On December 10-11, Lake Mead National Recreation Area will hold public meetings for the General Management Plan Amendment/Low-Water Plan. The plan provides a long-term strategy for addressing operational needs to maintain lake access and provide safe and diverse recreational opportunities at lake elevations above 950 feet. (10/31/2018)

On December 11, the public comment period closes for development concept ideas for the residence area of Jimmy Carter National Historic Site. The effort would guide park management in decisions about future cultural and natural resource conditions, as well as visitor experience opportunities for the structures, facilities and gardens associated with the Carter home. (11/14/2018)

On or before December 10, the NPS Pacific West Regional Director will submit a scheduling request to the Department for a January 11, 2019, DOI Review Team briefing on the development of the Draft Environmental Impact Statement for the General Management Plan Amendment at Point Reyes National Seashore and the north district of Golden Gate National Recreation Area. This briefing is required by Step 3 of the DOI NEPA Document Clearance

Process memorandum. Per the memorandum, briefing materials will be submitted to the Review Team five days before the scheduled briefing. (11/28/2018)

On December 14, the NPS Southeast Region is scheduled to brief the Executive Review Team in order to release the Draft Environmental Impact Statement for the Big Cypress National Preserve Backcountry Access Plan and Wilderness Study for public review. This briefing is required by Step 4 of the DOI NEPA Document Clearance Process. The administrative draft and briefing materials will be submitted to the Review Team one week prior to the scheduled briefing. The request letter was sent the week of November 5. (11/21/2018)

On December 17, the NPS Pacific West Regional Director will submit scheduling request to the Department for a January 25, 2019, DOI Review Team briefing in order to release the Final Environmental Impact Statement (FEIS) for the Saline Valley Warm Springs Management Plan in Death Valley National Park. This briefing is required by Step 5 of the DOI NEPA Document Clearance Process memorandum. Per the memorandum, the administrate drafts of the FEIS and Record of Decision will be submitted to the Review Team five days before the scheduled briefing.(11/28/2018)

15-60 Day Look-Ahead

U.S. Fish and Wildlife Service

NEW ITEMS

On or around January 2, FWS plans to send to the *Federal Register* a final listing determination on the Barrens topminnow, a fish found in Tennessee. This listing determination is not expected to be controversial. Planned outreach includes a regional news release, notifications on social media, congressional and stakeholder notifications, a fact sheet, and FAQs. The statutory deadline for publication of the final determination is January 4; therefore, FWS plans to submit it to the *Federal Register* by January 2. (11/28/2018)

By January 28, FWS and the National Fish and Wildlife Foundation (NFWF) will announce the final allocations for the first round of Delaware River Basin Conservation Act grants, appropriated by Congress in FY2018. More than $6.4 million in grant applications was received and the review committee of partners named in the Act approved a final slate of $4.1 million with a non-federal match of $7.5 million. The grants will restore 626 acres of wetland habitat and 549 acres of floodplain; increase public access on 1,794 acres; create 32 new jobs; and leverage more than 3,000 volunteers in project delivery. NFWF conducted fiscal notifications to Congress on November 16, with a 30-day response time. FWS and NFWF will notify grantees and coordinate a rollout event in January. (11/28/2018)

ONGOING ITEMS

By December 28, FWS will award up to $200,000 in small ($25,000 or less) grants for white-nose syndrome (WNS) communications and research, administered by the Wildlife Management Institute. The grants will be awarded to non-federal government applicants addressing three priority topics: outreach, education programs, and tools for communicating about WNS; gaps in knowledge of bat life history, habits, and ecological interactions relevant to managing WNS; and tools and strategies to improve survival rates for bats vulnerable to WNS. No FWS news release is planned. FWS will coordinate with grant recipients for individual outreach. (11/21/2018)

On or around January 10, FWS plans to publish a proposed rule to allow the baiting of brown bears on Kenai NWR, which is permitted under Alaska state hunting regulations. The rule would also allow the discharge of firearms along the Kenai and Russian rivers during certain times of the year; allow the use of snowmobiles, all-terrain vehicles, and utility task vehicles on certain lakes when there is adequate snow and ice cover; and increase access to the refuge by bicycle and game cart. This proposed rule would be available for a 60-day public comment period and is likely to be strongly opposed by those who believe that baiting of wildlife for hunting is unethical or who oppose hunting (particularly of large predatory mammals). FWS plans to notify stakeholders directly by email and issue a news release to Alaska media announcing the proposed rule and public comment period. (Updated 11/21/2018)

On or around January 18, FWS plans to send to the *Federal Register* a proposed delisting determination on the Borax lake chub, an endemic fish species in Oregon, due to recovery. The primary threats to the chub have been reduced or eliminated. Potential stakeholders include the state, The Nature Conservancy, and the Bureau of Land Management. This action is not controversial. FWS does not anticipate negative reaction from environmental groups. This action will likely receive the most interest at the local and regional level. Planned outreach includes a regional news release and communication with congressional offices, local, and state officials, and invested stakeholders. (Updated 11/21/2018)

On or around January 18, FWS plans to send to the *Federal Register* a proposed delisting determination on the running buffalo clover, located in Indiana, Kentucky, Missouri, Ohio, Pennsylvania, and West Virginia. FWS has developed a regional news release, a Flickr site for images, social media, fact sheet, and FAQs. Stakeholders include members of Congress and recovery partners, including state agencies. Some NGOs could question the delisting proposal because one of the delisting criterion was not met in the exact manner specified in the recovery plan. (Updated 11/21/2018)

National Park Service

NEW ITEMS

On December 16, the annual birthday celebration for Dr. Carter G. Woodson will be held near the Carter G. Woodson Home National Historic Site. This year's event will highlight Woodson's work during World War II as well as the NPS progress made at the site during 2018. (11/28/2018)

On or around December 17, Hot Springs National Park expects to release the Pullman Avenue Trail Connector Environmental Assessment (EA) to the public for a 30-day review. The park proposes to create a new trail (0.65 miles) across park lands to connect city streets to the City of Hot Springs' new Cedar Glades park mountain biking trail network. The EA is the first step to allow mountain biking on this new connector trail. If it is determined mountain biking should be allowed, a new special regulation would also be necessary. (11/28/2018)

(CLOSE HOLD) During the week of December 17, the Golden Gate National Recreation Area will announce the contract award for passenger ferry service to Alcatraz Island. The new 15-year concession contract (effective May 9, 2019) will offer passenger ferry service to Alcatraz and Angel Islands, a park cruise, food and beverage service, charter transportation service, and associated visitor services to the public. (11/28/2018)

On December 31, the current General Agreement between Steamtown National Historic Site and the Pennsylvania Northeast Regional Railroad Authority (PNRRA) that defines terms of rail use by both parties expires. Negotiations have been underway for the past 24 months that have included DOI Solicitors, the park, and Northeast Regional staff. Correspondence from PNRRA on November 8, 2018, stated they "are prevented from entering into this new [general] agreement." This potentially places rail operations in and through the park at risk in 2019. The NPS is currently developing options in case an agreement is not reached. This issue may attract congressional attention. (11/28/2018)

ONGOING

On or about January 5, the NPS will assume front desk operations at the First Ladies National Historic Site (FILA) in Canton, Ohio, from the nonprofit partner that has been providing that service. This is another step in the partnership transition. The on-site non-profit partner, the National First Ladies Library, will now focus on building a philanthropic program, creating volunteer opportunities, developing research education programs, networking with other sites and organizations that share the park mission, and advocating for the National Historic Site. The NPS will be responsible for Site management, maintenance, preservation, and operations. (10/31/2018)

On January 18, the prospectus for glacier landing air taxis and scenic tours at Denali will close. The Alaska Region issued the prospectus on November 8. By November 15, the Alaska Region will issue a prospectus for glacier landing air taxis and scenic tours at Denali National Park and Preserve. This solicitation is for four concession contracts, with a 10-year term of January 1, 2020, to December 31, 2029. (Updated 11/21/2018)

The NPS first nationwide fee-free day will occur on January 21, Martin Luther King, Jr. Day. The other fee free days will be April 20, First Day of National Park Week/National Junior Ranger Day; August 25, National Park Service Anniversary; September 28, National Public

Lands Day; November 11, Veterans Day. The public announcement was made on November 19. (11/21/2018)

On or around April, the NPS will display an exhibit on Treasured Landscapes at the United Nations Headquarters in New York for the annual kickoff of the upcoming General Assembly. The request was made through the office of UN Ambassador Nikki Haley. (Updated 09/05/2018)

Awareness

U.S. Fish and Wildlife Service

NEW ITEMS

Bonneville Power Administration (BPA) and FWS are proposing to translocate up to 50 deer from Tenasillahe Island, a part of the Julia Butler Hansen Refuge for the Columbian White-tailed Deer, to a 935-acre property owned by Columbia Land Trust. Columbian white-tailed deer are listed as threatened under ESA. The current population of these deer on Tenasillahe Island exceeds the management goal. The translocation would help establish a new subpopulation, one of the requirements for possible delisting. Translocation would occur from December 2018 to March 2019 and December 2019 to March 2020. BPA, Oregon and Washington Departments of Fish and Wildlife, Cowlitz Tribe and Columbia Land Trust support the translocation. This is not expected to be controversial. (11/28/2018)

On November 23, National Elk Refuge in Wyoming alerted hunters that it will require a mandatory sample of all elk harvested on the refuge for the remainder of the 2018 hunt season. This is just one of several responses to a recent confirmed case of chronic wasting disease in a mule deer that was road-killed within Grand Teton National Park and adjacent to the refuge boundary. Wyoming Game & Fish Department and NPS issued new releases and will plan a meeting with other agency partners (including FWS and the U.S. Forest Service) to discuss a coordinated response. Besides the mandatory testing, the refuge plans increased monitoring for symptomatic animals in the field; immediate euthanasia of symptomatic animals; and implementation of biosecurity protocols, including strict use of personal protective equipment, appropriate disinfection, and safe disposal of potentially infected animal carcasses. (11/28/2018)

UPDATED ITEMS

On November 8, FWS received an update from the U.S. Forest Service (USFS), Kootenai National Forest that a draft biological assessment (BA) for terrestrial species for Section 7 consultation with USFS for Hecla's Mining Company projects in northwest Montana would be forthcoming to FWS within the next 30 days. FWS will review the draft BA and provide comments back to the USFS as soon as possible. Once FWS receives a complete and final biological assessment, it will prepare a response within 135 days. (Updated 11/28/2018)

By the end of December, FWS will submit a "Request to Secure Water" for year 2019 to the Chief Engineer of the Kansas Department of Agriculture/Department of Water Resources as part of work to address the negative impact to of the Quivira NWR senior water right by junior groundwater wells. The Groundwater Management District #5 continues to develop a conceptual Local Enhanced Management Area proposal to remedy impairment. A draft proposal drew many negative responses regarding various aspects of the plan, and a new draft and comment period is expected. Letters from local school boards, county commissioners, and the Kansas Farm Bureau Office expressed concern regarding the potential impact of the plan on the local economy. Four Kansas congressional representatives also submitted a letter requesting from Secretary Zinke technical assistance with augmentation engineering. (Updated 11/28/2018)

National Park Service

NEW ITEMS

On November 21, the Office of Management and Budget (OMB) determined that the NPS proposed rulemaking, *Demonstrations and Special Events on the National Mall and Memorial Parks*, was significant under Executive Order 12866 due to its "novel legal or policy issues." As a result, the final rule will be reviewed by OMB for up to 90 days. The proposed rulemaking modifies how the NPS processes permit applications for demonstrations and special events. The rulemaking also identifies locations where activities are allowed, not allowed, or allowed but subject to restrictions. During the 60-day public comment period, which closed on October 15, the NPS received 140,652 comments. (11/28/2018)

ASSISTANT SECRETARY FOR INDIAN AFFAIRS

Week Ahead Schedule of Meetings, Hearings, and Travel

Assistant Secretary-Indian Affairs (AS-IA) Tara Sweeney will be attending an offsite meeting at NCTC on December 3-4 and in the office the rest of the week.

Principal Deputy Assistant Secretary-Indian Affairs (PDAS-IA) John will be attending an offsite meeting at NCTC on December 3, and on December 4 will be traveling to Alaska for the remainder of the week to lead Tribal consultations in Bethel and Kotzebue on the Department's implementation of the Alaska amendment to the Indian Reorganization Act (IRA) and fee-to-trust in Alaska.

Deputy Assistant Secretary for Policy and Economic Development (DAS-PED) Mark Cruz will be attending an offsite meeting at NCTC on December 3-4 and in the office the rest of the week.

Acting Bureau of Indian Affairs (BIA) Director Darryl LaCounte will be in the office.

BIA Deputy Director – Field Operations Jim James will be in the office.

Bureau of Indian Education (BIE) Director Tony Dearman will travel to Austin, Texas, for a Building State Capacity and Productivity Center meeting on December 5-6 and will return to Washington, DC, of Friday, December 7, 2018. Travel plans will be amended if a GAO hearing is scheduled for December 5, 2018, in Washington, DC.

Acting Deputy Assistant Secretary–Management (DAS-M) Jason Freihage will be in the office.

Acting Chief of Staff Rich Myers will be in the office.

Immediate Announcements and Actions (within the next 14 days)

Assistant Secretary for Indian Affairs

NEW ITEMS

On December 5, 2018, AS-IA Sweeney and BIA Director LaCounte will participate in a meeting with other Federal agencies and the White House on 477 to defend the current appeals process.

UPDATED ITEMS

December 5, 2018, is the due date for approval of the Kaw Nation's modification to its Off-Track Wagering Compact, which has been in effect since May of 2001. The existing Compact specified a location for Off-Track Wagering in Newkirk, Oklahoma. The Tribe and the State negotiated a modification to change the location to the Tribe's trust land in Braman, Oklahoma, which is eligible for gaming. The compact is currently pending surname in the AS-IA office.

This week, AS-IA Sweeney will review the Tribal-State gaming compact amendment for the Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Indians. A final approval decision was due on November 14, 2018 but the Office of the Solicitor (SOL) advised that AS-IA may affirmatively approve after that deadline. The amendment modifies Video Lottery Terminal definition, requires the Tribe to submit internal controls for the State's approval before new VLT's play, reaffirms the location of the Tribes' Gaming Facility, increases the number of VLTs the Tribe may operate from 800 to 1,200, and increases the wager limits for table and counter games.

This week, AS-IA will sign notifications that amendments to Tribal-State gaming compacts for the following Tribes are deemed approved as of November 19, 2018: Big Valley Band of Pomo Indians, La Jolla Band of Luiseno Indians, Mechoopda Indian Tribe, San Pasqual Band, Torrez Martinez Desert Cahuilla Indians, and Twenty-Nine Palms Band of Mission Indians. The amendments are pending SOL review.

Mid-December is the Office of Indian Gaming's target date for briefing PDAS-IA Tahsuda

on the Redding Rancheria's application to acquire land in trust in Shasta County, California, in order to relocate its existing Win River gaming facility. The Department signed an agreement with the Tribe to close its existing casino prior to opening the new casino.

Mid-December is the Office of Indian Gaming's target date for briefing PDAS-IA Tahsuda on the Coquille Tribe's application to acquire land into trust for gaming within the City of Medford, Jackson County, Oregon.

ONGOING ITEMS

AS-IA is expected to review the following Tribal-State gaming compact amendments this week for affirmative approval or deemed approval: Osage Nation, Santa Ynez, Dry Creek, Karuk Tribe, Habematolel Pomo of Upper Lake,

December 2, 2018, is the due date for approval of Tunica-Biloxi Indian Tribe's amendments to its Revenue Allocation Plan to resume limited per capita payments to minor tribal members and provide for enhanced services for elderly tribal members' healthcare and housing assistance. The Amendment also creates a permanent endowment fund to provide support and stability to tribal programs and services.

December 2-4, 2018, BIA Chief of Division of Facilities, Maintenance, and Construction will participate in the National Council for School Facilities annual meeting in Washington, DC.

December 3-5, 2018, the AS-IA Senior Policy Advisor will attend the Violence Against Women Act (VAWA) Inter-Tribal Work Group (ITWG), present at the Tribal Law & Order Act (TLOA), Indian Alcohol and Substance Abuse (IASA), Tribal Action Plan Work Group (TAP) workshop, and participate on a SAMHSA Opioid panel workshop to discuss TLOA IASA activities related to Interior.

December 5, 2018, is the tentative date for a Senate Committee on Indian Affairs oversight hearing for BIE and BIA to provide an update on the status of addressing GAO's recommendations for Indian energy and the BIE.

On December 5 - 6, 2018, Indian Affairs will hold Tribal consultation sessions in Bethel and Kotzebue, Alaska, to discuss how it might better implement the Alaska IRA's federal acknowledgement provisions and the legal authority of the Secretary to take land into trust in Alaska, per the Dear Tribal Leader and Dear Alaska Native Corporation CEO letters dated July 2, 2018.

December 11, 2018, Assistant Secretary Sweeney plans to host a Tribal roundtable with the Secretary in the Office of the Secretary at Main Interior.

On December 12, 2018, Indian Affairs will hold the last of five tribal consultation sessions by teleconference, to discuss how it might better implement the Alaska IRA's federal acknowledgement provisions and the legal authority of the Secretary to take land into trust in Alaska, per the Dear Tribal Leader and Dear Alaska Native Corporation CEO letters dated

July 2, 2018.

The final approval letter for the Saginaw Chippewa Tribe of Michigan's Revenue Allocation Plan Amendment is pending AS-IA signature. The Tribe is revising their educational requirements, instituting grace periods, and including the ability to receive a minor's trust fund at 20 years old.

The final approval letter for the San Pasqual Band's Revenue Allocation Plan Amendment is pending SOL surname. The Tribe is incorporating the 2014 Tribal General Welfare Exclusion Act and prior RAP approvals into the original document.

The Office of Indian Gaming is processing a request for AS-IA review from the Wyandotte Nation (Oklahoma/Kansas) to acquire in trust for gaming a 10.53-acre parcel of land in Park City, Sedgwick County, Kansas, (Park City parcel), overturning the denial of its previous application by the Assistant Secretary in 2014 (mandatory trust acquisition).

Indian Affairs' internal workgroup continues to work on developing a plan for decoupling BIE and BIA in the FY 2020 budget. The workgroup includes representatives of BIA, BIE, DAS-M (including IT, CFO), the AS-IA Office and Interior PMB.

Bureau of Indian Affairs

NEW ITEMS

December 9-16, 2018, BIA Southwest and Navajo Regional Directors will be providing support to Acting Solicitor Dan Jorjani for his tour through New Mexico and Arizona, including coordinating a tour of Chaco Canyon cultural site with BLM, NPS, and SOL.

December 10-12, 2018, BIA Office of Justice Services senior management will attend the Indian Country Leadership Summit at the U.S. Department of Justice (DOJ) National Advocacy Center in Columbia, South Carolina. The Summit is a joint presentation of DOJ, FBI's Indian Country Crimes Unit and BIA Office of Justice Services and focuses on topics of interest for DOJ, BIA, and Tribal communities.

By the December 16, 2018, deadline established by the Water Infrastructure Improvements for the Nation (WIIN) Act of 2016, BIA plans to submit its report on Indian dam safety and its report on Indian irrigation projects to Congress. The reports are currently in surname and provide status updates on accomplishments and remaining programmatic needs.

UPDATED ITEMS

The Indian Energy Minerals Steering Committee (IEMSC) meeting initially scheduled for November 2018 has been rescheduled to February 2019, to be held in Lakewood, Colorado. BIA Division of Real Estate Services Chief plans to attend.

ONGOING ITEMS

The week of December 3, 2018, BIA will be holding a Superintendents Leadership Course for BIA agency superintendents. The agenda will include presentations on harassment in the workplace, litigation assistance, orders of succession, procurement processes, ethics, and a number of other topics.

The week of December 3, 2018, the Division of Property Management plans to provide property management training to class attendees at the BIA Superintendent Orientation Class 7 in Albuquerque, New Mexico.

By early December, BIA, the Office of Regulatory Affairs & Collaborative Action (RACA) and SOL plan to finalize a new handbook addressing how BIA Realty staff processes mortgages of leasehold interests held in trust or restricted status.

December 9-14, 2018, BIA will present a poster summarizing the final chapter of the 4th National Climate Assessment (NCA4), entitled Tribes and Indigenous Peoples, for the American Geophysical Union conference in Washington, DC.

December 10-12, 2018, BIA Office of Justice Services senior managers will be receiving training and meeting with senior managers from the U.S. Department of Justice to discuss law enforcement issues at the Indian Country Leadership Summit, in Columbia, South Carolina.

On December 11-12, 2018, the BIA Realty Specialist for Mineral Leasing will provide training on the BIA portion of the onshore energy and mineral lease management interagency standard operating procedures at the Denver Business Center.

Bureau of Indian Education

ONGOING ITEMS

On December 4-6, 2018, the Bureau of Indian Education Standards, Assessments, and Accountability Negotiated Rulemaking Committee will hold a meeting in Arlington, Virginia, per the Federal Register notice published August 2.

December 6-7, 2018, BIE will participate in the U.S. Department of Education 2018 Combined Federal Programs Meeting in Washington DC.

15-60 Day Look-Ahead

Assistant Secretary for Indian Affairs

UPDATED ITEMS

December 31, 2018, is the due date for approval of a Tribal-State gaming compact between the Nooksack Tribe and the State of Washington. The compact is currently in review with SOL.

ONGOING ITEMS

December 20, 2018, is the deadline for submitting written comments, by midnight EST and via email, on the how Interior might better implement the Alaska IRA's federal acknowledgement provisions and the legal authority of the Secretary to take land into trust in Alaska, per the Dear Tribal Leader and Dear Alaska Native Corporation CEO letters dated July 2, 2018.

On January 22, 2019 through January 25, 2019, the Self-Governance Advisory Committee meeting will place at the Embassy Suites DC Convention Center, 900 10th Street, NW, Washington, DC. Representatives of the Office of the Assistant Secretary—Indian Affairs are invited to attend on the morning of Friday, January 25, 2019.

AS-IA is reviewing a request from Arapaho Tribe of the Wind River Indian Reservation (Wyoming) to place land in trust for gaming. AS-IA will determine whether to accept approximately 6.3 acres of land in trust for the Arapaho Tribe under the authority of a statute specific to the Tribe.

Hannahville Indian Community submitted amendments to its Revenue Allocation Plan for approval to allow for per capita deductions for child support and debts owed to the Tribe.

Indian Affairs expects to issue an updated National Policy Memorandum (NPM) on Real Property Leasing Space Utilization and Space Request Policy. The original NPM expired in June 2018. The updated NPM references the IA Facilities Investment Review Board (FIRB), which will provide oversight of the real property leasing program and ensure that real property leases comply with applicable laws, policies, and procedures. The FIRB charter is in the process of being approved, and once it has been signed, the program will move forward with surnaming the NPM.

Indian Affairs expects to issue a new Indian Affairs Manual (IAM) chapter regarding corrective deeds and affidavits to provide the process to correct a deed on Indian land.

<u>Bureau of Indian Affairs</u>

ONGOING ITEMS

December 17-20, 2018, BIA Office of Justice Services will host Opioid Community Awareness Meetings at Yurok Tribe, Cahto Tribe, and Bishop-Paiute Tribe, respectively.

<u>Bureau of Indian Education</u>

NEW ITEMS

January 7-11, 2019, BIE Strategic Direction team members will meet in Albuquerque, New Mexico, to work on implementation of goals. Senior leaders will also have a separate face-to-face meeting this week.

On January 15-17, 2019, the Bureau of Indian Education Standards, Assessments, and Accountability Negotiated Rulemaking Committee is tentatively scheduled to hold its fourth face-to-face meeting in Phoenix, Arizona, pending the Secretary's approval.

January 16-18, 2019, the BIE Advisory Board for Exceptional Children will meet in Albuquerque, New Mexico. All Associate Deputy Directors have been invited.

UPDATED ITEMS

Through January 20, Dr. Daniel Wildcat will be serving as Acting President of Haskell University. Dr. Venida Chenault will be detailed to a special assignment for BIE in order for senior leadership to fully review the Office of Inspector General report issued on November 16, 2018.

ONGOING ITEMS

December 12-14, 2018, BIE Special Education staff and technical assistance providers will meet to develop a revised technical assistance plan for the special education unit to meet Individuals with Disabilities Education Act (IDEA) requirements and demonstrate continuous improvement.

Through December 14, 2018, BIE is conducting the Indian School Equalization Program (ISEP) monitoring for General Education, Special Education, English Language Learners, Native Language Learners and Gifted and Talented.

By January 7, 2019, BIE expects to announce the availability of 21st Century Community Learning Centers Draft Application for the 2019-2022 cohort to BIE owned and operated schools, and expects to establish an application deadline of March 1, 2019.

On January 29, 2019, the BIE Associate Deputy Director for Bureau-Operated Schools will host a meeting of all off-reservation Bureau-operated boarding schools at Sherman Indian School to address urgent needs and long-term planning.

Through May 2019, BIE will be hosting a series of safety webinars to address: Winter Safety, Winter Driver Safety & Environmental Compliance (Paint, Ballasts and Bulbs), Safety – 3607 Purpose and Process & OSHA Logs, Collateral Duty Safety Officers & Safety Committees, and topics determined by a three-month trending.

BIE is working with BIA Office of Indian Services to review and update their memorandum of agreement on Public Law 93-638 contract administration for BIE programs, to clarify the respective responsibilities of BIE and BIA, identify training opportunities for BIE staff in

FY19, and further evaluate BIE delegated authority for 638 awarding officials.

BIE is developing a report entitled "Bureau Operated Schools' Site Visits and Recommendations on Native American Language, History, and Culture" that will compile current qualitative and quantitative data on Native American language, history, and culture. Site visits are necessary at the two schools remaining for inclusion.

Awareness

Bureau of Indian Affairs

ONGOING ITEMS

The Camp Fire burned 630 trust acres on the Chico Rancheria and the Berry Creek Rancheria is under evacuation. It is unknown at this time how the fire has impacted the Mooretown Rancheria.

BIA's Office of Indian Services, Division of Human Services (DHS) is partnering with the Department of Justice and the BIA's Office of Justice Services to expand the Justice Department's Tribal Access Program for National Crime Information (TAP): the federal government's essential program that provides Tribes with access to national crime information databases. TAP offers federally recognized tribes the ability to access and exchange data with national crime information databases for both civil and criminal purpose, which allows tribes to more effectively serve and protect their communities by ensuring the exchange of critical data.

Bureau of Indian Education

UPDATED ITEMS

Haskell Indian Nations University (Haskell) staff are working with BIA Office of Justice Services to explore options for improving safety and security of the campus.

ONGOING ITEMS

Retrocession of Borrego Pass: A review of the retrocession checklist was completed to ensure that the areas for School Operations had reasonable timeframes and staff accountable to carry out the efforts to ensure training and processes are shared with the school for a clean transition.

Pine Hill progress update: The Project Manager confirmed that the Contractor is completing site mobilization and performing a more detailed building-by-building assessment to complete the work plan for the lightning protection systems. The Contractor is on site and proceeding according to the schedule.

Staff at Haskell are working with the SOL, the Office of Civil Rights, and Southwestern

Indian Polytechnic Institute (SIPI) staff on a new policy implementing the Executive Order, "Nondiscrimination on the Basis of Race, Sex, Color, National Origin, Disability, Religion, Age, Sexual Orientation, and Status as a Parent in Federally Conducted Education and Training Programs" and a new policy on consensual relationships between employees and students.

ASSISTANT SECRETARY INSULAR AND INTERNATIONAL AFFAIRS

Week Ahead Schedule of Meetings, Hearings, and Travel for the upcoming week, December 2 –December 8

TRAVEL

AS-IIA Domenech will be attending an offsite meeting at NCTC on December 3-4.

OIA Director Pula will travel to Honolulu, HI for the Winter Island Government Finance Officers' Association meeting taking place December 4-6.

INT Director Karen Senhadji has no planned travel.

Senior Advisor Sarah Jorgenson will be attending an offsite meeting at NCTC on December 3-4. On December 5, she will attend her graduation ceremony with the Air Command and Staff College.

Oceans Program Coordinator Liza Johnson has no planned travel. Note that Liza will be out on maternity leave from mid-December to April 1.

Immediate Announcements and Actions within 14 days

UPDATED ITEMS

OIA INDOPACOM Liaison: OIA is working with INDOPACOM to finalize an MOU to fill an OIA liaison to INDOPACOM, a full-time position housed in Honolulu. UPDATE: INDOPACOM sent an updated MOU to OIA and OIA Director Pula is working with the Solicitor's office to finalize it.

OIA Meeting with NSC on IndoPacific Strategy: AS-IIA has been working with NSC and the interagency to update and to finalize an IndoPacific strategy, which encompasses some of OIA's work and objectives in the territories and freely associated states. UPDATE: A follow-up meeting is expected to take place the week of December 2, giving meeting participants time to read feedback and initial analysis from all agencies involved in the working group.

OIA White House Initiative on Asian Americans and Pacific Islanders: OIA staff continue to work on action items for the White House Initiative on Asian Americans and Pacific Islanders (WHIAAPI), which seeks to work to improve the quality of life for Asian Americans and Pacific Islanders across the nation through increased access to, and

participation in, federal programs in which they may be underserved. It focuses on four cross-cutting ideas: data disaggregation, language access, capacity building, and workforce diversity. UPDATE: The next WHIAAPI Interagency Working Group meeting will take place at the Department of Education on December 5. OIA's Technical Assistance Division Director will attend.

OIA FAS Trust Fund Quarterly Meeting: UPDATE: OIA Director Pula will attend and chair the Trust Fund Committee meeting for the Federated States of Micronesia in Washington, D.C. on Wednesday, December 12 (this is rescheduled from the week of November 26). The fund balance is currently $636 million.

OIA Economic Reports on the Freely Associated States: Economic reports on the three freely associated states are being compiled and are all expected to be completed by the end of December. UPDATE: The reports on the Federated States of Micronesia and the Republic of the Marshall Islands have been completed and the report on Palau is expected in December.

ONGOING ITEMS

OIA Appointment of Open Associate Justice of American Samoa Position: No change. Seven applicants were vetted for this vacancy. Acting Solicitor Jorjani and OIA Director Pula have completed the second series of telephone interviews with the candidates. A memo of recommendation is being compiled, and will be sent to the Secretary to assist him in making the appointment.

OIA Island Government Finance Officers' Association Meeting: No change. On December 4-6, the Winter Island Government Finance Officers' Association meeting will take place in Honolulu. OIA Director Pula will attend. Participation is expected from the heads of finance for each insular government as well as permanent staff members with a work-related focus on finance office performance measurements and audit improvement initiatives within each finance office. OIA funds two participants from each of the seven insular areas to attend this meeting.

OIA Western Governors' Association Annual Meeting: OIA staff are compiling briefing documents for the Deputy Secretary in advance of his possible attendance at the Western Governors' Association annual meeting in Honolulu, HI from December 11-13. The meeting focus will be on biosecurity and invasive species, and representatives from the insular areas as also expected to be in attendance.

OIA Interagency Group on Insular Areas (IGIA) Subgroup Meeting: OIA is coordinating and convening a meeting between various Federal departments and agencies to discuss the challenges that the Insular Area governments are having in successfully executing the financial accountability, operational management, and programmatic outcome requirements of federal grant programs. This subgroup meeting is planned for December 13, 2018, to inform future IGIA activities and the agenda for the 2019 Annual IGIA meeting (more details listed below).

OIA Region 12 Facilitator for DOI Reorg: No change. OIA Director Pula is the Facilitator for Region 12, which consists of Hawaii and the U.S. Territories in the Pacific. Mr. Pula and the other regional facilitators continue to work through the six mission functions to populate information in the focused areas of Collaborative Conservation, Recreation, Permitting, Information Technology, Human Resources Management, and Procurement.

OIA November and December OIA Leadership and Audit Training: No change. OIA-funded government oversight and audit training continue to take place in USVI and Florida:
-December 2: USVI Executive leadership program in Tampa, Florida
-December 3-7: Writing and communicating audit results and contract/procurement auditing in St. Thomas, USVI.

OIA DHS Public Charge Rule: The Ambassadors of the Federated States of Micronesia, the Marshall Islands and Palau continue to voice their concern with the implications of the proposed changes to the DHS rules addressing *public charges*, that is, aliens entering the United States who are unable to care for themselves without becoming a *public charge*.

OIA Parole Visa Policies Relating to the Commonwealth of the Northern Mariana Islands (CNMI) and Guam: Before the draft Federal Register notice regarding the rescission of discretionary parole visa policies relating to nationals of the People's Republic of China and the Russian Federation seeking entry into Guam and/or the Commonwealth of the Northern Mariana Islands moves forward, DHS/OMB is waiting for CNMI to recover from the recent typhoon to the point that the Governor of CNMI is able to travel to DC for a meeting to discuss this issue. CNMI has written the President requesting formal Section 902 consultations on the issue. At this time, no meeting is scheduled.

INT Launch Event in South Africa: No change. DOI-ITAP will participate in launch event meetings from December 1- 7, in Cape Town, South Africa, with Western Cape Government representatives and selected contractors, to mark the beginning of technical assistance to improve state of readiness for large-scale shale gas development in the rural area of the Central Karoo, in South Africa. This work is funded by the U.S. State Department.

INT Ashland Oregon Forensics Lab and Washington DC Visit: No change. DOI-ITAP will host a high level delegation from the Philippines to tour the DOI/Fish & Wildlife Service's National Wildlife Forensics Laboratory in Ashland, Oregon, and Washington DC, December 2-8. During the Ashland visit, the delegation will learn about the benefits such a facility can bring to the Philippines and Southeast Asia in general as well as the equipment and technical capacity needed to manage a forensics lab. The delegation will also meet with their counterparts in Washington, DC. This work is funded by USAID/Philippines.

INT Marine Protected Areas Exchange: No change. Through December 22, DOI-ITAP will facilitate a professional learning exchange for five Marine Protected Areas (MPA) and sustainable fisheries experts from the Indonesian provinces of Maluku and West Papua to travel to the U.S. to learn from NPS and FWS about DOI approaches to MPA management. This work is funded by USAID.

INT Coral Triangle Initiative Senior Officials' Meeting, Philippines: No change. DOI-ITAP will participate in the annual Senior Officials' Meeting of the Coral Triangle Initiative on Coral Reefs, Fisheries and Food Security (CTI-CFF), to be held in Manila, December 10-14. This annual priority-setting meeting of the marine and fisheries conservation coalition of the six Coral Triangle Countries will set out the 2019 goals for the organization and its Regional Secretariat, which receives DOI-ITAP technical support. The work is funded by USAID.

INT Lithium Scoping Mission, Argentina: No change. A DOI-ITAP team consisting of five USGS experts will travel to Salta, Argentina, and the surrounding area, from Dec 12-22, to assess the availability of lithium and evaluate extraction protocols. The group will work with Ministry counterparts. The work is part of DOI-ITAP global energy program and is funded by the Department of State.

INT Coordinate Intra-Agency and Interagency International Activities in Support of the DOI Mission and U.S. Foreign Policy: No change. INT is developing a searchable spreadsheet of all international agreements and organizations in which DOI participates. So far, there are about 300 initial entries, and INT is compiling additional information to support these entries (points of contact, upcoming related meetings, etc.) to be provided by bureaus.

INT Modernize International Travel Clearance System, Passport and Visa Operations: No change. INT staff have been working to develop a standard international travel clearance system for all of DOI, and updated guidance for DOI staff to follow for international travel. In addition, INT staff continue to automate passport and visas procedures for more efficient processing.

OCEANS Ocean Policy Committee Meeting: No change. The second Ocean Policy Committee meeting of the Subcommittee Co-Chairs and agency senior policy contacts will occur on Wednesday December 5th at the Eisenhower Executive Office Building. Assistant Secretary Domenech and the Ocean, Great Lakes, and Coastal Program Coordinator will attend. Agenda items include presentation and discussion on the Ocean Science and Technology Subcommittee priority research and technology needs, a briefing on the soon-to-be-released Science and Technology for America's Oceans: A Decadal Vision, Ocean Resource Management Subcommittee data product and report on regional data needs, and discussion of other potential interagency initiatives.

OCEANS DOI Senior Ocean Policy Team and Regional Ocean Contacts Meeting: No change. On December 5, the DOI Senior Ocean Policy Team and the Regional Ocean Contacts will meet jointly to discuss implementation of actions in support of Executive Order 13840: *Regarding Ocean Policy to Advance the Economic, Security, and Environmental Interests of the United States*, the FY19 Oceans Working Capital Fund activities, and other ocean, Great Lakes, and coastal actions to be jointly undertaken across DOI bureaus and regions.

OCEANS Extended Continental Shelf Executive Committee Meeting: No change. The Executive Committee of the Extended Continental Shelf (ECS) Task Force will meet on

December 6. The Ocean, Great Lakes, and Coastal Program Coordinator will attend representing DOI as the Vice Chair of the Executive Committee. The purpose of this meeting is to discuss and decide upon the updated ECS Project Plan and timeline.

15-60 Day Look-Ahead

NEW ITEMS

OIA Oceania Way Forward: OIA is working with the NSC and others in the intelligence community to identify a date in January to meet in Washington, DC on issues relating to the Oceania region, which includes the three freely associated states as well as American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands.

OIA USVI Gubernatorial Runoff Election: On November 20, Governor Kenneth "Ken" Mapp (Independent) lost to former island Labor Commissioner Albert J. Bryan, Jr. (Democrat). The vote tally was 11,796 to 9,766, making Mapp the third governor in U.S. Virgin Islands history to be defeated after the first term (the others were in 1998 and 1974).

OIA Gubernatorial Inaugurations in Territories: The inaugurations for the new territorial governors will occur as follows:
-January 7: Guam. Governor-elect Lou Leon Guerrero (D) will be sworn in as Guam's first female governor.
-January 7: U.S. Virgin Islands. Governor-elect Albert J. Bryan (D) will be sworn in (see above).
-January 14: Commonwealth of the Northern Mariana Islands. CNMI Governor Ralph Torres (R), who succeeded Governor Eloy Inos upon his death in office, will be sworn in for his first term.
OIA expects to have representation at all inaugurations. In addition, AS-IIA is preparing to send letters congratulating the governors-elect and to inform them of open grants that OIA is funding in their respective territories.

ONGOING ITEMS

OIA 2019 Interagency Group on Insular Areas (IGIA) Senior Plenary Session: OIA will send out to all Federal stakeholders a *save the date* notification for the 2019 IGIA Senior Plenary Session to be held on February 25, 2019, between 1:00 p.m. and 4:00 p.m. at The White House. The Secretary will co-chair the event.

OIA Graduate School USA Activities in January: No change. OIA's funded Graduate School USA, contracted and supported by OIA's Technical Assistance Program, is supporting multiple activities focused on financial education, oversight, and accountability for the CNMI, RMI, and FSM in January 2019:
-Saipan, CNMI; January 2019: *TBD if Typhoon Yutu will impact the timing of this event at this time.
-Majuro, RMI; January 14-18, 2019: The New Uniform Grant Guidance, Majuro, RMI. This course offers a high-level overview of the changes in grants management regulations in *The*

Uniform Guidance: Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards.
-Pohnpei, FSM; January 21-25, 2019: The New Uniform Grant Guidance, Pohnpei, FSM. This course offers a high-level overview of the changes in grants management regulations in *The Uniform Guidance: Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards.*
-Majuro, RMI; January 28-31, 2019: Developing Interim Procurement Regulations, Majuro, RMI.

OIA Census Compact Surveys: No change. With funding from OIA, the U.S. Census has begun its work in Guam and the Commonwealth of the Northern Mariana Islands (CNMI) as part of the next five-year enumeration of migrants from the freely associated states (FAS) in Hawaii, Guam, the CNMI and American Samoa, as required by the Compact of Free Association (Public Law 108-188). The enumeration is used as the basis for distributing $30 million provided under the Compact to help offset the economic and social impact of migrants from the FAS in the affected jurisdictions. Surveys have begun and are expected to be completed by spring 2019. OIA and Census Officials plan to meet with staff on the Hill to give an update on the status of the enumeration.

INT Secretarial Trip to Israel: INT is convening weekly planning calls and coordinating with the Office of Scheduling and Advance, U.S. Embassy Israel, the Israel desk at the Department of State and Israeli counterparts to prepare for a Secretarial visit, which is scheduled to occur January 28-31, 2019. During the visit, the Secretary will sign a Memorandum of Understanding to expand cooperation on conservation, natural and cultural resource management, and protected areas. He will also meet with senior level officials from the Israeli government to discuss the bilateral relationship.

INT Education and Interpretation Workshop, Indonesia: No change. A DOI-ITAP team, consisting of one NPS and two FWS experts, will travel to Jakarta, Indonesia, from January 4-19, to deliver education and interpretation training to counterparts, under the USAID funded Indonesia Terrestrial Protected Areas project. Activity is funded by USAID/Indonesia.

INT Roundtable Tribal Discussions: No change. Indian Affairs is in the early planning stages for a possible series of cross-border discussions between U.S. Tribes and Canadian/Mexican indigenous communities. Discussions will address violence against indigenous women, trafficking, and other issues that Tribes wish to discuss. These roundtable discussions will inform the ongoing annual trilateral working group meetings between the U.S., Canadian, and Mexican governments to address violence against indigenous women and girls. INT is supporting Indian Affairs to ensure coordination with State Department and the Canadian and Mexican governments.

INT Coordination of DOI Review of Description of Environmental Cooperation in North America: No change. At the request of USTR, INT is coordinating review within DOI of brief factual summaries of environmental cooperation and trade-related transboundary environmental issues among the three countries that are parties to the U.S.-

Mexico-Canada Agreement (USMCA), the successor agreement negotiated to the NAFTA. The summaries will be part of the informational materials accompanying the text of the USMCA when the Administration sends it to Congress.

INT Repatriation Ceremony with Embassy of Mexico: INT is working with NPS, DHS, State, Mexico's Foreign Affairs Ministry, and others to plan the repatriation of 500+ arrowheads and other artifacts that were illegally smuggled from Mexico into Big Bend National Park and confiscated there in April 2016. INT will be reaching out to the Scheduling Office to determine Secretary Zinke's potential availability to participate in the proposed repatriation ceremony with Mexico, likely to take place sometime early next year here in Washington.

AWARENESS

OIA Typhoon Yutu: OIA staff continue to reach out to various cabinet members of the CNMI government for updates. Based on information received from the Commonwealth Healthcare Corporation's CEO, the Tinian Health Center, and the Commonwealth Health Center (the only hospital in the CNMI) in Saipan are fully operational and satellite clinics have been closed. With FEMA and DOD taking the lead in the response and recovery effort, the Commonwealth Utilities Corporation reported that the northern half of Saipan that was not as impacted by the typhoon was fully operational. Significant progress has been made toward the areas severely impacted on the southern half of Saipan. As for Tinian, the utilities teams anticipate completion of their project in December. In addition, while the Saipan International Airport opened back up to commercial operations (power has been restored), it can only accommodate a limited closed commercial flights due to typhoon damages to the terminal buildings, so many tourism locations, including the Imperial Pacific Casino, have closed until more tourists can reach the island.

OIA Recent Congressional Action: The Senate Committee on Energy and Natural Resources approved *H.R. 4446* (Plaskett), a bill to extend the expiration date of the Virgin Islands Centennial Commission to September 30, 2019. Should the Senate consider and approve the legislation before adjournment, the bill would go to the President for his signature.
The House Committee on Natural Resources approved *H.R. 5025* (Radewagon), a bill to amend the Western and Central Pacific Fisheries Convention Implementation Act to limit the imposition of penalties against a person fishing on a United States flag fishing vessel in certain areas of the Pacific Ocean based on a report by an observer on such a vessel. Full House consideration is unknown at this time. Should the bill be considered and pass the House prior to adjournment, it would then go to the Senate for consideration.

OIA China Plan to Develop Western Samoan Port: It has been reported that China is negotiating to fund the redevelopment and expansion of the Asau Port, which already boasts a concrete wharf and is located next to an airstrip on Savai'i, the nation's largest island. Military analysts have warned that the port could lead to a land mass right through the heart of America's defenses in the South Pacific or threaten Australia's east-coast trade routes to the U.S.

OIA RMI High Score on Annual Financial Report: The financial health and accountability of the Republic of the Marshall Islands showed its best results (6.25 out of 10 in comparison to 3.48 in 2008) on record in FY2017, according to the annual Performeter report. This increase reflects improvements in key areas such as net position, inter-generational equity, short-term solvency, debt management, and carryovers. Two areas that remain a challenge are the condition of capital assets and the social security funding ratio. The Performeter is funded by OIA through Graduate School USA and is an analysis that uses financial indicators and ratios to assess the government's financial performance and sustainability.

INT Upcoming International Travel:

PETTY: Assistant Secretary for Water and Science Tim Petty will travel to Vancouver, Canada to participate in the DOS-led Columbia River Treaty negotiations from December 10-13.

REILLY: USGS Director Jim Reilly will travel to Antarctica in January.

Additional Known International Travel, Employees Departing December 2-8:

12/2/18 FWS	China	Migratory Birds Meetings	Michelle Haynes
12/2/18 USGS	France	Wildlife Disease Meeting	Jonathan Sleeman
12/2/18 USGS	Italy	Gas Data Processing Exchange	Peter Kelly
12/2/18 USGS	Japan	Critical Minerals Meeting	Graham Lederer
12/2/18 USBR	Oman	Desalination Cooperation	Saied Delagah
12/2/18 USGS	Philippines	Minerals Data Exchange	Ji Won Moon
12/2/18 USGS	Philippines	Minerals Data Exchange	Steven Textoris
12/3/18 USGS	Bahamas	Earth Sciences Exchange	Vic Heilweil
12/3/18 FWS	Gabon	Wildlife Law Enforcement	David Hubbard
12/3/18 USGS	Italy	Earthquake Modeling Meeting	Gari Mayberry
12/5/18 USGS	Mexico	Aquifer Water Quality Research	John Pohlman
12/5/18 FWS	Thailand	Wildlife Law Enforcement Training	Irene Jorata

12/5/18 FWS	Thailand	Wildlife Law Enforcement Training	Joseph Rousseau
12/6/18 FWS	China	Migratory Birds Meetings	Pete Probasco
12/6/18 FWS	China	Migratory Birds Meetings	Robert Kaler
12/6/18 USGS	Hong Kong	Atlantic Ocean Aerosol Research	Dale Griffin
12/7/18 USGS	Mexico	Mussel Taxonomy Research	Nathan Johnson
12/7/18 INT	Philippines	Marine Conservation Meeting	Peter Fricke
12/8/18 USGS	Argentina	Mineral Resource Research	Scott Hynek
12/8/18 USGS	Australia	Fisheries and Irrigation Exchange	Abigail Lynch
12/8/18 USGS	Singapore	Antimicrobial Research	Andrew Ramey
12/8/18 USGS	Zambia	Remote Sensing Analysis	Doug Howard

INT International Memoranda of Understanding and Documents Under Development for Signature:

-Australia: Letter of Intent on critical minerals (addressing existing MOU), in development. Requested by the Secretary and his counterpart Minister Canavan. INT is working with USGS and Australian counterparts to finalize language and specify additional cooperative activities to be undertaken on critical minerals. Australia is currently reviewing the latest draft.

-Israel: MOU to strengthen cooperation on biodiversity conservation, protected areas, and cultural and historical heritage, in development. Requested by Israeli government and recommended by U.S. Embassy Jerusalem, for signature by Secretary Zinke during a visit to Israel Jan 28-31, 2019. INT is coordinating review, translation, and clearance with relevant DOI, Israeli, and State Department counterparts.

-The Netherlands: MOU on offshore wind energy cooperation, in surname. Requested by BOEM and Dutch counterparts, for signature in conjunction with a potential visit to the U.S. by the Dutch Prime Minister early 2019. INT is supporting BOEM as needed.

-New Zealand: MOU on wildland fire cooperation, in development. Requested by DOI and USDA to update existing wildfire arrangement, and continue mutual assistance on wildfires as needed, for signature by the U.S. Ambassador to New Zealand in early 2019 by U.S. Embassy New Zealand. INT is coordinating with Office of Wildland Fire, as they work with New Zealand counterparts and the Departments of Agriculture and State.

-Norway: MOU on energy cooperation, in development. Requested by DOI Energy Counselor and Deputy Chief of Staff. INT is supporting BOEM as needed, and BOEM is working with Norwegian counterparts and Department of State. BOEM is reviewing recent Norwegian revisions.

-Vietnam: MOU to strengthen cooperation on law enforcement to combat wildlife trafficking, in development. Requested by FWS law enforcement, Department of State, and Vietnamese counterpart, for senior-level signature when the Vietnamese counterpart travels to Washington, DC, early 2019. INT is coordinating with FWS Office of Law Enforcement.

ASSISTANT SECRETARY FOR LAND AND MINERALS MANAGEMENT

Week Ahead Schedule of Meetings, Hearings, and Travel

ASLM Joe Balash will be attending an offsite meeting at NCTC on December 3-4 and in the office the rest of the week.

Principal Deputy Assistant Secretary Casey Hammond will be attending an offsite meeting at NCTC on December 3-4 and in the office the rest of the week.

Deputy Assistant Secretary Gary Lawkowski will be attending an offsite meeting at NCTC on December 3-4 and in the office the rest of the week.

BSEE Director Scott Angelle will be attending an offsite meeting at NCTC on December 3-4 and in the office the rest of the week.

BLM Deputy Director Brian Steed will be attending an offsite meeting at NCTC on December 3-4 and in the office the rest of the week.

Immediate Announcements and Actions (within the next 14 days)

Bureau of Land Management

NEW ITEMS

November 21-January 7. BLM-AK will be hosting public scoping meetings for an Integrated Activity Plan (IAP) with an associated Environmental Impact Statement (EIS) for the National Petroleum Reserve in Alaska (NPR-A). Meetings are currently scheduled for Anchorage, Nuiqsut, Atqasuk, Anaktuvuk Pass, Wainwright, Point Lay, Utqiagvik and Fairbanks. The Notice of Intent for the IAP/EIS published in the *Federal Register* on November 21. The NPR-A IAP/EIS will consider management of BLM-managed lands within the NPR-A totaling approximately 22.1 million acres of surface and subsurface lands and an additional 200,000 subsurface acres underlying Native Corporation-owned surface lands. If approved, this will supercede the 2013 IAP/EIS Record of Decision. (11/23/18)

December 3. BLM-AZ. The Hassayampa Field Office plans to approve a Mining and Reclamation Plan of Operations and Final Environmental Assessment (EA) for a mine on approximately 88 acres of public lands near Skull Valley, Arizona. This mine, proposed by the Kirkland Mining Co., LLC, will produce pozzolan which is used to make more durable concrete. Demand for high-quality pozzolan has grown in recent years as coal burning and supplies of fly ash, also used in making concrete, have dropped. Based on the analysis in the Final EA, the Field Office has determined that the project would not cause significant impacts and an EIS is not required. The BLM is planning to sign a Finding of No Significant Impact and issue a Decision Record on December 3. Over the course of analyzing the mining proposal over the past year and in response to public comments, the BLM has proposed changes to KMC's Mining and Reclamation Plan of Operations that have been incorporated. During the 60-day comment period, 110 categories of comments were received. (11/23/18)

December 19. BLM-MT/DK. The Butte Field Office has completed a preliminary environmental assessment on the donation of private land near Toston Dam along the Missouri River in Broadwater County, Montana. Montana's Outdoor Legacy Foundation has offered to donate 258 acres of private land, in three parcels, to the BLM. Acquisition of these lands would connect with two larger portions of nearby BLM lands thereby minimizing ownership fragmentation. The existing BLM lands adjacent the donation parcels total 988 acres. The donation would result in a single 1,246-acre block of BLM land. The proposed acquisition would help meet the Secretary of the Interior's goal of Serving America by providing access to hunting, fishing, and other recreational opportunities. The property would be managed in a manner similar to adjacent BLM lands for multiple resource values such as dispersed recreation, important wildlife habitat, and other multiple-use opportunities. The Butte Field Office will issue a news release sometime in the next week, initiating a 30-day public comment period that will end around December 19. (11/23/18)

UPDATED ITEMS

December 5 and 6. BLM-NM will hold an oil and gas lease sale for 114 nominated parcels administered by BLM-NM throughout New Mexico, Oklahoma and Texas totaling 89,320 acres. The parcels are within the jurisdictions of the Rio Puerco, Roswell, Carlsbad, Oklahoma and Farmington Field Offices. (11/16/18)

Early December. BLM-WY plans to release the Final EIS for the Riley Ridge to Natrona Pipeline project (RRNP), pending approval by the DOI Internal Review Team. The RRNP is a FAST-41 project that consists of three right-of-way applications: two for a 240-mile long underground pipeline and one for a 230-kV transmission line. The project also includes proposals for two hydrogen sulfide injection wells and other project components like roads, valves and flow lines. WO/DOI canceled the original October 26 briefing and has tentatively scheduled a new briefing for November 30. (10/16/18)

Early December. BLM-ID. The BLM expects to publish the the Draft Environmental Impact Statement (EIS) and Notice of Availability for the proposed Caldwell Canyon Mine by early December pending the outcome of the NEPA Review Team briefing on November 20. (8/10/18)

Early December. BLM-CO. The Uncompahgre Field Office has prepared the Notice of Proposed Supplementary Rules for Travel Management on Public Lands in Montrose, Delta, San Miguel, and Ouray counties. (8/21/18) DTS2294

December 7. BLM-MT/DK. The anticipated publication date in the Federal Register of a Notice of Availability for the Lewistown Draft Resource Management Plan (RMP) and Draft Environmental Impact Statement (EIS) has been set. The Draft RMP/EIS will address management of 651,200 surface acres and 1,196,800 acres of federal mineral interests in central Montana for the next 10-15 years. Key issues include travel management, access, oil and gas leasing, and timber sales. (6/15/18) DTS 2231 / FRN at DTS 2233

December 7. BLM-MT/DK. The anticipated publication date in the Federal Register of a Notice of Availability for the Missoula Draft Resource Management Plan (RMP) and Draft Environmental Impact Statement (EIS) has been set. The Draft RMP/EIS will address management of 163,000 surface acres and 268,000 acres of federal mineral interests in northwestern Montana for the next 10-15 years. Key issues raised in public meetings conducted by the Missoula Field Office include recreation along the popular Blackfoot River, forestry management, hunting, and access to public lands. The RMP will incorporate regional fish and wildlife conservation strategies for species such as the grizzly bear and Canada lynx, as well as new information related to recreation uses, land acquisitions, and forest health. (6/15/18) DTS 2230/FRN at DTS 2232

December 14. BLM-ID plans to issue final decisions for the Rockville Grazing Allotment that address protests received on the proposed decisions. BLM-ID State Office and Boise District Office staff briefed the BLM Director on these decisions on November 7. (3/23/18)

December 14. BLM-ID. BLM-Idaho expects to issue 22 Curlew Grazing Permit Renewal decisions after completion of the Environmental Assessment, Determination, and Finding of No Significant Impact. (7/27/18)

ONGOING ITEMS

November to Early December. BLM-CO. The White River Field Office will release a preliminary Environmental Assessment (EA) of a trailhead expansion proposal from the U.S. Forest Service for the White Creek Trail, a popular hiking and horseback trail, particularly for hunters. The majority of the trail is on National Forest lands, but the beginning of the trail crosses a 40-acre parcel of BLM land. The Forest Service has applied for a right-of-way to expand the parking area pull-out to accommodate more vehicles and horse trailers and to address current safety concerns. At present, visitors park their vehicles along a county road. (11/9/18)

November to Early December. BLM-CO. The Little Snake Field Office is hosting a public hearing to receive comments on the Environmental Assessment (EA) for Peabody Twentymile Coal LLC's Coal Lease-by-Application, fair market value and maximum economic recovery. The notice for the hearing and the 30-day public comment period

published in the Federal Register on Nov. 6. The public comment period will close December 6, 2018. (5/29/18)

November to Early December BLM-ES will hold a sealed-bid competitive coal lease sale at the Southeastern States District Office in Flowood, Mississippi. A 160-acre Federal coal tract will be offered in Jefferson County, Alabama, adjacent to the existing Narley Mine No. 3. This Federal coal is being offered for sale after careful review by the BLM-Eastern States (BLM-ES) in response to a coal Lease by Application (ALES-55199) filed by the Best Coal Company. The BLM completed an Environmental Assessment for this coal lease sale following a public hearing on November 20, 2014, and issued a Decision Record and a Finding of No Significant Impact on February 16, 2015. This lease was offered for sale April 14, 2016, however, bids received at that time did not meet the Fair Market Value. As the Federal coal vein is accessible in a currently operating mine, jobs may be lost if it cannot be developed.

November to Early December. The BLM-CA State Office submitted a draft Environmental Impact Statement (EIS) Developmental Briefing Scheduling Request on November 5 to the Department Review Team to discuss the summary of public comments received on the Bakersfield Field Office's Notice of Intent to prepare a supplemental EIS and potential Resource Management Plan amendment on the potential impacts of hydraulic fracturing during new oil and gas production. This planning effort is in response to a 2017 settlement agreement. The briefing request is in preparation for public release of the scoping report in early December. (10/30/18)

December. BLM-AK anticipates releasing the Coastal Plain Oil and Gas Leasing Program Draft Environmental Impact Statement (EIS) to the public. Publication of the Notice of Availability in the Federal Register begins a 45-day public comment period. BLM-Alaska plans to hold public meetings on the Draft EIS in Anchorage, Arctic Village, Fairbanks, Fort Yukon, Kaktovik, Utqiaġvik, Venetie, and Washington, D.C. (9/20/18)

Early December. BLM-CO. The Gunnison Field Office has prepared a Notice of Realty Action on its proposal to convey approximately 43.09 acres of public land under the Recreation and Public Purposes Act to the Town of Lake City. The land is located about one mile south of Lake City. The Lake City Ski Hill community ski area would continue to operate under the conveyance. The field office is planning for a December publication in the Federal Register (pending WO and DOI approval).(4/24/18) DTS2329

Early December. BLM-ID. The Four Rivers Field Office is working with the City of Caldwell regarding the Mallard Park Recreation and Public Purposes (R&PP) patent. The City of Caldwell currently holds an R&PP lease with the BLM and is seeking patent of those lands, which total 29.57 acres. Developments constructed since the lease was instituted include sidewalks, parking lots, vault toilets, multiple gazebos, sports courts, an amphitheater and landscaping. The park has widespread support. This project is expected to be completed as soon as the environmental site assessment is completed. The patent will be issued to the City of Caldwell in December. (10/16/18)

Early December. BLM-OR/WA. The Burns District plans to begin conducting research to evaluate the safety, complication rate, and feasibility of ovariectomy via colpotomy (spay) on wild horse mares at Oregon's Wild Horse Corral Facility. Since the release of the draft Environmental Assessment (EA) for this research (June 29, 2018), very strong activist campaign has arisen in opposition. The Cloud Foundation, American Wild Horse Campaign and Animal Welfare Institute jointly filed on September 21, 2018 for Injunctive Relief in the District of Oregon against the spay research. The complaint is specific to the spay procedures and does not involve the pending gathering of wild horses (expected to begin October 2) from the Warm Springs Herd Management Area, which was also part of the EA. The complaint focuses heavily on alleged violations of First Amendment rights to observe and document the research, even though in-person observation from less than fifteen feet away is allowed, along with photography/filming. All public observation opportunities were developed with the safety of the horses, handlers, veterinarians, and public in mind. (9/25/18)

Early December. BLM-ES. The BLM-Eastern States anticipates publishing a Federal Register notice for the solicitation of bids for a competitive 10-year renewable lease of the Equestrian Facility at the Meadowood Special Recreation Management Area (SRMA) near Lorton, Virginia. (4/20/18)

Early December. BLM-ES expects to publish in the Federal Register a Public Land Order for the U.S. Coast Guard's relinquishment of Lot 22 of the Jupiter Inlet Lighthouse Outstanding Natural Area (ONA) in Florida. (4/11/18)

Early December. BLM-ES. The BLM-Eastern States proposes transfer by quiet title deed a former railroad right-of-way (ROW) to the Village of Forsyth in Macon County, Illinois. The transfer was requested by the Village of Forsyth for use as a recreational trail, under authority of the National Trails System Act. The ROW is 200 feet wide and totals approximately 18 acres. This action has been reviewed by the Pittsburgh Field Solicitor's Office and the Washington Solicitor's Office. The transfer is supported by Congressman Rodney Davis (R-13-IL). (4/20/18)

Early December. BLM-NV. The Winnemucca District anticipates releasing the Notice of Intent to prepare an Environmental Impact Statement (EIS) for a proposed expansion of the Coeur Rochester and Packard Mines in the Federal Register. The silver mine currently employs about 302 people and is located approximately 26 miles northeast of Lovelock, in Pershing County, Nevada. (10/30/18)

Early December. BLM-WY expects to publish in the Federal Register the Notice of Availability for the Draft Environmental Impact Statement (EIS) for the proposed Moneta Divide Oil and Gas Development Project. Publication will begin a 90-day public comment period. Located near Lysite, Wyoming, the proposed project could recover up to 18 trillion cubic feet of natural gas and 254 million barrels of oil over its estimated 65-year lifespan and could support approximately 6,400 jobs during its 15-year development phase. The Draft EIS analyzes: amendments to the Casper Resource Management Plan, including establishment of a Production Area and increased protections for the Cedar Ridge Traditional Cultural Property and potential impacts to approximately 1.2 million acres of Greater sage-grouse

Priority Habitat Management Areas. The Review Team briefing for this project is scheduled for November 30. (6/22/18)

Early December. BLM-WY plans to release the Final EIS for the Riley Ridge to Natrona Pipeline project (RRNP), pending approval by the DOI Internal Review Team. The RRNP is a FAST-41 project that consists of three right-of-way applications: two for a 240-mile long underground pipeline and one for a 230-kV transmission line. The project also includes proposals for two hydrogen sulfide injection wells and other project components like roads, valves and flow lines. WO/DOI canceled the original October 26 briefing and has tentatively scheduled a new briefing for November 30. (10/19/18)

Early December. BLM-CO is preparing a Notice of Proposed Withdrawal and Transfer of Jurisdiction of two isolated BLM-managed parcels totaling 120 acres in Mesa County to the National Park Service's Colorado National Monument. The parcels are adjacent to the National Monument and are not contiguous with other BLM lands. The Colorado National Monument's 2005 General Management Plan identified the two parcels as important for improving public access to popular trailheads. The notice would segregate the lands from location and entry under the mining laws for two years while studies are completed to recommend a 50-year withdrawal and transfer of jurisdiction. The segregation would not close the lands to mineral or geothermal laws, or mineral material laws. BLM-CO is planning for a December 2018 publication in the Federal Register(pending WO and DOI approval). (7/20/18)

Early December. BLM-ID. The Burley Field Office will issue a decision on the proposed modification of an existing mining Plan of Operations submitted by Sawtooth Stone LLC. The proposed modification would expand current operations by 33 acres to facilitate the quarrying of "Oakley Stone," a locatable mineral that has been determined to be an uncommon variety of micaceous quartzite. A 30-day scoping period for the plan of operations began in late October and a decision anticipated early December. (10/16/18)

Early December. BLM-NV will be requesting to brief the Review Team on the Draft EIS Development for the Yellow Pine Solar Project. In 2016, Yellow Pine Solar, LLC requested an amended right-of-way authorization for the construction, operation, maintenance, and decommissioning of a 250-megawatt photovoltaic power plant.

Early December. BLM-CO. BLM Colorado will close on its purchase of Eagle County Open Space's Two Bridges site (16.98 acres) along the Upper Colorado River for $500,000 through the Land and Water Conservation Fund. The appraised fair market value of the property (located in the Colorado River Valley Field Office) is $850,000. The acquisition supports perpetual river access throughout the Upper Colorado River Special Recreation Management Area for fishing and other water-related recreation. The SRMA is heavily used throughout the year. (10/9/18)

Early December. BLM-CO will close on its purchase of Eagle County Open Space's State Bridge site (11.5 acres) along the Upper Colorado River for $1 million through the Land and

Water Conservation Fund. The appraised fair market value of the property is $1,425,000. The acquisition supports perpetual river access throughout the Upper Colorado River Special Recreation Management Area for fishing and other water-related recreation. The SRMA is heavily used throughout the year. (10/9/18)

Early December. BLM-ID. The Boise District anticipates submitting to the DOI Assistant Secretary for Land and Minerals Management a new Record of Decision for the Final Environmental Impact Statement (EIS) for the Bruneau-Owyhee Sage-Grouse Habitat (BOSH) Project. The Final EIS, which was developed in cooperation with state and federal agencies, analyzes the removal of encroaching Western juniper on 726,000 acres of sagebrush steppe in Owyhee County. This project builds on proactive land management policies and practices to conserve the region's remaining sagebrush habitat, which supports significant economic activity such as ranching and recreation, as well as abundant wildlife including mule deer, elk, pronghorn antelope and golden eagles. (2/21/18)

December 3. BLM-UT. The Salt Lake Field Office plans to issue a Decision Record for the Onaqui Mountain Herd Management Area (HMA) Population Control Environmental Assessment. The BLM proposes to use PZP fertility control, gelding (neutering), and periodic removal of horses over a 10-year period to maintain the appropriate management level (AML). The HMA has a current population of 455 horses, which is projected to reach 500 with the 2018 foal crop. The BLM plans to gather and remove approximately 379 horses to reach an AML of 121. The Onaqui Mountain HMA is located in Tooele County, Utah, approximately one hour from Salt Lake City and the herd is popular with locals. The gather will most likely be controversial with horse advocacy groups, range organizations, and the general public due to herd popularity and the HMA's close proximity to Salt Lake City. (7/6/18)

December 4. BLM-AZ. The Hassayampa Field Office will hold a public meeting regarding a proposed Recreation and Public Purposes (R&PP) Act lease of a 1,046-acre parcel of public land in the Vulture Mountains for recreation development by Maricopa County. Under the proposal, the Maricopa County Parks and Recreation Department would develop a variety of recreation facilities at the site, including a visitors center, picnic tables and shelters, archery range, equestrian facilities, nature playground, restrooms with showers, campgrounds and interpretive kiosks. Portions of the Vulture Mine Road would also be improved and realigned by the Maricopa County Department of Transportation in order to improve access to the area. BLM has prepared an environmental assessment (EA). The EA provides analysis of the direct, indirect and cumulative effects of the R&PP lease and the right-of-way for the road improvements. The meeting will be held in Wickenburg, Ariz., and include presentations by the BLM and Maricopa County. A 30-day public review period will also run from Nov. 20 until Dec. 19. (11/9/18)

December 5 and 6. BLM-NM will hold an oil and gas lease sale for 114 nominated parcels administered by BLM-NM throughout New Mexico, Oklahoma and Texas totaling 89,320 acres. The parcels are within the jurisdictions of the Rio Puerco, Roswell, Carlsbad, Oklahoma and Farmington Field Offices. (11/16/18)

December 6. BLM-ES will participate in a second conference call with DoD and other parties who have an interest in energy development, and the gas storage agreements currently in place for Ft. Knox. An initial conference call was held on October 18, 2018, with personnel from the Office of the Deputy Assistant Secretary of the Army for Energy and Sustainability, Fort Knox, and BLM Southeastern States District Office. Discussion was centered on data sharing for 26 legacy gas wells. One of the topics for the December 6 call will be the development of an Implementation Plan for the newly enacted legislation addressing oil and gas development. The BLM is working in coordination with Fort Knox, Louisiana Gas & Electric, and the state of Kentucky to implement the new legislation and facilitate the successful execution of each entity's mission, including DoD's goal to achieve energy resilience at Fort Knox. (10/26/18)

December 8-9. BLM-NV. The Rage at the River Off-Highway Vehicle Race will take place on private and public lands in southern Nevada, on existing routes. The event is expected to attract 300 participants and approximately 10,000 spectators. This event, along with the Laughlin Desert Classic Off-Road Race held in October, are anticipated to bring approximately $2 million to the local Laughlin economy through lodging, restaurants and other local business. (10/5/18)

December 10. BLM-ID. On August 6 and 7, the Bruneau Field Office issued nine proposed grazing decisions and the environmental assessment (EA) renewing grazing permits in the Battle Creek, East Castle Creek, and Owens grazing allotments in Owyhee County for a term of 10 years; release of the proposed decisions and EA started a 15-day public protest period. The EA was also made available in June and July for public review and comment. Protest points have been addressed; final decisions will be signed on December 10. The final decisions include a 40 percent reduction from average actual use until necessary range improvement projects are completed for making progress toward meeting Idaho Standards for Rangeland Health. Once range improvement projects are complete, AUMs authorized will be the same as currently permitted use for five permits, a 55 percent increase from average actual use for Simplot, 30 percent increase from actual use for two permittees, and a 70 percent increase from actual use for one permittee. Greater flexibility to graze areas with cheatgrass and 15-days flexibility to begin grazing earlier in the season or end 15-days later will also take effect after range improvement projects are complete. BLM-ID State Office and Boise District Office staff briefed the BLM Director on these decisions on November 7. (5/4/18)

December 10. BLM-UT. The Salt Lake Field Office, in coordination with the Utah State Office, plans to submit to the BLM Washington Office a recommendation to extend a 20-year withdrawal of 2,714.22 acres of public land from location and entry under the U.S. mining laws to protect aspects of the Central Utah Project. The existing withdrawal is located in the Uinta Wasatch Cache National Forest, in Utah County, and will expire in December 2019. The Central Utah Project is administered by the Secretary of the Interior through the Office of the Assistant Secretary for Water and Science. The project's Diamond Fork System consists of pipelines, tunnels, power plants, transmission lines, access roads, and other related structures that convey water from Strawberry Reservoir to the Wasatch Front. The

Utah County Commission and the Governor's Office (via the Public Lands Policy Coordination Office) have expressed support for the withdrawal extension. (5/18/18)

December 11. BLM-WY plans to offer three parcels totaling 720 acres in its quarterly competitive oil and gas lease sale. The BLM originally planned to offer 581 parcels in this sale, but delayed leasing 579 parcels until February to comply with a District Court order mandating longer public input periods for lease sales in sage-grouse habitat. (11/9/18)

December 11. BLM-MT/DK will offer 23 nominated parcels, covering 12,517 acres at the December 2018 oil and gas lease sale. The preliminary parcel worksheet was posted on July 6 for the 15-day scoping period. Parcels impacted (76 lease parcels covering 54,207 acres) by the Preliminary Injunction in Western Watersheds Project v. Zinke (D. Idaho September 21, 2018) were moved to the March 2019 lease sale. A total of 20 parcels (10,586) were moved from the December 2018 sale. The updated Environmental Assessment and final sale notice was posted October 23 for a 10-day protest period. Two protests were received. The 23 parcels/12,517 acres to be leased are located in the Butte Field Office (Lewis and Clark County), Havre Field Office (Blaine, Glacier and Toole counties), and the Miles City Field Office (Big Horn, Dawson and Sheridan counties). (10/16/18)

December 11. BLM-WY is preparing for the December 11 Jonah Interagency Office (JIO) and Pinedale Anticline Project Office (PAPO) meeting in Cheyenne, Wyoming. Project office staff set February 1, 2019, as the deadline to submit 2019 project funding applications. Project application information and materials are available on the JIO/PAPO website (https://www.wy.blm.gov/jio-papo/whatsgoingon.htm). The High Desert District Office and Pinedale Field Office will issue press releases to explain application submission guidelines and solicit project applications. The JIO/PAPO offices were created through different Records of Decision and provide overall management of monitoring and mitigation activities focusing on pronghorn, Greater Sage-grouse and mule deer in the project areas. The offices are a joint partnership between the BLM and the State of Wyoming Departments of Agriculture, Environmental Quality and Game and Fish. (11/2/18)

December 12. BLM-AK is scheduled to hold an oil and gas lease sale for the National Petroleum Reserve in Alaska (NPR-A). The BLM received nominations for 254 available tracts (approximately 2.9 million acres) for lease. Currently, there are 196 authorized leases in the NPR-A covering 1,384,352 acres. This lease sale is the 14th since 1999 and will be the second to occur via video livestream. The Federal Register package with the Notice of the Sale published November 9. (10/5/18) DTS 2370

December 12-13. BLM-AK. The Western Arctic Caribou Herd Working Group invited BLM-Alaska to present an update on the Ambler Road Environmental Impact Statement (EIS) at the 2018 meeting in Anchorage. On June 18, 2018, the Working Group submitted a letter to Central Yukon Field Manager Tim LaMarr requesting that the Ambler Road EIS not be subject to the NEPA page and time limits imposed by Executive Order 13807 and Secretarial Order 3355. The group asked that the BLM also address its concerns at the December meeting. The group includes subsistence users, Alaskan hunters, reindeer herders, hunting guides, transporters, and conservationists. The Ambler Mining District Industrial

Access Project is a proposal from the Alaska Industrial Development and Export Authority (a state economic development agency) to build a 211-mile long gravel industrial road connecting the Ambler Mining District with the Dalton Highway. The Ambler Road project will cross through the Western Arctic Caribou Herd range. (10/5/18)

December 13. BLM-CO will hold its quarterly oil and gas lease sale. The BLM is offering 23 parcels totaling approximately 8,347 acres in the Colorado River Valley, Grand Junction, Kremmling, Little Snake, Royal Gorge and White River field offices. BLM Colorado submitted a memo on October 2, 2018, to move parcels in Greater Sage-Grouse, big game habitat and parcels in the North Fork Valley to a later sale. BLM Colorado is assessing the October 18, U.S. District Court of Colorado opinion on the Colorado River Valley Field Office Resource Management Plan, and its potential impacts on the field office's parcels for the upcoming sale. The sale's protest period closed Nov. 5. (11/9/18)

December 10-13. BLM-NV. The Navy will host public meetings to discuss land withdrawals associated with the Fallon Naval Air Station expansion. The meetings will be held at the following locations: Hawthorne and Gabbs on December 10; Austin and Eureka on December 11; Fallon on December 12; Lovelock and Reno on December 13. These public meetings are pursuant to Public Land Order 7873, published in the Federal Register August 31, 2018. (11/2/18) DTS 2127

December 13. BLM-ES will offer 18 parcels totaling 3,195.12 acres at a competitive online oil and gas lease sale. Eight parcels of public domain minerals underlying private surface are in Stone and Cleburne Counties, Arkansas; one privately owned surface parcel overlying public domain minerals is in Muskegon County, Michigan; seven parcels are within the Manistee National Forest, Muskegon County, Michigan; and two parcels are within the Wayne National Forest, Monroe County, Ohio. The sale notice was posted to ePlanning following internal review October 26. The 10-day protest period ended November 5. The Center for Biological Diversity filed a timely protest for the two parcels in the Wayne National Forest. BLM-ES is reviewing and preparing the draft response for SOL review. (10/19/18)

December 13. BLM-WY. The 30-day comment period ends for BLM-WY's March 2019 oil and gas lease sale. The BLM proposes to lease 144 parcels totaling about 158,048 acres. The parcels are located in every BLM-WY field office except the Cody Field Office. (11/9/18)

December 14. BLM-ID. The Bruneau Field Office anticipates issuing two proposed grazing decisions to renew grazing permits, restore riparian areas, protect cultural resources, and incorporate range improvement projects across 187,537 acres of BLM-administered lands in the Big Springs Allotment. The lands affected lie entirely within a Greater Sage-Grouse Priority Habitat Management Area and contain Wilderness Areas and Wild and Scenic River segments. The Environmental Assessment (EA) was released on August 30, 2017, for public review, and the field manager has been meeting with permittees, state and federal agencies, and other interested publics to address comments on the EA before issuing any decisions. There is no anticipated reduction in Animal Unit Months as a result of the forthcoming

decisions. Three environmental groups (Wilderness Watch, Western Watersheds Project, and WildLands Defense) are expected to protest and appeal the decisions. (2/7/18)

December 14. BLM-ID plans to issue final decisions for the Rockville Grazing Allotment that address protests received on the proposed decisions. The Owyhee Field Office finalized its assessment and evaluation of Idaho's Standards for Rangeland Health and Guidelines for Livestock Grazing Management for the Rockville Allotment prior to the public scoping period conducted May 14 – June 11. The Rockville Allotment is part of the Battle Creek litigation in U.S. District Court of Idaho. While controversy is expected on all permit renewals, this one will be no more than usual for Owyhee County. Some standards are not being met. Proposed decisions and the Environmental Assessment (EA) were released on August 20, which was followed by a 15-day protest period. The acting field manager has met with permittees, state agencies, and other interested publics to address comments on the EA and protests on the proposed decisions. The final decisions will include a 22% reduction in Animal Unit Months (AUMs). These AUMs had been in voluntary non-use or had been put into suspension under the previous permit until rangeland health improved. As the allotment is still not making progress toward meeting rangeland health standards, those 486 AUMs will be eliminated under the new permit. The new permitted AUM level will still be set higher than the permittees' highest actual use over the last decade. Thus, AUMs will only be reduced as compared to their current permit, not as compared to their actual use. BLM-ID State Office and Boise District Office staff briefed the BLM Director on these decisions on November 7. (3/23/18)

December 14. BLM-CO. The 30-day public comment period for the environmental analyses for BLM-CO's March 2019 oil and gas lease sale will close. BLM is considering offering 26 parcels totaling approximately 14,052 acres in the Colorado River Valley, Grand Junction, Kremmling, Little Snake, Royal Gorge and White River field offices. (11/9/18)
Mid-December. BLM-NM. The Las Cruces District Office plans to publish the Final Environmental Impact Statement for the Copper Flat Copper Mining Project. The New Mexico Copper Corporation submitted a proposed mining plan of operations (MPO) that would re-establish the Copper Flat Copper Mine, a poly-metallic mine and processing facility near Hillsboro, N.M., that would produce copper, gold, silver, and molybdenum. If approved, the project is expected to provide 170-270 jobs over the 12-to-16-year life of the mine. The proposed MPO is based on the plan of development the Quintana Mineral Corporation used in its 1982 Copper Flat mining operation. The MPO includes upgrades and modifications based on current engineering designs and regulations and was intentionally developed to re-use the existing foundations, production wells, and water pipeline that were used by the Quintana operation. (5/25/18)

Mid-December. BLM plans to publish Final Environmental Impact Statements (EISs) and Proposed Plan Amendments for the seven states associated with Greater Sage-Grouse / sagebrush conservation plans adopted in 2015 (CA, CO, ID, NV, OR, UT, and WY). The target publication date for these documents and the associated Notices of Availability may need to be adjusted to allow state government partners and DOI time to develop more specific language about the process for applying compensatory mitigation. (10/12/18)

Mid-December. BLM-CA. The northwest California field offices will terminate work on the

Northwest California Integrated Resource Management Plan due to the changed conditions following the 229,000-acre Carr Fire. The field offices must now focus on recovery work associated with the fire; the shift in focus precludes the offices' ability to complete the plan and associated Environmental Impact Statement within the initially mandated time frame. The BLM launched the planning effort in November 2016 to develop a new Resource Management Plan covering public lands managed by the Redding and Arcata Field Offices. A new landscape-level plan would replace the existing RMPs that date to 1993 and 1997. The State Office will submit a Federal Register Notice on the termination once it is ready for Washington Office review. (8/21/18)

Mid-December. BLM-NV. The Battle Mountain District, Tonopah Field Office will publish the Draft Environmental Impact Statement (EIS) for the Gemfield Mine Project.

December 20. BLM-ID. The Bruneau Field Office anticipates issuing two proposed grazing decisions to renew grazing permits, restore riparian areas, protect cultural resources, and incorporate range improvement projects across 187,537 acres of BLM-administered lands in the Big Springs Allotment. The lands affected lie entirely within a Greater Sage-Grouse Priority Habitat Management Area and contain Wilderness Areas and Wild and Scenic River segments. The Environmental Assessment (EA) was released on August 30, 2017, for public review, and the field manager has been meeting with permittees, state and federal agencies, and other interested publics to address comments on the EA before issuing any decisions. There is no anticipated reduction in Animal Unit Months as a result of the forthcoming decisions. Three environmental groups (Wilderness Watch, Western Watersheds Project, and WildLands Defense) are expected to protest and appeal the decisions. (2/7/18)

Late December. BLM-CA. The Ridgecrest Field Office is preparing a Draft Supplemental Environmental Impact Statement (SEIS) for the proposed Haiwee Geothermal Leasing Project, which analyzes proposed leasing of BLM-managed lands for geothermal exploration, development, and utilization in the Haiwee Geothermal Leasing Area in Inyo County. The Draft SEIS assumes two 30MW plants operating for 30 years each. It further approximates the creation of 250 temporary and 65 permanent jobs. BLM has received three pending geothermal lease applications for public lands within the proposed leasing area. (7/27/18)

Late December. BLM-CO. The Gunnison Field Office has prepared a Notice of Realty Action on its proposal to convey approximately 43.09 acres of public land under the Recreation and Public Purposes Act to the Town of Lake City. The land is located about one mile south of Lake City. The Lake City Ski Hill community ski area would continue to operate under the conveyance. The field office is planning for publication in the Federal Register (pending WO and DOI approval) in late December. The Federal Register Notice package is currently under review with the BLM Director's Office. (4/24/18) DTS 2329

Late December. BLM-CO. The Kremmling Field Office will release a Draft Recreation Area Management Plan (RAMP) for the Colorado River between Parshall and State Bridge for a 30-day public review and comment period. The RAMP addresses alternatives to better manage increasing use in the area, which sees more than 90,000 float-boaters and anglers each season. Alternatives include adding unlimited day-use permits, expanding a developed

campground and designating river campsites. (3/13/18)

Late December. BLM-ES will renew mineral leases NMES 01352 and 01353 by posting an Environmental Assessment/FONSI/Decision. Similarly, BLM-ES proposes to process 18 prospecting permit extension requests with the approval of ASLM, and after preparing DNA documents tiered to the Forest Service 2012 Environmental Impact Statement. (10/26/18)

Late December. BLM-NV. The Battle Mountain District, Mount Lewis Field Office will publish the Supplemental Environmental Impact Statement (EIS) for the Eureka Moly-Mount Hope Project. On December 28, 2016, the United States Court of Appeals for the Ninth Circuit partially reversed and vacated BLM's decision with respect to certain aspects of the agency's air quality and cumulative air impacts analysis. The court also remanded to the BLM to clarify the status of any public water reserves (PWR). The Supplemental EIS will provide updated information and discussion regarding certain air quality data and analysis used in the original EIS, and will provide clarifying language regarding PWRs potentially impacted by the project. The district is currently preparing briefing materials and will be sending up a briefing request in mid-November. (8/24/18)

Late December. BLM-NV. The Battle Mountain District, Tonopah Field Office will publish the Draft Environmental Impact Statement (EIS) for the Gemfield Mine Project. The proposed project is an open pit gold mine that would be located approximately one and a half miles north of Goldfield, Nevada, in Esmeralda County. The proposed project area contains approximately 660 acres of public lands managed by the field office and 414 acres of private lands for a total of 1,075 acres. The Gemfield Project is expected to provide 370 high-quality, high-paying jobs during construction (estimated to take one year) and to employ 150 workers during the 12-year mine life. While this project would not take place on any tribal lands, tribal coordination activities have been ongoing throughout the development of the EIS and government-to-government consultation will be conducted as requested by the tribes. To date, the tribes coordinated with include; Duckwater Shoshone, Death Valley Timbisha Shoshone and Yomba Shoshone tribes. Other issues identified include closure of a proposed cyanide heap leach pad and potential impacts to vegetation and wildlife due to relocation of a 2.5 mile section of U.S. Highway 95. Currently, the District plans to schedule a briefing with the Washington Office for the Gemfield Project on November 30, 2018. The briefing with the Executive Review Team would follow soon after sometime in early to mid-December. (8/24/18)

December 28. BLM-NM. The Carlsbad Field Office anticipates publishing the Notice of Availability (NOA) for its Proposed Final Resource Management Plan and Environmental Impact Statement. The Plan outlines the BLM's long-term landscape-level plans and goals for public lands in Lea, Chaves, and Eddy Counties. The planning area includes approximately 2.1 million acres of federal surface land and 3 million acres of BLM-managed mineral estate in Chaves, Eddy, and Lea Counties. (11/16/18)

December 31. BLM-MT/DK. The Dillon Field Office is proposing to acquire private lands for $1,025,000 within the Little Sheep Creek watershed. The 960-acre parcel is located in the Beaverhead Valley, about five miles southwest of Lima, Montana, and about 45 minutes

south of Dillon, Montana. It is bordered on three sides by land managed by the BLM and the Beaverhead-Deerlodge National Forest. The Rocky Mountain Elk Foundation now holds the property and will keep it open to public access until conveying it to the BLM, which could happen as early as November 20 but no later than December 31. The property features high-quality winter range habitat for as many as 700 elk and 450 mule deer. It also supports moose, antelope, black bear, wolverine, greater sage-grouse and other wildlife. Both West Fork Little Sheep Creek and Straight Creek cross the immediate landscape providing vital riparian habitat for fish and other aquatic species. The property also contains some cabins which the BLM hopes to turn into year-round rental opportunities for the public. The acquisition is not anticipated to be controversial. (10/23/18)

December 31. BLM-MT/DK. The Western Montana District is proposing to complete a fee purchase acquisition using approved Land and Water Conservation Fund funding in the amount of $675,000. The privately owned 307.57-acre parcel is located 23 miles south of Ennis, Montana. The parcel lies adjacent to BLM-administered lands in the Dillon Field Office within the Upper River Special Recreation Management Area along the Madison River. There would be increased access to 880 acres of BLM-managed lands, which would provide approximately 4.5 miles of additional access to the Madison River. Willing landowners would like to complete the transaction as soon as possible. Montana Fish, Wildlife & Parks and Madison County Commissioners support the acquisition. An appraisal, NEPA analysis, and Endangered Species Act work have been completed. No controversy is expected. (3/7/18)

Late December / Early January. BLM-WY. The Rock Springs Field Office will release the North Dutch John Well #1 EA, FONSI and DR. The proponent requested a hold on this analysis for several years to modify the proposal, but is now prepared to move forward. Public interest in the pending decision likely will be high because the proposed well is located in the Greater Little Mountain Area, a popular hunting and fishing destination. During the scoping process, more than 100 individuals attended a public meeting on the proposal. The proposed action includes drilling a single well, constructing a well pad, upgrading a two-track road and building an access road. The proponent has committed to several mitigation measures including moving the well ped location, applying timing restrictions for crucial mule deer winter range, installing erosion control devices, burying associated pipelines and managing weeds. The BLM determined the impacts to the area would be minimal due to the mitigation measures agreed on by the proponent. (10/23/18)

Early January. BLM-CA. The BLM has initiated a 60-day review and public comment period for the Notice of Availability of the Environmental Assessment and Draft Land Use Plan Amendment for the OMYA Direct Land Sale Project that closes on January 4. An open-house public meeting is scheduled for December 6 in Lucerne Valley to allow the public an opportunity to learn more about the proposed action. The proposed sale would allow the company to continue mining the high-calcium limestone deposits in the area through 2055; resolve past unauthorized mining operations; and meet OMYA's need for additional lands. This proposal would also be consistent with the Amended Mining and Reclamation Plan approved by the County of San Bernardino. Located near Lucerne Valley, OMYA's mining operation generates more than $800,000 per year in county taxes and provides jobs for

approximately 100 workers from the surrounding communities. (11/9/18)

Early January. BLM-CO. The Tres Rios Field Office will initiate public scoping for GCC Energy LLC's proposed King II Coal Mine Lease by Application (LBA). The proposed LBA includes approximately 3,200 acres north of the existing King II Coal Mine. The LBA would extend the mine life for 5-7 years, and would utilize existing surface facilities and transportation routes. The Office of Surface Mining Reclamation and Enforcement will be the BLM's joint lead on the EA. (10/26/18)

Early January. BLM-NV. The Mount Lewis Field Office will be issuing the Record of Decision (ROD) for the 3 Bars Ecosystem and Landscape Restoration Project—a programmatic Environmental Impact Statement (EIS) proposing to treat up to 127,000 acres of sagebrush steppe, riparian habitat, pinyon juniper woodland, and aspen groves within a 749,810-acre area in part of the field office. Proponent-driven mitigation for the Gold Bar Mine Plan may also utilize projects from the 3 Bars decision. The proponent will work with the BLM, NDOW, the Sagebrush Ecosystem Technical Team, and Eureka County to select specific treatment blocks within the treatment units. The Notice of Availability for the Final EIS was published October 18, 2016. (8/24/18)

Early January. BLM-NV. The Humboldt River Field Office will publish the Draft Environmental Impact Statement for the Marigold Mine Mackay Optimization Project. The proposal includes expanding an existing gold mine to combine existing open pits into three larger pits and extend mine life by up to 10 years, to 2037. Two new rights-of-way would also be issued to accommodate changing a portion of Buffalo Valley Road and an existing 120-kV power line belonging to NV Energy. The most significant potential impact of the project is expanding the pits below the water table, which will require dewatering operations. This mine is located in the Humboldt River Water Basin, which is over allocated and strongly impacted by numerous active mining operations, communities (cities and towns), agriculture, and other industries. Numerous groups have expressed interest and concern with this project especially related to the potential impacts to surface and groundwater due to proposed dewatering. These groups include farmers, ranchers, USGS, Humboldt County, Lander County, Pershing County, Great Basin Resource Watch, the Humboldt River Basin Water Authority, Lovelock Meadows Water District, Pershing County Water Conservation District, and communities along the Humboldt River including Battle Mountain, Winnemucca, Valmy, and Lovelock. Mining facilities operated by Newmont and Barrick within the Humboldt River Water Basin are also watching this EIS to determine how to proceed with their own activities. (11/2/18)

January 7. BLM-NV. The Carson City District plans to begin the Pine Nut Mountains Herd Management Area wild horse helicopter gather to remove up to 575 excess wild horses. The gather is necessary due to over-population the presence of Bi-state sage-grouse, public safety, and private lands issues. The gather is the approved 2018 National Gather Schedule dated May 25, 2018, but was pushed back into FY19 due to higher-priority emergency gathers. The appropriate management level for the area is 118-179, and the population as of March 2018 was estimated at 775 animals. (6/8/18)

January 10-18. BLM-NV. The Pahrump Field Office will hold a modified competitive sale for one parcel of public lands totaling 553 acres in Pahrump, Nevada. Sealed bids for the modified competitive sale will be accepted between January 10-17, 2019. Sealed bids will be opened in a public setting on January 18, 2019. After all of the sealed bids have been opened, the highest bidder will be declared. The designated bidder for the modified competitive sale will then have an opportunity to match the highest bid. (10/15/18)

Mid-January. BLM-NM. The Oklahoma Field Office is planning to publish a Notice of Availability announcing the release of a Draft Environmental Assessment (EA) for public comment regarding the Liberty 8 competitive coal lease. The lease sale consists of 460 acres to be mined by surface and/or underground techniques. The scoping period on the EA closed on September 8. (8/17/18)

Mid-January. BLM-NM. The Las Cruces District Office plans to publish the Draft Supplemental Environmental Impact Statement (SEIS) for the Tri-County Resource Management Plan (RMP). The purpose of the RMP is to consolidate, update, and establish appropriate goals, objectives, and management actions for the new Tri-County planning area in Doña Ana, Otero, and Sierra counties in south-central New Mexico. The RMP will address new issues and new policies regarding renewable energy siting, outdoor recreation management, special status species habitat, special designations, lands retention, and disposal on 2.3 million acres of BLM-managed lands and 500,000 acres of split-estate. The RMP addresses the revision of the 1986 White Sands RMP and amends the 1993 Mimbres RMP. A Draft Supplemental EIS was required by the courts to address oil and gas leasing. (7/20/18)

January 18. BLM-AZ. The Lower Sonoran Field Office plans to release a Final Environmental Impact Statement related to development of the proposed Sonoran Valley Parkway Project (SVPP) by the City of Goodyear in Maricopa County, Arizona. The City has applied to BLM for a 250-foot right-of-way (ROW) to construct, operate, and maintain a two- lane parkway in Rainbow Valley, Arizona. The proposed SVPP would originate on Rainbow Valley Road and Riggs Road at the southern end of Goodyear, and proceed southwest to intersect with State Route (SR) 238, in Mobile, Arizona. The proposed project area encompasses 475 acres of BLM-managed lands. A briefing will be scheduled with the NEPA Review Team for December 19. The SVPP has been identified on regional transportation plans to meet future traffic demand resulting from population growth in Rainbow Valley, southwest of Phoenix. This project provides the opportunity to create immediate and future jobs, help bolster the growing local economy, and reduce emergency service response times. The city has approximately 77,000 residents and is part of the Phoenix-metropolitan area, which has approximately 4.5 million residents. (4/4/18) DTS 1775

January 18. BLM-AZ. The Yuma Field Office plans to host a grand reopening event at Mittry Lake, a popular Colorado River-area fishing and boating recreation site that is cooperatively managed by the BLM, Bureau of Reclamation, and the Arizona Game and Fish Department. The event will showcase recent improvements on three acres located adjacent to the boat ramp. This area had previously been covered with invasive salt cedar and was inaccessible to the public. After the salt cedar burned in the Mittry Fire, the managing

agencies worked together with the local community on a shared conservation stewardship project to stabilize the soils and establish a parking area at the site, expanding public recreation access and preventing future regrowth of salt cedar. (11/16/18)

Late January. BLM-CO. The Royal Gorge Field Office plans to issue a final decision for the Arkansas Headwaters Recreation Area (AHRA) Management Plan. The Arkansas River is the most commercially rafted river in the United States and is a major economic driver for the region. The BLM manages the AHRA in partnership with Colorado Parks and Wildlife, which is also a signatory on the plan. The plan addresses river allocation, recreation facility development, and resource management along the entire 152-mile stretch. (8/17/18)
Late January. BLM-NM. The Rio Puerco Field Office plans to publish the Final Rio Puerco Resource Management Plan (RMP) and Environmental Impact Statement. The RMP would replace the current Rio Puerco RMP, which was approved in 1986. The revision would provide updated management decisions for a variety of uses and resources, including land-tenure adjustments, land-use authorizations, mineral resources, recreation, areas with special management designations, lands with wilderness characteristics, livestock grazing, transportation access, renewable energy, visual resources, wildland/urban interface, and others. The Draft RMP was published in July 2012 and received nearly 50,000 public comments. (7/20/18)

Late January. BLM-NM plans to publish the SunZia right-of-way (ROW) modification Environmental Assessment (EA). SunZia has requested several modifications to the power-line ROW approved in the 2015 SunZia Environmental Impact Statement (EIS). The modifications are mostly required to reroute the power-line route around areas where SunZia was unable to secure agreements on private land. An EA has been initiated to evaluate the requested modifications. Given the public controversy surrounding the original EIS, BLM anticipates that this EA will also be controversial. One main concern is impacts to a migratory bird area, which is where the proposed line crosses the Rio Grande River. At the river crossing, the transmission line may impact a variety of migratory birds and waterfowl, including listed species such as the yellow billed cuckoo and designated critical habitat for the Southwestern willow flycatcher. In addition, habitat for the Northern Aplomado falcon may be affected by the transmission line west of the Rio Grande. (8/10/18)

Bureau of Ocean Energy Management

UPDATED ITEMS

By early December, BOEM expects to submit the Final Rule updating its air quality regulations related to oil, gas, and sulfur operations on the OCS to OMB for interagency review. This Final Rule significantly decreases the regulatory burden on industry compared to the Proposed Rule, while still meeting BOEM's statutory responsibilities under the OCSLA. A narrative describing the reduction to costs as compared to the proposed rule (Reduction to Costs Narrative) and the rule text are currently with the Department for review. (8/2/18, DTS #2280 (Rule), DTS #2454 (Reduction to Costs Narrative))

By early December, BOEM expects to publish a Request for Competitive Interest for an area proposed to be used for a right-of-way (ROW) project called Atlantic Link. Clean Power Northeast Development, Inc. filed an application on May 31, 2017 (revised August 22, and September 26), for a ROW grant in support of a proposed project connecting onshore wind and hydro power in Canada to the Massachusetts market via a 350 mile HVDC submarine cable traversing the OCS. The notice is in surnaming with the Department. (DTS #1773)

ONGOING ITEMS

BOEM has prepared multiple Calls for Information and Nominations (Calls) for lease sales proposed for 2019 and 2020 in the 2019-2024 Draft Proposed Program. The GOM Multisale Call (DTS #2378) is in surnaming with ASLM and expected to publish in early December concurrently with the Notice of Intent to prepare an EIS. The Mid-Atlantic Call (DTS #2257), the South Atlantic Call (DTS #2258), the Southern California Call (DTS #2388), and the Chukchi Sea Call (DTS #2385) are currently being held pending direction on the National Program. (9/21/18)

By early December, BOEM expects to publish a Request for Competitive Interest for an area proposed to be used for a right-of-way (ROW) project from Anbaric Development Partners (ADP). The application is for the New York and New Jersey Ocean Grid, an HVDC submarine system approximately 185NM (213 statute miles) in length with up to nine offshore AC to DC collector/converter platforms, which would collect and distribute power generated from existing offshore wind leases to up to six terrestrial landings at locations from Long Island, New York to Cardiff, New Jersey. BOEM has qualified ADP and has posted the application to its website. The notice is in surnaming with the Department. (10/15/18, DTS #2208)

Bureau of Safety and Environmental Enforcement

ONGOING ITEMS

The Arctic Rule: BSEE and BOEM continue to make arrangements for the Tribal consultation meetings (targeted for **December 3 thru December 14**). On September 20, 2018, BSEE's and BOEM's Alaska Regional Directors signed the invitation letters, which were then mailed to the potentially affected tribes, ANCSA Corporations, and municipalities. A total of 27 letters were mailed to these entities. During the week of **October 29,** BSEE-AK and BOEM-AK continued their outreach to the tribes, corporations, and municipalities to confirm their interest in this rulemaking and agree on a time to meet. Aside from the Tribal consultation arrangements, the bureaus continue to have internal discussions regarding the key policy options and the data needs for the economic, environmental, and information collection analyses that will support the proposed regulations. Travel plans for the Director include flying into Fairbanks, Alaska Wednesday night, **December 5,** in order to participate in the Tanana Chiefs Conference on **December 6**. The Director will travel and overnight in Anchorage on the evening of **December 6.** The Director will meet with the Arctic Slope Regional Corporation, Doyon Limited, and the Cully Corporation on **December 7** in Anchorage.

