature on jaguar and, as appropriate, other large felid survey and monitoring techniques and methodologies
	Jaguar Survey and Monitoring Protocol (English and Spanish)	Provides a jaguar survey and monitoring protocol applicable in measuring occupancy recovery criteria (3.3.1.B.i. and 3.3.2.B.i.) in the NRU, as well as other areas rangewide
Review and Develop Recommendations for Road Crossing Designs	*Review of Road Passage Designs for Jaguars*	Conducts a review of enhancements (e.g., underpasses, overpasses, guiding fences, etc.) that allow for passage of large carnivores, particularly jaguars, across road corridors
	Road Passage Design Recommendations (English and Spanish)	Develops recommendations for enhancements (e.g., underpasses, overpasses, guiding fences, etc.) that allow for passage of jaguars across road corridors that would be effective in a variety of different habitat types in the NRU
	Road Passage Location Recommendations (English and Spanish)	Identifies potential areas in the NRU where enhancements (e.g., underpasses, overpasses, guiding fences, etc.) would improve the passage of jaguars across different types of road corridors that would be effective in a variety of different habitat types

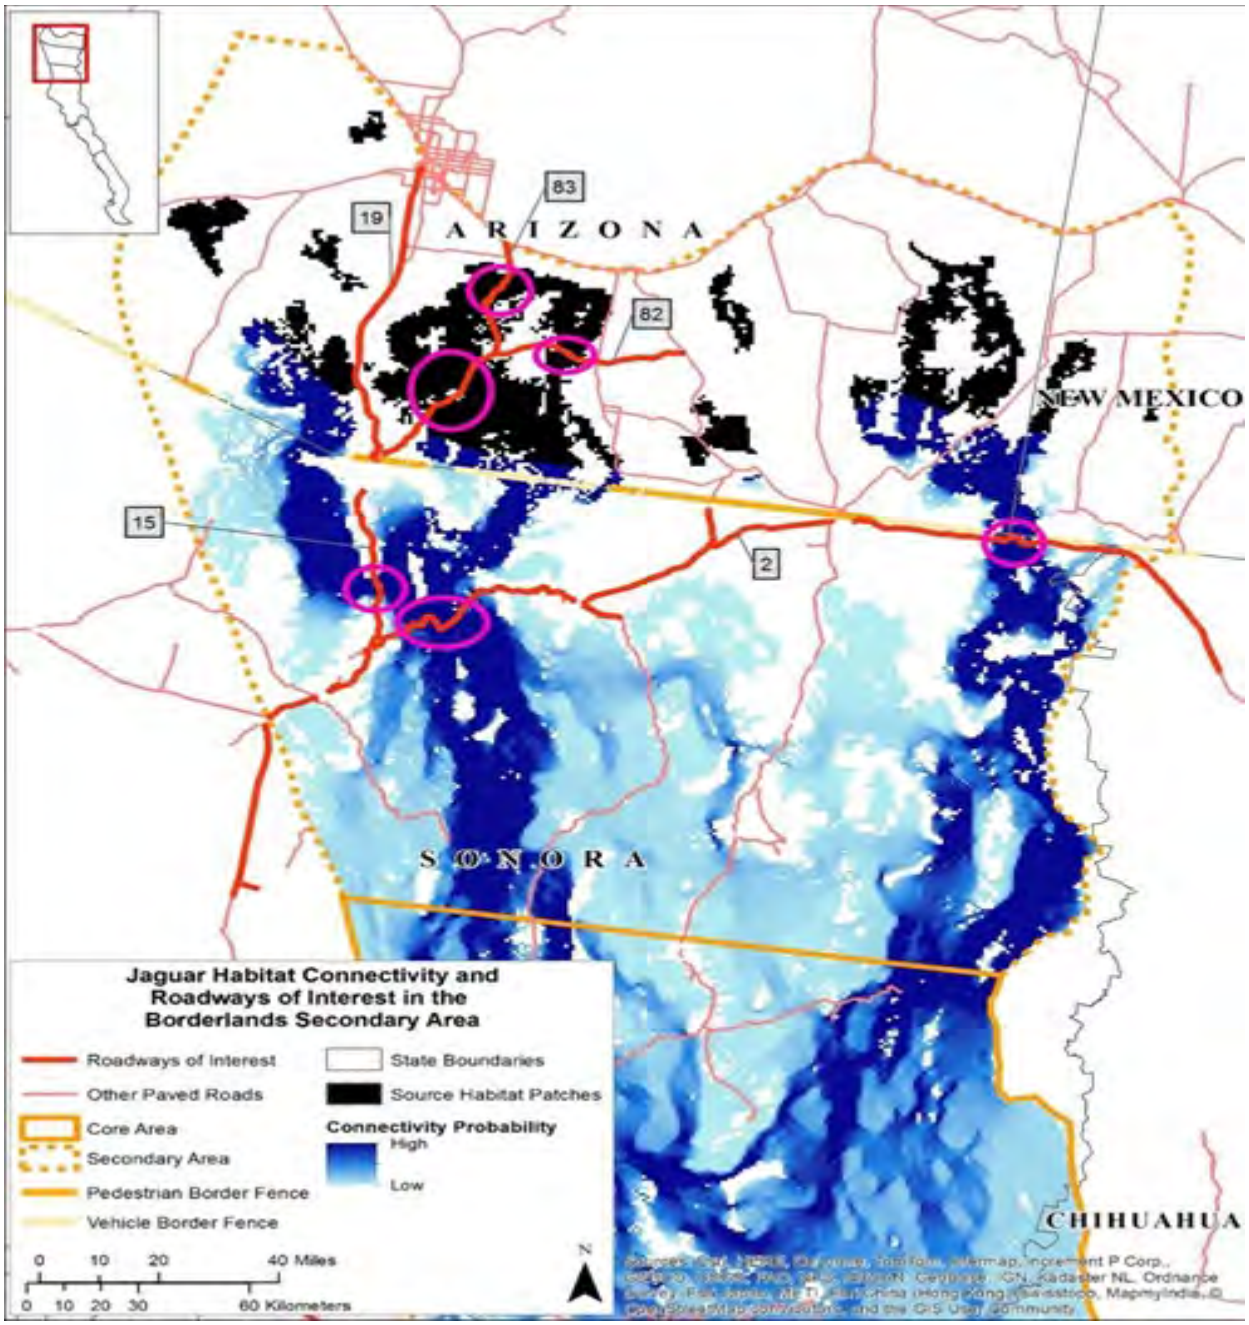

Figure 4. Map of habitat connectivity and roadways of interest in the Borderlands Secondary Area as modeled by Stoner et al. (2015) (some road segments in densely populated areas omitted). A visual examination of this connectivity model, which extends across the entirety of the Northwestern Recovery Unit, reveals three corridors that extend across the U.S.-Mexico border. These corridors are intersected by Mexico Federal Highways 2 and 15. U.S. State Routes 82 and 83 also intersect with "source" habitat patches (used for modeling purposes), which may impact jaguar habitat connectivity. These areas are good candidates for further assessment to determine the potential for road crossing mitigation structures.

Hi Charisa,

Please see attached requested items, for announcing the final jaguar recovery plan. Let me know you think they'd also like to see the actual final recovery plan as a PDF (it's a fairly large file). Thanks,

Brian

final recovery plan, that our regional office would like to announce this Thursday 4/11 or as soon as possible after that date.

As an FYI, It looks like this outreach has been with the Assistant Secretary's office since 4/4 in DTS. As a final recovery plan, this does not have a FR notice associated with it and we don't normally bring final recovery plans into HQ for review but this one is a high-profile species that touches on border wall issues.

Thanks in advance for helping us get this one over the finish line. Don't hesitate to write or call if you have any questions or follow up on anything.

BASIC COMMUNICATIONS STRATEGY

FOR ROUTINE NON-CONTROVERSIAL ANNOUNCEMENTS

SECTION I: GENERAL INFORMATION

1. **Title:** Final Recovery Plan for the Jaguar

2. **DTS number** 068832

3. **What is the action triggering this communications plan?** *(Please explain in no more than three sentences)*

   The Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar.

4. **What is the proposed date for this action? Why has it been selected? Is it flexible?**

   Proposed date for the announcement is April 11, 2019. The plan was signed by the Southwest Regional Director in July 2018; however, the announcement was delayed to accommodate extensive review and inter-agency coordination. The April 11 date allows for a final review by headquarters, notification of DOI, and facilitation of a coordinated rollout by the Jaguar Recovery Team (state, NGO, tribal and international partners.)

5. **Which office is leading this communications effort and which other programs, regions or groups are involved?**

   Region 2 External Affairs and Arizona Ecological Services Office. (The Conservation Planning Specialist Group and the Wildlife Conservation Society contributed substantially to technical aspects of the plan and will be available to contribute technical expertise.)

SECTION II: GOALS AND MESSAGES

6. **What story do we want to tell?**

   Reversing the decline of the jaguar (America's largest cat) is possible, but it will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States south to Argentina. The final recovery plan

sets goals for improving the species' status across its range and provides a framework whereby all stakeholders can align their efforts to achieve recovery. Critical to the recovery of the jaguar is conservation of key jaguar habitat (including core habitat areas and corridors) and populations. Due to past habitat loss, it is unlikely jaguars will be fully self-sustaining throughout their entire historical range. ~~We anticipate that it will take a minimum of 50 years to recover the jaguar.~~

7. **What are our key messages?** *(These should be top concepts that readers should take away, including an understanding of why this action matters and why they should care, not a list of facts, which should be placed in the appendix. List no more than four!)*

Primary messages:

- Reversing the decline of the jaguar -- America's largest wild cat -- is possible. It will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States to Argentina.
- Through the Endangered Species Act recovery planning process, nineteen nations and diverse conservation organizations are working together to protect this important and charismatic species.
- Primary threats to the jaguar throughout its range are loss of habitat, direct killing and depletion of its prey. The recovery plan identifies conservation activities in every country and region for addressing threats and sets goals for minimizing threats and establishing viable jaguar populations throughout their expansive range.
- The recovery plan proposes two corridors that are in remote and rugged countryside that can accommodate jaguar movements across the United States/Mexico border.
- Border interventions and operations in these areas, at present, are most practically addressed through surveillance and remote detection (electronics, towers, etc.). The U.S.-Mexico border is currently permeable to jaguar movement at these dispersal corridors, and continued work with the U.S. Customs and Border Protection (CBP) will remain important to allow for ongoing opportunities for cross-border movement of jaguars.

Secondary messages:

- The recovery plan describes two large jaguar recovery units – the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina and the Northwestern Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. *The plan recognizes that countries within the PARU will be the principal contributors to its recovery.* Through the NRU, the Service will continue to promote jaguar recovery throughout its range, as it has in the past.
- The final recovery plan focuses on the NRU because this is where the Service has legal jurisdiction. We also have close working relationships with Mexico on

behalf of the jaguar's recovery. The NRU includes jaguars that occupy the U.S. Southwest borderlands region. Since 1996, seven individual male jaguars have been documented in the United States (southern Arizona and southwestern New Mexico). These jaguars are believed to be expanding their range from the nearest core area and breeding population, which is approximately 130 miles south of the U.S.-Mexico border in Sonora. Recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity.

If-Asked Only Statements:

- The Service is working closely with federal and other partners to promote border security while protecting the jaguar and its habitat. The recovery plan proposes two corridors that are in particularly rugged countryside that can accommodate jaguar movements across the United States – Mexico border.
- The Service is not aware of any proposals to build new border fence on the Arizona border. Some existing fence is being replaced, but it is a direct replacement, not an upgrade from vehicle to pedestrian fence.]

The binational recovery team has not prescribed jaguar reintroductions in the United States. The recovery plan focuses on efforts to sustain habitat, eliminate poaching, maintain at least two borderland dispersal corridors, and improve human social acceptance of the jaguar to accommodate jaguars that disperse into the United States.

For additional background and approved messaging on role of CBP and the U.S. Border Patrol in the Jaguar Recovery Plan, see Appendix II below.

SECTION III: IMPLEMENTATION

8. Implementation timeline *(If not known, put TBD or the number of days/hours before/after the announcement*

Target Date	Tactic	Responsible
All times are in the Mountain (ET -2) time zone		
All dates and times are predicated on date determined for release of Final Recovery Plan		

At least 7 days prior to public announcement	Wildlife Conservation Society notification	Humphrey
2-3 days before announcement	Embargoed pitch to AP and/or national reporter(s)? Susan Montoya (AP)	Humphrey/Hires
Afternoon of signature (2 pm MT)	Notify New Mexico and Arizona fish and wildlife agency directors	Lueders or Millsap/Humphrey/McIntyre
Afternoon of signature (2 pm MT)	Notify AZ and NM congressional members, and congressional committees of anticipated availability	R2 Lesli Gray/CLA Alyssa Hausman
Afternoon of signature (2 pm MT)	Notify southern Arizona and New Mexico tribes of anticipated availability	Nystedt/Humphrey
Afternoon of signature (2 pm MT)	Confirm plan availability with recovery team member organizations	Alanen/Stanford
Morning after signature (8 am MT)	Post final recovery plan and news release to Arizona ES, ECOS, and R2 homepage	Kaplan/Crouse/ Campbell
Morning after signature (10 am MT)	Distribute news release to AZ, NM, Mexico, and international environmental news outlets	Humphrey
Morning after signature (10 am MT)	SMEs available for media response	Humphrey/Alanen/Stanford
Morning after signature (10 am MT)	Social media (Facebook) post	Barrus
Week after signature	[*Optional*] Provide written notification to affected parties, agencies	AESO

9. **Which communications tools are needed to support these strategies and tactics?** *(Be as specific as possible about the products identified and who will produce them)*

Tool	Responsible	Due Date
News Release	Humphrey	3/15/2019
Photos (www flickr.com/photos/usfws_southwest/sets/72157632294203147/)	Humphrey	3/15/2019
"If-asked" border talking points	Humphrey	3/15/2019
Video support: www fws.gov/southwest/es/arizona/Jaguar htm	Humphrey	3/15/2019
Jaguar population maps	Alanen	3/15/2019
FAQs (FAQs presently in Item 7 (above) as if-asked only) can be converted into FAQs)	Humphrey	3/15/2019

10. **Social media plan** *(Provide a list of accounts to be used as well as sample hashtags, messages, multimedia and other links, etc. as appropriate)*

https://www facebook.com/USFWSSouthwest?ref=mf

The Service and its partners in the binational Jaguar Recovery Team can recover the jaguar, but it will take time, effort and collaboration with partners across species' 19-country range. A recently released recovery plan sets goals for improving the species status across its range and provides a framework for achieving recovery.

Here in the Southwest, male jaguars from a core breeding population in Mexico occasionally occupy mountain ranges along our southern border with the country.

See more at: https://www fws.gov/southwest/es/arizona/Jaguar htm

11. **Stakeholder contact grids** *(For each, paste in a table that provides organization name, contact person, how the person will be contacted, phone or email address as appropriate and a name of the person who will be making contact)*

APPENDIX: ADDITIONAL BACKROUND INFORMATION AND MATERIALS

DO NOT PUT OTHER MATERIALS SUCH AS FAQs, NEWS RELEASE OR TALKING POINTS IN THIS SECTION. KEEP THOSE AS SEPARATE DOCUMENTS.

(Consider the following What is the historical context? Does this relate to other issues that may not immediately be apparent (consider other programs and regions)? Is there a scientific basis to this issue? If so what is it?)

APPENDIX 1

Historical Context:

Following a 2009, Arizona District Court decision, FWS determined that developing a recovery plan for jaguars will contribute to their conservation (in recognition that most of the species' habitat and almost all individuals occur outside if the United States).

FWS reconfigured and expanded a binational Jaguar Recovery Team and charged them with developing a recovery outline, which they completed in April 2012. The FWS drew heavily from the data compiled in the recovery outline for the development of jaguar critical habitat designation (in the U.S.), which was finalized in March 2014.

Summary:

In 2010, a binational Jaguar Recovery Team was convened with experts and stakeholders from both the U.S. and Mexico to develop a jaguar recovery plan. The Recovery Plan considers the jaguar throughout its range, but primarily focuses on the Northwestern Recovery Unit (NRU), which extends from the southwestern U.S. to western Mexico. To achieve delisting, viable jaguar populations should be secured by protecting jaguars and their habitat; reducing human-caused mortality of jaguars, particularly retaliatory killing

due to livestock depredation; improving, enacting, and/or enforcing effective laws that regulate illegal killing of jaguars, jaguar prey, and habitat loss; securing adequate funding to implement recovery actions; and maintaining and developing partnerships in the Americas, particularly in Mexico.

Regarding the role of the U.S. in recovering the jaguar, recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity. Actions to implement this involve identifying and mapping corridors and potential impediments to these linkages, along with developing and implementing strategies to maintain connectivity. Recovery actions to maintain connectivity and overall ecosystem/watershed health are ongoing in many areas in the U.S. by the U.S. Forest Service or Bureau of Land Management, where much of the linkage habitat into the U.S. occurs.

We received over 13,000 public comments on the draft Recovery Plan. We requested five peer reviews and received comments from two, both from Mexico. We also received comments from the Arizona Game and Fish Department, New Mexico Game and Fish Department, and the San Carlos Apache Tribe. We incorporated all substantive comments into the final Recovery Plan. If we did not incorporate substantive comments, we responded to them in our response to comments documents. Review of the Recovery Plan was also coordinated with the New Mexico Ecological Services Field Office, and Buenos Aires and San Bernardino National Wildlife Refuges.

MAIN DECISION OR MESSAGE: Due to past habitat loss, it is unlikely that jaguars will be fully self-sustaining throughout their historical range; however, conservation of key jaguar habitat and populations in their current range will be critical to the recovery of jaguars. We anticipate that it will take a minimum of 50 years to recover the jaguar. The estimated cost to recovery is $605,648,000 (among 19 countries over 50 years).

APPENDIX II

Jaguar Recovery Plan - Customs and Border Protection/U.S. Border Patrol Involvement
August 31, 2018

Customs and Border Protection (CBP) via U.S. Border Patrol (USBP) has been involved through all phases of jaguar draft and final recovery plan planning processes. In 2010, at the inception of the binational Jaguar Recovery Team (JRT), USBP was invited to serve as a member of the Implementation Subgroup of the JRT, as an official representative of

USBP. Since 2010, USBP has had a member on the JRT through the present (Charles Trost).

CBP also has significantly financially supported several projects, described in Table 3 of the Jaguar Recovery Plan (JRP), that were conducted to inform important content for the Plan and implement recovery actions identified in the JRP. These projects include genetics studies, habitat modeling, jaguar surveying and monitoring, citizen science education and outreach, rancher incentives, road crossing designs, citizen attitude surveys, and portions of Population Viability Analyses (PVA and PHVA) (see Table 3 below).

USBP participated in many meetings to discuss and prepare the JRP, and did not express significant concerns about border issues. In the spirit of cooperation, CBP permitted FWS and Jaguar Recovery Team to use their GIS layers of the border to develop a map that illustrates degrees of border permeability (no fences, including a vehicle or pedestrian fence), and this information is illustrated on Figure 4 of the JRP. Both this figure and the JRP indicate that portions of the border are currently permeable to jaguar movement and that continued work between FWS and CBP will remain important to allow for ongoing opportunities for cross-border jaguar movement.

As part of outreach on the JRP, CBP was informed of the option to comment during the public comment period, and did not provide any comments. Throughout the development of the JRP, CBP has had opportunities to address border issues and through these and related actions CBP's and BP's concerns have been fully incorporated into the Jaguar Recovery Plan.

Table 3. Summary of U.S. Customs and Border Protection-funded projects and their conservation benefit to jaguars. NRU = Northwestern Recovery Unit for the jaguar. USFWS = U.S. Fish and Wildlife Service. Final reports of these projects can be found at https://www.fws.gov/southwest/es/arizona/Jaguar.htm.

Project	Final Deliverable(s)	Purpose/Conservation Benefit
Genetics	*Jaguar taxonomy and genetic diversity for southern Arizona, U.S., and Sonora, Mexico*	Investigates unique genetic diversity of jaguars at the northern edge of the range and answers taxonomic question of whether or not northern jaguars are a distinct subspecies
PVAs	*Population Viability Analysis for the Jaguar (Panthera onca) in the Northwestern Range*	Describes demographic viability of the jaguar metapopulation defined as the NRU

PVAs (cont.)	*Addendum Population Viability Analysis for the Jaguar (Panthera onca) in the Northwestern Range*	Describes the structure, implementation, and interpretation of a new set of demographic simulations of jaguar population viability in core areas of the NRU
Habitat Modeling	*Digital Mapping in Support of Recovery Planning for the Northern Jaguar*	Assisted USFWS in digital mapping aspects of recovery planning for the northern jaguar (habitat models used in population viability analyses, above, and Recovery Outline for the Jaguar)
	Jaguar Habitat Modeling and Database Update	Updates jaguar database with additional observations, conducts analyses of different selections of jaguar observations, produces five revised versions of the habitat model (habitat models used in population viability analyses, above, as well as this Recovery Plan)
	jaguardata.info	Converts jaguar observations database to web-based platform allowing stakeholders, general public, and scientific community to search and access jaguar data; provides an interface for administrators to add, edit, and delete jaguar observations in the NRU
Jaguar Survey and Monitoring (U.S. portion of NRU)	*Jaguar Surveying and Monitoring in the United States Final Report*	Culver (2016) provides results and analyses of the two-year investigation of jaguars, prey base, and habitat in the U.S. portion of the NRU to inform recovery planning; multiple photos of one jaguar (and three ocelots) provided to USFWS and posted on USFWS Flickr site
Jaguar Survey and Monitoring (Tohono O'odham Nation; TON)	*Jaguar Surveying and Monitoring on the Tohono O'odham Nation*	Provides results and analyses of surveys for jaguars and ocelots on the TON to inform recovery planning
Citizen Science, Education, Outreach, and Grant Writing	*Citizen Science Teams*	Developed and implementing a citizen science program to survey and monitor for jaguars within the U.S. portion of the NRU
	K-12 Jaguar Educational Curricula	Developed and implementing formal educational curricula on jaguar and ocelot conservation for different educational levels to promote an understanding of feline conservation
Citizen Science, Education, Outreach, and Grant Writing (cont.)	*Jaguar Conservation Outreach*	Developed and presented a PowerPoint presentation on jaguar and ocelot biology and conservation for the general public to promote an understanding of feline conservation

	Education and Outreach Materials	Developed posters, stickers, etc. to promote jaguar conservation within the NRU
	Grant Writing	Applied for funding opportunities to continue aspects of jaguar survey and monitoring effort currently being conducted, to continue and/or expand the volunteer citizen science program, and to continue and/or expand public outreach and school education programs
Rancher Incentive Program	*Complete Project Overview*	See http://udallcenter.arizona.edu/jaguarproject/ for project summary, additional information, and reports
	Assessment of Rancher Knowledge	Pilot assessment of nine ranch owner/manager's knowledge of jaguar conservation issues
	Ranch Owner/Manager Survey Questionnaire	Survey of ranch owner/manager knowledge about and attitudes toward jaguar conservation issues
	Results of Ranch Owner/Manager Survey Questionnaire	Summary of survey results included in Results of Rancher Workshops report (below); comprehensive analysis of data still to be published
	Report on PES sources	Conducted research policy analysis of payment for ecosystem services (PES) program and analysis of jaguar-friendly ranch management options for distribution; available at http://extension.arizona.edu/pubs/payments-ecosystem-services-southern-arizona-ranchers
	Rancher Workshops	Developed workshops to enhance rancher knowledge of jaguar conservation, jaguar friendly ranch management practices, and conservation incentive programs; as well as receive feedback from ranchers regarding incentive programs that may generate participation
	Brochures	Provides a simple program of actions for landowners to implement for promoting jaguar conservation on their lands
Survey of Residents' Attitudes on Jaguar Conservation	*Results of Survey of Residents' Attitudes on Jaguar Conservation*	Provides insights into attitudes, mores, and level of knowledge of stakeholders in the U.S. portion of the NRU regarding jaguars to understand what is needed from a social perspective to create an environment that is conducive to jaguar conservation
Jaguar Survey and Monitoring Protocol	*Review of Jaguar Survey and Monitoring Techniques and Methodologies* (English and Spanish)	Provides a review of literature on jaguar and, as appropriate, other large felid survey and monitoring techniques and methodologies

	Jaguar Survey and Monitoring Protocol (English and Spanish)	Provides a jaguar survey and monitoring protocol applicable in measuring occupancy recovery criteria (3.3.1.B.i. and 3.3.2.B.i.) in the NRU, as well as other areas rangewide
Review and Develop Recommendations for Road Crossing Designs	*Review of Road Passage Designs for Jaguars*	Conducts a review of enhancements (e.g., underpasses, overpasses, guiding fences, etc.) that allow for passage of large carnivores, particularly jaguars, across road corridors
	Road Passage Design Recommendations (English and Spanish)	Develops recommendations for enhancements (e.g., underpasses, overpasses, guiding fences, etc.) that allow for passage of jaguars across road corridors that would be effective in a variety of different habitat types in the NRU
	Road Passage Location Recommendations (English and Spanish)	Identifies potential areas in the NRU where enhancements (e.g., underpasses, overpasses, guiding fences, etc.) would improve the passage of jaguars across different types of road corridors that would be effective in a variety of different habitat types

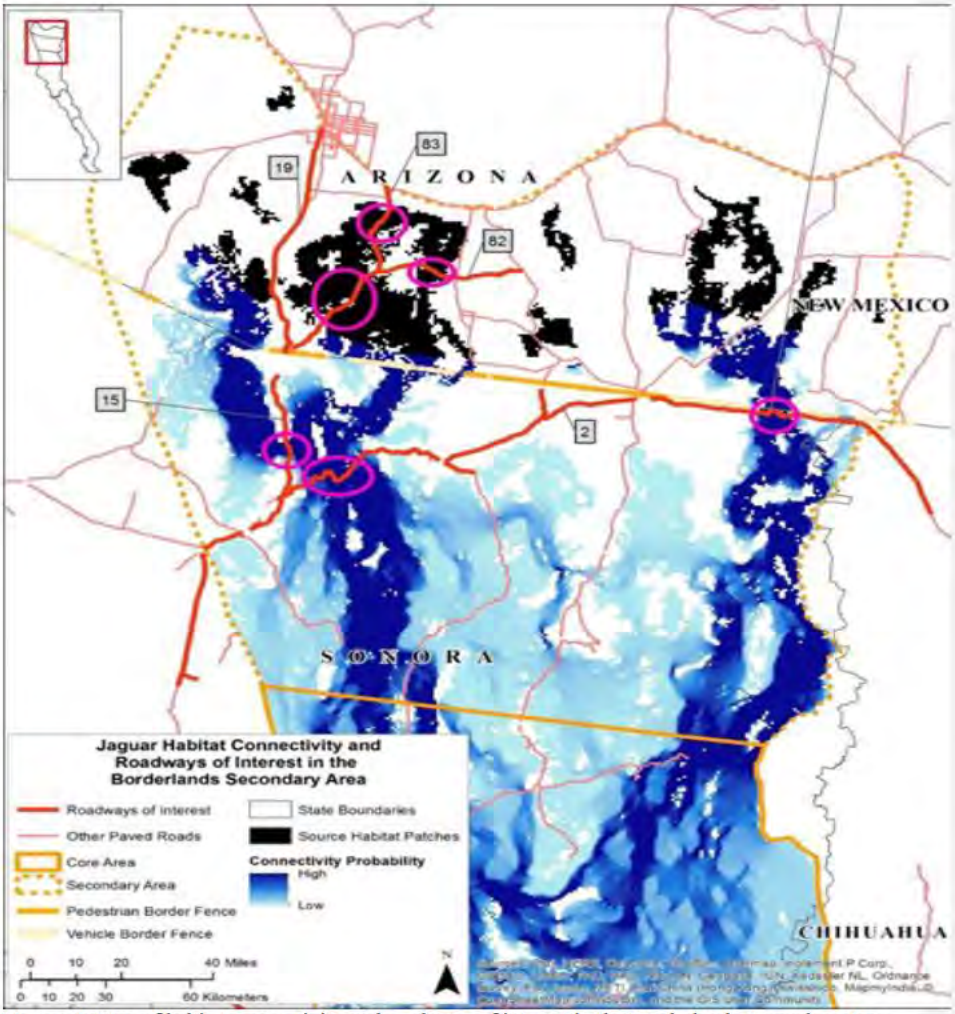

Figure 4. Map of habitat connectivity and roadways of interest in the Borderlands Secondary Area as modeled by Stoner et al. (2015) (some road segments in densely populated areas omitted). A visual examination of this connectivity model, which extends across the entirety of the Northwestern Recovery Unit, reveals three corridors that extend across the U.S.-Mexico border. These corridors are intersected by Mexico Federal Highways 2 and 15. U.S. State Routes 82 and 83 also intersect with "source" habitat patches (used for modeling purposes), which may impact jaguar habitat connectivity. These areas are good candidates for further assessment to determine the potential for road crossing mitigation structures.

U.S. Fish and Wildlife Service

Questions and Answers: Final Recovery Plan for the Jaguar

Arizona Ecological Services Field Office **www.fws.gov/southwest/es/arizona/**

For Release: [Enter date here]
Contacts: Jeff Humphrey 602-242-0210

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, America's largest wild cat. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States and recommends site-specific conservation actions that contribute to jaguar recovery across its range.

Q: What does the jaguar recovery plan tell us?

A: Reversing the decline of the jaguar is possible, but it will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States south to Argentina. The final recovery plan sets goals for improving the species' status across its range and provides a framework for aligning stakeholder efforts to achieve recovery. Critical to the recovery of the jaguar is conservation of key jaguar habitat (including core areas and connective corridors) and populations. Due to past habitat loss, it is unlikely jaguars will be fully self-sustaining throughout their entire historical range. ~~We anticipate that it will take a minimum of 50 years to recover the jaguar.~~

Q: What are the primary threats to the jaguar?

A: Loss of habitat, killing of individuals and depletion of prey throughout its range are the primary reasons for decreasing populations of jaguars. The recovery plan identifies conservation activities in every country and region for addressing each of these threats. It establishes goals for minimizing threats and for establishing viable populations throughout the jaguar's expansive range.

Q: What is a recovery plan?

A: Recovery plans are not regulatory but provide a framework for recovery of a species so protection under the ESA is no longer necessary. This recovery plan includes scientific information about the species and provides recovery criteria, conservation actions necessary for its recovery and delisting from the ESA and estimates of the time and cost to carry out the measures needed to achieve the plan's goal.

Q: What are the strategies for conserving and recovering the jaguar in the final recovery plan?

A: The recovery plan describes two large jaguar recovery units: the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina, and the Northwestern

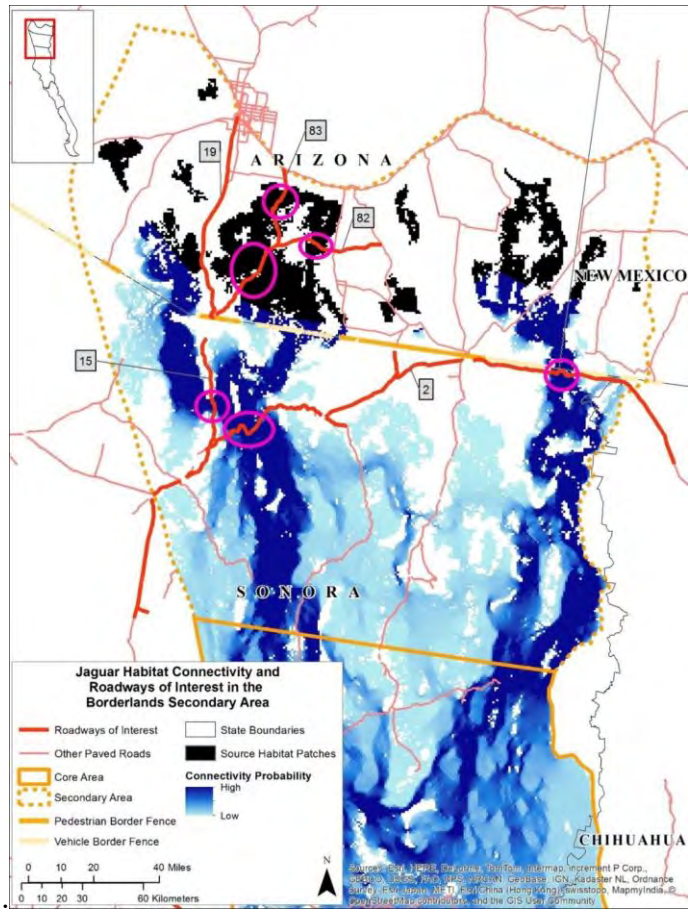
Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. The plan recognizes that countries within the PARU will be the principal contributors to jaguar recovery. As it has in the past, the Service will continue to promote jaguar recovery throughout the range of the jaguar.

The final recovery plan focuses on the NRU because this is where the Service has the most jurisdiction and has an established working relationship with Mexico. The NRU includes the jaguars that occupy the U.S. Southwest borderlands region. Since 1996, seven individual male jaguars have been documented in the United States (southern Arizona and southwestern New Mexico). These jaguars are believed to be expanding their range from the nearest core area and breeding population, which is approximately 130 miles south of the U.S.-Mexico border in Sonora. Recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity.

The binational recovery team has not prescribed jaguar reintroductions in the United States but focuses on efforts to sustain habitat, eliminate poaching, maintain at least two borderland dispersal corridors (see Figure 4 in the final recovery plan), and improve human social acceptance of the jaguar to accommodate jaguars that disperse into the United States.

Q: What are the borderland dispersal corridors referred to in the recovery plan and how critical are they to the recovery of jaguars in the United States?

A: Dispersal corridors are rugged, remote areas that presently male jaguars, presumably from the Sonora Core breeding area in Mexico, use to access secondary area habitat, a portion of which is in southern Arizona and New Mexico. These areas have been identified from habitat characteristics, historical records, recent sightings and photo monitoring in the United States and Mexico. (See Jaguar Habitat Connectivity and Identification of Potential Road Mitigation Locations in the NRU for the Jaguar report, as well as Figure 4 of the recovery plan.)



Continued jaguar access to habitat through transborder linkages is the sole mechanism identified in the recovery plan for continued jaguar occupation in the U.S. portion of the species' range. Maintaining this habitat connectivity is one of the recovery criteria for the Northwestern Recovery Unit. Research documents the importance of animal populations at the extremities of their ranges for the expansion and contraction of species' ranges and, ultimately, the long-term recovery of species.

These jaguar dispersal corridors are rugged and remote areas. Border interventions and operations in these areas, at present, are most practically addressed through surveillance and remote detection (electronics, towers, etc.). The U.S.-Mexico border is currently permeable to jaguar movement at these dispersal corridors. Continued work with the U.S. Customs and Border Protection (CBP) will remain important to allowing ongoing opportunities for cross-border movement of jaguars.

Q: How important is the recovery of jaguars in the United States to their overall recovery across their range?

A: The U.S. range of the jaguar represents the very northernmost edge of its 19-country range that extends all the way to South America. The U.S. range represents just one-tenth of 1 percent of its historic range.

Given that the jaguar is an international species with the vast majority of its range outside of the United States, primary actions to recover the jaguar will occur in other countries. Because more than 95 percent of the jaguar's habitat in the Northwestern Recovery Unit (NRU) is in Mexico, Mexico will be the primary contributor to the jaguar's recovery in the NRU. In the Pan-American Recovery Unit (PARU), countries within the jaguar's range will be the principal contributors to jaguar recovery.

The Service's limited resources are better applied to planning and on-the-ground implementation of conservation actions within the United States boundaries and in partnership with Mexico. Therefore, the Service and the Jaguar Recovery Team have established objective and measurable criteria for recovery and site-specific actions that, if implemented, will conserve viable jaguar populations in the northwestern portion of its range (e.g., the NRU). Priority is given to this unit because this is where the Service has the most jurisdiction, and we have an established working relationship with Mexico on issues of mutual concern.

Q: Was Customs and Border Patrol included in the developing of this plan?

A: Yes. U.S. Border Patrol (Tucson Sector) is represented on the Implementation Subgroup of the Jaguar Recovery Team. Other U.S. border area groups on the subgroup include ranchers, Malpais Borderlands Group, Altar Valley Conservation Alliance (ranching group), and state and federal land and wildlife managers.

Q: What are the actions and partnerships the Service is taking to support recovery of the jaguar in its primary range in 19 Central and South American countries?

A: In recent years, the Service's International Affairs Program has been at the forefront of supporting the conservation of jaguars throughout their range in Mexico, Central America and South America. During the past four years alone, we have supported 23 jaguar-related projects in 10 countries with more than $1 million in conservation funding. When jaguar habitat is conserved, many other species directly benefit.

In addition to providing incentives to protect habitat, many of the projects we support, seek to alleviate fears about jaguars in human communities through education. They also frequently provide landowners with concrete strategies and methods that reduce conflict in such a way that humans and jaguars can co-exist. As a result, landowners are better able to protect their livelihoods and economic interests while helping protect jaguars. They achieve these goals by discouraging jaguars from coming into contact with their livestock, by reforesting areas of their land, and by helping maintain the species' natural prey populations. Based on project reporting to date, most landowners who employ jaguar-friendly ranching techniques see a dramatic reduction in attacks and subsequent livestock mortality. A project in Paraguay has reduced cattle mortality from jaguar attacks by 80-100 percent at 12 sites that cover an area more than 770 square miles. Another project in the Maya Biosphere of Guatemala has reduced cattle mortality from jaguar attacks by approximately 70 percent at 283 properties, covering about 11,603 hectares of land now under improved management.

Q: What are the requirements for a full recovery of the jaguar?

A: The approach in this Recovery Plan is as follows:

- Two recovery units are included, the Northwestern Recovery Unit (NRU) and the larger Pan-American Recovery Unit (PARU). The NRU extends from south-central Arizona and extreme southwestern New Mexico, United States, south to Colima, Mexico. The PARU encompasses 18 countries from Mexico to Argentina. These units are further divided into core, secondary, and peripheral areas.
- The status of and threats to jaguars in the PARU are summarized and general actions and criteria for addressing these threats and evaluating rangewide recovery are recommended.
- Detailed criteria and actions necessary to recover jaguar populations in the NRU are provided.

The Service will consider removing the jaguar from the ESA list due to recovery when all of the following conditions are met:

A. PARU

i. The status of the jaguar changes to Least Concern (LC) and is maintained under the IUCN Red List criteria (as defined by the World Conservation Union, http://www.iucnredlist.org) for at least 20 more years after first qualifying for LC, which would mean threats have been reduced so the jaguar population is no longer at risk of a ≥ 30 percent decline because its area of occupancy, extent of occurrence, and/or habitat quality, as well as actual or potential levels of exploitation, have been stable for at least 40 years.

B. NRU

i. Maintain approximately 60 percent occupancy (proportion of cells) in each of the Core Areas over 40 years (inclusive of the 20 years required to downlist).

ii. Over 40 years, genetic distance (e.g., F_{ST} or G_{ST}) between the Sonora and Jalisco Core Areas does not significantly increase, and inbreeding coefficients (F_{IS} or G_{IS}) within each of the Sonora and Jalisco Core Areas do not significantly increase.

iii. During a period of 40 years, the average of at least 30 percent of the adult population within the Sonora and Jalisco Core Areas are female (based on data gathered through surveying, monitoring, genetic analysis, etc.).

iv. Agency policies and regulations (including transportation siting and design), land-use regulations, and landowner agreements in Mexico are sufficient to ensure the network of ≥ 100-km^2 blocks (the minimum area capable of supporting at least three breeding females) of high-quality habitat and habitat connections between blocks within each Core Area (Sonora and Jalisco) will support genetically and demographically viable jaguar populations for the foreseeable future.

v. Agency policies and regulations (including transportation), land-use regulations, and landowner agreements in Mexico are sufficient to ensure landscape permeability will be maintained for jaguars within the Sinaloa Secondary Area.

vi. Agency policies and regulations (including transportation), land-use regulations, and landowner agreements in the United States and Mexico are sufficient to ensure landscape permeability, including at least two trans-border linkages, will be maintained for jaguars throughout the Borderlands Secondary Area.

vii. The threat of direct human killing of jaguars is decreased or maintained at sustainable levels as measured by acceptable evidence or an index.

viii. Effective federal, state, tribal, and/or local laws are in place in the NRU that ensure killing of jaguars is prohibited or regulated so viable populations of the species can be maintained.

Service and Binational Team Complete ESA Recovery Plan for America's Largest Wild Cat

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final Endangered Species Act (ESA) recovery plan for the jaguar, currently listed under the Aact at endangered. The plan provides a recovery framework and goals for improving the species' status throughout its entire 19-country range while focusing on the jaguar populations in northwestern Mexico and the southwestern United States.

The final recovery plan describes two large jaguar recovery units – the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina, and the Northwestern Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. More than 99 percent of the jaguar's range is in Central and South America, so the plan recognizes that countries within the PARU will be the principal contributors to its recovery. The Service will continue to promote jaguar recovery throughout the range of the jaguar, including continued funding support.

The Service has established strong working relationships with state and local partners, conservation groups and the Mexican government. The binational recovery team has not prescribed jaguar reintroductions in the United States but calls for focusing efforts on sustaining potential habitat. In addition, the plan calls for establishing at least two borderland dispersal corridors for jaguars' continued movement through remote, rugged habitat between the countries, eliminating poaching, and improving social acceptance of the jaguar to accommodate their return to the United States.

"The binational recovery team's scientific expertise in protecting the jaguar has been invaluable," said Amy Lueders, the Service's Southwest Regional Director. "We recognize the challenges involved in conserving and recovering a species with such an expansive international range, and the team has laid out a comprehensive plan with goals that are achievable and realistic. We look forward to continuing to work with our diverse partners on this effort within and outside the United States."

Loss of habitat, direct killing of the cats, and depletion of prey are the primary factors contributing to the jaguar's current status and decreasing population trend. Due to past habitat loss, it is unlikely that jaguars will be fully self-sustaining throughout their entire historical range. However, conservation of key jaguar populations and habitat -- including core breeding and connective areas -- will be critical to jaguar recovery. ~~We anticipate it will take a minimum of 50 years to recover the jaguar.~~

Since 1996, seven individual male jaguars have been documented in the United States, all in southern Arizona and southwestern New Mexico. These jaguars are believed to have come from the nearest core area and breeding population, approximately 130 miles south of the U.S.-Mexico border in Sonora.

Across the jaguar's primary range in Latin America, the Service is actively working with countries and local partners to protect and recover the cat. Conservation efforts include providing incentives for protecting jaguar habitat and prey, education campaigns addressing misinformation and fears, and providing landowners with strategies for co-existing with jaguars.

Recovery plans are not regulatory but provide a framework for recovery of a species so protection under the ESA is no longer necessary. This recovery plan includes scientific information about the species and provides recovery criteria, conservation actions necessary for its recovery and delisting from the ESA and estimates of the time and cost to carry out the measures needed to achieve the plan's goal.

To achieve delisting, viable jaguar populations must be secured throughout their range. This will require protecting jaguar habitat quality and connectivity; providing incentives to protect jaguars and their habitat; reducing human-caused mortality of jaguars, particularly retaliatory killing due to livestock depredation; improving, enacting and/or enforcing effective laws that regulate illegal killing of jaguars, jaguar prey and habitat loss; securing adequate funding to implement recovery actions; and maintaining and developing partnerships in the Americas, particularly in Mexico. Once recovery is achieved and the jaguar is delisted, the states manage the species ~~These protections must remain in place after delisting~~ to ensure its ~~the~~ long-term viability~~. of the species.~~

The binational Jaguar Recovery Team includes representatives of CONANP (National Commission of Protected Areas in Mexico), CEDES (Commission of Ecology and Sustainable Development of the State of Sonora), U.S. Department of Agriculture APHIS Wildlife Services and U.S. Forest Service, Bureau of Land Management, U.S. Border Patrol, Arizona Game and Fish Department, New Mexico Department of Game and Fish, Tohono O'odham Nation, Altar Valley Conservation Alliance, Malpai Borderlands Group, Naturalia, Panthera and several ranchers, landowners, stakeholders and universities in Mexico and the United States. Additionally, the Conservation Planning Specialist Group and the Wildlife Conservation Society contributed substantially to technical aspects of the recovery plan.

The Jaguar Recovery Plan is available at: https://www.fws.gov/southwest/es/arizona/Jaguar.htm or by request from Field Supervisor, U.S. Fish and Wildlife Service, Arizona Ecological Services Office, 9828 North 31st Avenue, #C3, Phoenix, AZ 85051–2517; phone 602/242-0210.

MEMORANDUM OF UNDERSTANDING
BETWEEN THE
UNITED STATES CUSTOMS AND BORDER PROTECTION
AND THE
U.S. FISH AND WILDLIFE SERVICE

Regarding Implementation of Executive Order 13186: "Responsibilities of Federal Agencies to Protect Migratory Birds"

This Memorandum of Understanding (MOU) is entered into between the U.S. Customs and Border Protection (CBP) and the U.S. Fish and Wildlife Service (FWS), herein collectively referred to as the Parties.

A. Purpose and Scope

The Parties enter into this MOU pursuant to Executive Order (EO) 13186 (66 FR 3853, Jan. 17, 2001) concerning the responsibilities of Federal agencies to protect migratory birds. The EO directs executive departments and agencies to take certain actions to further implement the Migratory Bird Treaty Act (MBTA)[1]. This MOU focuses on avoiding and minimizing adverse impacts on migratory birds and strengthening migratory bird conservation through enhanced collaboration between the Parties. This MOU does not waive any applicable legal requirements and does not authorize the take of migratory birds.

B. Authority

The Parties enter into this MOU under the provisions of the following laws and other authorities available to the Parties:

- Bald and Golden Eagle Protection Act (Eagle Act) of 1940, as amended (16 U.S.C. 668–668d);
- Coastal Zone Management Act (CZMA), as amended (16 U.S.C. 1451–1466);
- Endangered Species Act (ESA) of 1973, as amended (16 U.S.C. 1531–1544);
- Executive Order 13186, Responsibilities of Federal Agencies to Protect Migratory Birds, 2001 (66 Fed. Reg. 3853, Jan. 17, 2001);
- Federal Water Pollution Control Act (Clean Water Act), as amended (33 U.S.C.

[1] This MOU focuses on improving bird conservation actions under the provisions of the MBTA. However, some birds are protected by other environmental laws and associated regulations such as the Endangered Species Act (ESA) and the Bald and Golden Eagle Protection Act (Eagle Act). As such, the coordination, permitting procedures; and requirements under these statutes are different. Therefore, if migratory bird species also covered by the ESA or the Eagle Act are present, CBP should coordinate with FWS to ensure compliance with the specific considerations of these statutes.

1251–1388);
- Fish and Wildlife Act of 1956, as amended (16 U.S.C. 742a–j-2 *et seq*.);
- Fish and Wildlife Conservation Act of 1980, as amended (16 U.S.C. 2901–2911);
- Fish and Wildlife Coordination Act of 1980, as amended (16 U.S.C. 661–667d);
- Fish and Wildlife Improvement Act of 1978, as amended (16 U.S.C. 742l);
- Migratory Bird Conservation Act of 1929, as amended (16 U.S.C. 715–715r);
- Migratory Bird Treaty Act of 1918, as amended (16 U.S.C. 703–712); and
- National Environmental Policy Act (NEPA) of 1969, as amended (42 U.S.C. 4321–4347).

C. Missions of Both Parties

CBP

CBP is the largest federal law enforcement agency of the U.S. Department of Homeland Security (DHS) charged with the dual mission of securing the Nation's borders while facilitating legitimate trade and travel. As the guardian of U.S. borders, CBP protects approximately 4,000 miles of the international border between the contiguous United States and Canada, as well as 1,000 miles between Alaska and Canada, 1,900 miles of international border with Mexico, and 95,000 miles of shoreline in the contiguous United States.

CBP serves as the front line in defending the United States against terrorists and instruments of terror and protects the economic security of the United States by regulating and facilitating the lawful movement of goods and people across the U.S. border. CBP protects the U.S. economy by enforcing trade laws, intellectual property rights, and collection of revenue on goods imported into the United States; protects the food supply and agricultural industry from pests and disease; and increases the security of our airspace. CBP accomplishes its goals by:

- Effective targeting - each year, more than 11 million maritime containers arrive at U.S. seaports. At land borders, another 11 million containers arrive by truck and 2.7 million by rail. CBP is responsible for knowing the contents of these containers and any safety issues they might pose to the American people. In addition, CBP assesses all people and cargo entering the United States from abroad for terrorist risk.

- Enforcing trade laws – CBP works with internal and external stakeholders to facilitate legitimate trade and address areas of non-compliance while effectively communicating the terms of trade agreements and preferential trade legislation. CBP enforces import and export laws at port-of-entry locations under provisions of the Migratory Bird Treaty Act and the Endangered Species Act. CBP inspects for potential signs of violation of environmental laws such as transnational smuggling of migratory bird parts, invasive species, or other wildlife items. CBP also confirms that all cargo is legally possessed and collects proper revenues for imports.

- Fostering legitimate and safe travel - a key goal of CBP, which increases passenger security through effective risk assessment.

- Inspection technology and equipment - given the magnitude of CBP's responsibility, the development and deployment of sophisticated detection technology is essential. Deployment of nonintrusive inspection technologies is increasing. These technologies are viewed as "force multipliers" that enable CBP officers to screen or examine a larger portion of the stream of commercial traffic. CBP does not rely on any single technology or inspection process. Instead, officers and agents use various technologies in different combinations to substantially increase the likelihood that terrorist weapons, including a nuclear or radiological weapon, will be detected and interdicted.

- Outbound inspections: Keeping weapons and money out of terrorist hands - CBP has the authority to search outbound as well as inbound shipments and uses targeting to carry out its mission in this area. Targeting of outbound shipments and people is a multi-dimensional effort that is enhanced by interagency cooperation.

- Protecting border areas between official ports of entry - Border Patrol agents and Air and Marine Operations personnel are securing areas between the ports of entry by implementing a comprehensive border enforcement strategy, expanding, integrating, and coordinating the use of technology and communications.

In carrying out its statutory mandate to control and guard the border of the United States, CBP performs a number of operational, administrative, and management-related activities and projects that potentially impact migratory birds and their habitat. These activities include, but are not limited to, construction, demolition, operation, maintenance, and repair of:

- Facilities - defined as ports of entry, U.S. Border Patrol Stations, forward operating bases, Air and Marine Operations Facilities, Customs Quarters (housing), camps, checkpoints, or other CBP operated installations, which consists of the land, buildings, on-site roadways, and parking lots that CBP owns, leases, or uses as free space.

- Tactical infrastructure - defined by CBP as any physical component designed to consistently slow, delay, and act as an obstacle to illegal cross-border activity. These components include: fences and gates; roads; bridges, crossovers, and low-water crossings; drainage management structures; boat ramps; lighting and ancillary power systems; remote surveillance systems; mobile detection and inspection technologies and equipment; underground sensors; traffic checkpoints; license-plate readers; and barriers to prohibit illegal vehicle entry.

- Towers and aerostats with infrastructure - to support communications and surveillance activities. This includes fixed-site, tether-controlled approximately 200 foot-long aerostats operating up to 10,000 feet Mean Sea Level (MSL) and smaller relocatable aerostats tethered up to 5000 feet Above Ground Level (AGL) from under 200-foot tower

systems.

- Landscape and vegetation maintenance - to support surveillance activities and Border Patrol safety by improving line of sight and reducing physical obstacles when monitoring cross-border activity.

CBP is committed to executing its mission in an environmentally responsible manner and in compliance with environmental laws, regulations, and EOs, including EO 13186. As part of CBP's commitment to migratory bird conservation, CBP prepared a Migratory Bird Treaty Act Handbook to meet its responsibility to avoid and minimize negative effects to migratory birds and/or their habitats.

FWS

The mission of the FWS is to work with others to conserve, protect, manage, and enhance fish, wildlife, plants, and their habitats for the continuing benefit of the American people. The FWS Migratory Bird Program serves as the focal point in the United States for policy development and strategic planning, program implementation, and evaluation of actions designed to conserve migratory birds and their habitats.

The FWS is legally mandated to implement the conservation provisions of the MBTA, which includes responsibilities for managing migratory bird populations, domestic and international coordination, and the development and enforcement of regulations. The Migratory Bird Conservation Act and the Fish and Wildlife Coordination Act mandate migratory bird habitat conservation including habitat protection through acquisition, enhancement, and/or management, and avoidance and minimization of impacts.

FWS programs that involve bird conservation activities include:

1. The Division of Migratory Bird Management and the Migratory Bird Programs in the FWS Regional Offices serve as focal points for policy development and strategic planning. These offices develop and implement monitoring and management initiatives and issue permits for intentional take. Migratory Bird Programs help maintain healthy populations of migratory birds and their habitats to provide continued opportunities for citizens to enjoy bird-related recreation.

2. The Division of Bird Habitat Conservation is instrumental in supporting habitat conservation partnerships through the administration of bird conservation grant programs and development of Joint Ventures that serve as major vehicles for implementing the various bird conservation plans across the country.

3. Ecological Services Field Offices across the country serve as the primary contacts for technical assistance and environmental reviews of projects involving migratory bird issues. The Field Offices coordinate with the Regional FWS Migratory Bird Offices, as necessary,

during these reviews, regarding permits and overall migratory bird conservation strategies.

4. The Office of Law Enforcement (OLE) is the principal FWS program that enforces the legal provisions of the MBTA, Eagle Act, ESA, and other laws pertaining to migratory bird conservation.

5. The Convention on International Trade in Endangered Species (CITES) provides the basis for international cooperation and collaboration to ensure trade does not contribute to decline in wild populations of animals and plants, including protected bird species. All documents must be validated or certified by an officially recognized, originating country CITES-inspection authority at the time of export. FWS receives inspection documentation on all regulated CITES commodities including migratory birds and migratory bird parts after CBP completes its inspections.

6. The National Wildlife Refuge System manages National Wildlife Refuges, Waterfowl Protection Areas, and Wetland Management Districts across the country. Many units of this system were established to protect and conserve migratory birds. Refuges not only protect important habitat, but also focus on monitoring migratory bird populations and native habitat restoration for the benefit of migratory birds. The Division of Refuge Law Enforcement enforces the legal provisions of wildlife laws on National Wildlife Refuges, Waterfowl Production Areas, and National Fisheries. The Division of Refuge Law Enforcement also assists OLE when needed.

7. The Science Applications program works with other Service programs and partners to ensure that the necessary science, tools, and capacity are available for planning and implementing the most efficient and effective best management practices (BMPs) to protect fish and wildlife including migratory birds. They facilitate regional self-directed science management partnerships called Landscape Conservation Cooperatives to develop and apply shared science capacity to conservation.

D. Statement of Mutual Interest and Benefit

Both Parties agree that migratory birds are important components of biological diversity. Their conservation will help to sustain ecological integrity and serve the public demand for outdoor recreation, conservation education, wildlife viewing, and hunting opportunities. Further, the Parties agree that it is important to identify measures that will: 1) promote migratory bird conservation; 2) avoid and minimize negative effects to migratory birds and their habitats; and 3) recognize that actions that may provide long-term benefits to migratory bird populations as a whole may result in short-term negative effects on individual birds. It is in the interest of both Parties that potential impacts, direct and indirect, are thoroughly assessed and unavoidable impacts are appropriately mitigated.

Nothing in this MOU is intended to prevent Border Patrol agents from exercising existing exigent/emergency authorities to access lands, including authority to conduct motorized off-road pursuit of cross border violators at any time.

E. Obligations of Both Parties

To the extent allowed by law, subject to the availability of appropriations and within administration budgetary limits, and in accord with the CBP and FWS missions and capabilities, each Party shall:

1. Support the conservation intent of EO 13186 and the migratory bird conventions, to the extent practicable, by: 1) integrating bird conservation principles, measures, and practices into agency actions, and 2) avoiding and minimizing negative effects on migratory birds and their habitat.

2. Develop BMPs and implement accepted BMPs that are consistent with EO 13186 resulting in the avoidance, minimization, and reduction of negative effects on migratory birds and their habitat.

3. Promote economic and recreational value of birds to the general public as appropriate by developing and integrating information on migratory birds and their habitats into environmental studies, outreach, and education materials.

4. To the extent practicable, protect, restore, and enhance habitat of migratory birds on facilities and lands administered (controlled or leased) by CBP and prevent and minimize the loss or degradation of remaining natural habitats. This includes:

    a. Collaboration on development and implementation of management practices to avoid and minimize negative effects on migratory bird populations and/or their migration, breeding, nesting, foraging, staging, or wintering habitats.

    b. Working collaboratively with other Federal and State agencies, Tribes, non-governmental organizations, private landowners, and other partners, where appropriate, in joint efforts to identify, protect, restore, enhance, monitor, and manage important migratory bird areas (e.g., Important Bird Areas, other significant bird sites that occur on CBP properties) potentially affected by agency actions, focusing efforts in areas of current or future project activities.

5. Promote research and information exchange related to migratory bird conservation including inventorying and monitoring, developing studies related to agency decisions and management practices that may impact migratory birds, and information on environmental contaminants and other physical and biological stressors that are relevant to the conservation of migratory birds. Share information through online tools such as the Avian Knowledge Network (AKN) and Information, Planning, and Conservation (IPaC) decision support

system. The Parties agree to:

a. As practicable and compatible with other study needs and program mandates, collaborate in developing studies: 1) on migratory bird species that may be potentially affected by agency actions, with an emphasis on Birds of Conservation Concern; 2) on the effects of management activities; 3) on avoiding and minimizing degradation of migratory bird habitat; and 4) on creating a framework for implementing appropriate mitigation measures for CBP actions that will negatively effect migratory birds.

b. Identifying BMPs for: 1) avoiding and minimizing negative effects on migratory birds and their habitat; 2) conserving and restoring migratory bird habitats; 3) promoting bird conservation; and 4) inventorying and monitoring migratory birds. Feasible BMPs will be incorporated into online tools, job aids, guidance, and agency policy documents where appropriate.

c. Developing partnerships to further migratory bird conservation, as practicable. This includes cooperation, coordination, and data sharing with other Federal or State agencies, universities, potential developers or their contractors, and nongovernmental organizations involved in monitoring and research studies to provide reliable and comparable information on the distribution and abundance or status and trends of migratory bird populations. Utilize and contribute information to online data sharing sites, such as AKN or IPaC.

d. Promoting the implementation of existing regional or national inventory and monitoring programs and systems such as Breeding Bird Survey (BBS), eBIRD, Christmas Bird Counts, bird atlas projects, or migratory game bird surveys when practicable.

e. Collaborating on studies and research to understand the effects of agency actions on migratory birds, and monitoring bird population responses to BMPs once these practices have been developed and implemented.

f. Contributing information on migratory bird resources to partners developing outreach and education materials and activities.

6. Promoting training opportunities in the most appropriate methods and techniques to: 1) increase migratory bird conservation awareness in compliance with applicable legislation, regulations, and policies; 2) evaluate impacts of projects on migratory birds; and 3) develop management practices that avoid and minimize adverse impacts and promote beneficial proactive approaches to migratory bird conservation.

7. As new information on effectiveness of BMPs become available, evaluate the measures described in this MOU intended to protect, restore, and enhance migratory bird populations and their habitats, including avoiding and minimizing adverse impacts to migratory birds. The FWS Division of Migratory Bird Management, FWS Ecological Services Offices and

CBP agree to design and implement feasible and effective BMPs.

8. Participate, as appropriate, in the interagency Council for the Conservation of Migratory Birds (through DHS representatives) to share information on the conservation of migratory birds. The Council's duties include:

    a. Sharing the latest resource information to assist in the conservation and management of migratory birds.

    b. Developing an annual report of accomplishments and recommendations related to EO 13186. CBP will provide information to be incorporated in the DHS highlighted page.

    c. Fostering partnerships to further the goals of EO 13186.

    d. When appropriate, CBP can nominate a project that exemplifies the implementation of EO 13186 for consideration of the Presidential Migratory Bird Federal Stewardship Award for contributions to the protection of migratory birds.

F. CBP Obligations:

The appropriateness and practicality of implementing any specific conservation measure that reduces negative effects on migratory birds and destruction of migratory bird habitat will be determined on a case-by-case basis. Best management practices (BMPs) have been developed to benefit a variety of migratory bird species and their associated habitats. CBP will work cooperatively with FWS to provide information on existing BMPs, develop new BMPs as needed, and provide recommendations regarding feasible BMPs for CBP projects and actions that have the potential to negatively affect migratory birds. To the extent allowed by law, subject to the availability of appropriations and within Administration budgetary limits, and consistent with CBP missions and capabilities, CBP shall:

1) Follow CBP guidance as outlined in the internal *CBP Migratory Bird Treaty Act Handbook for CBP Preparers* (Sept. 4, 2013) regarding CBP's responsibility to avoid and minimize negative effects to migratory birds and/or their habitats pursuant to the MBTA and EO 13186.

2) Prior to starting CBP activities that are associated with general BMP measures (described in #9), utilize credible online tools such as IPaC and AKN to identify activities that are likely to result in negative effects on migratory birds. If additional information is needed, CBP shall engage in early planning and scoping with the FWS to identify migratory bird species likely to occur in areas affected by a proposed action.

3) Integrate migratory bird conservation principles, measures, and practices into agency activities. Avoid and minimize, to the extent practicable, adverse impacts on migratory bird

resources when conducting agency actions, in compliance with, and supporting the purposes of the MBTA, the Eagle Act, the ESA, NEPA, and other applicable statutes.

4) During the NEPA process CBP will assess the potential adverse impacts of proposed actions on migratory birds and their habitat, proactively address migratory bird conservation (including conservation measures in budgeting), initiate appropriate actions to avoid and minimize negative effects on migratory birds, and assess and document effects on species of concern. CBP will use the best available demographic, population, and/or habitat association data in the assessment of effects on species of concern.

5) To the extent practicable, protect, restore, and enhance habitat of migratory birds on facilities and lands administered (controlled or leased) by CBP and prevent and minimize the loss or degradation of remaining natural habitats. This includes the following:

    a) Prevent, contain, or abate pollution detrimental to migratory birds and their habitats.

    b) Prevent or abate detrimental alteration of migratory bird habitats, to the extent practicable.

    c) Communicate with FWS, as practicable, to resolve any negative effects on migratory birds occurring during immediate actions taken by CBP to respond to exigent/emergency situations involving human life, health, safety of persons, posing threat to national security. Examples of such CBP actions include pursuit of cross-border violators, search and rescue, response to credible threat, or, in some cases, emergency repair of certain strategic communications equipment. Communication may occur through most expedient channels including through coordination with uniformed FWS law enforcement personnel.

6) Implement the following approaches for avoiding and minimizing negative effects on migratory birds, focusing first on species of concern, priority habitats, and key risk factors:

    a) Assess and estimate the effects of proposed actions on migratory birds and their habitats through the project planning process (include this analysis in the NEPA document associated with the proposed action whenever possible). Use best available demographic, population, behavioral, and habitat data in the assessment of effects upon migratory birds. If sufficient data are unavailable, attempt to acquire necessary data by working with Federal, State, and other partners. Utilize online tools, such as AKN, for obtaining geospatial and biological data, and IPaC to obtain information regarding practices relating to geospatial data necessary to support the impact analysis.

    b) Evaluate, through the NEPA process, a reasonable range of alternatives in environmental reviews and, as applicable, incorporate practices to avoid and minimize adverse effects to migratory birds or degradation of habitats consistent with CBP's primary mission to protect the Nation's borders and facilitate legitimate trade and travel. Develop practices,

in coordination with FWS, to avoid and minimize impacts to migratory birds and their habitat and determine how to improve evaluation of impacts.

c) Work collaboratively with FWS and other partners, and develop partnerships with non-federal entities, to monitor migratory birds, as resources allow and within the agency's capabilities and authorities, to improve and better understand the need for, and effectiveness of, conservation efforts tied to projects under CBP authority.

7) Encourage incorporation of comprehensive migratory bird management objectives and BMPs in CBP environmental planning and guiding documents, including MBTA Handbook, ESA Handbook, NEPA Handbook, and other environmental documents consistent with NEPA, CEQ regulations, and other Federal environmental mandates.

8) Comply with applicable Federal migratory bird permitting requirements for activities subject to 50 CFR Part 21. While working through the permitting process with FWS, CBP will, to the maximum extent practicable, avoid and minimize the intentional take of migratory bird species, with an emphasis on species of concern, and, if necessary, develop standards and procedures regarding such take.

9) Develop BMPs to avoid and minimize negative effects on migratory birds or migratory bird habitat. The agreed-upon practices should be documented through the NEPA process. These BMPs should emphasize taking steps to avoid and minimize any potential impacts of known stressors associated with the proposed action on migratory birds, which will in turn reduce threats and assist with meeting migratory-bird conservation goals. Examples of BMPs include, but are not limited to:

a) General measures:
   i) Avoid construction, demolition, installation, and maintenance activities during migratory bird nesting/breeding season to the extent practicable. Where project work cannot occur outside the migratory bird nesting season, conduct surveys prior to scheduled activity to determine if active nests are present within the area of impact. Generally, the surveys should be conducted no more than five days prior to scheduled activity. If active nests are identified within or in the vicinity of a project site, avoid the site if practicable until nestlings have fledged or the nest fails. Coordinate with FWS if an active nest needs to be removed or relocated.
   ii) Limit roadside food source or habitat plantings (including landscaping projects near roads) to trees that do not bear fruit (e.g., choosing not to plant attractants like serviceberries, wild cherries, and spicebush, etc.).
   iii) Stay within existing roads and trails to the extent feasible. For motorized off-road pursuits, CBP will use the least intrusive or damaging motorized vehicle readily available, without compromising agent or officer safety. In accordance with the principles of the 2006 MOU (Memorandum of Understanding Among U. S. Department of Homeland Security and U. S. Department of the Interior and U. S. Department of Agriculture Regarding Cooperative National Security and

Counterterrorism Efforts on Federal Lands along the United States' Borders), between CBP-BP and the Department of the Interior (DOI) for Cooperative National Security and Counterterrorism Efforts on Federal Lands along the United States' Border, agents and officers will use their professional judgment in each specific situation based on available evidence to conclude if motorized off-road pursuit is reasonably expected to result in the apprehension of suspected cross-border violators.

iv) Avoid vegetation removal, trimming, and maintenance (e.g., general landscaping activities, tree trimming, grubbing, etc.) during the nesting season to the extent practicable consistent with USBP operational needs to maintain clear lines of sight to the border in key areas of illegal cross-border traffic and otherwise where citizen and agent safety and security is at risk. Periodic vegetation maintenance (e.g. grass mowing once a week) does not require nesting bird surveys prior to each maintenance event. When possible, consider clearing woody vegetation during the non-nesting season a year in advance of a proposed action.

v) Prevent release of non-native plants within project areas and use native plants in CBP facility landscaping where appropriate.

vi) Minimize wildfire potential by reducing hazards that can cause or help spread accidental fires.

b) Lighting, noise, and structural additions:

i) Prevent bird injury or death due to collisions with windows by turning off lights at night or putting up curtains.

ii) To improve avian ability to detect and avoid glass, break up window glass with either a pattern of vertical stripes that are at least ¼ inch wide with a maximum spacing of 4 inches, or horizontal stripes that are at least ¼ inch wide with a maximum spacing of 2 inches. Pattern variations may be appropriate for particular species and habitats.. Patterns should be applied on the outside of see-through windows and reflective glass. The pattern should also contrast enough with the glass to be seen clearly by birds.

iii) Minimize and shield lighting (e.g., downshield lights, install motion sensors).

iv) If migratory birds commonly nest on facilities that must be maintained/repaired during the nesting season, when feasible, prevent nesting by installing anti-perching devices on affected sections of the structure.

c) Communication towers, utilities and energy development:

i) Review BMPs outlined in FWS Guidance and consult with FWS when appropriate on the BMPs that are most suitable for CBP implementation and for prevention of negative effects. Available guidance includes, but is not limited to:

(1) The Federal Aviation Administration's Obstruction Marking and Lighting Advisory Circular AC 70/7460-1L.

(2) Recommended Best Practices for Communication Tower Design, Siting, Construction, Operation, Maintenance, and Decommissioning Division of Migratory Bird Management U. S. Fish and Wildlife Service Falls Church, Virginia August 2016.);

(3) Avian Power Line Interaction Committee – Suggested Practices for Avian Protection on Power Lines (2006);
(4) Avian Power Line Interaction Committee – Reducing Avian Collisions with Power Lines (2012); and
(5) U.S. Fish and Wildlife Service Land-based Wind Energy Guidelines (2012)

CBP will coordinate with FWS, as needed, in considering potential effects on migratory birds of CBP proposals for locating communication towers, utilities, and energy development projects such as power lines or wind turbines. Construction of new communications, utility and energy systems, and associated infrastructure should be designed to avoid and minimize impacts on migratory bird populations where feasible. Existing utilities may also be considered for retrofitting to eliminate or reduce impacts.

10) Consistent with safety and security protocols, allow FWS and other partners reasonable access to CBP properties when necessary for conducting sampling or survey programs such as Monitoring Avian Productivity and Survivorship stations, Breeding Bird Surveys, International Shorebird Survey, and breeding bird atlases.

11) Support efforts by FWS to promote the ecological, economic, and recreational values of migratory birds by supporting outreach and educational activities and materials, when appropriate.

12) Minimize or prevent the pollution or detrimental alteration of the environment used by migratory birds whenever practicable by assessing information on environmental contaminants and other stressors associated with CBP actions or existing infrastructure relevant to migratory bird conservation.

13) Where BMPs require inventorying and monitoring, develop and implement new and/or existing inventory and monitoring programs, at appropriate scales, using national standardized protocols when available, to evaluate the effectiveness of BMPs designed to avoid and minimize take of migratory birds, with emphasis on those actions that have the potential to significantly impact species of concern.

14) Where appropriate and feasible, work with FWS to identify opportunities and processes for CBP vessels and aircraft to accommodate FWS staff ride-alongs where such accommodation will not interfere with CBP mission capability or create a financial burden on CBP, but will enable the FWS to conduct important research beneficial to migratory sea birds.

15) Advise the public of the availability of this MOU through a notice published in the Federal Register.

G. The Fish and Wildlife Service Shall:

1. Work with CBP by providing recommendations to avoid and minimize adverse effects

upon migratory birds from CBP actions. FWS may also incorporate these recommendations into IPaC for ease of reference.

2. Through the Division of Migratory Bird Management, maintain a web page on permits that provides links to all offices responsible for issuing permits and permit application forms for take of migratory birds.

3. Provide essential background information to CBP when requested, or through online tools such as AKN and IPaC, to ensure sound management decisions. This may include:

    a. Migratory bird distributions, status, key habitats, conservation guidelines, and risk factors within each Bird Conservation Region.

    b. Changes to the MBTA and its regulations and procedures or other Acts and their regulations affecting management of migratory birds.

    c. Population trends of species that CBP's activities may affect.

    d. Protection measures for reducing human-caused bird mortality that may be applicable to CBP activities, as new information becomes available.

    e. Proactively share with CBP new guidance documents, tools, and job aids designed to improve understanding of MBTA requirements and further the ability of CBP to promote the conservation of migratory birds.

4. Update the FWS publication of *Birds of Conservation Concern* at regular intervals for reliable reference.

5. Recommend accepted BMPs that CBP could programmatically adopt in dealing with migratory bird issues and reducing negative effects on migratory birds and their habitat.

6. FWS will work cooperatively with CBP to provide information on existing BMPs, develop new BMPs as needed, and provide recommendations regarding feasible BMPs for CBP projects and actions that have the potential to take migratory birds.

7. Work to identify important migratory bird habitats (i.e., migration corridors and staging, wintering, nesting, brood-rearing, stop-over habitats, ecological conditions important to nesting habitats, foraging habitats on or adjoining OCS) to aid in collaborative planning.

8. Through IPAC or through the Regional Migratory Bird office, provide to CBP, upon request, technical assistance on migratory bird species and their habitats.

9. Through the appropriate Ecological Services Field office, provide to CBP, upon request, technical assistance for avoiding and minimizing project-related effects on migratory

birds and their habitat resulting from CBP actions.

10. Review and comment on NEPA documents and other planning documents forwarded by CBP (through the Department of Homeland Security). When appropriate, due to special expertise, join as a cooperating agency for preparation of NEPA documents, consistent with the 2013 Memorandum of Agreement for Environmental Coordination and Review of Border Security Activities between the U.S. Department of the Interior, U.S. Department of Agriculture (USDA) Forest Service and U.S. Customs and Border Protection.

H. Dispute Resolution

To prevent potential conflicts and resolve actual disagreements between the Parties, the appropriate CBP Office and the corresponding FWS Ecological Services Field Office will first attempt to resolve the dispute. The Parties will use collaborative processes, including informal meetings or negotiations, to avoid or minimize a dispute. If necessary, the Parties will use conflict prevention or traditional Alternative Dispute Resolution (ADR) processes to achieve consensus. . If there is no resolution at the field-office level within 30 days the CBP Office should elevate the issue to the CBP Office of Facilities and Asset Management, Facilities Management and Engineering Directorate, Energy and Environmental Management Division, and the FWS Ecological Services Field Office should elevate the issue to the FWS Regional Office. In the event that the Parties cannot resolve the matter at this level within 30 days, CBP may elevate the dispute to the CBP Office of Facilities and Asset Management, Facilities Management and Engineering Directorate and FWS may elevate the dispute to the FWS Headquarters.

Representatives of both agencies agree to enter into a conflict prevention process using collaborative methods or to enter into a traditional ADR process, as appropriate.

I. Agreement

The Parties mutually agree and understand that:

1. This MOU in no way alters either Party's obligations or responsibilities under the authorities listed in Section B of this MOU or any other statute or other legal authority.

2. Documents furnished to a Party under this MOU may be subject to the Freedom of Information Act (FOIA, 5 U.S.C. § 552). A Party shall not release documents originating in the other Party to a FOIA requester. Rather, the Party shall forward such document(s) to the originating Party for review, determination, and response directly to the requester.

3. This MOU is neither a fiscal- nor a funds-obligation document. The Parties will handle any endeavor involving reimbursement, contribution of funds, or other transfer of anything of value between the Parties in accordance with applicable laws, regulations, and procedures,

including those for government procurement and printing. This instrument does not provide such authority.

4. Press releases prepared by either Party that reference this MOU, or the relationship established between the Parties of this MOU, must have prior approval of both Parties appropriate departments.

5. The Parties shall schedule periodic meetings every three years to review progress and identify opportunities for advancing the principles of this MOU.

6. This MOU in no way alters or takes the place of the respective Parties' obligations to comply with applicable requirements pursuant to NEPA, MBTA, ESA, CZMA, the Eagle Act, or other applicable statutes and legal authorities.

7. CBP may incorporate the responsibilities established by this MOU into existing CBP actions; however, CBP may not be able to implement some responsibilities identified in the MOU until CBP has successfully included them in formal planning processes. This MOU does not require changes to current contracts, permits, or other third-party agreements, until such time as CBP has successfully included them in a formal planning process. The Parties will implement this MOU when initiating new actions, when creating new agency guidance documents, and when revising the existing CBP MBTA Handbook, ESA Handbook, NEPA Handbook, or other environmental documents. It does not apply to ongoing CBP actions for which a NEPA decision document was finalized prior to, or within 180 days of the date this MOU was signed, unless supplemental NEPA analysis is subsequently required for the underlying action.

8. This MOU is intended only to improve the internal management of the Executive Branch of the Federal Government and does not create any right or benefit, substantive or procedural, separately enforceable at law or equity by a party against the United States, its agencies or instrumentalities, its officers or employees, or any other person.

9. This MOU takes effect upon the signature of CBP and FWS, and shall be reviewed every three years from the date of execution. This MOU may be amended upon written request of either Party and the subsequent written concurrence of the other Party. Either Party may terminate this MOU, in whole or in part, at any time by providing the other Party 30-days written notice to that effect. This MOU in no way restricts either Party from participating in similar activities with other public or private agencies, governments, organizations, or individuals.

Appendix A

Definitions:

Action – a program, activity, project, official policy, rule, regulation, or formal plan directly carried out by CBP.

Active nest – nest containing viable eggs, unfledged young, or fledged young that are still dependent on the nest, except bald and golden eagles. An active bald or golden eagle nest is defined by regulation as an "in-use nest," which means "a bald or golden eagle nest characterized by the presence of one or more eggs, dependent young, or adult eagles on the nest in the past 10 days during breeding season." 50 C.F.R. § 22.3 (also note additional definitions for "alternate nest" and "eagle nest").

Avian Knowledge Network (AKN) – An online database of bird distribution and abundance dedicated to the development of tools and resources that guide and inform conservation management (www.avianknowledge.net).

Breeding Bird Survey (BBS) – a standardized international survey that provides information on population trends of breeding birds, through volunteer observations located along randomly selected roadside routes in the United States, Canada and Mexico (http://www.mbr-pwrc.usgs.gov/bbs/html).

Birds of Conservation Concern – A list published and periodically updated by the FWS Division of Migratory Bird Management. The overall goal of this list is to identify the migratory and non-migratory bird species that, in addition to species already listed under ESA, represent the FWS's highest conservation priorities. The most current version of the list, Birds of Conservation Concern 2008, is available at http://www.fws.gov/migratorybirds.

CBP Office – All CBP organizational elements, including: Headquarters, Program Management Offices, Facility Divisions or Centers, Field Offices, and any other entity that reports to the Commissioner of CBP.

Conservation Measure – an action undertaken to avoid or minimize action-related environmental effects (in this case specific to migratory birds) and ultimately improve the conservation status of one or more species of migratory birds. Examples include BMPs, surveys and inventories, monitoring, status assessments, land acquisition or protection, habitat restoration, population manipulation, research, and outreach.

Council for the Conservation of Migratory Birds – an interagency council established by the Secretary of Interior to oversee the implementation of Executive Order 13186.

Ecological Condition – the composition, structure, and processes of ecosystems over time and space. This includes the diversity of plant and animal communities, the productive capacity of

ecological systems and species diversity, ecosystem diversity, disturbance processes, soil productivity, water quality and quantity, and air quality. Often referred to in terms of ecosystem health, which is the degree to which ecological factors and their interactions are reasonably complete and functioning for continued resilience, productivity, and renewal of the ecosystem.

Effect (adverse or beneficial) – "effects" and "impacts," as used in this MOU are synonymous. Effects may be direct, indirect, or cumulative, and refer to effects from management actions or categories of management actions on migratory bird populations, habitats, ecological conditions, or significant bird conservation sites.

Facility (CBP) - Ports of Entry, U.S. Border Patrol Stations, Forward Operating Bases, Air and Marine Operations Facilities, Customs Quarters (housing), camps, checkpoints, or other CBP-operated installations, which consists of the land, buildings, on-site roadways, and parking lots that CBP owns, leases, or uses as free space.

Important Bird Areas (IBA) – a network of sites that provide essential habitat for the long-term conservation of birds. In the United States, the IBA network is administered by the American Bird Conservancy and the National Audubon Society. (http://www.audubon.org/bird/iba/).

Information, Planning, and Conservation (IPaC) decision support system - a conservation planning tool for streamlining the environmental review process (http://ecos.fws.gov/ipac).

International Shorebird Survey – a monitoring program started in 1974 to survey shorebirds (sandpipers, plovers, etc.) across the Western Hemisphere. (http://www.manomet.org/programs.shorebirds).

Management Action – an activity by a government agency that could cause a positive or negative effect on migratory bird populations or habitats.

Migratory Bird – an individual of any species protected by the MBTA. A list of migratory birds can be found in 50 CFR § 10.13 and http://www.fws.gov/migratorybirds/intrnltr/mbta/mbtandx.html.

Monitoring Avian Productivity and Survivorship (MAPS) – a program that uses the banding of birds during the breeding season to track the changes and patterns in the number of young produced and the survivorship of adults and young. (http://www.birdpop.org/maps.htm).

Mitigation – For NEPA purposes, mitigation includes (a) avoiding the impact altogether by not taking a certain action or parts of an action, (b) minimizing impacts by limiting the degree or magnitude of the action and its implementation, (c) rectifying the impact by repairing, rehabilitating, or restoring the affected environment, (d) reducing or eliminating the impact over time by preservation and maintenance operations during the life of the action, and (e) compensating for the impact by replacing or providing substitute resources or environments

(from 40 C.F.R. § 1508.20, CEQ Regulations for Implementing the Procedural Provisions of the National Environmental Policy Act).

National Environmental Policy Act (NEPA) – the law that requires Federal agencies to prepare a detailed analysis of the environmental impacts of their proposed action with alternatives and to include public involvement in the decision making process for major federal actions significantly affecting the quality of the human environment. 42 U.S.C. § 4321–4347.

Species of Concern – refers to several categories of birds including: 1) species listed in the periodic report, *Birds of Conservation Concern*, published by the FWS Division of Migratory Bird Management (http://www.fws.gov/migratorybirds); 2) priority migratory bird species documented in the comprehensive bird conservation plans (North American Waterbird Conservation Plan, United States Shorebird Conservation Plan, Partners in Flight Bird Conservation Plans); 3) species or populations of waterfowl identified as high, or moderately high, continental priority in the North American Waterfowl Management Plan; 4) listed threatened and endangered bird species in 50 C.F.R. § 17.11; and 5) MBTA-listed gamebirds of management concern (http://www.fws.gov/migratorybirds).

Take – to pursue, hunt, shoot, wound, kill, trap, capture or collect or attempt to pursue, hunt, wound, kill, trap, capture or collect (50 C.F.R. § 10.12). The Eagle Act defines take to mean pursue, shoot, shoot at, poison, wound, kill, capture, trap, collect, destroy, molest, or disturb bald and golden eagles (16 U.S.C. § 668c). "Disturb" is further defined by regulation to mean "agitate or bother an eagle to a degree that causes, or is likely to cause, based on the best scientific information available, (1) injury to an eagle, (2) a decrease in its productivity, by substantially interfering with normal breeding, feeding, or sheltering behavior, or (3) nest abandonment, by substantially interfering with normal breeding, feeding, or sheltering behavior." 50 C.F.R. § 22.3.

MEMORANDUM OF UNDERSTANDING
BETWEEN THE
UNITED STATES CUSTOMS AND BORDER PROTECTION
AND THE
U.S. FISH AND WILDLIFE SERVICE

Regarding Implementation of Executive Order 13186: "Responsibilities of Federal Agencies to Protect Migratory Birds"

This Memorandum of Understanding (MOU) is entered into between the U.S. Customs and Border Protection (CBP) and the U.S. Fish and Wildlife Service (FWS), herein collectively referred to as the Parties.

A. Purpose and Scope

The Parties enter into this MOU pursuant to Executive Order (EO) 13186 (66 FR 3853, Jan. 17, 2001) concerning the responsibilities of Federal agencies to protect migratory birds. The EO directs executive departments and agencies to take certain actions to further implement the Migratory Bird Treaty Act (MBTA)[1]. This MOU focuses on avoiding and minimizing adverse impacts on migratory birds and strengthening migratory bird conservation through enhanced collaboration between the Parties. This MOU does not waive any applicable legal requirements and does not authorize the take of migratory birds.

B. Authority

The Parties enter into this MOU under the provisions of the following laws and other authorities available to the Parties:

- Bald and Golden Eagle Protection Act (Eagle Act) of 1940, as amended (16 U.S.C. 668–668d);
- Coastal Zone Management Act (CZMA), as amended (16 U.S.C. 1451–1466);
- Endangered Species Act (ESA) of 1973, as amended (16 U.S.C. 1531–1544);
- Executive Order 13186, Responsibilities of Federal Agencies to Protect Migratory Birds, 2001 (66 Fed. Reg. 3853, Jan. 17, 2001);
- Federal Water Pollution Control Act (Clean Water Act), as amended (33 U.S.C.

[1] This MOU focuses on improving bird conservation actions under the provisions of the MBTA. However, some birds are protected by other environmental laws and associated regulations such as the Endangered Species Act (ESA) and the Bald and Golden Eagle Protection Act (Eagle Act). As such, the coordination, permitting procedures; and requirements under these statutes are different. Therefore, if migratory bird species also covered by the ESA or the Eagle Act are present, CBP should coordinate with FWS to ensure compliance with the specific considerations of these statutes.

1251–1388);
- Fish and Wildlife Act of 1956, as amended (16 U.S.C. 742a–j-2 *et seq*.);
- Fish and Wildlife Conservation Act of 1980, as amended (16 U.S.C. 2901–2911);
- Fish and Wildlife Coordination Act of 1980, as amended (16 U.S.C. 661–667d);
- Fish and Wildlife Improvement Act of 1978, as amended (16 U.S.C. 742l);
- Migratory Bird Conservation Act of 1929, as amended (16 U.S.C. 715–715r);
- Migratory Bird Treaty Act of 1918, as amended (16 U.S.C. 703–712); and
- National Environmental Policy Act (NEPA) of 1969, as amended (42 U.S.C. 4321–4347).

C. Missions of Both Parties

CBP

CBP is the largest federal law enforcement agency of the U.S. Department of Homeland Security (DHS) charged with the dual mission of securing the Nation's borders while facilitating legitimate trade and travel. As the guardian of U.S. borders, CBP protects approximately 4,000 miles of the international border between the contiguous United States and Canada, as well as 1,000 miles between Alaska and Canada, 1,900 miles of international border with Mexico, and 95,000 miles of shoreline in the contiguous United States.

CBP serves as the front line in defending the United States against terrorists and instruments of terror and protects the economic security of the United States by regulating and facilitating the lawful movement of goods and people across the U.S. border. CBP protects the U.S. economy by enforcing trade laws, intellectual property rights, and collection of revenue on goods imported into the United States; protects the food supply and agricultural industry from pests and disease; and increases the security of our airspace. CBP accomplishes its goals by:

- Effective targeting - each year, more than 11 million maritime containers arrive at U.S. seaports. At land borders, another 11 million containers arrive by truck and 2.7 million by rail. CBP is responsible for knowing the contents of these containers and any safety issues they might pose to the American people. In addition, CBP assesses all people and cargo entering the United States from abroad for terrorist risk.

- Enforcing trade laws – CBP works with internal and external stakeholders to facilitate legitimate trade and address areas of non-compliance while effectively communicating the terms of trade agreements and preferential trade legislation. CBP enforces import and export laws at port-of-entry locations under provisions of the Migratory Bird Treaty Act and the Endangered Species Act. CBP inspects for potential signs of violation of environmental laws such as transnational smuggling of migratory bird parts, invasive species, or other wildlife items. CBP also confirms that all cargo is legally possessed and collects proper revenues for imports.

- Fostering legitimate and safe travel - a key goal of CBP, which increases passenger security through effective risk assessment.

- Inspection technology and equipment - given the magnitude of CBP's responsibility, the development and deployment of sophisticated detection technology is essential. Deployment of nonintrusive inspection technologies is increasing. These technologies are viewed as "force multipliers" that enable CBP officers to screen or examine a larger portion of the stream of commercial traffic. CBP does not rely on any single technology or inspection process. Instead, officers and agents use various technologies in different combinations to substantially increase the likelihood that terrorist weapons, including a nuclear or radiological weapon, will be detected and interdicted.

- Outbound inspections: Keeping weapons and money out of terrorist hands - CBP has the authority to search outbound as well as inbound shipments and uses targeting to carry out its mission in this area. Targeting of outbound shipments and people is a multi-dimensional effort that is enhanced by interagency cooperation.

- Protecting border areas between official ports of entry - Border Patrol agents and Air and Marine Operations personnel are securing areas between the ports of entry by implementing a comprehensive border enforcement strategy, expanding, integrating, and coordinating the use of technology and communications.

In carrying out its statutory mandate to control and guard the border of the United States, CBP performs a number of operational, administrative, and management-related activities and projects that potentially impact migratory birds and their habitat. These activities include, but are not limited to, construction, demolition, operation, maintenance, and repair of:

- Facilities - defined as ports of entry, U.S. Border Patrol Stations, forward operating bases, Air and Marine Operations Facilities, Customs Quarters (housing), camps, checkpoints, or other CBP operated installations, which consists of the land, buildings, on-site roadways, and parking lots that CBP owns, leases, or uses as free space.

- Tactical infrastructure - defined by CBP as any physical component designed to consistently slow, delay, and act as an obstacle to illegal cross-border activity. These components include: fences and gates; roads; bridges, crossovers, and low-water crossings; drainage management structures; boat ramps; lighting and ancillary power systems; remote surveillance systems; mobile detection and inspection technologies and equipment; underground sensors; traffic checkpoints; license-plate readers; and barriers to prohibit illegal vehicle entry.

- Towers and aerostats with infrastructure - to support communications and surveillance activities. This includes fixed-site, tether-controlled approximately 200 foot-long aerostats operating up to 10,000 feet Mean Sea Level (MSL) and smaller relocatable aerostats tethered up to 5000 feet Above Ground Level (AGL) from under 200-foot tower

systems.

- Landscape and vegetation maintenance - to support surveillance activities and Border Patrol safety by improving line of sight and reducing physical obstacles when monitoring cross-border activity.

CBP is committed to executing its mission in an environmentally responsible manner and in compliance with environmental laws, regulations, and EOs, including EO 13186. As part of CBP's commitment to migratory bird conservation, CBP prepared a Migratory Bird Treaty Act Handbook to meet its responsibility to avoid and minimize negative effects to migratory birds and/or their habitats.

FWS

The mission of the FWS is to work with others to conserve, protect, manage, and enhance fish, wildlife, plants, and their habitats for the continuing benefit of the American people. The FWS Migratory Bird Program serves as the focal point in the United States for policy development and strategic planning, program implementation, and evaluation of actions designed to conserve migratory birds and their habitats.

The FWS is legally mandated to implement the conservation provisions of the MBTA, which includes responsibilities for managing migratory bird populations, domestic and international coordination, and the development and enforcement of regulations. The Migratory Bird Conservation Act and the Fish and Wildlife Coordination Act mandate migratory bird habitat conservation including habitat protection through acquisition, enhancement, and/or management, and avoidance and minimization of impacts.

FWS programs that involve bird conservation activities include:

1. The Division of Migratory Bird Management and the Migratory Bird Programs in the FWS Regional Offices serve as focal points for policy development and strategic planning. These offices develop and implement monitoring and management initiatives and issue permits for intentional take. Migratory Bird Programs help maintain healthy populations of migratory birds and their habitats to provide continued opportunities for citizens to enjoy bird-related recreation.

2. The Division of Bird Habitat Conservation is instrumental in supporting habitat conservation partnerships through the administration of bird conservation grant programs and development of Joint Ventures that serve as major vehicles for implementing the various bird conservation plans across the country.

3. Ecological Services Field Offices across the country serve as the primary contacts for technical assistance and environmental reviews of projects involving migratory bird issues. The Field Offices coordinate with the Regional FWS Migratory Bird Offices, as necessary,

during these reviews, regarding permits and overall migratory bird conservation strategies.

4. The Office of Law Enforcement (OLE) is the principal FWS program that enforces the legal provisions of the MBTA, Eagle Act, ESA, and other laws pertaining to migratory bird conservation.

5. The Convention on International Trade in Endangered Species (CITES) provides the basis for international cooperation and collaboration to ensure trade does not contribute to decline in wild populations of animals and plants, including protected bird species. All documents must be validated or certified by an officially recognized, originating country CITES-inspection authority at the time of export. FWS receives inspection documentation on all regulated CITES commodities including migratory birds and migratory bird parts after CBP completes its inspections.

6. The National Wildlife Refuge System manages National Wildlife Refuges, Waterfowl Protection Areas, and Wetland Management Districts across the country. Many units of this system were established to protect and conserve migratory birds. Refuges not only protect important habitat, but also focus on monitoring migratory bird populations and native habitat restoration for the benefit of migratory birds. The Division of Refuge Law Enforcement enforces the legal provisions of wildlife laws on National Wildlife Refuges, Waterfowl Production Areas, and National Fisheries. The Division of Refuge Law Enforcement also assists OLE when needed.

7. The Science Applications program works with other Service programs and partners to ensure that the necessary science, tools, and capacity are available for planning and implementing the most efficient and effective best management practices (BMPs) to protect fish and wildlife including migratory birds. They facilitate regional self-directed science management partnerships called Landscape Conservation Cooperatives to develop and apply shared science capacity to conservation.

D. Statement of Mutual Interest and Benefit

Both Parties agree that migratory birds are important components of biological diversity. Their conservation will help to sustain ecological integrity and serve the public demand for outdoor recreation, conservation education, wildlife viewing, and hunting opportunities. Further, the Parties agree that it is important to identify measures that will: 1) promote migratory bird conservation; 2) avoid and minimize negative effects to migratory birds and their habitats; and 3) recognize that actions that may provide long-term benefits to migratory bird populations as a whole may result in short-term negative effects on individual birds. It is in the interest of both Parties that potential impacts, direct and indirect, are thoroughly assessed and unavoidable impacts are appropriately mitigated.

Nothing in this MOU is intended to prevent Border Patrol agents from exercising existing exigent/emergency authorities to access lands, including authority to conduct motorized off-road pursuit of cross border violators at any time.

E. Obligations of Both Parties

To the extent allowed by law, subject to the availability of appropriations and within administration budgetary limits, and in accord with the CBP and FWS missions and capabilities, each Party shall:

1. Support the conservation intent of EO 13186 and the migratory bird conventions, to the extent practicable, by: 1) integrating bird conservation principles, measures, and practices into agency actions, and 2) avoiding and minimizing negative effects on migratory birds and their habitat.

2. Develop BMPs and implement accepted BMPs that are consistent with EO 13186 resulting in the avoidance, minimization, and reduction of negative effects on migratory birds and their habitat.

3. Promote economic and recreational value of birds to the general public as appropriate by developing and integrating information on migratory birds and their habitats into environmental studies, outreach, and education materials.

4. To the extent practicable, protect, restore, and enhance habitat of migratory birds on facilities and lands administered (controlled or leased) by CBP and prevent and minimize the loss or degradation of remaining natural habitats. This includes:

    a. Collaboration on development and implementation of management practices to avoid and minimize negative effects on migratory bird populations and/or their migration, breeding, nesting, foraging, staging, or wintering habitats.

    b. Working collaboratively with other Federal and State agencies, Tribes, non-governmental organizations, private landowners, and other partners, where appropriate, in joint efforts to identify, protect, restore, enhance, monitor, and manage important migratory bird areas (e.g., Important Bird Areas, other significant bird sites that occur on CBP properties) potentially affected by agency actions, focusing efforts in areas of current or future project activities.

5. Promote research and information exchange related to migratory bird conservation including inventorying and monitoring, developing studies related to agency decisions and management practices that may impact migratory birds, and information on environmental contaminants and other physical and biological stressors that are relevant to the conservation of migratory birds. Share information through online tools such as the Avian Knowledge Network (AKN) and Information, Planning, and Conservation (IPaC) decision support

system. The Parties agree to:

a. As practicable and compatible with other study needs and program mandates, collaborate in developing studies: 1) on migratory bird species that may be potentially affected by agency actions, with an emphasis on Birds of Conservation Concern; 2) on the effects of management activities; 3) on avoiding and minimizing degradation of migratory bird habitat; and 4) on creating a framework for implementing appropriate mitigation measures for CBP actions that will negatively effect migratory birds.

b. Identifying BMPs for: 1) avoiding and minimizing negative effects on migratory birds and their habitat; 2) conserving and restoring migratory bird habitats; 3) promoting bird conservation; and 4) inventorying and monitoring migratory birds. Feasible BMPs will be incorporated into online tools, job aids, guidance, and agency policy documents where appropriate.

c. Developing partnerships to further migratory bird conservation, as practicable. This includes cooperation, coordination, and data sharing with other Federal or State agencies, universities, potential developers or their contractors, and nongovernmental organizations involved in monitoring and research studies to provide reliable and comparable information on the distribution and abundance or status and trends of migratory bird populations. Utilize and contribute information to online data sharing sites, such as AKN or IPaC.

d. Promoting the implementation of existing regional or national inventory and monitoring programs and systems such as Breeding Bird Survey (BBS), eBIRD, Christmas Bird Counts, bird atlas projects, or migratory game bird surveys when practicable.

e. Collaborating on studies and research to understand the effects of agency actions on migratory birds, and monitoring bird population responses to BMPs once these practices have been developed and implemented.

f. Contributing information on migratory bird resources to partners developing outreach and education materials and activities.

6. Promoting training opportunities in the most appropriate methods and techniques to: 1) increase migratory bird conservation awareness in compliance with applicable legislation, regulations, and policies; 2) evaluate impacts of projects on migratory birds; and 3) develop management practices that avoid and minimize adverse impacts and promote beneficial proactive approaches to migratory bird conservation.

7. As new information on effectiveness of BMPs become available, evaluate the measures described in this MOU intended to protect, restore, and enhance migratory bird populations and their habitats, including avoiding and minimizing adverse impacts to migratory birds. The FWS Division of Migratory Bird Management, FWS Ecological Services Offices and

CBP agree to design and implement feasible and effective BMPs.

8. Participate, as appropriate, in the interagency Council for the Conservation of Migratory Birds (through DHS representatives) to share information on the conservation of migratory birds. The Council's duties include:

    a. Sharing the latest resource information to assist in the conservation and management of migratory birds.

    b. Developing an annual report of accomplishments and recommendations related to EO 13186. CBP will provide information to be incorporated in the DHS highlighted page.

    c. Fostering partnerships to further the goals of EO 13186.

    d. When appropriate, CBP can nominate a project that exemplifies the implementation of EO 13186 for consideration of the Presidential Migratory Bird Federal Stewardship Award for contributions to the protection of migratory birds.

F. CBP Obligations:

The appropriateness and practicality of implementing any specific conservation measure that reduces negative effects on migratory birds and destruction of migratory bird habitat will be determined on a case-by-case basis. Best management practices (BMPs) have been developed to benefit a variety of migratory bird species and their associated habitats. CBP will work cooperatively with FWS to provide information on existing BMPs, develop new BMPs as needed, and provide recommendations regarding feasible BMPs for CBP projects and actions that have the potential to negatively affect migratory birds. To the extent allowed by law, subject to the availability of appropriations and within Administration budgetary limits, and consistent with CBP missions and capabilities, CBP shall:

1) Follow CBP guidance as outlined in the internal *CBP Migratory Bird Treaty Act Handbook for CBP Preparers* (Sept. 4, 2013) regarding CBP's responsibility to avoid and minimize negative effects to migratory birds and/or their habitats pursuant to the MBTA and EO 13186.

2) Prior to starting CBP activities that are associated with general BMP measures (described in #9), utilize credible online tools such as IPaC and AKN to identify activities that are likely to result in negative effects on migratory birds. If additional information is needed, CBP shall engage in early planning and scoping with the FWS to identify migratory bird species likely to occur in areas affected by a proposed action.

3) Integrate migratory bird conservation principles, measures, and practices into agency activities. Avoid and minimize, to the extent practicable, adverse impacts on migratory bird

resources when conducting agency actions, in compliance with, and supporting the purposes of the MBTA, the Eagle Act, the ESA, NEPA, and other applicable statutes.

4) During the NEPA process CBP will assess the potential adverse impacts of proposed actions on migratory birds and their habitat, proactively address migratory bird conservation (including conservation measures in budgeting), initiate appropriate actions to avoid and minimize negative effects on migratory birds, and assess and document effects on species of concern. CBP will use the best available demographic, population, and/or habitat association data in the assessment of effects on species of concern.

5) To the extent practicable, protect, restore, and enhance habitat of migratory birds on facilities and lands administered (controlled or leased) by CBP and prevent and minimize the loss or degradation of remaining natural habitats. This includes the following:

    a) Prevent, contain, or abate pollution detrimental to migratory birds and their habitats.

    b) Prevent or abate detrimental alteration of migratory bird habitats, to the extent practicable.

    c) Communicate with FWS, as practicable, to resolve any negative effects on migratory birds occurring during immediate actions taken by CBP to respond to exigent/emergency situations involving human life, health, safety of persons, posing threat to national security. Examples of such CBP actions include pursuit of cross-border violators, search and rescue, response to credible threat, or, in some cases, emergency repair of certain strategic communications equipment. Communication may occur through most expedient channels including through coordination with uniformed FWS law enforcement personnel.

6) Implement the following approaches for avoiding and minimizing negative effects on migratory birds, focusing first on species of concern, priority habitats, and key risk factors:

    a) Assess and estimate the effects of proposed actions on migratory birds and their habitats through the project planning process (include this analysis in the NEPA document associated with the proposed action whenever possible). Use best available demographic, population, behavioral, and habitat data in the assessment of effects upon migratory birds. If sufficient data are unavailable, attempt to acquire necessary data by working with Federal, State, and other partners. Utilize online tools, such as AKN, for obtaining geospatial and biological data, and IPaC to obtain information regarding practices relating to geospatial data necessary to support the impact analysis.

    b) Evaluate, through the NEPA process, a reasonable range of alternatives in environmental reviews and, as applicable, incorporate practices to avoid and minimize adverse effects to migratory birds or degradation of habitats consistent with CBP's primary mission to protect the Nation's borders and facilitate legitimate trade and travel. Develop practices,

in coordination with FWS, to avoid and minimize impacts to migratory birds and their habitat and determine how to improve evaluation of impacts.

c) Work collaboratively with FWS and other partners, and develop partnerships with non-federal entities, to monitor migratory birds, as resources allow and within the agency's capabilities and authorities, to improve and better understand the need for, and effectiveness of, conservation efforts tied to projects under CBP authority.

7) Encourage incorporation of comprehensive migratory bird management objectives and BMPs in CBP environmental planning and guiding documents, including MBTA Handbook, ESA Handbook, NEPA Handbook, and other environmental documents consistent with NEPA, CEQ regulations, and other Federal environmental mandates.

8) Comply with applicable Federal migratory bird permitting requirements for activities subject to 50 CFR Part 21. While working through the permitting process with FWS, CBP will, to the maximum extent practicable, avoid and minimize the intentional take of migratory bird species, with an emphasis on species of concern, and, if necessary, develop standards and procedures regarding such take.