Consideration of Pilot Program for ACT Program (Accelerating Compliance Together) Document was approved by the Deputy Secretary. BSEE is anticipating a **January 1, 2019** implementation for the pilot program. The rollout plan is under development by the Gulf of Mexico region and identifies the required program components and communication materials. BSEE Gulf of Mexico team will present at the Offshore Operators Committee meeting.

Office of Surface Mining Reclamation and Enforcement

UPDATED ITEMS

Illinois' Diversion of Abandoned Mined Land (AML) Funds: OSMRE was informed this week by Illinois program officials that the enactment of a new state law, Public Act 100-1107, authorizes the State Treasurer to divert monies from various trust funds for utilization and investment by the State. As we were informed and have confirmed, sometime during the month of October, the State of Illinois "statutorily transferred" $50 million out of the State's AML "Set-Aside" fund. These funds provided to the State for the purpose of treating acid and toxic drainage from abandoned mined lands is funded through AML grants issued by OSMRE. This is not the first time Illinois has similarly inappropriately diverted AML funds, having previously done so in 2005 and 2008. On both previous occasions, OSMRE informed the State that those diversions were considered an inappropriate diversion of federal funds from their intended use and the funds were returned. OSMRE staff is currently working on a draft letter for the Acting Director's signature to Illinois Governor Rauner seeking immediate return of the funds to their appropriate account.

Mason Coal (KY): The Kentucky Division of Mine Reclamation and Enforcement (KYDMR) informed OSMRE that on or about October 25, 2018, it became aware that Mason Coal was operating an underground coal mine and surface facility without a valid mining permit. The operation employs approximately 15-22 employees and estimated production is approximately 100,000 to 110,000 tons per year. Despite the KY requirements and KYDMR's reminders to the operator, Mason failed to renew its mining permit as required. Due to the permit not being renewed, KYDMR notified Mason that the permit had expired and that the company was required to immediately cease mining operations. On or about October 26, 2018, KYDMR received a Restraining Order (Civil Action No. 18-CI-00697; Floyd Circuit Court, Division No. I) enjoining KYDMR "from enforcing the Mine Inspection Report issued by Defendants on or about October 25, 2018, or taking any other action to prevent Plaintiff from continuing its mining operations on the site permitted under surface coal mining and reclamation operation Permit No. 836-5625." KYDMR conducted a follow-up inspection on October 29, 2018, and discovered that the Company was actively mining on an invalid permit. KYDMR informed OSMRE that, due to the court order, it had no other enforcement options and requested technical assistance in determining how to prohibit Mason from illegally conducting surface mining activities without a valid surface mining permit. Upon notification, OSMRE reviewed the matter, engaged the Office of the Solicitor and concluded that Mason was conducting surface mining activities without a valid mining permit. Pursuant to 30 CFR

843.11(a)(2), the issuance of a Federal Imminent Harm Cessation Order (IHCO) was required. OSMRE issued an IHCO to Mason on November 1, compelling the company to cease coal mining operations. Mason complied with the IHCO and ceased coal production upon receipt of the order. Mason has also filed an application for a new mining permit with the KYDMR. OSMRE is working with Mason and the Office of the Solicitor on further, appropriate abatement options. On November 7, 2018, OSMRE signed a Settlement Agreement (SA) with Mason agreeing not to oppose Mason's request for temporary relief from the IHCO, under the terms of the SA. On November 19, 2018, the ALJ Sweitzer granted Mason's request for temporary relief pursuant to the terms and conditions set forth in the Settlement Agreement.

Rosebud Mine (MT): The OSMRE Western Region jointly prepared an EIS with the Montana Department of Environmental Quality. The EIS will be used to support a recommendation on the mining plan for Area F of the Rosebud Mine. OSMRE has obtained Departmental Clearance to publish the Notice of Availability (NOA) for the Final EIS in the Federal Register. The NOA will be published in the Federal Register on Friday, November 30, 2018. The Record of Decision (ROD) clearance material will be submitted to the Departmental Review Team on or around January 4, 2019, and the ROD will be signed on or around January 10, 2019.

Coyote Creek Mining (ND): BLM and OSMRE have identified a "pilot" project for the leasing and permitting actions reflected in the mine plan decision document, that will be used to begin the process of closer coordination and concurrent NEPA analyses. Lease application NDM 110277 was submitted by Coyote Creek Mining Company, LLC (CCMC) on December 13, 2017, and proposes a new lease to mine approximately six million tons of coal on 320 acres (two 160-acre tracts) in Mercer County, approximately 11 miles south of Beulah, North Dakota. Comments received in response to public scoping urged BLM and OSMRE "...to reject this joint NEPA proposal." Stating that BLM and OSMRE "should carry out separate NEPA reviews for each of their respective distinct approval processes."

An air resource issue meeting for project specialists and managers was held on Wednesday, November 14. Finalized major milestone schedule. The contractor is preparing Ch. 1 and 2 of the EA as well as the Biological Assessment for agency review.

Pollyanna #8 (OK): On July 10, 2018, OSMRE received approval from BLM of the Resource Recovery and Protection Plan and the coal lease modification for the Pollyanna #8 mine. OSMRE held a meeting with OSMRE HQ on August 8 for a kickoff meeting. Georges Colliers Inc. Pollyanna #8 mine is an underground coal mine expected to use room and pillar retreat mining methods. The mine, located in LeFlore County, OK, consists of 3.37 million tons of recoverable coal overlain by 520 private surface acres. The state regulatory authority approved the revision with conditions on July 25, 2018. A call from the contractor on July 24, 2018, working for Georges Colliers Inc. informed OSMRE that the company will complete mining the remaining panels in approximately 2 weeks with an additional 3-4 weeks of retreat mining before completion. Based on issues with BLM's subsidence analysis, however, OSMRE has had to complete a supplemental EA to adequately analyze the impacts of subsidence. OSMRE is scheduled to initiate the public review period on the draft EA and FONSI, on November 20, 2018. Public notice will include posting the two draft documents on the agency's website and

electronic notification to interested parties as well as publication in a newspaper of local distribution. The public comment period will close on December 20, 2018. (9/26/2018)

ONGOING ITEMS

On or about September 7, 2018, the Secretary and the Acting Director received a **Notice of Intent to File Suit** over an alleged failure to perform an alleged mandatory duty under the Surface Mining Control and Reclamation Act from the WildEarth Guardians (WEG). WEG alleges that the agency failed to "promptly promulgate regulations to limit toxic blasting emissions at coal mines after granting a petition for rulemaking." SMCRA allows OSMRE 60 days to respond to the NOI before an action can be filed. The Solicitor's Office has provided OSMRE with options to consider in response to the NOI. OSMRE sent response letter to WEG on November 6, 2018, indicating that OSMRE would publish its decision in the *Federal Register* within 90 days.

Justice Companies' Bevins Branch Mine: On October 10, 2018, Kentucky Department of Natural Resources (KYDNR) formally requested technical assistance from OSMRE in assessing the flooding problems reported in Pike County, Kentucky, which purportedly, was being caused by the Kentucky Fuel Corporation's, Bevins Branch Mine, which is owned by the Justice Companies. KYDNR believed the mining operation had contributed to the off-site impacts to the citizens and the environment. After conducting an on-site inspection with the State, OSMRE issued an Imminent Danger/Imminent Harm Cessation Order (IDCO/IHCO), with an abatement date of October 17. OSMRE staff, along with a KYDMR inspector, went to the site on the October 17, to see if the permittee had started abating the violations. The permittee had moved 3 pieces of equipment to the site. After observing the site, the reclamation specialists determined that the IDCO/IHCO should be modified to extend the abatement times and include the notice and abatement requirements of other non-compliant conditions discovered after analyzing the information and findings from last week's technical assistance visit. Based on further review of the technical information, permit requirements, and inspection findings, and after consultation with the Solicitor's Office, OSMRE vacated the original IDCO/IHCO and replaced it with a new IDCO/IHCO. The new IDCO/IHCO more clearly addresses the required abatement and the non-compliance conditions that contributed to the flooding event. In addition, a new off-site impact (slide) was observed and cited. The replacement IDCO/IHCO was completed on October 18, and service of process initiated on Friday, October 19, 2018. The company's remedial measures to satisfy the IHCO were not met. A package of alternative enforcement or other measures was referred to the Knoxville Solicitors for consideration. On November 7, 2018, the Knoxville Field Solicitor's Office submitted the draft package to OSMRE (field office directors, financial office, AVS office, and the Regional Director), SOL DMR, and Deputy Solicitor EMR for review and comment. In order to facilitate timely review and communication, the recipients were asked to consider the package concurrently. Once the Knoxville Field Solicitor's Office receives and incorporates any suggested edits, the package will be elevated to the Acting Director for review and to the Principal Deputy Solicitor for review and approval. (10/16/2018)

Evans-McCurtain Mine is a proposed new coal mine operation located in the State of Oklahoma on approximately 1,300 acres. An OSMRE mining engineer and hydrologist are working with BLM staff on development of the leasing NEPA document. This NEPA document will analyze both the leasing and mining plan decision document effects. This collaboration will reduce the time frames after the lease is issued and the mining plan decision document can begin. The remaining reserves on the proposed lease are recoverable only by underground methods. BLM expects a final decision on the leasing by late November 2018.

15-60 Day Look-Ahead

Bureau of Land Management

NEW ITEMS

Mid-December. BLM-CO. BLM anticipates finalizing a consent order with the Colorado Department of Public Health and Environment to address groundwater contamination from a closed landfill near Fairplay. The landfill, which lies on BLM land, was leased to Park County under a Recreation and Public Purposes lease from the early 1970s to the early 1990s. The landfill was not closed in compliance with solid waste disposal regulations. Groundwater monitoring in several wells in the area (including two residential wells) indicated the presence of a potential carcinogen in levels that exceed regulatory limits. (11/16/18)

December 28. BLM-NM. The Carlsbad Field Office anticipates publishing the Notice of Availability (NOA) for its Proposed Final Resource Management Plan and Environmental Impact Statement. The Plan outlines the BLM's long-term landscape-level plans and goals for public lands in Lea, Chaves, and Eddy Counties. The planning area includes approximately 2.1 million acres of federal surface land and 3 million acres of BLM-managed mineral estate in Chaves, Eddy, and Lea Counties. (11/16/18)

UPDATED ITEMS

December 11. BLM-MT/DK will offer 23 nominated parcels, covering 12,517 acres at the December 2018 oil and gas lease sale. The preliminary parcel worksheet was posted on July 6 for the 15-day scoping period. Parcels impacted (76 lease parcels covering 54,207 acres) by the Preliminary Injunction in Western Watersheds Project v. Zinke (D. Idaho September 21, 2018) were moved to the March 2019 lease sale. A total of 20 parcels (10,586) were moved from the December 2018 sale. The updated Environmental Assessment and final sale notice was posted October 23 for a 10-day protest period. Two protests were received. The 23 parcels/12,517 acres to be leased are located in the Butte Field Office (Lewis and Clark County), Havre Field Office (Blaine, Glacier and Toole counties), and the Miles City Field Office (Big Horn, Dawson and Sheridan counties). (10/16/18)

December 13. BLM-ES will offer 18 parcels totaling 3,195.12 acres at a competitive online oil and gas lease sale. Eight parcels of public domain minerals underlying private surface are

in Stone and Cleburne Counties, Arkansas; one privately owned surface parcel overlying public domain minerals is in Muskegon County, Michigan; seven parcels are within the Manistee National Forest, Muskegon County, Michigan; and two parcels are within the Wayne National Forest, Monroe County, Ohio. The sale notice was posted to ePlanning following internal review October 26. The 10-day protest period ended November 5. The Center for Biological Diversity filed a timely protest for the two parcels in the Wayne National Forest. BLM-ES is reviewing and preparing the draft response for SOL review. (10/19/18)

December 14. BLM-CO. The 30-day public comment period for the environmental analyses for BLM-CO's March 2019 oil and gas lease sale will close. BLM is considering offering 26 parcels totaling approximately 14,052 acres in the Colorado River Valley, Grand Junction, Kremmling, Little Snake, Royal Gorge and White River field offices. (11/9/18)

Mid-December. BLM-UT anticipates publishing a Federal Register Notice to announce the Milford Flat Solar Energy Zone competitive lease sale. The BLM responded to substantive comments in the Final Environmental Assessment (EA). Changes were made to the EA and Decision Record to alleviate some of the identified concerns, including deferring one parcel (Parcel D) from the current lease sale. A Decision Record was signed on July 23, 2018 to approve offering three parcels of public land in Beaver County, totaling 4,836 acres. No appeals were received on the decision. Bids will be accepted for a 30-day period concluding in late December. (2/21/18)

Mid-December. BLM-ID. Tri-State Fuel Breaks Project: BLM Idaho expects to request a BLM Director's Office and Review Team briefing regarding publication of a Notice of Availability of a DEIS for a comprehensive system of fuel breaks in southwest Idaho, southeast Oregon and northern Nevada. These fuel breaks will be designed to provide firefighters with safe areas to engage fire, reducing the likelihood of large wildland fires that may spread across hundreds of thousands of acres, impacting sage-grouse habitat and the grazing economy for many years. This effort involves coordination among the Boise, Vale, Winnemucca and Elko BLM Districts. (11/1/18)

Mid-December. BLM-UT. The BLM anticipates publishing a Federal Register Notice to announce the Milford Flat Solar Energy Zone competitive lease sale. The BLM responded to substantive comments in the Final Environmental Assessment (EA). Changes were made to the EA and Decision Record to alleviate some of the identified concerns, including deferring one parcel (Parcel D) from the current lease sale. A Decision Record was signed on July 23, 2018 to approve offering three parcels of public land in Beaver County, totaling 4,836 acres. No appeals were received on the decision. Bids will be accepted for a 30-day period concluding in late December. (2/21/18)

Late December. BLM-NV. The Humboldt River Field Office plans to publish the Draft Environmental Impact Statement for the Marigold Mine Mackay Optimization Project. The proposal includes expanding an existing gold mine to combine existing open pits into three larger pits and extend mine life by up to 10 years, to 2037. (10/29/18)

ONGOING ITEMS

Mid-December. BLM-ID. The Boise District anticipates publishing a Notice of Exchange Proposal announcing 31,026 acres (11 parcels) of federal lands being exchanged for the 23,878 acres (40 parcels) of state land. The Owyhee Land Exchange was proposed for the purpose of acquiring State-owned lands located within or abutting wilderness areas in Owyhee County that were designated by the Omnibus Public Land Management Act of 2009. The BLM is consulting with the tribes and will soon be working with the State Historic Preservation Office and part of the clearance process. The Boise District anticipates at least some local media interest once a notice is issued. (10/30/18)

Mid- December. BLM-NV. The Black Rock Field Office anticipates releasing the draft of the Burning Man Environmental Impact Statement (EIS). (10/1/18)

Bureau of Offshore Energy Management

NEW ITEMS

BOEM received notice on November 6, 2018, that the Assistant Secretary of Commerce had sent a letter to the Secretary of the Interior requesting consultation on the Flower Garden Banks National Marine Sanctuary (FGBNMS) proposed expansion. BOEM has not yet seen the letter. Under Section 4 of Executive Order (EO) 13795, Implementing an America-First Offshore Energy Strategy, BOEM must respond within 60 days of a consultation request with a determination of the potential impact of the proposed expansion on the development of oil and gas, renewable, and marine mineral resource potential in the area of proposed expansion. (11/16/2018)

On December 7, the Vineyard Wind offshore wind project Notice of Availability (NOA) to prepare and Draft Environmental Impact Statement (DEIS) is expected to be published in the *Federal Register*. The DEIS analyzes the potential environmental impacts of the proposed action described in the Vineyard Wind Construction and Operations Plan and reasonable alternatives to the proposed action. Publication of the NOA announces the start of the public review and comment period, as well as the dates and locations of public hearings on the DEIS. The public hearings are tentatively planned for the weeks of January 7 and January 14 in New Bedford, Nantucket, Martha's Vineyard, and Hyannis, Massachusetts; as well as Narragansett, Rhode Island. The specific dates and locations will be finalized by November 30. BOEM received approval to issue the NOA after the Department Review Team was briefed on November 16. (11/5/18)

ONGOING ITEMS

On December 13, BOEM will be holding a public meeting on the California Offshore Wind Call for Information and Nominations in San Luis Obispo, California. The meeting will be open house format with a short presentation on the Call process and overview of the information BOEM is looking to obtain during the comment period. A laptop station will be

available for the public to offer comments on Regulations.gov. The comment period closes on January 28, 2019. (11/5/2018)

Office of Surface Mining Reclamation and Enforcement

ONGOING ITEMS

West Elk Mine (CO): In coordination with the Regional Solicitors Office, OSMRE Western Region will delay the previously scheduled October 22nd submission of a Record of Decision (ROD) and a notice of adoption clearance briefing form to the DOI Review Team for OSMRE's adoption of the 2017 U.S. Forest Service's West Elk Mine Final Supplemental Environmental Impact Statement, Federal Coal Lease Modifications COC-1362 & COC-67232. On September 26, an Initial Action Notice brief was provided. No oral briefing was requested by the DOI Review Team. The cause of the delay is attributed to OSMRE's decision to consider the findings of an imminent report that will be provided by the West Elk Mine to the BLM in accordance with the stipulations of their lease regarding the feasibility of methane capture and flaring. OSMRE is coordinating with the BLM regarding an expedited review and concurrence finding on the report. While OSMRE does not expect the report will change the findings of the ROD, in coordination with counsel, OSMRE agrees that incorporating the findings of the report will be beneficial to the defensibility of the decision. At this time, a date certain for the DOI Review Team notice of adoption clearance briefing and publishing of the notice of adoption in the Federal Register is not known.

Awareness

Bureau of Land Management

Fall 2018. The Biomass Research and Development Board is seeking agency concurrence on the Bioeconomy Initiative Plan (Plan) to be approved by DOI. The Plan lays out the strategy for interagency coordination on bioeconomy research designed to accelerate innovative technologies that harness America's biomass resources. The Board is chaired by United States Department of Agriculture (USDA) and the Department of Energy (DOE). USDA and DOE have the majority of the responsibility for the Plan. BLM sits on the Biomass Research and Development Board. BLM provides biomass from public domain lands; one power plant in Northern California co-produces energy from geothermal resources and biomass harvested from BLM lands.

Bureau of Offshore Energy Management

The BOEM MOU with The Netherlands on offshore wind cooperation has been cleared by the Department. BOEM is currently in discussions with representatives from the government regarding the details of a signing event. Additionally, BOEM has received edits back from the Norwegian energy ministry regarding the draft MOU with DOI on offshore energy and mineral resources cooperation. The Norway MOU is expected to begin the clearance process within DOI by late November. (11/16/18)

BOEM is currently reviewing a draft document related to the London Protocol, entitled "Revision of the Specific Guidelines for Assessment of Platforms or Other Man-Made Structures at Sea" document. BOEM and BSEE comments will be combined and provided to the Department for review by late November. (11/8/18)

The World Ocean Assessment (WOA) is a process established by the United Nations (UN) General Assembly to provide an overall assessment of the state of the marine environment, including socio-economic aspects. The first WOA (WOA-I) was released in 2015 and subsequent WOAs are expected to be generated every five years in order to document trends in the state of the marine environment. WOA-I is comprised of 57 chapters and a technical summary. BOEM contributed to WOA-I at various levels (including co-authoring two chapters: *Chapter 49: Salt Marshes* and *Chapter 22: Other Marine-Based Energy Industries*). The second round of the WOA (WOA-II) plans to build on the first round to provide an updated assessment of the state of the marine environment. WOA-II is expected to include more than thirty chapters plus a technical summary. The Department of State (DOS) is coordinating WOA-II engagement in the United States. The DOS coordinator discussed the WOA-II nomination process at a Subcommittee on Ocean Science and Technology (SOST) meeting and requested federal agencies to circulate the information. BOEM has been requested to provide support on multiple chapters (including: *Chapter 20: Changes in Hydrocarbon Exploration and Extraction* and *Chapter 22: Development in Renewable Energy Sources*). (11/8/18)

BOEM submitted a final Biological Assessment to NMFS for the Gulf of Mexico Geological and Geophysical Programmatic Endangered Species Act Consultation in July 2013. BOEM received a copy of the draft Biological Opinion (BiOp) from NMFS on Friday June 22, 2018. BOEM submitted a summary response of substantive issues with the BiOp to NMFS on September 13, 2018, along with the more detailed track changes comments in the draft BiOp. NMFS will not meet the original November 1, 2018, deadline or the February 1, 2019, deadline extension for issuance of a final BiOp pursuant to the NRDC litigation. BOEM and NMFS staff initiated a bi-weekly meeting to address and resolve issues and comments in the BiOp. A completion date remains unclear. NOAA has informed BOEM that they will request an extension from the court beyond the February 1, 2019, deadline to issue a final BiOp pursuant to the NRDC litigation. (6/29/18)

On October 22, BOEM submitted a conference approval package to ASLM for 2019 meetings of the National Academies Committee on Offshore Science and Assessment (COSA). BOEM is also planning to contract with the NAS to peer review the BOEM air quality study of the Gulf of Mexico, but is holding moving forward with the peer review pending verbal approval by ASLM (no written authorization is needed). The peer review is particularly time-sensitive because the review should be completed within the term of the underlying study contract. (10/15/18, DTS #2244).

BOEM has finalized its FY19 National Studies List for the Environmental Studies Program (ESP). This list covers both new studies starts, as well as on-going studies. Mandated by Section 20 of the OCSLA, ESP develops, funds, and manages rigorous scientific research specifically to inform policy decisions on the development of energy and mineral resources

on the OCS. Research covers physical oceanography, atmospheric sciences, biology, protected species, social sciences and economics, submerged cultural resources and environmental fates and effects. One study on the list (*Atlantic Marine Assessment Program for Protected Species III*) will require additional ASLM approval due to the fact that it will be a new procurement with individual project costs projected to exceed $3,000,000 (pursuant to requirements in Departmental Manual 218). This study is an *Inter-agency Agreement* with NOAA to collect broad scale and long-term data on protected species in the Atlantic OCS. The cost of the study is $6.4 million over 5 years. The request for approval of this study is with ASLM (DTS# 2424). (9/28/18)

BOEM's Pacific Region has accepted the Multi-Obligee Performance Bonds from Beta Operating Company LLC. These bonds will replace the existing surety bonds for decommissioning purposes presently on file with BOEM. On September 28, BOEM sent a letter to the trustee directing it to release the funds from the Trust Account that are being replaced by the new bond. Following receipt of the letter, Aera (the predecessor lessee) requested a meeting with the Regional Director. On October 5, Aera filed an emergency motion in an attempt to block distribution of the funds. On October 10, BOEM was notified that the bank had released all but $1 million of the funds. The $1 million was retained in case there is a lawsuit. On October 30, AERA, Shell, Noble, and Exxon met with the BOEM Acting Director. A follow up meeting was held on November 15. On October 31, the District Court affirmed the ruling of the bankruptcy court's decision that allowed BOEM to direct the Trustee to release the funds. (8/13/18)

Well Stimulation Litigation (Environmental Defense Center & Santa Barbara Channelkeeper, Center for Biological Diversity and Wishtoyo Foundation, and State of California): There were three lawsuits filed in Nov and Dec 2017 that have been consolidated into one case. The claims can be summarized as follows: (A) There are several flaws and faults in the programmatic EA (released in May 2016) for well stimulation treatments, (B) The California Coastal Commission has had no opportunity to review the activities for consistency with the Coastal Zone Management Act, (C) The government was required but failed to comply with the Endangered Species Act with regard to approval of well stimulation treatments. American Petroleum Institute, ExxonMobil Corporation, and DCOR, LLC, are intervenors. The hearing was held Nov 5 in Los Angeles; the judge concluded that Interior satisfied its obligations under NEPA but did not satisfy its obligations under CZMA and ESA. (11/16/2018)

ASSISTANT SECRETARY FOR POLICY, MANAGEMENT, AND BUDGET

Week Ahead Schedule of Meetings, Hearings, and Travel

Susan Combs, Senior Advisor to the Secretary, exercising the authority of the Assistant Secretary for Policy, Management and Budget, will be attending an offsite meeting at NCTC on December 3-4. On December 7, Susan is attending the Women's Suffrage Centennial Commission in Washington, DC.

Scott Cameron, Principal Deputy Assistant Secretary, will be attending an offsite meeting at NCTC on December 3-4 and in the office the rest of the week.

Deputy Assistant Secretary - Public Safety, Resource Protection and Emergency Services (DAS PRE)

From December 4-7, Inter-agency Borderland Coordinator (b)(6), (b)(7)(C) will conduct interagency field visits in CA at scheduled Border Patrol (BP) replacement fence projects. At the request of the BP, (b)(6), (b)(7)(C) (b)(6), (b)(7)(C) (b)(6), (b)(7)(C) will focus on the San Diego and El Centro sectors to discuss replacement projects in San Diego, Tecate, and Calexico. (b)(6), (b)(7)(C) (b)(6), (b)(7)(C) (b)(6), (b)(7)(C) will coordinate with representatives from BP, EPA, FWS and BLM. (11/20/2018)

Immediate Announcements and Actions (within the next 14 days)

Deputy Assistant Secretary - Budget, Finance, Grants and Acquisition (DAS BFGA)

NEW ITEMS

The Department submitted a FY 2019 reprogramming action on November 23 to the Interior Appropriations Subcommittees to reprogram $650,000 from NPS Line Item Construction project balances for a replacement crane at Channel Islands National Park. The 30 day review period ends December 23. (11/28/2018)

UPDATED ITEMS

The Department submitted a FY 2019 reprogramming action on November 23 to the Interior Appropriations Subcommittees to change two Deputy Assistant Secretary position titles within PMB. The 30 day review period ends December 23. (11/28/2018)

ONGOING ITEMS

On December 7, the FY 2019 Continuing Resolution providing ongoing appropriations for DOI (with the exception of Bureau of Reclamation and CUPCA) is set to expire. The Office of Human Capital is updating the OS Contingency Plan employee list for exempt, excepted and non-excepted employees. (11/20/2018)

The FY 2019 reprogramming action regarding FWS' proposal to reorganize administrative functions is pending before the Interior Appropriations Subcommittee. The 30 day review period ends November 29. (11/20/2018)

The Office of Budget is compiling information on estimated damages from hurricanes and other major events (volcanoes) this season to inform Departmental leadership. There has been no formal request for this information from OMB. The House and Senate Appropriations Committees have informally requested information. (11/14/2018)

Deputy Assistant Secretary - Public Safety, Resource Protection and Emergency Services (DAS PRE)

NEW ITEMS

DOI has been requested by the Secretary of Homeland Security to provide law enforcement resources to the U.S. Customs and Border Protection (CBP), along Points of Entry on the Southwest Border. DOI is in the process of assembling a team for deployment and coordinating with the Solicitors Office regarding authorities and CBP regarding funding. (11/28/2018)

ONGOING ITEMS

From December 11-13, Office of Wildland Fire (OWF) Director Rupert will attend the Intertribal Timber Council (ITC) quarterly meeting where he will provide an update on DOI priorities and initiatives to the ITC Fire Subcommittee in Portland, OR. (10/24/2018)

Deputy Assistant Secretary - Policy and Environmental Management (PEM)

NEW ITEMS

On December 12-14, National Invasive Species Council (NISC) Executive Director Jamie K. Reaser will participate in the 2018 annual invasive species innovation conference to provide a plenary presentation on establishing an "innovation culture" and present relevant projects emerging from the 2016-2018 NISC Management Plan (Nashville, TN, open to press) (11/28/2018).

ONGOING ITEMS

On December 14, Michaela Noble Office of Environmental Policy and Compliance (OEPC) Director will provide a presentation on the Department's National Environmental Policy Act (NEPA) streamlining initiatives at the Council on Environmental Quality's (CEQ) quarterly NEPA Inter-agency Contacts meeting. (Washington, DC; no press) (11/20/2018)

15-60 Day Look-Ahead

From January 23-24, 2019, Susan Combs will be attending the Wildland Fire Leadership Council Meeting in San Diego, CA and conducting a field tour of southern California. (11/28/2018)

Deputy Assistant Secretary - Policy and Environmental Management (PEM)

ONGOING ITEMS

The Office of Policy Analysis (PPA) is collaborating with the Office of Wildland Fire (OWF) on the implementation of a pilot to address fuels treatment, based on PPA's analysis.

The expected timeframe to complete a pilot for one wildfire is by the end of December. (11/20/2018)

Awareness

Deputy Assistant Secretary - Budget, Finance, Grants and Acquisition (DAS BFGA)

NEW ITEMS

GAO recently met with the National Park Service and the Bureau of Indian Affairs in an exit conference to discuss "Federal Employment and Training Programs" (Job Code 102320) in response to a request from the Chair and Ranking Member of the Permanent Subcommittee on Investigations, Senate Committee on Homeland Security and Governmental Affairs. The GAO reviewed the:

(1) Number, focus, and funding of Federal employment and training programs
(2) Changes in the outcome measures since the 2011 report
(3) Actions taken by Agencies to improve coordination among programs.

(Washington DC, no press) (11/28/2018)

(Per GAO, distribution is highly restricted): GAO recently issued the draft report "Oil and Gas Development: Actions Needed to Improve Oversight of the Inspection and Enforcement Program" (GAO-19-7) in response to a request from Ranking Member of the House Committee on Natural Resources. The GAO reviewed the:

(1) Distribution of the Bureau of Land Management's (BLM) oil and gas Inspection and Enforcement Program's workload and workforce among agency field offices
(2) Internal control reviews conducted for FYs 2013-2018.

The GAO issued BLM three recommendations to increase monitoring of the state offices' internal control reviews; document procedures for implementing internal control reviews; and implement a risk-informed approach to conducting internal control reviews. The response is due December 20. (11/28/2018)

OIG recently issued the draft report "U.S. Fish and Wildlife Service Wildlife and Sport Fish Restoration Program Grants Awarded to the State of California, Department of Fish and Wildlife, From July 1, 2014, Through June 30, 2016" (2017-WR-064). The audit included claims totaling approximately $113 million on 189 grants. In addition, the OIG found that the State:

(1) Did not use an approved methodology to count lifetime license holders
(2) Did not manage equipment adequately; properly allocate program income associated with its lands pass program, and did not properly classify its sub-awards.

The OIG issued 18 recommendations to the U.S. Fish and Wildlife Service (FWS). The response is due January 2. (11/28/2018)

On November 20, 2018, the Office of Acquisition and Property Management (PAM) issued Acquisition Policy Flash 19-04, *USDOL-OFCCP California Wildfire National Interest Exemption*. This policy implements a memorandum from the Department of Labor (DOL), which grants a limited exemption and waiver for covered supply & service and construction

contracts entered into specifically for California Wildfire relief. This temporary exemption and waiver is in effect for a period of three months, from November 19, 2018 to February 19, 2019, and is subject to an extension. (11/28/2018)

UPDATED ITEMS

The House Appropriations Committee's Surveys and Investigations team is beginning to conclude its review of the Bureau of Land Management's Wild Horse and Burro Program. BLM is wrapping up its work addressing staff requests for information and has supplied a total of eleven disks with over 150 documents. BLM has provided seven in-person briefings totaling 24 hours and 8 conference calls on the various intricacies of the WHB Program. S&I staff traveled to Wyoming, Utah, and Nevada as part of their investigation on Oct. 3. (11/28/2018)

ASSISTANT SECRETARY FOR WATER AND SCIENCE

Week Ahead Schedule of Meetings, Hearings, and Travel

For the week of December 2, Assistant Secretary Tim Petty is attending the off-site meeting at NCTC, and then in the DC office with mostly routine meetings. On December 5, Tim will provide the welcome address / keynote at the ACES (A Community on Ecosystem Services) 2018 Conference in Crystal City, VA. External meetings include the Northern California Power Agency. On Dec 6, W&S will host a departmental briefing by USGS on the Delaware Basin Assessment.

The week of December 2, Reclamation Commissioner Brenda Burman is scheduled to be in Washington, D.C., and will attend various meetings and events including the off-site meeting at NCTC.

From December 2-4, USGS Director Jim Reilly will be in Reston, Va. and will attend the off-site meeting at NCTC. On December 5-8, Director Reilly will be on personal leave.

Immediate Announcements and Actions (within the next 14 days)

U.S. Bureau of Reclamation

NEW ITEMS

On December 3, Reclamation plans to release the public notice for the Draft Supplemental Environmental Assessment for the Funding of Routine Operation, Maintenance, and Replacement of Associated Water Transmission Facilities of the Mni Wiconi Rural Water Supply Project in South Dakota. (11/26/2018)

On December 3, Reclamation plans to issue a news release announcing the release of flows up to 100 cubic feet per second from Pinto Dam into Crab Creek (Grant County,

Washington) beginning the week of December 3 to perform a regularly planned inspection on the Pinto Dam headworks. (11/26/2018)

On December 11, Reclamation will host a webinar about the WaterSMART Cooperative Watershed Management Program Phase II funding opportunity that is currently open. The funding opportunity is for watershed groups seeking funding to implement on-the-ground watershed management projects for their communities. (11/26/2018)

Around mid-December, Reclamation plans to issue a news release announcing the final draft for the Programmatic Agreement between Reclamation, the Oregon State Historic Preservation Office and Central Oregon Irrigation District (COID). The Agreement will direct COID's future Section 106 obligations for federal projects. A public notice will also be placed in the Bend (Oregon) Bulletin. (11/26/2018)

UPDATED ITEMS

Between December 2 and December 21, Reclamation plans to announce the projects selected to receive Title XVI, Water Reclamation and Reuse funding. Reclamation provides funding through the Title XVI Water Reclamation and Reuse Program for projects that reclaim and reuse municipal, industrial, domestic or agricultural wastewater and naturally impaired ground or surface waters. (09/10/2018)

ONGOING ITEMS

On December 5, Reclamation plans to hold a public meeting for the Bonny Reservoir Resource Management Plan and Environmental Assessment as part of a 30-day public comment period that began in November. Bonny Reservoir is located in eastern Colorado on the Republican River, which flows into Kansas and Nebraska. In 2011, Colorado decided to drain the reservoir in order to comply with the 1943 Republican River Compact between Colorado, Kansas and Nebraska. (11/19/2018)

On December 6, Reclamation plans to issue a news release announcing the draft Finding of No Significant Impact and Environmental Assessment on the Clipper Center Lateral Pipeline Project located in Delta County, Colorado. The project would replace approximately 4.3 miles of open irrigation ditch with buried pipe. The purpose of the project is to prevent seepage and reduce salinity loading in the Colorado River Basin. Local media interest is anticipated. (11/19/2018)

Between December 10 and 14, Reclamation plans to submit a report to Congress and governors of the seven Colorado River Basin States regarding the Operations of Glen Canyon Dam (Arizona) for water years 2017 and 2018. The report is prepared and submitted annually in accordance with provisions of the 1992 Grand Canyon Protection Act (Public Law 102-575) (GCPA). Five agencies within the Department of the Interior have responsibilities and undertake actions pursuant to the GCPA and have submitted sections for this report. No news release is anticipated and media interest is expected to be light. (11/19/2018)

Between December 10 and 14, Reclamation plans to submit a recommendation from the Glen Canyon Dam Adaptive Management Work Group (AMWG) for consideration by the Secretary. The AMWG is a federal advisory committee tasked with providing the Department of the Interior with input and recommendations on the operation of Glen Canyon Dam (Arizona). The AMWG recommends, by consensus, continued implementation of the Adaptive Management Program triennial budget and work plan for fiscal years 2018 through 2020. The Secretary's decision regarding the recommendation will be distributed to AMWG members, other relevant stakeholders, and to the five Department agencies with associated responsibilities. No news release is anticipated and media interest is expected to be moderate. (11/19/2018)

Between December 10 and 14, Reclamation plans to release the 2019 Annual Operating Plan (AOP) for Colorado River System Reservoirs required by section 602(b) of the Colorado River Basin Project Act of 1968 (Public Law 90-537). The 2019 AOP contains the projected plan of operation of Colorado River reservoirs for 2019 based on the most probable runoff conditions. The 2019 AOP was prepared by Reclamation in consultation with the seven Colorado River Basin States Governors' representatives, representatives from Mexico, the Upper Colorado River Commission, Native American tribes, appropriate Federal agencies, and additional stakeholders. The final 2019 AOP will be transmitted by the Secretary of the Interior to Congress and the seven Colorado River Basin States. No news release is anticipated and media interest is expected to be moderate. (11/13/2018)

Around December 10, Reclamation plans to issue a news release for the draft Environmental Assessment (EA) for the proposed modernization of generating units 19-21 in the Third Power Plant at Grand Coulee Dam, Washington. The modernization would ensure continued, reliable hydropower production for 40 years and ensure Reclamation would meet contractual obligations for power generation. Reclamation is issuing a 14-day public comment on the draft EA. (11/13/2018).

On December 12 through 14, Reclamation staff plan to participate in the annual Colorado River Water Users Association Conference in Las Vegas, Nevada. (11/13/2018)

U.S. Geological Survey

NEW ITEMS

On December 5, USGS and DOI scientists are scheduled for a closed door briefing with the Senate Energy & Natural Resources Committee staff about USGS wildfire science and coordination. (11/26/2018)

UPDATED ITEMS

In December, the USGS will announce a recently published paper that describes new evidence of frequent and large tsunamis along one of the Earth's largest faults, the Alaska-Aleutian megathrust. The paper, titled "Evidence for frequent, large tsunamis spanning

locked and creeping parts of the Aleutian megathrust," was published in the *Geological Society of America Bulletin* and a statewide news release is planned. Collaborators on this paper include the University of Rhode Island; University of Nevada, Reno; East Carolina University. (9/6/2018)

In December, the USGS will announce a recently published paper that describes the presence of human bacteria and viruses from sewage in some Milwaukee area streams. From April 2009 to March 2011, fecal pollution from human sources was spatially quantified by measuring two human-associated indicator bacteria (HIB) and eight human-specific viruses (HSV) at six stream locations in the Menomonee River watershed in Milwaukee, Wisconsin. Of the eight HSV only three were detected, present in up to 38% of the 228 stream samples, while at least one HSV was detected in all water reclamation facility (WRF) influent samples. HIB occurred significantly more often with higher concentrations than the HSV in stream and WRF influent samples. A negative HSV yield from the most downstream sub-watershed of the Menomonee River, and in contrast, a positive HIB yield from this same sub-watershed emphasizes the complexity in fate and transport properties between HSV and HIB. This study demonstrates the utility of analyzing multiple pathogens for a complete assessment of fecal contamination at the watershed level. A news release is being planned. (10/1/2018)

In December, the USGS will announce a new paper that demonstrates that certain well construction attributes are influential in predicting arsenic concentrations in drinking water. Smaller distances between the top of the well screen and overlying aquitard, and shorter well screen lengths, were each associated with higher probabilities of elevated arsenic concentration. Chronic exposure to arsenic via drinking groundwater is a human health concern worldwide, and Minnesota commonly has elevated arsenic concentrations in well water. This study describes a new, novel, and important finding from an arsenic probability model: Controllable well construction choices (not just location or depth) influence arsenic concentrations in drinking water. The paper will be published in *Water Resources Research* and a technical announcement is planned. (7/23/2018)

In December, the USGS will announce a new online service that provides stakeholders and the public access to groundwater quality information for California. In partnership with the California State Water Resources Control Board, researchers have developed a new California Groundwater-Quality Results Web Map showing how groundwater conditions have changed over time and assessments of groundwater used for both public and domestic drinking supply to evaluate geochemical differences in deep and shallow aquifers. A statewide news release is planned. (10/23/2018)

In December, the USGS will announce a new Open-File Report that examines mercury methylation and bioaccumulation in striped bass within the lower section of Lake Powell, Utah and Arizona. In 2012, elevated mercury monitoring results led to a Utah/Arizona fish consumption advisory for the lower 100 km of Lake Powell. In 2014 and 2015, USGS researchers collected chemical, physical, and biological data during two synoptic sampling trips on Lake Powell to test three hypotheses associated with a conceptual model developed

to explain the observed geographic concentration gradient of mercury in fish tissue samples. Partners include the State of Utah and NPS. A regional news release is planned. (11/5/2018)

ONGOING ITEMS

On December 6, the USGS plans to announce a new geologic-based assessment of undiscovered, technically recoverable continuous oil and gas resources for the Wolfcamp Shale and Bone Spring Formation of the Delaware Basin, Permian Basin Province, of west Texas and southeast New Mexico. The announcement will include links to a USGS Fact Sheet and data release. In 2016, the USGS released an assessment for the Wolfcamp Shale in the Midland Basin portion of the Permian Basin Province, which is the largest assessment of continuous oil that the USGS has ever announced. Briefings are scheduled and a news release is planned. (11/5/2018)

15-60 Day Look-Ahead

U.S. Bureau of Reclamation

ONGOING ITEMS

On or about December 30, Reclamation plans to issue a news release announcing a draft Environmental Assessment (EA) for public review and comment related to the proposed Area S Resource Management Plan. The draft EA will evaluate resource management on this small isolated tract of Reclamation land near Fort Klamath, Oregon, including grazing, forest and habitat management, and range improvements. Targeted communication is planned. Media interest is not expected. (11/19/2018)

In January 2019, Reclamation plans to issue a news release announcing the final Environmental Assessment (EA) and Finding of No Significant Impact (FONSI) for the Cottonwood Creek Daylighting project in Boise, Idaho. The final EA and FONSI follow the WaterSMART grant awarded to the Boise River Enhancement Network for their proposal to restore the natural function of the last 440 feet of Cottonwood Creek. The project supports additional spawning, rearing, and over-wintering fish habitat, all of which are currently limited in the Boise River fishery. (11/13/2018)

Reclamation has been invited to present its invasive mussel research activities at the 79th Midwest Fish and Wildlife Conference in Cleveland, Ohio, on January 29, 2019. This annual event will attract nearly 800 biologists, students, and scientists from local, state and provincial, federal, and tribal natural resources agencies, universities, and private companies across the 12 Midwestern states and Canadian provinces.

U.S. Geological Survey

ONGOING ITEMS

In December, a new USGS paper titled “Dynamic flood modeling essential to assess the coastal impacts of climate change” will be published in *Scientific Reports*. The paper summarizes a decade-long research effort to assess the vulnerability of the California coastal population and infrastructure to hazards (e.g. coastal flooding, beach erosion and cliff retreat) associated with a range of future climate change scenarios. In collaboration with agencies and academics across the world, the USGS developed the state-of-the-art Coastal Storm Modeling System (CoSMoS) to incorporate total water levels during storms and the dynamic response of the coast into present-day and future hazards assessments. Applied to the urbanized coast of California, with a population of 24 million, this dynamic approach shows that three times more of the population could be exposed to flooding over the 21st century when compared to static approaches that only consider sea level rise. A USGS news release is being considered. (11/19/2018)

Awareness

U.S. Bureau of Reclamation

ONGOING ITEMS

U.S. Geological Survey

NEW ITEMS

USGS researchers are using an Unmanned Aircraft System (UAS) to estimate walrus abundance at a large haulout near the Alaska Native community of Point Lay. USGS completed 13 surveys of the haulout over a 2-week period in September 2018, the first of a 2-year field study. The population estimates are needed by USFWS and BOEM to formulate regulations related to offshore oil and gas development and other activities in the Arctic. As many as 40,000 walruses haulout near Point Lay on the Chukchi Sea coast in autumn each year after offshore sea ice disappears. This aggregation provides USGS the opportunity to estimate the abundance of the eastern Chukchi Sea walrus population. Walrus surveys using a UAS reduces the risk of disturbance to walruses compared to manned fixed-wing aircraft and counts can be made frequently. This work is supported by USGS, Alaska Native community of Point Lay, Cully Corporation, North Slope Borough, Eskimo Walrus Commission, USFWS, and BOEM. (11/27/2018)

On November 29 USGS Wildlife Biologist John Pearce will attend the North Slope Borough Planning Commission Meeting in Utqiagvik (Barrow), Alaska. Pearce will provide an update about on-going and new USGS research on the North Slope of Alaska that may have implications for North Slope Borough's planning and permitting actions. Included in the presentation will be a discussion of new USGS research planned for 2019 on the coastal plain (1002 Area) of the Arctic National Wildlife Refuge. (11/27/2018)

On December 3-6, Janet Cushing (National Climate Adaptation Science Center) and Marcy Delos are presenting a poster at the A Community on Ecosystem Services (ACES) conference in Arlington, VA. The poster presentation is titled "A synthesis of recent links

between climate change impacts and assessing and managing ecosystem services supply and demand." Ms. Cushing will also be moderating a session at the conference. The focus of the ACES conference is to link state-of-the-art science, practice, and decision making by bringing together the ecosystem services community and decision makers from around the United States and the globe. (11/26/2018)

UPDATED ITEMS

Executive Order 13817/Secretarial Order 3359 milestones: The Department of Commerce has transmitted the whole-of-government strategy to the White House, including major contributions by USGS and BLM in coordination with BOEM. The strategy will likely be sent for final clearance by agencies and key White House components (Office of Science and Technology Policy (OSTP), Office of Management and Budget, Council on Environmental Quality, and Office of the U.S. Trade Representative). USGS and BLM anticipate receiving further direction at the next meeting of the OSTP-led interagency National Science and Technology Council (NSTC) Subcommittee on Critical and Strategic Mineral Supply Chains (CSMSC). The next meeting of the NSTC Subcommittee is on hold pending clearance of the strategy. The meeting is expected to focus on planning for implementation of the strategy's recommendations, including responsibilities, tracking, and deliverables. Future interagency work through the NSTC Subcommittee is expected to include review and clearance of a set of more detailed appendixes to the strategy, further supporting interagency implementation efforts. The appendices will likely be published at a later date, potentially as FY2019 products of the NSTC CSMSC. These appendices are expected to include an interagency plan for mapping subsurface mineral resources, based on the USGS-led plan delivered to the Secretary in April; an interagency report on permitting, based on the BLM recommendations delivered to the Secretary in March; an overview of existing trade dependencies for critical minerals, developed in part from USGS data; and an overview of recycling and reprocessing technologies, including brief discussion from USGS on the geologic composition of above-ground resources such as mine wastes, some of which are currently used for production of byproduct critical minerals. (2/9/2018)

ONGOING ITEMS

The White House Office of Science and Technology Policy (OSTP) is conducting final reviews before releasing a National Science and Technology Council (NSTC)-coordinated interagency plan on how to identify and address current research gaps in understanding the health effects of low levels of emerging contaminants in the Nation's drinking water. This plan was requested by Congress in the FY2018 OSTP appropriations language. The plan identifies a number of research gaps and specific roles for USGS Water and Environmental Health Mission Areas, including development of new or improved methods to sample and analyze low levels and complex mixtures of emerging contaminants in drinking water as it is taken from surface or groundwaters and treated, as it transits through municipal water distribution systems and building plumbing, and as it is taken from the tap; helping understand, model, and predict exposures to emerging contaminants in the context of their environmental and water treatment infrastructure drivers; and helping health agencies develop improved tools to enhance assessment of health risks posed by emerging

contaminants under realistic exposure scenarios. The other agencies highlighted in the plan include Environmental Protection Agency, National Institutes of Health, Department of Defense, National Institute of Standards and Technology, Center for Disease Control and Prevention, and National Science Foundation. (10/2/2018)

Upcoming USGS Publications

A new USGS paper titled "Using redundant primer sets to detect multiple native Alaskan fish species from environmental DNA" was recently published in *Conservation Genetics Resources*. Researchers developed an environmental DNA (eDNA) system to detect up to 37 native fish species in Alaskan lakes and streams. Accurate and timely data regarding freshwater fish communities is needed for measuring biodiversity and informing decision-making by land and resource managers. The new methods efficiently and reproducibly detect fish species in a single water sample, reducing the cost and time needed to perform studies of Alaskan fish communities in remote, roadless areas that characterize much of Alaska. (11/27/2018)

A new USGS study titled "Fire and tree death: understanding and improving modeling of fire-induced tree mortality" was recently published in *Environmental Research Letters*. Each year wildland fires kill and injure trees on millions of forested hectares globally, affecting plant and animal biodiversity, carbon storage, hydrologic processes, and ecosystem services. USGS helps resource managers and others understand the dynamics of wildland fire. This study reviews the current understanding of the mechanisms of fire-induced tree mortality, provides recommended standardized terminology, describes model applications and limitations, and conclude with key knowledge gaps and future directions for research. Researches suggest a two-pronged approach to future research: (1) continued improvements and evaluations of empirical models to quantify uncertainty and incorporate new regions and species and (2) acceleration of basic, physiological research on the causes of fire-induced tree mortality to incorporate processes of tree death into models. This would help advance the understanding of how fire injures and kills trees, while improving prediction accuracy of fire-driven feedbacks on ecosystems and landscapes, particularly under novel future conditions. This information could help resource and land managers make decisions about what actions are most needed or appropriate for their circumstances. Partners include Joint Fire Science Program, NPS, BLM, USFS. (11/27/2018)

A new USGS Open File Report titled "Population genomic surveys for six rare plant species in San Diego County, California" was recently published and is available online in the USGS Publications Warehouse. USGS conducts research important to federal, state and local entities who manage federally and state listed species in San Diego County. The Management Strategic Plan for western San Diego County has identified rare plant species within the plan area for which management activities are ongoing. Researchers examined the genetic population structure of six priority rare plant species, all but one federally listed as endangered or threatened. The report includes options for genetic management of occurrences, seed banking and seed bulking needs for each species, and information gaps that, if addressed, could further support management efforts. In addition to supporting regional conservation efforts for the San Diego Management Plan Area, these results provide

scientific information for the USFWS for the five federally listed species. Finally, these data provide a snapshot for monitoring genetic diversity trends over time in response to future disturbances or restoration actions. The USGS data will inform DOI, state and local agency management as they make decisions focused on conserving these six listed plants. Partners include USFWS and California Department of Fish and Wildlife, San Diego County. (11/27/2018)

In early December a new USGS study titled "The influence of chick production on territory retention in Arctic-breeding Pacific and Yellow-billed loons" will be published in the journal Condor. The study evaluates the role of breeding success and competition on territory retention by two loon species (Pacific and Yellow-billed Loons) in the National Petroleum Reserve – Alaska. The results found that territory retention and apparent survival rates for both loon species are high, and that chick production does not impact loon territory retention. This information may be useful for guiding future oil and gas development near Yellow-billed Loon nesting areas. Findings in this report inform activities of BLM and ConocoPhillips. (11/27/2018)

In December a new USGS paper titled "Probability of Streamflow Permanence Model (PROSPER): A spatially continuous model of annual streamflow permanence throughout the Pacific Northwest" will be published in the *Journal of Hydrology.* The PRObability of Streamflow PERmanence (PROSPER) model is a GIS raster-based empirical model that provides streamflow permanence probabilities (probabilistic predictions) of a stream channel having year-round flow for any unregulated and minimally-impaired stream channel in the Pacific Northwest region, U.S. PROSPER model predictions are available in ScienceBase and will also be available in StreamStats. The project objective was to provide land managers with the ability to identify headwater streams resilient to drought conditions enabling them to focus their limited rehabilitation and conservation resources on watersheds necessary to support populations of threatened aquatic species. This work provides end users with streamflow permanence conditions for the Pacific Northwest Region at unprecedented spatial extent and temporal resolution, representing the largest dynamic stream mapping effort the authors are aware of, and which is readily available for applications in water resources management or species conservation. The USGS authored paper received support from the Northwest Climate Adaptation Science Center. (11/27/2018)

A new USGS study titled "Effects of land use on greenhouse gas flux in playa wetlands and associated watersheds in the High Plains, USA" has been accepted for publication in a special issue of *Agricultural Sciences*. In the High Plains, U.S., native prairie conversion to cropland agriculture has resulted in a loss of service delivery capabilities from most depressional wetlands as a result of sedimentation. Restoring historic hydrological conditions to affected wetlands may rejuvenate some services, however, there may be trade offs due to emissions of methane and nitrous oxide. In the study researchers evaluated the influence of two predominant conservation programs (Wetlands Reserve Program and Conservation Reserve Program) on gas emissions from 42 playas and uplands in the High Plains of Nebraska. (11/27 /2018)

A new USGS study titled “Late season elk hunt in Grand Teton National Park primarily attracts local grizzly bears” has been accepted for publication in *Ursus*. Fall ungulate hunting in the Greater Yellowstone Ecosystem carries the risk of hunter-grizzly bear conflict and creates a substantial challenge for managers. For Grand Teton National Park, a key information need is whether increased availability of elk remains during a late fall (Nov–Dec) elk harvest within the national park attracts grizzly bears and increases the potential for conflict with hunters. Study findings show that grizzly bear presence during the elk hunt was limited to about 15 resident bears that specialized in accessing elk remains. The late timing of the elk hunt likely moderated the effect of elk remains as a food attractant because it coincides with the onset of hibernation. From a population response perspective, the current timing of the Elk Reduction Program likely represents a scenario of low relative risk. The risk of hunter-grizzly bear encounters remains, but may be more a function of factors that operate at the individual bear level. The USGS is the coordinating agency of the Interagency Grizzly Bear Study Team and partnered with the National Park service to address this information need. Partners include NPS, Wyoming Game and Fish Department, elk hunters, national park visitors, and NGOs. (11/27 /2018)

A new USGS study titled “Influence of temperature, precipitation, soil, and nonnative species on vegetation recovery in the western United States” has been accepted for publication in *Applied Vegetation Science*. Moisture-limited regions of the U.S. are susceptible to disturbance caused by wildfires, energy development, and other land-uses. However, vegetation restoration is difficult in these areas because moisture is low and variable. The presence of particularly problematic nonnative plant species like cheatgrass that rapidly reproduce post-fire make restoration even more challenging. Understanding the variables that can accelerate or inhibit vegetation recovery would allow land managers to plan more successful restoration strategies that result in desirable outcomes. Additionally, being able to assess vegetation recovery over large tracts of land relatively quickly and over multiple time periods would also provide invaluable information. The authors of this manuscript used satellite, restoration treatment, plant community, soil, and climate (temperature and precipitation) data to assess factors that influence vegetation recovery after fire in the western U.S. Additionally, they assessed if remote sensing (satellite) data would be a useful tool for monitoring restoration efforts in arid regions. Partners include Northern Arizona University. (11/27 /2018)

A new USGS study titled “Identification of Bighead Carp and Silver Carp early life environments and inferring Lock and Dam 19 passage in the Upper Mississippi River: insights from otolith chemistry” has been accepted for publication in *Biological Invasions*. Bigheaded carps are poised to establish populations further up in the Mississippi River basin if control measures at invasion fronts are not effective. This threatens the Upper Mississippi River (UMR) ecosystem and the services, like fishing and recreational boating, that it provides. Control strategies are just being developed, but important population dynamics information on these emerging populations at the front of the invasion are lacking thereby potentially limiting DOI and other natural resource management agencies ability to devise effective strategies. For example, the primary sources of recruitment to these emerging populations is unknown. To address this need, researchers used chemical analyses of a bony structure (otoliths) from bigheaded carp at the invasion front in the UMR to determine

sources of recruitment for an emerging population above a pinch point dam that separates river reaches with high and low abundances. The findings from this study suggest that there are multiple sources of recruitment to this emerging population from tributaries and mainstem reaches above and below the pinch point dam. This suggests that control strategies for the emerging population will need to target these multiple sources of recruitment. Partners include the states of Missouri, Iowa, Illinois, Wisconsin, and Minnesota, FWS, NPS and US Army Corp of Engineers. (11/27 /2018)

A new USGS study titled "Post-Release Behavior of Surf Scoters (*Melanitta perspicillata*) Following an Oil Spill: an Experimental Approach to Evaluating Rehabilitation Success" has been accepted for publication in *Marine Pollution Bulletin*. USGS conducts research that aids resource managers in decision making following oil spills and effectiveness of rehabilitating wildlife following oil spills has been controversial. Scoters held in captivity exhibited different habitat use, movement patterns and home range size compared to other scoters. Therefore, captivity and rehabilitation practices may influence success of the rehabilitation. Partners include USFWS and California Department of Fish and Wildlife. (11/27 /2018)

A new USGS study titled "Freshwater tidal forests and estuarine wetlands may confer early-life growth advantages for delta-rearing Chinook Salmon" has been accepted for publication in *Transactions of the American Fisheries Society*. The USGS works closely with the USFWS and the Nisqually Indian Tribe to conduct research on restoration of habitat including complex large river deltas which are believed to play a pivotal role in promoting the early marine growth and survival of threatened Chinook Salmon. Researchers assessed the role of multiple delta habitats over a range of salinities and vegetation types and considered consumption and growth rate potential proxies for habitat quality. They compared their model output to empirical, or realized, growth estimates from scale circuli (circular growth rings on the scales). Their results suggest that tidal forests and emergent marshes may offer early-life growth advantages for wild Chinook Salmon. However, the results also suggest that wild and hatchery fish can compensate as they move seaward by opportunistically consuming greater quantities of low-energy density prey, taking advantage of pulses of larval forage fish, or by spending time in multiple interconnected habitat types. This work will assist resource and land managers in identifying management actions that may provide valuable prey resources for juvenile salmon and other fishes and will also inform crucial steps toward protecting river deltas from degradation and functional loss. Partners include USFWS, Nisqually Indian Tribe, and Washington Department of Fish and Wildlife. (11/27 /2018)

A new USGS study titled "Flooding regimes increase avian predation on wildlife prey in tidal marsh ecosystems" has been accepted for publication in *Ecology and Evolution*. The study discusses how sea-level rise and extreme storm events can alter habitat availability in tidal marshes and change species interactions. Researchers used the natural tidal cycle at four marshes in San Francisco Bay, California to measure whether avian predator foraging behavior changed with water levels in tidal marshes. The results describe evidence of a relationship between tidal flooding and the presence, abundance, and behavior of avian predators. Based on this result, the authors introduce predation pressure as a combined probability of predator presence related to water level. Because predation pressure is related

to flooding of the marsh, short-term increases in sea levels from high astronomical tides, sea-level rise, and storm surges increase vulnerability of marsh wildlife. Marsh animals which could be affected include the federally and state endangered salt marsh harvest mouse and state-threatened California black rail. DOI agencies and land managers may use this study to understand how future changes in sea level could affect resources for which they are responsible. Partners include USFWS and California Department of Fish and Wildlife. (11/27 /2018)

A new USGS study titled "Rising tides: Assessing habitat vulnerability for an endangered salt marsh-dependent species with sea-level rise" has been accepted for publication in *Wetlands*.

The study describes potential impacts of sea level rise on federally-listed Ridgway's rail. Two subspecies of Ridgway's rail live in salt marshes of California, light-footed Ridgway's rail in Southern California and California Ridgway's rail in San Francisco Bay. Changes in suitable habitat for these rails and salt marsh vulnerabilities to sea level rise, were forecasted across 14 study sites using models. Under a high (166cm/100yr) sea level rise scenario, current extent of suitable habitat is projected to increase by 34% across the combined area of 14 sites by 2050. By 2100, total habitat suitability is projected to decrease by 83%, with six salt marshes losing over 95% of suitable habitat. If accretion rates cannot keep pace with sea level rise, salt marsh obligate species, such as Ridgway's rail, are in danger of being extirpated from their habitats. Potential sea level rise impacts to Ridgway's rail could exemplify effects on other coastal endemic species. Awareness of potential impacts of sea level rise on vulnerable salt marsh species could assist USFWS and other resource and land management agencies in current decision making and in planning for the future. Partners include USFWS, University of California – Los Angeles, California Department of Fish and Wildlife, Orange County Water District, and Point Blue Conservation Science. (11/27 /2018)

Subject:	Weekly Report to the Secretary January 27-February 2
Date:	Thursday, January 24, 2019 2:40:45 PM
Attachments:	Weekly Report to the Secretary January 27-February 2.docx

All,

Attached is the Weekly Report to the Secretary in both Word and Google Doc formats. Please let me know if you have any questions.

Thanks,

Matthew Dermody
Special Assistant
Office of the Deputy Secretary
U.S. Department of the Interior
1849 C Street NW
Washington, DC 20240
202-513-7778 (office)
202-570-5029 (cell)

NOTE: Every email I send or receive is subject to release under the Freedom of Information Act.

WEEKLY REPORT
DEPARTMENT OF THE INTERIOR
JANUARY 27-FEBRUARY 2, 2019

OFFICE OF THE SECRETARY

Week Ahead Schedule of Meetings, Hearings, and Travel

Acting Chief of Staff Todd Willens will be in the office.

Deputy Chief of Staff Katharine MacGregor will be excepted Tuesday January 29th, and in the office the rest of the week.

Senior Advisor Scott Hommel will be in the office.

Senior Advisor Heather Swift will be in the office.

OFFICE OF COMMUNICATIONS

Director John Bockmier will be in the office.

Deputy Director Russell Newell will be in the office.

OFFICE OF CONGRESSIONAL AND LEGISLATIVE AFFAIRS

John Tanner, Director, will be in the office and in meetings on Capitol Hill

Aaron Thiele, Advisor, will be in the office and in meetings on Capitol Hill

Taylor Playforth, Advisor, will be in the office and in meetings on Capitol Hill.

OFFICE OF INTERGOVERNMENTAL AND EXTERNAL AFFAIRS

Todd Wynn, Director, will be in the office all week.

Ben Cassidy, Senior Deputy Director, will be in the office all week.

Tim Williams, Deputy Director, will be in the office all week.

Jason Funes, Special Assistant, will be in the office all week.

Sarah Spaulding, Special Assistant will be in the office all week.

Immediate Announcements and Actions for the Next Week

The OIEA team is facilitating introductory meetings and phone calls between new and existing Governors and Acting Secretary David Bernhardt.

The OIEA team has developed an outreach and engagement plan and materials for newly elected officials for January and February in order to proactively reach out to other state elected officials.

The OIEA team has developed an outreach and engagement plan for connecting Acting Secretary David Bernhardt with our external partners over the next quarter.

OFFICE OF THE DEPUTY SECRETARY

Week Ahead Schedule of Meetings, Hearings, and Travel

Associate Deputy Secretary Jim Cason will be in the office.

OFFICE OF THE EXECUTIVE SECRETARIAT AND REGULATORY AFFAIRS

Week Ahead Schedule of Meetings, Hearings, and Travel

Director Julie Lillie will be in the office
Deputy Director Justin Abernathy will be in the office
Correspondence specialist, Lisa Cannuscio will be in the office

Immediate Announcements and Actions (within the next 14 days)

- **DOI Priority Rules-**

○ U.S. Fish and Wildlife Service (FWS) Final Rule, "Endangered and Threatened Wildlife and Plants; Regulations for Prohibitions to Threatened Wildlife and Plants; Removal of Blanket Section 4(d) Rule" (RIN 1018-BC97)-The FWS is finalizing revisions to the regulations on prohibitions that apply to species that are listed as threatened species or downlisted from an endangered species to a threatened species. The final rule is with the Office of Management and Budget (OMB) for review pursuant to Executive Order (EO) 12866. Nothing new to report.

○ FWS Final Rule, "Conservation of Endangered and Threatened Species; Revision of Regulations to Address Interagency Cooperation" (RIN 1018-BC87) - The FWS is finalizing revisions to its regulations for interagency cooperation pursuant to the Endangered Species Act. The final rule is with the OMB for review pursuant to EO 12866.Nothing new to report.

○ FWS Final Rule, "Endangered and Threatened Species of Wildlife and Plants; Revision of the Regulations for Listing Species and Designating Critical Habitat" (RIN 1018-BC88) -

The FWS is finalizing revisions to its regulations for listing endangered and threatened species and for designating critical habitat under the Endangered Species Act. The final rule is with the OMB for review pursuant to EO 12866. Nothing new to report.

○ Bureau of Safety and Environmental Enforcement (BSEE) Final Rule, "Oil and Gas Sulfur Operations on the Outer Continental Shelf - Blowout Preventer Systems and Well Control Revisions" (RIN 1014-AA39) - The BSEE is finalizing revisions to the regulations for oil and gas drilling, workover, completion and decommissioning operations on the Outer Continental Shelf. The final rule is with the OMB for review pursuant to EO 12866.Nothing new to report.

○ The Department's proposed rule titled, "Freedom of Information Act Regulations," published on December 28th, 2018. Comments are due January 28, 2019. OES was asked to prepare a draft comment extension for this rule.

● **DOI Documents Pending Federal Register Publication-**

○ A notice reopening the comment period for 30 days for the West Coast Distinct Population Segment of fisher (Pekania pennanti) as a threatened species; and

○ The proposed rule on the Marine Mammals; Incidental Take During Specified Activities: Arctic Coastal Plain

● **Interagency Reviews Under E.O. 12866**—no action to report.

Correspondence:

No action to report.

FOIA:

The OS FOIA office is operating.

Litigation Awareness Reviews

3:18-cv-00797/ OS-2017-01308, Sierra Club (Ellen Richmond), Non-USG communications with IOS personnel

OFFICE OF THE SOLICITOR

Week Ahead Schedule of Meetings, Congressional Hearings, and Travel

Principal Deputy Solicitor Dan Jorjani is in the office.

LITIGATION MATTERS:

Parker Drilling Management Services, Ltd. v. Newton - Non-government Case
Last week, DOJ asked for SOL's quick assessment on whether the federal government should file an amicus brief in *Parker Drilling Management Services, Ltd. v. Newton.* The question in *Parker Drilling*, is whether, under the Outer Continental Shelf Lands Act, state law is borrowed as the applicable federal law when there is a gap in the coverage of federal law, as the Fifth Circuit has held, or whenever state law pertains to the subject matter of a lawsuit and is not preempted by inconsistent federal law, as the Ninth Circuit has held. The law at issue in the case is California state wage law. SOL communicated to DOJ that while our understanding aligns with the well-established Fifth Circuit precedent, DOI typically does not involve itself in disputes that are generally among private parties and when DOI does become involved, we are most likely to focus on case-by-case issues rather than on the application of universal principles. Here, there does not seem to be a substantial threat that the potential applicability of state law as a more general matter would cause problems for DOI efforts to carry out its particular mandates (it is primarily relevant to private party relationships). SOL will send attorneys to meetings this week that OSG has scheduled to hear the parties' arguments for why the United States should file an amicus brief on their behalf. The meetings are scheduled for January 23 and 25. DOJ is asking whether Interior will submit a recommendation letter regarding whether DOJ should file an amicus brief in this case. SOL plans to use the information learned at the meetings this week to help determine whether Interior should prepare and send such a recommendation letter to DOJ.

Northern Alaska Environmental Center et al. v. Ryan Zinke et al.
On December 6, 2018, the U.S. District Court for the District of Alaska granted Summary Judgment in favor of DOI in this action brought by a coalition of environmental groups pursuant to the National Environmental Policy Act and the Administrative Procedure Act. The Plaintiffs alleged that the Bureau of Land Management violated NEPA by purportedly holding its December 2017 NPR-A oil and gas lease sale without first preparing an EIS or EA or otherwise conducting an adequate assessment of the impacts of the sale. Judge Gleason held that the plaintiffs failed to demonstrate that BLM was required to conduct an EIS or EA specifically for the 2017 NPR-A lease sale. In doing so the court determined that BLM's programmatic 2012 NPR-A Integrated Activity Plan/EIS was adequate to comply with NEPA for multiple lease sales, and that plaintiffs had not raised a failure to supplement argument. As a result of the court's decision, BLM's issuance of 7 leases covering 80,000 acres was upheld. This lawsuit is similar to one filed the same day (Feb. 2) by another coalition of environmental groups (*Natural Resources Defense Council et al. v. Ryan Zinke et al*.), in which DOI also received a favorable Summary Judgment decision on December 6th. The Plaintiffs have announced an intent to appeal.

Texas v. New Mexico, No. 141 Orig.
On January 9, 2019, Special Master Melloy granted the United States' unopposed motion to vacate dates for filing responses and replies for existing motions and to extend discovery deadlines until after the government receives funding.

Atlantic Seismic Permits Injunction
On January 18, 2019, the U.S. District Court for South Carolina issued an injunction under the All Writs Act enjoining "Federal Defendants, BOEM, and any other federal agency or entity from taking action to promulgate permits, otherwise approve, or take any other official action regarding the pending permit applications for oil and gas surveys in the Atlantic" until after appropriations are restored and the court rules on certain motions. The case involves South Carolina's request to intervene in a challenge to the National Marine Fisheries Service's issuance of incidental harassment authorizations for geological and geophysical (G&G) surveys off the Atlantic coast. BOEM has yet to issue its permits for these activities and is not currently a party to the case. The court's language, while ambiguous, could be read to prevent BOEM from even conducting preparatory work on the pending Atlantic G&G permit applications while the injunction is in effect. BOEM has ceased preparatory work on the permit applications, in accordance with the court order. Interior is consulting with the Justice Department about seeking clarification of the court's order.

NON-LITIGATION MATTERS:

Oil Spill Response Exercise Fatalities
On Wednesday January 16, a tragic series of events led to two fatalities on a crew boat conducting a spill response training and equipment exercise for an Oil Spill Response Organization (MSRC) on the Mississippi River. The exercise was designed to satisfy BSEE regulatory requirements for periodic equipment and personnel deployment, but was initiated, organized, and directed by MSRC (not BSEE-initiated). A Senior Preparedness Analyst from the BSEE Oil Spill Preparedness Division attended the exercise as an observer and witnessed the events. She has been interviewed by the New Orleans Port Authority and a US Coast Guard investigator, and is preparing a written statement in consultation with the Office of the Solicitor.

BOR-Drought Contingency Plan
This week the Arizona legislature introduced a joint resolution authorizing the Director of the Arizona Department of Water Resources (ADWR) to sign off on a Lower Basin Drought Contingency Plan (LBDCP), as well as six companion bills regarding the intra-Arizona LBDCP, in an attempt to finalize Arizona's agreements by the January 31st deadline set by Commissioner Burman. The intra-Arizona LBDCP is comprised of a mitigation component for those impacted by water reductions under the DCP, an off-set component to replenish currently stored water in Lake Mead that is needed for mitigation, and a groundwater infrastructure program. The United States is a party to several of the intra-Arizona agreements and continues to work with ADWR and the Central Arizona Water Conservation District (CAWCD) to finalize the Arizona package by January 31, 2019.

BLM—Upcoming oil and gas lease sale support
The Salt Lake Office has been providing legal support to the BLM's Utah State Office as it prepares to issue leases sold during its December 2018 quarterly oil and gas lease sale, and to assist with BLM's preparations for its March 2019 lease sale.

ASSISTANT SECRETARY FOR FISH AND WILDLIFE AND PARKS

Week Ahead Schedule of Meetings, Hearings, and Travel

From January 28-February 1, Principal Deputy Assistant Secretary Andrea Travnicek will be in the office.

From January 28-February 1, Deputy Assistant Secretary Aurelia Skipwith will be in the office.

From January 28-February 1, Deputy Assistant Secretary Ryan Hambleton will be in the office.

From January 28-February 1, Acting Director Dan Smith will be in the office.

From January 28-February 1, FWS Principal Deputy Director Margaret Everson will be in the office.

Immediate Announcements and Actions For the Next Week

U.S. Fish and Wildlife Service

During the lapse in appropriations, most of the FWS offices, field stations, and other physical facilities will be closed to non-excepted employees and the public and most Service employees furloughed. Because of the Administration's priority on increased access, where public access to refuge lands does not require the presence of a federal employee or contractor, permitted activities on refuge lands will be allowed to continue. All areas with sensitive natural, cultural, historic or archaeological resources vulnerable to destruction, looting or other damage that cannot be adequately protected will be closed. However, FWS has some previously appropriated funding available; some of these funds are being used to resume work, for the next two pay periods, on high priority projects and activities in support of the FWS mission and on behalf of the American public. Examples of these funding uses include re-staffing certain refuges, maintaining work on some large-scale construction projects, and developing plans for prescribed burns in preparation for the upcoming fire season. FWS updated its contingency plan to reflect moving excepted employees to exempt status for two pay periods (2019-02 and 2019-03). FWS will re-evaluate this after these two pay periods.

For two pay periods:

- Re-staffing 38 National Wildlife Refuges for public use and/or resource management. These NWRs were chosen based on criteria including visitation during the month of January, opportunities, including hunting, that would otherwise be limited or unavailable during this time, and protection, management and security of public

resources. The re-staffing of these refuges will also bring economic benefits to local communities.

- FWS will continue work on large infrastructure projects that address both access and maintenance needs as well as storm damage from recent hurricanes. FWS is using previously appropriated funds to continue work on the construction projects and deferred maintenance and 2018 hurricane supplemental funds to work on storm damage projects. Generally each of these projects are in excess of $500,000.

- In addition to those employees who are already working for the safety and protection of life and resources, FWS reactivated employees to work on developing plans for prescribed burns in preparation for the upcoming fire season. This will allow FWS to stay on track to implement these fire plans.

- Increasing access to public lands is a priority of the Department and Service. In order to meet regulatory deadlines for next year's hunting season, it is important that work on proposed regulations continue over the next two pay periods. FWS is using carryover funds to continue work on streamlining regulations and bringing them in line with state regulations. This will increase coordination with our state fish and wildlife partners and provide transparency and clarity to hunters and anglers.

FWS is in the process of reactivating approximately 100 employees to work on high-priority projects throughout the country that are funded through reimbursable agreements with other entities, including other federal agencies that have funding available for the work.

National Park Service

Most National Park Service employees are furloughed with the exception of employees deemed essential for protection of life and property. Because of the Administration's priority on increased access, the NPS' open air memorials, park roads, lookouts, trails and other generally open areas will remain accessible to visitors during a lapse, though NPS will only provide limited visitor services. Where appropriate, NPS will also allow concessioners, commercial use authorization holders, and other third parties to continue operations. NPS will also accept donations from third parties (including states, friends' groups, and others) to continue operations. On January 5, 2019, the Acting Secretary of the Interior instructed the NPS to use FLREA funds to continue operations, where appropriate, on a limited basis to provide for the protection and cleanliness of resources, manage conflict issues, and provide basic visitor services. Parks that have begun using these funds include the National Mall, Grand Canyon, Sequoia-King's Canyon, Joshua Tree, and the Statue of Liberty. In addition to basic visitor services at these and other parks, NPS is reviewing the potential use of FLREA funds for other activities related to rudimentary visitor services or resource protection.

8-30 Day Outlook

U.S. Fish and Wildlife Service

ONGOING ITEMS

A proposed change to the implementing regulations for the Migratory Bird Treaty Act (MBTA) is expected to clear DOI. The rule: 1) defines the scope of the MBTA as it applies to conduct resulting in the injury or death of protected migratory birds and 2) reduces permitting burdens by modifying existing permit exceptions and proposing new ones. This proposed regulation will be consistent with the Department Solicitor's Opinion M–37050. After clearing DOI, the rule has to go to OMB-OIRA for interagency review, which usually takes 90 days. FWS will coordinate with DOI regarding outreach. (Updated 12/19/2018)

FWS plans to publish the FY 2016 Recovery Report to Congress. The Recovery Report provides an update on the progress of federally protected species toward recovery between October 1, 2014, and September 30, 2016 (fiscal years 2015 and 2016). FWS does not anticipate controversy or opposition to the report. Planned outreach will include congressional notifications and posting the report to the web. (Updated 12/19/2018)

FWS will host information webinars outlining next steps in developing a 12-month finding on a petition to list the monarch butterfly under the Endangered Species Act. Attendees include state agency directors and tribal staff. FWS was petitioned to list the monarch in 2014 and issued a positive 90-day finding indicating the petition was substantial. FWS has finalized a species status assessment and is evaluating the monarch conservation database and other information to determine whether listing the monarch is warranted. The 12-month finding is due June 30, 2019. (Updated 12/19/2018)

FWS plans to publish a proposed rule to allow the baiting of brown bears on Kenai NWR, which is permitted under Alaska state hunting regulations. The rule would also allow the discharge of firearms along the Kenai and Russian rivers during certain times of the year; allow the use of snowmobiles, all-terrain vehicles, and utility task vehicles on certain lakes when there is adequate snow and ice cover; and increase access to the refuge by bicycle and game cart. This proposed rule would be available for a 60-day public comment period and is likely to be strongly opposed by those who believe that baiting of wildlife for hunting is unethical or who oppose hunting (particularly of large predatory mammals). FWS plans to notify stakeholders directly by email and issue a news release to Alaska media announcing the proposed rule and public comment period. (Updated 11/21/2018)

FWS and the National Fish and Wildlife Foundation (NFWF) will announce the final allocations for the first round of Delaware River Basin Conservation Act grants, appropriated by Congress in FY 2018. More than $6.4 million in grant applications was received and the review committee of partners named in the Act approved a final slate of $4.1 million with a non-federal match of $7.5 million. The grants will restore 626 acres of wetland habitat and 549 acres of floodplain; increase public access on 1,794 acres; create 32 new jobs; and leverage more than 3,000 volunteers in project delivery. NFWF conducted fiscal notifications

to Congress on November 16, with a 30-day response time. FWS and NFWF will notify grantees and coordinate a rollout event in January. (11/28/2018)

FWS plans to publish the FY 2017 Federal and State Endangered and Threatened Species Expenditures Report to Congress. This report provides a compilation of reasonably identifiable expenditures for the conservation of listed species reported independently by federal and state agencies. Expenditures are reported for species that were listed during FY 2017 through September 30, 2017. FWS does not anticipate opposition to the report. Planned outreach includes congressional notifications and posting the report to the FWS website.

Species	**Action**	**Current Status**	**Previously Proposed Date**
Tri-spot darter	Final listing determination, proposed 4(d) rule, and proposed critical habitat	Cleared DOI	Week of December 24
Southern Selkirk Mountain woodland caribou	Final determination of proposed relcassification as distinct population segment; list as endangered	Pending DOI clearance	Week of December 24
Meltwater lednian stonefly Western glacier stonefly	Final listing determination	Pending DOI clearance	Week of December 24
26 draft recovery plan amendments for 42 species	Draft recovery plans	Pending DOI clearance	Week of December 24
Eastern massasauga rattlesnake	Availability of draft recovery plan		On or around January 2
Endangered distinct population segment of Atlantic salmon in the Gulf of Maine	Updated final recovery plan		By January 15
Second batch of 29 draft recovery plan			On or around January 7

amendments for 42 species			
Barrens topminnow	Final listing determination		On or around January 25
Panama City crayfish	Six-month extension of the final determination of whether to list as a result of substantial scientific disagreement concerning the species; also reopen the comment period on the proposed rule to list the species for an additional 30 days		On or around January 25
Franklin's bumble bee	Proposed listing determination determined that critical habitat designation for this species is not prudent		On or around January 31
Jaguar	Announcement of the completion of the final recovery plan for the jaguar		On or around January 10
Macaw	final determination on a proposed rule to list the scarlet macaw, *Ara macao cyanoptera,* as endangered; list the northern distinct population segment (DPS) of *A. m. macao* as threatened; and list the southern DPS of *A. m. macao*		On or around January 14,

	and subspecies crosses as threatened based on similarity of appearance to *A. m. cyanoptera* and *A. m. macao*; will include a 4(d) rule that will allow for the import and export as well as interstate commerce of certain scarlet macaws without a permit.		
Fisher, West Coast distinct population segment	Notice reopening the comment period for the proposal to list as a threatened species		On or about January 14
California condor in northern California and Oregon	Proposal to designate a nonessential experimental population to help meet recovery goals for the species		On or around January 15
Borax lake chub	Proposed delisting determination due to recovery		On or around January 18
Running buffalo clover	Proposed delisting determination		On or around January 18
Gray wolf	Proposal to delist due to recovery. This proposed rule does not have any effect on the separate listing of the Mexican wolf as endangered under the ESA.		On or around January 31
Arizona eryngo	90-day findings on petitions to list		On or around January 31

Dunes sagebrush lizard Giraffe Refugio manzanita San Gabriel chestnut snail			
Neuse River waterdog Carolina madtom	12-month finding, proposed listing determination, and proposed critical habitat designation		On or around January 31

National Park Service

ONGOING ITEMS

The revisions to the NPS proposed rulemaking, *Demonstrations and Special Events on the National Mall and Memorial Parks*, are nearing completion. On November 21, the Office of Management and Budget (OMB) determined that the rulemaking was significant under Executive Order 12866 due to its "novel legal or policy issues." As a result, the final rule will be reviewed by OMB for up to 90 days. The proposed rulemaking modifies how the NPS processes permit applications for demonstrations and special events. The rulemaking also identifies locations where activities are allowed, not allowed, or allowed but subject to restrictions. During the 60-day public comment period, which closed on October 15, the NPS received 140,652 comments.

The NPS expects to publish a proposed rule that would revise regulations governing the listing of properties in the National Register of Historic Places. The proposed changes would implement the 2016 Amendments to the National Historic Preservation Act, extend the timeline for the Keeper to respond to appeals, and ensure that if the owners of a majority of the land area in a proposed historic district object to listing, the proposed district will not be listed over their objections. The rule would also make several minor, non-substantive changes to existing regulations. The package for approval of the Federal Register notice is going through the surname process and is currently with the Office of the Assistant Secretary for Fish and Wildlife and Parks.

Isle Royale National Park will implement phase two of the Wolf Relocation effort to the island. Between four and six wolves from Michipicoten Island in Ontario, Canada, will be captured by a company using net guns contracted by the Ministry of Natural Resources and Forestry for Ontario. The animals will be medically examined by NPS wildlife veterinarians on Michipicoten Island, then transported via helicopter to a remote section of the park where they will be then collared and released. This is the second operation as part of the three- to

five- year plan to relocate 20 – 30 wolves to Isle Royale in order to restore predation to the ecosystem.

On February 4, the Acadia National Park Advisory Commission will hold a public meeting in Bar Harbor, Maine. The commission advises the Secretary and the NPS on matters relating to the management and development of the park. The committees under the commission will report out on topics such as park use, science, and education. The commission has also been approved to meet on June 3 and September 9. Decision to postpone will be made on February 1.

The NPS Alaska Region anticipates completing the response to comments on the Alaska Sport Hunting and Trapping proposed rule and environmental assessment. On December 14, NPS awarded a contract to one of two vendors who bid to conduct the comment summary. While the contractor has been reviewing and cataloging comments during the appropriations lapse, NPS has been unable to begin drafting responses to significant comments that have come in.

Fire Island National Seashore plans to implement the first phase of its Deer Management Plan. The plan was approved through a Record of Decision in April 2016. The U.S. Department of Agriculture Animal and Plant Health Inspection Service will carry out the first phase at the William Floyd Estate, a unit of the Seashore. The Estate is closed to the public however, protests are anticipated near the Estate and/or at the Seashore's Headquarters. Regional and, potentially, national press coverage is expected.

Originally scheduled for on or around January 9, Golden Gate National Recreation Area plans to announce the prospectus release for the business opportunity to operate food and beverage and retail services at Muir Woods National Monument. A one-day site visit was scheduled to be provided to interested parties on February 6.

Yellowstone National Park plans to release a Finding of No Significant Impact (FONSI) for a project to replace the Lewis River Bridge located just south of Lewis Lake on the South Entrance Road within the park. This project would include replacing the existing bridge, built in 1960, on a new alignment adjacent to, and east of, the existing bridge. The project would also reconstruct associated parking areas and turnouts located at three corners of the new bridge. The existing bridge was listed as Category B in the latest bridge safety inspection on 9/26/14, which means it is seriously deficient or presents a safety hazard, but may remain in service at reduced loads with frequent inspections. The NPS prepared an Environmental Assessment for this project that was on public review for 30 days, ending November 30, 2018. During this time 11 comments were received. The proposed project is scheduled for construction in 2020-2022.

Lake Roosevelt National Recreation Area plans to announce selection of the concessioner to operate the Kettle Falls Marina under a new 10-year concession contract.

In February, the prospectus for glacier landing air taxis and scenic tours at Denali National Park and Preserve will close. This solicitation was issued on November 8 for four concession contracts, with a 10-year term of January 1, 2020, to December 31, 2029.

NPS Midwest Region staff will attend a consultation meeting with the Tribal Council of the Prairie Island Indian Community Tribal Historic Preservation Office. The Tribal Council requested this consultation to discuss the Coldwater Springs sacred site, which is located in the Recreation Area.

San Francisco Maritime National Historical Park will host an event in the Maritime Museum to mark the 80th anniversary of the Aquatic Park Bathhouse's construction. In addition to public programs, an event will showcase the installation of a plaque on the building which commemorates its designation as the *Sala Burton Building* in the park's enabling legislation. Members of the late Representative Sala Burton's family and Speaker Nancy Pelosi are invited to attend.

Wrangell-St. Elias National Park and Preserve will conduct the next scheduled listening session in Kenny Lake, Alaska, a community local to the park. In February through April, additional listening sessions will be scheduled for the following local communities: Chistochina, Fairbanks, Gakona, Glennallen, Mentasta, and Tazlina. A news release will announce the dates, times, and specific venues of the above mentioned locations. Beginning June 26, 2018, Wrangell-St. Elias National Park and Preserve conducted a series of public listening sessions to engage resident zone communities and federally recognized tribal governments in discussions about management of wilderness, frontcountry and backcountry areas within the park. Specific locations were: Copper Center, Chitina, Slana, and McCarthy/Kennecott.

ASSISTANT SECRETARY FOR INDIAN AFFAIRS

Week Ahead Schedule of Meetings, Hearings, and Travel

Assistant Secretary Tara Sweeney is in the office.

Principal Deputy Assistant Secretary John Tahsuda is in the office.

Deputy Assistant Secretary Mark Cruz is in the office.

Deputy Assistant Secretary - Management Jason Freihage is in the office.

Acting Bureau of Indian Affairs (BIA) Director Darryl LaCounte will be in Billings, Montana, but will be available as needed.

BIA Deputy Director - Field Operations Jim James will be in the Albuquerque, New Mexico, office but will be available as needed.

Chief of Staff Rich Myers will be available as needed.

BIE Director Tony Dearman will be in Anadarko, Oklahoma, but will be available as needed.

Immediate Announcements and Actions For the Next Week

Assistant Secretary for Indian Affairs

The AS-IA will begin approval process for Office of Justice Services to begin hiring new officers.

Bureau of Indian Affairs

The BIA will move about 25 employees nationwide from furlough to excepted status, and an additional 25 employees from furlough to exempt status. The employees moved to excepted status will continue processing: 1) distribution of remaining FY18 self-determination contract funds to tribes; 2) distribution of Wind River Tribe oil and gas revenue per capita funds; 3) in coordination with the Office of the Special Trustee, distribution of elderly per capita funds to the Colville and Warm Springs Tribes; and 4) other necessary tasks of short duration. The employees moved to exempt status will begin processing necessary tasks of longer duration, including approval of revenue-producing leases and timber sales (for individual Indians and tribes); processing of lockbox payments and other payments requiring manual processing; and most importantly, child care services (such as foster care payments, home visits, and processing placements and other interactions with state agencies).

Bureau of Indian Education

The BIE will ask the Office of the Federal Register to publish as soon as possible a Notice of Public Meeting for the fourth and final Standards, Assessments and Accountability Negotiated Rulemaking Committee. The basis for this request is that the Committee's activities support currently funded BIE and that delaying publication would prevent or damage the execution of those functions.

8-30 Day Outlook

Assistant Secretary for Indian Affairs

ONGOING ITEMS

The AS-IA and exempted and excepted senior staff continue to hold daily conference calls to address issues related to the execution of an orderly government shutdown and the preservation of property, health and safety in Indian Country.

Bureau of Indian Affairs

ONGOING ITEMS

The BIA Acting Director and Regional Directors (excepted staff) continue to hold conference calls every other day to address issues related to the execution of an orderly government shutdown and the preservation of property, health and safety in Indian Country.

Bureau of Indian Education

UPDATED ITEMS

The Navajo Nation retroceded the operation of the Borrego Pass School to the BIE, which has operated the school since January 3, 2019. The BIE is currently advertising teacher and other positions for permanent employment at the school.

The merger of the Santa Rosa Ranch and Santa Rosa Day schools on the Tohono O'odham Reservation in Arizona was successful and students from both schools returned to class after Christmas Break at the Day School on January 8. The target date for installation of modular classrooms and the resumption of class at the Santa Rosa Ranch School is on track for March, 2019. On January 24th ASIA will meet with the incoming professional project manager who will oversee the installation of modular buildings at the Santa Rosa Ranch School.

ASSISTANT SECRETARY INSULAR AND INTERNATIONAL AFFAIRS

Week Ahead Schedule of Meetings, Hearings, and Travel

TRAVEL

All planned travel has been suspended.

ASIIA Domenech is exempt and in the office next week.
OIA Director Pula is exempt and in the office next week.
INT Director Karen Senhadji is on furlough.
Sarah Jorgenson, Senior Advisor, is exempt and in the office next week.
Oceans Program Coordinator Liza Johnson is out on furlough/maternity leave until March 29.

Immediate Announcements and Actions for the Next Week

AS-IIA Programs Operating During the Shutdown: The Office of Insular Affairs has brought back 18 International Affairs ITAP staff to be exempt due to available permanent funding from USAID and State Department Projects from the previous fiscal year. Eight other International Affairs staff remain on furlough status. OIA policy analysis and program management activities involving previous obligated or mandatory funding have resumed. The Oceans Program Coordinator remains furloughed.

116th Congress Meetings/Action: Assistant Secretary Domenech is scheduled for the following courtesy meetings with the Congressional Delegates (pending approval from OCL):
-Thursday, January 24 - Congressman Sablan (CNMI)
-Monday, January 28 - Congressman San Nicolas (Guam)
-Tuesday, January 29 - Congresswoman Radewagen (American Samoa)
(A scheduled meeting with Congresswoman Plaskett (USVI) is expected soon.)

Guam Section 30 Funding: Next week, AS-IIA will discuss Guam Section 30 funding with the new Guam leadership to determine if the payment will be made now or if the payment will be applied in September against the $12 million offset for the Guam War Claims Fund. OIA staff completed an analysis on a request received during the shutdown from Guam for additional Section 30 funding in the amount of $6 million that IRS has indicated is owed to them. The source of funds for the Guam Section 30 payment is permanent indefinite rather than annual appropriations.

UPDATE. Insular Grants: OIA grant managers continue to review requests for payments that have been received during the shutdown and are processing payments when appropriate for grants that were previously obligated. A list of payments/draw-downs against existing grant awards can be found below.
In addition, OIA grant managers are reviewing needs for ongoing grants for items such as health, safety, and other urgent matters to determine if any short term grants need to be awarded during the next few weeks. Capital Improvement Program grant managers continue to assess performance and determine competitive criteria for future years' budgets.

<u>COMPACT/COMPACT IMPACT (Mandatory Funding)</u>
-$8,245,121 - Guam Compact Impact: Operations Offsets Related to Education
-$86,112.11 - Guam Compact Impact: Operations Offsets - Department of Public Health & Social Services
-$2,019,724 - Federated States of Micronesia Compact payments for education, health and infrastructure
<u>CAPITAL IMPROVEMENT PROGRAM (Mandatory Funding)</u>
-$25,000 - Guam Capital Improvement: Puerto Rico Dump Post-closure Monitoring Services
-$84,242.49 - CNMI Capital Improvement: Commonwealth Utilities Corporation Stipulated Order No. 2 Projects
-$73,203.34 - Capital Improvement Program, American Samoa Shipyard Authority, Slipway Renovation Project
<u>ENERGIZING INSULAR COMMUNITIES</u>
-$26,976.25 - Guam Energizing Insular Communities: Guam Power Authority Wind Turbine Project

TECHNICAL ASSISTANCE PROGRAM
-$72,051.70 - U.S. Virgin Islands Technical Assistance: Virgin Islands Housing Authority Youth Build, Virgin Islands Bureau of Economic Research 2017 Virgin Islands Consumer Price Index
-$4,150 - Republic of the Marshall Islands Technical Assistance: Marshallese Education Initiative Community Advancement
-$20,993.87 - General Technical Assistance: Partners in Development We Are Oceania, Pacific Islands Ocean Observing System Atmospheric and Wave Forecasts
-$10,997 - Technical Assistance: Guam Police Department Neighborhood Watch Program Outreach
-$14,430 - Technical Assistance: Guam Fire Department Hazmat Equipment Procurement
-$8,604.39 - Technical Assistance: American Samoa Cancer Patient Navigator Program
-$15,570.07 - Technical Assistance: Boys and Girls Club of American Samoa Youth in Action Program.
-$13,814 CNMI Technical Assistance: Invasive Species Coordinator
-$17,758 CNMI Technical Assistance: Contract Worker Survey
-$33,000 CNMI Technical Assistance: Coconut Rhinoceros Beetle Detection, Eradication and Preventative Measures
MAINTENANCE ASSISTANCE PROGRAM
-$2,400 - Maintenance Assistance: American Samoa Shipyard Apprenticeship Program
BROWN TREESNAKE PROGRAM
-$17,798.18 - Brown Treesnake Program: CNMI Brown Treesnake Interdiction Program
CORAL REEF AND NATURAL RESOURCES
-$16,871.09 - FSM Coral Reef/Natural Resources Invasive Species: Kosrae Association of Tourism Operators for Eradication of Crown of Thorns Starfish

UPDATE. Graduate School USA Activities in January:
January 28-31, 2019: Developing Interim Procurement Regulations, Majuro, RMI.
January 28-31, 2019: Preparing for the Year-End Close for Government, American Samoa.

Medicaid and CHIP Payment Access Commission (MACPAC) Meeting Regarding Territories: On January 23, officials from MACPAC, a non-partisan legislative branch agency that provides policy and data analysis and recommendations to Congress, Health and Human Services, and the states (or territories) on a wide array of issues affecting Medicaid and the State Children's Health Insurance Program will have a meeting to discuss Medicaid and the U.S. territories as well as the possibility of giving a presentation at the upcoming IGIA.

RAND Draft Report on the Freely Associated States and Chinese Influence: OIA staff will provide comments on a draft RAND report on the Freely Associate States and Chinese influence by January 31. As required under the 2018 National Defense Authorization Act, the Department of Defense is required to contract a study and assessment of U.S. security and foreign policy interests in the Federated States of Micronesia, the Republic of Palau, and the Republic of the Marshall Islands. The deadline for submission of this report, previously due December 1, 2018, has been extended to January 31, 2019.

8-30 Day Outlook

NEW ITEMS

OIA UPCOMING SIGNIFICANT TRAVEL (Pending the end of the shutdown):
2/17-18. Chuuk, FSM. 75th Anniversary of "Operation Hailstone" WWII. At the request of the State Department, INDOPACOM, and NSC, AS-IIA Domenech and OIA Director Pula are planning to attend so long as the shutdown has concluded.

Graduate School USA Activities in February: Next month, OIA will host the following training courses under a previously awarded contract:
February 4-7, 2019: Developing Corrective Action Plans, Majuro, RMI.
February 8, 2019: Practical Ethics for Government Employees, Majuro, RMI.
February 19-22, 2019: Innovation without Additional Resources, Koror, Palau.
February 11-15, 2019: Twenty seven insular government representatives will continue their participation in the Executive Leadership Development Program through Session III in Yap, Federated States of Micronesia (FSM). This Program will focus on a case study of a fictional government facing a variety of challenges common to the Pacific island governments.

Yap State Finance Office Consultations: During the week of February 11, financial experts from Graduate School USA will work with the Yap State Department of Finance and Administration in response to recent requests and by way of follow-up to several Island Government Finance Officers' Association (IGFOA) Winter Meeting initiatives. Topics include tracking finance office procurement measures, addressing FY17 audit findings, working with the current financial management information system (Fundware), and discussing procurement needs for new financial management information systems (a World Bank-funded FSM national initiative).

Yap State School Designs: OIA staff are anticipating awarding a $1.3 million Compact grant for the design of three school facilities in the Federated States of Micronesia, Yap State.

UPDATED ITEMS

UPDATE. CNMI Governor Scheduled to Meet with DHS/OMB Regarding Parole Visa Policies Relating to the Commonwealth of the Northern Mariana Islands (CNMI) and Guam: It is our understanding that Governor Torres is planning to schedule a meeting with DHS/OMB to take place around NGA/IGIA in February to discuss the proposed notice regarding the rescission of discretionary parole visa policies relating to nationals of the People's Republic of China and the Russian Federation seeking entry into Guam and/or the Commonwealth of the Northern Mariana Islands. Related to this, CNMI has written the President requesting formal Section 902 consultations on the issue. That letter has been forwarded to OIA for response, which OIA has drafted and will finalize for review.

UPDATE. OIA, U.S. Dept. of Energy and Commonwealth Utilities Corporation to Develop Energy Plan for CNMI as required by FEMA: OIA staff coordinated a

conference call with CNMI officials from the U.S. Department of Energy and Commonwealth Utilities Corporation (CUC) in an effort to assist CUC with putting together an energy recovery plan as well as sharing lessons learned from VI WAPA in preparedness and response to hurricanes that have impacted the Caribbean Islands. A follow-up conference call will take place in February to include Mr. Clinton Hedrington at VI WAPA, who has been specifically working with DOE and FEMA in USVI's resilience efforts. In addition, the DOE team agreed to review CUC's draft recovery plan, provide expertise from the National Energy Labs, and to visit CNMI and meet with the CUC team.

UPDATE. U.S. Government-Wide Comprehensive Report on Federal Grants to U.S. Insular Areas: OIA staff have been in contact with the former HHS staffer that managed the insular areas federal grants project, and he has agreed to assist in training OIA staff and to provide his procedural documents. OIA staff is working with him to set dates for training. OIA staff are working to take over an existing database from HHS and gather information from across the federal government on federal grants to U.S. insular areas. Completion is targeted for March of 2019.

POWER UPDATE. Typhoon Yutu Recovery: OIA staff continue to work with FEMA and local officials on typhoon recovery in CNMI. UPDATE: Power has been restored to 82% of homes on Saipan and 63% of the homes on Tinian.

ONGOING ITEMS

ON TRACK. 2019 Interagency Group on Insular Areas (IGIA) Senior Plenary Session: The 2019 IGIA Senior Plenary Session to be held on February 25, 2019, between 1:30 p.m. and 4:30 p.m. at the EEOB. The Secretary of the Interior is a co-chair of the event. It has been confirmed that Guam Governor "Lou" Leon Guerrero will attend NGA and IGIA next month, and she and her staff will also meet with AS-IIA Domenech and OIA Director Pula when she is in town. AS-IIA has been in close contact with White House Intergovernmental Affairs regarding the planning and a contingency plan should the shutdown continue through the planned IGIA date. OIA staff reached out to Governors Moliga, Torres, and Bryan's Chiefs of Staff regarding their attendance to the Plenary Session. OIA will be sending an update to the Congressional Delegates pending OCL's approval.

NO CHANGE. Winter Meeting of the Coral Reef Task Force (CRTF): The CRTF working group meetings (including the federal meeting and steering committee meeting) will occur on 2/19-2/20 at the Silver Spring Civic Center, and the business meeting and executive lunch will take place on 2/21 at EPA HQ. Pending shutdown status.

NO CHANGE. CNMI Tinian Dynasty DOJ Judgement: SOL continues to research issues related to this facility which was the subject of a (June 3, 2015) Financial Crimes Enforcement Network, Department of the Treasury, assessed $75 million civil money penalty against Hong Kong Entertainment (Overseas) Investments, Ltd., for willful and egregious violations of the Bank Secrecy Act. Specifically, as described in the assessment, Tinian Dynasty failed to develop and implement an anti-money laundering (AML) program.

ON HOLD. Census Compact Surveys: Analysis of census data on hold. With funding from OIA, the U.S. Census began its work in Guam and the Commonwealth of the Northern Mariana Islands (CNMI) as part of the next five-year enumeration of migrants from the freely associated states (FAS) in Hawaii, Guam, the CNMI and American Samoa, as required by the Compact of Free Association (Public Law 108-188). Surveys are expected to be completed by May 2019.

NO CHANGE. Secretarial Appointments to the Board of Trustees for the Conservation Trust of Puerto Rico: The Assistant Secretary, who represents the Secretary on the Trust Advisory Council, is working with the White House Liaison to identify three Trustees to serve starting April 2019. Under the charter, two Trustees must reside in Puerto Rico, and one in the States. They are jointly appointed by the Secretary and the Governor of Puerto Rico.

Upcoming International Travel:

No international travel by senior officials is known.

Additional Known International Travel, Employees Departing January and February 2019 is unknown.

International Memoranda of Understanding and Documents Under Development:

NO CHANGE. The Netherlands: MOU on offshore wind energy cooperation, in surname. Requested by BOEM and Dutch counterparts, for signature by BOEM/ASLM, TBD, in conjunction with a potential visit to the U.S. by the Dutch Prime Minister early 2019. INT was supporting BOEM as needed. BOEM to sign.

NO CHANGE. New Zealand: MOU on wildland fire cooperation, in development. Requested by DOI and USDA to update existing wildfire arrangement, and continue mutual assistance on wildfires as needed, for signature by the U.S. Ambassador to New Zealand in early 2019 by U.S. Embassy New Zealand. INT was coordinating with Office of Wildland Fire, as they worked with New Zealand counterparts and the Departments of Agriculture and State.

NO CHANGE. Norway: MOU on energy cooperation, in development. Requested by DOI Energy Counselor and Deputy Chief of Staff, for signature by BOEM/ASLM, TBD. INT was supporting BOEM as needed, and BOEM is working with Norwegian counterparts and Department of State. BOEM is reviewing recent Norwegian revisions.

NO CHANGE. Vietnam: MOU to strengthen cooperation on law enforcement to combat wildlife trafficking, in development. Requested by FWS law enforcement, Department of State, and Vietnamese counterpart, for ASFWS/FWS signature when the Vietnamese counterpart travels to Washington, DC, in 2019. INT was coordinating with FWS Office of Law Enforcement.

AWARENESS

President's Advisory Commission on Asian American and Pacific Islanders: On January 17, President Trump announced his intent to appoint the following individuals to be Members of the President's Advisory Commission on Asian Americans and Pacific Islanders. David B. Cohen of California (former DAS-IN under President George W. Bush) was appointed, along with Rep. Amata Coleman Radewagen of American Samoa.

President Trump also announced his intent to designate the Honorable Elaine L. Chao to be Co-Chair of the White House Initiative on Asian Americans and Pacific Islanders.

Supplemental Appropriations FY 2019: On January 17, the House of Representatives passed H.R. 268, a supplemental appropriations bill for disaster relief (i.e. hurricanes, typhoons, wildland fire). The Office of Insular Affairs received $2 million for Technical Assistance for financial management expenses related to the consequences of Typhoon Yutu. In addition, two amendments offered by Congressman Sablan and one amendment offered by Congresswoman Radewagen were adopted:

1. to increase funding for the Marianas food stamps block grant by $15 million to cover the cost of households, not previously eligible for aid, who remain in need of assistance because of continuing income loss after Typhoon Mangkhut and Super Typhoon Yutu;
2. to increase the funding for the Northern Marianas Medicaid program by $16 million to help the islands in recovery from Typhoon Mangkhut and Super Typhoon Yutu; and
3. to increase the amount of nutritional assistance appropriated in Sec. 101 by $5 million.

The Senate is expected to include this bill in a larger omnibus package on immigration/border wall funding.

Bribery Charge: On January 16, 2019, in the U.S. District Court of Hawaii, charges were filed against a contractor for conspiracy to violate the Foreign Corrupt Practices Act and to pay a bribe to an agent of an organization receiving federal funds. The Honolulu-based contractor allegedly bribed Hawaii Government officials in order to land a $2.5 million contract. He is also accused of bribing Federated States of Micronesia officials with at least $200,000 in order to get $7.8 million in FAA contract payments. The bribes came in the form of vehicles, gifts, and entertainment for officials, and were falsely classified as business expenses. OIA staff have cooperated with authorities on this investigation.

NPS Supplemental Historic Preservation Fund: The National Park Service has approved $10,000,000 for historic preservation in the U.S. Virgin Islands. NPS initially planned to give USVI $5.6M while USVI requested $19.8M. These funds must be spent this fiscal year.

ASSISTANT SECRETARY FOR LAND AND MINERALS MANAGEMENT

Week Ahead Schedule of Meetings, Hearings, and Travel

Assistant Secretary for Land and Minerals Management Joe Balash will be in the office.

Principal Deputy Assistant Secretary Casey Hammond will be in the office.

Deputy Assistant Secretary Gary Lawkowski will be in the office.

Immediate Announcements and Actions for the Next Week

Bureau of Land Management

FOR AWARENESS: On January 11, 2019, the BLM modified its contingency plan governing a lapse in appropriations. The BLM is continuing to bring back employees to prepare for the March and June oil and gas sales in WY, CO, MT/DK, UT, and NM. Employees are also being brought back to assist with the processing of grazing related items through the use of available carryover funds. APDs are continuing to be processed, as they are fee-based activities. Special Recreation Permits (SRPs) are being processed and administered for over 30 events taking place on federal land. The BLM is bringing on employees to focus efforts on both ongoing post-fire treatments and fuels reduction projects to prepare for the 2019 wildfire season. Carryover and cost recovery funds are being used to continue work on a variety of projects ranging from solar and mining projects to transmission lines. Wild horses and burros continue to be fed and cared for both by BLM staff and through contract work. Timber sales are in process to begin in February 2019. BLM lands continue to be open to the public, and each State Office continues to coordinate trash collection and restroom maintenance where appropriate.

Late January-Early February. BLM-DC will issue guidance on temporarily modifying the grazing authorization and billing process. BLM states are foregoing the normal courtesy application and will distribute a letter that will serve as the annual authorization for the 2019 grazing year in order to turn out livestock in accordance with the terms and conditions that are specified on the permittees ten year grazing permit or lease. Once the lapse in appropriation has been resolved and the BLM range staff resumes their duties, the BLM will contact permittees in order to process any application and/or issue they might have about the grazing bill.

January 28. BLM-WY. The protest period for the Wyoming Greater Sage-Grouse Final EIS and Proposed RMP Amendments will close on January 28, 2019.

January 29. BLM-NV. BLM NV will announce the cancellation of its Northeastern Great Basin Resource Advisory Council meeting which was initially scheduled to occur January 30, 2019. The RAC meeting will be rescheduled at a later date.

January 30. BLM-ES. The 30 day comment period on the draft EA specific to the Addition of Terms and Conditions for Renewal of Hardrock Leases, MNES 001352 and MNES 001353, has been extended until January 30, 2019. This is due to two outages directly impacting the BLM's online ePlanning database server.

January 30. BLM-AK. The public comment period on a new Integrated Activity Plan (IAP) and associated Environmental Impact Statement (EIS) for the National Petroleum Reserve in Alaska (NPR-A) has been extended until January 30, 2019. This is due to two outages directly impacting the BLM's online ePlanning database server.

February 1-9. BLM-CA. The King of Hammers off road race- the second largest special recreation permit issued by the BLM – will take place at the Johnson Valley Off Highway Vehicle Recreation Area in San Bernardino County, California. The desert race event attracts approximately 50,000 spectators during the nine-day period.

February 1-3. BLM-AZ. The Colorado River District will host, through a Special Recreation Permit, the 2019 Best In The Desert Off-Highway Vehicle Race. The events are expected to attract 400 race participants and approximately 5,000 spectators. A temporary closure will be put in place on selected public lands in Arizona, east of Parker in La Paz County from Feb. 1-3, to minimize the risk of potential collisions with spectators and racers. (12/14/18)

Bureau of Ocean Energy Management

NEW ITEMS

Late January-Early February: BOEM intends to reopen the comment period and reschedule the public meetings for the Draft Environmental Impact Statement (DEIS) for the Construction and Operations Plan (COP) submitted by Vineyard Wind LLC. BOEM cancelled the previously scheduled public meetings on the DEIS. BOEM intends to use carry over funds to begin this process in late January, 2019.

8-30 Day Outlook

Bureau of Land Management

NEW ITEMS

Late January-Early February. BLM Oil and Gas Lease Sale Dates (State-by-State Breakdown). Each state office offering oil and gas lease sales have varying deadlines in order to meet their sale dates. As such, announcements will be arriving to the Department on a rolling basis. Below are the various deadlines (*subject to slight variations*) broken out for the March (quarter 1) and June (quarter 2) oil and gas sales. For awareness, due to budgetary constraints, BLM-ES, BLM-NV, and BLM-AZ will not be holding March lease sales.

BLM-CO. BLM CO has scheduled their first two quarterly oil and gas lease sales in 2019, March 28 and June 28. **March 28, 2019 CO Oil and gas lease sale** – 26 parcels totaling 14,000 acres. 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (November 16, 2018) - posted on website and press release; 30-day public protest period (for the Greater Sage-Grouse areas) - Began November 16, 2018 and concluded December 16, 2018; Two-week public review and comment period of the environmental documents -

Begins March 1 and conclude March 15, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting -March 23, 2019**;** One day prior to sale – Decision Record and Signed FONSI – March 27. **June 28, 2019 CO Oil and gas lease sale – 12 parcels totaling 4,800 acres –** 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (January 28, 2019) - posted on website and press release; 15-day public protest period - Began January 28, 2019 and concluded February 12, 2019; Two- week public review and comment period of the environmental documents - Begins March 11 conclude March 25, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting –June 26, 2019; One day prior to sale – Decision Record and Signed FONSI – June 27.

BLM-MT. BLM-MT has scheduled one quarterly oil and gas lease sales in 2019, March 2. We are awaiting a full schedule of the second quarterly sale, which is slated to take place in July. **March 21, 2019 MT Oil and gas lease sale – 322 parcels totaling 180,000 acres –** 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (November 20, 2018) - posted on website and press release; 30-day public protest period (for the Greater Sage-Grouse areas) - Began November 20, 2018 and concluded December 21, 2018; Two- week public review and comment period of the environmental documents – Begins January 25 and conclude February 8, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting -March 19, 2019**;** One day prior to sale – Decision Record and Signed FONSI – March 20.

BLM-NM. BM-NM has scheduled their first two quarterly oil and gas lease sales in 2019, March 28 and June 20. **March 28, 2019 NM Oil and gas lease sale - 55 parcels totaling 15,491 acres in NM & OK** – 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (September 28, 2018) - posted on website and press release; 10-day public protest period - Began October 5, 2018 and concluded October 9, 2018; Two- week public review and comment period of the environmental documents - Begins February 11 and conclude February 20, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting -March 26, 2019; One day prior to sale – Decision Record and Signed FONSI – March 27. **June 20, 2019 NM Oil and gas lease sale - 56 parcels in NM, KS, & OK –** 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (January 28) - posting on website and press release; 10-day public protest period - Begins January 28 and concludes February 8; Two- week public review and comment period of the environmental documents - Begins March 11 and conclude March 22, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting - June 18, 2019**;** One day prior to sale – Decision Record and Signed FONSI – June 19.

BLM UT. BLM-UT has scheduled their first two quarterly oil and gas lease sales in 2019, March 25-26 and June 10. **March 25-26, 2019 UT Oil and gas lease sale - 156 parcels totaling 217,000 acres –** 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (November 16, 2018) - posted on website and press release; 30-day public protest period (for the Greater Sage-Grouse areas) - Began November 16, 2018 and ends February 25, 2019;
Two- week public review and comment period of the environmental documents - Begins March 1 and concludes March 15, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting -March 23, 2019; One day prior to sale – Decision Record and Signed

FONSI – March 24. **June 10, 2019 UT Oil and gas lease sale - 24 parcels totaling 41,000 BLM acres; 12 parcels 27,000 Forest Service acres –** 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (January 25) - posted on website and press release; 30-day public protest period (for the Greater Sage-Grouse areas) - Begins January 25, 2019 and concludes February 25, 2019; Two- week public review and comment period of the environmental documents - Begins March 1 and conclude March 15, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting –June 8, 2019; One day prior to sale – Decision Record and Signed FONSI – June 9.

BLM WY. BLM-WY has scheduled the first two quarterly oil and gas lease sales in 2019, March 28 and June 20. In addition, parcels that were pulled from the December 2018 sale will be offered on February 25. **February 25, 2019 WY Oil and gas lease sale - 568 parcels totaling 768,000 acres –** 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (December 21, 2018) - posted on website and press release**;** Public Notification of Supplementary Competitive Oil and Gas Lease Sale (December 21, 2018) - to comply with a District Court Order - posted on website and press release**;** 30-day public protest period (for the Greater Sage-Grouse areas) - Begins December 21, 2018 and concludes January 22, 2019; Two- week public review and comment period of the environmental documents - Begins February 11 and conclude February 20, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting -February 23, 2019**;** One day prior to sale – Decision Record and Signed FONSI – February 24, 2019. **March 19-20, 2019 WY Oil and gas lease sale - 146 parcels totaling 163,000 acres –** 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (November 13, 2018) - posted on website and press release**;** 30-day public protest period (for the Greater Sage-Grouse areas) - Began November 13, 2018 and concluded December 13, 2018;
Two- week public review and comment period of the environmental documents - Begins February 24 and conclude March 8, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting -March 17, 2019; One day prior to sale – Decision Record and Signed FONSI – March 18, 2019. **June 2019 WY Oil and gas lease sale –** 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (November 13, 2018) - posted on website and press release; 30-day public protest period (for the Greater Sage-Grouse areas) - Began November 13, 2018 and concluded December 13, 2018; Two- week public review and comment period of the environmental documents - Begins February 24 and conclude March 8, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting - March 17, 2019**;** One day prior to sale – Decision Record and Signed FONSI – June 2019.

UPDATED ITEMS

February 7. BLM MT/DK. On Nov. 8, 2018, Native Ecosystems Council (NEC) served the U.S. Attorney's office (USA) with a civil lawsuit under the Administrative Procedures Act regarding four watershed decisions by BLM in southwest Montana. NEC is seeking, among other things, to enjoin the implementation of these Dillon Field Office watershed decisions that include 226,852 acres of public land. The USA, working with the Field Office, will need to reply to the 151 complaints until February 7, 2019 (a continuance was granted by the court). NEC previously appealed the final decisions for each of these watersheds between 2014 and 2017, but the appeals were dismissed by IBLA due to lack of standing because

NEC could not show that they had been on the public lands in these watersheds. Cumulatively, the watershed decisions proposed 30,599 acres of non-commercial mechanical/prescribed fire treatments to reduce hazardous fuel loading and restore sagebrush steppe, aspen, and five-needle pine. In addition, the decisions include 3,787 acres of commercial timber sales (some which have already been sold) to improve forest health and resiliency and salvage dead and dying timber; more than 27 miles of riparian conifer treatment, along with other riparian enhancement projects; renewing/revising term grazing permits/leases for 104 allotments (which have been renewed); dozens of range improvement projects (many of which have been implemented); travel management revisions/corrections; and noxious and invasive weed treatments. (11/23/18)

ONGOING ITEMS

February 4. BLM-CO. The comment period for the Grand Junction Field Office Notice of Realty Action to convey 188.04 acres to the Grand Junction Regional Airport to accommodate a second runway ends on February 4, 2019. The conveyance is in conformance with the Grand Junction RMP. The Federal Register Notice was posted on December 21, 2018. (9/11/18) DTS 2411

February 7. BLM-NM. The OK, KS, TX Joint Resource Management Plan comment period will end on February 7, 2019. Public meetings previously scheduled to be held between January 14, 2019 and January 25, 2019 across the OKT planning area were cancelled. BLM-NM intends to reschedule at a later date.

February 11. BLM-AK. The comment period Coastal Plain Oil and Gas Leasing Program Draft EIS closes on February 11, 2019.

February 17. BLM-NV. The competitive bidding process for the Spring Mountain Raceway modified land sale ran from January 10 to January 17, 2019. Due to the availability of cost recovery funds, the BLM will be able to complete the land sale by February 17, 2019. A 30-day public scoping period for the planning initiative, and a 45-day public comment period on the proposed sale of public land opened July 30, 2018 and will close August 28, 2018, and September 12, 2018, respectively. If the RMP amendment is approved, two modified competitive sales for not less than the appraised fair market value are anticipated to take place. Approximately 68 of the 621 acres under consideration require cadastral survey. The BLM proposes to dispose of approximately 553 acres in phase one, and the remaining 68 acres in phase two after the survey is completed.

February 19. BLM-UT. BLM –UT will respond to any oil and gas protests by February 19 to meet the 60 days requirement from the December 18, 2018 lease sale as well as sign the Decision Record/FONSI to allow the leases to be issued.

Mid-February. BLM-ID. The comment period for the Pocatello Field Office's Dairy Syncline Mine Project EIS will close on February 21, 2019.

Mid-February. BLM-OR. The Medford District will hold a timber sale auction in mid-February. The sales will be fully ready to offer at the next regularly scheduled timber sale auction. The sales include: Big Graves Salvage Sale (3.9 mmbf); Wild Bill Sale (549,000 bf); and Bear Creek Sale (949,000 bf). The Coos Bay District is also anticipating holding a timber sale auction in February. The two sales will be fully ready to offer at the next regularly scheduled timber sale auction: Churchyard (4.3 mmbf) and Beam Me Up (269,000 bf).

Early February. BLM-CO will initiate a 15-day public scoping period for the New Elk Coal Lease by application. The New Elk Coal Company, LLC applied for a coal lease of 1,279 acres of split-estate Federal coal that holds approximately 11 million tons of coal in place located in Las Animas County, adjacent to their New Elk Coal Mine. The active mine is an underground room and pillar coal mine. The lease is in a historical coal production area. (12/7/18)

January – March. BLM-ID. The Twin Falls District Fuels and Emergency Stabilization and Rehabilitation programs conducted regular winter fire rehabilitation, fuel break and hazardous fuels reduction projects in the Burley, Jarbidge, and Shoshone Field Office areas. BLM will implement aerial seeding treatments over 79,700 acres. Fiscal Year 2019 funding is tied to these programs. (12/7/18)

Early February. BLM-CA requested a Departmental Review Team regarding a Supplemental EIS that evaluates a proposal to expand and modernize the U.S. Gypsum Company (USG) mine and plant in Imperial County. USG's proposed mine expansion / modernization project is subject to the U.S. Army Corps of Engineers' 404 permit process. The Corps is the cooperating agency in the Supplemental EIS. (12/7/18)

Early February. BLM-CO. The Gunnison Field Office will publish in the Federal Register (pending Washington Office approval) a Notice of Realty Action to convey approximately 43.09 acres of public land to the Town of Lake City under the Recreation and Public Purposes Act. The land is about one mile south of Lake City. The Lake City Ski Hill community ski area would continue to operate under the conveyance. The package has been with SIO-REGS since December 6, 2018. (4/24/18) DTS 2329

Early February. BLM-OR/WA. Lakeview District has finalized the Environmental Impact Statement and the Record of Decision for the Tucker Hill Perlite Mine Expansion and will brief the State Director soon. The Lake County Commission supports the proposed mine expansion due to economic benefits to the county. (12/7/18)

Early February. BLM-CO. The Colorado River Valley Field Office will release the final Environmental Assessment (EA) for managing the Sutey and Haines parcels, which were acquired in March 2017 through the Sutey Ranch Land Exchange. Because the management plan will amend the Field Office's Resource Management Plan, the announcement begins a 30-day protest period and 60-day Governor's consistency review. The Field Office held a public scoping period and meeting over the summer, as well as a comment period and public meeting on the draft EA this fall. More than 200 comments were received during each public

comment period. Management of the 557-acre Sutey Ranch parcel will focus on protecting wildlife habitat and recreational opportunities. (11/30/18)

Early February. BLM-CO. The Uncompahgre Field Office plans to announce a 30-day scoping period for a proposal to fence the Adobe Badlands Wilderness Study Area (WSA) boundary. The WSA is adjacent to an off-highway vehicle (OHV) open riding area and the BLM has observed impacts from riders on the WSA's Colorado hookless cactus habitat, a federally-listed threatened species. To ensure riders continue to enjoy OHV use in the adjacent area and to protect the hookless cactus habitat, BLM proposes building a fence to help identify the WSA boundary. It will also help the BLM remain in compliance with no mechanized or motorized use in the WSA. The BLM is in regular coordination with the U.S. Fish and Wildlife Service on this proposal, and will coordinate with the County before scoping begins.. (12/7/18)

Early February. BLM-ID. The Shoshone Field Office plans to issue a right of way grant for the Idaho Water Resources Board (IWRB) to construct and operate aquifer recharge projects along the Northside Canal in Jerome County. These projects will support IWRB's mandate to develop and operate a long-term Managed Groundwater Recharge Program and achieve the goal of recharging an average 250,000 acre-feet per year of groundwater in the Eastern Snake Plain Aquifer.. (12/14/18)

Early February. BLM-ID. The Challis Field Office will conduct media outreach to announce the issuance of patents to the cities of Challis and Clayton and Custer County as required by the Sawtooth National Recreation Area and Jerry Peak Wilderness Additions Act enacted on Aug. 7, 2015. The Act instructs the BLM to convey nine parcels of public land to these locations for various public purposes. (12/14/18)

Early February. BLM-ID. The Burley Field Office plans to issue three right-of-way grants: one for Raft River Highway District to pave 1.6 miles of the existing Idahome Road north of Malta; a second for Raft River Rural Electric to realign approximately one mile of existing power line southeast of Almo; and a third for ATC Communications to construct and maintain a 1.3-mile fiber optic line supporting existing communication sites east of Burley. (12/14/18)

Early February. BLM-ID. The Burley Field Office will issue a categorical exclusion decision on a Notice of Geophysical Exploration submitted by Walker Ranch LLC. The proposed project will consist of pedestrian surveys within existing geothermal leases to measure the spontaneous potential of the Raft River Geothermal Resource Area near Malta. (12/14/18)

Early February. BLM-NV. The Winnemucca District will publish the Notice of Intent to prepare an Environmental Impact Statement for a proposed expansion of the Coeur Rochester and Packard Mines. The silver mine currently employs about 302 people and is approximately 26 miles northeast of Lovelock, in Pershing County, Nev. (12/14/18)

Early February. BLM-MT/DK has informed the Montana Department of Natural Resources and Conservation that transfer of the final selected lands totaling 5,816.63 acres to fulfill the long-standing entitlement made by Congress when Montana became a State in 1889 will not be completed before the end of 2018 due to the delay in publication of the classification notice in the Federal Register. Montana Department of Natural Resources and Conservation Director John Tubbs and Montana State Land Board members expressed concern and disappointment in the delay, and believe it will impact the State's ability to offer grazing leases as planned in January 2019, which would result in impacts to revenue collection from these grazing leases. The package has been with SIO REGS since Aug. 13, 2018. The State Land Board accepted the lands, contingent on publication of the notice and final classification, on Sep. 17, 2018. (11/23/18) DTS 2211

Early February. BLM-CA. The Barstow Field Office anticipates publishing an Environmental Assessment for the Kern River Gas Transmission Company Pesticide Use Proposal project. This project proposes the use of pre-and post-emergent herbicides at fenced pump stations and use of herbicide treatments on weed species within the Kern River Gas right-of-way.

Early February. BLM-NV. The Winnemucca District will have the Notice of Intent Briefing for the DOI Review Team to prepare an Environmental Impact Statement (EIS) for a proposed expansion of the Coeur Rochester Mine. (12/7/18)

Early February. BLM-NV. The Winnemucca District will brief the DOI Review Team on the Hycroft Mine Draft EIS Notice of Availability. (12/7/18)

Early February. BLM-NV. The Battle Mountain District will brief the Review Team on the Mount Hope Project Draft Supplemental Environmental Impact Statement (EIS). (11/9/18)

Late February. BLM-NV. The Humboldt River Field Office will publish the Draft Environmental Impact Statement for the Marigold Mine Mackay Optimization Project. Numerous groups have expressed concern with this project especially related to the potential impacts to surface and groundwater. (11/2/18)

In February. BLM-NM. The Oklahoma Field Office cancelled a public hearing originally scheduled for January 7, 2019, for the Draft Environmental Assessment for a Lease by Application (LBA) in Haskell County, Okla. We are working to determine options for rescheduling. Evans Coal Company submitted an LBA for federal coal reserves underlying 1,270.85 acres of privately-owned surface lands. Evans estimates that the proposed lease area contains nearly 3.28 million tons of recoverable coal. This may be controversial because it is coal-related and the tract lies beneath a lake used for recreation by a private club. (8/17/18) DTS 229

Early February. BLM-OR/WA. Lakeview District plans to sign the Coyote Colvin Grazing Permit Renewal Environmental Analysis, allowing an "Outcome Based Grazing Authorization". This EA involves six allotments, five of which are included in the Outcome Based Grazing program. The proposal is to expand the season of use and allow for more

flexibility in pasture rotation. The number of AUMs (9,136) would remain the same. There is a cooperative relationship with the permittee and no controversy with NGOs at this time. (12/7/18)

Early February. BLM-CO. The Colorado River Valley Field Office expects to complete its 30-day review of a major plan of operation modification proposal it received from RMR Aggregates, Inc., which operates a limestone quarry adjacent to Glenwood Springs. The proposed expansion includes more than 300 acres of disturbance and over 250 truck trips per day (currently around 20 acres and 20 trips per day). The proposal addresses non-compliance issues the company inherited when it purchased the quarry in 2016. Because of its visibility from Glenwood Springs, the project is highly controversial. Both the City and Garfield County have expressed concerns regarding socioeconomic and transportation impacts. (11/30/18)

Early February. BLM-WY. The Worland Field Office plans to release an environmental assessment analyzing an update to the Fifteenmile Wild Horse Herd Management Area (HMA) Plan, and gathers needed to implement the plan, for a 30-day public comment period. About half of the HMA is Greater Sage Grouse priority habitat. Due to the inherent controversy associated with wild horse management, there may be public and media interest in this comment period. (12/7/18)

Early February. BLM-OR/WA. The Coos Bay District plans to issue decisions and sale notices for three upcoming timber sales The timber will be sold at an oral auction on Jan. 25, 2018. The sale is expected to yield 269,000 board feet. (12/7/18)

Early February. BLM-WY. The Rock Springs Field Office will release the North Dutch John Well #1 EA, FONSI and Decision Record. The proponent requested a hold on this analysis for several years to modify the proposal, but is now prepared to move forward. Public interest in the pending decision likely will be high because the proposed well is located in the Greater Little Mountain Area, a popular hunting and fishing destination. The proposed action includes drilling a single well, constructing a well pad, upgrading a two-track road and building an access road. The proponent has committed to several mitigation measures including moving the well pad location, applying timing restrictions for crucial mule deer winter range, installing erosion control devices, burying associated pipelines and managing weeds. The BLM determined impacts to the area would be minimal due to these measures. (10/23/18)

Early February. BLM-OR/WA. The Lakeview District anticipates finalizing the Response to Comments regarding a draft Environmental Assessment (EA) and Finding of No Significant Impact analyzing the potential effects of a wild horse gather and fertility control plan for the Beaty Butte Herd Management Area. This is separate from the Warm Springs Herd Management Area gather and fertility control plan, which is currently in litigation. Two alternatives within this EA would allow BLM to gather horses below maximum AML and will likely be controversial if selected. The decision is expected to be signed by early February 2019 and a gather scheduled in fall 2019.(12/7/18)

Early February. BLM-CO. The Tres Rios Field Office will initiate public scoping for GCC Energy LLC's proposed King II Coal Mine Lease by Application (LBA). The proposed LBA includes approximately 3,200 acres north of the existing King II Coal Mine. The LBA would extend mine life for 5-7 years and use existing surface facilities and transportation routes. The Office of Surface Mining Reclamation and Enforcement is the joint lead on the EA. (10/26/18)

Early February. BLM-ES anticipates publishing in the Federal Register a Public Land Order for the U.S. Coast Guard's relinquishment of Lot 22 of the Jupiter Inlet Lighthouse Outstanding Natural Area (ONA) in Florida. (4/11/18)

In February. BLM-NV. The Mount Lewis Field Office will issue the Record of Decision for the 3 Bars Ecosystem and Landscape Restoration Project—a programmatic Environmental Impact Statement (EIS) proposing to treat up to 127,000 acres of sagebrush steppe, riparian habitat, pinyon juniper woodland, and aspen groves within a 749,810-acre area in part of the Field Office. (8/24/18)

Early February. BLM-AK. The Eastern Interior Field Office will consult with the Tribal Governments of Chalkyitsik and the Gwichyaa Zhee Gwich'in (Fort Yukon). One meeting will likely occur in Fort Yukon while a second may be scheduled for Chalkyitsik. The consultation will fulfill the Tribes' request, made during consultation in 2018, that the BLM afford them an opportunity to share their priorities for implementation of the Eastern Interior Resource Management Plan. (10/26/18)

In February. BLM-NM. The Oklahoma Field Office plans to publish a Notice of Availability announcing the release of a Draft Environmental Assessment (EA) for public comment regarding the Liberty 8 competitive coal lease. The lease sale consists of 460 acres to be mined by surface and/or underground techniques. The scoping period on the EA closed on Sep. 8. (8/17/18)

In February. BLM-CO. The Royal Gorge Field Office plans to issue a final decision for the Arkansas Headwaters Recreation Area (AHRA) Management Plan. The Arkansas River is the most commercially rafted river in the United States and is a major economic driver for the region. The BLM manages the AHRA in partnership with Colorado Parks and Wildlife, which is also a signatory on the plan. The plan addresses river allocation, recreation facility development, and resource management along the entire 152-mile stretch. (8/17/18)

In February. BLM-CO. BLM CO will close on the purchase of Eagle County Open Space's 16.98-acre Two Bridges site along the Upper Colorado River in the Colorado River Valley Field Office for $500,000 through the Land and Water Conservation Fund. The appraised fair market value of the Two Bridges site is $850,000. This acquisition supports perpetual river access throughout the Upper Colorado River Special Recreation Management Area (SRMA) for fishing and other water-related recreation. The SRMA is heavily used throughout the year. Two Bridges is about four miles downriver from the State Bridge site. (10/9/18)

In February. BLM-NM. The Las Cruces District Office plans to publish the Final Environmental Impact Statement for the Copper Flat Copper Mining Project. The New Mexico Copper Corporation submitted a proposed mining plan of operations (MPO) that would re-establish the Copper Flat Copper Mine, a poly-metallic mine and processing facility near Hillsboro, N.M., that would produce copper, gold, silver, and molybdenum. If approved, the project is expected to provide 170-270 jobs over the mine's 12-to-16-year life. (5/25/18)

In February. BLM-CO is preparing a Notice of Proposed Withdrawal and Transfer of Jurisdiction of two isolated BLM-managed parcels totaling 120 acres in Mesa County to the National Park Service's Colorado National Monument which are not contiguous with other BLM lands. The Colorado National Monument's 2005 General Management Plan identified the two parcels as important for improving public access to popular trailheads. The notice would segregate the lands from location and entry under the mining laws for two years while studies are completed to recommend a 50-year withdrawal and transfer of jurisdiction. The segregation would not close the lands to mineral leasing or mineral material laws. BLM-CO is planning for a Feb. 2019 publication in the Federal Register (pending WO and DOI approval). (7/20/18)

In February. BLM-NM. The Socorro Field Office plans to publish the Notice of Availability for the Draft Environmental Impact Statement for the Borderlands Wind Project (BLWP). (8/31/18)

In February. BLM-NV. The Black Rock Field Office will publish the Draft Environmental Impact Statement for the Hycroft Mine Expansion Phase II. The U.S. Fish and Wildlife Service will issue a decision on an eagle incidental take permit based on analysis in the EIS. (8/24/18)

Bureau of Ocean Energy Management

UPDATED ITEMS

BOEM continues to review its FY 2019 Contingency Plan and prepare options for ASLM pertaining to use of existing appropriated carryover funds.

Preparation of the decision documents for the Proposed National OCS Oil and Gas Leasing Program and draft PEIS continues. Once published, a 90-day public comment period with public meetings are expected to begin.

ONGOING ITEMS

BOEM has prepared multiple Calls for Information and Nominations (Calls) for lease sales proposed for 2019 and 2020 in the 2019-2024 Draft Proposed Program. The Mid-Atlantic Call (DTS #2257), the South Atlantic Call (DTS #2258), the Southern California Call (DTS #2388), and the Chukchi Sea Call (DTS #2385) are currently being held pending direction on the National OCS Program. (9/21/18)

Work continues on preparation of the Final Notice of Sale for Gulf of Mexico Lease Sale 252, which must publish by February 15 for the Sale to be held as scheduled, and the Proposed Notice of Sale for Gulf of Mexico Lease Sale 253 . Both Notices are with ASLM for surnaming.

Once appropriations are restored for the Department, BOEM expects to submit the Final Rule updating its air quality regulations related to oil, gas, and sulfur operations on the OCS to OMB for interagency review. A narrative describing the reduction to costs as compared to the proposed rule (Reduction to Costs Narrative) and the rule text are currently with the Department for review. (8/2/18, DTS #2280 (Rule), DTS #2454 (Reduction to Costs Narrative))

Once appropriations are restored for the Department, BOEM expects to publish a Request for Competitive Interest for an area proposed to be used for a right-of-way (ROW) project from Anbaric Development Partners (ADP). The application is for the New York and New Jersey Ocean Grid, an HVDC submarine system approximately 185NM (213 statute miles) in length with up to nine offshore AC to DC collector/converter platforms, which would collect and distribute power generated from existing offshore wind leases to up to six terrestrial landings at locations from Long Island, New York to Cardiff, New Jersey. The notice is in surnaming with the Department. (10/15/18, DTS #2208)

Once appropriations are restored for the Department, BOEM expects to publish a Request for Competitive Interest for an area proposed to be used for a right-of-way (ROW) project called Atlantic Link. Clean Power Northeast Development, Inc. filed an application on May 31, 2017 (revised August 22, and September 26), for a ROW grant in support of a proposed project connecting onshore wind and hydro power in Canada to the Massachusetts market via a 350 mile HVDC submarine cable traversing the OCS. The notice is in surnaming with the Department. (DTS #1773)

On January 18, 2019, the U.S. District Court for South Carolina issued an injunction enjoining "Federal Defendants, BOEM, and any other federal agency or entity from taking action to promulgate permits, otherwise approve, or take any other official action regarding the pending permit applications for oil and gas surveys in the Atlantic" until after appropriations are restored and the court rules on certain motions. BOEM has ceased preparatory work on the permit applications while Interior is consulting with DOJ about seeking clarification of the court's order.

Bureau of Safety and Environmental Enforcement

ONGOING ITEMS

Well Control Rule- The rule was surnamed by the Deputy Secretary, the Associate Deputy Secretary, and the ASLM on **December 11.** The rule was surnamed by the Deputy Chief of Staff for the Secretary and submitted to Exec Sec on **December 12**. Exec Sec informed us that they submitted the rule to OMB on **December 12.** OMB officially "accepted" the rule to formally start the E.O. 12866 review "clock" on **December 13**. OMB requested an E.O.

12866 inter-agency briefing on the rule for **December 20**, in which the BSEE Director and SMEs presented and discussed items with OMB staff. OMB remains on the clock. WCR was identified as a top priority for BSEE's 15 day list. Upon receipt of comments from OMB, we will gather the appropriate BSEE team to respond. BSEE is still pursuing a late February publication in the Federal Register dependent upon OMB's comments.

Arctic Rule – BSEE will finish Tribal Consultation upon the end of the government shutdown. Next steps will be to begin drafting the rule.

- § As of 1/16/19, BSEE completed 88% of the municipalities meetings (7 of 8).
- § As of 1/16/19, BSEE completed 75% of the ANCSA Corporations meetings (6 of 8)

Reg. Reform 2.0- BSEE Director engaged a variety of BSEE personnel and through this process identified 13 regulatory actions fitting this description. The BSEE Director recently requested input from 20 senior managers on their ranking of importance. Despite the variations in the rankings on the individual "ballots," there was a general consensus around the top four rankings. Those top four recommended priority rulemakings for the first half of 2019 are:

- · **Pipelines and Pipeline Rights-of-Way** (30 CPR Part 250 - Subpart J);
- · **Decommissioning Activities** (30 CPR Part 250 - Subpart Q);
- · **Incorporation of Industry Standards** (30 CPR 250.198);
- · **Suspension of Operations {SOO)/Suspension of Production {SOP)** (30 CFR Part 250 - Subpart A)

Risk Based Inspection – BSEE Office of Safety Management (OSM) trained inspectors (**December 19 and 20**) for the upcoming Performance Based Risk Inspection (PBRI) on Well Operation Hazards, and the inspection took place the week of **January 7**. Additionally, OSM has concluded their evaluation on which deep-water facility will be subject to the next Facility Based Risk Inspection (FBRI) in late January 2019.
BEST Available and Safety Technology (BAST) - On December 4, the BSEE Director requested input from the industry on the "production equipment" components that should be subject to BAST, which is expected by mid-February.

Office of Surface Mining Reclamation and Enforcement

ONGOING ITEMS

Notice of Intent to File Suit: On or about December 7, 2018, the Secretary and the OSMRE Regional Director, Western Region, received a Notice of Intent to File Suit over alleged violations of the Endangered Species Act in approving Signal Peak Energy LLC's (Signal Peak) lease at the Bull Mountains Mine from the Montana Environmental Information Center, the Sierra Club, WildEarth Guardians, and 350 Montana conservation groups. These conservation groups state that OSMRE did not assess whether the project would impact grizzly bears and numerous other species that may be impacted by coal train shipments from the mine to the coal export terminal in British Columbia that is the primary destination of the coal. SMCRA allows OSMRE 60 days to respond to the NOI before an action can be filed, which would be in early February. (12/11/2018)

OSMRE AML Emergency Reclamation Projects: OSMRE staff has been designated as "excepted" and called back from furlough to respond to Abandoned Mine Land Emergency activities. OSMRE staff working with the designated State AML programs must review the incident, declare an emergency and provide an Authorization to proceed with the reclamation using AML grant funding. More information regarding the sites is available upon request.

Citizen's Complaint Filed: On January 11, 2019, the Trustees for Alaska filed a citizen complaint (with ten exhibits) alleging the surface coal mining operations of Usibelli Coal Mining, Inc. at Wishbone Hill, are being conducted without a valid permit in violation of the Alaska Surface Coal Mining Control and Reclamation Act. They also allege that the State of Alaska has failed to administer its program in compliance with federal requirements regarding the company's failure to initiate mining operations within three years of the permit issuance, as required by Federal law and the State's regulatory program.

River Hurricane Mine, Pike County, KY: The impoundment of water within the underground mine works of the River Hurricane Mine in Pike County, KY presents the potential for a blowout which would impact the safety of residents in the Grapevine, KY community as well as the surrounding environment including the waters of the U.S. Army Corp of Engineers' Fishtrap Lake. The Lexington Field Office, Office of the Solicitor, Applicant Violator System Office and AR's Technical Assistance Division took immediate action to assess and monitor the mine pool and engage relevant regulatory authorities, responsible parties and local emergency management officials to address the situation. United and its successor companies have denied ongoing responsibility over the site. A current permittee High Ridge Mining, LLC, with operations covering portions of the mine pool area, was issued an Imminent Danger Cessation Order by the KY Department of Natural Resources and ordered to begin dewatering and monitoring of the mine. While not accepting responsibility for the site, on January 6, 2019, High Ridge has re-established the blocked mine drain system and has begun to dewater the mine. As of January 10, 2019, the mine pool level dropped below the "Stand By Alert" stage to the "Intensified Monitoring and Reassessment of Stability" stage. OSMRE staff are continuing to assist KYDNR staff in monitoring and assessing the site.

Rosebud Mine (MT): The OSMRE Western Region jointly prepared an EIS with the Montana Department of Environmental Quality. The EIS will be used to support a recommendation on the mining plan for Area F of the Rosebud Mine. OSMRE obtained Departmental Clearance to publish the Notice of Availability (NOA) for the Final EIS in the *Federal Register*. The NOA was published in the *Federal Register* on Friday, November 30, 2018. OSMRE is awaiting revised permit findings information from the State of Montana, prior to finalizing the Record of Decision (ROD).

Illinois' Diversion of Abandoned Mined Land (AML) Funds: OSMRE was informed by Illinois program officials that the enactment of a new state law, Public Act 100-1107, authorizes the State Treasurer to divert monies from various trust funds for utilization and investment by the State. As we were informed and have confirmed, sometime during the month of October, the State of Illinois "statutorily transferred" $50 million out of the State's

AML "Set-Aside" fund. OSMRE staff prepared a draft letter for the Acting Director's signature to Illinois Governor Rauner seeking the immediate return of the funds to their appropriate account. The SOL reviewed the draft letter and provided comment to OSMRE. OSMRE will finalize and send letter to the State. (11/27/2018)

Section 7 Consultation: OSMRE sent the IMCC the final draft Biological Assessment (BA) and BA references, and the final draft MOU, as well as responses to the IMCC's comments on the earlier draft, following the Assistant Secretary's signing of the transmittal letter to the IMCC on October 16, 2018. The IMCC's time for providing comments has been extended. (10/18/2018)

Justice Companies' Bevins Branch Mine: On January 3, 2019, a follow up site visit was conducted by OSMRE as an "excepted" activity. While Imminent Danger conditions remain, the Permittee has begun initial steps to divert drainage away from Bear Fork watershed into adjacent watersheds, but has not restored the affected area back to permitted and/or pre-mining conditions. OSMRE will continue to monitor this permit to ensure all abatement measures required are met while the permanent plan is established.

Mason Coal (KY): The Kentucky Division of Mine Reclamation and Enforcement (KYDMR) informed OSMRE that on or about October 25, 2018, it became aware that Mason Coal was operating an underground coal mine and surface facility without a valid mining permit. OSMRE, pursuant to 30 CFR 843.11(a)(2), issued a Federal Imminent Harm Cessation Order (IHCO) to Mason on November 1, compelling the company to cease coal mining operations. OSMRE and Mason signed a Settlement Agreement (SA) with Mason agreeing not to oppose Mason's request for temporary relief from the IHCO, under the terms of the SA. In November 2018, an ALJ with the Office of Hearings and Appeals granted Mason's request for temporary relief pursuant to the terms and conditions set forth in the Settlement Agreement. Mason has applied to Kentucky to obtain the necessary mining permit for the operation and the permitting process is ongoing.
(11/2/2018)

Pollyanna #8 (OK): On July 10, 2018, OSMRE received approval from BLM of the Resource Recovery and Protection Plan and the coal lease modification for the Pollyanna #8 mine. OSMRE initiated the public review period on the draft EA and unsigned FONSI on November 20, 2018. The public comment period closed on December 20, 2018. Limited comments were received, Mid-Continent Region will work to finalize the MPDD once furloughed staff returns to active duty from the government shutdown. (11/27/18)

Notice of Intent to File Suit: On or about September 7, 2018, the Secretary and the Acting Director received a Notice of Intent to File Suit over an alleged failure to perform an alleged mandatory duty under the Surface Mining Control and Reclamation Act from the WildEarth Guardians (WEG). WEG alleges that the agency failed to "promptly promulgate regulations to limit toxic blasting emissions at coal mines after granting a petition for rulemaking." SMCRA allows OSMRE 60 days to respond to the NOI before an action can be filed. The Solicitor's Office advised OSMRE on its options in response to the NOI. OSMRE sent a response letter to WEG on November 6, 2018, indicating that OSMRE would publish its

decision in the *Federal Register* within 90 days, on or before February 4, 2019. OSMRE was on track to meet this deadline before the furlough. (10/18/2018)

ASSISTANT SECRETARY FOR POLICY, MANAGEMENT AND BUDGET

Susan Combs, Senior Adviser to the Secretary exercising the authority of the Assistant Secretary for Policy, Management and Budget, will be in the office.

Scott Cameron, Principal Deputy Assistant Secretary, will be in the office.

Week Ahead Schedule of Meetings, Hearings, and Travel

No significant external meetings, travel, or Congressional hearings involving PMB are anticipated.

Immediate Announcements and Actions For the Next Week

PMB is revising its furlough plan to bring back as exempt additional currently furloughed or excepted employees whose jobs involve priority activities.

Deputy Assistant Secretary - Policy and Environmental Management (DAS PEM)

PPA continues to lead a review of the future external-facing role of IBC in cooperation with IBC, PAM, PFM, SOL, and BIO internally, and external partners OMB, GSA, and Treasury.

Deputy Assistant Secretary - Budget, Finance, Grants and Acquisition (DAS BFGA)

OMB issued guidance to facilitate the payment of contract invoices during the lapse in appropriations. The Business Integration Office is implementing plans to process an increased number of invoices submitted to FBMS. PAM is providing guidance to the bureaus on how to address the OMB guidance.

The Office of Budget is analyzing information from bureaus and offices that was due Friday, January 25 on recurring major discretionary or mandatory funding disbursements (payments or awards) which would normally occur. This information will be used to anticipate and address concerns regarding upcoming standard payments and awards.

The Office of Budget is analyzing information from bureaus and offices to respond to a request from the White House to provide a list by January 25 of programs where funds will run out between now and April 16.

The Office of Budget will issue biweekly data call to bureaus and offices to capture pay period costs and the burn rates of unobligated balances. The next report will include costs for the pay period ending January 19th, which are posted on January 30.

Deputy Assistant Secretary - Public Safety, Resource Protection and Emergency Services (DAS PRE)

A hiring plan will be prepared to allow recruitment of fire season workers, including staffing by HR specialists and bureau fire managers.

An internal training plan will be developed to provide critical training to OAS inspectors, mechanics and pilots which has been cancelled as a result of the shutdown.

OWF is exploring the possibility of accelerating the obligation of available fuels treatment and burned area rehabilitation funds to put currently furloughed bureau employees to work.

OEM is preparing plans to respond to COOP requirements in the event the State of the Union address takes place on the 29th. Additional information will be known on January 25th.

8-30 Day Outlook

Deputy Assistant Secretary - Budget, Finance, Grants and Acquisition (DAS BFGA)

We are awaiting direction from OMB on a new release date for the President's FY 2020 budget, which will in turn determine deadlines for bureau and office budget justification development.

Work continues on the GrantSolutions migration, with a cost estimate expected from HHS on or about February 15, 2019.

Review of draft deliverables from Grant Thornton LLP contract on procurement shared services is continuing.

Chief Information Officer (CIO)

NEW ITEMS

The Department is responding to the directive of January 22, DHS's Cybersecurity and Infrastructure Security Agency (CISA) Director Christopher Krebs on Emergency Directive 19-01: Mitigate DNS Infrastructure Tampering. The Directive requires all agencies to mitigate risks from undiscovered tampering, enable agencies to prevent illegitimate DNS activity for their domains, and detect unauthorized certificates. The deadline for response is February 5, 2019.

OWF is preparing a contingency plan and risk analysis to assess the implications for the fire program if the government shutdown continues until March 1, April 1, or May 1.

ASSISTANT SECRETARY FOR WATER AND SCIENCE

Week Ahead Schedule of Meetings, Hearings, and Travel

Assistant Secretary Tim Petty will be in the office.

Reclamation Commissioner Brenda Burman is scheduled to be in Washington, D.C.

USGS Director Reilly will be in the office.

Immediate Announcements and Actions For the Next Week

Central Utah Project Completion Act Office

Utah Lake System South Fields Reach Environmental Assessment: The Central Utah Water Conservancy District (CUWCD), Utah Reclamation Mitigation and Conservation Commission, and the Central Utah Project Completion Act (CUPCA) Office, as Joint Lead Agencies, are evaluating realignment of a portion of the South Fields Reach of the Spanish Fork – Santaquin Pipeline, which is part of the Utah Lake Drainage Basin System (ULS) of the Central Utah Project. The Spanish Fork – Santaquin Pipeline was initially evaluated in an Environmental Impact Statement completed in 2004. Scoping for NEPA compliance of the realignment has been initiated, comments received, and a preferred alignment identified. The Joint Lead Agencies are moving forward in preparing a Draft Environmental Assessment to evaluate potential impacts associated with the realignment alternatives. (1/23/2019)

U.S. Bureau of Reclamation

Between January 27 and February 8, Reclamation plans to announce the funding opportunity for the Fiscal Year 2019 Water and Energy Efficiency Program. Water and energy efficiency grants focus on projects that conserve and use water more efficiently. A news release will be issued. (01/09/2019)

Between January 27 and February 8, Reclamation plans to announce the funding opportunity for the Fiscal Year 2019 Drought Response Program. The Drought Response Program supports a proactive approach to drought by aiding water managers to develop and update comprehensive drought plans and implement projects that will build long-term resiliency to drought. A news release will be issued. (12/03/2018)

Between January 27 and February 8, Reclamation plans to announce the funding opportunity for WaterSMART's Small-Scale Water Efficiency Projects. Through this program, Reclamation provides 50/50 cost-share funding to irrigation and water districts, tribes, states

and other entities for small water efficiency improvements that have been identified through previous planning efforts. A news release will be issued. (12/03/2018)

Between January 28 and February 8, Reclamation plans to post the Klamath River Basin Study to its website. Reclamation partnered with the State of California Department of Water Resources and State of Oregon Water Resources Department to conduct the study. The study area encompasses 12,100 square miles along the boundary of California and Oregon. No news release will be issued but talking points will be developed to respond to questions. (12/17/2018)

On January 28, Reclamation plans to issue a contract to Precision Surveys Inc. for professional surveying services throughout the Upper Colorado Region. The contract will be an Indefinite Delivery, Indefinite Quantity for up to five years with a cost ceiling of $24.5 million. Reclamation anticipates most work activities will be performed in central south Colorado, New Mexico, and northwest Texas with most of the work being performed along the Rio Grande corridor. (12/17/2018)

During the week of January 28, Reclamation is planning to release a Draft Finding of No Significant Impact for the Supplemental Environmental Assessment for the Funding of Routine Operation, Maintenance, and Replacement of Associated Water Transmission Facilities of the Mni Wiconi Rural Water Supply Project, South Dakota. The comment period ended January 11, 2019 – no significant comments were received. (11/26/2018)

Between January 28 and February 1, Reclamation will post a web story announcing the funding of 14 additional science and technology projects that Reclamation will be studying this fiscal year. These are in addition to the selection of 49 projects Reclamation announced in October. (12/17/2018)

Between January 28 and February 8, Reclamation will announce the winners of the year-long sub-seasonal climate forecast rodeo prize competition. This forecasting prize competition had solvers submit forecasts of temperature and precipitation for one year, competing in real-time against other teams as well as forecasts from the National Oceanic and Atmospheric Administration (NOAA). NOAA was a partner with Reclamation on this project. (12/03/2018)

On January 29, Reclamation has been invited to present its invasive mussel research activities at the 79th Midwest Fish and Wildlife Conference in Cleveland, Ohio. This annual event will attract nearly 800 biologists, students, and scientists from local, state and provincial, federal, and tribal natural resources agencies, universities, and private companies across the 12 Midwestern states and Canadian provinces. (12/03/2018)

Around January 30, Reclamation is planning to publish the Green River Block Water Exchange Contract Final Environmental Assessment (EA) and Finding of No Significant Impact. The contract is between Reclamation and the State of Utah along the Green River between Flaming Gorge and Lake Powell (Eastern Utah and Northwest Colorado). The Final

EA will reflect the comments made during the 50-day comment period in a matrix that will be published as an appendix. (12/31/2018)

On January 28, Reclamation will host a meeting with the Friant Division Contractors at its Fresno, California, office. The meeting is expected to cover revisions to the Friant Operational Guidelines. The operational guidelines are written to establish procedures guiding water supply management of the Friant Division, Central Valley Project, California. No media interest is expected. (01/22/2019)

On January 28, Reclamation plans to distribute a news release announcing light construction on the dikes at Folsom Dam and Reservoir (California) under the Safety of Dams program. Weather permitting, construction is scheduled to begin the week of January 28. The area is highly trafficked with a large bike trail, but no major traffic delays are expected. Media or local attention may occur. (01/22/2019)

On January 30, Reclamation will host a meeting with the Santa Ynez River Water Conservation District (SYRWCD) at the Fresno, California, office. The meeting is expected to cover a review of the fish surcharge and flood operation tools that Stetson Engineers developed for the County of Santa Barbara and the SYRWCD. Tabletop exercises involving historical storm events are planned. No media interest is expected. (01/22/2019)

On January 31, Reclamation plans to issue a request for input by the Governors of the seven Colorado River Basin States and others, regarding recommendations for potential Departmental actions in the event that Drought Contingency Plans cannot be completed and promptly adopted. This request will be issued in the event the seven Colorado River Basin states have not completed and approved the Drought Contingency Plans by that time. Significant media interest is expected. (01/22/2019)

On January 31, the Biological Assessment on the Reinitiation of Consultation on the Coordinated Long-Term Operation of the Central Valley Project and State Water Project in California is expected to be provided to the U.S. Fish and Wildlife Service and the Department of Commerce, National Marine Fisheries Service to initiate the consultation process under Section 7 of the Endangered Species Act. Reclamation is contemplating a news release. The document will be posted on Reclamation website. (01/08/2019)

On or about January 31, Reclamation plans to sign the Cottonwood Creek Daylighting Project Final Environmental Assessment (EA) and Finding of No Significant Impact (FONSI). The Final EA and FONSI are for a WaterSMART grant to restore this portion of Cottonwood Creek to its natural condition. The creek, located in downtown Boise, Idaho, currently flows through a culvert. A news release may be issued early February. (1/11/2019).

In January, Reclamation plans to close Road 12 (Washington) located in a topographical low spot to install a metal swing gate for public safety. The new gate will not require a cultural survey and is noncontroversial. Reclamation and the Washington Department of Fish and Wildlife are working together on the project. A legal notice and press release are currently being developed. (12/06/2018)

U.S. Geological Survey

Shutdown Status: To the extent possible, USGS is calling staff back to support projects that we can identify as critical to safety and preservation of lives and property. We are evaluating every project for potential losses of critical science and, where possible, bringing personnel in to support those efforts. We are also assessing where we might find the funding to bring back some staff on an exempt basis. Our 2018 Appropriated carryover is limited, and we are assessing fund availability and reprogramming flexibility to cover resources within a program. We also will be activating employees to work on all signed reimbursable activities and have requested that we reach out to those customers to confirm the agreements are still in effect.

The Water Mission Area is maintaining executive coordination pertaining to network monitoring systems and working in coordination with other Federal agencies in case of a natural disaster (flood). Primary focus is on the streamgage monitoring network. To date approximately 400 sites have been serviced or repaired to ensure our partners have the information needed to help protect lives and property.

We are continuing to monitor and report on domestic and global earthquakes through the 24X7 National Earthquake Information Center (NEIC) in Colorado. Staff at USGS volcano observatories are continuing to provide basic monitoring of potential eruptive activity at US volcanoes.

The USGS is maintaining servers for the ShakeAlert West Coast earthquake early warning system as well as continuing to approve and monitor pilot projects for the ShakeAlert system and to work to permit and install seismic stations for earthquake early warning funded by the California Governor's Office of Emergency Services.

The USGS has called staff back as needed to update debris flow hazard thresholds for burned areas of California where the National Weather Service (NWS) needs refined rainfall thresholds to forecast and communicate the potential magnitude of post-wildfire debris flows based on rainfall projections. This is the rainy season in California, and following the severe fires experienced this past summer and fall, the rainfall threshold information is critical for debris-flow early warning. NWS is counting on USGS to provide this information to help protect lives and property. (1/23/2019)

8-30 Day Outlook

U.S. Bureau of Reclamation

NEW ITEMS

Between February 4 and 8, Reclamation plans to release inflow forecasts for Wyoming Area Office Bighorn Basin Reservoirs and will prepare a joint news release with Montana Area Office to address forecasted inflow to Bull Lake, Boysen Reservoir, Buffalo Bill Dam, and

Bighorn Reservoirs, all of which are in Wyoming. Inflow forecasts will also be prepared for the North Platte Basin reservoirs, also located in Wyoming. Inflow forecasts will be updated monthly and corresponding joint news releases will be issued near the beginning of the months of February through June. (1/21/2019)

UPDATED ITEMS

In early February, Reclamation plans to issue a news release inviting a two-week public review and comment period on a Draft Environmental Assessment (EA) titled *Implementation of Short Term Klamath Project Interim Operating Procedures in Siskiyou and Modoc Counties, California and Klamath County, Oregon.* The EA will evaluate the proposed operations for the Klamath Project as described in the 2018 Biological Assessment released in December 2018. This effort is part of the accelerated Klamath Reinitation of Consultation process that is expected to culminate in joint Biological Opinions from the National Marine Fisheries Service and the Fish and Wildlife Service at the end of March 2018. Media interest is expected. (01/14/2019)

On February 12-13, Alan Mikkelsen, the Senior Advisor to the Secretary, may be in Medford, Oregon, to facilitate his "Coalition of the Willing" working toward a Klamath Basin-Wide agreement. This meeting is tentative, pending government shutdown termination. (01/14/2019)

ONGOING ITEMS

In February, Reclamation will launch the Streamflow prize competition. This prize competition's goal is to significantly reduce the cost of continuous streamflow monitoring and increase the availability of streamflow data that are vital to the effective planning, design, and operation of water resource projects. Reclamation is partnering with the USGS on this competition. A news release will be issued. (12/03/2018)

On February 12-13, the Glen Canyon Dam Adaptive Management Program Annual Reporting meeting is scheduled in Phoenix, Arizona, at the Arizona Department of Water Resources. This annual reporting meeting is held in accordance with the Long-Term Environmental and Management Plan Record of Decision to serve as an initial platform to discuss potential future experimental actions as well as a forum for presentations based on the previous research and monitoring. The annual reporting meeting is open to all interested stakeholders. (01/14/2019)

On February 14, the Glen Canyon Dam Technical Work Group meeting will be held at the Arizona Department of Water Resources in Phoenix, Arizona. Topics of discussion will include the Adaptive Management Program budget and workplan for fiscal year 2019, possible experiments at Glen Canyon Dam in 2019 including planning for future High-Flow Experiments, current basin hydrology, Long-Term Experimental and Management Plan Biological Opinion Conservation Measures, U.S. Fish and Wildlife Service plans for a Colorado Pikeminnow Reintroduction Feasibility study, Razorback Sucker five year review,

Tribal Monitoring Program presentation, and other administrative items as needed. The meeting is open to media and the public. (01/14/2019)

On February 20 through 22, the Colorado River Basin Salinity Control Forum's Work Group will meet in Phoenix and Scottsdale, Arizona. The purpose of the meeting is to discuss ongoing and future salinity control activities with the federal agencies of Reclamation, Bureau of Land Management, U.S. Fish and Wildlife Service, and United States Geological Survey of the Department of the Interior; and the Natural Resources Conservation Service of the Department of Agriculture. Meeting is open press. (01/07/2019)

In February, Reclamation expects to announce the projects selected to receive Fiscal Year 2018 Title XVI, Water Reclamation and Reuse funding. Reclamation provides funding through the Title XVI Water Reclamation and Reuse Program for projects that reclaim and reuse municipal, industrial, domestic or agricultural wastewater and naturally impaired ground or surface waters. (09/10/2018)

In February, Reclamation plans to announce the Title XVI Authorized Projects Funding Opportunity Announcement for Fiscal Year 2019. Through the Title XVI Water Reclamation and Reuse Program, Reclamation provides financial and technical assistance to local water agencies for the planning, design, and construction of water reclamation and reuse projects. A news release will be issued. (01/09/2019)

U.S. Geological Survey

Nothing to report due to the shutdown.

WEEKLY REPORT
DEPARTMENT OF THE INTERIOR
JANUARY 27-FEBRUARY 2, 2019

OFFICE OF THE SECRETARY

Week Ahead Schedule of Meetings, Hearings, and Travel

Acting Chief of Staff Todd Willens will be in the office.

Deputy Chief of Staff Katharine MacGregor will be excepted Tuesday January 29th, and in the office the rest of the week.

Senior Advisor Scott Hommel will be in the office.

Senior Advisor Heather Swift will be in the office.

OFFICE OF COMMUNICATIONS

Director John Bockmier will be in the office.

Deputy Director Russell Newell will be in the office.

OFFICE OF CONGRESSIONAL AND LEGISLATIVE AFFAIRS

John Tanner, Director, will be in the office and in meetings on Capitol Hill

Aaron Thiele, Advisor, will be in the office and in meetings on Capitol Hill

Taylor Playforth, Advisor, will be in the office and in meetings on Capitol Hill.

OFFICE OF INTERGOVERNMENTAL AND EXTERNAL AFFAIRS

Todd Wynn, Director, will be in the office all week.

Ben Cassidy, Senior Deputy Director, will be in the office all week.

Tim Williams, Deputy Director, will be in the office all week.

Jason Funes, Special Assistant, will be in the office all week.

Sarah Spaulding, Special Assistant will be in the office all week.

Immediate Announcements and Actions for the Next Week

The OIEA team is facilitating introductory meetings and phone calls between new and existing Governors and Acting Secretary David Bernhardt.

The OIEA team has developed an outreach and engagement plan and materials for newly elected officials for January and February in order to proactively reach out to other state elected officials.

The OIEA team has developed an outreach and engagement plan for connecting Acting Secretary David Bernhardt with our external partners over the next quarter.

OFFICE OF THE DEPUTY SECRETARY

Week Ahead Schedule of Meetings, Hearings, and Travel

Associate Deputy Secretary Jim Cason will be in the office.

OFFICE OF THE EXECUTIVE SECRETARIAT AND REGULATORY AFFAIRS

Week Ahead Schedule of Meetings, Hearings, and Travel

Director Julie Lillie will be in the office
Deputy Director Justin Abernathy will be in the office
Correspondence specialist, Lisa Cannuscio will be in the office

Immediate Announcements and Actions (within the next 14 days)

- **DOI Priority Rules-**

○ U.S. Fish and Wildlife Service (FWS) Final Rule, "Endangered and Threatened Wildlife and Plants; Regulations for Prohibitions to Threatened Wildlife and Plants; Removal of Blanket Section 4(d) Rule" (RIN 1018-BC97)-The FWS is finalizing revisions to the regulations on prohibitions that apply to species that are listed as threatened species or downlisted from an endangered species to a threatened species. The final rule is with the Office of Management and Budget (OMB) for review pursuant to Executive Order (EO) 12866. Nothing new to report.

○ FWS Final Rule, "Conservation of Endangered and Threatened Species; Revision of Regulations to Address Interagency Cooperation" (RIN 1018-BC87) - The FWS is finalizing revisions to its regulations for interagency cooperation pursuant to the Endangered Species Act. The final rule is with the OMB for review pursuant to EO 12866.Nothing new to report.

○ FWS Final Rule, "Endangered and Threatened Species of Wildlife and Plants; Revision of the Regulations for Listing Species and Designating Critical Habitat" (RIN 1018-BC88) -

The FWS is finalizing revisions to its regulations for listing endangered and threatened species and for designating critical habitat under the Endangered Species Act. The final rule is with the OMB for review pursuant to EO 12866. Nothing new to report.

○ Bureau of Safety and Environmental Enforcement (BSEE) Final Rule, "Oil and Gas Sulfur Operations on the Outer Continental Shelf - Blowout Preventer Systems and Well Control Revisions" (RIN 1014-AA39) - The BSEE is finalizing revisions to the regulations for oil and gas drilling, workover, completion and decommissioning operations on the Outer Continental Shelf. The final rule is with the OMB for review pursuant to EO 12866.Nothing new to report.

○ The Department's proposed rule titled, "Freedom of Information Act Regulations," published on December 28th, 2018. Comments are due January 28, 2019. OES was asked to prepare a draft comment extension for this rule.

● **DOI Documents Pending Federal Register Publication-**

○ A notice reopening the comment period for 30 days for the West Coast Distinct Population Segment of fisher (Pekania pennanti) as a threatened species; and

○ The proposed rule on the Marine Mammals; Incidental Take During Specified Activities: Arctic Coastal Plain

● **Interagency Reviews Under E.O. 12866**—no action to report.

OFFICE OF THE SOLICITOR

Week Ahead Schedule of Meetings, Congressional Hearings, and Travel

Principal Deputy Solicitor Dan Jorjani is in the office.

LITIGATION MATTERS:

Parker Drilling Management Services, Ltd. v. Newton - Non-government Case
Last week, DOJ asked for SOL's quick assessment on whether the federal government should file an amicus brief in *Parker Drilling Management Services, Ltd. v. Newton.* The question in *Parker Drilling*, is whether, under the Outer Continental Shelf Lands Act, state law is borrowed as the applicable federal law when there is a gap in the coverage of federal law, as the Fifth Circuit has held, or whenever state law pertains to the subject matter of a lawsuit and is not preempted by inconsistent federal law, as the Ninth Circuit has held. The law at issue in the case is California state wage law. SOL communicated to DOJ that while our understanding aligns with the well-established Fifth Circuit precedent, DOI typically does not involve itself in disputes that are generally among private parties and when DOI does become involved, we are most likely to focus on case-by-case issues rather than on the application of universal principles. Here, there does not seem to be a substantial threat that the potential applicability of state law as a more general matter would cause problems for DOI efforts to carry out its particular mandates (it is primarily relevant to private party relationships). SOL will send attorneys to meetings this week that OSG has scheduled to hear the parties' arguments for why the United States should file an amicus brief on their behalf. The meetings are scheduled for January 23 and 25. DOJ is asking whether Interior will submit a recommendation letter regarding whether DOJ should file an amicus brief in this case. SOL plans to use the information learned at the meetings this week to help determine whether Interior should prepare and send such a recommendation letter to DOJ.

Northern Alaska Environmental Center et al. v. Ryan Zinke et al.
On December 6, 2018, the U.S. District Court for the District of Alaska granted Summary Judgment in favor of DOI in this action brought by a coalition of environmental groups pursuant to the National Environmental Policy Act and the Administrative Procedure Act. The Plaintiffs alleged that the Bureau of Land Management violated NEPA by purportedly holding its December 2017 NPR-A oil and gas lease sale without first preparing an EIS or EA or otherwise conducting an adequate assessment of the impacts of the sale. Judge Gleason held that the plaintiffs failed to demonstrate that BLM was required to conduct an EIS or EA specifically for the 2017 NPR-A lease sale. In doing so the court determined that BLM's programmatic 2012 NPR-A Integrated Activity Plan/EIS was adequate to comply with NEPA for multiple lease sales, and that plaintiffs had not raised a failure to supplement argument. As a result of the court's decision, BLM's issuance of 7 leases covering 80,000 acres was upheld. This lawsuit is similar to one filed the same day (Feb. 2) by another coalition of environmental groups (*Natural Resources Defense Council et al. v. Ryan Zinke et al*.), in which DOI also received a favorable Summary Judgment decision on December 6th. The Plaintiffs have announced an intent to appeal.

Texas v. New Mexico, No. 141 Orig.
On January 9, 2019, Special Master Melloy granted the United States' unopposed motion to vacate dates for filing responses and replies for existing motions and to extend discovery deadlines until after the government receives funding.

Atlantic Seismic Permits Injunction
On January 18, 2019, the U.S. District Court for South Carolina issued an injunction under the All Writs Act enjoining "Federal Defendants, BOEM, and any other federal agency or entity from taking action to promulgate permits, otherwise approve, or take any other official action regarding the pending permit applications for oil and gas surveys in the Atlantic" until after appropriations are restored and the court rules on certain motions. The case involves South Carolina's request to intervene in a challenge to the National Marine Fisheries Service's issuance of incidental harassment authorizations for geological and geophysical (G&G) surveys off the Atlantic coast. BOEM has yet to issue its permits for these activities and is not currently a party to the case. The court's language, while ambiguous, could be read to prevent BOEM from even conducting preparatory work on the pending Atlantic G&G permit applications while the injunction is in effect. BOEM has ceased preparatory work on the permit applications, in accordance with the court order. Interior is consulting with the Justice Department about seeking clarification of the court's order.

NON-LITIGATION MATTERS:

Oil Spill Response Exercise Fatalities
On Wednesday January 16, a tragic series of events led to two fatalities on a crew boat conducting a spill response training and equipment exercise for an Oil Spill Response Organization (MSRC) on the Mississippi River. The exercise was designed to satisfy BSEE regulatory requirements for periodic equipment and personnel deployment, but was initiated, organized, and directed by MSRC (not BSEE-initiated). A Senior Preparedness Analyst from the BSEE Oil Spill Preparedness Division attended the exercise as an observer and witnessed the events. She has been interviewed by the New Orleans Port Authority and a US Coast Guard investigator, and is preparing a written statement in consultation with the Office of the Solicitor.

BOR-Drought Contingency Plan
This week the Arizona legislature introduced a joint resolution authorizing the Director of the Arizona Department of Water Resources (ADWR) to sign off on a Lower Basin Drought Contingency Plan (LBDCP), as well as six companion bills regarding the intra-Arizona LBDCP, in an attempt to finalize Arizona's agreements by the January 31st deadline set by Commissioner Burman. The intra-Arizona LBDCP is comprised of a mitigation component for those impacted by water reductions under the DCP, an off-set component to replenish currently stored water in Lake Mead that is needed for mitigation, and a groundwater infrastructure program. The United States is a party to several of the intra-Arizona agreements and continues to work with ADWR and the Central Arizona Water Conservation District (CAWCD) to finalize the Arizona package by January 31, 2019.

BLM—Upcoming oil and gas lease sale support
The Salt Lake Office has been providing legal support to the BLM's Utah State Office as it prepares to issue leases sold during its December 2018 quarterly oil and gas lease sale, and to assist with BLM's preparations for its March 2019 lease sale.

ASSISTANT SECRETARY FOR FISH AND WILDLIFE AND PARKS

Week Ahead Schedule of Meetings, Hearings, and Travel

From January 28-February 1, Principal Deputy Assistant Secretary Andrea Travnicek will be in the office.

From January 28-February 1, Deputy Assistant Secretary Aurelia Skipwith will be in the office.

From January 28-February 1, Deputy Assistant Secretary Ryan Hambleton will be in the office.

From January 28-February 1, Acting Director Dan Smith will be in the office.

From January 28-February 1, FWS Principal Deputy Director Margaret Everson will be in the office.

Immediate Announcements and Actions For the Next Week

U.S. Fish and Wildlife Service

During the lapse in appropriations, most of the FWS offices, field stations, and other physical facilities will be closed to non-excepted employees and the public and most Service employees furloughed. Because of the Administration's priority on increased access, where public access to refuge lands does not require the presence of a federal employee or contractor, permitted activities on refuge lands will be allowed to continue. All areas with sensitive natural, cultural, historic or archaeological resources vulnerable to destruction, looting or other damage that cannot be adequately protected will be closed. However, FWS has some previously appropriated funding available; some of these funds are being used to resume work, for the next two pay periods, on high priority projects and activities in support of the FWS mission and on behalf of the American public. Examples of these funding uses include re-staffing certain refuges, maintaining work on some large-scale construction projects, and developing plans for prescribed burns in preparation for the upcoming fire season. FWS updated its contingency plan to reflect moving excepted employees to exempt status for two pay periods (2019-02 and 2019-03). FWS will re-evaluate this after these two pay periods.

For two pay periods:

- Re-staffing 38 National Wildlife Refuges for public use and/or resource management. These NWRs were chosen based on criteria including visitation during the month of January, opportunities, including hunting, that would otherwise be limited or unavailable during this time, and protection, management and security of public

resources. The re-staffing of these refuges will also bring economic benefits to local communities.

- FWS will continue work on large infrastructure projects that address both access and maintenance needs as well as storm damage from recent hurricanes. FWS is using previously appropriated funds to continue work on the construction projects and deferred maintenance and 2018 hurricane supplemental funds to work on storm damage projects. Generally each of these projects are in excess of $500,000.

- In addition to those employees who are already working for the safety and protection of life and resources, FWS reactivated employees to work on developing plans for prescribed burns in preparation for the upcoming fire season. This will allow FWS to stay on track to implement these fire plans.

- Increasing access to public lands is a priority of the Department and Service. In order to meet regulatory deadlines for next year's hunting season, it is important that work on proposed regulations continue over the next two pay periods. FWS is using carryover funds to continue work on streamlining regulations and bringing them in line with state regulations. This will increase coordination with our state fish and wildlife partners and provide transparency and clarity to hunters and anglers.

FWS is in the process of reactivating approximately 100 employees to work on high-priority projects throughout the country that are funded through reimbursable agreements with other entities, including other federal agencies that have funding available for the work.

National Park Service

Most National Park Service employees are furloughed with the exception of employees deemed essential for protection of life and property. Because of the Administration's priority on increased access, the NPS' open air memorials, park roads, lookouts, trails and other generally open areas will remain accessible to visitors during a lapse, though NPS will only provide limited visitor services. Where appropriate, NPS will also allow concessioners, commercial use authorization holders, and other third parties to continue operations. NPS will also accept donations from third parties (including states, friends' groups, and others) to continue operations. On January 5, 2019, the Acting Secretary of the Interior instructed the NPS to use FLREA funds to continue operations, where appropriate, on a limited basis to provide for the protection and cleanliness of resources, manage conflict issues, and provide basic visitor services. Parks that have begun using these funds include the National Mall, Grand Canyon, Sequoia-King's Canyon, Joshua Tree, and the Statue of Liberty. In addition to basic visitor services at these and other parks, NPS is reviewing the potential use of FLREA funds for other activities related to rudimentary visitor services or resource protection.

8-30 Day Outlook

U.S. Fish and Wildlife Service

ONGOING ITEMS

A proposed change to the implementing regulations for the Migratory Bird Treaty Act (MBTA) is expected to clear DOI. The rule: 1) defines the scope of the MBTA as it applies to conduct resulting in the injury or death of protected migratory birds and 2) reduces permitting burdens by modifying existing permit exceptions and proposing new ones. This proposed regulation will be consistent with the Department Solicitor's Opinion M–37050. After clearing DOI, the rule has to go to OMB-OIRA for interagency review, which usually takes 90 days. FWS will coordinate with DOI regarding outreach. (Updated 12/19/2018)

FWS plans to publish the FY 2016 Recovery Report to Congress. The Recovery Report provides an update on the progress of federally protected species toward recovery between October 1, 2014, and September 30, 2016 (fiscal years 2015 and 2016). FWS does not anticipate controversy or opposition to the report. Planned outreach will include congressional notifications and posting the report to the web. (Updated 12/19/2018)

FWS will host information webinars outlining next steps in developing a 12-month finding on a petition to list the monarch butterfly under the Endangered Species Act. Attendees include state agency directors and tribal staff. FWS was petitioned to list the monarch in 2014 and issued a positive 90-day finding indicating the petition was substantial. FWS has finalized a species status assessment and is evaluating the monarch conservation database and other information to determine whether listing the monarch is warranted. The 12-month finding is due June 30, 2019. (Updated 12/19/2018)

FWS plans to publish a proposed rule to allow the baiting of brown bears on Kenai NWR, which is permitted under Alaska state hunting regulations. The rule would also allow the discharge of firearms along the Kenai and Russian rivers during certain times of the year; allow the use of snowmobiles, all-terrain vehicles, and utility task vehicles on certain lakes when there is adequate snow and ice cover; and increase access to the refuge by bicycle and game cart. This proposed rule would be available for a 60-day public comment period and is likely to be strongly opposed by those who believe that baiting of wildlife for hunting is unethical or who oppose hunting (particularly of large predatory mammals). FWS plans to notify stakeholders directly by email and issue a news release to Alaska media announcing the proposed rule and public comment period. (Updated 11/21/2018)

FWS and the National Fish and Wildlife Foundation (NFWF) will announce the final allocations for the first round of Delaware River Basin Conservation Act grants, appropriated by Congress in FY 2018. More than $6.4 million in grant applications was received and the review committee of partners named in the Act approved a final slate of $4.1 million with a non-federal match of $7.5 million. The grants will restore 626 acres of wetland habitat and 549 acres of floodplain; increase public access on 1,794 acres; create 32 new jobs; and leverage more than 3,000 volunteers in project delivery. NFWF conducted fiscal notifications

to Congress on November 16, with a 30-day response time. FWS and NFWF will notify grantees and coordinate a rollout event in January. (11/28/2018)

FWS plans to publish the FY 2017 Federal and State Endangered and Threatened Species Expenditures Report to Congress. This report provides a compilation of reasonably identifiable expenditures for the conservation of listed species reported independently by federal and state agencies. Expenditures are reported for species that were listed during FY 2017 through September 30, 2017. FWS does not anticipate opposition to the report. Planned outreach includes congressional notifications and posting the report to the FWS website.