9) Develop BMPs to avoid and minimize negative effects on migratory birds or migratory bird habitat. The agreed-upon practices should be documented through the NEPA process. These BMPs should emphasize taking steps to avoid and minimize any potential impacts of known stressors associated with the proposed action on migratory birds, which will in turn reduce threats and assist with meeting migratory-bird conservation goals. Examples of BMPs include, but are not limited to:

a) General measures:
   i) Avoid construction, demolition, installation, and maintenance activities during migratory bird nesting/breeding season to the extent practicable. Where project work cannot occur outside the migratory bird nesting season, conduct surveys prior to scheduled activity to determine if active nests are present within the area of impact. Generally, the surveys should be conducted no more than five days prior to scheduled activity. If active nests are identified within or in the vicinity of a project site, avoid the site if practicable until nestlings have fledged or the nest fails. Coordinate with FWS if an active nest needs to be removed or relocated.
   ii) Limit roadside food source or habitat plantings (including landscaping projects near roads) to trees that do not bear fruit (e.g., choosing not to plant attractants like serviceberries, wild cherries, and spicebush, etc.).
   iii) Stay within existing roads and trails to the extent feasible. For motorized off-road pursuits, CBP will use the least intrusive or damaging motorized vehicle readily available, without compromising agent or officer safety. In accordance with the principles of the 2006 MOU (Memorandum of Understanding Among U. S. Department of Homeland Security and U. S. Department of the Interior and U. S. Department of Agriculture Regarding Cooperative National Security and

Counterterrorism Efforts on Federal Lands along the United States' Borders), between CBP-BP and the Department of the Interior (DOI) for Cooperative National Security and Counterterrorism Efforts on Federal Lands along the United States' Border, agents and officers will use their professional judgment in each specific situation based on available evidence to conclude if motorized off-road pursuit is reasonably expected to result in the apprehension of suspected cross-border violators.

iv) Avoid vegetation removal, trimming, and maintenance (e.g., general landscaping activities, tree trimming, grubbing, etc.) during the nesting season to the extent practicable consistent with USBP operational needs to maintain clear lines of sight to the border in key areas of illegal cross-border traffic and otherwise where citizen and agent safety and security is at risk. Periodic vegetation maintenance (e.g. grass mowing once a week) does not require nesting bird surveys prior to each maintenance event. When possible, consider clearing woody vegetation during the non-nesting season a year in advance of a proposed action.

v) Prevent release of non-native plants within project areas and use native plants in CBP facility landscaping where appropriate.

vi) Minimize wildfire potential by reducing hazards that can cause or help spread accidental fires.

b) Lighting, noise, and structural additions:

i) Prevent bird injury or death due to collisions with windows by turning off lights at night or putting up curtains.

ii) To improve avian ability to detect and avoid glass, break up window glass with either a pattern of vertical stripes that are at least ¼ inch wide with a maximum spacing of 4 inches, or horizontal stripes that are at least ¼ inch wide with a maximum spacing of 2 inches. Pattern variations may be appropriate for particular species and habitats.. Patterns should be applied on the outside of see-through windows and reflective glass. The pattern should also contrast enough with the glass to be seen clearly by birds.

iii) Minimize and shield lighting (e.g., downshield lights, install motion sensors).

iv) If migratory birds commonly nest on facilities that must be maintained/repaired during the nesting season, when feasible, prevent nesting by installing anti-perching devices on affected sections of the structure.

c) Communication towers, utilities and energy development:

i) Review BMPs outlined in FWS Guidance and consult with FWS when appropriate on the BMPs that are most suitable for CBP implementation and for prevention of negative effects. Available guidance includes, but is not limited to:

(1) The Federal Aviation Administration's Obstruction Marking and Lighting Advisory Circular AC 70/7460-1L.

(2) Recommended Best Practices for Communication Tower Design, Siting, Construction, Operation, Maintenance, and Decommissioning Division of Migratory Bird Management U. S. Fish and Wildlife Service Falls Church, Virginia August 2016.);

(3) Avian Power Line Interaction Committee – Suggested Practices for Avian Protection on Power Lines (2006);
(4) Avian Power Line Interaction Committee – Reducing Avian Collisions with Power Lines (2012); and
(5) U.S. Fish and Wildlife Service Land-based Wind Energy Guidelines (2012)

CBP will coordinate with FWS, as needed, in considering potential effects on migratory birds of CBP proposals for locating communication towers, utilities, and energy development projects such as power lines or wind turbines. Construction of new communications, utility and energy systems, and associated infrastructure should be designed to avoid and minimize impacts on migratory bird populations where feasible. Existing utilities may also be considered for retrofitting to eliminate or reduce impacts.

10) Consistent with safety and security protocols, allow FWS and other partners reasonable access to CBP properties when necessary for conducting sampling or survey programs such as Monitoring Avian Productivity and Survivorship stations, Breeding Bird Surveys, International Shorebird Survey, and breeding bird atlases.

11) Support efforts by FWS to promote the ecological, economic, and recreational values of migratory birds by supporting outreach and educational activities and materials, when appropriate.

12) Minimize or prevent the pollution or detrimental alteration of the environment used by migratory birds whenever practicable by assessing information on environmental contaminants and other stressors associated with CBP actions or existing infrastructure relevant to migratory bird conservation.

13) Where BMPs require inventorying and monitoring, develop and implement new and/or existing inventory and monitoring programs, at appropriate scales, using national standardized protocols when available, to evaluate the effectiveness of BMPs designed to avoid and minimize take of migratory birds, with emphasis on those actions that have the potential to significantly impact species of concern.

14) Where appropriate and feasible, work with FWS to identify opportunities and processes for CBP vessels and aircraft to accommodate FWS staff ride-alongs where such accommodation will not interfere with CBP mission capability or create a financial burden on CBP, but will enable the FWS to conduct important research beneficial to migratory sea birds.

15) Advise the public of the availability of this MOU through a notice published in the Federal Register.

G. The Fish and Wildlife Service Shall:

1. Work with CBP by providing recommendations to avoid and minimize adverse effects

upon migratory birds from CBP actions. FWS may also incorporate these recommendations into IPaC for ease of reference.

2. Through the Division of Migratory Bird Management, maintain a web page on permits that provides links to all offices responsible for issuing permits and permit application forms for take of migratory birds.

3. Provide essential background information to CBP when requested, or through online tools such as AKN and IPaC, to ensure sound management decisions. This may include:

    a. Migratory bird distributions, status, key habitats, conservation guidelines, and risk factors within each Bird Conservation Region.

    b. Changes to the MBTA and its regulations and procedures or other Acts and their regulations affecting management of migratory birds.

    c. Population trends of species that CBP's activities may affect.

    d. Protection measures for reducing human-caused bird mortality that may be applicable to CBP activities, as new information becomes available.

    e. Proactively share with CBP new guidance documents, tools, and job aids designed to improve understanding of MBTA requirements and further the ability of CBP to promote the conservation of migratory birds.

4. Update the FWS publication of *Birds of Conservation Concern* at regular intervals for reliable reference.

5. Recommend accepted BMPs that CBP could programmatically adopt in dealing with migratory bird issues and reducing negative effects on migratory birds and their habitat.

6. FWS will work cooperatively with CBP to provide information on existing BMPs, develop new BMPs as needed, and provide recommendations regarding feasible BMPs for CBP projects and actions that have the potential to take migratory birds.

7. Work to identify important migratory bird habitats (i.e., migration corridors and staging, wintering, nesting, brood-rearing, stop-over habitats, ecological conditions important to nesting habitats, foraging habitats on or adjoining OCS) to aid in collaborative planning.

8. Through IPAC or through the Regional Migratory Bird office, provide to CBP, upon request, technical assistance on migratory bird species and their habitats.

9. Through the appropriate Ecological Services Field office, provide to CBP, upon request, technical assistance for avoiding and minimizing project-related effects on migratory

birds and their habitat resulting from CBP actions.

10. Review and comment on NEPA documents and other planning documents forwarded by CBP (through the Department of Homeland Security). When appropriate, due to special expertise, join as a cooperating agency for preparation of NEPA documents, consistent with the 2013 Memorandum of Agreement for Environmental Coordination and Review of Border Security Activities between the U.S. Department of the Interior, U.S. Department of Agriculture (USDA) Forest Service and U.S. Customs and Border Protection.

H. Dispute Resolution

To prevent potential conflicts and resolve actual disagreements between the Parties, the appropriate CBP Office and the corresponding FWS Ecological Services Field Office will first attempt to resolve the dispute. The Parties will use collaborative processes, including informal meetings or negotiations, to avoid or minimize a dispute. If necessary, the Parties will use conflict prevention or traditional Alternative Dispute Resolution (ADR) processes to achieve consensus. . If there is no resolution at the field-office level within 30 days the CBP Office should elevate the issue to the CBP Office of Facilities and Asset Management, Facilities Management and Engineering Directorate, Energy and Environmental Management Division, and the FWS Ecological Services Field Office should elevate the issue to the FWS Regional Office. In the event that the Parties cannot resolve the matter at this level within 30 days, CBP may elevate the dispute to the CBP Office of Facilities and Asset Management, Facilities Management and Engineering Directorate and FWS may elevate the dispute to the FWS Headquarters.

Representatives of both agencies agree to enter into a conflict prevention process using collaborative methods or to enter into a traditional ADR process, as appropriate.

I. Agreement

The Parties mutually agree and understand that:

1. This MOU in no way alters either Party's obligations or responsibilities under the authorities listed in Section B of this MOU or any other statute or other legal authority.

2. Documents furnished to a Party under this MOU may be subject to the Freedom of Information Act (FOIA, 5 U.S.C. § 552). A Party shall not release documents originating in the other Party to a FOIA requester. Rather, the Party shall forward such document(s) to the originating Party for review, determination, and response directly to the requester.

3. This MOU is neither a fiscal- nor a funds-obligation document. The Parties will handle any endeavor involving reimbursement, contribution of funds, or other transfer of anything of value between the Parties in accordance with applicable laws, regulations, and procedures,

including those for government procurement and printing. This instrument does not provide such authority.

4. Press releases prepared by either Party that reference this MOU, or the relationship established between the Parties of this MOU, must have prior approval of both Parties appropriate departments.

5. The Parties shall schedule periodic meetings every three years to review progress and identify opportunities for advancing the principles of this MOU.

6. This MOU in no way alters or takes the place of the respective Parties' obligations to comply with applicable requirements pursuant to NEPA, MBTA, ESA, CZMA, the Eagle Act, or other applicable statutes and legal authorities.

7. CBP may incorporate the responsibilities established by this MOU into existing CBP actions; however, CBP may not be able to implement some responsibilities identified in the MOU until CBP has successfully included them in formal planning processes. This MOU does not require changes to current contracts, permits, or other third-party agreements, until such time as CBP has successfully included them in a formal planning process. The Parties will implement this MOU when initiating new actions, when creating new agency guidance documents, and when revising the existing CBP MBTA Handbook, ESA Handbook, NEPA Handbook, or other environmental documents. It does not apply to ongoing CBP actions for which a NEPA decision document was finalized prior to, or within 180 days of the date this MOU was signed, unless supplemental NEPA analysis is subsequently required for the underlying action.

8. This MOU is intended only to improve the internal management of the Executive Branch of the Federal Government and does not create any right or benefit, substantive or procedural, separately enforceable at law or equity by a party against the United States, its agencies or instrumentalities, its officers or employees, or any other person.

9. This MOU takes effect upon the signature of CBP and FWS, and shall be reviewed every three years from the date of execution. This MOU may be amended upon written request of either Party and the subsequent written concurrence of the other Party. Either Party may terminate this MOU, in whole or in part, at any time by providing the other Party 30-days written notice to that effect. This MOU in no way restricts either Party from participating in similar activities with other public or private agencies, governments, organizations, or individuals.

The principal contacts for this MOU are as follows:

Appendix A

Definitions:

Action – a program, activity, project, official policy, rule, regulation, or formal plan directly carried out by CBP.

Active nest – nest containing viable eggs, unfledged young, or fledged young that are still dependent on the nest, except bald and golden eagles. An active bald or golden eagle nest is defined by regulation as an "in-use nest," which means "a bald or golden eagle nest characterized by the presence of one or more eggs, dependent young, or adult eagles on the nest in the past 10 days during breeding season." 50 C.F.R. § 22.3 (also note additional definitions for "alternate nest" and "eagle nest").

Avian Knowledge Network (AKN) – An online database of bird distribution and abundance dedicated to the development of tools and resources that guide and inform conservation management (www.avianknowledge.net).

Breeding Bird Survey (BBS) – a standardized international survey that provides information on population trends of breeding birds, through volunteer observations located along randomly selected roadside routes in the United States, Canada and Mexico (http://www.mbr-pwrc.usgs.gov/bbs/html).

Birds of Conservation Concern – A list published and periodically updated by the FWS Division of Migratory Bird Management. The overall goal of this list is to identify the migratory and non-migratory bird species that, in addition to species already listed under ESA, represent the FWS's highest conservation priorities. The most current version of the list, Birds of Conservation Concern 2008, is available at http://www.fws.gov/migratorybirds.

CBP Office – All CBP organizational elements, including: Headquarters, Program Management Offices, Facility Divisions or Centers, Field Offices, and any other entity that reports to the Commissioner of CBP.

Conservation Measure – an action undertaken to avoid or minimize action-related environmental effects (in this case specific to migratory birds) and ultimately improve the conservation status of one or more species of migratory birds. Examples include BMPs, surveys and inventories, monitoring, status assessments, land acquisition or protection, habitat restoration, population manipulation, research, and outreach.

Council for the Conservation of Migratory Birds – an interagency council established by the Secretary of Interior to oversee the implementation of Executive Order 13186.

Ecological Condition – the composition, structure, and processes of ecosystems over time and space. This includes the diversity of plant and animal communities, the productive capacity of

ecological systems and species diversity, ecosystem diversity, disturbance processes, soil productivity, water quality and quantity, and air quality. Often referred to in terms of ecosystem health, which is the degree to which ecological factors and their interactions are reasonably complete and functioning for continued resilience, productivity, and renewal of the ecosystem.

Effect (adverse or beneficial) – "effects" and "impacts," as used in this MOU are synonymous. Effects may be direct, indirect, or cumulative, and refer to effects from management actions or categories of management actions on migratory bird populations, habitats, ecological conditions, or significant bird conservation sites.

Facility (CBP) - Ports of Entry, U.S. Border Patrol Stations, Forward Operating Bases, Air and Marine Operations Facilities, Customs Quarters (housing), camps, checkpoints, or other CBP-operated installations, which consists of the land, buildings, on-site roadways, and parking lots that CBP owns, leases, or uses as free space.

Important Bird Areas (IBA) – a network of sites that provide essential habitat for the long-term conservation of birds. In the United States, the IBA network is administered by the American Bird Conservancy and the National Audubon Society. (http://www.audubon.org/bird/iba/).

Information, Planning, and Conservation (IPaC) decision support system - a conservation planning tool for streamlining the environmental review process (http://ecos.fws.gov/ipac).

International Shorebird Survey – a monitoring program started in 1974 to survey shorebirds (sandpipers, plovers, etc.) across the Western Hemisphere. (http://www.manomet.org/programs.shorebirds).

Management Action – an activity by a government agency that could cause a positive or negative effect on migratory bird populations or habitats.

Migratory Bird – an individual of any species protected by the MBTA. A list of migratory birds can be found in 50 CFR § 10.13 and http://www.fws.gov/migratorybirds/intrnltr/mbta/mbtandx.html.

Monitoring Avian Productivity and Survivorship (MAPS) – a program that uses the banding of birds during the breeding season to track the changes and patterns in the number of young produced and the survivorship of adults and young. (http://www.birdpop.org/maps.htm).

Mitigation – For NEPA purposes, mitigation includes (a) avoiding the impact altogether by not taking a certain action or parts of an action, (b) minimizing impacts by limiting the degree or magnitude of the action and its implementation, (c) rectifying the impact by repairing, rehabilitating, or restoring the affected environment, (d) reducing or eliminating the impact over time by preservation and maintenance operations during the life of the action, and (e) compensating for the impact by replacing or providing substitute resources or environments

(from 40 C.F.R. § 1508.20, CEQ Regulations for Implementing the Procedural Provisions of the National Environmental Policy Act).

National Environmental Policy Act (NEPA) – the law that requires Federal agencies to prepare a detailed analysis of the environmental impacts of their proposed action with alternatives and to include public involvement in the decision making process for major federal actions significantly affecting the quality of the human environment. 42 U.S.C. § 4321–4347.

Species of Concern – refers to several categories of birds including: 1) species listed in the periodic report, *Birds of Conservation Concern*, published by the FWS Division of Migratory Bird Management (http://www.fws.gov/migratorybirds); 2) priority migratory bird species documented in the comprehensive bird conservation plans (North American Waterbird Conservation Plan, United States Shorebird Conservation Plan, Partners in Flight Bird Conservation Plans); 3) species or populations of waterfowl identified as high, or moderately high, continental priority in the North American Waterfowl Management Plan; 4) listed threatened and endangered bird species in 50 C.F.R. § 17.11; and 5) MBTA-listed gamebirds of management concern (http://www.fws.gov/migratorybirds).

Take – to pursue, hunt, shoot, wound, kill, trap, capture or collect or attempt to pursue, hunt, wound, kill, trap, capture or collect (50 C.F.R. § 10.12). The Eagle Act defines take to mean pursue, shoot, shoot at, poison, wound, kill, capture, trap, collect, destroy, molest, or disturb bald and golden eagles (16 U.S.C. § 668c). "Disturb" is further defined by regulation to mean "agitate or bother an eagle to a degree that causes, or is likely to cause, based on the best scientific information available, (1) injury to an eagle, (2) a decrease in its productivity, by substantially interfering with normal breeding, feeding, or sheltering behavior, or (3) nest abandonment, by substantially interfering with normal breeding, feeding, or sheltering behavior." 50 C.F.R. § 22.3.

Appendix C: List of Bird Species Not Protected under the MBTA

Federal Register Volume 70 Number 49 - List of Bird Species to Which the Migratory Bird Treaty Act Does Not Apply

Species Not Protected under the MBTA

A. **Species that are (1) nonnative human-introduced and (2) belong to families covered by conventions implemented by the MBTA**

70 FR 12710 (March 15, 2005)

B. **Species that are (1) native and (2) belong to families not covered by any of the conventions implemented by the MBTA**[Q]

Family MEGAPODIIDAE
Megapodius laperouse, Micronesian Megapode+ (NMI)‡
Family PHASIANIDAE
Bonasa umbellus, Ruffed Grouse+ (cont. U.S.)
Centrocercus minimus, Gunnison Sage-Grouse+ (CO, UT)
Centrocercus urophasianus, Greater Sage-Grouse+ (w. U.S.)
Dendragapus obscurus, Blue Grouse+ (w. U.S.)
Falcipennis canadensis, Spruce Grouse (n. U.S.)
Lagopus lagopus, Willow Ptarmigan+ (n. U.S.)
Lagopus leucurus, White-tailed Ptarmigan+ (n. U.S.)
Lagopus mutus, Rock Ptarmigan+ (n. U.S.)
Meleagrus gallopavo, Wild Turkey+ (cont. U.S.)
Tympanuchus cupido, Greater Prairie-Chicken+ (c. & w. U.S.)‡
Tympanuchus pallidicinctus, Lesser Prairie-Chicken+ (c. & w. U.S.)
Tympanuchus phasianellus, Sharp-tailed Grouse+ (n. & w. U.S.)
Family ODONTOPHORIDAE
Callipepla californica, California Quail+ (CA, NV, OR)
Callipepla gambelii, Gambel's Quail+ (sw U.S.)
Callipepla squamata, Scaled Quail+ (sw U.S.)
Colinus virginianus, Northern Bobwhite+ (cont. U.S.)
Cyrtonyx montezumae, Montezuma Quail+ (sw U.S.)
Oreortyx pictus, Mountain Quail+ (w. U.S.)
Family BURHINIDAE
Burhinus bistriatus, Double-striped Thick-knee (TX)
Family GLAREOLIDAE
Glareola maldivarum, Oriental Pratincole (AK)
Family PSITTACIDAE
Amazona vittata, Puerto Rican Parrot+ (PR)‡
Aratinga chloroptera, Hispaniolan Parakeet (PR–Extirpated)
Rhynchopsitta pachyrhyncha, Thick-billed Parrot (AZ, NM)‡
Family TODIDAE
Todus mexicanus, Puerto Rican Tody+ (PR)
Family MELIPHAGIDAE

Moho braccatus, Kauai Oo+ (HI)‡
Family MONARCHIDAE
Chasiempis sandwichensis, Elepaio+ (HI)‡
Clytorhynchus vitiensis, Fiji Shrikebill+ (AS)
Myiagra freycineta, Guam Flycatcher+ (GU)
Monarcha takatsukasai, Tinian Monarch+ (NMI)
Rhipidura rufifrons, Rufous Fantail+ (GU, NMI)
Family TIMALIIDAE
Chamaea fasciata, Wrentit+ (CA, OR, WA)
Family ZOSTEROPIDAE
Zosterops conspicillatus, Bridled White-eye+ (GU, NMI)‡
Family COEREBIDAE
Coereba flaveola, Bananaquit+ (PR, VI)
Family DREPANIDINAE
Hemignathus flavus, Oahu Amakihi+ (HI)
Hemignathus kauaiensis, Kauai Amakihi+ (HI)
Hemignathus lucidus, Nukupuu+ (HI)‡
Hemignathus munroi, Akiapolaau+ (HI)
Hemignathus parvus, Anianiau+ (HI)
Hemignathus virens, Hawaii Amakihi+ (HI)
Himatione sanguinea, Apapane+ (HI)
Loxioides bailleui, Palila+ (HI)‡
Loxops caeruleirostris, Akekee+ (HI)
Loxops coccineus, Akepa+ (HI)
Melamprosops phaeosoma, Poo-uli [=Po'ouli] + (HI-Extinct 2004)‡
Oreomystis bairdi, Akikiki+ (HI)
Oreomystis mana, Hawaii Creeper+ (HI)‡
Palmeria dolei, Akohekohe [=Crested Honeycreeper]+ (HI)‡
Paroreomyza flammea, Kakawahie [=Molokai Creeper]+ (HI)‡
Paroreomyza maculata, Oahu Alauahio [=Oahu Creeper]+ (HI–probably Extinct)‡
Paroreomyza montana, Maui Alauahio+ (HI)
Pseudonestor xanthophrys, Maui Parrotbill+ (HI)‡
Psittirostra psittacea, Ou+ (HI)‡
Telespiza cantans, Laysan Finch+ (HI)‡
Telespiza ultima, Nihoa Finch+ (HI)‡
Vestiaria coccinea, Iiwi+ (HI)

C. Species that are (1) nonnative human-introduced and (2) belong to families not covered by any of the conventions implemented by the MBTA[1]

Family TINAMIDAE
Nothoprocta perdicaria, Chilean Tinamou
Nothura maculosa, Spotted Nothura

Rhynchotus rufescens, Red-winged Tinamou
Tinamus major, Great Tinamou
Family CRACIDAE
Crax rubra, Great Curassow
Ortalis cinereiceps, Gray-headed Chachalaca
Ortalis garrula, Chestnut-winged Chachalaca
Ortalis vetula, Plain Chachalaca (GA)
Penelope purpurascens, Crested Guan
Family PHASIANIDAE
Alectoris barbara, Barbary Partridge
Alectoris chukar, Chukar^ (w. U.S.)
Alectoris graeca, Rock Partridge
Ammoperdix griseogularis, See-see Partridge
Bambusicola thoracica, Chinese Bamboo-Partridge
Bonasia bonasia, Hazel Grouse
Chrysolophus amherstiae, Lady Amherst's Pheasant
Chrysolophus pictus, Golden Pheasant
Coturnix chinensis, Blue-breasted Quail
Coturnix japonica, Japanese Quail^ (HI)
Coturnix pectoralis, Stubble Quail
Francolinus adspersus, Red-billed Francolin
Francolinus clappertoni, Clapperton's Francolin
Francolinus erckelii, Erckel's Francolin^ (HI)
Francolinus francolinus, Black Francolin^ (HI)
Francolinus icterorhynchus, Heuglin's Francolin
Francolinus leucoscepus, Yellow-necked Spurfowl (HI-Extirpated)*
Francolinus pintadeanus, Chinese Francolin
Francolinus pondicerianus, Gray Francolin^ (HI)
Gallus gallus, Red Junglefowl^ (FL, HI)
Gallus sonnerati, Gray Junglefowl
Lophura leucomelanos, Kalij Pheasant^ (HI)
Lophura nycthemera, Silver Pheasant
Melanoperdix nigra, Black Partridge
Numida meleagris, helmeted Guineafowl^ (HI, PR)
Pavo cristatus, Common Peafowl^ (HI)
Perdix perdix, Gray Patridge^ (cont. U.S.)
Phasianus colchicus, Ring-necked Pheasant^ (cont. U.S., HI)
Phasianus versicolor, Green Pheasant
Rollulus rouloul, Crested Partridge
Syrmaticus ellioti, Elliot's Pheasant
Syrmaticus reevesii, Reeve's Pheasant
Syrmaticus soemmerringii, Copper Pheasant
Tetrao tetrix, Black Grouse
Tetrao urogallus, Western Capercaillie
Tetraogallus himalayensis, Himalayan Snowcock^ (NV)
Family TURNICIDAE

Turnix varia, painted Buttonquail
Family ODONTOPHORIDAE
Colinus cristatus, Crested Bobwhite^ (VI–now Extirpated)
Callipepla douglasii, Elegant Quail
Family PTEROCLIDIDAE
Pterocles exustus, Chestnut-bellied Sandgrouse^ (HI)
Family PSITTACIDAE
Agapornis fischeri, Fischer's Lovebird
Agapornis personatus, Yellow-collared Lovebird
Agapornis roseicollis, Peach-faced Lovebird
Amazona aestiva, Blue-fronted Parrot
Amazona albifrons, White-fronted Parrot (FL)*
Amazona amazonica, Orange-winged Parrot
Amazona auropalliata, Yellow-naped Parrot
Amazona autumnalis, Red-lored Parrot (FL–now Extirpated)*
Amazona barbadensis, Yellow-shouldered Parrot
Amazona farinosa, Mealy Parrot
Amazona festiva, Festive Parrot
Amazona finschi, Lilac-crowned Parrot
Amazona ochrocephala, Yellow-crowned Parrot^ (PR)
Amazona oratrix, Yellow-headed Parrot^ (FL, PR)
Amazona pretrei, Red-spectacled Parrot
Amazona ventralis, Hispaniolan Parrot^ (PR, VI)
Amazona viridigenalis, Red-crowned Parrot^ (CA, FL)
Anodorhynchus hyacinthinus, Hyacinth Macaw
Ara ararauna, Blue-and-yellow Macaw^ (PR)
Ara chloroptera, Red-and-green Macaw
Ara macao, Scarlet Macaw
Ara militaris, Military Macaw
Ara severa, Chestnut-fronted Macae (FL)*
Aratinga acuticaudata, Blue-crowned Parakeet (FL)*
Aratinga aurea, Peach-fronted Parakeet
Aratinga canicularis, Orange-fronted Parakeet (FL)*
Aratinga erythrogenys, Red-masked Parakeet (FL)*
Aratinga finschi, Crimson-fronted Parakeet
Aratinga holochlora, Green Parakeet^ (TX)
Aratinga leucophthalmus, White-eyed Parakeet (FL)*
Aratinga mitrata, Mitred Parakeet^ (CA, FL)
Aratinga pertinax, Brown-throated Parakeet^ (FL, PR)
Aratinga rubritorquis, Red-throated Parakeet

Aratinga solstitialis or jandaya, Sun or Jandaya parakeet
Aratinga wagleri, Scarlet-fronted Parakeet
Aratinga weddellii, Dusky-headed Parakeet (FL)*

*Brotogeris chiriri, Yellow-chevroned Parakeet * (FL)*
Brotogeris jugularis, Orange-chinned Parakeet
Brotogeris versicolurus, White-winged Parakeet^ (CA, FL)
Cacatua alba, White Cockatoo
Cacatua galerita, Sulphur-crested Cockatoo (FL–now Extirpated)*
Cacatua goffini, Tanimbar Cockatoo
Cacatua moluccensis, Salmon-crested Cockatoo
Cyanoliseus patagonus, Burrowing Parrot
Diopsittaca nobilis, Red-shouldered Macaw
Eclectus roratus, Eclectus Parrot
Eolophus roseicapillus, Galah
Eos bornea, Red Lory (FL–Extirpated)*
Lorius garrulus, Chattering Lory
Melopsittacus undulatus, Budgerigar^ (FL)
Myiopsitta monachus, Monk Parakeet^ (e. U.S, PR, TX)
Nandayus nenday, Black-hooded Parakeet
Nymphicus hollandicus, Cockatiel
Pionites melanocephala, Black-headed Parrot
Pionus maximiliani, Scaly-headed Parrot
Pionus senilis, White-crowned Parrot
Poicephalus rueppellii, Rueppell's Parrot (FL–now Extirpated)*
Poicephalus senegalus, Senegal Parrot (FL–now Extirpated)*
Propyrrhura auricollis, Golden-collared Macaw
Psephotus haematonotus, Red-rumped Parrot
Pseudos fuscata, Dusky Lory
Psittacula alexandri, Red-breasted Parakeet
Psittacula columboides, Malabar Parakeet
Psittacula cyanocephala, Plum-headed Parakeet
Psittacula eupatris, Alexandrine Parakeet
Psittacula krameri, Rose-ringed Parakeet^ (FL, HI, VA)
Psittacula roseata, Blossom-headed Parakeet
Psittacus erithacus, Gray Parrot
Pyrrhura frontalis, Maroon-bellied Parakeet
Pyrrhura molinae, Green-cheeked Parakeet (FL)*
Rhynchopsitta terrisi, Maroon-fronted Parrot
Trichoglossus chlorolepidotus, Scaly-breasted Lorikeet
Trichoglossus haematodus, Rainbow Lorikeet (FL–now Extirpated)*
Trichoglossus ornatus, Ornate Lorikeet

Family DICRURIDAE
Dicrurus macrocercus, Black Drongo^ (GU, NMI)

Family RHAMPHASTIDAE
Ramphastos sulfuratus, Keel-billed Toucan
Ramphastos citrolaemus, Citron-throated Toucan
Ramphastos toco, Toco Toucan

Family MUSOPHAGIDAE
Musophaga violacea, Violet Turaco

Tauraco corythaix, Knysna Turaco
Tauraco schalowi, Schalow's Turaco
Family BUCEROTIDAE
Tockus nasutus, African Gray Hornbill
Aceros undulatus, Wreathed Hornbill
Ceratogymna brevis, Silvery-cheeked Hornbill
Family BUCORVIDAE
Bucorvus abyssinicus, Abyssinian Ground-Hornbill
Family PYCNONOTIDAE
Hypsipetes madagascariensis, Black Bulbul
Pycnonotus cafer, Red-vented Bulbul^ (FL)
Pycnonotus jocosus, Red-whiskered Bulbul^ (FL, HI)
Family PITTIDAE
Pitta guajana, Banded Pitta
Family IRENIDAE
Irena puella, Asian Fairy-bluebird
Family TIMALIIDAE
Garrulax canorus, Hwamei^ (HI)
Garrulax leucolophus, White-crested Laughingthrush (HI-Extirpated)*
Garrulax pectoralis, Greater Necklaced Laughingthrush^ (HI)
Leiothrix lutea, Red-billed Leiothrix^ (HI)
Family ZOSTEROPIDAE
Zosterops japonicus, Japanese White-eye^ (HI)
Family STURNIDAE
Acridotheres cristatellus, Crested Myna
Acridotheres fuscus, Jungle Myna
Acridotheres tristis, Common Myna^ (FL, HI)
Gracula religiosa, Hill Myna^ (HI, PR)
Lamprotornis superbus, Superb Starling
Mino dumontii, Yellow-faced Myna
Sturnus vulgaris, European Starling^ (cont. U.S., PR)
Family PASSERIDAE
Passer domesticus, House Sparrow^ (cont. U.S., HI, PR, VI)
Passer luteus, Sudan Golden Sparrow
Passer montanus, Eurasian Tree Sparrow^ (IL, MO)
Family PLOCEIDAE
Euplectes afer, Yellow-crowned Bishop^ (PR)
Euplectes ardens, Red-collared Bishop^ (PR)
Euplectes franciscanus, Orange Bishop^ (CA, PR)
Euplectes orix, Red Bishop
Ploceus cucullatus, Village Weaver
Ploceus velatus, African Masked-Weaver
Family ESTRIDIDAE
Amandava amandava, Red Avadavat^ (HI, PR)
Estrilda astrild, Common Waxbill^ (HI, PR)
Estrilda caerulescens, Lavender Waxbill^ (HI)

Estrilda melpoda, Orange-cheeked Waxbill^ (HI, PR)
Estrilda troglodytes, Black-rumped Waxbill^ (HI, PR)
Lonchura atricapilla, Chestnut Munia^ (HI, PR)
Lonchura cantans, African Silverbill^ (HI)
Lonchura cucullata, Bronze Mannikin^ (PR)
Lonchura maja, White-headed Munia
Lonchura malabarica, Indian Silverbill^ (PR)
Lonchura malacca, Tricolored Munia^ (HI, PR)
Lonchura nana, Madagascar Munia
Lonchura punctulata, Nutmeg Mannikin^ (HI)
Padda oryzivora, Java Sparrow^ (HI, PR)
Taeniopygia guttata, Zebra Finch
Uraeginthus bengalus, Red-cheeked Cordonbleu^ (HI)
Vidua macroura, Pin-tailed Whydah^ (PR)

(1)
Symbols: plus sign (+) denotes a native species with breeding populations in the U.S.; hat (^) denotes an introduced species that has established a self-sustaining breeding population; asterisk (*) denotes an introduced species that has nested in the U.S. but has not established a self-sustaining breeding population; double dagger (‡) denotes a species that is covered by the Endangered Species Act in all or part of its U.S. range.

Abbreviations (in parentheses) are used to denote the known U.S. range, and are used only for species with established populations or evidence of breeding: AK = Alaska, AS = American Samoa, AZ = Arizona, CA = California, FL = Florida, GU = Guam, HI = Hawaii, NM = New Mexico, NMI = Northern Marina Islands, NV = Nevada, OR = Oregon, PR = Puerto Rico, TX = Texas, UT = Utah, VI = Virgin Islands, WA = Washington.

Appendix D: Executive Order 13186

Executive Order 13186 - Responsibilities of Federal Agencies to Protect Migratory Birds

Appendix E: Nesting Bird Survey Protocol and Survey Checklist

Pre-construction nesting bird surveys should be conducted during migratory bird nesting season no more than 5 days prior to commencement of a project and during the project if the site was dormant for more than 5 days. The survey area for active bird nests should include the project area and appropriate buffer zone (coordinated with the U.S. Fish and Wildlife Service Ecological Services Field Office, as necessary).

Prior to surveys, a desktop review of bird species (and their preferred habitat) with potential to nest in the project area should be conducted. A special emphasis should be placed on the presence of Birds of Conservation Concern (BCC) within the action area. Please refer to the complete list of BCC species.

Survey should consist of walking transects that will be spaced accordingly to allow complete visual coverage (when possible) of all habitats including: open fields, barren areas, manmade structures (e.g., bridges and buildings), riparian corridors, wooded areas and brush dominated ground cover within, and adjacent to, the project area that could support nesting birds. Appropriate spacing will ultimately be determined by the surveyor in the field, but the following guidelines are recommended to ensure adequate coverage of habitats:

- 100-300 feet for open grasslands
- 25-50 feet for areas with dense brush or shrubs
- <25 feet as needed for a dense stand of trees or very dense vegetation

The survey should also include actively searching for low-level, ground, cavity and tree nests in the vegetation proposed for disturbance. For example, cavity nesting would include searching/inspecting all relevant local features: structures, suitable tree holes and cavities and may require an extension pole with mirror to make a determination.

When breeding or nesting activities are suspected or observed, the surveyor will spend time watching the activity (with the aid of binoculars when appropriate) to determine the status of the observed activity. The following behaviors are indicators that an active nest may be present:

1. Carrying material to build nest within the survey area
2. Copulations
3. Carrying food or feeding young
4. Carrying fecal sacks away from nest
5. Mate-feeding; repeated "bee-line" flying to likely nest site
6. Observation of nest
7. Observation of chicks

8. Alarm calls being given by one or both adults of a pair
9. Females giving call or chip notes alerting their mate that they are off the nest
10. Auditory evidence of chicks

If there is inconclusive evidence to determine whether the nest is being actively utilized, it may be necessary to conduct additional surveys. Up to three additional survey events of the nest itself, up to 2 hours each, should be conducted to document whether nest is active. If breeding activity is noted, but no nest is found, the surveyor should assume the presence of a nest and take appropriate measures to protect the nest from project-related activities.

The location of any confirmed active nest of a migratory bird species should be recorded on a survey form (see next page for a sample of a survey checklist) and submitted to the environmental project lead, preparer and project manager.

If active nests are identified within or in the vicinity of a project site, avoid the site until nestlings have fledged or the nest fails. If activity must occur, establish a buffer zone around the nest and no activities will occur within that zone until nestlings have fledged and left the nest area.

Homeland Security

Nesting Bird Survey Checklist

1. Site Name_____.

2. Day_____ Month_____ Year_____.

3. Locality: Name nearest town or prominent map feature whose latitude and longitude can be looked up: _____ . County/Township _____. State/Province_____.

Locality name (e.g. Smith Marsh, Jones Woods):_____.

Latitude/longitude to nearest minute (optional except for remote areas, but encouraged for regularly-visited sites): Latitude_____. Longitude _____ ____.

4. Observer name(s)_____.

5. Start time (to nearest quarter hour) _____.

6. End time (to nearest quarter hour) _____.

7. Evidence of active nests _____.

If active nest is identified:

Location of a nest _____.

Distance of a nest to construction _____.

Stage of nesting (eggs, nestlings) _____.

Nesting bird species (if known) _____.

Photograph of the nesting bird species (e.g. attached, emailed) _____.

8. Habitat(s) visited (check as many as apply): Deciduous woodland____ Coniferous woodland____ Scrub____ Grassland____ Agricultural____ Rural____ Suburban____ Urban____ Freshwater____ Salt water____ Other_____.

6. Site photographs (e.g. attached, emailed) _____.

Appendix F: Electronic Resources for Bird Conservation and Project Assessment

GENERAL RESOURCES

- **USFWS Division of Migratory Bird Management**
  - http://www.fws.gov/migratorybirds/
  - Source for Bird Lists, Conservation Plans, MBTA, BGEPA, and EO 13186 information, links to permits information

- **U.S. Fish and Wildlife Service- Division of Bird Habitat Conservation**
  - http://www.fws.gov/birdhabitat/index.shtm
  - Information on grant programs to conserve bird habitats, bird conservation plans, and all the habitat and species joint ventures to conserve bird habitat.

- **Bird Strike Committee - USA**
  - http://www.birdstrike.org/
  - Source of information on bird and wildlife strikes at airports in U.S. including reporting strikes, meetings and workshops, BMP's for airports, risk assessment, and publications.

BEST MANAGEMENT PRACTICES/CONSERVATION MEASURES

- **USFWS Service Guidance on the Siting, Construction Operation and Decommissioning of Communications Towers**

INTEGRATED FIXED TOWERS
BLOCK 1 REPLACEMENT PROJECT

U.S. BORDER PATROL
TUCSON AREA OF RESPONSIBILITY

TUCSON SECTOR
ENVIRONMENTAL AWARENESS BRIEFING

GENERAL ACTIVITY BMPS

PROJECT ACTIVITIES, INCLUDING STAGING, PARKING AND EQUIPMENT STORAGE WILL BE CONFINED TO THE PREVIOUSLY DISTURBED ROAD CORRIDOR AND THE MARKED 100 FOOT BY 100 FOOT TEMPORARY DISTURBANCE AREA AT ALL SENSOR TOWERS.

PROJECT ACTIVITIES, INCLUDING STAGING, PARKING AND EQUIPMENT STORAGE WILL BE CONFINED TO THE FENCED PERIMETER OF THE TOWER SITE AND PREVIOUSLY DISTURBED ROAD CORRIDOR AT THE COMMUNICATION TOWER.

INVOLVED ENTITIES WILL MINIMIZE THE NUMBER OF VEHICLES TRAVELING TO AND FROM THE PROJECT SITE AND THE NUMBER OF TRIPS PER DAY TO REDUCE THE LIKELIHOOD OF DISTURBING ANIMALS IN THE AREA OR INJURING AN ANIMAL ON THE ROAD, OR DISTURBING THEIR HABITAT.

DISTURBANCE WILL BE MINIMIZED BY LIMITING DELIVERIES OF MATERIALS AND EQUIPMENT TO ONLY THOSE NEEDED FOR EFFECTIVE PROJECT IMPLEMENTATION.

ALL VEHICULAR TRAFFIC WILL USE DESIGNATED/AUTHORIZED ROADS TO ACCESS THE PROPOSED TOWER SITES AND WILL AVOID OFF-ROAD VEHICLE ACTIVITY OUTSIDE OF THE PROJECT FOOTPRINT.

MIGRATORY BIRDS

MIGRATORY BIRDS

A SURVEY FOR MIGRATORY BIRDS MUST BE CONDUCTED PRIOR TO ALL ACTIVITIES TO BE IMPLEMENTED DURING THE NESTING PERIOD (FEBRUARY 1 THROUGH SEPTEMBER 1).

IF AN ACTIVE NEST IS FOUND, A BUFFER ZONE OF 300 FEET MUST BE ESTABLISHED AROUND THE NEST AND NO ACTIVITIES WILL OCCUR WITHIN THAT ZONE UNTIL NESTLINGS HAVE FLEDGED AND ABANDONED THE NEST. CONFIRMATION THAT ALL YOUNG HAVE FLEDGED MUST BE MADE BY QUALIFIED PERSONNEL.

IF PROJECT ACTIVITIES ARE SCHEDULED DURING THE NESTING SEASON, STEPS TO PREVENT NESTING IN THE POTENTIAL IMPACT AREA CAN BE TAKEN, INCLUDING COVERING EQUIPMENT AND STRUCTURES, AND USING NESTING DETERRENTS (E.G., NOISE).

IF PROJECT ACTIVITIES MAY RESULT IN THE "TAKE" (IMPACTS TO ACTIVE NESTS, EGGS, OR FLEDGLINGS) OF A BIRD, COORDINATION WITH USFWS AND/OR ARIZONA GAME AND FISH DEPARTMENT IS REQUIRED.

THREATENED/ENDANGERED & OTHER
PROTECTED SPECIES OVERVIEW

THE ENDANGERED SPECIES ACT (ESA)

THE PURPOSE OF THE ESA IS TO PROTECT AND RECOVER IMPERILED SPECIES AND THE ECOSYSTEMS UPON WHICH THEY DEPEND. IT IS ADMINISTERED BY THE U.S. FISH AND WILDLIFE SERVICE AND THE COMMERCE DEPARTMENT'S NATIONAL MARINE FISHERIES SERVICE. UNDER THE ESA, SPECIES MAY BE LISTED AS EITHER ENDANGERED OR THREATENED.

"ENDANGERED" MEANS A SPECIES IS IN DANGER OF EXTINCTION THROUGHOUT ALL OR A SIGNIFICANT PORTION OF ITS RANGE.

"THREATENED" MEANS A SPECIES IS LIKELY TO BECOME ENDANGERED WITHIN THE FORESEEABLE FUTURE.

ALL SPECIES OF PLANTS AND ANIMALS (EXCEPT PEST INSECTS) ARE ELIGIBLE FOR LISTING AS ENDANGERED OR THREATENED. FOR THE PURPOSES OF THE ESA, CONGRESS DEFINED SPECIES TO INCLUDE SUBSPECIES, VARIETIES, AND, FOR VERTEBRATES, DISTINCT POPULATION SEGMENTS.

STIFF PENALTIES MAY BE IMPOSED FOR VIOLATIONS OF THE ENDANGERED SPECIES ACT. CRIMINAL ACTIVITIES MAY BE PUNISHED WITH FINES UP TO $50,000 AND/OR ONE YEAR IMPRISONMENT FOR CRIMES INVOLVING ENDANGERED SPECIES, AND $25,000 AND/OR SIX MONTHS IMPRISONMENT FOR CRIMES INVOLVING THREATENED SPECIES.

THREATENED/ENDANGERED & OTHER PROTECTED SPECIES OVERVIEW

IF A LISTED SPECIES IS OBSERVED WITHIN THE PROJECT AREA, WORK IN THE IMMEDIATE VICINITY MUST BE SUSPENDED UNTIL IT MOVES OUT OF HARM'S WAY ON ITS OWN, OR UNTIL IT IS RELOCATED BY A PERMITTED INDIVIDUAL.

THE UNDERSIDE OF ALL VEHICLES AND HEAVY EQUIPMENT MUST BE CHECKED FOR LISTED SPECIES AND OTHER WILDLIFE PRIOR TO MOVING AT THE BEGINNING OF EACH WORKDAY AND AFTER VEHICLES HAVE IDLED FOR MORE THAN 15 MINUTES.

SURFACE WATER FROM UNTREATED SOURCES LOCATED WITHIN ONE MILE OF AQUATIC HABITAT FOR FEDERALLY LISTED AQUATIC SPECIES MUST NOT BE USED.

HABITAT

THE WESTERN YELLOW-BILLED CUCKOO BREEDS IN RIPARIAN HABITAT ALONG LOW GRADIENT (SURFACE SLOPE LESS THAN 3 PERCENT) RIVERS AND STREAMS, AND IN OPEN RIVERINE VALLEYS THAT PROVIDE WIDE FLOODPLAIN CONDITIONS (GREATER THAN 325 FEET).

WITHIN THE BOUNDARIES OF THE DISTINCT POPULATION SEGMENT (DPS), THESE RIPARIAN AREAS ARE LOCATED FROM SOUTHERN BRITISH COLUMBIA, CANADA, TO SOUTHERN SINALOA, MEXICO, AND MAY OCCUR FROM SEA LEVEL TO 7,000 FEET (OR SLIGHTLY HIGHER IN WESTERN COLORADO, UTAH, AND WYOMING) IN ELEVATION.

YELLOW-BILLED CUCKOO

ESA STATUS: *THREATENED*

ALL CONSTRUCTION ACTIVITY AT TUS-35 AND TUS-287, AND ASSOCIATED ACCESS ROADS, MUST CEASE FROM JUNE 1 TO SEPTEMBER 30.

ALL CONSTRUCTION ACTIVITY AT TUS-299 MUST CEASE FROM JULY 1 TO SEPTEMBER 30.

CUCKOO PROTOCOL SURVEYS MUST BE CONDUCTED IN DRAINAGES BORDERED BY TREES WITHIN 0.25 MILES OF TOWER TCA-TUS-299 FROM JUNE 1 TO JUNE 30.

IF ANY CUCKOOS ARE LOCATED WITHIN 0.25 MILES OF THIS TOWER, CBP WILL ENGAGE THE USFWS IN DEVELOPMENT OF MEASURES NECESSARY TO MINIMIZE AND AVOID IMPACTS TO THE SPECIES IN THESE LOCATIONS.

TRES BELLOTAS ROAD ALONG FRESNAL WASH MUST BE AVOIDED BETWEEN TCA-TUS-298 AND TCA-TUS-036 FROM JUNE 1 TO SEPTEMBER 30 TO AVOID DISTURBANCE TO CUCKOOS IN SUITABLE HABITAT.

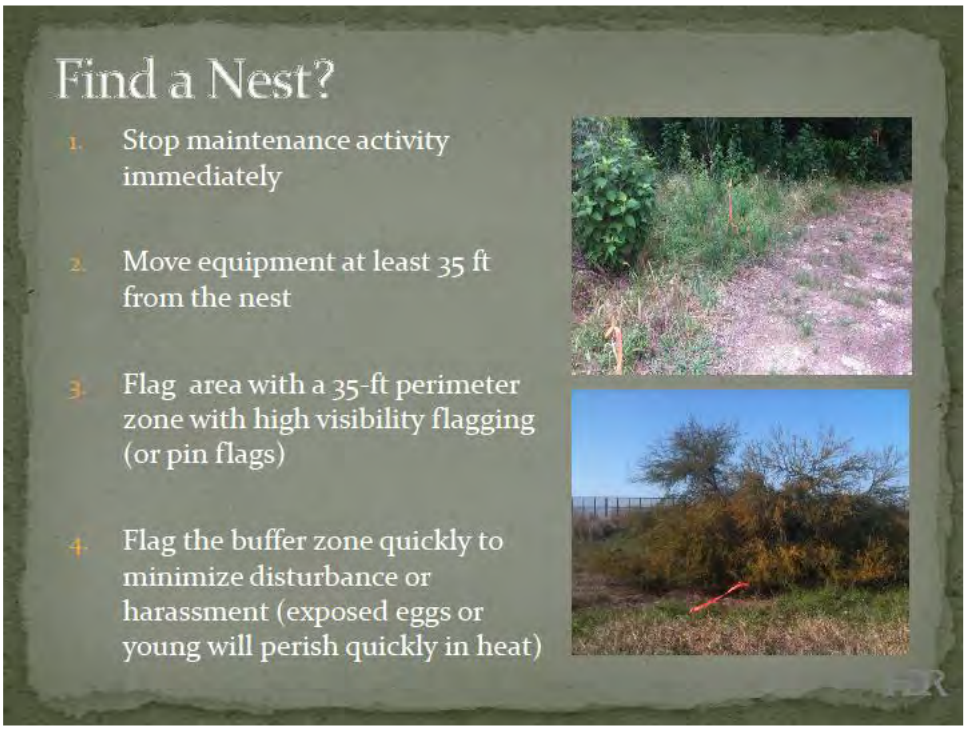
Del Rio, Laredo, and Rio Grande Valley Sector Nesting Bird Awareness Training

This is an example of regionally specific training developed for a maintenance and repair contract. It was administered and required for all Agents, Contractors, Sub-Contractors, COTRs and PMs. Regionally specific training was developed for each area where this contract vehicle was utilized.



Draft Proposed MBTA Bird Removal/Relocation Training

Managing Bird Encounters for CBP Towers

Draft Training for Border Patrol, CBP employees, and Contractors

Managing Bird Encounters for CBP Towers

Draft Training for Border Patrol, CBP employees, and Contractors

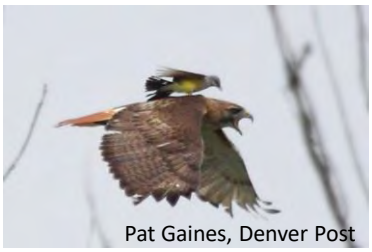
Migratory Bird Treaty Act

- International agreement to protect migratory birds
- Executive Order 13186 (January 2001)
- Agencies are required to take conservation actions to implement the MBTA
- Avoid or minimize adverse impacts on migratory bird resources
- Integrate migratory bird habitat and population conservation into agency plans
- Develop and use practices to decrease unintentional take
- Provide training to employees on methods of avoiding or minimizing take of migratory birds and conserving migratory bird habitat
- THIS TRAINING is to help CBP continue needed repairs, maintenance and operations while complying with the MBTA requirements

Nesting Habitats

- Ground (bare ground, gravel/rocks)
- Woodland
- Grasslands
- Marshes
- Shrubland
- Cavities
- Banks/cliffs
- Sometimes - Towers, Buildings & Equipment

Be Aware Nesting Behavior



Pat Gaines, Denver Post

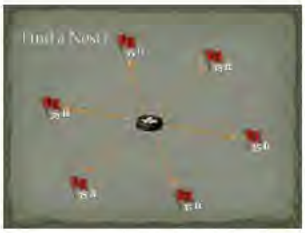
Anna Mlodzinski

- Dive bombing
- Fuss calls
- Subtle calls
- Chasing / circling
- Distraction displays
- Persistent bird in one location
- Some birds will leave the immediate area of their nest when they are disturbed
- Most active in the early morning and late afternoon

Find a Nest?

- Stop maintenance or repair activity immediately
- Move equipment at least 35 ft from the nest Immediately. Further distance may be required if the nest is occupied.
- From a distance if possible observe the nest. If no eggs or baby birds are present remove the nest unless the nest is an eagle nest (which are further protected by the Bald and Golden Eagle Protection Act and cannot be removed without special provisions) and **notify**.
- If eggs or baby birds are present. Flag area with a minimum 100-foot perimeter zone with high visibility flagging (or pin flags). You could reduce the buffer if it appears that a nesting pair is tolerant of disturbance. A designated monitor should watch the nesting birds for signs of stress or disturbance associated with the activities after the buffer is established. The buffer may need to be increased if they appear disturbed. Raptors require even larger buffers. For more guidance concerning appropriate buffer sizes see table 1.
- Flag the buffer zone quickly to minimize disturbance or harassment (exposed eggs or young will perish quickly in heat) and **notify**.

Photo: Duckling being harassed instead of allowing it to leave its nest naturally.



Notify

- BP Agents Notify PLLA (Specific Contact info placed here)
- CBP civilian personnel notify BPAM (Specific Contact info placed here)
- Contractors Notify Contracting Officer Technical Representative (Specific Contact info placed here)
- PLLA and COTR will contact BPAM and BPAM:
  - **If the nest is removed**, will **record the incident**
  - **If the nest is occupied**, will **determine the best course of action**:
    - If there is no critical need for removal the nest will remain until Fledging – record the incident and end of incident
    - If there is a need for removal BPAM will:
      - Contract removal, relocation, rehabilitation with an appropriate contractor as listed in the list of approved relocators and rehabilitators and record the incident – or
      - Arrange removal and transport by a BPAM trained person to an appropriate contractor as listed in the list of approved relocators and rehabilitators and record the incident

Contracting Relocators and Rehabilitators

- It will BPAM's responsibility to ensure that the relocator and the rehabilitation facility are covered by the proper permits
- The following relocators have been identified for this project from the list of approved relocators and rehabilitators
- (Specific Contact information placed here)

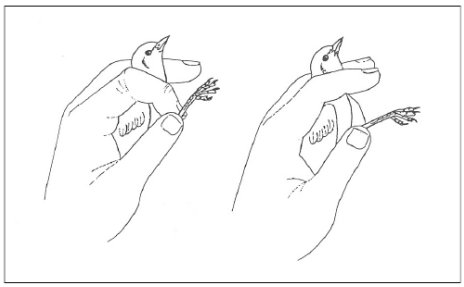
If you are tasked by BPAM to move a nest, eggs, or baby birds (fledglings)

1. Do not take any action until tasked by BPAM to remove and transport.
2. Contact the recipient (the approved rehabilitation facility provided by BPAM) of the bird, nest, eggs, or fledglings to make sure they will be present to receive them when you arrive.
3. Consider the timing to remove the birds, nest, eggs, or fledglings in light of the need to allow the birds to calm down before transport and likely transportation time.

Transporting Birds

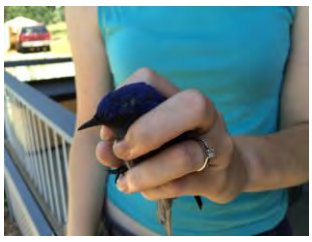
1. *Prepare a container.* Put a soft cloth in a cardboard box or pet carrier of an appropriate size to prevent the bird from sliding or being jostled during transport. If a box, make sure there are air holes.
2. *Protect yourself.* Wear heavy leather gloves if necessary. Some birds may bite or scratch to protect themselves, even if sick or injured. Remember the bird is terrified of you. Smaller birds do not require gloves
3. *Cover the container* with a light sheet or towel. You want to keep the bird warm and calm. Keeping the container dark also will help keep the animal calm.
4. *Gently pick up the bird* and put it in the prepared container. *Extreme fright can kill*
   a. With **a larger bird**, it's important to pick up the bird from the back and secure its wings in one motion. A towel will help in this process.
   b. With **a smaller bird**, its body is like a small water bag and it can be internally injured by too much handling. Do not move your hands around while holding the baby, or turn it upside down, as rapid changes in posture can also kill.
5. *Do not give the animal food or water.* Keep it away from children and pets.
6. After placing the bird into the prepared container:
   1. If it is an adult or injured bird, allow the bird to rest and unstress for at least 20 minutes before transporting. Allow for this time in your transportation estimate to the rehabilitation facility.
   2. If the bird is fledgling or if they are eggs move quickly to ensure that the fledglings or eggs do not cool down or get too hot. No unstress time interval is needed.
7. *Keep the bird warm and calm.* A bottle of warm tap water can provide warmth
8. *Note exactly where you found the bird.* The rehabilitator will want to know this information and BPAM will need the information for the official record.
9. If the bird(s) die during transportation notify the rehabilitation facility AND BPAM.

Handling Birds



THE NORTH AMERICAN BANDERS' STUDY GUIDE

- *Protect yourself.* Wear heavy leather gloves if necessary. Some birds may bite or scratch to protect themselves, even if sick or injured. Remember the bird is terrified of you. Smaller birds do not require gloves
- Approach the bird from the back with your hand. Place your pointer finger and middle finger on either side of the back of the bird's neck (to avoid crushing the bird's airway). Wrap the rest of your fingers around the wings and sides of the bird to keep the wings gently pinned against the body. Be careful not to squeeze very hard and be very careful not to squeeze the breast (they need to be able to breathe).



Merwin (Chip) Brown

Handling Larger Birds

- Approach them from behind, place one gloved hand over the wings, and slide the other hand under the body (touch the back of the bird and slide down until you feel the top of the legs),
- Put your middle finger between the top of the two legs, your pointer finger on the outside of the legs, and your ring finger on the outside of the other leg.
- Always keep control of the legs, the feet are the business end that you want to stay away from if you can.
- Once you have hold of the legs and wings, you can pick the bird up and put it's back against your chest so that you don't have to continue holding the wings, or you can cradle the bird in the crook of your arm, still holding the feet.

Merwin (Chip) Brown

Briefing Provided to CEQ

FM&E

CTIMR COTR/PM Boot Camp

Overview of Environmental Laws

- Congress has enacted numerous environmental laws and created regulatory agencies to enforce them
  - CBP Tactical Infrastructure (TI) maintenance and repair (M&R) activities are subject to some of these laws
  - CBP is committed to complying with these laws

- This session discusses most relevant laws in implementing CTIMR
  - National Environmental Policy Act (NEPA)
  - Endangered Species Act (ESA)
  - Migratory Bird Treaty Act (MBTA)
  - National Historic Preservation Act (NHPA)
  - Clean Water Act (CWA) – Wetland

CTIMR COTR/PM Boot Camp

Migratory Bird Treaty Act (MBTA)

- MBTA makes it unlawful to pursue, hunt, take, capture, kill, or sell birds listed therein ("migratory birds"). The statute does not discriminate between live or dead birds and also grants full protection to any bird parts including feathers, eggs, and nests. Over 800 species are currently on the list
- United States and Mexico entered the treaty in 1936
- Some of these conventions stipulate protections not only for the birds themselves, but also for habitats and environs necessary for the birds' survival
- CTIMR activities covered under the MBTA
  - Preservation of bird habitats protected under the MBTA
  - Curtailed CTIMR activities during the breeding season

Environmental Stewardship Training Program

This training was prepared for COTRs, PMs, Border Patrol Agents, Contractors, Subcontractors, Environmental Monitors, and other personnel with responsibilities in Maintenance and Repair. Although the entire environmental stewardship program was required training, this document only shows portions pertinent to MBTA compliance including general and ESA Best Management Practices.

INTRODUCTION

- This training program provides an overview of the environmental concerns, both biological and cultural, for maintenance and repair activities in Del Rio, Laredo, and Rio Grande Valley (RGV) Sectors. You are required to understand the content of this program.
- The training program will cover BMPs which have been carefully designed to provide protection to natural and cultural resources, including plants and wildlife.
- Environmental stewardship is very important to CBP.
- This presentation identifies specific practices and habitat conservation measures you will be required to implement while maintaining and repairing tactical infrastructure.
- In this module, you will recognize photos outlined in green or red. Photos outlined in red depict actions that are out of compliance with BMPs. These deficiencies are also denoted with an "X" through the photo. Photos outlined in green depict actions that were performed in compliance with the BMPs.

WHAT ARE BMPs?

- BMPs are common-sense actions applied to maintenance and repair activities to promote execution of the work in an environmentally responsible manner, so that wildlife, habitat, water quality, air quality, cultural resources, and landscape integrity are conserved.
- These BMPs were developed in consultation with the USFWS and CBP is obligated to implement them.

Photo (above): Proper dust suppression during excavation activities.

Photo (right): Hydroseeding a temporarily disturbed area.

Photo (right): Properly installed silt fencing and fiber rolls to prevent erosion along waterway.

NOISE

BMP: All Occupational Safety and Health Administration requirements will be followed with respect to maintenance and repair noise impacts. Ensure all motorized equipment possess properly working mufflers and are kept properly tuned to reduce backfires. Ensure all motorized generators will be in baffle boxes (a sound-resistant box that is placed over or around a generator), have an attached muffler, or use other noise-abatement methods in accordance with industry standards. For activities involving heavy equipment, seasonal restrictions might be required to avoid impacts on threatened or endangered species in areas where these species or their potential habitat occur. See species-specific BMPs.

VEGETATION

BMP: Clearly demarcate the perimeter of all new areas to be disturbed using flagging or temporary construction fence. Do not allow any disturbance outside that perimeter. Riparian vegetation should be protected during maintenance activities.

Photo (above): No perimeter markers resulted in disturbance outside the perimeter.

Photos (below and right): Correct demarcation of perimeter.

27

VEGETATION

BMP: Identify fill material, sandbags, hay bales, and mulch brought in from outside the project area by its source location. Use sources that are sterile or weed-free.

BMP: Avoid the removal of mature trees providing shade or bank stabilization within the riparian area of any waterway during maintenance or repair activities.

BMP: If vegetation must be removed, allow natural regeneration of native plants by cutting vegetation with hand tools, mowing, trimming, or using other removal methods that allow root systems to remain intact.

Photo: Obtain weed-free fill material to use on site.

WILDLIFE

BMP: Minimize animal collisions during maintenance and repair activities by not exceeding 35 mph on major unpaved roads (graded with ditches on both sides) and 25 mph on all other unpaved roads. During periods of decreased visibility (e.g., night, poor weather, curves), do not exceed speeds of 25 mph.

Photo (above): Dead bird in grill.

WILDLIFE

BMP: If hollow bollards are necessary, cover hollow bollards (i.e., those that will be filled with a reinforcing material such as concrete) to prevent wildlife from entrapment. Deploy covers (and ensure they remain fully functioning) from the time the posts or hollow bollards arrive on the site and are unloaded, until they are filled with reinforcing material.

Photo (right): Uncovered bollards

BMP: Do not permit pets owned or under the care of the contractor or sector personnel inside the project boundaries, adjacent native habitats, or other associated work areas.

BMP: Clearing of riparian and aquatic vegetation will not occur within 100 feet of natural drainages, ephemeral and perennial aquatic habitats, or other water bodies to provide a buffer area to protect the habitat from sedimentation.

Photo (above): Pet monkey on construction site.

WILDLIFE

BMP: To prevent entrapment of wildlife species, ensure excavated, steep-walled holes or trenches are either completely covered by plywood or metal caps at the close of each work day or provided with one or more escape ramps (at no greater than 1,000-foot intervals and sloped less than 45 degrees) constructed of earth fill or wooden planks.

BMP: Each morning before the start of maintenance activities ensure holes and trenches are thoroughly inspected for trapped animals. Ensure that any animals discovered are allowed to escape voluntarily (by escape ramps or temporary structures), without harassment, before maintenance activities resume; or are removed from the trench or hole by a qualified person and allowed to escape unimpeded.

Photo (right): A turtle fell into an uncovered trench and became stuck in the rebar of the trench. Turtle was successfully recovered

Photo (above): Trench with an exit ramp (at each end of the trench).

WILDLIFE

BMP: Ensure permanent light poles and other permanent pole-like structures have anti-perch devices to discourage roosting by birds.

No bird deterrent

Bird deterrent

WILDLIFE

BMP: If maintenance activities will continue at night, direct shielded light only onto the area required for worker safety and productivity. Lights will not exceed 1.5-foot candles within the lit area.

Photo (above): Lights need to be pointed down and away from surrounding habitat. The light shown in the photo is not directing light onto the work area.

Photo (right): Lights are pointed into active work area.

MIGRATORY BIRDS

BMP: Initial mechanical and chemical vegetation clearing and subsequent mechanical vegetation control should be timed to avoid the migration, breeding, and nesting timeframe of Migratory Bird Treaty Act (MBTA)-covered birds (February 1 through September 1). Herbicide re-treatments could occur throughout the year. When initial mechanical and chemical vegetation control must be implemented during February 1 through September 1, a survey for nesting migratory birds will be conducted immediately prior to the start of activities. If an active nest is found, a buffer zone will be established around the nest and no activities will occur within that zone until nestlings have fledged and abandoned the nest.

Photo (above): Duckling found and removed from a nest in tall grass.

Photo (right): Duckling being harassed instead of allowing it to leave its nest naturally.

BMP: A survey for migratory birds will also be conducted prior to all other maintenance and repair activities to be implemented during the nesting period in areas where MBTA-covered birds might be nesting.

MIGRATORY BIRDS

BMP: If maintenance is scheduled during the migratory bird-nesting season, take steps to prevent MBTA-covered birds from establishing nests in the potential impact area. These steps could include covering equipment and structures, and use of various excluders (e.g., noise). Birds can be harassed to prevent them from nesting on the site. Once a nest is established, they cannot be harassed until all young have fledged and left the nest site. If nesting birds are found during the supplemental survey, defer intrusive maintenance activities until the birds have left the nest. Confirmation that all young have fledged should be made by qualified personnel.

THREATENED, ENDANGERED AND OTHER PROTECTED SPECIES

BMP: Check visible space underneath heavy equipment for listed species and other wildlife prior to moving the equipment at the beginning of each workday and after vehicles have sat idle for more than 15 minutes.

Photos (above): Didn't survive.

Photos (above): Species removed and survived.

Photo (above): Bird nest found in wheel well of equipment that had not been used for less than one week.

BIRD SPECIES

Black-capped Vireo (Del Rio Sector)

BMP: Vegetation control in suitable habitat of threatened or endangered bird species will be limited to the minimum necessary to maintain drivable access roads and to maintain the functionality of other tactical infrastructure. This limited vegetation control will be conducted outside of the nesting season. This restriction does not apply to areas where protocol surveys have been conducted and it has been determined that the area is not occupied and does not contain a primary constituent element (PCE).

Photo: TPWD

Photo (above): Duckling found and removed from a nest in tall grass.

BIRD SPECIES

Black-capped Vireo (Del Rio Sector)

BMP: If vegetation clearing is to be conducted adjacent to suitable habitat of a threatened or endangered bird species, qualified personnel with experience identifying suitable habitat of that species will delineate and clearly mark the suitable habitat to be avoided.

BMP: For all other maintenance activities to be conducted within suitable habitat of a threatened or endangered bird species during the nesting season, the following avoidance measures will apply. A qualified biologist will conduct a survey for threatened and endangered birds prior to initiating maintenance activities. If a threatened or endangered bird is present, a qualified biologist will survey for nests approximately once per week within 500 feet of the maintenance area for the duration of the activity. If an active nest is found, no maintenance will be conducted within 500 feet of the nest until the young have fledged.

Federal Fish and Wildlife Permit Application Form

Click here for addresses.

Return to: U.S. Fish and Wildlife Service (USFWS)

Type of Activity: | **Special Purpose – Miscellaneous**

☑ **New Application**
☐ **Requesting Renewal or Amendment of Permit #** _____

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A.	**Complete if applying as an individual**		
1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
2. Date of birth (mm/dd/yyyy)	3. Social Security No.	4. Occupation	5. Affiliation/ Doing business as (see instructions)
6.a. Telephone number	6.b. Alternate telephone number	6.c. Fax number	6.d. E-mail address

B.	**Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution**		
1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (dba)	
Customs and Border Protection		N/A	
2. Tax identification no.	3. Description of business, agency, or institution		
N/A	Border security law enforcement agency		
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
(b) (6)	(b) (6)	(b)	
5. Principal officer title		6. Primary contact name	
Director, Facilities Management and Engineering		(b) (6)(b) (6)(b) (6)	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address
(b) (6)(b) (6)	(b) (6)(b) (6)	(b) (6)(b) (6)	(b) (6)(b) (6)(b) (6)(b) (6)(b) (6)(b) (6)

C.	**All applicants complete address information**			
1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)				
1331 Pennsylvania Ave. NW, Suite 755N				
1.b. City	1.c. State	1.d. Zip code/Postal code:	1.e. County/Province	1.f. Country
Washington	DC	20004	NA	USA
2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)				
(b) (6)(b) (6)(b) (6)(b) (6)(b) (6)(b) (6)(b) (6)(b) (6)(b) (6)(b) (6)				
2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country
Washington	DC	(b) (6)(b) (6)	NA	USA

D.	**All applicants MUST complete**
1.	Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount** | **$100.00** ⊥ Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))
2.	Do you currently have or have you ever had any Federal Fish and Wildlife permits? Yes ☑ If "yes," list the number of the most current permit you have held or that you are applying to renew/re-issue: MB37271C-0 No ☐
3.	Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature (**in blue ink**) of applicant/person responsible for permit (No photocopied or stamped signatures) — Date of signature (mm/dd/yyyy): 6/8/18

SECTION E. SPECIAL PURPOSE - MISCELLANEOUS
(Migratory Bird Treaty Act, 50 CFR 21.27)

Note: A Federal Special Purpose - Miscellaneous permit is required to address migratory bird activities that are not covered by other existing permit types. Activities must benefit the migratory bird resource, address important research, address human concerns for individual birds, or show other compelling justification. You must be at least 18 years of age to apply for a permit. Special Purpose Permits may be valid up to 3 years.

Please provide the following information. You may use the space provided as well as a separate sheet of paper with your responses numbered according to the application questions below. You should be as thorough and specific as possible in your responses. Incomplete applications will be returned, delayed or abandoned.

1. The species (scientific and common name) and quantity of migratory birds, parts, nests, and eggs to be covered by the permit.

2. A detailed description of the project or activity, including the purpose. Include copies of supporting documentation, research proposals, and any other information that may be useful for evaluating your request.

3. The exact location (physical – address and/or GPS coordinates in decimal degree; or geographic, as appropriate) where the activity would be conducted.

4. A full description of your background and expertise in conducting the proposed activities.

5. If live birds will be maintained in captivity, describe the facilities. Attach photographs and diagrams of your enclosures. Diagrams must include dimensions (length, width, and height) and a description of interior and exterior construction materials, such as flooring and netting materials.

6. Indicate the intended disposition of the specimens, including, if applicable, the name and address of the public, scientific, or educational institution to which all specimens ultimately will be donated upon completion of activity.

7. Anyone who will be assisting you with the permitted activities or acting as your agent must either have their own Federal migratory bird permit for the activity or be identified by you, in writing, as a subpermittee under your permit. They may also require a State permit. Subpermittees must be at least 18 years old. As the primary permittee, you will be responsible for ensuring that your subpermittees are properly trained and adhere to the terms of your permit. Provide the name of anyone besides yourself who will be conducting activities under your permit. For anyone handling or caring for live birds, briefly describe what they will be doing and their qualifications.

8. You must retain records relating to the activities conducted under your permit for at least 5 years from the date of expiration of your permit. Is the physical address you provided in Section C on page 1 of this application the address where your records will be kept? Indicate "yes" or "no." If "no," provide the physical address.

9. **Any permit issued as a result of this application is not valid unless you also have any required State or tribal permits or approvals associated with the activity.** Have you obtained all required State or tribal permits or approvals to conduct this activity? **If "yes," attach a copy of the approval(s).** If "no," indicate whether your "have applied" or whether "none is required." **If you "have applied," send a copy when it is issued.**

10. **Disqualification factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c))

    Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above? If not, indicate "no." If you have, indicate "yes," and provide the following: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

PERMIT APPLICATION FORM INSTRUCTIONS

The following instructions pertain to an application for a U.S. Fish and Wildlife Service or CITES permit. The General Permit Procedures in 50 CFR 13 address the permitting process. For simplicity, all licenses, permits, registrations, and certificates are referred to as a permit.

GENERAL INSTRUCTIONS:

- Complete all blocks/lines/questions in Sections A or B, and in C, D, and E.
- **An incomplete application may cause delays in processing or may be returned to the applicant. Be sure you are filling in the appropriate application form for the proposed activity.**
- Print clearly or type in the information. Illegible applications may cause delays.
- Sign the application in blue ink. Faxes or copies of the original signature will not be accepted.
- Mail the original application to the address at the top of page one of the application or if applicable on the attached address list.
- **Keep a copy of your completed application.**
- **Please plan ahead. Allow at least 60 days for your application to be processed. Some applications may take longer than 90 days to process. (50 CFR 13.11)**
- Applications are processed in the order they are received.
- Additional forms and instructions are available from http://permits.fws.gov.

COMPLETE EITHER SECTION A OR SECTION B:

Section A. **Complete if applying as an individual:**

- Enter the complete name of the responsible individual who will be the permittee if a permit is issued. Enter personal information that identifies the applicant. ***Fax and e-mail are not required if not available.***
- If you are applying on behalf of a client, the personal information must pertain to the client, and a document evidencing power of attorney must be included with the application.
- **Affiliation/ Doing business as (dba)**: business, agency, organizational, or institutional affiliation *directly* related to the activity requested in the application (e.g., a taxidermist is an individual whose business can *directly* relate to the requested activity). The Division of Management Authority (DMA) will **not** accept *doing business as* affiliations for individuals.

Section B. **Complete if applying as a business, corporation, public agency, Tribe, or institution:**

- Enter the complete name of the business, agency, Tribe, or institution that will be the permittee if a permit is issued. Give a brief description of the type of business the applicant is engaged in. Provide contact phone number(s) of the business.
- **Principal Officer** is the person in charge of the listed business, corporation, public agency, Tribe, or institution. The principal officer is the person responsible for the application and any permitted activities. Often the principal officer is a Director or President. **Primary Contact** is the person at the business, corporation, public agency, Tribe, or institution who will be available to answer questions about the application or permitted activities. Often this is the preparer of the application.

ALL APPLICANTS COMPLETE SECTION C:

- For all applications submitted to the Division of Management Authority (DMA) a physical U.S. address is **required**. Province and Country blocks are provided for those USFWS programs which use foreign addresses and are not required by DMA.
- **Mailing address** is address where communications from USFWS should be mailed if different than applicant's physical address.

ALL APPLICANTS COMPLETE SECTION D:

Section D.1 **Application processing fee:**

- An application processing fee is required at the time of application; unless exempted under 50 CFR13.11(d)(3). The application processing fee is assessed to partially cover the cost of processing a request. **The fee does not guarantee the issuance of a permit. Fees will not be refunded for applications that are approved, abandoned, or denied**. We may return fees for withdrawn applications prior to any significant processing occurring.
- **Documentation of fee exempt status is not required for Federal, Tribal, State, or local government agencies; but must be supplied by those applicants acting on behalf of such agencies**. Those applicants acting on behalf of such agencies must submit a letter on agency letterhead and signed by the head of the unit of government for which the applicant is acting on behalf, confirming that the applicant will be carrying out the permitted activity for the agency.

Section D.2 **Federal Fish and Wildlife permits:**

- List the number(s) of your most current FWS or CITES permit or the number of the most recent permit if none are currently valid. If applying for re-issuance of a CITES permit, the original permit must be returned with this application.

Section D.3 **CERTIFICATION:**

- **The individual identified in Section A, the principal officer named in Section B, or person with a valid power of attorney (documentation must be included in the application) must sign and date the application in blue ink.** This signature binds the applicant to the statement of certification. This means that you certify that you have read and understand the regulations that apply to the permit. You also certify that everything included in the application is true to the best of your knowledge. Be sure to read the statement and re-read the application and your answers before signing.

ALL APPLICANTS COMPLETE SECTION E.

APPLICATION FOR A FEDERAL FISH AND WILDLIFE PERMIT
Paperwork Reduction Act, Privacy Act, and Freedom of Information Act – Notices

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501, *et seq.*) and the Privacy Act of 1974 (5 U.S.C. 552a), please be advised:

1. The gathering of information on fish and wildlife is authorized by:
(Authorizing statutes can be found at: http://www.gpoaccess.gov/cfr/index.html and http://www.fws.gov/permits/ltr/ltr.html.)

   a. Bald and Golden Eagle Protection Act (16 U.S.C. 668), 50 CFR 22;
   b. Endangered Species Act of 1973 (16 U.S.C. 1531-1544), 50CFR 17;
   c. Migratory Bird Treaty Act (16 U.S.C. 703-712), 50 CFR 21;
   d. Marine Mammal Protection Act of 1972 (16 U.S.C. 1361, *et. seq.*), 50 CFR 18;
   e. Wild Bird Conservation Act (16 U.S.C. 4901-4916), 50 CFR 15;
   f. Lacey Act: Injurious Wildlife (18 U.S.C. 42), 50 CFR 16;
   g. Convention on International Trade in Endangered Species of Wild Fauna and Flora (TIAS 8249), http://www.cites.org , 50 CFR 23;
   h. General Provisions, 50 CFR 10;
   i. General Permit Procedures, 50 CFR 13; and
   j. Wildlife Provisions (Import/export/transport), 50 CFR 14.

2. Information requested in this form is purely voluntary. However, submission of requested information is required in order to process applications for permits authorized under the above laws. Failure to provide all requested information may be sufficient cause for the U.S. Fish and Wildlife Service to deny the request. We may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

3. Certain applications for permits authorized under the Endangered Species Act of 1973 (16 U.S.C. 1539) and the Marine Mammal Protection Act of 1972 (16 U.S.C. 1374) will be published in the **Federal Register** as required by the two laws.

4. Disclosures outside the Department of the Interior may be made without the consent of an individual under the routine uses listed below, if the disclosure is compatible with the purposes for which the record was collected. (Ref. 68 FR 52611, September 4, 2003)

   a. Routine disclosure to subject matter experts, and Federal, Tribal, State, local, and foreign agencies, for the purpose of obtaining advice relevant to making a decision on an application for a permit or when necessary to accomplish an FWS function related to this system of records.
   b. Routine disclosure to the public as a result of publishing **Federal Register** notices announcing the receipt of permit applications for public comment or notice of the decision on a permit application.
   c. Routine disclosure to Federal, Tribal, State, local, or foreign wildlife and plant agencies for the exchange of information on permits granted or denied to assure compliance with all applicable permitting requirements.
   d. Routine disclosure to Captive-bred Wildlife registrants under the Endangered Species Act for the exchange of authorized species, and to share information on the captive breeding of these species.
   e. Routine disclosure to Federal, Tribal, State, and local authorities who need to know who is permitted to receive and rehabilitate sick, orphaned, and injured birds under the Migratory Bird Treaty Act and the Bald and Golden Eagle Protection Act; federally permitted rehabilitators; individuals seeking a permitted rehabilitator with whom to place a bird in need of care; and licensed veterinarians who receive, treat, or diagnose sick, orphaned, and injured birds.
   f. Routine disclosure to the Department of Justice, or a court, adjudicative, or other administrative body or to a party in litigation before a court or adjudicative or administrative body, under certain circumstances.
   g. Routine disclosure to the appropriate Federal, Tribal, State, local, or foreign governmental agency responsible for investigating, prosecuting, enforcing, or implementing statutes, rules, or licenses, when we become aware of a violation or potential violation of such statutes, rules, or licenses, or when we need to monitor activities associated with a permit or regulated use.
   h. Routine disclosure to a congressional office in response to an inquiry to the office by the individual to whom the record pertains.
   i. Routine disclosure to the Government Accountability Office or Congress when the information is required for the evaluation of the permit programs.
   j. Routine disclosure to provide addresses obtained from the Internal Revenue Service to debt collection agencies for purposes of locating a debtor to collect or compromise a Federal claim against the debtor or to consumer reporting agencies to prepare a commercial credit report for use by the FWS.

5. For individuals, personal information such as home address and telephone number, financial data, and personal identifiers (social security number, birth date, etc.) will be removed prior to any release of the application.

6. The public reporting burden on the applicant for information collection varies depending on the activity for which a permit is requested. The relevant burden for a Special Purpose – Miscellaneous permit application is 2 hours and 30 minutes for recordkeeping. This burden estimate includes time for reviewing instructions, gathering and maintaining data and completing and reviewing the form. You may direct comments regarding the burden estimate or any other aspect of the form to the Service Information Clearance Officer, U.S. Fish and Wildlife Service, Mail Stop 222, Arlington Square, U.S. Department of the Interior, 1849 C Street, NW, Washington D.C. 20240.

Freedom of Information Act – Notice

For organizations, businesses, or individuals operating as a business (i.e., permittees not covered by the Privacy Act), we request that you identify any information that should be considered privileged and confidential business information to allow the Service to meet its responsibilities under FOIA. Confidential business information must be clearly marked "Business Confidential" at the top of the letter or page and each succeeding page and must be accompanied by a non-confidential summary of the confidential information. The non-confidential summary and remaining documents may be made available to the public under FOIA [43 CFR 2.26 – 2.33].

INTERAGENCY AGREEMENT
STATEMENT OF WORK
BETWEEN
U.S. CUSTOMS AND BORDER PROTECTION AND THE
DEPARTMENT OF INTERIOR (DOI), U.S. FISH AND WILDLIFE SERVICES (FWS)

I. AUTHORITY

The authority of the Department of Homeland Security, U.S. Customs and Border Protection and the Department of Interior, United States Fish and Wildlife Service (FWS) which is acting as the servicing agency (collectively the "Parties") to enter into this Interagency Agreement (IAA) is the Economy Act of 1932 (31 U.S.C. 1535), resulting in an assisted acquisition.

II. OBJECTIVE/PURPOSE

This Interagency Agreement (IAA) is between the Department of Interior, U.S. Fish and Wildlife Services (FWS) and the Department of Homeland Security, U.S. Customs and Border Protection (CBP), Border Wall (BW) Program Management Office (PMO). In accordance with this agreement, FWS (servicing agency), will, on behalf of CBP (requesting agency), use its experience, background, and expertise to chemically and mechanically control non-native invasive plant species that exploit openings in the riparian forest canopy in the Tijuana River Valley and the Sweetwater River Valley which are located in the San Diego Border Patrol Sector.

The overall goals of the project are to: reduce the risk of wildfire; improve habitat for riparian nesting bird species including the federally-endangered least Bell's vireo and Southwestern willow flycatcher; mitigate safety risks to FWS staff and Border Patrol personnel; and improve access and visibility for Border Patrol operations. The San Diego Sector of the U.S. Border Patrol is one of the busiest in the country in terms of illegal entries and smuggling activity from Mexico.

III. SCOPE

This Statement of Work describes the comprehensive scope of support services for CBP's requirements. During the Base Period, U.S. Fish and Wildlife Service will use its best efforts to provide the following services either by contract or by in-house efforts:

a. **Sweetwater River Valley** (using either in-house or contractor resources), including but not limited to:

    1) The primary actions are to chemically and mechanically control non-native invasive plant species that exploit openings in the riparian forest canopy. Chemical treatments would include application of herbicide at the appropriate point of the growth cycle for the chemical to be transported to the roots and kill the plant. Mechanical treatments would include cutting, removal, and chipping. Non-native species that contribute to hazardous fuel loading and are targeted for

removal include giant reed (*Arundo donax*), saltcedar (*Tamarix* spp.), Peruvian peppertree (*Schinus molle*), eucalyptus (*Eucalyptus* spp.), Mexican fan palm (*Washingtonia robusta*), Canary Island date palm (*Phoenix canariensis*), and castor bean (*Ricinus communis*). Planning activities include project plan development, mapping of target species, environmental compliance, contract development and administration, treatment effectiveness monitoring, and reporting. Two units of the Sweetwater River totaling 242 acres would be treated – Unit 1 (upstream of SR 94 to the Refuge boundary with private land) is 124 acres; Unit 2 (downstream of SR 94 to boundary with Sweetwater Authority) is 118 acres.

Follow-up chemical and mechanical treatments will likely be necessary for 3 years to achieve 100% control of invasive plant species and to remove live or dead biomass.

The project area is designated critical habitat for the federally-endangered least Bell's vireo (*Vireo bellii pusillus*) and Southwestern willow flycatcher (*Empidonax traillii extimus*).

b. **Tijuana River Valley** (using either in-house or contractor resources), including but not limited to:

1) The primary actions are to mechanically remove woody debris from the riparian zone and to chemically and mechanically control invasive plant species that exploit openings in the forest canopy created by the beetle infestation. Mechanical treatment of large woody debris would include cutting, removal, and chipping. Invasive plant species would be controlled with herbicides followed by mechanical removal of the dead material. The main species to be targeted include giant reed (*Arundo donax*), saltcedar (*Tamarix* spp.), and castor bean (*Ricinus communis*). Planning activities include project plan development, mapping of target species, environmental compliance, contract development and administration, treatment effectiveness monitoring, and reporting. The total footprint of the project area is approximately 200 acres.

Follow-up mechanical and chemical treatments will likely be necessary for 3-5 years to achieve 100% control of invasive plant species or to remove additional woody debris generated by beetle activity.

Portions of the project area include designated critical habitat for the federally-endangered least Bell's vireo (*Vireo bellii pusillus*).

IV. **REQUIREMENTS/TASKS:**

a. **Sweetwater River Valley:** The total footprint is 242 acres; and 242 acres would be counted for accomplishments.
   1) Treatment #1: CATNR-FY19-CX-SCA-Units 1,2-BP
   2) Treatment #2: CATNR-FY19-MX-SCA-Units 1,2-BP

b. **Tijuana River Valley:** The total footprint is approximately 200 acres; however, approximately 1,120 acres will be counted for accomplishments (each treatment type is counted once; follow-up treatments will occur for 3-5 years on each unit).
   1) Treatment #1: CATJR-FY19-MX-SCA-Units 1,2-BP
   2) Treatment #2: CATJR-FY19-CX-SCA-Units 3,4-BP
   3) Treatment #3: CATJR-FY20-MX-SCA-Units 1,2-BP
   4) Treatment #4: CATJR-FY20-CX-SCA-Units 3,4-BP
   5) Treatment #5: CATJR-FY20-MX-SCA-Units 1,2-BP
   6) Treatment #6: CATJR-FY20-CX-SCA-Units 1,2-BP

V. **ESTIMATED COST BREAKOUT (INCLUDING APPLICABLE FEES):**

Project Title	TOTAL COST ESTIMATE
Sweetwater River Valley	
FY19	350,000.00
Sub-Total	**350,000.00**
Tijuana River Valley	
FY19	330,000.00
FY20	320,000.00
Subtotal	**650,000.00**
Grand Total	**1,000,000.00**

Table 1: Project Cost Estimate

The Base Period amount includes all costs for all work included in the scope of this IAA plus the project management costs charged by FWS for the Base Period. Actual costs are dependent on the work performed. This budgetary estimate is based on a summation of all the labor, contract and other direct and indirect costs assumed to be required to fund the mechanical / chemical treatments executed during the Base Period through contract closeout.

VI. **DELIVERABLES:**

The servicing agency must provide an electronic version of the following:

- Monthly expense burn rate report
- Monthly Project Delivery Schedule

VII. PLACE OF PERFORMANCE

The place of performance for this requirement shall include San Diego Border Patrol Sector.

VIII. PERIOD OF PERFORMANCE

This Agreement is effective from _____ through four years from date of award, which is estimated to be from XXX 2019 – XXX, 2024.

IX. FUNDING

The initial value of the IAA base year is **$1,000,000.00**
Any modifications resulting from a CBP approved change request will be funded from the change management reserve contract line item number (CLIN) 10. Use of the change management reserve funding CLIN 10 is only authorized after receipt of a CBP approved change request. Funding will be provided by CBP BW PMO to the Department of Interior, US Fish and Wildlife Service.

Specific funding information is as follows:

Subject: NY Times inquiry re: border wall protest

Good afternoon Gavin,

I received a call today from Michael Hardy at the NY Times. He said he is planning to cover the protest at the Santa Ana NWR this weekend. He asked for our position on the proposed border wall. I provided him or statement and referred him to CBP. He asked a follow up question re: consultation and I reiterated our position (we are one of many agencies being informed as CBP works to implement the President's Executive Order).

Let me know if you have questions.

Subject: NY Times inquiry re: border wall protest

Good afternoon Gavin,

I received a call today from Michael Hardy at the NY Times. He said he is planning to cover the protest at the Santa Ana NWR this weekend. He asked for our position on the proposed border wall. I provided him or statement and referred him to CBP. He asked a follow up question re: consultation and I reiterated our position (we are one of many agencies being informed as CBP works to implement the President's Executive Order).

Let me know if you have questions.

Hi Kayla and Chun,

Attached is the draft testimony for DOJ's Environment and Natural Resources Division for an upcoming hearing. There is mention of ESA and CERCLA litigation. Can you please check with folks in ES and see if there is anything of major concern in the testimony?

If you could please let me Lisa and me know by 10am tomorrow, I would greatly appreciate it.

Thank you,
Alyssa

DEPARTMENT OF THE INTERIOR

LEGISLATIVE COUNSEL REFERRAL

Date:	**May 16, 2017**
To:	**Legislative Liaison**
Subject:	**HRG #28 - JUSTICE Oversight Testimony 5/23/17** **Re: A Time to Reform: Oversight of the Activities of the Justice Department's Civil, Tax, and ENR Divisions, and the U.S. Trustee Program**

Attached for your review, please find a draft DOJ Environment and Natural Resources Division (ENRD) testimony for a May 23rd oversight hearing before the House Judiciary Sub-Committee on Regulatory Reform, Commercial, and Antitrust Law. This hearing is entitled "A Time to Reform: Oversight of the Activities of the Justice Department's Civil, Tax, and ENR Divisions, and the U.S. Trustee Program. Among other things, the draft testimony discusses ENRD: (1) efforts in support of Administration priorities, including the acquisition of private land to enhance border security; (2) enforcement efforts, to address crimes including fraud involving records of Renewable Identification Numbers and discharges of oily waste; and (3) civil settlements under the Clean Air Act, and Clean Water Act.

Note that witnesses from DOJ's Civil Division, Tax Division, and U.S. Trustee Program are also expected to testify at this hearing.

Please review the draft testimony and provide your comments/edits by the deadline above.

Please send agency comments or respond with a "no comment" to Pamela_Barkin@ios.doi.gov and Joseph_Nevils@ios.doi.gov by the deadline above.

FWS	1018-0102	Agency Information Collection Activities: OMB Control Number 1018-0102; National Wildlife Refuge Special Use Permit Applications and Reports	
FWS		Giant garter snake; Notice of Availability of Second Revised Draft Recovery Plan	This document describes the strategy, objectives, and actions necessary for achieving recovery of the giant garter snake, along with criteria that, when met, signify that the Service may be able to remove the species from the list of threatened and endangered species. The plan focuses on establishing and protecting self-sustaining populations throughout the range of the species, restoring and conserving healthy wetland ecosystems that will support the species, and ameliorating or eliminating the threats that caused the species to be listed.
FWS	1018-BB54	Listing Determination for the I'iwi	This final rule lists the I'iwi (Drepanis coccinea), a forest bird endemic to Hawaii, as threatened under the Endangered Species Act
FWS		Stock Assessment Reports for Southern Beaufort Sea and Chukchi-Bering Seas; Opening 90-day Public Comment Period	The Fish and Wildlife Service (Service) is publishing a Federal Register Notice of Availability on draft revised Stock Assessment Reports (SARs) for the Southern Beaufort and the Chukchi Seas stocks of polar bears. This notice opens a 90-day public comment period to request input on these draft revisions.

FWS		Receipt of Application for Incidental Take Permit; Low-Effect Habitat Conservation Plan for Betteravia Farms, LLC /Curletti Farm Employee Housing Project, Santa Barbara County, California	
FWS		Draft Recovery Plan for the Pima Pineapple Cactus	We announce that our Pima pineapple cactus draft recovery plan is available. The cactus is listed as endangered under the Endangered Species Act of 1973, as amended. This plant species is currently found in southern Arizona and in northern Sonora, Mexico. The draft recovery plan includes specific recovery objectives and criteria to be met in order to enable us to remove this species from the list of endangered and threatened wildlife and plants. A proposed border wall is not anticipated to impede the recovery of the Pima pineapple cactus. We request that local, State, and Federal agencies, Tribes, and the public review and comment. We will also accept any new species status information throughout its range to assist with recovery plan finalization.
FWS		Batched permit notice: receipt of ES permit applications (ERO Resources Corp/ TE040510 and others)	This notice informs the public of the receipt of multiple applications for ESA recovery permits and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.

FWS	1018-BB34	Reopening of the Comment Period and Announcement of Two Public Hearings for Texas Hornshell	We received several requests for public hearings on the proposed rule to list the Texas hornshell (*Popenaias popeii*) as an endangered species. We are reopening the comment period on the proposed listing rule for 30 days and announcing the dates and locations of these public hearings. The additional comment period will allow the public another opportunity to comment on the proposed rule as well as allow us to take into consideration input we receive during the two public hearings. The public information sessions, to be held immediately before both public hearings, will give us an opportunity to interact with the public, hear their concerns, and provide information on what listing is and does.The Texas hornshell was part of the Multi District Litigation settlement agreement. The public hearings must occur in enough time to revise the final listing rule as appropriate and publish our final listing determination in the Federal Register by August 10, 2017.

FWS		Marine Mammals; Incidental Take During Specified Activities; Proposed Incidental Harassment Authorization for Pacific Walruses and Polar Bears in Alaska and Associated Federal Waters; Quintillion	In response to a request from Quintillion Subsea Operation, LLC (Quintillion), we propose to authorize the incidental taking by harassment of small numbers of Pacific walruses and polar bears from July 1, 2017, through November 15, 2017, under section 101(a)(5)(D) of the Marine Mammal Protection Act of 1972 (MMPA), as amended. Quintillion has requested this incidental harassment authorization (IHA) for its planned cable-laying activities in the northern Bering, Chukchi, and southwestern Beaufort Seas, the marine waters of the State of Alaska, and coastal land adjacent to Nome, Kotzebue, Point Hope, Wainwright, Utqiagvik, and Oliktok Point. We anticipate no take (as defined in the MMPA) by injury or death and include none in this proposed authorization, which, if finalized, would be for non-lethal, non-injurious, take by harassment only. The Quintillion project will provide for improved broadband internet service in northern Alaska. The project is a continuation of work begun in 2016.
FWS	1018-BA41	Removal of the Greater Yellowstone Ecosystem Population of Grizzly Bears from the List of Endangered and Threatened Wildlife	
FWS		Intent to Prepare a Draft Environmental Impact Statement and Associated Documents for LCRA Transmission Services Corporation's Proposed Habitat Conservation Plan, TX	

FWS	1018-BB74	Establishment of a Nonessential Experimental Population of the Oregon Silverspot Butterfly in Northwestern Oregon	
FWS	1018-BA74, 1018-BB89, 1018-BB90, and 1018-BB87	Reopening of Comment Period on Proposed Rules: Listing & Critical Habitat (G. Fescue, 1018-BA74), Downlist from Endangered to Threatened (Cactuses, 1018-BB89 and 1018-BB90), Delist (Wild-Buckwheat, 1018-BB87)	We, the U.S. Fish and Wildlife Service (Service), announce that we are reopening the comment periods for our proposed rules to list *Festuca ligulata* (Guadalupe fescue) as an endangered species; to designate *Festuca ligulata* critical habitat ; to reclassify *Sclerocactus brevihamatus* ssp. *tobuschii* (Tobusch fishhook cactus) from endangered to threatened; to reclassify *Echinocereus fendleri* var. *kuenzleri* (Kuenzler hedgehog cactus) from endangered to threatened; and to remove *Eriogonum gypsophilum* (gypsum wild-buckwheat) from the Federal List of Endangered and Threatened Plants. We are reopening the comment period for each of these proposed rules for 30 days in order to publish a legal notice and to give all interested parties further opportunity to comment on the proposed rules. Comments previously submitted need not be resubmitted, as they will be fully considered in preparing the final listing determinations.
FWS		Louisiana Pinesnake; Notice of Availability for the Candidate Conservation Agreement with Assurances	

FWS		Yolo Habitat Conservancy, CA; Counties of Yolo and Cities of Davis, West Sacramento, Winters, and Woodland; draft Joint Yolo Habitat Conservation Plan and draft Joint Natural Community Conservation Plan	
FWS		Initiation of a 5-Year Review of the Aleutian Shield Fern, AK	This notice alerts the public that we are initiating a 5-year status review for the Aleutian shield fern under the ESA and provides an opportunity for the public to provide information they may have on the species. A 5-year status review results in a recommendation on whether the species should be classified differently or delisted. The species is only known to occur on one island in the Aleutian Island chain.
FWS		U.S. Endangered Species Recovery Permit Applications (first applicant: Arkansas Highway and Transportation Department, Little Rock, AR)	This notice informs the public of the receipt of applications for Endangered Species Act recovery permits for Region 4 and provides them with the opportunity to receive copies of the applications and submit comments.
FWS		Draft Barton Springs Edwards Aquifer Conservation District Habitat Conservation Plan and Draft Environmental Impact Statement; Barton Springs salamander and Austin blind salamander, Texas	This is a Federal Register Notice of Availability for the draft Barton Springs Edwards Aquifer Conservation District HCP and dEIS for take of the Barton Springs salamander (Eurycea sosorum) and the Austin blind salamander (Eurycea waterlooensis) in Travis and Hays Counties, Texas.

FWS		U.S. Endangered Species Recovery Permit Applications; Region 6	This notice informs the public of the receipt of multiple applications for ESA recovery permits and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.
FWS		Notice of availability; joint Draft Environmental Impact Statement And Draft Environmental Impact Report; receipt of permit application, Draft Habitat Conservation Plan; South Sacramento County, California	The proposed permit would authorize the incidental take of 28 covered-species by the construction and operation of new urban development, transportation, infrastructure, and other projects that would be implemented or authorized by five permit applicants over a 50-year period, within a 317,656-acre planning area located in south Sacramento County, California.
FWS		Endangered and Threatened Wildlife and Plants; Availability of Proposed Low-Effect Lakes at St. Sebastian Preserve Habitat Conservation Plan, Brevard County, FL / Atlantic Coast Paladin Estates, LLC and Micco Road Investments, LLC c/o the Kelsey Group	The applicant is requesting take of approximately 99.85 acres of Audubon's Crested Caracara (*Polyborus plancus audubonii*) nesting and foraging habitat incidental to the construction of a residential development project in Brevard County, Florida. The Audubon's Crested Caracara is federally listed as threatened. Impacts to the species will be offset by conservation of 20 acres of caracara habitat and a $10,000 management endowment.

FWS		NOA: Draft Texas Coastal Bend Shortgrass Prairie Multi-Species Recovery Plan, including Slender Rush-Pea and South Texas Ambrosia	This is a notice of availability for the draft recovery plan that includes slender rush-pea and South Texas ambrosia. The recovery plan includes specific recovery objectives and criteria that, when achieved, will enable us to remove both species from the list of endangered and threatened plants. We are requesting review and comment on the recovery plan from the public; tribes; and local, State, and Federal agencies.
FWS	1018-AX99	Removal of the Hualapai Mexican Vole From the Federal List of Endangered and Threatened Wildlife	
FWS		Recovery Permits (Kiernan, first)	This notice informs the public of the receipt of multiple applications for Endangered Species Act (ESA) recovery permits, requests public comment on the permits, and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.
FWS		ES Recovery Permit Applications (First Preserve District of Will County, Plainfield, IL, and others)	
FWS		Initiation of 5-Year Status Reviews of 23 Southeastern Species	

FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Maire Malone, first) FWS-HQ-IA-2017-0019	This notice is a periodic action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice, the Division of Management Authority has issued nine permits under the ESA and two under the MMPA that require notification to the public. This notice only informs the public that, after going through a complete review of the submitted applications and considering any comments from the public or outside experts, the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA, there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species, there is no statutory time frame established under the ESA.

FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Nature Conservation Trust, first applicant)	This notice is a periodic action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice, the Division of Management Authority has issued four permits under the ESA and one under the MMPA that require notification to the public. This notice only informs the public that, after going through a complete review of the submitted applications and considering any comments from the public or outside experts, the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA, there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species, there is no statutory time frame established under the ESA.
FWS		Endangered Species; Receipt of Applications for Permits (Tony Goldberg, University of Wisconsin, Madison, WI, first applicant)	

FWS		Endangered Species; Notice of Issuance (Foreign Species Permits; Michael Rohweder, first permittee)	This notice is a periodic action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice, the Division of Management Authority has issued four permits under the ESA and one under the MMPA that require notification to the public. This notice only informs the public that, after going through a complete review of the submitted applications and considering any comments from the public or outside experts, the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA, there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species, there is no statutory time frame established under the ESA.

FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Feld Entertainment, Inc., first applicant)	This is a weekly action taken by the U.S. Fish and Wildlife Service, Division of Management Authority, to notify the public of the receipt of applications for Endangered Species Act (ESA) permits. This notice provides the public an opportunity to comment on sixteen(16) (ESA) applications and one (1) Marine Mammal application that were received by the Service requesting authorization to conduct otherwise prohibited activities within the United States or to import biological specimens for research purposes. There are no decisions announced in these notices, but we cannot finalize the review of these permit applications until the conclusion of a mandatory 30-day comment period under the ESA.
FWS		Exemption from Threatened Species Permits for a Qualifying Beluga Sturgeon Aquaculture Facility	
FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Dallas World Aquarium, first applicant)	
FWS		Meeting Notice; Service Regulations Committee Meeting	
FWS		Meeting Notice; North American Wetlands Council Meeting	
FWS	1018-BB24	Migratory Bird Subsistence Harvest in Alaska; Use of Inedible Bird Parts in Authentic Alaska Native Handicrafts for Sale	

FWS	1018-AZ69	Migratory Bird Permits; Control Order for Introduced Migratory Bird Species in Hawaii (Cattle Egrets and Barn Owls)	
FWS		Notice of Intent to Prepare an Environmental Impact Statement; Hycroft Mining Company; Request for Take Permits Under the Bald and Golden Eagle Protection Act	
FWS	1018-AY30	Eagle Permits: Revision to Regulations for Eagle Incidental Take and Take of Nests; Correction	
FWS	1018-BB06	Migratory Bird Hunting; Approval of Corrosion-inhibited Copper Shot as Nontoxic for Waterfowl Hunting	
FWS	1018-BB73	2018–19 Migratory Game Bird Hunting Regulations	
FWS	1018-BB40	Migratory Bird Hunting; Seasons and Bag and Possession Limits for Certain Migratory Game Birds for the 2017–18 Season	
FWS		Notice of Availability for the Grays Harbor National Wildlife Refuge and Black River Unit of Billy Frank Jr. Nisqually National Wildlife Refuge, Grays Harbor and Thurston Counties, WA; Comprehensive Conservation Plans and Finding of No Significant Impact for Environmental Assessment	

FWS		Notice of intent to implement annual hunting fees, annual fishing fees, and special permit fees; Clarks River National Wildlife Refuge, KY [FWS–R4–R–2016–N141]	Clarks River National Wildlife Refuge proposes to implement annual hunting and fishing fees and special permit fees for commercial recreational activities. The proposed cost for the annual access permit is $15 (free for youth under 16, and $5 for seniors 65 and over); there would be a $50 minimum fee for annual Recreational Special Use Permit authorizing commercial recreational activities to be conducted on the Refuge.
FWS	1018-BB75	Refuge-Specific Hunting and Sport Fishing Regulations, 2017–18	
FWS		Notice of Intent to Re-open the Planning Process for the Comprehensive Conservation Plan and Enivironmental Assessment at Crystal River National Wildlife Refuge	
FWS		NOA: Camas National Wildlife Refuge, Jefferson County, ID; Comprehensive Conservation Plan and Finding of No Significant Impact for Environmental Assessment	A Finding of No Significant Impact was signed on March 10, 2017, and the Comprehensive Conservation Plan (CCP) was completed for Camas National Wildlife Refuge (NWR), located in Jefferson County, Idaho. The CCP will guide management of the Refuge for 15 years or until it is revised, and actions will be implemented as funding becomes available. We are informing the Secretary of our intent to publish the Notice of Availability for the Camas National Wildlife Refuge CCP and the Finding of No Significant Impact for the Environmental Assessment (EA).

FWS	1018-BA31	Disapproval of Final Rule: Non-Subsistence Take of Wildlife, and Public Participation and Closure Procedures, on National Wildlife Refuges in Alaska	The final rule published August 5, 2016 (81 FR 52248) and became effective September 6, 2016. The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act, signed by the President on April 3, 2017 (P.L. 115-20). This action conforms to P.L. 115-20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the effective date of the final rule that was nullified under the Congressional Review Act.
FWS	1018-BA33	Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4	The proposed rule:• Is in response to requests from States to revise and simplify the rules for license certification. The Service worked closely with DOI solicitors and AFWA attorneys in developing the new language. • Includes changes that were reviewed by Regional and State representatives, and interested stakeholders, during pre-rulemaking comment periods and were developed considering the comments we received. • Includes definitions and additions to the rule that will clarify the rule and improve national consistency. • Was developed in coordination with the Association of Fish and Wildlife Agencies, the Federal Aid Coordinators Working Group, Regional WSFR offices, State representatives, and members of interest organizations.

Bureau	RIN or OMB Control Number	Title	Summary
FWS	1018-0022	Agency Information Collection Activities: OMB Control Number 1018-0022; Federal Fish and Wildlife Permit Applications and Reports—Migratory Birds and Eagles	
FWS	1018-0093	Agency Information Collection Activities: OMB Control Number 1018-0093; Federal Fish and Wildlife Permit Applications and Reports—Management Authority	
FWS	1018-0123	Agency Information Collection Activities: OMB Control Number 1018-0123; International Conservation Grant Programs	
FWS	1018-0095	Agency Information Collection Activities: OMB Control Number 1018-0095; Endangered and Threatened Wildlife, Experimental Populations	The Notice provides the public with an opportunity to comment on the U.S. Fish and Wildlife Service's (Service) intention to renew Office of Management and Budget (OMB) Control No. 1018-0095. The Secretary of the Interior is authorized to establish experimental populations of endangered or threatened species in 50 CFR 17.84. Individuals of experimental populations are protected under the ESA. This control number authorizes the Service to collect important information necessary to monitor the success of reintroduction and recovery efforts.
FWS	1018-0023	Agency Information Collection Activities: OMB Control Number 1018-0023; Migratory Bird Harvest Information Program and Migratory Bird Surveys	

FWS	1018-0066	Agency Information Collection Activities: OMB Control Number 1018-0066; Marine Mammal Marking, Tagging, and Reporting Certificates, and Registration of Certain Dead Marine Mammal Hard Parts	
FWS	1018-0102	Agency Information Collection Activities: OMB Control Number 1018-0102; National Wildlife Refuge Special Use Permit Applications and Reports	
FWS		Giant garter snake; Notice of Availability of Second Revised Draft Recovery Plan	This document describes the strategy, objectives, and actions necessary for achieving recovery of the giant garter snake, along with criteria that, when met, signify that the Service may be able to remove the species from the list of threatened and endangered species. The plan focuses on establishing and protecting self-sustaining populations throughout the range of the species, restoring and conserving healthy wetland ecosystems that will support the species, and ameliorating or eliminating the threats that caused the species to be listed.
FWS	1018-BB54	Listing Determination for the I'iwi	This final rule lists the I'iwi (Drepanis coccinea), a forest bird endemic to Hawaii, as threatened under the Endangered Species Act
FWS		Stock Assessment Reports for Southern Beaufort Sea and Chukchi-Bering Seas; Opening 90-day Public Comment Period	The Fish and Wildlife Service (Service) is publishing a Federal Register Notice of Availability on draft revised Stock Assessment Reports (SARs) for the Southern Beaufort and the Chukchi Seas stocks of polar bears. This notice opens a 90-day public comment period to request input on these draft revisions.

FWS		Receipt of Application for Incidental Take Permit; Low-Effect Habitat Conservation Plan for Betteravia Farms, LLC /Curletti Farm Employee Housing Project, Santa Barbara County, California	
FWS		Draft Recovery Plan for the Pima Pineapple Cactus	We announce that our Pima pineapple cactus draft recovery plan is available. The cactus is listed as endangered under the Endangered Species Act of 1973, as amended. This plant species is currently found in southern Arizona and in northern Sonora, Mexico. The draft recovery plan includes specific recovery objectives and criteria to be met in order to enable us to remove this species from the list of endangered and threatened wildlife and plants. A proposed border wall is not anticipated to impede the recovery of the Pima pineapple cactus. We request that local, State, and Federal agencies, Tribes, and the public review and comment. We will also accept any new species status information throughout its range to assist with recovery plan finalization.
FWS		Batched permit notice: receipt of ES permit applications (ERO Resources Corp/ TE040510 and others)	This notice informs the public of the receipt of multiple applications for ESA recovery permits and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.

FWS	1018-BB34	Reopening of the Comment Period and Announcement of Two Public Hearings for Texas Hornshell	We received several requests for public hearings on the proposed rule to list the Texas hornshell (*Popenaias popeii*) as an endangered species. We are reopening the comment period on the proposed listing rule for 30 days and announcing the dates and locations of these public hearings. The additional comment period will allow the public another opportunity to comment on the proposed rule as well as allow us to take into consideration input we receive during the two public hearings. The public information sessions, to be held immediately before both public hearings, will give us an opportunity to interact with the public, hear their concerns, and provide information on what listing is and does.The Texas hornshell was part of the Multi District Litigation settlement agreement. The public hearings must occur in enough time to revise the final listing rule as appropriate and publish our final listing determination in the Federal Register by August 10, 2017.

FWS		Marine Mammals; Incidental Take During Specified Activities; Proposed Incidental Harassment Authorization for Pacific Walruses and Polar Bears in Alaska and Associated Federal Waters; Quintillion	In response to a request from Quintillion Subsea Operation, LLC (Quintillion), we propose to authorize the incidental taking by harassment of small numbers of Pacific walruses and polar bears from July 1, 2017, through November 15, 2017, under section 101(a)(5)(D) of the Marine Mammal Protection Act of 1972 (MMPA), as amended. Quintillion has requested this incidental harassment authorization (IHA) for its planned cable-laying activities in the northern Bering, Chukchi, and southwestern Beaufort Seas, the marine waters of the State of Alaska, and coastal land adjacent to Nome, Kotzebue, Point Hope, Wainwright, Utqiagvik, and Oliktok Point. We anticipate no take (as defined in the MMPA) by injury or death and include none in this proposed authorization, which, if finalized, would be for non-lethal, non-injurious, take by harassment only. The Quintillion project will provide for improved broadband internet service in northern Alaska. The project is a continuation of work begun in 2016.
FWS	1018-BA41	Removal of the Greater Yellowstone Ecosystem Population of Grizzly Bears from the List of Endangered and Threatened Wildlife	
FWS		Intent to Prepare a Draft Environmental Impact Statement and Associated Documents for LCRA Transmission Services Corporation's Proposed Habitat Conservation Plan, TX	

FWS	1018-BB74	Establishment of a Nonessential Experimental Population of the Oregon Silverspot Butterfly in Northwestern Oregon	
FWS	1018-BA74, 1018-BB89, 1018-BB90, and 1018-BB87	Reopening of Comment Period on Proposed Rules: Listing & Critical Habitat (G. Fescue, 1018-BA74), Downlist from Endangered to Threatened (Cactuses, 1018-BB89 and 1018-BB90), Delist (Wild-Buckwheat, 1018-BB87)	We, the U.S. Fish and Wildlife Service (Service), announce that we are reopening the comment periods for our proposed rules to list *Festuca ligulata* (Guadalupe fescue) as an endangered species; to designate *Festuca ligulata* critical habitat ; to reclassify *Sclerocactus brevihamatus* ssp. *tobuschii* (Tobusch fishhook cactus) from endangered to threatened; to reclassify *Echinocereus fendleri* var. *kuenzleri* (Kuenzler hedgehog cactus) from endangered to threatened; and to remove *Eriogonum gypsophilum* (gypsum wild-buckwheat) from the Federal List of Endangered and Threatened Plants. We are reopening the comment period for each of these proposed rules for 30 days in order to publish a legal notice and to give all interested parties further opportunity to comment on the proposed rules. Comments previously submitted need not be resubmitted, as they will be fully considered in preparing the final listing determinations.
FWS		Louisiana Pinesnake; Notice of Availability for the Candidate Conservation Agreement with Assurances	

FWS		Yolo Habitat Conservancy, CA; Counties of Yolo and Cities of Davis, West Sacramento, Winters, and Woodland; draft Joint Yolo Habitat Conservation Plan and draft Joint Natural Community Conservation Plan	
FWS		Initiation of a 5-Year Review of the Aleutian Shield Fern, AK	This notice alerts the public that we are initiating a 5-year status review for the Aleutian shield fern under the ESA and provides an opportunity for the public to provide information they may have on the species. A 5-year status review results in a recommendation on whether the species should be classified differently or delisted. The species is only known to occur on one island in the Aleutian Island chain.
FWS		U.S. Endangered Species Recovery Permit Applications (first applicant: Arkansas Highway and Transportation Department, Little Rock, AR)	This notice informs the public of the receipt of applications for Endangered Species Act recovery permits for Region 4 and provides them with the opportunity to receive copies of the applications and submit comments.
FWS		Draft Barton Springs Edwards Aquifer Conservation District Habitat Conservation Plan and Draft Environmental Impact Statement; Barton Springs salamander and Austin blind salamander, Texas	This is a Federal Register Notice of Availability for the draft Barton Springs Edwards Aquifer Conservation District HCP and dEIS for take of the Barton Springs salamander (Eurycea sosorum) and the Austin blind salamander (Eurycea waterlooensis) in Travis and Hays Counties, Texas.

FWS		U.S. Endangered Species Recovery Permit Applications; Region 6	This notice informs the public of the receipt of multiple applications for ESA recovery permits and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.
FWS		Notice of availability; joint Draft Environmental Impact Statement And Draft Environmental Impact Report; receipt of permit application, Draft Habitat Conservation Plan; South Sacramento County, California	The proposed permit would authorize the incidental take of 28 covered-species by the construction and operation of new urban development, transportation, infrastructure, and other projects that would be implemented or authorized by five permit applicants over a 50-year period, within a 317,656-acre planning area located in south Sacramento County, California.
FWS		Endangered and Threatened Wildlife and Plants; Availability of Proposed Low-Effect Lakes at St. Sebastian Preserve Habitat Conservation Plan, Brevard County, FL / Atlantic Coast Paladin Estates, LLC and Micco Road Investments, LLC c/o the Kelsey Group	The applicant is requesting take of approximately 99.85 acres of Audubon's Crested Caracara (*Polyborus plancus audubonii*) nesting and foraging habitat incidental to the construction of a residential development project in Brevard County, Florida. The Audubon's Crested Caracara is federally listed as threatened. Impacts to the species will be offset by conservation of 20 acres of caracara habitat and a $10,000 management endowment.

FWS		NOA: Draft Texas Coastal Bend Shortgrass Prairie Multi-Species Recovery Plan, including Slender Rush-Pea and South Texas Ambrosia	This is a notice of availability for the draft recovery plan that includes slender rush-pea and South Texas ambrosia. The recovery plan includes specific recovery objectives and criteria that, when achieved, will enable us to remove both species from the list of endangered and threatened plants. We are requesting review and comment on the recovery plan from the public; tribes; and local, State, and Federal agencies.
FWS	1018-AX99	Removal of the Hualapai Mexican Vole From the Federal List of Endangered and Threatened Wildlife	
FWS		Recovery Permits (Kiernan, first)	This notice informs the public of the receipt of multiple applications for Endangered Species Act (ESA) recovery permits, requests public comment on the permits, and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.
FWS		ES Recovery Permit Applications (First Preserve District of Will County, Plainfield, IL, and others)	
FWS		Initiation of 5-Year Status Reviews of 23 Southeastern Species	

FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Maire Malone, first) FWS-HQ-IA-2017-0019	This notice is a periodic action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice, the Division of Management Authority has issued nine permits under the ESA and two under the MMPA that require notification to the public. This notice only informs the public that, after going through a complete review of the submitted applications and considering any comments from the public or outside experts, the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA, there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species, there is no statutory time frame established under the ESA.

FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Nature Conservation Trust, first applicant)	This notice is a periodic action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice, the Division of Management Authority has issued four permits under the ESA and one under the MMPA that require notification to the public. This notice only informs the public that, after going through a complete review of the submitted applications and considering any comments from the public or outside experts, the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA, there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species, there is no statutory time frame established under the ESA.
FWS		Endangered Species; Receipt of Applications for Permits (Tony Goldberg, University of Wisconsin, Madison, WI, first applicant)	

FWS		Endangered Species; Notice of Issuance (Foreign Species Permits; Michael Rohweder, first permittee)	This notice is a periodic action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice, the Division of Management Authority has issued four permits under the ESA and one under the MMPA that require notification to the public. This notice only informs the public that, after going through a complete review of the submitted applications and considering any comments from the public or outside experts, the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA, there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species, there is no statutory time frame established under the ESA.

FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Feld Entertainment, Inc., first applicant)	This is a weekly action taken by the U.S. Fish and Wildlife Service, Division of Management Authority, to notify the public of the receipt of applications for Endangered Species Act (ESA) permits. This notice provides the public an opportunity to comment on sixteen(16) (ESA) applications and one (1) Marine Mammal application that were received by the Service requesting authorization to conduct otherwise prohibited activities within the United States or to import biological specimens for research purposes. There are no decisions announced in these notices, but we cannot finalize the review of these permit applications until the conclusion of a mandatory 30-day comment period under the ESA.
FWS		Exemption from Threatened Species Permits for a Qualifying Beluga Sturgeon Aquaculture Facility	
FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Dallas World Aquarium, first applicant)	
FWS		Meeting Notice; Service Regulations Committee Meeting	
FWS		Meeting Notice; North American Wetlands Council Meeting	
FWS	1018-BB24	Migratory Bird Subsistence Harvest in Alaska; Use of Inedible Bird Parts in Authentic Alaska Native Handicrafts for Sale

FWS	1018-AY30	Eagle Permits: Revision to Regulations for Eagle Incidental Take and Take of Nests; Correction	
FWS	1018-BB06	Migratory Bird Hunting; Approval of Corrosion-inhibited Copper Shot as Nontoxic for Waterfowl Hunting	
FWS	1018-BB73	2018–19 Migratory Game Bird Hunting Regulations	
FWS	1018-BB40	Migratory Bird Hunting; Seasons and Bag and Possession Limits for Certain Migratory Game Birds for the 2017–18 Season	
FWS		Notice of Availability for the Grays Harbor National Wildlife Refuge and Black River Unit of Billy Frank Jr. Nisqually National Wildlife Refuge, Grays Harbor and Thurston Counties, WA; Comprehensive Conservation Plans and Finding of No Significant Impact for Environmental Assessment	

FWS		Notice of intent to implement annual hunting fees, annual fishing fees, and special permit fees; Clarks River National Wildlife Refuge, KY [FWS–R4–R–2016–N141]	Clarks River National Wildlife Refuge proposes to implement annual hunting and fishing fees and special permit fees for commercial recreational activities. The proposed cost for the annual access permit is $15 (free for youth under 16, and $5 for seniors 65 and over); there would be a $50 minimum fee for annual Recreational Special Use Permit authorizing commercial recreational activities to be conducted on the Refuge.
FWS	1018-BB75	Refuge-Specific Hunting and Sport Fishing Regulations, 2017–18	
FWS		Notice of Intent to Re-open the Planning Process for the Comprehensive Conservation Plan and Enivironmental Assessment at Crystal River National Wildlife Refuge	
FWS		NOA: Camas National Wildlife Refuge, Jefferson County, ID; Comprehensive Conservation Plan and Finding of No Significant Impact for Environmental Assessment	A Finding of No Significant Impact was signed on March 10, 2017, and the Comprehensive Conservation Plan (CCP) was completed for Camas National Wildlife Refuge (NWR), located in Jefferson County, Idaho. The CCP will guide management of the Refuge for 15 years or until it is revised, and actions will be implemented as funding becomes available. We are informing the Secretary of our intent to publish the Notice of Availability for the Camas National Wildlife Refuge CCP and the Finding of No Significant Impact for the Environmental Assessment (EA).

FWS	1018-BA31	Disapproval of Final Rule: Non-Subsistence Take of Wildlife, and Public Participation and Closure Procedures, on National Wildlife Refuges in Alaska	The final rule published August 5, 2016 (81 FR 52248) and became effective September 6, 2016. The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act, signed by the President on April 3, 2017 (P.L. 115-20). This action conforms to P.L. 115-20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the effective date of the final rule that was nullified under the Congressional Review Act.
FWS	1018-BA33	Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4	The proposed rule:• Is in response to requests from States to revise and simplify the rules for license certification. The Service worked closely with DOI solicitors and AFWA attorneys in developing the new language. • Includes changes that were reviewed by Regional and State representatives, and interested stakeholders, during pre-rulemaking comment periods and were developed considering the comments we received. • Includes definitions and additions to the rule that will clarify the rule and improve national consistency. • Was developed in coordination with the Association of Fish and Wildlife Agencies, the Federal Aid Coordinators Working Group, Regional WSFR offices, State representatives, and members of interest organizations.

FWS	1018-0095	Agency Information Collection Activities: OMB Control Number 1018-0095; Endangered and Threatened Wildlife, Experimental Populations	The Notice provides the public with an opportunity to comment on the U.S. Fish and Wildlife Service's (Service) intention to renew Office of Management and Budget (OMB) Control No. 1018-0095. The Secretary of the Interior is authorized to establish experimental populations of endangered or threatened species in 50 CFR 17.84. Individuals of experimental populations are protected under the ESA. This control number authorizes the Service to collect important information necessary to monitor the success of reintroduction and recovery efforts.
FWS	1018-0023	Agency Information Collection Activities: OMB Control Number 1018-0023; Migratory Bird Harvest Information Program and Migratory Bird Surveys	

FWS	1018-0066	Agency Information Collection Activities: OMB Control Number 1018-0066; Marine Mammal Marking, Tagging, and Reporting Certificates, and Registration of Certain Dead Marine Mammal Hard Parts	
FWS	1018-0102	Agency Information Collection Activities: OMB Control Number 1018-0102; National Wildlife Refuge Special Use Permit Applications and Reports	
FWS		Giant garter snake; Notice of Availability of Second Revised Draft Recovery Plan	This document describes the strategy, objectives, and actions necessary for achieving recovery of the giant garter snake, along with criteria that, when met, signify that the Service may be able to remove the species from the list of threatened and endangered species. The plan focuses on establishing and protecting self-sustaining populations throughout the range of the species, restoring and conserving healthy wetland ecosystems that will support the species, and ameliorating or eliminating the threats that caused the species to be listed.
FWS	1018-BB54	Listing Determination for the I'iwi	This final rule lists the I'iwi (Drepanis coccinea), a forest bird endemic to Hawaii, as threatened under the Endangered Species Act
FWS		Stock Assessment Reports for Southern Beaufort Sea and Chukchi-Bering Seas; Opening 90-day Public Comment Period	The Fish and Wildlife Service (Service) is publishing a Federal Register Notice of Availability on draft revised Stock Assessment Reports (SARs) for the Southern Beaufort and the Chukchi Seas stocks of polar bears. This notice opens a 90-day public comment period to request input on these draft revisions.

FWS		Receipt of Application for Incidental Take Permit; Low-Effect Habitat Conservation Plan for Betteravia Farms, LLC /Curletti Farm Employee Housing Project, Santa Barbara County, California	
FWS		Draft Recovery Plan for the Pima Pineapple Cactus	We announce that our Pima pineapple cactus draft recovery plan is available. The cactus is listed as endangered under the Endangered Species Act of 1973, as amended. This plant species is currently found in southern Arizona and in northern Sonora, Mexico. The draft recovery plan includes specific recovery objectives and criteria to be met in order to enable us to remove this species from the list of endangered and threatened wildlife and plants. A proposed border wall is not anticipated to impede the recovery of the Pima pineapple cactus. We request that local, State, and Federal agencies, Tribes, and the public review and comment. We will also accept any new species status information throughout its range to assist with recovery plan finalization.
FWS		Batched permit notice: receipt of ES permit applications (ERO Resources Corp/ TE040510 and others)	This notice informs the public of the receipt of multiple applications for ESA recovery permits and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.

FWS	1018-BB34	Reopening of the Comment Period and Announcement of Two Public Hearings for Texas Hornshell	We received several requests for public hearings on the proposed rule to list the Texas hornshell (*Popenaias popeii*) as an endangered species. We are reopening the comment period on the proposed listing rule for 30 days and announcing the dates and locations of these public hearings. The additional comment period will allow the public another opportunity to comment on the proposed rule as well as allow us to take into consideration input we receive during the two public hearings. The public information sessions, to be held immediately before both public hearings, will give us an opportunity to interact with the public, hear their concerns, and provide information on what listing is and does.The Texas hornshell was part of the Multi District Litigation settlement agreement. The public hearings must occur in enough time to revise the final listing rule as appropriate and publish our final listing determination in the Federal Register by August 10, 2017.

FWS		Marine Mammals; Incidental Take During Specified Activities; Proposed Incidental Harassment Authorization for Pacific Walruses and Polar Bears in Alaska and Associated Federal Waters; Quintillion	In response to a request from Quintillion Subsea Operation, LLC (Quintillion), we propose to authorize the incidental taking by harassment of small numbers of Pacific walruses and polar bears from July 1, 2017, through November 15, 2017, under section 101(a)(5)(D) of the Marine Mammal Protection Act of 1972 (MMPA), as amended. Quintillion has requested this incidental harassment authorization (IHA) for its planned cable-laying activities in the northern Bering, Chukchi, and southwestern Beaufort Seas, the marine waters of the State of Alaska, and coastal land adjacent to Nome, Kotzebue, Point Hope, Wainwright, Utqiagvik, and Oliktok Point. We anticipate no take (as defined in the MMPA) by injury or death and include none in this proposed authorization, which, if finalized, would be for non-lethal, non-injurious, take by harassment only. The Quintillion project will provide for improved broadband internet service in northern Alaska. The project is a continuation of work begun in 2016.
FWS	1018-BA41	Removal of the Greater Yellowstone Ecosystem Population of Grizzly Bears from the List of Endangered and Threatened Wildlife	
FWS		Intent to Prepare a Draft Environmental Impact Statement and Associated Documents for LCRA Transmission Services Corporation's Proposed Habitat Conservation Plan, TX	

FWS	1018-BB74	Establishment of a Nonessential Experimental Population of the Oregon Silverspot Butterfly in Northwestern Oregon	
FWS	1018-BA74, 1018-BB89, 1018-BB90, and 1018-BB87	Reopening of Comment Period on Proposed Rules: Listing & Critical Habitat (G. Fescue, 1018-BA74), Downlist from Endangered to Threatened (Cactuses, 1018-BB89 and 1018-BB90), Delist (Wild-Buckwheat, 1018-BB87)	We, the U.S. Fish and Wildlife Service (Service), announce that we are reopening the comment periods for our proposed rules to list *Festuca ligulata* (Guadalupe fescue) as an endangered species; to designate *Festuca ligulata* critical habitat ; to reclassify *Sclerocactus brevihamatus* ssp. *tobuschii* (Tobusch fishhook cactus) from endangered to threatened; to reclassify *Echinocereus fendleri* var. *kuenzleri* (Kuenzler hedgehog cactus) from endangered to threatened; and to remove *Eriogonum gypsophilum* (gypsum wild-buckwheat) from the Federal List of Endangered and Threatened Plants. We are reopening the comment period for each of these proposed rules for 30 days in order to publish a legal notice and to give all interested parties further opportunity to comment on the proposed rules. Comments previously submitted need not be resubmitted, as they will be fully considered in preparing the final listing determinations.
FWS		Louisiana Pinesnake; Notice of Availability for the Candidate Conservation Agreement with Assurances	

FWS		Yolo Habitat Conservancy, CA; Counties of Yolo and Cities of Davis, West Sacramento, Winters, and Woodland; draft Joint Yolo Habitat Conservation Plan and draft Joint Natural Community Conservation Plan	
FWS		Initiation of a 5-Year Review of the Aleutian Shield Fern, AK	This notice alerts the public that we are initiating a 5-year status review for the Aleutian shield fern under the ESA and provides an opportunity for the public to provide information they may have on the species. A 5-year status review results in a recommendation on whether the species should be classified differently or delisted. The species is only known to occur on one island in the Aleutian Island chain.
FWS		U.S. Endangered Species Recovery Permit Applications (first applicant: Arkansas Highway and Transportation Department, Little Rock, AR)	This notice informs the public of the receipt of applications for Endangered Species Act recovery permits for Region 4 and provides them with the opportunity to receive copies of the applications and submit comments.
FWS		Draft Barton Springs Edwards Aquifer Conservation District Habitat Conservation Plan and Draft Environmental Impact Statement; Barton Springs salamander and Austin blind salamander, Texas	This is a Federal Register Notice of Availability for the draft Barton Springs Edwards Aquifer Conservation District HCP and dEIS for take of the Barton Springs salamander (Eurycea sosorum) and the Austin blind salamander (Eurycea waterlooensis) in Travis and Hays Counties, Texas.

FWS		U.S. Endangered Species Recovery Permit Applications; Region 6	This notice informs the public of the receipt of multiple applications for ESA recovery permits and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.
FWS		Notice of availability; joint Draft Environmental Impact Statement And Draft Environmental Impact Report; receipt of permit application, Draft Habitat Conservation Plan; South Sacramento County, California	The proposed permit would authorize the incidental take of 28 covered-species by the construction and operation of new urban development, transportation, infrastructure, and other projects that would be implemented or authorized by five permit applicants over a 50-year period, within a 317,656-acre planning area located in south Sacramento County, California.
FWS		Endangered and Threatened Wildlife and Plants; Availability of Proposed Low-Effect Lakes at St. Sebastian Preserve Habitat Conservation Plan, Brevard County, FL / Atlantic Coast Paladin Estates, LLC and Micco Road Investments, LLC c/o the Kelsey Group	The applicant is requesting take of approximately 99.85 acres of Audubon's Crested Caracara (*Polyborus plancus audubonii*) nesting and foraging habitat incidental to the construction of a residential development project in Brevard County, Florida. The Audubon's Crested Caracara is federally listed as threatened. Impacts to the species will be offset by conservation of 20 acres of caracara habitat and a $10,000 management endowment.

FWS		NOA: Draft Texas Coastal Bend Shortgrass Prairie Multi-Species Recovery Plan, including Slender Rush-Pea and South Texas Ambrosia	This is a notice of availability for the draft recovery plan that includes slender rush-pea and South Texas ambrosia. The recovery plan includes specific recovery objectives and criteria that, when achieved, will enable us to remove both species from the list of endangered and threatened plants. We are requesting review and comment on the recovery plan from the public; tribes; and local, State, and Federal agencies.
FWS	1018-AX99	Removal of the Hualapai Mexican Vole From the Federal List of Endangered and Threatened Wildlife	
FWS		Recovery Permits (Kiernan, first)	This notice informs the public of the receipt of multiple applications for Endangered Species Act (ESA) recovery permits, requests public comment on the permits, and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.
FWS		ES Recovery Permit Applications (First Preserve District of Will County, Plainfield, IL, and others)	
FWS		Initiation of 5-Year Status Reviews of 23 Southeastern Species	

FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Maire Malone, first) FWS-HQ-IA-2017-0019	This notice is a periodic action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice, the Division of Management Authority has issued nine permits under the ESA and two under the MMPA that require notification to the public. This notice only informs the public that, after going through a complete review of the submitted applications and considering any comments from the public or outside experts, the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA, there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species, there is no statutory time frame established under the ESA.

FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Nature Conservation Trust, first applicant)	This notice is a periodic action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice, the Division of Management Authority has issued four permits under the ESA and one under the MMPA that require notification to the public. This notice only informs the public that, after going through a complete review of the submitted applications and considering any comments from the public or outside experts, the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA, there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species, there is no statutory time frame established under the ESA.
FWS		Endangered Species; Receipt of Applications for Permits (Tony Goldberg, University of Wisconsin, Madison, WI, first applicant)	

FWS		Endangered Species; Notice of Issuance (Foreign Species Permits; Michael Rohweder, first permittee)	This notice is a periodic action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice, the Division of Management Authority has issued four permits under the ESA and one under the MMPA that require notification to the public. This notice only informs the public that, after going through a complete review of the submitted applications and considering any comments from the public or outside experts, the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA, there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species, there is no statutory time frame established under the ESA.

FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Feld Entertainment, Inc., first applicant)	This is a weekly action taken by the U.S. Fish and Wildlife Service, Division of Management Authority, to notify the public of the receipt of applications for Endangered Species Act (ESA) permits. This notice provides the public an opportunity to comment on sixteen(16) (ESA) applications and one (1) Marine Mammal application that were received by the Service requesting authorization to conduct otherwise prohibited activities within the United States or to import biological specimens for research purposes. There are no decisions announced in these notices, but we cannot finalize the review of these permit applications until the conclusion of a mandatory 30-day comment period under the ESA.
FWS		Exemption from Threatened Species Permits for a Qualifying Beluga Sturgeon Aquaculture Facility	
FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Dallas World Aquarium, first applicant)	
FWS		Meeting Notice; Service Regulations Committee Meeting	
FWS		Meeting Notice; North American Wetlands Council Meeting

FWS	1018-BB73	2018–19 Migratory Game Bird Hunting Regulations	
FWS	1018-BB40	Migratory Bird Hunting; Seasons and Bag and Possession Limits for Certain Migratory Game Birds for the 2017–18 Season	
FWS		Notice of Availability for the Grays Harbor National Wildlife Refuge and Black River Unit of Billy Frank Jr. Nisqually National Wildlife Refuge, Grays Harbor and Thurston Counties, WA; Comprehensive Conservation Plans and Finding of No Significant Impact for Environmental Assessment	

FWS		Notice of intent to implement annual hunting fees, annual fishing fees, and special permit fees; Clarks River National Wildlife Refuge, KY [FWS–R4–R–2016–N141]	Clarks River National Wildlife Refuge proposes to implement annual hunting and fishing fees and special permit fees for commercial recreational activities. The proposed cost for the annual access permit is $15 (free for youth under 16, and $5 for seniors 65 and over); there would be a $50 minimum fee for annual Recreational Special Use Permit authorizing commercial recreational activities to be conducted on the Refuge.
FWS	1018-BB75	Refuge-Specific Hunting and Sport Fishing Regulations, 2017–18	
FWS		Notice of Intent to Re-open the Planning Process for the Comprehensive Conservation Plan and Enivironmental Assessment at Crystal River National Wildlife Refuge	
FWS		NOA: Camas National Wildlife Refuge, Jefferson County, ID; Comprehensive Conservation Plan and Finding of No Significant Impact for Environmental Assessment	A Finding of No Significant Impact was signed on March 10, 2017, and the Comprehensive Conservation Plan (CCP) was completed for Camas National Wildlife Refuge (NWR), located in Jefferson County, Idaho. The CCP will guide management of the Refuge for 15 years or until it is revised, and actions will be implemented as funding becomes available. We are informing the Secretary of our intent to publish the Notice of Availability for the Camas National Wildlife Refuge CCP and the Finding of No Significant Impact for the Environmental Assessment (EA).

FWS	1018-BA31	Disapproval of Final Rule: Non-Subsistence Take of Wildlife, and Public Participation and Closure Procedures, on National Wildlife Refuges in Alaska	The final rule published August 5, 2016 (81 FR 52248) and became effective September 6, 2016. The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act, signed by the President on April 3, 2017 (P.L. 115-20). This action conforms to P.L. 115-20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the effective date of the final rule that was nullified under the Congressional Review Act.
FWS	1018-BA33	Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4	The proposed rule:• Is in response to requests from States to revise and simplify the rules for license certification. The Service worked closely with DOI solicitors and AFWA attorneys in developing the new language. • Includes changes that were reviewed by Regional and State representatives, and interested stakeholders, during pre-rulemaking comment periods and were developed considering the comments we received. • Includes definitions and additions to the rule that will clarify the rule and improve national consistency. • Was developed in coordination with the Association of Fish and Wildlife Agencies, the Federal Aid Coordinators Working Group, Regional WSFR offices, State representatives, and members of interest organizations.

Attachments:	FWS entries, 30 day spreadsheet for May 23 2017_MASTER.xlsx

---

Hi Tina!

Please add the names below (including Gary) to the distribution of the 30 day list. Also, Julie noted that there were quite a few items missing. Her ask is that we err on the side of inclusion. I'm thinking as soon as an item is on your radar (week 1 of our 6-8 week process LOL), we get it on this list.

How's your week coming along? Want to check in tomorrow, especially if it was a surprise the 30 day had items missing?

:-)
Charisa

I am not receiving them, but guess I need to, since Julie Lillie advised today that nothing is clearing the Dept unless it's on this 30 day report.

Pls also add Gina Shultz, Jeff Newman, Bridget Fahey, and Kayla Miller to the distribution. -- GDF

> Cc: Tina Campbell <tina_campbell@fws.gov>, Anissa Craghead <Anissa_Craghead@fws.gov>, "Wilkinson, Susan" <susan_wilkinson@fws.gov>

Hi, Mark and Megan,

Here is the weekly 30-day-out report.

If you have any questions, please let me know.

Thank you,

Sara Prigan
Division of Policy, Performance, and Management Programs
U.S. Fish and Wildlife Service

Report Date: Tuesday, May 23, 2017

Bureau	RIN or OMB Control Number	Title	Summary
FWS	1018-0022	Agency Information Collection Activities: OMB Control Number 1018-0022; Federal Fish and Wildlife Permit Applications and Reports—Migratory Birds and Eagles	
FWS	1018-0093	Agency Information Collection Activities: OMB Control Number 1018-0093; Federal Fish and Wildlife Permit Applications and Reports—Management Authority	
FWS	1018-0123	Agency Information Collection Activities: OMB Control Number 1018-0123; International Conservation Grant Programs	
FWS	1018-0095	Agency Information Collection Activities: OMB Control Number 1018-0095; Endangered and Threatened Wildlife, Experimental Populations	The Notice provides the public with an opportunity to comment on the U.S. Fish and Wildlife Service's (Service) intention to renew Office of Management and Budget (OMB) Control No. 1018-0095. The Secretary of the Interior is authorized to establish experimental populations of endangered or threatened species in 50 CFR 17.84. Individuals of experimental populations are protected under the ESA. This control number authorizes the Service to collect important information necessary to monitor the success of reintroduction and recovery efforts.
FWS	1018-0023	Agency Information Collection Activities: OMB Control Number 1018-0023; Migratory Bird Harvest Information Program and Migratory Bird Surveys	

FWS	1018-0066	Agency Information Collection Activities: OMB Control Number 1018-0066; Marine Mammal Marking, Tagging, and Reporting Certificates, and Registration of Certain Dead Marine Mammal Hard Parts	
FWS	1018-0102	Agency Information Collection Activities: OMB Control Number 1018-0102; National Wildlife Refuge Special Use Permit Applications and Reports	
FWS		Giant garter snake; Notice of Availability of Second Revised Draft Recovery Plan	This document describes the strategy, objectives, and actions necessary for achieving recovery of the giant garter snake, along with criteria that, when met, signify that the Service may be able to remove the species from the list of threatened and endangered species. The plan focuses on establishing and protecting self-sustaining populations throughout the range of the species, restoring and conserving healthy wetland ecosystems that will support the species, and ameliorating or eliminating the threats that caused the species to be listed.
FWS	1018-BB54	Listing Determination for the I'iwi	This final rule lists the I'iwi (Drepanis coccinea), a forest bird endemic to Hawaii, as threatened under the Endangered Species Act
FWS		Stock Assessment Reports for Southern Beaufort Sea and Chukchi-Bering Seas; Opening 90-day Public Comment Period	The Fish and Wildlife Service (Service) is publishing a Federal Register Notice of Availability on draft revised Stock Assessment Reports (SARs) for the Southern Beaufort and the Chukchi Seas stocks of polar bears. This notice opens a 90-day public comment period to request input on these draft revisions.

FWS		Receipt of Application for Incidental Take Permit; Low-Effect Habitat Conservation Plan for Betteravia Farms, LLC /Curletti Farm Employee Housing Project, Santa Barbara County, California	
FWS		Draft Recovery Plan for the Pima Pineapple Cactus	We announce that our Pima pineapple cactus draft recovery plan is available. The cactus is listed as endangered under the Endangered Species Act of 1973, as amended. This plant species is currently found in southern Arizona and in northern Sonora, Mexico. The draft recovery plan includes specific recovery objectives and criteria to be met in order to enable us to remove this species from the list of endangered and threatened wildlife and plants. A proposed border wall is not anticipated to impede the recovery of the Pima pineapple cactus. We request that local, State, and Federal agencies, Tribes, and the public review and comment. We will also accept any new species status information throughout its range to assist with recovery plan finalization.
FWS		Batched permit notice: receipt of ES permit applications (ERO Resources Corp/ TE040510 and others)	This notice informs the public of the receipt of multiple applications for ESA recovery permits and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.

FWS	1018-BB34	Reopening of the Comment Period and Announcement of Two Public Hearings for Texas Hornshell	We received several requests for public hearings on the proposed rule to list the Texas hornshell (*Popenaias popeii*) as an endangered species. We are reopening the comment period on the proposed listing rule for 30 days and announcing the dates and locations of these public hearings. The additional comment period will allow the public another opportunity to comment on the proposed rule as well as allow us to take into consideration input we receive during the two public hearings. The public information sessions, to be held immediately before both public hearings, will give us an opportunity to interact with the public, hear their concerns, and provide information on what listing is and does.The Texas hornshell was part of the Multi District Litigation settlement agreement. The public hearings must occur in enough time to revise the final listing rule as appropriate and publish our final listing determination in the Federal Register by August 10, 2017.

FWS		Marine Mammals; Incidental Take During Specified Activities; Proposed Incidental Harassment Authorization for Pacific Walruses and Polar Bears in Alaska and Associated Federal Waters; Quintillion	In response to a request from Quintillion Subsea Operation, LLC (Quintillion), we propose to authorize the incidental taking by harassment of small numbers of Pacific walruses and polar bears from July 1, 2017, through November 15, 2017, under section 101(a)(5)(D) of the Marine Mammal Protection Act of 1972 (MMPA), as amended. Quintillion has requested this incidental harassment authorization (IHA) for its planned cable-laying activities in the northern Bering, Chukchi, and southwestern Beaufort Seas, the marine waters of the State of Alaska, and coastal land adjacent to Nome, Kotzebue, Point Hope, Wainwright, Utqiagvik, and Oliktok Point. We anticipate no take (as defined in the MMPA) by injury or death and include none in this proposed authorization, which, if finalized, would be for non-lethal, non-injurious, take by harassment only. The Quintillion project will provide for improved broadband internet service in northern Alaska. The project is a continuation of work begun in 2016.
FWS	1018-BA41	Removal of the Greater Yellowstone Ecosystem Population of Grizzly Bears from the List of Endangered and Threatened Wildlife	
FWS		Intent to Prepare a Draft Environmental Impact Statement and Associated Documents for LCRA Transmission Services Corporation's Proposed Habitat Conservation Plan, TX	

FWS	1018-BB74	Establishment of a Nonessential Experimental Population of the Oregon Silverspot Butterfly in Northwestern Oregon	
FWS	1018-BA74, 1018-BB89, 1018-BB90, and 1018-BB87	Reopening of Comment Period on Proposed Rules: Listing & Critical Habitat (G. Fescue, 1018-BA74), Downlist from Endangered to Threatened (Cactuses, 1018-BB89 and 1018-BB90), Delist (Wild-Buckwheat, 1018-BB87)	We, the U.S. Fish and Wildlife Service (Service), announce that we are reopening the comment periods for our proposed rules to list *Festuca ligulata* (Guadalupe fescue) as an endangered species; to designate *Festuca ligulata* critical habitat ; to reclassify *Sclerocactus brevihamatus* ssp. *tobuschii* (Tobusch fishhook cactus) from endangered to threatened; to reclassify *Echinocereus fendleri* var. *kuenzleri* (Kuenzler hedgehog cactus) from endangered to threatened; and to remove *Eriogonum gypsophilum* (gypsum wild-buckwheat) from the Federal List of Endangered and Threatened Plants. We are reopening the comment period for each of these proposed rules for 30 days in order to publish a legal notice and to give all interested parties further opportunity to comment on the proposed rules. Comments previously submitted need not be resubmitted, as they will be fully considered in preparing the final listing determinations.
FWS		Louisiana Pinesnake; Notice of Availability for the Candidate Conservation Agreement with Assurances	

FWS		Yolo Habitat Conservancy, CA; Counties of Yolo and Cities of Davis, West Sacramento, Winters, and Woodland; draft Joint Yolo Habitat Conservation Plan and draft Joint Natural Community Conservation Plan	
FWS		Initiation of a 5-Year Review of the Aleutian Shield Fern, AK	This notice alerts the public that we are initiating a 5-year status review for the Aleutian shield fern under the ESA and provides an opportunity for the public to provide information they may have on the species. A 5-year status review results in a recommendation on whether the species should be classified differently or delisted. The species is only known to occur on one island in the Aleutian Island chain.
FWS		U.S. Endangered Species Recovery Permit Applications (first applicant: Arkansas Highway and Transportation Department, Little Rock, AR)	This notice informs the public of the receipt of applications for Endangered Species Act recovery permits for Region 4 and provides them with the opportunity to receive copies of the applications and submit comments.
FWS		Draft Barton Springs Edwards Aquifer Conservation District Habitat Conservation Plan and Draft Environmental Impact Statement; Barton Springs salamander and Austin blind salamander, Texas	This is a Federal Register Notice of Availability for the draft Barton Springs Edwards Aquifer Conservation District HCP and dEIS for take of the Barton Springs salamander (Eurycea sosorum) and the Austin blind salamander (Eurycea waterlooensis) in Travis and Hays Counties, Texas.

FWS		U.S. Endangered Species Recovery Permit Applications; Region 6	This notice informs the public of the receipt of multiple applications for ESA recovery permits and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.
FWS		Notice of availability; joint Draft Environmental Impact Statement And Draft Environmental Impact Report; receipt of permit application, Draft Habitat Conservation Plan; South Sacramento County, California	The proposed permit would authorize the incidental take of 28 covered-species by the construction and operation of new urban development, transportation, infrastructure, and other projects that would be implemented or authorized by five permit applicants over a 50-year period, within a 317,656-acre planning area located in south Sacramento County, California.
FWS		Endangered and Threatened Wildlife and Plants; Availability of Proposed Low-Effect Lakes at St. Sebastian Preserve Habitat Conservation Plan, Brevard County, FL / Atlantic Coast Paladin Estates, LLC and Micco Road Investments, LLC c/o the Kelsey Group	The applicant is requesting take of approximately 99.85 acres of Audubon's Crested Caracara (*Polyborus plancus audubonii*) nesting and foraging habitat incidental to the construction of a residential development project in Brevard County, Florida. The Audubon's Crested Caracara is federally listed as threatened. Impacts to the species will be offset by conservation of 20 acres of caracara habitat and a $10,000 management endowment.

FWS		NOA: Draft Texas Coastal Bend Shortgrass Prairie Multi-Species Recovery Plan, including Slender Rush-Pea and South Texas Ambrosia	This is a notice of availability for the draft recovery plan that includes slender rush-pea and South Texas ambrosia. The recovery plan includes specific recovery objectives and criteria that, when achieved, will enable us to remove both species from the list of endangered and threatened plants. We are requesting review and comment on the recovery plan from the public; tribes; and local, State, and Federal agencies.
FWS	1018-AX99	Removal of the Hualapai Mexican Vole From the Federal List of Endangered and Threatened Wildlife	
FWS		Recovery Permits (Kiernan, first)	This notice informs the public of the receipt of multiple applications for Endangered Species Act (ESA) recovery permits, requests public comment on the permits, and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.
FWS		ES Recovery Permit Applications (First Preserve District of Will County, Plainfield, IL, and others)	
FWS		Initiation of 5-Year Status Reviews of 23 Southeastern Species	

FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Maire Malone, first) FWS-HQ-IA-2017-0019	This notice is a periodic action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice, the Division of Management Authority has issued nine permits under the ESA and two under the MMPA that require notification to the public. This notice only informs the public that, after going through a complete review of the submitted applications and considering any comments from the public or outside experts, the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA, there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species, there is no statutory time frame established under the ESA.

FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Nature Conservation Trust, first applicant)	This notice is a periodic action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice, the Division of Management Authority has issued four permits under the ESA and one under the MMPA that require notification to the public. This notice only informs the public that, after going through a complete review of the submitted applications and considering any comments from the public or outside experts, the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA, there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species, there is no statutory time frame established under the ESA.
FWS		Endangered Species; Receipt of Applications for Permits (Tony Goldberg, University of Wisconsin, Madison, WI, first applicant)	

FWS		Endangered Species; Notice of Issuance (Foreign Species Permits; Michael Rohweder, first permittee)	This notice is a periodic action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice, the Division of Management Authority has issued four permits under the ESA and one under the MMPA that require notification to the public. This notice only informs the public that, after going through a complete review of the submitted applications and considering any comments from the public or outside experts, the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA, there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species, there is no statutory time frame established under the ESA.

FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Feld Entertainment, Inc., first applicant)	This is a weekly action taken by the U.S. Fish and Wildlife Service, Division of Management Authority, to notify the public of the receipt of applications for Endangered Species Act (ESA) permits. This notice provides the public an opportunity to comment on sixteen(16) (ESA) applications and one (1) Marine Mammal application that were received by the Service requesting authorization to conduct otherwise prohibited activities within the United States or to import biological specimens for research purposes. There are no decisions announced in these notices, but we cannot finalize the review of these permit applications until the conclusion of a mandatory 30-day comment period under the ESA.
FWS		Exemption from Threatened Species Permits for a Qualifying Beluga Sturgeon Aquaculture Facility	
FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Dallas World Aquarium, first applicant)	
FWS		Meeting Notice; Service Regulations Committee Meeting	
FWS		Meeting Notice; North American Wetlands Council Meeting	
FWS	1018-BB24	Migratory Bird Subsistence Harvest in Alaska; Use of Inedible Bird Parts in Authentic Alaska Native Handicrafts for Sale	

FWS	1018-AZ69	Migratory Bird Permits; Control Order for Introduced Migratory Bird Species in Hawaii (Cattle Egrets and Barn Owls)	
FWS		Notice of Intent to Prepare an Environmental Impact Statement; Hycroft Mining Company; Request for Take Permits Under the Bald and Golden Eagle Protection Act	
FWS	1018-AY30	Eagle Permits: Revision to Regulations for Eagle Incidental Take and Take of Nests; Correction	
FWS	1018-BB06	Migratory Bird Hunting; Approval of Corrosion-inhibited Copper Shot as Nontoxic for Waterfowl Hunting	
FWS	1018-BB73	2018–19 Migratory Game Bird Hunting Regulations	
FWS	1018-BB40	Migratory Bird Hunting; Seasons and Bag and Possession Limits for Certain Migratory Game Birds for the 2017–18 Season	
FWS		Notice of Availability for the Grays Harbor National Wildlife Refuge and Black River Unit of Billy Frank Jr. Nisqually National Wildlife Refuge, Grays Harbor and Thurston Counties, WA; Comprehensive Conservation Plans and Finding of No Significant Impact for Environmental Assessment	

FWS		Notice of intent to implement annual hunting fees, annual fishing fees, and special permit fees; Clarks River National Wildlife Refuge, KY [FWS–R4–R–2016–N141]	Clarks River National Wildlife Refuge proposes to implement annual hunting and fishing fees and special permit fees for commercial recreational activities. The proposed cost for the annual access permit is $15 (free for youth under 16, and $5 for seniors 65 and over); there would be a $50 minimum fee for annual Recreational Special Use Permit authorizing commercial recreational activities to be conducted on the Refuge.
FWS	1018-BB75	Refuge-Specific Hunting and Sport Fishing Regulations, 2017–18	
FWS		Notice of Intent to Re-open the Planning Process for the Comprehensive Conservation Plan and Enivironmental Assessment at Crystal River National Wildlife Refuge	
FWS		NOA: Camas National Wildlife Refuge, Jefferson County, ID; Comprehensive Conservation Plan and Finding of No Significant Impact for Environmental Assessment	A Finding of No Significant Impact was signed on March 10, 2017, and the Comprehensive Conservation Plan (CCP) was completed for Camas National Wildlife Refuge (NWR), located in Jefferson County, Idaho. The CCP will guide management of the Refuge for 15 years or until it is revised, and actions will be implemented as funding becomes available. We are informing the Secretary of our intent to publish the Notice of Availability for the Camas National Wildlife Refuge CCP and the Finding of No Significant Impact for the Environmental Assessment (EA).

FWS	1018-BA31	Disapproval of Final Rule: Non-Subsistence Take of Wildlife, and Public Participation and Closure Procedures, on National Wildlife Refuges in Alaska	The final rule published August 5, 2016 (81 FR 52248) and became effective September 6, 2016. The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act, signed by the President on April 3, 2017 (P.L. 115-20). This action conforms to P.L. 115-20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the effective date of the final rule that was nullified under the Congressional Review Act.
FWS	1018-BA33	Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4	The proposed rule:• Is in response to requests from States to revise and simplify the rules for license certification. The Service worked closely with DOI solicitors and AFWA attorneys in developing the new language. • Includes changes that were reviewed by Regional and State representatives, and interested stakeholders, during pre-rulemaking comment periods and were developed considering the comments we received. • Includes definitions and additions to the rule that will clarify the rule and improve national consistency. • Was developed in coordination with the Association of Fish and Wildlife Agencies, the Federal Aid Coordinators Working Group, Regional WSFR offices, State representatives, and members of interest organizations.

---

Hi All,

Here is the 30-day list we compiled for this week based on the input provided to us. It is due to Exec Sec by COB today, so please let us know if you have any changes asap.

Thank you,

Tina

Tina A. Campbell
Chief, Division of Policy, Performance, and Management Programs
U.S. Fish and Wildlife Service
5275 Leesburg Pike, MS: BPHC
Falls Church, VA 22041-3803
Telephone: 703-358-2676
Fax: 703-358-1997

Bureau	RIN or OMB Control Number	Title	Summary	Type	Estimated Date for DOI Clearance	Current Status	Has Been at Current Status Since (Date)	Must be at Exec Sec no later than	DCN (Optional)	Program (Optional)	Critical Date (Judicial Statutory or Other)	Explain Critical Date if "Other"
FWS	1018-0123	Agency Information Collection Activities: OMB Control Number 1018-0123; International Conservation Grant Programs	This notice provides the public with an opportunity to comment on the U.S. Fish and Wildlife Service's (Service) intention to renew Office of Management and Budget Control No. 1018-0123. This control number authorizes the Service to solicit proposals for funding and implement reporting requirements in response to Notices of Funding Opportunity published by the Service on Grants.gov.	ICR Notice	6/5/2017	Pending Office of the Secretary clearance	05/10/17	Monday May 22 2017	2948	ABHC		
FWS	1018-0066	Agency Information Collection Activities: OMB Control Number 1018-0066; Marine Mammal Marking Tagging and Reporting Certificates and Registration of Certain Dead Marine Mammal Hard Parts	This notice provides the public with an opportunity to comment on the U.S. Fish and Wildlife Service's (Service) intention to renew Office of Management and Budget Control No. 1018-0066. OMB Control No. 1018-0066 authorizes the monitoring of the take of polar bears northern sea otters and Pacific walruses by Alaska Natives under 50 CFR 18.23(f). This collection of information also provides important data to the Service regarding Alaska Native subsistence and handicraft harvest and on the mammals' biology to determine what effect the harvests may have on their populations.	ICR Notice	6/15/2017	Pending Assistant Secretary clearance	05/19/17	Thursday June 1 2017	2968	ABHC		
FWS	1018-0102	Agency Information Collection Activities: OMB Control Number 1018-0102; National Wildlife Refuge Special Use Permit Applications and Reports	This notice provides the public with an opportunity to comment on the U.S. Fish and Wildlife Service's (Service) intention to renew Office of Management and Budget Control No. 1018-0102. OMB Control No. 1018-0102 authorizes the Service to collect information needed to issue special use permits in the National Wildlife Refuge system for a specific period as determined by the type and location of the management activity or visitor service provided. Without approval by OMB we will have no other mechanism to allow research facilitated recreation and commercial uses on national wildlife refuges which will impact thousands of projects every year.	ICR Notice	6/15/2017	Pending Bureau clearance	05/08/17	Thursday June 1 2017	2969	ABHC		
FWS	1018-0023	Agency Information Collection Activities: OMB Control Number 1018-0023; Migratory Bird Harvest Information Program and Migratory Bird Surveys	This notice provides the public with an opportunity to comment on the U.S. Fish and Wildlife Service's (Service) intention to renew Office of Management and Budget Control No. 1018-0023. OMB Control No. 1018-0023 authorizes the Service to gather data on various characteristics of migratory bird harvest through the Migratory Bird Harvest Information Program (HIP) and through Migratory Bird Hunter Surveys.	ICR Notice	6/15/2017	Pending Assistant Secretary clearance	05/19/17	Thursday June 1 2017	2970	ABHC		
FWS		Endangered and Threatened Wildlife and Plants; 90-Day Findings on Two Petitions (Florida black bear and Mojave population of the desert tortoise) (February batch)	The U.S. Fish and W ldlife Service has completed initial findings ("90-day findings") on petitions under the Endangered Species Act to list or reclassify two species. We find that a petition to list the Florida black bear as a threatened or endangered species does not present substantial information indicating that the petitioned action may be warranted. The Florida black bear inhabits mostly forested habitat in parts of Florida and Georgia. We find that the petition to reclassify the Mojave population of the desert tortoise from a threatened to endangered species does not present substantial information indicating that the petitioned action may be warranted. The Mojave desert tortoise inhabits the Mojave desert in the southwestern United States including the states of Arizona California Nevada and Utah.	Notice	4/12/2017	Pending Assistant Secretary clearance	4/11/2017	Wednesday April 5 2017	2923	ES		

FWS		Giant garter snake; Notice of Availability of Second Revised Draft Recovery Plan	This document describes the strategy objectives and actions necessary for achieving recovery of the giant garter snake along with criteria that when met signify that the Service may be able to remove the species from the Federal List of Endangered and Threatened Wildlife. The plan focuses on establishing and protecting self-sustaining populations throughout the range of the species restoring and conserving healthy wetland ecosystems that will support the species and ameliorating or eliminating the threats that caused the species to be listed.	Notice	5/4/2017	Pending Bureau clearance	05/15/17	Thursday April 27 2017	2839	ES		
FWS	1018-BB54	Listing Determination for the I'iwi	This final rule lists the i'iwi (*Drepanis coccinea*) a forest bird endemic to Hawaii as threatened under the Endangered Species Act.	Final Rule	5/8/2017	Pending Bureau clearance	04/20/17	Monday April 24 2017	2902	ES	Statutory 9/20/2017	
FWS		Stock Assessment Reports for Southern Beaufort Sea and Chukchi-Bering Seas; Opening 90-day Public Comment Period	Thi s is a notice of availability for draft revised Stock Assessment Reports (SARs) for the Southern Beaufort and the Chukchi Seas stocks of polar bears. This notice opens a 90-day public comment period to request input on these draft revisions.	Notice	5/12/2017	Pending Assistant Secretary clearance	05/11/17	Friday May 5 2017	2782	ES		
FWS		Draft Recovery Plan for the Pima Pineapple Cactus	We announce that our Pima pineapple cactus draft recovery plan is available. The cactus is listed as endangered under the Endangered Species Act of 1973 as amended. This plant species is currently found in southern Arizona and in northern Sonora Mexico. The draft recovery plan includes specific recovery objectives and criteria to be met in order to enable us to remove this species from the Federal List of Endangered and Threatened Plants. A proposed border wall is not anticipated to impede the recovery of the Pima pineapple cactus. We request that local State and Federal agencies Tribes and the public review and comment. We will also accept any new species status information throughout its range to assist with recovery plan finalization.	Notice	5/15/2017	Pending Office of the Secretary clearance	05/03/17	Monday May 8 2017	2808	ES		
FWS		Receipt of Application for Incidental Take Permit; Low-Effect Habitat Conservation Plan for Betteravia Farms LLC /Curletti Farm Employee Housing Project Santa Barbara County California	This is a notice that the U.S. Fish and Wildlife Service has received an application for incidental take associated with a low-effect habitat conservation plan for a housing project.The Curletti Farm Employee Housing Project will provide much needed housing for seasonal farmworkers. These workers have been staying in low-income housing in the surrounding community thus displacing other residents that would benefit greatly from low-income housing. The proposed project would provide housing for up to 600 workers (da ly average occupancy of approximately 450 workers).	Notice	5/15/2017	Pending Communications clearance	05/03/17	Monday May 8 2017	2895	ES		
FWS		Marine Mammals; Incidental Take During Specified Activities; Proposed Incidental Harassment Authorization for Pacific Walruses and Polar Bears in Alaska and Associated Federal Waters; Quintillion	In response to a request from Quintillion Subsea Operation LLC (Quintillion) we propose to authorize the incidental taking by harassment of small numbers of Pacific walruses and polar bears from July 1 2017 through November 15 2017 under section 101(a)(5)(D) of the Marine Mammal Protection Act of 1972 (MMPA) as amended. Quinti lion has requested this incidental harassment authorization (IHA) for its planned cable-laying activities in the northern Bering Chukchi and southwestern Beaufort Seas the marine waters of the State of Alaska and coastal land adjacent to Nome Kotzebue Point Hope Wainwright Utqiagvik and Oliktok Point. We anticipate no take (as defined in the MMPA) by injury or death and include none in this proposed authorization which if finalized would be for non-lethal non-injurious take by harassment only. The Quinti lion project will provide for improved broadband internet service in northern Alaska. The project is a continuation of work begun in 2016.	Notice	5/18/2017	Pending Assistant Secretary clearance	05/18/17	Thursday May 11 2017	2949	ES		

FWS	1018-BA41	Removal of the Greater Yellowstone Ecosystem Population of Grizzly Bears from the List of Endangered and Threatened Wildlife	The U.S. Fish and W ldlife Service is issuing a final rule to establish the Greater Yellowstone Ecosystem (GYE) grizzly bear as a Distinct Population Segment (DPS) and remove (delist) the GYE population of grizzly bears from the Federal List of Endangered and Threatened Wildlife under the Endangered Species Act.	Final Rule	5/22/2017	Drafting		Monday May 8 2017	2972	ES	Statutory 3/11/2017	
FWS	1018-BB74	Establishment of a Nonessential Experimental Population of the Oregon Silverspot Butterfly in Northwestern Oregon	The U.S. Fish and W ldlife Service with the support of the State of Oregon Parks and Recreation Department (the agency with responsibility for conservation of invertebrate species in Oregon) wants to reestablish the Oregon silverspot butterfly a federally listed threatened species within its historical range at two sites in northwestern Oregon: Saddle Mountain State Natural Area in Clatsop County and Nestucca Bay National Wildlife Refuge in Tillamook County. We would reestablish the Oregon silverspot butterfly under the authority of section 10(j) of the Endangered Species Act of 1973 as amended and classify the populations reintroduced to these two areas as part of the nonessential experimental population identified in this rule.	Final Rule	5/26/2017	Pending Bureau clearance	05/19/17	Friday May 12 2017	2940	ES		
FWS		Intent to Prepare a Draft Environmental Impact Statement and Associated Documents for LCRA Transmission Services Corporation's Proposed Habitat Conservation Plan TX	The U.S. Fish and Wildlife Service is announcing that it will prepare a draft environmental impact statement on the proposed Lower Colorado River Authority Transmission Services Corporation's (LCRA TSC; applicant's) habitat conservation plan (HCP). The publication of this notice is required by the National Environmental Policy Act. Included in the notice is information about the proposed HCP and opportunities for the public to provide information that may be relevant to the proposed action and alternatives to consider. LCRA TSC has scheduled public scoping meetings for the week of June 19 2017.	Notice	5/26/2017	Pending Bureau clearance	05/23/17	Friday May 19 2017	2962	ES		
FWS		Draft Barton Springs Edwards Aquifer Conservation District Habitat Conservation Plan and Draft Environmental Impact Statement; Barton Springs salamander and Austin blind salamander Texas	This is a notice of availability for the draft Barton Springs Edwards Aquifer Conservation District habitat conservation plan and draft environmental impact statement for take of the Barton Springs salamander (*Eurycea sosorum*) and the Austin blind salamander (*Eurycea waterlooens s*) in Travis and Hays Counties Texas.	Notice	5/30/2017	Pending Office of the Secretary clearance	05/03/17	Tuesday May 23 2017	2785	ES		
FWS		Louisiana Pinesnake; Notice of Availability for the Candidate Conservation Agreement with Assurances	The programmatic Candidate Conservation Agreement with Assurances (CCAA) which would be between the Louisiana Department of Wildlife and Fisheries (LDWF) and the U.S. Fish and Wildlife Service will allow LDWF to issue certificates of inclusion to elig ble non-federal landowners in Bienville Beauregard Jackson Natchitoches Rapides Sabin Vernon Winn Grant and Allen Parishes Louisiana whose conservation management agreements are approved. Landowners who enroll through the CCAA will receive assurances against take liability for incidental take of the Louisiana pinesnake from their conservation actions.	Notice	5/30/2017	Pending Bureau clearance	02/24/17	Tuesday May 23 2017	2870	ES		

FWS	1018-BA74 1018-BB89 1018-BB90 and 1018-BB87	Reopening of Comment Period on Proposed Rules: Listing & Critical Habitat (G. Fescue 1018-BA74) Downlist from Endangered to Threatened (Cactuses 1018-BB89 and 1018-BB90) Delist (Wild-Buckwheat 1018-BB87)	This document announces the reopening of the comment periods for our proposed rules to list *Festuca ligulata* (Guadalupe fescue) as an endangered species; to designate *Festuca ligulata* critical habitat ; to reclassify *Sclerocactus brevihamatus* ssp. *tobuschii* (Tobusch fishhook cactus) from endangered to threatened; to reclassify *Echinocereus fendleri* var. *kuenzleri* (Kuenzler hedgehog cactus) from endangered to threatened; and to remove *Eriogonum gypsophilum* (gypsum wild buckwheat) from the Federal List of Endangered and Threatened Plants. We are reopening the comment period for each of these proposed rules for 30 days in order to publish a legal notice and to give all interested parties further opportunity to comment on the proposed rules. Comments previously submitted need not be resubmitted as they will be fully considered in preparing the final listing determinations.	Proposed Rule	5/30/2017	Pending Office of the Secretary clearance	05/09/17	Tuesday May 16 2017	2897	ES		
FWS		U.S. Endangered Species Recovery Permit Applications (first applicant: Arkansas Highway and Transportation Department Little Rock AR)	This notice informs the public of the receipt of applications for Endangered Species Act recovery permits for Region 4 and provides them with the opportunity to receive copies of the applications and submit comments.	Notice	5/30/2017	Pending Office of the Secretary clearance	05/09/17	Tuesday May 23 2017	2917	ES		
FWS		U.S. Endangered Species Recovery Permit Applications; Region 6 (ERO Resources Corp first applicant)	This notice informs the public of the receipt of multiple applications for Endangered Species Act recovery permits and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.	Notice	5/30/2017	Pending Office of the Secretary clearance	05/09/17	Tuesday May 23 2017	2922	ES		
FWS		Initiation of a 5-Year Review of the Aleutian Shield Fern AK	This notice alerts the public that we are initiating a 5-year status review for the Aleutian shield fern under the Endangered Species Act and provides an opportunity for the public to provide information they may have on the species. A 5-year status review results in a recommendation on whether the species should be classified differently or delisted. The species is only known to occur on one island in the Aleutian Island chain.	Notice	5/30/2017	Pending Office of the Secretary clearance	05/09/17	Tuesday May 23 2017	2931	ES		
FWS		Endangered and Threatened Wildlife and Plants; Availability of Proposed Low-Effect Lakes at St. Sebastian Preserve Habitat Conservation Plan Brevard County FL / Atlantic Coast Paladin Estates LLC and Micco Road Investments LLC c/o the Kelsey Group	The applicant is requesting take of approximately 99.85 acres of Audubon's crested caracara (*Polyborus plancus audubonii*) nesting and foraging habitat incidental to the construction of a residential development project in Brevard County Florida. The Audubon's crested caracara is federally listed as threatened. Impacts to the species w ll be offset by conservation of 20 acres of caracara habitat and a $10 000 management endowment.	Notice	5/30/2017	Pending Office of the Secretary clearance	05/09/17	Tuesday May 23 2017	2933	ES		
FWS	1018-AX99	Removal of the Hualapai Mexican Vole From the Federal List of Endangered and Threatened Wildlife	We the Service are removing the Hualapai Mexican vole from the Federal List of Endangered and Threatened Wildlife due to recent data indicating that the original classification is now erroneous. This action is based on a thorough review of the best available scientific and commercial information which indicates that the currently listed subspecies is not a valid taxonomic entity.	Final Rule	6/2/2017	Pending Bureau clearance	05/23/17	Friday May 19 2017	2693	ES		
FWS		ES Recovery Permit Applications (First Preserve District of Will County Plainfield IL and others)	This notice informs the public of the receipt of multiple applications for Endangered Species Act recovery permits requests public comment on the permits and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.	Notice	6/8/2017	Pending Bureau clearance	05/15/17	Thursday June 1 2017	2956	ES		
FWS		Recovery Permits (Kiernan first)	This notice informs the public of the receipt of multiple applications for Endangered Species Act recovery permits requests public comment on the permits and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.	Notice	6/8/2017	Pending Bureau clearance	05/16/17	Thursday June 1 2017	2964	ES		
FWS		Endangered and Threatened Wildlife & Plants Permit Applications (Northern Research Station--USFS and others)	This notice informs the public of the receipt of applications for Endangered Species Act recovery permits in Region 3 and provides them with the opportunity to receive copies of the applications and submit comments.	Notice	6/15/2017	Pending Bureau clearance	05/23/17	Thursday June 8 2017	2926	ES		

FWS		NOA: Application to Participate in American Burying-Beetle Amended Industry Conservation Plan (Council Oak Resources LLC and Corterra Energy Operating LLC apps)	This is a notice of availability for incidental take permit applications under the American Burying Beetle amended Industry Conservation Plan (ICP); the two applicants are Council Oak Resources LLC and Corterra Energy Operating LLC. The app icants request a permit for oil and gas upstream and midstream production including activities associated with oil and gas well field and pipeline infrastructure (gathering transmission and distribution) including geophysical exploration (seismic) construction maintenance operation repair decommissioning and reclamation in Oklahoma. Required by section 10(c) of the Endangered Species Act this notice alerts the public that the incidental take permit applications are available for public review and comment.	Notice	6/15/2017	Pending Bureau clearance	05/23/17	Thursday June 8 2017	2955	ES		
FWS		Initiation of 5-Year Status Reviews of 23 Southeastern Species	The Fish and Wildlife Service will announce the initiation of 5-year status reviews of 23 Southeastern Species under the Endangered Species Act (Act). This notice announces our active review of 22 endangered species and 1 threatened species.	Notice	6/19/2017	Pending Bureau clearance	05/23/17	Monday June 12 2017	2952	ES		
FWS		Notice of Intent to Prepare a Draft Environmental Impact Statement for the Proposed Deschutes Basin Habitat Conservation Plan in Oregon	The U.S. Fish and W ldlife Service Service) has been leading a large scale multi-party planning effort to address irrigation infrastructure improvements that will benefit the conservation of endangered and threatened species in the Deschutes River Basin in Central Oregon. This effort has spanned many years and has involved eight Central Oregon irrigation districts (constituting the Deschutes Basin Board of Control) the City of Prineville and the U.S. Bureau of Reclamation as well as other parties. In accordance with the National Environmental Policy Act we are providing notice to all interested parties that the Service intends to prepare a draft environmental impact statement to evaluate the impacts of alternatives relating to the potential issuance of Endangered Species Act incidental take permits to the City of Prineville and to the eight irrigation districts represented by the Deschutes Basin Board of Control in central Oregon. We are also announcing the initiation of a public scoping period for this effort to engage Federal Tribal State and local governments and the public in the identification of issues and concerns potential impacts and possible alternatives to the	Notice	6/20/2017	Pending Bureau clearance	05/23/17	Tuesday June 13 2017	2939	ES		
FWS		June 2017 Batched 12-Month Findings for Two Species (Kirtland's snake and Mohave shoulderband snail)	We have completed 12-month findings on petitions requesting listing of two species under the Endangered Species Act and determined that the Kirtland's snake (found in the Midwestern United States) and the Mohave shoulderband snail (found in the western Mojave Desert in California) are not warranted for listing.	Notice	6/20/2017	Pending Bureau clearance	05/23/17	Tuesday June 13 2017	2973	ES		
FWS		Notice of Availability of a Draft Candidate Conservation Agreement Draft Candidate Conservation Agreements with Assurances and Draft Environmental Assessment for Activities within Eddy County New Mexico and Culberson County Texas; Includes Texas Hornshell (Proposed for Listing)	This is a notice of availability for a draft candidate conservation agreement a draft candidate conservation agreement with assurances with the Center of Excellence in Hazardous Material Management a draft candidate conservation agreement with assurances with the New Mexico State Lands Office (co lectively referred to as the agreements) a draft environmental assessment and two applications (one for each applicant) for Endangered Species Act section 10(a)(1)(A) enhancement of survival permits (permit) for the Texas hornshell in Texas and New Mexico. This notice required by section 10(c) of the Endangered Species Act alerts the public that the draft agreements draft EA and applications for the permits are available for public review and comment.	Notice	6/23/2017	Pending Bureau clearance	5/23/2017	Friday June 16 2017	2980	ES		

FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Maire Malone first) FWS-HQ-IA-2017-0019	This notice is a periodic action taken by the U.S. Fish and Wildlife Service Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice the Division of Management Authority has issued nine permits under the ESA and two under the MMPA that require notification to the public. This notice only informs the public that after going through a complete review of the submitted applications and considering any comments from the public or outside experts the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species there is no statutory time frame established under the ESA.	Notice	5/5/2017	Pending Office of the Secretary clearance	04/27/17	Friday April 28 2017	2905	IA		
FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Nature Conservation Trust first applicant)	This notice is a periodic action taken by the U.S. Fish and Wildlife Service Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice the Division of Management Authority has issued four permits under the ESA and one under the MMPA that require notification to the public. This notice only informs the public that after going through a complete review of the submitted applications and considering any comments from the public or outside experts the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species there is no statutory time frame established under the ESA.	Notice	5/12/2017	Pending Assistant Secretary clearance	05/17/17	Friday May 5 2017	2924	IA		
FWS		Endangered Species; Receipt of Applications for Permits (Tony Goldberg University of Wisconsin Madison WI first applicant)	This is a weekly action taken by the U.S. Fish and Wildlife Service Division of Management Authority to notify the public of the receipt of applications for Endangered Species Act (ESA) permits. This notice provides the public an opportunity to comment on four applications that were received by the Service requesting authorization to conduct otherwise prohibited activities within the United States or to import biological specimens for research purposes. There are no decisions announced in these notices but we cannot finalize the review of these permit applications until the conclusion of a mandatory 30-day comment period under the ESA.	Notice	5/17/2017	Pending Office of the Secretary clearance	05/09/17	Wednesday May 10 2017	2896	IA		

FWS		Endangered Species; Notice of Issuance (Foreign Species Permits; Michael Rohweder first permittee)	This notice is a periodic action taken by the U.S. Fish and Wildlife Service Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice the Division of Management Authority has issued four permits under the ESA and one under the MMPA that require notification to the public. This notice only informs the public that after going through a complete review of the submitted applications and considering any comments from the public or outside experts the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species there is no statutory time frame established under the ESA.	Notice	5/17/2017	Pending Office of the Secretary clearance	05/09/17	Wednesday May 10 2017	2927	IA		
FWS		Exemption from Threatened Species Permits for a Qualifying Beluga Sturgeon Aquaculture Facility	The U.S. Fish and W ldlife Service (Service) is providing notice of an exemption to permit requirements granted under our regulations to carry out the Endangered Species Act of 1973 as amended (Act). The Service in June 2016 granted an exemption for beluga sturgeon (*Huso huso*) reared in an aquaculture facility Sturgeon AquaFarms in Bascom Florida that meets the criteria under our regulations. The exemption authorizes the facility to take beluga sturgeon from its aquacultured stock for the purpose of harvesting aquacultured beluga sturgeon meat and also authorizes the fac lity to engage in interstate commerce and export of beluga sturgeon meat harvested from the faci ity's aquacultured stock subject to certain conditions.	Notice	6/16/2017	Pending Office of the Secretary clearance	05/22/17	Friday June 9 2017	2953	IA		
FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Dallas World Aquarium first applicant)	This notice is a weekly action taken by the U.S. Fish and Wildlife Service Division of Management Authority to notify the public of the receipt and issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). This notice provides the public an opportunity to comment on eight (8) permits under the ESA and three (4) under the MMPA. There are no decisions announced in these weekly notices but we cannot finalize the review of the permit applications unt l the conclusion of a mandatory 30-day comment period.	Notice	5/24/2017	Pending Assistant Secretary clearance	05/09/17	Wednesday May 17 2017	2942	IA		
FWS		Endangered Species; Receipt of Applications for Permits (Foreign Species Permits: Morani River Ranch first applicant)	This notice is a weekly action taken by the U.S. Fish and Wildlife Service Division of Management Authority to notify the public of the receipt and issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). This notice provides the public an opportunity to comment on ESA and MMPA permits. There are no decisions announced in these weekly notices but we cannot finalize the review of the permit applications until the conclusion of a mandatory 30-day comment period.	Notice	6/20/2017	Pending Bureau clearance	5/22/2017	Tuesday June 13 2017	2982	IA		
FWS		Foreign Endangered Species; Notice of Issuance of Permits (Charles Waibel first)	This notice is a periodic action taken by the U.S. Fish and Wildlife Service Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA). This notice only informs the public that after going through a complete review of the submitted app ications and considering any comments from the public or outside experts the Service has determined that all of the issuance criteria of the ESA have been meet.	Notice	6/22/2017	Pending Bureau clearance	5/23/2017	Thursday June 15 2017	2985	IA		
FWS		Meeting Notice; Service Regulations Committee Meeting	This is a notice that the U.S. Fish and Wildlife Service will conduct an open meeting in June 2017 to identify and discuss preliminary issues concerning the 2018-19 migratory bird hunting regulations.	Notice	5/15/2017	Pending meeting waiver clearance	05/12/17	Monday May 8 2017	2941	MB	Other 6/6/2017	This notice must publish two weeks prior to the scheduled meeting date which is June 21 2017.

FWS		Meeting Notice; North American Wetlands Council Meeting	This notice announces a meeting of the North American Wetlands Conservation Council (Council). The Council will meet to consider wetland acquisition restoration and enhancement projects for recommendation to and final funding approval by the Migratory Bird Conservation Commission.	Notice	5/19/2017	Pending meeting waiver clearance	05/15/17	Friday May 12 2017	2906	MB	Other 5/26/2017	This notice must publish two weeks prior to the scheduled meeting date which is June 13 2017.
FWS	1018-BB24	Migratory Bird Subsistence Harvest in Alaska; Use of Inedible Bird Parts in Authentic Alaska Native Handicrafts for Sale	The U.S. Fish and W ldloife Service is amending the permanent subsistence migratory bird harvest regulations in Alaska. This rule enables Alaska Natives to sell authentic native articles of handicraft or clothing that contain inedible byproducts from migratory birds that were taken for food during the Alaska migratory bird subsistence harvest season. The rule was developed under a co-management process involving the Service the Alaska Department of Fish and Game and Alaska Native representatives.	Final Rule	5/20/2017	Pending Assistant Secretary clearance	05/18/17	Monday May 8 2017	2763	MB		
FWS	1018-AZ69	Migratory Bird Permits; Control Order for Introduced Migratory Bird Species in Hawaii (Cattle Egrets and Barn Owls)	Introduced nonnative alien and invasive species in Hawaii displace compete with and consume native species some of which are endangered threatened or otherwise in need of additional protection in order to increase or maintain viable populations. To protect native species a control order is established for cattle egrets and barn owls two invasive migratory bird species in Hawaii under the direction of Executive Order 13112.	Final Rule	5/30/2017	Pending Office of the Secretary clearance	04/26/17	Tuesday May 16 2017	2913	MB		
FWS		Notice of Intent to Prepare an Environmental Impact Statement; Hycroft Mining Company; Request for Take Permits Under the Bald and Golden Eagle Protection Act	The U.S. Fish and W ldlife Service (Service) is considering the issuance of eagle take permits under the Bald and Golden Eagle Protection Act (Eagle Act). We intend to prepare a joint Environmental Impact Statement (EIS) with the Bureau of Land Management (BLM). We are a cooperating agency with the BLM on the development of this EIS. The BLM will be analyzing potential impacts of their decision regarding Hycroft Resource and Development Incorporated's (Hycroft/App icant) proposed expansion as described in BLM's Notice of Intent published in December 2014 (79 FR 78469). This EIS will also analyze impacts associated with the Service's eagle take permit decisions.	Notice	5/30/2017	Pending Office of the Secretary clearance	05/10/17	Tuesday May 23 2017	2938	MB		
FWS	1018-AY30	Eagle Permits: Revision to Regulations for Eagle Incidental Take and Take of Nests; Correction	In 2016 the Service finalized revisions to permit regulations regarding permits that we issue for some activities involving eagles. In that final rule we updated a table that includes permit app ication fees. Because of a formatting error in the rule the revisions were not able to be incorporated into the Code of Federal Regulations. With this document we correct the formatting error. This rule is purely an administrative action and does not affect the provisions of the rule in any substantive way.	Final Rule	6/8/2017	Pending Bureau clearance	04/18/17	Thursday May 25 2017	2944	MB		
FWS	1018-BB06	Migratory Bird Hunting; Approval of Corrosion inhibited Copper Shot as Nontoxic for Waterfowl Hunting	The Service proposes to approve corrosion-inhibited copper shot for hunting waterfowl and coots. We have concluded that the shot is unlikely to adversely affect fish wildlife or their habitats. We propose to change the regulation at 50 CFR 20.21(j) accordingly.	Proposed Rule	6/23/2017	Pending Bureau clearance	05/03/17	Friday June 9 2017	2278	MB		
FWS	1018-BB73	2018–19 Migratory Game Bird Hunting Regulations	This proposed rule is the first in the series to establish the 2018-19 annual migratory bird hunting regulations.	Proposed Rule	6/16/2017	Pending Bureau clearance	05/19/17	Friday June 2 2017	2992	MB	Other 7/31/2017	Must be published prior to Flyway Council meetings which begin in August.
FWS	1018-BB40	Migratory Bird Hunting; Seasons and Bag and Possession Limits for Certain Migratory Game Birds for the 2017–18 Season	This rule establishes the seasons and bag and possession limits for the 2017-18 migratory game bird hunting season.	Final Rule	6/16/2017	Pending Bureau clearance	05/19/17	Friday June 2 2017	2991	MB	Other 8/31/2017	This is the drop-dead date to legally open 2017/2018 hunting seasons.
FWS		Notice of intent to implement annual hunting fees annual fishing fees and special permit fees; Clarks River National Wildlife Refuge KY [FWS–R4–R–2016–N141]	Clarks River National Wildlife Refuge proposes to implement annual hunting and fishing fees and special permit fees for commercial recreational activities. The proposed cost for the annual access permit is $15 (free for youth under 16 and $5 for seniors 65 and over); there would be a $50 minimum fee for annual Recreational Special Use Permit authorizing commercial recreational activities to be conducted on the Refuge.	Notice	6/30/2017	Pending Office of the Secretary clearance	05/08/17	Friday June 23 2017	2867	NWRS	Other 8/15/2017	This date is necessary to enable us to initiate the recreational fee program.

FWS		Notice of Intent to Reopen the Planning Process for the Comprehensive Conservation Plan and Enivironmental Assessment at Crystal River National Wildlife Refuge	The Fish and Wildlife Service is submitting a notice of intent to prepare a comprehensive conservation plan for Crystal River National Wildlife Refuge (NWR) in Citrus County Florida. The planning process for Crystal River NWR began in 2008. The planning process was delayed when rulemaking for the Kings Bay Manatee Protection Area (Manatee Protection Area) was initiated in 2010 and completed in 2012.	Notice	6/30/2017	Pending Bureau clearance		Friday June 23 2017	2881	NWRS		
FWS		Notice of Availability for the Grays Harbor National Wildl fe Refuge and Black River Unit of Billy Frank Jr. Nisqually National Wildlife Refuge Grays Harbor and Thurston Counties WA; Comprehensive Conservation Plans and Finding of No Significant Impact for Environmental Assessment	The U.S. Fish and W ldlife Service will announce the availability of our comprehensive conservation plans and finding of no significant impact (signed on March 10 2017) for Grays Harbor NWR located in Grays Harbor County Washington and the Black River Unit (Unit) of Billy Frank Jr. Nisqua ly NWR located in Thurston County Washington.	Notice	6/30/2017	Pending Bureau clearance		Friday June 23 2017	2914	NWRS		
FWS		NOA: Camas National Wildlife Refuge Jefferson County ID; Comprehensive Conservation Plan and Finding of No Significant Impact for Environmental Assessment	A finding of no significant impact (FONSI) was signed on March 10 2017 and the comprehensive conservation plan (CCP) was completed for Camas National Wildlife Refuge located in Jefferson County Idaho. The CCP will guide management of the Refuge for 15 years or until it is revised and actions w ll be implemented as funding becomes available. We are informing the Secretary of our intent to publish the notice of availabi ity for the Camas National Wildlife Refuge CCP and the FONSI for the environmental assessment.	Notice	6/30/2017	Pending Bureau clearance		Friday June 23 2017	2915	NWRS		
FWS	1018-BB75	Refuge-Specific Hunting and Sport Fishing Regulations 2017–18	This proposed rule begins the annual process of updating refuge-specific regulations for National Wildlife Refuges.	Proposed Rule	6/1/2017	Pending Bureau clearance		Thursday May 18 2017		NWRS		
FWS	1018-BA31	Disapproval of Final Rule: Non-Subsistence Take of Wildlife and Public Participation and Closure Procedures on National Wildlife Refuges in Alaska	The final rule published August 5 2016 (81 FR 52248) and became effective September 6 2016. The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act signed by the President on April 3 2017 (P.L. 115-20). This action conforms to P.L. 115-20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the effective date of the final rule that was nullified under the Congressional Review Act.	Final Rule	6/2/2017	Pending Solicitor clearance		Friday May 19 2017		NWRS		
FWS		Lower Klamath Clear Lake Tule Lake Upper Klamath and Bear Valley National Wildlife Refuges Klamath County OR; Siskiyou and Modoc Counties CA; Record of Decision for Final Comprehensive Conservation Plan/Environmental Impact Statement	The notice informs the public that the U.S. Fish and Wildlife Service (Service) has signed a Record of Decision on January 13 2017 for the Final CCP/EIS for the Klamath Refuges. The Final CCP/EIS evaluated alternatives for managing the Klamath Refuges over the next 15 years. The Record of Decision includes a statement of the decisions made the basis for the decisions a description of the alternatives considered a description of the environmentally preferable alternative an overview of the measures to minimize environmental impacts and a summary of public involvement in the decisionmaking process. The Service can now begin implementing the CCP.	Notice	6/30/2017	Pending Bureau clearance	5/4/2017	Friday June 23 2017	2828	NWRS		
FWS		Silvio O. Conte National Fish and Wildlife Refuge; Record of Decision for Final Comprehensive Conservation Plan and Environmental Impact Statement	The U.S. Fish and W ldlife Service announces the availability of the record of decision (ROD) on the final comprehensive conservation plan (CCP) and environmental impact statement (EIS) for Silvio O. Conte National Fish and Wildlife Refuge (NFWR). We prepared the ROD pursuant to the National Environmental Policy Act of 1969 (NEPA) and its implementing regulations. The Service is furnishing this notice to advise the public and other agencies of our decision and of the availability of the ROD.	Notice	6/30/2017	Pending Bureau clearance	4/25/2017	Friday June 23 2017	2836	NWRS		

FWS		Draft Alaska Native Relations Policy	The Service together with Tribes Alaska Native Organizations (ANO) and Alaska Native Corporations (ANC) has drafted this Alaska Native Relations Policy which is supplemental to the Native American Policy (510 FW 1). The Native American Policy is the foundational policy which applies to agency personnel across the country as it guides the trust responsibility to and relationships with federally recognized tribes. The Alaska Native Relations Policy provides clarity and consistency for our work in Alaska and specifically explains the unique relationship the Service has with Alaska Native Claims Settlement Act corporations and describes the subsistence opportunities afforded by several Acts. We are seeking public comment on the draft policy.	Notice	5/15/2017	Pending Bureau clearance	5/2/2017	Monday May 8 2017	2937	R7 (Alaska Native Affairs)		
FWS	1018-BA33	Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4	The proposed rule:• Is in response to requests from States to revise and simplify the rules for license certification. The Service worked closely with DOI solicitors and Association of Fish and Wildlife Agencies (AFWA) attorneys in developing the new language. • Includes changes that were reviewed by Regional and State representatives and interested stakeholders during pre-rulemaking comment periods and were developed considering the comments we received. • Includes definitions and additions to the rule that will clarify the rule and improve national consistency. • Was developed in coordination with the AFWA the Federal Aid Coordinators Working Group Regional WSFR offices State representatives and members of interest organizations.	Proposed Rule	6/2/2017	Pending Office of the Secretary clearance	03/01/17	Friday May 19 2017	2841	WSFR

~~ES~~	~~1018-AX99 Removal of the Hualapai Mexican Vole from the List of Endangered and Threatened Wildlife 50 CFR 17~~	~~FR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS will remove the Hualapai Mexican vole, restricted to the Hualapai Mountains located in Arizona, from the List of Endangered and Threatened Wildlife due to the fact that the original classification is no longer appropriate. The best available science no longer supports the recognition of a separate Hualapai Mexican vole subspecies. Therefore, based on the best available scientific and commercial information at this time, FWS finds that the original data for classification were in error, and FWS is removing the Hualapai Mexican vole as a listed entity under the ESA.~~ ~~**Controversy:** None anticipated.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Don Morgan, 703-358-2444.~~ ~~**OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."~~	~~Not subject to OMB review~~ Was on Q3 same stage; will publish before Q4

ES	1018-AY05 Removal of the Eastern Cougar from the List of Endangered and Threatened Wildlife 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to delist the eastern cougar, formerly found in eastern North America, due to extinction. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Was on Q3 in same stage; pushed to Q4 9/1/17
WSFR	1018-AY75 Multi-Year Hunting and Fishing License Certification for the Wildlife and Sport Fish Restoration Program 50 CFR 80	~~PR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS proposes to make technical changes to FWS regulations that implement the Pittman-Robertson Wildlife Restoration Act and the Dingell-Johnson Sport Fish Restoration Act. The updates would align the regulations' language with terms used at 2 CFR 200, "Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards," and include other clarifying changes.~~ ~~**Controversy:** None anticipated. State fish and wildlife agencies as well as other partners support this proposed rule and have been closely involved in its development.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Peter Barlow, 703-358-2119.~~	~~6/30/17~~ Was on Q3; program says remove
ES	1018-AZ02 Listing Determination for the Sonoyta Mud Turtle 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/21/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Sonoyta mud turtle as an endangered species under the Endangered Species Act. This turtle is found in freshwater habitats in Arizona, and also Mexico. **Controversy:** This species occurs near the U.S.-Mexico border; however, no conflicts with border activities or potential border wall construction have been identified at this time. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review When was PR on?