Species	**Action**	**Current Status**	**Previously Proposed Date**
Tri-spot darter	Final listing determination, proposed 4(d) rule, and proposed critical habitat	Cleared DOI	Week of December 24
Southern Selkirk Mountain woodland caribou	Final determination of proposed relcassification as distinct population segment; list as endangered	Pending DOI clearance	Week of December 24
Meltwater lednian stonefly Western glacier stonefly	Final listing determination	Pending DOI clearance	Week of December 24
26 draft recovery plan amendments for 42 species	Draft recovery plans	Pending DOI clearance	Week of December 24
Eastern massasauga rattlesnake	Availability of draft recovery plan		On or around January 2
Endangered distinct population segment of Atlantic salmon in the Gulf of Maine	Updated final recovery plan		By January 15
Second batch of 29 draft recovery plan			On or around January 7

amendments for 42 species			
Barrens topminnow	Final listing determination		On or around January 25
Panama City crayfish	Six-month extension of the final determination of whether to list as a result of substantial scientific disagreement concerning the species; also reopen the comment period on the proposed rule to list the species for an additional 30 days		On or around January 25
Franklin's bumble bee	Proposed listing determination determined that critical habitat designation for this species is not prudent		On or around January 31
Jaguar	Announcement of the completion of the final recovery plan for the jaguar		On or around January 10
Macaw	final determination on a proposed rule to list the scarlet macaw, *Ara macao cyanoptera,* as endangered; list the northern distinct population segment (DPS) of *A. m. macao* as threatened; and list the southern DPS of *A. m. macao*		On or around January 14,

	and subspecies crosses as threatened based on similarity of appearance to *A. m. cyanoptera* and *A. m. macao*; will include a 4(d) rule that will allow for the import and export as well as interstate commerce of certain scarlet macaws without a permit.		
Fisher, West Coast distinct population segment	Notice reopening the comment period for the proposal to list as a threatened species		On or about January 14
California condor in northern California and Oregon	Proposal to designate a nonessential experimental population to help meet recovery goals for the species		On or around January 15
Borax lake chub	Proposed delisting determination due to recovery		On or around January 18
Running buffalo clover	Proposed delisting determination		On or around January 18
Gray wolf	Proposal to delist due to recovery. This proposed rule does not have any effect on the separate listing of the Mexican wolf as endangered under the ESA.		On or around January 31
Arizona eryngo	90-day findings on petitions to list		On or around January 31

Dunes sagebrush lizard Giraffe Refugio manzanita San Gabriel chestnut snail			
Neuse River waterdog Carolina madtom	12-month finding, proposed listing determination, and proposed critical habitat designation		On or around January 31

National Park Service

ONGOING ITEMS

The revisions to the NPS proposed rulemaking, *Demonstrations and Special Events on the National Mall and Memorial Parks*, are nearing completion. On November 21, the Office of Management and Budget (OMB) determined that the rulemaking was significant under Executive Order 12866 due to its "novel legal or policy issues." As a result, the final rule will be reviewed by OMB for up to 90 days. The proposed rulemaking modifies how the NPS processes permit applications for demonstrations and special events. The rulemaking also identifies locations where activities are allowed, not allowed, or allowed but subject to restrictions. During the 60-day public comment period, which closed on October 15, the NPS received 140,652 comments.

The NPS expects to publish a proposed rule that would revise regulations governing the listing of properties in the National Register of Historic Places. The proposed changes would implement the 2016 Amendments to the National Historic Preservation Act, extend the timeline for the Keeper to respond to appeals, and ensure that if the owners of a majority of the land area in a proposed historic district object to listing, the proposed district will not be listed over their objections. The rule would also make several minor, non-substantive changes to existing regulations. The package for approval of the Federal Register notice is going through the surname process and is currently with the Office of the Assistant Secretary for Fish and Wildlife and Parks.

Isle Royale National Park will implement phase two of the Wolf Relocation effort to the island. Between four and six wolves from Michipicoten Island in Ontario, Canada, will be captured by a company using net guns contracted by the Ministry of Natural Resources and Forestry for Ontario. The animals will be medically examined by NPS wildlife veterinarians on Michipicoten Island, then transported via helicopter to a remote section of the park where they will be then collared and released. This is the second operation as part of the three- to

five- year plan to relocate 20 – 30 wolves to Isle Royale in order to restore predation to the ecosystem.

On February 4, the Acadia National Park Advisory Commission will hold a public meeting in Bar Harbor, Maine. The commission advises the Secretary and the NPS on matters relating to the management and development of the park. The committees under the commission will report out on topics such as park use, science, and education. The commission has also been approved to meet on June 3 and September 9. Decision to postpone will be made on February 1.

The NPS Alaska Region anticipates completing the response to comments on the Alaska Sport Hunting and Trapping proposed rule and environmental assessment. On December 14, NPS awarded a contract to one of two vendors who bid to conduct the comment summary. While the contractor has been reviewing and cataloging comments during the appropriations lapse, NPS has been unable to begin drafting responses to significant comments that have come in.

Fire Island National Seashore plans to implement the first phase of its Deer Management Plan. The plan was approved through a Record of Decision in April 2016. The U.S. Department of Agriculture Animal and Plant Health Inspection Service will carry out the first phase at the William Floyd Estate, a unit of the Seashore. The Estate is closed to the public however, protests are anticipated near the Estate and/or at the Seashore's Headquarters. Regional and, potentially, national press coverage is expected.

Originally scheduled for on or around January 9, Golden Gate National Recreation Area plans to announce the prospectus release for the business opportunity to operate food and beverage and retail services at Muir Woods National Monument. A one-day site visit was scheduled to be provided to interested parties on February 6.

Yellowstone National Park plans to release a Finding of No Significant Impact (FONSI) for a project to replace the Lewis River Bridge located just south of Lewis Lake on the South Entrance Road within the park. This project would include replacing the existing bridge, built in 1960, on a new alignment adjacent to, and east of, the existing bridge. The project would also reconstruct associated parking areas and turnouts located at three corners of the new bridge. The existing bridge was listed as Category B in the latest bridge safety inspection on 9/26/14, which means it is seriously deficient or presents a safety hazard, but may remain in service at reduced loads with frequent inspections. The NPS prepared an Environmental Assessment for this project that was on public review for 30 days, ending November 30, 2018. During this time 11 comments were received. The proposed project is scheduled for construction in 2020-2022.

Lake Roosevelt National Recreation Area plans to announce selection of the concessioner to operate the Kettle Falls Marina under a new 10-year concession contract.

In February, the prospectus for glacier landing air taxis and scenic tours at Denali National Park and Preserve will close. This solicitation was issued on November 8 for four concession contracts, with a 10-year term of January 1, 2020, to December 31, 2029.

NPS Midwest Region staff will attend a consultation meeting with the Tribal Council of the Prairie Island Indian Community Tribal Historic Preservation Office. The Tribal Council requested this consultation to discuss the Coldwater Springs sacred site, which is located in the Recreation Area.

San Francisco Maritime National Historical Park will host an event in the Maritime Museum to mark the 80th anniversary of the Aquatic Park Bathhouse's construction. In addition to public programs, an event will showcase the installation of a plaque on the building which commemorates its designation as the *Sala Burton Building* in the park's enabling legislation. Members of the late Representative Sala Burton's family and Speaker Nancy Pelosi are invited to attend.

Wrangell-St. Elias National Park and Preserve will conduct the next scheduled listening session in Kenny Lake, Alaska, a community local to the park. In February through April, additional listening sessions will be scheduled for the following local communities: Chistochina, Fairbanks, Gakona, Glennallen, Mentasta, and Tazlina. A news release will announce the dates, times, and specific venues of the above mentioned locations. Beginning June 26, 2018, Wrangell-St. Elias National Park and Preserve conducted a series of public listening sessions to engage resident zone communities and federally recognized tribal governments in discussions about management of wilderness, frontcountry and backcountry areas within the park. Specific locations were: Copper Center, Chitina, Slana, and McCarthy/Kennecott.

ASSISTANT SECRETARY FOR INDIAN AFFAIRS

Week Ahead Schedule of Meetings, Hearings, and Travel

Assistant Secretary Tara Sweeney is in the office.

Principal Deputy Assistant Secretary John Tahsuda is in the office.

Deputy Assistant Secretary Mark Cruz is in the office.

Deputy Assistant Secretary - Management Jason Freihage is in the office.

Acting Bureau of Indian Affairs (BIA) Director Darryl LaCounte will be in Billings, Montana, but will be available as needed.

BIA Deputy Director - Field Operations Jim James will be in the Albuquerque, New Mexico, office but will be available as needed.

Chief of Staff Rich Myers will be available as needed.

BIE Director Tony Dearman will be in Anadarko, Oklahoma, but will be available as needed.

Immediate Announcements and Actions For the Next Week

Assistant Secretary for Indian Affairs

The AS-IA will begin approval process for Office of Justice Services to begin hiring new officers.

Bureau of Indian Affairs

The BIA will move about 25 employees nationwide from furlough to excepted status, and an additional 25 employees from furlough to exempt status. The employees moved to excepted status will continue processing: 1) distribution of remaining FY18 self-determination contract funds to tribes; 2) distribution of Wind River Tribe oil and gas revenue per capita funds; 3) in coordination with the Office of the Special Trustee, distribution of elderly per capita funds to the Colville and Warm Springs Tribes; and 4) other necessary tasks of short duration. The employees moved to exempt status will begin processing necessary tasks of longer duration, including approval of revenue-producing leases and timber sales (for individual Indians and tribes); processing of lockbox payments and other payments requiring manual processing; and most importantly, child care services (such as foster care payments, home visits, and processing placements and other interactions with state agencies).

Bureau of Indian Education

The BIE will ask the Office of the Federal Register to publish as soon as possible a Notice of Public Meeting for the fourth and final Standards, Assessments and Accountability Negotiated Rulemaking Committee. The basis for this request is that the Committee's activities support currently funded BIE and that delaying publication would prevent or damage the execution of those functions.

8-30 Day Outlook

Assistant Secretary for Indian Affairs

ONGOING ITEMS

The AS-IA and exempted and excepted senior staff continue to hold daily conference calls to address issues related to the execution of an orderly government shutdown and the preservation of property, health and safety in Indian Country.

Bureau of Indian Affairs

ONGOING ITEMS

The BIA Acting Director and Regional Directors (excepted staff) continue to hold conference calls every other day to address issues related to the execution of an orderly government shutdown and the preservation of property, health and safety in Indian Country.

Bureau of Indian Education

UPDATED ITEMS

The Navajo Nation retroceded the operation of the Borrego Pass School to the BIE, which has operated the school since January 3, 2019. The BIE is currently advertising teacher and other positions for permanent employment at the school.

The merger of the Santa Rosa Ranch and Santa Rosa Day schools on the Tohono O'odham Reservation in Arizona was successful and students from both schools returned to class after Christmas Break at the Day School on January 8. The target date for installation of modular classrooms and the resumption of class at the Santa Rosa Ranch School is on track for March, 2019. On January 24th ASIA will meet with the incoming professional project manager who will oversee the installation of modular buildings at the Santa Rosa Ranch School.

ASSISTANT SECRETARY INSULAR AND INTERNATIONAL AFFAIRS

Week Ahead Schedule of Meetings, Hearings, and Travel

TRAVEL

All planned travel has been suspended.

ASIIA Domenech is exempt and in the office next week.
OIA Director Pula is exempt and in the office next week.
INT Director Karen Senhadji is on furlough.
Sarah Jorgenson, Senior Advisor, is exempt and in the office next week.
Oceans Program Coordinator Liza Johnson is out on furlough/maternity leave until March 29.

Immediate Announcements and Actions for the Next Week

AS-IIA Programs Operating During the Shutdown: The Office of Insular Affairs has brought back 18 International Affairs ITAP staff to be exempt due to available permanent funding from USAID and State Department Projects from the previous fiscal year. Eight other International Affairs staff remain on furlough status. OIA policy analysis and program management activities involving previous obligated or mandatory funding have resumed. The Oceans Program Coordinator remains furloughed.

116th Congress Meetings/Action: Assistant Secretary Domenech is scheduled for the following courtesy meetings with the Congressional Delegates (pending approval from OCL):
-Thursday, January 24 - Congressman Sablan (CNMI)
-Monday, January 28 - Congressman San Nicolas (Guam)
-Tuesday, January 29 - Congresswoman Radewagen (American Samoa)
(A scheduled meeting with Congresswoman Plaskett (USVI) is expected soon.)

Guam Section 30 Funding: Next week, AS-IIA will discuss Guam Section 30 funding with the new Guam leadership to determine if the payment will be made now or if the payment will be applied in September against the $12 million offset for the Guam War Claims Fund. OIA staff completed an analysis on a request received during the shutdown from Guam for additional Section 30 funding in the amount of $6 million that IRS has indicated is owed to them. The source of funds for the Guam Section 30 payment is permanent indefinite rather than annual appropriations.

UPDATE. Insular Grants: OIA grant managers continue to review requests for payments that have been received during the shutdown and are processing payments when appropriate for grants that were previously obligated. A list of payments/draw-downs against existing grant awards can be found below.
In addition, OIA grant managers are reviewing needs for ongoing grants for items such as health, safety, and other urgent matters to determine if any short term grants need to be awarded during the next few weeks. Capital Improvement Program grant managers continue to assess performance and determine competitive criteria for future years' budgets.

<u>COMPACT/COMPACT IMPACT (Mandatory Funding)</u>
-$8,245,121 - Guam Compact Impact: Operations Offsets Related to Education
-$86,112.11 - Guam Compact Impact: Operations Offsets - Department of Public Health & Social Services
-$2,019,724 - Federated States of Micronesia Compact payments for education, health and infrastructure
<u>CAPITAL IMPROVEMENT PROGRAM (Mandatory Funding)</u>
-$25,000 - Guam Capital Improvement: Puerto Rico Dump Post-closure Monitoring Services
-$84,242.49 - CNMI Capital Improvement: Commonwealth Utilities Corporation Stipulated Order No. 2 Projects
-$73,203.34 - Capital Improvement Program, American Samoa Shipyard Authority, Slipway Renovation Project
<u>ENERGIZING INSULAR COMMUNITIES</u>
-$26,976.25 - Guam Energizing Insular Communities: Guam Power Authority Wind Turbine Project

TECHNICAL ASSISTANCE PROGRAM
-$72,051.70 - U.S. Virgin Islands Technical Assistance: Virgin Islands Housing Authority Youth Build, Virgin Islands Bureau of Economic Research 2017 Virgin Islands Consumer Price Index
-$4,150 - Republic of the Marshall Islands Technical Assistance: Marshallese Education Initiative Community Advancement
-$20,993.87 - General Technical Assistance: Partners in Development We Are Oceania, Pacific Islands Ocean Observing System Atmospheric and Wave Forecasts
-$10,997 - Technical Assistance: Guam Police Department Neighborhood Watch Program Outreach
-$14,430 - Technical Assistance: Guam Fire Department Hazmat Equipment Procurement
-$8,604.39 - Technical Assistance: American Samoa Cancer Patient Navigator Program
-$15,570.07 - Technical Assistance: Boys and Girls Club of American Samoa Youth in Action Program.
-$13,814 CNMI Technical Assistance: Invasive Species Coordinator
-$17,758 CNMI Technical Assistance: Contract Worker Survey
-$33,000 CNMI Technical Assistance: Coconut Rhinoceros Beetle Detection, Eradication and Preventative Measures
MAINTENANCE ASSISTANCE PROGRAM
-$2,400 - Maintenance Assistance: American Samoa Shipyard Apprenticeship Program
BROWN TREESNAKE PROGRAM
-$17,798.18 - Brown Treesnake Program: CNMI Brown Treesnake Interdiction Program
CORAL REEF AND NATURAL RESOURCES
-$16,871.09 - FSM Coral Reef/Natural Resources Invasive Species: Kosrae Association of Tourism Operators for Eradication of Crown of Thorns Starfish

UPDATE. Graduate School USA Activities in January:
January 28-31, 2019: Developing Interim Procurement Regulations, Majuro, RMI.
January 28-31, 2019: Preparing for the Year-End Close for Government, American Samoa.

Medicaid and CHIP Payment Access Commission (MACPAC) Meeting Regarding Territories: On January 23, officials from MACPAC, a non-partisan legislative branch agency that provides policy and data analysis and recommendations to Congress, Health and Human Services, and the states (or territories) on a wide array of issues affecting Medicaid and the State Children's Health Insurance Program will have a meeting to discuss Medicaid and the U.S. territories as well as the possibility of giving a presentation at the upcoming IGIA.

RAND Draft Report on the Freely Associated States and Chinese Influence: OIA staff will provide comments on a draft RAND report on the Freely Associate States and Chinese influence by January 31. As required under the 2018 National Defense Authorization Act, the Department of Defense is required to contract a study and assessment of U.S. security and foreign policy interests in the Federated States of Micronesia, the Republic of Palau, and the Republic of the Marshall Islands. The deadline for submission of this report, previously due December 1, 2018, has been extended to January 31, 2019.

8-30 Day Outlook

NEW ITEMS

OIA UPCOMING SIGNIFICANT TRAVEL (Pending the end of the shutdown):
2/17-18. Chuuk, FSM. 75th Anniversary of "Operation Hailstone" WWII. At the request of the State Department, INDOPACOM, and NSC, AS-IIA Domenech and OIA Director Pula are planning to attend so long as the shutdown has concluded.

Graduate School USA Activities in February: Next month, OIA will host the following training courses under a previously awarded contract:
February 4-7, 2019: Developing Corrective Action Plans, Majuro, RMI.
February 8, 2019: Practical Ethics for Government Employees, Majuro, RMI.
February 19-22, 2019: Innovation without Additional Resources, Koror, Palau.
February 11-15, 2019: Twenty seven insular government representatives will continue their participation in the Executive Leadership Development Program through Session III in Yap, Federated States of Micronesia (FSM). This Program will focus on a case study of a fictional government facing a variety of challenges common to the Pacific island governments.

Yap State Finance Office Consultations: During the week of February 11, financial experts from Graduate School USA will work with the Yap State Department of Finance and Administration in response to recent requests and by way of follow-up to several Island Government Finance Officers' Association (IGFOA) Winter Meeting initiatives. Topics include tracking finance office procurement measures, addressing FY17 audit findings, working with the current financial management information system (Fundware), and discussing procurement needs for new financial management information systems (a World Bank-funded FSM national initiative).

Yap State School Designs: OIA staff are anticipating awarding a $1.3 million Compact grant for the design of three school facilities in the Federated States of Micronesia, Yap State.

UPDATED ITEMS

UPDATE. CNMI Governor Scheduled to Meet with DHS/OMB Regarding Parole Visa Policies Relating to the Commonwealth of the Northern Mariana Islands (CNMI) and Guam: It is our understanding that Governor Torres is planning to schedule a meeting with DHS/OMB to take place around NGA/IGIA in February to discuss the proposed notice regarding the rescission of discretionary parole visa policies relating to nationals of the People's Republic of China and the Russian Federation seeking entry into Guam and/or the Commonwealth of the Northern Mariana Islands. Related to this, CNMI has written the President requesting formal Section 902 consultations on the issue. That letter has been forwarded to OIA for response, which OIA has drafted and will finalize for review.

UPDATE. OIA, U.S. Dept. of Energy and Commonwealth Utilities Corporation to Develop Energy Plan for CNMI as required by FEMA: OIA staff coordinated a

conference call with CNMI officials from the U.S. Department of Energy and Commonwealth Utilities Corporation (CUC) in an effort to assist CUC with putting together an energy recovery plan as well as sharing lessons learned from VI WAPA in preparedness and response to hurricanes that have impacted the Caribbean Islands. A follow-up conference call will take place in February to include Mr. Clinton Hedrington at VI WAPA, who has been specifically working with DOE and FEMA in USVI's resilience efforts. In addition, the DOE team agreed to review CUC's draft recovery plan, provide expertise from the National Energy Labs, and to visit CNMI and meet with the CUC team.

UPDATE. U.S. Government-Wide Comprehensive Report on Federal Grants to U.S. Insular Areas: OIA staff have been in contact with the former HHS staffer that managed the insular areas federal grants project, and he has agreed to assist in training OIA staff and to provide his procedural documents. OIA staff is working with him to set dates for training. OIA staff are working to take over an existing database from HHS and gather information from across the federal government on federal grants to U.S. insular areas. Completion is targeted for March of 2019.

POWER UPDATE. Typhoon Yutu Recovery: OIA staff continue to work with FEMA and local officials on typhoon recovery in CNMI. UPDATE: Power has been restored to 82% of homes on Saipan and 63% of the homes on Tinian.

ONGOING ITEMS

ON TRACK. 2019 Interagency Group on Insular Areas (IGIA) Senior Plenary Session: The 2019 IGIA Senior Plenary Session to be held on February 25, 2019, between 1:30 p.m. and 4:30 p.m. at the EEOB. The Secretary of the Interior is a co-chair of the event. It has been confirmed that Guam Governor "Lou" Leon Guerrero will attend NGA and IGIA next month, and she and her staff will also meet with AS-IIA Domenech and OIA Director Pula when she is in town. AS-IIA has been in close contact with White House Intergovernmental Affairs regarding the planning and a contingency plan should the shutdown continue through the planned IGIA date. OIA staff reached out to Governors Moliga, Torres, and Bryan's Chiefs of Staff regarding their attendance to the Plenary Session. OIA will be sending an update to the Congressional Delegates pending OCL's approval.

NO CHANGE. Winter Meeting of the Coral Reef Task Force (CRTF): The CRTF working group meetings (including the federal meeting and steering committee meeting) will occur on 2/19-2/20 at the Silver Spring Civic Center, and the business meeting and executive lunch will take place on 2/21 at EPA HQ. Pending shutdown status.

NO CHANGE. CNMI Tinian Dynasty DOJ Judgement: SOL continues to research issues related to this facility which was the subject of a (June 3, 2015) Financial Crimes Enforcement Network, Department of the Treasury, assessed $75 million civil money penalty against Hong Kong Entertainment (Overseas) Investments, Ltd., for willful and egregious violations of the Bank Secrecy Act. Specifically, as described in the assessment, Tinian Dynasty failed to develop and implement an anti-money laundering (AML) program.

ON HOLD. Census Compact Surveys: Analysis of census data on hold. With funding from OIA, the U.S. Census began its work in Guam and the Commonwealth of the Northern Mariana Islands (CNMI) as part of the next five-year enumeration of migrants from the freely associated states (FAS) in Hawaii, Guam, the CNMI and American Samoa, as required by the Compact of Free Association (Public Law 108-188). Surveys are expected to be completed by May 2019.

NO CHANGE. Secretarial Appointments to the Board of Trustees for the Conservation Trust of Puerto Rico: The Assistant Secretary, who represents the Secretary on the Trust Advisory Council, is working with the White House Liaison to identify three Trustees to serve starting April 2019. Under the charter, two Trustees must reside in Puerto Rico, and one in the States. They are jointly appointed by the Secretary and the Governor of Puerto Rico.

Upcoming International Travel:

No international travel by senior officials is known.

Additional Known International Travel, Employees Departing January and February 2019 is unknown.

International Memoranda of Understanding and Documents Under Development:

NO CHANGE. The Netherlands: MOU on offshore wind energy cooperation, in surname. Requested by BOEM and Dutch counterparts, for signature by BOEM/ASLM, TBD, in conjunction with a potential visit to the U.S. by the Dutch Prime Minister early 2019. INT was supporting BOEM as needed. BOEM to sign.

NO CHANGE. New Zealand: MOU on wildland fire cooperation, in development. Requested by DOI and USDA to update existing wildfire arrangement, and continue mutual assistance on wildfires as needed, for signature by the U.S. Ambassador to New Zealand in early 2019 by U.S. Embassy New Zealand. INT was coordinating with Office of Wildland Fire, as they worked with New Zealand counterparts and the Departments of Agriculture and State.

NO CHANGE. Norway: MOU on energy cooperation, in development. Requested by DOI Energy Counselor and Deputy Chief of Staff, for signature by BOEM/ASLM, TBD. INT was supporting BOEM as needed, and BOEM is working with Norwegian counterparts and Department of State. BOEM is reviewing recent Norwegian revisions.

NO CHANGE. Vietnam: MOU to strengthen cooperation on law enforcement to combat wildlife trafficking, in development. Requested by FWS law enforcement, Department of State, and Vietnamese counterpart, for ASFWS/FWS signature when the Vietnamese counterpart travels to Washington, DC, in 2019. INT was coordinating with FWS Office of Law Enforcement.

AWARENESS

President's Advisory Commission on Asian American and Pacific Islanders: On January 17, President Trump announced his intent to appoint the following individuals to be Members of the President's Advisory Commission on Asian Americans and Pacific Islanders. David B. Cohen of California (former DAS-IN under President George W. Bush) was appointed, along with Rep. Amata Coleman Radewagen of American Samoa.

President Trump also announced his intent to designate the Honorable Elaine L. Chao to be Co-Chair of the White House Initiative on Asian Americans and Pacific Islanders.

Supplemental Appropriations FY 2019: On January 17, the House of Representatives passed H.R. 268, a supplemental appropriations bill for disaster relief (i.e. hurricanes, typhoons, wildland fire). The Office of Insular Affairs received $2 million for Technical Assistance for financial management expenses related to the consequences of Typhoon Yutu. In addition, two amendments offered by Congressman Sablan and one amendment offered by Congresswoman Radewagen were adopted:

1. to increase funding for the Marianas food stamps block grant by $15 million to cover the cost of households, not previously eligible for aid, who remain in need of assistance because of continuing income loss after Typhoon Mangkhut and Super Typhoon Yutu;
2. to increase the funding for the Northern Marianas Medicaid program by $16 million to help the islands in recovery from Typhoon Mangkhut and Super Typhoon Yutu; and
3. to increase the amount of nutritional assistance appropriated in Sec. 101 by $5 million.

The Senate is expected to include this bill in a larger omnibus package on immigration/border wall funding.

Bribery Charge: On January 16, 2019, in the U.S. District Court of Hawaii, charges were filed against a contractor for conspiracy to violate the Foreign Corrupt Practices Act and to pay a bribe to an agent of an organization receiving federal funds. The Honolulu-based contractor allegedly bribed Hawaii Government officials in order to land a $2.5 million contract. He is also accused of bribing Federated States of Micronesia officials with at least $200,000 in order to get $7.8 million in FAA contract payments. The bribes came in the form of vehicles, gifts, and entertainment for officials, and were falsely classified as business expenses. OIA staff have cooperated with authorities on this investigation.

NPS Supplemental Historic Preservation Fund: The National Park Service has approved $10,000,000 for historic preservation in the U.S. Virgin Islands. NPS initially planned to give USVI $5.6M while USVI requested $19.8M. These funds must be spent this fiscal year.

ASSISTANT SECRETARY FOR LAND AND MINERALS MANAGEMENT

Week Ahead Schedule of Meetings, Hearings, and Travel

Assistant Secretary for Land and Minerals Management Joe Balash will be in the office.

Principal Deputy Assistant Secretary Casey Hammond will be in the office.

Deputy Assistant Secretary Gary Lawkowski will be in the office.

Immediate Announcements and Actions for the Next Week

Bureau of Land Management

FOR AWARENESS: On January 11, 2019, the BLM modified its contingency plan governing a lapse in appropriations. The BLM is continuing to bring back employees to prepare for the March and June oil and gas sales in WY, CO, MT/DK, UT, and NM. Employees are also being brought back to assist with the processing of grazing related items through the use of available carryover funds. APDs are continuing to be processed, as they are fee-based activities. Special Recreation Permits (SRPs) are being processed and administered for over 30 events taking place on federal land. The BLM is bringing on employees to focus efforts on both ongoing post-fire treatments and fuels reduction projects to prepare for the 2019 wildfire season. Carryover and cost recovery funds are being used to continue work on a variety of projects ranging from solar and mining projects to transmission lines. Wild horses and burros continue to be fed and cared for both by BLM staff and through contract work. Timber sales are in process to begin in February 2019. BLM lands continue to be open to the public, and each State Office continues to coordinate trash collection and restroom maintenance where appropriate.

Late January-Early February. BLM-DC will issue guidance on temporarily modifying the grazing authorization and billing process. BLM states are foregoing the normal courtesy application and will distribute a letter that will serve as the annual authorization for the 2019 grazing year in order to turn out livestock in accordance with the terms and conditions that are specified on the permittees ten year grazing permit or lease. Once the lapse in appropriation has been resolved and the BLM range staff resumes their duties, the BLM will contact permittees in order to process any application and/or issue they might have about the grazing bill.

January 28. BLM-WY. The protest period for the Wyoming Greater Sage-Grouse Final EIS and Proposed RMP Amendments will close on January 28, 2019.

January 29. BLM-NV. BLM NV will announce the cancellation of its Northeastern Great Basin Resource Advisory Council meeting which was initially scheduled to occur January 30, 2019. The RAC meeting will be rescheduled at a later date.

January 30. BLM-ES. The 30 day comment period on the draft EA specific to the Addition of Terms and Conditions for Renewal of Hardrock Leases, MNES 001352 and MNES 001353, has been extended until January 30, 2019. This is due to two outages directly impacting the BLM's online ePlanning database server.

January 30. BLM-AK. The public comment period on a new Integrated Activity Plan (IAP) and associated Environmental Impact Statement (EIS) for the National Petroleum Reserve in Alaska (NPR-A) has been extended until January 30, 2019. This is due to two outages directly impacting the BLM's online ePlanning database server.

February 1-9. BLM-CA. The King of Hammers off road race- the second largest special recreation permit issued by the BLM – will take place at the Johnson Valley Off Highway Vehicle Recreation Area in San Bernardino County, California. The desert race event attracts approximately 50,000 spectators during the nine-day period.

February 1-3. BLM-AZ. The Colorado River District will host, through a Special Recreation Permit, the 2019 Best In The Desert Off-Highway Vehicle Race. The events are expected to attract 400 race participants and approximately 5,000 spectators. A temporary closure will be put in place on selected public lands in Arizona, east of Parker in La Paz County from Feb. 1-3, to minimize the risk of potential collisions with spectators and racers. (12/14/18)

Bureau of Ocean Energy Management

NEW ITEMS

Late January-Early February: BOEM intends to reopen the comment period and reschedule the public meetings for the Draft Environmental Impact Statement (DEIS) for the Construction and Operations Plan (COP) submitted by Vineyard Wind LLC. BOEM cancelled the previously scheduled public meetings on the DEIS. BOEM intends to use carry over funds to begin this process in late January, 2019.

8-30 Day Outlook

Bureau of Land Management

NEW ITEMS

Late January-Early February. BLM Oil and Gas Lease Sale Dates (State-by-State Breakdown). Each state office offering oil and gas lease sales have varying deadlines in order to meet their sale dates. As such, announcements will be arriving to the Department on a rolling basis. Below are the various deadlines (*subject to slight variations*) broken out for the March (quarter 1) and June (quarter 2) oil and gas sales. For awareness, due to budgetary constraints, BLM-ES, BLM-NV, and BLM-AZ will not be holding March lease sales.

BLM-CO. BLM CO has scheduled their first two quarterly oil and gas lease sales in 2019, March 28 and June 28. **March 28, 2019 CO Oil and gas lease sale** – 26 parcels totaling 14,000 acres. 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (November 16, 2018) - posted on website and press release; 30-day public protest period (for the Greater Sage-Grouse areas) - Began November 16, 2018 and concluded December 16, 2018; Two-week public review and comment period of the environmental documents -

Begins March 1 and conclude March 15, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting -March 23, 2019**;** One day prior to sale – Decision Record and Signed FONSI – March 27. **June 28, 2019 CO Oil and gas lease sale – 12 parcels totaling 4,800 acres –** 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (January 28, 2019) - posted on website and press release; 15-day public protest period - Began January 28, 2019 and concluded February 12, 2019; Two- week public review and comment period of the environmental documents - Begins March 11 conclude March 25, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting –June 26, 2019; One day prior to sale – Decision Record and Signed FONSI – June 27.

BLM-MT. BLM-MT has scheduled one quarterly oil and gas lease sales in 2019, March 2. We are awaiting a full schedule of the second quarterly sale, which is slated to take place in July. **March 21, 2019 MT Oil and gas lease sale – 322 parcels totaling 180,000 acres –** 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (November 20, 2018) - posted on website and press release; 30-day public protest period (for the Greater Sage-Grouse areas) - Began November 20, 2018 and concluded December 21, 2018; Two- week public review and comment period of the environmental documents – Begins January 25 and conclude February 8, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting -March 19, 2019**;** One day prior to sale – Decision Record and Signed FONSI – March 20.

BLM-NM. BM-NM has scheduled their first two quarterly oil and gas lease sales in 2019, March 28 and June 20. **March 28, 2019 NM Oil and gas lease sale - 55 parcels totaling 15,491 acres in NM & OK** – 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (September 28, 2018) - posted on website and press release; 10-day public protest period - Began October 5, 2018 and concluded October 9, 2018; Two- week public review and comment period of the environmental documents - Begins February 11 and conclude February 20, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting -March 26, 2019; One day prior to sale – Decision Record and Signed FONSI – March 27. **June 20, 2019 NM Oil and gas lease sale - 56 parcels in NM, KS, & OK –** 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (January 28) - posting on website and press release; 10-day public protest period - Begins January 28 and concludes February 8; Two- week public review and comment period of the environmental documents - Begins March 11 and conclude March 22, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting - June 18, 2019**;** One day prior to sale – Decision Record and Signed FONSI – June 19.

BLM UT. BLM-UT has scheduled their first two quarterly oil and gas lease sales in 2019, March 25-26 and June 10. **March 25-26, 2019 UT Oil and gas lease sale - 156 parcels totaling 217,000 acres –** 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (November 16, 2018) - posted on website and press release; 30-day public protest period (for the Greater Sage-Grouse areas) - Began November 16, 2018 and ends February 25, 2019;
Two- week public review and comment period of the environmental documents - Begins March 1 and concludes March 15, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting -March 23, 2019; One day prior to sale – Decision Record and Signed

FONSI – March 24. **June 10, 2019 UT Oil and gas lease sale - 24 parcels totaling 41,000 BLM acres; 12 parcels 27,000 Forest Service acres –** 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (January 25) - posted on website and press release; 30-day public protest period (for the Greater Sage-Grouse areas) - Begins January 25, 2019 and concludes February 25, 2019; Two- week public review and comment period of the environmental documents - Begins March 1 and conclude March 15, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting –June 8, 2019; One day prior to sale – Decision Record and Signed FONSI – June 9.

BLM WY. BLM-WY has scheduled the first two quarterly oil and gas lease sales in 2019, March 28 and June 20. In addition, parcels that were pulled from the December 2018 sale will be offered on February 25. **February 25, 2019 WY Oil and gas lease sale - 568 parcels totaling 768,000 acres –** 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (December 21, 2018) - posted on website and press release**;** Public Notification of Supplementary Competitive Oil and Gas Lease Sale (December 21, 2018) - to comply with a District Court Order - posted on website and press release**;** 30-day public protest period (for the Greater Sage-Grouse areas) - Begins December 21, 2018 and concludes January 22, 2019; Two- week public review and comment period of the environmental documents - Begins February 11 and conclude February 20, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting -February 23, 2019**;** One day prior to sale – Decision Record and Signed FONSI – February 24, 2019. **March 19-20, 2019 WY Oil and gas lease sale - 146 parcels totaling 163,000 acres –** 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (November 13, 2018) - posted on website and press release**;** 30-day public protest period (for the Greater Sage-Grouse areas) - Began November 13, 2018 and concluded December 13, 2018;
Two- week public review and comment period of the environmental documents - Begins February 24 and conclude March 8, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting -March 17, 2019; One day prior to sale – Decision Record and Signed FONSI – March 18, 2019. **June 2019 WY Oil and gas lease sale –** 45 days out - Public Notification of Competitive Oil and Gas Lease Sale (November 13, 2018) - posted on website and press release; 30-day public protest period (for the Greater Sage-Grouse areas) - Began November 13, 2018 and concluded December 13, 2018; Two- week public review and comment period of the environmental documents - Begins February 24 and conclude March 8, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting - March 17, 2019**;** One day prior to sale – Decision Record and Signed FONSI – June 2019.

UPDATED ITEMS

February 7. BLM MT/DK. On Nov. 8, 2018, Native Ecosystems Council (NEC) served the U.S. Attorney's office (USA) with a civil lawsuit under the Administrative Procedures Act regarding four watershed decisions by BLM in southwest Montana. NEC is seeking, among other things, to enjoin the implementation of these Dillon Field Office watershed decisions that include 226,852 acres of public land. The USA, working with the Field Office, will need to reply to the 151 complaints until February 7, 2019 (a continuance was granted by the court). NEC previously appealed the final decisions for each of these watersheds between 2014 and 2017, but the appeals were dismissed by IBLA due to lack of standing because

NEC could not show that they had been on the public lands in these watersheds. Cumulatively, the watershed decisions proposed 30,599 acres of non-commercial mechanical/prescribed fire treatments to reduce hazardous fuel loading and restore sagebrush steppe, aspen, and five-needle pine. In addition, the decisions include 3,787 acres of commercial timber sales (some which have already been sold) to improve forest health and resiliency and salvage dead and dying timber; more than 27 miles of riparian conifer treatment, along with other riparian enhancement projects; renewing/revising term grazing permits/leases for 104 allotments (which have been renewed); dozens of range improvement projects (many of which have been implemented); travel management revisions/corrections; and noxious and invasive weed treatments. (11/23/18)

ONGOING ITEMS

February 4. BLM-CO. The comment period for the Grand Junction Field Office Notice of Realty Action to convey 188.04 acres to the Grand Junction Regional Airport to accommodate a second runway ends on February 4, 2019. The conveyance is in conformance with the Grand Junction RMP. The Federal Register Notice was posted on December 21, 2018. (9/11/18) DTS 2411

February 7. BLM-NM. The OK, KS, TX Joint Resource Management Plan comment period will end on February 7, 2019. Public meetings previously scheduled to be held between January 14, 2019 and January 25, 2019 across the OKT planning area were cancelled. BLM-NM intends to reschedule at a later date.

February 11. BLM-AK. The comment period Coastal Plain Oil and Gas Leasing Program Draft EIS closes on February 11, 2019.

February 17. BLM-NV. The competitive bidding process for the Spring Mountain Raceway modified land sale ran from January 10 to January 17, 2019. Due to the availability of cost recovery funds, the BLM will be able to complete the land sale by February 17, 2019. A 30-day public scoping period for the planning initiative, and a 45-day public comment period on the proposed sale of public land opened July 30, 2018 and will close August 28, 2018, and September 12, 2018, respectively. If the RMP amendment is approved, two modified competitive sales for not less than the appraised fair market value are anticipated to take place. Approximately 68 of the 621 acres under consideration require cadastral survey. The BLM proposes to dispose of approximately 553 acres in phase one, and the remaining 68 acres in phase two after the survey is completed.

February 19. BLM-UT. BLM –UT will respond to any oil and gas protests by February 19 to meet the 60 days requirement from the December 18, 2018 lease sale as well as sign the Decision Record/FONSI to allow the leases to be issued.

Mid-February. BLM-ID. The comment period for the Pocatello Field Office's Dairy Syncline Mine Project EIS will close on February 21, 2019.

Mid-February. BLM-OR. The Medford District will hold a timber sale auction in mid-February. The sales will be fully ready to offer at the next regularly scheduled timber sale auction. The sales include: Big Graves Salvage Sale (3.9 mmbf); Wild Bill Sale (549,000 bf); and Bear Creek Sale (949,000 bf). The Coos Bay District is also anticipating holding a timber sale auction in February. The two sales will be fully ready to offer at the next regularly scheduled timber sale auction: Churchyard (4.3 mmbf) and Beam Me Up (269,000 bf).

Early February. BLM-CO will initiate a 15-day public scoping period for the New Elk Coal Lease by application. The New Elk Coal Company, LLC applied for a coal lease of 1,279 acres of split-estate Federal coal that holds approximately 11 million tons of coal in place located in Las Animas County, adjacent to their New Elk Coal Mine. The active mine is an underground room and pillar coal mine. The lease is in a historical coal production area. (12/7/18)

January – March. BLM-ID. The Twin Falls District Fuels and Emergency Stabilization and Rehabilitation programs conducted regular winter fire rehabilitation, fuel break and hazardous fuels reduction projects in the Burley, Jarbidge, and Shoshone Field Office areas. BLM will implement aerial seeding treatments over 79,700 acres. Fiscal Year 2019 funding is tied to these programs. (12/7/18)

Early February. BLM-CA requested a Departmental Review Team regarding a Supplemental EIS that evaluates a proposal to expand and modernize the U.S. Gypsum Company (USG) mine and plant in Imperial County. USG's proposed mine expansion / modernization project is subject to the U.S. Army Corps of Engineers' 404 permit process. The Corps is the cooperating agency in the Supplemental EIS. (12/7/18)

Early February. BLM-CO. The Gunnison Field Office will publish in the Federal Register (pending Washington Office approval) a Notice of Realty Action to convey approximately 43.09 acres of public land to the Town of Lake City under the Recreation and Public Purposes Act. The land is about one mile south of Lake City. The Lake City Ski Hill community ski area would continue to operate under the conveyance. The package has been with SIO-REGS since December 6, 2018. (4/24/18) DTS 2329

Early February. BLM-OR/WA. Lakeview District has finalized the Environmental Impact Statement and the Record of Decision for the Tucker Hill Perlite Mine Expansion and will brief the State Director soon. The Lake County Commission supports the proposed mine expansion due to economic benefits to the county. (12/7/18)

Early February. BLM-CO. The Colorado River Valley Field Office will release the final Environmental Assessment (EA) for managing the Sutey and Haines parcels, which were acquired in March 2017 through the Sutey Ranch Land Exchange. Because the management plan will amend the Field Office's Resource Management Plan, the announcement begins a 30-day protest period and 60-day Governor's consistency review. The Field Office held a public scoping period and meeting over the summer, as well as a comment period and public meeting on the draft EA this fall. More than 200 comments were received during each public

comment period. Management of the 557-acre Sutey Ranch parcel will focus on protecting wildlife habitat and recreational opportunities. (11/30/18)

Early February. BLM-CO. The Uncompahgre Field Office plans to announce a 30-day scoping period for a proposal to fence the Adobe Badlands Wilderness Study Area (WSA) boundary. The WSA is adjacent to an off-highway vehicle (OHV) open riding area and the BLM has observed impacts from riders on the WSA's Colorado hookless cactus habitat, a federally-listed threatened species. To ensure riders continue to enjoy OHV use in the adjacent area and to protect the hookless cactus habitat, BLM proposes building a fence to help identify the WSA boundary. It will also help the BLM remain in compliance with no mechanized or motorized use in the WSA. The BLM is in regular coordination with the U.S. Fish and Wildlife Service on this proposal, and will coordinate with the County before scoping begins.. (12/7/18)

Early February. BLM-ID. The Shoshone Field Office plans to issue a right of way grant for the Idaho Water Resources Board (IWRB) to construct and operate aquifer recharge projects along the Northside Canal in Jerome County. These projects will support IWRB's mandate to develop and operate a long-term Managed Groundwater Recharge Program and achieve the goal of recharging an average 250,000 acre-feet per year of groundwater in the Eastern Snake Plain Aquifer.. (12/14/18)

Early February. BLM-ID. The Challis Field Office will conduct media outreach to announce the issuance of patents to the cities of Challis and Clayton and Custer County as required by the Sawtooth National Recreation Area and Jerry Peak Wilderness Additions Act enacted on Aug. 7, 2015. The Act instructs the BLM to convey nine parcels of public land to these locations for various public purposes. (12/14/18)

Early February. BLM-ID. The Burley Field Office plans to issue three right-of-way grants: one for Raft River Highway District to pave 1.6 miles of the existing Idahome Road north of Malta; a second for Raft River Rural Electric to realign approximately one mile of existing power line southeast of Almo; and a third for ATC Communications to construct and maintain a 1.3-mile fiber optic line supporting existing communication sites east of Burley. (12/14/18)

Early February. BLM-ID. The Burley Field Office will issue a categorical exclusion decision on a Notice of Geophysical Exploration submitted by Walker Ranch LLC. The proposed project will consist of pedestrian surveys within existing geothermal leases to measure the spontaneous potential of the Raft River Geothermal Resource Area near Malta. (12/14/18)

Early February. BLM-NV. The Winnemucca District will publish the Notice of Intent to prepare an Environmental Impact Statement for a proposed expansion of the Coeur Rochester and Packard Mines. The silver mine currently employs about 302 people and is approximately 26 miles northeast of Lovelock, in Pershing County, Nev. (12/14/18)

Early February. BLM-MT/DK has informed the Montana Department of Natural Resources and Conservation that transfer of the final selected lands totaling 5,816.63 acres to fulfill the long-standing entitlement made by Congress when Montana became a State in 1889 will not be completed before the end of 2018 due to the delay in publication of the classification notice in the Federal Register. Montana Department of Natural Resources and Conservation Director John Tubbs and Montana State Land Board members expressed concern and disappointment in the delay, and believe it will impact the State's ability to offer grazing leases as planned in January 2019, which would result in impacts to revenue collection from these grazing leases. The package has been with SIO REGS since Aug. 13, 2018. The State Land Board accepted the lands, contingent on publication of the notice and final classification, on Sep. 17, 2018. (11/23/18) DTS 2211

Early February. BLM-CA. The Barstow Field Office anticipates publishing an Environmental Assessment for the Kern River Gas Transmission Company Pesticide Use Proposal project. This project proposes the use of pre-and post-emergent herbicides at fenced pump stations and use of herbicide treatments on weed species within the Kern River Gas right-of-way.

Early February. BLM-NV. The Winnemucca District will have the Notice of Intent Briefing for the DOI Review Team to prepare an Environmental Impact Statement (EIS) for a proposed expansion of the Coeur Rochester Mine. (12/7/18)

Early February. BLM-NV. The Winnemucca District will brief the DOI Review Team on the Hycroft Mine Draft EIS Notice of Availability. (12/7/18)

Early February. BLM-NV. The Battle Mountain District will brief the Review Team on the Mount Hope Project Draft Supplemental Environmental Impact Statement (EIS). (11/9/18)

Late February. BLM-NV. The Humboldt River Field Office will publish the Draft Environmental Impact Statement for the Marigold Mine Mackay Optimization Project. Numerous groups have expressed concern with this project especially related to the potential impacts to surface and groundwater. (11/2/18)

In February. BLM-NM. The Oklahoma Field Office cancelled a public hearing originally scheduled for January 7, 2019, for the Draft Environmental Assessment for a Lease by Application (LBA) in Haskell County, Okla. We are working to determine options for rescheduling. Evans Coal Company submitted an LBA for federal coal reserves underlying 1,270.85 acres of privately-owned surface lands. Evans estimates that the proposed lease area contains nearly 3.28 million tons of recoverable coal. This may be controversial because it is coal-related and the tract lies beneath a lake used for recreation by a private club. (8/17/18) DTS 229

Early February. BLM-OR/WA. Lakeview District plans to sign the Coyote Colvin Grazing Permit Renewal Environmental Analysis, allowing an "Outcome Based Grazing Authorization". This EA involves six allotments, five of which are included in the Outcome Based Grazing program. The proposal is to expand the season of use and allow for more

flexibility in pasture rotation. The number of AUMs (9,136) would remain the same. There is a cooperative relationship with the permittee and no controversy with NGOs at this time. (12/7/18)

Early February. BLM-CO. The Colorado River Valley Field Office expects to complete its 30-day review of a major plan of operation modification proposal it received from RMR Aggregates, Inc., which operates a limestone quarry adjacent to Glenwood Springs. The proposed expansion includes more than 300 acres of disturbance and over 250 truck trips per day (currently around 20 acres and 20 trips per day). The proposal addresses non-compliance issues the company inherited when it purchased the quarry in 2016. Because of its visibility from Glenwood Springs, the project is highly controversial. Both the City and Garfield County have expressed concerns regarding socioeconomic and transportation impacts. (11/30/18)

Early February. BLM-WY. The Worland Field Office plans to release an environmental assessment analyzing an update to the Fifteenmile Wild Horse Herd Management Area (HMA) Plan, and gathers needed to implement the plan, for a 30-day public comment period. About half of the HMA is Greater Sage Grouse priority habitat. Due to the inherent controversy associated with wild horse management, there may be public and media interest in this comment period. (12/7/18)

Early February. BLM-OR/WA. The Coos Bay District plans to issue decisions and sale notices for three upcoming timber sales The timber will be sold at an oral auction on Jan. 25, 2018. The sale is expected to yield 269,000 board feet. (12/7/18)

Early February. BLM-WY. The Rock Springs Field Office will release the North Dutch John Well #1 EA, FONSI and Decision Record. The proponent requested a hold on this analysis for several years to modify the proposal, but is now prepared to move forward. Public interest in the pending decision likely will be high because the proposed well is located in the Greater Little Mountain Area, a popular hunting and fishing destination. The proposed action includes drilling a single well, constructing a well pad, upgrading a two-track road and building an access road. The proponent has committed to several mitigation measures including moving the well pad location, applying timing restrictions for crucial mule deer winter range, installing erosion control devices, burying associated pipelines and managing weeds. The BLM determined impacts to the area would be minimal due to these measures. (10/23/18)

Early February. BLM-OR/WA. The Lakeview District anticipates finalizing the Response to Comments regarding a draft Environmental Assessment (EA) and Finding of No Significant Impact analyzing the potential effects of a wild horse gather and fertility control plan for the Beaty Butte Herd Management Area. This is separate from the Warm Springs Herd Management Area gather and fertility control plan, which is currently in litigation. Two alternatives within this EA would allow BLM to gather horses below maximum AML and will likely be controversial if selected. The decision is expected to be signed by early February 2019 and a gather scheduled in fall 2019.(12/7/18)

Early February. BLM-CO. The Tres Rios Field Office will initiate public scoping for GCC Energy LLC's proposed King II Coal Mine Lease by Application (LBA). The proposed LBA includes approximately 3,200 acres north of the existing King II Coal Mine. The LBA would extend mine life for 5-7 years and use existing surface facilities and transportation routes. The Office of Surface Mining Reclamation and Enforcement is the joint lead on the EA. (10/26/18)

Early February. BLM-ES anticipates publishing in the Federal Register a Public Land Order for the U.S. Coast Guard's relinquishment of Lot 22 of the Jupiter Inlet Lighthouse Outstanding Natural Area (ONA) in Florida. (4/11/18)

In February. BLM-NV. The Mount Lewis Field Office will issue the Record of Decision for the 3 Bars Ecosystem and Landscape Restoration Project—a programmatic Environmental Impact Statement (EIS) proposing to treat up to 127,000 acres of sagebrush steppe, riparian habitat, pinyon juniper woodland, and aspen groves within a 749,810-acre area in part of the Field Office. (8/24/18)

Early February. BLM-AK. The Eastern Interior Field Office will consult with the Tribal Governments of Chalkyitsik and the Gwichyaa Zhee Gwich'in (Fort Yukon). One meeting will likely occur in Fort Yukon while a second may be scheduled for Chalkyitsik. The consultation will fulfill the Tribes' request, made during consultation in 2018, that the BLM afford them an opportunity to share their priorities for implementation of the Eastern Interior Resource Management Plan. (10/26/18)

In February. BLM-NM. The Oklahoma Field Office plans to publish a Notice of Availability announcing the release of a Draft Environmental Assessment (EA) for public comment regarding the Liberty 8 competitive coal lease. The lease sale consists of 460 acres to be mined by surface and/or underground techniques. The scoping period on the EA closed on Sep. 8. (8/17/18)

In February. BLM-CO. The Royal Gorge Field Office plans to issue a final decision for the Arkansas Headwaters Recreation Area (AHRA) Management Plan. The Arkansas River is the most commercially rafted river in the United States and is a major economic driver for the region. The BLM manages the AHRA in partnership with Colorado Parks and Wildlife, which is also a signatory on the plan. The plan addresses river allocation, recreation facility development, and resource management along the entire 152-mile stretch. (8/17/18)

In February. BLM-CO. BLM CO will close on the purchase of Eagle County Open Space's 16.98-acre Two Bridges site along the Upper Colorado River in the Colorado River Valley Field Office for $500,000 through the Land and Water Conservation Fund. The appraised fair market value of the Two Bridges site is $850,000. This acquisition supports perpetual river access throughout the Upper Colorado River Special Recreation Management Area (SRMA) for fishing and other water-related recreation. The SRMA is heavily used throughout the year. Two Bridges is about four miles downriver from the State Bridge site. (10/9/18)

In February. BLM-NM. The Las Cruces District Office plans to publish the Final Environmental Impact Statement for the Copper Flat Copper Mining Project. The New Mexico Copper Corporation submitted a proposed mining plan of operations (MPO) that would re-establish the Copper Flat Copper Mine, a poly-metallic mine and processing facility near Hillsboro, N.M., that would produce copper, gold, silver, and molybdenum. If approved, the project is expected to provide 170-270 jobs over the mine's 12-to-16-year life. (5/25/18)

In February. BLM-CO is preparing a Notice of Proposed Withdrawal and Transfer of Jurisdiction of two isolated BLM-managed parcels totaling 120 acres in Mesa County to the National Park Service's Colorado National Monument which are not contiguous with other BLM lands. The Colorado National Monument's 2005 General Management Plan identified the two parcels as important for improving public access to popular trailheads. The notice would segregate the lands from location and entry under the mining laws for two years while studies are completed to recommend a 50-year withdrawal and transfer of jurisdiction. The segregation would not close the lands to mineral leasing or mineral material laws. BLM-CO is planning for a Feb. 2019 publication in the Federal Register (pending WO and DOI approval). (7/20/18)

In February. BLM-NM. The Socorro Field Office plans to publish the Notice of Availability for the Draft Environmental Impact Statement for the Borderlands Wind Project (BLWP). (8/31/18)

In February. BLM-NV. The Black Rock Field Office will publish the Draft Environmental Impact Statement for the Hycroft Mine Expansion Phase II. The U.S. Fish and Wildlife Service will issue a decision on an eagle incidental take permit based on analysis in the EIS. (8/24/18)

Bureau of Ocean Energy Management

UPDATED ITEMS

BOEM continues to review its FY 2019 Contingency Plan and prepare options for ASLM pertaining to use of existing appropriated carryover funds.

Preparation of the decision documents for the Proposed National OCS Oil and Gas Leasing Program and draft PEIS continues. Once published, a 90-day public comment period with public meetings are expected to begin.

ONGOING ITEMS

BOEM has prepared multiple Calls for Information and Nominations (Calls) for lease sales proposed for 2019 and 2020 in the 2019-2024 Draft Proposed Program. The Mid-Atlantic Call (DTS #2257), the South Atlantic Call (DTS #2258), the Southern California Call (DTS #2388), and the Chukchi Sea Call (DTS #2385) are currently being held pending direction on the National OCS Program. (9/21/18)

Work continues on preparation of the Final Notice of Sale for Gulf of Mexico Lease Sale 252, which must publish by February 15 for the Sale to be held as scheduled, and the Proposed Notice of Sale for Gulf of Mexico Lease Sale 253 . Both Notices are with ASLM for surnaming.

Once appropriations are restored for the Department, BOEM expects to submit the Final Rule updating its air quality regulations related to oil, gas, and sulfur operations on the OCS to OMB for interagency review. A narrative describing the reduction to costs as compared to the proposed rule (Reduction to Costs Narrative) and the rule text are currently with the Department for review. (8/2/18, DTS #2280 (Rule), DTS #2454 (Reduction to Costs Narrative))

Once appropriations are restored for the Department, BOEM expects to publish a Request for Competitive Interest for an area proposed to be used for a right-of-way (ROW) project from Anbaric Development Partners (ADP). The application is for the New York and New Jersey Ocean Grid, an HVDC submarine system approximately 185NM (213 statute miles) in length with up to nine offshore AC to DC collector/converter platforms, which would collect and distribute power generated from existing offshore wind leases to up to six terrestrial landings at locations from Long Island, New York to Cardiff, New Jersey. The notice is in surnaming with the Department. (10/15/18, DTS #2208)

Once appropriations are restored for the Department, BOEM expects to publish a Request for Competitive Interest for an area proposed to be used for a right-of-way (ROW) project called Atlantic Link. Clean Power Northeast Development, Inc. filed an application on May 31, 2017 (revised August 22, and September 26), for a ROW grant in support of a proposed project connecting onshore wind and hydro power in Canada to the Massachusetts market via a 350 mile HVDC submarine cable traversing the OCS. The notice is in surnaming with the Department. (DTS #1773)

On January 18, 2019, the U.S. District Court for South Carolina issued an injunction enjoining "Federal Defendants, BOEM, and any other federal agency or entity from taking action to promulgate permits, otherwise approve, or take any other official action regarding the pending permit applications for oil and gas surveys in the Atlantic" until after appropriations are restored and the court rules on certain motions. BOEM has ceased preparatory work on the permit applications while Interior is consulting with DOJ about seeking clarification of the court's order.

Bureau of Safety and Environmental Enforcement

ONGOING ITEMS

Well Control Rule- The rule was surnamed by the Deputy Secretary, the Associate Deputy Secretary, and the ASLM on **December 11.** The rule was surnamed by the Deputy Chief of Staff for the Secretary and submitted to Exec Sec on **December 12**. Exec Sec informed us that they submitted the rule to OMB on **December 12.** OMB officially "accepted" the rule to formally start the E.O. 12866 review "clock" on **December 13**. OMB requested an E.O.

12866 inter-agency briefing on the rule for **December 20**, in which the BSEE Director and SMEs presented and discussed items with OMB staff. OMB remains on the clock. WCR was identified as a top priority for BSEE's 15 day list. Upon receipt of comments from OMB, we will gather the appropriate BSEE team to respond. BSEE is still pursuing a late February publication in the Federal Register dependent upon OMB's comments.

Arctic Rule – BSEE will finish Tribal Consultation upon the end of the government shutdown. Next steps will be to begin drafting the rule.

- § As of 1/16/19, BSEE completed 88% of the municipalities meetings (7 of 8).
- § As of 1/16/19, BSEE completed 75% of the ANCSA Corporations meetings (6 of 8)

Reg. Reform 2.0- BSEE Director engaged a variety of BSEE personnel and through this process identified 13 regulatory actions fitting this description. The BSEE Director recently requested input from 20 senior managers on their ranking of importance. Despite the variations in the rankings on the individual "ballots," there was a general consensus around the top four rankings. Those top four recommended priority rulemakings for the first half of 2019 are:

- · **Pipelines and Pipeline Rights-of-Way** (30 CPR Part 250 - Subpart J);
- · **Decommissioning Activities** (30 CPR Part 250 - Subpart Q);
- · **Incorporation of Industry Standards** (30 CPR 250.198);
- · **Suspension of Operations {SOO)/Suspension of Production {SOP)** (30 CFR Part 250 - Subpart A)

Risk Based Inspection – BSEE Office of Safety Management (OSM) trained inspectors (**December 19 and 20**) for the upcoming Performance Based Risk Inspection (PBRI) on Well Operation Hazards, and the inspection took place the week of **January 7**. Additionally, OSM has concluded their evaluation on which deep-water facility will be subject to the next Facility Based Risk Inspection (FBRI) in late January 2019.
BEST Available and Safety Technology (BAST) - On December 4, the BSEE Director requested input from the industry on the "production equipment" components that should be subject to BAST, which is expected by mid-February.

Office of Surface Mining Reclamation and Enforcement

ONGOING ITEMS

Notice of Intent to File Suit: On or about December 7, 2018, the Secretary and the OSMRE Regional Director, Western Region, received a Notice of Intent to File Suit over alleged violations of the Endangered Species Act in approving Signal Peak Energy LLC's (Signal Peak) lease at the Bull Mountains Mine from the Montana Environmental Information Center, the Sierra Club, WildEarth Guardians, and 350 Montana conservation groups. These conservation groups state that OSMRE did not assess whether the project would impact grizzly bears and numerous other species that may be impacted by coal train shipments from the mine to the coal export terminal in British Columbia that is the primary destination of the coal. SMCRA allows OSMRE 60 days to respond to the NOI before an action can be filed, which would be in early February. (12/11/2018)

OSMRE AML Emergency Reclamation Projects: OSMRE staff has been designated as "excepted" and called back from furlough to respond to Abandoned Mine Land Emergency activities. OSMRE staff working with the designated State AML programs must review the incident, declare an emergency and provide an Authorization to proceed with the reclamation using AML grant funding. More information regarding the sites is available upon request.

Citizen's Complaint Filed: On January 11, 2019, the Trustees for Alaska filed a citizen complaint (with ten exhibits) alleging the surface coal mining operations of Usibelli Coal Mining, Inc. at Wishbone Hill, are being conducted without a valid permit in violation of the Alaska Surface Coal Mining Control and Reclamation Act. They also allege that the State of Alaska has failed to administer its program in compliance with federal requirements regarding the company's failure to initiate mining operations within three years of the permit issuance, as required by Federal law and the State's regulatory program.

River Hurricane Mine, Pike County, KY: The impoundment of water within the underground mine works of the River Hurricane Mine in Pike County, KY presents the potential for a blowout which would impact the safety of residents in the Grapevine, KY community as well as the surrounding environment including the waters of the U.S. Army Corp of Engineers' Fishtrap Lake. The Lexington Field Office, Office of the Solicitor, Applicant Violator System Office and AR's Technical Assistance Division took immediate action to assess and monitor the mine pool and engage relevant regulatory authorities, responsible parties and local emergency management officials to address the situation. United and its successor companies have denied ongoing responsibility over the site. A current permittee High Ridge Mining, LLC, with operations covering portions of the mine pool area, was issued an Imminent Danger Cessation Order by the KY Department of Natural Resources and ordered to begin dewatering and monitoring of the mine. While not accepting responsibility for the site, on January 6, 2019, High Ridge has re-established the blocked mine drain system and has begun to dewater the mine. As of January 10, 2019, the mine pool level dropped below the "Stand By Alert" stage to the "Intensified Monitoring and Reassessment of Stability" stage. OSMRE staff are continuing to assist KYDNR staff in monitoring and assessing the site.

Rosebud Mine (MT): The OSMRE Western Region jointly prepared an EIS with the Montana Department of Environmental Quality. The EIS will be used to support a recommendation on the mining plan for Area F of the Rosebud Mine. OSMRE obtained Departmental Clearance to publish the Notice of Availability (NOA) for the Final EIS in the *Federal Register*. The NOA was published in the *Federal Register* on Friday, November 30, 2018. OSMRE is awaiting revised permit findings information from the State of Montana, prior to finalizing the Record of Decision (ROD).

Illinois' Diversion of Abandoned Mined Land (AML) Funds: OSMRE was informed by Illinois program officials that the enactment of a new state law, Public Act 100-1107, authorizes the State Treasurer to divert monies from various trust funds for utilization and investment by the State. As we were informed and have confirmed, sometime during the month of October, the State of Illinois "statutorily transferred" $50 million out of the State's

AML "Set-Aside" fund. OSMRE staff prepared a draft letter for the Acting Director's signature to Illinois Governor Rauner seeking the immediate return of the funds to their appropriate account. The SOL reviewed the draft letter and provided comment to OSMRE. OSMRE will finalize and send letter to the State. (11/27/2018)

Section 7 Consultation: OSMRE sent the IMCC the final draft Biological Assessment (BA) and BA references, and the final draft MOU, as well as responses to the IMCC's comments on the earlier draft, following the Assistant Secretary's signing of the transmittal letter to the IMCC on October 16, 2018. The IMCC's time for providing comments has been extended. (10/18/2018)

Justice Companies' Bevins Branch Mine: On January 3, 2019, a follow up site visit was conducted by OSMRE as an "excepted" activity. While Imminent Danger conditions remain, the Permittee has begun initial steps to divert drainage away from Bear Fork watershed into adjacent watersheds, but has not restored the affected area back to permitted and/or pre-mining conditions. OSMRE will continue to monitor this permit to ensure all abatement measures required are met while the permanent plan is established.

Mason Coal (KY): The Kentucky Division of Mine Reclamation and Enforcement (KYDMR) informed OSMRE that on or about October 25, 2018, it became aware that Mason Coal was operating an underground coal mine and surface facility without a valid mining permit. OSMRE, pursuant to 30 CFR 843.11(a)(2), issued a Federal Imminent Harm Cessation Order (IHCO) to Mason on November 1, compelling the company to cease coal mining operations. OSMRE and Mason signed a Settlement Agreement (SA) with Mason agreeing not to oppose Mason's request for temporary relief from the IHCO, under the terms of the SA. In November 2018, an ALJ with the Office of Hearings and Appeals granted Mason's request for temporary relief pursuant to the terms and conditions set forth in the Settlement Agreement. Mason has applied to Kentucky to obtain the necessary mining permit for the operation and the permitting process is ongoing.
(11/2/2018)

Pollyanna #8 (OK): On July 10, 2018, OSMRE received approval from BLM of the Resource Recovery and Protection Plan and the coal lease modification for the Pollyanna #8 mine. OSMRE initiated the public review period on the draft EA and unsigned FONSI on November 20, 2018. The public comment period closed on December 20, 2018. Limited comments were received, Mid-Continent Region will work to finalize the MPDD once furloughed staff returns to active duty from the government shutdown. (11/27/18)

Notice of Intent to File Suit: On or about September 7, 2018, the Secretary and the Acting Director received a Notice of Intent to File Suit over an alleged failure to perform an alleged mandatory duty under the Surface Mining Control and Reclamation Act from the WildEarth Guardians (WEG). WEG alleges that the agency failed to "promptly promulgate regulations to limit toxic blasting emissions at coal mines after granting a petition for rulemaking." SMCRA allows OSMRE 60 days to respond to the NOI before an action can be filed. The Solicitor's Office advised OSMRE on its options in response to the NOI. OSMRE sent a response letter to WEG on November 6, 2018, indicating that OSMRE would publish its

decision in the *Federal Register* within 90 days, on or before February 4, 2019. OSMRE was on track to meet this deadline before the furlough. (10/18/2018)

ASSISTANT SECRETARY FOR POLICY, MANAGEMENT AND BUDGET

Susan Combs, Senior Adviser to the Secretary exercising the authority of the Assistant Secretary for Policy, Management and Budget, will be in the office.

Scott Cameron, Principal Deputy Assistant Secretary, will be in the office.

Week Ahead Schedule of Meetings, Hearings, and Travel

No significant external meetings, travel, or Congressional hearings involving PMB are anticipated.

Immediate Announcements and Actions For the Next Week

PMB is revising its furlough plan to bring back as exempt additional currently furloughed or excepted employees whose jobs involve priority activities.

Deputy Assistant Secretary - Policy and Environmental Management (DAS PEM)

PPA continues to lead a review of the future external-facing role of IBC in cooperation with IBC, PAM, PFM, SOL, and BIO internally, and external partners OMB, GSA, and Treasury.

Deputy Assistant Secretary - Budget, Finance, Grants and Acquisition (DAS BFGA)

OMB issued guidance to facilitate the payment of contract invoices during the lapse in appropriations. The Business Integration Office is implementing plans to process an increased number of invoices submitted to FBMS. PAM is providing guidance to the bureaus on how to address the OMB guidance.

The Office of Budget is analyzing information from bureaus and offices that was due Friday, January 25 on recurring major discretionary or mandatory funding disbursements (payments or awards) which would normally occur. This information will be used to anticipate and address concerns regarding upcoming standard payments and awards.

The Office of Budget is analyzing information from bureaus and offices to respond to a request from the White House to provide a list by January 25 of programs where funds will run out between now and April 16.

The Office of Budget will issue biweekly data call to bureaus and offices to capture pay period costs and the burn rates of unobligated balances. The next report will include costs for the pay period ending January 19th, which are posted on January 30.

Deputy Assistant Secretary - Public Safety, Resource Protection and Emergency Services (DAS PRE)

A hiring plan will be prepared to allow recruitment of fire season workers, including staffing by HR specialists and bureau fire managers.

An internal training plan will be developed to provide critical training to OAS inspectors, mechanics and pilots which has been cancelled as a result of the shutdown.

OWF is exploring the possibility of accelerating the obligation of available fuels treatment and burned area rehabilitation funds to put currently furloughed bureau employees to work.

OEM is preparing plans to respond to COOP requirements in the event the State of the Union address takes place on the 29th. Additional information will be known on January 25th.

8-30 Day Outlook

Deputy Assistant Secretary - Budget, Finance, Grants and Acquisition (DAS BFGA)

We are awaiting direction from OMB on a new release date for the President's FY 2020 budget, which will in turn determine deadlines for bureau and office budget justification development.

Work continues on the GrantSolutions migration, with a cost estimate expected from HHS on or about February 15, 2019.

Review of draft deliverables from Grant Thornton LLP contract on procurement shared services is continuing.

Chief Information Officer (CIO)

NEW ITEMS

The Department is responding to the directive of January 22, DHS's Cybersecurity and Infrastructure Security Agency (CISA) Director Christopher Krebs on Emergency Directive 19-01: Mitigate DNS Infrastructure Tampering. The Directive requires all agencies to mitigate risks from undiscovered tampering, enable agencies to prevent illegitimate DNS activity for their domains, and detect unauthorized certificates. The deadline for response is February 5, 2019.

OWF is preparing a contingency plan and risk analysis to assess the implications for the fire program if the government shutdown continues until March 1, April 1, or May 1.

ASSISTANT SECRETARY FOR WATER AND SCIENCE

Week Ahead Schedule of Meetings, Hearings, and Travel

Assistant Secretary Tim Petty will be in the office.

Reclamation Commissioner Brenda Burman is scheduled to be in Washington, D.C.

USGS Director Reilly will be in the office.

Immediate Announcements and Actions For the Next Week

Central Utah Project Completion Act Office

Utah Lake System South Fields Reach Environmental Assessment: The Central Utah Water Conservancy District (CUWCD), Utah Reclamation Mitigation and Conservation Commission, and the Central Utah Project Completion Act (CUPCA) Office, as Joint Lead Agencies, are evaluating realignment of a portion of the South Fields Reach of the Spanish Fork – Santaquin Pipeline, which is part of the Utah Lake Drainage Basin System (ULS) of the Central Utah Project. The Spanish Fork – Santaquin Pipeline was initially evaluated in an Environmental Impact Statement completed in 2004. Scoping for NEPA compliance of the realignment has been initiated, comments received, and a preferred alignment identified. The Joint Lead Agencies are moving forward in preparing a Draft Environmental Assessment to evaluate potential impacts associated with the realignment alternatives. (1/23/2019)

U.S. Bureau of Reclamation

Between January 27 and February 8, Reclamation plans to announce the funding opportunity for the Fiscal Year 2019 Water and Energy Efficiency Program. Water and energy efficiency grants focus on projects that conserve and use water more efficiently. A news release will be issued. (01/09/2019)

Between January 27 and February 8, Reclamation plans to announce the funding opportunity for the Fiscal Year 2019 Drought Response Program. The Drought Response Program supports a proactive approach to drought by aiding water managers to develop and update comprehensive drought plans and implement projects that will build long-term resiliency to drought. A news release will be issued. (12/03/2018)

Between January 27 and February 8, Reclamation plans to announce the funding opportunity for WaterSMART's Small-Scale Water Efficiency Projects. Through this program, Reclamation provides 50/50 cost-share funding to irrigation and water districts, tribes, states

and other entities for small water efficiency improvements that have been identified through previous planning efforts. A news release will be issued. (12/03/2018)

Between January 28 and February 8, Reclamation plans to post the Klamath River Basin Study to its website. Reclamation partnered with the State of California Department of Water Resources and State of Oregon Water Resources Department to conduct the study. The study area encompasses 12,100 square miles along the boundary of California and Oregon. No news release will be issued but talking points will be developed to respond to questions. (12/17/2018)

On January 28, Reclamation plans to issue a contract to Precision Surveys Inc. for professional surveying services throughout the Upper Colorado Region. The contract will be an Indefinite Delivery, Indefinite Quantity for up to five years with a cost ceiling of $24.5 million. Reclamation anticipates most work activities will be performed in central south Colorado, New Mexico, and northwest Texas with most of the work being performed along the Rio Grande corridor. (12/17/2018)

During the week of January 28, Reclamation is planning to release a Draft Finding of No Significant Impact for the Supplemental Environmental Assessment for the Funding of Routine Operation, Maintenance, and Replacement of Associated Water Transmission Facilities of the Mni Wiconi Rural Water Supply Project, South Dakota. The comment period ended January 11, 2019 – no significant comments were received. (11/26/2018)

Between January 28 and February 1, Reclamation will post a web story announcing the funding of 14 additional science and technology projects that Reclamation will be studying this fiscal year. These are in addition to the selection of 49 projects Reclamation announced in October. (12/17/2018)

Between January 28 and February 8, Reclamation will announce the winners of the year-long sub-seasonal climate forecast rodeo prize competition. This forecasting prize competition had solvers submit forecasts of temperature and precipitation for one year, competing in real-time against other teams as well as forecasts from the National Oceanic and Atmospheric Administration (NOAA). NOAA was a partner with Reclamation on this project. (12/03/2018)

On January 29, Reclamation has been invited to present its invasive mussel research activities at the 79th Midwest Fish and Wildlife Conference in Cleveland, Ohio. This annual event will attract nearly 800 biologists, students, and scientists from local, state and provincial, federal, and tribal natural resources agencies, universities, and private companies across the 12 Midwestern states and Canadian provinces. (12/03/2018)

Around January 30, Reclamation is planning to publish the Green River Block Water Exchange Contract Final Environmental Assessment (EA) and Finding of No Significant Impact. The contract is between Reclamation and the State of Utah along the Green River between Flaming Gorge and Lake Powell (Eastern Utah and Northwest Colorado). The Final

EA will reflect the comments made during the 50-day comment period in a matrix that will be published as an appendix. (12/31/2018)

On January 28, Reclamation will host a meeting with the Friant Division Contractors at its Fresno, California, office. The meeting is expected to cover revisions to the Friant Operational Guidelines. The operational guidelines are written to establish procedures guiding water supply management of the Friant Division, Central Valley Project, California. No media interest is expected. (01/22/2019)

On January 28, Reclamation plans to distribute a news release announcing light construction on the dikes at Folsom Dam and Reservoir (California) under the Safety of Dams program. Weather permitting, construction is scheduled to begin the week of January 28. The area is highly trafficked with a large bike trail, but no major traffic delays are expected. Media or local attention may occur. (01/22/2019)

On January 30, Reclamation will host a meeting with the Santa Ynez River Water Conservation District (SYRWCD) at the Fresno, California, office. The meeting is expected to cover a review of the fish surcharge and flood operation tools that Stetson Engineers developed for the County of Santa Barbara and the SYRWCD. Tabletop exercises involving historical storm events are planned. No media interest is expected. (01/22/2019)

On January 31, Reclamation plans to issue a request for input by the Governors of the seven Colorado River Basin States and others, regarding recommendations for potential Departmental actions in the event that Drought Contingency Plans cannot be completed and promptly adopted. This request will be issued in the event the seven Colorado River Basin states have not completed and approved the Drought Contingency Plans by that time. Significant media interest is expected. (01/22/2019)

On January 31, the Biological Assessment on the Reinitiation of Consultation on the Coordinated Long-Term Operation of the Central Valley Project and State Water Project in California is expected to be provided to the U.S. Fish and Wildlife Service and the Department of Commerce, National Marine Fisheries Service to initiate the consultation process under Section 7 of the Endangered Species Act. Reclamation is contemplating a news release. The document will be posted on Reclamation website. (01/08/2019)

On or about January 31, Reclamation plans to sign the Cottonwood Creek Daylighting Project Final Environmental Assessment (EA) and Finding of No Significant Impact (FONSI). The Final EA and FONSI are for a WaterSMART grant to restore this portion of Cottonwood Creek to its natural condition. The creek, located in downtown Boise, Idaho, currently flows through a culvert. A news release may be issued early February. (1/11/2019).

In January, Reclamation plans to close Road 12 (Washington) located in a topographical low spot to install a metal swing gate for public safety. The new gate will not require a cultural survey and is noncontroversial. Reclamation and the Washington Department of Fish and Wildlife are working together on the project. A legal notice and press release are currently being developed. (12/06/2018)

U.S. Geological Survey

Shutdown Status: To the extent possible, USGS is calling staff back to support projects that we can identify as critical to safety and preservation of lives and property. We are evaluating every project for potential losses of critical science and, where possible, bringing personnel in to support those efforts. We are also assessing where we might find the funding to bring back some staff on an exempt basis. Our 2018 Appropriated carryover is limited, and we are assessing fund availability and reprogramming flexibility to cover resources within a program. We also will be activating employees to work on all signed reimbursable activities and have requested that we reach out to those customers to confirm the agreements are still in effect.

The Water Mission Area is maintaining executive coordination pertaining to network monitoring systems and working in coordination with other Federal agencies in case of a natural disaster (flood). Primary focus is on the streamgage monitoring network. To date approximately 400 sites have been serviced or repaired to ensure our partners have the information needed to help protect lives and property.

We are continuing to monitor and report on domestic and global earthquakes through the 24X7 National Earthquake Information Center (NEIC) in Colorado. Staff at USGS volcano observatories are continuing to provide basic monitoring of potential eruptive activity at US volcanoes.

The USGS is maintaining servers for the ShakeAlert West Coast earthquake early warning system as well as continuing to approve and monitor pilot projects for the ShakeAlert system and to work to permit and install seismic stations for earthquake early warning funded by the California Governor's Office of Emergency Services.

The USGS has called staff back as needed to update debris flow hazard thresholds for burned areas of California where the National Weather Service (NWS) needs refined rainfall thresholds to forecast and communicate the potential magnitude of post-wildfire debris flows based on rainfall projections. This is the rainy season in California, and following the severe fires experienced this past summer and fall, the rainfall threshold information is critical for debris-flow early warning. NWS is counting on USGS to provide this information to help protect lives and property. (1/23/2019)

8-30 Day Outlook

U.S. Bureau of Reclamation

NEW ITEMS

Between February 4 and 8, Reclamation plans to release inflow forecasts for Wyoming Area Office Bighorn Basin Reservoirs and will prepare a joint news release with Montana Area Office to address forecasted inflow to Bull Lake, Boysen Reservoir, Buffalo Bill Dam, and

Bighorn Reservoirs, all of which are in Wyoming. Inflow forecasts will also be prepared for the North Platte Basin reservoirs, also located in Wyoming. Inflow forecasts will be updated monthly and corresponding joint news releases will be issued near the beginning of the months of February through June. (1/21/2019)

UPDATED ITEMS

In early February, Reclamation plans to issue a news release inviting a two-week public review and comment period on a Draft Environmental Assessment (EA) titled *Implementation of Short Term Klamath Project Interim Operating Procedures in Siskiyou and Modoc Counties, California and Klamath County, Oregon.* The EA will evaluate the proposed operations for the Klamath Project as described in the 2018 Biological Assessment released in December 2018. This effort is part of the accelerated Klamath Reinitation of Consultation process that is expected to culminate in joint Biological Opinions from the National Marine Fisheries Service and the Fish and Wildlife Service at the end of March 2018. Media interest is expected. (01/14/2019)

On February 12-13, Alan Mikkelsen, the Senior Advisor to the Secretary, may be in Medford, Oregon, to facilitate his "Coalition of the Willing" working toward a Klamath Basin-Wide agreement. This meeting is tentative, pending government shutdown termination. (01/14/2019)

ONGOING ITEMS

In February, Reclamation will launch the Streamflow prize competition. This prize competition's goal is to significantly reduce the cost of continuous streamflow monitoring and increase the availability of streamflow data that are vital to the effective planning, design, and operation of water resource projects. Reclamation is partnering with the USGS on this competition. A news release will be issued. (12/03/2018)

On February 12-13, the Glen Canyon Dam Adaptive Management Program Annual Reporting meeting is scheduled in Phoenix, Arizona, at the Arizona Department of Water Resources. This annual reporting meeting is held in accordance with the Long-Term Environmental and Management Plan Record of Decision to serve as an initial platform to discuss potential future experimental actions as well as a forum for presentations based on the previous research and monitoring. The annual reporting meeting is open to all interested stakeholders. (01/14/2019)

On February 14, the Glen Canyon Dam Technical Work Group meeting will be held at the Arizona Department of Water Resources in Phoenix, Arizona. Topics of discussion will include the Adaptive Management Program budget and workplan for fiscal year 2019, possible experiments at Glen Canyon Dam in 2019 including planning for future High-Flow Experiments, current basin hydrology, Long-Term Experimental and Management Plan Biological Opinion Conservation Measures, U.S. Fish and Wildlife Service plans for a Colorado Pikeminnow Reintroduction Feasibility study, Razorback Sucker five year review,

Tribal Monitoring Program presentation, and other administrative items as needed. The meeting is open to media and the public. (01/14/2019)

On February 20 through 22, the Colorado River Basin Salinity Control Forum's Work Group will meet in Phoenix and Scottsdale, Arizona. The purpose of the meeting is to discuss ongoing and future salinity control activities with the federal agencies of Reclamation, Bureau of Land Management, U.S. Fish and Wildlife Service, and United States Geological Survey of the Department of the Interior; and the Natural Resources Conservation Service of the Department of Agriculture. Meeting is open press. (01/07/2019)

In February, Reclamation expects to announce the projects selected to receive Fiscal Year 2018 Title XVI, Water Reclamation and Reuse funding. Reclamation provides funding through the Title XVI Water Reclamation and Reuse Program for projects that reclaim and reuse municipal, industrial, domestic or agricultural wastewater and naturally impaired ground or surface waters. (09/10/2018)

In February, Reclamation plans to announce the Title XVI Authorized Projects Funding Opportunity Announcement for Fiscal Year 2019. Through the Title XVI Water Reclamation and Reuse Program, Reclamation provides financial and technical assistance to local water agencies for the planning, design, and construction of water reclamation and reuse projects. A news release will be issued. (01/09/2019)

U.S. Geological Survey

Nothing to report due to the shutdown.

Weekly Report to the Secretary March 17-23.docx

WEEKLY REPORT
DEPARTMENT OF THE INTERIOR
MARCH 17-23, 2019

OFFICE OF THE SECRETARY

Week Ahead Schedule of Meetings, Hearings, and Travel

Acting Chief of Staff Todd Willens will be in the office.

Deputy Chief of Staff Katharine MacGregor will be in the office.

Director of Scheduling and Advance Samantha Hebert will be in the office.

Senior Advisor Scott Hommel will be in the office.

Senior Advisor Heather Swift will be in the office.

Advisor Mike Argo will be in the office.

Advisor Rick May will be in the office.

Special Assistant Matthew Dermody will be in the office.

OFFICE OF COMMUNICATIONS

Director John Bockmier will be in the office.

Deputy Director Russell Newell will be in the office.

OFFICE OF CONGRESSIONAL AND LEGISLATIVE AFFAIRS

Cole Rojewski, Director, will be in the office and in meetings on Capitol Hill

Aaron Thiele, Advisor, will be in the office and in meetings on Capitol Hill

Taylor Playforth, Advisor, will be in the office and in meetings on Capitol Hill.

UPCOMING HNR OVERSIGHT HEARINGS: The Department of the Interior will be participating in the following House Natural Resources oversight hearings:

- **S/C on National Parks, Forest, and Public Lands hearing to *"Examining the Spending Priorities and Mission of the National Park Service":*** Witness is Danny Smith, Acting Director, NPS
  Timing: April 3, 2019
  Contact: Taylor Playforth, Advisor, Congressional Affairs

- **S/C on National Parks, Forest, and Public Lands hearing to *"Examining the Spending Priorities and Missions of the U.S. Forest Service and the Bureau of Land Management":*** Witness is TBD
  Timing: April 10, 2019
  Contact: Taylor Playforth, Advisor, Congressional Affairs

UPCOMING SCIA OVERSIGHT HEARINGS: The Department of the Interior will participate in the following Senate Committee on Indian Affairs oversight hearings:

- **Full Committee Field Hearing *"TO PROTECT AND SERVE: JOINT LAW ENFORCEMENT EFFORTS IN BUILDING SAFE TRIBAL COMMUNITIES AND STOPPING DANGEROUS DRUGS FROM ENTERING INDIAN COUNTRY"*** Witness is Charles Addington, Director Office of Justice Services, BIA.
  Timing: March 20, 2019
  Contact: Aaron Thiele, Advisor, Congressional Affairs

- **Full Committee hearing on "*BUILDING OUT INDIAN COUNTRY: TOOLS FOR COMMUNITY DEVELOPMENT*"** Witness is Tara Sweeney, ASIA.
  Timing: April 10, 2019
  Contact: Aaron Thiele, Advisor, Congressional Affairs

OFFICE OF INTERGOVERNMENTAL AND EXTERNAL AFFAIRS

Todd Wynn, Director, will be in the office all week.

Benjamin Cassidy, Senior Deputy Director, will be in the office all week.

Tim Williams, Deputy Director, will be in the office all week.

Jason Funes, Special Assistant, will be out of the office on personal leave

Sarah Spaulding, Special Assistant will be in the office all week.

Immediate Announcements and Actions (within the next 14 days)

The OIEA team is working with the BLM to set up a grazing roundtable.

The OIEA team is helping to plan for both PRDJ and AML grant disbursement events.

OFFICE OF THE DEPUTY SECRETARY

Week Ahead Schedule of Meetings, Hearings, and Travel

Associate Deputy Secretary Jim Cason will be in the office.

Immediate Announcements and Actions

The Department will sign a Memorandum of Agreement with the Department of Defense expanding the role of the DoD liaison to include all issues between the two departments. The MOA will implement the Memorandum of Understanding signed in 2018. The package has cleared DOI surnaming and is awaiting concurrence from DoD.

OFFICE OF THE EXECUTIVE SECRETARIAT AND REGULATORY AFFAIRS

Week Ahead Schedule of Meetings, Hearings, and Travel

● Director Julie Lillie will be on leave, Thursday, March 21 thru Friday, March 22. Deputy Director for Regulatory Policy, Justin Abernathy will be Acting Director during this time.
● Deputy Director of Regulatory Affairs, Bivan Patnaik, will be on leave Wednesday, March 20 thru Friday March 22, 2019.
● The Department of the Interior's submission for the Spring 2019 update of the "Unified Agenda of Federal Regulatory and Deregulatory Actions" will be sent to the Office of Management and Budget on Wednesday March 12, 2019. The Office of the Executive Secretariat and Regulatory Affairs is currently working with Bureau/Office regulatory contacts to compile information for the Department's Agenda submission.

Immediate Announcements and Actions (within the next 14 days)

● DOI Priority Rules

○ U.S. Fish and Wildlife Service (FWS) Final Rule, "Endangered and Threatened Wildlife and Plants; Regulations for Prohibitions to Threatened Wildlife and Plants; Removal of Blanket Section 4(d) Rule" (RIN 1018-BC97)-The FWS is finalizing revisions to the regulations on prohibitions that apply to species that are listed as threatened species or downlisted from an endangered species to a threatened species. The final rule is with the Office of Management and Budget (OMB) for review pursuant to Executive Order (EO) 12866. DOI received interagency review comments and is reviewing and preparing responses.
○ FWS Final Rule, "Conservation of Endangered and Threatened Species; Revision of Regulations to Address Interagency Cooperation" (RIN 1018-BC87) - The FWS is finalizing revisions to its regulations for interagency cooperation pursuant to the Endangered Species Act. The final rule is with the OMB for review pursuant to EO 12866. DOI received interagency review comments on and is reviewing and preparing responses.
○ FWS Final Rule, "Endangered and Threatened Species of Wildlife and Plants; Revision of the Regulations for Listing Species and Designating Critical Habitat" (RIN 1018-BC88) - The FWS is finalizing revisions to its regulations for listing endangered and threatened species and for designating critical habitat under the Endangered Species Act. The final rule is with the OMB for review pursuant to EO 12866. Interagency comments were also provided to DOI on and is reviewing and preparing responses.
○ Bureau of Safety and Environmental Enforcement (BSEE) Final Rule, "Oil and Gas Sulfur Operations on the Outer Continental Shelf - Blowout Preventer Systems and Well Control Revisions" (RIN 1014-AA39) - The BSEE is finalizing

revisions to the regulations for oil and gas drilling, workover, completion and decommissioning operations on the Outer Continental Shelf. The final rule is with the OMB for review pursuant to EO 12866. On February 8, 2019, OMB provided

DOI/BSEE with an initial round of EO 12866 interagency comments. On March 13, 2019, BSEE submitted drafts of revised final rule documents, which include responses to the comments received from OMB and revised regulatory text, for Departmental review. The revised final rule documents and comment responses are currently under review.

● Interagency Reviews Under E.O. 12866

○ EPA's NPRM titled, "Aquatic Life Criteria for Aluminum in Oregon." Comments due to OMB on March 12, 2019.
○ EPA's NPRM titled, "Vehicle Test Procedure Adjustments for Tier 3 Certification Test Fuel." Comments due to OMB on March 11, 2019.

Committee Meetings

Hunting and Shooting Sports Conservation Council - Council is scheduled to meet March 21, 2019 in Washington, DC
Women's Suffrage Centennial Commission - Commission is scheduled to meet via teleconference on March 27, 2019
Secretarial Appointments
400 Years of African-American History Commission - Appointment of Mr. Haywood Swygert
Correspondence
NPS is working on an upcoming draft proclamation for an addition to the U.S. Civil Rights Network with a tentative timeline for end of March.
Incoming Congressional Oversight Requests
February 28, 2019 request from Chairman Grijalva, Committee on Natural Resources, on marine
national monuments. EST #00011691
March 11, 2019 request from Chairman Grijalva, House Committee on Natural Resources, and
Chairman Alan Lowenthal, Subcommittee on Energy and Mineral Resources, on incidents of noncompliance issued by the BLM's Inspection and Enforcement program. EST #00011754

OFFICE OF THE SOLICITOR

Principal Deputy Solicitor Daniel Jorjani will be in the office.

Litigation:

In *Weyerhaeuser v. USFWS (dusky gopher frog)*, the United States will seek remand, without vacatur, of the current regulation as to Unit 1.

Endangered Species Act Section 4 Litigation:

- Deadline Lawsuits—We have 13 pending lawsuits regarding 19 species (5 of them are currently stayed). Of these lawsuits, 0 were filed in the past week. We received 0 new notices of intent to sue during the past week.
- Merits Lawsuits—We have 19 pending lawsuits challenging the merits of petition findings (7 cases), final listing or delisting determinations (6 cases), final critical habitat designations (5 cases), and the species status assessment process (1 case). Of these lawsuits, 0 were filed in the past week. We received 0 new notices of intent to sue during the past week.

Multiple Lawsuits Related to the Emergency Declaration on the Southern Border
The Department has been named in several lawsuits challenging President Trump's declaration of an emergency on the Mexican border (*Center for Biological Diversity et al. v. Trump et al.*, 1:19-cv-00408 (D.D.C.); *California et al. v. Trump et al.*, 3:19-cv-00872 (N.D. Cal.); *El Paso County, et al., v. Trump et al.,* 3:19-cv-00066 (W.D. Tex.)). General Law is working with the Department of Justice to identify Departmental equities and to get litigation holds in place.

Creating an Inter-Agency Agreement between NPS and the U.S. Secret Service, Architect of the Capitol, and GSA for sharing the design and mold of White House Security Bollards
Several Government agencies have requested the use of the mold for the White House security bollards. NPS designed the molds and limits the use by other Government agencies and prohibits third party use. Currently, there are no active access agreements. DGL will draft a Use Agreement (Inter-Agency Agreement) that will allow inter-agency use of the security bollards and restrict their re-use or reproduction of the bollards, both physical copies and its intellectual property.

Potential Claims Based on Alleged Radiation Exposure at the Grand Canyon
The Torts Practice Branch is coordinating with the Department of Justice to address the potential tort claims of visitors to the Grand Canyon who may have been exposed to rock

samples containing uranium ore housed in the Grand Canyon Museum Collections Building between 2000 and 2018. To date, the Department of the Interior has not received any FTCA claims related to such exposure. NPS employees exposed to uranium ore would likely be barred from bringing an FTCA claim and their potential remedy would fall under the Federal Employee Claims Act.

Petition for Rulemaking
The U.S. Fish and Wildlife Service anticipates publication in the Federal Register of a petition for rulemaking seeking revision to existing rules pertaining to the religious use of bald eagle and golden eagle feathers and parts for Native Americans. The petition is being published pursuant to the terms of a settlement agreement entered into in 2016 by the United States with McAllen Grace Brethren Church and the Becket Fund for Religious Liberty. Any changes to existing rules will be subject to a public comment period and tribal consultation consistent with Executive Order 13175.

City of Beaufort v. NMFS (D.S.C.) -Atlantic G&G IHAs
DOJ filed its opposition brief to most of the Plaintiffs' preliminary injunction motions on Wednesday, March 13. These plaintiffs have until March 25 to file their reply. DOJ filed a motion seeking a one-week extension until March 22 to file its opposition to the State of South Carolina's PI motion, with the State then having until April 2 to file its reply.

ASSISTANT SECRETARY FOR FISH AND WILDLIFE AND PARKS

Week Ahead Schedule of Meetings, Hearings, and Travel

From March 18-22, Principal Deputy Assistant Secretary Andrea Travnicek will be in the office; on March 21, she will be attending the Hunting and Shooting Sports Conservation Council Meeting at the U.S. Department of Agriculture.

From March 18-22, Deputy Assistant Secretary Aurelia Skipwith will be in the office.

From March 18-21, Deputy Assistant Secretary Ryan Hambleton will be in the office; on March 22, he will be on annual leave.

From March 18-22, NPS Acting Director Dan Smith will be in the office.

From March 18-22, FWS Principal Deputy Director, Margaret Everson will in the office; on March 21, she will be participating in the Hunting and Shooting Sports Conservation Council Meeting. On March 22, she will speak at the FWS, Special Agent Course at NCTC in Shepherdstown, West Virginia.

Immediate Announcements and Actions For the Next Week

U.S. Fish and Wildlife Service

On or around March 18, FWS will publish in the *Federal Register* a final rule amending the depredation and control orders to allow destruction of resident Canada goose nests and eggs at any time of year. In 2006, FWS implemented several actions intended to reduce, manage, and control resident Canada goose populations in the continental United States and to reduce related damages. Those actions included depredation and control orders that allow destruction of their nests and eggs by authorized personnel between March 1 and June 30. However, some resident Canada geese currently initiate nests in February, particularly in the southern United States, and it seems likely that in the future, nest initiation dates will begin earlier and hatching of eggs could end later. This change will give the states more flexibility to address specific, local damage problems caused by resident Canada geese. If-asked talking points will be available. Information will also be posted to the web. (Updated 03/13/2019)

On or around March 18, FWS will publish in the *Federal Register* a proposed rule to amend the agricultural depredation order to allow take of resident Canada geese at agricultural facilities between April 1 and August 31 in Atlantic Flyway states. In 2006, FWS implemented several actions intended to reduce, manage, and control resident Canada goose populations in the continental United States and to reduce related damages. Those actions included an agricultural depredation order that allows take of resident Canada geese at agricultural facilities by authorized personnel between May 1 and August 31. This time period, however, is too restrictive in portions of the Atlantic Flyway where specific crops are now being planted and depredated prior to May 1. This change only applies to Atlantic Flyway states because the other flyway states opted not to request a similar change. If-asked talking points will be available. Information will also be posted to the web. (Updated 03/13/2019)

On or about March 20, FWS, as co-chair of the Asian Carp Regional Coordinating Committee (ACRCC), will release the 2019 Asian carp action plan. The action plan is developed annually and provides the ACRCC partnership with a portfolio of strategic measures to prevent the spread of invasive Asian carp in the Great Lakes. The action plan addresses priorities for early detection and monitoring, support for the electric dispersal barrier, secondary pathway mitigation, and stakeholder communication and outreach. Key initiatives for 2019 include the field testing of underwater sound and carbon dioxide as potential Asian carp deterrents and coordinated efforts to address the growing threats from black and grass carp. Planned outreach will be a news release from ACRCC. (Updated 03/13/2019)

By March 21, FWS plans to publish in the *Federal Register* a proposed incidental take regulation (ITR) and associated draft environmental assessment for Hilcorp and Alaska LNG's multi-year activities in the Cook Inlet that have the potential to result in incidental harassment of northern sea otters. FWS and Hilcorp have worked together to develop a mutually agreeable timeline for the Cook Inlet ITR and an estimated date of publication of the final ITR and issuance of the associated Letter of Authorization (LOA). Under this proposed schedule, a final ITR would publish on May 3 and a LOA would be issued that

same day. Activities are scheduled to begin in Cook Inlet as early as mid-May. FWS has shortened various steps in the internal and public reviews, but proposal must publish by March 21 to meet the timeline. Outreach will include an email to stakeholders. (Updated 03/13/2019)

ONGOING ITEMS

On March 21, FWS will host the meeting of the Hunting and Shooting Sports Conservation Council at the Department of Agriculture's Whitten Building. The Council was established to provide advice and recommendations for implementing Secretarial Orders 3347 and 3356, as well as Executive Order 13443, and to make recommendations related to hunting and shooting sports that will expand opportunities, conservation efforts, and the economic benefits to the national and local economies. Meeting agenda items include updates on the implementation of outdoor recreation secretarial orders, updates on efforts to create or expand hunting and recreational shooting opportunities on federal lands, council subcommittee reports and discussion of possible recommendations, and a public comment period. (02/20/2019)

On or around March 22, FWS and the National Fish and Wildlife Foundation (NFWF) will announce the final allocations for the first round of Delaware River Basin Conservation Act grants, appropriated by Congress in FY 2018. More than $6.4 million in grant applications were received and the review committee of partners named in the Act approved a final slate of $4.1 million with a non-federal match of $7.5 million. The grants will restore 626 acres of wetland habitat and 549 acres of floodplain; increase public access on 1,794 acres; create 32 new jobs; and leverage more than 3,000 volunteers in project delivery. NFWF conducted fiscal notifications to Congress on November 16, with a 30-day response time. (Updated 02/20/2019)

A proposed change to the implementing regulations for the Migratory Bird Treaty Act (MBTA) has cleared DOI and was sent to OMB-OIRA where it is in delayed status until it receives a regulatory impact analysis (RIA) from DOI. FWS submitted a draft RIA to DOI on February 22 and is currently revising the RIA. The next draft is scheduled to be completed by March 15. Once the RIA is received by OMB-OIRA, it may initiate interagency review, typically taking up to 90 days. The rule: 1) defines the scope of the MBTA as it applies to conduct resulting in the injury or death of protected migratory birds and 2) reduces permitting burdens by modifying existing permit exceptions and proposing new ones. This proposed regulation will be consistent with the Department Solicitor's Opinion M–37050. (Updated 03/06/2019)

On February 28, FWS notified the states, territories, and the District of Columbia of the FY 2019 apportionment of funds under the Pittman-Robertson Wildlife Restoration Act, the Dingell-Johnson Sport Fish Restoration Act and of the State Wildlife Grant Program. Wildlife Restoration funds totaled $673,586,164 and can be used by the states for projects to restore, conserve, manage, and enhance wild birds and mammals and their habitat. Projects also include providing public use and access to wildlife resources, hunter education, and development and management of shooting ranges. Sport Fish Restoration funds totaled

$365,396,740 and can be used for fishery projects, boating access, and aquatic education. State Wildlife Grant funds totaled $52,028,789 and can be used for developing and implementing programs that benefit wildlife and their habitats, including species that are not hunted or fished. Outreach is being developed for these awards of funds, and FWS is working with DOI-OCO on a possible event to announce the PRDJ awards. (03/06/2019)

National Park Service

NEW ITEMS

On or around March 18, the Appalachian National Scenic Trail will issue permits to Sunoco Pipeline, LP to build the second of its Mariner East 2 natural gas liquids pipelines in an existing 325-foot deeded easement crossing the Trail in a developed section of south central Pennsylvania. NPS staff are completing compliance materials, including a thorough assessment of extraordinary circumstances with use of a categorical exclusion, to support a five-year operations and maintenance special use permit and a construction special use permit. (03/13/2019)

The week of March 18, Death Valley National Park anticipates announcing the Finding of No Significant Impact (FONSI) for the Modification to Keystone Mine Plan of Operations Environmental Assessment (EA). The NPS adopted a BLM EA to prepare this FONSI. This will authorize the diversion of water from Sourdough Spring within the park to Keystone Mine, which is outside the park on land under BLM jurisdiction. (03/13/2019)

On or around March 18, Lake Roosevelt National Recreation Area will notify the public that campground reservations will not be available between July 8 and September 2 due to an asphalt resurfacing project jointly funded by the Federal Highway Administration and the NPS. During this time, campgrounds will be available on a first-come, first-served basis, with areas of work closed as needed for construction and visitor safety. Existing reservations will be cancelled and fees refunded. (03/13/2019)

On or around March 18, 2019, Grand Canyon National Park anticipates releasing the Finding of No Significant Impact for the Transcanyon Water Distribution Pipeline (TCWL)/Environmental Assessment. The selected alternative prepared for the project will relocate the water intake for the TCWL, replace three miles of the TCWL, and construct treatment plants, pump stations, and distribution lines to support the water system. The NPS held two public meetings and one webinar during the public review period. Public comment was held from October 10 through November 10, 2018. (03/13/2019)

Between March 18 and 27, Zion National Park anticipates acquiring a ± 4.95 acre inholding tract (Number 06-140) with a main house and separate cabin located on the property. The provisions of the acquisition include a 6-year Use and Occupancy Reservation on behalf of the owners. The property is located in the park's Cave Valley, noted for its striking geologic features and wildlife habitat frequented by scores of mule deer as key winter range. (03/13/2019)

On or around March 20, Joshua Tree National Park anticipates opening the 30-day public comment period on a draft Environmental Assessment, prepared by contractors on behalf of Southern California Edison with input and review by park staff. This project will address a right of way permit and proposed relocation of a failing underground cable along Park Route 12 entering the park from Twentynine Palms. (03/13/2019)

From March 23 - April 14, the 21st annual National Cherry Blossom Festival will run. The festival's welcome area at the Tidal Basin along the National Mall will be open on weekends starting March 23, and weekdays during peak bloom. The estimated date for peak bloom is April 3 and can last up to 14 days. Official events will occur throughout the greater Washington, DC area, including locations within the National Mall and Memorial Parks (Freedom Plaza, Japanese American Memorial to Patriotism in World War II, Tidal Basin, Washington Monument Grounds) and National Capital Parks–East (Anacostia Park, Oxon Run Park). (03/13/2019)

March 23, Prince William Forest Park will host the Marine Corps Marathon's 17.75K event. The course runs almost entirely within the park. Some areas will briefly close to regular visitation during the event. More than 3,000 runners are expected. (03/13/2019)

ONGOING ITEMS

On March 18, Olympic National Park will release the park’s Fire Management Plan/Environmental Assessment and begin the 30-day public review period. (03/06/2019)

On March 18, Prince William Forest Park will release the Comprehensive Trails Plan and Environmental Assessment (EA) for public comment. The plan/EA provides comprehensive guidance for enhancing the park’s trails system and visitor experience in a manner that balances resource protection with recreation. (02/20/2019)

On March 18, Rock Creek Park will release the Nature Center Complex Development Concept Plan and Environmental Assessment (EA) for public review. The plan/EA establishes a vision and clear guidance for managing the park's Nature Center, public horse center, maintenance yard, and associated grounds. A public meeting is scheduled for April 3. (02/20/2019)

By March 18, the NPS plans to accept the donation of the Bauvais-Amoureux House, Tract 01-101, from the State of Missouri. The 0.12-acre tract is improved with a historic structure. This will be the first tract acquired at Ste. Genevieve National Historical Park. (02/27/2019)

On March 19 and 20, Camp Nelson National Monument (established October 2018) will host public and stakeholder meetings to solicit comments on the future of the National Monument as part of efforts to develop a Foundation Document for the park. Public comment will also be sought via parkplanning.nps.gov for 30 days beginning on March 1. (02/27/2019)

On March 20, National Mall and Memorial Parks will begin taking reservations on Recreation.gov for the spring season at the Parkway Drive Volleyball Courts near the

Lincoln Memorial. The 2019 season will start earlier than in the past to provide increased access and opportunities for the public to play (beginning on April 15 instead of May 1). The park will coordinate public announcements with DOI. (02/20/2019)

On or around March 20, Golden Gate National Recreation Area intends to release a Request for Qualifications (RFQ) for the lease and operation of an historic boat shop and marina at Fort Baker, near the Golden Gate Bridge. A site visit for potential RFQ respondents is scheduled for April 3, with RFQ responses due May 31. A public tabling session by RFQ respondents in Sausalito will follow on June 4. A short-list of RFQ respondents will be invited to respond to a more detailed Request for Proposals (RFP) in late 2019. The project lessee will be responsible for rehabilitation of the historic site to be used as a waterfront community center with food, beverage, and meeting space. (02/27/2019)

On or around March 20, the NPS will announce that it has selected the businesses which will provide exclusive cruise ship services in Glacier Bay National Park and Preserve starting this fall. A prospectus soliciting proposals for cruise ship services was issued in May 2018. A panel of technical experts reviewed each proposal package and five new ten-year concession contracts will be awarded. Two of the contracts are set aside for the two historic operators identified through the Alaska National Interest Lands Conservation Act (ANILCA) legislation. (Updated 03/06/2019)

8-30 Day Outlook

U.S. Fish and Wildlife Service

NEW ITEMS

By end of March, FWS will fully integrate pay.gov, an electronic payment receivable system, into its existing Service Permits Issuance and Tracking System (SPITS). Permittees will be able to pay for permits electronically rather than with paper checks. Permit processing times will be reduced; FWS efficiencies will increase with the reduction of paper check handling. The pay.gov integration process is in testing phase now. (03/13/2019)

On or around March 30, FWS plans to announce approximately $20.6 million in federal funding approved for the FY 2019 Boating Infrastructure Grants (BIG). The BIG Program provides grant funds to the states, the District of Columbia and insular areas to construct, renovate, and maintain tie-up facilities with features for transient boaters in recreational vessels 26 feet or more in length, and to produce and distribute information and educational materials about the program. (03/13/2019)

By the end of March, FWS expects to finalize the biological opinion (BiOp) for the East Collier County, Florida Multispecies Habitat Conservation Plan. The plan would minimize impacts to 20 species while developing 45,000 acres of residential and commercial areas, and mining within more than 150,000 acres of rural, agricultural, and wild lands in Collier County. FWS is making progress in developing the BiOp, final environmental impact

statement, and associated documents and remains on target with the requested revised timeline, under which it would make the final permit decision by mid-July. (03/13/2019)

On or around April 15, FWS anticipates submitting to the *Federal Register* a draft conservation agreement involving FWS and transportation and energy partners across the lower 48 states that would address conservation needs of monarch butterflies on millions of acres of rights-of-way and associated lands. More than 30 companies will carry out measures to reduce or remove threats to the monarch butterfly caused by ongoing maintenance and modernization activities on rights-of-way. The draft agreement encourages the creation of new monarch habitat, as well as the maintenance of existing habitat across enrolled lands. A mid-April submission would mean a public comment period through mid-June. (03/13/2019)

UPDATED ITEMS

Around March 25, FWS and the binational Jaguar Recovery Team will announce completion of the final recovery plan for the jaguar. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions and borderland dispersal corridors such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Outreach includes a news release, social media, and emails to congressional offices and stakeholders. (03/13/2019)

On or around April 15, FWS plans to publish in the *Federal Register* a draft environmental impact statement (DEIS) for a draft habitat conservation plan (HCP) Sierra Pacific Industries (SPI), California Department of Fish and Wildlife, U.S. Forest Service (USFS) and FWS have been working to develop for the northern spotted owl and California spotted owl. The 50-year incidental take permit would cover 1.6 million acres of commercially managed SPI timberlands in California (0.4 million acres in Northern spotted owl range and 1.2 million acres in California spotted owl range). USFS is a NEPA Cooperating Agency on the DEIS. A listing decision for California spotted owl is currently due September 30, 2019, by court order. The SPI HCP is part of a suite of California spotted owl pre-listing conservation efforts. Planned outreach includes a local news release. On April 5, FWS plans a briefing for the DEIS. (Updated 03/13/2019)

ONGOING ITEMS

On or around March 25, FWS plans to publish in the *Federal Register* the proposed 2019-20 hunting regulations for certain migratory game birds. FWS annually prescribes frameworks, or outer limits, for dates and times when hunting may occur and the number of birds that may be taken and possessed in hunting seasons. These frameworks are necessary to allow state selections of seasons and limits and to allow recreational harvest at levels compatible with population and habitat conditions. Planned outreach includes congressional and stakeholder notifications. (Updated 03/06/2019)

On or around March 29, pending final clearance by OMB, FWS and NOAA Fisheries (NMFS) plan to send to the *Federal Register* final revised regulations of the Endangered Species Act. FWS and NMFS sent the draft final revised regulations pertaining to interagency cooperation pursuant to section 7 of the ESA and the procedures for listing of species and designation of critical habitat pursuant to section 4 of the Act to OMB for review on December 21, 2018. FWS previously submitted to OMB on November 26 a draft final withdrawal of the blanket 4(d) rule for newly listed threatened species to recognize the difference between endangered and threatened species and align with NMFS's current practice. The interagency review concluded on the 4(d) rule in December and on the section 7 and section 4 rules on February 13. FWS and NMFS have received interagency review comments from OMB on all three rules, reviewed those comments, and distributed the drafting teams' assessment of those comments to DOI policy officials. (Updated 03/06/2019)

On or before March 30, FWS will publish in the *Federal Register* an interim final rule allowing migratory bird subsistence harvest regulations in Alaska for the 2019 season. These regulations are a continuation of the 2018 regulations and allow for the continuation of customary and traditional subsistence uses of migratory birds in Alaska and prescribe regional information on when and where the harvesting of birds may occur. These regulations were developed under a co-management process involving the Service, the Alaska Department of Fish and Game, and Alaska Native representatives. The rulemaking is necessary because the regulations governing the subsistence harvest of migratory birds in Alaska are subject to annual review. This rulemaking would establish region-specific regulations that would go into effect on April 2, 2019. Planned outreach will include a release and notifications to tribes and Congress. (02/20/2019)

By the end of March, FWS will release a five-year status review with a species status assessment for the endangered red-cockaded woodpecker. The review finds that recovery efforts have been successful and recommends downlisting from endangered to threatened. With the release of the five-year review, FWS will begin work on a proposed rule. This recommendation and the subsequent proposed rule are expected to be controversial. Planned outreach likely will include a news release and congressional notifications. (Updated 03/06/2019)

By April 10, FWS will notify appropriate local landowners of the start of the land protection planning process to establish Green River NWR in Henderson County, Kentucky. FWS was directed by Congress in FY 2018 and FY 2019 appropriations reports to establish the refuge. The FY 2019 language directs FWS to forgo the development of the preliminary land protection strategy and go directly to the land protection plan (LPP) in order to expedite the refuge's establishment. In close partnership with Kentucky and local elected officials, FWS is moving forward with the land protection planning process. Affected Indian tribes have already been notified of FWS's initiation of the planning process. FWS anticipates releasing the draft LPP and associated environmental assessment for public review and comment by early summer. (02/27/2019)

On or around April 15, FWS plans to publish a proposed rule to allow the baiting of brown bears on Kenai NWR, which is permitted under Alaska state hunting regulations. The rule

would also allow the discharge of firearms along the Kenai and Russian rivers during certain times of the year; allow the use of snowmobiles, all-terrain vehicles, and utility task vehicles on certain lakes when there is adequate snow and ice cover; and increase access to the refuge by bicycle and game cart. This proposed rule would be available for a 60-day public comment period and is likely to be strongly opposed by those who believe that baiting of wildlife for hunting is unethical or who oppose hunting (particularly of large predatory mammals). FWS plans to notify stakeholders directly by email and issue a news release to Alaska media announcing the proposed rule and public comment period. (Updated 02/27/2019)

Endangered Species Act Actions through April 14:

Species	**Action**	**Current Status**	**Target Date to FR (dates in bold are litigation deadlines)**	**Outreach**
California condor in northern California and Oregon	Proposed designation of a nonessential experimental population	Pending Exec-Sec clearance	As soon as it clears	Regional release
Southern Selkirk Mountain woodland caribou	Final reclassification as distinct population segment, endangered	Pending Exec-Sec clearance	As soon as it clears	Regional release
Meltwater lednian stonefly, Western glacier stonefly	Final listing determination as threatened	Pending Exec-Sec clearance	As soon as it clears	Regional release

Arizona eryngo, Giraffe, Refugio manzanita, San Gabriel chestnut snail	90-day findings on ESA petitions	Pending FWP clearance	As soon as it clears (lawsuit filed on giraffe)	National release (controversy)
Franklin's bumble bee	Proposal to list as endangered	Pending FWP clearance	As soon as it clears	Regional release
Batch of 29 draft recovery plan revisions for 42 species (APG Batch 2)	Notice of availability of draft recovery plans	Pending FWS Director clearance	As soon as it clears	National and regional releases
Panama City crayfish	Six-month extension of the final listing determination	Pending FWS Director clearance	As soon as it clears	Regional release
Bi-State Population of greater sage-grouse	Comment period reopening on proposed listing	Pending FWP clearance	As soon as it clears	Regional release
Neuse River waterdog, Carolina madtom	Proposed listing of Neuse River waterdog as threatened and Carolina madtom as endangered, with proposed critical habitat	Pending FWP clearance	As soon as it clears (deadline litigation stayed until March 1)	Regional release

2016 Recovery Report to Congress	Transmittal of 2016 Biennial report	Pending FWS Director Clearance	As soon as it clears (release to Congress; will not be published in the FR)	National - Congressional notifications and post the report online
Barrens topminnow	Final listing determination as endangered	Pending FWS Director clearance	As soon as it clears	Regional release
Batch of 29 draft recovery plans for 43 species (APG Batch 2.5)	Notice of availability of draft recovery plans	Pending FWS Director clearance	As soon as it clears	National and regional releases
Running buffalo clover	Proposed delisting	Pending FWS Director clearance	As soon as it clears	Regional release
34 NMFS Species	Adding 16 NMFS Species, Removing One NMFS Species, and Updating Entries for 17 NMFS Species on the List of Endangered and Threatened Wildlife	Pending FWP Clearance	March 25	N/A - NMFS completed outreach on these species during their rulemaking process.
Arkansas mudalia, ashy darter, Barrens darter, Chihuahua scurfpea, Coldwater Crayfish, Eleven Point River Crayfish, Spring River Crayfish, and	12-month findings on ESA petitions	Pending FWS Director clearance	March 29 (March 31 is settlement agreement deadline for ashy and Barrens darters)	Regional releases

red-crowned parrot				
Eastern hellbender	12-month finding and proposed listing	Pending FWS Director Clearance	March 29 (March 31 is settlement agreement deadline)	Multi-regional release
ESA Revised Regulations	Listing Species and Designating Critical Habitat, Prohibitions, Interagency Cooperation	Under OMB interagency review	March 29	National release
Texas Hornshell	Proposed Critical Habitat	Pending FWS Director clearance	April 11	Regional release

National Park Service

NEW ITEMS

On March 27, the Wekiva River System Advisory Management Committee will be holding a public meeting in Apopka, Florida. The committee advises on the development and

implementation of projects as part of the comprehensive management plan for the Wekiva Wild and Scenic River. (03/13/2019)

On or about March 29, the Acting Regional Director for the National Capital Region will sign a Finding of No Significant Impact for the Environmental Assessment for safety improvements for the Memorial Circle area of the George Washington Memorial Parkway. The purpose of this project is to improve transportation safety at and near the circle, reduce risks at key locations within the corridor, and conflicts between trail, walkway, and roadway users, while maintaining the memorial character of the area. (03/13/2019)

By March 29, Death Valley National Park anticipates announcing the Finding of No Significant Impact for the Scotty's Castle Flood Rehabilitation Environmental Assessment (EA). The projects analyzed in this EA are needed to reopen the historic district to the public after significant damage from a flash flood in 2015. (03/13/2019)

By March 29, Death Valley National Park anticipates announcing the Finding of No Significant Impact for the Rogers Peak Telecommunications Site Environmental Assessment (EA). The EA analyzed the proposed construction of a Navy radome, AT&T cell tower, a replacement California Department of Transportation communications tower, and associated infrastructure on a non-wilderness mountain summit. (03/13/2019)

On March 29, the Gateway National Recreation Area Fort Hancock 21st Century Advisory Committee will hold a public meeting. The committee provides advice on matters related to the Fort Hancock Historic District. The meeting will include an update on the leasing program. (03/13/2019)

On March 29, Glacier National Park anticipates releasing the Westslope Cutthroat Trout and Bull Trout Conservation in the Upper Camas Drainage Environmental Assessment for public review. The proposed action would use rotenone, a fish toxicant, to remove non-native fish from Camas Lake, Lake Evangeline, and upper Camas Creek, followed by translocation (i.e., stocking) of native westslope cutthroat trout and bull trout to the lakes. This would be done to establish a native fish community that is secure against the threats of non-native fish and climate-related habitat degradation. (03/13/2019)

On March 30, Klondike Gold Rush National Historical Park – Seattle Unit will commemorate the 77th anniversary of the forced removal of Japanese Americans from Bainbridge Island, Washington, under Executive Order 9066. The park will commemorate the day through social media and participation in events at the Bainbridge Island Japanese American Exclusion Memorial (a unit of Minidoka National Historic Site) and in the community of Bainbridge Island. (03/13/2019)

On April 1, Budweiser, a National Park Foundation Find Your Park partner, will open their summer national cause marketing campaign (April 1, 2019 through September 15, 2019) with the rollout of a line of limited edition national park inspired aluminum can and bottle designs. Budweiser will donate $1.00 per limited edition case sold through select grocery and retail stores in all 50 states for a maximum donation of $1 million. The National Park

Foundation will be promoted in retail signage, on packaging, social media, and other advertising and promotional materials. (3/13/2019)

On or around April 1, the teardown and rebuild of Maswik South lodging in Grand Canyon National Park is expected to begin. The buildings are at the end of their useful life and this project will replace the existing 90 basic rooms with 120 mid-scale rooms, 30 of which will have kitchenettes. The total cost of the project is approximately $30 million. This was a contractual requirement of the concession contract awarded to Xanterra in 2016. A Finding of No Significant Impact for the project was signed February 14. (03/13/2019)

On April 3, the Denali National Park Subsistence Resource Commission (SRC) will hold a public meeting via teleconference. The purpose of an SRC is to devise and recommend to the Governor of Alaska and the Secretary a program for subsistence hunting within Alaska national parks where subsistence is authorized. The SRCs were established under the Alaska National Interest Lands Conservation Act. (03/13/2019)

On or around April 4, the Acting Regional Director for the National Capital Region will sign a Finding of No Significant Impact for the proposed enhancement of the former Pershing Park as a national World War I Memorial. The project will enhance the General John J. Pershing Commemorative Work as a national World War I Memorial by constructing appropriate sculptural and commemorative elements, including landscaping as provided within Public Law 113-291. (03/13/2019)

On April 9, Chesapeake and Ohio Canal National Historical Park will host a public meeting and open a comment period about the park's proposal to relocate its headquarters to Williamsport, Maryland. This meeting will include information about the historic structures and the cultural landscape of the proposed relocation site. An announcement will be made at least two weeks prior to the meeting and will be coordinated with the Department. (03/13/2019)

On or around April 10, Cabrillo National Monument anticipates releasing the park's draft Trail Management Plan/Environmental Assessment (EA) for a 30-day public review and comment period. The plan/EA addresses proposed trail improvements to diversify recreational opportunities, improve connectivity between features of interest, eliminate unsustainable routes, improve visitor safety, and protect park resources. The park plans to hold a public meeting on April 25 to answer questions and solicit feedback on the draft EA. (03/13/2019)

On April 12, Chesapeake & Ohio Canal National Historical Park support group, Friends of Fletchers Cove, will host a ribbon cutting ceremony for a new boat dock at Fletchers Cove located 3 miles north of Georgetown in Washington, D.C. The installation of the new dock was approved by the NPS and is being facilitated by park concessioner Guest Services Inc. with help of the Friends of Fletchers Cove. Park Superintendent Kevin Brandt has been invited to speak at the event. D.C. Mayor Muriel Bowser and Congressman Jamie Raskin (D-MD-8) have indicated they will attend. (03/13/2019)

On April 16-17, the Gates of the Arctic National Park Subsistence Resource Commission (SRC) will hold a public meeting in Anaktuvuk Pass, Alaska. The purpose of an SRC is to devise and recommend to the Governor of Alaska and the Secretary a program for subsistence hunting within Alaska national parks where subsistence is authorized. The SRCs were established under the Alaska National Interest Lands Conservation Act. (03/13/2019)

UPDATED ITEMS

On March 29, the acting National Capital Regional Director is expected to sign a Finding of No Significant Impact for the George Washington Memorial Parkway Arlington County and Vicinity Boathouse Environmental Assessment (Plan/EA). The Plan/EA evaluates the proposed construction and operation of a non-motorized boathouse on lands administered by the George Washington Memorial Parkway along the Potomac River along with a series of low-impact access points to the river to accommodate canoes and kayakers. The project has been delayed three times in recent months as work to finalize the FONSI and Section 106 Memorandum of Agreement continued. (Updated 03/13/2019)

On March 29, a final report is due from the contractor which will summarize public comment and develop various concern statements with regard to the Alaska Sport Hunting and Trapping proposed rule. In the interim, the Alaska Region NPS team has completed its review of all correspondence received on the EA and compiled substantive comments. Subject matter experts are also reviewing supplemental information received from commenters and substantive comments on the EA related to environmental impacts. Concurrently, the workgroup, which is comprised of AKR staff, DOI solicitors and NRSS staff, is working on response to comments on both the EA and the rule. NPS received the draft comment summary report from the contractor on March 8. (Updated 03/13/2019).

In March, the contract for repairs to the visitor loading ramp at the USS Arizona Memorial will be awarded. Despite the efforts of park staff and partners to implement an expedited plan for repair, the Memorial will not open in March 2019 as expected. Additional severe damage to the structure was discovered in May 2018, during the first phase of the project; it had not been identified in early surveys. The NPS and Navy are meeting regularly; they received and are reviewing an updated proposal from the contractor. Negotiations with the contractor for the repair of the anchoring system, and for damage to the USS Arizona Memorial resulting from the failure of the anchoring system, are complete. The NPS contracting officer and engineer are working through the technical evaluations. The Solicitor has been asked to expedite the contract review. There may be additional negotiations; once that is complete, the contract will be prepared for signature. On March 12, the Congressional delegation requested a monthly written update on the project. While the repair process continues, park staff and partners will offer supplemental visitor services and amenities to provide the best possible experience. (Updated 03/13/2019)

ONGOING ITEMS

On March 25, the 30-day comment period will close for proposed changes to the Glacier Bay National Park and Preserve 2019 compendium. Two modifications are proposed: one relating

to the collection of gull eggs and the other updating the availability of the park public use cabin to reflect changes in state hunting seasons. (03/06/2019)

Before March 31, the U.S. Dept. of Agriculture Animal and Plant Health Inspection Service will conduct a deer cull at Fire Island National Seashore. On February 26, the Eastern District Court of New York denied the request for a temporary restraining order at Fire Island National Seashore that was filed by the Animal Welfare Institute. After this ruling the park resumed pre-baiting in preparation for the deer culling operations. The Animal Welfare Institute is a party to a lawsuit against the park related to its plan to initiate a deer cull. On February 11, 2019 the park announced via press release plans to implement deer removal operations per its approved Deer Management Plan. On February 13, Seashore staff began pre-baiting, commonly conducted for two weeks prior to a cull. On February 19, the court granted the TRO, which required the park to stop pre-baiting activities. (Updated 03/06/2019)

On April 1, the NPS will conclude its call for applications for $5 million in grants to support the preservation of historic buildings in rural communities across the country that are listed in or eligible for inclusion in the National Register of Historic Places through the Historic Revitalization Subgrant Program. The grant announcement opened on February 7. (Updated 02/06/2019)

On April 2, the extension of the Memorandum of Agreement (MOA) between Steamtown National Historic Site and the Pennsylvania Northeast Regional Railroad Authority (PNRRA) that defines terms of rail use by both parties will expire. This most recent 45-day extension of the current MOA does not incur any expenses by NPS while negotiating a new General Agreement. Even if a new agreement is signed by April 1, it is likely this extension will cause a delay to the start of the Steamtown NHS operating season while contracts are put in place. If an agreement is not reached, there will be no additional extensions offered. Without an agreement in place PNRRA and their commercial freight operations are in violation of Surface Transportation Board (STB) requirements. Negotiations are tentatively set for March 13 and 14, 2019. Representative Cartwright (D-PA-17) has expressed interest in a meeting with the Steamtown Acting Superintendent and NPS staff after the negotiations take place. (Updated 02/27/2019)

On April 2, Cape Hatteras National Seashore, in coordination with Pea Island National Wildlife Refuge, will host and participate in a large grand reopening and possible renaming event for the new 3-mile long Bonner Bridge that spans the Oregon Inlet. The Governor of North Carolina, other elected officials, and the Superintendent may speak at the event, which is expected to be open to the press. (Updated 03/06/2019)

(**Close Hold**) On April 3, National Mall and Memorial Parks, in partnership with the Trust for the National Mall and the National Trust for Historic Preservation, will announce at a press conference a new partnership to build public awareness of the challenges facing the iconic Tidal Basin on the National Mall. With funding from a supporting partner, the Trust for the National Mall and the National Trust for Historic Preservation will engage diverse professionals in an *Ideas Lab* to develop strategies for a sustainable future for this important

landscape. The Ideas Lab and other public awareness activities will be conducted from 2019 to 2021, and will result in a report to the NPS. (03/06/2019)

On April 4, Chesapeake & Ohio Canal National Historical Park, in partnership with Georgetown Heritage, the park's non-profit partner in Georgetown, will hold a public meeting to share updated design concepts for the Georgetown Canal Plan. The Plan/Environmental Assessment is intended to revitalize and reactivate the one-mile section of the C&O Canal in Georgetown. The last public meeting was in November 2017. The public comment period is April 4 – May 11. (03/06/2019)

On April 13, a group is planning to reenact an event at Independence National Historical Park, pending permit approval. The event occurred in 1919 when Korean political, religious and community leaders marched to Independence Hall to bring awareness to the need for Korean independence. The reenactment will include a ceremony on Independence Mall with up to 1,000 people. Congressman Evans and the Mayor of Philadelphia will be in attendance. (02/13/2019)

By April 15, Gateway National Recreation Area (GATE) anticipates executing a General Agreement (GA) related to the Staten Island South Shore buried seawall project that crosses GATE property at Miller Field. Overall construction of the 5.3 mile project is expected to occur over the next 5 years. On February 15, the City, State and the Army Corps signed a Project Partnership Agreement that will keep the project funded and moving forward while the GA is developed. At issue has been the challenge of finding a legally acceptable means of assigning responsibility for the operation and maintenance of the completed project on National Park Service property to the City of New York. The GA will delineate the path forward for a Cooperative Management Agreement and also layout an alternative, more desirable path should Congress authorize GATE to issue an easement for the permanent management and operation of the project. (Updated 02/20/2019)

ASSISTANT SECRETARY FOR INDIAN AFFAIRS

Week Ahead Schedule of Meetings, Hearings, and Travel

In the Office:

Assistant Secretary Tara Sweeney

Principal Deputy Assistant Secretary John Tahsuda

Deputy Assistant Secretary Mark Cruz

Acting Bureau of Indian Affairs (BIA) Director Darryl LaCounte

BIE Director Tony Dearman

Chief of Staff Rich Myers

Immediate Announcements and Actions for the Next Week (March 17-23)

During the week of March 18, the BIA Deputy Bureau Director for Field Operations will be participating in Superintendent meetings in Pacific Region (at the Cabezon Hotel in Indio, California) and Northwest Region (at the Portland BIA office).

During the week of March 18, AS-IA plans to send a letter to the recognized leadership of the Cayuga Nation (i.e., the Halftown Council) to inform the Tribe that the Department cannot approve its trust acquisition application because the application includes geographic areas that have not been accessed to conduct necessary contaminant surveys. A rival leadership group is blocking access to the geographic areas.

During the week of March 18, AS-IA plans to publish a Federal Register notice to reopen the draft environmental impact statement (DEIS) comment period for the Little River Band of Ottawa Indians' request to acquire approximately 60 acres in trust in Muskegon County, Michigan. The original comment period expired during the partial government shutdown.

During the week of March 18, a "deemed approved" notice of the Tribal-State Class III Gaming Compact amendment between the Forest County Potawatomi Community and State of Wisconsin will publish in the Federal Register. The notice was deemed approved by law on January 7, 2019, during the partial government shutdown.

On March 18, the U.S. Department of Education Office of Special Education Programs (OSEP) staff will meet with BIE Director Dearman in Washington, DC.

March 20-21, BIA and Oklahoma University (OU) will kick off their Indian Child Welfare Training Academy—a certification program for social service professions. The Academy training sessions are part of BIA's strategic performance plan to develop BIA child welfare and child protection specialists' capabilities and fulfill recommendations from a March 2013 OIG Report and OMB review findings.

8-30 Day Outlook

Assistant Secretary for Indian Affairs

NEW ITEMS

The week of March 31, AS-IA representatives will participate in the 2019 Annual Self-Governance Conference in Traverse City, Michigan, and will host Department of the Interior sessions on April 3 and 4.

April 8-11, the Tribal-Interior Budget Council will be in Washington, DC, to develop and align regional and national priority ranking results for the 2021 budget.

April 22-23, AS-IA representatives will participate in the Self-Governance Advisory

Committee meeting in Washington, DC.

UPDATED ITEMS

On March 26, the AS-IA will give the keynote address at the Reservation Economic Summit (RES) Conference hosted by the National Center for American Indian Economic Development in Las Vegas, Nevada.

On April 10, the Senate Committee on Indian Affairs will hold a hearing on "Building in Indian Country" including the BIA loan guarantee program. The hearing was rescheduled from March 6.

ONGOING ITEMS

The Deputy Assistant Secretary - Management (DAS-M) continues to work with Office of Justice Services (OJS) to obtain an approved process from the Solicitor for the appointment of CFR court judges. It is necessary to get an approved process as soon as possible so the judges can be appointed as Federal employees by March 31, 2019, which is when the current contract the judges are working under expires.

The final rule adjusting civil penalty amounts to account for inflation in Indian Affairs regulations (25 CFR) is pending final approval for publication with the Office of the Secretary. The Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 requires annual adjustments by January 15 of each year.

The final rule exempting (under certain circumstances) State, local, and Tribal governments from the bonding, insurance, and security requirements for obtaining a right-of-way on Indian land is currently in surname.

Bureau of Indian Affairs

NEW ITEMS

During the week of March 18, the Deputy Bureau Director, Field Operations will be participating in Superintendent meetings in Pacific Region (hosted at the Cabezon Hotel in Indio, California) and Northwest Region at the Portland office.

Bureau of Indian Education

NEW ITEMS

U.S. Department of Education OSEP will visit three BIE-Funded schools in March and April 2019, including Rock Point Community School in Arizona on March 29; Chemawa Indian School in Oregon on April 9; and St. Francis Indian School in South Dakota on April 11, 2019.

On April 18, the Southwestern Indian Polytechnic Institute (SIPI) commencement speaker will be U.S. Representative Deb Halaand (D-NM).

UPDATED ITEMS

On March 25, PDAS Cruz and BIE Director Dearman will travel to Santa Rosa Ranch School on the Tohono O'odham Reservation in Arizona, to welcome students back to their school after their spring break to their new modular classrooms. They also plan to visit with students, staff, and Tribal leadership to provide support and address any concerns.

ONGOING ITEMS

Haskell Indian Nations University is cooperating with the City of Lawrence, Kansas effort to have the Haskell campus designated by the U.S. Park Service as a National Historic Site with a historical interpretive center built on the campus to tell the story of the off-reservation Indian Boarding Schools.

ASSISTANT SECRETARY INSULAR AND INTERNATIONAL AFFAIRS

Week Ahead Schedule of Meetings, Hearings, and Travel for the upcoming week, March 17 - March 23

TRAVEL

AS-IIA Domenech will be in the office all week except March 21-22 when he will be attending an in-town conference. (*Note: AS-IIA Domenech will be out on personal leave the week of March 25.)

OIA Director Pula will be out of the office in Chuuk, Federated States of Micronesia, and Majuro, Republic of the Marshall Islands.

INT Director Karen Senhadji will be out of the office March 21-22.

Sarah Jorgenson, Senior Advisor, will be in the office all week.

Oceans Program Coordinator Liza Johnson is out on maternity leave until March 29.

Immediate Announcements and Actions for the Next Week (March 17 - March 23)

902 Consultation Process: The formal 902 Consultation process continues in response to CNMI Governor Torres' request to the President. OIA is preparing for the second round in CNMI on Tuesday, April 2.

American Samoa Hospital Assessment: The 2019 Consolidated Appropriations Act report language (HR 116-9) contains a Congressional directive requiring OIA "to provide

information, within 90 days of enactment of this Act, to the Committee on the condition of the hospital; the estimated cost of building a new hospital; the estimated cost of completing all renovations necessary to modernize the hospital; and estimates of whether a renovated facility has sufficient capacity to meet American Samoa's needs." OIA is finalizing the scope of work for the project and preparing the interagency agreement with the U.S. Army Corps of Engineers to meet the Congressional directive and meet the tight deadline. The cost will be approximately $320,000.

Freely Associated States Joint Economic Management Meetings: OIA Director Nik Pula will chair mid-year bilateral meetings of the Joint Economic Management (JEM) Committees on March 19, 2019 in Chuuk State (Federated States of Micronesia) and on March 21, 2019 in Majuro (Republic of the Marshall Islands). The mid-year JEM meetings will focus on the FY 2020 budget proposals for the use of sector grant funding provided under the Compact of Free Association provided to both countries. Compact assistance is provided through a permanent appropriation from Fiscal Year 2004 through Fiscal Year 2023 whereafter U.S. financial assistance is currently scheduled to transition to trust funds for each nation that are currently in accumulation phases. The FSM and the RMI Governments are represented at a senior level by their respective Ministers of Foreign Affairs. The U.S. is also represented by the State Department and Health and Human Services.

Conference on Illegal Fishing in the Pacific: On March 21-22, 2019, the Annenberg Foundation Trust at Sunnylands and the Pew Charitable Trusts will host a conference on illegal fishing in the Pacific. The event will convene national security officials and civil society experts with the objective of identifying challenges facing partner nations in the Pacific and to develop a portfolio of actions that the U.S. government can undertake to address illicit fishing and related development challenges. The event will take place in Washington, DC, and AS-IIA Domenech and Senior Advisor Jorgenson will attend.

Marine Monument Reviews: The Department continues to work with the White House on proposing changes to Marine Monument proclamations to allow for commercial fishing. SOL is drafting the document.

London Protocol Meeting on Offshore Energy in Canada: BSEE will send a senior staff member, Ms. Julie Fleming, to participate in the U.S. delegation to the 42nd meeting of the Scientific Groups under the London Convention and 13th meeting of the Scientific Groups under the London Protocol. The meeting will be held in Vancouver, British Columbia, Canada from March 18-22. The U.S. delegation is comprised of a representative from the Environmental Protection Agency (lead), Department of State, Department of the Interior, and U.S. Army Corps of Engineers. The agenda includes a session for members to review the latest draft revised Specific Guidelines for Assessment of Platforms or Other Man-made Structures at Sea, with a view to its finalization and subsequent discussion and approval at the fall 2019 meeting of the governing bodies. The latest revision incorporates DOI's edits from late November 2018, plus suggested revisions submitted by other international members of the intersessional Correspondence Group. BSEE, BOEM, and SOL coordinated on the development of an initial draft U.S. position paper regarding this agenda item at the end of January. The document has been finalized and surnamed through the ASLM. Ms. Fleming

will participate in efforts to develop revisions to the Specific Guidelines for assessment of platforms and other man-made structures at sea. She will focus on preserving flexibility in addressing DOI/BSEE equities in decommissioning activities.

Planning for Cooperation under the Free Trade Agreements with Jordan and Oman: At the request of and funded by the U.S. State Department, DOI-ITAP Senior Project Managers will travel to Amman, Jordan and Muscat, Oman from March 9-20 to meet with U.S. Embassy personnel and government counterparts to initiate cooperation between the U.S. and each country on issues related to CITES implementation and training wildlife inspectors and law enforcement officers.

Wetland Monitoring in Indonesia: DOI-ITAP will send two technical experts to install several rod surface elevation table (RSET) units in strategically identified locations throughout Sebangau National Park in Central Kalimantan, March 10-26. These RSET units will be used to measure the ecological health in the surrounding wetlands, and serve as a model for similar research activities throughout protected tropical forests in Indonesia. In addition to the installation, FWS Refuge Manager Chris Lowie will be assessing the progress made on Sebangau's park interpretations infrastructure and advising on next steps. This program is funded by USAID under the Strengthening Indonesia's Protected Areas program.

Cambodia Environmental Law and Regulation: DOI-ITAP has been requested by Cambodia's Ministry of Environment to train a group of recently designated legal focal points on enforcement and development of environmental regulations, March 18-21. This effort is taking place under the Smart Infrastructure for the Mekong program and follows up on a previous legal capacity building assessment completed by staff from DOI's Office of the Solicitor and USEPA for the Ministry in May 2018, plus past assistance with development of a comprehensive environmental code currently going through the inter-ministerial review process. This work is funded by USAID.

8-30 Day Outlook (March 23-April 19)

NEW ITEMS

USVI and PR Hurricane Recovery: The Department's coordination efforts in Puerto Rico and the U.S. Virgin Islands continue on the Federal Emergency Management Agency (FEMA) Recovery team. In its role on the National Disaster Recovery Framework, the Office of Environmental Policy and Compliance leads the coordination efforts for natural and cultural resource recovery on behalf of the federal family. Now, after more than a year of working on disaster recovery within the Territories, the Department is transitioning to Inter-Agency Agreements with FEMA that allow for the reimbursement of travel costs for all staff and reimbursement of salary for term employees. The agreement for Puerto Rico also reflects the services being provided by our Inter-Agency partners, including the U.S Department of Agriculture, the National Oceanic and Atmospheric Administration, the National Endowment of the Arts, and the General Services Administration. The Department will continue to

provide staff to coordinate actions among the federal agencies to enhance the capacity and expertise within the territorial governments.

Conservation Law Enforcement Database Needs Assessment, Morocco: DOI-ITAP will send two Project Managers and two subject matter specialists, one from FWS, the other from BLM, to work with in-country counterparts to identify conservation law enforcement database development needs, from April 6-17. This activity is funded by the State Department.

Fisheries Environmental Law Enforcement Training, Philippines: DOI-ITAP will send a retired DOI/FWS Special Agent to the Philippines to provide an advanced training on environmental law enforcement to members of the Bureau of Fisheries and Aquatic Resources (BFAR), from April 8-12. This activity is funded by USAID/Philippines.

UPDATED ITEMS

UPDATE. Guam War Claims: OIA continues to work on an administrative or legislative solution to authorize the Treasury Department to issue checks from the account.

UPDATE. NSC Meeting on Compacts of Free Association: On Monday, March 25, the National Security Council is expected to hold a meeting on the Compacts of Free Association. DOI/OIA will lead part of the discussion. In addition, the Department of State is starting to circulate its Circular 175 (C-175) request, which will begin a formal process of looking into options of potential Compact funding extensions (the annual financial contribution portion of the Compact for the FSM and RMI expires in 2023 and 2024 for Palau). OIA has plans to meet with State Department to coordinate efforts prior to this meeting.

UPDATE. Winter Meeting of the Coral Reef Task Force (CRTF): The winter meeting of the Coral Reef Task Force (CRTF) will be held the first week of April (April 1-5). NOAA is the lead agency for the event, and OIA Director Pula will co-chair the all-day business meeting on Thursday, April 4. It is expected that there will be coordination calls on this event over the next few weeks.

UPDATE. Interagency Group on Insular Areas (IGIA): Discussion from the annual IGIA meeting (held on February 25) will be used to prioritize issues and to establish issue oriented workgroups from relevant federal agencies. In addition, workgroups will meet between March and August to develop policy recommendations that will be included in an annual report of the work of the IGIA that will be sent to the President in September.

ONGOING ITEMS

NO CHANGE. FAS Trust Fund Conference Call: At a date and time to be determined in April, OIA Director Pula will host quarterly meetings of the FSM and RMI Trust Fund Committees, both of which the Director chairs.

NO CHANGE. Coast Guard NAVAID: OIA received a request for funding (approximately $500,000) from the Coast Guard to assist in funding NAVAID marker (navigational markers)

improvements in Palau. The existing markers in the channels need to be renovated, relocated, and/or replaced to ensure that vessels can safely navigate. This project is on hold pending receipt of additional information from the State Department.

NO CHANGE. Paris Auction of Native American Objects: The Eve auction house has announced an auction on April 10 of pre-Columbian and American Indian Art. Over the past 5 years, this auction house has sold numerous objects considered sacred by Indian Tribes. If Tribes identify problematic items once the catalogue is released for this auction, and request federal government intervention, INT will coordinate with experts across DOI and the State Department to assist.

NO CHANGE. U.S. Government-Wide Comprehensive Report on Federal Grants to U.S. Insular Areas: OIA Policy Director, Basil Ottley, continues to work to finalize the database and will partake in a training this week.

NO CHANGE. POTUS Meeting with FAS Presidents: It has been indicated that a formal invitation will be sent to the Presidents of the Republic of the Marshall Islands, the Federated States of Micronesia, and Palau to meet with the President for a date this spring (likely May). This first ever meeting is important in U.S. efforts to engage in the President's Indo-Pacific strategy. There may be a delay pending the final outcome of the FSM Presidential vote.

NO CHANGE. Oversight of Contractor Gas Work in South Africa: At the request of and funded by the Department of State Energy Resources Bureau, a DOI-ITAP contract team will travel to Cape Town, South Africa during the week of March 25th to lead a workshop on drafting effective environmental and technical regulations for officials governing the natural gas sector in the Western Cape Province (WCG).

AWARENESS

OIA Recent and Upcoming Media: All press releases are posted on the OIA website and tweeted by @ASIIADomenech). Please see below for the most recent OIA media:
DOI Budget Roll Out, OIA Press - President Proposes $611 Million FY 2020 Budget for the U.S. Territories and the Freely Associated States (Monday 3/11)
Coral Reef Natural Resources Grant Announcement - Deadline for Applications May 15, 2019 (Tuesday 3/12)
Interior Praises President for Signing Bipartisan Public Lands Bill Bringing Parity for U.S. Territories and States (Tuesday 3/12)
Executive Leadership Development Program for Island Public Officials Concludes Third Session in Yap, Federated States of Micronesia (Wednesday 3/13)
Interior Applauds Treasury's Rejection of EU Inclusion of U.S. Territories on List of High-Risk Jurisdictions (Wednesday 3/13)
Prior Service Trust Fund Grant Funding (Thursday 3/14)
Palau Initiative Training Program (Friday, 3/15)

UPDATE. FSM Elections Results: Vice President Yosiwo George won his election in Kosrae (by 10 votes) and will be back in Congress. FSM President Peter Christian lost his

election in Pohnpei to David Panuelo (by 59 votes) - numbers show that he won in his district, but lost to Panuelo in other districts and overall lost across all seats. The FSM Congress members will make a choice (by secret ballot) as to who will be the next President and Vice President. There is speculation that the next President will be Wesley Simina of Chuuk, who is the current Speaker of Congress. There is also the chance that FSM Vice President Yosiwo George may be the next President as the State of Kosrae has not yet had its chance to hold the Presidency since the FSM became a country in 1986. Though not written in law, there is a "gentlemen's agreement" that the Presidency will rotate among the four states. As determined by population size, the State of Chuuk holds 6 seats in the FSM Congress, thus 6 votes, Pohnpei 4, Kosrae 2 and Yap 2. Inauguration is typically in May.

Association of State and Territorial Health Officials: Insular Area Health Officers will be in Washington, D.C. for meetings on the Hill this week and with federal officials to exchange information on policy challenges and solutions unique to their respective island jurisdictions. They are sponsored by the Association of State and Territorial Health Officials, a body charged with making recommendations on policy actions and recommendations unique to the insular areas for consideration by Congress and legislative action.

Puerto Rico CODEL: On March 15-18, House Natural Resources Chairman Grijalva (D-AZ) will lead a Congressional Delegation (CODEL) trip to Puerto Rico with Reps. Bishop, Sablan, Velazquez, Soto, and Gonzalez-Colon. The purpose of the CODEL is to review ongoing recovery efforts in the territory following Hurricane Maria, meet with FEMA, and meet with the Financial Oversight and Management Board.

DOC Funding for USVI Airports: The Department of Commerce is awarding $27 million in grants to the U.S. Virgin Islands to help expand and renovate two airports damaged by Hurricanes Irma and Maria. $20 million will be used to build a parking and transportation center at the Cyril E. King Airport in St. Thomas. Another $7 million will help renovate and expand the Henry E. Rohlsen Airport in St. Croix. The projects are expected to create up to 158 jobs and generate an estimated $6.1 million in private investment.

U.S. Territories Removed from European Commission Blacklist: The U.S. Virgin Islands and other U.S. territories are no longer on a list of 23 high-risk jurisdictions the European Commission claimed were "posing significant threats" to the European Union's financial system, including threats of terrorism. The Department of Treasury had previously told American banks to ignore the list, calling into question the EU's methodology for developing the list.

<u>Upcoming International Travel</u>:

OIA Director Nik Pula: Chuuk State, FSM and Majuro, RMI. March 17-24.

From April 7-12, 2019 twelve USGS employees will attend the European Geosciences Union General Assembly in Vienna, Austria as invited speakers, session chairs and/or presenters.

Additional known international travel departing March 17-23:

03/17/19	Jamaica	Monitor marine conservation grant	Amanda Gonzalez	FWS
03/17/19	Switzerland	Earth observation data exchange	Virginia Burkett	USGS
03/17/19	UK	Wildlife crime collaboration	Stephanie Romanach	USGS
03/18/19	Australia	Satellite technology coordination	Cody Anderson	USGS
03/19/19	Chile	Translational ecology fieldwork	Toni Morelli	USGS
03/20/19	Tanzania	CITES technical exchange	Ennis Brandon	FWS
03/20/19	Costa Rica	Groundwater mapping field work	Saud Amer	USGS
03/20/19	Japan	Earthquake technical collaboration	Elizabeth Cochran	USGS
03/20/19	Japan	Earthquake technical collaboration	Sarah Minson	USGS
03/21/19	Costa Rica	Volcano monitoring field work	Maurizio Battaglia	USGS
03/22/19	S. Africa	Earth sciences collaboration	Jeff Doebrich	USGS
03/23/19	Netherlands	Freshwater modeling exchange	Christian Langevin	USGS
03/23/19	Netherlands	Freshwater modeling exchange	Joseph Hughes	USGS

ASSISTANT SECRETARY FOR LAND AND MINERALS MANAGEMENT

Week Ahead Schedule of Meetings, Hearings, and Travel

Assistant Secretary for Land and Minerals Management Joe Balash will be in the office.

Principal Deputy Assistant Secretary Casey Hammond will be in the office.

Deputy Assistant Secretary Gary Lawkowski will be in the office.

Director Angelle will be in the office.

Exempt Federal Register Notices (First Week Notice)

Oil and Gas Proposed Class II Reinstatement Notices:
Notice of Proposed Class II Reinstatement of Terminated Oil and Gas Lease UTU87659, Utah
Notice of Proposed Reinstatement of Terminated Oil and Gas Lease WYW173785, Wyoming
Notice of Proposed Reinstatement of Terminated Oil and Gas Lease WYW185474, Wyoming

Immediate Announcements and Actions for the Next Week

Bureau of Land Management

By March 20. BLM-WY plans to issue a Record of Decision for Lost Creek uranium expansion project Environmental Impact Statement (EIS). The EIS analyzes Lost Creek ISR, LLC's proposal to expand its existing uranium mine in Sweetwater County, Wyo., continuing employment and expanding production at the mine. (2/5/19)

By March 20. BLM anticipates submitting an Instruction Memorandum on implementing Federal Land Policy and Management Act Section 512 for power line Rights of Way (ROWs), as well as Secretarial Order 3372 Reducing Wildfire Risks on Department of the Interior Land Through Active Management. The policy will outline agency requirements for managing authorized activities on public lands for vegetation management, facility inspection, and operation and maintenance of power line ROWs. (2/12/19) DTS 17100

March 18. BLM-ID. The Shoshone Field Office anticipates publishing a Notice of Realty Action (NORA) in the Federal Register identifying 13.78 acres of public land as suitable for conveyance to Lincoln County under the Recreation and Public Purposes Act. Lincoln County proposes to use the land for operating and maintaining a municipal solid waste transfer station. BLM-ID is preparing to submit a request to brief the BLM Director's office on this project. The NORA package is currently under review in the Washington Office. (8/28/18)

March 18. BLM-NV. Rep. Mark Amodei (R-NV-2) will host a meeting with the BLM in Reno to continue exploring alternatives and accommodations for grazing permittees affected by the Fallon Range Training Complex Modernization. The proposed modernization includes renewal of the Navy's current public land withdrawal; land range expansion through additional withdrawal of public lands and acquisition of non-federal land; airspace expansion and modifications; and upgrades to range infrastructure. A consideration he would like to discuss further is the opening of vacant allotments, or amending existing allotments to allow the permittees to continue operations. BLM-NV State Director Jon Raby, Deputy State Director for Resources Raul Morales, Winnemucca and Carson City District staff, and U.S. Navy representatives will attend. (3/5/19)

By Late March. BLM-AK is preparing a Federal Register notice to revoke Public Land Order (PLO) 5179 issued in 1972 by DOI. The package will be submitted to the Washington Office for review. This order will affect 243,653 acres of BLM-managed land withdrawn near the Bering Glacier area of Alaska. The action will open those acres to surface entry, mining and mineral leasing, subject to valid existing rights. The PLO was issued pursuant to Sec. 17(d)(1) of the Alaska Native Claims Settlement Act. The East Alaska Resource Management Plan and Record of Decision, finalized in 2007, recommended partial revocation of these withdrawals. BLM-AK plans to hold a signing ceremony for ASLM to sign the PLO. (1/30/19) DTS Lands 186

Late March. BLM anticipates submitting the royalty rate reduction rule for non-energy minerals to OMB. The rulemaking package is currently with DOI for review, and BLM will address any comments before sending to OMB. (3/5/19)

Late March. BLM-AK will publish constructive notice of a decision approving 704.60 acres for conveyance to Emmonak Corporation, for the Native village of Emmonak, under the Alaska Native Claims Settlement Act (ANCSA). The surface lands will be conveyed to Emmonak Corporation and the subsurface estate will be conveyed to Calista Corporation, the regional corporation. Conveyance of the lands will fulfill Emmonak's entitlements under

Secs. 12(a) and 12(b) of ANCSA. The Federal Register package is currently in review at the Alaska State Office. (3/12/19)

Late March. BLM-CO. The Little Snake Field Office expects to sign the Decision Record on the Environmental Assessment for Peabody Twentymile Coal LLC's Coal Lease-by-Application (LBA). Peabody proposes expanding its Twentymile Coal Foidel Creek Mine near Hayden in Routt County by 640 acres. If approved, the lands in the LBA would be mined by underground methods with no surface disturbance. The tract is private surface overlying federal coal. Peabody estimates it could recover 4.7 million tons of coal from this lease, generating approximately $13 million in royalties, half of which would go to the State of Colorado. Peabody's current employment of 366 mine workers would remain the same. (5/29/18)

Late March. BLM-CO. The Army National Guard completed two Records of Decision (RODs) for the Craig National Guard Training Site Munitions Response Area and the Delta National Guard Complex to remediate munition sites on BLM-managed land in the Northwest and Southwest districts. Per DOI policy, review from BLM management and signature from the Assistant Secretary for Policy, Management and Budget are required to provide the Army National Guard access to BLM lands. BLM-CO will have briefing materials prepared for the ROD and surname process by late March. (2/12/19)

Late March. BLM-ID is aiming to finalize the Environmental Assessment (EA) for the Owyhee Land Exchange. The exchange between BLM and the Idaho Department of Lands (IDL) was developed to acquire State inholdings in Idaho wilderness areas designated by the Omnibus Public Land Management Act of 2009. BLM will convey 31,030 acres of federal land to the IDL in exchange for 23,878 acres of State land. Staff are working to complete State Historic Preservation Office consultation, and the preliminary EA has been sent to the Solicitor's Office for review. (12/18/18)

Late March. BLM-NV. The Bristlecone Field Office will issue final decisions for the Wilson Creek Allotment Grazing Term Permit Renewals. The decisions include various range improvements and additional flexibility for grazing operations. The 1.1-million-acre common allotment has nine grazing permittees. There is conflict between the permittees and controversy due to the various resources impacted including wild horses and sage grouse. (3/12/19)

Late March. BLM-NV. The Department of Energy, Office of Legacy Management, has applied to the BLM for withdrawal of approximately 361 acres of public land surrounding part of its Central Nevada Test Area. The Battle Mountain District is working on a Public Land Order to be published in the Federal Register for public review and comment. This includes an Environmental Assessment (EA) that has been prepared to analyze the potential impacts of withdrawing this acreage. BLM-NV anticipates that it will send the EA and Public Land Order package to the Washington Office for review in late March. (3/5/19) DTS 2474

Late March. BLM-NV. The Southern Nevada District plans to complete the briefings for the Draft Environmental Impact Statement for the Gemini Solar Project. The proposed project –

on the FAST-41 Dashboard and a priority project for Nevada – would consist of the construction, operation, maintenance, and eventual decommissioning of a photovoltaic solar field and ancillary facilities (to include battery storage) on approximately 7,100 acres. Proposed energy production is 690 megawatts. (3/5/19)

Late March. BLM-NV plans to brief the BLM Director's Office on the Hycroft Phase 2 Mine Expansion and Draft Environmental Impact Statement (EIS) Notice of Availability the week of March 18, and the DOI Review Team in late March. BLM-NV anticipates releasing the Draft Hycroft Mine EIS in late March. The U.S. Fish and Wildlife Service will issue a decision on an eagle incidental take permit based on analysis in the EIS. (12/7/18)

Late March - June. BLM-MT/DK. The North Central Montana District plans to conduct three prescribed fires, weather and fuel conditions permitting: the 7,300-acre Crooked Creek Unit "K" prescribed fire (which includes 2,180 acres on the Charles M. Russell National Wildlife Refuge, in partnership with the U.S. Fish & Wildlife Service); the 50-acre North Moccasin prescribed fire; and the 400-acre Woods Bottom Prescribed Fire, which is in the Upper Missouri Breaks National Monument. (3/5/19)

March 21. BLM-NM. Senator Tom Udall (D-NM) is planning an event in the Organ Mountains-Desert Peaks National Monument to celebrate the recent public lands package. His office has inquired as to whether a Special Recreation Permit is needed. The Las Cruces District Office is working on the request. (3/12/19)

By March 22. BLM plans to issue an Instruction Memorandum (IM) to help field staff comply with Section 106 of the National Historic Preservation Act regarding oil and gas activities producing federal minerals on non-federal/private land. The IM supplements Permanent IM 2018-014 on directional drilling from well pads on non-federal locations, also known as fee-fee-fed wells. This guidance will help ensure that BLM activities are appropriately limited. Interest has been expressed by Rep. Liz Cheney's (R-WY) office, as well as the Petroleum Association of Wyoming. The IM is currently under review in ASLM. (2/12/19)

By March 22. BLM-MT/DK. The Department of Veterans Affairs and the National Cemetery Administration are awaiting acknowledgement from the Secretary of the Interior that will establish the official date of administrative transfer and allow updating of the federal land records of 181.32 acres of BLM land near Sturgis, S.D., for cemetery purposes in accordance with the Black Hills National Cemetery Boundary Expansion Act. A letter is circulating for the Acting Interior Secretary's signature. (1/29/19) DTS 16960

By March 22. BLM-MT/DK is awaiting DOI approval to publish an in lieu classification notice in the Federal Register to finalize the State of Montana In Lieu effort, which would convey final selected lands totaling 5,816.63 acres to fulfill the long-standing entitlement made by Congress when Montana became a State in 1889. BLM has coordinated closely with the Montana Department of Natural Resources and Conservation. The State of Montana Land Board accepted the lands on Sep. 17, 2018, contingent on publication of the notice and final classification. There has been little controversy associated with this effort. Delayed

publication has generated inquiries and concern from grazing permittees. (11/23/18) DTS 2211

March 22. BLM-AZ. The Phoenix District plans to publish in the Federal Register a Notice of Availability for the Final Environmental Impact Statement on the proposed Sonoran Valley Parkway Project (SVPP) by the City of Goodyear in Maricopa County. The SVPP will help expand transportation infrastructure to support economic development and emergency services in the Southwest Phoenix exurbs. (3/12/19)

March 22. BLM-CA will brief the Departmental Review Team on the Draft Supplemental Environmental Impact Statement (EIS) and Notice of Availability for the Haiwee Geothermal Leasing Project. The Draft Supplemental EIS analyzes proposed leasing of BLM-managed lands for geothermal exploration, development, and utilization in the Haiwee Geothermal Leasing Area in Inyo County. The Draft Supplemental EIS assumes two 30-megawatt plants operating for 30 years each, and creation of 250 temporary and 65 permanent jobs. The BLM has received three pending geothermal lease applications for public lands within the proposed leasing area. (2/22/19)

March 22. BLM-NV. The Humboldt River Field Office anticipates releasing the draft Lone Willow and Santa Rosa Travel Management Plan and Environmental Assessment. Humboldt County has expressed concern about impacts they assume would result from the project such as access restrictions to private land, range improvements, mines, and other activities. Release of the draft documents may reduce concerns. (3/12/19)

March 23. BLM-NV. U.S. Citizenship and Immigration Services will hold a Naturalization Ceremony at the Red Rock Canyon National Conservation Area Visitor Center. The event has been held there annually for the past six years. More than 70 new citizens were sworn in at the 2018 ceremony. (3/12/19)

Bureau of Ocean Energy Management

On March 1, 2019, BOEM finalized the Environmental Assessments (EAs) on the four pending Atlantic G&G 2-D seismic permit applications with both Coastal Zone Management Act (CZMA) concurrence and Incidental Harassment Authorizations (IHA) approval. On March 7, 2019, Solicitor gave final approval to the additional documentation requested that explains for the record the differences in impacts from the four permits. The permits are now under Solicitor review. The ION permit application has Department of Defense approval for the crew and vessel. The Spectrum, TGS and PGS permit application are awaiting crew and vessel approval. (11/30/18)

In March, BOEM expects to finalize an MOU with NOAA's National Marine Fisheries Service (NMFS) and the Responsible Offshore Development Alliance (RODA). The MOU is focused on working collaboratively on communications, and identifying research and monitoring needs specific to offshore wind development and fisheries. RODA is an alliance of fishing industry members from Maine to North Carolina, representing many fisheries and

gear types with an interest in offshore development activities. The draft MOU is with ASLM. (2/28/19, DTS #2658)

In March, BOEM expects to publish the Final Rule adjusting for inflation the level of maximum civil monetary penalties contained in the BOEM regulations. BOEM is submitting this Final Rule pursuant to the provisions of the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (FCPIA of 2015) and Office of Management and Budget (OMB) guidance (OMB Memorandum M-18-03). The Final Rule is currently with the Department for review. (2/4/19, DTS#2484)

Office of Surface Mining Reclamation and Enforcement

FY 2019 Abandoned Mine Land Mandatory Grants Distribution: The AML distribution package that includes a memo, distribution numbers and draft communication press release was submitted to ASLM the week of March 4, 2019, for approval. The distribution package was approved by ASLM on March 8, 2019.

Status of Revisions to the Policy on Reclamation Fees for Coal Mine Waste: In accordance with its identification in the October 24, 2017 Review of DOI Actions that Potentially Burden Domestic Energy, OSMRE has proposed revisions to its 1994 Policy on No Value Determinations. A work group is reviewing the proposal. The proposal encourages the remining and use of waste coal for domestic energy production and promotes the reclamation of abandoned coal waste sites that would otherwise be made at the expense of the AML Fund. The revision will also result in more effective management of No Value Determinations by establishing clear and consistent criteria for audit.

Request for Updated Abandoned Mine Land State Reclamation Plans - 884 Letters: On March 7, 2019, OSMRE issued 884 letters to the 5 certified States (Louisiana, Mississippi, Montana, Wyoming, Texas) with a response due no later May 7, 2019, (60 days) requesting revisions to their AML State Reclamation Plans.

Illinois' Diversion of Abandoned Mine Land (AML) Funds: OSMRE staff used the Illinois Comptroller website (illinoiscomptroller.gov) to verify that the $50M, plus some $658K in interest, were transferred back to the proper AMD set aside fund (fund #0257). (11/27/2018)

Scoping for Dry Fork Mine Mining Plan Modification EA (WY): OSMRE will delay publication of a notice of intent to prepare an Environmental Assessment (EA) in the *Gillette News Record* regarding its intent to initiate a 30 day comment period to ensure its decision to prepare an EA is adequately documented. Recent court decisions have found that OSMRE's NEPA documents have not adequately documented the decision not to prepare an EIS. The WR project team, HQ OSMRE PSD staff and HQ Solicitors are reviewing the Department manual 5.16, chapter 13, section 13.4 to ensure consistent and appropriate application of the applicable criteria identifying when an EIS is required. (2/28/19)

Scoping for King II Mine Dunn Ranch LBA and Mine Extension EA (CO): The BLM and OSMRE are co-lead agencies on preparation of the Environmental Assessment EA. This project has been identified as a BLM/OSMRE NEPA Coordination "Pilot Project" that will be used to support bureaus' respective leasing and federal mining plan decisions. On March 4, 2019, Wild Earth Guardians (WEG), et al. requested a 30-day extension of the scoping comment period. On March 5, OSMRE and BLM replied to WEG denying their request. The scoping comment period closed on March 11, 2019. Completion of the EA is expected in July of 2019.

Scoping for Caballo Mine West Lease Tract EA (WY): OSMRE is preparing an EA for the Caballo Mine West Lease Tract federal mining plan. OSMRE initiated a 30-day public scoping period on December 19, 2018 with the scoping period expected to close on January 18, 2019. Due to the government shutdown, OSMRE noticed a 15-day extension of the scoping period on February 7, 2019. The comment period closed on February 22, 2019. OSMRE is currently working with the consultant to review and consider comments during the drafting of the EA.

The Justice Companies' Kentucky Fuels' Bevins Branch Mine: On February 19, 2019, the Solicitor's Office filed a "Joint Status Report" and a "Request to Hold Case in Abeyance for 60 Days" with the Office of Hearings and Appeals to allow OSMRE and the Company time to complete a settlement agreement or give the Company time to finish all of the abatement measures required by the IHCO. During a March 1, 2019, meeting with OSMRE, the Office of the Solicitor, and principals of the Justice Companies, progress was made toward identifying the steps necessary to resolve the outstanding Bevins Branch IHCO. The principals of the Justice Companies committed to aggressively resolve the issues.

Justice Group of Companies: The Justice Group of Companies, consisting of eleven coal mining companies operating in the Appalachian Region, have been and continue to be engaged in serial non-compliance with the requirements of SMCRA (the "Act") and other federal and state laws in four states that they operate in within the Appalachian Region. The Justice Companies have: (1) violated the Act in VA, KY, and TN and failed to comply with the orders of the Secretary, (2) failed to pay civil penalties in VA, KY, and TN, and (3) failed to pay reclamation debt in VA, KY, and WV. The Act authorizes the Secretary to ask the Department of Justice to file lawsuits seeking ((1) injunctive relief against a corporate permittee and its agents for failing to comply with orders of the Secretary, (2) recovery of unpaid civil penalties, and (3) recovery of unpaid Abandoned Mine Land Reclamation Fees. OSMRE has provided documentation of the non-compliances, failures to pay penalties, and failures to pay reclamation debts to the Knoxville Solicitor's Office (the "SOL") for consideration of referral to DOJ. On February 12, 2019, a proposed referral package completed review by OSMRE (Acting Director, Field Office Directors, Financial Office, AVS Office, and the Regional Director), SOL DMR, and Deputy Solicitor EMR. The SOL is now moving to finalize the referral package; including updating the status of violations, penalties and fees due, and the package will be elevated to the Principal Deputy Solicitor for review and approval. On March 1, a meeting was held with the attorney for the Justice Companies, the AR-RD, Lexington Field Office and the Office of the Solicitor to discuss the status of the various violations of the Justice Companies. The message was delivered that the

Department is taking legal action to seek enforcement against all possible parties, on individual and corporate levels, for the various violations and debts owed. The attorney for the Justice Companies is prepared to advise his clients that they need to enter into a structured abatement plan outlining the various steps they will undertake and a timeframe for implementation. OSMRE has advised that it will not consider such a plan without meaningful enforcement measures associated with it. The Office of the Solicitor continues to perfect the referral package and expects review of same.

Tennessee Primacy: Communications with the State of TN have restarted following the passage of the OSMRE appropriations bill which included funds for regulatory program development for states such as TN, wishing to assume regulatory primacy.

River Hurricane Mine, Pike County, KY: The impoundment of water within the underground mine works of the River Hurricane Mine in Pike County, KY presents the potential for a blowout which would impact the safety of residents in the Grapevine, KY community as well as the surrounding environment including the waters of the U.S. Army Corp of Engineers' Fishtrap Lake. The Lexington Field Office, Office of the Solicitor, Applicant Violator System Office and AR's Technical Assistance Division took immediate action to assess and monitor the mine pool and engage relevant regulatory authorities, responsible parties and local emergency management officials to address the situation. United Coal Company and its successor companies have denied ongoing responsibility over the site. A current permittee, High Ridge Mining, LLC, with operations covering portions of the mine pool area, was issued an Imminent Danger Cessation Order by the KY Department of Natural Resources and ordered to begin dewatering and monitoring of the mine. While not accepting responsibility for the site, on January 6, 2019, High Ridge has re-established the blocked mine drain system and has begun to dewater the mine. As of January 10, 2019, the mine pool level dropped below the "Stand By Alert" stage to the "Intensified Monitoring and Reassessment of Stability" stage. On January 7, 2019, KYDNR issued two Notices of Non Compliance for Water Quality and another for Effluent Limits in the Grapevine Creek area (the non- permitted side of the mine). The abatement measures require the permittee to obtain permits with the Kentucky Division of Water (DOW) for the two identified areas. Also, KYDNR is in the process of determining if the off-site impacts (mineral deposits in the stream) that were observed at the site by OSMRE staff warrant an Imminent Harm Cessation Order due to environmental impacts. The permittee was notified of the site conditions, and attempted to make adjustments to their treatment system to address the problem. DOW issued violations to the company during their site visit on February 7, 2019. Staff from the Lexington Field Office continue to work with the KYDNR in monitoring the mine pool and seeking a permanent solution to the drainage issues at the site. With the recent influx of rain the emergency measures put in place to dewater the mine are having difficulty keeping up. The operator conducting the pumping at the site has filed an administrative appeal of the Kentucky violations. OSMRE staff will be assisting KYDNR, as necessary and appropriate, in defense of the violations.

Failure to Initiate Surface Coal Mining Operations (Republic Energy, Inc. /Marfork Coal Company): Under the Surface Mining Control and Reclamation Act (SMCRA) section 506(c), a coal mining permit terminates by operation of law when mining operations

have not commenced within three years and a valid extension has not been expressly granted. The West Virginia Department of Environmental Protection (WVDEP) issued a permit to Marfork Coal Co. (Marfork), under WVDEP's counterpart to SMCRA in 2008. In 2012, a citizen complaint was filed claiming that the permit issued to Marfork had terminated due to the company's failure to begin mining within three years of permit issuance, despite the fact that an extension was issued to Marfork by WVDEP after the three year deadline. OSMRE issued a ten day notice (TDN) to WVDEP. On August 20, 2013, OSMRE's Deputy Director reversed a Charleston Field Office (CFO) determination on the matter. Among other things, her decision found that: WVDEP did not act arbitrarily or capriciously when it found that Marfork's permit had not terminated by operation of law, but was instead subject to termination by WVDEP; and WVDEP acted within the scope of its discretion when it followed its 1993 policy allowing an extension after three years. On October 21, 2013, Coal River Mountain Watch (CRMW) filed a lawsuit in the U.S. District Court challenging the informal review decision as a de facto rulemaking and as contradicting the plain language of SMCRA and OSMRE's implementing regulations. At the same time, in a similar case in Alaska (*Castle Mountain Coal. v. Office of Surface Mining Reclamation and Enf't*.), a District Court held that SMCRA is unambiguous, in that a permit terminates by operation of law when mining operations have not commenced within three years and a valid extension has not been granted. The court alluded to the possibility that a permit could be extended even after it had terminated, provided the statutory grounds for an extension were met. In the *CRMW* case, following the Government's motion for vacatur and voluntary remand to consider its position in light of the *Castle Mountain* decision, the Acting Director issued a new informal review decision finding that WVDEP's "implicit extensions*", i.e.,* assumptions that a permit was extended based upon other action by the regulatory authority, were not acceptable. The Acting Director ultimately upheld WVDEP's actions finding that a permit could be extended after it had terminated, provided the statutory grounds for an extension had been met. The Acting Director also required the CFO to issue a new TDN with respect to subsequent extensions that were granted to Marfork, now operating as Republic Energy, Inc. (Republic), by WVDEP. On February 15, 2019, the CFO issued a decision upholding WVDEP's actions in retroactively granting extensions to Marfork/Republic based upon the criteria set forth in SMCRA.

Citizen's Complaint Filed: On January 11, 2019, the Trustees for Alaska filed a citizen complaint (with ten exhibits) alleging the surface coal mining operations of Usibelli Coal Mining, Inc. at Wishbone Hill, are being conducted without a valid permit in violation of the Alaska Surface Coal Mining Control and Reclamation Act. They also allege that the State of Alaska has failed to administer its program in compliance with federal requirements regarding the company's failure to initiate mining operations within three years of the permit issuance, as required by Federal law and the State's regulatory program. The Western Regional Director is preparing a response to the citizen complaint.

Section 7 Consultation: OSMRE sent the IMCC the final draft Biological Assessment (BA) and BA references, and the final draft MOU, as well as responses to the IMCC's comments on the earlier draft, following the Assistant Secretary's signing of the transmittal letter to the IMCC on October 16, 2018. The IMCC sent its comments on January 31, 2019. OSMRE, FWS and the Solicitors held a call on February to discuss the comments. The BA comments

are being reviewed and a plan and timeline for addressing them has been developed. In addition the overall schedule for completing the consultation has been updated. (10/18/2018)

Rosebud Mine (MT): The OSMRE Western Region jointly prepared an EIS with the Montana Department of Environmental Quality. The EIS will be used to support a recommendation on the mining plan for Area F of the Rosebud Mine. OSMRE obtained Departmental Clearance to publish the Notice of Availability (NOA) for the Final EIS in the *Federal Register*. The NOA was published in the *Federal Register* on Friday, November 30, 2018. OSMRE is awaiting written permit findings from the State of Montana, prior to finalizing the Record of Decision (ROD). We are assessing the implications of further delay in publishing the ROD.

Coyote Creek Mining (ND): BLM and OSMRE have identified a "pilot" project for the leasing and permitting actions reflected in the mine plan decision document, that will be used to begin the process of closer coordination and concurrent NEPA analyses. Lease application NDM 110277 was submitted by Coyote Creek Mining Company, LLC (CCMC) on December 13, 2017, and proposes a new lease to mine approximately six million tons of coal on 320 acres (two 160-acre tracts) in Mercer County, approximately 11 miles south of Beulah, North Dakota. The contractor has completed the draft EA which OSMRE and the cooperating agencies have reviewed. OSMRE and BLM reconciled their comments and submitted them to the contractor on March 1, 2019.

Arkansas Department of Environmental Quality (ADEQ) Reorganization: OSMRE sent ADEQ a letter on November 27, 2018, regarding the reorganization of the Mining Program. This was in response to structural changes being implemented at ADEQ. During the Government Shutdown OSMRE was informed by the ADEQ that House Bill 1215 has been introduced that would reduce direct reports to the Arkansas Governor from over 40 to just 15. This measure is expected to pass and will create a Department of Energy and Environment (DEE). The current ADEQ would become the Division of Environmental Quality within DEE. The ADEQ Mining Program is currently modifying an O&C rule package for the previous ADEQ reorganization and now proposes to add these new organizational changes before they submit it to OSMRE for review. It is expected that all changes will occur by July 1, 2019. OSMRE is working with the ADEQ Mining Program on these current and proposed program changes.

Notice of Adoption and Record of Decision for West Elk Mine (CO): OSMRE is proceeding with the adoption of the Forest Service's Supplemental Final Environmental Impact Statement (SFEIS) for Federal Coal Lease Modifications COC-1362 and COC-67232. The OSMRE Western Region briefed OSMRE Headquarters on February 13, 2019, and the DOI Clearance package requesting approval to publish was submitted on February 19, 2019. Clearance was granted on February 24, 2019. OSMRE will publish the Notice of Adoption and availability of their Record of Decision in the *Federal Register* on or around March 15, 2019.

Montana Magistrate's Findings and Recommendation, Spring Creek Mine (MT): On February 11, 2019, the Magistrate Judge (Magistrate) for the U.S. District Court for the

District of Montana Billings Division issued a recommendation deferring vacatur of OSMRE's 2016 Environmental Assessment (EA) and Finding of No Significant Impact prepared for the 2016 Spring Creek Mine mining plan decision. The Magistrate determined that the 2016 EA failed to (1) properly analyze the impacts of transporting coal, (2) properly analyze the non-greenhouse gas emissions during combustion, (3) justify its decision not to quantify the economic costs of GHG emission, and (4) follow its own internal guidelines when deciding not to prepare an Environmental Impact Statement (EIS). In its recommendation, the Magistrate is allowing OSMRE 240 days from the final order to correct the EA or seek leave from the court for a new deadline if OSMRE determines it needs to do an EIS. OSMRE has 14 days to object the Magistrate's recommendation before the District Court Judge issues her ruling. OSMRE expects the District Court Judge will concur with the Magistrate's recommendation and issue her ruling accordingly. OSMRE was granted an extension of time and is currently working with the Solicitor's Office to appeal the Magistrate's recommendation. Solicitor's Office is coordinating with DOJ on draft Objections which is due on March 14, 2019. (2/11/19)

Bureau of Safety and Environmental Enforcement

Well Control Rule (WCR) (AA39) - Revised Reg Text, Preamble, RIA and EA were submitted to Exec Sec and Exec Sec has provided to DOI Deputy Chief of Staff for review. OMB hosted an E.O. 12866 listening session on February 26, 2019, by and between industry and the federal government to provide an opportunity for the federal government to listen to industry concerns and to clarify comments submitted regarding this rulemaking. During this listening session, industry reiterated its view that BSEE should permit operators to seek approval of alternative drilling margins at the APD (Application for Permit to Drill) or the DWOP (Deepwater Operational Plan) stage. The current regulations only provide for this information to be received by BSEE at the APD stage. It should be noted that industry did not suggest the criteria by which the decision to approve alternative drilling margins would be made would be different at the DWOP versus the APD stage, but rather that they are seeking to create a path for an option to submit the same information under the same criteria at an earlier stage (the DWOP Conceptual Plan stage). Inasmuch as the criteria under which BSEE would make its decision would not be changed in creating this option, there is no impact to safety. Obviously, should conditions change between the DWOP and the APD stage, BSEE would need to retain the right to amend decisions made at the DWOP stage. BSEE provided a memo on February 28 to the ASLM summarizing the details of the listening session and the consequences of incorporating these suggestions. In conjunction with SOL and the Well Control Rule Revision team, BSEE authorized the team to commence the effort necessary to accomplish final rule status incorporating these suggestions. BSEE submitted updated RIA and Reg Text on March 13 with the changes referenced above to Exec Sec for DOI clearance and submittal to OMB.

Risk Based Inspection – BSEE Office of Safety Management (OSM) concluded the Performance Based Risk Inspection (PBRI) on Well Operation Hazards, and the OSM Staff is initiating follow-up evaluations and report documenting the inspection and findings will be completed by March 31. Additionally, OSM has concluded their evaluation on which deep-

water facility (Marco Polo) will be subject to the next Facility Based Risk Inspection (FBRI) in late March 2019. BSEE will be receiving documentation next week for the May FBRI at Walter's EW 834 A and developing the FBRI protocol shortly thereafter.