ES	1018-AZ38 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Three Hawaiian Big Island Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will designate critical habitat for three plant species on Hawaii Island and correct the maps for existing designations for an additional four species. FWS intends to exclude lands owned or managed by the Queen Liliuokalani Trust, the Department of Hawaiian Homelands, and other private landowners under section 4(b)(2) of the Endangered Species Act. **Controversy:** Resolved. FWS coordinated with the Queen Liliuokalani Trust, landowners, and government jurisdictions, and will exclude lands owned by these entities under section 4(b)(2) of the Act. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	7/7/17 Was on Q1 in same stage
IA	1018-AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant**.** Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Timothy J. Van Norman, 703-358-2350.	9/29/17 Was not on Q3; was on Q217 (Q2 didn't go to OMB)

MB	1018-AZ69 Migratory Bird Permits; Control Order for Introduced Migratory Bird Species in Hawaii (Cattle Egrets and Barn Owls) 50 CFR 21	~~FR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** This rule will add a control order to apply to cattle egrets and barn owls, two introduced and invasive migratory bird species in Hawaii. The ranges of both species have expanded to occupy all of the Hawaiian islands. Both species have been found to prey on endemic endangered or threatened species. Without this order, control of the two species would require issuing depredation permits, which would add to State and Federal agency costs for control activities that will benefit listed species.~~ ~~**Controversy:** None.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Jerry Thompson (703) 358-2016.~~ ~~**OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."~~	~~4/21/17~~ Was on Q3—removing because this is currently in Exec Sec and we expect it to clear prior to Q4
LE	1018-AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	Not significant. Not major. Not court driven. **Retrospective Regulatory Review action.** **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	~~6/30/17~~ 9/29/17 Was on Q3; pushing to Q4

NWRS	1018-BA31 Nonsubsistence Take of Wildlife, and Public Participation and Closure Procedures, on National Wildlife Refuges in Alaska 50 CFR 32 and 36	FR	Not significant. Not major. Not court driven. **What the rule does:** This final rule published August 5, 2016 (81 FR 52248) and became effective September 6, 2016. The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act, signed by the President on April 3, 2017 (Pub. L. 115–20). This action conforms to Pub. L. 115–20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the final rule was nullified under the Congressional Review Act. **Controversy:** The original rulemaking action was controversial. This action is congressionally directed. **Dates of any briefs provided to EOP:** None. **Contact:** Stephanie Brady, 907-306-7448. **OMB's comments in response to Q317 list:** "Deregulatory action under E.O. 13771. Can we get a briefing/briefing paper (BP) on what the regulations will return to with the overturning of this rule via the Congressional Review Act?" 5/23/17—Got Director's Office clearance to send OES the BP requested by OMB.	~~4/28/17~~ Was on Q3; will stay on Q4—date? *Depends on when template for nullification is ready; SW asking OES*
WSFR	1018-BA33 Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4 50 CFR 80	PR	Not significant. Not major. Not court driven. **What the rule does:** This is the first in a four-phase process for directing State fish and wildlife agencies on how they must receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, FWS distributes annual apportionments to States from trust funds derived from excise tax and fuel tax revenues. This phase would address definitions, requirements for licenses counted for apportionment of Federal financial assistance, program income, and other related issues. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR. **Controversy:** None anticipated. State fish and wildlife agencies, as well as other partners, support this final rule and have been closely involved in its development. **Dates of any briefs provided to EOP:** None. **Contact:** Peter Barlow, 703-358-2119.	~~4/25/17~~ With Exec Sec since Mar 1 Was on Q317; pushing to 7/5/17

ES	1018-BA43 Reclassifying the Borax Lake Chub from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Borax Lake chub from endangered to threatened. The primary threats to the species have been ameliorated; however, due to ongoing threats from geothermal development, FWS is proposing to reclassify the species to threatened status rather than delisting it. FWS is also proposing to correct the List of Endangered and Threatened Wildlife to reflect the current scientifically accepted taxonomy of this species as *Siphateles boraxobius* (=*Gila boraxobius*). **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. **OMB's comment in response to Q317 list:** "If the downlisting is accompanied with a reduction in regulatory burden (e.g., an Endangered Species Act section 4d rule), it is a deregulatory action under E.O. 13771."	Not subject to OMB review Was on Q3 in same stage; pushed to Q4 9/15/17
ES	1018-BA74 Listing Determination and Critical Habitat Designation for the Guadalupe Fescue 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/09/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Guadalupe fescue, a grass species found in Texas and Mexico, as an endangered species under the Endangered Species Act. FWS will also make a final determination on the designation of critical habitat for the Guadalupe fescue under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	~~6/30/17~~ 8/18/17 Was on Q3 at same stage (CH under BA75); date pushed ahead

ES	1018-BA78 Listing Determination and Critical Habitat Designation for the Black Warrior Waterdog 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 10/06/17, MDL settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Black Warrior waterdog as an endangered species under the Endangered Species Act. FWS will also make a final determination on the designation of critical habitat for the Black Warrior waterdog under the Endangered Species Act. This salamander species is found in streams in the Black Warrior River Basin in Alabama. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Was on Q316 – PR 9/15/17
ES	1018-BA80 Removing Textual Descriptions of Critical Habitat Boundaries for Plants on the Hawaiian Islands 50 CFR 17	FR	Not Significant. Not major. Not court driven. **What the rule does:** This rule will remove the textual descriptions of the critical habitat boundaries from certain entries at 50 CFR 17.99 (plants on the Hawaiian Islands) that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease, or in any other way change the critical habitat designations from which we are removing the textual descriptions of boundaries. This action will save taxpayer resources. We are taking this action in accordance with our May 1, 2012, revision of the regulations related to publishing textual descriptions of critical habitat boundaries in the CFR and as part of our response to Executive Order 13563 (January 18, 2011), which directs Federal agencies to review their existing regulations and then to modify or streamline them in accordance with what they have learned. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Carey Galst, 703-358-1954.	8/31/17 First appearance on quarterly report

MB	1018-BB06 Migratory Bird Hunting; Approval of Corrosion-Inhibited Copper Shot as Nontoxic for Waterfowl Hunting 50 CFR 20	PR	Not significant. Not major. Not court driven. **What the rule does:** Environ-Metal, Inc., of Sweet Home, Oregon, has applied for approval of shot composed of copper as nontoxic for waterfowl hunting in the United States. The shot formulation is at least 99.9 percent copper by weight, with a corrosion-inhibiting coating to prevent release of copper into terrestrial or aquatic environments. FWS has reviewed the shot as required under the criteria in the nontoxic shot approval procedures in FWS regulations. FWS' proposed approval of this shot formulation would increase the number of nontoxic shot options for hunters of migratory waterfowl. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. **OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."	~~5/1/17~~ Was on Q3—pushing to 7/14/17
AK Sub	1018-BB22 Subsistence Management Regulations for Public Lands in Alaska—Applicability and Scope; Tongass National Forest Submerged Lands 50 CFR 100; 36 CFR 242	~~FR~~	~~Not significant. Not major.~~ **~~Court driven. No deadline; however, FWS needs to show the plaintiffs and the court that progress is being made.~~** **~~What the rule does:~~** ~~The U.S. District Court for Alaska, in an October 17, 2011, order, enjoined the United States "to promptly initiate regulatory proceedings for the purpose of implementing the subsistence provisions in Title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) with respect to submerged public lands within Tongass National Forest," and directed entry of judgment. To comply with the order, the Federal Subsistence Board (FWS/DOI and USDA/Forest Service, joint rulemaking) published a proposed rule to identify those submerged lands within the Tongass that did not pass to the State of Alaska at Statehood and therefore are subject to the subsistence provisions of ANILCA. DOI/FWS and USDA/Forest Service will now finalize the proposed rule.~~ **~~Controversy:~~** ~~None anticipated.~~ **~~Dates of any briefs provided to EOP:~~** ~~None.~~ **~~Contact:~~** ~~Theo Matuskowitz, 907-786-3867.~~	~~6/15/17~~ Was on Q3 same stage; will publish before Q4

MB	1018-BB73 Migratory Game Bird Hunting Regulations, 2018–19 50 CFR 20	~~PR~~	~~**Significant. Major.** Not court driven.~~ ~~**What the rule does:** This rule proposes to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. FWS annually prescribes outside limits (frameworks) within which States may select hunting seasons. This proposed rule provides the regulatory schedule, describes the proposed regulatory alternatives for the 2018–19 duck hunting seasons, requests proposals from Indian tribes that wish to establish special migratory game bird hunting regulations on Federal Indian reservations and ceded lands, and requests proposals for the 2019 spring and summer migratory bird subsistence season in Alaska. Migratory game bird hunting seasons provide opportunities for recreation and sustenance; aid Federal, State, and tribal governments in the management of migratory game birds; and permit harvests at levels compatible with migratory game bird population status and habitat conditions.~~ ~~**Controversy:** None.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Ron Kokel, 703-358-1967.~~	~~6/1/17~~ Was on Q3—removing because this is currently in SOL for review and we expect it to clear prior to Q4
MB	1018-BB73 Migratory Game Bird Hunting Regulations, 2018–19; Supplemental 50 CFR 20	PR	**Significant. Major.** Not court driven. **What the rule does:** Proposes to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. The U.S. Fish and Wildlife Service proposed in an earlier document to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. This supplement to the proposed rule provides the regulatory schedule, announces the Service Migratory Bird Regulations Committee and Flyway Council meetings, and provides Flyway Council recommendations resulting from the Council's March 2017 meetings. **Controversy:** None. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967.	8/15/17

NWRS	1018-BB75 Refuge-Specific Hunting and Sport Fishing Regulations, 2017–18 50 CFR 32	~~PR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS is proposing to make additions to refuge-specific regulations for the 2017–18 hunting and sport fishing season. This action is part of an annual update for the National Wildlife Refuge System that ensures adequate public notice of openings and changes. FWS operates hunting and fishing programs on refuges to implement the National Wildlife Refuge System Improvement Act of 1997 directives to facilitate compatible priority wildlife-dependent recreational opportunities.~~ ~~**Controversy:** Medium. Some oppose hunting on National Wildlife Refuges. However, failure to have regulations in place will cause issue/controversy with hunters.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Aaron Mize, 703-358-2678.~~ ~~**OMB's comment on Q317 list:** "We would like additional information on what the additional costs there may be for the FWS associated with opening additional refuges for fishing and hunting." 5/23/17—Got Director's Office clearance to send OES the BP requested by OMB.~~	~~5/19/17~~ Was on Q3—removing because we except it to go to FR before Q4
ES	1018-BB76 Removal of the Monito gecko from the Federal List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to remove the Monito gecko from the Federal List of Endangered and Threatened Wildlife due to recovery. The Monito gecko is endemic to the island of Monito, which is located 68 kilometers west of Puerto Rico. This determination is based on a thorough review of the best available scientific and commercial information, which indicates that the threats to this species have been eliminated or reduced to the point that the species no longer meets the definition of an endangered species or a threatened species under the Endangered Species Act. FWS will also make available a post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review First appearance on quarterly report

ES	1018-BB79 Removal of the Black-Capped Vireo from the Federal List of Endangered and Threatened Wildlife; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove the black-capped vireo, a bird species, from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring (PDM) plan. The black-capped vireo breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states. **Controversy:** A number of public comments opposed the delisting of the black-capped vireo, including one from the Office of Travis County Judge and one from a national park. Those concerns may be reflected in comments FWS receives on the draft PDM. A number of partner agencies have indicated concerns about having the necessary funds to implement the ongoing management needs (e.g., cow-bird removal) and monitoring identified for their lands, which may also result in concerns about the viability of both the delisting and the PDM plan. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review
WSFR	1018-BB84 Administrative Requirements; Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 2 of 4 50 CFR 80	~~PR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS continues the process of directing State fish and wildlife agencies on how to receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, FWS distributes annual apportionments to States from trust funds derived from excise tax revenues and fuel taxes. This is the second phase of a four-phase rulemaking. This phase will possibly include response to pending bills before Congress, include some more difficult topics through an advance notice of proposed rulemaking (ANPR), and propose changes to more settled topics, including definitions, topics related to the continued Federal connection to the project, audits, third-party labor, and contact information on coordination grants in the proposed rule (PR). FWS will publish the ANPR with the PR. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR.~~ ~~**Controversy:** None anticipated.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Peter Barlow, 703-358-2119.~~	~~5/3/17~~ Was on Q3; Pushing ahead to Q118; remove

ES	1018-BB98 Endangered and Threatened Wildlife and Plants; Nonessential Experimental Population of Red Wolves in North Carolina 50 CFR 17	~~AN~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS will prepare a draft environmental impact statement (EIS) in conjunction with development of a revised rule for the nonessential experimental population (NEP) of red wolves (*Canis rufus*) in North Carolina. Improved management of the NEP is needed to benefit the species, so FWS plans to change the NEP's size, scope, and management. FWS will initiate a public scoping process to engage governments, stakeholders, and the public in developing a proposed rule and associated EIS.~~ ~~**Controversy:** FWS anticipates both support and opposition to the proposed revisions. The North Carolina Wildlife Resources Commission recognizes the need to improve management of the NEP, and FWS will engage the Commission in drafting the proposed rule and EIS. FWS anticipates opposition from several members of Congress, nongovernmental organizations, and the public due to a perceived abandonment of management of red wolves in the wild.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Don Morgan, 703-358-2444.~~	~~4/30/17~~ Was on Q3; ANPR published 5/23/17 https://www.fws.gov/policy/library/2017/2017-10551.pdf
AK Sub	1018-BB99 Subsistence Management Regulations for Public Lands in Alaska; Subsistence Taking of Fish; Cook Inlet Area 50 CFR 100; 36 CFR 242	~~PR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS will propose to revise the regulations for seasons, harvest limits, methods and means for the subsistence taking of fish in the Cook Inlet of Alaska. This action would also reorganize specific regulations addressing the Kenai River, which would provide clarity for the public and allow the Federal Subsistence Board to correct regulatory conflicts that have arisen based on recent rulemaking. (This is a joint rulemaking between DOI/FWS and USDA/Forest Service.)~~ ~~**Controversy:** Senator Murkowski and Representative Young have expressed interest in this issue in the past; however, they have not recently contacted FWS about this issue.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Theo Matuskowitz, 907-786-3867.~~	~~5/15/17~~ Was on Q3 same stage; will publish before Q4

ES	1018-BC01 Reclassifying the Kirtland's warbler from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Kirtland's warbler from endangered to threatened, due to the impact of management actions in addressing the primary threats to the species and decreasing the overall magnitude of the primary threats. The Kirtland's warbler is found in Michigan, Wisconsin, South Carolina, and Florida in the United States; in Canada during the breeding season; and in the Bahamas during the winter period. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review First appearance on quarterly report
~~ES~~	~~1018-BC04~~ ~~Reinstatement of Removal of the Gray Wolf in Wyoming from the Federal List of Endangered and Threatened Wildlife,~~ ~~50 CFR 17~~	~~FR~~	~~Not significant. Not major. Court driven.~~ ~~**What the rule does:** FWS will publish a final rule removing gray wolves in Wyoming from the Federal List of Endangered and Threatened Wildlife. Pursuant to the United States Court of Appeals for the District of Columbia order dated March 3, 2017, and court mandate, which FWS expects the court to issue on April 24, 2017, this rule removes gray wolves in Wyoming from the List of Endangered and Threatened Wildlife.~~ ~~**Controversy:** Although this action is being taken as a result of a court mandate, the ESA listing status of gray wolves in Wyoming will continue to garner a high level of interest from the state, agricultural and producer groups, and non-governmental organizations with opposing views on delisting. FWS expects some members of the environmental community, including plaintiffs (i.e., Defenders of Wildlife et al.) will strongly oppose this final rule as they did when FWS delisted gray wolves in Wyoming in 2012.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Don Morgan, 703-358-2444.~~ ~~**OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."~~	~~Not subject to OMB review~~ Was on Q3; FR published May 1, 2017 https://www.fws.gov/policy/library/2017/2017-08720.pdf

ES	1018-BC09 Removal of the Foskett Speckled Dace from the List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to remove the Foskett speckled dace, a fish in Oregon, from the Federal List of Endangered and Threatened Wildlife due to recovery. This determination is based on a thorough review of the best available scientific and commercial information, which indicates that the threats to this species have been eliminated or reduced to the point that the species no longer meets the definition of an endangered species or a threatened species under the Endangered Species Act. We will also make available a post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP**: None. **Contact**: Don Morgan, 703-358-2444.	Not subject to OMB review First appearance on quarterly report
ES	1018-BC14 Listing Determination and Critical Habitat Designation for the Panama City Crayfish 50 CFR 17	PR	Not significant. Not major. **Court driven: PR, 9/30/17, settlement agreement.** **What the rule does:** FWS will make a listing determination for the Panama City crayfish under the Endangered Species Act. This crayfish is found in Florida. FWS will, if prudent and determinable, also propose to designate critical habitat for Panama City crayfish under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/15/17 First appearance on quarterly report

ES	1018-BC64 Endangered and Threatened Wildlife and Plants; Technical Correction for Tonkin Snub-nosed Monkey 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** We are removing the endangered Tonkin snub-nosed monkey from certain regulations that apply only to primates that are listed as threatened species (50 CFR 17.40). Tonkin snub-nosed monkeys were included in these regulations when this species was listed as threatened. However, this species was reclassified as endangered in 1990. Therefore, the provisions of the regulations for threatened primates no longer apply to Tonkin snub-nosed monkeys, and, accordingly, we are correcting this error in the Code of Federal Regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Janine Van Norman, 703-358-2370	Was Info in table fmt sent to OMB between Q3 and Q4 of FY17? 7/6/17

ES	1018-AZ02 Listing Determination for the Sonoyta Mud Turtle 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/21/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Sonoyta mud turtle as an endangered species under the Endangered Species Act. This turtle is found in freshwater habitats in Arizona, and also Mexico. **Controversy:** This species occurs near the U.S.-Mexico border; however, no conflicts with border activities or potential border wall construction have been identified at this time. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review When was PR on?
ES	1018-AZ38 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Three Hawaiian Big Island Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will designate critical habitat for three plant species on Hawaii Island and correct the maps for existing designations for an additional four species. FWS intends to exclude lands owned or managed by the Queen Liliuokalani Trust, the Department of Hawaiian Homelands, and other private landowners under section 4(b)(2) of the Endangered Species Act. **Controversy:** Resolved. FWS coordinated with the Queen Liliuokalani Trust, landowners, and government jurisdictions, and will exclude lands owned by these entities under section 4(b)(2) of the Act. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	7/7/17 Was on Q1 in same stage
IA	1018-AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant**.** Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Timothy J. Van Norman, 703-358-2350.	9/29/17 Was not on Q3; was on Q217 (Q2 didn't go to OMB)

LE	1018-AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	Not significant. Not major. Not court driven. **Retrospective Regulatory Review action.** **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	~~6/30/17~~ 9/29/17 Was on Q3; pushing to Q4
NWRS	1018-BA31 Nonsubsistence Take of Wildlife, and Public Participation and Closure Procedures, on National Wildlife Refuges in Alaska 50 CFR 32 and 36	FR	Not significant. Not major. Not court driven. **What the rule does:** This final rule published August 5, 2016 (81 FR 52248) and became effective September 6, 2016. The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act, signed by the President on April 3, 2017 (Pub. L. 115–20). This action conforms to Pub. L. 115–20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the final rule was nullified under the Congressional Review Act. **Controversy:** The original rulemaking action was controversial. This action is congressionally directed. **Dates of any briefs provided to EOP:** None. **Contact:** Stephanie Brady, 907-306-7448. **OMB's comments in response to Q317 list:** "Deregulatory action under E.O. 13771. Can we get a briefing/briefing paper (BP) on what the regulations will return to with the overturning of this rule via the Congressional Review Act?" 5/23/17—Got Director's Office clearance to send OES the BP requested by OMB.	~~4/28/17~~ Was on Q3; will stay on Q4—date? *Depends on when template for nullification is ready; SW asking OES*

WSFR	1018-BA33 Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4 50 CFR 80	PR	Not significant. Not major. Not court driven. **What the rule does:** This is the first in a four-phase process for directing State fish and wildlife agencies on how they must receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, FWS distributes annual apportionments to States from trust funds derived from excise tax and fuel tax revenues. This phase would address definitions, requirements for licenses counted for apportionment of Federal financial assistance, program income, and other related issues. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR. **Controversy:** None anticipated. State fish and wildlife agencies, as well as other partners, support this final rule and have been closely involved in its development. **Dates of any briefs provided to EOP:** None. **Contact:** Peter Barlow, 703-358-2119.	~~4/25/17~~ With Exec Sec since Mar 1 Was on Q317; pushing to 7/5/17
WSFR	1018-BA33 Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4 50 CFR 80	FR	Not significant. Not major. Not court driven. **What the rule does:** This is the first in a four-phase process for directing State fish and wildlife agencies on how they must receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, FWS distributes annual apportionments to States from trust funds derived from excise tax and fuel tax revenues. This phase will address definitions, requirements for licenses counted for apportionment of Federal financial assistance, program income, and other related issues. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR. **Controversy:** None anticipated. State fish and wildlife agencies, as well as other partners, support this final rule and have been closely involved in its development. **Dates of any briefs provided to EOP:** None. **Contact:** Peter Barlow, 703-358-2119.	~~6/30/17~~ Was on Q317; pushing to 9/15/17

ES	1018-BA43 Reclassifying the Borax Lake Chub from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Borax Lake chub from endangered to threatened. The primary threats to the species have been ameliorated; however, due to ongoing threats from geothermal development, FWS is proposing to reclassify the species to threatened status rather than delisting it. FWS is also proposing to correct the List of Endangered and Threatened Wildlife to reflect the current scientifically accepted taxonomy of this species as *Siphateles boraxobius* (=*Gila boraxobius*). **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. **OMB's comment in response to Q317 list:** "If the downlisting is accompanied with a reduction in regulatory burden (e.g., an Endangered Species Act section 4d rule), it is a deregulatory action under E.O. 13771."	Not subject to OMB review Was on Q3 in same stage; pushed to Q4 9/15/17
ES	1018-BA74 Listing Determination and Critical Habitat Designation for the Guadalupe Fescue 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/09/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Guadalupe fescue, a grass species found in Texas and Mexico, as an endangered species under the Endangered Species Act. FWS will also make a final determination on the designation of critical habitat for the Guadalupe fescue under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	~~6/30/17~~ 8/18/17 Was on Q3 at same stage (CH under BA75); date pushed ahead

ES	1018-BA78 Listing Determination and Critical Habitat Designation for the Black Warrior Waterdog 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 10/06/17, MDL settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Black Warrior waterdog as an endangered species under the Endangered Species Act. FWS will also make a final determination on the designation of critical habitat for the Black Warrior waterdog under the Endangered Species Act. This salamander species is found in streams in the Black Warrior River Basin in Alabama. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Was on Q316 – PR 9/15/17
ES	1018-BA80 Removing Textual Descriptions of Critical Habitat Boundaries for Plants on the Hawaiian Islands 50 CFR 17	FR	Not Significant. Not major. Not court driven. **What the rule does:** This rule will remove the textual descriptions of the critical habitat boundaries from certain entries at 50 CFR 17.99 (plants on the Hawaiian Islands) that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease, or in any other way change the critical habitat designations from which we are removing the textual descriptions of boundaries. This action will save taxpayer resources. We are taking this action in accordance with our May 1, 2012, revision of the regulations related to publishing textual descriptions of critical habitat boundaries in the CFR and as part of our response to Executive Order 13563 (January 18, 2011), which directs Federal agencies to review their existing regulations and then to modify or streamline them in accordance with what they have learned. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Carey Galst, 703-358-1954.	8/31/17 First appearance on quarterly report

MB	1018-BB06 Migratory Bird Hunting; Approval of Corrosion-Inhibited Copper Shot as Nontoxic for Waterfowl Hunting 50 CFR 20	PR	Not significant. Not major. Not court driven. **What the rule does:** Environ-Metal, Inc., of Sweet Home, Oregon, has applied for approval of shot composed of copper as nontoxic for waterfowl hunting in the United States. The shot formulation is at least 99.9 percent copper by weight, with a corrosion-inhibiting coating to prevent release of copper into terrestrial or aquatic environments. FWS has reviewed the shot as required under the criteria in the nontoxic shot approval procedures in FWS regulations. FWS' proposed approval of this shot formulation would increase the number of nontoxic shot options for hunters of migratory waterfowl. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. **OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."	~~5/1/17~~ Was on Q3—pushing to 7/14/17

MB	1018-BB73 Migratory Game Bird Hunting Regulations, 2018–19; Supplemental 50 CFR 20	PR	**Significant. Major.** Not court driven. **What the rule does:** Proposes to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. The U.S. Fish and Wildlife Service proposed in an earlier document to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. This supplement to the proposed rule provides the regulatory schedule, announces the Service Migratory Bird Regulations Committee and Flyway Council meetings, and provides Flyway Council recommendations resulting from the Council's March 2017 meetings. **Controversy:** None. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967.	8/15/17
ES	1018-BB76 Removal of the Monito gecko from the Federal List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to remove the Monito gecko from the Federal List of Endangered and Threatened Wildlife due to recovery. The Monito gecko is endemic to the island of Monito, which is located 68 kilometers west of Puerto Rico. This determination is based on a thorough review of the best available scientific and commercial information, which indicates that the threats to this species have been eliminated or reduced to the point that the species no longer meets the definition of an endangered species or a threatened species under the Endangered Species Act. FWS will also make available a post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review First appearance on quarterly report

ES	1018-BB79 Removal of the Black-Capped Vireo from the Federal List of Endangered and Threatened Wildlife; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove the black-capped vireo, a bird species, from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring (PDM) plan. The black-capped vireo breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states. **Controversy:** A number of public comments opposed the delisting of the black-capped vireo, including one from the Office of Travis County Judge and one from a national park. Those concerns may be reflected in comments FWS receives on the draft PDM. A number of partner agencies have indicated concerns about having the necessary funds to implement the ongoing management needs (e.g., cow-bird removal) and monitoring identified for their lands, which may also result in concerns about the viability of both the delisting and the PDM plan. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review
ES	1018-BB87 Removal of the Gypsum Wild-Buckwheat from the Federal List of Endangered and Threatened Plants; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove *Eriogonum gypsophilum* (gypsum wild-buckwheat, a plant species) from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring plan. The gypsum wild-buckwheat is a regionally endemic perennial plant in New Mexico. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	~~NPRM Q117~~ Not subject to OMB review On Q117 as PR

Not major. **Court driven: PR, 9/30/17, settlement agreement.** **What the rule does:** FWS will make a listing determination for the candy darter under the Endangered Species Act. This fish species is found in Virginia and West Virginia. FWS will, if prudent and determinable, also propose to designate critical habitat for the candy darter under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/15/17 First appearance on quarterly report
ES	1018-BC46 Listing Determination and Critical Habitat Designation for Barbour's Map Turtle 50 CFR 17	PR	Not significant. Not major. **Court driven: PR, 9/30/17, settlement agreement.** **What the rule does:** FWS will make a listing determination for Barbour's map turtle under the Endangered Species Act. This turtle is found in Alabama, Florida, and Georgia. FWS will, if prudent and determinable, also propose to designate critical habitat for Barbour's map turtle under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/15/17 First appearance on quarterly report
ES	1018-BC50 Listing Determinations and Critical Habitat Designations for 14 Southern Nevada Springsnails 50 CFR 17	PR	Not significant. Not major. **Court driven: PR, 9/30/17, settlement agreement for bifid duct pyrg, flag pyrg, hardy pyrg, and Lake Valley pyrg.** **What the rule does:** FWS will make listing determinations for 14 species of springsnails under the Endangered Species Act. These snails are found in Nevada and Utah. FWS will, if prudent and determinable, also propose to designate critical habitat for 14 species of springsnails under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/15/17 First appearance on quarterly report

ES	1018-BC56 Listing Determination and Critical Habitat Designation for the Tinian Monarch 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a listing determination for the Tinian monarch under the Endangered Species Act. This bird species is found in the Northern Mariana Islands. FWS will, if deemed prudent and determinable, also propose to designate critical habitat for the Tinian monarch under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/15/17 First appearance on quarterly report
ES	1018-BC57 Listing Determination and Critical Habitat Designation for the Hermes Copper Butterfly 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a listing determination for the Hermes copper butterfly under the Endangered Species Act. This butterfly is found in California, and is currently a candidate for listing under the Endangered Species Act. FWS will, if prudent and determinable, also propose to designate critical habitat for the Hermes copper butterfly under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/15/17 First appearance on quarterly report
ES	1018-BC59 Listing Determination and Critical Habitat Designation for the San Joaquin Valley Giant Flower-Loving Fly 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a listing determination for the San Joaquin Valley giant flower-loving fly under the Endangered Species Act. This insect species is found in California. FWS will, if prudent and determinable, also propose to designate critical habitat for the San Joaquin Valley giant flower-loving fly under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/15/17 First appearance on quarterly report

ES	1018-BC64 Endangered and Threatened Wildlife and Plants; Technical Correction for Tonkin Snub-nosed Monkey 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** We are removing the endangered Tonkin snub-nosed monkey from certain regulations that apply only to primates that are listed as threatened species (50 CFR 17.40). Tonkin snub-nosed monkeys were included in these regulations when this species was listed as threatened. However, this species was reclassified as endangered in 1990. Therefore, the provisions of the regulations for threatened primates no longer apply to Tonkin snub-nosed monkeys, and, accordingly, we are correcting this error in the Code of Federal Regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Janine Van Norman, 703-358-2370	Was Info in table fmt already sent to OMB between Q3 and Q4 of FY17? 7/6/17

Subject:	Need a Favor - Revised 90-day List
Date:	Friday, May 26, 2017 9:49:22 AM
Attachments:	DRAFT Qtrly Rept FWS Jul-Sep (Q417) streamlined (sorted by RIN) (5-26-17).docx

Hi Everyone,

We received updates from ES this morning on the 90-day list and have incorporated them in the attached version which has also been uploaded to DTS. It should be ready for ES' surname once the updated list has been printed and placed in the hard copy package.

Would someone mind printing out the new version and including it in the package? Thank you very much!

As a reminder, Exec Sec wants this by COB on Tuesday. I know that isn't likely to happen, but the sooner we get it moving, the less likely Julie is to yell at you, Charisa.

Tina

ES	1018-AZ02 Listing Determination for the Sonoyta Mud Turtle 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/21/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Sonoyta mud turtle as an endangered species under the Endangered Species Act. This turtle is found in freshwater habitats in Arizona, and also Mexico. **Controversy:** This species occurs near the U.S.-Mexico border; however, no conflicts with border activities or potential border wall construction have been identified at this time. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review When was PR on?
ES	1018-AZ38 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Three Hawaiian Big Island Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will designate critical habitat for three plant species on Hawaii Island and correct the maps for existing designations for an additional four species. FWS intends to exclude lands owned or managed by the Queen Liliuokalani Trust, the Department of Hawaiian Homelands, and other private landowners under section 4(b)(2) of the Endangered Species Act. **Controversy:** Resolved. FWS coordinated with the Queen Liliuokalani Trust, landowners, and government jurisdictions, and will exclude lands owned by these entities under section 4(b)(2) of the Act. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	7/7/17 Was on Q1 in same stage
IA	1018-AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant**.** Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Timothy J. Van Norman, 703-358-2350.	9/29/17 Was not on Q3; was on Q217 (Q2 didn't go to OMB)

LE	1018-AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	Not significant. Not major. Not court driven. **Retrospective Regulatory Review action.** **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	~~6/30/17~~ 9/29/17 Was on Q3; pushing to Q4
NWRS	1018-BA31 Nonsubsistence Take of Wildlife, and Public Participation and Closure Procedures, on National Wildlife Refuges in Alaska 50 CFR 32 and 36	FR	Not significant. Not major. Not court driven. **What the rule does:** This final rule published August 5, 2016 (81 FR 52248) and became effective September 6, 2016. The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act, signed by the President on April 3, 2017 (Pub. L. 115–20). This action conforms to Pub. L. 115–20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the final rule was nullified under the Congressional Review Act. **Controversy:** The original rulemaking action was controversial. This action is congressionally directed. **Dates of any briefs provided to EOP:** None. **Contact:** Stephanie Brady, 907-306-7448. **OMB's comments in response to Q317 list:** "Deregulatory action under E.O. 13771. Can we get a briefing/briefing paper (BP) on what the regulations will return to with the overturning of this rule via the Congressional Review Act?" 5/23/17—Got Director's Office clearance to send OES the BP requested by OMB.	~~4/28/17~~ Was on Q3; will stay on Q4—date? *Depends on when template for nullification is ready; SW asking OES*

ES	1018-BA43 Reclassifying the Borax Lake Chub from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Borax Lake chub from endangered to threatened. The primary threats to the species have been ameliorated; however, due to ongoing threats from geothermal development, FWS is proposing to reclassify the species to threatened status rather than delisting it. FWS is also proposing to correct the List of Endangered and Threatened Wildlife to reflect the current scientifically accepted taxonomy of this species as *Siphateles boraxobius* (=*Gila boraxobius*). **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. **OMB's comment in response to Q317 list:** "If the downlisting is accompanied with a reduction in regulatory burden (e.g., an Endangered Species Act section 4d rule), it is a deregulatory action under E.O. 13771."	Not subject to OMB review Was on Q3 in same stage; pushed to Q4 9/15/17
ES	1018-BA74 Listing Determination and Critical Habitat Designation for the Guadalupe Fescue 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/09/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Guadalupe fescue, a grass species found in Texas and Mexico, as an endangered species under the Endangered Species Act. FWS will also make a final determination on the designation of critical habitat for the Guadalupe fescue under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	~~6/30/17~~ 8/18/17 Was on Q3 at same stage (CH under BA75); date pushed ahead

ES	1018-BA78 Listing Determination and Critical Habitat Designation for the Black Warrior Waterdog 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 10/06/17, MDL settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Black Warrior waterdog as an endangered species under the Endangered Species Act. FWS will also make a final determination on the designation of critical habitat for the Black Warrior waterdog under the Endangered Species Act. This salamander species is found in streams in the Black Warrior River Basin in Alabama. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Was on Q316 – PR 9/15/17
ES	1018-BA80 Removing Textual Descriptions of Critical Habitat Boundaries for Plants on the Hawaiian Islands 50 CFR 17	FR	Not Significant. Not major. Not court driven. **What the rule does:** This rule will remove the textual descriptions of the critical habitat boundaries from certain entries at 50 CFR 17.99 (plants on the Hawaiian Islands) that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease, or in any other way change the critical habitat designations from which we are removing the textual descriptions of boundaries. This action will save taxpayer resources. We are taking this action in accordance with our May 1, 2012, revision of the regulations related to publishing textual descriptions of critical habitat boundaries in the CFR and as part of our response to Executive Order 13563 (January 18, 2011), which directs Federal agencies to review their existing regulations and then to modify or streamline them in accordance with what they have learned. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Carey Galst, 703-358-1954.	8/31/17 First appearance on quarterly report

MB	1018-BB06 Migratory Bird Hunting; Approval of Corrosion-Inhibited Copper Shot as Nontoxic for Waterfowl Hunting 50 CFR 20	PR	Not significant. Not major. Not court driven. **What the rule does:** Environ-Metal, Inc., of Sweet Home, Oregon, has applied for approval of shot composed of copper as nontoxic for waterfowl hunting in the United States. The shot formulation is at least 99.9 percent copper by weight, with a corrosion-inhibiting coating to prevent release of copper into terrestrial or aquatic environments. FWS has reviewed the shot as required under the criteria in the nontoxic shot approval procedures in FWS regulations. FWS' proposed approval of this shot formulation would increase the number of nontoxic shot options for hunters of migratory waterfowl. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. **OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."	~~5/1/17~~ Was on Q3—pushing to 7/14/17
ES	1018-BB34 Listing Determination for the Texas Hornshell 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 8/10/17, settlement agreement.** **What the rule does:** FWS will make a final determination on its proposal to list the Texas hornshell as endangered under the Endangered Species Act. This mussel species is found in freshwater streams in Texas and New Mexico. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703 358-1796,	7/27/17 Was on Q316 – PR New stage

MB	1018-BB73 Migratory Game Bird Hunting Regulations, 2018–19; Supplemental 50 CFR 20	PR	**Significant. Major.** Not court driven. **What the rule does:** Proposes to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. The U.S. Fish and Wildlife Service proposed in an earlier document to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. This supplement to the proposed rule provides the regulatory schedule, announces the Service Migratory Bird Regulations Committee and Flyway Council meetings, and provides Flyway Council recommendations resulting from the Council's March 2017 meetings. **Controversy:** None. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967.	8/15/17
ES	1018-BB76 Removal of the Monito gecko from the Federal List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to remove the Monito gecko from the Federal List of Endangered and Threatened Wildlife due to recovery. The Monito gecko is endemic to the island of Monito, which is located 68 kilometers west of Puerto Rico. This determination is based on a thorough review of the best available scientific and commercial information, which indicates that the threats to this species have been eliminated or reduced to the point that the species no longer meets the definition of an endangered species or a threatened species under the Endangered Species Act. FWS will also make available a post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. ES	1018-BB79 Removal of the Black-Capped Vireo from the Federal List of Endangered and Threatened Wildlife; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove the black-capped vireo, a bird species, from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring (PDM) plan. The black-capped vireo breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states. **Controversy:** A number of public comments opposed the delisting of the black-capped vireo, including one from the Office of Travis County Judge and one from a national park. Those concerns may be reflected in comments FWS receives on the draft PDM. A number of partner agencies have indicated concerns about having the necessary funds to implement the ongoing management needs (e.g., cow-bird removal) and monitoring identified for their lands, which may also result in concerns about the viability of both the delisting and the PDM plan. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review
ES	1018-BB87 Removal of the Gypsum Wild-Buckwheat from the Federal List of Endangered and Threatened Plants; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove *Eriogonum gypsophilum* (gypsum wild-buckwheat, a plant species) from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring plan. The gypsum wild-buckwheat is a regionally endemic perennial plant in New Mexico. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	~~NPRM Q117~~ Not subject to OMB review On Q117 as PR

ES	1018-BC64 Endangered and Threatened Wildlife and Plants; Technical Correction for Tonkin Snub-nosed Monkey 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** We are removing the endangered Tonkin snub-nosed monkey from certain regulations that apply only to primates that are listed as threatened species (50 CFR 17.40). Tonkin snub-nosed monkeys were included in these regulations when this species was listed as threatened. However, this species was reclassified as endangered in 1990. Therefore, the provisions of the regulations for threatened primates no longer apply to Tonkin snub-nosed monkeys, and, accordingly, we are correcting this error in the Code of Federal Regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Janine Van Norman, 703-358-2370	Was Info in table fmt already sent to OMB between Q3 and Q4 of FY17? 7/6/17

Attachments: DRAFT Qtrly Rept FWS Jul-Sep (Q417) streamlined (sorted by RIN) (5-26-17).docx

---

Here is the latest (and hopefully the last) version of the 4th quarter 90-day list. I added BA-54 based on a request from Don Morgan and Jeff Newman - that is the only change from the version I sent you a little while ago. I have uploaded this version to DTS as well. It is the file identified at Streamlined.

I hope everyone has a good weekend.

Tina

Would someone mind printing out the new version and including it in the package? Thank you very much!

As a reminder, Exec Sec wants this by COB on Tuesday. I know that isn't likely to happen, but the sooner we get it moving, the less likely Julie is to yell at you, Charisa.

ES	1018-AZ02 Listing Determination for the Sonoyta Mud Turtle 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/21/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Sonoyta mud turtle as an endangered species under the Endangered Species Act. This turtle is found in freshwater habitats in Arizona, and also Mexico. **Controversy:** This species occurs near the U.S.-Mexico border; however, no conflicts with border activities or potential border wall construction have been identified at this time. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review When was PR on?
ES	1018-AZ38 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Three Hawaiian Big Island Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will designate critical habitat for three plant species on Hawaii Island and correct the maps for existing designations for an additional four species. FWS intends to exclude lands owned or managed by the Queen Liliuokalani Trust, the Department of Hawaiian Homelands, and other private landowners under section 4(b)(2) of the Endangered Species Act. **Controversy:** Resolved. FWS coordinated with the Queen Liliuokalani Trust, landowners, and government jurisdictions, and will exclude lands owned by these entities under section 4(b)(2) of the Act. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	7/7/17 Was on Q1 in same stage
IA	1018-AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant**.** Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Timothy J. Van Norman, 703-358-2350.	9/29/17 Was not on Q3; was on Q217 (Q2 didn't go to OMB)

LE	1018-AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	Not significant. Not major. Not court driven. **Retrospective Regulatory Review action.** **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	~~6/30/17~~ 9/29/17 Was on Q3; pushing to Q4
NWRS	1018-BA31 Nonsubsistence Take of Wildlife, and Public Participation and Closure Procedures, on National Wildlife Refuges in Alaska 50 CFR 32 and 36	FR	Not significant. Not major. Not court driven. **What the rule does:** This final rule published August 5, 2016 (81 FR 52248) and became effective September 6, 2016. The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act, signed by the President on April 3, 2017 (Pub. L. 115–20). This action conforms to Pub. L. 115–20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the final rule was nullified under the Congressional Review Act. **Controversy:** The original rulemaking action was controversial. This action is congressionally directed. **Dates of any briefs provided to EOP:** None. **Contact:** Stephanie Brady, 907-306-7448. **OMB's comments in response to Q317 list:** "Deregulatory action under E.O. 13771. Can we get a briefing/briefing paper (BP) on what the regulations will return to with the overturning of this rule via the Congressional Review Act?" 5/23/17—Got Director's Office clearance to send OES the BP requested by OMB.	~~4/28/17~~ Was on Q3; will stay on Q4—date? *Depends on when template for nullification is ready; SW asking OES*

WSFR	1018-BA33 Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4 50 CFR 80	PR	Not significant. Not major. Not court driven. **What the rule does:** This is the first in a four-phase process for directing State fish and wildlife agencies on how they must receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, FWS distributes annual apportionments to States from trust funds derived from excise tax and fuel tax revenues. This phase would address definitions, requirements for licenses counted for apportionment of Federal financial assistance, program income, and other related issues. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR. **Controversy:** None anticipated. State fish and wildlife agencies, as well as other partners, support this final rule and have been closely involved in its development. **Dates of any briefs provided to EOP:** None. **Contact:** Peter Barlow, 703-358-2119.	~~4/25/17~~ With Exec Sec since Mar 1 Was on Q317; pushing to 7/5/17
WSFR	1018-BA33 Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4 50 CFR 80	FR	Not significant. Not major. Not court driven. **What the rule does:** This is the first in a four-phase process for directing State fish and wildlife agencies on how they must receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, FWS distributes annual apportionments to States from trust funds derived from excise tax and fuel tax revenues. This phase will address definitions, requirements for licenses counted for apportionment of Federal financial assistance, program income, and other related issues. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR. **Controversy:** None anticipated. State fish and wildlife agencies, as well as other partners, support this final rule and have been closely involved in its development. **Dates of any briefs provided to EOP:** None. **Contact:** Peter Barlow, 703-358-2119.	~~6/30/17~~ Was on Q317; pushing to 9/15/17

Program	RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for Review
ES	1018-BA43 Reclassifying the Borax Lake Chub from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Borax Lake chub from endangered to threatened. The primary threats to the species have been ameliorated; however, due to ongoing threats from geothermal development, FWS is proposing to reclassify the species to threatened status rather than delisting it. FWS is also proposing to correct the List of Endangered and Threatened Wildlife to reflect the current scientifically accepted taxonomy of this species as *Siphateles boraxobius* (=*Gila boraxobius*). **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. **OMB's comment in response to Q317 list:** "If the downlisting is accompanied with a reduction in regulatory burden (e.g., an Endangered Species Act section 4d rule), it is a deregulatory action under E.O. 13771."	Not subject to OMB review Was on Q3 in same stage; pushed to Q4 9/15/17
ES	1018-BA54	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS is updating the List of Endangered and Threatened Wildlife in accordance with the Endangered Species Act of 1973, as amended, to correct errors on the List for eight species of wildlife in the "Where Listed" column. The CFR incorrectly identifies some species as being listed only in the U.S. or only outside the U.S, even though the species were originally listed in their entirety and no subsequent rulemaking has altered those original listings. These revisions are editorial in nature and involve no substantive changes to the List, or any applicable regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Was on Q3 in same stage, pushed to Q4 9/15/17

ES	1018-BA80 Removing Textual Descriptions of Critical Habitat Boundaries for Plants on the Hawaiian Islands 50 CFR 17	FR	Not Significant. Not major. Not court driven. **What the rule does:** This rule will remove the textual descriptions of the critical habitat boundaries from certain entries at 50 CFR 17.99 (plants on the Hawaiian Islands) that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease, or in any other way change the critical habitat designations from which we are removing the textual descriptions of boundaries. This action will save taxpayer resources. We are taking this action in accordance with our May 1, 2012, revision of the regulations related to publishing textual descriptions of critical habitat boundaries in the CFR and as part of our response to Executive Order 13563 (January 18, 2011), which directs Federal agencies to review their existing regulations and then to modify or streamline them in accordance with what they have learned. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Carey Galst, 703-358-1954.	8/31/17 First appearance on quarterly report
MB	1018-BB06 Migratory Bird Hunting; Approval of Corrosion-Inhibited Copper Shot as Nontoxic for Waterfowl Hunting 50 CFR 20	PR	Not significant. Not major. Not court driven. **What the rule does:** Environ-Metal, Inc., of Sweet Home, Oregon, has applied for approval of shot composed of copper as nontoxic for waterfowl hunting in the United States. The shot formulation is at least 99.9 percent copper by weight, with a corrosion-inhibiting coating to prevent release of copper into terrestrial or aquatic environments. FWS has reviewed the shot as required under the criteria in the nontoxic shot approval procedures in FWS regulations. FWS' proposed approval of this shot formulation would increase the number of nontoxic shot options for hunters of migratory waterfowl. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. **OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."	~~5/1/17~~ Was on Q3—pushing to 7/14/17

ES	1018-BB76 Removal of the Monito gecko from the Federal List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to remove the Monito gecko from the Federal List of Endangered and Threatened Wildlife due to recovery. The Monito gecko is endemic to the island of Monito, which is located 68 kilometers west of Puerto Rico. This determination is based on a thorough review of the best available scientific and commercial information, which indicates that the threats to this species have been eliminated or reduced to the point that the species no longer meets the definition of an endangered species or a threatened species under the Endangered Species Act. FWS will also make available a post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review First appearance on quarterly report
ES	1018-BB79 Removal of the Black-Capped Vireo from the Federal List of Endangered and Threatened Wildlife; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove the black-capped vireo, a bird species, from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring (PDM) plan. The black-capped vireo breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states. **Controversy:** A number of public comments opposed the delisting of the black-capped vireo, including one from the Office of Travis County Judge and one from a national park. Those concerns may be reflected in comments FWS receives on the draft PDM. A number of partner agencies have indicated concerns about having the necessary funds to implement the ongoing management needs (e.g., cow-bird removal) and monitoring identified for their lands, which may also result in concerns about the viability of both the delisting and the PDM plan. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review

Not major. **Court driven: PR, 9/30/17, settlement agreement.** **What the rule does:** FWS will make a listing determination for Bicknell's thrush under the Endangered Species Act. This migratory songbird is found in the northeastern United States. FWS will, if prudent and determinable, also propose to designate critical habitat for Bicknell's thrush under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/15/17 First appearance on quarterly report
ES	1018-BC44 Listing Determination and Critical Habitat Designation for the Candy Darter 50 CFR 17	PR	Not significant. Not major. **Court driven: PR, 9/30/17, settlement agreement.** **What the rule does:** FWS will make a listing determination for the candy darter under the Endangered Species Act. This fish species is found in Virginia and West Virginia. FWS will, if prudent and determinable, also propose to designate critical habitat for the candy darter under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/15/17 First appearance on quarterly report
ES	1018-BC46 Listing Determination and Critical Habitat Designation for Barbour's Map Turtle 50 CFR 17	PR	Not significant. Not major. **Court driven: PR, 9/30/17, settlement agreement.** **What the rule does:** FWS will make a listing determination for Barbour's map turtle under the Endangered Species Act. This turtle is found in Alabama, Florida, and Georgia. FWS will, if prudent and determinable, also propose to designate critical habitat for Barbour's map turtle under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/15/17 First appearance on quarterly report

ES	1018-BC50 Listing Determinations and Critical Habitat Designations for 14 Southern Nevada Springsnails 50 CFR 17	PR	Not significant. Not major. **Court driven: PR, 9/30/17, settlement agreement for bifid duct pyrg, flag pyrg, hardy pyrg, and Lake Valley pyrg.** **What the rule does:** FWS will make listing determinations for 14 species of springsnails under the Endangered Species Act. These snails are found in Nevada and Utah. FWS will, if prudent and determinable, also propose to designate critical habitat for 14 species of springsnails under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/15/17 First appearance on quarterly report
ES	1018-BC56 Listing Determination and Critical Habitat Designation for the Tinian Monarch 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a listing determination for the Tinian monarch under the Endangered Species Act. This bird species is found in the Northern Mariana Islands. FWS will, if deemed prudent and determinable, also propose to designate critical habitat for the Tinian monarch under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/15/17 First appearance on quarterly report
ES	1018-BC57 Listing Determination and Critical Habitat Designation for the Hermes Copper Butterfly 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a listing determination for the Hermes copper butterfly under the Endangered Species Act. This butterfly is found in California, and is currently a candidate for listing under the Endangered Species Act. FWS will, if prudent and determinable, also propose to designate critical habitat for the Hermes copper butterfly under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/15/17 First appearance on quarterly report

ES	1018-BC59 Listing Determination and Critical Habitat Designation for the San Joaquin Valley Giant Flower-Loving Fly 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a listing determination for the San Joaquin Valley giant flower-loving fly under the Endangered Species Act. This insect species is found in California. FWS will, if prudent and determinable, also propose to designate critical habitat for the San Joaquin Valley giant flower-loving fly under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/15/17 First appearance on quarterly report
ES	1018-BC64 Endangered and Threatened Wildlife and Plants; Technical Correction for Tonkin Snub-nosed Monkey 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** We are removing the endangered Tonkin snub-nosed monkey from certain regulations that apply only to primates that are listed as threatened species (50 CFR 17.40). Tonkin snub-nosed monkeys were included in these regulations when this species was listed as threatened. However, this species was reclassified as endangered in 1990. Therefore, the provisions of the regulations for threatened primates no longer apply to Tonkin snub-nosed monkeys, and, accordingly, we are correcting this error in the Code of Federal Regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Janine Van Norman, 703-358-2370	Was Info in table fmt already sent to OMB between Q3 and Q4 of FY17? 7/6/17

ES	1018-AZ02 Listing Determination for the Sonoyta Mud Turtle 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/21/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Sonoyta mud turtle as an endangered species under the Endangered Species Act. This turtle is found in freshwater habitats in Arizona, and also Mexico. **Controversy:** This species occurs near the U.S.-Mexico border; however, no conflicts with border activities or potential border wall construction have been identified at this time. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review When was PR on?
ES	1018-AZ38 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Three Hawaiian Big Island Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will designate critical habitat for three plant species on Hawaii Island and correct the maps for existing designations for an additional four species. FWS intends to exclude lands owned or managed by the Queen Liliuokalani Trust, the Department of Hawaiian Homelands, and other private landowners under section 4(b)(2) of the Endangered Species Act. **Controversy:** Resolved. FWS coordinated with the Queen Liliuokalani Trust, landowners, and government jurisdictions, and will exclude lands owned by these entities under section 4(b)(2) of the Act. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	7/7/17 Was on Q1 in same stage
IA	1018-AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant**.** Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Timothy J. Van Norman, 703-358-2350.	9/29/17 Was not on Q3; was on Q217 (Q2 didn't go to OMB)

Regulations Ready for Review from July through September 2017 (FY17 Q4)

Program	RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for Review
LE	1018-AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	Not significant. Not major. Not court driven. **Retrospective Regulatory Review action.** **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	~~6/30/17~~ 9/29/17 Was on Q3; pushing to Q4
NWRS	1018-BA31 Nonsubsistence Take of Wildlife, and Public Participation and Closure Procedures, on National Wildlife Refuges in Alaska 50 CFR 32 and 36	FR	Not significant. Not major. Not court driven. **What the rule does:** This final rule published August 5, 2016 (81 FR 52248) and became effective September 6, 2016. The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act, signed by the President on April 3, 2017 (Pub. L. 115–20). This action conforms to Pub. L. 115–20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the final rule was nullified under the Congressional Review Act. **Controversy:** The original rulemaking action was controversial. This action is congressionally directed. **Dates of any briefs provided to EOP:** None. **Contact:** Stephanie Brady, 907-306-7448. **OMB's comments in response to Q317 list:** "Deregulatory action under E.O. 13771. Can we get a briefing/briefing paper (BP) on what the regulations will return to with the overturning of this rule via the Congressional Review Act?" 5/23/17—Got Director's Office clearance to send OES the BP requested by OMB.	~~4/28/17~~ Was on Q3; will stay on Q4—date? *Depends on when template for nullification is ready; SW asking OES*

WSFR	1018-BA33 Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4 50 CFR 80	PR	Not significant. Not major. Not court driven. **What the rule does:** This is the first in a four-phase process for directing State fish and wildlife agencies on how they must receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, FWS distributes annual apportionments to States from trust funds derived from excise tax and fuel tax revenues. This phase would address definitions, requirements for licenses counted for apportionment of Federal financial assistance, program income, and other related issues. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR. **Controversy:** None anticipated. State fish and wildlife agencies, as well as other partners, support this final rule and have been closely involved in its development. **Dates of any briefs provided to EOP:** None. **Contact:** Peter Barlow, 703-358-2119.	~~4/25/17~~ With Exec Sec since Mar 1 Was on Q317; pushing to 7/5/17

ES	1018-BA43 Reclassifying the Borax Lake Chub from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Borax Lake chub from endangered to threatened. The primary threats to the species have been ameliorated; however, due to ongoing threats from geothermal development, FWS is proposing to reclassify the species to threatened status rather than delisting it. FWS is also proposing to correct the List of Endangered and Threatened Wildlife to reflect the current scientifically accepted taxonomy of this species as *Siphateles boraxobius* (=*Gila boraxobius*). **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. **OMB's comment in response to Q317 list:** "If the downlisting is accompanied with a reduction in regulatory burden (e.g., an Endangered Species Act section 4d rule), it is a deregulatory action under E.O. 13771."	Not subject to OMB review Was on Q3 in same stage; pushed to Q4 9/15/17
ES	1018-BA54 Lists of Endangered and Threatened Wildlife and Plants; Corrections of Errors for Descriptions of Listing Locations for Wildlife Species Listed in the United States and Foreign Countries 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS is updating the List of Endangered and Threatened Wildlife in accordance with the Endangered Species Act of 1973, as amended, to correct errors on the List for eight species of wildlife in the "Where Listed" column. The CFR incorrectly identifies some species as being listed only in the U.S. or only outside the U.S, even though the species were originally listed in their entirety and no subsequent rulemaking has altered those original listings. These revisions are editorial in nature and involve no substantive changes to the List, or any applicable regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Was on Q3 in same stage, pushed to Q4 9/15/17

ES	1018-BA74 Listing Determination and Critical Habitat Designation for the Guadalupe Fescue 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/09/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Guadalupe fescue, a grass species found in Texas and Mexico, as an endangered species under the Endangered Species Act. FWS will also make a final determination on the designation of critical habitat for the Guadalupe fescue under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	~~6/30/17~~ 8/18/17 Was on Q3 at same stage (CH under BA75); date pushed ahead
ES	1018-BA78 Listing Determination and Critical Habitat Designation for the Black Warrior Waterdog 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 10/06/17, MDL settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Black Warrior waterdog as an endangered species under the Endangered Species Act. FWS will also make a final determination on the designation of critical habitat for the Black Warrior waterdog under the Endangered Species Act. This salamander species is found in streams in the Black Warrior River Basin in Alabama. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Was on Q316 – PR 9/15/17

Program	RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for Review
ES	1018-BA80 Removing Textual Descriptions of Critical Habitat Boundaries for Plants on the Hawaiian Islands 50 CFR 17	FR	Not Significant. Not major. Not court driven. **What the rule does:** This rule will remove the textual descriptions of the critical habitat boundaries from certain entries at 50 CFR 17.99 (plants on the Hawaiian Islands) that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease, or in any other way change the critical habitat designations from which we are removing the textual descriptions of boundaries. This action will save taxpayer resources. We are taking this action in accordance with our May 1, 2012, revision of the regulations related to publishing textual descriptions of critical habitat boundaries in the CFR and as part of our response to Executive Order 13563 (January 18, 2011), which directs Federal agencies to review their existing regulations and then to modify or streamline them in accordance with what they have learned. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Carey Galst, 703-358-1954.	8/31/17 First appearance on quarterly report
MB	1018-BB06 Migratory Bird Hunting; Approval of Corrosion-Inhibited Copper Shot as Nontoxic for Waterfowl Hunting 50 CFR 20	PR	Not significant. Not major. Not court driven. **What the rule does:** Environ-Metal, Inc., of Sweet Home, Oregon, has applied for approval of shot composed of copper as nontoxic for waterfowl hunting in the United States. The shot formulation is at least 99.9 percent copper by weight, with a corrosion-inhibiting coating to prevent release of copper into terrestrial or aquatic environments. FWS has reviewed the shot as required under the criteria in the nontoxic shot approval procedures in FWS regulations. FWS' proposed approval of this shot formulation would increase the number of nontoxic shot options for hunters of migratory waterfowl. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. **OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."	~~5/1/17~~ Was on Q3—pushing to 7/14/17

ES	1018-BB46 Listing Determination for the Louisiana Pinesnake 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to list the Louisiana pinesnake as a threatened species under the Endangered Species Act. This species is found in open pine forest and longleaf pine savannah in Louisiana and Texas. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Was on Q416 – PR Not subject to OMB review New stage
ES	1018-BB48 Listing Determination for Four Everglades Plants 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 10/11/17, settlement agreement.** **What the rule does:** FWS will make a final listing determination on a proposal to list pineland sandmat, Florida pineland crabgrass, and Everglades bully as threatened species, and Florida prairie-clover as an endangered species under the Endangered Species Act. These plants are found in Florida. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Was on Q416 Not subject to OMB review
ES	1018-BB50 Listing Determination for the Kenk's Amphipod 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/30/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Kenk's amphipod as an endangered species under the Endangered Species Act. This crustacean species is found in freshwater springs in Maryland. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact**: Sarah Quamme, 703-358-1796.	Was on Q416 –PR New Stage Not subject to OMB review

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

Program	RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for Review
ES	1018-BB52 Listing Determination for Two Stoneflies 50 CFR 17	FR	Not significant. Not major. **Court driven: 10/04/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the meltwater lednian stonefly and western glacier stonefly as threatened species. The meltwater lednian stonefly is located in Montana, and the western glacier stonefly is located in Montana and Wyoming. **Controversy:** The State of Wyoming is opposed to listing the western glacier stonefly in Wyoming. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review Was on Q3
ES	1018-BB54 Listing Determination for the I'iwi 50 CFR 17	FR	Not significant. Not major. **Court driven: 9/20/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the i'iwi as a threatened species under the Endangered Species Act. This bird species is found in the Hawaiian Islands. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review Was on Q3 in same stage; pushed to Q4
ES	1018-BB55 Listing Determination for the Pearl Darter 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/21/17, MDL settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the pearl darter as a threatened species under the Endangered Species Act. This fish species is found in freshwater streams of slow to moderate current in Mississippi. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Was on previously, but only as PR? Q416 Not subject to OMB review

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

ES	1018-BB64 Listing Determination for the San Fernando Valley Spineflower 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/15/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the San Fernando Valley spineflower as a threatened species under the Endangered Species Act. This species is found in California. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Was on previously, but only as PR? Q416 Not subject to OMB review
MB	1018-BB73 Migratory Game Bird Hunting Regulations, 2018–19; Supplemental 50 CFR 20	PR	**Significant. Major.** Not court driven. **What the rule does:** Proposes to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. The U.S. Fish and Wildlife Service proposed in an earlier document to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. This supplement to the proposed rule provides the regulatory schedule, announces the Service Migratory Bird Regulations Committee and Flyway Council meetings, and provides Flyway Council recommendations resulting from the Council's March 2017 meetings. **Controversy:** None. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967.	8/15/17

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

Program	RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for Review
ES	1018-BB76 Removal of the Monito gecko from the Federal List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to remove the Monito gecko from the Federal List of Endangered and Threatened Wildlife due to recovery. The Monito gecko is endemic to the island of Monito, which is located 68 kilometers west of Puerto Rico. This determination is based on a thorough review of the best available scientific and commercial information, which indicates that the threats to this species have been eliminated or reduced to the point that the species no longer meets the definition of an endangered species or a threatened species under the Endangered Species Act. FWS will also make available a post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review First appearance on quarterly report
ES	1018-BB79 Removal of the Black-Capped Vireo from the Federal List of Endangered and Threatened Wildlife; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove the black-capped vireo, a bird species, from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring (PDM) plan. The black-capped vireo breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states. **Controversy:** A number of public comments opposed the delisting of the black-capped vireo, including one from the Office of Travis County Judge and one from a national park. Those concerns may be reflected in comments FWS receives on the draft PDM. A number of partner agencies have indicated concerns about having the necessary funds to implement the ongoing management needs (e.g., cow-bird removal) and monitoring identified for their lands, which may also result in concerns about the viability of both the delisting and the PDM plan. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

This insect species is found in California. FWS will, if prudent and determinable, also propose to designate critical habitat for the San Joaquin Valley giant flower-loving fly under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/15/17 First appearance on quarterly report
ES	1018-BC64 Endangered and Threatened Wildlife and Plants; Technical Correction for Tonkin Snub-nosed Monkey 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** We are removing the endangered Tonkin snub-nosed monkey from certain regulations that apply only to primates that are listed as threatened species (50 CFR 17.40). Tonkin snub-nosed monkeys were included in these regulations when this species was listed as threatened. However, this species was reclassified as endangered in 1990. Therefore, the provisions of the regulations for threatened primates no longer apply to Tonkin snub-nosed monkeys, and, accordingly, we are correcting this error in the Code of Federal Regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Janine Van Norman, 703-358-2370	Was Info in table fmt already sent to OMB between Q3 and Q4 of FY17? 7/6/17

Not court driven. **What the rule does:** FWS will make a final determination on a proposal to delist the eastern cougar, formerly found in eastern North America, due to extinction. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Was on Q3 in same stage; pushed to Q4 9/1/17
WSFR	1018-AY75 Multi-Year Hunting and Fishing License Certification for the Wildlife and Sport Fish Restoration Program 50 CFR 80	~~PR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS proposes to make technical changes to FWS regulations that implement the Pittman-Robertson Wildlife Restoration Act and the Dingell-Johnson Sport Fish Restoration Act. The updates would align the regulations' language with terms used at 2 CFR 200, "Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards," and include other clarifying changes.~~ ~~**Controversy:** None anticipated. State fish and wildlife agencies as well as other partners support this proposed rule and have been closely involved in its development.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Peter Barlow, 703-358-2119.~~	~~6/30/17~~ Was on Q3; program says remove
ES	1018-AZ02 Listing Determination for the Sonoyta Mud Turtle 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/21/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Sonoyta mud turtle as an endangered species under the Endangered Species Act. This turtle is found in freshwater habitats in Arizona, and also Mexico. **Controversy:** This species occurs near the U.S.-Mexico border; however, no conflicts with border activities or potential border wall construction have been identified at this time. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review When was PR on?

ES	1018-AZ38 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Three Hawaiian Big Island Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will designate critical habitat for three plant species on Hawaii Island and correct the maps for existing designations for an additional four species. FWS intends to exclude lands owned or managed by the Queen Liliuokalani Trust, the Department of Hawaiian Homelands, and other private landowners under section 4(b)(2) of the Endangered Species Act. **Controversy:** Resolved. FWS coordinated with the Queen Liliuokalani Trust, landowners, and government jurisdictions, and will exclude lands owned by these entities under section 4(b)(2) of the Act. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	7/7/17 Was on Q1 in same stage
IA	1018-AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant**.** Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Timothy J. Van Norman, 703-358-2350.	9/29/17 Was not on Q3; was on Q217 (Q2 didn't go to OMB)

MB	1018-AZ69 Migratory Bird Permits; Control Order for Introduced Migratory Bird Species in Hawaii (Cattle Egrets and Barn Owls) 50 CFR 21	~~FR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** This rule will add a control order to apply to cattle egrets and barn owls, two introduced and invasive migratory bird species in Hawaii. The ranges of both species have expanded to occupy all of the Hawaiian islands. Both species have been found to prey on endemic endangered or threatened species. Without this order, control of the two species would require issuing depredation permits, which would add to State and Federal agency costs for control activities that will benefit listed species.~~ ~~**Controversy:** None.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Jerry Thompson (703) 358-2016.~~ ~~**OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."~~	~~4/21/17~~ Was on Q3—removing because this is currently in Exec Sec and we expect it to clear prior to Q4
LE	1018-AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	Not significant. Not major. Not court driven. **Retrospective Regulatory Review action.** **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	~~6/30/17~~ 9/29/17 Was on Q3; pushing to Q4

NWRS	1018-BA31 Nonsubsistence Take of Wildlife, and Public Participation and Closure Procedures, on National Wildlife Refuges in Alaska 50 CFR 32 and 36	FR	Not significant. Not major. Not court driven. **What the rule does:** This final rule published August 5, 2016 (81 FR 52248) and became effective September 6, 2016. The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act, signed by the President on April 3, 2017 (Pub. L. 115–20). This action conforms to Pub. L. 115–20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the final rule was nullified under the Congressional Review Act. **Controversy:** The original rulemaking action was controversial. This action is congressionally directed. **Dates of any briefs provided to EOP:** None. **Contact:** Stephanie Brady, 907-306-7448. **OMB's comments in response to Q317 list:** "Deregulatory action under E.O. 13771. Can we get a briefing/briefing paper (BP) on what the regulations will return to with the overturning of this rule via the Congressional Review Act?" 5/23/17—Got Director's Office clearance to send OES the BP requested by OMB.	~~4/28/17~~ Was on Q3; will stay on Q4—date? *Depends on when template for nullification is ready; SW asking OES*
WSFR	1018-BA33 Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4 50 CFR 80	PR	Not significant. Not major. Not court driven. **What the rule does:** This is the first in a four-phase process for directing State fish and wildlife agencies on how they must receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, FWS distributes annual apportionments to States from trust funds derived from excise tax and fuel tax revenues. This phase would address definitions, requirements for licenses counted for apportionment of Federal financial assistance, program income, and other related issues. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR. **Controversy:** None anticipated. State fish and wildlife agencies, as well as other partners, support this final rule and have been closely involved in its development. **Dates of any briefs provided to EOP:** None. **Contact:** Peter Barlow, 703-358-2119.	~~4/25/17~~ With Exec Sec since Mar 1 Was on Q317; pushing to 7/5/17

ES	1018-BA43 Reclassifying the Borax Lake Chub from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Borax Lake chub from endangered to threatened. The primary threats to the species have been ameliorated; however, due to ongoing threats from geothermal development, FWS is proposing to reclassify the species to threatened status rather than delisting it. FWS is also proposing to correct the List of Endangered and Threatened Wildlife to reflect the current scientifically accepted taxonomy of this species as *Siphateles boraxobius* (=*Gila boraxobius*). **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. **OMB's comment in response to Q317 list:** "If the downlisting is accompanied with a reduction in regulatory burden (e.g., an Endangered Species Act section 4d rule), it is a deregulatory action under E.O. 13771."	Not subject to OMB review Was on Q3 in same stage; pushed to Q4 9/15/17
ES	1018-BA54 Lists of Endangered and Threatened Wildlife and Plants; Corrections of Errors for Descriptions of Listing Locations for Wildlife Species Listed in the United States and Foreign Countries 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS is updating the List of Endangered and Threatened Wildlife in accordance with the Endangered Species Act of 1973, as amended, to correct errors on the List for eight species of wildlife in the "Where Listed" column. The CFR incorrectly identifies some species as being listed only in the U.S. or only outside the U.S, even though the species were originally listed in their entirety and no subsequent rulemaking has altered those original listings. These revisions are editorial in nature and involve no substantive changes to the List, or any applicable regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Was on Q3 in same stage; pushed to Q4 9/15/17

ES	1018-BA80 Removing Textual Descriptions of Critical Habitat Boundaries for Plants on the Hawaiian Islands 50 CFR 17	FR	Not Significant. Not major. Not court driven. **What the rule does:** This rule will remove the textual descriptions of the critical habitat boundaries from certain entries at 50 CFR 17.99 (plants on the Hawaiian Islands) that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease, or in any other way change the critical habitat designations from which we are removing the textual descriptions of boundaries. This action will save taxpayer resources. We are taking this action in accordance with our May 1, 2012, revision of the regulations related to publishing textual descriptions of critical habitat boundaries in the CFR and as part of our response to Executive Order 13563 (January 18, 2011), which directs Federal agencies to review their existing regulations and then to modify or streamline them in accordance with what they have learned. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Carey Galst, 703-358-1954.	8/31/17 First appearance on quarterly report
MB	1018-BB06 Migratory Bird Hunting; Approval of Corrosion-Inhibited Copper Shot as Nontoxic for Waterfowl Hunting 50 CFR 20	PR	Not significant. Not major. Not court driven. **What the rule does:** Environ-Metal, Inc., of Sweet Home, Oregon, has applied for approval of shot composed of copper as nontoxic for waterfowl hunting in the United States. The shot formulation is at least 99.9 percent copper by weight, with a corrosion-inhibiting coating to prevent release of copper into terrestrial or aquatic environments. FWS has reviewed the shot as required under the criteria in the nontoxic shot approval procedures in FWS regulations. FWS' proposed approval of this shot formulation would increase the number of nontoxic shot options for hunters of migratory waterfowl. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. **OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."	~~5/1/17~~ Was on Q3—pushing to 7/14/17

~~MB~~	~~1018-BB71~~ ~~Migratory Bird Subsistence in Alaska; Harvest Regulations for Migratory Birds in Alaska during the 2017 Season~~ ~~50 CFR 92~~	~~FR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS promulgates subsistence harvest regulations for migratory birds for the 2017 season in Alaska. These regulations enable the continuation of customary and traditional subsistence uses of migratory birds in Alaska and prescribe regional information on when and where the harvesting of birds may occur. These regulations are developed under a co-management process involving the FWS, the Alaska Department of Fish and Game, and Alaska Native representatives.~~ ~~**Controversy:** None anticipated.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Donna Dewhurst, 907-786-3499.~~	~~4/21/17~~ Removed; FR published April 4, 2017 https://www.fws.gov/policy/library/2017/2017-06592.pdf
MB	1018-BB73 Migratory Game Bird Hunting Regulations, 2018–19 50 CFR 20	~~PR~~	~~**Significant. Major.** Not court driven.~~ ~~**What the rule does:** This rule proposes to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. FWS annually prescribes outside limits (frameworks) within which States may select hunting seasons. This proposed rule provides the regulatory schedule, describes the proposed regulatory alternatives for the 2018–19 duck hunting seasons, requests proposals from Indian tribes that wish to establish special migratory game bird hunting regulations on Federal Indian reservations and ceded lands, and requests proposals for the 2019 spring and summer migratory bird subsistence season in Alaska. Migratory game bird hunting seasons provide opportunities for recreation and sustenance; aid Federal, State, and tribal governments in the management of migratory game birds; and permit harvests at levels compatible with migratory game bird population status and habitat conditions.~~ ~~**Controversy:** None.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Ron Kokel, 703-358-1967.~~	~~6/1/17~~ Was on Q3—removing because this is currently in SOL for review and we expect it to clear prior to Q4

MB	1018-BB73 Migratory Game Bird Hunting Regulations, 2018–19; Supplemental 50 CFR 20	PR	**Significant. Major.** Not court driven. **What the rule does:** Proposes to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. The U.S. Fish and Wildlife Service proposed in an earlier document to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. This supplement to the proposed rule provides the regulatory schedule, announces the Service Migratory Bird Regulations Committee and Flyway Council meetings, and provides Flyway Council recommendations resulting from the Council's March 2017 meetings. **Controversy:** None. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967.	8/15/17
NWRS	1018-BB75 Refuge-Specific Hunting and Sport Fishing Regulations, 2017–18 50 CFR 32	~~PR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS is proposing to make additions to refuge-specific regulations for the 2017–18 hunting and sport fishing season. This action is part of an annual update for the National Wildlife Refuge System that ensures adequate public notice of openings and changes. FWS operates hunting and fishing programs on refuges to implement the National Wildlife Refuge System Improvement Act of 1997 directives to facilitate compatible priority wildlife-dependent recreational opportunities.~~ ~~**Controversy:** Medium. Some oppose hunting on National Wildlife Refuges. However, failure to have regulations in place will cause issue/controversy with hunters.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Aaron Mize, 703-358-2678.~~ ~~**OMB's comment on Q317 list:** "We would like additional information on what the additional costs there may be for the FWS associated with opening additional refuges for fishing and hunting." 5/23/17 – Got Director's Office clearance to send OES the BP requested by OMB.~~	~~5/19/17~~ Was on Q3—removing because we except it to go to FR before Q4

ES	1018-BB76 Removal of the Monito gecko from the Federal List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to remove the Monito gecko from the Federal List of Endangered and Threatened Wildlife due to recovery. The Monito gecko is endemic to the island of Monito, which is located 68 kilometers west of Puerto Rico. This determination is based on a thorough review of the best available scientific and commercial information, which indicates that the threats to this species have been eliminated or reduced to the point that the species no longer meets the definition of an endangered species or a threatened species under the Endangered Species Act. FWS will also make available a post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review First appearance on quarterly report
ES	1018-BB79 Removal of the Black-Capped Vireo from the Federal List of Endangered and Threatened Wildlife; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove the black-capped vireo, a bird species, from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring (PDM) plan. The black-capped vireo breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states. **Controversy:** A number of public comments opposed the delisting of the black-capped vireo, including one from the Office of Travis County Judge and one from a national park. Those concerns may be reflected in comments FWS receives on the draft PDM. A number of partner agencies have indicated concerns about having the necessary funds to implement the ongoing management needs (e.g., cow-bird removal) and monitoring identified for their lands, which may also result in concerns about the viability of both the delisting and the PDM plan. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review

ES	1018-BB98 Endangered and Threatened Wildlife and Plants; Nonessential Experimental Population of Red Wolves in North Carolina 50 CFR 17	~~AN~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS will prepare a draft environmental impact statement (EIS) in conjunction with development of a revised rule for the nonessential experimental population (NEP) of red wolves (*Canis rufus*) in North Carolina. Improved management of the NEP is needed to benefit the species, so FWS plans to change the NEP's size, scope, and management. FWS will initiate a public scoping process to engage governments, stakeholders, and the public in developing a proposed rule and associated EIS.~~ ~~**Controversy:** FWS anticipates both support and opposition to the proposed revisions. The North Carolina Wildlife Resources Commission recognizes the need to improve management of the NEP, and FWS will engage the Commission in drafting the proposed rule and EIS. FWS anticipates opposition from several members of Congress, nongovernmental organizations, and the public due to a perceived abandonment of management of red wolves in the wild.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Don Morgan, 703-358-2444.~~	~~4/30/17~~ Was on Q3; ANPR published 5/23/17 https://www.fws.gov/policy/library/2017/2017-10551.pdf
AK Sub	1018-BB99 Subsistence Management Regulations for Public Lands in Alaska; Subsistence Taking of Fish; Cook Inlet Area 50 CFR 100; 36 CFR 242	~~PR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS will propose to revise the regulations for seasons, harvest limits, methods and means for the subsistence taking of fish in the Cook Inlet of Alaska. This action would also reorganize specific regulations addressing the Kenai River, which would provide clarity for the public and allow the Federal Subsistence Board to correct regulatory conflicts that have arisen based on recent rulemaking. (This is a joint rulemaking between DOI/FWS and USDA/Forest Service.)~~ ~~**Controversy:** Senator Murkowski and Representative Young have expressed interest in this issue in the past; however, they have not recently contacted FWS about this issue.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Theo Matuskowitz, 907-786-3867.~~	~~5/15/17~~ Was on Q3 same stage; will publish before Q4

ES	1018-BC64 Endangered and Threatened Wildlife and Plants; Technical Correction for Tonkin Snub-nosed Monkey 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** We are removing the endangered Tonkin snub-nosed monkey from certain regulations that apply only to primates that are listed as threatened species (50 CFR 17.40). Tonkin snub-nosed monkeys were included in these regulations when this species was listed as threatened. However, this species was reclassified as endangered in 1990. Therefore, the provisions of the regulations for threatened primates no longer apply to Tonkin snub-nosed monkeys, and, accordingly, we are correcting this error in the Code of Federal Regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Janine Van Norman, 703-358-2370	Was Info in table fmt sent to OMB between Q3 and Q4 of FY17? 7/6/17

ES	1018-AZ38 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Three Hawaiian Big Island Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will designate critical habitat for three plant species on Hawaii Island and correct the maps for existing designations for an additional four species. FWS intends to exclude lands owned or managed by the Queen Liliuokalani Trust, the Department of Hawaiian Homelands, and other private landowners under section 4(b)(2) of the Endangered Species Act. **Controversy:** Resolved. FWS coordinated with the Queen Liliuokalani Trust, landowners, and government jurisdictions, and will exclude lands owned by these entities under section 4(b)(2) of the Act. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	7/7/17 Was on Q1 in same stage
IA	1018-AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant**.** Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Timothy J. Van Norman, 703-358-2350.	9/29/17 Was not on Q3; was on Q217 (Q2 didn't go to OMB)

MB	1018-AZ69 Migratory Bird Permits; Control Order for Introduced Migratory Bird Species in Hawaii (Cattle Egrets and Barn Owls) 50 CFR 21	~~FR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** This rule will add a control order to apply to cattle egrets and barn owls, two introduced and invasive migratory bird species in Hawaii. The ranges of both species have expanded to occupy all of the Hawaiian islands. Both species have been found to prey on endemic endangered or threatened species. Without this order, control of the two species would require issuing depredation permits, which would add to State and Federal agency costs for control activities that will benefit listed species.~~ ~~**Controversy:** None.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Jerry Thompson (703) 358-2016.~~ ~~**OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."~~	~~4/21/17~~ Was on Q3—removing because this is currently in Exec Sec and we expect it to clear prior to Q4
LE	1018-AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	Not significant. Not major. Not court driven. **Retrospective Regulatory Review action.** **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	~~6/30/17~~ 9/29/17 Was on Q3; pushing to Q4

NWRS	1018-BA31 Nonsubsistence Take of Wildlife, and Public Participation and Closure Procedures, on National Wildlife Refuges in Alaska 50 CFR 32 and 36	FR	Not significant. Not major. Not court driven. **What the rule does:** This final rule published August 5, 2016 (81 FR 52248) and became effective September 6, 2016. The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act, signed by the President on April 3, 2017 (Pub. L. 115–20). This action conforms to Pub. L. 115–20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the final rule was nullified under the Congressional Review Act. **Controversy:** The original rulemaking action was controversial. This action is congressionally directed. **Dates of any briefs provided to EOP:** None. **Contact:** Stephanie Brady, 907-306-7448. **OMB's comments in response to Q317 list:** "Deregulatory action under E.O. 13771. Can we get a briefing/briefing paper (BP) on what the regulations will return to with the overturning of this rule via the Congressional Review Act?" 5/23/17—Got Director's Office clearance to send OES the BP requested by OMB.	~~4/28/17~~ Was on Q3; will stay on Q4—date? *Depends on when template for nullification is ready; SW asking OES*
WSFR	1018-BA33 Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4 50 CFR 80	PR	Not significant. Not major. Not court driven. **What the rule does:** This is the first in a four-phase process for directing State fish and wildlife agencies on how they must receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, FWS distributes annual apportionments to States from trust funds derived from excise tax and fuel tax revenues. This phase would address definitions, requirements for licenses counted for apportionment of Federal financial assistance, program income, and other related issues. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR. **Controversy:** None anticipated. State fish and wildlife agencies, as well as other partners, support this final rule and have been closely involved in its development. **Dates of any briefs provided to EOP:** None. **Contact:** Peter Barlow, 703-358-2119.	~~4/25/17~~ With Exec Sec since Mar 1 Was on Q317; pushing to 7/5/17

ES	1018-BA43 Reclassifying the Borax Lake Chub from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Borax Lake chub from endangered to threatened. The primary threats to the species have been ameliorated; however, due to ongoing threats from geothermal development, FWS is proposing to reclassify the species to threatened status rather than delisting it. FWS is also proposing to correct the List of Endangered and Threatened Wildlife to reflect the current scientifically accepted taxonomy of this species as *Siphateles boraxobius* (=*Gila boraxobius*). **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. **OMB's comment in response to Q317 list:** "If the downlisting is accompanied with a reduction in regulatory burden (e.g., an Endangered Species Act section 4d rule), it is a deregulatory action under E.O. 13771."	Not subject to OMB review Was on Q3 in same stage; pushed to Q4 9/15/17
ES	1018-BA54 Lists of Endangered and Threatened Wildlife and Plants; Corrections of Errors for Descriptions of Listing Locations for Wildlife Species Listed in the United States and Foreign Countries 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS is updating the List of Endangered and Threatened Wildlife in accordance with the Endangered Species Act of 1973, as amended, to correct errors on the List for eight species of wildlife in the "Where Listed" column. The CFR incorrectly identifies some species as being listed only in the U.S. or only outside the U.S, even though the species were originally listed in their entirety and no subsequent rulemaking has altered those original listings. These revisions are editorial in nature and involve no substantive changes to the List, or any applicable regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Was on Q3 in same stage; pushed to Q4 9/15/17

ES	1018-BA80 Removing Textual Descriptions of Critical Habitat Boundaries for Plants on the Hawaiian Islands 50 CFR 17	FR	Not Significant. Not major. Not court driven. **What the rule does:** This rule will remove the textual descriptions of the critical habitat boundaries from certain entries at 50 CFR 17.99 (plants on the Hawaiian Islands) that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease, or in any other way change the critical habitat designations from which we are removing the textual descriptions of boundaries. This action will save taxpayer resources. We are taking this action in accordance with our May 1, 2012, revision of the regulations related to publishing textual descriptions of critical habitat boundaries in the CFR and as part of our response to Executive Order 13563 (January 18, 2011), which directs Federal agencies to review their existing regulations and then to modify or streamline them in accordance with what they have learned. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Carey Galst, 703-358-1954.	8/31/17 First appearance on quarterly report
MB	1018-BB06 Migratory Bird Hunting; Approval of Corrosion-Inhibited Copper Shot as Nontoxic for Waterfowl Hunting 50 CFR 20	PR	Not significant. Not major. Not court driven. **What the rule does:** Environ-Metal, Inc., of Sweet Home, Oregon, has applied for approval of shot composed of copper as nontoxic for waterfowl hunting in the United States. The shot formulation is at least 99.9 percent copper by weight, with a corrosion-inhibiting coating to prevent release of copper into terrestrial or aquatic environments. FWS has reviewed the shot as required under the criteria in the nontoxic shot approval procedures in FWS regulations. FWS' proposed approval of this shot formulation would increase the number of nontoxic shot options for hunters of migratory waterfowl. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. **OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."	~~5/1/17~~ Was on Q3—pushing to 7/14/17

MB	1018-BB40 Migratory Bird Hunting; Final Frameworks for Migratory Bird Hunting Regulations for the 2017–18 Season 50 CFR 20	~~FR~~	~~**Significant. Major.** Not court driven.~~ ~~**What the rule does:** FWS is establishing the 2017–18 season hunting regulations for certain migratory game birds. FWS annually prescribes frameworks, or outer limits, for dates and times when hunting may occur, and the number of birds that may be taken and possessed in hunting seasons. These frameworks are necessary to allow State selections of seasons and limits and to allow recreational harvest at levels compatible with population and habitat conditions.~~ ~~**Controversy:** None anticipated.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Ron Kokel, 703-358-1967.~~ ~~Note: 1018-BB40, at the stage of the proposed frameworks (proposed rule), received an exemption from OMB under 4(C) of EO 13711 to publish without two accompanying deregulatory actions.~~	~~5/1/17~~ Was on Q3—Removing because this cleared OMB for publication
MB	1018-BB40 Migratory Bird Hunting; Seasons and Bag and Possession Limits for Certain Migratory Game Birds for the 2017–18 Season 50 CFR 20	~~FR~~	~~**Significant. Major.** Not court driven.~~ ~~**What the rule does:** This rule prescribes the hunting seasons, hours, areas, and daily bag and possession limits for migratory game bird seasons. Taking of migratory birds is prohibited unless specifically provided for by annual regulations. This rule permits the taking of designated species during the 2017–18 season.~~ ~~**Controversy:** None anticipated.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Ron Kokel (703) 358-1967.~~ ~~Note: 1018-BB40, at the stage of the proposed frameworks (proposed rule), received an exemption from OMB under 4(C) of EO 13711 to publish without 2 accompanying deregulatory actions.~~	~~6/1/17~~ Was on Q3—removing because we expect it to clear prior to Q4

~~MB~~	~~1018-BB71~~ ~~Migratory Bird Subsistence in Alaska; Harvest Regulations for Migratory Birds in Alaska during the 2017 Season~~ ~~50 CFR 92~~	~~FR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS promulgates subsistence harvest regulations for migratory birds for the 2017 season in Alaska. These regulations enable the continuation of customary and traditional subsistence uses of migratory birds in Alaska and prescribe regional information on when and where the harvesting of birds may occur. These regulations are developed under a co-management process involving the FWS, the Alaska Department of Fish and Game, and Alaska Native representatives.~~ ~~**Controversy:** None anticipated.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Donna Dewhurst, 907-786-3499.~~	~~4/21/17~~ Removed; FR published April 4, 2017 https://www.fws.gov/policy/library/2017/2017-06592.pdf
MB	1018-BB73 Migratory Game Bird Hunting Regulations, 2018–19 50 CFR 20	~~PR~~	~~**Significant. Major.** Not court driven.~~ ~~**What the rule does:** This rule proposes to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. FWS annually prescribes outside limits (frameworks) within which States may select hunting seasons. This proposed rule provides the regulatory schedule, describes the proposed regulatory alternatives for the 2018–19 duck hunting seasons, requests proposals from Indian tribes that wish to establish special migratory game bird hunting regulations on Federal Indian reservations and ceded lands, and requests proposals for the 2019 spring and summer migratory bird subsistence season in Alaska. Migratory game bird hunting seasons provide opportunities for recreation and sustenance; aid Federal, State, and tribal governments in the management of migratory game birds; and permit harvests at levels compatible with migratory game bird population status and habitat conditions.~~ ~~**Controversy:** None.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Ron Kokel, 703-358-1967.~~	~~6/1/17~~ Was on Q3—removing because this is currently in SOL for review and we expect it to clear prior to Q4

MB	1018-BB73 Migratory Game Bird Hunting Regulations, 2018–19; Supplemental 50 CFR 20	PR	**Significant. Major.** Not court driven. **What the rule does:** Proposes to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. The U.S. Fish and Wildlife Service proposed in an earlier document to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. This supplement to the proposed rule provides the regulatory schedule, announces the Service Migratory Bird Regulations Committee and Flyway Council meetings, and provides Flyway Council recommendations resulting from the Council's March 2017 meetings. **Controversy:** None. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967.	8/15/17
NWRS	1018-BB75 Refuge-Specific Hunting and Sport Fishing Regulations, 2017–18 50 CFR 32	~~PR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS is proposing to make additions to refuge-specific regulations for the 2017–18 hunting and sport fishing season. This action is part of an annual update for the National Wildlife Refuge System that ensures adequate public notice of openings and changes. FWS operates hunting and fishing programs on refuges to implement the National Wildlife Refuge System Improvement Act of 1997 directives to facilitate compatible priority wildlife-dependent recreational opportunities.~~ ~~**Controversy:** Medium. Some oppose hunting on National Wildlife Refuges. However, failure to have regulations in place will cause issue/controversy with hunters.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Aaron Mize, 703-358-2678.~~ ~~**OMB's comment on Q317 list:** "We would like additional information on what the additional costs there may be for the FWS associated with opening additional refuges for fishing and hunting." 5/23/17 – Got Director's Office clearance to send OES the BP requested by OMB.~~	~~5/19/17~~ Was on Q3—removing because we except it to go to FR before Q4

ES	1018-BB76 Removal of the Monito gecko from the Federal List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to remove the Monito gecko from the Federal List of Endangered and Threatened Wildlife due to recovery. The Monito gecko is endemic to the island of Monito, which is located 68 kilometers west of Puerto Rico. This determination is based on a thorough review of the best available scientific and commercial information, which indicates that the threats to this species have been eliminated or reduced to the point that the species no longer meets the definition of an endangered species or a threatened species under the Endangered Species Act. FWS will also make available a post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review First appearance on quarterly report
ES	1018-BB79 Removal of the Black-Capped Vireo from the Federal List of Endangered and Threatened Wildlife; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove the black-capped vireo, a bird species, from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring (PDM) plan. The black-capped vireo breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states. **Controversy:** A number of public comments opposed the delisting of the black-capped vireo, including one from the Office of Travis County Judge and one from a national park. Those concerns may be reflected in comments FWS receives on the draft PDM. A number of partner agencies have indicated concerns about having the necessary funds to implement the ongoing management needs (e.g., cow-bird removal) and monitoring identified for their lands, which may also result in concerns about the viability of both the delisting and the PDM plan. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review

ES	1018-BB98 Endangered and Threatened Wildlife and Plants; Nonessential Experimental Population of Red Wolves in North Carolina 50 CFR 17	~~AN~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS will prepare a draft environmental impact statement (EIS) in conjunction with development of a revised rule for the nonessential experimental population (NEP) of red wolves (*Canis rufus*) in North Carolina. Improved management of the NEP is needed to benefit the species, so FWS plans to change the NEP's size, scope, and management. FWS will initiate a public scoping process to engage governments, stakeholders, and the public in developing a proposed rule and associated EIS.~~ ~~**Controversy:** FWS anticipates both support and opposition to the proposed revisions. The North Carolina Wildlife Resources Commission recognizes the need to improve management of the NEP, and FWS will engage the Commission in drafting the proposed rule and EIS. FWS anticipates opposition from several members of Congress, nongovernmental organizations, and the public due to a perceived abandonment of management of red wolves in the wild.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Don Morgan, 703-358-2444.~~	~~4/30/17~~ Was on Q3; ANPR published 5/23/17 https://www.fws.gov/policy/library/2017/2017-10551.pdf
AK Sub	1018-BB99 Subsistence Management Regulations for Public Lands in Alaska; Subsistence Taking of Fish; Cook Inlet Area 50 CFR 100; 36 CFR 242	~~PR~~	~~Not significant. Not major. Not court driven.~~ ~~**What the rule does:** FWS will propose to revise the regulations for seasons, harvest limits, methods and means for the subsistence taking of fish in the Cook Inlet of Alaska. This action would also reorganize specific regulations addressing the Kenai River, which would provide clarity for the public and allow the Federal Subsistence Board to correct regulatory conflicts that have arisen based on recent rulemaking. (This is a joint rulemaking between DOI/FWS and USDA/Forest Service.)~~ ~~**Controversy:** Senator Murkowski and Representative Young have expressed interest in this issue in the past; however, they have not recently contacted FWS about this issue.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Theo Matuskowitz, 907-786-3867.~~	~~5/15/17~~ Was on Q3 same stage; will publish before Q4

ES	1018-BC64 Endangered and Threatened Wildlife and Plants; Technical Correction for Tonkin Snub-nosed Monkey 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** We are removing the endangered Tonkin snub-nosed monkey from certain regulations that apply only to primates that are listed as threatened species (50 CFR 17.40). Tonkin snub-nosed monkeys were included in these regulations when this species was listed as threatened. However, this species was reclassified as endangered in 1990. Therefore, the provisions of the regulations for threatened primates no longer apply to Tonkin snub-nosed monkeys, and, accordingly, we are correcting this error in the Code of Federal Regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Janine Van Norman, 703-358-2370	Was Info in table fmt sent to OMB between Q3 and Q4 of FY17? 7/6/17

ES	1018-AZ02 Listing Determination for the Sonoyta Mud Turtle 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/21/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Sonoyta mud turtle as an endangered species under the Endangered Species Act. This turtle is found in freshwater habitats in Arizona, and also Mexico. **Controversy:** This species occurs near the U.S.-Mexico border; however, no conflicts with border activities or potential border wall construction have been identified at this time. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review When was PR on?
ES	1018-AZ38 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Three Hawaiian Big Island Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will designate critical habitat for three plant species on Hawaii Island and correct the maps for existing designations for an additional four species. FWS intends to exclude lands owned or managed by the Queen Liliuokalani Trust, the Department of Hawaiian Homelands, and other private landowners under section 4(b)(2) of the Endangered Species Act. **Controversy:** Resolved. FWS coordinated with the Queen Liliuokalani Trust, landowners, and government jurisdictions, and will exclude lands owned by these entities under section 4(b)(2) of the Act. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	7/7/17 Was on Q1 in same stage
IA	1018-AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant**.** Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Timothy J. Van Norman, 703-358-2350.	9/29/17 Was not on Q3; was on Q217 (Q2 didn't go to OMB)

LE	1018-AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	Not significant. Not major. Not court driven. **Retrospective Regulatory Review action.** **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	~~6/30/17~~ 9/29/17 Was on Q3; pushing to Q4
NWRS	1018-BA31 Nonsubsistence Take of Wildlife, and Public Participation and Closure Procedures, on National Wildlife Refuges in Alaska 50 CFR 32 and 36	FR	Not significant. Not major. Not court driven. **What the rule does:** This final rule published August 5, 2016 (81 FR 52248) and became effective September 6, 2016. The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act, signed by the President on April 3, 2017 (Pub. L. 115–20). This action conforms to Pub. L. 115–20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the final rule was nullified under the Congressional Review Act. **Controversy:** The original rulemaking action was controversial. This action is congressionally directed. **Dates of any briefs provided to EOP:** None. **Contact:** Stephanie Brady, 907-306-7448. **OMB's comments in response to Q317 list:** "Deregulatory action under E.O. 13771. Can we get a briefing/briefing paper (BP) on what the regulations will return to with the overturning of this rule via the Congressional Review Act?" 5/23/17—Got Director's Office clearance to send OES the BP requested by OMB.	~~4/28/17~~ Was on Q3; will stay on Q4—date? *Depends on when template for nullification is ready; SW asking OES*

ES	1018-BA43 Reclassifying the Borax Lake Chub from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Borax Lake chub from endangered to threatened. The primary threats to the species have been ameliorated; however, due to ongoing threats from geothermal development, FWS is proposing to reclassify the species to threatened status rather than delisting it. FWS is also proposing to correct the List of Endangered and Threatened Wildlife to reflect the current scientifically accepted taxonomy of this species as *Siphateles boraxobius* (=*Gila boraxobius*). **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. **OMB's comment in response to Q317 list:** "If the downlisting is accompanied with a reduction in regulatory burden (e.g., an Endangered Species Act section 4d rule), it is a deregulatory action under E.O. 13771."	Not subject to OMB review Was on Q3 in same stage; pushed to Q4 9/15/17
ES	1018-BA54	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS is updating the List of Endangered and Threatened Wildlife in accordance with the Endangered Species Act of 1973, as amended, to correct errors on the List for eight species of wildlife in the "Where Listed" column. The CFR incorrectly identifies some species as being listed only in the U.S. or only outside the U.S, even though the species were originally listed in their entirety and no subsequent rulemaking has altered those original listings. These revisions are editorial in nature and involve no substantive changes to the List, or any applicable regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Was on Q3 in same stage, pushed to Q4 9/15/17

ES	1018-BA80 Removing Textual Descriptions of Critical Habitat Boundaries for Plants on the Hawaiian Islands 50 CFR 17	FR	Not Significant. Not major. Not court driven. **What the rule does:** This rule will remove the textual descriptions of the critical habitat boundaries from certain entries at 50 CFR 17.99 (plants on the Hawaiian Islands) that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease, or in any other way change the critical habitat designations from which we are removing the textual descriptions of boundaries. This action will save taxpayer resources. We are taking this action in accordance with our May 1, 2012, revision of the regulations related to publishing textual descriptions of critical habitat boundaries in the CFR and as part of our response to Executive Order 13563 (January 18, 2011), which directs Federal agencies to review their existing regulations and then to modify or streamline them in accordance with what they have learned. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Carey Galst, 703-358-1954.	8/31/17 First appearance on quarterly report
MB	1018-BB06 Migratory Bird Hunting; Approval of Corrosion-Inhibited Copper Shot as Nontoxic for Waterfowl Hunting 50 CFR 20	PR	Not significant. Not major. Not court driven. **What the rule does:** Environ-Metal, Inc., of Sweet Home, Oregon, has applied for approval of shot composed of copper as nontoxic for waterfowl hunting in the United States. The shot formulation is at least 99.9 percent copper by weight, with a corrosion-inhibiting coating to prevent release of copper into terrestrial or aquatic environments. FWS has reviewed the shot as required under the criteria in the nontoxic shot approval procedures in FWS regulations. FWS' proposed approval of this shot formulation would increase the number of nontoxic shot options for hunters of migratory waterfowl. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. **OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."	~~5/1/17~~ Was on Q3—pushing to 7/14/17

ES	1018-BB34 Listing Determination for the Texas Hornshell 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 8/10/17, settlement agreement.** **What the rule does:** FWS will make a final determination on its proposal to list the Texas hornshell as endangered under the Endangered Species Act. This mussel species is found in freshwater streams in Texas and New Mexico. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703 358-1796,	7/27/17 Was on Q316 – PR New stage
MB	1018-BB40 Migratory Bird Hunting; Migratory Bird Hunting Regulations on Certain Federal Indian Reservations and Ceded Lands for the 2017–18 Season 50 CFR 20	FR	**Significant. Major.** Not court driven. **What the rule does:** FWS prescribes special migratory bird hunting regulations for certain tribes on Federal Indian reservations, off-reservation trust lands, and ceded lands for the 2017–18 migratory bird hunting season. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. Note: 1018-BB40, at the stage of the proposed frameworks (proposed rule), received an exemption from OMB under 4(C) of EO 13711 to publish without 2 accompanying deregulatory actions.	~~6/30/17~~ Was on Q3—Pushing ahead to 8/30/17
ES	1018-BB41 Removing the Deseret Milk-Vetch from the List of Endangered and Threatened Plants 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to delist the Deseret milk-vetch, a plant species found in Utah, due to recovery. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. **OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."	Not subject to OMB review Was on Q3 in same stage; pushed to Q4

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

Program	RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for Review
ES	1018-BB46 Listing Determination for the Louisiana Pinesnake 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to list the Louisiana pinesnake as a threatened species under the Endangered Species Act. This species is found in open pine forest and longleaf pine savannah in Louisiana and Texas. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Was on Q416 – PR Not subject to OMB review New stage
ES	1018-BB48 Listing Determination for Four Everglades Plants 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 10/11/17, settlement agreement.** **What the rule does:** FWS will make a final listing determination on a proposal to list pineland sandmat, Florida pineland crabgrass, and Everglades bully as threatened species, and Florida prairie-clover as an endangered species under the Endangered Species Act. These plants are found in Florida. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Was on Q416 Not subject to OMB review
ES	1018-BB50 Listing Determination for the Kenk's Amphipod 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/30/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Kenk's amphipod as an endangered species under the Endangered Species Act. This crustacean species is found in freshwater springs in Maryland. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact**: Sarah Quamme, 703-358-1796.	Was on Q416 –PR New Stage Not subject to OMB review

Program	RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for Review
ES	1018-BB52 Listing Determination for Two Stoneflies 50 CFR 17	FR	Not significant. Not major. **Court driven: 10/04/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the meltwater lednian stonefly and western glacier stonefly as threatened species. The meltwater lednian stonefly is located in Montana, and the western glacier stonefly is located in Montana and Wyoming. **Controversy:** The State of Wyoming is opposed to listing the western glacier stonefly in Wyoming. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review Was on Q3
ES	1018-BB54 Listing Determination for the I'iwi 50 CFR 17	FR	Not significant. Not major. **Court driven: 9/20/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the i'iwi as a threatened species under the Endangered Species Act. This bird species is found in the Hawaiian Islands. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review Was on Q3 in same stage; pushed to Q4
ES	1018-BB55 Listing Determination for the Pearl Darter 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/21/17, MDL settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the pearl darter as a threatened species under the Endangered Species Act. This fish species is found in freshwater streams of slow to moderate current in Mississippi. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Was on previously, but only as PR? Q416 Not subject to OMB review

ES	1018-BB64 Listing Determination for the San Fernando Valley Spineflower 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/15/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the San Fernando Valley spineflower as a threatened species under the Endangered Species Act. This species is found in California. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Was on previously, but only as PR? Q416 Not subject to OMB review
MB	1018-BB73 Migratory Game Bird Hunting Regulations, 2018–19; Supplemental 50 CFR 20	PR	**Significant. Major.** Not court driven. **What the rule does:** Proposes to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. The U.S. Fish and Wildlife Service proposed in an earlier document to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. This supplement to the proposed rule provides the regulatory schedule, announces the Service Migratory Bird Regulations Committee and Flyway Council meetings, and provides Flyway Council recommendations resulting from the Council's March 2017 meetings. **Controversy:** None. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967.	8/15/17

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

Program	RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for Review
ES	1018-BB76 Removal of the Monito gecko from the Federal List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to remove the Monito gecko from the Federal List of Endangered and Threatened Wildlife due to recovery. The Monito gecko is endemic to the island of Monito, which is located 68 kilometers west of Puerto Rico. This determination is based on a thorough review of the best available scientific and commercial information, which indicates that the threats to this species have been eliminated or reduced to the point that the species no longer meets the definition of an endangered species or a threatened species under the Endangered Species Act. FWS will also make available a post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review First appearance on quarterly report
ES	1018-BB79 Removal of the Black-Capped Vireo from the Federal List of Endangered and Threatened Wildlife; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove the black-capped vireo, a bird species, from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring (PDM) plan. The black-capped vireo breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states. **Controversy:** A number of public comments opposed the delisting of the black-capped vireo, including one from the Office of Travis County Judge and one from a national park. Those concerns may be reflected in comments FWS receives on the draft PDM. A number of partner agencies have indicated concerns about having the necessary funds to implement the ongoing management needs (e.g., cow-bird removal) and monitoring identified for their lands, which may also result in concerns about the viability of both the delisting and the PDM plan. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review

ES	1018-BC59 Listing Determination and Critical Habitat Designation for the San Joaquin Valley Giant Flower-Loving Fly 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a listing determination for the San Joaquin Valley giant flower-loving fly under the Endangered Species Act. This insect species is found in California. FWS will, if prudent and determinable, also propose to designate critical habitat for the San Joaquin Valley giant flower-loving fly under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	9/15/17 First appearance on quarterly report
ES	1018-BC64 Endangered and Threatened Wildlife and Plants; Technical Correction for Tonkin Snub-nosed Monkey 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** We are removing the endangered Tonkin snub-nosed monkey from certain regulations that apply only to primates that are listed as threatened species (50 CFR 17.40). Tonkin snub-nosed monkeys were included in these regulations when this species was listed as threatened. However, this species was reclassified as endangered in 1990. Therefore, the provisions of the regulations for threatened primates no longer apply to Tonkin snub-nosed monkeys, and, accordingly, we are correcting this error in the Code of Federal Regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Janine Van Norman, 703-358-2370	Was Info in table fmt already sent to OMB between Q3 and Q4 of FY17? 7/6/17

Bureau	RIN or OMB Control Number	Title	Summary
FWS	1018-0123	Agency Information Collection Activities: OMB Control Number 1018-0123; International Conservation Grant Programs	This notice provides the public with an opportunity to comment on the U.S. Fish and Wildlife Service's (Service) intention to renew Office of Management and Budget Control No. 1018-0123. This control number authorizes the Service to solicit proposals for funding and implement reporting requirements in response to Notices of Funding Opportunity published by the Service on Grants.gov.
FWS	1018-0066	Agency Information Collection Activities: OMB Control Number 1018-0066; Marine Mammal Marking, Tagging, and Reporting Certificates, and Registration of Certain Dead Marine Mammal Hard Parts	This notice provides the public with an opportunity to comment on the U.S. Fish and Wildlife Service's (Service) intention to renew Office of Management and Budget Control No. 1018-0066. OMB Control No. 1018-0066 authorizes the monitoring of the take of polar bears, northern sea otters, and Pacific walruses by Alaska Natives under 50 CFR 18.23(f). This collection of information also provides important data to the Service regarding Alaska Native subsistence and handicraft harvest and on the mammals' biology to determine what effect the harvests may have on their populations.

FWS	1018-0102	Agency Information Collection Activities: OMB Control Number 1018-0102; National Wildlife Refuge Special Use Permit Applications and Reports	This notice provides the public with an opportunity to comment on the U.S. Fish and Wildlife Service's (Service) intention to renew Office of Management and Budget Control No. 1018-0102. OMB Control No. 1018-0102 authorizes the Service to collect information needed to issue special use permits in the National Wildlife Refuge system for a specific period as determined by the type and location of the management activity or visitor service provided. Without approval by OMB, we will have no other mechanism to allow research, facilitated recreation, and commercial uses on national wildlife refuges, which will impact thousands of projects every year.
FWS	1018-0023	Agency Information Collection Activities: OMB Control Number 1018-0023; Migratory Bird Harvest Information Program and Migratory Bird Surveys	This notice provides the public with an opportunity to comment on the U.S. Fish and Wildlife Service's (Service) intention to renew Office of Management and Budget Control No. 1018-0023. OMB Control No. 1018-0023 authorizes the Service to gather data on various characteristics of migratory bird harvest through the Migratory Bird Harvest Information Program (HIP) and through Migratory Bird Hunter Surveys.

FWS	1018-0146	Agency Information Collection Activities: OMB Control Number 1018-0146; Annual Report - Depredation Order for Blackbirds, Grackles, Cowbirds, Magpies, and Crows	The notice provides the public with an opportunity to comment on the Service's intention to renew OMB Control No. 1018-0146 authorized by the Migratory Bird Treaty Act (MBTA). This information collection is associated with our regulations that implement a depredation order that authorizes take of blackbirds, cowbirds, grackles, crows, and magpies "when found committing or about to commit depredations upon ornamental or shade trees, agricultural crops, livestock, or wildlife, or when concentrated in such numbers and manner as to constitute a health hazard or other nuisance."
FWS		Draft Barton Springs Edwards Aquifer Conservation District Habitat Conservation Plan and Draft Environmental Impact Statement; Barton Springs salamander and Austin blind salamander, Texas	This is a notice of availability for the draft Barton Springs Edwards Aquifer Conservation District habitat conservation plan and draft environmental impact statement for take of the Barton Springs salamander (*Eurycea sosorum*) and the Austin blind salamander (*Eurycea waterlooensis*) in Travis and Hays Counties, Texas.

FWS	1018-BA74, 1018-BB89, 1018-BB90, and 1018-BB87	Reopening of Comment Period on Proposed Rules: Listing & Critical Habitat (G. Fescue, 1018-BA74), Downlist from Endangered to Threatened (Cactuses, 1018-BB89 and 1018-BB90), Delist (Wild-Buckwheat, 1018-BB87)	This document announces the reopening of the comment periods for our proposed rules to list *Festuca ligulata* (Guadalupe fescue) as an endangered species; to designate *Festuca ligulata* critical habitat ; to reclassify *Sclerocactus brevihamatus* ssp. *tobuschii* (Tobusch fishhook cactus) from endangered to threatened; to reclassify *Echinocereus fendleri* var. *kuenzleri* (Kuenzler hedgehog cactus) from endangered to threatened; and to remove *Eriogonum gypsophilum* (gypsum wild-buckwheat) from the Federal List of Endangered and Threatened Plants. We are reopening the comment period for each of these proposed rules for 30 days in order to publish a legal notice and to give all interested parties further opportunity to comment on the proposed rules. Comments previously submitted need not be resubmitted, as they will be fully considered in preparing the final listing determinations.
FWS		U.S. Endangered Species Recovery Permit Applications (first applicant: Arkansas Highway and Transportation Department, Little Rock, AR)	This notice informs the public of the receipt of applications for Endangered Species Act recovery permits for Region 4 and provides them with the opportunity to receive copies of the applications and submit comments.

FWS		U.S. Endangered Species Recovery Permit Applications; Region 6 (ERO Resources Corp, first applicant)	This notice informs the public of the receipt of multiple applications for Endangered Species Act recovery permits and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.
FWS		Initiation of a 5-Year Review of the Aleutian Shield Fern, AK	This notice alerts the public that we are initiating a 5-year status review for the Aleutian shield fern under the Endangered Species Act and provides an opportunity for the public to provide information they may have on the species. A 5-year status review results in a recommendation on whether the species should be classified differently or delisted. The species is only known to occur on one island in the Aleutian Island chain.
FWS		Endangered and Threatened Wildlife and Plants; Availability of Proposed Low-Effect Lakes at St. Sebastian Preserve Habitat Conservation Plan, Brevard County, FL / Atlantic Coast Paladin Estates, LLC and Micco Road Investments, LLC c/o the Kelsey Group	The applicant is requesting take of approximately 99.85 acres of Audubon's crested caracara (*Polyborus plancus audubonii*) nesting and foraging habitat incidental to the construction of a residential development project in Brevard County, Florida. The Audubon's crested caracara is federally listed as threatened. Impacts to the species will be offset by conservation of 20 acres of caracara habitat and a $10,000 management endowment.

FWS		Stock Assessment Reports for Southern Beaufort Sea and Chukchi-Bering Seas; Opening 90-day Public Comment Period	Thi s is a notice of availability for draft revised Stock Assessment Reports (SARs) for the Southern Beaufort and the Chukchi Seas stocks of polar bears. This notice opens a 90-day public comment period to request input on these draft revisions.
FWS		Draft Recovery Plan for the Pima Pineapple Cactus	We announce that our Pima pineapple cactus draft recovery plan is available. The cactus is listed as endangered under the Endangered Species Act of 1973, as amended. This plant species is currently found in southern Arizona and in northern Sonora, Mexico. The draft recovery plan includes specific recovery objectives and criteria to be met in order to enable us to remove this species from the Federal List of Endangered and Threatened Plants. A proposed border wall is not anticipated to impede the recovery of the Pima pineapple cactus. We request that local, State, and Federal agencies, Tribes, and the public review and comment. We will also accept any new species status information throughout its range to assist with recovery plan finalization.

FWS		Receipt of Application for Incidental Take Permit; Low-Effect Habitat Conservation Plan for Betteravia Farms, LLC /Curletti Farm Employee Housing Project, Santa Barbara County, California	This is a notice that the U.S. Fish and Wildlife Service has received an application for incidental take associated with a low-effect habitat conservation plan for a housing project.The Curletti Farm Employee Housing Project will provide much needed housing for seasonal farmworkers. These workers have been staying in low-income housing in the surrounding community, thus displacing other residents that would benefit greatly from low-income housing. The proposed project would provide housing for up to 600 workers (daily average occupancy of approximately 450 workers).
FWS	1018-AX99	Removal of the Hualapai Mexican Vole From the Federal List of Endangered and Threatened Wildlife	We, the Service, are removing the Hualapai Mexican vole from the Federal List of Endangered and Threatened Wildlife due to recent data indicating that the original classification is now erroneous. This action is based on a thorough review of the best available scientific and commercial information, which indicates that the currently listed subspecies is not a valid taxonomic entity.
FWS		ES Recovery Permit Applications (First Preserve District of Will County, Plainfield, IL, and others)	This notice informs the public of the receipt of multiple applications for Endangered Species Act recovery permits, requests public comment on the permits, and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.

FWS		Recovery Permits (Kiernan, first)	This notice informs the public of the receipt of multiple applications for Endangered Species Act recovery permits, requests public comment on the permits, and provides them with the opportunity to receive copies of the applications and submit comments. Numerous species are affected by this notice.
FWS	1018-BB74	Establishment of a Nonessential Experimental Population of the Oregon Silverspot Butterfly in Northwestern Oregon	The U.S. Fish and Wildlife Service, with the support of the State of Oregon Parks and Recreation Department (the agency with responsibility for conservation of invertebrate species in Oregon), wants to reestablish the Oregon silverspot butterfly, a federally listed threatened species, within its historical range at two sites in northwestern Oregon: Saddle Mountain State Natural Area in Clatsop County, and Nestucca Bay National Wildlife Refuge in Tillamook County. We would reestablish the Oregon silverspot butterfly under the authority of section 10(j) of the Endangered Species Act of 1973, as amended, and classify the populations reintroduced to these two areas as part of the nonessential experimental population identified in this rule.
FWS		Endangered and Threatened Wildlife & Plants, Permit Applications (Northern Research Station--USFS and others)	This notice informs the public of the receipt of applications for Endangered Species Act recovery permits in Region 3 and provides them with the opportunity to receive copies of the applications and submit comments.

FWS		NOA: Application to Participate in American Burying-Beetle Amended Industry Conservation Plan (Council Oak Resources, LLC and Corterra Energy Operating, LLC, apps)	This is a notice of availability for incidental take permit applications under the American Burying Beetle amended Industry Conservation Plan (ICP); the two applicants are Council Oak Resources, LLC and Corterra Energy Operating, LLC. The applicants request a permit for oil and gas upstream and midstream production, including activities associated with oil and gas well field and pipeline infrastructure (gathering, transmission, and distribution), including geophysical exploration (seismic), construction, maintenance, operation, repair, decommissioning, and reclamation in Oklahoma. Required by section 10(c) of the Endangered Species Act, this notice alerts the public that the incidental take permit applications are available for public review and comment.
FWS		Giant garter snake; Notice of Availability of Second Revised Draft Recovery Plan	This document describes the strategy, objectives, and actions necessary for achieving recovery of the giant garter snake, along with criteria that, when met, signify that the Service may be able to remove the species from the Federal List of Endangered and Threatened Wildlife. The plan focuses on establishing and protecting self-sustaining populations throughout the range of the species, restoring and conserving healthy wetland ecosystems that will support the species, and ameliorating or eliminating the threats that caused the species to be listed.

FWS	1018-BB54	Listing Determination for the I'iwi	This final rule lists the i'iwi (*Drepanis coccinea*), a forest bird endemic to Hawaii, as threatened under the Endangered Species Act.
FWS	1018-BA41	Removal of the Greater Yellowstone Ecosystem Population of Grizzly Bears from the List of Endangered and Threatened Wildlife	The U.S. Fish and Wildlife Service is issuing a final rule to establish the Greater Yellowstone Ecosystem (GYE) grizzly bear as a Distinct Population Segment (DPS) and remove (delist) the GYE population of grizzly bears from the Federal List of Endangered and Threatened Wildlife under the Endangered Species Act.
FWS		Initiation of 5-Year Status Reviews of 23 Southeastern Species	The Fish and Wildlife Service will announce the initiation of 5-year status reviews of 23 Southeastern Species under the Endangered Species Act (Act). This notice announces our active review of 22 endangered species and 1 threatened species.

FWS		Louisiana Pinesnake; Notice of Availability for the Candidate Conservation Agreement with Assurances	The programmatic Candidate Conservation Agreement with Assurances (CCAA), which would be between the Louisiana Department of Wildlife and Fisheries (LDWF) and the U.S. Fish and Wildlife Service, will allow LDWF to issue certificates of inclusion to eligible non-federal landowners in Bienville, Beauregard, Jackson, Natchitoches, Rapides, Sabin, Vernon, Winn, Grant, and Allen Parishes, Louisiana, whose conservation management agreements are approved. Landowners who enroll through the CCAA will receive assurances against take liability for incidental take of the Louisiana pinesnake from their conservation actions.