8-30 Day Outlook

Bureau of Land Management

NEW ITEMS

March 29. BLM-ES expects to issue a patent transferring by quiet title deed, a former railroad right-of-way (ROW) to the Village of Forsyth in Macon County, Ill. The Village of Forsyth requested the ROW transfer for use as a recreational trail, under authority of the National Trails System Act. The ROW is 200 feet wide and totals approximately 18 acres. This action has been reviewed by the Pittsburgh Field Solicitor's Office and the Washington Solicitor's Office. The transfer is supported by Rep. Rodney Davis (R-IL-13). (3/12/19)

March 29. BLM-WY will sign the Decision Record on the Big Dry Creek Sodium Lease Sale Environmental Assessment (EA) for the competitive sale of three parcels totaling 5094.72 acres in the Kemmerer Field Office, approximately 15 miles southwest of Green River, Wyo. The EA will be made publicly available on ePlanning and the public sale notice will appear in local newspapers on April 3, 10, and 17 in accordance with regulations. (3/12/19)

April 2. BLM-ES plans to approve a Decision Record authorizing a competitive coal lease sale for seven federal tracts encompassing 432.44 acres within the Wayne National Forest, in Perry and Morgan counties, Ohio. The federal tracts contain an estimated 1.6 million tons of sub-surface mineable coal resources. BLM-ES is offering these federal coal resources in response to a coal lease by application (LBA) filed by Westmoreland Coal Company (formerly Buckingham Coal Company), which operates an adjacent, privately-owned underground coal mine called the Burr Oak No. 6. The target sale date is July 1, 2019. (3/12/19)

April 3-8. BLM-AK. The Eastern Interior Field Office will host four open house public meetings in early April to seek input on travel and transportation in the White Mountains National Recreation Area and Steese National Conservation Area. The Records of Decision for Eastern Interior resource management plans, approved in Dec. 2016, committed to completing a transportation and travel plan for the Steese and White Mountains planning areas within five years. Meetings are scheduled for Fairbanks, Anchorage, Central, and Fort Yukon. (3/12/19)

Mid-April. BLM-NV. The Mount Lewis Field Office anticipates releasing for public comment a Draft Environmental Assessment (EA) analyzing potential impacts of hauling water to wild horses on the Fish Creek Herd Management Area southwest of Eureka, Nev. The proposed action is needed to avert animal health emergencies until excess horses can be removed to a level that is consistent with the Appropriate Management Level and/or the

ability of the natural water sources to provide for the needs of the wild horse populations. The Field Office expects to have the Draft EA out for public comment in mid-April. (3/12/19)

UPDATED ITEMS

March 25. BLM-UT plans to publish a Notice of Exchange Proposal for the Utah Test and Training Range (UTTR) Land Exchange in local newspapers for four weeks. The FY17 National Defense Authorization Act directed a land exchange between the BLM and State of Utah's School and Institutional Trust Lands Administration. The Federal lands (95,737.13 acres) and State lands (83,609.38 acres) are located throughout western Utah. The purpose of the exchange is to: 1) remove State ownership of lands where development would be incompatible with the critical national defense uses of the UTTR and Dugway Proving Ground; 2) consolidate land ownership for both the State of Utah and the United States; 3) place valuable conservation and recreation lands and mineral interests into public ownership, including lands within and contiguous to the Cedar Mountain Wilderness; and 4) place lands with a high development potential into State ownership for the benefit of Utah public schools. (2/19/19) DTS L18

March 27. BLM-AZ. The Hassayampa Field Office and Maricopa County Parks will issue a joint press release announcing a new lease of approximately 1,046 acres of public lands near Wickenburg, Ariz., to Maricopa County, under the Recreation and Public Purposes Act. An Environmental Assessment analyzing potential environmental impacts of the lease, which allows the construction of recreation facilities, including picnic and campground facilities, restrooms, trails, a nature center, and an amphitheater was signed Jan. 31, 2019. The lease will support the County's efforts to expand recreation access to residents of the fastest growing county in the U.S. (1/30/19)

March 29. BLM-AZ. The Gila District Manager plans to participate in a Review Team briefing on the Final Supplemental Environmental Impact Statement (EIS) / Proposed Plan Amendments for the Ray Land Exchange. This proposed land exchange has the potential to create hundreds of Arizona mining-related jobs as well as improve access to existing public lands for traditional uses such as hunting, fishing, and family recreation. The original Final EIS was deemed insufficient by the Ninth Circuit Court of Appeals as it failed to analyze the different environmental consequences of the proponent's likely mining operations, with or without the exchange and federal oversight. This Final Supplemental EIS provides the analysis lacking in the original Final EIS. BLM plans to release the Final Supplemental EIS /Proposed Plan Amendments in April 2019 and a Record of Decision in June 2019. (2/19/19)

March 29. BLM-ID anticipates having the Decision Record package on the Big Lost Land Exchange ready for Washington Office review. The owner of the Big Lost Ranch in the Mackay area is interested in acquiring some BLM lands that are adjacent to the ranch and difficult for both BLM and the ranch to manage. Approximately 208 acres of BLM-managed lands would be exchanged for 495 acres of private land. The private land was appraised at $19,000 more than the BLM land; however, the ranch owners will donate a portion of their land to equalize the values. No known controversies exist at this time. (7/27/18)

March 29 (pending). BLM-MT/DK. The U.S. Department of State (DoS), as lead agency, expects to publish a Notice of Availability for a Draft Supplemental Environmental Impact Statement (EIS) for the Keystone XL pipeline for public comment and review. The BLM is a cooperating agency and provided comments to DoS on the internal Draft Supplemental EIS. The document considers direct, indirect, and cumulative impacts related to changes in the project since 2014 and incorporates updated information and new studies, as well as the alignment shift of the route in Nebraska. (2/5/19)

March 29. BLM-NV. The news release on the Argenta Allotment Environmental Assessment (EA) will be distributed announcing the opening of a 30-day comment period. The EA is tied to the grazing permit renewal on the Argenta Allotment in the Battle Mountain District. (2/12/19)

March 29. BLM-NM plans to publish the Notice of Availability for the proposed Copper Flat Mine Final Environmental Impact Statement (EIS). The New Mexico Copper Corporation submitted a proposed mining plan of operations that would re-establish the Copper Flat Copper Mine, a poly-metallic mine and processing facility near Hillsboro, N.M., that would produce copper, gold, silver, and molybdenum. If approved, the project is expected to provide 170-270 jobs over the mine's 12-to-16-year life. (5/25/18)

March 29. BLM-OR/WA. The Lakeview District plans to sign the Coyote Colvin Grazing Permit Renewal Environmental Assessment (EA), allowing an Outcome Based Grazing Authorization. This EA involves six allotments, five of which are included in the Outcome Based Grazing program. The proposal is to expand the season of use and allow for more flexibility in pasture rotation. The number of AUMs (9,136) would remain the same. There is a cooperative relationship with the permittee and no controversy with NGOs at this time. (12/7/18)

Early April. BLM-CO. The Gunnison Field Office plans to publish a Notice of Availability (pending Washington Office and DOI approval) for the Draft Environmental Impact Statement (EIS) to assess domestic sheep permit renewals on nine livestock grazing allotments in Gunnison, Hinsdale, and Ouray counties totaling approximately 65,000 acres. BLM-CO briefed the DOI Review Team on the Draft EIS on March 8. The Draft EIS evaluates reducing contact between domestic sheep on BLM lands and wild sheep populations to minimize disease transmission. (4/10/18) DTS 2507

Early April. BLM-CO. The Gunnison Field Office plans to publish in the Federal Register (pending Washington Office approval) a Notice of Realty Action to convey 43.09 acres of public land to the Town of Lake City under the Recreation and Public Purposes Act. The land is about one mile south of Lake City. The Lake City Ski Hill community ski area would continue to operate under the conveyance. (4/24/18) DTS 2329

Early April. BLM-CO. The Royal Gorge Field Office plans to publish a Notice of Availability (pending Washington Office and DOI approval) for the Draft Environmental Impact Statement for the Eastern Colorado Resource Management Plan (RMP). BLM-CO

briefed the DOI Review Team on the Draft Environmental Impact Statement (EIS) on March 1. The Draft RMP includes decisions on approximately 658,200 acres of BLM-administered lands and 3.3 million acres of subsurface mineral estate across 37 counties. The Eastern Colorado RMP will replace the 1996 Royal Gorge RMP and 1986 Northeast RMP. (4/24/18) DTS 2484

Mid-April. BLM-CO. The Royal Gorge Field Office is preparing a Notice of Availability of its Environmental Assessment (EA) for New Elk Coal Company LLC's Lease-by-Application (LBA), which includes a Notice of Public Hearing for public comment on the EA, as well as to discuss fair market value and maximum economic recovery. The 15-day public scoping period for the LBA closed Feb. 26. The New Elk Coal Company, LLC applied for a lease of 1,279 acres of split-estate federal coal that holds approximately 11 million tons of coal in place located in Las Animas County, adjacent to their New Elk Coal Mine. The active mine is an underground room and pillar coal mine. The proposed lease is in a historical coal production area. The Field Office's target publication date in the Federal Register is mid-April (pending WO and DOI approval). (12/7/18)

Mid-April. BLM-NV anticipates publishing the Final Environmental Impact Statement (EIS) for the Barrick Deep South Mine Project in the Federal Register following Solicitor review. The project was briefed to the Executive Review Team and received approval to move forward with publication. BLM has prepared detailed responses to cooperating agency and interested public comments, which the Solicitor's Office is reviewing. Publication of the Final EIS will set the stage for BLM to prepare a Record of Decision in the second quarter of 2019. The proposed project proposes major changes to a complex of open pit and underground gold mining operations at the Cortez Gold Mines in Lander and Eureka County, approximately 24 miles south of Beowawe, Nev. (3/5/19)

April 19. BLM-OR/WA. The Lakeview District plans to sign the decision regarding a draft Environmental Assessment and Finding of No Significant Impact analyzing the potential effects of a wild horse gather and fertility control plan for the Beatys Butte Herd Management Area. A gather is expected to be scheduled in fall 2019. (12/7/18)

April 19. BLM-WY plans to publish the Notice of Availability and release the Draft Environmental Impact Statement (EIS) for the Moneta Divide oil and gas development project near Lysite, Wyo. BLM-WY briefed the Review Team on March 8; the team requested that the Draft EIS be delayed and updated following release of the Greater Sage-Grouse Resource Management Plan (RMP) revisions. No follow-up briefing was requested. The proposed project, from Aetheon and Burlington Resources, could recover up to 18 trillion cubic feet of natural gas and 254 million barrels of oil over its estimated 65-year life and support around 6,400 jobs during the 15-year development phase. The Draft EIS analyzes amendments to the Casper RMP, including potential impacts to approximately 1.2 million acres of Greater Sage-grouse Priority Habitat Management Areas. Once the Draft EIS is updated, following release of the Greater Sage-Grouse RMP revisions, the Federal Register notice would publish, beginning a 90-day public comment period. (2/5/19)

April-May. BLM-MT/DK. The Butte Field Office plans to conduct the second phase of the Iron Mask prescribed fire, covering 450 acres five miles northwest of Townsend, Mont. The project will utilize fire to reduce conifers that are expanding into shrub and grassland habit to promote biodiversity and improve wildlife habitat. (3/5/19)

ONGOING ITEMS

March 24. BLM-NM. The public comment period ends for the Oklahoma, Kansas and Texas (OKT) Draft Joint Environmental Impact Statement / Resource Management Plan and Bureau of Indian Affairs Integrated Resource Management Plan. On Nov. 9, 2018, the BLM Oklahoma Field Office, in coordination with the BIA Eastern Oklahoma Regional Office and Southern Plains Regional Office, released a revised land use management plan for administration of federal and Indian lands across Oklahoma, Kansas, and Texas. The amended draft plan addresses future land-use allocations; resource management actions; resource data and impact analysis; and laws, regulations, and policies applicable to BLM- and BIA-administered lands. (12/18/18)

By March 25. BLM-NM plans to publish a corrected Federal Register Notice (FRN) rescheduling a postponed public hearing originally scheduled for Jan. 7, 2019, for the Draft Environmental Assessment for a Lease by Application (LBA) in Haskell County, Okla. The LBA was delayed due to the partial government shutdown. Evans Coal Company submitted an LBA for federal coal reserves underlying 1,270.85 acres of privately owned surface lands. Evans estimates that the proposed lease area contains nearly 3.28 million tons of recoverable coal. This may be controversial because it is coal-related and the tract lies beneath a lake used for recreation by a private club. (8/17/18) DTS 2501

March 25. BLM-NV. The Ely District, Bristlecone Field Office begins a 15-day public comment period on a preliminary Environmental Assessment analyzing a Kinross Gold Corporation proposal to expand operations at the Bald Mountain Mine on private and public lands about 65 miles northwest of Ely, Nev. The comment period concludes April 9. (2/19/19)

March 25. BLM-UT. The Salt Lake Field Office will issue a decision for the Invasive Species Management Plan, which will manage invasive species through the use of new approved herbicides to treat weeds across the Field Office. The proposal also includes use of early-detection and rapid response; manual, mechanical, chemical and biological control; prescribed grazing and browsing; seeding, seedling planting, live staking, application of soil amendments, mulching, and prescribed fire. The project was developed in coordination with counties, the Utah Public Lands Policy Coordinating Office, U.S. Fish and Wildlife Service, and other affected parties. (12/17/18)

March 27. BLM-UT. The West Desert District is working with Solicitors and DOJ on a settlement motion in favor of the BLM, seeking approval of $5 million in reclamation, CERCLA, and other claims on Magnesium Corporation of America (MagCorp) through its bankruptcy proceedings. MagCorp was mining magnesium by collection and concentration of salt brines pumped from thousands of acres of public lands. These funds are needed to

rehabilitate public lands that MagCorp abandoned when it declared bankruptcy in 2001. Once an agreement is met, a public notice will be posted, initiating a public comment period. (7/27/18)

March 28. BLM-OR/WA. The Coos Bay District will issue decision records and sale notices for three upcoming timber sales: Sister Sweeden, Glide Path, and Slater 21. The District will offer the three sales at an oral auction on Apr. 26. Sister Sweeden includes 196 acres of commercial thinning in the late successional reserve land use allocation, and is expected to yield 4.9 million board feet. Glide Path is a regeneration harvest on 141 acres in the harvest land base land use allocation, and is expected to yield 4.9 million board feet of timber. Slater 21 includes a combination of thinning and regeneration harvest on 61 acres in the harvest land base. It is expected to yield 1.1 million board feet of timber. The District analyzed the Sister Sweeden sale as part of the West Fork Smith Environmental Assessment (EA). Both Glide Path and Slater 21 were analyzed in the Upper Rock Creek EA. These sales will contribute to the District's target of offering 30 million board feet of timber for sale in FY19. (2/26/19)

By March 29 (to be confirmed). BLM-CA. The U.S. Fish and Wildlife Service, in coordination with the BLM El Centro Field Office, anticipates issuing a Final Environmental Assessment (EA) and joint Decision Record for the Ocotillo Wind Energy Project on BLM-managed land in Imperial County. The EA analyzed an Eagle Take Permit application and an amendment to the right-of-way grant for the Ocotillo Wind Energy Facility, a 112-turbine project operated by Pattern Energy and authorized by the BLM in 2012. The BLM is a cooperating agency on the EA and the U.S. Fish and Wildlife Service is the lead federal agency for NEPA and Section 106 of the Historic Preservation Act. (2/26/19)

March 29. BLM-CA. The Ridgecrest Field Office plans to release for public comment the Crater Mine Exploration Environmental Assessment (EA). The EA evaluates a proposal to conduct exploratory drilling and bulk sampling to determine the extent of sulphur deposits. The area of interest is located within the Last Chance Canyon Range, Inyo County, which is within the Basin and Range National Conservation Lands and a BLM inholding surrounded by Death Valley National Park. This parcel is proposed to be transferred to Death Valley National Park under S. 47, the Natural Resources Management Act, which passed the Senate on Feb. 12 and the House on Feb. 26. The anticipated date for release for public comments for the EA is Mar. 29. (2/26/19)

March 29. BLM-ID. The Morley Nelson Snake River Birds of Prey National Conservation Area is preparing an EA for the Idaho Army National Guard's Master Plan No. 1, which would include improvements to three ranges; four ammo transfer and holding points; and 25 concrete tank turning pads. These projects are being analyzed in one EA. BLM is a co-lead on this project with the National Guard. The 30-day public comment period began Dec. 17. Due to the volume of comments, a final decision will be ready for release at the end of March. (7/20/18)

March 30. BLM-CO. The Grand Junction Field Office is preparing to commemorate the upcoming 10-year anniversary of the Dominguez-Escalante National Conservation Area. The

BLM is working with community partners to plan an event to celebrate the milestone. BLM staff will prepare materials and provide logistical support for the celebration and an invitation has been sent to Acting Secretary David Bernhardt. (2/5/19)

March 31. BLM-CO. The 30-day public comment period will close for the Kremmling Field Office's programmatic Environmental Assessment (EA) to streamline Special Recreation Permit (SRP) processing. This programmatic EA consolidates the authorization process for many commercial, competitive, and organized group events and recreational activities in the Field Office, rather than preparing an individual EA for each new SRP application or renewal. This proposal would expedite the SRP process and reduce the amount of time, burden and expense required for applicants, existing permittees and BLM staff. (2/12/19)

Early April. BLM-CO plans to finalize a settlement agreement for two oil and gas wells in trespass through a limited-fee railroad ROW north of Denver. SRC Energy, Inc. agreed to terms set by the Department of Justice and will pay $723,236 to the U.S. Treasury. (2/19/19)

Early April. BLM-CO. The Gunnison Field Office plans to publish a Notice of Realty Action in the Federal Register (pending Washington Office and DOI approval) on a proposal for a direct (non-competitive) sale of 0.21 acre of public land in Saguache County to Lucky 3, Inc. The sale will resolve an inadvertent, unauthorized occupancy on the public lands proposed for offer. The parcel is approximately 30 miles southeast of Gunnison. (2/26/19)

Early April. BLM-NV. The Southern Nevada District plans to complete briefings for the Draft Environmental Impact Statement for the Yellow Pine Solar Project. Yellow Pine Solar, LLC has submitted to BLM a Right-of-Way application proposing to construct, operate, maintain, and decommission up to a 500-megawatt photovoltaic solar generation power plant and ancillary facilities on approximately 3,000 acres of BLM-managed land in Clark County, Nev. Construction is proposed to commence in 2020. (3/5/19)

April 1. BLM-CO. The 30-day public comment period will close for the Uncompahgre Field Office and Grand Mesa, Uncompahgre, and Gunnison National Forest's Revised Preliminary Environmental Assessment of the Gunnison Energy LLC North Fork Mancos Master Development Plan. The project encompasses five federal oil and gas units and includes nearly 35,000 acres of National Forest and split-estate lands in the North Fork Valley 12 miles northeast of Paonia. Up to 35 wells are proposed on five well pads (three on National Forest and two on private land), which could produce up to 700 billion cubic feet of natural gas over 30 years. The proposal and oil and gas development in the North Fork Valley has generated controversy. (2/19/19)

April 1. BLM-UT. The Monticello Field Office will issue a news release on enhanced visitor services at the Edge of the Cedars Museum in Blanding, Utah. The BLM is partnering with the Museum, who will host a BLM employee to answer visitor questions about the area, including Bears Ears National Monument. This partnership focuses on shared stewardship goals, educating visitors about responsible recreation, particularly around sensitive cultural sites, and addressing increasing recreation demands in the region. Through this partnership, the BLM also plans to issue firewood permits, which extends the hours and locations for

local residents to obtain permits closer to popular wood cutting areas. This is a pilot project, and the BLM will determine later whether the service can be offered on a continuing basis. (10/23/18)

April 4 and 5. BLM-OR/WA. The Southeast Oregon Resource Advisory Council (RAC) will meet at the Vale District Office. Agenda items include the Vale District Southeast Oregon Resource Management Plan Amendment; the Lakeview Resource Management Plan Amendment; updates on rangeland and grazing, energy and minerals, recreation; and any other business that may reasonably come before the RAC. (2/6/19)

April 6. BLM-ID. The Bruneau Field Office anticipates issuing two proposed grazing decisions to renew grazing permits, restore riparian areas, and incorporate range improvements across 187,537 acres of BLM-administered lands in the Big Springs Allotment. Affected lands lie entirely within a Greater Sage-Grouse Priority Habitat Management Area and contain Wilderness Areas and Wild and Scenic River segments. There is no anticipated reduction in Animal Unit Months as a result of the forthcoming decisions. Three environmental groups (Wilderness Watch, Western Watersheds Project, and WildLands Defense) are expected to protest and appeal the decisions. (2/7/18)

April 6. BLM-UT. The Fillmore Field Office plans to issue a Decision Record for the Sawtooth Pipeline project in Millard County. The proposed project would connect the Sawtooth Salt Cavern Storage Facility to the UNEV pipeline and greatly increase the region's refined fuel storage capacity. Of the 2.8 miles of right-of-way corridor that would be issued with this grant, 2.48 miles is slated for transfer to the Utah School and Institutional Trust Lands Administration (SITLA) under the Utah Test and Training Range land exchange. SITLA supports BLM issuance of the right-of-way grant. The interconnection site and remaining 0.32 miles of right-of-way would remain under BLM management. The Draft Environmental Assessment was posted to ePlanning in Dec. 2018. No public comments were received on the proposal. (3/5/19)

April 8. BLM-CO. The Uncompahgre Field Office plans to announce a 30-day public comment period on an Environmental Assessment (EA) for a proposed Recreation and Public Purposes Act lease for approximately 44 acres of public land to Montrose County for an OHV staging area and skills course. These lands would eventually be conveyed to Montrose County. The staging area would serve as the starting point for OHV travel on the 160-mile RimRocker Trail, which starts in Montrose and connects to trails in Moab, Utah. The EA also considers a proposal from the Colorado Plateau Mountain Bike Association for 20 miles of new non-motorized single-track trails adjacent to the staging area and establish guidelines for special recreation permits on the new trails. The Field Office plans to conduct a public meeting on April 25 at the Montrose County Fairgrounds Event Center. (3/5/19)

April 9. The American Exploration and Mining Association has requested BLM's participation at a Summit Conference on Advancing Abandoned Mine Land Cleanup, With or Without Good Samaritan Legislation, being held in Reno, Nev. The meeting is sponsored by the Mining and Metallurgical Society of America; University of Nevada, Reno; Colorado School of Mines; and Trout Unlimited. The meeting is a follow-up to a conference held last

year in Golden, Colo. that BLM attended. Currently, BLM's Acting Division Chief for Environmental Quality and Protection plans to attend. (3/5/19)

April 10. BLM-ID. The Four Rivers Field Office is working to develop the Four Rivers Resource Management Plan (RMP). Publication of the Draft RMP will occur after approval from the DOI Review Team, with a target date of April 10 for publishing the Draft RMP in the Federal Register for public comment. The Field Office has submitted a request to brief the BLM Director's Office. (7/23/18)

April 11. BLM- MT/DK. The Butte Field Office plans to issue a Record of Decision for fuels treatment on 1,000 acres of BLM land within the Tenmile study area. The U.S. Fish and Wildlife Service has concurred with the Field Office's effects determination on the Tenmile–South Helena Project, which is a cooperative project between the Helena National Forest and the Butte Field Office. The project area includes all ownerships in 61,395 acres, of which 1,043 acres are administered by the Butte Field Office. The project is intended to maintain consistent quantity and quality of water within the Helena municipal watershed and improve conditions for public and firefighter safety across the landscape. (12/18/18)

April 12-13. BLM-WY. The High Desert District and Rock Springs Field Office will hold a wild horse and burro adoption at the Rock Springs Wild Horse Holding Facility. The BLM will offer approximately 60 horses for adoption at the event. Most of the offered horses were gathered from the Green Mountain and Stewart Creek areas in Sep. 2018. (3/5/19)

Oil and Gas Lease Sale Updates

BLM-CO. BLM-CO has scheduled its first two quarterly oil and gas lease sales in 2019, Mar. 28 and June 28. **The March oil and gas lease sale will offer six parcels totaling 1,091 acres.** 45 days out – Post Sale Notice and begin 10-day protest period (Feb. 12, 2019) – 30-day public review and comment period on NEPA documents began Nov. 16, 2018 and concluded Dec. 16, 2018; Two-week public scoping period began on Oct. 10, 2018 and ended on Oct. 16, 2018; Two days prior to sale – Send final sale parcel list to Energy Net for posting – Mar. 26, 2019; One day prior to sale – Decision Record and Signed FONSI – Mar. 27, 2019. **The June oil and gas lease sale will offer 12 parcels totaling 4,804 acres.** Two-week public scoping period began on Jan. 29, 2019 and closes on Feb. 12, 2019. Two-week public review and comment period on NEPA documents will begin on Mar. 12, 2019 and closes on Mar. 26, 2019. 45 days out – Post sale notice and begin 10-day protest period (May 14, 2019 – May 23, 2019). Two days prior to sale – Send final sale parcel list to Energy Net for posting – June 26, 2019; One day prior to sale – Decision Record and Signed FONSI – June 27, 2019. Sep. 2019 CO oil and gas lease sale – Mar. 1, 2019 was the cut-off for accepting Expressions of Interest.

BLM-ES. BLM-ES has scheduled a quarterly oil and gas lease sale June 20, 2019. Twenty-nine parcels totaling 1,899.165 acres will be offered. The Sale Notice will be posted March 13, 2019, initiating a 10-day protest period. A 30-day public review and comment period on NEPA documents began Dec. 11, 2018, and ended Feb. 1, 2019. The final NEPA document

was posted to the ePlanning website Feb. 15, 2019. The Sale Notice protest period will end Apr. 1, 2019.

BLM-MT/DK. BLM-MT/DK has scheduled its first two quarterly oil and gas lease sales in 2019, March 25-27 and July 30. **March 27, 2019 MT-DK Oil and Gas Lease Sale - 305 parcels totaling 166,999 acres.** Public Notification of Competitive Oil and Gas Lease Sale was posted and a news release issued on October 11, 2018. The 30-day public review and comment period of the environmental documents began on Nov. 21, 2018 and concluded Dec. 21, 2018. Sent final sale parcel list to Energy Net for posting on Jan. 31, 2019. The 30-day public protest period began Feb. 1, 2019 and ended Mar. 3, 2019. Decision Record and FONSI will be signed on March 19. **July 30, 2019 MT oil and gas lease sale - 35 parcels totaling 10,076 acres.** Public Notification of Competitive Oil and Gas Lease Sale was posted and a news release issued on January 30. The 30-day public review and comment period of the environmental documents begins on March 13, 2019, and concludes April 11, 2019. Send final sale parcel list to Energy Net for posting on June 11, 2019. The 30-day public protest period begins June 12, 2019, and concludes July 12, 2019. Decision Record and FONSI to be signed on July 26.

BLM-NM. BLM-NM has scheduled its first two quarterly oil and gas lease sales in 2019, March 28 and June 20. **March 28, 2019 NM oil and gas lease sale - 37 parcels totaling approximately 12,500 acres in NM & OK** – 45 days out - Public Notification of Competitive Oil and Gas Lease Sale - posted on website and press release; public scoping period - Began Oct. 5, 2018 and concluded Oct. 19, 2018; public protest period of the environmental documents - Began Feb. 11 and concluded Feb. 20, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting – Mar. 26, 2019; One day prior to sale – Decision Record and Signed FONSI – Mar. 27. **June 20, 2019 NM oil and gas lease sale - 56 parcels in NM, KS, & OK –** 45 days out - Public Notification of Competitive Oil and Gas Lease Sale - posting on website and press release; public scoping period - Began Jan. 30 and concluded Feb. 10; public review and comment period of the environmental documents - Begins Mar. 11 and concludes Mar. 22, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting - June 18, 2019; One day prior to sale – Decision Record and Signed FONSI – June 19.

BLM-NV. BLM-NV plans on conducting an oil and gas lease sale June 11, 2019. The sale will involve 172 parcels totaling 339,081 acres on the Battle Mountain (123 parcels, 264,076 acres) and Elko Districts (49 parcels, 75,005 acres). The sale notice will post April 12 and the protest due date is May 13. The NEPA comment period for the Battle Mountain District runs from Feb. 19 to Mar. 20. The NEPA comment period for the Elko District runs from Feb. 16 to Mar. 19.

BLM-UT. BLM-UT has scheduled their first two quarterly oil and gas lease sales in 2019, March 25-26 and June 10. **March 25-26, 2019 UT oil and gas lease sale - 156 parcels totaling 217,000 acres –** Public Notification of Competitive Oil and Gas Lease Sale will be posted on website and news release (TBD, NLT 45-days out). The 30-day public protest period (for the Greater Sage-Grouse areas) began Feb. 7, 2019 and ended Mar. 1, 2019. The 30-day public review and comment period of the environmental documents began on Nov.

15, 2018 and concluded Dec. 17, 2018. Final sale parcel list sent to Energy Net for posting on Feb. 11, 2019; Decision Record and signed FONSI on May 24. **June 10, 2019 UT oil and gas lease sale - 8 parcels totaling 11,557.73 BLM acres; 12 parcels 27,000 Forest Service acres –** Public Notification of Competitive Oil and Gas Lease Sale (45-days notice on April 25) will be posted on website and in a news release. The 15-day public review and comment period of the environmental documents begins Feb. 15 and concludes Mar. 4, 2019. The 10-day public protest period (no Greater Sage-Grouse areas) begins Apr. 25, 2019 and concludes May 6, 2019. Send final sale parcel list to Energy Net for posting on Apr. 26, 2019; Decision Record and signed FONSI on Aug. 9.

BLM-WY. BLM-WY has scheduled the first two quarterly oil and gas lease sales in 2019, March 19-20 and June 17. March 19-20, 2019 WY oil and gas lease sale - 140 parcels totaling 148,908 acres – Public Notification of Competitive Oil and Gas Lease Sale (Nov. 13, 2018) - posted on website and press release; 30-day public protest period - Began Jan. 30 and concludes March 1; Two days prior to sale - Send final sale parcel list to Energy Net for posting – Mar. 17, 2019; One day prior to sale – Decision Record and Signed FONSI – Mar. 18, 2019. June 2019 WY oil and gas lease sale – 160 parcels totaling 205,885 acres – Public comment period for EA ends Mar. 27.

Bureau of Ocean Energy Management

NEW ITEMS

In late March, BOEM expects to publish a Notice of Intent (NOI) to prepare an environmental assessment (EA) for leasing offshore the New York Bight. The NOI will be published concurrent with identification of the New York Bight WEAs. The NOI is with ASLM for surnaming. (3/8/19, DTS #2514)

On April 4, the House Interior Appropriations Subcommittee has scheduled a FY 2020 Budget Hearing for BLM, BOEM and BSEE. The Acting Director expects to testify. (3/8/19)

UPDATED ITEMS

The analytical and decision chapters for the Proposed 2020-2025 National OCS Oil & Gas Leasing Program are with ASLM for review. The *Federal Register* Notice is with ASLM and the transmittal letters are with BOEM for review. (9/7/18)

BOEM has prepared multiple Calls for Information and Nominations (Calls) for lease sales proposed for 2019 and 2020 in the 2019-2024 Draft Proposed Program. The Mid-Atlantic Call (DTS #2257), the South Atlantic Call (DTS #2258), the Southern California Call (DTS #2388), and the Chukchi Sea Call (DTS #2385) are currently being held pending direction on the National OCS Program. (9/21/18)

On March 5, BOEM provided the updated version of the proposed financial assurance rule to SOL for review. On March 5, BOEM also returned revisions to Regulatory Impact Analysis

(RIA) to SOL. Based on a change in policy direction, BOEM has revised the proposed rule and associated RIA. Currently, the estimated cost-savings of the rule are about $16 million annually. BOEM briefed OIRA on March 11. (8/27/18, DTS #2343)

In mid-March, BOEM's Marine Minerals Program expects to execute the negotiated agreement revisions for the Sandbridge Beach, VA lease. SOL has surnamed the lease package and BOEM is finalizing the package for signature by the BOEM Chief of the Office of Strategic Resources. (2/4/19, DTS#2630)

ONGOING ITEMS

On March 20, BOEM will hold Gulf of Mexico Oil and Gas Lease Sale 252. The Sale will be live-streamed from BOEM's New Orleans office. (3/1/19)

On March 29, BOEM expects to publish the Notice of Availability of the Area Identification covering the Gulf of Mexico GOM oil and gas lease sales in the 2020-2025 National Program (excluding the area currently under the GOMESA moratorium) is currently in surnaming with SOL. (2/22/19, DTS#2631)

In March, BOEM expects to submit the Final Rule updating its air quality regulations related to oil, gas, and sulfur operations on the OCS to OMB for interagency review. This Final Rule significantly decreases the regulatory burden on industry compared to the Proposed Rule, while still meeting BOEM's statutory responsibilities under the OCSLA. A narrative describing the reduction to costs as compared to the proposed rule (Reduction to Costs Narrative and the rule text are currently with the Department for review. (8/2/18, DTS #2280 (Rule), DTS #2454 (Reduction to Costs Narrative))

In March, BOEM expects to publish a Request for Competitive Interest for an area proposed to be used for a right-of-way (ROW) project called Atlantic Link. Clean Power Northeast Development, Inc. filed an application on May 31, 2017 (revised August 22, and September 26), for a ROW grant in support of a proposed project connecting onshore wind and hydro power in Canada to the Massachusetts market via a 350 mile HVDC submarine cable traversing the OCS. The notice is in surnaming with the Department. (DTS #1773)

In March, BOEM expects to publish a Request for Competitive Interest for an area proposed to be used for a right-of-way (ROW) project from Anbaric Development Partners (ADP). The application is for the New York and New Jersey Ocean Grid, an HVDC submarine system approximately 185NM (213 statute miles) in length with up to nine offshore AC to DC collector/converter platforms, which would collect and distribute power generated from existing offshore wind leases to up to six terrestrial landings at locations from Long Island, New York to Cardiff, New Jersey. The notice is in surnaming with the Department. (10/15/18, DTS #2208)

On April 8, BOEM will be hosting the inaugural meeting of the Global Offshore Wind Regulators Forum (GOWRF) in New York City. The meeting will coincide with the 2019 International Partnering Forum conference. This multilateral group of federal regulators will

discuss priority topics associated with planning and oversight of offshore wind energy development. Participants are expected to include lead government regulators representing both experienced and emerging offshore wind markets. The forum will present a unique opportunity for sharing lessons learned and discussing best practices. (2/8/19)

Bureau of Safety and Environmental Enforcement

Arctic Rule (AA01) –This is a joint BSEE BOEM rule and BSEE has been tasked as the lead agency by the ASLM for revisions to this rule. Although the scheduled tribal consultations were impacted by the drowning of a Native whaling captain and crewmember as well as the Alaskan earthquake, all have taken place. A meeting with the BSEE/ BOEM regulatory team took place on February 13 to discuss comments and path forward. A joint BSEE BOEM memo on the path forward has been drafted and was subject to ASLM/BSEE discussion on February 25. Additions were requested and a revised memo was delivered by the BSEE Director to the ASLM in a meeting on February 28. A revised, signed Arctic Rule memo complete with milestone timeline and team membership was delivered to the ASLM on March 11. The memo was executed by the ASLM on March 11. On March 13, BSEE, BOEM, and staff SOLs met to discuss coordination efforts to prepare a proposed rule package. Topics discussed include the roles and responsibilities of individuals within each bureau, and expectations under the rulemaking schedule. Before the end of this week (week of 3/11), the BSEE team will have prepared draft reg text, upon which the team will begin drafting the preamble, environmental assessment, information collection compliance statements, and initial regulatory analysis beginning next week.

London Convention

BSEE will send a senior staff member, Ms. Julie Fleming, to participate in the U.S. delegation to the 42nd meeting of the Scientific Groups under the London Convention and 13th meeting of the Scientific Groups under the London Protocol. The meeting will be held in Vancouver, British Columbia, Canada from March 18-22. The U.S. delegation is comprised of a representative from the Environmental Protection Agency (lead), Department of State, Department of the Interior, and U.S. Army Corps of Engineers. The agenda includes a session for members to review the latest draft revised Specific Guidelines for Assessment of Platforms or Other Man-made Structures at Sea, with a view to its finalization and subsequent discussion and approval at the fall 2019 meeting of the governing bodies. The latest revision incorporates DOI's edits from late November 2018, plus suggested revisions submitted by other international members of the intersessional Correspondence Group. BSEE, BOEM, and SOL coordinated on the development of an initial draft U.S. position paper regarding this agenda item at the end of January. The document has been finalized and surnamed through the ASLM. Ms. Fleming will participate in efforts to develop revisions to the Specific Guidelines for assessment of platforms and other man-made structures at sea. She will focus on preserving flexibility in addressing DOI/BSEE equities in decommissioning activities.

Office of Surface Mining Reclamation and Enforcement

Notice of Intent to File Suit: On or about September 7, 2018, the Secretary and the Acting Director received a Notice of Intent to File Suit over an alleged failure to perform a mandatory duty under the Surface Mining Control and Reclamation Act from the WildEarth Guardians (WEG). WEG alleges that the agency failed to "promptly promulgate regulations to limit toxic blasting emissions at coal mines after granting a petition for rulemaking." SMCRA allows OSMRE 60 days to respond to the NOI before an action can be filed. The Solicitor's Office advised OSMRE on its options in response to the NOI. OSMRE sent a response letter to WEG on November 6, 2018, indicating that OSMRE would publish its decision in the *Federal Register* within 90 days, on or before February 4, 2019. On January 31, 2019, OSMRE notified WEG that an extension of time would be needed due to the 35 day government shutdown. The Solicitors are working with the ASLM's office to resolve suggestions made on the draft notice.

Pollyanna #8 (OK): The FONSI was signed on February 11, 2019. The final MPDD was signed by the Regional Director on February 13, 2019. A hard copy and DTS copy were submitted for HQ routing on February 14, 2019. The Acting Director approved the MPDD on March 1, 2019, and it has been routed to the ASLM for review. This approval includes shadow area only for 520 acres of federally owned coal (1.7 million tons recoverable). (11/27/18)

Narley No. 3 (AL): OSMRE Mid-Continent Region began scoping for the Best Coal Narley No. 3 Mine in February 2019. The NOI was posted on the OSMRE Mid-Continent website on February 22, 2019. Public comments will be accepted through March 25, 2019. (1/30/19)

Notice for San Juan Mine Deep Lease Extension Final EIS ROD (NM): The DOI Clearance Briefing was held on March 1, 2019. OSMRE will now publish the announcement in the *Federal Register* on or around March 15, and OSMRE expects to issue its Record of Decision (ROD) on or around April 25, 2019. The Final EIS will inform OSMRE's recommendation to the Assistant Secretary for Land and Minerals Management on whether to approve the federal mining plan.

ASSISTANT SECRETARY FOR POLICY, MANAGEMENT AND BUDGET

Week Ahead Schedule of Meetings, Hearings, and Travel for the upcoming week

Susan Combs, Senior Advisor to the Secretary, exercising the authority of the Assistant Secretary for Policy, Management and Budget, will be out of the office on personal leave Monday through Friday.

Scott Cameron, Principal Deputy Assistant Secretary, will be in the office.

Immediate Actions and Announcements for the Next Week

Director - Office of Natural Resources Revenue (ONRR)

From March 19-21, the Office of Natural Resources Revenue (ONRR) will host the State and Tribal Royalty Audit Committee (STRAC) meeting in Denver, Colorado. Representatives from ONRR, States and Tribes, Bureau of Land Management, Interior Business Center, the Solicitors office, and the Office of Inspector General will attend. Agenda items include ONRR Updates, Royalty Policy Committee Updates, IT System Updates, Business Process Reengineering, and STRAC agreement updates. (03/13/2019)

Deputy Assistant Secretary - Public Safety, Resource Protection and Emergency Services (DAS PRE)

From March 20-21, the Office of Law Enforcement and Security (OLES) Acting Director will attend a joint Office of the Director of National Intelligence (ODNI)/FBI security conference at the Hoover Dam and the FBI Phoenix Field office. The conference is hosted by the Bureau of Reclamation (BOR) and focuses on coordination of sharing classified and sensitive intelligence information as it relates to threats against the Department's critical infrastructure and public lands in the western United States. (02/27/2019)

Deputy Assistant Secretary - Budget, Finance, Grants and Acquisition (DAS BFGA)

On March 18th, the remaining volumes of the President's Budget will be released publicly. DOI Greenbook volumes will be released the same day. (03/13/2019)

No later than March 29th, all remaining Bureaus' and Offices' FY 2019 spend plans are due to the Office of Budget. The Office of Budget continues to review the spend plan submissions. (03/13/2019)

DOI participated in a call with OMB on March 12th to address questions raised by OMB during the informal review of the DOI's Notice of Proposed Rule to establish the DOI Financial Assistance Interior Regulation (FAIR). The FAIR is DOI's regulatory supplement to the Uniform Guidance, and will consolidate DOI's financial assistance regulations and policies. Based on the meeting DOI is making minor changes to the rule and will send to the Federal Register the week of 3/18/2019. (03/13/2019)

The week of March 18, two additional GrantSolutions meetings are scheduled in order to resolve outstanding concerns as a result of the bureau Fit/Gap review. (03/13/2019)

8-30 Day Outlook

Susan Combs, Senior Advisor to the Secretary, exercising the authority of the Assistant Secretary for Policy, Management and Budget, will be attend the Western Caucus Foundation's Energy Policy Roundtable on Friday March 29th in Houston, Texas. Ms. Combs will participate as a speaker discussing the Department's role in helping to maintain America's energy independence. (03/13/2019)

From April 2-3, the RESTORE Council Steering Committee will meet in St. Petersburg, FL to discuss criteria to select proposals for the next Funded Priorities List in 2020, in accordance

with the RESTORE Act. The RESTORE Council Steering Committee is composed of Federal agency and Governor's representatives. (03/13/2019)

Deputy Assistant Secretary - Human Capital and Diversity

NEW ITEMS

During the week of March 25, the Office of Strategic Employee and Organizational Development and the Office of Human Capital will execute the first iteration of early adopters for the automated performance management portion within DOI Talent. The early adopters will include ~800 human resource employees that will test the system and learn the new process. This will enable the HR community to gain advance understanding of the new process and provide better support upon implementation more broadly. (03/13/2019)

Deputy Assistant Secretary – Public Safety, Resource Protection and Emergency Services (DAS PRE)

ONGOING ITEMS

From March 26-29, Office of Wildland Fire (OWF) Director will participate in a panel at the International Association of Fire Chiefs (IAFC) Wildland Urban Interface (WUI) Conference in Reno, NV. The conference provides a venue for inter-agency cooperation and discussion on emerging issues in wildland fire management. (03/06/2019)

From April 1-5, Office of Aviation Services (OAS) Director will be in Washington, DC to participate in planning meetings with DHS, DOD, NASA, and the FAA on a proposed demonstration of the Unmanned Traffic Management system in the National Capital Region later this year. (03/06/2019)

Deputy Assistant Secretary - Policy and Environmental Management (PEM)

NEW ITEMS

The Natural Resource Damage Assessment (NRDA) program is developing a task order to assist NRDA staff in documenting the business process and internal controls associated with the receipt, management and disbursement of NRDA Funds. PMB is on schedule to award the task order in early April. PPA continues to participate in a PMB effort to identify options for guidance, policy, and DM changes in support of NRDAR program restoration efforts. (03/15/2019)

UPDATED ITEMS

From April 3-4, the Office of Policy Analysis (PPA) and the U.S. Forest Service (USFS) are meeting with technical experts in Fort Collins, CO, to discuss the findings for potentially using social media data to supplement traditional methods for estimating recreation visits on public lands (such as in-person counts). PPA is assisting with drafting a report using data

collected during summer 2018 at four locations in northern New Mexico, with a follow-up stakeholders' workshop planned in summer or fall in D.C. for a more general audience. (03/13/2019)

PPA is working with IBC and PMB offices to review options and considerations for reducing IBC's services to external customers. PPA is evaluating four options for each of IBC's three lines of business. PPA is also developing recommendations for implementing the decision to reduce IBC's external customers. PPA will provide a draft report by April 1. (03/13/2019)

Deputy Assistant Secretary - Budget, Finance, Grants and Acquisition (DAS BFGA)

NEW ITEMS

GAO met with the Office of the Chief Information Officer in an entrance conference to discuss "Information Technology (IT) Supply Chain Cybersecurity" (Job Code 103187) in response to a request made by Chairman Johnson of the Senate Committee on Homeland Security and Governmental Affairs and Chairman Cummings of the House Committee on Oversight and Government Reform. The GAO will review:

(1) whether Federal agencies manage IT supply chain cyber risks in alignment with key practices

(2) how selected agencies have implemented information security controls to manage IT supply chain cyber risks

(3) any other aspects of cybersecurity management or planning in the IT procurement process. (03/13/2019)

The OIG initiated the new audit "The Bureau of Land Management's Compensatory Mitigation Program Fund" (2019-FIN-022) which will examine the BLM's internal review of the fund and independently determine whether appropriate supporting documentation and internal controls are in place. (03/13/2019)

UPDATED ITEMS

FY 2020 Budget Hearings. Three of the four budget hearings have been scheduled as shown below. The Office of Budget is coordinating with OCL to schedule the Senate Energy and Natural Resources hearing. (3/13/2019):

- March 26 - The House Interior Appropriations Subcommittee hearing
- March 27 - The House Natural Resources Committee hearing
- April 10 - The Senate Interior Appropriations Subcommittee hearing

The House Interior Appropriations Subcommittee has identified the following dates for Bureau specific budget hearings:

- April 3 - NPS, FWS, USGS – still confirming attendance.
- April 4 - BLM, BOEM, BSEE
- April 30 - BIA, BIE

ASSISTANT SECRETARY FOR WATER AND SCIENCE

Week Ahead Schedule of Meetings, Hearings, and Travel

Assistant Secretary Tim Petty will be in the DC office. On March 20, he will speak at the State Department's U.S. Global Water Strategy forum on World Water Day.

Principal Deputy Assistant Secretary Kiel Weaver will be in the DC office.

On March 18, Reclamation Commissioner Brenda Burman is scheduled to be out of the office. Commissioner Burman is scheduled to be in Washington, D.C. March 19 – 22.

During the week of March 18, USGS Director Reilly will be out of the office March 18, and in Reston, VA the remainder of the week.

During the week of March 18, Acting USGS Deputy Director Lodge will be in Reston, VA.

Immediate Announcements and Actions For the Next Week

Bureau of Reclamation

Between March 17 and March 23, Reclamation plans to issue a press release announcing a spring photography contest at New Melones Lake in California. The contest is open to amateur photographers and the deadline for submissions will be June 3. Local media coverage is not expected. (03/11/2019)

Between March 17 and March 23, Reclamation plans to issue a draft environmental assessment detailing the proposed plan to store Central Arizona Project (CAP) water leased from the Gila River Indian Community at select Arizona Department of Water Resources permitted Groundwater Savings Facilities (GSFs). The GSFs seek to use up to 25,000 acre-feet of water annually of the community's CAP water in lieu of pumping groundwater for their irrigation customers. The community seeks long-term storage credits. No significant press coverage is expected. (03/04/2019)

Between March 18 and March 26, Reclamation plans to issue a news release announcing the award of a construction contract for the Minidoka Switchyard Modernization Project at Minidoka Dam in southwestern Idaho. The contract award is approximately $2 million. The contract will replace high-voltage equipment that is worn beyond its intended service life. (03/11/19)

On March 18, Reclamation will publish a funding opportunity to solicit proposals from federally recognized Indian tribes for projects that help tribes manage, protect, and develop their water resources. It does not require a non-federal cost-share contribution. This is being coordinated through the Native American Affairs Technical Assistance Program. It will be open for a minimum of 60 days once published. (03/11/2019)

On March 18, Reclamation plans to issue a news release announcing the 15-day public comment period for the environmental assessment and finding of no significant impact for festivals and special events at East Park Reservoir, California. East Park Reservoir is owned by Reclamation and managed by Colusa County. The festivals and special events will conform to best management practices and will be subject to individual approval by the county and Reclamation. (03/11/2019)

On March 19, the Folsom Dam (California) Security and Law Enforcement Contract will be on the public agenda for the Sacramento County Board of Supervisors' meeting for approval to meet Reclamation's contract award date. Reclamation and the Sacramento County Sheriff's Department negotiated an agreement on January 24, 2019. Media attention is expected. (01/28/2019)

On March 20, Reclamation will attend the annual Pecos Stakeholder's Meeting in Fort Sumner, New Mexico, at the Bosque Redondo Visitor's Center. The meeting offers an opportunity for stakeholders such as Reclamation, irrigation districts, U.S. Fish and Wildlife Service and others to share information on projects and forecasts plans for the upcoming irrigation season. No press coverage is expected. (03/11/2019)

On March 20, Reclamation and the State of Utah will sign the Green River Block Water Exchange Contract. This contract will facilitate the development of the Green River Block portion of the state's Ultimate Phase water right. Releases from Flaming Gorge Dam (eastern Utah) could be altered to meet annual water demands under this exchange contract. (03/04/2019)

On March 20, Reclamation plans to attend the Lakehead Community Safety Meeting in Lakehead, California. Reclamation will provide a short update on the Shasta Dam and Reservoir Enlargement Project. Representatives from U.S. Forest Service, CalFire and the county will also provide updates on safety-related topics. Possible media interest. (02/25/2019)

Around March 22, Reclamation plans to issue a news release announcing a $1.65 million salinity grant to the Crawford Clipper Ditch Company, located in Crawford, Colorado. The grant will be used to replace approximately 34,204 feet of open earthen ditch and 1,525 feet of natural drainage ditch with buried pipeline. The purpose of the project is to prevent seepage and reduce salinity loading in the Colorado River Basin. (02/25/2019)

Around March 22, Reclamation plans to award a $6.5 million grant to the Utah Division of Wildlife Resources (UDWR) and a $5.6 million grant to the Larval Fish Laboratory at Colorado State University (CSU) to assist with the Upper Colorado River Endangered Fish Recovery Program. The grants will allow UDWR and CSU to continue assisting with implementation solutions to meet the water needs of growing western communities, while protecting endangered fish in the Colorado River Basin. No press releases will be issued. (02/25/2019)

On March 22, the Environmental Protection Agency plans to publish a notice in the *Federal Register* announcing Reclamation's release of the draft environmental impact statement for the B.F. Sisk Dam Safety of Dams Corrective Action Project, in coordination with California's Department of Water Resources. A public comment period of 45 days will begin upon publication in the *Federal Register.* Two public meetings will be scheduled to gather comments. A news release announcing the draft environmental impact statement will be issued. Dates for the public meetings will be announced in a subsequent news release. (02/11/2019)

On March 22, Reclamation plans to release final environmental documents that analyze the proposed execution of a series of annual transfers of water over a 5-year period (calendar year 2019 through 2023) of up to 7,500 acre-feet per year of Firebaugh Canal Water District's Central Valley Project contract water supplies to Pacheco Water District, San Luis Water District and Westlands Water District (California). The proposed transfers would occur from April through December of each year that water is transferred and would not exceed the maximum of 37,500 acre-feet over the five-year period. (03/11/2019)

On March 22, Reclamation plans to release draft environmental documents that analyze the proposed water banking program between Arvin-Edison Water Storage District and Rosedale-Rio Bravo Water Storage District (California). The program would allow the annual transfer of up to 100,000 acre-feet of Arvin-Edison's available Central Valley Project water supplies to Rosedale for banking. In return, Rosedale would deliver their State Water Project water supplies, Kern River water, and/or groundwater supplies, or internally transfer CVP water from other banking partners' accounts, at a rate of 1 acre-foot returned to Arvin-Edison for every 2 acre-feet of water banked in Rosedale. (03/11/2019)

U.S. Geological Survey

The week of March 18 or later, USGS and NASA will formally announce the names of two awardees for 2018 William T. Pecora Award for achievements in Earth remote sensing. The award has been presented annually since 1974 and honors the memory of William T. Pecora, Ph.D., former director of the USGS and Under Secretary of the Department of the Interior. Dr. Pecora was a motivating force behind Secretary Udall's 1966 announcement for the establishment of civil remote sensing of the Earth from space. The annual awards will be formally presented to both recipients at future venues. (02/19/19)

Sometime during mid to late March, an NPR interview is set to be released with the Southwest Climate Adaptation Science Center's (SW CASC) university director, Gregg Garfin, on floods and drought in the southwestern U.S. Dr. Garfin is the lead author on the Southwest chapter of the NCA4, and used this expertise to explain how extreme precipitation and flooding are projected to increase, while droughts are also projected to become more frequent and severe in the southwestern U.S. (03/07/2019)

Gary Rowe will be attending the Association of Clean Water Agencies (ACWA) meeting in Alexandria VA, March 19-20. (03/05/19).

On March 21, Vivian Hutchison from USGS Core Science Systems' Science Analytics and Synthesis program will be presenting to the Bureau of Reclamation (BOR) March 21. The presentation, "USGS review and approval processes, policies, and repositories for data management." will focus on the current practices, lessons learned, infrastructure, and challenges faced by USGS in supporting science data management across the bureau.

8-30 Day Outlook

Bureau of Reclamation

NEW ITEMS

Between March 25 and April 5, Reclamation will announce the winners of the Powering Electronic Instruments on a Rotating Shaft prize competition. Reclamation sought novel methods and technologies to reliably provide direct current power for loads of up to 20 watts to instruments on rotating shafts. Equipment monitoring via electronic instruments on the generator shaft provide a critical advancement toward keeping these units operational and reducing costly outages. A news release or story will be published. (03/11/2019)

On March 27, the Hoover Dam Visitor Center Theater Level reopening/ribbon cutting event will take place. The 4-month remodel project features a completely upgraded experience for visitors. The Theater Level reopened to the public on March 11. No news release will be issued. (03/11/2019)

In March or April, Reclamation will announce the availability of the FY 2019 WaterSMART Water Marketing funding opportunity. Through these grants, Reclamation assists states, tribes, and local governments to conduct planning activities to develop water marketing strategies that establish or expand water markets or water marketing activities between willing participants in compliance with state and federal laws. A news release will be issued. (03/11/2019)

In March or April, Reclamation will announce the Water Infrastructure Improvements for the Nation (WIIN) Desalination Construction Projects and WIIN Title XVI Water Reclamation and Reuse FY 2019 funding opportunity. The Desalination Construction Projects under the WIIN Act funding provides sponsors of ocean and brackish water desalination projects the opportunity to request cost-shared funding for the planning, design and/or construction of those projects. The Title XVI Water Reclamation and Reuse Projects funding opportunity allows for sponsors of water reclamation and reuse projects that are congressionally authorized or are eligible under section 4009(c) of the WIIN Act to request cost-shared funding for planning, design and/or construction of those projects. A news release will be issued. (03/11/2019)

On April 3, Reclamation is scheduled to host a hard-hat tour of Hoover Dam (Nevada/Arizona) for visiting journalists from Southern California being escorted by the Metropolitan Water District (MWD). As part of a 2-day media inspection trip to the

Colorado River hosted by the MWD, Reclamation will provide the group a tour of the powerplant, tailrace, transformer deck and visitor center overlook. (03/11/2019)

In early April, Sarah Bradley, editor in chief of *Valve World* magazine, is interested in interviewing a maintenance technician from Hoover Dam (Nevada/Arizona) regarding the use and/or procurement of valves, pumps, hoses and other components. Trade magazines feature interviews with end users of valves and related componentry to assess why they were chosen for use and integration at the facility. (03/11/2019)

Around April 1, the San Luis Low Point Improvement Project Draft Feasibility Report (California) will be available for public review and comment through April 30. The draft report includes analysis of the Pacheco Reservoir Expansion Alternative as the locally preferred plan. Currently, the Santa Clara Valley Water District experiences water quality and reliability problems due to the development of algae blooms when the reservoir level drops below 300,000 acre-feet. A news release and public outreach is planned. (03/11/2019)

In early April, Reclamation will issue a news release announcing that safety-of-dams work at Boca Dam will commence in May. The work is a result of Reclamation's analysis regarding risk from structural failure during an earthquake. The project will extend to October 2020. Boca Dam is located northeast of Truckee, California. (03/11/2019)

On April 11, Reclamation will participate in the Sacramento River Science Workshop in Sacramento, California. The workshop will convene participants to hear about and discuss the state of science on the Upper Sacramento River and how it can inform management decisions. Topics to be discussed include monitoring, habitat restoration, and operations and engineering modeling. (03/11/2019)

On April 11, Reclamation will host a second public meeting on the Draft Final Central Valley Project Cost Allocation Study in Folsom, California. Notification of the meeting will be emailed to interested parties. Meeting details and agenda will be posted to the website. Comments will be accepted. (03/11/2019)

Around April 15, Reclamation will announce availability of the final environmental impact statement for the El Dorado County Water Agency Long-Term Water Service Contract (Fazio) for 30-day public review and announce availability of the draft contract for 60-day public review. Contract negotiation sessions are scheduled for April 3 and April 10. (03/12/2019)

April 16 – April 17, Reclamation will host an interactive stakeholders' workshop at the Denver Federal Center, Building 67, in Lakewood, Colorado. Meeting topics will include updates from Reclamation's leadership with discussions on Improving the Environmental Review Process; WaterSMART Funding Opportunities; Identifying, Designing, and Executing Repairs, Replacements, and Additions at Transferred Works Facilities; Cultural Resources Compliance on Transferred Works; and Economic Benefits and Cost Estimates in Reclamation Planning Studies. (03/11/2019)

On April 18, Reclamation will hold an emergency action planning tabletop exercise in Burley, Idaho, for the American Falls and Minidoka Dams. No media interest is expected. (03/11/19)

UPDATED ITEMS

Around March 26, Reclamation plans to issue a news release announcing a final finding of no significant impact and environmental assessment on the Aspen Canal Piping Project located in Delta County, Colorado. The project will replace approximately 5.6 miles of open irrigation ditch with buried pipe. The purpose of the project is to prevent seepage and reduce salinity loading in the Colorado River Basin. (01/07/2019)

ONGOING ITEMS

In March, the Trinity River Restoration Program, Bureau of Reclamation, and Bureau of Land Management (federal co-lead agencies) plan to announce the environmental assessment and finding of no significant impact for the Chapman Ranch Phase A Channel Rehabilitation Project. The purpose of the project is to increase salmon and steelhead habitat downstream of Lewiston Dam on the Trinity River in California. (01/28/2019)

On April 1, Reclamation expects new coordinated biological opinions on the operation of the Klamath Project (California/Oregon) to be released by the National Marine Fisheries Service and the U.S. Fish and Wildlife Service. This release will trigger a transition in Klamath Project water operations from the requirements of the 2013 Biological Opinion. The United States has already noticed the court of the forthcoming biological opinions and completion of the Endangered Species Act re-initiation of consultation process, which will lift the injunction and associated flow requirements intended to decrease Ceratonova Shasta disease. The disease affects endangered salmon in the Klamath River. Media interest is expected. (03/04/2019)

Between April 8 and 19, Reclamation may issue a news release following receipt of the Klamath Project coordinated biological opinions. Reclamation plans to complete the National Environmental Policy Act process and will review the information included in the 2019 Biological Opinion to ensure consistency with the environmental assessment and determine if it will release a finding of no significant impact or issue a notice of intent to complete an environmental impact statement. Media interest is expected. (03/04/2019)

U.S. Geological Survey

NEW ITEMS

In March, the USGS responded to a data call from the National Science & Technology Council's interagency Subcommittee on Ocean Science and Technology (SOST) requesting priority Research and Technology (R&T) needs. Subsequent to review and synthesis by the SOST leadership of these needs, agencies will be expected to develop up to five project proposals by March 25 to achieve identified agency needs over the next 24 to 36 months.

Resulting projects will be presented to the Ocean Policy Committee for review. The USGS response has been developed by the Coastal/Marine Hazards & Resources Program after internal bureau consultation to ensure consistency with USGS priorities. (03/05/19)

On March 25, Northeast Climate Adaptation Science Center (CASC) Research Ecologist Dr. Toni Lyn Morelli is planned to present on CASC science and practices to leadership and scientists at the University de la Frontera in central Chile. The trip will involve planning for future fieldwork as well as sharing information about translational ecology and the process of establishing a climate science center. This trip will help spread the word and reputation about USGS and build a relationship with a university in a high biodiversity/ecosystem services country. (03/07/19)

Sometime between March and May, North Central Climate Adaptation Science Center (CASC) ecologist Brian Miller is expected to present his work on scenario planning and simulation modeling as part of a webinar series hosted by the Western Governors' Association Biosecurity and Invasive Species Initiative. Miller was invited to present his work modeling climate, invasive species, and resource management as part of this series. (03/07/19)

On April 2-3, an “Industry Day” event will be held at the USGS National Center in Reston, VA to gather information from industry about existing, planned, and emerging Earth observation and imaging capabilities/systems. NASA released an request for information (RFI) for the "Sustainable Land Imaging (SLI) Beyond Landsat 9 Architecture Study". The RFI was open from October 25 to November 30 and the Architecture Study Team (AST) received industry responses on space instruments, ground systems, products, data services, public-private partnerships, and related topics. The respondents are invited to participate in this by-invitation-only event, the format for which will consist of one-on-one conversations with each RFI respondent, about 45 minutes each. The SLI AST 2019 team has reviewed the RFI responses and compiled questions for the Industry Day. A subset of the SLI AST 2019 core team members will participate in the event. (03/07/2019)

In celebration of *National Library Week,* April 7-13, the USGS Library will host several activities highlighting Library resources and collections serving the science community. Library tours offered in Denver and Reston will provide an opportunity to meet library staff and learn about services, resources, and specialized collections. Online events will include an in-depth look at using Elsevier's SCOPUS search platform for science research as well as tips to efficiently search the new Library Catalog across both physical and digital collections to find relevant materials, including journal articles, books, maps, ebooks, USGS-authored series reports, and open access materials.

On April 19, The North Central Climate Adaptation Science Center (NC CASC) host institution, University of Colorado Boulder, will host a public open house to mark the “grand opening” of the North Central Climate Adaptation Science Center (NC CASC) and to showcase the capabilities of CU’s EarthLab, which hosts the NC CASC. The University of Colorado Boulder was chosen as the new university host for the North Central CASC in 2018. The event will take place at CU Boulder SEEC Building, 4000 Discovery Drive,

Boulder CO and will include research presentations and discussions with senior university leadership. Invitations will be sent by CU Boulder to elected and appointed federal, state, and local officials, including regional leadership of FWS, NPS, etc. (03/07/19)

ONGOING ITEMS

In late March, the White House Office of Science and Technology Policy (OSTP) will request clearance of the first biennial Report to Congress on Crowdsourcing and Citizen Science (CCS), as required by the CCS Act of 2016. The report includes appendixes describing bureau-level activities in crowdsourcing and citizen science, as well as challenges and prizes. OSTP's guidance was to submit for inclusion in the appendixes all activities launched under the CCS Act, and a sampling of representative activities launched under different authorities. (DOI Office of Policy Analysis is coordinating the request on challenges and prizes.) (03/05/19)

On March 31, funding from the US Air Force for USGS geomagnetic observatories will end after more than a decade of support. In FY18, this funding represented 18% of the total for the Geologic Hazards Science Center's Geomagnetism Project and 25% of the Project's operations funds. To cope with the loss of support, maintenance will be suspended on three of the 14 magnetic observatories currently operated, on April 15. They are: Shumagin (AK), Fresno (CA) and Bay St. Louis (MS). In mid-March, the USGS will notify partner agencies in the National Space Weather Program. A briefing request has already been received from National Security Council staff. (03/05/19)

On April 2-4, the North Central Climate Adaptation Science Center (CASC) Deputy Director, Aparna Bamzai-Dodson, will participate in the "Bringing Conversations on Diversity and Inclusion in Data Science to the Environmental Sciences" workshop to be held at University Corporation for Atmospheric Research's (UCAR) Center Green facility in Boulder, CO. The workshop will be led by the Environmental Data Science Inclusion Network (EDSIN) and is funded by the National Science Foundation "Inclusion across the Nation of Communities of Learners of Underrepresented Discoverers in Engineering and Science" program (NSF Includes). Growth in large ecological datasets and large environmental synthesis projects has resulted in the need for a diverse workforce with technical data science skills. The EDSIN is intended to strengthen initiatives across existing alliances and organizations to recruit and retain individuals from underrepresented groups in data science careers. (02/28/19)

In April or May, USGS will announce the kick off of an innovative project to study Harmful Algal Blooms in the State of New York, in Owasco, Seneca and Skaneateles lakes of the Finger Lakes region. In partnership with the state, USGS is installing new, innovative and robust systems to gain insight on HAB development, duration and decline. HABs occur when algae grow out of control and produce toxic or harmful effects. These blooms can be harmful to humans, animals, pets and aquatic ecosystems, and lead to impacts on the economy. A better understanding of HAB growth and severity will allow state officials, water resource managers, drinking water utilities, the public and others make more informed choices on how to deal with blooms and develop mitigation strategies. (03/05/19)

Upcoming USGS Publications

Pub Title	Pub Synopsis	Pub Outlet	Anticipated Pub Date
Sea otter population biology at Big Sur and Monterey, California—Investigating the consequences of resource abundance and anthropogenic stressors for sea otter recovery	Southern sea otters are a Federally threatened species and recognized as depleted under the Marine Mammal Protection Act. USGS will publish a multi-year study concerning sea otter population biology at Big Sur and Monterey, California. The report identifies the factors most important in limiting population growth of southern sea otters in central California and informs conservation research and management actions for this species.	USGS Open File Report	March
Nonlinearities in transmission dynamics and efficient management vector-borne pathogens	This paper explores nonlinearities in transmission dynamics of vector-borne pathogens, develops an improved measure of the effect of management on risk of human exposure to vector-borne pathogens, and examines the implications for efficient integration of control measures to protect public health while minimizing adverse effects on nontarget organisms.	Ecological Applications	May
An integrated framework for ecological drought across riverscapes of North America	Climate change is increasing the severity and extent of extreme droughts events, posing a critical threat to freshwater ecosystems, particularly with increasing human demands for diminishing water supplies. Current understanding of drought consequences for freshwater biodiversity is very limited. This study describes key barriers that hinder integrative drought research and monitoring across riverscapes and describes how this approach can directly inform natural-resource management.	Bioscience	May

Trends and carrying capacity of sea otters in southeast Alaska	The recovery of sea otters to ecosystems from which they had been absent in southeast Alaska has affected coastal food webs, including commercially important fisheries. This study estimates past trend and current abundance of sea otters, providing insights to managers regarding food web implications and informing commercial fishery managers, particularly regarding conflicts between sea otter and shellfish fisheries.	Journal of Wildlife Management	June
Climate-Changed Wetlands Challenge Waterbird Use and Migratory Connectivity in Arid Landscapes	Wetlands in the Great Basin provide vital habitat to waterbirds and conservation depends on a better understanding of climate change as a potential stressor. This study assessed changes in water availability and climate trends over the past 100 years in conjunction with North American Breeding Bird Survey data, with implications on the health of the entire Pacific Flyway. Long-term data on temperature, precipitation, and streamflow were examined for monthly and annual changes.	Scientific Reports	TBD

Change in Carbon Storage for Cold-Desert Ecosystems Controlled by Strong Interactions Between Precipitation Seasonality and Vegetation	Dryland ecosystems are experiencing shifts in plant community composition and rainfall, which are expected to alter cycling and storage of soil carbon at local to global scales. Estimated changes in dryland carbon are poorly constrained and few studies few studies are designed to experimentally examine long-term climate effects on soil carbon. USGS scientists and colleagues measured soil carbon from 0 to 1 m under and between plants following nearly 20 years of experimental manipulations of plant community composition (native sagebrush steppe, or monoculture of exotic crested wheatgrass), as well as the amount and timing of rainfall. Findings from this long-term experimental study indicate sagebrush communities may become a net carbon source with increased dormant season rainfall rather than a carbon sink as previously predicted. This research also provides direct experimental evidence for increased carbon sequestration, influenced by biotic and abiotic factors. Consideration of vegetation type, sub-surface soils, and both organic and inorganic carbon forms are imperative to predicting how carbon sequestration may be altered by changing climate and disturbance.	Ecosphere	March
Science Framework for Conservation and Restoration of the Sagebrush Biome: Linking the Department of the Interior's Integrated Rangeland Fire Management Strategy to Long-Term Strategic Conservation Actions Part 2. Management Applications	A report developed in response to the DOI's Integrated Rangeland Fire Management Strategy intended to provide long-term strategic guidance on conservation actions in the sagebrush biome. The chapter *Adaptive Management and Monitoring* introduces adaptive management and defines terms and important ecosystem attributes to be monitored. The chapter *Integration and Tradeoffs* addresses the complexity of decision making to meet a diversity of management objectives.	U.S. Forest Service General Technical Report	March

Fish Diseases and Medicine	Two book chapters written by USGS will be released as part of the veterinary textbook titled “Fish Diseases and Medicine.” The comprehensive textbook provides an overview of piscine (concerning fish) medicine, including diseases and disorders of fish in the ornamental, food, and bait industries, among others. The text includes two chapters authored by USGS: *Chapter 1 – Anatomy and physiology of fish* and *Chapter 8 – Coelomic Disorder*s.	CRC Press	March
Change in Carbon Storage for Cold-Desert Ecosystems Controlled by Strong Interactions Between Precipitation Seasonality and Vegetation	Dryland ecosystems are experiencing shifts in plant community composition and rainfall, which are expected to alter cycling and storage of soil carbon at local to global scales. Estimated changes in dryland carbon are poorly constrained and few studies few studies are designed to experimentally examine long-term climate effects on soil carbon. USGS scientists and colleagues measured soil carbon from 0 to 1 m under and between plants following nearly 20 years of experimental manipulations of plant community composition (native sagebrush steppe, or monoculture of exotic crested wheatgrass), as well as the amount and timing of rainfall. Findings from this long-term experimental study indicate sagebrush communities may become a net carbon source with increased dormant season rainfall rather than a carbon sink as previously predicted. This research also provides direct experimental evidence for increased carbon sequestration, influenced by biotic and abiotic factors. Consideration of vegetation type, sub-surface soils, and both organic and inorganic carbon forms are imperative to predicting how carbon sequestration may be altered by changing climate and disturbance.		week of March 25

North-facing slopes and elevation shape asymmetric genetic structure in the range-restricted salamander Plethodon shenandoah	The Shenandoah Salamander is Federally endangered and found only in three mountaintops in Virginia. Using genetic techniques, this study reconstructed the evolutionary history and population connectivity of the species for all three populations. Results highlight the importance of landscape features in understanding and predicting movement and fragmentation of salamanders across space.	Ecology and Evolution	March
Changes In Breeding Population Sizes Of Double-Crested Cormorants Phalacrocorax Auritus In The Humboldt Bay Area, California, 1924–2017	The Double-crested cormorant is of management interest to USFWS and to enable better understanding of recent population growth along the Pacific coast of North America, this study assessed long-term breeding population trends in the Humboldt Bay area, California, using aerial photographic survey data collected since 1989 as well as available prior data.	Marine Ornithology	March
Wolf recolonization failure: a Minnesota case study	A case study detailing how a wolf pack attempted for three years to recolonize an area 15 miles from Minneapolis and St. Paul, Minnesota but failed due to depredation of livestock and dogs, which resulted in the lethal removal of the pack by USDA Wildlife Services. This case study serves as an example of why wolves cannot recolonize non-wild lands in Minnesota and elsewhere.	Canadian Field Naturalist	April
Functional variation at an expressed MHC class IIb locus predicts Ranavirus infection intensity in larval anuran populations	Infectious diseases are causing losses to global biodiversity and Ranavirus is among the leading causes of amphibian disease-related mortality, including wood frogs across the northwestern U.S. By surveying larval wood frogs in Maryland, this study identified immunogenetic signatures linked to variation in disease susceptibility to inform mitigation strategies for combating global amphibian declines.	Immunogenetics	April

Yellowstone Science	USGS has authored four articles that discuss science related to proliferative kidney disease in fish in the Yellowstone River and western U.S.; how paleoclimate provides a framework for understanding potential ecological change in the future; an overview of recommendations for Yellowstone National Park's Aquatic Invasive Species program; and the role that birds play in Yellowstone National Park related to ecological vital signs that indicate park health.	Yellowstone Center for Resources, Yellowstone National Park	April
Invasive buffelgrass detection using high-resolution satellite and UAV imagery on Google Earth Engine	Buffelgrass is an invasive grass species that facilitates fires in desert ecosystems while benefiting from the disturbance the fire causes. The USGS developed a buffelgrass detection method using a drone and high-resolution satellite imagery at two sites in Saguaro National Park, Arizona. This method provides an improved detection method for managing buffelgrass and determines what environmental variables is associated with this invasive species.	Remote Sensing in Ecology and Conservation	April
Influence of surrounding land-use on mussel growth and glycogen levels in the St. Croix and Minnesota River basins	Freshwater mussels are facing threats that are altering habitat and health of mussel populations. The state of current and past environmental conditions can be monitored by measuring mussel growth and glycogen levels. This study measured growth and glycogen levels in mussels from the St. Croix and Minnesota River basins to understand how surrounding land-use influences the growth and physiological status of native freshwater mussels.	Hydrobiologia	May
Managing the trifecta of disease, climate, and contaminants: Searching for robust choices under multiple sources of uncertainty	Wood frog populations in the northeastern US are experiencing population declines due to multiple stressors. This study evaluated how potential management actions might mitigate the effects of increasingly frequent and severe droughts, ranavirus disease exposure, and methylmercury on wood frog populations. Results can assist managers in the conservation of wood frogs under changing environmental conditions.	Biological Conservation	May

To forage or flee: lessons from an elk migration near a protected area	The causes and consequences of shifting and variable elk migration patterns are still largely unknown, particularly for autumn migration. This study used five years of data from female elk which utilize a landscape managed by four federal agencies, the State of Wyoming, and private landowners, to identify the driving factors behind the initiation of fall migration in two groups of elk, one of which migrates to a protected area where hunting is prohibited.	Ecosphere	May
Local scale spatial patterns of freshwater mussels in the Upper Mississippi River	Native freshwater mussels, one of the most threatened faunal groups with high extinction risk, serve vital functions in freshwater systems and many species are economically important, making them key targets for conservation, restoration, and management. This study was designed to quantify where high quality mussel assemblages exist in the Upper Mississippi River so that future habitat and restoration projects can be designed to avoid or enhance native mussel assemblages.	Freshwater Science	May
The bee fauna of coastal Napatree Point and two inland sites in southern Rhode Island	Bees are important pollinators and essential to ecosystems, and there is evidence of pollinator declines. The bee faunas of coastal sites are relatively poorly known and the USGS surveys pollinator species so that their trends can be monitored. This study provides baseline survey information on bees at Napatree Point and the Great Swamp and Carter Preserves (all three are conservation areas in Rhode Island), and provides data useful for future monitoring of these bee faunas.	Northeastern Naturalist	April
Louisiana Black Bear Post-delisting Monitoring Report	At the request of the USFWS, USGS will provide an annual post-delisting monitoring report for the Louisiana black bear. The report is intended to indicate whether tipping points have been reached which might trigger the re-listing of the species. The report provides an assessment of data collected at sites in Atchafalaya and Tensas River Basins, Louisiana from roughly 2002/2006 to 2017.	Cooperator publication for U.S. Fish and Wildlife Service	April

Measuring seedlings of a problem nonnative plant species in two sites at Petrified Forest National Park, Arizona to better understand how invasions start	Prickly Russian thistle (tumbleweed) is a nonnative plant species and being able to predict if and when it will pose a serious problem is valuable for land managers when determining management strategies. This study measured the emergence of prickly Russian thistle seedlings at Petrified Forest National Park, Arizona to better understand the factors that contribute to the success of this problematic nonnative plant species.	Invasive Plant Science and Management	April
Changes in Genetic Diversity and Differentiation in Red-cockaded Woodpeckers (Dryobates borealis) Over the Past Century	The endangered red-cockaded woodpecker has declined in the southeastern US due to loss of habitat and fire suppression. An earlier genetic study conducted during the 1990's found low genetic diversity. USGS and others examined temporal change in genetic diversity and structure using microsatellite and mitochondrial DNA to assess genetic variability before and after the population decline.	Ecology and Evolution	March
Book Chapter: Global status of trout and char: conservation challenges in the 21st century	Freshwater ecosystems are among the most threatened ecosystems in the world, and freshwater fishes may now be the most threatened group of vertebrates. As of 2017 only 54% of the total described species of trout and char have been assessed by the IUCN. Of the 67 species that have been assessed, an estimated 73% are threatened with global extinction. This book chapter is the first global assessment of status and conservation of freshwater trout and char.	American Fisheries Society Book	May
Rare Earth Element Mineral Deposits in the United States	Review of the major types of mineral deposits that are known to contain rare earth element (REE) resources as products and byproducts. Provides a high-level description of the major minerals that contain the REEs and how they occur in nature. The report prioritizes the mineral deposit types most likely to contain sufficient REE content that if developed would significantly impact US domestic supplies. This prioritization will be used to emphasize the REE-bearing mineral deposit types that are the focus of the first phase of the critical minerals mapping initiative.	USGS Circular	3/29/2019

Arizona Hedgehog Cactus (Echinocereus triglochidiatus var arizonicus)—A Systematic Data Assessment in Support of Recovery	The Arizona hedgehog cactus is a federally listed cactus due to loss of habitat attributed to mining, mineral exploration and highway development. At the request of USFWS, USGS estimated survival and population growth rates and provided suggestions on how to improve the collection of Arizona hedgehog cactus monitoring data.	USGS Open-File-Report	March
Viability of razorback-flannelback sucker hybrids	Dams have segmented the Colorado River, altering habitat and isolating native fish populations such as the endangered Razorback Sucker which are uncommon and hybridization could increase due to limited mates. To understand the impacts of hybridization on recovery of Razorback Suckers, USGS and partners compared hatch success and larval survival of artificially spawned Razorback Sucker, Flannelmouth Sucker, and their hybrid to successfully spawn and rear all combinations.	Southwestern Naturalist	March
Rangeland live vegetation monitoring with satellite remote sensing: U.S. Geological Survey Administrative Report	USGS and partners developed a new satellite-based technology for high spatial and high frequency mapping of live vegetation in semi-arid and arid landscapes in Kenya's conservancies comprising the Northern Rangelands Trust (NRT). These technologies provide the needed mapping performance for management to protect iconic species such as elephants, rhinos, and cheetahs while supporting a pastoral population dependent on access to grazing areas for livestock.	USGS Open-File-Report	March
Lead in piscivorous raptors during breeding season in the Chesapeake Bay region of Maryland and Virginia, USA	USGS and others examined blood lead concentrations of osprey and bald eagles breeding at the largest estuary in the U.S., the Chesapeake Bay. Both of these species have increased in numbers since the ban on dichlorodiphenyltrichloroethane (DDT), this study aimed to see if adults or chicks could be negatively affected by another toxicant, lead, and attempts to determine sources of exposure by testing paint, sediment, and forage fish.	Environmental Toxicology and Chemistry	TBD

Wind erosion and dust from US drylands: a review of causes, consequences, and solutions in a changing world	Over 148 million acres in the U.S. (~64% managed by the federal government) have been identified as vulnerable to wind erosion, which removes topsoil, decreases soil fertility, damages crops and property, deposits soil on roadways, generates dust that can affect human health, and can indirectly affect regional water supplies by influencing mountain snowmelt. This study assessed the factors driving wind erosion and dust generation, the consequences, and potential strategies that could mitigate the effects.	Ecosphere	TBD
Early genetic outcomes of American black bear reintroductions in the Central Appalachians, USA	American black bears were extirpated from most of the Central Appalachians in the early 20th century and reintroductions were conducted during the 1990s. An assessment of the early genetic outcomes of bear reintroduction illustrates sustained isolation and small effective population size. Results may warrant continued genetic monitoring to determine if gene flow from neighboring populations is established.	Ursus	TBD
Topographic drivers of flight altitude over large spatial and temporal scales	In order to better understand drivers of golden eagle flight patterns, researchers tracked the birds, listed as a fully protected species in California, within all five bird conservation regions in California. By analyzing nearly 200,000 flight locations and examining topographic features such as roughness and aspect in conjunction with temporal parameters, researchers developed a relatively simple predictive model to assist with conservation and management.	Auk	TBD
Landscape and organismal factors affecting sagebrush-seedling transplant survival after megafire restoration	To provide insight to guide future allocation of resources to maximize probability of post-fire sagebrush restoration success, USGS worked in close partnership with BLM to examine how biotic and abiotic factors contribute to differences in survival of sagebrush planted after the 2015 Soda Wildfire, Idaho. Survival of over 3,000 sagebrush seedlings spanning more than 1,000 acres were evaluated in relation to organismal traits and landscape factors.	Restoration Ecology	TBD

Assessing the Quality of America's Public Aeromagnetic Data	The United States is well covered by first-generation geophysical surveys, which provide a big picture of the distribution of subsurface rock types. However, many of the surveys flown are out of date and used dated technology. The article uses these historical data to prioritize regions for more detailed geophysical surveys to characterize potential critical mineral resources, and publishes those gaps in map form for the larger scientific community.	Eos	TBD
Modelling Riparian Restoration Impacts on the Hydrologic Cycle at the Babacomari Ranch, SE Arizona, USA	This paper describes coupling field experiments with surface and groundwater modelling to investigate the use of erosion control structures to augment shallow and deep aquifer recharge in SE Arizona rangelands. Findings demonstrate how erosion-control structures could impact all components of the annual water budget and provide support for potential watershed-wide gabion installation to increase total aquifer recharge. The Walton Family Foundation contributed to project funding and partners included the Babacomari Ranch, the Appleton-Whittell Research Ranch of the National Audubon Society, and the University of Arizona.	Journal of Water, Special Issue: Hydrologic Modelling for Water Resources and Basin Management	
Trends and carrying capacity of sea otters in southeast Alaska	Sea otter populations in southeast Alaska increased from fewer than 500 translocated animals in the late 1960s to an estimated >8,000 animals by 2003. The recovery of sea otters to ecosystems from which they had been absent has affected coastal food webs, including commercially important fisheries, and thus information on expected growth and equilibrium abundances can help guide resource management. The authors compiled available survey and harvest data and utilized a Bayesian state-space model to estimate past trend and current abundance, providing insights to managers regarding food web implications and informing commercial fishery managers, particularly regarding conflicts between sea otter and shellfish fisheries.	Journal of Wildlife Management	TBD, May 2019

Carbon accumulation and vertical accretion in a restored vs. historic salt marsh in southern Puget Sound, Washington, USA	Sediment cores were collected in Animal Slough (Billy Frank Jr. Nisqually National Wildlife Refuge), the relatively undisturbed historic marsh, and Six Gill Slough, the restored, largely unvegetated marsh at the Nisqually refuge. Cores were analyzed for bulk density, % loss of ignition, % organic carbon, and 210Pb for sediment dating. Sharp changes in bulk density in surface layers of Six Gill Slough cores were highly reliable markers for the onset of restoration in November 2009. The mean vertical accretion rate at Six Gill Slough was almost twice (0.79 cm/yr) that of the historic marsh since the time of restoration. Carbon accumulation rates at Six Gill Slough were somewhat greater than at AS, but the difference was not significant due to high variability (Six Gill: 81 - 210 g C m-2 yr-1; Animal Slough: 115 - 168 g C m-2 yr-1). The implications of this study are threefold: (1) major changes in land use, including onset of restoration, can be preserved in marsh cores and identified by abrupt changes in bulk density with depth, (2) restored marshes can quickly begin to accumulate carbon, even with sparse vegetation cover; however, carbon stores are vulnerable to loss by erosion, and (3) carbon accumulation rates in restored vs. historic marshes may be similar despite major differences in marsh formation processes.	Restoration Ecology	TBD

Spatio-temporal Population Change of Arctic-breeding Waterbirds	The paper estimated distribution, abundance, and spatially-explicit population trend of 20 breeding waterbird species collected on the Arctic Coastal Plain (ACP), Alaska to increase understanding of avian response to ecological change in the Arctic. The ACP is an extensive wetland complex on Alaska's North Slope that supports millions of breeding waterbirds and includes portions of the National Petroleum Reserve – Alaska and the Arctic National Wildlife Refuge. Rapid physical changes that are occurring in the Arctic are primary drivers of landscape change and thus may drive population dynamics of Arctic-breeding birds. This study used 25 years (1992–2016) of aerial survey data collected on the Arctic Coastal Plain (ACP), Alaska. Important areas for most species included the coastal fringe near Teshekpuk Lake, the Colville River Delta, and Admiralty Bay. The National Petroleum Reserve – Alaska was an important area for all species examined. Our results can be used to better inform land use decisions, improve monitoring of waterbird populations, and increase understanding of avian response to ecological change in the Arctic.	Avian Conservation and Ecology	TBD
Historical background and current developments for mapping burned area from satellite Earth observation.	This paper reviews remote sensing approaches to mapping burned areas with active and passive sensors with an emphasis on global products and their application for estimating fire emissions. This effort also includes a brief review of operational regional products, highlighting Landsat Burned Area products. This was an ad-hoc collaboration organized by Emilio Chuvieco, a recognized leader in remote sensing of fire and fire effects, with contributions by scientists involved in operationally mapping burned areas at global and national scales.	Remote Sensing of the Environment	5/1/2019

Subject:	Weekly Report to the Secretary May 12-18
Date:	Thursday, May 9, 2019 2:21:35 PM
Attachments:	Weekly Report to the Secretary May 12-18.docx

All,

Attached is the Weekly Report to the Secretary.

Let me know if you have any questions.

Thanks,

Matthew Dermody
Advisor to the Secretary
U.S. Department of the Interior
1849 C Street NW
Washington, DC 20240
202-513-7778 (office)
202-570-5029 (cell)

NOTE: Every email I send or receive is subject to release under the Freedom of Information Act.

WEEKLY REPORT TO THE SECRETARY
DEPARTMENT OF THE INTERIOR
MAY 12-18, 2019

OFFICE OF THE SECRETARY

Week Ahead Schedule of Meetings, Hearings, and Travel

Acting Chief of Staff Todd Willens will be in the office.

Director of Scheduling and Advance Samantha Hebert will be in the office.

Senior Advisor Heather Swift will be in the office.

Senior Counselor to the Secretary Gregg Renkes will be in the office

Advisor Mike Argo will be in the office.

Advisor Rick May will be in the office.

Advisor Matthew Dermody will be in the office.

White House Liaison Lori Mashburn will be in the office.

OFFICE OF COMMUNICATIONS

Director Nicholas Goodwin will be in the office.

Deputy Director Russell Newell will be in the office.

Monday, 5/13:

- Secretary Comms:
  - Speaking: 31st Annual Law Enforcement Candlelight Vigil on the National Mall
  - NMMA Video (Pre-Recorded) Kicking off the American Boating Congress
- National Releases/Announcements:
  - DOI will announce Grant Solutions Implementation - the grants management platform that is dedicated to the management of grants and cooperative agreements for the entire lifecycle. Moving to Grant Solutions will allow business process reengineering via policy to standardize procedures and increase efficiencies, as well as promote accountability and oversight.
  - DOI will announce the commitment of more than $106.8 million to support 47 public lands projects throughout Nevada and the California side of the Lake Tahoe Basin. These projects, which encompass a broad range of recreation improvement, wildlife habitat conservation, and hazardous fuels reduction and

wildfire prevention projects, will be funded through the sale of public lands under the Southern Nevada Public Land Management Act (SNPLMA). [TENTATIVE]

- Noteworthy Bureau Releases:
    - BLM-MT/DK. The Missoula Field Office plans to open a 30-day public comment period for an Environmental Assessment evaluating the impacts of acquiring 13,000 acres of private land owned by the Nature Conservancy. The acquisition would increase the amount of public lands available for recreational activities such as hunting, fishing, hiking, mountain biking and snowmobiling. The proposal would also maintain the working lands with active forestry and fire management programs as well as continued grazing.

Tuesday, 5/14:

- Secretary Comms:
    - Speaking: DOI Law Enforcement Memorial ceremony - Yates Auditorium at 11am
- National Releases/Announcements:
    - Izembek National Wildlife Refuge/King Cove Rd Announcement [TENTATIVE]
    - Federal Lands Recreation Enhancement Act (FLREA) announcement [TENTATIVE]
- Noteworthy Bureau Releases:
    - BLM-CO. The Royal Gorge Field Office plans to announce a 15-day public scoping period for a proposed 19-acre, 115kV transmission line right-of-way in Fremont County. If approved, the transmission line and associated access routes will primarily be located within a Section 368 West-wide Energy corridor adjacent to a 230kV Western Area Power Administration transmission line.
    - BLM-CO. The Royal Gorge Field Office plans to host a volunteer riparian restoration project to remove encroaching pinyon and juniper trees from the riparian corridor at Booger Red Mountain in Fremont County.
    - BLM-NV. The Winnemucca District plans to host the 14th annual Lovelock Cave Days. This 3-day event will bring approximately 350 fourth grade students from Humboldt and Pershing Counties to public lands to learn about natural and cultural resources. The event, which takes place at Lovelock Cave and the Marzen House Museum in Lovelock, Nev., involves local tribes, partner groups, and volunteers.

Wednesday 5/15:

- National Releases/Announcements:
    - Roll out Final Critical Minerals Report. WH, Commerce Coordination. [TENTATIVE]
    - BLM-ID. The Pocatello Field Office plans to issue a decision on the Recreation Development Environmental Assessment (EA). The EA will

analyze the environmental and cultural impacts of improving recreation facilities within 14 established recreation sites, providing up to three dispersed sites, and constructing up to five boater put-ins / take-outs along the Blackfoot River in southeast Idaho. All proposed improvements would be within Pocatello Field Office Special Recreation Management Areas. Public scoping ended April 8 with the Field Office receiving two comments.

- Noteworthy Bureau Releases:
    - BLM-OR/WA. The Northwest Oregon District, Cascades Field Office plans to offer a timber sale auction in Salem for the Voodoo Child Timber Sale. The timber sale will offer 5.5 million board feet on BLM-managed land several miles east of Lebanon.

Thursday, 5/16:

- Secretary Comms:
    - Speaking: Remarks at Statue of Liberty for Visitor Center Opening [Molly staffing]
    - Radio: Contingent on POTUS
    - TV: Contingent on POTUS
- National Releases/Announcements:
    - ISRAEL MOU: As previously reported in this report on December 18, 2018, former Secretary Zinke signed a Memorandum of Understanding (MOU) to strengthen cooperation on biodiversity conservation, protected areas, and cultural and historical heritage with Israel. Israel's Director General of the Israel Parks and Nature Authority will now sign the document on May 16 with an expected signing ceremony. DOI Deputy Press Secretary Alex Hinson has been in communication with U.S. Embassy Israel's Public Diplomacy Counselor to coordinate any media in relation to this.
- Noteworthy Bureau Releases:
    - BLM-NV. The Mount Lewis Field Office plans to issue a Record of Decision for the 3 Bars Ecosystem and Landscape Restoration Project, a programmatic Environmental Impact Statement proposing to treat up to 127,000 acres of sagebrush steppe, riparian habitat, pinyon juniper woodland, and aspen groves within a 749,810-acre area.

Friday 5/17:

- National Releases/Announcements:
    - On May 17, Mount Rainier National Park will host a press briefing for the reopening of the Historic Paradise Inn, a National Historic Landmark. The $23 million rehabilitation of the Paradise Inn Annex is a significant investment to address deferred maintenance while simultaneously completing much needed historic preservation and ensuring high quality visitor experiences for generations to come. NPS representatives, project contractors, and the park concessionaire will lead tours and brief the media. On May 17, the Paradise Inn will open to the public.

- Noteworthy Bureau Releases:
    - BLM-UT. The Moab Field Office plans to seek public comment on an Environmental Assessment (EA) analyzing a proposal to seasonally open a 1.7-mile low-use road near the Colorado River in a remote site south of Cisco. The EA will address visitor safety and bird habitat management including bald eagle nest sites and wild turkeys. This dead-end road is seasonally wet and subject to flooding and rock falls. It is primarily used by dispersed campers and would be open during the most popular fall camping period.
- Notable A/S Speaking Engagement:
    - Western Interstate Region/Naco - Spokane, Washington (Balash)

OFFICE OF CONGRESSIONAL AND LEGISLATIVE AFFAIRS

Cole Rojewski, Director, will be in the office and in meetings on Capitol Hill

Aaron Thiele, Advisor, will be in the office and in meetings on Capitol Hill

Taylor Playforth, Advisor, will be in the office and in meetings on Capitol Hill.

Hubbel Relat, Senior Counselor, will be in the office.

1. **SUSAN COMBS, NOMINEE FOR ASSISTANT SECRETARY FOR POLICY MANAGEMENT AND BUDGET:** On January 16, President Trump re-nominated Susan Combs to be Assistant Secretary for Policy, Management, and Budget. On April 4th, Senate Energy and Natural Resources Committee held a business meeting in which Susan Combs nomination was favorably reported by a voice vote sending the nomination to the floor. Floor vote has not been scheduled.
   Timing: Ongoing until confirmation
   Contact: John Tanner, Senior Advisor to the Secretary

2. **DAN JORJANI, NOMINEE FOR SOLICITOR OF THE INTERIOR:** On April 1, President Trump nominated Daniel Jorjani to serve as Solicitor of the Department of the Interior. Jorjani has been serving at Interior as the Department's Principal Deputy Solicitor since May 2017. On May 2 Senate Energy held a confirmation hearing on Mr. Jorjani's nomination. The nominee received post-hearing written questions on May 5, 2019, and is developing responses to those questions.
   Timing: Ongoing until confirmation
   Contact: John Tanner, Senior Advisor to the Secretary

3. **ROB WALLACE, NOMINEE FOR ASSISTANT SECRETARY FOR FISH AND WILDLIFE AND PARKS:** On May 3, 2019, the White House issued its intent to nominate Rob Wallace of Wyoming to be Assistant Secretary for Fish and Wildlife and Parks. The Department is assisting Mr. Wallace in preparation of materials related to his nomination.
   Timing: Ongoing until nomination
   Contact: John Tanner, Senior Advisor to the Secretary

4. **UPCOMING SENR HEARINGS:** The Department of the Interior will be participating in the following House Natural Resources oversight hearings:
    - **Full Committee legislative hearing on *"Examine The Importance Of And Path To Achieving Mineral Security And To Receive Testimony On The Following Bills: S. 1052, The Rare Earth Element Advanced Coal Technologies Act; And S. 1317, The American Mineral Security Act..":*** Witness is Joe Balash, Assistant Secretary for Land and Minerals Management.
      Timing: May 14, 2019
      Contact: Taylor Playforth, Advisor, Congressional Affairs

    - **S/C on Public Lands, Forests, and Mining legislative hearing on *"S. 258, Ruby Mountains Protection Act (Cortez-Masto), S. 434, A bill to provide for a report in the maintenance of Federal land holdings under the jurisdiction of the Department of the Interior (Braun), S. 490, B-47 Ridge Designation Act (Daines), S. 499, Offshore Wind for Territories Act (Cassidy), S. 526, Buffalo Tract Protection Act (Heinrich), S. 883, Flagstaff Federal Reversion Relief Act (McSally), S. 1079, Chaco Cultural Heritage Area Protection Act (Udall), S. ___, Oregon wilderness /National Recreation Areas (pieces not included in S. 47 from original OR wildlands bill).":*** Witness is TBD.
      Timing: May 14, 2019
      Contact: Taylor Playforth, Advisor, Congressional Affairs

5. **UPCOMING HNR HEARINGS:** The Department of the Interior will be participating in the following House Natural Resources oversight hearings:
    - **Full committee oversight hearing on *"Priorities and Policies of the Department of the Interior":*** Witness is Secretary David Bernhardt.
      Timing: May 15, 2019
      Contact: Cole Rojewski, Director, Office of Congressional and Legislative Affairs
    - **S/C on Water, Oceans, and Wildlife budget hearing on *"Examining the President's Fiscal Year 2020 Budget Proposal for the Bureau of Reclamation and the United States Geological Survey":*** Witness is Brenda Burman, Commissioner, Bureau of Reclamation and Dr. Don Cline, Associate Director USGS Water Resources Mission Area.
      Timing: May 16, 2019
      Contact: Aaron Thiele, Advisor, Congressional Affairs
    - **S/C on Indegenous Peoples oversight hearing on *"BIE Off-Reservation Boarding Schools":*** Witness is TBD.
      Timing: May 16, 2019
      Contact: Aaron Thiele, Advisor, Congressional Affairs
    - **S/C on Water, Oceans, and Wildlife budget hearing on *"Examining the President's Fiscal Year 2020 Budget Proposal for the FWS and the***

NOAA": Witness is Margaret Everson, Principal Deputy Director, US Fish & Wildlife Service.
Timing: May 21, 2019
Contact: Aaron Thiele, Advisor, Congressional Affairs

6. **UPCOMING SCIA HEARINGS:** The Department of the Interior will participate in the following Senate Committee on Indian Affairs oversight hearings.
    - **Full Committee legislative hearing on "*FY2020 Budget Request for Indian Programs*"** Witness is Tara Sweeney, Assistant Secretary for Indian Affairs.
      Timing: May 8, 2019
      Contact: Aaron Thiele, Advisor, Congressional Affairs
    - **Full Committee legislative hearing on "*S. 1211 (AUTOS Act); Bison Bill*"** Witness is TBD.
      Timing: May 15, 2019
      Contact: Aaron Thiele, Advisor, Congressional Affairs

7. **UPCOMING SENATE APPROPRIATIONS HEARINGS:** The Department of the Interior will be participating in the following Senate Appropriations hearings:
    - **S/C on Interior, Environment, and Related Agencies hearing to *"Budget Priorities and Policies of the Department of the Interior":*** Witness is Secretary David Bernhardt.
      Timing: May 22, 2019
      Contact: Cole Rojewski, Director, Office of Congressional and Legislative Affairs

OFFICE OF INTERGOVERNMENTAL AND EXTERNAL AFFAIRS

Todd Wynn, Director, will be in the office all week.
Tim Williams, Principal Deputy Director, will be at NACo on official travel from May 15-18.
Carly Miller, Deputy Director, will be at NACo on official travel from May 15-18.
Jason Funes, Special Assistant, will be in the office all week
Sarah Spaulding, Special Assistant will be in the office all week.
Marshall Critchfield will be in the office all week.