FWS		Notice of Intent to Prepare a Draft Environmental Impact Statement for the Proposed Deschutes Basin Habitat Conservation Plan in Oregon	The U.S. Fish and Wildlife Service Service) has been leading a large scale, multi-party planning effort to address irrigation infrastructure improvements that will benefit the conservation of endangered and threatened species in the Deschutes River Basin in Central Oregon. This effort has spanned many years and has involved eight Central Oregon irrigation districts (constituting the Deschutes Basin Board of Control), the City of Prineville, and the U.S. Bureau of Reclamation as well as other parties. In accordance with the National Environmental Policy Act, we are providing notice to all interested parties that the Service intends to prepare a draft environmental impact statement to evaluate the impacts of alternatives relating to the potential issuance of Endangered Species Act incidental take permits to the City of Prineville and to the eight irrigation districts represented by the Deschutes Basin Board of Control in central Oregon. We are also announcing the initiation of a public scoping period for this effort to engage Federal, Tribal, State, and local governments and the public in the identification of issues and concerns, potential impacts, and possible alternatives to the proposed action for consideration in the draft

FWS		June 2017 Batched 12-Month Findings for Three Species (Kirtland's snake, Mohave shoulderband snail, and San Felipe gambusia)	We have completed 12-month findings on petitions requesting listing of three species under the Endangered Species Act, and determined that the Kirtland's snake (found in the Midwestern United States), the Mohave shoulderband snail (found in the western Mojave Desert in California), and the San Felipe gambusia (found in Texas waters) are not warranted for listing.
FWS		Intent to Prepare a Draft Environmental Impact Statement and Associated Documents for LCRA Transmission Services Corporation's Proposed Habitat Conservation Plan, TX	The U.S. Fish and Wildlife Service is announcing that it will prepare a draft environmental impact statement on the proposed Lower Colorado River Authority Transmission Services Corporation's (LCRA TSC; applicant's) habitat conservation plan (HCP). The publication of this notice is required by the National Environmental Policy Act. Included in the notice is information about the proposed HCP and opportunities for the public to provide information that may be relevant to the proposed action and alternatives to consider. LCRA TSC has scheduled public scoping meetings for the week of June 19, 2017.

FWS		Notice of Availability of a Draft Candidate Conservation Agreement, Draft Candidate Conservation Agreements with Assurances, and Draft Environmental Assessment for Activities within Eddy County, New Mexico and Culberson County, Texas; Includes Texas Hornshell (Proposed for Listing)	This is a notice of availability for a draft candidate conservation agreement, a draft candidate conservation agreement with assurances with the Center of Excellence in Hazardous Material Management, a draft candidate conservation agreement with assurances with the New Mexico State Lands Office (collectively referred to as the agreements), a draft environmental assessment, and two applications (one for each applicant) for Endangered Species Act section 10(a)(1)(A) enhancement of survival permits (permit) for the Texas hornshell in Texas and New Mexico. This notice, required by section 10(c) of the Endangered Species Act, alerts the public that the draft agreements, draft EA, and applications for the permits are available for public review and comment.
FWS		Lost Hills Solar Project, Kern County, California; Draft Environmental Assessment and Draft Habitat Conservation Plan	CED Lost Hills Solar, LLC (applicant) has applied for an incidental take permit under the Endangered Species Act for a habitat conservation plan (HCP) for the Lost Hills Solar Project in Kern County, California. The permit would authorize the take of the federally endangered San Joaquin kit fox incidental to the construction, operation and maintenance, and decommissioning of the solar project. This notice, required by section 10(c) of the ESA, alerts the public that the draft HCP and draft Environmental Impact Statement are available for public review and comment.

FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Nature Conservation Trust, first applicant)	This notice is a periodic action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice, the Division of Management Authority has issued four permits under the ESA and one under the MMPA that require notification to the public. This notice only informs the public that, after going through a complete review of the submitted applications and considering any comments from the public or outside experts, the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA, there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species, there is no statutory time frame established under the ESA.

FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; Dallas World Aquarium, first applicant)	This notice is a weekly action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the receipt and issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). This notice provides the public an opportunity to comment on eight (8) permits under the ESA and three (4) under the MMPA. There are no decisions announced in these weekly notices, but we cannot finalize the review of the permit applications until the conclusion of a mandatory 30-day comment period.

FWS		Foreign Endangered Species; Notice of issuance of Permits (Maire Malone, first) FWS-HQ-IA-2017-0019	This notice is a periodic action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice, the Division of Management Authority has issued nine permits under the ESA and two under the MMPA that require notification to the public. This notice only informs the public that, after going through a complete review of the submitted applications and considering any comments from the public or outside experts, the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA, there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species, there is no statutory time frame established under the ESA.

FWS		Endangered Species; Notice of Issuance (Foreign Species Permits; Michael Rohweder, first permittee)	This notice is a periodic action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). Since the last issuance notice, the Division of Management Authority has issued four permits under the ESA and one under the MMPA that require notification to the public. This notice only informs the public that, after going through a complete review of the submitted applications and considering any comments from the public or outside experts, the Service has determined that all of the issuance criteria of the ESA or MMPA have been meet. Under the MMPA, there is a statutory requirement to notify the public within 10 days of issuing a permit of the issuance. While the ESA also has a statutory requirement to notify the public of the issuance of permits involving endangered species, there is no statutory time frame established under the ESA.

FWS		Exemption from Threatened Species Permits for a Qualifying Beluga Sturgeon Aquaculture Facility	The U.S. Fish and Wildlife Service (Service) is providing notice of an exemption to permit requirements granted under our regulations to carry out the Endangered Species Act of 1973, as amended (Act). The Service, in June 2016, granted an exemption for beluga sturgeon (*Huso huso*) reared in an aquaculture facility, Sturgeon AquaFarms, in Bascom, Florida that meets the criteria under our regulations. The exemption authorizes the facility to take beluga sturgeon from its aquacultured stock for the purpose of harvesting aquacultured beluga sturgeon meat and also authorizes the facility to engage in interstate commerce and export of beluga sturgeon meat harvested from the facility's aquacultured stock, subject to certain conditions.
FWS		Endangered Species; Receipt of Applications for Permits (Foreign Species Permits: Morani River Ranch, first applicant)	This notice is a weekly action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the receipt and issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). This notice provides the public an opportunity to comment on ESA and MMPA permits. There are no decisions announced in these weekly notices, but we cannot finalize the review of the permit applications until the conclusion of a mandatory 30-day comment period.

FWS		Foreign Endangered Species; Notice of Issuance of Permits (Charles Waibel, first)	This notice is a periodic action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA). This notice only informs the public that, after going through a complete review of the submitted applications and considering any comments from the public or outside experts, the Service has determined that all of the issuance criteria of the ESA have been meet.
FWS		Endangered Species; Receipt of Applications for Permits (Foreign Species Permits: Philadelphia Zoo, first applicant)	This notice is a weekly action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the receipt and issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). This notice provides the public an opportunity to comment on ESA and MMPA permits. There are no decisions announced in these weekly notices, but we cannot finalize the review of the permit applications until the conclusion of a mandatory 30-day comment period.

FWS	1018-AZ69	Migratory Bird Permits; Control Order for Introduced Migratory Bird Species in Hawaii (Cattle Egrets and Barn Owls)	Introduced, nonnative, alien, and invasive species in Hawaii displace, compete with, and consume native species, some of which are endangered, threatened, or otherwise in need of additional protection in order to increase or maintain viable populations. To protect native species, a control order is established for cattle egrets and barn owls, two invasive migratory bird species in Hawaii, under the direction of Executive Order 13112.
FWS		Notice of Intent to Prepare an Environmental Impact Statement; Hycroft Mining Company; Request for Take Permits Under the Bald and Golden Eagle Protection Act	The U.S. Fish and Wildlife Service (Service) is considering the issuance of eagle take permits under the Bald and Golden Eagle Protection Act (Eagle Act). We intend to prepare a joint Environmental Impact Statement (EIS) with the Bureau of Land Management (BLM). We are a cooperating agency with the BLM on the development of this EIS. The BLM will be analyzing potential impacts of their decision regarding Hycroft Resource and Development Incorporated's (Hycroft/Applicant) proposed expansion as described in BLM's Notice of Intent published in December, 2014 (79 FR 78469). This EIS will also analyze impacts associated with the Service's eagle take permit decisions.
FWS		Meeting Notice; Service Regulations Committee Meeting	This is a notice that the U.S. Fish and Wildlife Service will conduct an open meeting in June 2017 to identify and discuss preliminary issues concerning the 2018-19 migratory bird hunting regulations.

FWS	1018-AY30	Eagle Permits: Revision to Regulations for Eagle Incidental Take and Take of Nests; Correction	In 2016, the Service finalized revisions to permit regulations regarding permits that we issue for some activities involving eagles. In that final rule, we updated a table that includes permit application fees. Because of a formatting error in the rule, the revisions were not able to be incorporated into the Code of Federal Regulations. With this document, we correct the formatting error. This rule is purely an administrative action and does not affect the provisions of the rule in any substantive way.
FWS	1018-BB24	Migratory Bird Subsistence Harvest in Alaska; Use of Inedible Bird Parts in Authentic Alaska Native Handicrafts for Sale	The U.S. Fish and Wildloife Service is amending the permanent subsistence migratory bird harvest regulations in Alaska. This rule enables Alaska Natives to sell authentic native articles of handicraft or clothing that contain inedible byproducts from migratory birds that were taken for food during the Alaska migratory bird subsistence harvest season. The rule was developed under a co-management process involving the Service, the Alaska Department of Fish and Game, and Alaska Native representatives.
FWS	1018-BB73	2018–19 Migratory Game Bird Hunting Regulations	This proposed rule is the first in the series to establish the 2018-19 annual migratory bird hunting regulations.
FWS	1018-BB40	Migratory Bird Hunting; Seasons and Bag and Possession Limits for Certain Migratory Game Birds for the 2017–18 Season	This rule establishes the seasons and bag and possession limits for the 2017-18 migratory game bird hunting season.

FWS	1018-BB06	Migratory Bird Hunting; Approval of Corrosion-inhibited Copper Shot as Nontoxic for Waterfowl Hunting	The Service proposes to approve corrosion-inhibited copper shot for hunting waterfowl and coots. We have concluded that the shot is unlikely to adversely affect fish, wildlife, or their habitats. We propose to change the regulation at 50 CFR 20.21(j) accordingly.
FWS	1018-BB75	Refuge-Specific Hunting and Sport Fishing Regulations, 2017–18	This proposed rule begins the annual process of updating refuge-specific regulations for National Wildlife Refuges.
FWS	1018-BA31	Disapproval of Final Rule: Non-Subsistence Take of Wildlife, and Public Participation and Closure Procedures, on National Wildlife Refuges in Alaska	The final rule published August 5, 2016 (81 FR 52248) and became effective September 6, 2016. The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act, signed by the President on April 3, 2017 (P.L. 115-20). This action conforms to P.L. 115-20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the effective date of the final rule that was nullified under the Congressional Review Act.
FWS		Notice of intent to implement annual hunting fees, annual fishing fees, and special permit fees; Clarks River National Wildlife Refuge, KY [FWS–R4–R–2016–N141]	Clarks River National Wildlife Refuge proposes to implement annual hunting and fishing fees and special permit fees for recreational activities. The proposed cost for the annual access permit is $15 (free for youth under 16, and $5 for seniors 65 and over); there would be a $50 minimum fee for annual Recreational Special Use Permit authorizing commercial recreational activities to be conducted on the Refuge.

FWS		Notice of Intent to Reopen the Planning Process for the Comprehensive Conservation Plan and Environmental Assessment at Crystal River National Wildlife Refuge	The Fish and Wildlife Service is submitting a notice of intent to prepare a comprehensive conservation plan for Crystal River National Wildlife Refuge (NWR) in Citrus County, Florida. The planning process for Crystal River NWR began in 2008. The planning process was delayed when rulemaking for the Kings Bay Manatee Protection Area (Manatee Protection Area) was initiated in 2010 and completed in 2012.
FWS		Notice of Availability for the Grays Harbor National Wildlife Refuge and Black River Unit of Billy Frank Jr. Nisqually National Wildlife Refuge, Grays Harbor and Thurston Counties, WA; Comprehensive Conservation Plans and Finding of No Significant Impact for Environmental Assessment	The U.S. Fish and Wildlife Service will announce the availability of our comprehensive conservation plans and finding of no significant impact (signed on March 10, 2017) for Grays Harbor NWR, located in Grays Harbor County, Washington, and the Black River Unit (Unit) of Billy Frank Jr. Nisqually NWR, located in Thurston County, Washington.
FWS		NOA: Camas National Wildlife Refuge, Jefferson County, ID; Comprehensive Conservation Plan and Finding of No Significant Impact for Environmental Assessment	A finding of no significant impact (FONSI) was signed on March 10, 2017, and the comprehensive conservation plan (CCP) was completed for Camas National Wildlife Refuge, located in Jefferson County, Idaho. The CCP will guide management of the Refuge for 15 years or until it is revised, and actions will be implemented as funding becomes available. We are informing the Secretary of our intent to publish the notice of availability for the Camas National Wildlife Refuge CCP and the FONSI for the environmental assessment.

FWS		Lower Klamath, Clear Lake, Tule Lake, Upper Klamath, and Bear Valley National Wildlife Refuges, Klamath County, OR; Siskiyou and Modoc Counties, CA; Record of Decision for Final Comprehensive Conservation Plan/Environmental Impact Statement	The notice informs the public that the U.S. Fish and Wildlife Service (Service) has signed a Record of Decision on January 13, 2017, for the Final CCP/EIS for the Klamath Refuges. The Final CCP/EIS evaluated alternatives for managing the Klamath Refuges over the next 15 years. The Record of Decision includes a statement of the decisions made, the basis for the decisions, a description of the alternatives considered, a description of the environmentally preferable alternative, an overview of the measures to minimize environmental impacts, and a summary of public involvement in the decisionmaking process. The Service can now begin implementing the CCP.
FWS		Silvio O. Conte National Fish and Wildlife Refuge; Record of Decision for Final Comprehensive Conservation Plan and Environmental Impact Statement	The U.S. Fish and Wildlife Service announces the availability of the record of decision (ROD) on the final comprehensive conservation plan (CCP) and environmental impact statement (EIS) for Silvio O. Conte National Fish and Wildlife Refuge (NFWR). We prepared the ROD pursuant to the National Environmental Policy Act of 1969 (NEPA) and its implementing regulations. The Service is furnishing this notice to advise the public and other agencies of our decision and of the availability of the ROD.

FWS	1018-BA33	Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4	The proposed rule:• Is in response to requests from States to revise and simplify the rules for license certification. The Service worked closely with DOI solicitors and Association of Fish and Wildlife Agencies (AFWA) attorneys in developing the new language. • Includes changes that were reviewed by Regional and State representatives, and interested stakeholders, during pre-rulemaking comment periods and were developed considering the comments we received. • Includes definitions and additions to the rule that will clarify the rule and improve national consistency. • Was developed in coordination with the AFWA, the Federal Aid Coordinators Working Group, Regional WSFR offices, State representatives, and members of interest organizations.

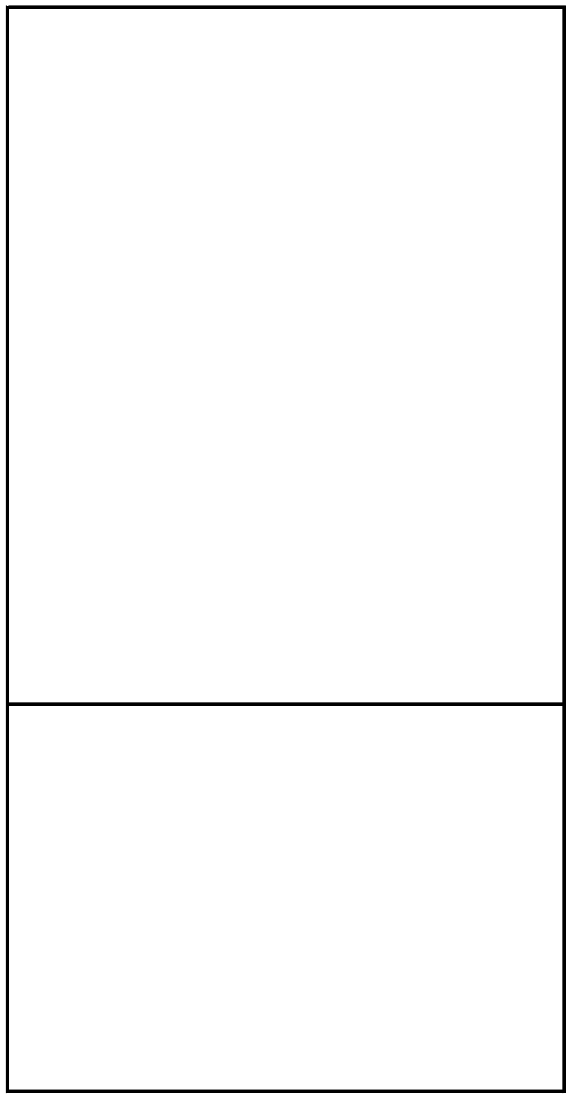
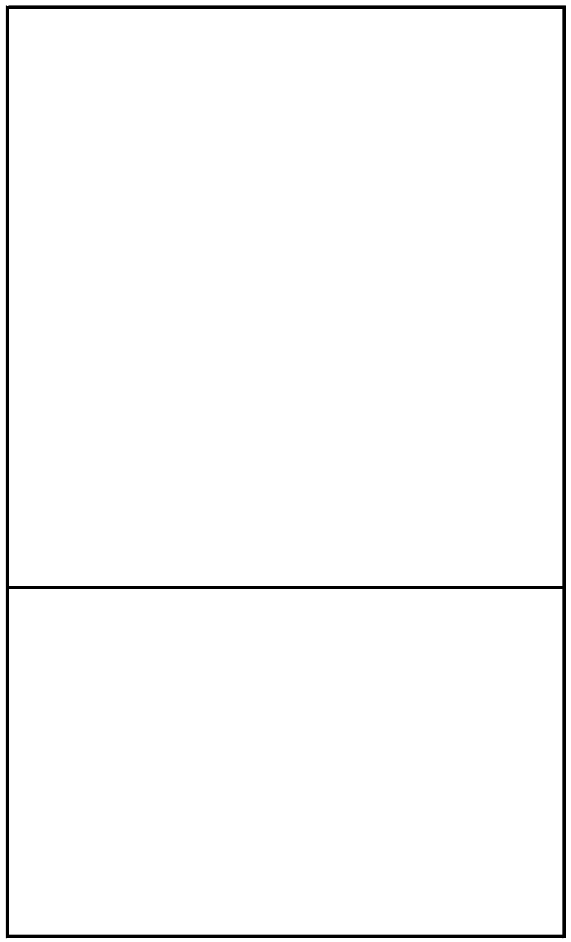
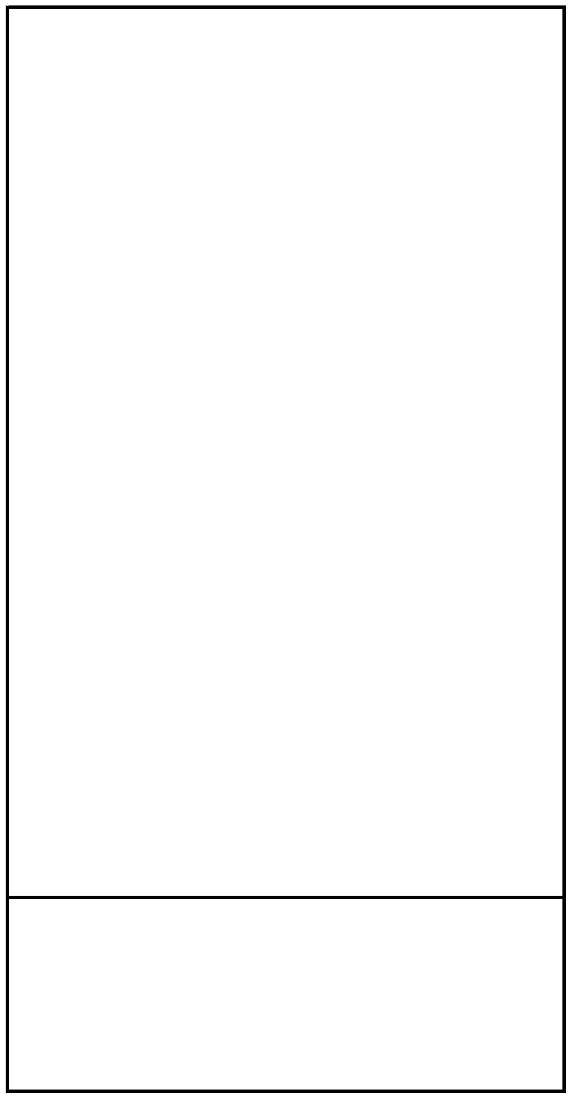
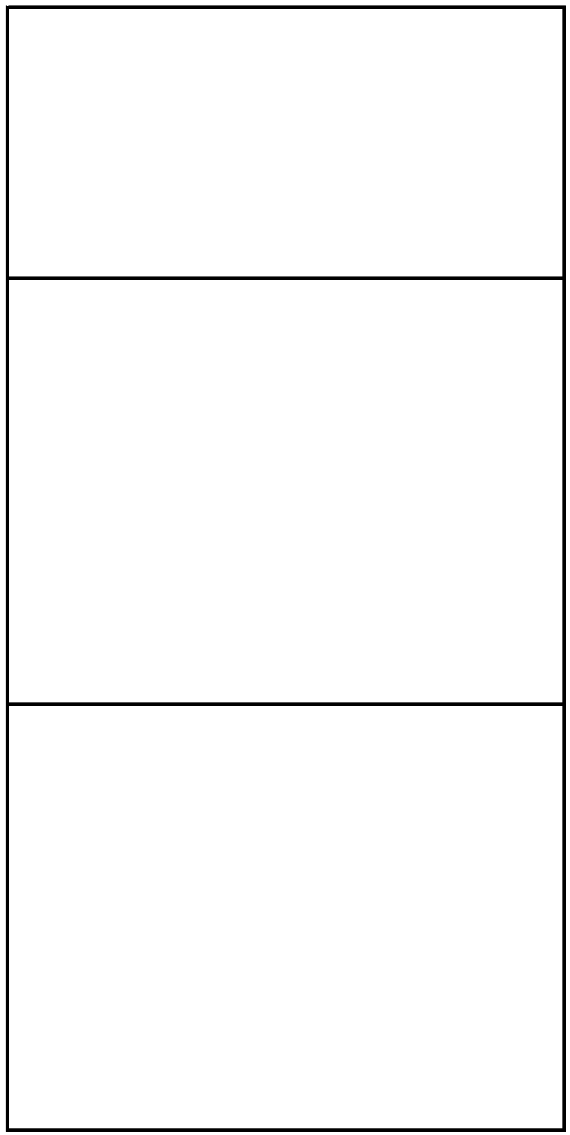
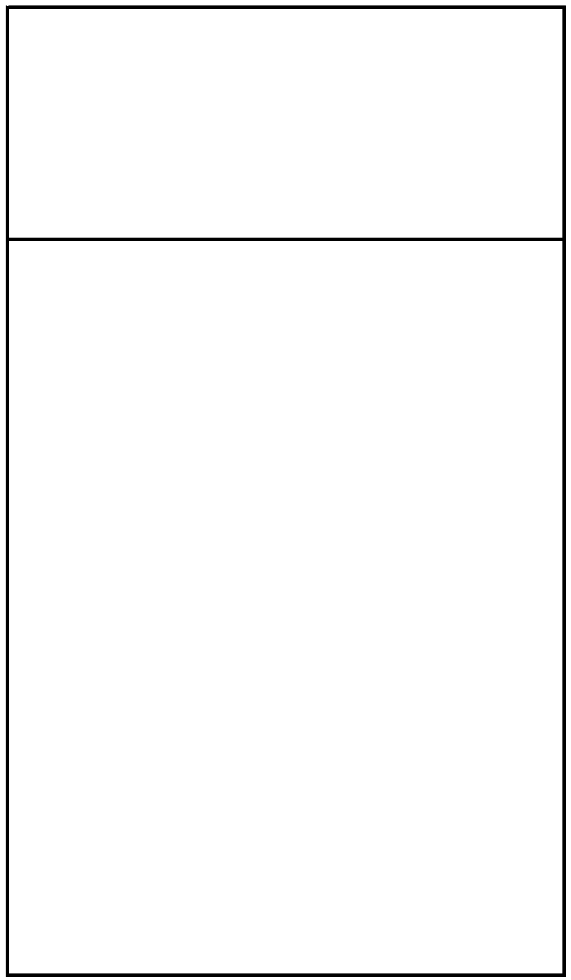
Explain Critical Date if "Other"

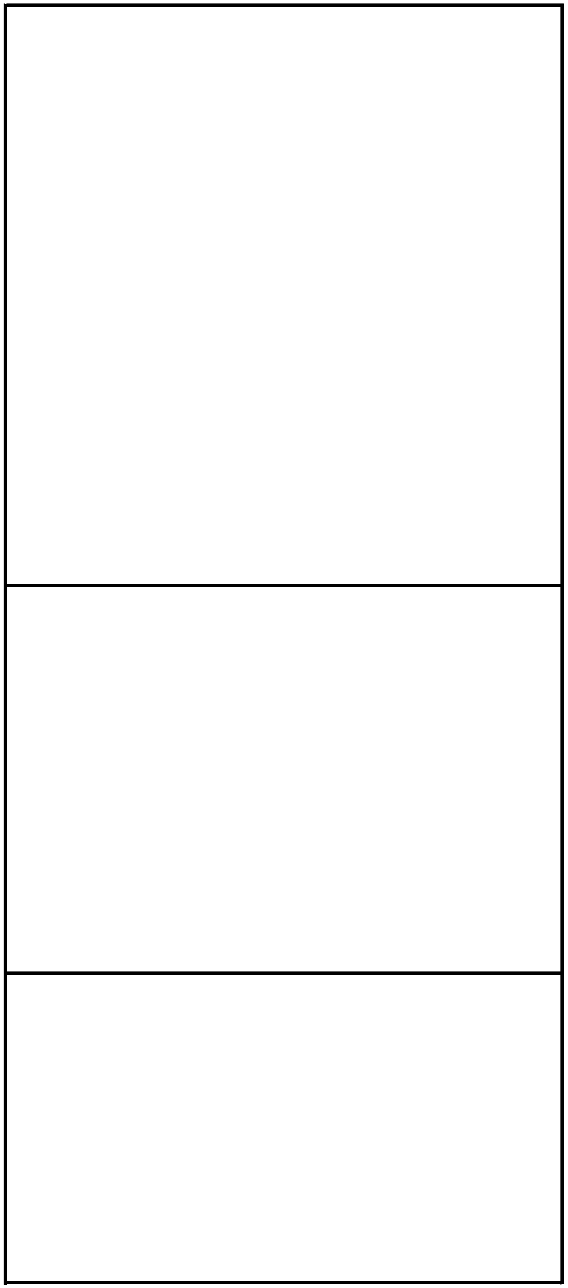


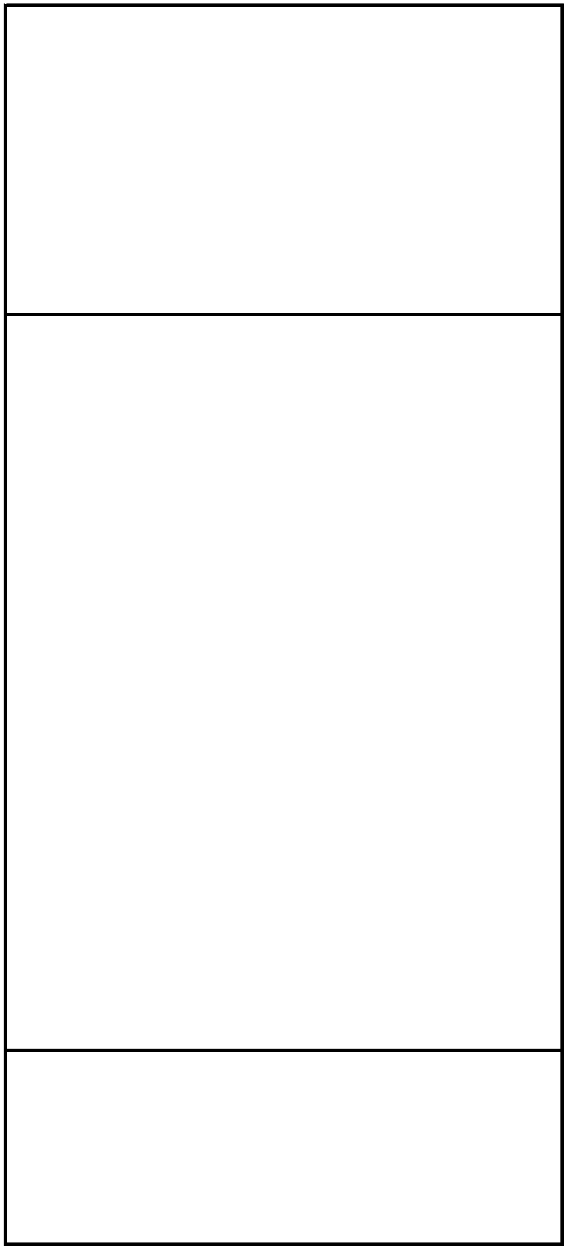


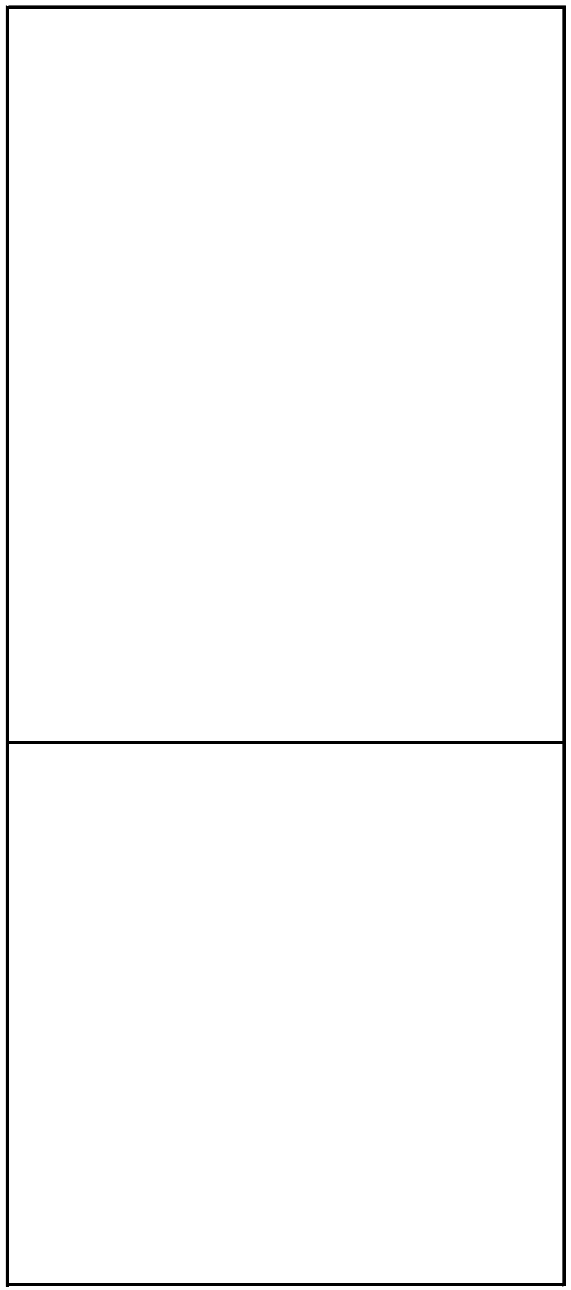


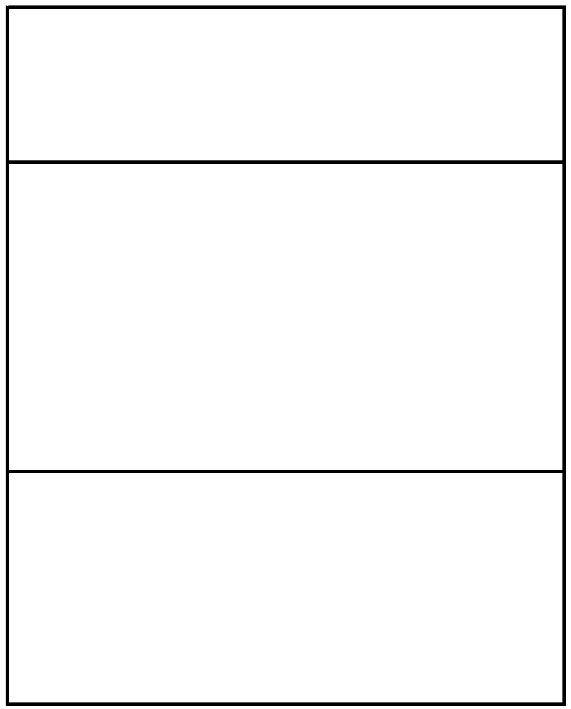




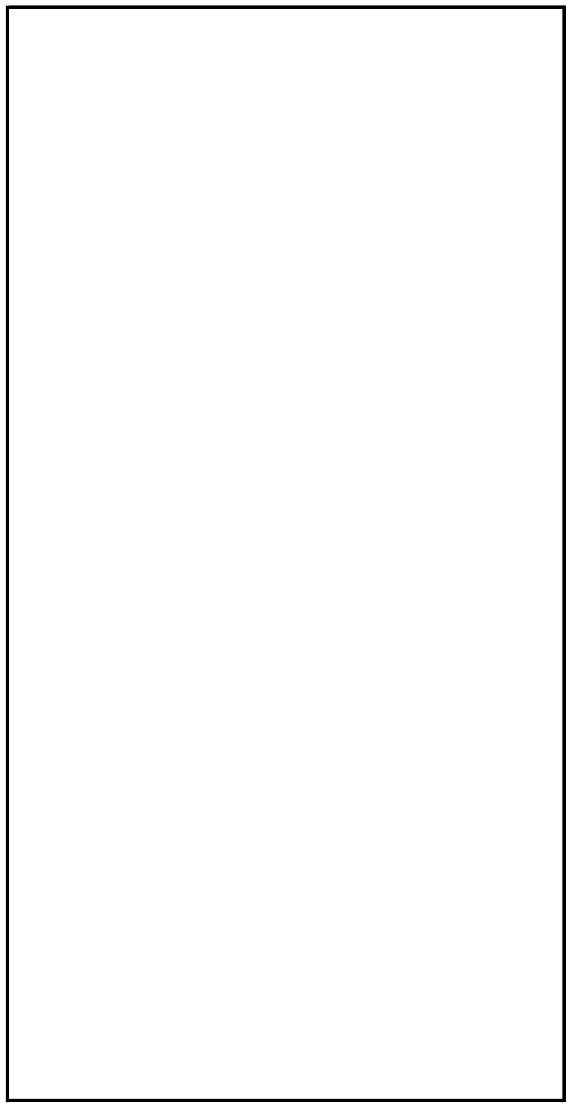


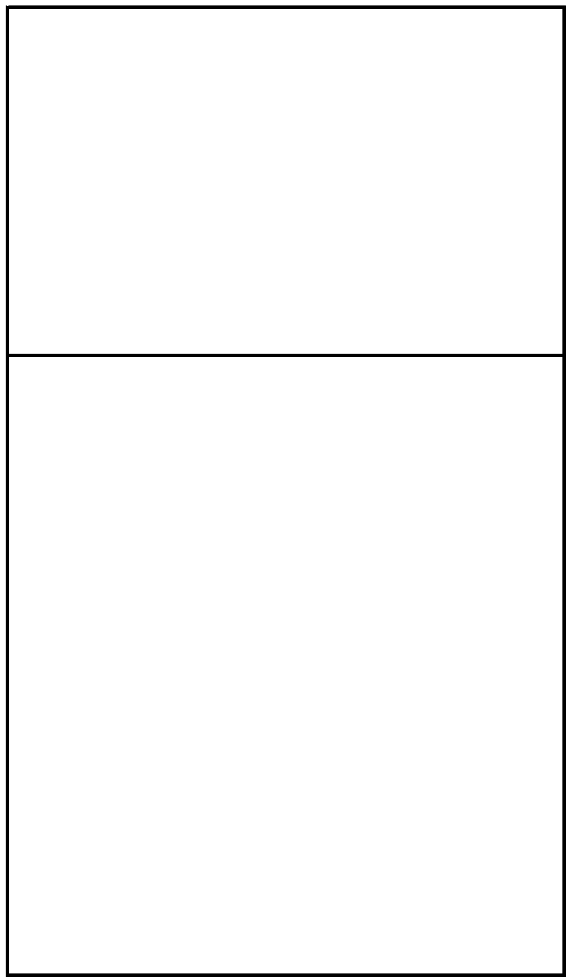


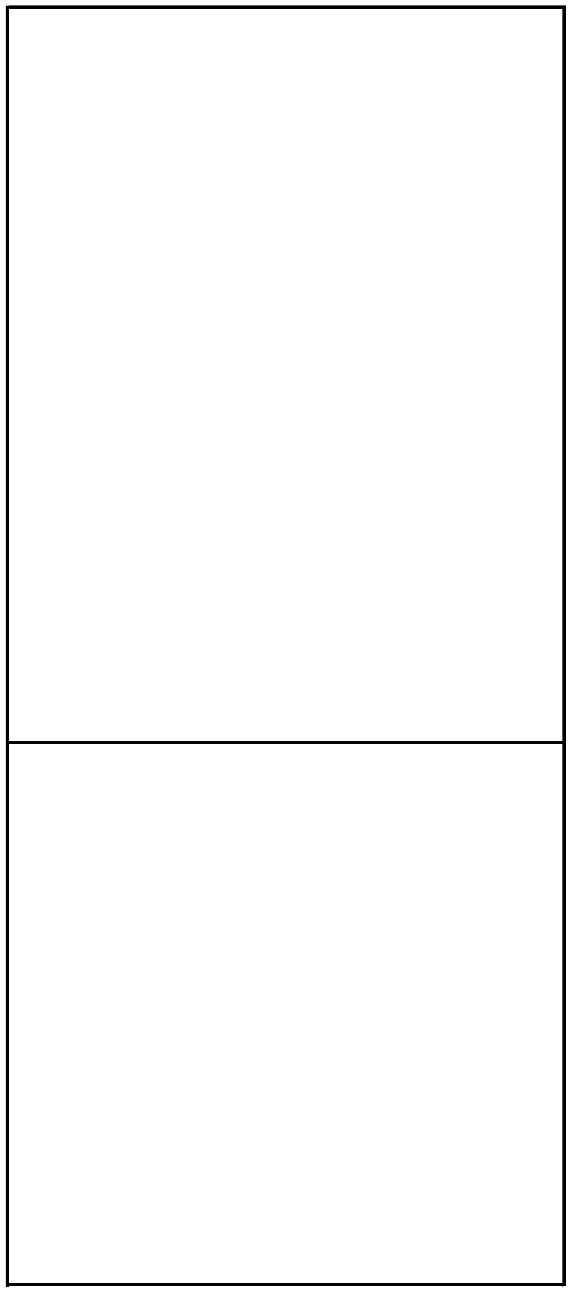


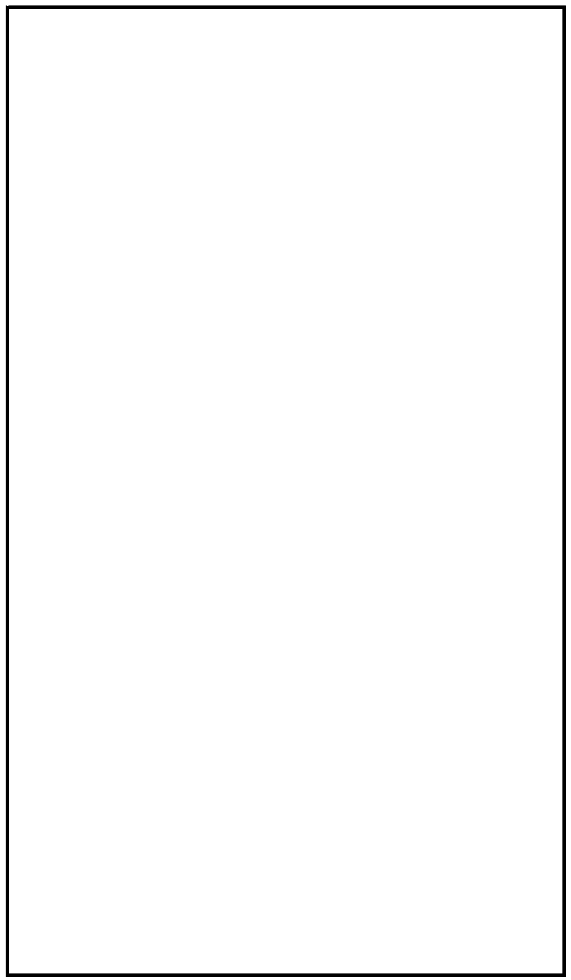


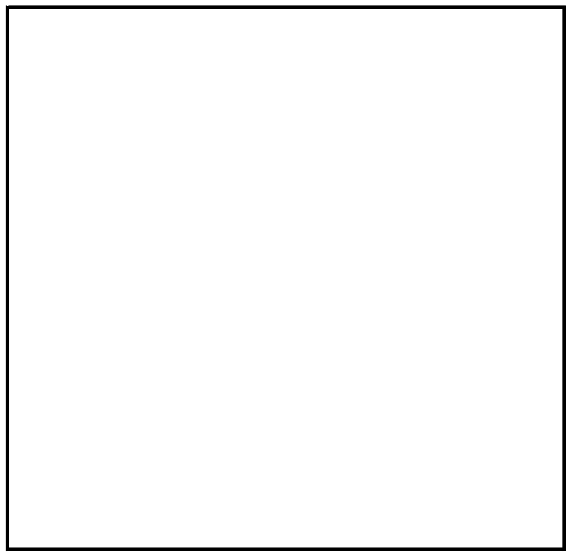
The Louisiana pinesnake was proposed for listing as threatened on October 6, 2016. A final decision on listing the Louisiana pinesnake must be made by October 6, 2017. Private landowners have requested to have opportunities to voluntarily enroll and receive assurances prior to the final listing action. After the listing is final, landowners will no longer be able to enroll in the CCAA.

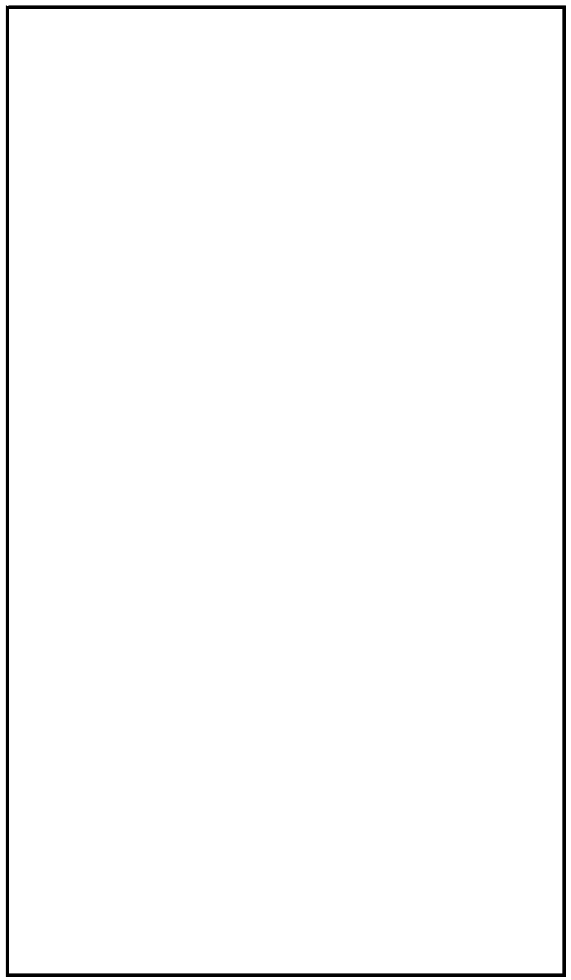


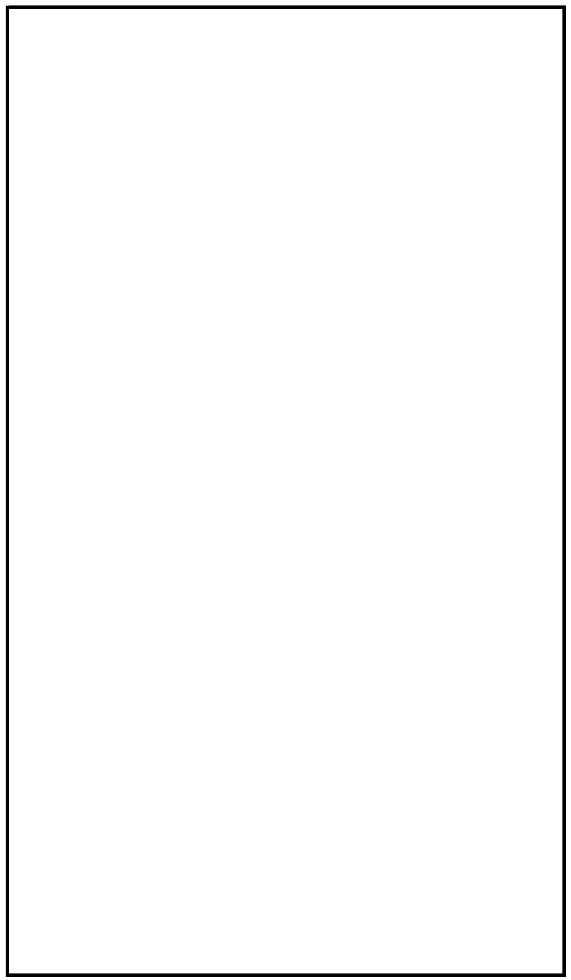


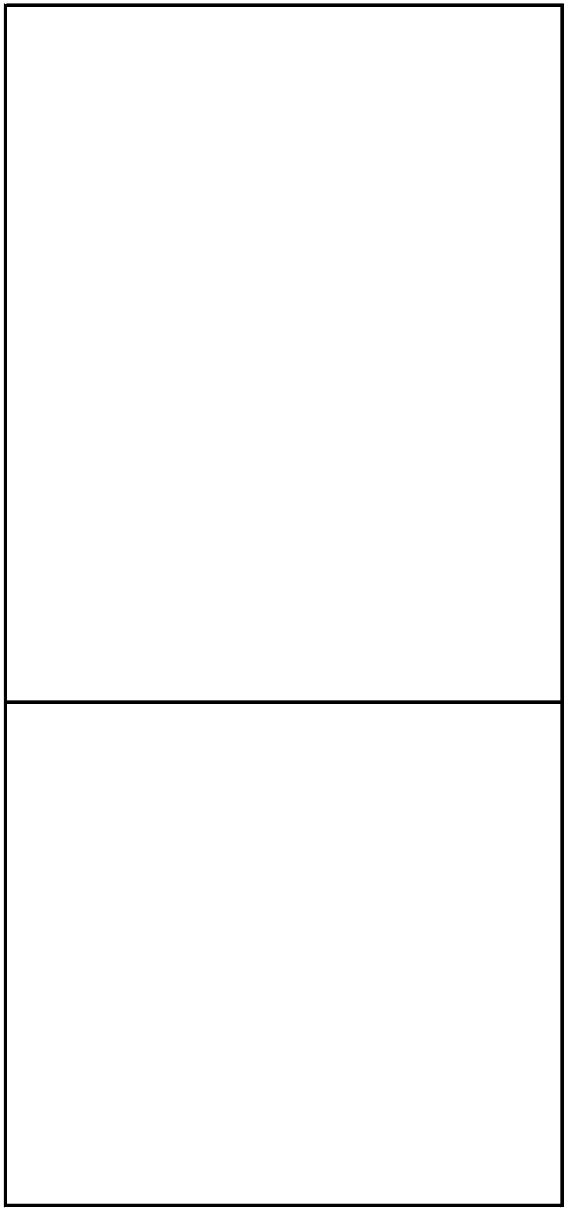


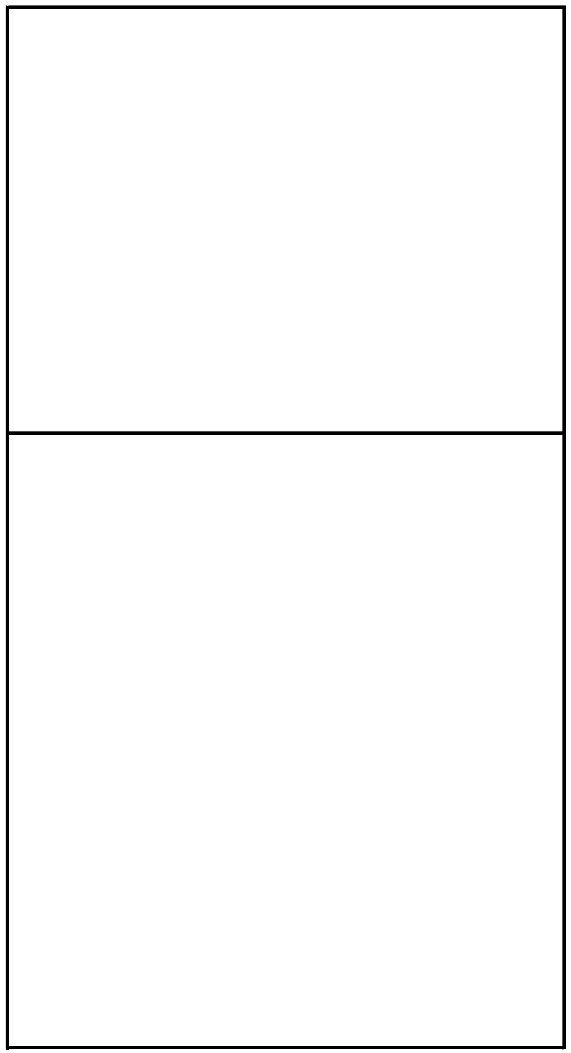












This notice must publish two weeks prior to the scheduled meeting date, which is June 21, 2017.

Must be published prior to Flyway Council meetings, which begin in August.
This is the drop-dead date to legally open 2017/2018 hunting seasons.

Attachments:	FWS entries, 30 day spreadsheet for June 20 2017_MASTER (1).xlsx

Charisa/Delores,

I have previously asked about status of the SWG packages but I am not finding any response back. Do we know what the status is? Also, see Tom's note on the license certification revision. Any info you can provide would be helpful.

Thanks

Paul

Subject: Three delayed items: SWG apportionment, C-SWG and license certification
To: Paul Rauch <paul_rauch@fws.gov>, Robert Curry <robert_curry@fws.gov>

Paul & Bob-

Would you see if there is a way to move these long-delayed packages to completion?

Two State Wildlife Grants packages have been in the Director's office nearly a month awaiting action. SWG apportionment (**DCN 065699**) and Competitive SWG grants (**DCN 065561**) both reached the Director's office on May 17. States depend on the apportioned funds to support their wildlife diversity programs, just as they do PR/DJ. Presumably all of the SWG grants that exceed $100K will also have to undergo DOI review after Director's signature, so this is a double delay adversely affecting State agencies.

Our proposed revision of 50 CFR 80 that includes the long-awaited license certification method has been hung up in the Department for months. We have met all requirements and followed all procedures. Every week they simply change the date for "Estimated Date for DOI Clearance". Our item is now the "oldest" on the Service's list of projected Federal Register documents. This is a priority for States, and will simplify and streamline the onerous methods of counting licenses for apportionment of PR/DJ funds. Some States will have to enact legislation to match the new procedures, so timeliness is crucial. And this is just the proposed rule, not the final. FYI, I've attached the most recent list of projected FR documents. Our item is on line 49 at the bottom of the list.

Bureau	RIN or OMB Control Number	Title	Summary
FWS	1018-0123	Agency Information Collection Activities: OMB Control Number 1018-0123; International Conservation Grant Programs	This notice provides the public with an opportunity to comment on the U.S. Fish and Wildlife Service's (Service) intention to renew Office of Management and Budget Control No. 1018-0123. This control number authorizes the Service to solicit proposals for funding and implement reporting requirements in response to Notices of Funding Opportunity published by the Service on Grants.gov.
FWS	1018-0066	Agency Information Collection Activities: OMB Control Number 1018-0066; Marine Mammal Marking, Tagging, and Reporting Certificates, and Registration of Certain Dead Marine Mammal Hard Parts	This notice provides the public with an opportunity to comment on the U.S. Fish and Wildlife Service's (Service) intention to renew Office of Management and Budget Control No. 1018-0066. OMB Control No. 1018-0066 authorizes the monitoring of the take of polar bears, northern sea otters, and Pacific walruses by Alaska Natives under 50 CFR 18.23(f). This collection of information also provides important data to the Service regarding Alaska Native subsistence and handicraft harvest and on the mammals' biology to determine what effect the harvests may have on their populations.

FWS	1018-0102	Agency Information Collection Activities: OMB Control Number 1018-0102; National Wildlife Refuge Special Use Permit Applications and Reports	This notice provides the public with an opportunity to comment on the U.S. Fish and Wildlife Service's (Service) intention to renew Office of Management and Budget Control No. 1018-0102. OMB Control No. 1018-0102 authorizes the Service to collect information needed to issue special use permits in the National Wildlife Refuge system for a specific period as determined by the type and location of the management activity or visitor service provided. Without approval by OMB, we will have no other mechanism to allow research, facilitated recreation, and commercial uses on national wildlife refuges, which will impact thousands of projects every year.
FWS	1018-0023	Agency Information Collection Activities: OMB Control Number 1018-0023; Migratory Bird Harvest Information Program and Migratory Bird Surveys	This notice provides the public with an opportunity to comment on the U.S. Fish and Wildlife Service's (Service) intention to renew Office of Management and Budget Control No. 1018-0023. OMB Control No. 1018-0023 authorizes the Service to gather data on various characteristics of migratory bird harvest through the Migratory Bird Harvest Information Program (HIP) and through Migratory Bird Hunter Surveys.

FWS	1018-0146	Agency Information Collection Activities: OMB Control Number 1018-0146; Annual Report - Depredation Order for Blackbirds, Grackles, Cowbirds, Magpies, and Crows	The notice provides the public with an opportunity to comment on the Service's intention to renew OMB Control No. 1018-0146 authorized by the Migratory Bird Treaty Act (MBTA). This information collection is associated with our regulations that implement a depredation order that authorizes take of blackbirds, cowbirds, grackles, crows, and magpies "when found committing or about to commit depredations upon ornamental or shade trees, agricultural crops, livestock, or wildlife, or when concentrated in such numbers and manner as to constitute a health hazard or other nuisance."
FWS	1018-0115	Agency Information Collection Activities: OMB Control Number 1018-0115; Application for Training, National Conservation Training Center	The notice provides the public with an opportunity to comment on the U.S. Fish and Wildlife Service's (Service) intention to renew Office of Management and Budget (OMB) Control No. 1018-0115 (expiring February 28, 2018). This control number authorizes the Service to utilize FWS Form 3–2193 to register non-DOI students for classes at the National Conservation Training Center.

FWS	1018-0103	Agency Information Collection Activities: OMB Control Number 1018–0103; Conservation Order for Light Geese	The notice provides the public with an opportunity to comment on the Service's intention to renew OMB Control No. 1018-0103, which authorizes the Service to collect information necessary to administer a light goose conservation order. The conservation order allows States to reduce the number of light geese (greater and lesser snow geese and Ross's geese), which have become overabundant and are damaging arctic and migration habitat. If this collection is not renewed, the Service would be unable to fulfill its obligation under 50 CFR 21.60 to annually monitor the number of light geese taken under conservation order regulations in the Atlantic, Mississippi, and Central Flyways.
FWS		Initiation of a 5-Year Review of the Aleutian Shield Fern, AK	This notice alerts the public that we are initiating a 5-year status review for the Aleutian shield fern under the Endangered Species Act and provides an opportunity for the public to provide information they may have on the species. A 5-year status review results in a recommendation on whether the species should be classified differently or delisted. The species is only known to occur on one island in the Aleutian Island chain.

FWS		Endangered and Threatened Wildlife and Plants; Availability of Proposed Low-Effect Lakes at St. Sebastian Preserve Habitat Conservation Plan, Brevard County, FL / Atlantic Coast Paladin Estates, LLC and Micco Road Investments, LLC c/o the Kelsey Group	The applicant is requesting take of approximately 99.85 acres of Audubon's crested caracara (*Polyborus plancus audubonii*) nesting and foraging habitat incidental to the construction of a residential development project in Brevard County, Florida. The Audubon's crested caracara is federally listed as threatened. Impacts to the species will be offset by conservation of 20 acres of caracara habitat and a $10,000 management endowment.
FWS		Stock Assessment Reports for Southern Beaufort Sea and Chukchi-Bering Seas; Opening 90-day Public Comment Period	Thi s is a notice of availability for draft revised Stock Assessment Reports (SARs) for the Southern Beaufort and the Chukchi Seas stocks of polar bears. This notice opens a 90-day public comment period to request input on these draft revisions.
FWS		Receipt of Application for Incidental Take Permit; Low-Effect Habitat Conservation Plan for Betteravia Farms, LLC /Curletti Farm Employee Housing Project, Santa Barbara County, California	This is a notice that the U.S. Fish and Wildlife Service has received an application for incidental take associated with a low-effect habitat conservation plan for a housing project.The Curletti Farm Employee Housing Project will provide much needed housing for seasonal farmworkers. These workers have been staying in low-income housing in the surrounding community, thus displacing other residents that would benefit greatly from low-income housing. The proposed project would provide housing for up to 600 workers (daily average occupancy of approximately 450 workers).

FWS		Draft Recovery Plan for the Pima Pineapple Cactus	We announce that our Pima pineapple cactus draft recovery plan is available. The cactus is listed as endangered under the Endangered Species Act of 1973, as amended. This plant species is currently found in southern Arizona and in northern Sonora, Mexico. The draft recovery plan includes specific recovery objectives and criteria to be met in order to enable us to remove this species from the Federal List of Endangered and Threatened Plants. A proposed border wall is not anticipated to impede the recovery of the Pima pineapple cactus. We request that local, State, and Federal agencies, Tribes, and the public review and comment. We will also accept any new species status information throughout its range to assist with recovery plan finalization.
FWS	1018-AX99	Removal of the Hualapai Mexican Vole From the Federal List of Endangered and Threatened Wildlife	We, the Service, are removing the Hualapai Mexican vole from the Federal List of Endangered and Threatened Wildlife due to recent data indicating that the original classification is now erroneous. This action is based on a thorough review of the best available scientific and commercial information, which indicates that the currently listed subspecies is not a valid taxonomic entity.

FWS		Draft Barton Springs Edwards Aquifer Conservation District Habitat Conservation Plan and Draft Environmental Impact Statement; Barton Springs salamander and Austin blind salamander, Texas	This is a notice of availability for the draft Barton Springs Edwards Aquifer Conservation District habitat conservation plan and draft environmental impact statement for take of the Barton Springs salamander (*Eurycea sosorum*) and the Austin blind salamander (*Eurycea waterlooensis*) in Travis and Hays Counties, Texas.
FWS		NOA: Application to Participate in American Burying-Beetle Amended Industry Conservation Plan (Council Oak Resources, LLC and Corterra Energy Operating, LLC, apps)	This is a notice of availability for incidental take permit applications under the American Burying Beetle amended Industry Conservation Plan (ICP); the two applicants are Council Oak Resources, LLC and Corterra Energy Operating, LLC. The applicants request a permit for oil and gas upstream and midstream production, including activities associated with oil and gas well field and pipeline infrastructure (gathering, transmission, and distribution), including geophysical exploration (seismic), construction, maintenance, operation, repair, decommissioning, and reclamation in Oklahoma. Required by section 10(c) of the Endangered Species Act, this notice alerts the public that the incidental take permit applications are available for public review and comment.

FWS		Mexican Wolf (*Canis lupus baileyi*) Draft Recovery Plan	A notice of availability of the Mexican Wolf Draft Recovery Plan, First Revision will be published in the Federal Register. The purpose of the notice is to request review and comment on the draft revised recovery plan from local, State, and Federal agencies, Tribes, and the public in both the United States and Mexico.
FWS		Giant Garter Snake; Notice of Availability of Second Revised Draft Recovery Plan	This document describes the strategy, objectives, and actions necessary for achieving recovery of the giant garter snake, along with criteria that, when met, signify that the Service may be able to remove the species from the Federal List of Endangered and Threatened Wildlife. The plan focuses on establishing and protecting self-sustaining populations throughout the range of the species, restoring and conserving healthy wetland ecosystems that will support the species, and ameliorating or eliminating the threats that caused the species to be listed.
FWS	1018-BB54	Listing Determination for the I'iwi	This final rule lists the i'iwi (*Drepanis coccinea*), a forest bird endemic to Hawaii, as threatened under the Endangered Species Act.
FWS		Initiation of 5-Year Status Reviews of 23 Southeastern Species	The Fish and Wildlife Service will announce the initiation of 5-year status reviews of 23 Southeastern Species under the Endangered Species Act (Act). This notice announces our active review of 22 endangered species and 1 threatened species.

FWS	1018-BB74	Establishment of a Nonessential Experimental Population of the Oregon Silverspot Butterfly in Northwestern Oregon	The U.S. Fish and Wildlife Service, with the support of the State of Oregon Parks and Recreation Department (the agency with responsibility for conservation of invertebrate species in Oregon), wants to reestablish the Oregon silverspot butterfly, a federally listed threatened species, within its historical range at two sites in northwestern Oregon: Saddle Mountain State Natural Area in Clatsop County, and Nestucca Bay National Wildlife Refuge in Tillamook County. We would reestablish the Oregon silverspot butterfly under the authority of section 10(j) of the Endangered Species Act of 1973, as amended, and classify the populations reintroduced to these two areas as part of the nonessential experimental population identified in this rule.

FWS		Louisiana Pinesnake; Notice of Availability for the Candidate Conservation Agreement with Assurances	The programmatic Candidate Conservation Agreement with Assurances (CCAA), which would be between the Louisiana Department of Wildlife and Fisheries (LDWF) and the U.S. Fish and Wildlife Service, will allow LDWF to issue certificates of inclusion to eligible non-federal landowners in Bienville, Beauregard, Jackson, Natchitoches, Rapides, Sabin, Vernon, Winn, Grant, and Allen Parishes, Louisiana, whose conservation management agreements are approved. Landowners who enroll through the CCAA will receive assurances against take liability for incidental take of the Louisiana pinesnake from their conservation actions.

FWS		Notice of Intent to Prepare a Draft Environmental Impact Statement for the Proposed Deschutes Basin Habitat Conservation Plan in Oregon	The U.S. Fish and Wildlife Service Service) has been leading a large scale, multi-party planning effort to address irrigation infrastructure improvements that will benefit the conservation of endangered and threatened species in the Deschutes River Basin in Central Oregon. This effort has spanned many years and has involved eight Central Oregon irrigation districts (constituting the Deschutes Basin Board of Control), the City of Prineville, and the U.S. Bureau of Reclamation as well as other parties. In accordance with the National Environmental Policy Act, we are providing notice to all interested parties that the Service intends to prepare a draft environmental impact statement to evaluate the impacts of alternatives relating to the potential issuance of Endangered Species Act incidental take permits to the City of Prineville and to the eight irrigation districts represented by the Deschutes Basin Board of Control in central Oregon. We are also announcing the initiation of a public scoping period for this effort to engage Federal, Tribal, State, and local governments and the public in the identification of issues and concerns, potential impacts, and possible alternatives to the proposed action for consideration in the draft

FWS		June 2017 Batched 12-Month Findings for Three Species (Kirtland's snake, Mohave shoulderband snail, and San Felipe gambusia)	We have completed 12-month findings on petitions requesting listing of three species under the Endangered Species Act, and determined that the Kirtland's snake (found in the Midwestern United States), the Mohave shoulderband snail (found in the western Mojave Desert in California), and the San Felipe gambusia (found in Texas waters) are not warranted for listing.
FWS		Intent to Prepare a Draft Environmental Impact Statement and Associated Documents for LCRA Transmission Services Corporation's Proposed Habitat Conservation Plan, TX	The U.S. Fish and Wildlife Service is announcing that it will prepare a draft environmental impact statement on the proposed Lower Colorado River Authority Transmission Services Corporation's (LCRA TSC; applicant's) habitat conservation plan (HCP). The publication of this notice is required by the National Environmental Policy Act. Included in the notice is information about the proposed HCP and opportunities for the public to provide information that may be relevant to the proposed action and alternatives to consider. LCRA TSC has scheduled public scoping meetings for the week of June 19, 2017.

FWS		Notice of Availability of a Draft Candidate Conservation Agreement, Draft Candidate Conservation Agreements with Assurances, and Draft Environmental Assessment for Activities within Eddy County, New Mexico and Culberson County, Texas; Includes Texas Hornshell (Proposed for Listing)	This is a notice of availability for a draft candidate conservation agreement, a draft candidate conservation agreement with assurances with the Center of Excellence in Hazardous Material Management, a draft candidate conservation agreement with assurances with the New Mexico State Lands Office (collectively referred to as the agreements), a draft environmental assessment, and two applications (one for each applicant) for Endangered Species Act section 10(a)(1)(A) enhancement of survival permits (permit) for the Texas hornshell in Texas and New Mexico. This notice, required by section 10(c) of the Endangered Species Act, alerts the public that the draft agreements, draft EA, and applications for the permits are available for public review and comment.
FWS		Lost Hills Solar Project, Kern County, California; Draft Environmental Assessment and Draft Habitat Conservation Plan	CED Lost Hills Solar, LLC (applicant) has applied for an incidental take permit under the Endangered Species Act for a habitat conservation plan (HCP) for the Lost Hills Solar Project in Kern County, California. The permit would authorize the take of the federally endangered San Joaquin kit fox incidental to the construction, operation and maintenance, and decommissioning of the solar project. This notice, required by section 10(c) of the ESA, alerts the public that the draft HCP and draft Environmental Impact Statement are available for public review and comment.

FWS	1018-BA41	Removal of the Greater Yellowstone Ecosystem Population of Grizzly Bears from the List of Endangered and Threatened Wildlife	The U.S. Fish and Wildlife Service is issuing a final rule to establish the Greater Yellowstone Ecosystem (GYE) grizzly bear as a Distinct Population Segment (DPS) and remove (delist) the GYE population of grizzly bears from the Federal List of Endangered and Threatened Wildlife under the Endangered Species Act.
FWS	1018-BB64	San Fernando Valley Spineflower 6-mo Extension on Final Listing	The Service announces a 6-month extension of the final determination of whether to list the the San Fernando Valley spineflower, a plant species from southern California, as a threatened species. We also are reopening the comment period on the proposed rule to list the species for an additional 30 days. We are taking this action based on substantial disagreement regarding the potential impact of Argentine ant invasion on the pollination ecology of the San Fernando Valley spineflower and scientific uncertainty related to establishment of this species by seeding suitable, unoccupied areas.

FWS		General Conservation Plan Oil and Gas Activities in Santa Barbara County, CA	The Service is seeking input from the public to identify potential issues and concerns, potential impacts, and possible alternatives to be considered in development of either an environmental assessment or an environmental impact statement under the National Environmental Policy Act, as amended, for a proposed General Conservation Plan for oil and gas activities in Santa Barbara County. The proposed General Conservation Plan is a collaborative and comprehensive strategy that will allow the Service to work more efficiently and effectively with project proponents to ensure compliance with the ESA. Through this collaborative approach, the Service will work with oil and gas companies to implement conservation measures that minimize and mitigate for take of covered species.

FWS		Exemption from Threatened Species Permits for a Qualifying Beluga Sturgeon Aquaculture Facility	The U.S. Fish and Wildlife Service (Service) is providing notice of an exemption to permit requirements granted under our regulations to carry out the Endangered Species Act of 1973, as amended (Act). The Service, in June 2016, granted an exemption for beluga sturgeon (*Huso huso*) reared in an aquaculture facility, Sturgeon AquaFarms, in Bascom, Florida that meets the criteria under our regulations. The exemption authorizes the facility to take beluga sturgeon from its aquacultured stock for the purpose of harvesting aquacultured beluga sturgeon meat and also authorizes the facility to engage in interstate commerce and export of beluga sturgeon meat harvested from the facility's aquacultured stock, subject
FWS		Foreign Endangered Species; Notice of Issuance of Permits (Charles Waibel, first)	This notice is a periodic action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the issuance of permits under the Endangered Species Act (ESA). This notice only informs the public that, after going through a complete review of the submitted applications and considering any comments from the public or outside experts, the Service has determined that all of the issuance criteria of the ESA have been meet.

FWS		Endangered Species; Receipt of Applications for Permits (Foreign Species Permits: Philadelphia Zoo, first applicant)	This notice is a weekly action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the receipt and issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). This notice provides the public an opportunity to comment on ESA and MMPA permits. There are no decisions announced in these weekly notices, but we cannot finalize the review of the permit applications until the conclusion of a mandatory 30-day comment period.
FWS		Endangered Species; Receipt of Applications for Permits (Foreign species applications; University of Texas-Austin, first applicant)	This notice is a weekly action taken by the U.S. Fish and Wildlife Service, Division of Management Authority to notify the public of the receipt and issuance of permits under the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). This notice provides the public an opportunity to comment on 17 permits under the ESA and none under the MMPA. There are no decisions announced in these weekly notices, but we cannot finalize the review of the permit applications until the conclusion of a mandatory 30-day comment period.

FWS		Notice of Intent to Prepare an Environmental Impact Statement; Hycroft Mining Company; Request for Take Permits Under the Bald and Golden Eagle Protection Act	The U.S. Fish and Wildlife Service (Service) is considering the issuance of eagle take permits under the Bald and Golden Eagle Protection Act (Eagle Act). We intend to prepare a joint Environmental Impact Statement (EIS) with the Bureau of Land Management (BLM). We are a cooperating agency with the BLM on the development of this EIS. The BLM will be analyzing potential impacts of their decision regarding Hycroft Resource and Development Incorporated's (Hycroft/Applicant) proposed expansion as described in BLM's Notice of Intent published in December, 2014 (79 FR 78469). This EIS will also analyze impacts associated with the Service's eagle take permit decisions.
FWS	1018-AZ69	Migratory Bird Permits; Control Order for Introduced Migratory Bird Species in Hawaii (Cattle Egrets and Barn Owls)	Introduced, nonnative, alien, and invasive species in Hawaii displace, compete with, and consume native species, some of which are endangered, threatened, or otherwise in need of additional protection in order to increase or maintain viable populations. To protect native species, a control order is established for cattle egrets and barn owls, two invasive migratory bird species in Hawaii, under the direction of Executive Order 13112.

FWS	1018-BB24	Migratory Bird Subsistence Harvest in Alaska; Use of Inedible Bird Parts in Authentic Alaska Native Handicrafts for Sale	The U.S. Fish and Wildloife Service is amending the permanent subsistence migratory bird harvest regulations in Alaska. This rule enables Alaska Natives to sell authentic native articles of handicraft or clothing that contain inedible byproducts from migratory birds that were taken for food during the Alaska migratory bird subsistence harvest season. The rule was developed under a co-management process involving the Service, the Alaska Department of Fish and Game, and Alaska Native representatives.
FWS	1018-BB73	2018–19 Migratory Game Bird Hunting Regulations	This proposed rule is the first in the series to establish the 2018-19 annual migratory bird hunting regulations.
FWS	1018-BB40	Migratory Bird Hunting; Seasons and Bag and Possession Limits for Certain Migratory Game Birds for the 2017–18 Season	This rule establishes the seasons and bag and possession limits for the 2017-18 migratory game bird hunting season.
FWS	1018-BB06	Migratory Bird Hunting; Approval of Corrosion-inhibited Copper Shot as Nontoxic for Waterfowl Hunting	The Service proposes to approve corrosion-inhibited copper shot for hunting waterfowl and coots. We have concluded that the shot is unlikely to adversely affect fish, wildlife, or their habitats. We propose to change the regulation at 50 CFR 20.21(j) accordingly.

FWS	1018-AY30	Eagle Permits: Revision to Regulations for Eagle Incidental Take and Take of Nests; Correction	In 2016, the Service finalized revisions to permit regulations regarding permits that we issue for some activities involving eagles. In that final rule, we updated a table that includes permit application fees. Because of a formatting error in the rule, the revisions were not able to be incorporated into the Code of Federal Regulations. With this document, we correct the formatting error. This rule is purely an administrative action and does not affect the provisions of the rule in any substantive way.
FWS		Notice of intent to implement annual hunting fees, annual fishing fees, and special permit fees; Clarks River National Wildlife Refuge, KY [FWS–R4–R–2016–N141]	Clarks River National Wildlife Refuge proposes to implement annual hunting and fishing fees and special permit fees for recreational activities. The proposed cost for the annual access permit is $15 (free for youth under 16, and $5 for seniors 65 and over); there would be a $50 minimum fee for annual Recreational Special Use Permit authorizing commercial recreational activities to be conducted on the Refuge.

FWS		Notice of Intent to Reopen the Planning Process for the Comprehensive Conservation Plan and Environmental Assessment at Crystal River National Wildlife Refuge	The Fish and Wildlife Service is submitting a notice of intent to prepare a comprehensive conservation plan for Crystal River National Wildlife Refuge (NWR) in Citrus County, Florida. The planning process for Crystal River NWR began in 2008. The planning process was delayed when rulemaking for the Kings Bay Manatee Protection Area (Manatee Protection Area) was initiated in 2010 and completed in 2012.
FWS		Notice of Availability for the Grays Harbor National Wildlife Refuge and Black River Unit of Billy Frank Jr. Nisqually National Wildlife Refuge, Grays Harbor and Thurston Counties, WA; Comprehensive Conservation Plans and Finding of No Significant Impact for Environmental Assessment	The U.S. Fish and Wildlife Service will announce the availability of our comprehensive conservation plans and finding of no significant impact (signed on March 10, 2017) for Grays Harbor NWR, located in Grays Harbor County, Washington, and the Black River Unit (Unit) of Billy Frank Jr. Nisqually NWR, located in Thurston County, Washington.
FWS		NOA: Camas National Wildlife Refuge, Jefferson County, ID; Comprehensive Conservation Plan and Finding of No Significant Impact for Environmental Assessment	A finding of no significant impact (FONSI) was signed on March 10, 2017, and the comprehensive conservation plan (CCP) was completed for Camas National Wildlife Refuge, located in Jefferson County, Idaho. The CCP will guide management of the Refuge for 15 years or until it is revised, and actions will be implemented as funding becomes available. We are informing the Secretary of our intent to publish the notice of availability for the Camas National Wildlife Refuge CCP and the FONSI for the environmental assessment.

FWS		Lower Klamath, Clear Lake, Tule Lake, Upper Klamath, and Bear Valley National Wildlife Refuges, Klamath County, OR; Siskiyou and Modoc Counties, CA; Record of Decision for Final Comprehensive Conservation Plan/Environmental Impact Statement	The notice informs the public that the U.S. Fish and Wildlife Service (Service) has signed a Record of Decision on January 13, 2017, for the Final CCP/EIS for the Klamath Refuges. The Final CCP/EIS evaluated alternatives for managing the Klamath Refuges over the next 15 years. The Record of Decision includes a statement of the decisions made, the basis for the decisions, a description of the alternatives considered, a description of the environmentally preferable alternative, an overview of the measures to minimize environmental impacts, and a summary of public involvement in the decisionmaking process. The Service can now begin implementing the CCP.
FWS		Silvio O. Conte National Fish and Wildlife Refuge; Record of Decision for Final Comprehensive Conservation Plan and Environmental Impact Statement	The U.S. Fish and Wildlife Service announces the availability of the record of decision (ROD) on the final comprehensive conservation plan (CCP) and environmental impact statement (EIS) for Silvio O. Conte National Fish and Wildlife Refuge (NFWR). We prepared the ROD pursuant to the National Environmental Policy Act of 1969 (NEPA) and its implementing regulations. The Service is furnishing this notice to advise the public and other agencies of our decision and of the availability of the ROD.
FWS	1018-BB75	Refuge-Specific Hunting and Sport Fishing Regulations, 2017–18	This proposed rule begins the annual process of updating refuge-specific regulations for National Wildlife Refuges.

FWS	1018-BA33	Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4	The proposed rule:• Is in response to requests from States to revise and simplify the rules for license certification. The Service worked closely with DOI solicitors and Association of Fish and Wildlife Agencies (AFWA) attorneys in developing the new language. • Includes changes that were reviewed by Regional and State representatives, and interested stakeholders, during pre-rulemaking comment periods and were developed considering the comments we received. • Includes definitions and additions to the rule that will clarify the rule and improve national consistency. • Was developed in coordination with the AFWA, the Federal Aid Coordinators Working Group, Regional WSFR offices, State representatives, and members of interest organizations.

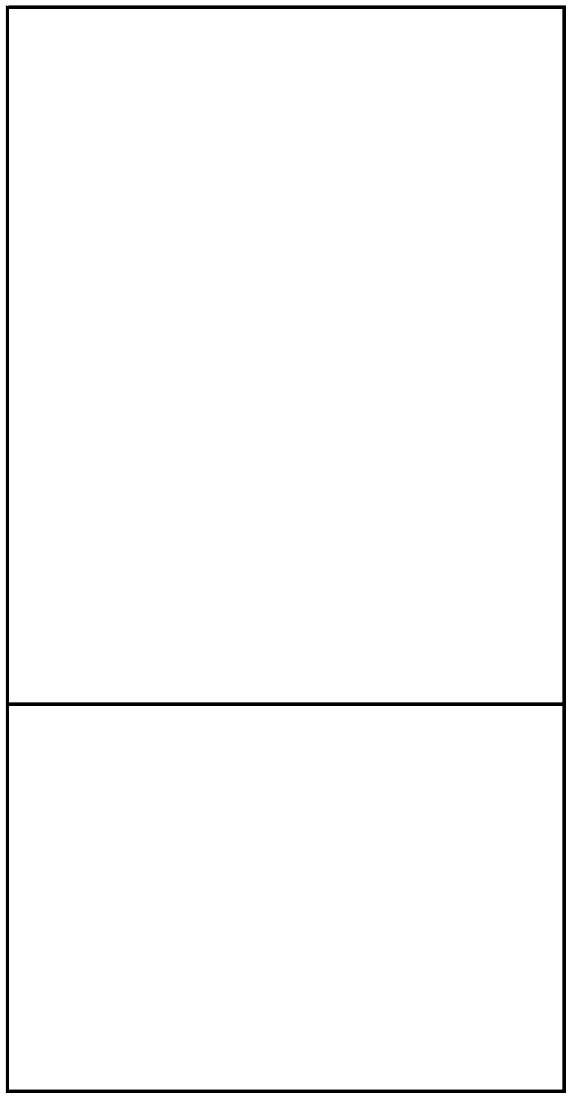
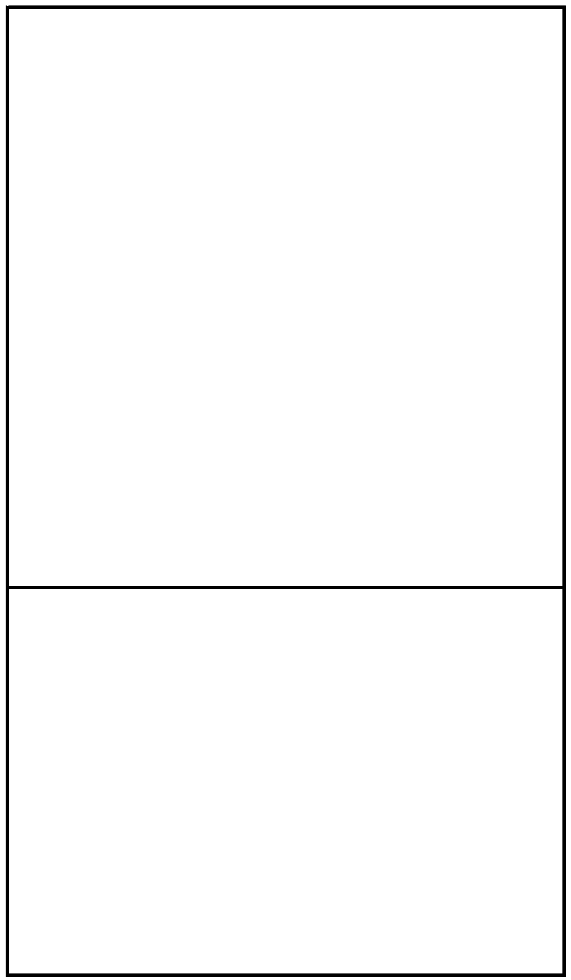
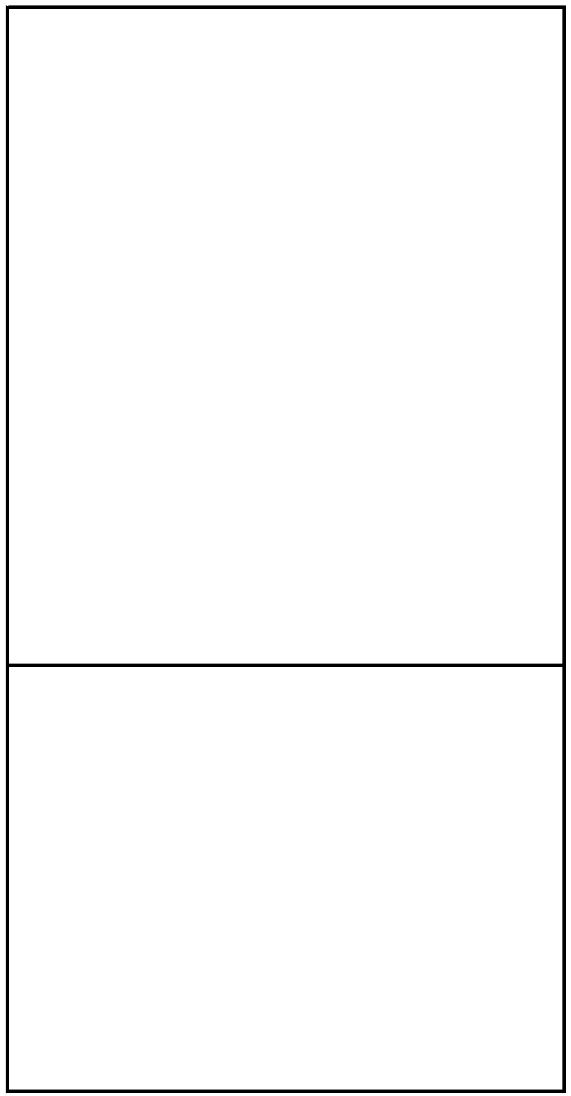
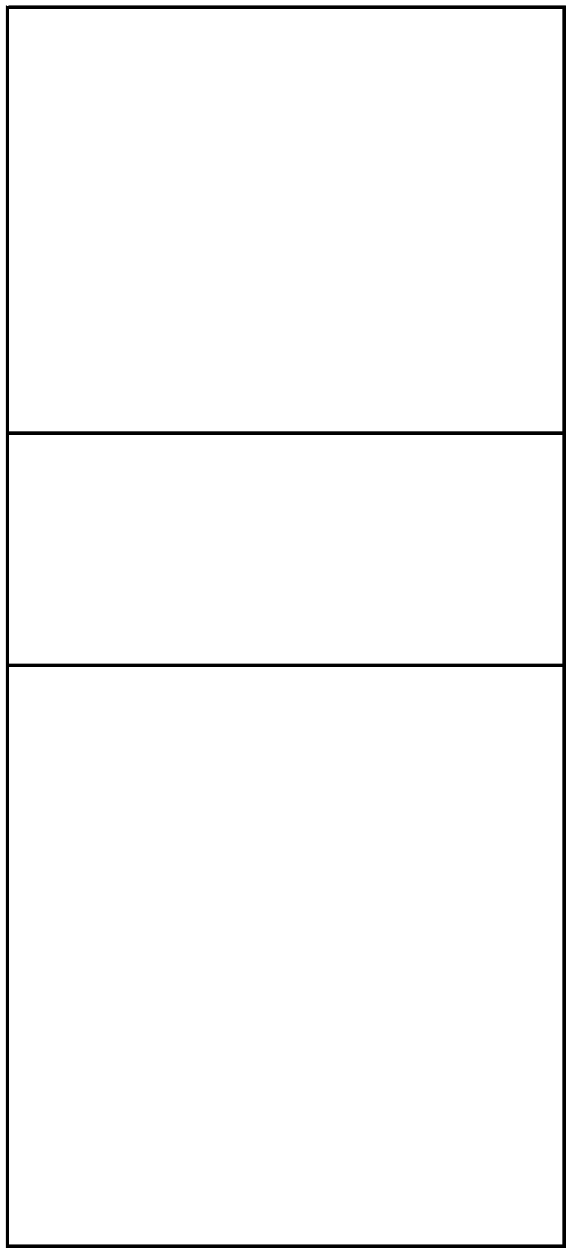
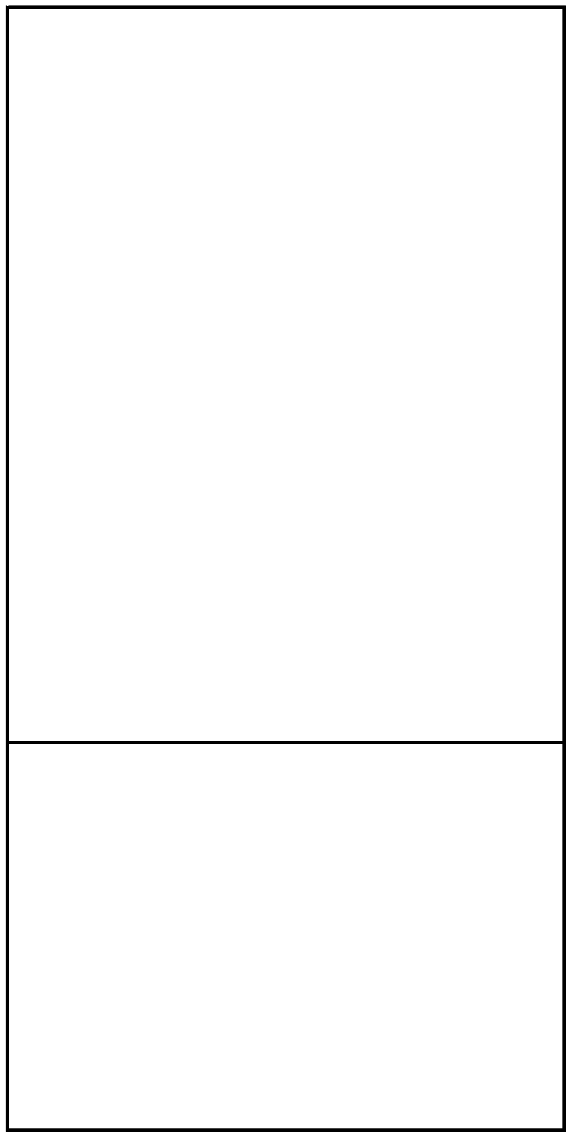
Explain Critical Date if "Other"

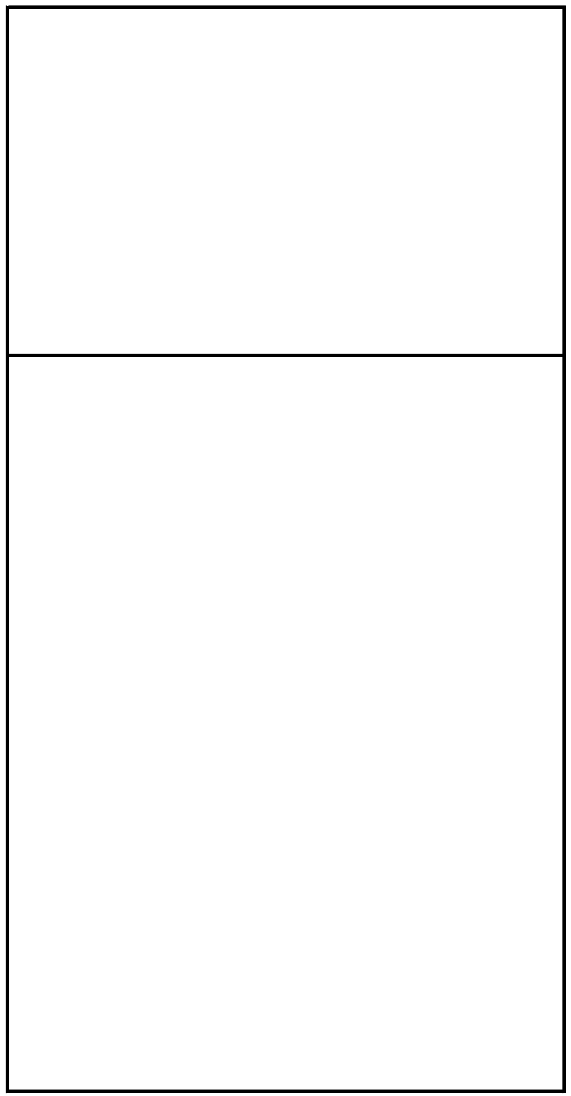




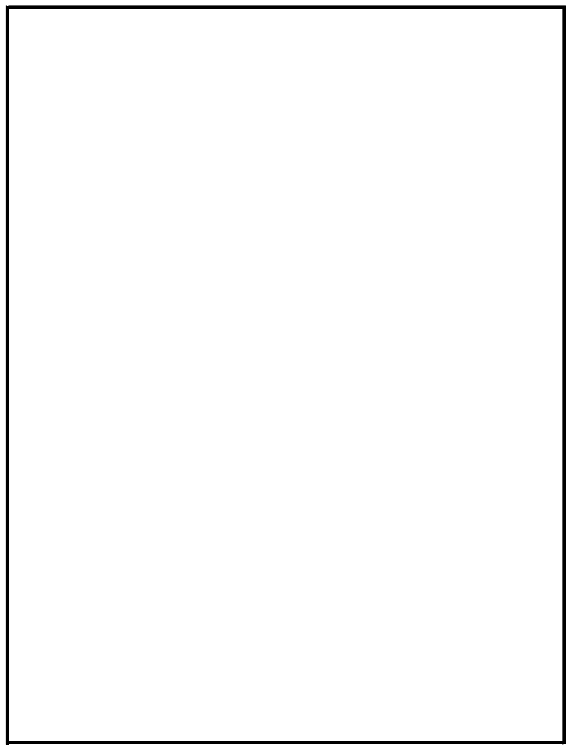




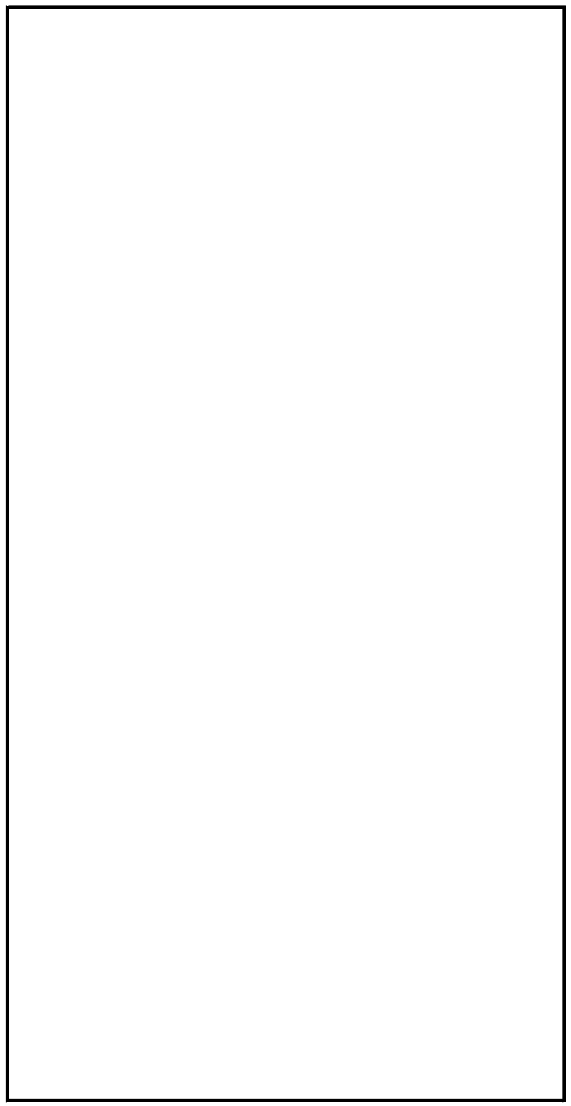


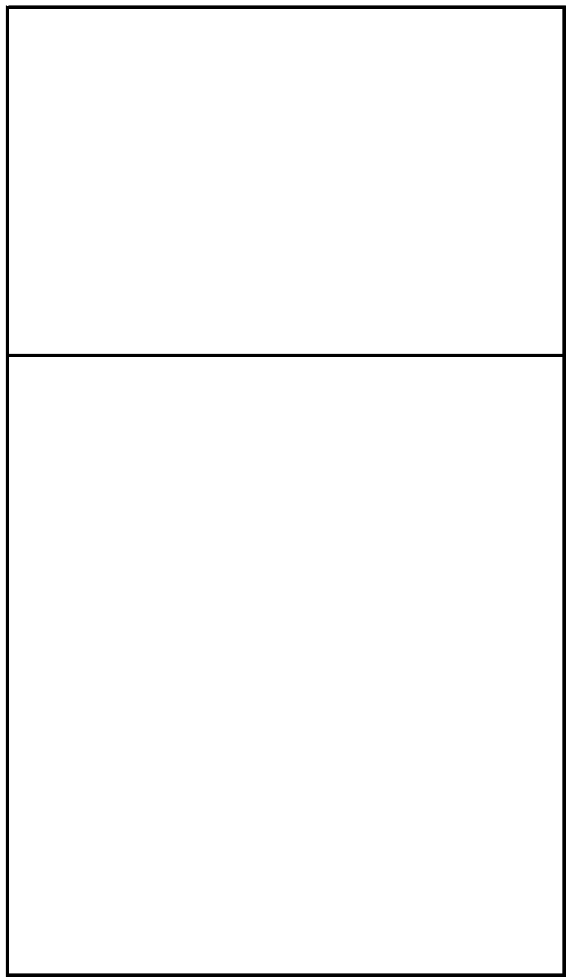


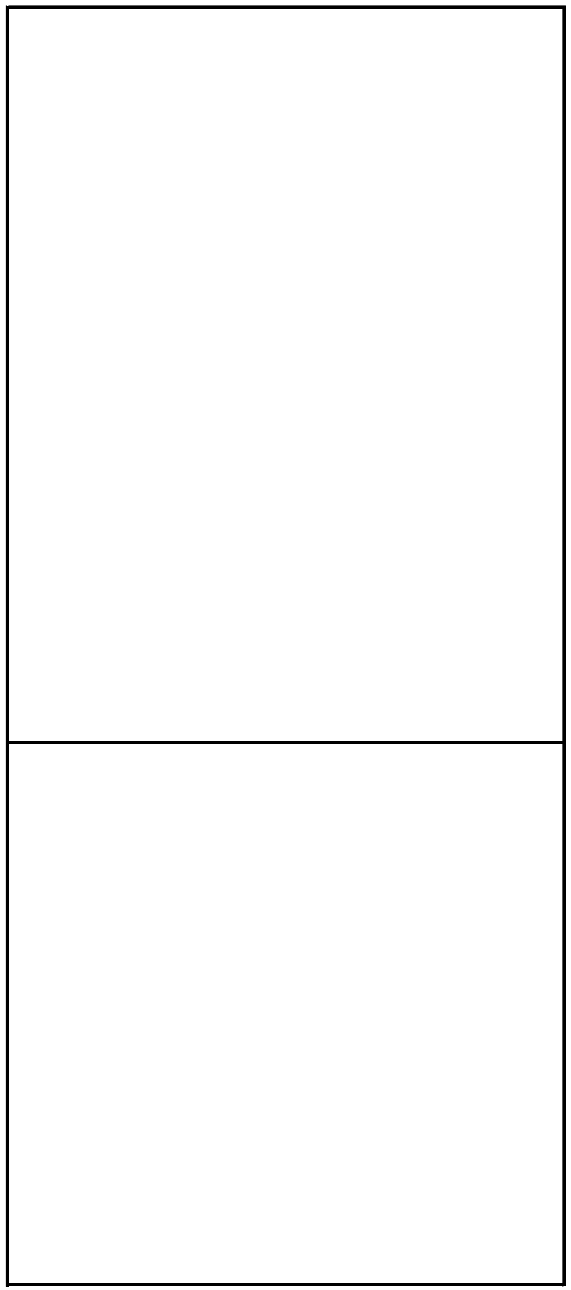
Judicial date for final plan 11/30/2017; draft needs 60-day public comment period and time for incorporation of public comments

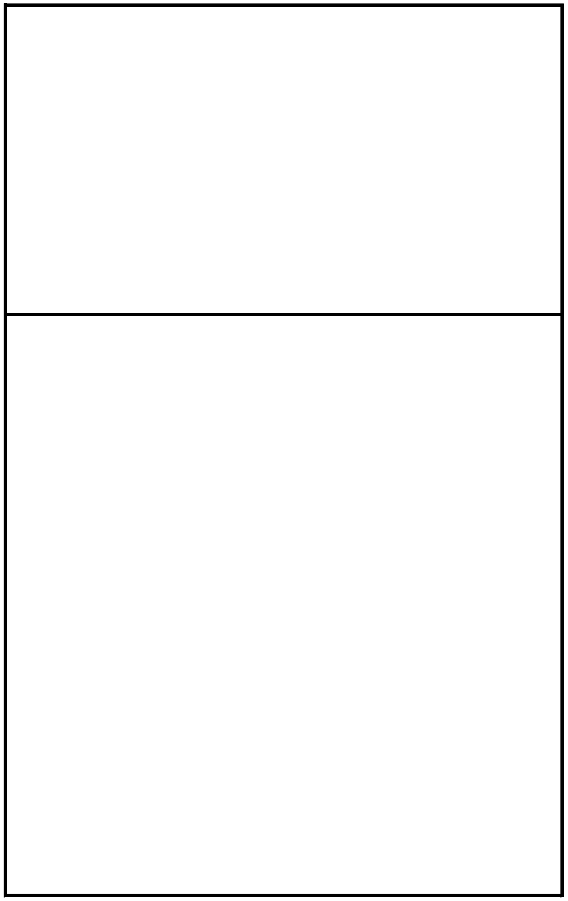


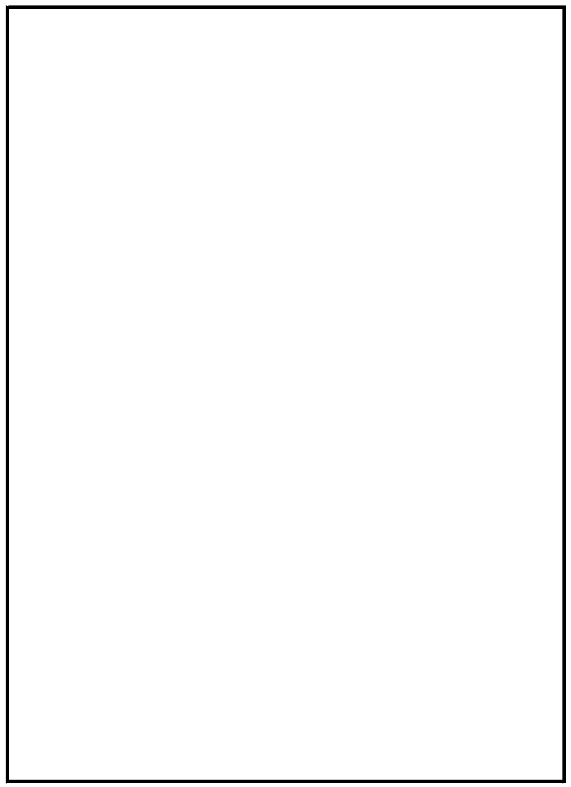
The Louisiana pinesnake was proposed for listing as threatened on October 6, 2016. A final decision on listing the Louisiana pinesnake must be made by October 6, 2017. Private landowners have requested to have opportunities to voluntarily enroll and receive assurances prior to the final listing action. After the listing is final, landowners will no longer be able to enroll in the CCAA.

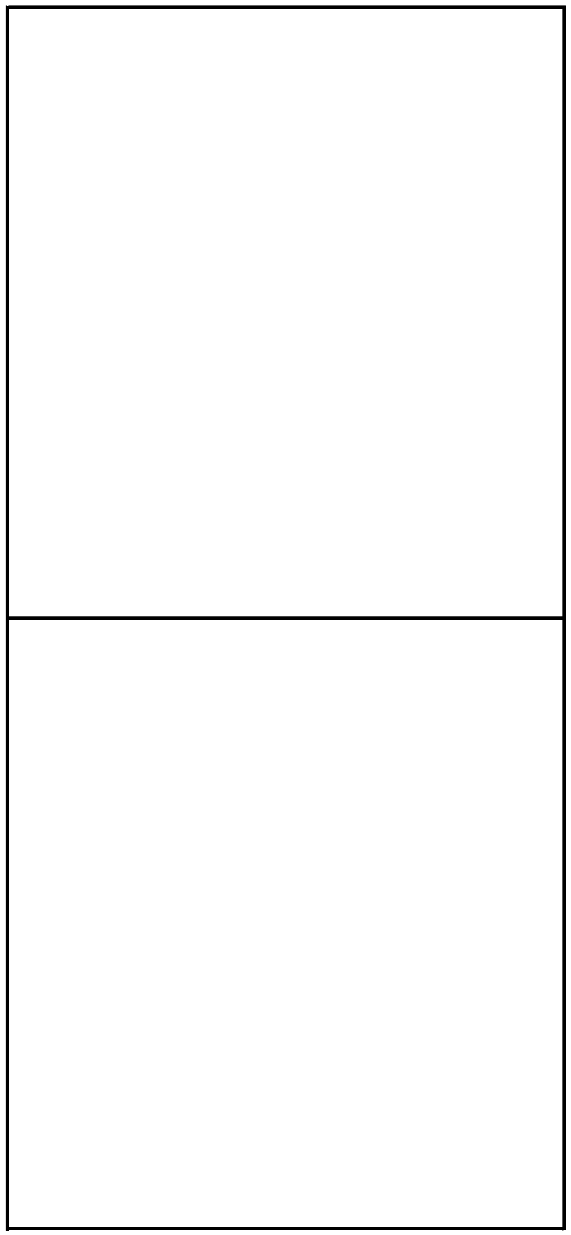


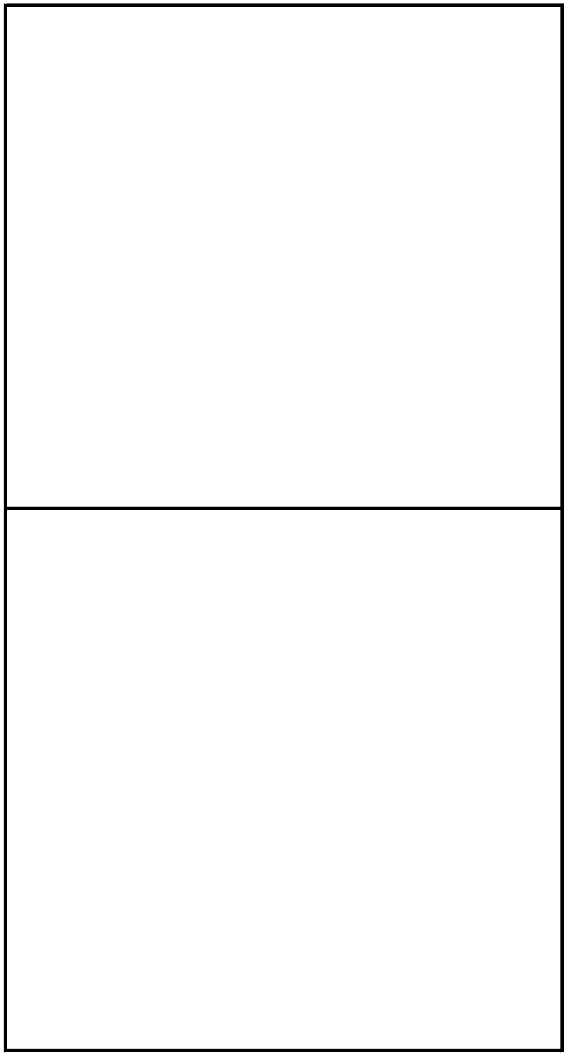


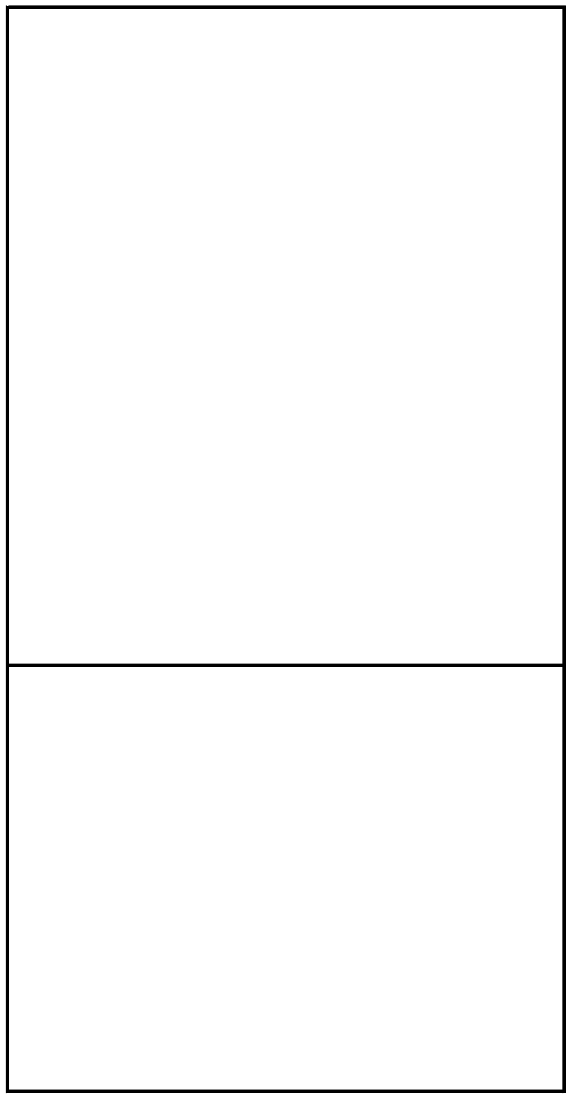












Must be published prior to Flyway Council meetings, which begin in August.
This is the drop-dead date to legally open 2017/2018 hunting seasons.

---

Good afternoon, all.

Exec Sec needs to report soon to the Regulatory Reform Task Force. One of the topics for discussion is the current status of regulatory actions included on the Q4 FY2017 report to OMB.

Attached to this message is the FWS portion of that report. I have changed the last column to provide space for a status update. I have attempted to fill in that column with information from the 30-day-out report and other sources.

Please update and revise this information as best you can. **DES:** For those actions with a not-warranted finding, we will still need to publish a document, so please provide a status update on its development.

I'm sorry for the short deadline; PPM just got this assignment.

Thank you and best regards,

Susan Wilkinson

DRAFT

U.S. Fish and Wildlife Service Q4 FY2017 Regulatory Report to OMB
Status Update as of August 4, 2017

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Current Status; Next Step
(b)(5) DPP (b)(5) DPP (b)(5) DPP (b)(5) DPP (b)(5) DPP (b)(5) DPP (b)(5) DPP	(b) (5) D P P	(b)(5) DPP(b)(5) DPP(b)(5) DPP (b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP(b)(5) DPP (b)(5) DPP(b)(5) DPP(

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Current Status; Next Step
‡1018-AY05 Removal of the Eastern Cougar from the List of Endangered and Threatened Wildlife 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to delist the eastern cougar, formerly found in eastern North America, due to extinction. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	
1018-AZ02 Listing Determination for the Sonoyta Mud Turtle 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/21/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Sonoyta mud turtle as an endangered species under the Endangered Species Act. This turtle is found in freshwater habitats in Arizona, and also Mexico. **Controversy:** This species occurs near the U.S.-Mexico border; however, no conflicts with border activities or potential border wall construction have been identified at this time. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re EO 12866 significance determination.

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Current Status; Next Step
1018-AZ38 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Three Hawaiian Big Island Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will designate critical habitat for three plant species on Hawaii Island and correct the maps for existing designations for an additional four species. FWS intends to exclude lands owned or managed by the Queen Liliuokalani Trust, the Department of Hawaiian Homelands, and other private landowners under section 4(b)(2) of the Endangered Species Act. **Controversy:** Resolved. FWS coordinated with the Queen Liliuokalani Trust, landowners, and government jurisdictions, and will exclude lands owned by these entities under section 4(b)(2) of the Act. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	
1018-AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant. Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Timothy J. Van Norman, 703-358-2350.	

Commented [A1]: Propose OMB RMO review since addressing fee increases

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re EO 12866 significance determination.

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Current Status; Next Step
‡1018-AZ69 Migratory Bird Permits; Control Order for Introduced Migratory Bird Species in Hawaii (Cattle Egrets and Barn Owls) 50 CFR 21	FR	Not significant. Not major. Not court driven. **What the rule does:** This rule will add a control order to apply to cattle egrets and barn owls, two introduced and invasive migratory bird species in Hawaii. The ranges of both species have expanded to occupy all of the Hawaiian islands. Both species have been found to prey on endemic endangered or threatened species. Without this order, control of the two species would require issuing depredation permits, which would add to State and Federal agency costs for control activities that will benefit listed species. **Controversy:** None. **Dates of any briefs provided to EOP:** None. **Contact:** Jerry Thompson (703) 358-2016. **OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."	Published 7/25/17

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re EO 12866 significance determination.

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Current Status; Next Step
‡1018-AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re EO 12866 significance determination.

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Current Status; Next Step
‡1018-BA31 Nonsubsistence Take of Wildlife, and Public Participation and Closure Procedures, on National Wildlife Refuges in Alaska 50 CFR 32 and 36	FR	Not significant. Not major. Not court driven. **What the rule does:** This final rule published August 5, 2016 (81 FR 52248) and became effective September 6, 2016. The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act, signed by the President on April 3, 2017 (Pub. L. 115–20). This action conforms to Pub. L. 115–20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the final rule was nullified under the Congressional Review Act. **Controversy:** The original rulemaking action was controversial. This action is congressionally directed. **Dates of any briefs provided to EOP:** None. **Contact:** Stephanie Brady, 907-306-7448. **OMB's comments in response to Q317 list:** OMB requested a briefing paper.	

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re EO 12866 significance determination.

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Current Status; Next Step
‡1018-BA33 Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4 50 CFR 80	PR	Not significant. Not major. Not court driven. **What the rule does:** This is the first in a four-phase process for directing State fish and wildlife agencies on how they must receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, FWS distributes annual apportionments to States from trust funds derived from excise tax and fuel tax revenues. This phase would address definitions, requirements for licenses counted for apportionment of Federal financial assistance, program income, and other related issues. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR. **Controversy:** None anticipated. State fish and wildlife agencies, as well as other partners, support this final rule and have been closely involved in its development. **Dates of any briefs provided to EOP:** None. **Contact:** Lisa Van Alstyne, 703-358-1705.	

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Current Status; Next Step
‡1018-BA43 Reclassifying the Borax Lake Chub from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Borax Lake chub from endangered to threatened. The primary threats to the species have been ameliorated; however, due to ongoing threats from geothermal development, FWS is proposing to reclassify the species to threatened status rather than delisting it. FWS is also proposing to correct the List of Endangered and Threatened Wildlife to reflect the current scientifically accepted taxonomy of this species as *Siphateles boraxobius* (=*Gila boraxobius*). **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. **OMB's comment in response to Q317 list:** "If the downlisting is accompanied with a reduction in regulatory burden (e.g., an Endangered Species Act section 4d rule), it is a deregulatory action under E.O. 13771."	

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re EO 12866 significance determination.

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Current Status; Next Step
‡1018-BA74 Listing Determination and Critical Habitat Designation for the Guadalupe Fescue 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 9/09/17, settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Guadalupe fescue, a grass species found in Texas and Mexico, as an endangered species under the Endangered Species Act. FWS will also make a final determination on the designation of critical habitat for the Guadalupe fescue under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	
1018-BA76 Subsistence Management Regulations for Public Lands in Alaska; 2017-2018 and 2018-2019 Subsistence Taking of Fish and Shellfish 50 CFR 100; 50 CFR 242	FR	Not Significant. Not Major. **What the rule does:** FWS and the U.S. Forest Service (U.S. Department of Agriculture) will revise the regulations for seasons, harvest limits, methods, and means for the taking of fish and shellfish for subsistence uses in Alaska during the 2017-2018 and 2018-2019 regulatory seasons. The Federal Subsistence Board will also address customary and traditional use determinations for fish and shellfish. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Theo Matuskowitz, 907 786-3867.	

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re EO 12866 significance determination.

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Current Status; Next Step
1018-BA78 Listing Determination and Critical Habitat Designation for the Black Warrior Waterdog 50 CFR 17	FR	Not significant. Not major. **Court driven: Final, 10/06/17, MDL settlement agreement.** **What the rule does:** FWS will make a final determination on a proposal to list the Black Warrior waterdog as an endangered species under the Endangered Species Act. FWS will also make a final determination on the designation of critical habitat for the Black Warrior waterdog under the Endangered Species Act. This salamander species is found in streams in the Black Warrior River Basin in Alabama. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

1018-BA80 Removing Textual Descriptions of Critical Habitat Boundaries for Plants on the Hawaiian Islands 50 CFR 17	FR	Not Significant. Not major. Not court driven. **What the rule does:** This rule will remove the textual descriptions of the critical habitat boundaries from certain entries at 50 CFR 17.99 (plants on the Hawaiian Islands) that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease, or in any other way change the critical habitat designations from which we are removing the textual descriptions of boundaries. This action will save taxpayer resources. We are taking this action in accordance with our May 1, 2012, revision of the regulations related to publishing textual descriptions of critical habitat boundaries in the CFR and as part of our response to Executive Order 13563 (January 18, 2011), which directs Federal agencies to review their existing regulations and then to modify or streamline them in accordance with what they have learned. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Carey Galst, 703-358-1954.

‡1018-BB06 Migratory Bird Hunting; Approval of Corrosion-Inhibited Copper Shot as Nontoxic for Waterfowl Hunting 50 CFR 20	PR	Not significant. Not major. Not court driven. **What the rule does:** Environ-Metal, Inc., of Sweet Home, Oregon, has applied for approval of shot composed of copper as nontoxic for waterfowl hunting in the United States. The shot formulation is at least 99.9 percent copper by weight, with a corrosion-inhibiting coating to prevent release of copper into terrestrial or aquatic environments. FWS has reviewed the shot as required under the criteria in the nontoxic shot approval procedures in FWS regulations. FWS' proposed approval of this shot formulation would increase the number of nontoxic shot options for hunters of migratory waterfowl. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. **OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771." ‡1018-BB22 Subsistence Management Regulations for Public Lands in Alaska—Applicability and Scope; Tongass National Forest Submerged Lands 50 CFR 100; 36 CFR 242	FR	Not significant. Not major. **Court driven. No deadline; however, FWS needs to show the plaintiffs and the court that progress is being made.** **What the rule does:** The U.S. District Court for Alaska, in an October 17, 2011, order, enjoined the United States "to promptly initiate regulatory proceedings for the purpose of implementing the subsistence provisions in Title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) with respect to submerged public lands within Tongass National Forest," and directed entry of judgment. To comply with the order, the Federal Subsistence Board (FWS/DOI and USDA/Forest Service, joint rulemaking) published a proposed rule to identify those submerged lands within the Tongass that did not pass to the State of Alaska at Statehood and therefore are subject to the subsistence provisions of ANILCA. DOI/FWS and USDA/Forest Service will now finalize the proposed rule. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Theo Matuskowitz, 907-786-3867.

‡1018-BB73 Migratory Game Bird Hunting Regulations, 2018–19 50 CFR 20	PR	**Significant. Major.** Not court driven. **What the rule does:** This rule proposes to establish annual hunting regulations for certain migratory game birds for the 2018–19 hunting season. FWS annually prescribes outside limits (frameworks) within which States may select hunting seasons. This proposed rule provides the regulatory schedule, describes the proposed regulatory alternatives for the 2018–19 duck hunting seasons, requests proposals from Indian tribes that wish to establish special migratory game bird hunting regulations on Federal Indian reservations and ceded lands, and requests proposals for the 2019 spring and summer migratory bird subsistence season in Alaska. Migratory game bird hunting seasons provide opportunities for recreation and sustenance; aid Federal, State, and tribal governments in the management of migratory game birds; and permit harvests at levels compatible with migratory game bird population status and habitat conditions. **Controversy:** None. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. **Note**: This action is not subject to EO 13771 (82 FR 9339, February 3, 2017) because it is issued with respect to routine hunting and fishing activities	Published 8/3/17

1018-BB76 Removal of the Monito gecko from the Federal List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to remove the Monito gecko from the Federal List of Endangered and Threatened Wildlife due to recovery. The Monito gecko is endemic to the island of Monito, which is located 68 kilometers west of Puerto Rico. This determination is based on a thorough review of the best available scientific and commercial information, which indicates that the threats to this species have been eliminated or reduced to the point that the species no longer meets the definition of an endangered species or a threatened species under the Endangered Species Act. FWS will also make available a post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.

1018-BB79 Removal of the Black-Capped Vireo from the Federal List of Endangered and Threatened Wildlife; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove the black-capped vireo, a bird species, from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring (PDM) plan. The black-capped vireo breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states. **Controversy:** A number of public comments opposed the delisting of the black-capped vireo, including one from the Office of Travis County Judge and one from a national park. Those concerns may be reflected in comments FWS receives on the draft PDM. A number of partner agencies have indicated concerns about having the necessary funds to implement the ongoing management needs (e.g., cow-bird removal) and monitoring identified for their lands, which may also result in concerns about the viability of both the delisting and the PDM plan. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.

Not court driven. **What the rule does:** FWS will make a listing determination for the island marble butterfly, found in Washington State, under the Endangered Species Act. FWS will, if prudent and determinable, propose to designate critical habitat for the species. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	
‡1018-BB99 Subsistence Management Regulations for Public Lands in Alaska; Subsistence Taking of Fish; Cook Inlet Area 50 CFR 100; 36 CFR 242	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to revise the regulations for seasons, harvest limits, methods and means for the subsistence taking of fish in the Cook Inlet of Alaska. This action would also reorganize specific regulations addressing the Kenai River, which would provide clarity for the public and allow the Federal Subsistence Board to correct regulatory conflicts that have arisen based on recent rulemaking. (This is a joint rulemaking between DOI/FWS and USDA/Forest Service.) **Controversy:** Senator Murkowski and Representative Young have expressed interest in this issue in the past; however, they have not recently contacted FWS about this issue. **Dates of any briefs provided to EOP:** None. **Contact:** Theo Matuskowitz, 907-786-3867.	

Commented [A3]: How would this reorganize the regulations and what regulations would it reorganize?

How will this impact seasons, means and harvest limits for subsistence taking of fish?

What are the regulatory conflicts?

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re EO 12866 significance determination.

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Current Status; Next Step
1018-BC01 Reclassifying the Kirtland's warbler from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Kirtland's warbler from endangered to threatened, due to the impact of management actions in addressing the primary threats to the species and decreasing the overall magnitude of the primary threats. The Kirtland's warbler is found in Michigan, Wisconsin, South Carolina, and Florida in the United States; in Canada during the breeding season; and in the Bahamas during the winter period. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	
1018-BC09 Removal of the Foskett Speckled Dace from the List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to remove the Foskett speckled dace, a fish in Oregon, from the Federal List of Endangered and Threatened Wildlife due to recovery. This determination is based on a thorough review of the best available scientific and commercial information, which indicates that the threats to this species have been eliminated or reduced to the point that the species no longer meets the definition of an endangered species or a threatened species under the Endangered Species Act. We will also make available a post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP**: None. **Contact**: Don Morgan, 703-358-2444.

1018-BC16 Listing Determination and Critical Habitat Designation for Three Southeast Darters 50 CFR 17	PR	Not significant. Not major. **Court driven: PR, 9/30/17, settlement agreement for listing determination for trispot darter and bridled darter. PR, 9/30/18, settlement agreement for listing determination for holiday darter.** **What the rule does:** FWS will make a listing determination for the holiday darter, trispot darter, and bridled darter under the Endangered Species Act. These fish are found in Alabama, Georgia, and Tennessee. FWS will, if prudent and determinable, also propose to designate critical habitat for the holiday darter, trispot darter, and bridled darter under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Critical habitat is not being proposed for these species at this time. If prudent and determinable, the critical habitat will be proposed under this RIN at a later stage.
1018-BC20 Endangered and Threatened Wildlife and Plants; Listing Determination and Critical Habitat Designation for the Blackfin Sucker	PR	Not significant. Not major. **What the rule does**: We will make a listing determination for the blackfin sucker under the Endangered Species Act. The blackfin sucker is a fish found in Kentucky. We will also, if prudent and determinable, propose to designate critical habitat for the blackfin sucker under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact**: Sarah Quamme 703 358-1796

1018-BC59 Listing Determination and Critical Habitat Designation for the San Joaquin Valley Giant Flower-Loving Fly 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a listing determination for the San Joaquin Valley giant flower-loving fly under the Endangered Species Act. This insect species is found in California. FWS will, if prudent and determinable, also propose to designate critical habitat for the San Joaquin Valley giant flower-loving fly under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	
1018-BC64 Endangered and Threatened Wildlife and Plants; Technical Correction for Tonkin Snub-nosed Monkey 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** We are removing the endangered Tonkin snub-nosed monkey from certain regulations that apply only to primates that are listed as threatened species (50 CFR 17.40). Tonkin snub-nosed monkeys were included in these regulations when this species was listed as threatened. However, this species was reclassified as endangered in 1990. Therefore, the provisions of the regulations for threatened primates no longer apply to Tonkin snub-nosed monkeys, and, accordingly, we are correcting this error in the Code of Federal Regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Janine Van Norman, 703-358-2370	Pending Bureau clearance

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018-AW66 Clean Vessel Act Grant Program, 50 CFR 85	PR	Not significant. Not major. Not court driven. **What the rule does:** This rule gives State agencies requirements for receiving Federal financial assistance for this competitive grant program (Clean Vessel Act of 1992, Sec. 5604) that supports installing waste reception/removal facilities for vessel septic waste, and associated education. This rule update would combine three *Federal Register* documents into one document at 50 CFR 85. We published an advance notice of proposed rulemaking in September 2015 (80 FR 55078) and established a Federal/State team to assist FWS with appropriate updates to clarify and simplify the program, placing more emphasis on clean water. **Controversy:** None anticipated. FWS is leading a Federal/State team to develop approaches to update the rule to reduce administrative burdens, offer services to a larger user group, and expand clean water opportunities. **Dates of any briefs provided to EOP:** None. **Contact:** Lisa Van Alstyne, 703.358.1942.	11/10/17
‡1018-AY05 Removal of the Eastern Cougar from the List of Endangered and Threatened Wildlife 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to delist the eastern cougar, formerly found in eastern North America, due to extinction. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Was on Q417 and Q317 as FR; pushing to 10/2/17

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re E.O. 12866 significance determination.

~~‡1018-AZ02 Listing Determination for the Sonoyta Mud Turtle 50 CFR 17~~	~~FR~~	~~Not significant. Not major.~~ **~~Court driven: Final, 9/21/17, settlement agreement.~~** **~~What the rule does:~~** ~~FWS will make a final determination on a proposal to list the Sonoyta mud turtle as an endangered species under the Endangered Species Act. This turtle is found in freshwater habitats in Arizona, and also Mexico.~~ **~~Controversy:~~** ~~This species occurs near the U.S. Mexico border; however, no conflicts with border activities or potential border wall construction have been identified at this time.~~ **~~Dates of any briefs provided to EOP:~~** ~~None.~~ **~~Contact:~~** ~~Sarah Quamme, 703-358-1796.~~	Was on Q417 in FR stage; Will be completed before Q118; remove. Not subject to OMB review
‡1018-AZ38 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Three Hawaiian Big Island Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will designate critical habitat for three plant species on Hawaii Island and correct the maps for existing designations for an additional four species. FWS intends to exclude lands owned or managed by the Queen Liliuokalani Trust, the Department of Hawaiian Homelands, and other private landowners under section 4(b)(2) of the Endangered Species Act. **Controversy:** Resolved. FWS coordinated with the Queen Liliuokalani Trust, landowners, and government jurisdictions, and will exclude lands owned by these entities under section 4(b)(2) of the Act. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Was on Q417 in FR stage; pushing to 10/4/2017

‡1018-AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant**.** Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Timothy J. Van Norman, 703-358-2350. OMB comment on Q417: Propose OMB RMO review since addressing fee increases. (Megan suggested we send a briefing paper.)	~~9/29/17~~ Pushed to 10/26/17

‡1018-AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741. Note: If this rule leads to a reduction in paperwork burden then it would be a deregulatory action under EO 13771. If this rule leads to a reduction in paperwork burden then it would be a deregulatory action under EO 13771.	~~9/29/17~~ ~~On Q317 and Q417~~ 12/15/17

‡1018-BB22 Subsistence Management Regulations for Public Lands in Alaska—Applicability and Scope; Tongass National Forest Submerged Lands 50 CFR 100; 36 CFR 242	FR	Not significant. Not major. **Court driven. No deadline; however, FWS needs to show the plaintiffs and the court that progress is being made.** **What the rule does:** The U.S. District Court for Alaska, in an October 17, 2011, order, enjoined the United States "to promptly initiate regulatory proceedings for the purpose of implementing the subsistence provisions in Title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) with respect to submerged public lands within Tongass National Forest," and directed entry of judgment. To comply with the order, the Federal Subsistence Board (FWS/DOI and USDA/Forest Service, joint rulemaking) published a proposed rule to identify those submerged lands within the Tongass that did not pass to the State of Alaska at Statehood and therefore are subject to the subsistence provisions of ANILCA. DOI/FWS and USDA/Forest Service will now finalize the proposed rule. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Theo Matuskowitz, 907-786-3867.	~~8/15/17~~ Was on Q317 and Q417; pushed to Q118 10/2/17
‡1018-BB23 Revision of Federal Migratory Bird Hunting and Conservation Stamp (Duck Stamp) Contest Regulations 50 CFR 91	PR	Not significant. Not major. ~~‡1018-BB73 Migratory Game Bird Hunting Regulations, 2018-19 50 CFR 20~~	~~PR~~	~~**Significant. Major.** Not court driven.~~ ~~**What the rule does:** This rule proposes to establish annual hunting regulations for certain migratory game birds for the 2018-19 hunting season. FWS annually prescribes outside limits (frameworks) within which States may select hunting seasons. This proposed rule provides the regulatory schedule, describes the proposed regulatory alternatives for the 2018-19 duck hunting seasons, requests proposals from Indian tribes that wish to establish special migratory game bird hunting regulations on Federal Indian reservations and ceded lands, and requests proposals for the 2019 spring and summer migratory bird subsistence season in Alaska. Migratory game bird hunting seasons provide opportunities for recreation and sustenance; aid Federal, State, and tribal governments in the management of migratory game birds; and permit harvests at levels compatible with migratory game bird population status and habitat conditions.~~ ~~**Controversy:** None.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Ron Kokel, 703-358-1967.~~ ~~**Note**: This action is not subject to EO 13771 (82 FR 9339, February 3, 2017) because it is issued with respect to routine hunting and fishing activities~~	~~7/15/17~~ Was on Q317 and Q417 Published 8/3/17 https://www.gpo.gov/fdsys/pkg/FR-2017-08-03/pdf/2017-16353.pdf

~~‡1018-BB73 Migratory Game Bird Hunting Regulations, 2018-19; Supplemental 50 CFR 20~~	~~PR~~	~~**Significant. Major.** Not court driven.~~ ~~**What the rule does:** FWS proposes to establish annual hunting regulations for certain migratory game birds for the 2018-19 hunting season. FWS proposed in an earlier document (8/3/17) to establish annual hunting regulations for certain migratory game birds for the 2018-19 hunting season. This supplement to the proposed rule provides the regulatory schedule, announces the Service Migratory Bird Regulations Committee and Flyway Council meetings, and provides Flyway Council recommendations resulting from the Council's March 2017 meetings.~~ ~~**Controversy:** None.~~ ~~**Dates of any briefs provided to EOP:** None.~~ ~~**Contact:** Ron Kokel, 703-358-1967.~~ ~~**Note**: This action is not subject to E.O. 13771 (82 FR 9339, February 3, 2017) because it is issued with respect to routine hunting and fishing activities.~~	~~8/15/17~~ Expected to publish in September 2017; remove
1018 BB73 Migratory Bird Hunting; Proposed Frameworks for Migratory Game Bird Hunting Regulations for the 2018–19 Hunting Season 50 CFR 20	PR	**Significant. Major.** Not court driven. **What the rule does:** This rule proposes the 2018–19 season hunting regulations for certain migratory game birds. We annually prescribe frameworks, or outer limits, for dates and times when hunting may occur, and the number of birds that may be taken and possessed in hunting seasons. These frameworks are necessary to allow State selections of seasons and limits and to allow recreational harvest at levels compatible with population and habitat conditions. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967.	12/1/17

1018-BB77 Migratory Bird Permits; Removing a Depredation Order for Scrub Jays and Steller's Jays in Washington and Oregon 50 CFR 21	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS is withdrawing a proposed rule to remove 50 CFR 21.46, a regulation that sets forth a depredation order for scrub jays and Steller's jays in Oregon and Washington. FWS had proposed to remove this regulation, as we had received no reports of activities undertaken under the provisions of section 21.46 in the last 10 years. However, we have recently received several reports under this depredation order, so we are now withdrawing the proposed rule. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Jerry Thompson, 703-358-2217.	12/1/17

‡1018-BB79 Removal of the Black-Capped Vireo from the Federal List of Endangered and Threatened Wildlife; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove the black-capped vireo, a bird species, from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring (PDM) plan. The black-capped vireo breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states. **Controversy:** A number of public comments opposed the delisting of the black-capped vireo, including one from the Office of Travis County Judge and one from a national park. Those concerns may be reflected in comments FWS receives on the draft PDM. A number of partner agencies have indicated concerns about having the necessary funds to implement the ongoing management needs (e.g., cow-bird removal) a Was on Q417 nd monitoring identified for their lands, which may also result in concerns about the viability of both the delisting and the PDM plan. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. 1018-BB98 Revision to the Nonessential Experimental Population Designation of Red Wolf in North Carolina 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will publish a proposed rule to revise the existing nonessential experimental population designation of red wolves in North Carolina under section 10(j) of the Endangered Species Act. **Controversy:** We anticipate both support and opposition to the revision of the 10(j) rule. North Carolina Wildlife Resources Commission (NCWRC) supports a revision of the current 10(j) rule, because NCWRC has recognized, along with FWS, that improved management of the nonessential experimental population of the Red wolf is needed. The FWS will engage NCWRC in the drafting of a proposed 10(j) rule. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Not on Q4

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re E.O. 12866 significance determination.

‡1018-BB99 Subsistence Management Regulations for Public Lands in Alaska; Subsistence Taking of Fish; Cook Inlet Area 50 CFR 100; 36 CFR 242	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to revise the regulations for seasons, harvest limits, methods and means for the subsistence taking of fish in the Cook Inlet of Alaska. This action would also reorganize specific regulations addressing the Kenai River, which would provide clarity for the public and allow the Federal Subsistence Board to correct regulatory conflicts that have arisen based on recent rulemaking. (This is a joint rulemaking between DOI/FWS and USDA/Forest Service.) **Controversy:** Senator Murkowski and Representative Young have expressed interest in this issue in the past; however, they have not recently contacted FWS about this issue. **Dates of any briefs provided to EOP:** None. OMB comment on Q417: Sent Qs, which we answered. **Contact:** Theo Matuskowitz, 907-786-3867.	12/01/17

‡1018-BC01 Reclassification of the Kirtland's Warbler from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Kirtland's warbler from endangered to threatened (downlist), due to the positive effect of management actions in addressing the primary threats to the species and decreasing the overall magnitude of the primary threats. The downlisting rule is accompanied with an Endangered Species Act section 4(d) rule. The Kirtland's warbler breeds in Michigan, Wisconsin, and Eastern Canada. Migration may span most of the eastern United States as far west as the Mississippi River, with occurrences concentrated around the Great Lakes, Appalachia, and the Atlantic Ocean coastline. The Kirtland's warbler winters almost exclusively in the Bahamas. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. OMB Q417 comment: If accompanied by a 4(d) rule, this would be a deregulatory action under EO 13771.	Not subject to OMB review Was on Q317 Pushed to Q118
1018-BC05 Civil Procedures; Inflation Adjustments for Civil Monetary Penalties 50 CFR 11	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will establish inflation adjustments for civil monetary penalties for 2018. The inflation adjustments will be updated after using the 2018 inflation adjustment multiplier provided in OMB guidance. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	12/31/17

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

1018-BC06 Subsistence Management Regulations for Public Lands in Alaska; 2019–20 and 2020–21 Subsistence Taking of Fish and Shellfish Regulations	PR	Not significant. Not major. **What the rule does:** FWS and the U.S. Forest Service (U.S. Department of Agriculture) will propose to revise the regulations for seasons, harvest limits, methods, and means for the taking of fish and shellfish for subsistence uses in Alaska during the 2019–20 and 2020–21 regulatory seasons. The Federal Subsistence Board will also address customary and traditional use determinations for fish and shellfish. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Theo Matuskowitz, 907 786-3867.	12/15/17 First appearance on list
‡1018-BC09 Removal of the Foskett Speckled Dace from the List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to remove the Foskett speckled dace, a fish endemic to Oregon, from the Federal List of Endangered and Threatened Wildlife due to recovery. We will also make available a draft post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP**: None. **Contact**: Don Morgan, 703-358-2444. Q417 comment: This is a deregulatory action under 13771.	Not subject to OMB review Was on Q417 Pushed to Q118

1018-BC10 Reclassification of the Hawaiian goose (nene) from endangered to threatened on the List of Endangered and Threatened Wildlife.	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Hawaiian goose (nene) from endangered to threatened. **Controversy:** None anticipated. **Dates of any briefs provided to EOP**: None. **Contact**: Don Morgan, 703-358-2444	Not subject to OMB review Not on Q4
1018-BC12 Depredation Orders for Double-Crested Cormorants; Removal of Regulations 50 CFR 21	FR	Not significant. Not major. Court driven. **What the rule does:** On May 25, 2016, the District Court for the District of Columbia ordered that both the Aquaculture Depredation Order and the Public Resources Depredation Order for double-crested cormorants be vacated until FWS performs a new and legally adequate environmental assessment or environmental impact statement for national cormorant management orders in compliance with the requirements of the National Environmental Policy Act. The court concluded that FWS did not take careful enough consideration of the effects of the depredation orders on cormorant populations and other affected resources (fisheries, vulnerable species, and habitats) and failed to consider a range of reasonable alternatives in the remanded 2014 environmental assessment. Therefore, this rule removes the regulations setting forth the provisions of the orders at 50 CFR 21.47 and 21.48. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Jerry Thompson, 703-358-2217.	12/1/17

1018-BC54 Notice of Taxonomic Correction for Orangutan 50 CFR 17	PD	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a taxonomic change for the orangutan. The orangutan was originally listed as a single entity under the ESA: *Pongo pygmaeu*s, which included orangutans from Indonesia, Malaysia, and Brunei. However, the orangutan is currently only found in northern Sumatra (Indonesia) and Borneo (Indonesia and Malaysia). Since the original listing, taxonomic reviews by the scientific community support Pongo abelii in Sumatra (Indonesia) as being a separate species from Pongo pygmaeus in Borneo (Indonesia and Malaysia). Because both species are considered part of the original listed entity, the revised taxonomy does not change the endangered status of either species. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Janine Van Norman, 703-358-2370	Not subject to OMB review Pushed from Q4 to Q1
1018-xxxx Endangered and Threatened Wildlife and Plants; Removal of the Gila chub from the List of Endangered and Threatened Plants and Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** The Service will propose to remove the Gila chub, a fish found in Arizona and New Mexico**,** from the Federal List of Endangered and Threatened Wildlife due to a recent taxonomic revision. This taxonomic revision indicates that the Gila chub is no longer a separate species that is a listable entity under the ESA. **Controversy:** There may be some organizations that disagree with this taxonomic revision. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444	Not subject to OMB review Submitting RIN request

1018-AW66 Clean Vessel Act Grant Program, 50 CFR 85	PR	Not significant. Not major. Not court driven. **What the rule does:** This rule gives State agencies requirements for receiving Federal financial assistance for this competitive grant program (Clean Vessel Act of 1992, Sec. 5604) that supports installing waste reception/removal facilities for vessel septic waste, and associated education. This rule update would combine three *Federal Register* documents into one document at 50 CFR 85. We published an advance notice of proposed rulemaking in September 2015 (80 FR 55078) and established a Federal/State team to assist FWS with appropriate updates to clarify and simplify the program, placing more emphasis on clean water. **Controversy:** None anticipated. FWS is leading a Federal/State team to develop approaches to update the rule to reduce administrative burdens, offer services to a larger user group, and expand clean water opportunities. **Dates of any briefs provided to EOP:** None. **Contact:** Lisa Van Alstyne, 703.358.1942.	11/10/17
‡1018-AY05 Removal of the Eastern Cougar from the List of Endangered and Threatened Wildlife 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to delist the eastern cougar, formerly found in eastern North America, due to extinction. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Was on Q417 and Q317 as FR; pushing to 10/2/17

‡1018-AZ38 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Three Hawaiian Big Island Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will designate critical habitat for three plant species on Hawaii Island and correct the maps for existing designations for an additional four species. FWS intends to exclude lands owned or managed by the Queen Liliuokalani Trust, the Department of Hawaiian Homelands, and other private landowners under section 4(b)(2) of the Endangered Species Act. **Controversy:** Resolved. FWS coordinated with the Queen Liliuokalani Trust, landowners, and government jurisdictions, and will exclude lands owned by these entities under section 4(b)(2) of the Act. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Was on Q417 in FR stage; pushing to 10/4/2017
‡1018-AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant**.** Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Timothy J. Van Norman, 703-358-2350. OMB comment on Q417: Propose OMB RMO review since addressing fee increases. (Megan suggested we send a briefing paper.)	~~9/29/17~~ Pushed to 10/26/17

‡1018-AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741. Note: If this rule leads to a reduction in paperwork burden then it would be a deregulatory action under EO 13771. If this rule leads to a reduction in paperwork burden then it would be a deregulatory action under EO 13771.	~~9/29/17~~ ~~On Q317 and Q417~~ 12/15/17

‡1018-BA33 Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4 50 CFR 80	PR (ANPR and NPRM)	Not significant. Not major. Not court driven. **What the rule does:** This is the first in a four-phase process for updating requirements for State fish and wildlife agencies to receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, FWS distributes annual apportionments to States from trust funds derived from excise tax and fuel tax revenues. This phase would update definitions for clarity, propose new requirements for licenses counted for apportionment of Federal financial assistance to reflect the desires of State Directors, clarify program income, and other related issues. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR. **Controversy:** None anticipated. State fish and wildlife agencies, as well as other partners, support this and have been closely involved in its development. **Dates of any briefs provided to EOP:** None. **Contact:** Lisa Van Alstyne, 703-358-1942.	~~7/5/17~~ On Q317 and Q417 in PR stage; Pushed to Q118 10/2/17

‡1018-BB06 Migratory Bird Hunting; Approval of Corrosion-Inhibited Copper Shot as Nontoxic for Waterfowl Hunting 50 CFR 20	FR	Not significant. Not major. Not court driven. **What the rule does:** Environ-Metal, Inc., of Sweet Home, Oregon, has applied for approval of shot composed of copper as nontoxic for waterfowl hunting in the United States. The shot formulation is at least 99.9 percent copper by weight, with a corrosion-inhibiting coating to prevent release of copper into terrestrial or aquatic environments. FWS has reviewed the shot as required under the criteria in the nontoxic shot approval procedures in FWS regulations. FWS' proposed approval of this shot formulation would increase the number of nontoxic shot options for hunters of migratory waterfowl. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. OMB's comment in response to Q317 list: "Deregulatory action under E.O. 13771."	~~10/15/17~~ 12/15/17 PR was on list Q3 and Q4, but this is the first time for FR
1018-BB21 Endangered and Threatened Wildlife and Plants; Technical Corrections of Taxonomy and Nomenclature for Wildlife and Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS is updating the Lists of Endangered and Threatened Wildlife and Plants in accordance with the Endangered Species Act by making taxonomic corrections to the scientific names and other corrections for approximately 40 species that occur primarily in California and Nevada. The corrections are editorial in nature and involve no substantive changes to the List, or any applicable regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	10/15/17

‡1018-BB22 Subsistence Management Regulations for Public Lands in Alaska—Applicability and Scope; Tongass National Forest Submerged Lands 50 CFR 100; 36 CFR 242	FR	Not significant. Not major. **Court driven. No deadline; however, FWS needs to show the plaintiffs and the court that progress is being made.** **What the rule does:** The U.S. District Court for Alaska, in an October 17, 2011, order, enjoined the United States "to promptly initiate regulatory proceedings for the purpose of implementing the subsistence provisions in Title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) with respect to submerged public lands within Tongass National Forest," and directed entry of judgment. To comply with the order, the Federal Subsistence Board (FWS/DOI and USDA/Forest Service, joint rulemaking) published a proposed rule to identify those submerged lands within the Tongass that did not pass to the State of Alaska at Statehood and therefore are subject to the subsistence provisions of ANILCA. DOI/FWS and USDA/Forest Service will now finalize the proposed rule. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Theo Matuskowitz, 907-786-3867.	~~8/15/17~~ Was on Q317 and Q417; pushed to Q118 10/2/17
‡1018-BB23 Revision of Federal Migratory Bird Hunting and Conservation Stamp (Duck Stamp) Contest Regulations 50 CFR 91	PR	Not significant. Not major. Not court driven. **What the rule does:** In 2016, FWS proposed to revise the regulations governing the annual Migratory Bird Hunting and Conservation Stamp Contest (also known as the Federal Duck Stamp Contest). We are revising that proposed rule based on comments we received, the need to make technical corrections (updates), and the need to incorporate administration priorities. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Mott 703-358-1910	10/2/17

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018 BB73 Migratory Bird Hunting; Proposed Frameworks for Migratory Game Bird Hunting Regulations for the 2018–19 Hunting Season 50 CFR 20	PR	**Significant. Major.** Not court driven. **What the rule does:** This rule proposes the 2018–19 season hunting regulations for certain migratory game birds. We annually prescribe frameworks, or outer limits, for dates and times when hunting may occur, and the number of birds that may be taken and possessed in hunting seasons. These frameworks are necessary to allow State selections of seasons and limits and to allow recreational harvest at levels compatible with population and habitat conditions. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967.	12/1/17
‡1018-BB75 Refuge-Specific Hunting and Sport Fishing Regulations, 2017–18 50 CFR 32	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will finalize a proposal to make additions to refuge-specific regulations for the 2017–18 hunting and sport fishing season. This action is part of an annual update for the National Wildlife Refuge System that ensures adequate public notice of openings and changes. FWS operates hunting and fishing programs on refuges to implement the National Wildlife Refuge System Improvement Act of 1997 directives to facilitate compatible priority wildlife-dependent recreational opportunities. **Controversy:** Medium. Some oppose hunting on National Wildlife Refuges. However, failure to have regulations in place will cause issue/controversy with hunters. **Dates of any briefs provided to EOP:** None. **Contact:** Aaron Mize, 703-358-2678. **OMB's comment on Q317 list:** OMB requested a briefing paper. **Note**: This action is not subject to EO 13771 (82 FR 9339, February 3, 2017) because it is issued with respect to routine hunting and fishing activities	First appearance on OMB report in FR stage 10/1/17

‡1018-BB76 Removal of the Monito Gecko from the Federal List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to remove the Monito gecko from the Federal List of Endangered and Threatened Wildlife due to recovery. The Monito gecko is endemic to the island of Monito, which is 68 kilometers west of Puerto Rico. FWS will also make available a draft post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. OMB response to Q417?: This is a deregulatory action under 13771.	Not subject to OMB review On Q417; Pushed to 12/15/17
1018-BB77 Migratory Bird Permits; Removing a Depredation Order for Scrub Jays and Steller's Jays in Washington and Oregon 50 CFR 21	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS is withdrawing a proposed rule to remove 50 CFR 21.46, a regulation that sets forth a depredation order for scrub jays and Steller's jays in Oregon and Washington. FWS had proposed to remove this regulation, as we had received no reports of activities undertaken under the provisions of section 21.46 in the last 10 years. However, we have recently received several reports under this depredation order, so we are now withdrawing the proposed rule. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Jerry Thompson, 703-358-2217.	12/1/17

‡1018-BB79 Removal of the Black-Capped Vireo from the Federal List of Endangered and Threatened Wildlife; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove the black-capped vireo, a bird species, from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring (PDM) plan. The black-capped vireo breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states. **Controversy:** A number of public comments opposed the delisting of the black-capped vireo, including one from the Office of Travis County Judge and one from a national park. Those concerns may be reflected in comments FWS receives on the draft PDM. A number of partner agencies have indicated concerns about having the necessary funds to implement the ongoing management needs (e.g., cow-bird removal) a Was on Q417 nd monitoring identified for their lands, which may also result in concerns about the viability of both the delisting and the PDM plan. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Pushed from Q4 to Q118
‡1018-BB87 Removal of the Gypsum Wild-Buckwheat from the List of Endangered and Threatened Plants 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on its proposed rule to remove *Eriogonum gypsophilum* (gypsum wild-buckwheat, a New Mexico plant species) from the List of Endangered and Threatened Plants, due to recovery. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018-BB98 Revision to the Nonessential Experimental Population Designation of Red Wolf in North Carolina 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will publish a proposed rule to revise the existing nonessential experimental population designation of red wolves in North Carolina under section 10(j) of the Endangered Species Act. **Controversy:** We anticipate both support and opposition to the revision of the 10(j) rule. North Carolina Wildlife Resources Commission (NCWRC) supports a revision of the current 10(j) rule, because NCWRC has recognized, along with FWS, that improved management of the nonessential experimental population of the Red wolf is needed. The FWS will engage NCWRC in the drafting of a proposed 10(j) rule. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Not on Q4

‡1018-BC01 Reclassification of the Kirtland's Warbler from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Kirtland's warbler from endangered to threatened (downlist), due to the positive effect of management actions in addressing the primary threats to the species and decreasing the overall magnitude of the primary threats. The downlisting rule is accompanied with an Endangered Species Act section 4(d) rule. The Kirtland's warbler breeds in Michigan, Wisconsin, and Eastern Canada. Migration may span most of the eastern United States as far west as the Mississippi River, with occurrences concentrated around the Great Lakes, Appalachia, and the Atlantic Ocean coastline. The Kirtland's warbler winters almost exclusively in the Bahamas. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. OMB Q417 comment: If accompanied by a 4(d) rule, this would be a deregulatory action under EO 13771.	Not subject to OMB review Was on Q317 Pushed to Q118
1018-BC05 Civil Procedures; Inflation Adjustments for Civil Monetary Penalties 50 CFR 11	FR	Not significant. Not major. 1018-BC12 Depredation Orders for Double-Crested Cormorants; Removal of Regulations 50 CFR 21	FR	Not significant. Not major. Court driven. **What the rule does:** On May 25, 2016, the District Court for the District of Columbia ordered that both the Aquaculture Depredation Order and the Public Resources Depredation Order for double-crested cormorants be vacated until FWS performs a new and legally adequate environmental assessment or environmental impact statement for national cormorant management orders in compliance with the requirements of the National Environmental Policy Act. The court concluded that FWS did not take careful enough consideration of the effects of the depredation orders on cormorant populations and other affected resources (fisheries, vulnerable species, and habitats) and failed to consider a range of reasonable alternatives in the remanded 2014 environmental assessment. Therefore, this rule removes the regulations setting forth the provisions of the orders at 50 CFR 21.47 and 21.48. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Jerry Thompson, 703-358-2217.	12/1/17

1018-BC52 Listing Determination and Critical Habitat Designation for the Barren's Topminnow 50 CFR 17	PR	Not significant. Not major. **Court driven. Settlement agreement deadline of 12/31/17.** **What the rule does:** FWS will make a listing determination for the Barrens topminnow under the Endangered Species Act. This fish species is found in Tennessee. FWS will, if prudent and determinable, also propose to designate critical habitat for the Barrens topminnow under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	12/15/17
1018-BC54 Notice of Taxonomic Correction for Orangutan 50 CFR 17	PD	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a taxonomic change for the orangutan. The orangutan was originally listed as a single entity under the ESA: *Pongo pygmaeu*s, which included orangutans from Indonesia, Malaysia, and Brunei. However, the orangutan is currently only found in northern Sumatra (Indonesia) and Borneo (Indonesia and Malaysia). Since the original listing, taxonomic reviews by the scientific community support Pongo abelii in Sumatra (Indonesia) as being a separate species from Pongo pygmaeus in Borneo (Indonesia and Malaysia). Because both species are considered part of the original listed entity, the revised taxonomy does not change the endangered status of either species. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Janine Van Norman, 703-358-2370	Not subject to OMB review Pushed from Q4 to Q1

1018-BA21 Endangered and Threatened Wildlife and Plants; Technical Corrections of Taxonomy and Nomenclature for 40 Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will correct scientific names and common names on the Lists of Endangered and Threatened Wildlife and Plants for approximately 40 species through a direct final rule. The corrections are administrative in nature and involve no substantive changes to the Lists, or any applicable regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444	Not subject to OMB review
‡1018-BA54 Endangered and Threatened Wildlife and Plants; Technical Corrections for Eight Wildlife Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will revise the List of Endangered and Threatened Wildlife in accordance with the Endangered Species Act to correct errors for several species of wildlife in the "Vertebrate population where endangered or threatened" column. The CFR incorrectly identifies some wildlife species as being listed only in the United States, and others as being listed only outside the United States, even though the species were originally listed in their entirety both inside and outside the United States, and no subsequent rulemakings have altered the original listings. These revisions are editorial in nature and involve no substantive changes to the List, or to any applicable regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review

1018-AW66 Clean Vessel Act Grant Program, 50 CFR 85	PR	Not significant. Not major. Not court driven. **What the rule does:** This rule gives State agencies requirements for receiving Federal financial assistance for this competitive grant program (Clean Vessel Act of 1992, Sec. 5604) that supports installing waste reception/removal facilities for vessel septic waste, and associated education. This rule update would combine three *Federal Register* documents into one document at 50 CFR 85. We published an advance notice of proposed rulemaking in September 2015 (80 FR 55078) and established a Federal/State team to assist FWS with appropriate updates to clarify and simplify the program, placing more emphasis on clean water. **Controversy:** None anticipated. FWS is leading a Federal/State team to develop approaches to update the rule to reduce administrative burdens, offer services to a larger user group, and expand clean water opportunities. **Dates of any briefs provided to EOP:** None. **Contact:** Lisa Van Alstyne, 703.358.1942.	11/10/17
‡1018-AY05 Removal of the Eastern Cougar from the List of Endangered and Threatened Wildlife 50 CFR 17	FR	Not significant. Not major. ‡1018-AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741. Note: If this rule leads to a reduction in paperwork burden then it would be a deregulatory action under EO 13771. If this rule leads to a reduction in paperwork burden then it would be a deregulatory action under EO 13771.	~~9/29/17~~ ~~On Q317 and Q417~~ 12/15/17

‡1018-BA80 Removing Textual Descriptions of Critical Habitat Boundaries for Plants on the Hawaiian Islands 50 CFR 17	FR	Not Significant. Not major. Not court driven. **What the rule does:** This rule will remove the textual descriptions of the critical habitat boundaries from certain entries at 50 CFR 17.99 (plants on the Hawaiian Islands) that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease, or in any other way change the critical habitat designations from which we are removing the textual descriptions of boundaries. This action will save taxpayer resources by reducing the cost of printing the Code of Federal Regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Carey Galst, 703-358-1954.	~~8/31/17~~ Was on Q417; pushed to 10/2/17
1018-BA81 Removing Textual Descriptions of Critical Habitat Boundaries for Wildlife (50 CFR 17.95)	FR	Not Significant. Not major. Not court driven. **What the rule does:** This rule removes the textual descriptions of the critical habitat boundaries from certain entries at 50 CFR 17.95 (wildlife) that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease, or in any other way change the critical habitat designations from which we are removing the textual descriptions of boundaries. This action will save taxpayer resources. We are taking this action in accordance with our May 1, 2012, revision of the regulations related to publishing textual descriptions of critical habitat boundaries in the Code of Federal Regulations and as part of our response to Executive Order 13563 (January 18, 2011), which directs Federal agencies to review their existing regulations and then to modify or streamline them in accordance with what they have learned. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Carey Galst, 703-358-1954.	12/15/17 Not on previous list

‡1018-BB06 Migratory Bird Hunting; Approval of Corrosion-Inhibited Copper Shot as Nontoxic for Waterfowl Hunting 50 CFR 20	PR	Not significant. Not major. Not court driven. **What the rule does:** Environ-Metal, Inc., of Sweet Home, Oregon, has applied for approval of shot composed of copper as nontoxic for waterfowl hunting in the United States. The shot formulation is at least 99.9 percent copper by weight, with a corrosion-inhibiting coating to prevent release of copper into terrestrial or aquatic environments. FWS has reviewed the shot as required under the criteria in the nontoxic shot approval procedures in FWS regulations. FWS' proposed approval of this shot formulation would increase the number of nontoxic shot options for hunters of migratory waterfowl. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. **OMB's comment in response to Q317 list:** "Deregulatory action under E.O. 13771."	7/14/17 Cleared DOI 8/1/17; will be sent to OFR week of 8/7/17 Published 8/15/17; remove https://www.fws.gov/policy/library/2017/2017-17175.pdf

‡1018-BB22 Subsistence Management Regulations for Public Lands in Alaska—Applicability and Scope; Tongass National Forest Submerged Lands 50 CFR 100; 36 CFR 242	FR	Not significant. Not major. **Court driven. No deadline; however, FWS needs to show the plaintiffs and the court that progress is being made.** **What the rule does:** The U.S. District Court for Alaska, in an October 17, 2011, order, enjoined the United States "to promptly initiate regulatory proceedings for the purpose of implementing the subsistence provisions in Title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) with respect to submerged public lands within Tongass National Forest," and directed entry of judgment. To comply with the order, the Federal Subsistence Board (FWS/DOI and USDA/Forest Service, joint rulemaking) published a proposed rule to identify those submerged lands within the Tongass that did not pass to the State of Alaska at Statehood and therefore are subject to the subsistence provisions of ANILCA. DOI/FWS and USDA/Forest Service will now finalize the proposed rule. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Theo Matuskowitz, 907-786-3867.	~~8/15/17~~ Was on Q317 and Q417; pushed to Q118 10/2/17
‡1018-BB23 Revision of Federal Migratory Bird Hunting and Conservation Stamp (Duck Stamp) Contest Regulations 50 CFR 91	PR	Not significant. Not major. ‡1018-BB75 Refuge-Specific Hunting and Sport Fishing Regulations, 2017–18 50 CFR 32	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will finalize a proposal to make additions to refuge-specific regulations for the 2017–18 hunting and sport fishing season. This action is part of an annual update for the National Wildlife Refuge System that ensures adequate public notice of openings and changes. FWS operates hunting and fishing programs on refuges to implement the National Wildlife Refuge System Improvement Act of 1997 directives to facilitate compatible priority wildlife-dependent recreational opportunities. **Controversy:** Medium. Some oppose hunting on National Wildlife Refuges. However, failure to have regulations in place will cause issue/controversy with hunters. **Dates of any briefs provided to EOP:** None. **Contact:** Aaron Mize, 703-358-2678. **OMB's comment on Q317 list:** OMB requested a briefing paper. **Note**: This action is not subject to EO 13771 (82 FR 9339, February 3, 2017) because it is issued with respect to routine hunting and fishing activities	First appearance on OMB report in FR stage 10/1/17
‡1018-BB76 Removal of the Monito Gecko from the Federal List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to remove the Monito gecko from the Federal List of Endangered and Threatened Wildlife due to recovery. The Monito gecko is endemic to the island of Monito, which is 68 kilometers west of Puerto Rico. FWS will also make available a draft post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. OMB response to Q417?: This is a deregulatory action under 13771.	Not subject to OMB review On Q417; Pushed to 12/15/17

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re E.O. 12866 significance determination.

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018-BB77 Migratory Bird Permits; Removing a Depredation Order for Scrub Jays and Steller's Jays in Washington and Oregon 50 CFR 21	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS is withdrawing a proposed rule to remove 50 CFR 21.46, a regulation that sets forth a depredation order for scrub jays and Steller's jays in Oregon and Washington. FWS had proposed to remove this regulation, as we had received no reports of activities undertaken under the provisions of section 21.46 in the last 10 years. However, we have recently received several reports under this depredation order, so we are now withdrawing the proposed rule. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Jerry Thompson, 703-358-2217.	12/1/17

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re E.O. 12866 significance determination.

‡1018-BB79 Removal of the Black-Capped Vireo from the Federal List of Endangered and Threatened Wildlife; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove the black-capped vireo, a bird species, from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring (PDM) plan. The black-capped vireo breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states. **Controversy:** A number of public comments opposed the delisting of the black-capped vireo, including one from the Office of Travis County Judge and one from a national park. Those concerns may be reflected in comments FWS receives on the draft PDM. A number of partner agencies have indicated concerns about having the necessary funds to implement the ongoing management needs (e.g., cow-bird removal) a Was on Q417 nd monitoring identified for their lands, which may also result in concerns about the viability of both the delisting and the PDM plan. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Pushed from Q4 to Q118

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

1018-BB98 Revision to the Nonessential Experimental Population Designation of Red Wolf in North Carolina 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will publish a proposed rule to revise the existing nonessential experimental population designation of red wolves in North Carolina under section 10(j) of the Endangered Species Act. **Controversy:** We anticipate both support and opposition to the revision of the 10(j) rule. North Carolina Wildlife Resources Commission (NCWRC) supports a revision of the current 10(j) rule, because NCWRC has recognized, along with FWS, that improved management of the nonessential experimental population of the Red wolf is needed. The FWS will engage NCWRC in the drafting of a proposed 10(j) rule. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Not on Q4

‡1018-BC01 Reclassification of the Kirtland's Warbler from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Kirtland's warbler from endangered to threatened (downlist), due to the positive effect of management actions in addressing the primary threats to the species and decreasing the overall magnitude of the primary threats. The downlisting rule is accompanied with an Endangered Species Act section 4(d) rule. The Kirtland's warbler breeds in Michigan, Wisconsin, and Eastern Canada. Migration may span most of the eastern United States as far west as the Mississippi River, with occurrences concentrated around the Great Lakes, Appalachia, and the Atlantic Ocean coastline. The Kirtland's warbler winters almost exclusively in the Bahamas. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. OMB Q417 comment: If accompanied by a 4(d) rule, this would be a deregulatory action under EO 13771.	Not subject to OMB review Was on Q317 Pushed to Q118
1018-BC05 Civil Procedures; Inflation Adjustments for Civil Monetary Penalties 50 CFR 11	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will establish inflation adjustments for civil monetary penalties for 2018. The inflation adjustments will be updated after using the 2018 inflation adjustment multiplier provided in OMB guidance. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	12/31/17

1018-BC10 Reclassification of the Hawaiian goose (nene) from endangered to threatened on the List of Endangered and Threatened Wildlife.	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Hawaiian goose (nene) from endangered to threatened. **Controversy:** None anticipated. **Dates of any briefs provided to EOP**: None. **Contact**: Don Morgan, 703-358-2444	Not subject to OMB review Not on Q4
1018-BC12 Depredation Orders for Double-Crested Cormorants; Removal of Regulations 50 CFR 21	FR	Not significant. Not major. Court driven. **What the rule does:** On May 25, 2016, the District Court for the District of Columbia ordered that both the Aquaculture Depredation Order and the Public Resources Depredation Order for double-crested cormorants be vacated until FWS performs a new and legally adequate environmental assessment or environmental impact statement for national cormorant management orders in compliance with the requirements of the National Environmental Policy Act. The court concluded that FWS did not take careful enough consideration of the effects of the depredation orders on cormorant populations and other affected resources (fisheries, vulnerable species, and habitats) and failed to consider a range of reasonable alternatives in the remanded 2014 environmental assessment. Therefore, this rule removes the regulations setting forth the provisions of the orders at 50 CFR 21.47 and 21.48. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Jerry Thompson, 703-358-2217.	12/1/17

1018-BC54 Notice of Taxonomic Correction for Orangutan 50 CFR 17	PD	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a taxonomic change for the orangutan. The orangutan was originally listed as a single entity under the ESA: *Pongo pygmaeu*s, which included orangutans from Indonesia, Malaysia, and Brunei. However, the orangutan is currently only found in northern Sumatra (Indonesia) and Borneo (Indonesia and Malaysia). Since the original listing, taxonomic reviews by the scientific community support Pongo abelii in Sumatra (Indonesia) as being a separate species from Pongo pygmaeus in Borneo (Indonesia and Malaysia). Because both species are considered part of the original listed entity, the revised taxonomy does not change the endangered status of either species. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Janine Van Norman, 703-358-2370	Not subject to OMB review Pushed from Q4 to Q1
1018-xxxx Endangered and Threatened Wildlife and Plants; Removal of the Gila chub from the List of Endangered and Threatened Plants and Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** The Service will propose to remove the Gila chub, a fish found in Arizona and New Mexico**,** from the Federal List of Endangered and Threatened Wildlife due to a recent taxonomic revision. This taxonomic revision indicates that the Gila chub is no longer a separate species that is a listable entity under the ESA. **Controversy:** There may be some organizations that disagree with this taxonomic revision. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444	Not subject to OMB review Submitting RIN request

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018-AW66 Clean Vessel Act Grant Program, 50 CFR 85	PR	Not significant. Not major. Not court driven. **What the rule does:** This rule gives State agencies requirements for receiving Federal financial assistance for this competitive grant program (Clean Vessel Act of 1992, Sec. 5604) that supports installing waste reception/removal facilities for vessel septic waste, and associated education. This rule update would combine three *Federal Register* documents into one document at 50 CFR 85. We published an advance notice of proposed rulemaking in September 2015 (80 FR 55078) and established a Federal/State team to assist FWS with appropriate updates to clarify and simplify the program, placing more emphasis on clean water. **Controversy:** None anticipated. FWS is leading a Federal/State team to develop approaches to update the rule to reduce administrative burdens, offer services to a larger user group, and expand clean water opportunities. **Dates of any briefs provided to EOP:** None. **Contact:** Lisa Van Alstyne, 703.358.1942.	11/10/17
‡1018-AY05 Removal of the Eastern Cougar from the List of Endangered and Threatened Wildlife 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to delist the eastern cougar, formerly found in eastern North America, due to extinction. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Was on Q417 and Q317 as FR; pushing to 10/2/17

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡1018-AZ38 Endangered and Threatened Wildlife and Plants; Critical Habitat Designation for Three Hawaiian Big Island Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will designate critical habitat for three plant species on Hawaii Island and correct the maps for existing designations for an additional four species. FWS intends to exclude lands owned or managed by the Queen Liliuokalani Trust, the Department of Hawaiian Homelands, and other private landowners under section 4(b)(2) of the Endangered Species Act. **Controversy:** Resolved. FWS coordinated with the Queen Liliuokalani Trust, landowners, and government jurisdictions, and will exclude lands owned by these entities under section 4(b)(2) of the Act. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Was on Q417 in FR stage; pushing to 10/4/2017
‡1018-AZ65 General Permit Procedures; Fees and Clarifications 50 CFR 13	PR	Not Significant**.** Not major. Not court driven. **What the rule does:** This proposed rule would revise FWS general permitting regulations, primarily to propose increases in permit application fees for various programs. In addition, FWS proposes several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and make other minor changes. **Controversy:** None anticipated. FWS proposes an increase in permit fees to be more in line with OMB circular A-25. **Dates of any briefs provided to EOP:** None. **Contact:** Timothy J. Van Norman, 703-358-2350. OMB comment on Q417: Propose OMB RMO review since addressing fee increases. (Megan suggested we send a briefing paper.)	~~9/29/17~~ Pushed to 10/26/17

‡1018-AZ71 Importation, Exportation, and Transportation of Wildlife; Implementation of the International Trade Data System 50 CFR 14	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to change its regulations in response to mandates from Executive Order 13659, "Streamlining the Export/Import Process for America's Businesses," and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741. Note: If this rule leads to a reduction in paperwork burden then it would be a deregulatory action under EO 13771. If this rule leads to a reduction in paperwork burden then it would be a deregulatory action under EO 13771.	~~9/29/17~~ ~~On Q317 and Q417~~ 12/15/17

‡1018-BA33 Administrative Requirements Under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts; Phase 1 of 4 50 CFR 80	PR (ANPR and NPRM)	Not significant. Not major. Not court driven. **What the rule does:** This is the first in a four-phase process for updating requirements for State fish and wildlife agencies to receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, FWS distributes annual apportionments to States from trust funds derived from excise tax and fuel tax revenues. This phase would update definitions for clarity, propose new requirements for licenses counted for apportionment of Federal financial assistance to reflect the desires of State Directors, clarify program income, and other related issues. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR. **Controversy:** None anticipated. State fish and wildlife agencies, as well as other partners, support this and have been closely involved in its development. **Dates of any briefs provided to EOP:** None. **Contact:** Lisa Van Alstyne, 703-358-1942.	~~7/5/17~~ On Q317 and Q417 in PR stage; Pushed to Q118 10/2/17

‡1018-BA43 Reclassifying the Borax Lake Chub from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Borax Lake chub from endangered to threatened. The primary threats to the species have been ameliorated; however, due to ongoing threats from geothermal development, FWS is proposing to reclassify the species to threatened status rather than delisting it. FWS is also proposing to correct the List of Endangered and Threatened Wildlife to reflect the current scientifically accepted taxonomy of this species as *Siphateles boraxobius* (=*Gila boraxobius*). **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. **OMB's comment in response to Q317 list:** "If the downlisting is accompanied with a reduction in regulatory burden (e.g., an Endangered Species Act section 4d rule), it is a deregulatory action under E.O. 13771." ‡1018-BB06 Migratory Bird Hunting; Approval of Corrosion-Inhibited Copper Shot as Nontoxic for Waterfowl Hunting 50 CFR 20	FR	Not significant. Not major. Not court driven. **What the rule does:** Environ-Metal, Inc., of Sweet Home, Oregon, has applied for approval of shot composed of copper as nontoxic for waterfowl hunting in the United States. The shot formulation is at least 99.9 percent copper by weight, with a corrosion-inhibiting coating to prevent release of copper into terrestrial or aquatic environments. FWS has reviewed the shot as required under the criteria in the nontoxic shot approval procedures in FWS regulations. FWS' proposed approval of this shot formulation would increase the number of nontoxic shot options for hunters of migratory waterfowl. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967. OMB's comment in response to Q317 list: "Deregulatory action under E.O. 13771."	~~10/15/17~~ 12/15/17 PR was on list Q3 and Q4, but this is the first time for FR
1018-BB21 Endangered and Threatened Wildlife and Plants; Technical Corrections of Taxonomy and Nomenclature for Wildlife and Plant Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS is updating the Lists of Endangered and Threatened Wildlife and Plants in accordance with the Endangered Species Act by making taxonomic corrections to the scientific names and other corrections for approximately 40 species that occur primarily in California and Nevada. The corrections are editorial in nature and involve no substantive changes to the List, or any applicable regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	10/15/17

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡1018-BB22 Subsistence Management Regulations for Public Lands in Alaska—Applicability and Scope; Tongass National Forest Submerged Lands 50 CFR 100; 36 CFR 242	FR	Not significant. Not major. **Court driven. No deadline; however, FWS needs to show the plaintiffs and the court that progress is being made.** **What the rule does:** The U.S. District Court for Alaska, in an October 17, 2011, order, enjoined the United States "to promptly initiate regulatory proceedings for the purpose of implementing the subsistence provisions in Title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) with respect to submerged public lands within Tongass National Forest," and directed entry of judgment. To comply with the order, the Federal Subsistence Board (FWS/DOI and USDA/Forest Service, joint rulemaking) published a proposed rule to identify those submerged lands within the Tongass that did not pass to the State of Alaska at Statehood and therefore are subject to the subsistence provisions of ANILCA. DOI/FWS and USDA/Forest Service will now finalize the proposed rule. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Theo Matuskowitz, 907-786-3867.	~~8/15/17~~ Was on Q317 and Q417; pushed to Q118 10/2/17
‡1018-BB23 Revision of Federal Migratory Bird Hunting and Conservation Stamp (Duck Stamp) Contest Regulations 50 CFR 91	PR	Not significant. Not major. Not court driven. **What the rule does:** In 2016, FWS proposed to revise the regulations governing the annual Migratory Bird Hunting and Conservation Stamp Contest (also known as the Federal Duck Stamp Contest). We are revising that proposed rule based on comments we received, the need to make technical corrections (updates), and the need to incorporate administration priorities. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Mott 703-358-1910	10/2/17

1018 BB73 Migratory Bird Hunting; Proposed Frameworks for Migratory Game Bird Hunting Regulations for the 2018–19 Hunting Season 50 CFR 20	PR	**Significant. Major.** Not court driven. **What the rule does:** This rule proposes the 2018–19 season hunting regulations for certain migratory game birds. We annually prescribe frameworks, or outer limits, for dates and times when hunting may occur, and the number of birds that may be taken and possessed in hunting seasons. These frameworks are necessary to allow State selections of seasons and limits and to allow recreational harvest at levels compatible with population and habitat conditions. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Ron Kokel, 703-358-1967.	12/1/17
‡1018-BB75 Refuge-Specific Hunting and Sport Fishing Regulations, 2017–18 50 CFR 32	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will finalize a proposal to make additions to refuge-specific regulations for the 2017–18 hunting and sport fishing season. This action is part of an annual update for the National Wildlife Refuge System that ensures adequate public notice of openings and changes. FWS operates hunting and fishing programs on refuges to implement the National Wildlife Refuge System Improvement Act of 1997 directives to facilitate compatible priority wildlife-dependent recreational opportunities. **Controversy:** Medium. Some oppose hunting on National Wildlife Refuges. However, failure to have regulations in place will cause issue/controversy with hunters. **Dates of any briefs provided to EOP:** None. **Contact:** Aaron Mize, 703-358-2678. **OMB's comment on Q317 list:** OMB requested a briefing paper. **Note**: This action is not subject to EO 13771 (82 FR 9339, February 3, 2017) because it is issued with respect to routine hunting and fishing activities	First appearance on OMB report in FR stage 10/1/17

‡1018-BB76 Removal of the Monito Gecko from the Federal List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to remove the Monito gecko from the Federal List of Endangered and Threatened Wildlife due to recovery. The Monito gecko is endemic to the island of Monito, which is 68 kilometers west of Puerto Rico. FWS will also make available a draft post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. OMB response to Q417?: This is a deregulatory action under 13771.	Not subject to OMB review On Q417; Pushed to 12/15/17
1018-BB77 Migratory Bird Permits; Removing a Depredation Order for Scrub Jays and Steller's Jays in Washington and Oregon 50 CFR 21	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS is withdrawing a proposed rule to remove 50 CFR 21.46, a regulation that sets forth a depredation order for scrub jays and Steller's jays in Oregon and Washington. FWS had proposed to remove this regulation, as we had received no reports of activities undertaken under the provisions of section 21.46 in the last 10 years. However, we have recently received several reports under this depredation order, so we are now withdrawing the proposed rule. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Jerry Thompson, 703-358-2217.	12/1/17

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡1018-BB79 Removal of the Black-Capped Vireo from the Federal List of Endangered and Threatened Wildlife; Draft Post-Delisting Monitoring Plan 50 CFR 17	PR; NOA	Not significant. Not major. Not court driven. **What the rule does:** FWS plans to reopen the comment period for its proposed rule to remove the black-capped vireo, a bird species, from the List of Endangered and Threatened Plants, due to recovery, and open a comment period for the draft post-delisting monitoring (PDM) plan. The black-capped vireo breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states. **Controversy:** A number of public comments opposed the delisting of the black-capped vireo, including one from the Office of Travis County Judge and one from a national park. Those concerns may be reflected in comments FWS receives on the draft PDM. A number of partner agencies have indicated concerns about having the necessary funds to implement the ongoing management needs (e.g., cow-bird removal) a Was on Q417 nd monitoring identified for their lands, which may also result in concerns about the viability of both the delisting and the PDM plan. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review Pushed from Q4 to Q118
‡1018-BB87 Removal of the Gypsum Wild-Buckwheat from the List of Endangered and Threatened Plants 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on its proposed rule to remove *Eriogonum gypsophilum* (gypsum wild-buckwheat, a New Mexico plant species) from the List of Endangered and Threatened Plants, due to recovery. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. ‡1018-BB99 Subsistence Management Regulations for Public Lands in Alaska; Subsistence Taking of Fish; Cook Inlet Area 50 CFR 100; 36 CFR 242	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to revise the regulations for seasons, harvest limits, methods and means for the subsistence taking of fish in the Cook Inlet of Alaska. This action would also reorganize specific regulations addressing the Kenai River, which would provide clarity for the public and allow the Federal Subsistence Board to correct regulatory conflicts that have arisen based on recent rulemaking. (This is a joint rulemaking between DOI/FWS and USDA/Forest Service.) **Controversy:** Senator Murkowski and Representative Young have expressed interest in this issue in the past; however, they have not recently contacted FWS about this issue. **Dates of any briefs provided to EOP:** None. OMB comment on Q417: Sent Qs, which we answered. **Contact:** Theo Matuskowitz, 907-786-3867.	12/1/17

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

‡Appeared on a previous 90-day list; OMB concurred re E.O. 12866 significance determination.

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
‡1018-BC01 Reclassification of the Kirtland's Warbler from Endangered to Threatened 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Kirtland's warbler from endangered to threatened (downlist), due to the positive effect of management actions in addressing the primary threats to the species and decreasing the overall magnitude of the primary threats. The downlisting rule is accompanied with an Endangered Species Act section 4(d) rule. The Kirtland's warbler breeds in Michigan, Wisconsin, and Eastern Canada. Migration may span most of the eastern United States as far west as the Mississippi River, with occurrences concentrated around the Great Lakes, Appalachia, and the Atlantic Ocean coastline. The Kirtland's warbler winters almost exclusively in the Bahamas. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444. OMB Q417 comment: If accompanied by a 4(d) rule, this would be a deregulatory action under EO 13771.	Not subject to OMB review Was on Q317 Pushed to Q118
1018-BC05 Civil Procedures; Inflation Adjustments for Civil Monetary Penalties 50 CFR 11	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will establish inflation adjustments for civil monetary penalties for 2018. The inflation adjustments will be updated after using the 2018 inflation adjustment multiplier provided in OMB guidance. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Mark Phillips, 703-358-1741.	12/31/17

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

1018-BC06 Subsistence Management Regulations for Public Lands in Alaska; 2019–20 and 2020–21 Subsistence Taking of Fish and Shellfish Regulations	PR	Not significant. Not major. **What the rule does:** FWS and the U.S. Forest Service (U.S. Department of Agriculture) will propose to revise the regulations for seasons, harvest limits, methods, and means for the taking of fish and shellfish for subsistence uses in Alaska during the 2019–20 and 2020–21 regulatory seasons. The Federal Subsistence Board will also address customary and traditional use determinations for fish and shellfish. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Theo Matuskowitz, 907 786-3867.	12/15/17 First appearance on list
‡1018-BC09 Removal of the Foskett Speckled Dace from the List of Endangered and Threatened Wildlife 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to remove the Foskett speckled dace, a fish endemic to Oregon, from the Federal List of Endangered and Threatened Wildlife due to recovery. We will also make available a draft post-delisting monitoring plan. **Controversy:** None anticipated. **Dates of any briefs provided to EOP**: None. **Contact**: Don Morgan, 703-358-2444. Q417 comment: This is a deregulatory action under 13771.	Not subject to OMB review Was on Q417 Pushed to Q118

1018-BC10 Reclassification of the Hawaiian goose (nene) from endangered to threatened on the List of Endangered and Threatened Wildlife.	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will propose to reclassify the Hawaiian goose (nene) from endangered to threatened. **Controversy:** None anticipated. **Dates of any briefs provided to EOP**: None. **Contact**: Don Morgan, 703-358-2444	Not subject to OMB review Not on Q4
1018-BC12 Depredation Orders for Double-Crested Cormorants; Removal of Regulations 50 CFR 21	FR	Not significant. Not major. Court driven. **What the rule does:** On May 25, 2016, the District Court for the District of Columbia ordered that both the Aquaculture Depredation Order and the Public Resources Depredation Order for double-crested cormorants be vacated until FWS performs a new and legally adequate environmental assessment or environmental impact statement for national cormorant management orders in compliance with the requirements of the National Environmental Policy Act. The court concluded that FWS did not take careful enough consideration of the effects of the depredation orders on cormorant populations and other affected resources (fisheries, vulnerable species, and habitats) and failed to consider a range of reasonable alternatives in the remanded 2014 environmental assessment. Therefore, this rule removes the regulations setting forth the provisions of the orders at 50 CFR 21.47 and 21.48. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Jerry Thompson, 703-358-2217.	12/1/17

‡1018-BC16 Listing Determination and Critical Habitat Designation for Three Southeast Darters 50 CFR 17	PR	Not significant. Not major. **Court driven: PR, 9/30/17, settlement agreement for listing determination for trispot darter and bridled darter. PR, 9/30/18, settlement agreement for listing determination for holiday darter.** **What the rule does:** FWS will make a listing determination for the holiday darter, trispot darter, and bridled darter under the Endangered Species Act. These fish are found in Alabama, Georgia, and Tennessee. FWS will, if prudent and determinable, also propose to designate critical habitat for the holiday darter, trispot darter, and bridled darter under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. OMB comment on Q417: Sent Qs. We responded that critical habitat is not being proposed for these species at this time. If prudent and determinable, the critical habitat will be proposed under this RIN at a later stage. The requested information will be made available at that time. **Contact:** Sarah Quamme, 703-358-1796.	Pushing to Q118 11/14/17
‡1018-BC34 Listing Determination and Critical Habitat Designation for the Wright's Marsh Thistle 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a listing determination for the Wright's marsh thistle under the Endangered Species Act. This plant species is found in Arizona and New Mexico. FWS will, if prudent and determinable, also propose to designate critical habitat for the Wright's marsh thistle under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	~~9/15/17~~ Was on Q417 Pushing to Q118 Ready for OMB Review 12/1/17

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018-BC52 Listing Determination and Critical Habitat Designation for the Barren's Topminnow 50 CFR 17	PR	Not significant. Not major. **Court driven. Settlement agreement deadline of 12/31/17.** **What the rule does:** FWS will make a listing determination for the Barrens topminnow under the Endangered Species Act. This fish species is found in Tennessee. FWS will, if prudent and determinable, also propose to designate critical habitat for the Barrens topminnow under the Endangered Species Act. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	12/15/17
1018-BC54 Notice of Taxonomic Correction for Orangutan 50 CFR 17	PD	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a taxonomic change for the orangutan. The orangutan was originally listed as a single entity under the ESA: *Pongo pygmaeu*s, which included orangutans from Indonesia, Malaysia, and Brunei. However, the orangutan is currently only found in northern Sumatra (Indonesia) and Borneo (Indonesia and Malaysia). Since the original listing, taxonomic reviews by the scientific community support Pongo abelii in Sumatra (Indonesia) as being a separate species from Pongo pygmaeus in Borneo (Indonesia and Malaysia). Because both species are considered part of the original listed entity, the revised taxonomy does not change the endangered status of either species. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Janine Van Norman, 703-358-2370	Not subject to OMB review Pushed from Q4 to Q1

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

1018-BA21 Endangered and Threatened Wildlife and Plants; Technical Corrections of Taxonomy and Nomenclature for 40 Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will correct scientific names and common names on the Lists of Endangered and Threatened Wildlife and Plants for approximately 40 species through a direct final rule. The corrections are administrative in nature and involve no substantive changes to the Lists, or any applicable regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444	Not subject to OMB review
‡1018-BA54 Endangered and Threatened Wildlife and Plants; Technical Corrections for Eight Wildlife Species 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will revise the List of Endangered and Threatened Wildlife in accordance with the Endangered Species Act to correct errors for several species of wildlife in the "Vertebrate population where endangered or threatened" column. The CFR incorrectly identifies some wildlife species as being listed only in the United States, and others as being listed only outside the United States, even though the species were originally listed in their entirety both inside and outside the United States, and no subsequent rulemakings have altered the original listings. These revisions are editorial in nature and involve no substantive changes to the List, or to any applicable regulations. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Not subject to OMB review

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

1018-xxxx Endangered and Threatened Wildlife and Plants; 12-Month Finding on a Petition/Proposal to List the Yangtze Sturgeon (*Acipenser dabryanus*) as an Endangered Species 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to list the Yangtze Sturgeon (*Acipenser dabryanus*) as endangered under the ESA. This fish species is found in China. **Controversy:** While there is no controversy for this species, China is concerned that the potential listing of this species will have an impact on other species that are traded internationally, such as the Amur sturgeon. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review Submitting RIN request; PR would be pub Oct 31 2017
1018-xxxx Proposed Rule to Establish a Nonessential Experimental Population of the California Condor in the Pacific Northwest 50 CFR 17	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to designate an area in the Pacific Northwest as a nonessential experimental population area for reintroduction of California condors. This action is being taken in partnership with the National Park Service and the Yurok Tribe in support of recovery goals for the species. **Controversy:** ???? **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Submitting RIN request; 12/15/17

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

1018-xxxx Endangered and Threatened Wildlife and Plants; Amending the Listing for the Southern Selkirk Mountains Population of Woodland Caribou 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to amend the current listing of the endangered southern Selkirk Mountains population of woodland caribou, to define a distinct population segment (DPS) consistent with the 1996 DPS Policy. FWS will make a final determination on the proposal to list as threatened the Southern Mountain Caribou DPS, which includes the southern Selkirk Mountains population of woodland caribou, a trans-boundary species between British Columbia, Canada, and northern Idaho and northeastern Washington. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	Submitting RIN request; 12/15/17
1018-xxxx Endangered and Threatened Wildlife and Plants; Listing Determination for the Hyacinth Macaw 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to list the hyacinth macaw (*Anodorhynchus hyacinthinus*) as an threatened species under the Endangered Species Act. FWS is also proposing a 4(d) rule that will exempt interstate trade. This bird species is found in Bolivia, Brazil, and Paraguay **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Sarah Quamme, 703-358-1796.	Not subject to OMB review Submitting RIN request; FR would publish Nov 2017

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

RIN, Title, CFR Citation	Type	Description (Including whether or not rule is significant or major and the name and phone number of a contact)	Ready for OMB Review
1018-xxxx; Endangered Species Status for Five Tarantula Species from Sri Lanka 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** Under the Endangered Species Act, FWS will list as endangered the following five tarantula species from Sri Lanka: Poecilotheria fasciata, P. ornata, P.smithi, P. subfusca, and P. vittata. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Janine Van Norman, 703-358-2376.	Submitting RIN request; FR would publish Oct 2017
1018-xxxx General Provisions; Revised List of Migratory Birds 50 CFR 10.13	PR	Not significant. Not major. Not court driven. **What the rule does:** The purpose of this rule making is administrative in nature and meant to inform the public of the species protected by the MBTA. This rule is required to update the current list of migratory birds protected by the MBTA as published in 50 CFR 10.13. This proposed rule will update the list based on scientific changes to bird taxonomy (i.e., common names, scientific names, families, etc.). Without updating this list, the public will be unaware of current avian taxonomy and how it relates to birds protected by law. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Eric Kershner, 703-358-2376.	12/15/17 Submitting RIN request
1018-xxxx Regulations for Managing Resident Canada Goose Populations 50 CFR 21	PR	Not significant. Not major. Not court driven. **What the rule does:** FWS proposes to amend the regulations governing control of resident Canada geese by removing the date restrictions on authorized destruction of resident Canada goose nests and eggs. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Paul Padding, 301-497-5851.	12/1/17 Submitting RIN request

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

1018-xxxx Migratory Bird Subsistence in Alaska; Harvest Regulations for Migratory Birds in Alaska during the 2018 Season 50 CFR 92	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS promulgates subsistence harvest regulations for migratory birds for the 2018 season in Alaska. These regulations enable the continuation of customary and traditional subsistence uses of migratory birds in Alaska and prescribe regional information on when and where the harvesting of birds may occur. These regulations are developed under a co-management process involving the FWS, the Alaska Department of Fish and Game, and Alaska Native representatives. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Donna Dewhurst, 907-786-3499.	12/15/17 Submitting RIN request
1018-BB39 Endangered and Threatened Wildlife and Plants**;** Removal of Hidden Lake Bluecurls from the List of Threatened and Endangered Plants 50 CFR 17	FR	Not significant. Not major. Not court driven. **What the rule does:** FWS will make a final determination on a proposal to remove Hidden Lake bluecurls from the List of Endangered and Threatened Plants due to recovery. The species is endemic to an alpine lake in California. **Controversy:** None anticipated. **Dates of any briefs provided to EOP:** None. **Contact:** Don Morgan, 703-358-2444.	12/15/17

Key to abbreviations: FR - Final rule; PR - Proposed rule; AN - Advance notice of proposed rulemaking; IFR – Interim final rule; PD - Non-rulemaking policy document

CFR CITATION:

50 CFR 21.13

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

In carrying out our responsibility to safeguard migratory waterfowl protected under the Migratory Bird Treaty Act of 1918, we considered proposing revisions to the regulations pertaining to permit exceptions for captive-reared mallard ducks. Our goal was to address conflicts that result from the intermingling of captive-reared mallards with wild ducks in the United States. However, we are withdrawing this rulemaking action from the Agenda as we do not have immediate plans to publish proposed regulations. We may pursue this rulemaking action at a future time.

CFR CITATION:

50 CFR 85

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We propose to update regulations that tell States how to apply for and receive grants under the Clean Vessel Act program. The program provides funds for States to install facilities for boaters to dispose of septic waste from vessels with holding tanks, and to provide information and education on the use, location, and benefits of pump-out facilities. The rule would combine two rulemakings from 1994 and 1997 and guidelines published in 1994, reducing and simplifying program rules in one location. The revisions would reflect changes in the U.S. Code, improve program management and understanding, and update information based on experience and current technology. The Sport Fishing and Boating Partnership Council, a group chartered by the Federal Advisory Committee Act, published a June 2008 report that identified 30 recommendations for improving the program in the areas of administration, reporting, funding, project maintenance, and operation. The Service is working with a Federal/State team and the States Organization for Boating Access in developing areas for improvement that will assist States in completing successful projects.

CFR CITATION:

50 CFR 21.32

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

In 2015, we proposed regulations, including creation of a new permit, governing the use of raptors (birds of prey) in abatement activities. Abatement is the use of trained raptors to flush, haze, or take birds (or other wildlife, when allowed) to mitigate depredation problems, including threats to human health and safety. The Service currently issues special purpose permits for use of raptors in abatement. We are withdrawing this rulemaking action from the Agenda as we do not have immediate plans to finalize this action. However, we may pursue completion of this rulemaking action at a future time.

CFR CITATION:

50 CFR 21

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

In 2010, we proposed to revise the regulations regarding captive-bred migratory waterfowl and other game birds (those species for which hunting regulations are established in 50 CFR 20.11), with particular provisions for muscovy ducks (Cairina moschata). The proposed rule would also consolidate and simplify permitting for captive-bred game birds by revising the regulations pertaining to Waterfowl Sale and Disposal permits. We are withdrawing this rulemaking action from the Agenda as we do not have immediate plans to finalize this action. However, we may pursue completion of this rulemaking action at a future time.

CFR CITATION:

50 CFR 22

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

In 2016, the Service revised eagle nonpurposeful take permit regulations and eagle nest take regulations pertaining to such issues as eagle population objectives, programmatic permit standards and duration, criteria for eagle nest removal permits, compensatory mitigation, refinement of the low-risk permit category, and adaptive management and monitoring. The rule also affected a permit fee table in 50 CFR part 13. However, due to a formatting error in the rule, the revisions to the fee table were not incorporated into the Code of Federal Regulations. Therefore, in 2017 we published a document to correct the formatting error. This action was purely administrative and did not affect the provisions of the original rule in any substantive way.

CFR CITATION:

50 CFR 80

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

This proposed rule will address how we count multi-year hunting and fishing licenses for States to report total license holders for their annual apportionments from the Service's Wildlife and Sport Fish Restoration (WSFR) Trust Funds under the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration Acts. These funds go to support grants and cooperative agreements that fund projects that conserve, protect, and enhance fish, wildlife, their habitats, and the hunting, sport fishing, and recreational boating opportunities they provide. State fish and game agencies have repeatedly asked for action on this issue, so initiation of an action to change inadequate language in our current implementing regulations is not controversial.

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We have implemented a fee program that exempts certain businesses from base inspection fees at designated ports. The program exempts businesses that exclusively import or export shipments that we would consider to be small and of low value. This program will serve as an interim measure while we reassess our current user fee system.

LEGAL DEADLINE:

Final, Statutory, 10/17/2013

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We will make a final determination to designate critical habitat for three Hawaiian plant species (Mezoneuron kavaiense, Isodendrion pyrifolium, and Bidens micrantha ssp. ctenophylla) under the Endangered Species Act. These three species are listed as endangered. We are correcting maps for four other listed plant species that currently have critical habitat designated. These species are found in seven multi-species critical habitat units on lands owned by the U.S. National Park Service, State of Hawaii, County of Hawaii, and private interests

CFR CITATION:

50 CFR 13

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We propose to revise our general permitting regulations, primarily to propose increases in permit application fees for various programs to better reflect the Service's costs for reviewing permit applications. Most of the permit application fees have not been amended since 2005. While a portion of the proposed fee increases are to address rising operational costs, the increases also reflect increased complexity in evaluating some application types and the need for improved technology to better streamline the process and reduce burdens on the permitted communities. In addition, the proposed fee increases are to be more in line with OMB circular A25. We also propose several changes to clarify the permit application reconsideration and appeal process, to correct contact information, and to make other minor changes. Permits to be affected are those that allow people to carry out otherwise prohibited activities under the Endangered Species Act, Lacey Act, Migratory Bird Treaty Act, Wild Bird Conservation Act, Marine Mammal Protection Act, and the Convention on International Trade in Endangered Species of Wild Fauna and Flora.

Migratory Bird Treaty Act, 16 U.S.C. 703 to 712

CFR CITATION:

50 CFR 21

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

This rule will add a control order to apply to cattle egrets and barn owls, two introduced and invasive migratory bird species in Hawaii. The ranges of both species have expanded to occupy all of the Hawaiian islands. Both species have been found to prey on endemic endangered or threatened species. Without this order, control of the two species would require issuing depredation permits, which would add to State and Federal agency costs for control activities that will benefit listed species.

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

FWS proposes to change its regulations in response to mandates from Executive Order 13659, Streamlining the Export/Import Process for America's Businesses, and the Safe Port Act (Public Law 109-347), which lay out the implementation of the International Trade Data System (ITDS). The proposed rule will address changes in declaration requirements and exemptions for wildlife as defined under the Endangered Species Act, including changes needed to operate within the single-window environment of ITDS, which enables interfacing with other Federal inspection agencies. The proposal will also clarify prior notification requirements and clearance refusal options, and add the ability for FWS to offer a conditional release of certain wildlife in order to coordinate release activities under ITDS among agencies operating at the borders.

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

The final rule published August 5, 2016 (81 FR 52248), and became effective September 6, 2016. The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act, signed by the President on April 3, 2017 (Pub. L. 115-20). This action conforms to Public Law 115-20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the effective date of the final rule that was nullified under the Congressional Review Act.

CFR CITATION:

50 CFR 80

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We begin a process of updating the regulations that direct State fish and wildlife agencies on how to receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, we distribute annual apportionments to States from trust funds derived from excise tax revenues and fuel taxes. We will publish an advance notice of proposed rulemaking (ANPRM) with a proposed rule (NPRM). This is the first of a four-phase rulemaking. This phase will introduce some more difficult topics, such as predator control, for discussion and future resolution via the ANPRM, while using the NPRM to propose changes to definitions and topics such as license certification, real property, program income, matching funds, and program symbols. We will also update for consistency with 2 CFR part 200. We have coordinated with State fish and wildlife agency directors on changes to license certification and worked with a Federal/State team to develop topic resolution and the phased schedule. We will post additional information, when it is available, at https://fawiki.fws.gov/display/WRR.

LEGAL AUTHORITY:

16 U.S.C. 1531 et seq.

CFR CITATION:

50 CFR 17

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We are updating the List of Endangered and Threatened Wildlife in accordance with the Endangered Species Act to correct errors for several species of wildlife in the "Vertebrate population where endangered or threatened" column. The CFR incorrectly identifies some wildlife species as being listed only in the United States, and others as being listed only outside the United States, even though the species were originally listed in their entirety both inside and outside the United States, and no subsequent rulemakings have altered the original listings. These revisions are editorial in nature and involve no substantive changes to the List, or to any applicable regulations.

CFR CITATION:

50 CFR 18

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

In 2016, we published an advance notice of proposed rulemaking regarding implementation of the annual taking limit for the Alaska-Chukotka polar bear population. The taking limit was adopted by the Commissioners to the Agreement Between the Government of the United States and the Government of the Russian Federation on the Conservation and Management of the Alaska-Chukotka Polar Bear Population (Agreement). The Service solicited public comment on the development of a regulatory program and local management structures for carrying out the responsibilities under the Agreement and title V of the Marine Mammal Protection Act of 1972, as amended. The Service also sought comments on the formation of an Alaska Native Organization for the purposes of involving subsistence users in conservation and management of polar bears in Alaska. Because we do not have immediate plans to publish a proposed rule, we are withdrawing this rulemaking action from the Agenda. However, we may pursue completion of this rulemaking action at a future time.

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

FWS and the U.S. Forest Service (U.S. Department of Agriculture) will revise the regulations for seasons, harvest limits, methods, and means for the taking of fish and shellfish for subsistence uses in Alaska during the 2017-2018 and 2018-2019 regulatory seasons. The Federal Subsistence Board will also address customary and traditional use determinations for fish and shellfish.

Migratory Bird Treaty Act, 40 Stat. 755 (16 U.S.C. 703); Pub. L. 95-616, 92 Stat. 3112 (16 U.S.C. 712(2)); Pub. L. 106-108, 113 Stat. 1491, Note following 16 U.S.C. 703

CFR CITATION:

50 CFR 20

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

Environ-Metal, Inc., of Sweet Home, Oregon, has applied for approval of shot composed of copper as nontoxic for waterfowl hunting in the United States. The shot formulation is at least 99.9 percent copper by weight, with a corrosion-inhibiting coating to prevent release of copper into the terrestrial or aquatic environments. We have initiated review of the shot as required under the criteria in the nontoxic shot approval procedures in our regulations.
Our approval of this shot formulation would increase the nontoxic shot options for hunters of migratory waterfowl.

CFR CITATION:

36 CFR 242; 50 CFR 100

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

In an October 17, 2011, order, the U.S. District Court for Alaska enjoined the United States to promptly initiate regulatory proceedings for the purpose of implementing the subsistence provisions in title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) with respect to submerged public lands within Tongass National Forest and directed entry of judgment. To comply with the order, the Federal Subsistence Board (Board) needs to initiate a regulatory proceeding to identify those submerged lands within the Tongass that did not pass to the State of Alaska at Statehood and, therefore, are subject to the subsistence provisions of ANILCA. The Bureau of Land Management (BLM) started a review of hundreds of pre-Statehood (January 3, 1959) withdrawals in the marine waters of the Tongass following the Court's order. In April and October of 2015, BLM submitted initial listings of submerged land to the Board. This rule will add those listings to the subsistence regulations to ensure compliance with the Court order. Additional listings will be published as BLM continues its review of pre-Statehood withdrawals.

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We revised the permanent subsistence migratory bird harvest regulations in Alaska. These changes will enable Alaska Natives to sell authentic native articles of handicrafts or clothing that contain inedible byproducts from migratory birds that were taken for food during the Alaska migratory bird subsistence harvest season. These regulations were developed under a co-management process involving the Service, the Alaska Department of Fish and Game, and Alaska Native representatives.

Agenda Review Report 1018-BB40

Date: 09/06/2017

TITLE:

Migratory Bird Hunting; 2017-2018 Migratory Game Bird Hunting Regulations

RIN: 1018-BB40 (Final Rule Stage) **# Paper Print:** No

 # REGULATORY PLAN: No

PRIORITY: Economically Significant
Major under 5 USC 801

 # UNFUNDED MANDATES: No

EO 13771 Designation : Fully or Partially Exempt

LEGAL AUTHORITY:

16 U.S.C. 703 to 712; 16 U.S.C. 742(a) to 742(j)

CFR CITATION:

50 CFR 20

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We propose to establish annual hunting regulations for certain migratory game birds for the 2017-18 hunting season. We annually prescribe outside limits (frameworks), within which States may select hunting seasons. This rulemaking action provides the regulatory schedule, describes the proposed regulatory alternatives for the 2017-18 duck hunting seasons, requests proposals from Indian tribes that wish to establish special migratory game bird hunting regulations on Federal Indian reservations and ceded lands, and requests proposals for the 2018 spring and summer migratory bird subsistence season in Alaska. Migratory game bird hunting seasons provide opportunities for recreation and sustenance; aid Federal, State, and tribal governments in the management of migratory game birds; and permit harvests at levels compatible with migratory game bird population status and habitat conditions.

Agenda Review Report 1018-BB73

Date: 09/06/2017

TITLE:

Migratory Bird Hunting; 2018-2019 Migratory Game Bird Hunting Regulations

RIN: 1018-BB73 (Proposed Rule Stage)

 # Paper Print: Yes

 # REGULATORY PLAN: No

PRIORITY: Economically Significant
Major under 5 USC 801

 # UNFUNDED MANDATES: No

EO 13771 Designation : Fully or Partially Exempt

LEGAL AUTHORITY:

16 U.S.C. 703 to 711; 16 U.S.C. 742a-j

CFR CITATION:

50 CFR 20

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We propose to establish annual hunting regulations for certain migratory game birds for the 2018-2019 hunting season. We annually prescribe outside limits (frameworks), within which States may select hunting seasons. This proposed rule provides the regulatory schedule, describes the proposed regulatory alternatives for the 2018-2019 duck hunting seasons, requests proposals from Indian tribes that wish to establish special migratory game bird hunting regulations on Federal Indian reservations and ceded lands, and requests proposals for the 2018 spring and summer migratory bird subsistence season in Alaska. Migratory game bird hunting seasons provide opportunities for recreation and sustenance; aid Federal, State, and tribal governments in the management of migratory game birds; and permit harvests at levels compatible with migratory game bird population status and habitat conditions.

CFR CITATION:

50 CFR 32

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We propose to make additions to refuge-specific regulations and expand hunting and fishing opportunities for the 2017 to 2018 hunting and sport fishing season. This action is part of an annual update for the National Wildlife Refuge System that ensures adequate public notice of openings and changes. We operate hunting and fishing programs on refuges to implement the National Wildlife Refuge System Improvement Act of 1997 directives to facilitate compatible priority wildlife-dependent recreational opportunities. The benefits of these changes and openings are the enhancement of conservation stewardship and outdoor recreation, and improvement of the management of game species and their habitats. Costs have been minimized through proper public notification and compliance to the legislative authority and policy.

LEGAL AUTHORITY:

16 U.S.C. 703 to 712

CFR CITATION:

50 CFR 21

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We are withdrawing our proposed rule to remove 50 CFR 21.46, a regulation that sets forth a depredation order for scrub jays and Steller's jays in Oregon and Washington. We had proposed to remove this regulation as we had received no reports of activities undertaken under the provisions of section 21.46 in the last 10 years. However, we have recently received several reports under this depredation order, so we are now withdrawing the proposed rule.

CFR CITATION:

50 CFR 80

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We continue the process of updating the rule that directs State fish and wildlife agencies on how to receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, we distribute annual apportionments to States from trust funds derived from excise tax revenues and fuel taxes. This is the second phase of a four-phase rulemaking. This phase will potentially include response to pending bills before Congress; include resolution to some more difficult topics that we receive input through an advance notice of proposed rulemaking (ANPRM) in phase 1; and propose changes to more settled topics, including definitions, topics related to the continued Federal connection to the project, audits, third-party labor, and information on coordination grants. We have worked with States and the Association of Fish and Wildlife Agencies in developing rule updates. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR.

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We continue the process of updating the rule that directs State fish and wildlife agencies on how to receive funds and implement conservation projects under the Pittman-Robertson Wildlife Restoration Act and Dingell-Johnson Sport Fish Restoration Act. Under these Acts, we distribute annual apportionments to States from trust funds derived from excise tax revenues and fuel taxes. This is the final phase of a four-phase rulemaking. The first three phases will combine a proposed rule (NPRM) with an advanced notice of proposed rulemaking (ANPRM), allowing us to collect comments on more difficult topics through the ANPRM and use the regulatory process to refine direction and gain support. Topics that are less difficult or that have already been resolved and need to move to regulation will be presented in the NPRM. Phase 4 is expected to be the final phase and may include new topics as needed or relevant. We expect to reach conclusion for all topics introduced. The preamble will continue to thoroughly describe the approach and will address topics and progress achieved to date. We will continue to work with our partners to distribute information on participation. Further information, as it becomes available, will be posted at https://fawiki.fws.gov/display/WRR.

TITLE:

Wildlife and Sport Fish Restoration Program; National Coastal Wetlands Conservation Grant Program

RIN: 1018-BB92 (Proposed Rule Stage)

 # Paper Print: No

 # REGULATORY PLAN: No

PRIORITY: Substantive, Nonsignificant

 # UNFUNDED MANDATES: No

 # MAJOR: No

EO 13771 Designation : Not subject to, not significant

LEGAL AUTHORITY:

16 U.S.C. 3951 to 3956

CFR CITATION:

50 CFR 84

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

FWS periodically updates all regulations for which the FWS Wildlife and Sport Fish Restoration Program is responsible. The National Coastal Wetlands Conservation Grant Program regulations were last revised in 2002. Since that time, cost principles, ranking criteria, and grants administration have evolved, and regulations must reflect those changes. The rulemaking process will help FWS communicate important program changes to the public and solicit input on how best to address areas where we have discretion on statute implementation. We expect to publish a proposed and final rule that will target the clarification of Criterion 11 for scoring grant applications in this rule. Currently, criterion 11 is unclear, and we will change it to reflect the consensus in meetings where we have worked to arrive at better guidance for the section.

CFR CITATION:

50 CFR 11

LEGAL DEADLINE:

Final, Statutory, 01/15/2018

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We are issuing a final rule, in accordance with the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Inflation Adjustment Act) and Office of Management and Budget (OMB) guidance, to adjust for inflation the statutory civil monetary penalties that may be assessed for violations of Service-administered statutes and their implementing regulations. We are required to adjust civil monetary penalties annually for inflation according to a formula specified in the Inflation Adjustment Act. This rule replaces the previously issued amounts with the updated amounts after using the 2018 inflation adjustment multiplier provided in the OMB guidance.

Agenda Review Report 1018-BC07

Date: 09/06/2017

TITLE:

National Wildlife Refuge System; Refuge-Specific Hunting and Sport Fishing Regulations, 2018-2019

RIN: 1018-BC07 (Proposed Rule Stage)

 # Paper Print: No

 # REGULATORY PLAN: No

PRIORITY: Substantive, Nonsignificant

 # UNFUNDED MANDATES: No

 # MAJOR: No

EO 13771 Designation : Not subject to, not significant

LEGAL AUTHORITY:

5 U.S.C. 301; 16 U.S.C. 664; 16 U.S.C. 668dd to 668ee; 16 U.S.C. 715i

CFR CITATION:

50 CFR 32

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We propose to make additions to refuge-specific regulations and expand hunting and fishing opportunities for the 2018 to 2019 hunting and sport fishing season. This action is part of an annual update for the National Wildlife Refuge System that ensures adequate public notice of openings and changes. We operate hunting and fishing programs on refuges to implement the National Wildlife Refuge System Improvement Act of 1997 directives to facilitate compatible priority wildlife-dependent recreational opportunities. The benefits of these changes and openings are the enhancement of conservation stewardship and outdoor recreation, and improvement of the management of game species and their habitat. Costs have been minimized through proper public notification and compliance to the legislative authority and policy.

Agenda Review Report 1018-BC12

Date: 09/06/2017

TITLE:

Depredation Orders for Double-Crested Cormorants; Removal of Regulations

RIN: 1018-BC12 (Final Rule Stage) **# Paper Print:** No

 # REGULATORY PLAN: No

PRIORITY: Substantive, Nonsignificant

 # UNFUNDED MANDATES: No

 # MAJOR: No **EO 13771 Designation :** Not subject to, not significant

LEGAL AUTHORITY:

16 U.S.C. 703 et seq.

CFR CITATION:

50 CFR 21.47 and 21.48

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

On May 25, 2016, the District Court for the District of Columbia ordered that both the Aquaculture Depredation Order and the Public Resources Depredation Order for double-crested cormorants be vacated until the U.S. Fish and Wildlife Service (Service) performs a new and legally adequate environmental assessment or environmental impact statement for national cormorant management orders in compliance with the requirements of the National Environmental Policy Act. The court concluded that the Service did not take careful enough consideration of the effects of the depredation orders on cormorant populations and other affected resources (fisheries, vulnerable species, and habitats) and failed to consider a range of reasonable alternatives in the remanded 2014 environmental assessment. Therefore, this rule removes the regulations setting forth the provisions of the orders at 50 CFR 21.47 and 21.48. Entities seeking to conduct activities that were covered under the orders will now have to apply for permits.