Immediate Announcements and Actions (within the next 14 days)

Continued planning for National Association of Counties Western Interstate Region Conference (May 13-18) and DOI participation
Continued planning for Utah Chamber of Commerce Presidents fly-in on May 14

Working with OCO to finalize remarks and produce video of Secretary's address to the American Boating Congress. The video will air at their breakfast welcome on May 15th.

Working on Club 20, a coalition of individuals, businesses, tribes and local governments in Colorado's 22 western counties, fly-in on May 21-23

Organizing a number of meetings (BOR, ASLM, FWP) for the California Secretary of Natural Resources fly-in on May 13

Projects:
Received an ask from Elko, Nevada County Commissioner to provide relief for Indian rancher

Continued communication with Western Governors Association regarding Secretarial participation in their Annual Meeting on June 10-12 in Vail, Colorado.

Working with bureaus and external partners on plans/ideas for Great Outdoors Month (June) and potential options for events to highlight the 2019-2020 Station-Specific Hunting and Sport Fishing Regulations

OFFICE OF THE DEPUTY SECRETARY

Week Ahead Schedule of Meetings, Hearings, and Travel

Deputy Chief of Staff exercising the authority of the Deputy Secretary Katharine MacGregor will be in the office.

Associate Deputy Secretary Jim Cason will be in the office.

Immediate Announcements and Actions

The Department will sign a Memorandum of Agreement with the Department of Defense expanding the role of the DoD liaison to include all issues between the two departments. The MOA will implement the Memorandum of Understanding signed in 2018. The package has cleared DOI surnaming and is awaiting concurrence from DoD.

OFFICE OF THE EXECUTIVE SECRETARIAT AND REGULATORY AFFAIRS

No Update Provided.

OFFICE OF THE SOLICITOR (Indicates Press/Comms Opportunities)

Week Ahead Schedule of Meetings, Hearings, and Travel

Principal Deputy Solicitor Dan Jorjani will be in the office all week.

Deputy Solicitor for Parks and Wildlife Karen Budd-Falen will be out of the office speaking to the Legal Information and Networking Committee (LINC) & Environmental Issues Conference (EIC) for the American Farm Bureau Federation in Raleigh, North Carolina on May 20 and 21, 2019.

Litigation:

Endangered Species Act Section 4 Litigation:

- Deadline Lawsuits—We have 14 pending lawsuits regarding 43 species (5 of them are or have been stayed). Of these lawsuits, 0 were filed in the past week. We received 1 new notice of intent to sue during the past week.
- Merits Lawsuits—We have 19 pending lawsuits challenging the merits of petition findings (7 cases), final listing or delisting determinations (6 cases), final critical habitat designations (5 cases), and the species status assessment process (1 case). Of these lawsuits, 0 were filed in the past week. We received 1 new notice of intent to sue during the past week.

***Justice Companies* Affirmative Litigation**

The Knoxville Field Solicitor's Office has received approximately 100 referrals to initiate affirmative litigation against companies owned or controlled by West Virginia Governor Jim Justice and his family members and associates. The companies have failed to appeal or comply with the requirements of at least 15 cessation orders and owe over $3.2 million in civil penalties and Abandoned Mine Land reclamation fees. The Solicitor's Office is reviewing an affirmative litigation referral to the Department of Justice.

***Bohmker v. Oregon* (S. Ct.) - Challenge to Oregon's Suction Dredging Prohibition in Salmon Habitat**

The Supreme Court denied *certiorari* in this case on April 29. Joshua Bohmker and other miners filed a petition for a writ of *certiorari* requesting Supreme Court review of the Ninth Circuit's judgment, issued on September 12, 2018, upholding Oregon's ban on in-stream motorized placer mining in designated salmon habitat areas (S.B. 838). The Ninth Circuit found that the Mining Law of 1872 and other federal laws did not preempt S.B. 838. The United States was not a party to the case, but filed an *amicus* brief in the Ninth Circuit proceedings in favor of Oregon's position that the state law was not preempted.

***Citizens for Clean Energy, et al. v. U.S. Dep't of the Interior, et al. (*D. Mont. Apr. 19, 2019)**

The Bureau of Land Management is preparing an environmental assessment to respond to a court order indicating that DOI's issuance of SO 3348 constituted a major federal action that triggered NEPA compliance. The EA analyzes the environmental impacts of three federal coal leases not exempt from the coal leasing pause issued after SO 3348. As directed by the court, BLM will also explain why the impacts are insignificant and do not require an EIS. BLM circulated a draft EA for SOL review on May 7, 2019. To comply with the court's direction for the parties to consult regarding remedies, DOJ and SOL are conferring with the plaintiffs on May 14, 2019.

Cloud Peak Energy, Inc. - Potential Coal Bankruptcy Filing

Cloud Peak Energy, Inc. (CP) owns and operates 3 coal mines in the Powder River Basin (2 in Wyoming, 1 in Montana). Recently, there have been rumblings that CP is on the verge of filing for bankruptcy, which may occur sooner rather than later. CP's original March 15 deadline to pay its $1.8 million interest payment on debt due in 2024 was extended until

May 7. Additionally, CP has a May 10 deadline to pay taxes owed to Campbell County for the end of the year 2018. Both BLM and SOL will continue to jointly monitor this situation.

Clean Air Council v. U.S. **(E.D. Pa.) - Climate Change**
Plaintiffs in this case sought a declaration that the Administration's deregulatory actions have endangered plaintiffs in violation of their constitutional and international rights, and violate the public trust doctrine. In February, the district court dismissed the complaint, ruling that plaintiffs lack standing and that there is no constitutional right to a stable climate. Plaintiffs failed to appeal within the time allowed. The case is over.

Western Watersheds Project v. Bernhardt **(D. Idaho) - Challenge to 2019 Sage Grouse Plans**
On May 2, the District Court granted plaintiffs' motion to supplement the complaint to add plaintiffs challenges to the 2019 plan amendments to the complaint (which originally only challenged the 2015 plans). We still have until May 31 to respond to plaintiffs' motion for a preliminary injunction.

Non-Litigation Matters:

Leasing Offshore Territories and Possessions
Last week, the House Natural Resources marked up H.R. 1014 to authorize the Secretary to issue mineral leases on the continental shelf adjacent to U.S. territories and possessions. The Senate Energy and Natural Resources Committee is scheduled to mark-up S. 499 on that topic this week.

ASSISTANT SECRETARY FOR FISH AND WILDLIFE AND PARKS (Indicates Press/Comms Opportunities)

Week Ahead Schedule of Meetings, Hearings, and Travel

From May 13-17, Principal Deputy Assistant Secretary Andrea Travnicek will be in the office; on May 16-18, she may make sites visits to the National Parks of New York Harbor.

From May 13-17, Deputy Assistant Secretary Aurelia Skipwith will be in the office.

From May 13-17, Deputy Assistant Secretary Ryan Hambleton will be in the office.

From May 13-17, NPS Deputy Director Dan Smith will be in the office.

From May 13-17, FWS Principal Deputy Director, Margaret Everson will be in the office

Immediate Announcements and Actions For the Next Week

U.S. Fish and Wildlife Service

By May 10, FWS will post updates to its Delisting/Downlisting Workplan and Domestic Listing Workplan on its Endangered Species websites. The National Listing Workplan has been available online since 2016 and covers planned work until 2023. The Delisting/Downlisting workplan has been available online since 2017 and covers planned work through 2021. These updates are in response to new information on species and priorities since the workplans were originally posted. Formal outreach will not be conducted but if-asked talking points have been developed. (05/08/2019)

By May 10, FWS will send to the Federal Register a notice extending the public comment period for the proposal to remove the gray wolf from the List of Endangered and Threatened Wildlife. FWS recently published a proposal to remove the gray wolf from the List of Endangered and Threatened Wildlife, and announced the opening of a 60-day public comment period on the proposed action, ending May 14, 2019. FWS will now extend the public comment period by 60 days to allow all interested parties additional time to comment on the proposed rule. Comments previously submitted need not be resubmitted and will be fully considered in preparation of the final rule. In addition, FWS will provide public-hearing information through the Federal Register in the near future. (05/08/2019)

During the week of May 13, FWS plans to publish in the *Federal Register* a final rule amending the depredation and control orders to allow destruction of resident Canada goose nests and eggs at any time of year. In 2006, FWS implemented several actions intended to reduce, manage, and control resident Canada goose populations in the continental United States and to reduce related damages. Those actions included depredation and control orders that allow destruction of their nests and eggs by authorized personnel between March 1 and June 30. However, some resident Canada geese currently initiate nests in February, particularly in the southern United States, and it seems likely that in the future, nest initiation dates will begin earlier and hatching of eggs could end later. This change will give the states more flexibility to address specific, local damage problems caused by resident Canada geese. If-asked talking points will be available. Information will also be posted to the web. (Updated 05/08/2019)

During the week of May 13, FWS will publish in the *Federal Register* a proposed rule to amend the agricultural depredation order to allow take of resident Canada geese at agricultural facilities between April 1 and August 31 in Atlantic Flyway states. In 2006, FWS implemented several actions intended to reduce, manage, and control resident Canada goose populations in the continental United States and to reduce related damages. Those actions included an agricultural depredation order that allows take of resident Canada geese at agricultural facilities by authorized personnel between May 1 and August 31. This time period, however, is too restrictive in portions of the Atlantic Flyway where specific crops are now being planted and depredated prior to May 1. This change only applies to Atlantic Flyway states because the other flyway states opted not to request a similar change. If-asked talking points will be available. Information will also be posted to the web. (Updated 05/08/2019)

During the week of May 13, FWS plans to publish a proposed rule in the *Federal Register* on special seasons for hunting migratory game birds by tribes for the 2019-20 season. This rule

prescribes special migratory bird hunting regulations for certain tribes on Indian reservations, off-reservation trust lands and ceded lands. This rule responds to tribal requests for FWS recognition of their authority to regulate hunting under established guidelines. It allows the establishment of season bag limits and, thus, harvest at levels compatible with populations and habitat conditions. Outreach will include emails and phone calls to tribes, states, congressional offices, and stakeholders and if-asked media talking points. (Updated 05/08/2019)

On May 15, FWS Principal Deputy Director Margaret Everson is scheduled to meet with Representative Sam Graves (R-Mo.) to discuss the name of Loess Bluffs NWR. FWS has begun complying with report language accompanying the FY 19 appropriations bill, which directs FWS "to open the public process within 30 days of enactment of this act, on the question of whether or not to rename the Loess Bluffs National Wildlife Refuge." Date of enactment of the Act was February 15. On January 10, 2017, the name of Squaw Creek NWR was officially changed to Loess Bluffs NWR. There has been interest from Representative Graves to return the refuge to its original name. A letter signed March 7, 2019, requesting this action was delivered to Secretary Bernhardt by Representative Graves. (Updated 04/17/2019)

On or around May 15, FWS plans to approve and adopt the Arthur R. Marshall Loxahatchee NWR's visitor services plan. The refuge will implement new and expanded wildlife-dependent recreational opportunities including opening more than 140,000 acres of the refuge to non-motorized access, opening portions of the refuge to 24-hours/day use, new white-tailed deer and feral hog hunting, expanding migratory bird hunting opportunities, airboating, expanding opportunities for bowfishing, fish gigging, and frog gigging, and camping by permit, as well as other public activities. New infrastructure to be constructed includes two fishing piers, a parking lot, camping platforms, three observation towers, two boardwalks, a photo blind, and an environmental education center as funding becomes available. Outreach will include congressional notifications, notifications of and offers to meet with partners and stakeholders, news release, and web posting. (05/08/2019)

On or around May 15, FWS plans to publish a proposed rule to allow the baiting of brown bears on Kenai NWR, which is permitted under Alaska state hunting regulations. The rule would also allow the discharge of firearms along the Kenai and Russian rivers during certain times of the year; allow the use of snowmobiles, all-terrain vehicles, and utility task vehicles on certain lakes when there is adequate snow and ice cover; and increase access to the refuge by bicycle and game cart. This proposed rule would be available for a 60-day public comment period and is likely to be strongly opposed by those who believe that baiting of wildlife for hunting is unethical and those who oppose hunting generally (particularly of large predatory mammals). FWS plans to notify stakeholders and congressional offices directly by email and issue a news release to Alaska media announcing the proposed rule and public comment period. (Updated 04/17/2019)

By May 15, FWS and NPS plan to publish for public comment and review an environmental assessment (EA) for a proposed biking and hiking Space Coast Trail at Merritt Island NWR and Canaveral National Seashore. The trail is a 30-mile key part of Florida's 250-mile Coast-to-Coast Trail and 266-mile River-to-Sea Loop Trail. It will connect the Atlantic Ocean to

the Gulf of Mexico. It also will connect to the Gullah Geechee Cultural Heritage Corridor and the 3,000-mile East Coast Greenway. It supports FWS and DOI priorities focusing on greater public access to the outdoors and being good neighbors. Partners include NASA and the Florida Department of Transportation (FDOT), who funded the EA. The project is a high priority for FDOT, which is funding the planning, engineering, and construction for the proposal. FWS and NPS will provide funding for the associated maintenance, which will be partially offset with user fees. Local interest is high because of anticipated community and economic benefits. Planned outreach includes congressional and stakeholder notifications. (03/20/2019)

On May 16, FWS will present Fort McCoy, Wisconsin, with the FWS Military Conservation Partnership Award for 2018. Fort McCoy, a U.S. Army installation located in western Wisconsin, was chosen as the recipient because of their aggressive program of habitat restoration and wildlife management activities. They work closely with FWS, the Wisconsin Department of Natural Resources (DNR), and a variety of partners to achieve myriad conservation successes while fully supporting their mission of training soldiers. Fort McCoy recently completed 107 high priority conservation projects, exceeding a 98 percent completion rate and including meeting recovery goals for the Karner blue butterfly. Through partnerships with FWS and DNR their work continues to ensure progress toward the butterfly's delisting. Limited local outreach, including a news release, is planned. (04/24/2019)

By May 17, FWS plans to publish in the *Federal Register* a final rule amending the regulations regarding the importation and exportation of green sea urchins. This rule is pursuant to the Agriculture Improvement Act of 2018, which includes a provision that directs the Director of FWS to revise the regulations pertaining to green sea urchins. This final rule will remove the importation and exportation requirements for U.S. businesses involved in the shipment of green sea urchins taken in waters under the jurisdiction of the United States or imported into the United States for processing and exported for purposes of human or animal consumption. FWS is not planning public outreach but will distribute congressional and stakeholder notifications. (Updated 05/08/2019)

By May 17, FWS plans to have internal/external guidance and a permitting process to allow tribes to retain eligible deceased eagles found within the exterior boundaries of federally recognized tribal reservations. This meets a 2017 request from several federally recognized tribes that FWS allow them to keep eagles found dead on tribal land without first sending them to the National Eagle Repository. This is a change from previous policy. The updated policy was finalized and placed in the Fish and Wildlife Manual on February 19. Tribal notification will occur as soon as the FWS develops guidance and the permitting process. (Updated 05/01/2019)

On or around May 17, the notice of availability for a draft environmental impact statement (EIS) will publish in the *Federal Register* for Hycroft, a large-scale gold mine looking to expand operations in northern Nevada. BLM briefed DOI on May 3. BLM is the lead on the EIS for the mine's expansion. FWS is considering issuance of an eagle take permit for impacts within the currently approved mine site and for additional impacts that would occur

to eagles under the proposed mine expansion. The EIS analyzes both the BLM and FWS respective decisions. Hycroft is requesting authorization for the take of six golden eagle nests and the loss of three eagle territories, in annual loss of productivity at the site. However, Alternative A, the preferred alternative to the proposal, would result in take of three golden eagle nests and one eagle territory. FWS needs to complete the public involvement process (draft and final EIS) before making a permitting decision. The amount of take authorized will depend on the alternative selected at the end of the NEPA process. (Updated 05/08/2019)

National Park Service

On or around May 12, the NPS intends to publish a proposed rule regarding the Pullman Avenue Connector Trail in Arkansas. The draft plan was released to the public in February. The rule, if finalized, would allow bicycle use on a new trail connecting Hot Spring National Park and property owned by the City of Hot Springs, Arkansas. The proposed rule will be open for a 60-day comment period. Both the rule and the plan will be finalized later this year. (05/08/2019)

By May 12, the NPS expects to submit the draft final rule for Alaska Sport Hunting and Trapping in National Preserves to OMB on schedule. (05/08/2019)

On or around May 13, the Director will approve three Battlefield Land Acquisition Grant awards, funded through the Land and Water Conservation Fund. Grants through this program are awarded to Government sponsors, in partnership with non-profits, for battlefield protection through fee simple and easement purchase. The total of the three grants is $499,705.96 and goes toward the protection of 131.49 acres at three Civil War battlefields: Spotsylvania Court House, VA, Champion Hill, MS; and Fort Blakeley, AL. (05/08/2019)

During the week of May 13, Redwood National Park will release an Environmental Assessment for the Lower B500 Road Removal Project for a 30-day public review period. The proposed action seeks to remove 0.8 mile of a failing logging road to prevent chronic sediment input into Larry Damm Creek, which is habitat for threatened salmonid fish species and aquatic species of concern. This road has been closed to the public since 1978 park expansion and has only been used administratively to rehabilitate previously harvested areas. It currently dead ends after 0.8 miles to a rehabilitated timber area. This project continues the park's ongoing efforts to remove failing roads that threaten park aquatic resources but have no administrative or public purpose. (05/01/2019)

On May 13, a contractor will begin a project to stabilize an embankment along the northbound George Washington Memorial Parkway near Spout Run. The long-planned project is being undertaken to prevent future damage to the Parkway from naturally occurring subsidence. Work is scheduled primarily overnight. The project will last into mid-summer and will require US Park Police to close one of the two northbound lanes during periods of work. (04/24/2019)

On May 13, the Lewis and Clark National Historic Trail, in partnership with the Town of Clarksville, Indiana, will hold a press conference announcing the extension of the Lewis and

Clark National Historic Trail. The press conference will be held at Falls of the Ohio State Park in Clarksville, Indiana. Confirmed speakers include Senator Todd Young (IN) and the Lewis and Clark National Historic Trail Superintendent. (04/17/2019)

On May 14, Shenandoah National Park will open the Loft Mountain Campground. This is a delay from the originally planned opening of May 1, due to unsafe conditions from multiple winter storms. Only 54 of the campground's 205 sites will be open to the public. As other campground sites and loops are cleared of hazard trees and deemed safe, those sites will be made available to the public. The park anticipates that only half the campground will be available on Memorial Day Weekend. A press release will be sent out to alert the public of this temporary closure. (05/08/2019)

On May 14, Mammoth Cave National Park will host a public meeting to solicit informal comments on several concessions facilities improvement projects. The projects include construction of new family cabins, parking lot, and site access improvements; repair of the main lodge roof and façade improvements; and the refinishing and upgrading of over 30 historical cottages. While the park is seeking public input on all of the projects, only the construction of new cabins and parking lot realignment projects will be included in a draft environmental assessment being developed for release this summer. (04/24/2019)

By May 15, the Department of the Interior Solicitor is expected to refer the New River Gorge National River claim for damages for encroachment/trespass to Department of Justice attorneys to provide time to negotiate a possible settlement. In June 2015, park employees discovered that the trees and other vegetation had been cut within the park adjacent to the Wild Rock housing development near Fayetteville, West Virginia. The NPS developed a claim for damages in the amount of $991,946. (05/08/2019)

On May 15, Glen Canyon National Recreation Area will convene a rating panel to select the Energy Saving Performing Contract (ESPC). On April 9–11, the top two proposals (Lockheed-Martin and Siemens Electric) toured the project sites, in preparation for a May 14 meeting to prepare their formal presentations. The park has been pursuing an ESPC for its electrical generation in remote areas of the park to convert diesel power and electrical generation stations into solar micro-grids. The estimated cost savings will pay for the project over its 25-year life. (05/01/2019)

On May 15, Great Basin National Park will begin a 30-day public scoping period to inform preparation of an Environmental Assessment for the Lehman Caves Management Plan and the Wild Caves and Karst Management Plan. The two plans aim to improve infrastructure, resource protection, and interpretive opportunities in Lehman Caves, which has over 30,000 visitors a year, and to protect the 39 other wild caves and karst areas in the park. The plans also include continuing and encouraging biological, geological, paleontological, and climate research; designating no-development and no-fire-retardant areas over caves; and emphasizing safety. (04/24/2019)

On May 15, the North Rim of Grand Canyon National Park is scheduled to open for the season. Winter storm conditions caused a rock slide resulting in two breaks on the inner-

canyon pipeline that supplies water to the park's North Rim. The remote inner-canyon location, rugged terrain, and continuing winter weather conditions make repairing the North Rim water pipeline particularly challenging. The NPS expects the North Rim to open as scheduled with repairs taking approximately four to six weeks. Until the breaks are repaired, water will not be pumped to the North Rim, however, water from a storage tank is available in the interim. (03/27/2019)

On May 16, the National Park Foundation (NPF) partnering with Nissan's *Calling All Titan*s campaign will be hosting a media day at Grand Canyon National Park to highlight its support of Grand Canyon Conservancy (GCC). Nissan will be donating a service truck to GCC's Canyon Field School. The NPS is helping to coordinate the event and finalize a filming permit with the Special Park Uses Program. On the same day, NPF and Nissan will meet with Arizona Conservation Corps (AZCC) as Nissan's campaign through the NPF, also provides funding for an AZCC crew in the park. (05/08/2019)

On May 17, Brown v. Board of Education National Historic Site and partners will commemorate the 65th anniversary of the Supreme Court decision in *Brown v. Board of Education of Topeka*. Community activities will be held and include a film festival, original performances of dance and theater, art exhibits, symposia or lectures, and tours of civil rights sites and public art work around town. Several of the events will include some of the original plaintiffs and Topeka teachers and administrators. (03/13/2019)

On May 17, Mount Rainier National Park will host a press briefing for the reopening of the Historic Paradise Inn, a National Historic Landmark. The $23 million rehabilitation of the Paradise Inn Annex is a significant investment to address deferred maintenance while simultaneously completing much needed historic preservation and ensuring high quality visitor experiences for generations to come. NPS representatives, project contractors, and the park concessionaire will lead tours and brief the media. On May 17, the Paradise Inn will open to the public. (04/17/2019)

8-30 Day Outlook

U.S. Fish and Wildlife Service

NEW ITEMS

During the week of May 27, FWS plans to announce the report *Banking on Nature 2018: The Economic Benefits of National Wildlife Refuge Visitation to Local Communities*. The report focuses on the economic impact of consumptive and non-consumptive uses on refuges, and how they affect the economy of local regions. Visitation records of 158 sample refuges around the country were used to estimate the economic role that refuge visitors play in regional economies. Outreach is planned to include a national news release, talking points, and website updates. (05/08/2019)

Through May 31, J.N. "Ding" Darling NWR is seeking public comment on a proposed increase in entrance fees. Once the public comment period ends, the refuge will evaluate its

proposal and make a final determination. If the new fee schedule is adopted, the new fees will be implemented October 1, 2020. (05/08/2019)

ONGOING ITEMS

Around May 20, FWS plans to publish a notice of availability of a 30-day public comment period for a draft environmental assessment (EA) as part of the reconsideration of an eagle incidental take permit (EITP) to Garrett Construction Company LLC for their residential housing development project in the City and County of Broomfield, Colorado. FWS issued an EITP to Garrett in 2018 due to possible disturbance take of a pair of bald eagles nesting in proximity to the Garrett project. In 2018, a court complaint was filed in U.S. District Court for Colorado by Front Range Nesting Bald Eagle Studies challenging the FWS action. On December 13, 2018, a ruling was issued by the U.S. District Court for the District of Colorado affirming and vacating the FWS action of issuing an EITP to Garret, and the associated EA. Both were remanded to FWS for further consideration. Garrett has amended their EITP application and is seeking an EITP for 2019 for their project. The EA will be posted to the FWS Region 6 website. (05/01/2019)

On or around May 20, FWS plans to announce approximately $17.8 million in federal funding approved for the FY 2019 Clean Vessel Act (CVA) Program. The CVA Program provides matching grants to state boating agencies for the construction and renovation of pumpout and dump facilities for recreational boats as well as education programs to inform boaters and the public about the benefits of keeping public waters clean by properly disposing of boater sewage. Outreach includes a news release, social media, and emails to congressional offices and stakeholders. (05/01/2019)

In May, FWS plans to integrate pay.gov, an electronic payment receivable system, into its existing Service Permits Issuance and Tracking System (SPITS). Permittees will be able to pay for their permits electronically via SPITS rather than sending paper checks. This will reduce the time to process permits and improve efficiencies for FWS by reducing or eliminating paper check handling. The pay.gov integration process is currently in testing phase (Updated 04/03/2019)

By the end of May, FWS plans to deliver the 2017 Water Resources Reform and Development Act Report to Congress. This report, the fourth annual, summarizes activities and expenditures to manage the threat of Asian carp in the Upper Mississippi River and Ohio River basins, including the Illinois River. The report is required by the Water Resources Reform and Development Act of 2014. Date for delivery to Congress is flexible and dependent on the DOI and OMB approval process. Outreach includes a news release, Q&As, talking points, and congressional and partner notifications. (04/10/2019)

By the end of May, FWS will transmit to Congress an analysis of potential options for increasing the capacity of its Wildlife Inspection Program (WIP). Included in the analysis are reports that evaluate the funding structure of the program and provide recommendations to help it better achieve full cost recovery for the program; evaluate the WIP port designation structure and provide recommendations for future wildlife port designation; and evaluate the staffing structure of the WIP and provide a staffing model to help optimize the use of current

and future staff at wildlife ports. The analysis and reports are currently with OMB for final review and clearance. They cannot go to Congress until they have cleared OMB. Outreach will likely include a news release. (Updated 04/03/2019)

On or around May 31, pending final clearance by OMB, FWS and NOAA Fisheries (NMFS) plan to send to the *Federal Register* final revised regulations of the Endangered Species Act. FWS and NMFS sent the draft final revised regulations pertaining to interagency cooperation pursuant to section 7 of the ESA and the procedures for listing of species and designation of critical habitat pursuant to section 4 of the Act to OMB for review on December 21, 2018. FWS previously submitted to OMB on November 26 a draft final withdrawal of the blanket 4(d) rule for newly listed threatened species to recognize the difference between endangered and threatened species and align with NMFS's current practice. The interagency review comments were due on the 4(d) rule in December and on the section 7 and section 4 rules on February 13. FWS and NMFS received interagency review comments from OMB on all three rules, reviewed those comments, and are currently revising the rules to address the comments received during interagency review and direction from DOI policy officials. Internal briefings will be scheduled for May 13 and 14; May 16 is the goal for submitting these revisions to OIRA. (Updated 05/08/2019)

On or before June 3, FWS plans to publish in the *Federal Register* a proposed rule, opening a 45-day public comment period for the 2019-2020 Station-specific Hunting and Sport Fishing Regulation (rule). The rule would open or expand approximately 1.4 million acres to hunting and/or sport fishing at 74 national wildlife refuges. The rule also proposes to formally open 15 national fish hatcheries to hunting and/or sport fishing with a proposed update to regulations in 50 CFR Part 71. In addition, the rule proposes revisions to existing regulations in all 50 states to better align with state hunting and fishing regulations while continuing to ensure safe and compatible opportunities. Planned outreach [MA2] includes a national news release when the *Federal Register* notice publishes and notifications to members of Congress and stakeholders, as well as the potential for an event to announce the proposal. (Updated 05/01/2019)

On or around June 5, FWS plans to publish in the *Federal Register* for public comment an environmental assessment (EA) that analyzes the risk of bald and golden eagle take associated with operation of the Dunlap Wind Energy Project in Carbon County, Wyoming. PacifiCorp is requesting a 30-year Eagle Take Permit (ETP) for take of bald and golden eagles, pursuant to the 2016 Eagle Act regulations. The project became operational in October 2010 and consists of 74 wind turbines with a nameplate capacity of 111 megawatts. PacifiCorp developed an Eagle Conservation Plan, which describes how the project incorporated avoidance and minimization measures for eagles, and includes proposed mitigation measures and an adaptive management process. Preliminary analyses of the post-construction monitoring data predict that up to 3.5 bald eagles and 3.5 golden eagles could be killed annually incidental to the operation of the Project. The EA will be available for a 30-day comment period. A decision record will be issued on the permit application after public comments on the EA are evaluated. (04/17/2019)

FWS has analyzed SAExploration Inc.'s (SAE) 3D seismic survey operations proposed to take place during the winters of 2019/2020 and 2020/2021 and prepared draft incidental take regulations (ITRs) under the Marine Mammal Protection Act. On April 15, SAE requested a delay to any further work on their ITR application for the Coastal Plain, including posting of the application in the *Federal Register* pending additional review and consultation by SAE. Publication date is uncertain at this time, but the proposed rule will likely be controversial when it does publish. The rule will be available for public comment for 30 days. FWS continues to coordinate with BLM to determine when it intends to publish the NEPA document for the seismic work. The rule is currently under review in the FWS Director's office. Outreach includes congressional notification and a news release (possibly joint with BLM) on the ITR and the EA. (05/01/2019)

Endangered Species Act Actions through June 7:

Species	**Action**	**Current Status**	**Target Date to FR (dates in bold are litigation deadline)**	**Outreach**
Southern Selkirk Mountain woodland caribou	Final reclassification as distinct population segment, endangered	Pending Exec-Sec clearance	As soon as it clears	Regional release
Meltwater lednian stonefly, Western glacier stonefly	Final listing determination as threatened	Pending Exec-Sec clearance	As soon as it clears	Regional release
Franklin's bumble bee	Proposal to list as endangered	Pending Exec-Sec clearance	As soon as it clears	Regional release

Neuse River waterdog, Carolina madtom	Proposed listing of Neuse River waterdog as threatened and Carolina madtom as endangered, with proposed critical habitat	Pending Exec-Sec clearance	As soon as it clears	Regional release
Running buffalo clover	Proposed delisting	Pending Exec-Sec clearance	As soon as it clears	Regional release
Batch of 29 draft recovery plan revisions for 42 species (APG Batch 2)	Notice of availability of draft recovery plans	Pending FWP clearance	As soon as it clears	National and regional releases
Batch of 29 draft recovery plans for 43 species (APG Batch 2.5)	Notice of availability of draft recovery plans	Pending FWP clearance	As soon as it clears	National and regional releases
Water Howellia	Proposed Delisting	Pending FWP clearance	As soon as it clears	Regional release
Barrens topminnow	Final listing determination as endangered	Pending FWS Director clearance	As soon as it clears	Regional release
Texas Hornshell	Proposed Critical Habitat	Pending FWS Director clearance	As soon as it clears	Regional release

2016 Recovery Report to Congress	Transmittal of 2016 Biennial report	Pending FWS Director clearance	As soon as it clears (release to Congress; will not be published in the FR)	National - Congressional notifications and post the report online
Batch of 28 draft recovery plan revisions for 53 species (APG Batch 3)	Notice of availability of draft recovery plans	Pending FWS Director clearance	As soon as it clears	National and regional releases
Foskett speckled dace	Final Delisting	Pending FWS Director clearance	May 13	Regional release
Batch of 21 draft recovery plan revisions for 43 species (APG Batch 4)	Notice of availability of draft recovery plans	Pending FWS Director clearance	May 17	National and regional releases
Batch of 21 draft recovery plan revisions for 25 species (APG Batch 5)	Notice of availability of draft recovery plans	Pending FWS Director clearance	May 17	National and regional releases
Lake sturgeon, Siskiyou mountains salamander, Gila topminnow	90-day findings on ESA petitions	Pending FWS Director clearance	May 23	National release
Spring Pygmy Sunfish	Final Critical Habitat	Pending FWS Director clearance	May 24 (in litigation on deadline)	Regional release

Monito Gecko	Final Delisting	Pending FWS Director clearance	May 28	Regional release
Gray Wolf	Notice of extension of comment period and announcement of a public hearing	FWS	May 8	National release
ESA Revised Regulations	Listing Species and Designating Critical Habitat, Prohibitions, Interagency Cooperation	Addressing OMB interagency comments	May 31	National release

National Park Service

NEW ITEMS

On May 20, Grand Canyon National Park will issue a notification to incumbent concessioners and the public that the park will request approval to extend the 16 existing concession contracts to provide guided Colorado River trips for an additional year to collect another year of data. The goal of collecting additional data is to better understand the expenses the river concessioners have incurred or expect to incur due to changes in local, state, and federal laws that affect labor expenses and associated costs of providing these services. The notification is a courtesy to the existing concessioners to provide additional transparency. Visitor services will not be interrupted. The extensions will authorize operations through 2020. (05/08/2019)

On or about May 24, the Bryce Canyon National Park Environmental Assessment (EA) for State Route 12 Stabilization and Improvements will be released for a 30-day public review. The NPS and the Utah Department of Transportation co-led the EA process with Garfield County as a cooperating agency. (05/08/2019)

By May 30, the Mississippi Department of Archives and History-owned lands that make up the Champion Hill Battlefield are expected to be transferred to Vicksburg National Military Park. This acquisition will add 836 acres to the park, increasing the park size by nearly 50

percent. It is the largest expansion to the park since the park was created in 1899. (05/08/2019)

During the month of May, a small section of an off-road vehicle (ORV) route near Cape Point at Cape Hatteras National Seashore may close to visitor access as shorebird nesting protection areas are implemented. Cape Point, a popular fishing and shelling location also known as "Shelly Island", closes temporarily almost every summer through the end of August to allow for several species of shorebirds to complete nesting. Although Cape Point may close temporarily, the Seashore expects that the majority of ORV routes (about 27 miles, 90-95 percent) will be accessible throughout the summer. (05/08/2019)

In May, the NPS Midwest Regional Office will transmit comments on a review draft of the contractor-prepared Feasibility Study for the Theodore Roosevelt Presidential Library. The North Dakota state legislature passed a bill in April setting aside $50M for an endowment with the requirement that $100 million is raised for the construction of the library. On May 10, the Theodore Roosevelt Presidential Library Foundation Board met to determine a fundraising strategy and next steps. The Board held Medora community informational meetings three times in March and April. The Theodore Roosevelt National Park South Unit entrance continues to be the preferred alternative for locating the new facility. (05/08/2019)

By June 3, Cape Lookout National Seashore expects to receive the United States Coast Guard's decision on whether navigational buoys in Barden Inlet will have to be removed or shifted due to loss of the inlet's integrity. Barden Inlet is the main pathway for commercial ferries, tour groups and private boaters to access the park. The NPS is working with the Coast Guard, Corps of Engineers, county, and state officials towards a solution. This issue is of interest to the public, media, and Congress. (05/08/2019)

During the week of June 3, Google will hold a public event at Stonewall National Monument to launch the release of Stonewall Forever. The $1 million project, a collaboration between Google, the LGBT Community Center, and the National Park Service is an on-line repository of stories intended to preserve and share the untold history of the Stonewall Uprising of 1969 and the early years of the LGBTQ rights movement. The project includes an augmented reality component utilizing historic imagery that the public will be able to experience from their smartphones. (05/08/2019)

Between June and August, a report that evaluates the physical and biological factors affecting beach nesting wildlife at Cape Hatteras National Seashore could be released to the public. The report, coordinated by Virginia Tech University, could receive media attention because the topic of protecting beach nesting wildlife at the Seashore has been controversial over the last decade. (05/08/2019)

UPDATED ITEMS

On May 29, Gulf Islands National Seashore and the US Army Corps of Engineers (USACE) will hold a *Ground Building* ceremony celebrating the restoration of Ship Island (Mississippi). The NPS Deputy Regional Director will attend. The Assistant Secretary of the

Army for Civil Works is tentatively scheduled to attend. Regional and departmental leadership of the USACE are expected. The Bureau of Ocean Energy Management Director may attend. (Updated 05/08/2019)

ONGOING ITEMS

On or around May 20, the Acting National Capital Regional Director is expected to sign a Finding of No Significant Impact for the Rock Creek Park Nature Center Complex Development Concept Plan/Environmental Assessment (plan/EA). The plan/EA proposes improvements and management changes for the park's nature center, horse center, maintenance yard and associated grounds. This has not been controversial and little media interest is expected. (5/1/2019)

On or around May 20, the NPS expects to submit the Revised Feasibility and Suitability Study for Additional Routes of the Oregon, Mormon Pioneer, California, and Pony Express National Historic Trails to the Department for approval and transmittal to Congress. The study was completed pursuant to Section 5302 of Public Law 111-11, the Omnibus Public Land Management Act of 2009. The purpose of the study was to evaluate 17,043 miles of trail routes in 13 states for possible addition to the existing four national historic trails. Of 77 total study routes, the NPS determined that 26 routes (7,589 miles) are nationally significant and eligible for designation; furthermore, the addition of these routes is feasible, suitable, and desirable. (04/17/2019)

During the week of May 20, the NPS expects to submit the Oregon Caves National Monument and Preserve Wild and Scenic River Study to the Department for approval and transmittal to Congress. The study was completed pursuant to section 3041 of Public Law 113-291. The segments evaluated include: Lake Creek (3.6 miles), Lower Cave Creek (2.6 miles), No Name Creek (0.6 miles), Panther Creek (0.8 miles), and Upper Cave Creek (0.2 miles). The NPS also studied Waterfelt Creek (0.8 miles) through Section 5(d)(1) of the WSR Act. The NPS determined that Lake Creek and Upper Cave Creek (currently managed by NPS) are eligible and suitable for WSR designation; the other segments were found to be ineligible. (04/17/2019)

By May 28, the NPS expects the contractor to begin repairs to the visitor loading ramp at the USS Arizona Memorial. The project is projected to be complete by fall 2019. Since March 28, the NPS has provided monthly updates on the project to the Hawaii congressional delegation. (Updated 05/08/2019)

From May 21–June 4, Saratoga National Historical Park will be conducting a large scale archaeological survey. The park is partnering with the American Battlefield Trust and the American Veterans Archaeology Recovery organization who connect wounded warriors to American battlefields through archaeological training. This is the largest, most complex, archaeological survey at the park to date. (05/01/2019)

On May 23, the NPS will brief the Executive Review Team regarding the Great Sand Dunes National Park and Preserve Ungulate Management Plan and Abbreviated Final

Environmental Impact Statement (AFEIS) for the required 30-day no action period. This briefing is required by Step 5 of the DOI NEPA Document Clearance Process memorandum. Per the memorandum, the administrative drafts of the AFEIS and Record of Decision, and other briefing materials, will be submitted to the Review Team five days before the scheduled briefing. The preferred alternative in the AFEIS continues public elk hunting in the preserve, provides the NPS with lethal and non-lethal tools for elk management in the park, includes opportunities for skilled volunteers and tribal members, and amends the park's general management plan to allow for a bison herd to remain in the park after the NPS acquires the Medano Ranch from The Nature Conservancy. (05/01/2019)

On May 24, Yellowstone National Park will issue a temporary moratorium on watercraft equipped with sealed internal water ballast tanks on all park waters for the 2019 season to minimize the risk of introducing Dreissenid mussels and other aquatic invasive species. Ballast tank boats contain sealed tanks that can be filled with water to produce specific wakes for waterskiing and wakeboarding. The park prohibits waterskiing or wakeboarding, and only about two dozen of these boats enter the park each year. This temporary moratorium will address the high risk Dreissenid mussels pose to waterways. Yellowstone will revisit this moratorium at the end of the 2019 boating season. The states agree with the moratorium. (05/01/2019)

On or around May 24, the Deputy Director is expected to issue a Policy Memorandum that provides guidance on the use of electric bicycles (e-bikes) within the National Park System. Superintendents will be given the authority to allow pedal-assist e-bikes on park roads, paved or hardened trails, and administrative roads where traditional bicycles are allowed. They will be generally prohibited in primitive, undeveloped areas of parks. (04/17/2019)

Beginning May 24, Gateway National Recreation Area will implement a rule change that will restrict the consumption of alcoholic beverages and the possession of open containers of alcoholic beverages on the swimming beaches of the park's Sandy Hook Unit. The primary purpose of the rule change is to address persistent public safety challenges related to excessive alcohol consumption by beach-goers. The sale and consumption of alcohol will still be allowed at certain permitted activities and events. (03/27/2019)

On or after May 27, Haleakalā National Park will release the Kalahaku Overlook Area Management Environmental Assessment (EA) for a 30-day public review and comment period. The overlook is one of four locations in the park where visitors gather to watch the sunrise and sunset and enjoy broad crater vistas. The EA analyzed alternatives that aim to improve visitor enjoyment and safety and reduce adverse impacts to natural and cultural resources. The need for this action is driven by the number of visitors to the overlook, the lack of clearly defined trails and visitor use areas, as well as documented impacts to endangered species and critical endangered species habitat. (Updated 05/01/2019)

Beginning May 27, Yosemite National Park will begin a pilot lottery system for Camp 4 reservations. The popular Yosemite Valley campground is currently operated on a first-come, first-served basis, which has resulted in resource impacts and conflicts among visitors. The park is working with the campground contractor to implement the lottery. The park will issue

a news release in early May announcing the pilot program, which is scheduled to run through Labor Day weekend. (04/10/2019)

On May 31, the prospectuses will close for Guided Day Kayaking and Guided Overnight Kayaking in Glacier Bay National Park and Preserve (NPP). These prospectuses were released on March 19. The Region released the prospectus for guided sport hunting in Wrangell-St. Elias NPP on March 21 and it is anticipated to close on July 1. (Updated 03/27/2019)

By the end of May, National Mall and Memorial Parks expects to turn on the American Veterans Disabled for Life Memorial fountain. A broken waterline under the pavement was discovered on March 28 and necessitated a delay in turning on the fountain. The fountain at the Franklin Delano Roosevelt Memorial is off due to water intrusion in the electrical system; the park is actively working on assessing and mitigating this intrusion. (04/03/2019)

In May, the Interagency Visitor Use Management Council will release the Visitor Capacity Guidebook to the general public via the council's website (https://visitorusemanagement.nps.gov/). The NPS and FWS prepared a joint briefing statement for DOI on the upcoming guidebook release. The guidebook, in combination with the council's Visitor Use Management Framework, provides managers with processes and tools to collaboratively develop long-term strategies to manage the amounts and types of visitor use to protect resources, improve access, connect visitors to key experiences, and achieve desired resource conditions and visitor experiences. The guidebook is not agency policy, but represents recommendations developed by the council for consistent best practices based on the current knowledge of visitor use management. (05/01/2019)

On June 4, the comment period will close for the Environmental Assessment for the Northern California Condor Restoration Program to reintroduce condors at Redwood National Park and Yurok Ancestral Territory. The comment period for the related proposed rule by the FWS to designate the condor population in the Pacific Northwest as a nonessential experimental population also closes on June 4. The proposed actions have broad local and regional support and will benefit condors by facilitating their return to northwestern California and the surrounding region. Public meetings are being held in California and Oregon. (05/01/2019)

On June 7, the NPS will brief the Executive Review Team regarding the Gulf Islands National Seashore Personal Watercraft Management Plan and Final Environmental Impact Statement (FEIS). This briefing is required by Step 5 of the DOI NEPA Document Clearance Process memorandum. Per the memorandum, the administrative drafts of the FEIS and Record of Decision, and other briefing materials, will be submitted to the Review Team five days before the scheduled briefing. (04/24/2019)

On June 8, Kenai Fjords National Park will host a Grand Opening event in celebration of the installation of new exhibits and complete rehabilitation of the park's main visitor center, which now features full accessibility including new ramps and an indoor elevator. Elected

officials and local Tribal and community leaders have been invited to participate. (04/10/2019)

ASSISTANT SECRETARY FOR INDIAN AFFAIRS (Indicates Press/Comms Opportunities)

In the Office:

AS-IA Sweeney
PDAS Tahsuda
DAS-PED Cruz
DAS-M Freihage
COS Myers

On May 15 PDAS Tahsuda will Testify before the Senate Committee on Indian Affairs on the Addressing Underdeveloped and Tribally-Operated Streets (AUTOS) Act the Bison Act.

Immediate Announcements and Actions for the Next Week (May 12 - May 18)

Assistant Secretary - Indian Affairs

The Office of Indian Gaming has received a submission from Seneca Nation asking for approval of a compact amendment and anticipates responding within the week of May 12.

8-30 Day Outlook (May 19 - June 20)

Bureau of Indian Affairs

NEW ITEMS

On June 10, Office of Trust Services senior management will conduct a Managers Symposium in Albuquerque, New Mexico. Human Resources, Freedom of Information Act compliance and Budget are top priority items to discuss for long term planning. An Open House at the new offices will be held for the local community.

On June 10-13, the Inter-Tribal Timber Council (ITC) and the Seminole Tribe will host the Annual National Timber Symposium in Holywood, Florida. Topics will center around forest management planning, the next fire season, and development of new tribal forest managers.

Two Oregon Tribes have been approved to participate in the Demonstration Project authorized under Title II of the Indian Trust Asset Reform Act (ITARA), and have requested technical assistance relevant to the development of their Indian Trust Asset Management Plans (ITAMPs) and Tribal Forestry Regulations. BIA Central Office and Northwest Regional Office staff will provide the technical assistance.

June 11-13, the Office of Trust Services, Branch of Fisheries, Wildlife & Recreation, will host a meeting of regional staff with a goal of improving the tribal management and reporting of program funding for fish and wildlife projects. This effort will improve the ability of tribes to compete for funding for fish and wildlife management projects..

ONGOING ITEMS

On May 13-16, the Office of Trust Resources, Division of Natural Resources, is hosting a Fish, Wildlife and Parks Conservation Law Enforcement Officer (CLEO) Team Meeting. The Team will review and rank proposals to support tribal natural resource enforcement programs.

On May 14, the 12th Annual Department of Interior Law Enforcement Officers' Memorial Ceremony will be held at the Sidney R. Yates Auditorium at 11am. The Department will recognize three Indian Country fallen law enforcement officers.

ASSISTANT SECRETARY INSULAR AND INTERNATIONAL AFFAIRS

Week Ahead Schedule of Meetings, Hearings, and Travel for the upcoming week, May 12 - May 18

TRAVEL

AS-IIA Domenech will be in the office.

OIA Director Pula will be in the office.

Sarah Jorgenson, Senior Advisor, will be in the office.

INT Director Senhadji will be in the office.

Oceans Program Coordinator Liza Johnson will be in the office.

Press/Communications Outlook (30 DAY OUTLOOK)

Week of May 12 - OIA Press Release on Technical Assistance Grant Program Funding: Funding for (1) the Republic of the Marshall Islands Marshallese Educational Initiative for the Marsallese Resource and Educational Center in Arkansas, and (2) a Reimbursable Support Agreement with the United States Environmental Protection Agency for the continuation of the Freely Associated States Water Quality Laboratory Certification Program.

Week of May 12 - OIA Press Release on Northern Marianas Capital Improvement Grant Program Funding: Funding for the Commonwealth of the Northern Mariana Island (CNMI) to support the Commonwealth Utilities Corporation and CNMI CIP Program Office and Infrastructure Maintenance, as well as serve as cost share for FEMA projects in relation

to Super Typhoon Yutu. $1 million was previously awarded to the CNMI for the Public School System in the aftermath of Yutu.

May 16 - Signature of MOU between DOI and Israel's Nature and Parks Authority (INPA): The INPA Director General will sign the MOU previously signed by the former DOI Secretary at a ceremony on May 16 at Castel Park near Jerusalem. The MOU creates a framework for cooperation on biodiversity conservation, protected areas, and cultural and historical heritage. The U.S. Ambassador to Israel is expected to attend the event. The DOI Press Secretary is coordinating with the Public Diplomacy officer at U.S. Embassy Israel on press and communications.

May 21 - DOI/WH Press Coordination - POTUS meeting at WH with Presidents of the Freely Associated States (Palau, Republic of the Marshall Islands, and the Federated States of Micronesia). Secretary Bernhardt to attend. Historic first meeting between FAS leaders and POTUS.

Late May - OIA Press Release - Energizing Insular Communities: Announcing open season for the Energizing Insular Communities (EIC) grant program applications for energy strategy proposals that reduce the cost of electricity while supporting the territories' strategic energy plans and/or energy action plans.

Immediate Announcements and Actions for the Next Week (May 12 - May 18)

OIA Technical Assistance Grants Approved: AS-IIA Domenech approved the following in Technical Assistance grants, which will be awarded in May:

- $217,594.50 to the Marshallese Educational Initiative, Inc. for the Marshallese Resource and Educational Center (MREC) in Arkansas. MREC will provide full-time, bilingual office staff to assist with translation, notary services, youth mentorship program and workshops about financial planning, resume-building, educational opportunities, public services, raising awareness on prevention of domestic violence. Staff also assists local agencies with interpreter services and cultural training.
- $199,250 Reimbursable Support Agreement with the United States Environmental Protection Agency for the continuation of the Freely Associated States Water Quality Laboratory Certification Program. This agreement ensures that the Freely Associated States laboratories continue to produce scientifically valid and legally defensible water quality data for drinking water and marine waters.

Northern Marianas Capital Improvement Funding: AS-IIA Domenech approved $8,665,000 in Capital Improvement Project (CIP) grants for the Commonwealth of the Northern Mariana Island (CNMI). This funding will support the Commonwealth Utilities Corporation and CNMI CIP Program Office and Infrastructure Maintenance, as well as serve as cost share for FEMA projects in relation to Super Typhoon Yutu. $1 million was previously awarded to the CNMI for the Public School System in the aftermath of Yutu.

U.S. Coral Reef Task Force (USCRTF) Steering Committee Meeting: On May 16, the DOI Ocean, Great Lakes, and Coastal Program Coordinator will co-chair the USCRTF

Steering Committee Meeting along with her counterpart at NOAA. The meeting will include participation from federal, state, and territorial members. The focus of the meeting will be planning for the next meeting in Palau in September, updating the work plan, and process to include FEMA as a member of the USCRTF.

902 Consultation Report: OIA is working with Governor Torres in response to his questions on the draft report. Expectation is that the report will be finalized the week of May 12. Recall, on April 30, AS-IIA Domenech sent the draft to Governor Torres after intergovernmental review and an approved extension from the White House. Once the Governor concurs with the report, it will be sent to the President as is, or with slight modifications. If he disagrees, separate recommendations will be laid out within the report, and then it will be sent to the President.

8-30 Day Outlook (May 19 - June 20)

NEW ITEMS

Island Government Finance Officers' Association Summer Meeting. The 2019 Government Finance Officers Association (GFOA) meeting will take place in Los Angeles, California, from May 19-22, 2019. Insular government participants will join regular GFOA sessions, but will also meet for a day in advance of the GFOA, and following the GFOA, to discuss targeted issues of relevance to the insular areas. Although 50 participants are expected to represent the insular governments overall, OIA funds 17 participants (one from each of the FSM governments (5), and two from each of the other governments (12).

Offshore Environmental Regulation and Oil Spill Response Workshop: DOI-ITAP is coordinating a three-day workshop in New Orleans May 21-24 for a group of government officials from Argentina. This workshop will focus on U.S. best practices for responding to offshore spills and drafting environmental regulations for offshore oil and gas development. NOAA, the Coast Guard, and the Department of Commerce will participate in addition to specialists from DOI bureaus. This activity is funded by the State Department.

USVI and Puerto Rico Meetings: AS-IIA Domenech will travel to the United States Virgin Islands June 2-6 to deliver grants in person, meet with USVI officials, and visit OIA-funded projects along with NPS Acting Director Smith. From there, AS-IIA Domenech will travel to Puerto Rico from June 6-8 for Conservation Trust of Puerto Rico meetings.

COFA Funding Extension Discussion: OIA continues to work with the NSC and other agencies on how to fund the financial extension of the Compacts of Free Association.

UPDATED ITEMS

UPDATE. Freely Associated States Presidents Meeting with POTUS: White House invitations have been accepted for a meeting on May 21 between the President and the Presidents of the Freely Associated States (Palau, the Republic of the Marshall Islands, and the Federated States of Micronesia). This would be the first-ever joint meeting with these

three Pacific countries key to the Administration's Indo-Pacific Strategy. DOI continues to work with the NSC and State in preparation for this meeting, including putting together background materials. In addition, DOI is looking into hosting the FAS Presidents for breakfast while they are in town, if time and scheduling allows. The Secretary is scheduled to attend.

UPDATE. Guam War Claims: On May 8, OIA staff participated on a conference call led by the WH Office of Intergovernmental Affairs, along with Treasury, Justice, and representatives from the Guam Government on the possible legislative or administrative solutions to commence authorized compensation payments to victims of Guam's occupation during World War II. DOI SOL staff drafted a possible legislative fix that is under review by OIA and Budget. The goal is to develop and socialize the solution with Treasury, the White House, and Rep. San Nicolas as soon as possible. The 75th anniversary of the Liberation of Guam takes place in July 2019.

Interagency Agreements: The Office of Insular Affairs will enter into an Interagency Agreement with the United States Postal Service (USPS) for services provided to the Freely Associated States (FAS). $2,288,938 will be provided in support of transportation and administrative costs for fiscal year 2018.

OCS and U.S. Territories: On May 14, the Senate Energy and Natural and Resources Committee will conduct a legislative hearing that will include, among eight bills, S. 499 (Cassidy-LA), a bill to amend the Outer Continental Shelf Lands Act to apply to the territories of the United States, to establish offshore wind lease sale requirements, to provide dedicated funding for coral reef conservation. Recall, on May 1, the House Natural Resources reported H.R. 1014 (Gonzalez-Colon-PR), the companion bill to S. 499. H.R. 1014 awaits House consideration.

ONGOING ITEMS

NO CHANGE. Lowy Institute Meeting: On May 16, the Director of the Pacific Islands Program from the Australia-based Lowy Institute will meet with AS-IIA Domenech, OIA Director Pula, and additional members of the OIA team to learn about the Lowy Institute's Pacific Aid Map and to discuss current geopolitical dynamics in the Pacific.

UPDATE. Disaster Recovery Legislation: During the week of May 6, both the House and Senate may consider competing versions of revised disaster assistance legislation. In the House it will consider a bill that providing $17.2 billion in aid to areas affected by recent natural disasters. The House passed the measure on January 16. For the territories, the House-passed bill includes: 1) $2 million for Technical Assistance for financial management expenses related to the consequences of Typhoon Yutu; 2) increased funding for the Northern Marianas Medicaid program to help the islands in recovery from Typhoon Mangkhut and Super Typhoon Yutu; 3) increased funding for the Marianas food stamps block grant to cover the cost of households, not previously eligible for aid, who remain in need of assistance because of continuing income loss after Typhoon Mangkhut and Super Typhoon Yutu; and 4) increased nutritional assistance for American Samoa.

UPDATE. American Samoa Hospital Assessment: The U.S. Army Corps of Engineers completed its on-the-ground assessment of the hospital and drafted its report. OIA has provided comments to the draft. OIA expects to meet the May 16 deadline to provide the Report to the Committee on Appropriations.

NO CHANGE. Fiscal Year 2020 Compact Sector Grant Budget Consultations (Federated States of Micronesia): From May 20-28, OIA Honolulu Field Office grant managers will be meeting in each of the four FSM states governments (Kosrae, Pohnpei, Chuuk, and Yap) with national and state government officials to review FY20 Compact Sector Budget Proposals. Final budget submittals to the U.S. Government are due on July 1.

NO CHANGE. Dam Impact Assessment, Colombia. From May 19-June 1 DOI-ITAP will send a team of two experts, one fisheries biologist and one hydrologist, to Colombia to work on assessing the impact of the Hidroituango Dam on downstream fisheries. This will be followed by a review of a recent assessment drafted by the dam operator after a floodgate failure in February of this year. This activity is funded by the Department of State.

NO CHANGE. Groundwater Management Policy Reform, Armenia. From May 28-June 6 DOI-ITAP will send a retired groundwater expert from the USGS to assist with the Ararat Valley's groundwater restoration, which will serve as a basis for implementation of future measures to balance drinking, irrigation and industrial use of water and promote the self-restoration of groundwater in the Valley. This activity is funded by the Department of State.

NO CHANGE: Paris Auction of Native American Objects. The Eve auction house has postponed to June 6 its next auction of pre-Columbian and American Indian Art. Over the past 5 years, this auction house has sold numerous objects considered sacred by Indian Tribes. If Tribes identify problematic items once the catalogue is released for this auction, and request federal government intervention, INT will coordinate with experts across DOI and the State Department to assist.

AWARENESS

NSC PIF Meeting: The Secretary will serve as head of delegation. Planning for the trip has begun, including identifying potential deliverables to be announced at the forum.

American Samoa Economic Report: A new report from American Samoa's government says the territory must diversify its economy or face a potential economic disaster. American Samoa's Commerce Department believes that if the last tuna cannery (StarKist) closes, it will trigger a catastrophic economic disaster. Objectives for diversifying the economy include reviewing the negative impacts of minimum wage increases and creating new industries. American Samoa would like to allow the territory to have more control over any increases in minimum wage to use local input and local data for any adjustments.

Resolution for RMI Veterans: The Nitijela of the Republic of the Marshall Islands sent to the U.S. Embassy in RMI a Certified Resolution that was adopted requesting the United

States Department of Veterans Affairs and appropriate agencies of the U.S. Federal Government to provide the benefits and services of which Marshallese citizens who have served in the United States Armed Forces are entitled to and as is currently being provided to all the U.S. veterans residing in the United States and its territories.

Big Island of Hawaii Land Purchase: The Marshall Islands' Kili/Bikini/Ejit (KBE) Local Government purchased 283 acres of land on Hawaii for future development reportedly using $4.8 million of trust fund monies. The trust fund for these nuclear testing affected atolls were capitalized by the U.S. but are now wholly controlled by the local government.

Medicaid Oversight Hearing: The House Natural Resources Committee is expected to conduct an oversight hearing on May 23 on the impending *Medicaid Cliff* -- September 30, 2019, when supplemental funding from the Affordable Care Act expires, jeopardizing health care delivery for Medicaid recipients and the population at large in the U.S. territories. Invited witnesses will be from HHS and the Medicaid directors from each of the territories, including Puerto Rico.

Raising the Minimum Wage: During the week of May 6, the House of Representatives may consider H.R. 582, Raise the Wage Act, which would incrementally increase the Federal minimum hourly wage to $15 over five years. Historically, legislation raising the minimum wage has had a negative impact on the economies of the Pacific territories. OIA understands that this legislation will not affect the existing wage schedule in American Samoa.

Education Assistance: On May 1, Congressman Sablan (CNMI) introduced the Northern Mariana Islands and American Samoa College Access Act, legislation to amend the Higher Education Act of 1965 to establish a program that enables college-bound residents of the Northern Mariana Islands and American Samoa to have greater choices among institutions of higher education. Specifically, the bill authorizes special federal tuition assistance for graduates of Northern Marianas College and American Samoa Community College who want to pursue a four-year degree at any public university in the United States. The grant covers the difference between in-state and out-of-state tuition. The Marianas and American Samoa are the only insular areas without four-year colleges. Mr. Sablan plans on attaching this bill to larger legislation reauthorizing a variety of college programs later this year.

CNMI Selected by NGA for Health Preparedness Workshop: The National Governors Association recently announced that the Commonwealth of the Northern Mariana Islands is among five states and territories selected to participate in the NGA Center for Best Practices' Public Preparedness and Response Workshop for State and Territorial Gubernatorial and Legislative Leadership. The CNMI is the only territory to be selected, while Minnesota, Mississippi, Pennsylvania, and Washington have been selected as well for participation in a workshop that will develop strategic action plans to implement during public health emergencies. The workshop will take place June 25-26.

U.S. Coral Reef Task Force Meeting in Palau: The next USCRTF meeting will be held in Palau the week of September 8. This will be the first USCRTF meeting in Palau since 2005.

President Remengesau will host, and DOI and DOC/NOAA will co-chair. AS-IIA Domenech will co-chair along with RDML Tim Gallaudet of NOAA. USGS Director Reilly may attend.

ASSISTANT SECRETARY FOR LAND AND MINERALS MANAGEMENT
(Indicates Press/Comms Opportunities)

Week Ahead Schedule of Meetings, Hearings, and Travel

Assistant Secretary for Land and Minerals Management Joe Balash will be in the office.

Principal Deputy Assistant Secretary Casey Hammond will be on annual leave Friday, May 17th.

Deputy Assistant Secretary Gary Lawkowski will be in the office.

Director Scott Angelle will be in the office.

Exempt Federal Register Notices (First Week Notice)

Information Collection Renewal Notices:
Agency Information Collection Activities: Free Use Application and Permit for Vegetative or Mineral Materials (1004-0001).

Immediate Announcements and Actions for the Next Week

Bureau of Land Management

Ongoing through May 22. BLM-CO. The Tres Rios Field Office is seeking public scoping input for travel management on 100,000 acres of public lands in Montezuma, La Plata, and Archuleta counties. BLM will consider various route designations and parking areas for public lands access in the southern portion of the Field Office. (4/5/19)

Ongoing through May. BLM-UT is publishing a Notice of Exchange Proposal for the Utah Test and Training Range Land Exchange in local newspapers over four weeks. The FY17 National Defense Authorization Act directed a land exchange between the BLM and the State of Utah's School and Institutional Trust Lands Administration. The Federal lands (95,675.54 acres) and State lands (83,609.38 acres) are located throughout western Utah. (2/19/19) DTS L183

By May 10. The BLM plans to publish two petitions for reinstatement of competitive oil and gas leases in the Federal Register (pending DOI approval): one from Southland Royalty Company LLC for 1,936.65 acres in Sweetwater County, Wyo., and one from Tripower Resources LLC for 79.63 acres in Converse County, Wyo. BLM completed Determination of NEPA Adequacy reviews on these leases in June 2018 and Dec. 2017, respectively. (4/9/19)

May 10. BLM-CA plans to sign a decision letter concurring with the Ridgecrest Field Office's decision to approve the Environmental Assessment and Mine Plan of Operation for the Perdito exploratory drilling project in Inyo County. The project was approved May 2018. Then in June, Advocates for the West requested a State Director Review to reverse and remand the field office decision. The mine site was originally permitted and drilled in the late 1980s. The Plan of Operations has been updated several times to accommodate expanded exploration and development. This decision will be controversial. (5/7/19)

May 13. The BLM is required by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 to adjust its civil monetary penalties annually for inflation. These

adjustments aim to further the policy goals of the underlying statutes. The BLM is publishing a final rule in accordance with the Act and subsequent guidance from the OMB. (5/7/19)

May 13. The BLM anticipates submitting the royalty rate reduction rule for non-energy minerals to OMB. The rulemaking package is currently with DOI for review, and BLM will address any comments before sending to OMB. (3/5/19)

May 13. BLM-CO plans to publish (pending BLM and DOI approval) a Notice of Proposed Reinstatement for Williams Fork Land Co.'s terminated oil and gas lease (COC76814 – approximately 480.55 acres) in the Federal Register. This lease is in Moffat County and was terminated on April 1, 2016 because the lessee failed to pay rental fees on time. If approved, the lease would be reinstated with an increased royalty rate and rental fee. (5/7/19) DTS 2617

May 12-16. The BLM-AK State Director and Deputy State Director for Resources plan to hold site tours and briefings for an OMB/DOI/BLM executive budget group to learn about current BLM-AK programs and energy work. Briefings will include the National Petroleum Reserve in Alaska (NPR-A) Integrated Activity Plan (IAP); Coastal Plain EIS; AFS; Legacy Wells; Alaska Native Vietnam Veterans Land Allotment (PL 116-9, Sec. 1119); Willow MDP; Ambler Road EIS; Central Yukon RMP; and Bering Sea-Western Interior RMP/EIS. (5/7/19)

May 13. Last year, the BLM and BOEM issued a joint contract to study / assess the Federal Oil and Gas Fiscal System. The contractor, IHS Markit, is expected to deliver the draft report for a 3-week agency review beginning on May 13. The final reports are expected to be delivered on May 17 and the contractor has committed to provide a presentation in DC for senior leaders on May 17. (4/30/19)

May 13. BLM-ES plans to distribute a news release announcing the availability of the notice for the June 27 oil and gas online lease sale. The sale notice protest period would end May 20. (4/30/19)

May 13. BLM-MT/DK. The Missoula Field Office plans to open a 30-day public comment period for an Environmental Assessment evaluating the impacts of acquiring 13,000 acres of private land owned by the Nature Conservancy. The lands are adjacent to BLM-managed lands within the Lower Blackfoot River-Belmont Creek area 25 miles northeast of Missoula. The lands would be acquired in phases using Sportsman's Access funds from the Land and Water Conservation Fund. This year's allocation of $3 million will allow the BLM to acquire approximately 4,800 of the 13,000 acres by late fall 2019. The acquisition would increase the amount of public lands available for recreational activities, and would also maintain the working lands with active forestry and fire management programs as well as continued grazing. The acquisition is not controversial and has strong local support. (4/30/19)

May 13. BLM-OR/WA. The Lakeview District plans to sign the decision regarding a draft Environmental Assessment and Finding of No Significant Impact analyzing the potential effects of a wild horse gather and fertility control plan for the Beatys Butte Herd Management Area. A gather is expected to be scheduled in fall 2019. (12/7/18)

By May 14. BLM-OR/WA. The Prineville District, in cooperation with the Malheur National Forest, plans to begin an Environmental Assessment (EA) to consider options for management of wild horses in the Murderers Creek Wild Horse Joint Management Area. The project's overall purpose is to develop a joint Herd Management Area Plan. The EA will also establish an appropriate management level for the Joint Management Area. The public scoping period is expected to run from May 15 to June 15, 2019. (5/7/19)

May 14. BLM-CO. The Royal Gorge Field Office plans to announce a 15-day public scoping period for a proposed 19-acre, 115kV transmission line right-of-way in Fremont County. If approved, the transmission line and associated access routes will primarily be located within a Section 368 West-wide Energy corridor adjacent to a 230kV Western Area Power Administration transmission line. (4/30/19)

By May 15. The BLM National Wild Horse and Burro Program plans to announce a solicitation for additional contracted Off-Range Corral (ORC) space in Colorado, Utah, and Wyoming. The Program is seeking space for 500 - 3,500 animals in close proximity to Herd Management Areas. The corrals will serve as initial preparation facilities for excess animals removed from the range. The Program currently has contracts for 26 ORCs with a combined capacity of 18,970 head. (5/7/19)

May 15. BLM-CO. The Gunnison Field Office plans to announce a 30-day scoping period for a proposed Travel Management Plan on BLM-administered lands near Silverton. The proposal will align with the Silverton Trails Master Plan, developed by the Town of Silverton and San Juan County. The BLM will consider proposals to construct new roads and trails and increase authorized uses on existing trails. (2/19/19)

May 15. BLM-CO. The Tres Rios Field Office plans to publish in the Federal Register (pending WO and DOI approval) the Notice of Availability of its Preliminary Environmental Assessment (EA) for GCC Energy LLC's proposed King II Coal Mine Lease-by-Application (LBA). This includes a Notice of Public Hearing for public comment on the Preliminary EA, as well as to discuss fair market value and maximum economic recovery. GCC proposes expanding its King II mine near Durango by 2,462 acres. The LBA would extend mine life for 22 years and use existing surface facilities and transportation routes. The Ute Mountain Ute Tribe holds the majority of the surface estate. GCC estimates it could recover 9.5 million tons of coal from this lease. Half of the royalties generated from this lease would go to the State of Colorado. GCC's current employment of 83 mine workers would remain the same. The Office of Surface Mining Reclamation and Enforcement is the joint lead on the EA. (10/26/18)

May 15. BLM-ID. The Pocatello Field Office plans to issue a decision on the Recreation Development Environmental Assessment (EA). The EA will analyze the environmental and cultural impacts of improving recreation facilities within 14 established recreation sites, providing up to three dispersed sites, and constructing up to five boater put-ins / take-outs along the Blackfoot River in southeast Idaho. All proposed improvements would be within

Pocatello Field Office Special Recreation Management Areas. Public scoping ended April 8 with the Field Office receiving two comments. (3/19/19)

May 15. BLM-ID. The Shoshone Field Office plans to issue two proposed grazing decisions to renew grazing permits, restore riparian areas, and make needed range improvements across 6,938 acres of BLM-administered land in the Muldoon Canyon Allotment. Affected lands lie mostly within a Greater Sage-Grouse General Habitat Management Area and a small portion lies within a Priority Habitat Management Area. There are no anticipated reductions in Animal Unit Months as a result of the forthcoming decisions. One environmental group (WildLands Defense) is expected to protest and appeal the decisions, we do not anticipate media interest. (3/28/19)

May 15. BLM-OR/WA. The Northwest Oregon District, Cascades Field Office plans to offer a timber sale auction in Salem for the Voodoo Child Timber Sale. The timber sale will offer 5.5 million board feet on BLM-managed land several miles east of Lebanon. (4/23/19)

By May 17. BLM-NV. The Mount Lewis Field Office plans to issue a Record of Decision for the 3 Bars Ecosystem and Landscape Restoration Project, a programmatic Environmental Impact Statement proposing to treat up to 127,000 acres of sagebrush steppe, riparian habitat, pinyon juniper woodland, and aspen groves within a 749,810-acre area. (4/9/19)

May 17. BLM-AK. The Anchorage Field Office tentatively plans to release a draft Environmental Assessment (EA) for the Squirrel River Special Recreation Area Management Plan for a 60-day public comment period. This implementation-level EA has four alternatives intended to address issues between commercial and subsistence uses. Public meetings will be held during the public comment period. (3/12/19)

May 17. BLM-ID anticipates publishing the Notice of Availability for the Caldwell Canyon Mine Final Environmental Impact Statement (EIS) in the Federal Register. The EIS is being prepared in response to the proposed Phosphate Mine and Reclamation Plan (M&RP) submitted by Bayer. The proposed mine is along Schmidt Ridge, about 13 miles northeast of Soda Springs. The M&RP for Caldwell Canyon includes development of two open mine pits. Mining operations would be conducted over an estimated 40-year period. Proposed total disturbance is 1,599 acres: 75% private (split estate), 15% State of Idaho, 10% BLM, and less than 1% U.S. Forest Service. BLM-ID briefed the DOI Review Team on May 3 and received approval to publish the Final EIS. (8/10/18)

May 17. BLM-ID plans to publish a Notice of Intent in the Federal Register for an Environmental Impact Statement to analyze the Blackrock Land Exchange proposal from the J.R. Simplot Company. Simplot proposes to convey 667 acres of non-federal land in the Idaho Falls District to the BLM in exchange for 719 acres (of which 140 is contaminated) near Simplot's existing phosphate processing plant. Through this proposed exchange, the BLM would gain land highly suitable for recreation and containing wildlife habitat, and dispose of Federal land adjacent to Simplot's Don Plant that may be needed for future plant operations. BLM-ID submitted a Stage 2 briefing package with the Deputy Secretary's Office for approval on April 15. (12/7/18) DTS 2561

May 17. BLM-ID. The Upper Snake Field Office anticipates signing a Decision Record for an Environmental Assessment that analyzes the impacts of creating fuel breaks in the Sand Creek Desert area in eastern Idaho. The proposal would mechanically and chemically treat 1,595 acres of BLM-managed shrubland within the area to establish and maintain a system of multi-jurisdictional fuel breaks. The Idaho Department of Fish and Game and several private landowners are also engaging on this project. (4/9/19)

May 17. BLM-MT/DK and BLM-WY. The Buffalo and Miles City field offices anticipate publishing a Notice of Availability for the court-ordered Supplemental Environmental Impact Statements and potential Resource Management Plan amendments (Western Organization of Resource Councils v BLM, Montana District Court). The DOI Review Team approved the scoping report and proposed alternatives on May 3. (4/16/19) DTS 2602

May 17. BLM-MT/DK. The Missoula and Lewistown field offices anticipate publishing Notices of Availability for their Draft Resource Management Plans / Environmental Impact Statements in the Federal Register. (6/15/18) DTS 2230 and 2231 / FRNs at DTS 2232 and 2233

May 17. BLM-NV. The Winnemucca District plans to publish a Notice of Availability for a Draft Environmental Impact Statement for the Marigold Mine Mackay Optimization Project. The proposed project would extend the life of the gold mine by 10 years. (11/2/18) DTS 2284

May 17. BLM-NV. The Winnemucca District plans to publish a Notice of Availability for a Draft Environmental Impact Statement for the Hycroft Phase 2 Mine Expansion Project. The proposed project would extend the life of the gold mine by 15 years out to 2039. (12/7/18) DTS 2300

May 17. BLM-OR/WA. The Coos Bay District plans to offer the Sister Sweeden, Glide Path, Slater 21, and Kenyon Mountain timber sales at an oral auction. Sister Sweeden includes 196 acres of commercial thinning in the late successional reserve land use allocation, and is expected to yield 4.9 million board feet. Glide Path is a regeneration harvest on 141 acres in the harvest land base land use allocation, and is expected to yield 4.9 million board feet. Slater 21 includes a combination of thinning and regeneration harvest on 61 acres in the harvest land base, and is expected to yield 1.1 million board feet. These three sales were originally scheduled for auction in April 2019, but a late-winter snowstorm made it impossible for staff and prospective purchasers to reach the timber sale units in enough time to prepare final sale details and develop competitive bids. Kenyon Mountain is a 68-acre regeneration harvest in the harvest land base, and is expected to yield 1.9 million board feet. (2/26/19)

May 17. BLM-UT. The Moab Field Office plans to issue a Decision of Record on sustainable camping opportunities for the Klondike Bluffs area, approximately 17 miles north of Moab near a popular mountain biking area. This decision will improve visitor experience,

provide for better sanitation, human health and safety, and protect sensitive cultural and paleontological resources by designating campsites. (5/7/19)

May 18. BLM-CO. The Tres Rios Field Office will host a ribbon-cutting ceremony with the Montezuma County Commissioners to celebrate the completion of the parking lot at Phil's World, a popular mountain biking destination near Cortez. The parking lot construction has been a joint venture between the BLM and Montezuma County. (4/16/19)

May 18. BLM-CO. The Uncompahgre Field Office plans to host two public lands clean-up events in celebration of Colorado Public Lands Day. Colorado was the first state in the nation to establish a state holiday for our public lands. The BLM, Delta County, Thunder Mountain Wheelers, WESTCORE, Double J Disposal, and community volunteers will join together to clean up illegal dump sites in the North Delta OHV Recreation Area. The recreation area provides outstanding OHV riding opportunities for visitors and residents and has been plagued with illegal dumping by a few bad actors. In addition, the Backcountry Hunters and Anglers will clean up a shooting area near Placerville in San Miguel County. (5/7/19)

May 18-19. BLM-CO. The Royal Gorge Field Office will celebrate Colorado Public Lands Day at the Guffey Gorge Day-Use Area through a volunteer event with 15 volunteers from the Rocky Mountain Field Institute. BLM staff and volunteers will conduct maintenance on a trail to the popular Paradise Cove swimming area, which has experienced increased visitor use. This effort will improve public access to the site. (4/30/19)

May 18-19. BLM-CO. The third annual Temple Canyon Hill Climb, a competitive off-road event, will take place on Fremont County and BLM-managed lands near Canon City. The event is permitted through a Special Recreation Permit issued by the Royal Gorge Field Office. The race course is on county roads. Vehicle staging, pits, and spectator areas are on BLM lands. (4/30/19)

Bureau of Ocean Energy Management

On May 1, HR 1014, the Offshore Wind for Territories Act, passed out of the House Natural Resources Committee by unanimous consent. S.499, the companion bill in the Senate, is scheduled to be part of a legislative hearing before the Senate Energy and Natural Resources (SENR) Committee on May 14. This bill would amend OCSLA to allow offshore wind development in US overseas territories and possessions. (5/3/19)

On May 13, BOEM has been invited to speak at the International Energy Agency (IEA) World Energy Outlook Workshop in Paris, France. The BOEM speaker will provide an outlook for the U.S. offshore wind market, including challenges, plans, activities, market enablers, and BOEM's longer-term leasing strategy. If BOEM is unable to participate in person due to travel clearance issues, we have been invited to brief IEA staff separate from the event via phone. IEA is expected to include a chapter in this year's World Energy Outlook specific to offshore wind. (5/3/19)

Office of Surface Mining Reclamation and Enforcement

Scoping for Caballo Mine West Lease Tract EA (WY): OSMRE is preparing an EA for the Caballo Mine West Lease Tract federal mining plan. OSMRE initiated a 30-day public scoping period on December 19, 2018 with the scoping period expected to close on January 18, 2019. Due to the government shutdown, OSMRE noticed a 15-day extension of the scoping period on February 7, 2019. The comment period closed on February 22, 2019. OSMRE is currently working with the consultant to review and consider all substantive comments during the drafting of the EA. OSMRE expected to publish the draft EA and unsigned FONSI for a 30-day comment period on or around May 7, 2019. Due to additional required EA revisions, however, the schedule projects approximately a week's delay. OSMRE thus tentatively expects to publish the draft EA and unsigned FONSI for a 30-day comment period on or around May 14, 2019.

Revision to OSMRE Directives, INE-35 and REG-8 – OSMRE's system of directives provides guidance and clarification to OSMRE staff on implementation of their responsibilities under the Surface Mining Control and Reclamation Act (SMCRA). OSMRE has engaged since late 2017 with the state regulatory authorities (RAs) that have primary responsibility to administer surface mining regulatory programs pursuant to OSMRE's approval, in looking at potential revisions to two of its directives, INE-35 and REG-8. INE-35 provides operational guidance to staff on implementation of their responsibilities related to the issuance of ten-day notices (TDNs) to the RAs, when OSMRE receives information of potential violations of a state's surface mining program requirements. REG-8 establishes guidance on OSMRE's oversight of the RAs' implementation of their state regulatory programs. OSMRE and the RAs have coordinated extensively on revisions to INE-35 and REG-8 to ensure they recognize and reflect the states' primary jurisdiction with limited exceptions, to exercise exclusive jurisdiction over the regulation of surface coal mining and reclamation operations within their borders, except as provided in provisions of SMCRA, such as section 521, regarding enforcement, where warranted. OSMRE expects to finalize revisions to these directives by May 10, 2019.

OSMRE is also initiating rulemaking to address issues associated with the issuance of ten-day notices identified under the current regulations.