Agenda Review Report 1018-BC36

Date: 09/06/2017

TITLE:

Endangered and Threatened Wildlife and Plants; Listing Determination and Critical Habitat Designation for the Oregon Cascades-California Population of the Black-Backed Woodpecker

RIN: 1018-BC36 (Completed Actions) **# Paper Print:** No

 # REGULATORY PLAN: No

PRIORITY: Substantive, Nonsignificant

 # UNFUNDED MANDATES: No

 # MAJOR: No **EO 13771 Designation :** Not subject to, not significant

LEGAL AUTHORITY:

16 U.S.C. 1531 et seq.

CFR CITATION:

50 CFR 17

LEGAL DEADLINE:

NPRM, Judicial, 09/30/2017, Settlement agreement.

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We will make a listing determination for the Oregon Cascades-California population of the black-backed woodpecker under the Endangered Species Act. This population is found in California, North Dakota, and Oregon. We will, if prudent and determinable, also propose to designate critical habitat for the Oregon Cascades-California population of the black-backed woodpecker under the Endangered Species Act.

Agenda Review Report 1018-BC54

Date: 09/06/2017

TITLE:

Endangered and Threatened Wildlife and Plants; Technical Correction of Taxonomy and Nomenclature for the Orangutan

RIN: 1018-BC54 (Final Rule Stage) **# Paper Print:** No

 # REGULATORY PLAN: No

PRIORITY: Substantive, Nonsignificant

 # UNFUNDED MANDATES: No

 # MAJOR: No **EO 13771 Designation :** Not subject to, not significant

LEGAL AUTHORITY:

16 U.S.C. 1531 et seq.

CFR CITATION:

50 CFR 17

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We will make a taxonomic change for the orangutan. The orangutan was originally listed as a single entity under the Endangered Species Act: Pongo pygmaeus, which included orangutans from Indonesia, Malaysia, and Brunei. However, the orangutan is currently found only in northern Sumatra (Indonesia) and Borneo (Indonesia and Malaysia). Since the original listing, taxonomic reviews by the scientific community support Pongo abelii in Sumatra (Indonesia) as being a separate species from Pongo pygmaeus in Borneo (Indonesia and Malaysia). Because both species are considered part of the original listed entity, the revised taxonomy does not change the endangered status of either species. The taxonomic corrections involve no substantive changes to the List of Endangered and Threatened Wildlife, or to any applicable regulations.

Agenda Review Report 1018-BC64

Date: 09/06/2017

TITLE:

Endangered and Threatened Wildlife and Plants; Technical Correction for the Tonkin Snub-Nosed Monkey

RIN: 1018-BC64 (Completed Actions) **# Paper Print:** No

 # REGULATORY PLAN: No

PRIORITY: Substantive, Nonsignificant

 # UNFUNDED MANDATES: No

 # MAJOR: No **EO 13771 Designation :** Not subject to, not significant

LEGAL AUTHORITY:

16 U.S.C. 1531 et seq.

CFR CITATION:

50 CFR 17

LEGAL DEADLINE: None

None

OVERALL DESCRIPTION OF DEADLINE:

ABSTRACT:

We removed the endangered Tonkin snub-nosed monkey from certain regulations that apply only to primates that are listed as threatened species (50 CFR 17.40). Tonkin snub-nosed monkeys were included in these regulations when this species was listed as threatened. However, this species was reclassified as endangered in 1990. Therefore, the provisions of the regulations for threatened primates no longer apply to Tonkin snub-nosed monkeys, and, accordingly, we corrected this error in the Code of Federal Regulations.

DRAFT U.S. Fish and Wildlife Service Input for the 2017 DOI Regulatory Plan

The mission of the U.S. Fish and Wildlife Service (FWS) is to work with others to conserve, protect, and enhance fish, wildlife, and plants and their habitats for the continuing benefit of the American people. FWS also provides opportunities for Americans to enjoy the outdoors and our shared natural heritage. FWS fulfills its responsibilities through a diverse array of programs that:

- Protect and recover endangered and threatened species;
- Monitor and manage migratory birds;
- Restore native aquatic populations and nationally significant fisheries;
- Enforce Federal wildlife laws and regulate international trade;
- Conserve and restore wildlife habitat such as wetlands;
- Help foreign governments conserve wildlife through international conservation efforts;
- Distribute Federal funds to States, territories, and tribes for fish and wildlife conservation projects; and
- Manage the more than 150-million-acre National Wildlife Refuge System (NWRS), which protects and conserves fish and wildlife and their habitats and allows the public to engage in outdoor recreational activities.

During the next year, FWS regulatory priorities will include rulemaking actions that promote our Nation's hunting and fishing traditions. FWS provides wildlife-dependent recreational opportunities on NWRS lands by issuing annual rules that update the hunting and fishing regulations on specific refuges.

In carrying out our responsibility to manage migratory bird populations, we issue annual migratory bird hunting regulations. Through a collaborative rulemaking process with our State and Tribal partners, we establish the frameworks (outside limits) for States and Tribes to establish season lengths, bag limits, and areas for migratory game bird hunting. Moreover, we are proposing changes to the Federal Duck Stamp Contest that will promote hunting as an American tradition that performs an important role in conservation.

To strengthen our partnership with State conservation organizations, we are working on several rules to update and clarify our regulations under the Wildlife and Sport Fish Restoration Program. Planned regulatory revisions will reflect several new decisions agreed upon by State and Federal partners.

Finally, in the next year, FWS will issue several rules under the Endangered Species Act (ESA). While some ESA rules will add species in need of protection to the Lists of Endangered and Threatened Wildlife and Plants, we are proud to announce numerous ESA successes via rules that will either reclassify species from endangered to threatened status or remove species entirely from the Lists due to recovery. These reclassification and delisting rules comprise the majority of the 20 deregulatory rules on the FWS Unified Agenda of Regulatory and Deregulatory Actions as shown on the following list:

FWS Deregulatory Actions on the Fall 2017 Unified Agenda

Completed Actions

1018–AX99; Endangered and Threatened Wildlife and Plants; Removal of the Hualapai Mexican Vole From the List of Endangered and Threatened Wildlife

1018–AZ69; Migratory Bird Permits; Control Order for Introduced Migratory Bird Species in Hawaii (Cattle Egrets and Barn Owls)

1018–BA41; Endangered and Threatened Wildlife and Plants; Removing the Greater Yellowstone Ecosystem Population of Grizzly Bears From the List of Endangered and Threatened Wildlife

Final Rule Stage

1018–AW04; Endangered and Threatened Wildlife and Plants; Removal of Eureka Dunes Evening Primrose and Eureka Valley Dunegrass From the List of Endangered and Threatened Plants

1018–AY05; Endangered and Threatened Wildlife and Plants; Removal of Eastern Cougar From the List of Endangered and Threatened Wildlife

1018–BA31; Non-Subsistence Take of Wildlife and Public Participation and Closure Procedures on National Wildlife Refuges in Alaska

1018–BB39; Endangered and Threatened Wildlife and Plants; Removal of Hidden Lake Bluecurls From the List of Endangered and Threatened Plants

1018–BB79; Endangered and Threatened Wildlife and Plants; Removal of the Black-Capped Vireo From the List of Endangered and Threatened Wildlife

1018–BB87; Endangered and Threatened Wildlife and Plants; Removal of the Gypsum Wild-Buckwheat From the List of Endangered and Threatened Plants

1018–BB89; Endangered and Threatened Wildlife and Plants; Removal of the Kuenzler Hedgehog Cactus From the List of Endangered and Threatened Plants

Proposed Rule Stage

1018–BA88; Migratory Bird Subsistence Harvest in Alaska; Exempting Subsistence Hunters From Duck Stamp Purchase

1018–BB41; Endangered and Threatened Wildlife and Plants; Removing the Deseret Milk-Vetch From the List of Endangered and Threatened Plants

1018–BB76; Endangered and Threatened Wildlife and Plants; Removal of the Monito Gecko From the List of Endangered and Threatened Wildlife

1018–BB91; Endangered and Threatened Wildlife and Plants; Removal of the Lesser Long-Nosed Bat From the List of Endangered and Threatened Wildlife

1018–BC01; Endangered and Threatened Wildlife and Plants; Reclassification of the Kirtland's Warbler From Endangered to Threatened

1018–BC02; Endangered and Threatened Wildlife and Plants; Removal of the Colorado Butterfly Plant From the List of Endangered and Threatened Plants

1018–BC03; Endangered and Threatened Wildlife and Plants; Removal of the Water Howellia From the List of Endangered and Threatened Plants

1018–BC09; Endangered and Threatened Wildlife and Plants; Removal of the Foskett Speckled Dace From the List of Endangered and Threatened Wildlife

1018–BC10; Endangered and Threatened Wildlife and Plants; Reclassification of the Hawaiian Goose From Endangered to Threatened

1018–BC11; Endangered and Threatened Wildlife and Plants; Removal of the Interior Least Tern From the List of Endangered and Threatened Wildlife

FWS Regulatory Action on the Fall 2017 Unified Agenda

Long-term Action

1018–BA77; Injurious Wildlife Species; Listing Salamanders Due to Risk of Salamander Chytrid Fungus

Agency	Sub-Agency	Identification Number	Action Title	Type of Action	Preliminary Summary
1000 - DOI	1018 - FWS	1018-AW04	Endangered and Threatened Wildlife and Plants; Removal of Eureka Dunes Evening Primrose and Eureka Valley Dunegrass From the List of Endangered and Threatened Plants	Rulemaking	We will make a final determination on our proposal to remove Eureka Dunes evening primrose and Eureka Valley dunegrass from the List of Endangered and Threatened Plants, due to recovery The two plants are found in California
1000 - DOI	1018 - FWS	1018-AX99	Endangered and Threatened Wildlife and Plants; Removal of the Hualapai Mexican Vole From the List of Endangered and Threatened Wildlife	Rulemaking	We made a final determination on our proposal to remove the Hualapai Mexican vole, a species in Arizona, from the List of Endangered and Threatened Wildlife, because the best scientific or commercial data avilable when the subspecies was listed were in error 82 FR 28582
1000 - DOI	1018 - FWS	1018-BA31	Non-Subsistence Take of Wildlife and Public Participation and Closure Procedures on National Wildlife Refuges in Alaska	Rulemaking	The final rule published August 5, 2016 (81 FR 52248), and became effective September 6, 2016 The final rule was nullified by a joint resolution of disapproval under the Congressional Review Act, signed by the President on April 3, 2017 (Pub L 115-20) This action conforms to Public Law 115-20 by changing the Code of Federal Regulations to reflect the regulations as they existed before the effective date of the final rule that was nullified under the Congressional Review Act
1000 - DOI	1018 - FWS	1018-BA41	Endangered and Threatened Wildlife and Plants; Removal of the Greater Yellowstone Ecosystem Population of Grizzly Bears From the List of Endangered and Threatened Wildlife	Rulemaking	We made a final determination on our proposal to identify the Greater Yellowstone Ecosystem (GYE) grizzly bear population of Montana, Idaho, and Wyoming as a distinct population segment (DPS) and revise the List of Endangered and Threatened Wildlife by removing grizzly bears within the GYE DPS 82 FR 30502
1000 - DOI	1018 - FWS	1018-BA88	Migratory Bird Subsistence Harvest in Alaska; Exempting Subsistence Hunters From Duck Stamp Purchase	Rulemaking	We propose to amend the regulations governing subsistence hunting of migratory birds in Alaska by adding an exemption for rural subsistence migratory bird hunters in Alaska to purchase a Duck Stamp Doing so will comport with the intent of Congress as written in the Federal Duck Stamp Act of 2014
1000 - DOI	1018 - FWS	1018-BB29	Endangered and Threatened Wildlife and Plants; Removal of the Scarlet-Chested Parakeet and Turquoise Parakeet From the List of Endangered and Threatened Wildlife	Rulemaking	We made a final determination on our proposal to remove the scarlet-chested parakeet and the turquoise parakeet from the list List of Endangered and Threatened Wildlife, due to recovery The scarlet-chested parakeet is found in open woodlands or shrublands among sand plains of the dry inland portions of Australia The turquoise parakeet is found in open woodlands and timbered grasslands of eastern and southeastern Australia 82 FR 16522
1000 - DOI	1018 - FWS	1018-BB39	Endangered and Threatened Wildlife and Plants; Removal of Hidden Lake Bluecurls From the List of Endangered and Threatened Plants	Rulemaking	We will make a final determination on our proposal to remove Hidden Lake bluecurls, a plant endemic to an alpine lake in California, from the Federal List of Endangered and Threatened Plants due to recovery
1000 - DOI	1018 - FWS	1018-BB41	Endangered and Threatened Wildlife and Plants; Removing Deseret Milk-Vetch From the List of Endangered and Threatened Plants	Rulemaking	We will propose to remove the Deseret milk-vetch from the List of Endangered and Threatened Plants, due to recovery of the species This species is found in Utah

1000 - DOI	1018 - FWS	1018-BB79	Endangered and Threatened Wildlife and Plants; Removal of the Black-capped Vireo From the Federal List of Endangered and Threatened Wildlife	Rulemaking	We will make a final determination on our proposal to remove the black-capped vireo from the List of Endangered and Threatened Wildlife due to recovery This species breeds and nests in south-central Oklahoma, Texas, and the northern states of Mexico (Coahuila, Nuevo Leon, Tamaulipas), and winters along Mexico's western coastal states
1000 - DOI	1018 - FWS	1018-BB87	Endangered and Threatened Wildlife and Plants; Removal of the Gypsum Wild-Buckwheat From the List of Endangered and Threatened Plants	Rulemaking	We will make a final determination on our proposal to remove gypsum wild-buckwheat from the List of Endangered and Threatened Plants, due to recovery This species is a regionally endemic, perennial plant species in New Mexico
1000 - DOI	1018 - FWS	1018-BB91	Endangered and Threatened Wildlife and Plants; Removal of the Lesser Long-Nosed Bat From the List of Endangered and Threatened Wildlife	Rulemaking	We will make a final determination on our proposal to remove the lesser long-nosed bat from the List of Endangered and Threatened Wildlife, due to recovery The lesser long-nosed bat is found from the southwestern United States southward through Mexico
1000 - DOI	1018 - FWS	1018-BC04	Endangered and Threatened Wildlife and Plants; Reinstatement of Removal of the Gray Wolf in Wyoming from the Federal List of Endangered and Threatened Wildlife	Rulemaking	We published a final rule removing gray wolves in Wyoming from the Federal List of Endangered and Threatened Wildlife Pursuant to the United States Court of Appeals for the District of Columbia order dated March 3, 2017, and court mandate, which we expect the court to issue on April 24, 2017, this rule removes gray wolves in Wyoming from the List of Endangered and Threatened Wildlife 82 FR 20284
1000 - DOI	1018 - FWS	1018-AZ69	Migratory Bird Permits; Control Order for Introduced Migratory Bird Species in Hawaii (Cattle Egrets and Barn Owls)	Rulemaking	This rule adds a control order to apply to cattle egrets and barn owls, two introduced and invasive migratory bird species in Hawaii The ranges of both species have expanded to occupy all of the Hawaiian islands Both species have been found to prey on endemic endangered or threatened species Without this order, control of the two species would require issuing depredation permits, which would add to State and Federal agency costs for control activities that will benefit listed species Cattle egrets and barn owls are invasive in Hawaii and threaten native wildlife with extinction Nonlethal methods have been unsuccessful in reducing the impacts caused by cattle egrets and barn owls This final rule allows take by agencies that have functional and/or jurisdictional responsibility for controlling invasive species and protecting native species in the Hawaiian Islands 82 FR 34419
1000 - DOI	1018 - FWS	1018-BC01	Endangered and Threatened Wildlife and Plants; Reclassifying the Kirtland's Warbler From Endangered to Threatened	Rulemaking	We will propose to reclassify the Kirtland’s warbler from endangered to threatened on the List of Endangered and Threatened Wildlife, with a rule promulgated under section 4(d) of the Endangered Species Act This species is found in Michigan, Wisconsin, South Carolina, and Florida in the United States It is also found in Canada during the breeding season, and in the Bahamas during the winter period
1000 - DOI	1018 - FWS	1018-BB89	Endangered and Threatened Wildlife and Plants; Removal of Kuenzler Hedgehog Cactus From the List of Endangered and Threatened Plants	Rulemaking	We will make a final determination on our proposal to remove Kuenzler hedgehog cactus from the List of Endangered and Threatened Plants The species occurs in New Mexico

1000 - DOI	1018 - FWS	1018-AY05	Endangered and Threatened Wildlife and Plants; Removal of Eastern Cougar From the List of Endangered and Threatened Wildlife	Rulemaking	We will make a final determination on our proposal to delist the eastern cougar, formerly found in eastern North America, due to extinction
1000 - DOI	1018 - FWS	1018-BA77	Injurious Wildlife Species; Listing Salamanders Due to Risk of Salamander Chytrid Fungus	Rulemaking	We are reviewing public comments received on the January 13, 2016, interim rule that added 201 species to the injurious wildlife list, and we are evaluating the Order Caudata to confirm or revise which salamander species should be listed in the regulations as injurious to prevent the risk of introduction into the United States of Batrachochytrium salamandrivorans, a fungus that causes fatal infections in European salamanders The fungus affects only salamanders and is not yet known to be found in the United States
1000 - DOI	1018 - FWS	1018-BB40	Migratory Bird Hunting; 2017-2018 Migratory Game Bird Hunting Regulations	Rulemaking	This rulemaking allows an otherwise prohibited activity Under the Migratory Bird Treaty Act, the annual migratory bird hunting season remains closed until we open it through rulemaking We establish annual hunting regulations for certain migratory game birds for the 2017-18 hunting season 82 FR 34752 Further, the final rule will result in an estimated consumer surplus of $317 8–$416 8 million and migratory bird hunters will spend approximately $1 5 billion at small businesses during the 2018-19 season The figures in columns M - R are consumer surplus measures of hunter's willingness to pay for migratory bird hunting The $1 5 billion figure is a transfer from buyers and sellers, and is therefore not included in M - R
1000 - DOI	1018 - FWS	1018-BB73	Migratory Bird Hunting; 2018-2019 Migratory Game Bird Hunting Regulations	Rulemaking	This rulemaking allows an otherwise prohibited activity Under the Migratory Bird Treaty Act, the annual migratory bird hunting season remains closed until we open it through rulemaking We establish annual hunting regulations for certain migratory game birds for the 2018-19 hunting season Further, the final rule will result in an estimated consumer surplus of $317 8–$416 8 million and migratory bird hunters will spend approximately $1 5 billion at small businesses during the 2018-19 season The figures in columns M - R are consumer surplus measures of hunter's willingness to pay for migratory bird hunting The $1 5 billion figure is a transfer from buyers and sellers, and is therefore not included in M - R
1000 - DOI	1018 - FWS	1018-BB76	Endangered and Threatened Wildlife and Plants; Removal of the Monito Gecko From the List of Endangered and Threatened Wildlife	Rulemaking	We propose to remove the Monito gecko from the Federal List of Endangered and Threatened Wildlife due to recovery This species is endemic to the island of Monito, located 68 kilometers west of Puerto Rico
1000 - DOI	1018 - FWS	1018-BC02	Endangered and Threatened Wildlife and Plants; Removing Gaura neomexicana ssp coloradensis (Colorado Butterfly Plant) from the Federal List of Endangered and Threatened Plants	Rulemaking	We will propose to remove *Oenothera coloradensis*, currently listed as *Gaura neomexicana* ssp *coloradensis* and commonly known as Colorado butterfly plant, from the Federal List of Endangered and Threatened Plants due to recovery This plant is found in Colorado, Nebraska, and Wyoming Accordingly, we also propose to remove the designated critical habitat for this plant at 50 CFR 17 96(a)

1000 - DOI	1018 - FWS	1018-BC03	Endangered and Threatened Wildlife and Plants; Removing Water Howellia from the List of Endangered and Threatened Plants	Rulemaking	We will propose to remove water howellia from the Federal List of Endangered and Threatened Plants due to recovery of the species This species is found inÂ California, Oregon, Washington, Idaho, and Montana
1000 - DOI	1018 - FWS	1018-BC09	Endangered and Threatened Wildlife and Plants; Removing Foskett Speckled Dace From the List of Endangered and Threatened Wildlife	Rulemaking	We will propose to remove Foskett speckled dace, found in Oregon, from the List of Endangered and Threatened Wildlife due to recovery
1000 - DOI	1018 - FWS	1018-BC10	Endangered and Threatened Wildlife and Plants; Reclassifying Hawaiian Goose from Endangered to Threatened with 4(d) Rule	Rulemaking	We will propose to reclassify the Hawaiian goose from endangered to threatened under the Endangered Species Act (ESA) We will also propose to establish regulations for the conservation of the species under section 4(d) of the ESA
1000 - DOI	1018 - FWS	1018-BC11	Endangered and Threatened Wildlife and Plants; Removing Interior Least Tern From the List of Endangered and Threatened Wildlife	Rulemaking	We will propose to remove the interior least tern from the List of Endangered and Threatened Wildlife due to recovery

Memorandum

To: Director, Office of the Executive Secretariat and Regulatory Affairs

Through: Acting Assistant Secretary for Fish and Wildlife and Parks

From: Director

Subject: Regulatory Report to Office of Management and Budget (OMB) for the First Quarter of Fiscal Year 2018;
Unified Agenda of Regulatory and Deregulatory Actions, Fall 2017;
FWS portion of the DOI Regulatory Plan; and
List of Regulatory and Deregulatory Actions, Fall 2017

The U.S. Fish and Wildlife Service (Service) hereby submits the following:

- **Draft Regulatory Report to the Office of Management and Budget for the First Quarter of Fiscal Year 2018**—This table contains rulemaking actions that should be ready for review by the Department of the Interior (DOI) and OMB during the period October through December 2017. The Service respectfully submits this list in accordance with Executive Order (E.O.) 12866, "Regulatory Planning and Review."
- **Draft Unified Agenda of Regulatory and Deregulatory Actions, Fall 2017 (Agenda)**—This report notifies the public of all deregulatory and regulatory actions that the Service expects to move forward from the present through October 2018. The Service respectfully submits the Agenda in accordance with E.O. 12866. Note: The Service may add up to 21 new actions to the Agenda; these actions are currently pending approval.
- **Regulatory Plan, Fall 2017**—This document publishes with the Fall Agenda and briefly describes the Service mission and our major rulemaking initiatives for the coming year. It also meets the requirements of E.O. 12866.
- **List of Regulatory and Deregulatory Actions, Fall 2017**—This spreadsheet lays out deregulatory actions and significant and/or economically significant regulatory actions under E.O. 13771.

If you need additional information or have any questions, please contact Ms. Susan Wilkinson, 703-358-2506, or Ms. Sara Prigan, 703-358-2508, Division of Policy, Performance, and Management Programs.

Subject: Congressional Affairs Update
Date: Friday, September 15, 2017 1:19:32 PM
Attachments: 9.15.17.docx

Good afternoon,

The Congressional Affairs Update for this week is attached. The House Natural Resources Committee held a legislative hearing on the Sportsmen's Heritage and Recreational Enhancement (SHARE) Act. In addition, the Committee held a markup to consider the SHARE Act, and it was approved, as amended, by the Committee.

This week, the House passed a FY 2018 appropriations omnibus, which was sent to the Senate, and includes the appropriations bill that funds the Department of the Interior.

Have a good weekend,

Angela

CONGRESSIONAL AFFAIRS UPDATE

Division of Congressional and Legislative Affairs
U.S. Fish and Wildlife Service

September 15, 2017

2017 Congressional Recess Schedule

Senate	Holidays & Special Days	House
Oct. 9 – Oct. 13	**Columbus Day** Oct. 9	Oct. 9
		Oct. 16 – Oct. 20
Nov. 10	**Veterans Day** Nov. 10 (Observed)	Nov. 10
Nov. 20 – Nov. 24	**Thanksgiving Day** Nov. 23	Nov. 20 – Nov. 24
Dec. 18 – Dec. 29	**Christmas Day** Dec. 25	Dec. 18 – Dec. 29

UPDATES ON LEGISLATION OF INTEREST

House Passes Omnibus Appropriations Bill for FY 2018

On Thursday, September 14, the House of Representatives passed H.R. 3354, an eight-bill fiscal year 2018 appropriations omnibus that was automatically attached to the remaining four previously-passed appropriations bills and sent to the Senate. The bill passed by a vote of 211 to 198. The package includes the appropriations bill that funds the Department of the Interior, including $1.5 billion for the Service. The legislation prioritizes funding to advance the recovery of listed species, reduce the refuge maintenance backlog, fight invasive species, increase access to federal lands for hunting and fishing, prevent illegal wildlife trafficking, and prevent the closure of fish hatcheries. The bill also included several amendments of interest to the Service, including:

- Prohibiting the elimination the Urban Wildlife Refuge Partnership **(Rep. Sheila Jackson Lee, D-TX-18)**
- Increasing funding for the Wildlife and Habitat Management of invasive species within the National Wildlife Refuge System **(Rep. Darren Soto, D-FL-9)**
- Restricting the use of legal fees obtained from ESA-related cases **(Rep. Jason Smith, R-MO-8)**
- Prohibiting the use of funds to enforce or implement the threatened status of Preble's meadow jumping mouse under the ESA **(Rep. Doug Lamborn, R-CO-5)**
- Prohibiting the use of funds to enforce or implement the endangered or threatened status

of any listed species that has not undergone a section 4(c)(2) review under the ESA **(Rep. Lamborn)**
- Prohibits additional Service inspections for sea urchin and sea cucumber exports **(Rep. Bruce Poliquin, R-ME-2)**

Senate Continues Discussion on National Defense Authorization Act

This week, the Senate continued debate on H.R. 2810, the National Defense Authorization Act (NDAA) for fiscal year 2018. The Senate voted to substitute their version of the bill on Thursday, September 14, and invoked cloture on the measure. The Senate version of the legislation includes an authorization of the Sentinel Landscapes Partnership. The Senate is expected to complete work on the bill next week.

HEARINGS AND MARKUPS OF INTEREST

House Committee Holds Legislative Hearing on the SHARE Act

On Tuesday, September 12, the House Natural Resources Committee held a legislative hearing to discuss H.R. 3668, the Sportsmen's Heritage and Recreational Enhancement (SHARE) Act, introduced by **Rep. Jeff Duncan (R-SC-3)**. The discussion centered around the implications of the Hearing Protection provision, Title XV, and the impacts of the legislation on law enforcement activities. Members also spoke to several issues of interest to the Service, including:

- **Chairman McClintock (R-CA-4)** discussed that the purpose of the SHARE Act is to restore recreational access to public lands without prioritizing hunting and fishing over other activities.
- **Ranking Member Colleen Hanabusa (D-HI-1)**, **Rep. Jared Huffman (D-CA-2)**, **Rep. Alan Lowenthal (D-CA-47)**, and **Rep. Don Beyer (D-VA-8**) expressed concerns about the potential for the legislation to undermine numerous environmental laws, including the Marine Mammal Protection Act and the Endangered Species Act. They also expressed concern over the lack of provisions that reauthorize conservation programs, including the Land and Water Conservation Fund and the Partners for Fish and Wildlife Program.
- **Rep. Greg Gianforte (R-MT-AL)** discussed concerns with the current state of hunting and fishing access on public lands in Montana, and asked whether and how the bill would help inform sportsmen about area closures on public lands.
- **Rep. Steve Pearce (R-NM-2)**, **Rep. Scott Tipton (R-CO-3)**, and **Rep. Beyer** discussed the implications of the legislation's delisting of the gray wolf in Wyoming and the Western Great Lakes. **Rep. Pearce** talked about Wyoming's ability to manage gray wolves without federal control. **Rep. Tipton** discussed the use of science in setting population recovery goals and the Service's support of the gray wolf delisting, and suggested that the court ruling to override the decision was not based on sound science. **Rep. Beyer** expressed his concern for the removal of protections for the gray wolf.

House Committee Marks Up SHARE Act

On Tuesday, September 12 and Wednesday, September 13, the House Natural Resources Committee held a markup of the SHARE Act, which passed out of Committee by a vote of 22-13. Several proposed amendments were of interest to the Service were considered, including:

- **Amendment #1,** offered by **Chairman Rob Bishop (R-UT-1)**: Provides technical corrections relating to the Pittman Robertson Act relating to Land Grant Universities. **Agreed to by voice vote.**
- **Amendment 004**, offered by **Ranking Member Raul Grijalva (D-AZ-3)**: Permanently reauthorizes the Land and Water Conservation Fund. **Rejected 15-20.**
- **Amendment 108**, offered by **Rep. Huffman**: Authorizes the Service to seek compensation from responsible parties for damages to resources on Service-managed lands. This language has been introduced as the United States Fish and Wildlife Service Resource Protection Act in previous Congresses. **Moved to Table**.
- **Amendment 002**, offered by **Rep. Gomez**: Removes authorization of certain motorized activities in wilderness areas. **Rejected 13-23.**
- **Amendment 006**, offered by **Rep. Beyer**: Removes Title XIV, the delisting of Wyoming and Western Great Lakes gray wolves, from the SHARE Act. **Rejected 13-22**.
- **Amendment 061**, offered by **Rnk. Mem. Grijalva**: Requires the Secretary of the Interior to issue a report on the impacts of a border wall on hunting, fishing, and other outdoor recreation. **Rejected 12-22**.
- **Amendment 001**, offered by **Rep. Niki Tsongas (D-MA-3)**: Clarifies that nothing in the bill prevents the Secretary of the Interior from including climate change as a consideration in making a decision related to conservation and recreation on federal land. **Rejected 13-21**.
- **Amendment 093**, offered by **Rep. Don Young (R-AK-AL)**: Requires the Secretary of the Interior to withdraw the rule entitled "Alaska; Hunting and Trapping in National Preserves" related to predator hunting on National Park Service lands. **Adopted 21-14.**
- **Amendment 026,** offered by **Rep. Doug LaMalfa (R-CA-1)**: Adds the Guides and Outfitters Act, which streamlines the recreational permitting process on public lands. **Adopted by voice vote.**

The Committee did not mark up several bills related to the Endangered Species Act. The following bills, as well as several amendments of interest to the Service, will be considered at a later date:

- **H.R. 424, Gray Wolf State Management Act of 2017**, introduced by **Rep. Collin Peterson (D-MN-7)**.
- **H.R. 717, Listing Reform Act**, introduced by **Rep. Pete Olson (R-TX-22)**.
- **H.R. 1274, State, Tribal and Local Species Transparency and Recovery Act**, introduced by **Rep. Dan Newhouse (R-WA-4)**.
    - **Amendment 046**, offered by **Rep. McClintock**: Offers further protections to states and personal information in the disclosure of scientific data on the internet.

- **H.R. 2603, Saving America's Endangered Species (SAVES) Act**, introduced by **Rep. Louie Gohmert (R-TX-1)**.
    - **Amendment 001**, offered by **Rep. Gohmert**: Eliminates the listing of all foreign species.
- **H.R. 3131, Endangered Species Litigation Reasonableness Act**, introduced by **Rep. Bill Huizenga (R-MI-2)**.

UPCOMING HEARINGS

Senate Committee to Hold Hearing on Natural Resources Bills
On Tuesday, September 19, the Senate Committee on Energy and Natural Resources will hold a legislative hearing to consider two bills related to natural resources requirements for electricity assets on federal lands. The first bill, H.R. 1873, introduced by **Rep. Doug LaMalfa (R-CA-1)**, ensures that vegetation management exists for electrical transmission on federal lands. Section 2310 of the second bill, S. 1460, introduced by **Sen. Lisa Murkowski (R-AK)**, will also be discussed, and provides for similar requirements to that of H.R. 1873. The hearing is scheduled for 10:00 a.m. in 366 Dirksen Senate Office Building.

For more information, please visit: https://www.energy.senate.gov/public/index.cfm/hearings-and-business-meetings?ID=CF13EB5F-9A33-4FF8-AD65-25AAD698A628

Senate Subcommittee to Hold Hearing on Federal Spending
On Wednesday, September 20, the Senate Homeland Security and Governmental Affairs Subcommittee on Federal Spending Oversight and Emergency Management will hold a hearing to assess end of the year spending. The hearing is scheduled for 2:30 p.m. in 342 Dirksen Senate Office Building.

For more information, please visit:
https://www.hsgac.senate.gov/subcommittees/fso/hearings/prudent-planning-or-wasteful-binge-another-look-at-end-of-the-year-spending

INTRODUCED LEGISLATION OF INTEREST

S.1798 — A bill to establish a Federal standard in order to improve the Nation's resilience to current and future flood risk.
Sponsor: Sen. Van Hollen, Chris [D-MD] (Introduced 09/12/2017) Cosponsors: (2)
Committees: Senate - Banking, Housing, and Urban Affairs
Latest Action: 09/12/2017 Read twice and referred to the Committee on Banking, Housing, and Urban Affairs

S.1787 — A bill to reauthorize the National Geologic Mapping Act of 1992.
Sponsor: Sen. Murkowski, Lisa [R-AK] (Introduced 09/11/2017) Cosponsors: (1)
Committees: Senate - Energy and Natural Resources
Latest Action: 09/11/2017 Read twice and referred to the Committee on Energy and Natural Resources.

H.R.3794 — To direct the Secretary of the Army, acting through the Chief of Engineers, to carry out a program to prevent flooding and wastewater, sewage, trash, and sediment spills in the Tijuana River Valley, and for other purposes.
Sponsor: Rep. Vargas, Juan [D-CA-51] (Introduced 09/14/2017) Cosponsors: (0)
Committees: House - Transportation and Infrastructure, Foreign Affairs
Latest Action: 09/14/2017 Referred to the Committee on Transportation and Infrastructure, and in addition to the Committee on Foreign Affairs, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

H.R.3788 — To amend the Energy Policy and Conservation Act to provide for a Northeast Gasoline Supply Reserve, and for other purposes.
Sponsor: Rep. Pallone, Frank, Jr. [D-NJ-6] (Introduced 09/14/2017) Cosponsors: (16)
Committees: House - Energy and Commerce
Latest Action: 09/14/2017 Referred to the House Committee on Energy and Commerce.

H.R.3786 — To require the Under Secretary for Oceans and Atmosphere to update periodically the environmental sensitivity index products of the National Oceanic and Atmospheric Administration for each coastal area of the Great Lakes, and for other purposes.
Sponsor: Rep. Kildee, Daniel T. [D-MI-5] (Introduced 09/14/2017) Cosponsors: (3)
Committees: House - Natural Resources
Latest Action: 09/14/2017 Referred to the House Committee on Natural Resources.

H.R.3723 — To extend the National Flood Insurance Program.
Sponsor: Rep. Palazzo, Steven M. [R-MS-4] (Introduced 09/08/2017) Cosponsors: (0)
Committees: House - Financial Services
Latest Action: 09/08/2017 Referred to the House Committee on Financial Services.

H.R.3715 — Scenic Columbia Gorge Restoration Act of 2017
Sponsor: Rep. Walden, Greg [R-OR-2] (Introduced 09/08/2017) Cosponsors: (0)
Committees: House - Agriculture, Natural Resources
Latest Action: 09/08/2017 Referred to the Committee on Agriculture, and in addition to the Committee on Natural Resources, for a period to be subsequently determined by the Speaker, in

each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

WEEKLY REPORT
DEPARTMENT OF THE INTERIOR U.S. Fish and Wildlife Service
October 4

Week Ahead Schedule of Meetings, Hearings and Travel

On October 9-13, Principal Deputy Director Greg Sheehan will be in the office until he goes on leave Friday, October 13.

Week Ahead Announcement and Actions

October 8-14 is National Wildlife Refuge Week, an annual celebration of the nation's wildlife conservation heritage and the national wildlife refuges that protect it. Hundreds of events take place for Refuge Week at wildlife refuges across the nation.

On October 10, a scientific paper will be published in the journal *Global Change Biology*, titled *Continental-extent patterns in amphibian malformations linked to parasites, chemical contaminants and their interactions*. The majority of the data came from the FWS abnormal amphibian monitoring program, which was conducted on national wildlife refuges across the nation. The lead author, a post-doctoral researcher from the University of Colorado, will handle research related questions in coordination with their staff. Two additional co-authors are FWS employees. FWS will handle agency-centric questions. This is expected to generate some media from press. If asked talking points are available.

On October 10 and 11, FWS will host two public meetings in Nevada seeking public input for studying the environmental impacts of issuing eagle take permits to a gold mine. Hycroft Resource and Development Incorporated is requesting eagle take permits for golden eagles, which are protected under the Bald and Golden Eagle Protection Act, associated with their mining operations and proposed expansion activities at their mine in Northern Nevada. FWS intends to prepare a joint EIS with the BLM. FWS is seeking public comments to help obtain suggestions and information from agencies and the public on the scope of issues and alternatives to be addressed in the environmental impact statement (EIS). Outreach will include congressional, stakeholder and media notifications.

On October 16, Representative Debbie Dingell (D-MI) will attend an event at Detroit River International Wildlife Refuge that celebrates partner contributions to a new boat dock and fishing pier. The dock and pier will be open to the public beginning in spring of 2018. The event is invitation-only and not open to the public. Event is open to media.

In the coming weeks, FWS plans to publish in the *Federal Register* a change to the permitting status for imports of African elephant trophies from Zimbabwe. In 2014 and 2015, FWS was unable to determine that the hunting programs and subsequent imports of African elephant trophies from Zimbabwe met criteria under ESA regulations, so FWS could not authorize the issuance of import permits. After receiving information from Zimbabwe on a number of substantial improvements to their management program and elephant conservation efforts, FWS has determined that taking of African elephant trophy animals in Zimbabwe on or after January 21, 2016, (the date that Zimbabwe's new management plan was officially adopted) through 2017

would enhance the survival of African elephants, and import permits can be issued for these trophies. Planned outreach includes a news release and comprehensive FAQs.

In early October, the Alala Working Group, which is made up of FWS, the San Diego Zoo, the Hawaii Department of Forestry and Wildlife and other partners, plans a second reintroduction of the federally and state-listed endangered Alala (Hawaiian crow) into Puu Makaala Natural Area Reserve on Hawaii Island. The first reintroduction took place September 25. The Alala was extirpated from the wild in 2002, but has been successfully bred in captivity and is now ready for release. An earlier reintroduction in December 2016 was halted after challenges posed by winter storms and predation by Io (Hawaiian hawk, listed as endangered). The partners have addressed the previous challenges through changing the timing of release and incorporating a training program to teach the released birds how to better avoid the threat of Io. The reintroduction will take place on state-owned lands on Hawaii Island. The timing of the release is variable based on weather conditions and final health checks. Outreach is expected to include a news release, social media, emails and phone calls to congressional offices and stakeholders in the local Hawaiian community. This is not expected to be controversial.

Hot Topics

After Hurricane Maria, FWS has accounted for all 61 FWS personnel in Puerto Rico and the U.S. Virgin Islands. A team of six Law Enforcement employees (5 OLE, 1 CLEO) continue to deliver supplies and conduct life and wellness checks in the Cabo Rojo NWR area in southwest Puerto Rico. A second team of 14 employees (10 OLE, 4 Incident Management staff) are removing debris and repairing cages at the Puerto Rican parrot aviary in northeast Puerto Rico. Team two will also deliver supplies to Vieques and Cabo Rojo NWRs, including satellite phones.

FWS and Washington Department of Fish and Wildlife have confirmed reports of a wolf in eastern Skagit County, Washington. The gray wolf was captured and collared on June 8. The FWS Forensics Laboratory in Ashland, Oregon, completed the genetics analysis. This is the first wolf captured and collared west of the cascade crest in Washington State. Interested stakeholders include the Snoqualmie Tribe, Lummi Nation, and Swinomish Indian Tribal Community; Washington Cattlemen and livestock producers; environmental groups such as Defenders of Wildlife and Conservation Northwest; and state and federal wildlife and land management agencies. This is somewhat controversial.

The 2016 Water Resources Reform and Development Act (WRRDA) Report to Congress on Asian carp has been cleared by DOI Congressional and Legislative Affairs (OCL) and was sent to OMB on September 28 for review and approval.

In early September the FWS became aware that the Calhoun Conservation District in Marshall, Michigan, was under investigation for financial irregularities, which may involve several projects that FWS has funded. FWS takes any possible misuse of federal funds very seriously. All inquiries about this issue are referred to the Department of the Interior, Office of the Inspector General. Several news stories have recently published on this.

Charles M. Russell NWR received a letter of complaint from the Valley County Commissioners relating to its response to the Cold Smoke Fire. The letter stated that they were "disappointed in the actions of your organization in the conduct of the "Cold Smoke" fire. The concern was with FWS's response not being aggressive enough initially. The responsible fire staff made a determination that due to the location of the fire and the inaccessible nature of the area, they could not safely attack the fire at that time. The area was not accessible to fire engines and sending in firefighters on foot posed a significant danger. The project leader is preparing a response letter and will have his fire staff, who managed this fire, meet with the commissioners as requested. The project leader will also meet with the commissioners later this winter.

FWS has partnered with The Nature Conservancy (TNC) to develop a statewide programmatic Candidate Conservation Agreement with Assurances (CCAA) designed to conserve populations and habitats of greater sage-grouse, Baird's sparrow, chestnut-collared longspur, McCown's longspur, and Sprague's pipit on privately owned ranching and agricultural lands in Montana. Landowners who enroll in the CCAA agree to manage privately owned ranching and agricultural lands to remove or reduce threats to these at-risk species. In exchange, landowners receive regulatory assurances that the conservation actions implemented will result in no additional regulatory requirements for the landowner on enrolled lands if any of the species become listed under the Endangered Species Act (ESA). FWS provides these assurances through an Enhancement of Survival Permit issued to TNC, and interested landowners can enroll their properties under the permit through a Certificate of Inclusion. If any of the species covered under this CCAA become listed under the ESA, the permit would authorize any incidental take of the covered species that occurs as a result of CCAA implementation. The duration of the CCAA and the associated permit is 20 years. The open comment period for the draft CCAA and draft Environmental Assessment started on September 25 and are available for a 30-day public review and comment period ending October 25.

On September 20, FWS and Montana Fish, Wildlife, and Parks (MFWP) investigated a depredation site about ten miles west of Dupuyer, Montana along the Rocky Mountain Front. The investigation found the remains of at least four dead calves, two of which had been dead for a couple days. The calves had signs that they were killed by bears and others appeared to have been fed upon by bears. The livestock owner also reported six missing calves from that pasture. FWS and MFWP asked the landowner to move cattle to another pasture as there were numerous bears in the area and they could not be sure which animals had caused the losses. The landowner agreed to do so. On September 24, another cow was killed at an adjoining ranch and traps were set with no capture on the first night, but traps would remain for at least another night. In the week previous, four lambs were killed about five miles north of Choteau, Montana. The investigation was not conclusive on the cause of death but bears had fed on the carcasses. Bear managers from Montana Fish, Wildlife, and Parks are concerned about additional depredation events on livestock near Choteau and Dupuyer, Montana due to natural foods in the form of chokecherries and buffalo berries are becoming scarce given the colder temperatures.

In July 2017, FWS began a one-foot drawdown of the Felsenthal Pool in accordance with Felsenthal NWR's approved Habitat Management Plan, with the primary objective of fostering moist soil vegetation for waterfowl. The last drawdown occurred in 1995 and was a success. Future drawdowns are proposed once every three years. Despite the state of Arkansas' support

for the drawdown, and refuge staff's communication and coordination with congressional staff and other interested parties, the bass fishing tournament community remains concerned about potential negative impacts the drawdown may have on the quality of their upcoming tournament on October 28. Since the drawdown began, all refuge boat ramps have remained open and operational and there has been no decline in participation in tournaments or recreational fishing. Refuge staff will begin reflooding the pool on October 16, and dependent on river flows, water levels should return to normal pool by October 28.

30-60-Day Look Ahead

On October 18, a consultation meeting with the White Mountain Apache Tribe in Arizona to discuss Statement of Relations with incoming Regional Director is tentatively proposed. Details will be available as meeting is firmed up.

On October 21, a media conference regarding the proposed border wall is tentatively being planned by the local community at or near Santa Ana NWR. (FWS is not a participant). If the event takes place, it is estimated that 50 to 65 individuals could be in attendance, including 18 mayors from local towns of the Rio Grande Valley (the nearest city to the refuge is Alamo, Texas). It is anticipated the local community will have signed resolutions against the proposed project.

On October 24, FWS will join U.S. Geological Survey, U.S. Forest Service, Organization for Bat Conservation, and other partners at two Congressional events to commemorate BatWeek 2017. Both events are hosted by Congressman Glenn Thompson. The first is a Congressional briefing sponsored by the Congressman who sits on both the House Agriculture and House Natural Resources Committees. USGS is organizing the briefing as part of their congressional science series and speakers will discuss the importance of bats to the agricultural economy, impacts of white-nose syndrome, and what states and farmers are doing to benefit bats. That evening there is a congressional reception in the House Rayburn Cafeteria to showcase the federal, state, and nonprofit efforts underway to protect bats and raise awareness. These events are not controversial. The partners are proposing a press opportunity, and USDA and DOI have been invited to do Secretarial Proclamations to commemorate the week.

By October 24, the National Fish and Wildlife Foundation (NFWF) and FWS will announce funding up to $1 million for the first round of grants to fight White-Nose Syndrome (WNS) under the Bats for the Future Fund (BFF). Funded projects will include treatments and actions to fight WNS, a disease caused by fungus in hibernating bats. Bats provide important services to farmers and the forest products industry (one study showed that in Texas alone, the agricultural value of insect control by bats is $1.4 billion). In 2016, FWS provided seed funding to BFF, and additional funding was provided by the USDA Forest Service and Shell Oil Company. The grant program will annually match federal funds with sources of public and private dollars. We are coordinating with NFWF on joint media relations, including a possible media event with Shell Oil in Houston, Texas, and targeted media pitches in key markets where grants will be awarded. The announcement is not controversial.

The Department has approved FWS's distribution of more than $6.3 million in grant funding for 16 projects under the Competitive State Wildlife Grants program. Grant funds will be matched by more than $3.6 million in non-federal funds, making total available funding of more than $10 million. This slate is different from, but complementary to, the apportioned State Wildlife Grants that were announced earlier in August. The projects focus on "species of greatest conservation need" identified in State Wildlife Action Plans. Funds for this program are appropriated annually by Congress. FWS regional offices will submit individual grants for DOI approval prior to award. This is not controversial. No outreach is planned.

Endangered Species Act Listing/Delisting Actions

Pending clearance by the Department, FWS plans to send to the *Federal Register* a notice removing the textual descriptions of the critical habitat boundaries from certain plants on the Hawaiian Islands that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease or in any other way change the critical habitat designations from which FWS is removing the textual descriptions of boundaries. This action will save taxpayer resources by reducing the cost of printing the Code of Federal Regulations. No outreach is planned.

On or around October 13, FWS plans to send to the *Federal Register* a notice to reopen the comment period for the proposed rule to delist the Hidden Lake bluecurls, a plant in California, due to recovery. Stakeholders include California Department of Parks and Recreation Mount San Jacinto State Park**.** We will publish a legal notice during the re-opened comment period in a newspaper of general circulation within the species' range. This is not expected to be controversial. A news release announcing the comment period reopening will be disseminated electronically to media and stakeholders, including federal and state agencies. Affected congressional districts will also be notified.

On or around October 30, FWS plans to send to the *Federal Register* a notice requesting public comment on portions of its agency-wide Mitigation Policy and Endangered Species Act Compensatory Mitigation Policy. The portions FWS will request comment on include the policies' reference to a mitigation planning goal of net conservation gain and the policies' references to the previous Administration's mitigation directives. Based on comments received, FWS will decide whether and how to revise the policies. Outreach will include a news release and notifications to targeted stakeholders. This is not controversial.

On or around October 30, FWS plans to send to the *Federal Register* a notice requesting public comment on both the Candidate Conservation Agreements with Assurances (CCAA) policy and the corresponding regulations. These notices will solicit public comments on the 2016 revised policy and regulations to determine if there are additional revisions, particularly to the CCAA standard, that will make the policy and regulations easier to implement for those entities choosing to participate in a CCAA. Outreach will include a news release and notifications to targeted stakeholders. This is not controversial.

On or around November 3, FWS plans to send to the *Federal Register* a notice to reopen the comment period on the proposed rule to list the San Fernando Valley spineflower to allow for

public notice and comment on a Candidate Conservation Agreement (CCA) as it applies to our listing determination. The spineflower listing is locally controversial, but the reopening of comment period is not expected to be controversial. Interested stakeholders are Newhall Ranch, who developed the CCA with FWS, the City of Calabasas and Santa Monica Mountains Conservancy (the petitioners), Wild Earth Guardians (MDL Settlement Agreement), the U.S. Army Corps of Engineers, and the State of California. Planned outreach includes congressional and stakeholder notifications and a local press release to Santa Barbara County media.

On or around November 9, FWS plans to send to the *Federal Register* a final delisting the eastern puma (cougar) (historically known to exist in southeastern Ontario, southern Quebec, and New Brunswick in Canada, and a region bounded from Maine to Michigan, Illinois, Kentucky, and South Carolina in the eastern United States) from the list of endangered and threatened species due to extinction. Although we do not anticipate major public controversy with regard to the final rule, opposition to our conclusion of extinction may be expressed by advocates and advocacy organizations for puma and large predator conservation. The best available information indicates that these are cases of mistaken identity and escaped captive animals, and, rarely, dispersers from western puma populations. This rule will also acknowledge the current state of the North American puma taxonomy. Interested parties include the States within the eastern United States, the Humane Society of the United States, the Animal Legal Defense Fund, and the Cougar Network. A national news bulletin and congressional emails are planned.

On or around November 10, FWS plans to send to the *Federal Register* a notice reopening the comment period on the proposed rule to list the Western glacier stonefly and meltwater lednian stonefly, located in Montana and Wyoming, as threatened species. The listing is considered moderately controversial, but reopening of the comment period is not expected to be controversial. The State of Wyoming does not support the listing, largely due to uncertainty regarding genetic information available at the time of the proposal. Interested stakeholders include WildEarth Guardians, Xerces Society, Center for Biological Diversity and the states of Montana and Wyoming. Planned outreach is a regional news release.

On or around November 10, FWS plans to send to the *Federal Register* 90-day petition findings for five species: the oblong rocksnail, sicklefin chub, sturgeon chub, tricolored bat, and Venus flytrap. As part of this batched finding FWS is publishing a correction to the 90-day finding for leopards which clarifies the range and the entity we are evaluating in our status review. These actions are not typically controversial; however, for substantial 90-day findings, this action might be the first time stakeholders become aware that FWS is assessing the status of a species. All stakeholders will have ample opportunity to provide input into our eventual 12-month findings. A national news bulletin and Congressional notifications are planned.

On or around November 10, FWS plans to send to the *Federal Register* a proposal to reclassify the Borax Lake chub, which occurs in Oregon, from endangered to threatened. The primary threats to the species have been ameliorated; however, there is the potential for geothermal development in the vicinity. Potential stakeholders include the state of Oregon, The Nature Conservancy, Bureau of Land Management, and U.S. Department of Agriculture Animal and Plant Health Inspection Service. This action is not controversial. FWS does not anticipate negative reaction from environmental groups. We will propose reclassification but acknowledge

the interest to delist the species and ask for information regarding which alternative to take. This action will likely receive the most interest at the local and regional level. The Oregon Desert Fishes Working Group (Oregon Department of Fish and Wildlife, Bureau of Land Management, The Nature Conservancy, FWS, and others) has been engaged and is supportive of this action. FWS will conduct outreach with local and regional media, congressionals, and invested stakeholders. FWS is considering a joint announcement with the proposed delisting of the Foskett speckled dace.

On or around November 10, FWS plans to send to the *Federal Register* a proposal to delist the Foskett speckled dace, an endemic fish species in Oregon, from the ESA due to recovery. This action will likely receive the most interest at the local and regional level. The Oregon Desert Fishes Working Group (Oregon Department of Fish and Wildlife, Bureau of Land Management, The Nature Conservancy, FWS, and others) has been engaged and is supportive of this action. FWS will conduct outreach to local and regional media, congressionals, and invested stakeholders. FWS is considering a joint announcement with the proposed reclassification of the Borax Lake chub. FWS will also make the draft post-delisting monitoring plan available. This action is not controversial.

On or around November 15, FWS plans to send to the *Federal Register* a proposal to remove the Monito gecko, a reptile in Puerto Rico, from the List of Endangered and Threatened Wildlife due to recovery. It is protected in a natural reserve managed by the Puerto Rico Department of Environmental and Natural Resources (PRDNER) and which has no public access. The species protections will remain in place after delisting, and there are only a few scientific research permits granted. This action is a conservation success story and is not expected to be controversial. The primary stakeholder is the Territory of Puerto Rico. Planned outreach will include a news release and web postings.

On or around November 17, FWS plans to send to the *Federal Register* a proposed listing determination and proposed critical habitat designation for the Island marble butterfly, found in Washington. The proposed critical habitat designation includes approximately 812 acres. The single proposed unit of critical habitat is predominantly on federal lands; accordingly, the economic and other impacts of critical habitat are expected to be very low. This action is not expected to be controversial. Interested stakeholders include Xerces (the petitioner), federal partners including the National Park Service and Bureau of Land Management, and State partners including Washington Department of Fish and Wildlife, Washington Department of Natural Resources, San Juan County Land Bank, the San Juan Preservation Trust, and local landowners. A news release to all interested parties and the media is planned.

National Wildlife Refuge Actions

In October, FWS will publish a final rule on the 2017-18 Refuge-Specific Hunting and Sport Fishing Regulations. The final rule will open various national wildlife refuges to hunting and/or sport fishing for the first time (new hunts) and expand hunting and fishing opportunities at others. Outreach is planned to include a national news release when the *Federal Registe*r notice is published and notifications to members of Congress in affected districts, with some stakeholder outreach. Not controversial.

Migratory Bird Management Actions

On October 17 and 18, FWS will meet in Bloomington, Minnesota, to discuss regulatory frameworks for the 2018-19 migratory game bird hunting season lengths, dates and bag limits. Each year, FWS works in partnership with states from the four Flyway Councils (Pacific, Central, Mississippi and Atlantic) to establish regulatory frameworks for hunting season lengths, dates and bag limits. Outreach is not planned. This is not controversial.

---

Hello,

Please see the FWS Weekly Secretarial Report and next week's FishBites, attached. Please let me know if you have any questions (I'm acting for Charisa for the next two weeks).

Have a great holiday weekend,

Michael

WEEKLY REPORT
DEPARTMENT OF THE INTERIOR U.S. Fish and Wildlife Service
October 11

Week Ahead Schedule of Meetings, Hearings and Travel

On October 11, Greg Sheehan will speak at the Congressional Wildlife Refuge Caucus and the Cooperative Alliance for Refuge Enhancement in Washington, DC. On October 19, Greg Sheehan will be speaking at the 20th Anniversary of the National Conservation Training Center in Shepherdstown, WV.

Week Ahead Announcement and Actions

On October 16, Representative Debbie Dingell (D-MI) will attend an event at Detroit River International Wildlife Refuge that celebrates partner contributions to a new boat dock and fishing pier. The dock and pier will be open to the public beginning in spring of 2018. The event is invitation-only and not open to the public. Event is open to media.

On October 17 and 18, FWS will meet in Bloomington, Minnesota, to discuss regulatory frameworks for the 2018-19 migratory game bird hunting season lengths, dates and bag limits. Each year, FWS works in partnership with states from the four Flyway Councils (Pacific, Central, Mississippi and Atlantic) to establish regulatory frameworks for hunting season lengths, dates and bag limits. Outreach is not planned. This is not controversial.

Through October 18 (starts October 10), FWS, as part of a funding agreement with the U.S. Department of State, Bureau of International Narcotics and Law Enforcement Affairs, is hosting a marine wildlife crime scene investigation training for Indonesian government officials in Jakarta, Indonesia, to further the agencies' shared priority to combat wildlife trafficking. The curriculum is intensive and includes classroom as well as in-water sessions for practitioners. FWS is providing expert trainers from its Office of Law Enforcement. FWS partnered with the International Coral Reef Initiative for facilitation, logistics and additional technical expertise.

On October 21, a media conference regarding the proposed border wall is being planned by the local community at or near Santa Ana NWR. (FWS is not a participant). If the event takes place, it is estimated that 50 to 65 individuals could be in attendance, including 18 mayors from local towns of the Rio Grande Valley (the nearest city to the refuge is Alamo, Texas). It is anticipated the local community will have signed resolutions against the proposed project.

In the coming weeks, FWS plans to publish in the *Federal Register* a change to the permitting status for imports of African elephant trophies from Zimbabwe. In 2014 and 2015, FWS was unable to determine that the hunting programs and subsequent imports of African elephant trophies from Zimbabwe met criteria under ESA regulations, so FWS could not authorize the issuance of import permits. After receiving information from Zimbabwe on a number of substantial improvements to their management program and elephant conservation efforts, FWS has determined that taking of African elephant trophy animals in Zimbabwe on or after January 21, 2016, (the date that Zimbabwe's new management plan was officially adopted) through 2017

would enhance the survival of African elephants, and import permits can be issued for these trophies. Planned outreach includes a news release and comprehensive FAQs.

Hot Topics

On September 29, a U.S. District Judge dismissed a lawsuit filed against Rocky Flats NWR, in which several community and activist groups argued that opening Rocky Flats NWR near Denver, Colorado, to the public could be a health hazard. They asked the Court to delay the building and construction of trails and a multipurpose facility until FWS complies with its obligations under the National Environmental Policy Act (NEPA), the National Wildlife Refuge System Administration Act, and Executive Order 11990 by analyzing the environmental risks of opening the refuge (a former nuclear weapons manufacturing site) to the public. The judge ruled that because federal officials have not issued a final agency action regarding the building of trails and a multipurpose facility at Rocky Flats, the plaintiffs' claim that proper environmental reviews had yet to be conducted was not supported.

It was recently confirmed that on September 19 a single young-of-year black carp was collected by the Missouri Department of Conservation near Cape Girardeau, Missouri. This is the second time that young black carps have been found in the area. The presence of the small fish substantiates concerns about the successful reproduction of the invasive fish in the wild. Black carps were originally imported by the aquaculture community to keep catfish ponds clean. They primarily eat mussels and snails, and in the wild can devastate native mussel beds. Black carp response is a growing piece of the Asian Carp Regional Coordinating Committee's work, which is co-chaired by FWS.

30-60-Day Look Ahead

On October 24, FWS will join U.S. Geological Survey, U.S. Forest Service, Organization for Bat Conservation, and other partners at two Congressional events on Capitol Hill to commemorate BatWeek 2017. Both events are hosted by Congressman Glenn Thompson (R-PA). The first is a Congressional briefing sponsored by the Congressman, who sits on both the House Agriculture and House Natural Resources Committees. USGS is organizing the briefing as part of their congressional science series and speakers will discuss the importance of bats to the agricultural economy, impacts of white-nose syndrome, and what states and farmers are doing to benefit bats. That evening there is a congressional reception in the House Rayburn Cafeteria to showcase the federal, state and nonprofit efforts underway to protect bats and raise awareness. These events are not controversial. The partners are proposing a press opportunity, and USDA and DOI are planning to issue Secretarial Proclamations to commemorate the week.

By October 24, the National Fish and Wildlife Foundation (NFWF) and FWS will announce funding up to $1 million for the first round of grants to fight white-nose syndrome under the Bats for the Future Fund (BFF). Funded projects will include treatments and actions to fight the fungal disease of hibernating bats. Bats provide important services to farmers and the forest products industry (one study showed that in Texas alone, the agricultural value of insect control by bats is $1.4 billion). In 2016, FWS provided seed funding to BFF, and additional funding was provided by the USDA Forest Service and Shell Oil Company. The grant program will annually

match federal funds with sources of public and private dollars. We are coordinating with NFWF on joint media relations, including a possible media event with Shell Oil in Houston, Texas, and targeted media pitches in key markets where grants will be awarded. The announcement is not controversial.

By late October, FWS plans to publish in the *Federal Register* a draft 10-year General Conservation Plan (GCP) for Utah prairie dogs. Conservation plans such as the Utah prairie dog GCP are developed to allow for incidental take permit authorization for species listed under the Endangered Species Act. The overall goal of the Utah prairie dog GCP is to reconcile prairie dog conservation with the development needs of local communities in southwest and southcentral Utah, and compensate for impacts to Utah prairie dogs. The GCP also includes a program to allow translocations of prairie dogs from already developed (or adjacent) properties to sites on federal or other protected lands, mirroring portions of the previous state prairie dog management plan. FWS developed the GCP in partnership with the State of Utah, Iron County, and other parties.

The Department has approved FWS's distribution of more than $6.3 million in grant funding for 16 projects under the Competitive State Wildlife Grants program. Grant funds will be matched by more than $3.6 million in non-federal funds, making total available funding of more than $10 million. This slate is different from, but complementary to, the apportioned State Wildlife Grants that were announced earlier in August. The projects focus on "species of greatest conservation need" identified in State Wildlife Action Plans. Funds for this program are appropriated annually by Congress. FWS regional offices will submit individual grants for DOI approval prior to award. This is not controversial. No outreach is planned.

Endangered Species Act Listing/Delisting Actions

Pending clearance by the Department, FWS plans to send to the *Federal Register* a notice removing the textual descriptions of the critical habitat boundaries from certain plants on the Hawaiian Islands that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease or in any other way change the critical habitat designations from which FWS is removing the textual descriptions of boundaries. This action will save taxpayer resources by reducing the cost of printing the Code of Federal Regulations. No outreach is planned.

In October (with a target date of the 13th), FWS plans to reopen the comment period for the proposed rule to delist the Hidden Lake bluecurls, a plant in California, due to recovery. Stakeholders include California Department of Parks and Recreation Mount San Jacinto State Park**.** FWS will publish a legal notice during the reopened comment period in a newspaper of general circulation within the species' range. Reopening comment periods is rarely controversial. A news release announcing the comment period reopening will be disseminated electronically to media and stakeholders, including federal and state agencies. Affected congressional districts will also be notified.

On or around October 20, FWS plans to send to the *Federal Register* a notice requesting public comment on portions of its Agency-Wide Mitigation Policy and Endangered Species Act

Compensatory Mitigation Policy. The portions FWS will request comment on include the policies' reference to a mitigation planning goal of net conservation gain and the policies' references to the previous Administration's mitigation directives. Based on comments received, FWS will decide whether and how to revise the policies. Outreach will include a news release and notifications to targeted stakeholders. There is a high level of interest from states, stakeholders, NGOs and the public. There is a high level of interest from states, stakeholders, NGOs, the media and the public.

On or around October 30, FWS plans to send to the *Federal Register* a notice requesting public comment on both the Candidate Conservation Agreements with Assurances (CCAA) policy and the corresponding regulations. These notices will solicit public comments on the 2016 revised policy and regulations to determine if there are additional revisions, particularly to the CCAA standard, that will make the policy and regulations easier to implement for those entities choosing to participate in a CCAA. Outreach will include a news release and notifications to targeted stakeholders. This is not controversial.

On or around November 3, FWS plans to send to the *Federal Register* a notice to reopen the comment period on the proposed rule to list the San Fernando Valley spineflower to allow for public notice and comment on a Candidate Conservation Agreement (CCA) as it applies to our listing determination. The spineflower listing is locally controversial, but the reopening of comment period is not expected to be controversial. Interested stakeholders are Newhall Ranch, who developed the CCA with FWS, the City of Calabasas and Santa Monica Mountains Conservancy (the listing petitioners), Wild Earth Guardians (MDL Settlement Agreement), the U.S. Army Corps of Engineers, and the State of California. Planned outreach includes congressional and stakeholder notifications and a local press release to Santa Barbara County media.

On or around November 9, FWS plans to send to the *Federal Register* a final delisting the eastern puma (cougar) (historically known to exist in southeastern Ontario, southern Quebec, and New Brunswick in Canada, and a region bounded from Maine to Michigan, Illinois, Kentucky, and South Carolina in the eastern United States) from the list of endangered and threatened species due to extinction. Although we do not anticipate major public controversy with regard to the final rule, opposition to our conclusion of extinction may be expressed by advocates and advocacy organizations for puma and large predator conservation, and we can expect some national media attention. The best available information indicates that supposed recent sightings are cases of mistaken identity and escaped captive animals, and, rarely, dispersers from western puma populations. This rule will also acknowledge the current state of the North American puma taxonomy. Interested parties include the states within the eastern United States, the Humane Society of the United States, the Animal Legal Defense Fund, and the Cougar Network. A national news bulletin and congressional emails are planned.

On or around November 10, FWS plans to send to the *Federal Register* a notice reopening the comment period on the proposed rule to list the western glacier stonefly and meltwater lednian stonefly, located in Montana and Wyoming, as threatened species. The listing is considered moderately controversial, but reopening of the comment period is not expected to be controversial. The State of Wyoming does not support the listing, largely due to uncertainty

regarding genetic information available at the time of the proposal. Interested stakeholders include WildEarth Guardians, Xerces Society, Center for Biological Diversity and the states of Montana and Wyoming. Planned outreach is a regional news release.

On or around November 10, FWS plans to send to the *Federal Register* 90-day petition findings for five species: the oblong rocksnail, sicklefin chub, sturgeon chub, tricolored bat, and Venus flytrap. As part of this batched finding we are publishing a correction to the 90-day finding for leopards that clarifies the range and the entity we are evaluating in our status review. 90-day findings are just the first step in a long process and tend not to get significant media coverage except for the most high-profile species; however, for substantial 90-day findings, this action might be the first time stakeholders become aware that we are assessing the status of a species. All stakeholders will have ample opportunity to provide input into our eventual 12-month findings. A national news bulletin and congressional notifications are planned.

On or around November 10, FWS plans to send to the *Federal Register* a proposal to reclassify the Borax Lake chub, which occurs in Oregon, from endangered to threatened. The primary threats to the species have been ameliorated; however, there is the potential for geothermal development in the vicinity. Potential stakeholders include the state of Oregon, The Nature Conservancy, Bureau of Land Management, and U.S. Department of Agriculture Animal and Plant Health Inspection Service. This action is not controversial. FWS does not anticipate negative reaction from environmental groups. We will propose reclassification but acknowledge the interest to delist the species and ask for information regarding which alternative to take. This action will likely receive the most interest at the local and regional level. The Oregon Desert Fishes Working Group (Oregon Department of Fish and Wildlife, Bureau of Land Management, The Nature Conservancy, FWS, and others) has been engaged and is supportive of this action. FWS will conduct outreach with local and regional media, congressional staff, and invested stakeholders. FWS is considering a joint announcement with the proposed delisting of the Foskett speckled dace.

On or around November 10, FWS plans to send to the *Federal Register* a proposal to delist the Foskett speckled dace, an endemic fish species in Oregon, from the ESA due to recovery. This action will likely receive the most interest at the local and regional level. The Oregon Desert Fishes Working Group (Oregon Department of Fish and Wildlife, Bureau of Land Management, The Nature Conservancy, FWS, and others) has been engaged and is supportive of this action. FWS will conduct outreach to local and regional media, congressional staff, and invested stakeholders. FWS is considering a joint announcement with the proposed reclassification of the Borax Lake chub. FWS will also make the draft post-delisting monitoring plan available. This action is not controversial.

On or around November 15, FWS plans to send to the *Federal Register* a proposal to remove the Monito gecko, a reptile in Puerto Rico, from the List of Endangered and Threatened Wildlife due to recovery. It is protected in a natural reserve managed by the Puerto Rico Department of Environmental and Natural Resources that has no public access. The species protections will remain in place after delisting, and there are only a few scientific research permits granted. This action is a conservation success story and is not expected to be controversial. The primary

stakeholder is the Territory of Puerto Rico. Planned outreach will include a news release and web postings.

On or around November 17, FWS plans to send to the *Federal Register* a proposed listing determination and proposed critical habitat designation for the Island marble butterfly, found in Washington. The proposed critical habitat designation includes approximately 812 acres. The single proposed unit of critical habitat is predominantly on federal lands; accordingly, the economic and other impacts of critical habitat are expected to be very low. This action is not expected to be controversial. Interested stakeholders include Xerces (the petitioner), federal partners including the National Park Service and Bureau of Land Management, and State partners including Washington Department of Fish and Wildlife, Washington Department of Natural Resources, San Juan County Land Bank, the San Juan Preservation Trust, and local landowners. A news release to all interested parties and the media is planned.

On or around November 27, FWS plans to send to the *Federal Register* a proposal to reclassify the Kirtland's warbler from endangered to threatened. This bird is located in 31 states and the District of Columbia ranging from the Atlantic Coast west to the Mississippi River Basin, and in Canada and the Bahamas. This proposed downlisting rule will also have a special (d) rule to enable wildfire prevention and response actions, facilitate forest management activities on private lands, use designated trails and roads, allow incidental take from non-motorized recreational activities, and allow capturing and banding outside of the breeding areas. Stakeholders include Michigan Department of Natural Resources, U.S. Forest Service and Huron Pines, a conservation group, all partners in recovery activities for the species, along with other conservation groups working as part of the Kirtland's Warbler Alliance. There is not expected to be controversy associated with the proposal. There is expected to be a moderate level of interest among birders and conservation groups. Outreach will include a news release, web postings; regional media interest is expected.

On or around November 30, FWS plans to send to the *Federal Register* 12-month findings on petitions to list the blackfin sucker, Mohave shoulderband snail, white-tailed prairie dog, and Woodville Karst cave crayfish. These actions are not expected to be controversial. Planned outreach includes separate news releases for each region, many with supporting FAQs, and notifications to stakeholders and members of Congress. FWS is required by settlement agreement to submit the finding for the Mohave shoulderband snail to the *Federal Register* by November 30.

National Wildlife Refuge Actions

In October, FWS will publish a final rule on the 2017-18 Refuge-Specific Hunting and Sport Fishing Regulations. The final rule will open various national wildlife refuges to hunting and/or sport fishing for the first time (new hunts) and expand hunting and fishing opportunities at others. Outreach is planned to include a national news release when the *Federal Register* notice is published and notifications to members of Congress in affected districts, with some stakeholder outreach. Not controversial.

Migratory Bird Management Actions

At the end of October, FWS and the U.S. Department of Agriculture Wildlife Services will complete a NEPA Environmental Assessment to evaluate options for lethal take permits for aquaculture facilities, among other circumstances, and publish a notice of availability in the *Federal Register*. In 2016, the U.S. District Court vacated two FWS depredation orders that previously allowed the lethal take of cormorants, citing inadequate NEPA documentation. FWS will also review the science and options for lethal take permits involving cormorants and their potential damage to recreational and commercial fishing. FWS is striving to make certain the NEPA reviews are built on a strong biological foundation to ensure cormorants are managed responsibly and in compliance with federal laws and regulations, while also balancing economic development, human health and safety and endangered species management. Outreach is being planned, and will include notifications to targeted stakeholders and members of Congress in affected districts. This will be controversial.

FishBites 10.10.17

FWS continues to aggressively use prescribed fire in the Pacific Region to reduce excess fuel loads to avoid potentially catastrophic fires in the future, while simultaneously improving wildlife habitat.

- **Topic:** As weather permits, FWS has conducted prescribed burns at multiple NWRs in the Pacific Region in collaboration with partners. In the last week, FWS burned a record 500-plus acres in Oregon's Willamette Valley refuges, conducted a first-ever burn at Protection Island NWR, and other had other burns in Hawaii, the Southeastern Idaho Complex and the Mid-Columbia Complex in Washington.
- **Stakeholders:** BLM, National Park Service, Forest Service, Joint Base Lewis-McChord, state agencies, Native American tribes, and nonprofit groups such as The Nature Conservancy and Center for Natural Lands Management.
- **Impacted locations:** Multiple sites in Hawaii, Idaho, Oregon and Washington.

Infrastructure project at Lower Green River NWR Complex

- **Topic:** Staff at the Lower Green River NWR Complex have been working with Federal Highways, the Bureau of Land Management, Colorado Parks and Wildlife, Colorado State Land Board, Moffatt Country, Seven County Infrastructure Coalition, Utah Department of Natural Resources and several private partners to replace a bridge that is essential to the local community. The "Swinging Bridge" that crosses the Green River on Browns Park NWR was damaged three years ago by a tractor, resulting in an hour and a half detour for the community. Through the collaborative efforts of the multiagency team funding has been acquired and plans developed for the bridge replacement project that will begin the spring of 2018.
- **Supportive Stakeholders**: Community surrounding Browns Park NWR
- **Impacted Location:** Northwest, Colorado

New fishing pier at Flint Hills NWR

- **Topic:** Flint Hills NWR in Kansas has constructed a new fishing pier at Lebo Creek. The Lebo Creek location is a popular place for anglers, and the refuge sought to improve access for them and other users. The fishing deck provides people of all abilities with access to fishing opportunities.
- **Supportive Stakeholders:** Anglers, refuge visitors
- **Impacted Location:** Kansas

Modoc NWR featured on the front page of the local paper for building a paved trail that will connect Alturas, California, to the Refuge.

- **Topic:** Residents of Alturas will soon be able to walk, bike, or run to Modoc NWR's front entrance. The trail will be universally accessible and provide a safe travel corridor off the main highway for pedestrians and cyclists. An additional spur will also provide safe access to the local Desert Rose Casino. The trail will be complete at the end of October.
- **Supportive stakeholders:** Modoc County Road Department and the Federal Highway Administration

Impacted location: Alturas, California

Wildlife inspectors help to streamline import permitting for small business

- **Topic:** A small business in Wisconsin contacted FWS in regard to the inspection costs for a product that they sell in the U.S. After discussion with the owner, Office of Law Enforcement staff determined her company was a candidate for fee waivers under the current Small Business Fee Exemption Program that was implemented a few years ago.
- **Supportive Stakeholder:** Small business in Wisconsin
- **Impacted Location:** Wisconsin

FWS works with partners to conserve at-risk spotted turtle with the goal of avoiding federal listing

- **Topic:** FWS is working with 11 Northeast, Mid-Atlantic and Southeast states, other federal agencies, and non-governmental organizations to develop a regional conservation plan, identify funding, and implement on-the-ground management actions to conserve the spotted turtle. Spotted turtles have declined and are of conservation concern throughout the United States and Canada. They are identified as a Species of Greatest Conservation Need in all 21 states in which they occur and have been petitioned for federal listing under the ESA. This project directly supports the priority to work with private landowners, industry, states, and other agencies to conserve at-risk species through voluntary and non-regulatory approaches and secure the future of this species.
- **Supportive Stakeholders:** 11 States, Natural Resource Conservation Service, U.S. Forest Service, Department of Defense, The Nature Conservancy Virginia Chapter, Mid-Atlantic Center for Herpetology and Conservation
- **Impacted Location:** Northeast, Mid-Atlantic and Southeast states

FWS partners with Steve Harvey Foundation to take urban youth fishing

- **Topic**: FWS partnered with the Steve Harvey Foundation and Texas Parks and Wildlife Department (TPWD) to take 25 Dallas, Texas area boys fishing at Cedar Hill State Park on September 30, 2017. For many of the young men this was their first fishing experience and they were excited to spend the afternoon learning about fishing and being outside. One of the goals of the Steve Harvey Foundation is to introduce and pair children with community leaders as mentors; through group and one-on-one mentoring programs. Over the last five years, FWS, TPWD and the Steve Harvey Foundation have partnered on a number of events aimed at getting inner city youth engaged in outdoor experiences.
- **Supportive Stakeholders:** The Steve Harvey Foundation, hunting and fishing community, and the Texas Parks and Wildlife Department
- **Impacted Location:** Dallas, Texas

Assistant Director (AD) Meeting Notes
10.23.17

Charisa Morris is back from vacation. Her time in Greece was lovely.

Director's Office

This week is Bat Week. On Thursday, the Secretary is hosting an event around hunting and fishing access for veterans. Regional SACs from OLE are meeting this week at Skyline, and now Greg Sheehan will be joining them. Last week, Greg, Jim, and others attended the 20th Anniversary event for NCTC. A number of former Directors were there.

We have begun importation of African lions from Zimbabwe and Zambia based on the recent enhancement findings for the species.

Greg's trip to Texas to visit refuges has been postponed to line up with Deputy Secretary travel the week of November 6.

Jim spoke at the Refuge Academy on Monday.

We have several teams working on the various Secretarial Orders (3355/NEPA, 3356/Access). We have also formed a team on international travel, which includes setting priorities for future travel. A briefing with FWP on foreign travel turned into a broader briefer on travel in general, which may come under scrutiny in the future. DOI is not going to do a travel ceiling but is looking to the bureaus to set up their own reduced targets.

Ecological Services (Gary Frazer)

For the Bat Week event on Capitol Hill, Greg Sheehan will now give the remarks instead of Gary Frazer. He will be giving a bat box to Congressman Peterson, who's supportive of FWS issues.

OMSRE meeting was cancelled and will get rescheduled. The issue is whether to updated the biological opinion for coal operations issued eight months ago.

There is a meeting on lesser prairie chicken. We need to figure out the basic message on where we are at. It's related to the current progress of the SSA and how we're working with WAFWA.

There's a need to work with Departmental officials on ESA regulations, which got kicked back from OMB.

We are setting up a Mexican wolf briefing with Todd Willens and FWP.

Business and Management Operations - BMO (Janine Valesco)

Working on a tool to disseminate safety messages to employees.

Zack Gambill, Advisor

Interested in attending weekly staff meetings of the programs to learn more about USFWS.

Wildlife and Sport Fish Restoration (WSFR) (Paul Rausch)

Combined Federal Campaign (CFC) online donation portal is up and running. There's a kick off event a week from Friday at Skyline.

Bud Cribley

Chasing down some energy related issues, particularly in the Texas and New Mexico area. Also identifying energy issues with DOI.

Law Enforcement (Ed Grace)

There is a meeting this week of the Regional SACs.

International Affairs (Gloria Bell)

The Secretary is meeting with the USAID Administrator on Wednesday. Jason Larrabee will be at the meeting. Briefing materials should be sent to Karen Senhadji.

External Affairs (Matt Huggler is the Deputy, Barbara Wainman is the AD)

Barbara is back this week. Bat Week activities are this week: informal event at DOI on Tuesday morning, Congressional events in the afternoon.

Information Resources and Technology Management (Ken Taylor)

Ken is out meeting with the cyber security team this week.

Budget, Planning, and Human Capital (BPHC) (Denise Sheehan)

Denise will be out Thursday and Friday at William and Mary.

National Wildlife Refuge System

The Regions are identifying the Hunt / Fish Chiefs. Greg Sheehan would like to be part of the kick-off meeting. There is a border barrier meeting with Jason Larrabee. Cynthia will work to set up a meeting for Greg on this issue as well.

Chief of Staff

Charisa is back. Starting next week, the weekly AD Meetings on Mondays will start at 10:00a.m.

Science Applications (Seth Mott)

There are a number of people at the State Wildlife Action Plan meeting. As of now, there are six that have not been approved. Last week, Greg spoke at the ARD for SA meeting.

Migratory Birds (Jerome Ford)

Migratory Birds ARD meeting is this week at Skyline. Cormorant EA for aquaculture is on track to be finished this week.

Colloquium on Conservation of Mammals

Midwest/Southeast/Northeast Bat Working Groups

Approval & signature by Director on this multi-regional conference attendance package. Total number of attendees will be 25 with an estimated cost of $24,882. This is the first joint meeting of the North American Joint Bat Working Group (includes Midwest, Southeast, and Northeast Bat Working Groups) and the Colloquium on the Conservation of Mammals. This Mammal Colloquium will bring together conservation biologists, private and public land managers, private consultation organizations, education institutions, citizen scientists, and outdoor enthusiast.

American Ornithology Society

The American Ornithological Society (AOS) is an international society devoted to advancing the scientific understanding of birds, enriching ornithology as a profession, and promoting a rigorous scientific basis for the conservation of birds. As one of the oldest, and the largest ornithological society in the world, AOS produces scientific publications of the highest quality, hosts intellectually engaging and professionally vital meetings, serves ornithologists at every career stage, pursues a global perspective, and informs public policy on all issues important to ornithology and ornithological collections.

American Ornithology Society

Foster an integrated continental perspective for cooperative conservation and sustainable use of biological resources, contribute to the maintenance of the ecological integrity of North American ecoregions, and promote biodiversity conservation capacity building and cooperative cross-sectoral activities in the three countries that will contribute to the reduction and mitigation of threats to North American shared species and ecosystems. This is done through coordination, cooperation, and development of partnerships among wildlife agencies of the three countries and other interested parties.

Reduced Submitted Package

Reduced by 2 Travelers - Significant number of local travelers on this event.

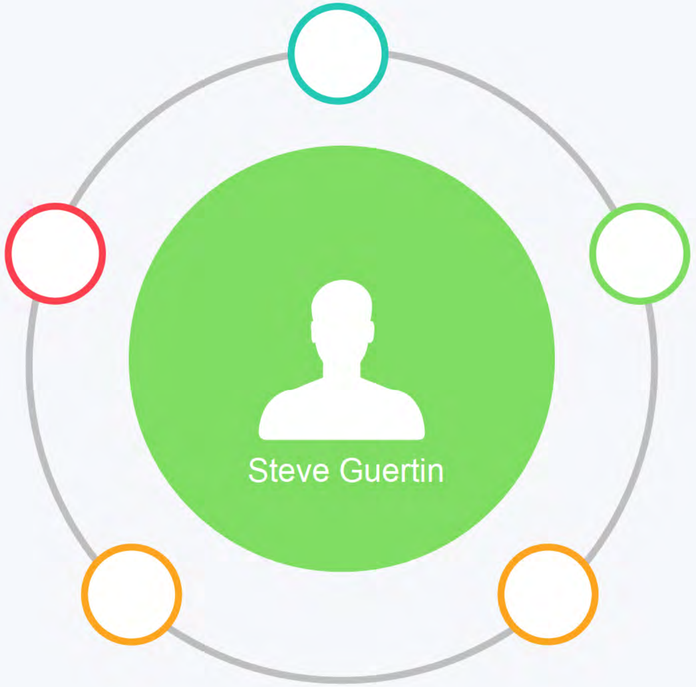
FISHNET CONFERENCE MANAGEMENT SITE

Event Evaluation



1. Karla Bartelt, NCC
2. Susan Humphrey, DFM
3. Stephanie Potter, R6
4. Megan Cook, SA-HQ
5. Lucille Frerich, R7

Five person evaluation team, consisting of the National Conference Coordinator, and four Conference Coordinators, with the full understanding that the Director is always the final decision should the event be elevated

Subject matter experts evaluate events and determine whether or not the event requires reporting.

Initiated to evaluate events to determine those that require reporting.

Significant reduction in time spent attempting to deduce whether an event requires reporting and documents those that do not for the future.

Verbal Request Added to Slide for Clarity:
We respectfully request the Executive Team be empowered with the full support of the Director to make decisions regarding conferences according to policy/guidance. When a decision is being considered or has already been made, the team lead is the National Conference Coordinator (NCC) and, when possible, we ask that leadership seek the counsel of the NCC to determine how the decision was determined before over riding that process or decision.

FISHNET CONFERENCE MANAGEMENT SITE

4 Year Plan

YEAR 1	YEAR 2	YEAR 3	YEAR 4
Design, development, and refinement	Simplify, reduce and adjust to maximize results Complete guidance and SOP's	Event list reductions and refinement to events that have expenditures under $10k with 2 years of data are moved to the Drop List and the maximum amount of expenditure is maintained on the annual plan. Reducing the nomination process of 62% of events	Event list reductions and refinement to events that have expenditures under $15k with 3 years of data solidify the management practice of adding the events to the Drop list and maintain the maximum amount of expenditure on the annual plan. Further reducing the nomination process of approximately 17% of events

FWS Recommended Attendee Worksheet for DCN: CON0000633 - Colloquium on the Conservation of Mammals - Joint Meeting (28th)(2018) 2018-03-27 to 2018-03-29 in Roanoke, Virginia

FWS Rank	Full Name	Job Title	Program	Region	Justification	Reg.	Travel	Total Cost	Funding Sc
1	Pete Pattavina	Regional White-nose Coordinator/Fish and Wildlife Biologist	ES	Region 4 - Southeast	The SBDN and North American Joint Bat Working Group meeting represents the largest transfer of information related to threatened and endangered bat species in the Southeastern United States, a collection of researchers, wildlife managers, state biologists, non-profit groups, and Federal resource agencies. To meet our USFWS Regional goals for recovery, classification, and networking, it is imperative that USFWS biologists attend and participate at this meeting. This meeting presents novel data on bat life history, threats, and conservation strategies, information that is disseminated long before publication or information that remains unpublished. As Southeastern White-nose Syndrome Coordinator, this meeting is one of the few opportunities where regional data is presented by state partners, imperative for understanding disease threats and WNS response. As a Board Member at Large for the Southeastern Bat Diversity Network, I am a meeting organizer for the North American Joint Bat Working Group Meeting, working with the Commonwealth of Virginia and Northeastern Bat Working group on logistics. Additionally, I present each year on white-nose syndrome at this meeting and often present information within the different species working groups. This year, USFWS designated endangered gray bats as a focal species, with opportunities to potentially reclassify this species. Each year, gray bats are a focus of this meeting and understanding and correctly applying data trends across each field office is imperative to meet agency goals.	$175	$1,581	$1,756	Appropria
2	Jeremy Coleman	Fish and Wildlife Biologist	ES	Region 5 - Northeast	The North American Joint Bat Working Group Meeting is a gathering of three regional bat working groups: Northeast and Midwestern bat working group, and Southeastern Bat Diversity Network (the meeting is also being held in conjunction with the Colloquium on the Conservation of Mammals in the Southeastern U.S.). Joint working group meetings only occur every 2 to 3 years, making this an important meeting of experts involved in bat conservation science and management. Bat working groups are comprised of biologists and professionals with state and federal agencies, NGOs, universities, and private firms throughout North America. The focus of this meeting is to develop strategies for bat conservation in light of multiple threats including disease, habitat degradation, climate change, and wind energy development. This meeting provides an opportunity for us to have face-to-face meetings with key partners. The national WNS team will update attendees on the status of WNS and our national response. We will also meet with members of committees and working groups of the national response. These discussions are critical to maintain collaborations and maximize efficacy of conservation efforts. As the National Coordinator for WNS, and the US Co-chair of the North American Bat Conservation Alliance, it is important for me and my team members to attend this meeting for the successful performance of our jobs and to meet organizational goals of FWS. I intend to ride-share with Federal colleagues which will reduce travel expenses from what is represented here.	$175	$1,621	$1,796	Appropria
3	Jonathan Reichard	Wildlife Biologist	ES	Region 5 - Northeast		$175	$1,453	$1,628	Appropria

					The North American Bat Working Group Meeting is being held in conjunction with the Colloquium on the Conservation of Mammals in 2018. This meeting will be a joint session of the northeastern, Midwestern, and southeastern bat working groups, which has not convened since 2015. This is an important meeting of experts from state and federal agencies, NGOs, and individuals involved in conservation science and management of bats throughout North America. The focus of this meeting is to share and advance strategies for bat conservation in light of multiple threats including disease, habitat degradation, and energy development. This meeting provides an opportunity to have face-to-face meetings with our partners. As the national assistant coordinator for the Service's white-nose syndrome (WNS), I represent the service and multi-partner national effort for this disease that is a primary threat to bats across the U.S. and Canada. I will provide the attendees with important updates on the status of WNS and the Service's programs to support state and federal partners in the management actions for WNS. I will also hold meetings with members of committees and working groups of the national response to advance important initiatives of our national response, including coordinating monitoring bat population statuses, identifying management and research priorities, and maintaining conservation partnerships. Information sharing and discussions that occur at this meeting are critical to maintain collaboration among various efforts to conserve bats, thus maximizing the effectiveness and efficiency of the national response. I intend to ride-share with others, which will reduce travel expenses.				
4	Amber Schorg	Fish and Wildlife Biologist	ES	Region 3 - Midwest	I will be attending this conference to present on the multi-year statewide bat acoustic and migration studies I have been coordinating with several partners. Abstracts and presentations are being prepared in conjunction with our partners, so I do not yet have a title/s. to report here. I am speaking with the conference organizers about hosting a full half-day tract with presentations by each partner, but the final agenda has not yet been decided. This conference will also present an excellent opportunity to network and increase my skillset in bat studies, including acoustics, netting, and tracking.	$175	$1,383	$1,558	Appropria
5	Robyn Niver	Fish and Wildlife Biologist	ES	Region 5 - Northeast	Planning to provide the annual FWS update. Serving as part of Northeast Bat Working Group leadership. Region 5 Indiana bat and northern long-eared bat species lead. Region 5 Indiana bat summer survey guidance lead. Will provide any new information on these species and learn from other presenters.	$200	$1,544	$1,744	Appropria
6	Mike Armstrong	Fish and Wildlife Biologist	ES	Region 4 - Southeast	As the Southeast Region Bat Recovery lead, the annual meeting of the Southeast Bat Diversity Network is the only opportunity I have to be in one place with all the other Federal, State, Private, and NGO biologists working with the species I am responsible for recovering. This meeting is also my opportunity to share upcoming listing and recovery information about species for which the Service is working. I will also be giving status updates for KY species at the meeting.	$200	$626	$826	Appropria
7	Christina Kocer	Fish and Wildlife Biologist	ES	Region 5 - Northeast		$175	$1,544	$1,719	Appropria

					The Northeast Bat Working Group (NEBWG) is comprised of agencies, organizations, and individuals interested in bat research, management, and conservation. This year, NEBWG is partnering with the Southeast Bat Diversity Network, Midwest Bat Working Group, as well as the Colloquium for Conservation of Mammals for a joint meeting. This joint meeting will bring together conservation biologists, private and public land managers, private consultation organizations, educational institutions, citizen scientists, and outdoor enthusiasts across the Midwest, Southeast, and Northeast Regions. This year's meeting provides a unique opportunity for me to have face-to-face meetings with state, federal, and non-governmental partners in the Northeast region, as well as other regions involved in the national response to white-nose syndrome (WNS). As the WNS Coordinator for the Northeast Region, I will be holding a meeting with regional state and federal partners to work together, coordinating our approach to conserving bat species in the region and enhance their habitat, while managing WNS. It is vitally important to have opportunities to work together to conserve wildlife and their habitats, so that we are able to use limited resources efficiently and effectively for the benefit of the American people. I also plan to present a "Northeast Regional White-Nose Syndrome Update". Further, I serve as project officer on Service funded projects that will be presented at the meeting, providing an important opportunity to get progress updates and meet with researchers. The ability to rideshare will allow for reduced costs.				
8	Keith Lott	Wildlife Biologist	ES	Region 3 - Midwest	Topics at this meeting will cover recent developments in assessing impacts to bats and the use of deterrents at both on and offshore wind energy projects. Keith's primary responsibility is reviewing proposed and existing wind turbines facilities so this information will be instrumental in providing recommendations to the industry. Keith is also the lead developer in the US Fish & Wildlife Service's bat survey database which surveyors from 4 Regions are required to submit their results. Keith will be submitting a poster presentation abstract which will outline how this data is being used, and will allow for public feedback on this two year old effort.	$175	$551	$726	Appropria
9	Catherine Hibbard	Public Affairs Specialist	EA	Region 5 - Northeast	This is the joint meeting of the Northeast, Midwest and Southern Bat Working Groups. As the national communications leader for white-nose syndrome disease in bats, it is important that I remain current on the research and management of bats and identify outreach opportunities for media. I am the lead of an interagency white-nose syndrome working group under the WNS national plan (led by the FWS), where developing and maintaining bat partnerships is important for the group to function in a coordinated manner.	$175	$1,545	$1,720	Appropria
10	Gary Jordan	Fish and Wildlife Biologist	ES	Region 4 - Southeast		$0	$644	$644	Appropria

					I am managing a 5-Year study on the Federally Threatened Northern Long-eared Bat. After two years of data collection, several important discoveries have been made. This information has major implications for the recovery of the species. This information needs to be presented to the overall bat research community. I have prepared an oral presentation to present some early findings of the research at the meeting, tentatively entitled: The Status of a Non-Hibernating Population of Northern Long-eared Bats in Eastern North Carolina. Although the title of this meeting on Fishnet is listed as "Colloquium on the Conservation of Mammals", it is also a joint meeting of the Southeastern Bat Diversity Network, the Northeastern Bat Working Group, and Midwest Bat Working Group. As such, this is the greatest opportunity to share the results of my research with the greatest number of bat biologists. The other information presented at this meeting will be useful to my own work by allowing me to keep up with the most current information, research results, and field techniques in the field of bat research. Managing and conducting bat research is a major component of my current job duties and is listed as one of my Critical Elements in my Employee Performance Appraisal Plan. This meeting is listed in my Individual Development Plan and is the major training/meeting opportunity for the year. The registration fee for this meeting will be paid from a Non-DOI source. The North Carolina Department of Transportation, which has funded the research I am managing, provided the funding for the meeting registration.				
11	Elizabeth Stout	Fish and Wildlife Biologist	ES	Region 5 - Northeast	I will be participating in this conference not only as a wildlife professional but also as a conference facilitator (on-site registration). The conference is being organized by a diverse group of individuals from various academic or NGO organizations in order to bring people together to develop solutions to challenges we collectively face for bat and wildlife management. By assisting with the planning committee and registration, I will develop a more personal relationship with these professionals, in accordance with the Service's mission of "...working with others...". The professional development offered by participation in this conference offers significant contributions to the conservation principles of Science, Partnerships, and Professionalism, and knowledge gained from the conference proceedings will greatly help my ability to effectively conduct my work as a Department of Highways Liaison. My attendance and travel will be paid for through a reimbursable agreement through the West Virginia Department of Highways.	$0	$0	$0	Reimbursa
12	Andrew King	Fish and Wildlife Biologist	ES	Region 3 - Midwest	I try to attend the Midwest Bat Working Group Meeting every year in order to stay abreast of new scientific research and pressing conservation issues within the bat community. I also use this meeting to network and collaborate with old and new partners and to provided updated info regarding the Service's new policies/positions/decisions affecting listed bat species and to explain changes to bat-related guidance (e.g., Indiana Bat Summer Survey Guidelines). This year being a combined meeting will provide additional opportunities with a broader reach. I have not settled on a poster topic as of yet, but have a couple in mind (IBat pop trends, IBat survey guidelines).	$175	$551	$726	Appropria
13	Amanda Selnick	Student Trainee	ES	Region 5 - Northeast		$75	$561	$636	Appropria

					I am participating on the committee helping to plan the conference, specifically to facilitate registration and organize the conference t-shirt design and printing. I anticipate managing onsite registration and other logistics (selling t-shirts, serving as a runner) for the planning committee. I am both a current masters student and a young professional, and I also spent my career thus far working the West, where bat issues are significantly different than those of the East. I seek to expand my knowledge of how the Eastern bat working groups manage bats and white nose syndrome as well as learning about the different challenges that are faced across the regions. Since this is a joint working group, I look forward to gaining a broad range of information to supplement my masters' final professional paper (primary topic is about developments in technology for use in wildlife monitoring/management) and critical thinking skills applicable for the rest of my career.				
14	Susan Cameron	Fish and Wildlife Biologist--Recovery	ES	Region 4 - Southeast	I am the lead for bats in western NC and work with four federally listed bat species. I am also the national lead for the Carolina northern flying squirrel. I assist the state with bat activities including WNS monitoring and research, bat populations monitoring, and outreach. Our office is also involved in several consultations related to bats. Additionally, I led the effort to form the Appalachian northern flying squirrel working group last year and we had our first working group meeting at the 2017 Southeastern Bat Diversity Network/Mammal Colloquium meeting. The working group is hoping to have its second meeting during the colloquium and I am planning on organizing and leading that meeting. The working group meeting provides a chance for partners to share information and plan/advance recovery efforts for the Carolina northern flying squirrel. I would like to attend the joint bat meeting and mammal colloquium to stay abreast of the latest research on bats and other mammals, maintain important partnerships, and to facilitate the Appalachian northern flying squirrel working group meeting.	$175	$551	$726	Appropria
15	Lori Pruitt	Fish and Wildlife Biologist	ES	Region 3 - Midwest	The Midwest Bat Working Group, the Southeastern Bat Diversity Network, and the Northeast Bat Working Group are holding this joint meeting in 2018. As the Service's Recovery Lead for the federally-endangered Indiana bat, this meeting is an opportunity for me to network with biologists from throughout the range of the species. Many high priority issues for the Indiana Field Office, as well as the Service generally, will be highlighted, including: wind-energy development impacts on bats, white-nose syndrome, Service bat listing actions and status assessments. Wind-energy development is a particular focus of this meeting, and is an issue that is also a focus of my work with the Service. There will be breakout sessions/working groups on a variety of topics – my participation will directly contribute to my understanding of these issues and current research/management actions. Both the knowledge acquired and the opportunity to network and communicate with bat biologists from throughout the eastern U.S. will contribute to my effectiveness in completing my assigned duties within the Service.	$175	$581	$756	Appropria
16	Michael Morse	Wildlife Biologist - Bat Specialist	ES	Region 4 - Southeast		$175	$817	$992	Appropria

					As bat specialist in the Raleigh ES - Manteo Sub-office, I am responsible to: plan and conduct operations to study the Northern long-eared bat (MYSE); lead efforts to study all bat species on the coastal plain of NC, work with private environmental consultants and contractors, and work with the National Wildlife Health Lab (USGS) to determine the presence or absence of White Nose Syndrome (WNS) in local bat populations. These activities entail netting and processing bats, radio-tracking bats to determine maternal roost preferences and movement patterns, and conducting active and passive acoustic monitoring efforts throughout the year. These activities are important because the bats of the coastal plain are understudied. SBDN will sponsor this meeting that will include the Northeast and Midwest Bat Working Groups. This normally annual meeting for SBDN is also the annual colloquium on the conservation of mammals in the Southeast. This meeting will bring together conservation biologist, private and public land managers, private consultation organizations, and educational institutions across the Southeast, Midwest and Northeast Regions. Presentations on the latest research, conservation efforts and newest techniques will be presented to those in attendance. Over the last few years, I've learned a lot while studying bats and would like to continue to increase my knowledge base and carry out the mission of the Service. I was able to attend the annual SBDN meeting last year for the first time and have been able to greatly use and share with others the information gained at the meeting throughout the year. Driving a GOV.				
17	Shannon Holbrook	Fish and Wildlife Biologist	ES	Region 4 - Southeast	Shannon Holbrook is the lead in our Field Office for all bat-related conservation activities in the State of Alabama, including white-nose syndrome activities, Forest Service and NRCS activities, and recovery related activities. She is also a member of the leadership team for the Alabama Bat Working Group. The Southeastern Bat Diversity Network Conference/North American Joint Bat Working Group Meeting will be a working meeting that will focus on continental issues for bat conservation including, but not limited to, recent policy changes, white-nose syndrome (WNS) and wind energy. Special symposium of working groups are scheduled for several bat species that are listed or considered species of concern for Alabama. Invited speakers will present the latest information on bat migration, onshore and offshore wind including risk assessment and mitigation, and the Motus Wildlife Tracking System. Representatives from US Fish and Wildlife Service (USFWS) will present updates on status assessments, permitting concerns, and other WNS-affected species. The Mammal Colloquium will provide a forum for student and professional oral and poster presentations on any topic related to mammals, including bat studies. This will be an important opportunity for Shannon Holbrook to stay abreast of the latest issues related to bat conservation in the southeast and meet with State and Federal agency, university, and consultant colleagues.	$175	$1,537	$1,712	Appropria
18	Pamela Shellenberger	Fish and Wildlife Biologist	ES	Region 5 - Northeast	I am the project coordinator for the O&G HCP, which is a HCP that covers that states of Ohio, Pennsylvania and West Virginia. I am also the lead for the PA Forestry HCP. I work with large pipeline companies to minimize impacts to bats. All of these projects involve partnering and networking with NGOs, industry and state and local agencies to minimize impacts to bats. Conferences such as these provide important data the Service uses when writing Biological Opinions and negotiating with industry on projects.	$175	$767	$942	Appropria
19	Carrie Allison	Fish and Wildlife Biologist	ES	Region 4 - Southeast		$175	$230	$405	Appropria

					I'm the only U.S. Fish and Wildlife Service representative for the "Protecting Bats In Coal Mines" team that is comprised of representatives from NGOs, state SMCRA regulatory authorities, and the Office of Surface Mining. The team spans all regions where federally-listed bats occur. The team depends on me to provide the most-recent information on bat research and conservation to ensure that SMCRA is implementing useful conservation measures. I am also the lead Sec 7 biologist for the Kentucky Field Office and handle the consultation load for our federal resources partners such as the Forest Service, Park Service, and Department of Defense within Kentucky. I also assist (and often take the lead) on multi-state and multi-region consultations. In the past, I have also been part of the listing/recovery/implementation team for the northern long-eared bat. This meeting allows me to stay involved with a partners and ensures I have up-to-date information scientific information. This year's meeting is of particular interest to me because it will allow several regions/agencies that I consistently work with across the US to come together for one meeting.				
20	Alicia Protus	Fish and Wildlife Biologist	ES	Region 5 - Northeast	I already registered for this conference when it was believed this meeting was mission critical and didn't need to be added through FishNet. This meeting presents typically the lastest information in bat conservation and threat management across the northeast. As a Section 7 biologist and field office lead for the northern long-eared and Indiana bats, I need to be up to date on information in this field to do my job. Also, bat managers across the region attend this meeting, so it will be a chance to meet all the contacts and partners I have been working with and introduce myself (since I moved into this position less than a year ago and many people haven't actually met me yet).	$175	$722	$897	Appropria
21	Sarah Harrison	Fish and Wildlife Biologist	ES	Region 4 - Southeast	I work on section 7 project reviews in which the majority of our projects require considerations for impacts to listed bats (primarily Indiana, and northern long eared bats but also gray bats) be made. I also work closely with the state species lead from Indiana bats and assist him with research projects that are conducted within the state. This meeting is one of the few meetings where I can gain a significant amount of institutional knowledge on current and future research projects going on across the region and nation for currently listed bat species and species that are under consideration for listing. Gaining this knowledge assists me in being able to provide accurate and up to date information in our project reviews. Attending this meeting allows me to meet and network with researchers and personnel from state and federal agencies. This allows for stronger working relationships with these individuals and allows more open communication.	$175	$551	$726	Appropria
22	Becky Rosamond	Wildlife Biologist	NWRS	Region 4 - Southeast	I am the chair the Mississippi Bat Working Group (MBWG) and serve as the official liaison between the MBWG and the Service. One of my duties as chair (as specified in the bylaws) is to attend the annual meeting of the Southeastern Bat Diversity Network (SBDN) which is held in conjunction with the mammal colloquium.	$175	$717	$892	Appropria
23	Tiernan Lennon	Fish and Wildlife Biologist	ES	Region 5 - Northeast		$0	($23)	($23)	Reimburs

					I work on section 7 and 10 ESA consultations for oil and gas development projects throughout the state of WV. Approximately 80% of those consultations deal directly with federally listed bats. In order to be more efficient and effective in my position, I need to expand my knowledge of bats to better understand how they may be affected by this growing industry in the future. I am also working on the Oil and Gas Coalition Multi-Species Habitat Conservation Plan (HCP). The HCP would cover 5 bat species and extend across 3 states (WV, OH, and PA). Staying up-to-date on the best available science relating to bat threats and recovery will allow me to be more efficient when working on the HCP. This conference relates directly to my daily work, and I think attending would benefit me professionally. Funding source is the West Virginia Oil and Natural Gas Association.				
24	Kathryn Matthews	Fish and Wildlife Biologist	ES	Region 4 - Southeast	As the NC Wind Energy Coordinator, I need to stay current on onshore and offshore wind research and issues as they pertain to bats. I also am the project manager for an SSP grant to conduct work on bat populations and habitat use in NC, and the information presented at the colloquium will assist in the planning and execution of the work under the grant. I plan to stay with family to reduce cost of lodging and M&IE, and will drive a GOV.	$175	$153	$328	Appropria
25	Place Holder	Fish and Wildlife Biologist	ES	Region 5 - Northeast	WVFO staff are participating in the planning and organization of this meeting including developing the agenda, soliciting and reviewing papers/poster submissions, and assisting with registration and moderating as needed. The WVFO is the lead field office for the endangered Virginia big-eared bat, the state contains the only critical habitat for the Indiana bat in Region 5, and WV supports a large summer population of the northern long-eared bat. A large majority of our office's consultation workload is centered on bat species.	$175	$883	$1,058	Appropria
						$3,800	**$21,082**	**$24,882**	

NOTE TO REVIEWERS*

PACKAGE CONTAINS:

Approval Request:	Regions 3,4 & 5
Conference Name:	Colloquium on the Conservation of Mammals - Joint Meeting (28th)(2...
Dates/Location:	2018-03-27 to 2018-03-29 in Roanoke, Virginia
DTS DCN#:	CON0000633

ACTION REQUESTED: Signature

STAFF ORIGINATOR: Heather Zackaricz, Conference Coordinator, Region 5

REVIEWED BY: Wendi Weber, Regional Director, Region 5

VERY BRIEF BACKGROUND ON ISSUE/ACTION:

Approval & signature by Director on this multi-regional conference attendance package. Total number of attendees will be 25 with an estimated cost of $24,882. This is the first joint meeting of the North American Joint Bat Working Group (includes Midwest, Southeast, and Northeast Bat Working Groups) and the Colloquium on the Conservation of Mammals. This Mammal Colloquium will bring together conservation biologists, private and public land managers, private consultation organizations, education institutions, citizen scientists, and outdoor enthusiast.

FINANCIAL BREAKDOWN:

	Approved by:	Approved after:
Date:	February 12, 2018	February 12, 2018
Attendees:	25	25
Registration:	$3,800	$4,550
Travel Costs:	$21,082	$21,082
Sponsorship:	$0	$0
Administrative Costs:	$0	$0
Total Cost:	$24,882	$24,882
Additional Registration Cost:		$750

For futher information please contact Heather Zackaricz at 413-253-8255.

Date

FWS Attendee Worksheet for DCN: CON0000637 - American Ornithology Society (136th)(2018)

2018-04-09 to 2018-04-14 in Tucson, Arizona

FWS Rank	Full Name	Job Title	Program	Region	Justification	Reg.	Travel	Total Cost	Funding Source
1	Jennie Duberstein	Sonoran Joint Venture Coordinator/Wildlife Biologist	MB	Region 2 - Southwest	I am part of the local organizing committee for the AOS Conference in Tucson. I have been involved in coordinating logistics since the local committee was formed. In particular, I am helping recruit and coordinate volunteers, organizing early morning bird walks during the conference, and helping to coordinate various evening events and activities.I am also co-moderating two symposia during the conference. The first, "Desert Birds in Peril: Research & Conservation Challenges in northern Mexico and the southwestern United States," brings together SJV and Rio Grande JV partners to present on their work on desert birds. I will give an introductory presentation about the SJV and our partners to set the stage for the rest of the presentations, and also moderating a panel discussion at the end. I will co-moderate the second symposium, "40 Years of Birding in Southeast Arizona," and help lead any discussion.It hasn't been confirmed yet, but local organizing committee members may be given a registration waiver, so there is a reasonable chance that there would be no cost associated with my participation in this conference.	$435	$0	$435	Appropriations
2	Patricia Heglund	Chief, Division of Natural Resources and Conservation Planning	NWRS	Region 3 - Midwest	I am hosting a symposium on waterbird monitoring and presenting a paper on the Integrated Waterbird Management and Monitoring Project.	$435	$2,053	$2,488	Appropriations
3	Randy Wilson	Station Leader	MB	Region 4 - Southeast	I am co-organizer and facilitator/moderator for an accepted mini-symposium within the Conference entitled "Setting regional priorities for research and monitoring bird populations in the face of uncertainty". Within the mini-symposium, I will also be presenting a talk entitled "Conservation challenges in the face of Gulf of Mexico restoration". Participation and attendance will facilitate the U.S. Fish and Wildlife Service's Migratory Bird Program's ability to learn about new means to advance (bird) restoration activities along the Northern Gulf of Mexico as well as to share lessons learned over the last 5 years using the principals of decision theory and establishment of bird monitoring guidelines.	$435	$1,503	$1,938	Appropriations
4	James Ward	Wildlife Ecologist	NWRS	Region 9 - Headquarters	Provide findings indicating strategies for recovering Mexican spotted owls through managing prey habitat. The Mexican spotted owl dwells in the mountains and canyons of the American Southwest an Mexico. It is listed as a Threatened Species under the ESA. Region 2 of the USFWS has the lead on recovery of this owl subspecies and provides guidance on habitat conservation to promote recovery.	$435	$1,537	$1,972	Appropriations
5	Thomas Dietsch	Migratory Bird Biologist	ES	Region 8 - Pacific Southwest		$435	$1,751	$2,186	Appropriations

					In collaboration with USGS and other partners, I have organized a symposium entitled, "Avian-solar interactions: Understanding and responding to impacts on birds of an emerging clean-energy industry." In part the symposium abstract summarizes the need for the symposium: As the heart of solar energy development in the US, the desert southwest location of the 2018 American Ornithological Society annual meeting offers a fitting context for engaging ornithologists in this emerging issue. As with wind energy, scientists again face the challenge of finding ways to reduce near-term risks to flying animals posed by technologies that help address the longer-term impacts of climate change. As the hazards of avian-solar interactions become apparent, scientists are applying a surprising array of advanced ornithological methods to understand and reduce this impact. The approaches being implemented are advancing our knowledge of birds and provide a good example of how to address other causes of anthropogenic-related avian mortality. This symposium will provide an overview of observed solar-avian interactions and the scientific response to potential risks that this expanding industry may present to birds. Among other topics, presentations will summarize avian mortalities at solar facilities, suggest how birds may perceive solar facilities, consider the potential role of migration and landscape context to mortality, and examine population-level impacts, and consider how this science may guide steps taken to reduce and mitigate impacts to migratory and resident bird populations. I will be presenting an overview of the issue as part of the symposium.				
6	John Morton	Supervisory F&W Biologist	NWRS	Region 7 - Alaska	Giving a presentation on facilitating ecological transformation in a special session entitled "Science outside the vacuum - bridging the gap between science and conservation". This session is being hosted by the National Audubon Society and invited presenters (of which I'm one) are from several agencies, NGOs and universities.	$435	$1,223	$1,658	Appropriations
7	Ariel Gaffney	Forensic Scientist - Morphology	OLE	Region 9 - Headquarters	The AOS is one of the largest ornithology conferences held and it attracts scientists from across all of North America (Canada, U.S. and Mexico). It is an invaluable opportunity to share the work of the USFWS Forensics Lab, to be informed of the latest research, and to network with my new colleagues. The exact topic of my presentation is not yet determined, but it will report on OLE's work combating wildlife crime related to birds. This is an opportunity to share our findings with a broad audience of both applied and research ornithologists. This would be my first conference as a professional and would allow me to begin to develop relationships with ornithologists from all over North America as I begin my career in the USFWS OLE.	$435	$23	$458	Appropriations
8	Susan Sferra	Fish and Wildlife Biologist	ES	Region 2 - Southwest	Clarification: I am not the Conference Organizer (limited options in drop-down menu) but I am on the local committee, assisting with a variety of local arrangements and decisions about food, coffee, evening sessions, camping options, etc. I was also asked by the conference organizers to put together a symposium on "40 years of birding in southeastern Arizona" that will be a 2 or 3 hour session with speakers. In addition to being on the local committee and organizing a symposium, I would like to attend to gain knowledge on recent advances in sound recorder monitoring and geospatial monitoring, genetics, and bird research. I have not requested attendance at a national professional bird meeting in more than 10 years. No travel expenses will be incurred since it's local.	$435	$0	$435	Appropriations
9	Jeff Gleason	Gulf of Mexico Migratory Bird Coordinator	MB	Region 4 - Southeast		$435	$1,153	$1,588	Appropriations

					Jeff will be representing the Service, Gulf Restoration Team and Migratory Bird Program as a presenter for the GoMAMN Session at the meeting. Jeff was 1 of several co-authors that submitted an Abstract for a Session at this Conference. Jeff is the Co-Lead for GoMAMN and will presenting a GoMMAPPS-related presentation entitled, “Gulf of Mexico Marine Assessment Program for Protected Species (GOMMAPPS): a Nexus to Regulatory Decision-Making”. In addition, he will also be a co-author on at least 1 other presentation during this Session. These presentations are part of an on-going effort, the Gulf of Mexico Avian Monitoring Network, that R4 Leadership has supported since its inception. Attending this Conference will also provide him with the opportunity to network with other federal and state agency partners, NGOs, and universities associated with GoMAMN in his role as Gulf of Mexico Migratory Bird Coordinator				
10	Kristine Sowl	Wildlife Biologist	NWRS	Region 7 - Alaska	The American Ornithological Society (AOS) is an international society devoted to advancing the scientific understanding of birds, enriching ornithology as a profession, and promoting a rigorous scientific basis for the conservation of birds. The meeting will offer a great opportunity for sharing and discussing scientific research in all areas involving birds and interacting with scientific peers from a variety of backgrounds. Therefore, it is an excellent professional development opportunity for a wildlife biologist that works primarily on birds and bird conservation. It will also provide an opportunity to share the results from our refuge-wide shorebird inventory surveys conducted in 2015-16. The attendee’s presentation will be entitled: “Distribution of Breeding Shorebirds on the Yukon-Kuskokwim Delta, Alaska.”	$435	$4,018	$4,453	Appropriations
11	Ken Corey	assistant field supervisor	ES	Region 8 - Pacific Southwest	I work with solar companies throughout southern California to find ways to minimize and avoid impacts to listed birds. Many of the solar company reps and leads on avian/solar research will be there. In addition, there will be a symposia on the decline of several desert bird species and I would make contacts and form working groups to look at creating broad conservation strategies to address these declines to prevent the need for some future listings of desert birds.	$435	$653	$1,088	Appropriations
12	Emily Clark	SJV Communications & Partnerships Specialist/Wildlife Biologist	MB	Region 2 - Southwest	I am part of the local organizing committee for this conference. I will be helping to coordinate and lead the morning bird walks for this conference and provide other logistical support for the conference as needed. I will also be participating the symposium "Desert Birds in Peril: research and conservation challenges in northern Mexico and the southwestern United States," connecting with new and existing partnerships to improve the SJV's desert bird conservation efforts, a key part of my job. As part a the local organizing committee, my registration fee may be waived, meaning my attendance will be zero cost.	$455	$0	$455	Appropriations
13	Brian Spears	DWH NRDA Restoration Program Manager	GULF	Region 4 - Southeast	As the Department's Coordinator for Mississippi and Alabama DWH Gulf restoration activities, my responsibility includes coordination with partners and development of restoration projects in both states. Development of sound bird restoration projects has been articulated as a priority and attending this meeting will allow me to interact with a community of ornithologists from across the Americas and engage in cutting edge restoration science and collaboration, all of which will aid in efficient and effective restoration development for targeted bird species in these geographies. Additionally, knowledge gained will increase my ability to provide assistance to the Migratory Bird Coordinator as needed for broader bird restoration planning efforts. I also intend to submit an abstract for oral presentation on the DWH NRDA restoration of Breton Island, LA, which will showcase interagency collaboration and innovative engineering of a barrier island restoration project. This project is expected to have tremendous benefits for numerous bird species injured by the DWH spill.	$435	$1,433	$1,868	Appropriations
14	Robert Doster	Wildlife Biologist	MB	Region 8 - Pacific Southwest		$365	$1,721	$2,086	Appropriations

		As a regional migratory bird biologist with involvement in a range of bird conservation issues across Region 8 (such as inventory, monitoring, research, permitting, and threat assessment), my participation in the American Ornithology 2018 conference will help me to stay current on new ornithological research and discoveries, as well as bird population trends and status. In addition to the scientific sessions, multiple one-day workshops will occur, providing an added training opportunity on a range of emerging technologies used in avian biology. My attendance would also aid in development of partnership-building for all-bird conservation within and outside of Region 8. I further plan to contribute to the conference by serving as a chair for one of the scientific sessions.

NOTE TO REVIEWERS

PACKAGE CONTAINS:

Approval Request:	Regions 2, 3, 4, 7, 8
Conference Name:	American Ornithology Society (136th)(2018)
Dates/Location:	2018-04-09 to 2018-04-14 in Tucson, Arizona
DTS DCN#:	CON0000637

ACTION REQUESTED: Signature

STAFF ORIGINATOR: Stacey Garcia, Regional Conference Coordinator, Region 2

REVIEWED BY: Joy Nicholopoulos, Deputy Regional Director, Region 2

VERY BRIEF BACKGROUND ON ISSUE/ACTION:

The American Ornithological Society (AOS) is an international society devoted to advancing the scientific understanding of birds, enriching ornithology as a profession, and promoting a rigorous scientific basis for the conservation of birds. As one of the oldest, and the largest ornithological society in the world, AOS produces scientific publications of the highest quality, hosts intellectually engaging and professionally vital meetings, serves ornithologists at every career stage, pursues a global perspective, and informs public policy on all issues important to ornithology and ornithological collections.

FINANCIAL BREAKDOWN:

	Approved by:	Approved after:
Date:	March 17, 2018	March 17, 2018
Attendees:	14	14
Registration:	$6,040	$6,040
Travel Costs:	$17,065	$17,065
Sponsorship:	$0	$0
Administrative Costs:	$0	$0
Total Cost:	$23,105	$23,105
Additional Registration Cost:		$0

Deputy Director _____ Date _____

FWS Attendee Worksheet for DCN: CON0000638 - Trilateral Committee - CAN/MX/US (23rd)(2018)

2018-04-09 to 2018-03-29 in Shepherdstown, West Virginia

FWS Rank	Full Name	Job Title	Program	Region	Justification	Reg.	Travel	Total Cost	Funding Source
1	Gregory Sheehan	Principal Deputy Director	DO	Region 9 - Headquarters	Traveler will participate as Principal Deputy Director, FWS	$0	$731	$731	Appropriations
2	Tom Melius	Regional Director	RD	Region 3 - Midwest	Mr. Melius is the Regional Director of the US Fish and Wildlife Service's Midwest Region. In this position, he is responsible for direct oversight over multiple USFWS programs working across eight states. He also represents the Director, as appropriate, on issues of international importance. In relation to the Trilateral meeting, Mr. Melius will work with all delegates in developing effective and efficient conservation efforts for the monarch butterfly and other pollinators. He will also be leading a discussion covering bird strikes within transmission towers in conjunction with FCC representatives. Mr. Melius serves on the USFWS Waterfowl Regulation Committee and will be meeting with Canada and Mexico officials concerning the process. This meeting will be held at NCTC thus reducing the lodging and M&IE costs.	$0	$970	$970	Appropriations
3	Amy Lueders	Regional Director	RD	Region 2 - Southwest	Amy Lueders is the Regional Director of the Southwest Region and projects that Mrs. Lueders is involved with are the masked bob-white quail, border fence issues, common threats to native fishes in Mexico, and oversees the Refuge program to promote protection and conservation of the monarch butterfly along its migration route in Canada and Mexico. She provides guidance and direction for the recovery of Sonoran pronghorn, jaguar, ocelot, lesser-long nosed bat, Mexican wolf, southwestern willow flycatcher, Sonoyta mud turtle, Tarahumara frog, Chiricahua leopard frog, etc., that reside on both sides of the border. Mrs. Lueders involvement in cross-border conservation is particularly important to maintain landscape conservation activities. As the Regional Director for the Southwest Region, she has over site on projects as they relate to fish and wildlife conservation. This meeting provides her the opportunity to work closely with his Canadian and Mexican counterparts and develop relationships.	$0	$1,633	$1,633	Appropriations
4	Gloria Bell	Acting Assistant Director, International Affairs	IA	Region 9 - Headquarters		$0	$825	$825	Appropriations

					The Assistant Director of International Affairs (AD-AIA) is responsible for the Service's coordination of domestic and international strategies to protect, restore and enhance treasured biodiversity with a focus on species of common concern. AD-AIA manages 40 conventions, treaties, and agreements, and oversees the International Wildlife Trade and Wildlife Without Borders programs. The Trilateral Committee is within this purview and he/she ensures its successful implementation. At the annual meeting of the Trilateral Committee, the AD-AIA will provide staff support to the Director related to his role as the Head of the U.S. Delegation and Executive Table U.S. Co-chair. In particular, the AD will provide staff support to the Director on the agenda items related to the 2018-2021 Trilateral Committee Priorities, the Working Tables Action Item Requests, and the U.S. Country Report. AD-AIA participation will ensure best-informed decisions regarding the best path forward for the Trilateral Committee. The Trilateral Committee is undergoing a transition period due to administrative changes within each country. The Executive Table must determine the Trilateral Committee's strategic direction. The AD-AIA's insight into each countries position on this will help ensure the best decision is made regarding a successful future for the Trilateral Committee. In addition, his/her good relationship with top-level members of the Mexican delegation will greatly facilitate sensitive discussions with Mexico. If the AD-AIA were not able to attend this meeting, his/her input into the best path forward for the Trilateral Committee would be missed, hindering a positive outcome.				
5	Melida Tajbakhsh	Chief, Western Hemisphere Branch	IA	Region 9 - Headquarters	Melida Tajbakhsh, Chief, Western Hemisphere Branch, FWS/AIA - Ms. Tajbakhsh is directly responsible for the successful implementation of the Trilateral Committee as it is implemented under the Western Hemisphere Branch. She has direct supervisory responsibility over staff implementing various aspects, including annual meetings, coordination of work tables' agenda development, and work plans implementation. Her experience/expertise will help facilitate a smooth transition in US leadership and strategic direction of this forum to ensure that it incorporates/supports the Department's new priorities, effectively advancing US interests vis a vis Mexico and Canada. This is particularly critical at this meeting as the priorities identified by the Committee in 2014 are up for review. Specifically, she will serve as US Co-chair of the Species Table, staff the Director in support of his roles as head of the US Delegation and US Co-chairs of the Executive Table-including developing/vetting the agenda for this later and drafting new 2018-22 strategic priorities for discussion at the Executive Table. Also, coordinate US state agencies' input-including staffing the Director at his meeting with state agencies, documenting follow-up activities, and discussing ways to expand states' participation, and facilitate US states' negotiations with Mexico and their input/participation at the Executive Table to advance their interest vis a vis Mexico.	$0	$964	$964	Appropriations
6	Shannon Smith	Deputy Chief, division of Natural Resources & Conservation Planning	NWRS	Region 9 - Headquarters	Serve as U.S. Co-chair for the Ecosystem Conservation Working Table	$0	$729	$729	Appropriations
7	Ken Richkus	Deputy Chief, Division of Migratory Bird Management	MB	Region 9 - Headquarters		$0	$711	$711	Appropriations

					As the acting Chief of the Division of Migratory Bird Management, Dr. Ken Richkus will represent the U.S. Fish and Wildlife Service and serve as the U.S. co-Chair for the Migratory Bird Table. In this capacity, Dr. Richkus is responsible for leading the discussions at the Migratory Bird Table with the Canadian and Mexican co-Chairs. Dr. Richkus is also responsible for the final agenda development, giving updates on action items, and helping to facilitate discussions furthering collaborative migratory bird management for the United States. These discussions will have a direct impact on the Migratory Bird Program workplan and the continued coordination of activities affecting our shared migratory bird resource. Ken's attendance and participation is crucial for the successful implementation of the 2018-19 Migratory Bird Table Workplan. In addition, participation with other State, Federal, and International partners in attendance is important to maintaining and building coalitions for the conservation of migratory birds in North America.				
8	Phetsamon Souphanya	Senior Special Agent	OLE	Region 9 - Headquarters	To Co-Chair and Facilitate the Law Enforcement section of the conference. Topics of mutual law enforcement interest and concerns to include enforcement at ports of entries, species specific trafficking issues, and current trafficking trends will be discussed.	$0	$28	$28	Appropriations
9	Maricela Constantino	Endangered Species Biologist	ES	Region 9 - Headquarters	Maricela Constantino is an Endangered Species Biologist in the Branch of Recovery and State Grants and has served as the U.S. facilitator of the Species of Common Conservation Concern Working Table (SCCCWT) since 2010. Maricela provides national recovery expertise to the U.S., Canada, and Mexico Co-chairs for the endorsement of bilateral and trilateral project proposals presented during the SCCCWT 2018 meeting. In addition, she is coordinating the call for and submission of all US Agenda items for the 2018 meeting and is critical to finalizing the working table's Action Item Report from the 2017 meeting in Ensenada, Mexico. Her past experience facilitating the table will be extremely beneficial to the working table this year as we will have a new US Co-Chair this year; hence this individual will require her experienced support to ensure the table continues to run as efficiently as usual.	$0	$1,319	$1,319	Appropriations
10	Michael Gale	Special Assistant	NWRS	Region 9 - Headquarters	Michael Gale serves in key staff role as the Facilitator for the Ecosystem Conservation Working Table (ECWT) and co-leads the agency's conservation initiative for the Monarch butterfly—a priority of the Trilateral. Michael is providing all staff support to the ECWT and its U.S. co-chair, coordinating all logistics, note-taking, and giving several presentations. He is also participating in a conjoining meetings of the Commission for Environmental Cooperation (CEC) related to monarch conservation science and additional conjoining meetings of the Trinational Monarch Conservation Science Partnership, of which Michael represents the U.S. as the lead for science communications and policy.	$0	$844	$844	Appropriations
11	Eric Kershner	Branch Chief	MB	Region 9 - Headquarters	As Branch Chief, Dr. Kershner serves as the facilitator of the Trilateral Committee Migratory Birds Working Table throughout the year. In this capacity, he is responsible for coordinating with Canadian and Mexican counterparts, development of the agenda, action item report, and ensuring relevant logistics for the Migratory Bird Table are addressed for the United States. During the Trilateral meeting, Dr Kershner is responsible for providing staff support to the U.S. Co-chair by leading or assisting in planning of specific topics for the Migratory Bird Table, assuring that all deliverables are produced in a timely manner, and following up on recommended actions, as necessary. His attendance is necessary for the successful implementation of 2018-2019 Migratory Bird Table workplan.	$0	$656	$656	Appropriations
12	Valencia Richardson	International Affairs Specialist	IA	Region 9 - Headquarters		$0	$847	$847	Appropriations

					As U.S. Trilateral Coordinating Committee (TCC) representative, Ms. Richardson is directly responsible for on-site negotiations with Canadian and Mexican counterparts on all aspects of meeting implementation and follow-up throughout the year. This includes annual event planning, producing and/or coordinating development of schedules, agendas, annual reports, and products. In addition, Ms. Richardson is responsible for aspects of on-site meeting implementation, including staff support to the 2018 US Trilateral Committee delegation, Working Table Co-chairs, and Facilitators. Finally, Ms. Richardson will also attend the Executive Table & Co-chairs meeting to provide support to all Co-chairs with regard to annual deliverables and procedures. Trilateral Committee coordination for the Service is a function of DIC's Western Hemisphere Branch. Successful implementation of the Trilateral Committee's annual meeting is one of Ms. Richardson's performance indicators.				
13	Ryan Drum	Biologist	SA	Region 3 - Midwest	Ryan Drum serves on the Trilateral Committee Planning Team and will be providing staff support to the Ecosystem Table. He serves as the US chair for the Trinational Monarch Conservation Science Partnership. In this role, he co-leads a trinational project with the Commission for Environmental Cooperation, serving on a steering committee with representatives from Canada and Mexico. Ryan will be giving a presentation, entitled "US Domestic Updates on Monarch Butterfly Science and Monitoring Strategy" and working with co-leads to make decisions and coordinate logistics related to the Science Partnership and specifically the $420,000 in funds available for this 2-year project with the CEC.	$0	$1,394	$1,394	Appropriations
14	Eugene Bendele	Senior Special Agent/Attache	OLE	Region 9 - Headquarters	I am the Service's law enforcement Attaché to Mexico. I work with our counterparts in Mexico to share information about wildlife trafficking issues and help facilitate U.S. investigations with ties to Mexico.	$0	$0	$0	Other
15	Sherry Barrett	Mexican Wolf Recovery Coordinator	ES	Region 2 - Southwest	The USFWS completed the Mexican Wolf Recovery Plan, First Revision in November 2017. This plan was developed with federal agencies in Mexico, and includes a strategy to establish one Mexican wolf population in the U.S. and one in Mexico. In order to memorialize the binational collaboration of this recovery plan, the USFWS and federal agencies in Mexico will seek an endorsement to jointly sign a Letter of Intent (or MOU, or other) at the Trilateral meeting, as well as endorsement to continue collaboration on the management of the binational captive Mexican wolf population, the release of Mexican wolves in the U.S. and Mexico, and to coordinate should wolves disperse across the international border. As the Mexican Wolf Recovery Coordinator, Ms. Barrett is responsible for the recovery of the Mexican wolf throughout its range. Arizona Game and Fish Department and Wildlife Services are also very involved in the recovery efforts and will be attending the Trilateral meeting. It is critical that the USFWS, the state wildlife agencies from Arizona and New Mexico, and federal agencies in Mexico (e.g. CONAPN) come together and obtain the endorsement of the Trilateral to move forward. Ms. Barrett will provide a presentation on the status of recovery and goals for the future.	$0	$1,319	$1,319	Appropriations
16	Jennie Duberstein	Sonoran Joint Venture Coordinator/Wildlife Biologist	MB	Region 2 - Southwest		$0	$1,175	$1,175	Appropriations

					I want to attend the Trilateral to share progress on binational projects of the Sonoran Joint Venture with partners from the U.S. and Mexico. With the exception of 2016, the SJV has attended every Trilateral since the SJV began in 1999. It is a key meeting for connecting with partners in Mexico, especially in upper leadership levels, to discuss shared conservation priorities and collaborative strategies for addressing conservation issues that impact both of our countries. It is also an important opportunity to build existing partnerships and make new connections to help the SJV and the Service successfully implement our mission. I will unveil the new Borderlands Avian Knowledge Network ("Coordinated Bird Monitoring in northern Mexico and the southwest United States") and will also present on how we are integrating human dimensions into the North American Waterfowl Management Plan ("The People Part of Wetlands and Waterfowl Conservation.") Finally, I am part of the Trilateral Islands Initiative, which convenes as part of the Trilateral each year to discuss joint efforts at island conservation.				
17	Amedee Brickey	Chief, Migatory Bird Program, and CA Condor Coodinator	MB	Region 8 - Pacific Southwest	The Service has been working with the Mexican Government for several years to reintroduce California Condors to Baja California, MX. CONNAP has recently requested to expand the program in Mexico, however additional information is needed by the Service before we can approve their request. As the California Condor Coordinator for USFWS, I have requested to meet with them in person to discuss their proposal and potential complications to the larger Condor Recovery program in the US. Due to recent DOI restrictions on international travel, this meeting may be the first opportunity to meet with representatives from CONNAP and discuss the proposal.	$0	$1,601	$1,601	Appropriations
18	Amanda Gonzales	Program Officer for Mexico and the Caribbean	IA	Region 9 - Headquarters	Ms. Gonzales is the Program Officer for the Service's Mexico (MX) program. In this capacity, she is responsible for the successful implementation of this grants program in Mexico. She will meet with current and potential partners to deepen her understanding of biodiversity conservation challenges and efforts in the U.S- Mexico border region involving the Service. Ms. Gonzales will participate in side meetings with U.S. State agencies, the USFWS Sonoran Joint Venture, and USFWS Regional Offices to discuss opportunities for collaboration with the MX program. Ms. Gonzales plans to attend a meeting with high-level Mexican officers (CONABIO, INECC, CONANP, PROFEPA, CONAFOR, etc.) to discuss the Service's MX conservation approach under its current funding levels, in order to better guide the implementation of the grants program she manages. She will meet with grantees from the San Diego Natural History Museum, San Diego Zoo, Autonomous to evaluate the status of the projects being implemented by these organizations. Finally, she will meet with representatives from CONANP, Chapultepec Zoo and San Diego Zoo to discuss the 2017-2018 implementation of the MOU for the Recovery of the CA condor in Mexico.If Ms. Gonzales does not attend the meeting, the opportunity to further develop our long-term partnership with the natural resources agencies of the Mexican Government and the implementation of future projects for capacity building for biodiversity conservation that are truly supported by the Mexican Government would be jeopardized.	$0	$725	$725	Appropriations
19	Jeremy Coleman	Fish and Wildlife Biologist	ES	Region 5 - Northeast		$0	$1,010	$1,010	Appropriations

					I have three main reasons for attending the 23rd Annual Meeting of the Trilateral Committee: 1) to provide support, answer questions, and present materials (on request) on a Letter of Intent (LOI), signed in 2015 at the 20th annual meeting of the Trilateral Committee, for efforts to promote conservation of bats in Mexico, Canada, and the US. I worked with a team of representatives from Mexico and Canada to develop the LOI, and have been involved with international efforts that resulted from that agreement since that time. While there, I will also meet with colleagues from Canada and Mexico to discuss and further develop some of the action items identified in the LOI, as we consider options to develop a memorandum of understanding. Additionally, my attendance will allow me to 2) provide an update on White-Nose Syndrome (WNS) to members of the Trilateral Committee, including Service staff from HQ, and 3) to network with international colleagues and build relationships that will be helpful to performing the duties of my job and accomplishing the mission of the Service. As the National Coordinator for WNS, it is my responsibility to keep Service leadership and agency partners up to speed on the latest information regarding the research and management of this wildlife disease.				
20	Annie Little	Restoration Biologist	ES	Region 8 - Pacific Southwest	Annie has worked for the Fish and Wildlife Service for the last 21 years and is the lead for the Service on the Letter of Intent (LOI) regarding the conservation and restoration of islands in the United States, Canada and Mexico. The LOI was signed at the 2014 Trilateral Meeting in Queretaro, Mexico, and represents the first trilateral agreement regarding conservation of islands. Annie was designated as the U.S. Coordinator for the Trilateral Island Working Group tasked with moving the initiative forward. As part of the 2018 Trilateral Meeting, Annie will present to multiple working tables (Migratory Birds, Species of Common Conservation Concern, Ecosystem Conservation and Executive) on the furthering of the LOI and status of collaborative island restoration efforts among the three countries. One of the ongoing projects is the bilateral seabird restoration program on the Baja California Pacific Islands. The Montrose and Luckenbach Trustee Councils are funding this 5-year project with settlement funds from the Natural Resources Damage Assessment and Restoration Program. Annie is the staff ornithologist for the Montrose Program, and she provides updates on the status of this project to the Trilateral Committee as a regular part of her duties. The Montrose Program will be funding her participation, which will strengthen cross border collaboration and promote existing and new partnerships in furtherance of our trilateral conservation goals.	$0	$23	$23	Reimbursable (O)
21	Samantha Brooke	Coastal and Marine Program Team Lead	NWRS	Region 9 - Headquarters		$0	$700	$700	Appropriations

					Ms. Brooke is the Refuge System National Coastal and Marine Program lead. As the National Coordinator, it is Ms. Brooke's responsibility to advise the Service and Refuge System leadership on management of the Service's coastal and marine areas, which encompass over 750 million acres and to maintain partnerships with other marine protected area management agencies. Ms. Brooke represents the Service on the joint DOC and DOI Marine Protected Area Federal Advisory Committee and coordinates with the DOI, NOAA, and US State Department on international marine protected area issues. The Trilateral meeting provides an opportunity to share information and discuss potential areas for enhanced collaboration on marine protected areas at the continental level. Promoting linkages amongst land and marine protected areas is one of the Trilateral Ecosystem Conservation Table's objectives. Marine protected areas have been the subject discussions at prior meetings, and are anticipated to be part of this meeting. A presentation by the Marine Protected Area Center has been proposed, and Ms. Brooke's presence will allow her to speak to DOI's work in this area. In 2017, Mexico and Canada both made marine protected area designations, including the designation of one of the largest marine protected areas in North American by Mexico. It is anticipated that this meeting will provide important opportunities for furthering U.S-Canada-Mexico collaboration on marine protected areas, including sharing scientific and technical information and promoting increased coordination.				
22	Robert Ford	Partners in Flight coordinator	MB	Region 9 - Headquarters	As Partners in flight coordinator, Mr. Ford works often on trinaitonal projects that include grasslands birds and other migratory bird species. Close coordination on projects between the US and Canda and Mexico is necessary a as illustrated ni the 2016 PIF Landbird Conservation Plan. Attendance at the tri-lateral meeting will significantly advance PIF actions and conservation priorities.	$0	$81	$81	Appropriations
23	John Klavitter	National Invasive Species Coordinator	NWRS	Region 9 - Headquarters	Mr. Klavitter is the Refuge System National Invasive Species Coordinator responsible for invasive species related issues across the refuge system, leading the Cooperative Recovery Initiative, and leading and Island Restoration external partners group. As the National Coordinator, it is Mr. Klavitter's responsibility to keep Service and Refuge System leadership and agency partners up to speed on the latest information regarding management of invasive species. In addition Mr. Klavitter has been instrumental in development of the Trilateral Island Initiative and Letter of Intent focused on removal and eradication of invasive animal and plant species on islands in the U.S., Canada, and Mexico. The Trilateral meeting provides an opportunity to share information and discuss potential areas for enhanced collaboration on invasive species at the continental level. Development of a North American Invasive Alien Species Strategy and Action Plan was discussed at the past two Trilateral meetings and the Trilateral Island Initiative has been an agenda topic at several working tables over the past five years. Working Table agendas are currently being developed. It is anticipated that invasive species will be on the agendas of the Ecosystem Conservation, Shared Species, and Migratory Birds working tables. Mr. Klavitter's attendance at this meeting provides important opportunities for furthering U.S-Canada-Mexico collaboration on invasive alien species including raising the profile of the invasive alien species issue in international frameworks and through regional initiatives, sharing scientific and technical information (e.g., risk analyses), and promoting transboundary projects, including for species of concern detected at borders or along pathways.	$0	$701	$701	Appropriations
24	LUIS SANTIAGO	SPECIAL AGENT IN CHARGE	OLE	Region 9 - Headquarters		$0	$955	$955	Appropriations

					Mr. Santiago is the Southeast Region Special Agent in Charge (SAC) with the Office of Law Enforcement. In this position Mr. Santiago is responsible for providing direct oversight for the criminal investigations and the import/export inspections for the southeast region. Mr. Santiago will coordinate enforcement initiatives with Mexico and Canada. Mr. Santiago intends to have discussions with Canadian and Mexican counterparts regarding investigative assistance and information sharing initiatives being coordinated with Mexico. Mr. Santiago attendance at the Trilateral meeting this Spring will continue to develop relationships with high-level officials from Canada and Mexico. As the SAC in Region 4, he regularly deals with sensitive issues involving the movement of legal and illegal wildlife between the United States and Mexico. Mr. Santiago has extensive background in these areas and allowing him to meet and closely discuss issues would be extremely valuable to the Office of Law Enforcement. The Office of Law Enforcement views the Trilateral as an opportunity to grow partnerships with organizations that share a common mission. Mr. Santiago's participation will allow him to strengthen relationships for the cross-border coordination and facilitation of investigations and inspections.				
25	Tracy Melbihess	Classification and Recovery Branch Chief	ES	Region 1 - Pacific	USFWS-R1-IFWO is the lead for southern mountain caribou recovery under the Endangered Species Act. In 2018, we expect to finalize a rule to expand the listed entity from a single endangered transboundary subpopulation of 10 caribou that moves between Idaho/Washington and Canada to include an additional 14 subpopulations in Canada. Expansion of the ESA caribou recovery effort further into Canada will necessitate significant coordination between the Service and the Canadian Wildlife Service and British Columbia provincial representatives pursuant to their conservation efforts under the Species At Risk Act. As the Classification and Recovery Branch Chief for Idaho, I will be overseeing the caribou recovery effort: attendance, including a presentation or discussion at the Shared Species of Concern Table if accepted, is necessary to expand the binational recovery effort for southern mountain caribou.	$0	$1,369	$1,369	Appropriations
26	Guy Foulks	Fish and Wildlife Administrator	MB	Region 9 - Headquarters		$0	$297	$297	Appropriations

					Actual cost will be $296 because Mr. Foulks does not require lodging costs to attend. Mr. Foulks will present on two Action Items from the XXII (2017) Trilateral meeting. He serves as one of two USFWS representatives participating in the development of the migratory bird conservation implementation plan for the Western Hemisphere through the Convention on the Conservation of Migratory Species of Wild Animals (CMS) Migratory Birds Task Force. Mr Foulks helped build the Americas Flyways Framework adopted by CMS under its Migratory Birds Program of Work. He will speak to how the Trilateral nations can collaborate with and partner on objectives of the CMS Migratory Birds Task Force. Additionally, Mr. Foulks will present on efforts to build a conservation investment strategy for the Chihuahua Grasslands in Mexico that will be linked into the Neotropical Migratory Bird Conservation Act (NMBCA) grant program that he coordinates for USFWS. NMBCA grants since 2002 exceed $62M for birds that breed in Canada and the USA and/or migrate to or through Mexico and the Caribbean. Specifically, NMBCA projects in Mexico have received $24M for migratory bird conservation. Mr. Foulks served as the facilitator of the Trilateral Committee Migratory Birds Working Table at the XXI Trilateral meeting in Ottawa (May, 2016). In this capacity, he was responsible for coordinating with his Canadian and Mexican counterparts, developing the agenda, and ensuring relevant logistics for the Migratory Bird Table. Mr. Foulks was unable to attend last year's Trilateral, however this year can inexpensively provide continuity and perspective to efforts initiated two years ago at the Trilateral meeting in Ottawa.				
27	Greg Hughes	Fish and Wildlife Administrator	ES	Region 1 - Pacific	USFWS-R1-IFWO is the lead for southern mountain caribou recovery under the Endangered Species Act. In 2018, we expect to finalize a rule to expand the listed entity from a single endangered transboundary subpopulation of 10 caribou that moves between Idaho/Washington and Canada to include an additional 14 subpopulations in Canada. Expansion of the ESA caribou recovery effort further into Canada will necessitate significant coordination between the Service and the Canadian Wildlife Service and British Columbia provincial representatives pursuant to their conservation efforts under the Species At Risk Act. As the new State Supervisor/Project Leader of IFWO, my attendance at the Trilateral would serve to represent the United States' portion of this species range. It will be imperative to build relationships with Canadian officials at the federal and provincial levels to expand the binational recovery effort for southern mountain caribou. I intend to submit a request for an agenda item or presentation to discuss opportunities for collaborative conservation between the United States and Canada.	$0	$1,769	$1,769	Appropriations
28	Chris Warren	Fish and Wildlife Biologist	ES	Region 1 - Pacific	USFWS lead for southern mountain caribou recovery planning. Effort involves Canadian Wildlife Service and British Columbia provincial representatives and requires significant international coordination and planning. Attendance will greatly enhance our Canadian partnerships and, ultimately, comprehensive recovery planning for southern mountain caribou.	$0	$1,317	$1,317	Appropriations
						$0	**$24,688**	**$24,688**	

NOTE TO REVIEWERS

PACKAGE CONTAINS:

Approval Request:	Regions 1, 3, 5, 8 & 9
Conference Name:	Trilateral Committee - CAN/MX/US (23rd)(2018)
Dates/Location:	2018-04-09 to 2018-03-29 in Shepherdstown, West Virginia
DTS DCN#:	CON0000638

ACTION REQUESTED: Signature

STAFF ORIGINATOR: Karla Bartelt, Acting National Conference Coordinator

REVIEWED BY: Gloria Bell, International Affairs

VERY BRIEF BACKGROUND ON ISSUE/ACTION:

Foster an integrated continental perspective for cooperative conservation and sustainable use of biological resources, contribute to the maintenance of the ecological integrity of North American ecoregions, and promote biodiversity conservation capacity building and cooperative cross-sectoral activities in the three countries that will contribute to the reduction and mitigation of threats to North American shared species and ecosystems. This is done through coordination, cooperation, and development of partnerships among wildlife agencies of the three countries and other interested parties

FINANCIAL BREAKDOWN:

	Approved by:	Approved after:
Date:	March 1, 2018	March 1, 2018
Attendees:	28	28
Registration:	$0	$0

---

Good afternoon-

Please see this week's FWS Weekly Secretarial Report and Fishbites, attached.

Have a great weekend!
Charisa

WEEKLY REPORT
DEPARTMENT OF THE INTERIOR U.S. Fish and Wildlife Service
January 24, 2018

Week Ahead Schedule of Meetings, Hearings and Travel

On January 24, Greg Sheehan will travel to Albuquerque, New Mexico, for an All Employee Meeting with FWS, South Region Staff on DOI Priorities. On January 25, Mr. Sheehan will travel to Denver, Colorado, for the Sage Grouse Task Force Meeting.

Week Ahead Announcement and Actions

On January 27, the Sierra Club is organizing a "Save Santa Ana National Wildlife Refuge" event from 11 a.m. to 1:30 p.m. The independently organized rally will take place in a field east of the refuge. Representative Filemon Vela (D-TX) is expected to attend, and representatives from the 19 cities/counties that passed resolutions opposing the proposed border wall have been invited. The event coincides with a FWS-organized 75th anniversary event at the Santa Ana NWR. The FWS event is being coordinated to have guest speakers, guided walks, interpretive exhibits and displays, games and activities, and refreshments. FWS will have increased law enforcement as well as External Affairs support onsite to help as needed.

FWS and partners will conduct the annual Mexican wolf population survey and capture, weather conditions permitting through February 2. The Mexican Wolf Recovery Program is a multi-agency cooperative effort among FWS, Arizona Game and Fish Department, U.S. Forest Service, USDA-Animal and Plant Health Inspection Service, Wildlife Services and the White Mountain Apache Tribe, as well as in consultation with the New Mexico Department of Game and Fish. Survey flights will occur on the Fort Apache Indian Reservation, Apache and Gila National Forests in eastern Arizona and western New Mexico, and possibly on some areas immediately outside the forests. The count is not open to the public. A limited number of reporters may be invited to observe the count.

The biennial meeting of the signatories to the Agreement on the Conservation of Polar Bears, which includes Canada, Greenland, Norway, Russia, and the United States (Ranges States) will be meeting February 2-4 in Fairbanks, Alaska. The parties plan to exchange information on polar bear management and research and will evaluate the progress on implementation of the Circumpolar Action Plan. FWS is organizing and will be participating in the meeting. Alaska congressionals have been notified. No news release is planned, but FWS may pitch stories to a couple of local reporters and offer interviews with some of the meeting participants. The meeting is not open to the public, so no media will be there during proceedings. No controversy is expected.

On or around January 26, FWS plans to send to the *Federal Register* a notice announcing the availability of comprehensively revised boundaries for the first batch of Coastal Barrier Resources System (CBRS) units included in the Hurricane Sandy Remapping Project. CBRS was created by the Coastal Barrier Resources Act in 1982 to conserve relatively undeveloped, highly vulnerable coastal barriers along the Atlantic and Gulf of Mexico coasts. The proposed revisions will affect 112 existing and 36 proposed new units in Delaware, Massachusetts, New Hampshire,

and New Jersey. The notice will announce a 120-day public comment period and also advise of upcoming public meetings to be held via webcast. Landowners, state and local officials (and their representatives in Congress) will likely support the removal of areas from the CBRS and similarly oppose the addition of new areas into the CBR. Properties in a CBRA unit are ineligible for federally subsidized flood insurance. Taxpayer groups, recreational interest groups and conservation groups will likely support the additions to the CBRS. Outreach will include a news release and FAQs, as well as stakeholder and congressional outreach.

In January, FWS and Forest Service representatives are scheduled to meet with a private rancher and staff from Representative Pearce's (R-NM) office. The rancher's cattle graze Forest Service-managed lands that are inhabited by the ESA-listed New Mexico meadow jumping mouse. Discussions will include development of a framework to address long-term land management practices that will benefit the mouse while meeting the needs of the rancher.

In late January, FWS, NOAA, and New York State Department of Environmental Conservation (the Hudson River Natural Resource Trustees) plan to release an injury determination report that concludes PCBs released by General Electric have caused repeated and prolonged exceedances of state and federal water quality standards and contaminated surface water resources of the Hudson River for decades. The report is the latest demonstration of the Trustees' measurement of natural resource injuries from General Electric's release of PCBs to the Hudson River from its manufacturing facilities in Hudson Falls and Fort Edward, New York. The Trustees are planning coordinated outreach through a joint news release and congressional notifications.

In late January, FWS, NOAA and New York State Department of Environmental Conservation (the Hudson River Natural Resource Trustees) plan to release a data report regarding polychlorinated biphenyl (PCB) concentrations in eggs of the gray catbird. In 2015, the Trustees collected catbird eggs from along the Hudson River to determine PCB exposure. The study indicates that seven of the 29 eggs collected from the Hudson River exceed an avian effects threshold for PCBs quantified in scientific literature, suggesting the potential for embryo-mortality, an injury to these birds. The Catbird Egg Data Report is part of the Trustees' ongoing natural resource damage assessment (NRDA) to determine appropriate actions needed to injured restore natural resources and natural resource services of the Hudson River. The Trustees are planning coordinated outreach through posting on the web.

In January or February, FWS plans to send to the *Federal Register* a notice of issuance for letters of authorizations issued in 2015, 2016, and 2017 under regulations authorizing the non-lethal, incidental, unintentional take of marine mammals in the Chukchi and Beaufort seas. This is an administrative action and is noncontroversial. No news release will be issued for this notice of issuance.

30-60-Day Look Ahead

FWS has completed a Draft Recovery Plan for the Southern California Distinct Population Segment of the mountain yellow-legged frog. The recovery plan is expected to be announced for public comment and review in February and is designed to help southern populations of this species in three recovery units through a set of recovery strategies with associated objectives and

measurable criteria. The recovery units include San Bernardino Mountains, San Gabriel Mountains and San Jacinto Mountains. The draft plan includes input from partners including the San Diego and Los Angeles Zoos, California Department of Fish and Wildlife, U.S. Geological Survey and the U.S. Forest Service. This is not controversial. Planned outreach includes congressional and stakeholder notifications and a press release to media.

In January and February, several border projects involving FWS are anticipated to begin. Customs and Border Protection (CBP) will need access to water from a FWS-owned well on Buenos Aires NWR in Arizona for a road repair project. The Border Patrol & Air and Marine Program Management Office (BPAM PMO) plans a road construction project for a 66-mile portion of the Presumido Canyon Road through the Baboquivari Mountains in Arizona. CBP will update existing communications and surveillance towers on and adjacent to the Buenos Aires NWR.

On February 5-8, the Management Board of the Arctic Council's Conservation of Arctic Flora and Fauna (CAFF) Working Group will be meeting in Fairbanks, Alaska. FWS coordinates U.S. engagement in the CAFF Working Group. Participants will include representatives from all Arctic Council countries (Canada, Denmark, Finland, Iceland, Norway, Sweden, Russia and the United States); Arctic indigenous communities, including several representing Alaska native communities; and observer countries and organizations. Experts from FWS and across the U.S. government will join the U.S. delegation. A number of priority activities for the FWS, and the broader U.S. government, will be discussed at this meeting, including Arctic migratory birds, invasive species, wetlands and monitoring, among others. The meeting is not open to the public. FWS may send a media alert about the meeting to a few reporters to invite them to attend a reception, which will be held prior to the meeting. Reporters would learn more about CAFF, the topics that the CAFF board will discuss at the upcoming meeting, and have the opportunity to interview participants.

On February 8, Jan Butts' farm (approximately 730 acres) in Kankakee County, Illinois, will be sold at auction. In his will , the former farm owner, Mr. Butts, directed that a large portion of his estate be provided to the "U.S. Fish and Wildlife Service Grand Kankakee Marsh National Wildlife Refuge." Grand Kankakee Marsh National Wildlife Refuge does not exist. It is called Kankakee National Wildlife Refuge and Conservation Area. Staffs from FWS, together with attorneys from the Interior Solicitor's Office and the U.S. Attorney's Office in Illinois have been working with lawyers representing the Jan Butts Estate and the State Circuit Court to secure a path forward for the acceptance of what will likely be a donation valued at several million dollars.

FWS and the Marine National Monuments office have completed a public scoping process to evaluate ways to protect seabirds from predation by invasive house mice at Midway Atoll National Wildlife Refuge and Battle of Midway National Memorial, located in Papahānaumokuākea Marine National Monument. Midway is the largest Laysan albatross colony in the world and more than 3 million birds from 29 species nest on Midway's three islands. All of them are potentially vulnerable to mouse predation. The mice have been documented eating seabirds while they are nesting, resulting in injury and death. Due to their extreme dedication to raising their young, the birds won't leave the nest if attacked. FWS is preparing a draft

environmental assessment that will evaluate alternatives to protect seabirds from mouse predation. The draft Environmental Assessment (EA) should be ready for public comment in mid-February. Outreach is planned to include local public notifications through the web and social media, when the draft EA is published, and notifications to members of Congress in Hawaii, with targeted stakeholder outreach.

In February, FWS plans to send to the *Federal Register* a notice seeking public review and comment on a draft Environmental Assessment (EA) describing the potential effects of issuing a proposed Incidental Take Permit (ITP) for construction and development activities in Thurston County, Washington. UPC, LLC developed a draft Habitat Conservation Plan (HCP) and applied for a 15-year ITP. The project development site is 127 acres, and the conservation site is 64 acres. Species covered in the HCP include the threatened Olympia subspecies of the Mazama pocket gopher and the threatened Oregon spotted frog. This is not controversial. This HCP is a single-site developer and independent from the HCP that FWS briefed ASFWP on on November 17. This applicant would like to move forward with development in advance of the completion of the Thurston County HCP.

In February, FWS will award nearly $19 million in grants to coastal states to conserve and restore coastal wetlands and their fish and wildlife habitat. Each year, the Service supports coastal wetland conservation through the National Coastal Wetlands Conservation Grant Program and the Sport Fish Restoration and Boating Trust Fund. The grant funds are derived from excise taxes on fishing tackle and motorboat and small engine fuels. The grants will support 22 projects in 13 coastal states to protect, restore or enhance more than 30,000 acres of coastal wetlands and adjacent upland habitats, including 287 miles of shoreline. Over $21 million in additional matching funds will be provided by partner contributions from state and local governments, private landowners and conservation groups. Conservation of this habitat will help recover coastal-dependent federal trust species, enhance flood protection and water quality, provide economic benefits to coastal communities and increase recreational opportunities for hunters and anglers. The grant recipients (states) have not yet been informed that they will be receiving funds. Planned outreach includes congressional and stakeholder notifications and a news release.

In December, BNSF Railway submitted a final draft grizzly bear Habitat Conservation Plan to the FWS. The plan minimizes the effects of railway operations on grizzly bears and mitigates for unavoidable strikes by investing in bear conservation efforts in the project area. FWS is reviewing the plan. FWS is preparing for the other steps of environmental review including National Environmental Policy Act compliance, Incidental Take Permit issuance criteria, and intra-Service section 7 consultation. Since 1967, at least 55 grizzly bears have been struck and killed on railroad tracks in the 160-mile project area, which traverses the Continental Divide and is south of Glacier National Park. Beginning in the 1990s, BNSF instituted a series of voluntary measures directed at reducing or eliminating the causes of bear strikes. The incidence of grizzly bear strikes in the project area has markedly declined to less than one per year on average since 2009.

Endangered Species Act Listing/Delisting Actions

Pending approval by the Department, FWS plans to send to the *Federal Register* the final delisting determination for Eureka Valley evening-primrose and downlisting, to threatened from endangered, of the Eureka dune grass. These are two plant species that occur in Death Valley National Park, California. The primary partner and stakeholder is the National Park Service who supports the actions. Some environmental groups opposed delisting the two species. However, in response to new information, we are no longer delisting Eureka dunegrass and are instead reclassifying it to a threatened species which may reduce the level of concern among the interested parties. Planned outreach will include a news release and notifications to stakeholders and members of Congress.

Pending approval by the Department, FWS plans to send to the *Federal Register* a proposed listing determination and proposed critical habitat designation for the Island marble butterfly, found in Washington. The proposed critical habitat designation includes approximately 812 acres. This action is not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include Xerces (the petitioner), federal partners including National Park Service and Bureau of Land Management, and state partners including Washington Department of Fish and Wildlife and Washington Department of Natural Resources, San Juan County Land Bank, the San Juan Preservation Trust, and local landowners. A news release to all interested parties and the media is planned.

On or around February 2, FWS plans to send to the *Federal Register* a final listing determination for the Texas hornshell, a mussel that occurs in New Mexico, Texas, and Mexico. The states of New Mexico and Texas have not overtly opposed listing the hornshell, and FWS has worked with oil and gas companies extensively on a Candidate Conservation Agreement for the Black and Delaware rivers, the only portion of the range of Texas hornshell where oil and gas production is occurring. FWS anticipates significant participation in these agreements which will provide regulatory certainty for these companies. Stakeholders include the Center for Biological Diversity, the States of Texas and New Mexico, the Bureau of Land Management, the Independent Petroleum Association of America, and local landowners. Planned outreach will include notifications to stakeholders and relevant members of Congress and a news release to local media. FWS is required by settlement agreement to publish the final determination in the *Federal Register* by February 10; therefore, FWS plans to submit it by February 2.

On or around February 19, FWS plans to send to the *Federal Register* a notice of availability of a draft post-delisting monitoring plan for the black-capped vireo. While this action is not expected to be controversial, stakeholders who oppose the delisting of the species may use this notice to express their concerns about the delisting. Stakeholders include the petitioners, Pacific Legal Foundation, Jim Chilton, New Mexico Cattle Growers' Association, New Mexico Farm & Livestock Bureau, New Mexico Federal Lands Council, and Texas Farm Bureau, and the Office of Travis Co. Judge and Big Bend National Park. Planned outreach will include notifications to local stakeholders, a news release to local media and social media posts.

On or around February 28, FWS plans to send to the *Federal Register* a proposed rule to downlist to threatened from endangered the Kuenzler hedgehog cactus. When first listed, only one population of 200 plants was known. The discovery of additional populations, together with efforts to conserve the plant and its habitat, indicate the cactus is no longer at risk of extinction.

Today, there are 3,300 individual cacti in 11 known populations within its southern New Mexico range. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild. This downlisting is not expected to be controversial. Planned outreach includes a news release, phone calls to stakeholders and web postings.

On or around February 28, FWS plans to send to the *Federal Register* a proposal to downlist the Hawaiian goose (nene) from endangered to threatened. FWS will also propose to establish special regulations for the conservation of the species under section 4(d) of the ESA to allow for flexibility in managing lands. Landowners of resort, golf course, agricultural, residential and recreational properties are likely to support the reclassification and associated 4(d) rule while conservation groups may be opposed. Interested stakeholders include the State of Hawaii, federal agencies, conservation and bird groups, various private landowners, and the public. Outreach includes a news release, social media, emails and phone calls to Congressional offices and stakeholders.

On or around February 28, FWS plans to send to the *Federal Register* a final determination on a proposed rule to reclassify the Tobusch fishhook cactus from endangered to threatened. This plant species has shown significant recovery due in part to collaborative conservation efforts with partners. Supporters of this action include the Texas Parks and Wildlife Department, the Texas Department of Transportation, the Lady Bird Johnson Wildflower Center, The Nature Conservancy. FWS has gained positive coverage on downlisting proposals, and anticipates more interest when this final determination is announced. Outreach planned includes a news release and social media postings.

On or around March 6, FWS plans to send to the *Federal Register* a proposal to delist the Colorado butterfly plant due to recovery. This species is located in Colorado, Nebraska and Wyoming. This action is not expected to be opposed. Outreach plans include a news release, and an if-asked Q&A. Key stakeholders include private landowners, F.E. Warren Air Force Base, the City of Fort Collins, Colorado, and the Bureau of Land Management.

On or around March 8, FWS plans to send to the *Federal Register* a final determination to withdraw our proposed rule to list the San Fernando Valley spineflower, a plant found in California. This action is not expected to be strongly opposed; however, the Santa Clarita Organization for Planning and the Environment, a local environmental organization, has filed litigation regarding a development project in the range of the species and will likely oppose the withdrawal of the proposed rule. Other interested stakeholders include Newhall Land Company, City of Calabasas, Santa Monica Mountains Conservancy, WildEarth Guardians, California Department of Fish and Wildlife, and local landowners. Media coverage is expected to be neutral. Planned outreach includes a news release to all interested parties and the media. FWS is required by settlement agreement to submit the determination to the *Federal Register* by March 15; therefore, FWS plans to submit it by March 8.

On or around March 9, FWS plans to send to the *Federal Register* an amendment to the current listing of the southern Selkirk Mountains population of woodland caribou (endangered) to include the entire Southern Mountain Caribou population as a distinct population segment

(DPS). The revised DPS (17 subpopulations; 15 extant, 2 extirpated) includes the currently listed southern Selkirk Mountains population of woodland caribou, which is a transboundary population between British Columbia, Canada and northern Idaho and northeastern Washington. The critical habitat designation will remain unchanged. Non-governmental organizations including the International Fund for Wildlife, Kettle Range Conservation Group, Selkirk Conservation Alliance, Kootenai Environmental Alliance, Center for Biological Diversity, Idaho Conservation League, and the State of Idaho may be opposed to the DPS listing. The Pacific Legal Foundation (representing Bonner County) is likely to challenge the determination. FWS received a notice of intent to sue from the Pacific Legal Foundation on behalf of Bonner County in June 2017 because FWS has not met the statutory deadline for finalizing this rule (a proposed rule was published in 2014). Planned outreach includes a news release, social media, emails and phone calls to Congressional offices and stakeholders.

On or around March 9, FWS plans to send to the *Federal Register* a minor map correction in the final rule designating critical habitat for two butterflies, the Poweshiek skipperling and Dakota skipper. One map incorrectly labeled Poweshiek skipperling critical habitat as Dakota skipper critical habitat in Minnesota. FWS does not expect any opposition to this. No outreach is needed for this simple correction notice.

On or around March 16, FWS plans to send to the *Federal Register* a rule removing the textual descriptions of the critical habitat boundaries from certain wildlife entries that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease, or in any other way change the critical habitat designations from which we are removing the textual descriptions of boundaries. This action will save taxpayer resources. FWS is taking this action in accordance with the May 1, 2012, revision of the regulations related to publishing textual descriptions of critical habitat boundaries. No outreach is planned.

Migratory Bird Management Actions

In January, FWS plans to publish in the *Federal Register* the proposed 2018-19 hunting regulations for certain migratory game birds. FWS annually prescribes frameworks, or outer limits, for dates and times when hunting may occur and the number of birds that may be taken and possessed in hunting seasons. These frameworks are necessary to allow state selections of seasons and limits and to allow recreational harvest at levels compatible with population and habitat conditions. Planned outreach includes congressional and stakeholder notifications.

In January, FWS plans to publish a final rule removing regulations setting forth the provisions for two depredation orders for double-crested cormorants. FWS had used these standing orders to allow for lethal control of cormorants where they impact aquaculture and public resources; however, on May 25, 2016, the District Court for the District of Columbia ordered that both the Aquaculture Depredation Order and the Public Resources Depredation Order be vacated until FWS performs a new and legally adequate environmental assessment (EA) or environmental impact statement for national cormorant management orders in compliance with the requirements of the National Environmental Policy Act (NEPA). This final rule administratively implements the court's decision. While the depredation orders no longer exist, on November 15,

2017, FWS provided some measure of relief to aquaculture facilities. It issued a final EA under NEPA, which allows aquaculture facility managers and property owners across 37 central and eastern states and the District of Columbia to apply for individual permits for lethal take of cormorants where they are impacting resources. This latest action is not controversial. If-asked talking points will be planned for outreach.

In January, FWS will publish a final rule in the *Federal Register* on special methods of hunting migratory game birds by tribal members on ceded lands in Wisconsin, Michigan, and Minnesota for the 2017-18 season. This rule prescribes special migratory bird hunting regulations for certain tribes on Indian reservations, off-reservation trust lands and ceded lands. This rule responds to tribal requests for FWS recognition of their authority to regulate hunting under established guidelines. This rule allows the establishment of season bag limits and, thus, harvest at levels compatible with populations and habitat conditions. This new final rule replaces the August 31, 2017, interim final rule. Outreach will include talking points, emails and phone calls to tribes, states, Congressional offices and stakeholders.

In January, FWS will publish a proposed rule in the *Federal Register* for migratory bird subsistence harvest regulations in Alaska for the 2018 season. These regulations allow for the continuation of customary and traditional subsistence uses of migratory birds in Alaska and prescribe regional information on when and where the harvesting of birds may occur. These regulations were developed under a co-management process involving FWS, the Alaska Department of Fish and Game and Alaska Native representatives. The rulemaking is necessary because the regulations governing the subsistence harvest of migratory birds in Alaska are subject to annual review. This rulemaking proposes region-specific regulations that go into effect on April 2, 2018. Planned outreach includes congressional and stakeholder notifications and a news release.

In January, FWS will release a draft environmental assessment in response to a request by Ocotillo Express LLC for a five-year programmatic take permit for golden eagles at its Ocotillo Wind Energy Facility in Imperial County, California. Golden eagles are protected under the Bald and Golden Eagle Protection Act. Ocotillo is requesting a permit to cover unintentional of eagles from their ongoing activities. With their permit application, Ocotillo has submitted an eagle conservation plan that proposes proactive conservation measures to minimize impacts to golden eagles in the region to offset unavoidable harm. Outreach is planned in the form of a news release. This is not controversial.

FishBites

Garrison Dam NFH staff encourage area youth to discover the Missouri River

- **Topic:** Utilizing materials from Project WET, third- and fourth-grade youth in area schools are learning about the Missouri River including its many uses and importance, the people in the watershed, and also animals such as the endangered pallid sturgeon.
  Supportive Stakeholders: Garrison, Underwood, Turtle Lake and Washburn Public Schools
  Impacted Location: Central North Dakota

Garrison Dam NFH staff have groomed the hatchery's hiking trails again this year for cross country skiing

- **Topic:** Nearly eight miles of groomed trails located in the sheltered cottonwoods of the Missouri River bottomlands provide a great opportunity for wildlife watching and appreciation of the outdoors while getting in some healthy wintertime exercise.
- **Supportive Stakeholders:** Cross country skiers, snowshoeing enthusiasts and birdwatchers
- **Impacted Location:** Central North Dakota

Public/private partnership to benefit five prairie birds on private rangelands in Montana

- **Topic:** FWS's Montana Ecological Services Office, in partnership with The Nature Conservancy has finalized a statewide programmatic Candidate Conservation Agreement with Assurances (CCAA) designed to conserve populations and habitats of greater sage-grouse, Baird's sparrow, chestnut-collared longspur, McCown's longspur,and Sprague's pipit on privately owned ranching and agricultural lands in sagebrush and grasslands in Montana. Landowners who voluntarily enroll in the CCAA agree to manage privately owned ranching and agricultural lands to remove or reduce threats to these at-risk species. In exchange, landowners receive regulatory assurances that the conservation actions implemented will result in no additional regulatory requirements for the landowner on enrolled lands if any of the species become listed under the Endangered Species Act.
- **Supportive Stakeholders:** The Nature Conservancy, Montana Fish, Wildlife, and Parks, Natural Resources Conservation Service and ranchers
- **Impacted Location:** Montana

*FWS's Southeast Regional Coastal Coordinator joins collaborative coastal resilience program***.**

- **Topic**: The Southeast Regional Coastal Program Coordinator is has joined an advisory council that will develop the Strengthening Coastal Counties' Resilience program, an interactive, multimodal coastal-management training program for local governments throughout the Gulf region.
- **Supportive Stakeholders**: The program partners (National Association of Counties, the Association of State Floodplain Managers, the Coastal States Organization, and NOAA), as well as those who eventually enroll in the program.
- **Impacted Location**: Florida, Alabama, Mississippi, Louisiana and Texas; Gulf of Mexico

Spotting eagles at Hackmatack NWR in Illinois

- **Topic:** Hackmatack NWR staff are working with partners to welcome the public to see eagles up close and personal, as well as overwintering eagles living in the wild in the Fox River Valley.
- **Supportive Stakeholders:** McHenry County Conservation District, Friends of Hackmatack National Wildlife Refuge, Illinois Department of Natural Resources
- **Impacted Location:** Crystal Lake, Illinois

San Joaquin River NWR hosts first annual Goose Day

- **Topic:** San Joaquin River NWR hosted the first annual Goose Day public event to celebrate the more than 100,000 Aleutian, Snow/Ross, and White-fronted geese that winter on the refuge. The free event featured staff-led driving tours and nature walks for the general public on the refuge. More than 100 people participated in the event.
- **Supportive Stakeholders:** State agencies, partners, volunteers, neighboring landowners, and members of the public
- **Impacted location:** Central California

Dam Removal Completes 12-year Initiative to Open 30 Miles of River

- **Topic:** The obsolete West Britannia Dam on the Mill River in Taunton, Massachusetts, was demolished last week, opening the way for migratory fish such as river herring to reach their historic spawning grounds for the first time in nearly two centuries, provides increased recreational access for canoeing, kayaking and recreational fishing, and removes risk to residents from dam failure. The removal completes the Mill River Restoration Project, a 12-year initiative of dam owners; federal, state, and local agencies; and nonprofit organizations that began after the upstream Whittenton Dam nearly failed following heavy rain in 2005. More than 2,000 people were evacuated downstream, at a cost of $1.5 million, and the incident increased concern about the more than 3,000 dams in the state. The removal of the West Britannia Dam, as well as the Whittenton Dam in 2013, was partially funded by Hurricane Sandy recovery and resilience funds and overseen by The Nature Conservancy.
- **Supportive Stakeholders:** Massachusetts Division of Ecological Restoration, Massachusetts Division of Marine Fisheries, Massachusetts Department of Transportation, the City of Taunton, residents of Taunton, The Nature Conservancy.
- **Impacted Location:** Bristol County, Massachusetts

Hunt/Fish Notes

- Dale Bumpers White River NWR cooperated with the Arkansas Game and Fish Commission, the Arkansas Game and Fish Foundation, and volunteers from Arkansas and Mississippi to host the 4th Annual Mentored Youth Squirrel and Raccoon. The hunt featured six mentors, two teams of very experienced dog handlers and their exceptional K-9s showing six young people how to enjoy squirrel and raccoon hunting. The hunt was a great success, not just measured in the harvest of game (all six youth taking their first squirrel and three taking their first raccoon) but the lessons of conservation and sportsmanship learned by all.

- Tensas River NWR in Louisiana recently hosted its annual youth lottery hunts whereby 42 youth hunters successfully harvested 47 deer (participants were allowed to harvest one antlered and one antlerless deer, so several youth harvested two deer). The participating hunters were paired with a guide that mentored the youth and set great examples for ethical hunting. Additionally, Tensas River NWR hosted a mobility impaired hunt where 18 hunters harvested 11 deer.

- Students from Ashland High School, Ashland, Wisconsin, are partnering with the Ashland Fish and Wildlife Conservation Office to assist in early detection monitoring efforts for zebra mussels at nine local marinas along western Lake Superior. This cooperative effort is helping to prevent the spread of this invasive species, while also providing hands-on conservation training for future natural resource stewards. Eight students are participating in the monitoring effort this year. This partnership is in its 7th year.

- On January 13, the Fish and Aquatic Conservation program partnered with the Oregon Zoo in Portland Oregon to educate the public about Chinook salmon and some of the challenges facing this iconic Pacific Northwest species. The upriver bright fall Chinook salmon eggs at the zoo were raised at the Fish and Wildlife Service's Spring Creek National Fish Hatchery in the Columbia River Gorge. Once they hatch, they'll move to the zoo's Great Northwest area, alongside the other species in the Eagle Canyon habitat.

- Demolition of the Cotton Gin Mill Dam on the Satucket River in East Bridgewater, Massachusetts, was completed in mid-December by FWS's National Fish Passage Program and the Atlantic Coastal Fish Habitat Partnership. The dam's removal opened up almost 13 miles of river habitat for blueback herring and alewife, both of which are important forage species for striped bass and other sport fish. The recreational saltwater fishery for striped bass along the Atlantic coast has a $5 billion annual economic impact on our nation's economy. Other project partners include Massachusetts Department of

Fish and Game, National Fish and Wildlife Foundation, Audubon – Massachusetts, Taunton River Watershed Alliance, The Nature Conservancy and American Rivers.

- The initial Take Me Fishing™ First Catch Center fishing event was held at the Laguna Atacosa NWR in Los Fresnos, Texas, on Saturday, January 13th. Forty families were signed up for the event. First Catch Centers are a pilot program created by the Recreational Boating and Fishing Foundation that teach the public fishing skills and provide multiple fishing event opportunities. A second event is planned for January 27th.

To:	FWS Directorate & Deputies
Subject:	Last week"s FWS Weekly Secretarial Report
Date:	Tuesday, February 27, 2018 9:03:00 AM
Attachments:	_2018_02_20_FishBites.docx _2018-02-21 .FWS Weekly Report .docx

---

Good morning!

Please see last week's Weekly FWS Secretarial Report and Fishbites, attached. Please note the Secretarial report has a new format.

Thanks!
Charisa

FishBites

Boy Scouts of America launch new monarch conservation program

- **Topic:** On February 17, FWS Midwest Regional Director Tom Melius spoke to a crowd of approximately 300 Boy Scouts and their families at a Milkweed for Monarchs kickoff event. In addition to learning about the importance of monarch preservation and how it relates to broader conservation issues, Scouts took home milkweed seed packets.
- **Stakeholders:** National Capital Area Council of Boy Scouts of America, National Wildlife Federation,
- **Location:** U.S. National Arboretum, Washington, DC

Prescribed burns on and near St. Marks NWR

- **Topic:** St. Marks NWR in Florida recently prescribe burned 12,352 acres on the refuge and assisted The Nature Conservancy with a 10,000-acre burn on their property adjacent to the refuge. Most of the burned area on the refuge consists of frosted flatwoods salamander habitat. This salamander is federally listed as threatened, and forest management, including prescribed burns, is essential for its survival. The prescribed burn on the refuge set up another important summer burn in 18 months for the same area.
- **Supportive Stakeholders**: Bald Point State Park; Florida Department of Forestry; The Nature Conservancy; National Park Service; U. S. Forest Service
- **Impacted Locations**: Florida's Northern Gulf Coast and Big Bend areas

Hazard tree removal reopens campground

- **Topic:** FWS completed consultation on the removal of hazard trees, facilitating the reopening of the Wish Poosh campground. Approximately 1,400 trees will be removed as part of a 10-year vegetation management plan to reduce forest diseases and maintain public access to this popular site camping, boating and fishing site.
- **Supportive Stakeholders:** Washington Department of Fish and Wildlife, Okanogan and Wenatchee National Forest
- **Impacted Location:** Kittitas County, Washington

Protecting Idaho communities following spring floods

- **Topic:** FWS's Idaho Fish and Wildlife Office (IFWO) recently attended an inspection with the U.S. Army Corps of Engineers (COE) to examine damage along a levee within the town of St. Maries, Idaho. Loss of levee material and scouring caused the levee to weaken in a number of places, threatening nearby homes and businesses. The IFWO and COE worked together to draft a plan to repair the levee prior to this year's spring rains and avoid further damage. As an added benefit, this work will also reduce impacts to the threatened bull trout that migrate through the area.
- **Supportive Stakeholders:** U.S. Army Corps of Engineers, private landowners
- **Impacted Location:** St. Maries, Benewah County, Idaho

Wild fish health screening in Rocky Mountain National Park

- **Topic:** In a multi-year effort, FWS's Bozeman Fish Health Center in Bozeman, Montana, and Colorado Fish and Wildlife Conservation Office continue to conduct pathogen screening as part of the National Wild Fish Health Survey in Rocky Mountain

National Park. Two drainages east and west of the Continental Divide were sampled, and comprehensive health examinations were completed on brook trout, rainbow trout and cutthroat trout. No targeted pathogens were detected. Previous wild fish health surveys in Rocky Mountain National Park have found the targeted pathogens to be present in brook trout, rainbow trout and brown trout. The wild fish health sampling effort is used to gather information on pathogen presence in the park's watersheds and the potential impacts those pathogens may have on recovery efforts for native greenback cutthroat and Colorado River cutthroat trout.

- **Supportive Stakeholders:** National Park Service and Colorado Parks and Wildlife
- **Impacted Locations:** Colorado River, Middle Fork Baker Creek, Corral Creek and Mills Lake, Colorado

FWS and partners disburse vaccine to prairie dogs in an effort to protect black-footed ferret

- **Topic:** Sylvatic plague, an introduced disease to North America, is limiting recovery of highly endangered black-footed ferrets because of its lethality to ferrets, and to the prairie dogs on which they depend. An oral Sylvatic Plague Vaccine (SPV; deliverable via bait pellets) has been developed to protect prairie dogs from the plague, but until recently, an efficient and economical delivery mechanism had yet to be fully developed. In a collaborative effort, funding from World Wildlife Fund Innovation Grants has been used to develop equipment, methodologies, protocols and abilities to apply SPV at management scales using All Terrain Vehicles and Unmanned Aircraft Systems. With support from a second WWF Innovation Grant, the dispensing mechanisms were completely re-designed for 2017 for reliably dispensing three baits simultaneously (triple-shooters) from both ATV- and UAS-mounted platforms. These systems greatly enhanced SPV delivery efficiency.
- **Supportive Stakeholders:** World Wildlife Fund, Model Avionics and the U.S. Geological Survey (National Wildlife Health Center**)**
- **Impacted Location:** Montana and Colorado

FWS leads partnership restoring and conserving habitat on the Delmarva Peninsula

- **Topic**: FWS Chesapeake Bay Field Office is leading a multi-partner effort to restore and conserve landscapes, waterways and shorelines on the Delmarva Peninsula that are special to its residents, fundamental to its economy, and vital for its native fish, wildlife, and plants. The Delmarva Restoration and Conservation Network is composed of state fish and wildlife agencies, non-governmental conservation organizations, local governments and other federal government agencies. In January, the group agreed on a list of 45 species to serve as the foundation for a conservation blueprint, including American black duck, migratory fish, and other species that are rare or ecologically and economically important on Delmarva. The partnership is now developing restoration and conservation strategies to achieve its vision for the peninsula.
- **Interested Stakeholders:** Maryland Department of Natural Resources, Delaware Department of Natural Resources and Environmental Control, Virginia Division of Game and Inland Fisheries, The Nature Conservancy, The Conservation Fund, Ducks Unlimited, local land trusts and community organizations, National Oceanographic and Atmospheric Administration, Audubon Maryland – DC.
- **Location:** States of Maryland, Delaware, and Virginia.

Hunting/Fishing FishBites

Working with State, Tribal and local partners (Responsive to Sec 4.d)

- In February, FWS will award nearly $19 million through the National Coastal Wetlands Conservation Grant Program and the Sport Fish Restoration and Boating Trust Fund to coastal states to conserve and restore coastal wetlands and their fish and wildlife habitat. The grant funds are derived from excise taxes on fishing tackle and motorboat and small engine fuels. The grants will support 22 projects in 13 coastal states to protect, restore or enhance more than 30,000 acres of coastal wetlands and adjacent upland habitats, including 287 miles of shoreline. Over $21 million in additional matching funds will be provided by partner contributions from state and local governments, private landowners and conservation groups. Conservation of this habitat will help enhance flood protection and water quality, provide economic benefits to coastal communities and increase recreational opportunities for hunters and anglers.

- On February 16, staff from FWS Northeast Region are meeting with the National Shooting Sports Foundation to discuss efforts to increase collaboration and understanding between the shooting industries, FWS, and state fish and wildlife agencies. Discussions will focus on expanding efforts to bring industry representatives to projects funded under the Wildlife Restoration Program funded by an excise tax paid by industries, and bringing state and FWS employees to tour industry manufacturing facilities. The goal is for higher awareness of program accomplishments and advancing communications regarding conservation, restoration of wildlife and public engagement and opportunities in activities that connect people and nature.

- As part of the focus to work closely with state fish and wildlife agencies, the Refuge System's Coastal & Marine Program, in partnership with the National Park Service, joined the series of three webinars hosted by the Association of Fish and Wildlife Agencies' Ocean Resources Policy Committee. During the last webinar on February 13, the Refuge System presented on coastal and marine National Wildlife Refuges and Marine National Monuments. Discussion focused on engagement with the states in the management planning processes, encouraging public access and work under S.O. 3356.

- The Service completed consultation with the Washington Department of Fish and Wildlife and others on the removal of hazardous trees, which facilitated the reopening of the Wish Poosh campground in the Okanogan-Wenatchee National Forest. The consultation was part of a 10-year vegetation management plan to reduce forest disease and maintain public access. The removal of approximately 1,400 trees as part of the 10-year vegetation management plan will improve public access for camping, boating, and fishing.

- In a multi-year effort, the Service's Bozeman Fish Health Center in Montana, working with the Colorado Fish and Wildlife Conservation Office, continues to conduct pathogen screening as part of the National Wild Fish Health Survey in Rocky Mountain National

Park. The effort gathers information on pathogen presence and helps inform management decision which benefits recreational fishing opportunities. Comprehensive health examinations completed on brook trout, rainbow trout and cutthroat trout resulted in no targeted pathogens.

- The Service's Chesapeake Bay Field Office is leading Delmarva Restoration and Conservation Network, a multi-partner effort to restore and conserve habitats, waterways and shorelines on the Delmarva Peninsula that are fundamental to its economy, and vital for its native fish and wildlife. Partners include Maryland Department of Natural Resources, Delaware Department of Natural Resources and Environmental Control and Virginia Division of Game and Inland Fisheries; NGOs; local governments and other federal government agencies. The partnership is developing restoration and conservation strategies for waterfowl, fish, and other ecologically and economically important in the Delmarva region

- Florida Panther Refuge worked with 100 sports enthusiasts to improve about 80 acres of pine flatwoods, thinning cabbage palms to promote a more open understory and diversity of vegetation so the habitat will be more productive for deer, turkey and panthers.

Hunting Opportunities for Youth, Veterans, & Persons w/ Disabilities (Responsive to Section 4.c.3)

- The Southeast Region featured a story on a youth hunter, "Making memories in a duck blind: For a 12-year-old hunter in Alabama, connecting with family and the outdoors trumps video games: https://www.fws.gov/southeast/articles/making-memories-in-a-duck-blind/

Recreational Fishing (Responsive to S.O. 3347 Recommendations to Section 4.a.2)

- Valle del Oro NWR (NM) is one more place for New Mexicans to catch trout. The Mexico Department of Game and Fish now stocks 50 rainbow trout per week in the cold waters flowing through the edge of the urban refuge.

- With unseasonably warm weather Ruby Lake NWR in Nevada is almost completely ice free almost two months early. This means easy access for anglers, and many folks have been taking advantage of the nice weather to fish for the abundant trout in refuge waters. Recently an angler caught a 10 pound class tiger trout and many fish in the 18-inch range and larger have been landed.

- On February 12, Mora National Fish Hatchery transferred 1,384 Gila trout, 8.4 inches long in average size, to the Arizona Game and Fish Dept.'s Sterling Springs Hatchery. The trout are surplus to what are needed for recovery purposes and come from the Whiskey Creek lineage, one of five such lineages native to upper Gila River watershed. The state partners intend to rear these sport fish for another five months to a catchable size of 11+ inches. This transfer marks the first time Gila trout have been sent to another hatchery from the Mora facility, and builds on the 65,000 eyed Gila trout eggs sent Sterling Springs Hatchery in April of 2017.

- The Alabama Department of Conservation and Natural Resources and Cullman County demolished the existing boat launching slab at the Smith Lake Park and replaced it with a six-lane 90-foot-wide launching slab. This project was funded through the Sport Fish Restoration Boating Access Program. The Boating Access Program provides grant funds to the states, the District of Columbia and insular areas fish and wildlife agencies for projects that provide access to America's waterways by developing new access facilities or renovation and/or improvement of existing facilities

Other Notable Hunting and Fishing News

- James E. Gaddis, LTC U.S. Army National Guard (retired), recently thanked Secretary of the Interior Ryan Zinke and Dale Bumpers White River NWR in Arkansas for increasing hunting opportunities and clarifying legal hunting regulations on the refuge. Mr. Gaddis writes: "On behalf of my many duck hunting friends who, like myself, travel many miles each year to hunt our beautiful and majestic White River National Wildlife Refuge each duck season, thank you for opening up the South Unit Levee after over 20 years of closure, as well as clarifying legal hunting on the White River itself. By opening up the South Unit Levee to hunter access and clarifying hunting use on the White River, you have indeed helped the Interior Secretary in his objective to "champion sportsmen access" for ole military retirees like myself to enjoy some public duck hunting during our retirement. I will be submitting a letter to U.S. Department of Interior Secretary Ryan Zinke, Director of USFWS Greg Sheehan, and Chief of National Wildlife Refuge Systems Cynthia Martinez, thanking them for championing sportsmen access."

WEEKLY REPORT
DEPARTMENT OF THE INTERIOR U.S. Fish and Wildlife Service
February 21, 2018

Week Ahead Schedule of Meetings, Hearings and Travel
FWS Principal Deputy Director Greg Sheehan will be in the office.

Immediate Announcements and Actions (within the next 14 days)

[NEW] By February 28, FWS plans to publish a *Federal Register* notice requesting recommendations on resolutions, decisions and agenda items for the United States to consider submitting for discussion at the 18th Meeting of the Conference of the Parties (CoP18) to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) to be held in Sri Lanka in May 2019. This is the second in a series of *Federal Register* notices to solicit public input for CoP18. This process helps FWS to develop robust proposals and positions by taking into account a wide variety of views and anticipating potential implementation and enforcement challenges. Notice will be posted on FWS International Affairs website. (02/21/18)

[NEW] Around March 1, an Environmental Assessment (EA) should be available for public review on Geronimo Energy's planned development of the Crocker Wind Farm in Clark County, South Dakota, which would include 120 turbines and associated structures. As the proposed project is seeking to place 14 turbines, 14 transmission poles, and other associated features on FWS grassland easements, Crocker is seeking an easement exchange for 15.1 acres of direct easement impact. Crocker has offered funding for 30.2 new easement acres. The EA is tiered from the Upper Great Plains Programmatic Environmental Impact Statement and is required under the National Environmental Policy Act (NEPA). The company is simultaneously going through the South Dakota Public Utility Commission and hopes to begin construction in the second quarter of 2018. A local news release is planned. (02/21/18)

[UPDATE] By February 28, probably February 21, FWS and partners will announce the results of the annual Mexican wolf population survey and capture. The count documented a minimum of 114 Mexican wolves in the U.S., an increase of one wolf over what was documented in 2017. The final count will be available in the next couple of weeks. FWS is in communication with DOI COMs for this anticipated announcement. Planned outreach includes a news release and web posts.

[UPDATE] On February 21 or later, Kīlauea Point NWR in Hawaii will propose an entrance fee increase and an additional amenity fee for lighthouse tours. The last fee increase was in January 2008. The Kīlauea Point NWR requires this fee increase to manage visitor operations, maintain basic visitor services operations and safety, historic buildings and crucial infrastructure, reinvigorate the environmental education program, and implement steps needed to alleviate serious traffic safety concerns. There will be an informal comment period with targeted stakeholder outreach to local communities and interest groups, notifications to members of Congress in Hawaii, and tourism organizations and affiliated businesses. FWS is preparing a news release for local newspapers, as well as on the web and in social media. Following public involvement, Kīlauea Point NWR will develop a final fee increase proposal for implementation

by May. (02/14/18)

[UPDATE] On February 26, FWS will make the final determinations for delisting the Eureka Valley evening-primrose and downlisting the Eureka dune grass from endangered to threatened. These are two plant species that occur in Death Valley National Park, California. The primary partner and stakeholder is the National Park Service who supports the actions. Some environmental groups opposed delisting the two species as proposed. However, in response to new information, we are no longer delisting Eureka dunegrass and are instead reclassifying it to a threatened species which may reduce the level of concern among the interested parties. Planned outreach will include a regional news release and notifications to stakeholders and members of Congress.

On February 28, FWS (the State Supervisor and staff from the Oregon Fish and Wildlife Office) will meet with the USDA APHIS Wildlife Services and the Oregon Cattlemen's Association wolf committee chair. The purpose of the meeting is to discuss management options for gray wolves in the federally listed portion of Oregon. Wolves continue to expand in number and range across western Oregon, and this has led to several recent depredation incidents on livestock. Due to these incidents, the Oregon Cattlemen's Association has raised concerns about the expansion and federal management of wolves in western Oregon. The meeting is closed to the media. Wolves remain controversial. (02/14/18)

[UPDATE] By February 28, pending approval by the Department, FWS plans to send to the *Federal Register* a proposed listing determination and proposed critical habitat designation for the Island marble butterfly, found in Washington. The proposed critical habitat designation includes approximately 812 acres. This action is not expected to be opposed, and media coverage is expected to be neutral. Interested stakeholders include the Xerces Society (the petitioner), federal partners including National Park Service and Bureau of Land Management, and state partners including Washington Department of Fish and Wildlife and Washington Department of Natural Resources, San Juan County Land Bank, the San Juan Preservation Trust, and local landowners. A regional news release to all interested parties, congressionals and regional media is planned.

On or around February 28, FWS plans to send to the *Federal Register* a notice of availability of a draft post-delisting monitoring plan for the black-capped vireo. While this action is not expected to be controversial, stakeholders who oppose the delisting of the species may use this notice to express their concerns about the delisting. Stakeholders include the petitioners, Pacific Legal Foundation, Jim Chilton, New Mexico Cattle Growers' Association, New Mexico Farm & Livestock Bureau, New Mexico Federal Lands Council, and Texas Farm Bureau, and the Office of Travis Co. Judge and Big Bend National Park. Planned outreach will include notifications to local stakeholders, a regional news release and social media posts.

In February, FWS plans to publish a final rule on revisions to the 2018 Federal Migratory Bird Hunting and Conservation Stamp contest regulations. For the 2018 Federal Duck Contest and 2019-2020 Federal Duck Stamp, contest entries must include one or more visual elements that reflect the theme "Celebrating our waterfowl hunting heritage." The final changes for 2018 stamp design must depict appropriate hunting-themed elements, such as hunters, hunting dogs,

duck blinds, etc. as along with one of the five eligible waterfowl species. The bird must be in the foreground, portrayed live, and clearly the focus of attention.This will provide visual recognition to the contributions waterfowl hunters make to habitat conservation. Planned outreach includes a news release with congressional and stakeholder notifications.

In February, pending approval by the Department, FWS will award nearly $19 million in grants to coastal states to conserve and restore coastal wetlands and their fish and wildlife habitat. Each year, the Service supports coastal wetland conservation through the National Coastal Wetlands Conservation Grant Program and the Sport Fish Restoration and Boating Trust Fund. The grant funds are derived from excise taxes on fishing tackle and motorboat and small engine fuels. The grants will support 22 projects in 13 coastal states to protect, restore or enhance more than 30,000 acres of coastal wetlands and adjacent upland habitats, including 287 miles of shoreline. Over $21 million in additional matching funds will be provided by partner contributions from state and local governments, private landowners and conservation groups. Conservation of this habitat will help recover coastal-dependent federal trust species, enhance flood protection and water quality, provide economic benefits to coastal communities and increase recreational opportunities for hunters and anglers. The grant recipients (states) have not yet been informed that they will be receiving funds. Planned outreach includes congressional and stakeholder notifications and a news release.

In February, pending approval by the Department, FWS plans to send to the Federal Register a notice announcing the availability of comprehensively revised boundaries for the first batch of Coastal Barrier Resources System (CBRS) units included in the Hurricane Sandy Remapping Project. CBRS was created by the Coastal Barrier Resources Act in 1982 to conserve relatively undeveloped, highly vulnerable coastal barriers along the Atlantic and Gulf of Mexico coasts. The proposed revisions will affect 112 existing and 36 proposed new units in Delaware, Massachusetts, New Hampshire, and New Jersey. The notice will announce a 120-day public comment period and also advise of upcoming public meetings to be held via webcast. Landowners, state and local officials (and their representatives in Congress) will likely support the removal of areas from the CBRS and similarly oppose the addition of new areas into the CBRS. Properties in a CBRS unit are ineligible for federally subsidized flood insurance. Taxpayer groups, recreational interest groups and conservation groups will likely support the additions to the CBRS. This action is a step in the remapping process for CBRS units. It is separate from the the 3 CBRS bills that are the subject of the upcoming February 27 Hearing in the House Natural Resources Committee. That hearing will consider 3 bills to adopt recommended maps that Service prepared following the full process that these Sandy maps are currently undergoing. Outreach will include a news release and FAQs, as well as stakeholder and congressional outreach.

[UPDATE] <u>On March 6 (tentative),</u> FWS will join Brookfield Renewable, the Maine Department of Marine Resources, National Marine Fisheries Service and The Nature Conservancy in announcing a proposed feasibility study to enhance migratory fish passage on the Kennebec River. The Kennebec River is second only to the Penobscot River as Maine's most productive system for sea-run fish, including Atlantic salmon, alewife, shad and striped bass. The one-year study will explore the costs and benefits of a suite of alternatives to restore sea-run fish to the river (including nature-like fishways, fish ladders, bypass channels and dam removal)

while seeking to maintain current levels of low carbon energy generation. To allow time for the study, Brookfield is requesting an extension on fish passage requirements from the Federal Energy Regulatory Commission to further enhance fish passage beyond what is achievable through current regulatory processes. The request will include letters of support from state and federal agency partners. The governor of Maine also supports the study. Partners are planning coordinated outreach through a joint news release and congressional notifications.

[UPDATE]*A*round March 6, Mexico's Commission for Natural Protection Areas will announce the eastern monarch butterfly overwintering population numbers. FWS is in communication with the Mexican government for this anticipated announcement, and FWS is planning a news release.

15-60 Day Look-Ahead

[UPDATE] On or about February 28 or later, FWS plans to sign the new U.S. v Oregon Fisheries Management Agreement (2018-2027) for treaty (tribal) and non-treaty (state) fisheries on the Columbia River in Oregon, Washington, and Idaho. The Pacific Regional Director will sign the new agreement. Oregon, Washington, Idaho, five Columbia Basin Treaty tribes, and the United States have been negotiating a new agreement since 2015. The new agreement includes hatchery programs with specific production levels, and treaty and non-treaty fisheries in the Columbia River, which are intended to ensure fair sharing of harvestable Pacific salmon between the states and tribes in accordance with treaty fishing rights, and be responsive to the needs of ESA-listed species. Federal agencies, state and tribes support the new agreement. Once signed by all parties, the agreement will be sent to DOJ and then to the Federal District Court of Oregon for final approval, targeted for March. This is not controversial, and no outreach is planned.

On or around March 8, FWS plans to send to the *Federal Register* a proposal to downlist the Hawaiian goose (nēnē) from endangered to threatened. FWS will also propose to establish special regulations for the conservation of the species under section 4(d) of the ESA to allow for flexibility in managing lands. Landowners of resort, golf course, agricultural, residential and recreational properties are likely to support the reclassification and associated 4(d) rule while conservation groups may be opposed. Interested stakeholders include the State of Hawaii, federal agencies, conservation and bird groups, various private landowners, and the public. Outreach includes a regional news release, social media, emails and phone calls to congressional offices and stakeholders.

On or around March 8, FWS plans to send to the *Federal Register* a final determination to withdraw the proposal to list the San Fernando Valley spineflower, a plant found in California. This action is not expected to be strongly opposed; however, the Santa Clarita Organization for Planning and the Environment, a local environmental organization, has filed litigation regarding a development project in the range of the species and will likely oppose the withdrawal of the proposed rule. Other interested stakeholders include Newhall Land Company, City of Calabasas, Santa Monica Mountains Conservancy, WildEarth Guardians, California Department of Fish and Wildlife, and local landowners. Media coverage is expected to be neutral. Planned outreach includes a regional news release to all interested parties and the media. FWS is required by

settlement agreement to publish in the *Federal Register* by March 15; therefore, FWS plans to submit it by March 8.

On or around March 9, FWS plans to send to the *Federal Register* a minor map correction in the final rule designating critical habitat for two butterflies: the Poweshiek skipperling and Dakota skipper. One map incorrectly labeled Poweshiek skipperling critical habitat as Dakota skipper critical habitat in Minnesota. FWS does not expect any opposition to this. No outreach is planned for this simple correction notice.

As early as March 9, FWS will issue a Biological Opinion (BO) to the Army Corps of Engineers (Corps) for the Lake Okeechobee Regulation Schedule (LORS) in Florida. This consultation has involved no changes to the actual water level schedule or to lake operations. The only notable change is a new method for calculating the take of endangered snail kites. Consequently, this recent consultation has not been controversial. No outreach is planned but will be prepared to respond if asked. (02/14/18)

[UPDATE] Around March 15 or later, FWS will announce for public comment a draft environmental assessment (EA) that will evaluate alternatives to protect seabirds from predation by invasive house mice at Midway Atoll National Wildlife Refuge and Battle of Midway National Memorial, located in Papahānaumokuākea Marine National Monument. More than 3 million birds from 29 species nest on Midway's three islands, including the world's largest Laysan albatross colony. All of them are potentially vulnerable to mouse predation. The mice have been documented eating seabirds while they are nesting, resulting in injury and death. Due to their extreme dedication to raising their young, the birds will not leave the nest if attacked. Outreach is planned to include local public notifications through the web and social media, when the draft EA is published, and notifications to members of Congress in Hawaii, with targeted stakeholder outreach.

[UPDATE] On or around March 15, FWS plans to release for public comment a Draft Recovery Plan for the Southern California Distinct Population Segment of the mountain yellow-legged frog. The recovery plan is designed to help southern populations of this species in three recovery units through a set of recovery strategies with associated objectives and measurable criteria. The recovery units include San Bernardino Mountains, San Gabriel Mountains, and San Jacinto Mountains. The draft plan includes input from partners including the San Diego and Los Angeles zoos, California Department of Fish and Wildlife, U.S. Geological Survey, and the U.S. Forest Service. This is not controversial. Planned outreach includes congressional and stakeholder notifications and a regional press release to media.

On or around March 22, FWS plans to send to the *Federal Register* 90-day findings on petitions to delist or downlist the Cape mountain zebra, and delist the Preble's meadow jumping mouse. For substantial 90-day findings, this is the first step in a longer process and tends not to get significant media attention; however, this action might be the first time stakeholders become aware that FWS is assessing the status of a species. All stakeholders will have ample opportunity to provide input into the eventual 12-month findings. FWS anticipates local media coverage and interest from livestock and home building industries in Wyoming and Colorado regarding the finding on the petition to delist the Preble's meadow jumping mouse. A national news bulletin and congressional notifications are planned.

[UPDATE] On or around March 29, FWS plans to send to the *Federal Register* an amendment to the current listing of the southern Selkirk Mountains population of woodland caribou (endangered) to include the entire Southern Mountain Caribou population as a distinct population segment (DPS). The revised DPS (17 subpopulations; 15 extant, two extirpated) includes the currently listed southern Selkirk Mountains population of woodland caribou, which is a transboundary population between British Columbia, Canada, and northern Idaho and northeastern Washington. The critical habitat designation will remain unchanged. Non-governmental organizations including the International Fund for Wildlife, Kettle Range Conservation Group, Selkirk Conservation Alliance, Kootenai Environmental Alliance, Center for Biological Diversity, Idaho Conservation League and the State of Idaho may be opposed to the DPS listing. The Pacific Legal Foundation (representing Bonner County) is likely to challenge the determination. FWS received a notice of intent to sue from the Pacific Legal Foundation on behalf of Bonner County in June 2017 because FWS has not met the statutory deadline for finalizing this rule (a proposed rule was published in 2014). Planned outreach includes a regional news release, social media, emails and phone calls to congressional offices and stakeholders.

[UPDATE] On or around March 29, FWS plans to send to the *Federal Register* a final determination on the proposal to downlist to threatened from endangered the Kuenzler hedgehog cactus. When first listed, only one population of 200 plants was known. The discovery of additional populations, together with efforts to conserve the plant and its habitat, indicate the cactus is no longer at risk of extinction. Today, there are 3,300 individual cacti in 11 known populations within its southern New Mexico range. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild. This downlisting is not expected to be controversial. Planned outreach includes a regional news release, phone calls to stakeholders, and web postings.

On or around March 29, FWS plans to send to the *Federal Register* a final determination on the proposal to list the yellow lance as threatened. The yellow lance is a freshwater mussel that occurs in North Carolina and Virginia. The final listing will likely be opposed by the City of

Raleigh due to a proposed reservoir project on the Little River. FWS has been working with the city on this potential project for over nine years, and there are already other listed species in that location. Other stakeholders include the Lower Neuse Basin Association, Neuse River Compliance Association, Tar Pamlico Basin Association, North Carolina Water Quality Association, and the Center for Biological Diversity (petitioner). Planned outreach includes a regional news release and notification to stakeholders. The statutory deadline for publication of the final determination in the *Federal Register* is April 5; therefore, FWS plans to submit it by March 29.

[UPDATE] On or around March 30, FWS plans to send to the *Federal Register* a notice announcing the availability of a draft post-delisting monitoring plan for the delisting of the lesser long-nosed bat. This action is not expected to be opposed. Stakeholders are the petitioners, Pacific Legal Foundation, and the New Mexico Cattle Growers Association. Planned outreach includes a regional news release and notifications to stakeholders.

On or around March 30, FWS plans to send to the *Federal Register* a final determination on the proposal to delist the lesser long-nosed bat. This action is not expected to be controversial. Stakeholders are the petitioners, Pacific Legal Foundation, and the New Mexico Cattle Growers Association. Planned outreach includes a regional news release and notifications to stakeholders.

[UPDATE] On or around March 30, FWS plans to send to the *Federal Register* a rule removing the textual descriptions of the critical habitat boundaries from certain wildlife entries that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease, or in any other way change the critical habitat designations from which we are removing the textual descriptions of boundaries. This action will save taxpayer resources. FWS is taking this action in accordance with the May 1, 2012, revision of the regulations related to publishing textual descriptions of critical habitat boundaries. No outreach is planned.

On or around March 30, FWS plans to send to the *Federal Register* a proposed delisting determination on the Kirtland's warbler located in 31 states and the District of Columbia. The Michigan Governor's Office has expressed some interest in partnering with FWS on an announcement. Other planned outreach includes a regional news release, emails to stakeholders, social media and web postings. Stakeholders include Michigan Department of Natural Resources, U.S. Forest Service and Huron Pines, along with other conservation groups working as part of the Kirtland's Warbler Alliance. There is not expected to be controversy associated with the proposal, as partners have been transitioning from recovery to conservation management for more than a year. There is expected to be a moderate level of interest among birders and conservation groups, as the species is sought after by bird watchers.

On or around March 30, FWS plans to send to the *Federal Register* a final determination on the proposal to reclassify the Tobusch fishhook cactus from endangered to threatened. This plant species has shown significant recovery due in part to collaborative conservation efforts with partners. Supporters of this action include the Texas Parks and Wildlife Department, the Texas Department of Transportation, the Lady Bird Johnson Wildflower Center, and The Nature Conservancy. FWS has gained positive coverage on downlisting proposals, and anticipates more

interest when this final determination is announced. Planned outreach includes a regional news release with stakeholder and congressional contact, and social media postings.

On or around March 30, FWS plans to send to the *Federal Register* a notice as a follow-up to the *Federal Register* notice published on December 7, 2017 asking for public comments on the impact of the recent D.C. Circuit Court of Appeals ruling, Humane Society of the United States, et al. v. Zinke, et al., 865 F.3d 585 (D.C. Cir. 2017) on the final rule designating the Greater Yellowstone Ecosystem (GYE) population of grizzly bears as a distinct population segment and removing the population from the List of Endangered and Threatened Wildlife. Interested stakeholder groups include the Interagency Grizzly Bear Committee (including federal, tribal, state and local government entities), agricultural producers, hunting groups and environmental groups. Plaintiffs in the current litigation over the delisting of the GYE grizzly bear population may strongly oppose this action. Planned outreach includes individual congressional, state and tribal notifications, and a regional news release.

[UPDATE] On or around March 30, FWS plans to send to the *Federal Register* a final determination on the proposal to delist the black-capped vireo. Stakeholders include the petitioners, Pacific Legal Foundation, New Mexico Cattle Growers' Association, New Mexico Farm & Livestock Bureau, New Mexico Federal Lands Council, Texas Farm Bureau, Department of the Army, The Nature Conservancy, Oklahoma Department of Wildlife Conservation, and Texas Parks and Wildlife Department. Planned outreach will include notifications to local stakeholders, a regional news release and social media posts. An event to celebrate the delisting is being planned.

On or around March 30, FWS plans to send to the *Federal Register* a final determination on the proposal to list the Louisiana pinesnake as threatened. The pinesnake occurs in Louisiana and Texas. The Louisiana pinesnake listing is controversial due to concerns about the potential impacts on forestry activities. Stakeholders include the timber industry, U.S. Forest Service, U.S. Department of the Army – Fort Polk and the Joint Readiness Training Center, the State of Louisiana, USDA's Natural Resources Conservation Service, Louisiana Department of Wildlife and Fisheries, Texas Parks and Wildlife Department, Texas A&M Forest Service, Center for Biological Diversity, WildEarth Guardians, and members of Congress in Louisiana and Texas. Planned outreach includes a regional news release and notification to stakeholders and members of Congress. FWS is required by settlement agreement to publish the final determination in the *Federal Register* by April 6; therefore, FWS plans to submit it by March 30.