8-30 Day Outlook

Bureau of Land Management

NEW ITEMS

By May 20. BLM-AZ's Colorado River District plans to initiate the appraisal process for two legislative land conveyances in La Paz County and Bullhead City. A cadastral survey request for the La Paz County conveyance is planned as well. Both La Paz County and Bullhead City land conveyances support Secretarial Order 3374 implementing the John D. Dingell, Jr. Conservation, Management, and Recreation Act. (5/7/19)

May 20. BLM-MT/DK. The Billings Field Office plans to release a draft Environmental Assessment in support of a land donation that is being proposed in partnership with the Montana Department of Justice Natural Resource Damage Program. The subject property is just outside of Billings and will add acreage to the Sundance Lodge Special Recreation Management Area, which is immediately adjacent to the property. The 25-acre parcel would provide public access to approximately 0.5 mile of the Yellowstone and Clark's Fork of the Yellowstone River. No controversy is expected. (5/7/19)

May 20. BLM-UT. The St. George Field Office plans to begin a 30-day public scoping period on a proposal to sell two parcels of land in Washington County. The parcel near the town of Virgin is 70 acres and the parcel near St. George totals 10 acres. The two parcels being analyzed for sale are identified as potentially available for disposal in the St. George Resource Management Plan as amended, and would be offered under the competitive sale process. The purpose of the proposed sale is to dispose of lands that are difficult and uneconomical to manage and to purchase private inholdings from willing sellers within National Conservation Areas and Wilderness Areas in Washington County. (5/7/19)

May 21. BLM-UT. The Price Field Office plans to finalize a process with EnerVest to receive two small easements in Nine Mile Canyon. These easements, less than five acres total, will allow public access to two rock art sites in Nine Mile Canyon. The easements are part of the West Tavaputs Programmatic Agreement that was developed in 2010. (5/7/19)

May 21-24. BLM-WY. The Rock Springs Field Office plans to assist the U.S. Geological Survey (USGS) with the launch of the Powell Sesquicentennial Colorado River Exploring Expedition (SCREE). During the May 21 - July 31 SCREE event, USGS staff and volunteers in period clothing will float the Colorado River along the same route of the original 1869 John Wesley Powell expedition, from modern-day Green River, Wyo. to the upper end of Lake Mead, Utah. Rock Springs staff is helping USGS develop education materials focusing on the nexus between the historic Powell expedition and resources managed by the BLM, and will assist with the education and launch events on May 21-24 in Green River. (5/7/19)

May 22. BLM-UT. The Price Field Office plans to release for public comment an environmental assessment analyzing a potential wild horse gather in the Range Creek Herd Management Area (HMA). The Appropriate Management Level (AML) for this HMA is 75-125 animals with a current estimated population of 282. The field office proposes to remove approximately 207 horses to reach low AML. The comment period will run for 15 days. (5/7/19)

May 24. BLM-WY plans to release the draft supplemental Environmental Impact Statement (EIS) and potential Resource Management Plan (RMP) amendment for the Buffalo Field Office for a 90-day public review period. The supplemental analysis addresses a court ruling that identified NEPA deficiencies in the existing EIS/RMP and ordered the BLM to conduct remedial analysis regarding the cumulative and downstream impacts of coal development in the field office. The DOI Review Team approved of the draft on May 3. (5/7/19)

By May 31. The BLM plans to issue an Instruction Memorandum to implement Secretarial Order 3373, *Evaluating Public Access in Bureau of Land Management Public Land Disposals and Exchanges*, and ensure that when identifying public lands available for disposal or exchange, public access for outdoor recreation will be one of the factors considered in determining the appropriateness of the disposal or exchange. (5/7/19) DTS 17913

By June 1. BLM-ID. The Upper Snake Field Office is developing an environmental assessment (EA) for the City of Iona to construct a water tower on BLM-managed land. The local government has already completed an extensive environmental review, which the BLM feels confident will be useful in streamlining the EA process. A decision record is anticipated by June 1. (5/7/19)

June 1. BLM-WY. The Cody Field Office, in partnership with FishingCommunity.org and the local community, plans to host the inaugural Hogan/Luce Veterans Family Fishing Classic. This free event is for veterans, their families, and members of the public and will feature shore fishing, fishing instruction, and kids' activities. Participants will also have the chance to see recent improvements at Hogan/Luce to make the site more accessible for people with disabilities including accessible picnic tables, fire rings, bear boxes, and the newly-installed canoe/kayak dock. This is a *Fisheries for Veterans Project* event, a partnership between FishingCommunity.org and the BLM that uses public lands to provide recreational, educational, and job training opportunities and provides rehabilitation and healing capacities for veterans and their families. (5/7/19)

June 1. BLM-WY. The High Plains District expects to release the environmental assessment (EA) for the Wright Area coal leases in response to a court order. On Sep. 15, 2017, the Tenth Circuit Court of Appeals ruled that the BLM was arbitrary and capricious because the administrative record did not support the EA's assumptions involving supply and demand in the coal market, which determined that coal resources would be used from elsewhere if the Wright Area leases were not issued. The Tenth Circuit did not vacate any of the leases which the BLM has already leased and permitted for coal mining, but remanded the decision back to the U.S. District Court. (5/7/19)

June 1-5. National Conservation Lands and BLM's Travel and Tourism Team plan to participate in the inter-agency America's Great Outdoors Booth at U.S. Travel Association's IPW 2019, the travel industry's premier international marketplace and largest generator of travel to the U.S. (5/7/19)

June 3. BLM-MT/DK. The Butte Field Office plans to release for public review and comment a Supplemental Environmental Assessment (EA) done as a result of a recent court ruling regarding vegetation treatments and grazing infrastructure at Iron Mask. The court upheld the BLM on most points in the complaint but found that the EA did not adequately address certain cumulative impacts and remanded the case to BLM for preparation of a Supplemental EA. In addition, plaintiffs have filed a claim for attorney's fees under the Equal Access to Justice Act in the amount of $128,506. The BLM has been working through the

Solicitor's Office and the Department of Justice in an attempt to negotiate a settlement on the fee amount. The BLM has until May 13 to reach a settlement of the fee. (5/7/19)

June 5-6. BLM-UT. The Canyon Country District and Manti-La Sal National Forest plan to host a Bears Ears National Monument (BENM) Advisory Committee meeting in Monticello, Utah. The focus of this first meeting is to gather input related to the Draft BENM Monument Management Plan and Environmental Impact Statement. A press release announcing the meeting was issued on May 2. (5/7/19)

UPDATED ITEMS

May 20. BLM-AZ. The Phoenix District plans to announce a 30-day public scoping period and associated public meetings for the Recreational Shooting Sports Microsites Pilot. This pilot will focus on a strategy to identify, plan, develop, and manage sites appropriate for recreational shooting sports on public land. It will involve six microsites around the greater Phoenix area in Maricopa County. BLM-AZ will evaluate different approaches for actively managing recreational shooting sports microsites - from more passive / undeveloped to more intensively managed / developed ones - while preserving widespread dispersed recreational shooting sports opportunities. BLM has been working on the pilot strategy with the Arizona Game and Fish Department and other partners, and will also meet with stakeholders. The strategy is not intended to limit recreational shooting access; rather, it focuses on shooting sports in those areas best suited for ensuring public safety and minimizing impacts to natural resources and infrastructure. BLM-AZ is developing a communication plan to support the pilot project and anticipates media and congressional interest. (4/23/19)

Late May. BLM-MT/DK. The Notice of Availability for the Draft Supplemental Environmental Impact Statement (SEIS) for the Keystone XL pipeline is expected to be released for public comment. The BLM and other federal agencies provided comments to the State Department on the internal Draft SEIS. The Draft SEIS considers impacts related to changes in the project since 2014 and incorporates updated information and new studies in response to a court ruling citing the 2014 analysis was deemed insufficient. The SEIS will also address the route alignment shift in Nebraska. (2/5/19)

By May 24. BLM-CO. The Royal Gorge Field Office plans to publish a Notice of Availability (pending DOI approval) for a Draft Environmental Impact Statement (EIS) for the Eastern Colorado Resource Management Plan (RMP). BLM-CO briefed the DOI Review Team on the Draft EIS on March 1. The Draft RMP includes decisions on approximately 658,200 acres of BLM-administered lands and 3.3 million acres of subsurface mineral estate across 37 counties. The Eastern Colorado RMP will replace the 1996 Royal Gorge RMP and 1986 Northeast RMP. (4/24/18) DTS 2484

May 24. BLM-ID. The Four Rivers Field Office plans to sign a decision to acquire 560 acres in the Boise Foothills. The property is a critical piece that will provide recreation and hunter access to currently inaccessible public lands. The BLM has been working with the Land Trust of Treasure Valley who purchased the property in Feb. 2018, and will transfer the parcel to BLM through a bargain sale agreement upon completion of the appraisal which is

expected in fall 2019. This property was identified in the Ridge to Rivers 10-Year Management Plan (BLM is a managing partner) as a high-priority objective for obtaining public access for hunters and recreationists. The property is also important winter range for big game, especially elk, and is within the most popular big game hunting unit in Idaho. A BLM press release is planned prior to purchase in fall 2019 and could include statements from the Secretary, the BLM, the City of Boise, and/or the development of Avimor. (4/4/18)

May 24. BLM-OR/WA plans to publish a Notice of Availability and Draft Environmental Impact Statement (EIS) if the DOI Review Team approves the Draft Southeastern Oregon Resource Management Plan Amendment (RMPA) and EIS at the brief planned for May 10. This planning effort is in response to a 2010 Settlement Agreement requiring inventory and analysis of wilderness characteristics, off-highway vehicle use, and grazing management. BLM-OR/WA briefed the BLM Washington Office and DOI in Nov. 2018; responses to comments from the DOI have been incorporated into this revised Draft RMPA/EIS. Publication will initiate a 90-day comment period and BLM-WA/OR intends to hold three public meetings in local communities in June. (2/12/19)

May 25. BLM-ID. The Great Basin Regional Sage Grouse Support Team plans to publish a Notice of Availability in the Federal Register about the Draft Programmatic Environmental Impact Statement for 11,000 miles of fuel breaks in the Great Basin. BLM-ID briefed the DOI Review Team on May 3 and is awaiting further direction pending discussions with the Secretary's Office. (2/12/19)

By May 27. BLM-CO. The Gunnison Field Office plans to publish a Notice of Availability (pending DOI approval) for the Draft Environmental Impact Statement (EIS) to assess domestic sheep permit renewals on nine livestock grazing allotments in Gunnison, Hinsdale, and Ouray counties totaling approximately 65,000 acres. BLM-CO briefed the DOI Review Team on the Draft EIS on March 8. The Draft EIS evaluates reducing contact between domestic and wild sheep on BLM lands to minimize disease transmission. (4/10/18) DTS 2507

May 27. BLM-CO. The Kremmling Field Office plans to release the draft Environmental Assessment (EA) for the North Sand Hills Resource Protection Plan for public comment. The plan is needed to address the Colorado Water Quality Board's listing of North Sand Creek as impaired under the Clean Water Act. The State cites erosion from off-highway vehicle (OHV) use in and around the creek as the primary cause. The North Sand Hills Special Recreation Management Area (SRMA) is popular for OHV use on open sand dunes, and this plan will help the BLM maintain this unique recreational opportunity by protecting North Sand Creek, a small area within the SRMA. (4/2/19)

May 30. BLM-NM. The Oklahoma Field Office plans to host a public hearing for the Draft Environmental Assessment for a Lease by Application (LBA) in Haskell County, Okla. The public hearing is planned to be announced in the Federal Register on May 10 and will be held in McCurtain, Okla. The LBA was delayed due to the partial government shutdown. Evans Coal Company submitted an LBA for federal coal reserves underlying 1,270.85 acres of privately owned surface lands. Evans estimates that the proposed lease area contains nearly

3.28 million tons of recoverable coal. This may be controversial because it is coal-related and the tract lies beneath a lake used for recreation by a private club. (8/17/18) DTS 2501

June 6. BLM-MT/DK. The Butte Field Office plans to issue a Record of Decision for fuels treatment on 1,000 acres of BLM land within the Tenmile study area. The U.S. Fish and Wildlife Service has concurred with the field office's effects determination on the Tenmile–South Helena Project, which is a cooperative project between the Helena National Forest and the Butte Field Office. The project area includes all ownerships in 61,395 acres, of which 1,043 acres are administered by the BLM. The project is intended to maintain consistent quantity and quality of water within the Helena municipal watershed and improve conditions for public and firefighter safety across the landscape. (12/18/18)

By June 12. The BLM plans to issue an Instruction Memorandum (IM) for use in land use planning and in decisions on designating Areas of Critical Environmental Concern (ACECs). The IM will provide more certainty on the ACEC nomination process and appropriate size of such areas. The IM is currently under review with the BLM Director's Office. (4/9/19)

ONGOING ITEMS

By May 20. The BLM's first group of new proposed administrative NEPA categorical exclusions (CXs), and revisions to existing CXs, is with the Secretary's Office for review. These include proposals for five new CXs (pinyon pine and juniper tree management, aquatic and riparian habitat restoration, timber salvage, wild horse and burro population control, and wild horse and burro gathers) and two revisions to existing CXs (for range infrastructure improvements and special recreation permits). Following approval, the BLM will send these proposed CXs for review and approval by the Council on Environmental Quality. The BLM will then publish the proposed CXs in the Federal Register for public review and comment. (3/26/19)

By May 20. BLM plans to issue an Instruction Memorandum (IM) titled *National Policy for Powerline Rights-of-Way and Fire Risk, including Vegetation Management*. The policy meets the goals of Executive Order 13855 and Secretarial Order 3372 for reducing wildfire risk, and implements agency requirements under the 2018 amendment to the Federal Land Policy and Management Act (FLPMA), enacted for the same purpose. The IM addresses vegetation management in and adjacent to rights-of-way in both emergency and non-emergency conditions, and outlines FLPMA Section 512 agency requirements in approving maintenance plans and agreements submitted by powerline operators. A press release is being developed to announce the updated policy. (2/12/19) DTS 17100

By May 20. The BLM is preparing an Instruction Memorandum (IM) that clarifies and modifies national-level policy in two BLM manuals: Manual 6310, which provides guidance for conducting inventories of wilderness characteristics on BLM lands; and Manual 6320, which outlines general procedures for considering such areas in the BLM's land use planning process. The IM may generate moderate controversy, as a variety of stakeholders — namely industry, ranchers, state and local government, and the environmental community — continue to focus on BLM's handling of the wilderness characteristics issue. (4/9/19)

By May 20. BLM-AK will publish a Public Land Order (PLO) to revoke seven PLOs issued in 1972. A signing ceremony was previously discussed and may be rescheduled. This order will affect 1,153,609 acres of BLM-managed land withdrawn near the Fortymile area of Alaska. The action will open those acres to surface entry, mining and mineral leasing, subject to valid existing rights. The PLOs were issued pursuant to Sec. 17(d)(1) of the Alaska Native Claims Settlement Act. The Eastern Interior Fortymile Resource Management Plan and Record of Decision, finalized in 2016, recommended partial revocation of these withdrawals. (1/30/19)

By May 20. BLM-AK plans to publish constructive notice of a decision approving 704.6 acres for conveyance to Emmonak Corporation for the Native village of Emmonak under the Alaska Native Claims Settlement Act (ANCSA). The surface lands will be conveyed to Emmonak Corporation and the subsurface estate will be conveyed to Calista Corporation, the regional corporation. Conveyance of the lands will fulfill Emmonak's entitlements under Secs. 12(a) and 12(b) of ANCSA. The Federal Register package is currently under review in the Washington Office. (3/12/19) DTS 2548

By May 20. BLM-AK will prepare a Federal Register notice to revoke Public Land Orders (PLO) 5179 and 5186 to submit to the Washington Office for review. This order will affect 217,486 acres of BLM-managed land withdrawn near the Bering Glacier area of Alaska. The action will open those acres to surface entry, mining and mineral leasing, subject to valid existing rights. The PLO was issued pursuant to Sec. 17(d)(1) of the Alaska Native Claims Settlement Act. The East Alaska Resource Management Plan and Record of Decision, finalized in 2007, recommended partial revocation of these withdrawals. (1/30/19) DTS Lands 186

By May 20. BLM-CO anticipates receiving DOI approval to provide the U.S. Army National Guard access to BLM-managed lands for remediation activities. The National Guard completed two Records of Decision for the Craig National Guard Training Site Munitions Response Area and the Delta National Guard Complex to remediate munition sites on BLM-managed land in the Northwest and Southwest districts. Per DOI policy, review from BLM management and signature from the Assistant Secretary for Policy, Management and Budget are required to provide the National Guard access to BLM lands for remediation activities. (2/12/19)

May 20. BLM-ID. The Owyhee Field Office plans to initiate a 30-day scoping period for the Silver City Grazing Allotment after finalizing the assessment and evaluation of Idaho's Standards for Rangeland Health and Guidelines for Livestock Grazing Management. It should be available to the public May 20 - June 20. A public meeting will be held during this period. The Silver City Allotment is part of the Battle Creek litigation in U.S. District Court of Idaho and BLM expects additional litigation. (4/16/19)

May 20. BLM-UT. The Richfield Field Office will reopen the Factory Butte Off-Highway Vehicle Recreation Area, which was closed under an emergency order to assess potential damage to threatened and endangered cacti species. Findings from extensive studies over the

last 10 years have determined that OHV use in the area has not contributed to declines in species. The field office is working with the Solicitor Office to develop a Memorandum of Understanding with Utah School and Institutional Trust Lands Administration and seek concurrence from the U.S. Fish and Wildlife Service. (3/19/19)

Week of May 20. BLM-NV. The Elko District plans to complete briefings for the Final Environmental Impact Statement for the Rossi Mine Expansion Project in Elko County. The barite mine is currently 896 acres; the proposed expansion would create approximately 1,167 acres of new disturbance and extend the mine life by 8 years. The Record of Decision is expected to be signed in June. (3/5/19)

By Late May. BLM-AK submitted on April 30 the "Call for Nomination and Comments for the 2019 National Petroleum Reserve in Alaska Oil and Gas Lease Sale" Federal Register package to the Washington Office for review. The Federal Register notice needs to publish before May 30 to accomplish a 2019 lease sale. (4/2/19)

May 21. The U.S. Postal Service will hold the Wild and Scenic Rivers Stamp First Day of Issue ceremony in Bend, Ore. The sheet of 12 "Forever" stamps depict wild and scenic rivers around the nation including four BLM-managed or co-managed segments. "Save the date" commemorative invites are being sent to key BLM and DOI managers but the event is open to the public and organizers plan to livestream online. Acting BLM-OR/WA State Director Theresa Hanley will deliver remarks along with leaders from other river management agencies. This is a USPS managed event with the BLM, U.S. Forest Service, and Oregon State Parks providing local support. (4/16/19)

May 21-23. BLM-CA will host three public meetings in Bakersfield, San Luis Obispo, and Santa Barbara during the 45-day comment period for the Bakersfield Field Office hydraulic fracturing Draft Supplemental Environmental Impact Statement. This planning effort is in response to a 2017 U.S. District Court Order and is controversial. (12/10/18)

Late May. The BLM Wild Horse and Burro Program plans to circulate for review and approval a draft report to Congress providing analysis related to proposed actions that can address wild horse and burro overpopulation and lower program costs. The analysis was required by Congress in its 2019 Appropriations Act and follows a similar report to Congress submitted in 2018. The report is due Aug. 18, 2019. (4/2/19)

Late May. BLM-AZ plans to publish a notice of withdrawal application in the Federal Register on behalf of the Bureau of Reclamation to extend the Roosevelt Lake withdrawal. Under an extension, the land would remain withdrawn from settlement, sale, or entry under federal general mining laws. The Federal Register notice initiates a 90-day public comment period. The proposal seeks to extend the Dec. 1999 withdrawal for an additional 20 years, allowing for the continuation of recreational opportunities, and is needed to reserve those lands within the normal operating levels of the modified Theodore Roosevelt Dam. Roosevelt Lake is a popular recreation area for anglers, campers, swimmers, and boaters; it also contains a wildlife area and is open to permit hunting during certain parts of the year. (4/15/19)

Late May. BLM-CO. The Colowyo Mine is a surface coal mine in Northwest Colorado operated by Colowyo Coal Company L.P. Colowyo submitted an application to renew its Royalty Rate Reduction (RRR) from 12.5% to 8% for coal leases COC-29225 and COC-29226. The BLM proposes to grant the RRR because adverse geologic conditions make the coal reserves economically unrecoverable at the current lease royalty rate using standard industry operating practices. Upon receipt of a favorable lease account status determination requested from the Office of Natural Resources Revenue, the State Director could sign a decision granting the RRR. A concurrence letter was sent to the governor, who did not respond within the requested 30-day period. Environmental groups have tried to make an issue with RRRs recently, which could generate some controversy. (4/23/19)

Late May - Early June. BLM-MT/DK. The U.S. District Court for the District of Montana, Great Falls Division, issued a decision on April 19, 2019, in the case of Citizens for Clean Energy and the Northern Cheyenne Tribe v. the U.S. Department of the Interior. The plaintiffs challenged the Secretary's decision to cease work on the Programmatic Environmental Impact Statement (PEIS) for the federal coal program as well as ending the moratorium on leasing of federal coal. Judge Morris's decision states that DOI's decision to end the moratorium constitutes a major federal action triggering a National Environmental Policy Act (NEPA) Review. The court stopped short of compelling the Department to prepare a PEIS or re-institute the moratorium, concluding that the method of compliance with NEPA was within the agency's discretion as an initial matter. The court ordered the parties to meet and confer on remedies and to submit a report within 30 days. The BLM has begun working to develop the appropriate NEPA analysis and expects to have a document completed in late May or early June. (4/30/19)

May 22. The BLM Annual Making a Difference National Volunteer Awards ceremony is scheduled for 1:00 p.m. EDT in Room 5071 at the Main Interior Building and will be live streamed via video teleconference to all state offices hosting winners. States were notified on April 11 of winner selections. Deputy Director Brian Steed, the Assistant Secretary for Lands and Minerals Management, and Secretary of the Interior have been invited to speak. All Assistant Directors are invited to attend in person. (4/16/19)

May 23. BLM-ID. The Boise District Office will conduct a field tour for partners in the Bruneau-Owyhee Sage-Grouse Habitat (BOSH) Project to discuss 2019 implementation plans. DOI issued a Record of Decision in February 2019 for the BOSH Project to remove encroaching western juniper on 617,000 acres of public land in Owyhee County. Representatives of the Owyhee County Commissioners, Idaho Department of Lands, Idaho Department of Fish and Game, Natural Resources Conservation Service, and the Idaho Governor’s Office of Species Conservation are expected to participate in the tour. (4/30/19)

May 24. BLM-UT. The Canyon Country Fire Zone and Moab Field Office plan to announce a 30-day comment period for an Environmental Assessment (EA) analyzing a wildfire mitigation project near Castle Valley. Based on input from the community, the proposal is primarily for hand treatments (such as chainsaw cutting, lop and scatter, and pile burning) to create fuel breaks within a 7,551-acre area. The community supports the project and is

concerned about wildfire near the community and surrounding watershed. However, many citizens are adamantly opposed to the use of herbicides or heavy machinery in carrying out the treatments. These alternatives will be outlined in the EA as alternatives considered but not analyzed in detail, as they are not supported by the community and do not fully meet the purpose and need. (4/9/19)

May 27. BLM-ID. The Four Rivers Field Office plans to release an Environmental Assessment and Decision Record regarding several range improvement projects, including fence and water developments in the Hixon Columbian Sharp-Tailed Grouse habitat management area in Washington County. (4/30/19)

May 30. BLM-OR/WA. Coos Bay District plans to issue decision records and sale notices for three upcoming timber sales that total 13.2 million board feet: Early Fork, Ebeneezer, and Lookout. Coos Bay District plans to offer the three sales at an oral auction on June 28, 2019. Early Fork includes 250 acres of thinning in the late successional reserve and riparian reserve land use allocation, and is expected to yield 4.8 million board feet. Ebeneezer includes 269 acres of thinning in the riparian reserve and late successional reserve land use allocations and is expected to yield 5.5 million board feet. Lookout includes 39 acres of regeneration harvest in the harvest land base land use allocation and is expected to yield 1.95 million board feet. (4/30/19)

By May 31. BLM-CA. The Central Coast Field Office plans to publish a Notice of Intent for an amendment to the Resource Management Plan for the Cotoni-Coast Dairies Unit of the California Coastal National Monument. This amendment and associated Environmental Assessment will focus on improving and expanding public access and recreational opportunities to the Cotoni-Coast Dairies unit. BLM-CA plans to host two public meetings during the scoping period. Two public workshops held in Dec. 2018 explored opportunities for additional public access. A Federal Register Notice is working through the State Office and was submitted to the Washington Office by May 3. (4/2/19)

By May 31. BLM-CO. The Gunnison Field Office plans to publish in the Federal Register (pending BLM approval) a Notice of Realty Action to convey 43.09 acres of public land to the Town of Lake City under the Recreation and Public Purposes Act. The land is about one mile south of Lake City. The Lake City Ski Hill community ski area would continue to operate under the conveyance. (4/24/18) DTS 2329

By May 31. BLM-ID plans to issue 22 Curlew Grazing Permit Renewal decisions after completion of the Environmental Assessment, Determination, and Finding of No Significant Impact. The Curlew Allotment encompasses about 139,999 acres and is divided into 39 pastures. The most current grazing decisions date to 2000 and issued permits to 22 permittees divided into 5 groups with assigned pastures. A Land Heath Evaluation in 2015 determined that certain pastures are not meeting standards due to current grazing management, and found that the current authorized stocking level for several spring/fall pastures is too high for some groups. Consultation and coordination with the 22 permittees has occurred over the past several years to develop various grazing alternatives. The BLM preferred alternative would

reduce seven permittees' AUMs by 4-5 percent for a total of approximately 500 AUMs. Currently, the Curlew Allotment includes 24,928 authorized AUMs. (7/27/18)

By May 31. BLM-NM plans to publish the Record of Decision for the proposed Copper Flat Mine Final Environmental Impact Statement (EIS). The New Mexico Copper Corporation submitted a proposed mining plan of operations that would re-establish the Copper Flat Copper Mine, a poly-metallic mine and processing facility near Hillsboro, that would produce copper, gold, silver, and molybdenum. If approved, the project is expected to provide 170-270 jobs over the mine's 12-to-16-year life. (4/15/19)

May 31. BLM-ID plans to issue a NEPA decision on the Horse Gather Environmental Assessment (EA) for the Challis Herd Management Area (HMA). If approved, the EA would result in a comprehensive multi-year plan to include darting and/or bait gathering, helicopter gathers, and PZP treatment to manage the horses on the HMA. A helicopter gather may occur in 2019, which may generate controversy. The 168,720-acre Challis HMA is in Custer County, Idaho. The appropriate management level is 185-235 horses, and the last helicopter gather occurred in 2012. BLM-ID estimates 428 wild horses are on the HMA following the 2019 foaling season. The Challis Field Office is requesting to gather 365 horses, remove 244, and treat 40 to 50 mares with fertility control. (2/5/19)

May 31 - June 2. BLM-CO. The Gunnison Field Office will host the 2019 Colorado Off-Highway Vehicle Great Trails Workshop with the Colorado Off-Highway Vehicle Coalition, the National Off-Highway Vehicle Conservation Council, Colorado Parks and Wildlife, and the U.S. Forest Service. The workshop will focus on OHV trail maintenance, rehabilitation, improvement and relocation. Hands-on field training will take place at Hartman Rocks Recreation Area. (4/30/19)

Early June. BLM-NV. The Bristlecone Field Office plans to issue final decisions for the Wilson Creek Allotment Grazing Term Permit Renewals. These include various range improvements and additional flexibility for grazing operations. The 1.1-million-acre common allotment has nine grazing permittees. There are conflicts between the permittees and controversy due to the various resources impacted including wild horses and sage grouse. (3/12/19)

Early June. BLM-NV. The Department of Energy, Office of Legacy Management, has applied to the BLM for withdrawal of approximately 361 acres of public land surrounding part of its Central Nevada Test Area. The Battle Mountain District is working on a Public Land Order to be published in the Federal Register for public review and comment. This includes an Environmental Assessment that has been prepared to analyze the potential impacts of withdrawing this acreage. (3/5/19) DTS 2474

June 3. BLM-ID. The Jarbidge Field Office plans to issue 27 proposed grazing decisions to renew grazing permits on 29 allotments, restore riparian areas, and construct range infrastructure across 357,816 acres of BLM-managed land in the Devil Creek sub-region of Owyhee and Twin Falls Counties. About 18% of the sub-region lies within Greater Sage-Grouse Priority Habitat; 50% is included in Important Habitat. The Field Office anticipates

no reduction in Animal Unit Months as a result of the decisions. Two environmental groups (Western Watersheds Project and WildLands Defense) are expected to protest and appeal the decisions. (4/30/19)

June 4-6. BLM-AZ. The Arizona Strip Field Office plans to hold public meetings regarding a proposed change in the management of Paria Canyon–Vermilion Cliffs Wilderness and other related actions. The proposed change would increase recreational opportunities and visitor access, as outlined in Secretarial Orders 3347 and 3366, while preserving wilderness values. BLM-AZ is considering increasing daily visitor limits from 20 people to 96 people per day in Coyote Buttes North, where the geologic feature known as the Wave is located. The meetings will take place on June 4 in Page, Ariz.; June 5 in Kanab, Utah; and June 6 in St. George, Utah. On May 1, BLM-AZ plans to announce the public scoping period and three meetings seeking public input regarding resource concerns, access, recreation opportunities, etc. that would be relevant to the analysis. The comment period should end June 21. (4/30/19)

By June 10. BLM-AK plans to publish supplementary rules in the Federal Register to address public safety concerns on the 11.41 acres of public land at the Fairbanks District Office location. Lack of consistent rules and expectations regarding appropriate public conduct at the site has hampered the BLM's ability to provide a safe visitor experience and to minimize user conflicts. Ongoing issues addressed by the new rules include open fires in proximity to office buildings, overnight use, long-term occupancy, unattended vehicles, and use of aerial drones. Once the rules publish, BLM-AK plans to issue a news release. No controversy is anticipated. (4/16/19)

OHES-057390 lease Sale FRN in DTS surnaming (BLMR002554).
MTM 80697 (LMA) is associated with the Westmoreland Chapter 11 / transfer of leases.

Bureau of Ocean Energy Management

BOEM has prepared multiple Calls for Information and Nominations (Calls) for lease sales proposed for 2019 and 2020 in the 2019-2024 Draft Proposed Program. The Mid-Atlantic Call (DTS #2257), the South Atlantic Call (DTS #2258), the Southern California Call (DTS #2388), and the Chukchi Sea Call (DTS #2385) are being held by BOEM. (9/21/18) After the Proposed Program is published, BOEM expects to publish the Notice of Availability (NOA) of the Area Identification covering the Gulf of Mexico (GOM) oil and gas lease sales in the 2020-2025 National Program (excluding the area currently under the GOMESA moratorium). The NOA is currently in surnaming with ASLM. (2/22/19, DTS#2631) (3/8/19)

On March 1, 2019, BOEM finalized the Environmental Assessments (EAs) on the four pending Atlantic G&G 2-D seismic permit applications with both Coastal Zone Management Act (CZMA) concurrence and Incidental Harassment Authorizations (IHA) approval. On March 7, 2019, Solicitor gave final approval to the additional documentation requested that explains for the record the differences in impacts from the four permits. The ION permit vessel and crew has been approved by the Department of Defense (DOD). The Acting Director is engaged in discussions with DOD regarding the proposed vessel and crew for the Spectrum, TGS and PGS permit applications. (11/30/18)

Based on a change in policy direction, BOEM has revised the proposed rule on financial assurance and the associated Regulatory Impact Analysis (RIA). The package is now with the Department for surname. Upon approval by the Department, the rule will be forwarded to OMB. (8/27/18, DTS #2343)

In May, BOEM expects to submit the Final Rule updating its air quality regulations related to oil, gas, and sulfur operations on the OCS to OMB for interagency review. At the request of the Department, an alternative version of the rule has been prepared, with conforming revisions to the economic analysis and the environmental analysis. The documents are currently in surnaming with the Department. Upon approval by the Department, the rule will be forwarded to OMB. (3/18/19, New DTS#2697)

In early May, BOEM expects to publish the Spring 2019 List of Restricted Joint Bidders. The document is currently with the ASLM. (4/5/19, DTS#2687)

In May, BOEM expects to publish a Notice of Availability (NOA) for Lighting and Marking Guidelines. These guidelines provide best practices and recommendations for lighting and marking design for offshore wind energy facilities and outline the types of information needed from lessees as part of their project plans (Site Assessment Plans, Construction and Operations Plans, or General Activities Plans). The package is currently with the BOEM Directorate for surname. (11/30/18, DTS#1772)

BOEM is finalizing its review of the proposed revisions to the previously approved Research Activities Plan (RAP) for Coastal Virginia Offshore Wind (CVOW) (formerly VOWTAP). The project includes the construction, operation, and eventual decommissioning of two 6 MW turbines approximately 24 miles offshore Virginia Beach, VA and associated cabling to shore. The primary revisions to the RAP involve design changes to the turbine and its foundation. A final BOEM decision on the RAP is anticipated in May. (5/3/19)

The Louisiana Coastal Protection and Restoration Authority has combined a portion of the East Timbalier Barrier Island Restoration Project with the Terrebonne Basin Barrier Island and Beach Nourishment Project into a single engineering, contracting, and construction project utilizing up to 10 million cubic yards of OCS material from the South Pelto area of Ship Shoal in the Gulf of Mexico. To align with the U.S. Army Corps of Engineers' issued permit for these projects, the Negotiated Noncompetitive Agreements and associated Findings of No Significant Impacts were drafted separately for each project and are expected to be issued by BOEM by May 31, 2019. (5/3/19)

BOEM's consultation response for NOAA's Flower Garden Banks National Marine Sanctuary Expansion Consultation, pursuant to Executive Order 13795, was provided to NOAA in a February 25, 2019, letter. BOEM's analysis shows some oil and gas resource potential in the proposed expansion areas. Renewable energy, marine mineral, and methane hydrate potential in the proposed expansion areas appears low. On April 23, 2019, NOAA provided BOEM an update on the FGBNMS expansion proposed rule: 1) NOAA determined the new expansion boundaries fall within the range of alternatives analyzed in their DEIS, so they will not supplement the DEIS; 2) A Notice of Proposed Rulemaking for the expansion will be published in July 2019; 3) There will be a 60 day public comment period on the proposed rule, followed by a Final EIS and Final Rule; 4) the existing FGBNMS regulations will be applied within the expanded sanctuary (except for a few changes to fishing rules); and 5) NOAA has determined BOEM's impact analysis of sanctuary expansion on offshore energy development, provided under EO 13795, to be less than significant. BOEM is

working on responses to NOAA's March 12, 2019, questions regarding BOEM's analysis; NOAA will schedule a meeting with BOEM to discuss the questions and responses. (5/3/19)

BP has begun the process of dismantling and removing the Liberty drilling rig located on Endicott Satellite Drilling Island in Alaska. BP estimates that it will completely remove the rig by the end of 2019. (5/3/19)

On April 10, the State Department sent the latest version of the International Seabed Authority (ISA) Draft Regulations on Deep Seabed Mining to BOEM for review. Internal BOEM edits are due by May 24. Edits are due to the State Department by June 14. Additionally, BOEM has been invited to a workshop in May 2019, in South Africa, on the development of standards, guidelines and other key terms under the regulations. (4/12/19)

On April 16, BOEM's Pacific Office received the official proposal via email to switch $90.2M in bonds for the remaining money market funds in the trust account. The proposal is being analyzed, and SOL is providing feedback on the legal ramifications. The predecessor has appealed the District Court and Bankruptcy Court decisions regarding a previous, similar switch to the Fifth Circuit, which will look at the facts and language of the Trust document independent of the conclusions of the lower courts. Initial plaintiff briefs were filed on March 21 with the court. (4/12/19)

As soon as possible, BOEM plans to submit comments to NOAA on its advance notice of proposed rulemaking (ANPR). In the ANPR, NOAA is seeking public comment on the changes that should be made to NOAA's Coastal Zone Management Act (CZMA) federal consistency regulations to make the federal consistency process more efficient across all stages of OCS leasing and development for oil and gas and renewable energy projects. NOAA is also seeking comments on ways to increase the timeliness and predictability of its appeals process, as well as comments on any potential cost savings to small entities associated with increased efficiency in the appeals process. The document is currently with ASLM for review. (4/19/19)

Bureau of Safety and Environmental Enforcement

Arctic Rule (AA01) –This is a joint BSEE BOEM rule and BSEE has been tasked as the lead agency by the ASLM for revisions to this rule. Although the scheduled tribal consultations were impacted by the drowning of a Native whaling captain and crewmember as well as the Alaskan earthquake, all have taken place. A meeting with the BSEE/ BOEM regulatory team took place on February 13 to discuss comments and path forward. A joint BSEE BOEM memo on the path forward has been drafted and was subject to ASLM/BSEE discussion on February 25. Additions were requested and a revised memo was delivered by the BSEE Director to the ASLM in a meeting on February 28. A revised, signed Arctic Rule memo complete with milestone timeline and team membership was delivered to the ASLM on March 11. The memo was executed by the ASLM on March 11. On March 13, BSEE, BOEM, and staff SOLs met to discuss coordination efforts to prepare a proposed rule package. Topics discussed include the roles and responsibilities of individuals within each bureau, and expectations under the rulemaking schedule. On March 18, the draft reg text was

shared with the rulemaking team that are preparing the environmental assessment, regulatory impact analysis, and information collection burden. The rulemaking team and subject matter experts preparing these documents have been in discussions all week to establish the parameters for how the changes in the regulations will be analyzed in the supporting documents. These discussions continued through the week of March 25. Reg text revision language is currently under review.

Office of Surface Mining Reclamation and Enforcement

Arkansas Department of Environmental Quality (ADEQ) Reorganization: OSMRE met with the ADEQ Mining Program on April 17, 2019, to discuss current operations, proposed program changes, and recent management changes. The Director of ADEQ indicated significant interest in maintaining primacy and doing what is necessary regarding its organizational structure and management in order to satisfy OSMRE concerns. ADEQ named an interim Mining Program manager, following the loss of the previous manager.

OSMRE NEPA Handbook and Roll-out Plan: OSMRE, in accordance with the April 27, 2018 Deputy Secretary Memo on Additional Direction for Implementing Secretary's Order 3355, has revised the OSMRE NEPA Handbook. The Handbook was last published in 1989 and incorporates the latest direction and policy on NEPA Compliance to include Executive Order 13807 and Secretarial Order 3355. The NEPA Handbook was revised by a team of OSMRE HQ, Regional and Field Office NEPA professionals beginning in July 2018. OSMRE anticipates releasing the NEPA Handbook the week of May 6, 2019. Following the release, OSMRE HQ and Regional staff will conduct a series of Regional training sessions for OSMRE Regional and Field Office staff to support awareness and effective implementation. Additionally, OSMRE and Regional staff will host Webinars for State partners to ensure awareness of the revised Handbook. The Regional and State training sessions are being scheduled for June 2019. Implementation of the NEPA Handbook will begin after a 60-day grace period following the release date and completion of the Regional and State training sessions.

State Program Amendment (SPA) Processing: Consistent with the Secretarial priorities as enumerated in the October 24, 2017, *Final Report: Review of the Department of the Interior Actions that Potentially Burden Domestic Energy*, *Revise Processing of State Program Amendments*, OSMRE is developing a modernized tracking system to ensure timely processing of SPAs. Roll out of this product is expected to occur by the end of the fiscal year. OSMRE also revised Directive STP-1, that governs the processing of SPAs and released Standard Operating Procedures related to processing. Training of OSMRE staff on processing procedures will occur no later than July 2019. In fiscal year 2019, OSMRE has published five proposed rule notices. There are currently seven proposed rules and two final rules pending clearance for publication in the *Federal Register*.

Notice for San Juan Mine Deep Lease Extension Final EIS ROD (NM): OSMRE published its Record of Decision (ROD) on May 1, 2019, following publication of the Final EIS notice in the *Federal Register* on March 15, 2019. . The Final EIS and ROD will inform

OSMRE's recommendation to the Assistant Secretary for Land and Minerals Management on whether to approve the federal mining plan.

Rosebud Mine (MT): The OSMRE Western Region jointly prepared an EIS with the Montana Department of Environmental Quality. The EIS will support a recommendation on the mining plan for Area F of the Rosebud Mine. OSMRE obtained Departmental Clearance to publish the Notice of Availability (NOA) for the Final EIS in the *Federal Register*. The NOA was published in the *Federal Register* on Friday, November 30, 2018. OSMRE was awaiting written permit findings from the State of Montana, prior to finalizing the Record of Decision (ROD). On April 18, OSMRE received Montana's written permit findings. OSMRE is currently finalizing its ROD and completing a time waiver for submission to OEPC and the Deputy Secretary's office. OSMRE expects to notice the ROD in the *Federal Register* on or around June 21, 2019. The Final EIS and ROD will inform OSMRE's recommendation to the Assistant Secretary for Land and Minerals Management on whether to approve the federal mining plan.

Narley No. 3 (AL): OSMRE's Regional Office began scoping for an Environmental Assessment (EA) for the Best Coal Narley No. 3 Mine in February 2019. OSMRE posted the NOI on the OSMRE Regional website on February 22, 2019. The public comment period closed on March 25, 2019. The Region's Federal Lands team conducted a site visit on March 26, 2019. Congressman Gary Palmer sent a letter dated March 25, 2019, to OSMRE requesting expedited completion of the required NEPA EA due to a potential exhaustion of available reserves. OSMRE sent a response letter on April 23, 2019. During the review, staff noted that the site's Nationwide Permit from the U.S. Army Corps of Engineers (USACE) has expired. OSMRE has been in contact with the USACE District personnel, who visited the site on April 19, 2019, and confirmed that a new permit would be necessary. Regional staff is currently working with HQ and USACE to determine a path forward. The Regional Office is drafting the EA, and sent the first two chapters to Headquarters for review on April 26, 2019..

Coyote Creek Mining EA (ND): BLM and OSMRE continue their efforts on the "pilot" project for the leasing and permitting actions reflected in the mine plan decision document. The contractor has revised the EA based on agency comments. The SOL review was conducted April 3 through April 19, 2019. The project schedule, anticipated publishing the draft EA on April 26, with a 30-day comment period. Due to additional work required to resolve SOL comments, the draft EA publication date was delayed. The agencies anticipate having the EA released for a 30-day public comment period in May 2019. They expect to complete the EA in August 2019.

ASSISTANT SECRETARY FOR POLICY, MANAGEMENT AND BUDGET (Indicates Press/Comms Opportunities)

Week Ahead Schedule of Meetings, Hearings, and Travel for the Upcoming Week

Susan Combs, Senior Advisor to the Secretary, exercising the authority of the Assistant Secretary for Policy, Management and Budget, will be in the office.

Scott Cameron, Principal Deputy Assistant Secretary, will be in the office.

Immediate Actions and Announcements for the Next Week

Deputy Assistant Secretary - Budget, Finance, Grants and Acquisition (DAS BFGA)

The Office of Budget (POB) received questions for the record from the House Interior and Environment Appropriations Subcommittee from the March and April Departmental and bureau budget hearings. POB is coordinating responses, and Departmental and OMB reviews, prior to submitting to the Hill. (05/07/2019)

The week of May 13, the Office of Management and Budget (OMB) staff are planning official travel to Alaska and the Pacific Northwest. OMB will focus on energy related topics in Alaska and on National Parks, Wildlife Refuges and Indian Affairs in the Pacific Northwest. The Office of Budget is developing itineraries and will accompany them. PMB is coordinating with Steve Wackowski, Senior Advisor for Alaskan Affairs, on the Alaska portion of the itinerary. (05/03/2019)

The Financial Assistance Improvement Project (FAIP) is scheduling planning meetings with GrantSolutions to discuss the project schedule and implementation approach. The transition Interagency Agreement (IAA) has been signed by PMB, and the transition plan has been approved. (05/07/2019)

Deputy Assistant Secretary - Public Safety, Resource Protection and Emergency Services (DAS PRE)

From May 13 – 17, Office of Aviation Services (OAS) Director, Mark Bathrick will be in Washington, DC, to attend the quarterly meeting of the Federal UAS Executive Committee (ExCom). Director Bathrick will participate in meetings with bureau and other interagency and industry partners. (05/07/2019)

From May 13 – 17, Program Manager - Inter-agency Borderland Coordinator and Field Communications (IBC), (b)(6), (b)(7)(C), will attend several interagency border wall project site visits in CA and AZ. (05/07/2019)

From May 17 – 18, Office of Wildland Fire (OWF) Director Jeff Rupert will travel to Dallas, TX, for the American Thoracic Society International Conference where he will participate in a panel discussion on the health impacts of wildland fire smoke. (04/16/2019)

Deputy Assistant Secretary – Policy and Environmental Management (PEM)

On May 13, Stas Burgiel with the NISC Secretariat will participate in a round table on invasive species sponsored by Virginia Tech. He will discuss a whole-of-government perspective on invasive species management, complemented by presentations from DOI, USDA, and DOC/NOAA. (05/07/2019)

By May 15 the manual process between the Financial and Business Management System (FBMS) Business Integration Office and the USGS to allow for Natural Resource Damage Assessment and Restoration (NRDAR) data to be provided from FBMS will be in place. By the end of July, an automated process will have been tested and implemented linking FBMS data with NRDAR data housed in the Office of Restoration and Damage Assessment's (ORDA) Information Management System (DARTS). This connection will allow users the ability to view information on NRDAR cases and their associated financial data in one location. (05/07/2019)

Office of the Chief Information Officer (OCIO)

The Departmental Records Officer submitted the Department's response to the National Archives and Records Administration's (NARA) congressional inquiry concerning how the Department maintains the Secretary's calendar records. (05/07/2019)

8-30 Day Outlook

Deputy Assistant Secretary - Public Safety, Resource Protection and Emergency Services (DAS PRE)

NEW ITEMS

From May 20 – 22, Program Manager - Inter-agency Borderland Coordinator and Field Communications (IBC), (b)(6), (b)(7)(C), is planning to attend a FWS Regional Law Enforcement meeting at Santa Ana Wildlife Refuge near McAllen, TX. The topic of discussion will be Enterprise Dispatch solutions. (05/07/2019)

From May 28 – 31, Office of Wildland Fire (OWF) Director Jeff Rupert will travel to Winthrop, WA, to attend the National Association of State Foresters (NASF) Wildland Fire Committee Meeting. Topics for discussion include cooperative wildfire agreements, federal updates, wildland fire sciences, shared stewardship, and information technology. (05/07/2019)

Deputy Assistant Secretary - Budget, Finance, Grants and Acquisition (DAS BFGA)

NEW ITEMS

As of May 1, the Department closed 25 percent of open audit recommendations scheduled for closure in Fiscal Year (FY) 2019 versus the immediate goal of 48 percent by the end of March. The Department has an annual goal of closing 85 percent of recommendations scheduled for completion in the current FY to address issues raised in Office of Inspector General (OIG) and U.S. Government Accountability Office (GAO) audits. The Office of Financial Management is actively working with the Bureaus and Offices to reach the annual 85 percent goal by August 1. (05/07/2019)

UPDATED ITEMS

The House Interior and Environment Appropriations Subcommittee is expected to start to mark-up a FY 2020 bill in mid-May. No dates have been scheduled. (04/26/2019)

The following FY 2020 budget hearings are scheduled for May.

- May 15, Secretary Bernhardt is scheduled before the House Natural Resources Committee.
- May 22, Secretary Bernhardt is scheduled to testify before the Senate Interior and Environment Appropriations Subcommittee. (05/07/2019)

The Office of Management and Budget staff are planning official travel in May, June, and August. The Office of Budget is working to develop itineraries and will accompany OMB staff on travel. (05/07/2019)

The Notice of Proposed Rule to establish the DOI Financial Assistance Interior Regulation (FAIR) was published in the Federal Register on March 21, 2019. The 30-day public comment period ended on April 22, 2019. DOI received 56 public comments. The Office of Grants Management is reviewing the comments. The draft final rule is expected to enter PMB surnaming by May 24, 2019. (05/07/2019)

Deputy Assistant Secretary – Policy and Environmental Management (PEM)

NEW ITEMS

There are currently fourteen (14) Environmental Impact Statement Environmental Reviews scheduled from May 6 – June 4. (05/07/2019)

On June 4-5, Stas Burgiel with the NISC Secretariat will participate in a meeting of the 100th Meridian Initiative Columbia River Basin Team, where he will focus on opportunities to enhance the application of an Incident Command System in response to invasive mussels. (Spokane, WA; open to press; added 05/07/2019)

The Mississippi Trustee Implementation Group is developing a Draft Supplemental Restoration Plan (SRP) and Environmental Assessment for their Grand Bay Land Acquisition and Habitat Management Project. DOI is the lead Federal Trustee on the plan will publish the Notice of Availability (NOA) for public comment on behalf of the Deepwater Horizon Trustees in the Mississippi Trustee Implementation Group. The NOA will open the public comment period on the draft SRP that proposes $10,000,000 in funding for additional habitat acquisition and management for the Grand Bay Land Acquisition and Habitat Management Project located in the Mississippi Restoration Area. The State of Mississippi will use the $10 million to acquire land from willing sellers. The plan is expected to be released in late May. (05/07/2019)

Deputy Assistant Secretary - Human Capital and Diversity (DAS/HC&D)

ONGOING ITEMS

The 2019 Honor Award Convocation is scheduled for September 12, 2019 in the Yates Auditorium. The Office of Human Capital will issue a formal call for award nominations to Assistant Secretaries and Bureau leadership the week of May 6th. Deadline for Bureaus/Offices to submit nomination packages will be June 7th. (05/07/2019)

ASSISTANT SECRETARY FOR WATER AND SCIENCE (Indicates Press/Comms Opportunities)

Week Ahead Schedule of Meetings, Hearings, and Travel

Assistant Secretary Tim Petty will be in Washington, D.C. on May 13. May 14-17, ASWS Petty will attend the Nutrient Roundtable (a Water Subcabinet activity) and Hypoxia Task Force meeting in Baton Rouge, LA, and briefings at the USACE Engineer Research and Development Center in Vicksburg, MS. On May 18, Tim will travel to Boulder City, NV in prep for the DCP signing event on May 20.

Principal Deputy Assistant Secretary Kiel Weaver will be in Washington, D.C. May 12-18.

Commissioner Brenda Burman is scheduled to be in Washington, D.C. May 12 – 18. On May 16, Commissioner Burman is scheduled to testify before the House Natural Resources Subcommittee on Water, Oceans and Wildlife on Reclamation's FY 2020 budget request.

From May 14-16, USGS Director Jim Reilly will attend the Hypoxia Task Force meeting in Baton Rouge, LA. On May 13 and 17, Jim will be in Reston, Va./Washington, D.C.

From May 13-16, Acting USGS Deputy Director Cindy Lodge will lead the USGS Spring Science planning meeting at NCTC in Shepherdstown, WV. On May 17, Cindy will be in Reston, Va./Washington, D.C.

Immediate Announcements and Actions For the Next Week

Bureau of Reclamation

Between May 12 and 25, Reclamation plans to announce the availability of the final environmental assessment and finding of no significant impact documents for proposed efficiency enhancements to existing water distribution equipment on approximately 71 miles of the Casa Blanca Canal on the Gila River Indian Reservation, Pinal County, Arizona. No significant press coverage is anticipated. (05/06/2019)

On May 13, Reclamation proposes to approve the transfer of up to 2,000 acre-feet per year of Central Valley Project (California) water from the Anderson-Cottonwood Irrigation District to the City of Shasta Lake, California. The transfer period is five years, beginning with water year 2019. A 30-day public comment period for the draft environmental assessment is anticipated to begin on May 13. Stakeholders will be notified of the public comment period. No news release will be issued. Possible light media interest. (04/29/2019)

On or around May 13, Reclamation plans to issue a news release announcing the availability of a final environmental impact statement for the El Dorado County Water Agency (California) Long-Term Water Service Contract. The purpose of the proposed action is to enter into a new Central Valley Project water service contract to meet the water demands of planned and approved future growth in El Dorado County. Light media interest is expected. (05/06/2019)

On or about May 13, Reclamation plans to release a draft environmental assessment that analyzes the proposed issuance of a $193,000 WaterSMART grant to McMullin Area Groundwater Sustainability Agency (California) for their proposed development of a water marketing strategy to address declining groundwater levels, declining water quality, lack of a permanent surface water supply, and land subsidence. No news release will be issued. Media interest is not anticipated. (05/06/2019)

On or about May 13, Reclamation plans to release a draft environmental assessment that analyzes the proposed issuance of a $75,000 WaterSMART grant to Pajaro Valley Water Management Agency (California) for their proposed real-time water use data acquisition for the Coastal Distribution System Project. No news release will be issued. Media interest is not anticipated. (03/25/2019)

On or about May 13, Reclamation plans to release a draft environmental assessment that analyzes the proposed banking program between Arvin-Edison Water Storage District and Rosedale-Rio Bravo Water Storage District, both located in California. No news release will be issued. Media interest is not anticipated. (03/25/2019)

On or about May 13, Reclamation plans to release a draft environmental assessment that analyzes the proposed amendment of a previously approved nine-year transfer program for Poso Creek Water Company, LLC (California). No news release will be issued. Media interest is not anticipated. (03/25/2019)

On or about May 13, Reclamation plans to release a draft environmental assessment that analyzes the proposed issuance of a WaterSMART grant to the Tranquillity Irrigation District (California) for their proposed Southeast Service Area Water Conservation and Conveyance Improvement Project. No news release will be issued. Media interest is not anticipated. (03/25/2019)

On or about May 13, Reclamation plans to release a draft environmental assessment that analyzes proposed Central Valley Project (California) annual transfers over a five-year period (calendar year 2019 through 2023) of up to 25,500 acre-feet per year. No news release will be issued. Light media interest possible. (04/01/2019)

On or about May 13, Reclamation plans to release a draft environmental assessment analyzing the proposed issuance of five-year Warren Act agreements to five Friant Division (California) long-term contractors for the introduction of up to 7,450 acre-feet of Kaweah River water for use on existing agricultural lands. No news release will be issued. Light media interest possible. (04/01/2019)

Around May 13, Reclamation plans to distribute a news release announcing the use of Russian knapweed gall wasps in some wetland areas in southwest Colorado to help control Russian knapweed, a noxious weed harmful to native plants and wildlife. Reclamation is collaborating with the Palisade Insectary and Colorado Parks and Wildlife. Medium media interest is anticipated. (05/06/2019)

On May 14, Reclamation plans to host a tour of Hoover Dam near Las Vegas, Nevada for approximately 80 officers from the U.S. Naval War College. No media coverage is anticipated. (04/15/2019)

U.S. Geological Survey

Christina Neal, Scientist-in-charge, Tom Murray, Volcano Science Center Director, and the USGS Hawaiian Volcano Observatory Team are finalists for the Samuel J. Heyman Service to America Medal (SAMMIE) for Science and Environment. The nomination is recognition for careful monitoring of the large and sustained eruption of Kīlauea Volcano in Hawaii and providing vital updates to protect residents, tourists and property from ash, lava and toxic fumes. The award nomination includes the work of many across the USGS and we congratulate and celebrate everyone involved in the Kilauea response. (5/6/2019)

During the week of May 13, USGS scientist Sky Bristol with the Science Analytics and Synthesis program will serve on a panel to develop science questions for the United Nations Decade of Ocean Science for Sustainable Development (2021-2030). This effort will help set a research agenda for The Decade, helping to make sure that US research agency priorities are represented. (04/05/2019)

On May 13-14, the Joint Fire Science Program Governing Board meeting will be held in Boise, ID. Chaired by USGS Fire Science Coordinator Paul Steblein, the governing board is continuing strategic planning to identify ways to increase collaboration between fire science programs at the USGS and USFS. With funding restored in the 2019 appropriations, the current call for proposals is open until May 16, 2019. (4/24/2019)

On May 13-16, the 3rd Unmanned Aircraft Systems (UAS) Federal Workshop, co-sponsored by the USGS and NASA-Ames, will be held at Moffett Field, California. The goals of the workshop are to provide scientists across the federal government with new opportunities to use UAS, develop new sensors to fill observational gaps, and help shape the next generation of UAS with science and operational requirements. Speakers from many federal agencies across the nation, and selected industry leaders who are applying artificial intelligence to UAS data, and developing high altitude, long endurance UAS have also been invited for the 3-day event. (4/12/2019)

On May 15-17, USGS Associate Director for Natural Hazards Dave Applegate will serve as the Alternate US Representative on the US Delegation to the 2019 Global Platform for Disaster Risk Reduction, hosted by the UN Office for Disaster Risk Reduction (UNDRR) in Geneva, Switzerland. The Global Platform is a biennial global multi-stakeholder forum to review the progress in the implementation of the Sendai Framework for Disaster Risk Reduction. Dr. Applegate is attending on behalf of USGS and as co-chair of the National Science and Technology Council's Subcommittee on Disaster Reduction, which coordinates US interactions with the UNDRR and is responsible for US reporting on Sendai Framework progress indicators. (5/3/2019)

On May 15, the USGS will announce the latest edition of the National Land Cover Database, NLCD 2016. This is the most comprehensive land cover database that the USGS has ever produced. NLCD 2016 contains 27 different land cover products characterizing land cover change, urban imperviousness change, tree canopy change and shrub and grassland areas in the Western U.S. NLCD 2016 was developed to meet the rapidly growing demand for comprehensive land cover change data within a variety of user communities. A USGS news release is planned. (4/29/2019)

On May 16, USGS Associate Director for Water Resources, Don Cline, will serve as the USGS witness before the House Natural Resources Subcommittee on Water, Oceans, and Wildlife at an oversight hearing entitled, "Examining the President's Fiscal Year 2020 Budget Proposal for the Bureau of Reclamation and the United States Geological Survey." Commissioner Brenda Burman will also participate in the hearing to represent the Bureau of Reclamation. (4/19/2019).

On April 25 – May 12 and May 17 – 26, the USGS will participate in a research cruise examining coral reef habitats inside and near the Flower Garden Banks National Marine Sanctuary in the Gulf of Mexico. The expedition, part of NOAA's Regional Ecosystem Prediction Program, will examine the population connectivity of coral within a marine sanctuary, as well as the surrounding areas. Data collected will improve management strategies to protect these habitats and support decisions regarding current and future marine protected areas. This cruise will be conducted in two legs: The first leg will be aboard the *R/V Pelican* and utilize Oceaneering's remotely operated vehicle *ROV Global Explorer* to collect various corals and sponges for genetic and isotope studies; to collect water and sediments; and to deploy autonomous reef monitoring systems which will remain in place for approximately two years. The second leg will be aboard the *R/V Southern Journey* and utilize fish traps and other fishing gear to examine fish species present at these same sites and collect isotope, stomachs, and otoliths (ear bones) from multiple species. (04/26/19)

On May 13, the USGS will issue a feature story about two different USGS research projects, both taking place in Alaska, and both using drone technology to detect methane. One project is a demonstration of low-cost technology to detect erosion hotspots on the North Slope, the other study is about understanding the carbon cycle from soil to atmosphere, by examining forested land that has changed to bogland, because of permafrost thawing. (5/3/2019)

On May 14, the USGS will announce a new paper that describes key barriers hindering integrative drought research and monitoring across riverscapes. The primary constraint limiting understanding of ecological drought is the existing monitoring framework focused on human water consumption and flood risk in mainstem rivers. This approach is misaligned with escalating needs for research and data collection that illuminate exposure, sensitivity, and adaptive capacity (i.e., vulnerability) of biota to drought across entire riverscapes. This new coordinated and integrated drought research and monitoring approach is being used to implement the USGS Ecological Drought Strategy across the United States. A USGS news release is planned. (4/15/2019)

During the week of May 13, USGS plans to announce the kick off of an innovative project to study Harmful Algal Blooms (HABs) in the Finger Lakes region of New York. In partnership with the state, USGS is installing new, innovative and robust monitoring systems to gain insight on HAB development, duration and decline. HABs occur when algae grow out of control and produce toxic effects which can be harmful to humans, animals, pets and aquatic ecosystems, and lead to impacts on the economy. A better understanding of the growth and severity of HABs will allow state officials, water resource managers, drinking water utilities, the public and others make more informed choices to address HABs and develop HAB mitigation strategies. A media advisory will be issued for the installation event and a news release will follow the installation. (03/05/19)

8-30 Day Outlook

Central Utah Project Completion Act (CUPCA) Office

ONGOING ITEMS

The Department of the Interior's CUPCA Office, Central Utah Water Conservancy District, and Utah Reclamation Mitigation and Conservation Commission, as Joint Lead Agencies (JLAs), are evaluating alignment alternatives for the South Fields Reach 2 segment of the Spanish Fork Santaquin Pipeline (SFSP). The SFSP is part of the Utah Lake Drainage Basin Water Delivery System of the Central Utah Project. The JLAs have initiated the National Environmental Policy Act process and are preparing an Environmental Assessment. The JLAs previously conducted a scoping process for the South Fields Reach segment of the SFSP. As part of this previous scoping process, Brigham Young University (BYU) recommended an alignment alternative through BYU owned property. The new scoping materials describe the updated and proposed realignment alternatives. A public information meeting will be held May 16, 2019, and comments must be submitted by June 7. (05/06/2019)

Bureau of Reclamation

NEW ITEMS

On or about May 28, Reclamation plans to release the final environmental assessment and finding of no significant impact for the Cayuse Cove Slope Stabilization Project (Washington). No media attention is expected. (05/06/2019)

On June 4-5, Reclamation plans to hold public meetings in Albuquerque and Los Ojos, New Mexico, to discuss repairs to El Vado Dam and Spillway near Chama. The storage of water during construction has generated interest as El Vado Reservoir stores water for the Middle Rio Grande Conservancy District and the Six Middle Rio Grande Pueblos. Media advisory will be issued; local media interest is anticipated. (05/06/2019)

In early June, Reclamation plans to begin negotiations in Sacramento, California, with the Orland Unit Water Users Association for the Safety of Dams Repayment Contract for the

Stony Gorge Dam Modification Project completed in 2009. Stony Gorge Dam, which forms Stony Gorge Reservoir, is part of the Orland Project located in Glenn County near Willows, California. No news release will be issued. Light media interest is expected. (05/06/2019)

In June, Reclamation plans to announce the winners of the Sediment Removal Techniques for Reservoir Sustainability Prize Competition, Stage 1. This prize competition sought new or improved techniques for reservoir sediment removal and transport of the removed sediment in a cost-effective manner that preserves and sustains the operational objectives of the reservoir. Media interest is anticipated to be light. (05/06/2019)

ONGOING ITEMS

On May 20, Reclamation plans to host a Colorado River Drought Contingency Plans signing ceremony at Hoover Dam, near Las Vegas, Nevada. Media will be invited to a media availability prior to the event. National press is expected. (04/29/2019)

On or about May 20, Reclamation plans to release the final environmental assessment and finding of no significant impact for the maintenance and rehabilitation of the American Falls Dam spillway in south-central Idaho. Anticipate light media interest. (04/22/2019)

On May 22, the Glen Canyon Dam Adaptive Management Work Group will host a webinar/conference call. A *Federal Register* notice will be published prior to the meeting. The webinar is open to the media and public. (04/15/2019)

On May 23, Reclamation plans to host the Jackson Lake Dam operations information meeting in Jackson, Wyoming. A news release was issued on May 7. (04/08/2019)

In May, Reclamation plans to announce the winners of the Powering Electronic Instruments on a Rotating Shaft Prize Competition. Reclamation sought novel methods and technologies to reliably provide direct current power for loads of up to 20 watts to instruments on rotating shafts. A news release or web story will be published; expect medium media interest. (03/11/2019)

In May, Reclamation plans to announce the implementation of the Federal Lands Recreation Enhancement Act authority at Lake Berryessa, California. This is the final step to bring recreation use fees to the Lake Berryessa area to help fund recreation enhancements and meet the demands of the visitor recreation experience. A news release will be issued; expect moderate media interest. (04/22/2019)

In mid-May, Reclamation plans to announce in the *Federal Register* the establishment of a new categorical exclusion under the National Environmental Policy Act for certain facility transfers of title from Reclamation to qualifying non-federal entities. A news release will be issued; expect medium media interest. (04/15/2019)

At the end of May or beginning of June, Reclamation plans to offer a media opportunity to discuss the Boca Dam Safety of Dams improvement project and area impacts. Reclamation

plans to modify Boca Dam to better resist the impacts of earthquakes. The project is scheduled for completion in October 2020. Boca Dam is located six miles northeast of Truckee, California. A media advisory will be issued. (04/29/2019)

By June 7, Reclamation anticipates issuing a new 40-year Green Mountain Reservoir (Colorado) contract that renews an expiring contract. The proposed contract is with Roundup River Ranch: 125 acre-feet of water for municipal use. Do not anticipate media coverage. (04/29/2019)

Around June 7, Reclamation and the California Department of Parks and Recreation (CDPR) plan to announce the availability of a joint draft environmental impact report/environmental impact statement for the Auburn State Recreation Area General Plan/Auburn Project Lands Resource Management Plan. There will be a public open house in Cool, California, on June 20. CDPR plans to release a joint news release; possible light media coverage. (04/22/2019)

U.S. Geological Survey

NEW ITEMS

From May 2019-May 2021, the Alaska Climate Adaptation Science Center will be co-leading a new project, "The Indigenous Observation Network 2.0: Climate Change Impacts to the Yukon River Basin". The project will collect water data and pair snow, permafrost and active layer dynamics from watersheds from the headwaters to the mouth of the Yukon River through a partnership with Alaska Native Tribes and First Nations to better understand how snow distribution and permafrost degradation may be impacting the Yukon River Basin. Social science methods will also be employed to better understand Arctic and sub-Arctic Indigenous communities' knowledge and relationship to permafrost thaw. Partners and stakeholders include the National Science Foundation (Funder), Yukon River Inter-Tribal Watershed Council, University of Alaska Fairbanks, US Forest Service, and the USGS Water Mission Area. (5/2/2019)

From May 23-31, USGS biologists with the Alaska Science Center and Western Ecological Research Center will conduct collaborative field work with biologists from the USFWS, the Alaska Sea Life Center, and the veterinarian from the Monterey Bay Aquarium, in Kachemak Bay, Alaska. The field work involves capturing sea otters, collecting samples, and implanting VHF radios and life history tags. The research is seeking to determine the efficacy of the newly developed life history tags to the study of sea otter reproduction, movement, and survival over their lifetimes. Northern sea otters have been listed as threatened in the Southwest Alaska population stock. Because much of this stock is in remote, hard to study areas, such as the Aleutian Islands, gathering critical information is expensive and logistically difficult. Life history tags collect information that managers can use to address questions relevant to the listed stock about reproduction, survival, and movements. The information from this study may improve the ability to deploy the technology in more remote areas. (06/03/19)

In May or June, the White House plans to announce the release of a whole-of-government critical minerals strategy. This strategy is built off a list of 35 minerals deemed critical to the economy and security of the United States, which was created based upon a USGS methodology released in 2018. DOI will issue a news release summarizing the USGS, BLM, and BOEM roles in producing the strategy. Each bureau will also amplify the DOI release with social media and associated products. (5/1/2019)

UPDATED ITEMS

In late June, the USGS will announce a new Asian carp deterrent developed by the USGS and FWS that involves adding carbon dioxide to waterways and forcing invasive fish to retreat from the application site. Preliminary trials have proved promising, and EPA registration of the deterrent will allow scientists to test this method on a larger scale in Great Lakes waterways. The goal is to prevent/control the spread of invasive fish in the Great Lakes. The USGS will initially reach out to partners via a Partner Guidance Website and through partner organizations and communication channels. The information will be shared with the public at a later date. (4/23/2019)

ONGOING ITEMS

On May 21-23, the USGS-led Multi-Resolution Land Characteristics (MRLC) Consortium, the interagency partnership formed in the mid-1990s to produce the Nation's first Landsat-based map of land cover in the United States will convene in Reston VA for an annual meeting that coincides with the release of the most robust product suite in its history, the National Land Cover Database (NLCD) 2016. MRLC Consortium's representatives will discuss NLCD 2016, its land change and land cover findings for the conterminous U.S., as well as plans for product rollout. The group will also discuss progress in other partner products, including USDA National Agricultural Statistics Service crop type, NOAA coastal maps, and LANDFIRE's ongoing remap efforts. (5/2/2019)

In May, the USGS will release information and sample date about the Landsat Collection 2. In 2016, the USGS reorganized the Landsat archive into a tiered Collection 1. Collection 2 is the next iteration and will be generated using improved ground control points for the geometric processing, so the absolute geodetic accuracy will be much better. The Landsat Science Team plans to share a high-level summary of Landsat Collection 2 and also share sample metadata with the Landsat science and user community. (5/2/2019)

On May 21, Mindi Dalton (Water Resources Mission Area Water Availability and Use Science Program Coordinator) will brief the Upper Mississippi River Basin Association (UMRBA) on Integrated Water Availability Assessments (IWAAs). The UMRBA is currently exploring water availability and use issues in the basin and would like to learn more about IWAAs generally and the pilot in the Cambrian-Ordovician aquifer specifically. (5/4/2019)

On May 21-23, the Sustainable Land Imaging (SLI) Architecture Study Team (AST) will hold its 5th face-to-face working session at the USGS campus in Flagstaff, AZ to continue

working on Design Cycle 2. In April, the AST met at NASA Goddard Space Flight Center for its 4th face-to-face working session to address action items from Checkpoint 1, including higher resolution applications, disaggregated systems, an updated cost assessment, commercial framework and assumptions, and ground system architecture pipelines. (4/12/2019)

In early May, the USGS will announce the selection of 11 studies focused on Harmful Algal Blooms (HABs). The USGS National Water Quality Program and USGS Water Science Centers worked together to address various technical aspects of HABs work. The goals were to foster innovation in monitoring the occurrence of HABs and algal toxins, research factors that result in algal toxin production, and improve near-real time modeling and forecasting of toxin-producing blooms. The studies partner with state, city, and other federal entities who are critically engaged with HAB research and monitoring. The HAB studies feature new approaches and techniques, including genetics, sensor technology, and remote sensing that will also support the new WMA priorities of Next Generation Water Observation Systems, the Water Prediction Work Program and Integrated Water Availability Assessments (IWAAs). (4/9/2019)

In mid to late May, the USGS will issue a technical announcement regarding the results of an analysis of the quality and extent of aeromagnetic surveys throughout the United States conducted to support Executive Order 13817 (December 2017) on critical minerals. (4/23/2019)

In May, North Central Climate Adaptation Science Center (CASC) ecologist Brian Miller is expected to present his work on scenario planning and simulation modeling as part of a webinar series hosted by the Western Governors' Association Biosecurity and Invasive Species Initiative. Miller was invited to present his work modeling climate, invasive species, and resource management as part of this series. (03/07/19)

Implementation and planning for FY2020 of the USGS Earth Mapping Resources Initiative (Earth MRI) is underway. The USGS, in cooperation with the Association of American State Geologists (AASG), has identified areas to concentrate new data collection efforts for geophysical surveys, framework geologic mapping, and lidar topographic data. The USGS Mineral Resources Program plans to conduct four major geophysical surveys (one in Alaska and three in parts of South Carolina, Illinois/Kentucky, and California/Nevada) that focus on high-priority areas known or suspected of containing rare earth element mineral resources. Areas for 14 new geologic mapping efforts have been identified and discussions with the candidate States are underway. USGS anticipates that the State Geological Surveys' mapping efforts will be funded through cooperative agreements with the USGS National Cooperative Geologic Mapping Program. These agreements will be submitted for processing by June 13. Partnerships to help fund the collection of new lidar data are being sought through the USGS National Geospatial Program. Additionally, the National Geologic and Geophysical Data Preservation Program has selected proposals to fund over 33 State Geological Surveys for preserving and making available to the public archival information on critical mineral deposits, drill core information, and geologic records. (4/11/2019)

By approximately June 1, the USGS will develop a phased plan for implementing the recommendations resulting from the peer-review audit of the TRIGA reactor and a timeline for resuming safe operation of the reactor. (4/29/2019)

Upcoming USGS Publications

Title	Summary	Publication Outlet	Anticipated Publication Date
NEW *Effects of 21st century climate, land use, and disturbances on ecosystem carbon balance in California*	This publication presents new projections of changes in ecosystem carbon balance for the period 2001-2100 for 32 future scenarios which explore differences in the rates of land use change, ecosystem disturbances, radiative forcing and greenhouse-gas emissions, and projections of climate variability and change. Between 2001-2015 carbon storage in CA's terrestrial ecosystems declined, and carbon storage in terrestrial ecosystems was projected to decline by 2100 from current stocks.	Global Change Biology	5/10/2019
NEW *Long term trajectories of fractional component change in the Northern Great Basin, U.S.*	A paper, authored by EROS scientists, shares an automated method of mapping rangeland fractional component cover over a large portion of the northern Great Basin from 1986 to 2016 using a Landsat imagery time-series. The authors tested removing years for the time-series to evaluate the sensitivity of component cover temporal trends to sample size, finding little influence until less than 6 years were included in the time-series.	Ecosphere	5/10/2019
NEW *Mining Review*	Synopsis of nonfuel mineral production and processing in the United States as presented in the USGS Mineral Commodities Summaries for 2018.	Mining Engineering	6/1/2019
NEW *Spatial conservation planning under uncertainty: adapting to climate change risks using modern portfolio theory*	Southeast Climate Adaptation Science Center (CASC) researcher Mitchell Eaton is the lead author to this publication which details a scientific approach to address climate change and urban growth impacts on habitats, species and ecosystem services by considering the tradeoff between expected benefits and risks when designing conservation reserves for the future. The proposed approach can inform strategies for managing climate risks in the	Ecological Applications	7/1/2019

	South Carolina Lowcountry.		
NEW ***Contemporary human impacts on alpine ecosystems: the direct and indirect effects of human-induced climate change and land use***	Alpine ecosystems around the globe are experiencing some of the highest levels of warming-induced changes, as well as the effects of human activities like grazing and recreation. This book chapter covers a literature review of the effects of climate change and land use on alpine ecosystems worldwide. Understanding alpine ecosystems in the context of climate change and human land use can provide land managers valuable information about these fragile and globally important ecosystems.	Encyclopedia of World's Biomes	6/1/2019
NEW ***Soil characteristics are associated with the development of big sagebrush canopy structure after disturbance***	Restoration of wildlife habitat in sagebrush ecosystems is dependent on reestablishing shrub canopy cover after disturbances, such as wildfire. This study evaluated how sagebrush recovery related to soil and other site properties where sagebrush successfully re established after fire and subsequent seeding treatment across the Great Basin, USA. The results of this study may improve planning of restorative land treatments for sagebrush-steppe ecosystems.	Ecosphere	6/1/2019
NEW ***Freezing-resistance, safety margins, and survival vary among big sagebrush populations across the western US***	Physiological responses to temperature extremes are considered strong drivers of plant resilience to climate variability. Researchers measured winter and spring freezing responses for big sagebrush populations throughout its range. The relationships of the freezing responses to survival were evaluated in a warm common garden experiment, and in two colder gardens. Results may assist future sagebrush restoration efforts and provide insight on population responses to climate change.	Rangeland Ecology and Management	6/15/2019
NEW ***It is Raining Plastic.***	Atmospheric wet deposition samples were collected at eight sites in the Colorado Front Range. Plastics were identified in more than 90% of the samples. Plastic materials were mostly fibers and visible only with magnification. More plastic fibers were observed in samples from urban sites than from remote sites. However, frequent observation of plastic fibers in washout samples from the remote sites suggests that wet deposition of plastic is ubiquitous and not	USGS Open-File Report	5/7/2019

	just an urban condition.		
Airborne radiometric maps of Mountain Pass, California	Radiometric investigations of Mountain Pass and vicinity were conducted as part of an effort to study regional crustal structures as an aid to understanding the geologic framework and mineral resources of the eastern Mojave Desert. Mountain Pass is host to one of the world's largest rare earth element carbonatite deposits.	USGS Scientific Investigations Map	5/12/2019
Tectonic Map of the Arctic	The Tectonic Map of the Arctic (TeMAr) has been compiled under the International project "Atlas of Geological Maps of the Circumpolar Arctic in scale 1:5M." The project, initiated in 2003 by the Geological Surveys of the Arctic countries, was compiled by an international working group coordinated by the VSEGEI in Russia beginning in 2009. Major features depicted include orogenic belts, sedimentary basins, faults and areas of rifting, accretion, and magmatism.	Commission for the Geologic Map of the World	5/15/2019
Bunchgrass root abundances and their relationship to resistance and resilience of a burned shrub-steppe landscape	Using standard USDA protocols for root measurement, USGS scientists made 445 excavations across a region of sagebrush steppe burned in 2015 Soda megafire. The goal was to find how bunchgrass root abundances relate to annual grass invasion and to more-readily measured, aboveground indicators of bunchgrass vigor. The results of this study provide some support for the importance of basal gaps and bunchgrass diameters as indicators and the need for more detailed methods for root measurement.	Rangeland Ecology and Management	5/30/2019
Hydraulic, Geochemical, Thermal Monitoring of an Aquifer System in the Vicinity of Mammoth Lakes, Mono County, California, 2015 - 2017	USGS has played a long-term role addressing Mammoth area geothermal development. Beginning in 2015, new USGS monitoring was initiated to collect baseline data related to the proposed Casa Diablo IV Geothermal Power Project (Ormat). In response to focused attention on USGS monitoring by stakeholders in the community, the USGS has prepared a report summarizing and interpreting the recently collected data.	USGS Open-File Report	6/15/2019
Population estimates of Antillean manatees in Puerto Rico: An analytical	The Antillean manatee was down-listed as threatened in the U.S. as part of the reclassification of the West Indian manatee	Journal of Mammalogy	5/30/2019

framework for synoptic surveys	(the species the Antillean subspecies belongs to). In this study researchers estimate the population size of manatees in coastal Puerto Rico. The purpose of the research is to provide federal and territorial agencies with a sampling design for surveys to reliably estimate population size as stipulated in the species recovery plan.		
Experimentally derived nitrogen critical loads for northern Great Plains vegetation	Anthropogenic atmospheric nitrogen (N) deposition adversely affects a variety of ecosystems, but the information used to derive critical loads for North American ecosystems is sparse. This study, based on a four-year field experiment in the northern Great Plains, estimates the critical load of N for sensitive infertile, badlands vegetation and more widespread northern mixed-grass prairie.	Ecological Applications.	5/30/2019
Lag effects of hydrologic transitions between wet and dry conditions on wetland greenhouse gas fluxes	This study examines how greenhouse gas (GHG) fluxes in wetlands of the Prairie Pothole Region of North America change in response to seasonal flooding and drying, with a focus on hydrologic lag effects. Results of this study highlight how seasonal drying and re-wetting impact GHGs and demonstrate the importance of hydrologic transitions on total wetland GHG balance.	Atmosphere	5/30/2019
Negative impacts of summer heat on Sierra Nevada tree seedlings	Tree seedlings are often vulnerable to climatic variation and it is unclear how changes in precipitation and climatic shifts will impact seedlings. Scientists analyzed a decade of seedling growth and survival data collected in Sequoia and Yosemite National Parks to examine the influence of species, tree size, fire, and climate on seedling survival. Results can help forest managers protect tree seedlings from climatic extremes and plan for the long-term future on forest land.	Ecosphere	5/30/2019
Connectivity of mule deer (Odocoileus hemionus) populations in a highly fragmented urban landscape	Knowing the effects of urban areas, landscape factors, and roads on ungulates such as mule deer is important to understanding migration barriers, can allow for the appropriate planning of mitigation strategies during infrastructure expansion projects, and could be important in the management of these animals. This study investigated the effects of	Landscape Ecology	5/30/2019

	vegetation types, topographical characteristics, and roads on mule deer occurrence and gene flow in five counties in southern California.		
Improving Population Estimates of Threatened Spectacled Eiders: Correcting Aerial Counts for Visibility Bias	Spectacled Eider occurs in western Alaska and are listed as threatened. The population has rebounded, prompting an assessment of their suitability for delisting. Researchers developed a density-adjusted visibility correction factor (VCF) to account for density and visibility of birds when estimating population size, and evaluated the influence of several ecological factors on VCFs to estimate eider population size that was lower, on average, than those produced with current methods.	Endangered Species Research	6/1/2019
Overlap of Pink-footed Shearwaters and central Chilean purse-seine fisheries: implications for bycatch risk.	Pink-footed Shearwaters are vulnerable seabirds and recently high rates of bycatch were documented in central Chilean net fisheries. Researchers analyzed the overlap between shearwater habitat usage and central Chilean fishing fleet activity during the 2015-2017 breeding season and compared their movements with fishing locations provided by the Chilean observer program. The results will be used to inform Pink-footed shearwater conservation and monitoring as well as fisheries management.	The Condor	6/15/2019
Barred Owls reduce occupancy and breeding propensity of Northern Spotted Owl in a Washington old-growth forest	The Northern Spotted Owl, a species designated as threatened under the Endangered Species Act, occurs on public lands throughout the western United States including Mount Rainier National Park (MRNP), Washington, USA. Researchers use a multi-state, multi-season occupancy model to investigate how Northern Spotted Owl occupancy dynamics and breeding propensity respond to the presence of Barred Owls, local and regional weather, and other habitat characteristics at MRNP from 1997-2016.	The Condor	6/15/2019
Operationalizing Resilience and Resistance Concepts to Address Invasive Grass- Fire Cycles	This review discusses factors that influence fire regimes, resilience to fire, resistance to invasive annual grasses, and invasive grass-fire cycles in arid and semi-arid shrublands and woodlands. The researchers illustrate an approach and decision tools for prioritizing areas on the landscape for management	Frontier in Ecology and Evolution	6/15/2019

	actions to prevent development of invasive grass-fire cycles and protect high value resources and habitats and for determining effective management strategies.		
The Aleutian Low – Beaufort Sea Anticyclone: A climate index for predicting the timing of springtime melt in the Pacific Arctic cryosphere" received bureau approval on April 8 and will be published by the journal Geophysic	Early and late extremes in the timing of snowmelt have recently been observed in northern Alaska. Forecasts of this timing with lead times of weeks to months are important for area stakeholders including industry, environmental managers and Arctic communities. This study presents a new climate index with sensitivity to the timing of spring melt in the high-latitude Pacific Arctic.	Geophysical Research Letters	7/1/2019
Influences of potential oil and gas development and future climate on sage-grouse declines and redistribution.	Greater sage-grouse populations are impacted by multiple stressors across the western U.S. and managers need more information about their cumulative influence on future populations. In this study, landscape simulation models were used to evaluate changes in sage-grouse populations under different intensities of projected oil and gas development and future climate-induced vegetation change. Study findings provide knowledge regarding the ability of sage-grouse to withstand changing conditions.	Ecological Applications	5/15/2019
A comparison of riparian vegetation sampling methods along a large, regulated river	Rivers are natural conduits for dispersing nonnative plant species and it is important to have reliable methods to measure ecologically important riparian plant communities to be able to detect newly established nonnative plant species. This study tested two commonly used field approaches of measuring vegetation at four sites along the Colorado River and was initiated to verify the methods used were appropriate for the riparian ecosystem of the Colorado River downstream of Glen Canyon Dam.	River Research and Applications	5/30/2019
Integrative taxonomy reveals a new species of freshwater mussel, Potamilus streckersoni sp. nov. (Bivalvia: Unionidae): Implications for conservation and management	Freshwater mussels are one of the most imperiled groups of animals in the U.S. This study examined phylogenetic relationships for freshwater mussels within the genus Potamilus, including four species currently listed or under consideration for listing under the ESA. The findings indicate that species diversity is underestimated and formally describe a new species endemic to the Brazos	Systematics and Biodiversity	5/30/2019

	River Basin in Texas. The taxonomic findings may affect listing decisions by resource management agencies.		
Do Indigenous American peoples' stories inform the study of dog domestication?	This article responds to previous publications which proposed that stories about the interactions between Indigenous Americans and wolves provide insight into the interactions between early humans and wolves. It examines contradictions between Indigenous Americans' stories and information about wolf biology, behavior, and known interactions with humans, as well as important information not considered about wolf attacks on humans and the importance of rabies in wolf-human relationships.	Ethnobiology Letters	5/30/2019
Critical Minerals Review	An overview of the USGS Mineral Resources Program's work on critical minerals through efforts on mineral information, mineral resource assessments, geologic mapping and geophysical surveys, and mineral research.	Mining Engineering	5/15/2019
China's domestic and foreign influence in the global cobalt market	The USGS National Minerals Information Center analyzed China's ownership-share of foreign production for cobalt mines and intermediate materials (in the year 2016), as well as the net import reliance of China's cobalt refinery industry. China's foreign cobalt ownership is predominantly in the Democratic Republic of the Congo, the largest source of cobalt mine and intermediate imports for China's growing cobalt refinery industry.	Resources Policy	5/15/2019
Incorporating social-ecological considerations into basin-wide responses to climate change in the Colorado River Basin	The tributaries of the Colorado River Basin flow into the Colorado River, which is one of the most regulated rivers in North America. This paper proposes a holistic strategy to manage the Colorado River Basin that incorporates regional and finer-scale approaches and suggests planning for the ecological and societal consequences of climate change when developing management strategies.	Current Opinion in Environmental Sustainability	5/30/2019
Resurgence of cisco (Coregonus artedi) population levels in Lake Michigan	Great Lakes cisco are native bait fish and an important part of the food web, and once supported a large commercial fishery in lakes Erie and Huron.They remain a lucrative fish	Journal of Great Lakes Research	5/30/2019

	bait in Lake Superior. Their numbers have declined to a fraction of their former abundance. This study reveals evidence of a sustained recovery of cisco in Lake Michigan beginning in the mid-2000s. Restoration of cisco is a priority for state, tribal, and provincial fishery managers throughout the Great Lakes.		
The evolving threat of Rapid 'Ōhi'a Death (ROD) to Hawai'i's native ecosystems and rare plant species	Hawai'i's most widespread native tree, 'ōhi'a, has been dying across large areas of Hawai'i Island. Mainly caused by fungal pathogens and known as Rapid 'Ōhi'a Death (ROD), the 'ōhi' deaths threaten extensive areas of native forest. This study examines positive detections of ROD and compares the environmental range of the pathogens and distribution of 'ōhi'a, and modeled the potential distribution of the pathogens across the Hawaiian Archipelago to estimate the risk of ROD to other islands.	Forest Ecology and Management	6/15/2019
Large-scale tree mortality from Rapid Ohia Death negatively influences avifauna in lower Puna, Hawai'i Island, USA	The newly identified rapid 'ōhi'a death (ROD) has spread across Hawai'i Island affecting the island's keystone tree species. As ROD expands it is expected that the loss of the dominant tree species will adversely affect bird populations. This study is a first attempt to describe the relationship between the impacts of ROD on the Hawaiian birds, especially the native Hawai'i 'amakihi, an omnivore found in a wide range of native and nonnative habitat types.	Condor	6/15/2019
Shorebird subsistence harvest and indigenous knowledge in Alaska: informing harvest assessment and management, and engaging users in shorebird conservation	Limited data on harvest and population parameters of shorebirds are major impediments to assess shorebird harvest sustainability. This study combined harvest assessment and ethnographic research to better understand shorebird subsistence harvest in Alaska and to support culturally sensible conservation actions. Results can inform improvements to harvest assessment and management, as well as outreach and communication efforts to engage subsistence users in shorebird conservation.	The Condor: Ornithological Applications	5/30/2019
An integrated framework for ecological drought across riverscapes of North America	Climate change is increasing the severity and extent of extreme drought events, posing a critical threat to freshwater ecosystems, particularly with increasing human demands	Bioscience	5/8/2019

	for diminishing water supplies. Current understanding of drought consequences for freshwater biodiversity is very limited. This study describes key barriers that hinder integrative drought research and monitoring across riverscapes and describes how this approach can directly inform natural-resource management.		
Spatio-temporal Population Change of Arctic-breeding Waterbirds	Estimated distribution, abundance, and spatially-explicit population trend of 20 breeding waterbird species collected on the Arctic Coastal Plain (ACP), Alaska to increase understanding of avian response to ecological change in the Arctic. The ACP is an extensive wetland complex on the North Slope supporting millions of breeding waterbirds. Rapid physical changes occurring in the Arctic are primary drivers of landscape change and may drive population dynamics of Arctic-breeding birds.	Avian Conservation and Ecology	8/1/2019
Trends and carrying capacity of sea otters in southeast Alaska	The recovery of sea otters to ecosystems from which they had been absent in southeast Alaska has affected coastal food webs, including commercially important fisheries. This study estimates past trends and current abundance of sea otters, providing insights to managers regarding food web implications and informing commercial fishery managers, particularly regarding conflicts between sea otter and shellfish fisheries.	Journal of Wildlife Management	6/1/2019
The bee fauna of coastal Napatree Point and two inland sites in southern Rhode Island	Bees are important pollinators and essential to ecosystems, and there is evidence of pollinator declines. The bee faunas of coastal sites are relatively poorly known and the USGS surveys pollinator species so that their trends can be monitored. This study provides baseline survey information on bees at Napatree Point and the Great Swamp and Carter Preserves (all three are conservation areas in Rhode Island), and provides data useful for future monitoring of these bee faunas.	Northeastern Naturalist	5/15/2019
Local scale spatial patterns of freshwater mussels in the Upper Mississippi River	Native freshwater mussels, one of the most threatened faunal groups with high extinction risk, serve vital functions in freshwater systems and many species are economically important, making them key targets for	Freshwater Science	5/15/2019

	conservation, restoration, and management. This study was designed to quantify where high quality mussel assemblages exist in the Upper Mississippi River so that future habitat and restoration projects can be designed to avoid or enhance native mussel assemblages.		
Measuring seedlings of a problem nonnative plant species in two sites at Petrified Forest National Park, Arizona to better understand how invasions start	Prickly Russian thistle (tumbleweed) is a nonnative plant species and being able to predict if and when it will pose a serious problem is valuable for land managers when determining management strategies. This study measured the emergence of prickly Russian thistle seedlings at Petrified Forest National Park, Arizona to better understand the factors that contribute to the success of this problematic nonnative plant species.	Invasive Plant Science and Management	5/15/2019
Louisiana Black Bear Post-delisting Monitoring Report	At the request of the USFWS, USGS will provide an annual post-delisting monitoring report for the Louisiana black bear. The report is intended to indicate whether tipping points have been reached which might trigger the re-listing of the species. The report provides an assessment of data collected at sites in Atchafalaya and Tensas River Basins, Louisiana from roughly 2002/2006 to 2017.	Cooperator publication for U.S. Fish and Wildlife Service	5/30/2019
Book Chapter: Global status of trout and char: conservation challenges in the 21st century	Freshwater ecosystems are among the most threatened ecosystems in the world, and freshwater fishes may now be the most threatened group of vertebrates. As of 2017 only 54% of the total described species of trout and char have been assessed by the IUCN. Of the 67 species that have been assessed, an estimated 73% are threatened with global extinction. This book chapter is the first global assessment of the status and conservation of freshwater trout and char.	American Fisheries Society Book	9/1/2019
Rangeland live vegetation monitoring with satellite remote sensing: U.S. Geological Survey Administrative Report	USGS and partners developed a new satellite-based technology for high spatial and high frequency mapping of live vegetation in semi-arid and arid landscapes in Kenya's conservancies comprising the Northern Rangelands Trust (NRT). These technologies provide the needed mapping performance for management to protect iconic species such as elephants, rhinos, and cheetahs while supporting a pastoral population dependent on access to grazing areas for livestock.	USGS Open-File-Report	5/15/2019

Early genetic outcomes of American black bear reintroductions in the Central Appalachians, USA	American black bears were extirpated from most of the Central Appalachians in the early 20th century and reintroductions were conducted during the 1990s. An assessment of the early genetic outcomes of bear reintroduction illustrates sustained isolation and small effective population size. Results may warrant continued genetic monitoring to determine if gene flow from neighboring populations is established.	Ursus	5/15/2019

From: Jess, Robert
To: Greg Sheehan
Subject: Fellow Utah State Aggie!
Date: Wednesday, October 25, 2017 7:59:25 AM

Mr. Sheehan,

I just wanted to take a moment to say hello and welcome to the Service! And that it's about time we got a fellow Aggie into the upper levels of the Interior!

I understand you had to cancel your recent trip to deep south Texas. We hope that on the next go-around that you might have time to visit us at the South Texas Refuge Complex, where we're addressing the next installation of border fence at the Santa Ana Refuge and the Cattle Fever Tick outbreak at both the Laguna Atascosa and Lower Rio Grande Refuges.

[redacted]

Best wishes to you and your family in D.C. and thank you for all you do.
Rob

(BTW- There are a few members in the Service-I'm Bishop Jess on the weekends...)

Hi Rob

Thank you for reaching out and introducing yourself. It is good to meet an Aggie and a gentlemen with an unpaid extracurricular calling. Both good things. I graduated in 1986 so a bit more decrepit that you. You have some tough issues with the areas that you oversee. Fever tick and walls, both tricky. I would like to discuss those more with you. I will be down in Texas on Nov 8-10. Not sure of where I will be traveling then but primarily to visit the hurricane refuges. If you can make it up briefly that would be great. Maybe we could talk one evening later this week after 7 pm EST. I suspect you are busy on Tuesday and Wednesday eves.

My cell is (b) (6)(b) (6). Let me know what works.

Thanks again,
Greg

U.S. Customs and Border Protection
Office of Acquisition
(b) (6)(b) (6)(b) (6)(b) (6)(b) (6)
(b) (6)(b) (6)(b) (6)

Dear (b) (6):

Thank you for your correspondence dated October 24, 2017, received in our office on October 24, 2017. This letter documents our review of the U.S. Customs and Border Protection (CBP) Office of Acquisition's proposed Block 1 Tower Replacement Project in the Tucson Border Patrol Station Area of Operation. This project involves the construction of nine IFT sensor towers to replace existing SBInet towers in the general area of the Buenos Aires National Wildlife Refuge (BANWR) and east of the BANWR in Pima County, Arizona. In addition, the BANWR refuge manager and the Coronado National Forest Supervisor have both determined that new special use permits will be issued to authorize this action to construct replacement towers on lands they administer. The special use permit has been issued for the BANWR, but this consultation includes the issuance of the permit by the Coronado National Forest as an element of the proposed action for which CBP is acting as the lead agency for this consultation.

You are requesting informal consultation on the potential effects of this proposed action pursuant to section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1531-1544) (ESA), as amended. You have requested our concurrence with your determination that the proposed project may affect, but is not likely to adversely affect the endangered Pima pineapple cactus (*Coryphanta scheeri* var. *robustispina*), the threatened Chiricahua leopard frog (*Rana chiricahuaensis*) and designated critical habitat, the threatened northern Mexican gartersnake (*Thamnophis eques megalops*), the threatened yellow-billed cuckoo (*Coccyzus americanus*), and the endangered jaguar (*Panthera onca*) and designated critical habitat. We concur with your determinations and provide our rationale below. Critical habitat has been proposed for the northern Mexican gartersnake and the yellow-billed cuckoo and proposed critical habitat for both

species occurs in the area of the proposed action. You have determined that the proposed action will not adversely modify proposed critical habitat for either species and we will not address proposed critical habitat in this consultation.

You also determined the propose action would have no effect on the Kearney's Blue-Star (*Amsonia kearneyana*), the southwestern willow flycatcher (*Empidonax traillii eximus*), the masked bobwhite quail (*Colinus virginianus ssp. ridgwayi*), the lesser long-nosed bat (*Leptoncyteris curasoae yerbabuenae*), and the ocelot (*Leopardus pardalis*). The ESA does not require the U.S. Fish and Wildlife Service to concur with "no effect" determinations. These species will not be addressed in this consultation. However, we strongly recommend that CBP include their justification for these "no effect" determinations in their administrative record.

DESCRIPTION OF THE PROPOSED ACTION

The nine Block 1 sensor towers proposed for replacement in this project are identified as:

1) TCA-TUS-032 M4 occurring on lands owned by Pima County;
2) TCA-TUS-035 Guijas occurring on lands managed by BANWR;
3) TCA-TUS-036 Black Mesa occurring on lands managed by the Coronado NF;
4) TCA-TUS-041 County Line occurring on lands managed by the State of AZ;
5) TCA-TUS-085 Rose occurring on lands managed by BANWR;
6) TCA-TUS-287 De La Osa occurring on lands managed by BANWR;
7) TCA-TUS-290 Spears Property occurring on lands managed by CBP;
8) TCA-TUS-298 Blackberry Hill occurring on lands managed by the Coronado NF; and
9) TCA-TUS-299 Garcia Ranch occurring on lands managed by BANWR (see Figure 1 of the Biological Assessment).

At each of these towers, the entire tower structure and supporting equipment will be replaced. A lattice replacement tower, of similar height and design to the existing tower, with a poured concrete foundation will be constructed within the existing, permanently disturbed tower footprint (typically 50 feet by 50 feet). After construction is completed on the new tower, the above-ground portion of the existing towers will be removed. In order to enable construction of the new tower, the current fence and all support facilities (generator, propane tank, building, and solar panels) will be relocated within the original temporary disturbance footprint. The original 100 foot by 100-foot temporary disturbance footprint will be flagged and no disturbance outside of this area will be allowed. After the existing tower is removed, the grounding system will be rebuilt if and as required. At each of these towers, the existing communication equipment and power generation equipment (solar panels and propane generator) will be replaced. The solar panels will provide the primary power source for operation of the tower. When the IFT system becomes operational, the generator is only anticipated to run for a period of 20 minutes once every seven days, or during infrequent weather events when there is no sunshine for several days. The sound level as measured from the generator is anticipated to be approximately 68 dBA at 28 feet. During construction, the operating time of the generator will increase when the solar panels are removed at the five towers which are not connected to grid power (TCA-35, TCA-36, TCA-41, TCA-85, and TCA-298).

The actual construction activities at each sensor tower are expected last 40 to 60 days, not all consecutively, over the 12- to 18-month duration of the project. During these construction activities, up to an estimated 12 trips by cement trucks for foundation installation, 12 trips by flatbed trucks for delivery of materials, 3 trips for the crane truck and several hundred pick-up truck trips for workers will be required to construct each tower. Construction at towers in the Tucson Border Patrol Station AOR is planned to begin in fall 2017.

The temporary disturbance area will be restored after construction is completed as directed by the land manager. The construction schedule for work at each specific tower has not yet been developed. There will be no night time construction during the period from April 1 to October 1, and nighttime construction during the balance of the construction period is unlikely. There will be no night time operational lighting at the towers.

The Buenos Aires National Wildlife Refuge Manager and the Coronado National Forest Supervisor have both determined that new special use permits will be issued to authorize this action to construct replacement towers on lands they administer. The special use permit for this project has been issued by the Buenos Aires National Wildlife Refuge Manager. This consultation includes issuance of the permit by the Coronado National Forest Supervisor as an element of the proposed action.

CBP has included a number of conservation measures in their proposed action to avoid and minimize adverse effects to U.S. Fish and Wildlife Service trust resources. These include, but are not limited to, the following:

General

1. The government environmental Subject Matter Expert and environmental contract monitor will determine which threatened and endangered species could occur in the vicinity of project activities.

2. To protect individuals of listed species within the project area, suspend work in the immediate vicinity of the individual until it moves out of harm's way on its own, or enlist a qualified specialist (individuals or agency personnel with a permit to handle the species) to relocate the animal to a nearby safe location in accordance with accepted species-handling protocols.

3. CBP will develop (in conjunction with land managers) and implement a training program focusing on Trust Resources for contractor personnel. Training will be provided to all personnel associated with the project before the project begins and before any new personnel begin work on the project. Information presented in the training program will include occurrence of sensitive species in the project area, their general ecology, and sensitivity to human activities; legal protection afforded the species and the penalties for violation of state or Federal laws; implementation of included conservation actions/best management practices; and reporting requirements. Also included in this training program will be color photos of the listed species and maps of federally listed species' habitats. Following the training program, the photos and maps will be posted in the contractor and resident engineer's office, where they will remain through the duration of the project.

4. Check visible space underneath all vehicles and heavy equipment for listed species and other wildlife prior to moving vehicles and equipment at the beginning of each workday and after vehicles have idled for more than 15 minutes.

5. Groundwater or surface water from a treated municipal source will be used when within one-mile habitat for aquatic species.

6. No use of herbicides will be permitted.

7. Contractor shall not drive roads which have become impassable by heavy rains until such roads are repaired.

Migratory Bird BMPs

1. A survey for migratory birds will also be conducted prior to all activities to be implemented during the nesting period in areas where migratory birds might be nesting (February 1 through September 1). If construction is proposed in areas identified by USFWS as suitable breeding habitat for yellow-billed cuckoo, surveys will be conducted using the Halterman et al. (2016) protocol. If an active nest of any migratory bird is found in the Action Area, a buffer zone of 300 feet will be established around the nest and no activities will occur within that zone until nestlings have fledged and abandoned the nest. Confirmation that all young have fledged should be made by qualified personnel.

2. If project activity is scheduled during the migratory bird-nesting season, take steps to prevent migratory birds from establishing nests in the action area. These steps could include covering equipment and structures. Birds can be flushed to prevent them from nesting on the site.

3. If project activities could result in the take (e.g. removal of nest, eggs, and/or fledglings) of a migratory bird; then coordination with the USFWS and/ or the Arizona Game and Fish Department will be required and applicable permits would be obtained prior to project activities.

Species Specific BMPs

<u>Pima Pineapple Cactus</u>

1. No ground disturbance will occur outside the previously disturbed footprint in suitable habitat without further consultation with the USFWS.

2. Within or adjacent to Pima pineapple cactus suitable habitat, to minimize fugitive dust generation, monitor dust during construction, and conduct abatement of fugitive dust when there is a visible plume of dust extending more than 30 feet from the dust source. Abatement would include reducing travel speeds and/or applying dust suppressants, such as water.

<u>Chiricahua Leopard Frog</u>

1. To avoid running over Chiricahua leopard frogs on Highway 286 and Highway 289, construction vehicles will not cross washes when water is flowing along the following portions of these roads: (1) Highway 286 from its junction with Highway 289(Arivaca-Sasabe Road) south for 8.5 miles and (2) Highway 289 from its junction with Highway 286 continuing east for 2.4 miles to the far side of Puertocito Wash.

2. To avoid running over Chiricahua leopard frogs on Tres Boleros and Tres Bellotas Roads, construction vehicles will not travel along designated portions of these roads between July 1st and October 1st, or during rainfall events that occur outside of this time period: Tres Boleros Road within one mile overland distance of Garcia Tank, and Tres Bellotas Road beginning north of TCA-TUS-036 and continuing in a northeast direction to its intersection with Arivaca-Sasabe Road.

3. During the monsoon season, a qualified biologist will monitor the frog-proof fence at tower TCA-TUS-032 and relocate any frogs along this fence to avoid impacts to the species.

4. A site-specific storm water pollution prevention plan (SWPPP) and a spill protection plan will be prepared and regulatory approval sought, as required by regulations. This plan will include, but is not limited to, placing straw bale type sediment traps at the inlet of ponds or stock tanks and upstream of drainages known to be occupied by the species or within critical habitat of the species.

5. To prevent the spread of amphibian diseases among drainages via water or mud on vehicles and equipment, all work within Chiricahua leopard frog Action Area shall conform to amphibian disease prevention protocols as described in the Recovery Plan for the Chiricahua leopard frog (USFWS 2007). Equipment would either be disinfected on-site between uses at different sites or rinsed to remove all dirt and mud and then completely airdried before moving to another site. This measure will not be required for travel along paved routes or portions of Ruby Road that are in the action area, as these routes are heavily traveled by the public and cleaning/sterilization of project vehicles will do little to prevent movement of disease via vehicular travel.

6. Any use or storage of chemicals or fuels will be kept 0.3 miles away from the Chiricahua leopard frog Action Area.

7. Individual animals found in the project area in danger of being harmed will be relocated by a CBP biologist to a nearby safe location in accordance with accepted species handling protocols in Federal and state permits. No animals will be moved to aquatic habitat without prior coordination with the USFWS species lead.

Northern Mexican Gartersnake

1. Within proposed critical habitat for this species, an environmental monitor will be on site during all project activities.

2. Individual animals found in the project area in danger of being harmed will be relocated by a CBP biologist to a nearby safe location in accordance with accepted species handling protocols in Federal and state permits.

Yellow-billed Cuckoo

CBP will avoid all construction traffic and activity at the tower sites and access roads which USFWS has identified as the most likely locations for occupancy by yellow-billed cuckoo.

1. CBP will avoid all construction activity at the following towers and associated access roads from June 1 to September 30: TCA-TUS-35, TCA-TUS-290, and TCA-TUS-287.

2. CBP will avoid all construction activity at TCA-TUS-299 from July 1 to September 30.

3. CBP will conduct cuckoo protocol surveys (Halterman et al. 2016) in drainages bordered by trees within 0.25 miles of tower TCA-TUS-299 from June 1 to June 30. If any cuckoos are located within 0.25 miles of this tower, CBP will engage the USFWS in development of measures necessary to minimize and avoid impacts to the species in these locations.

4. CBP will avoid using Tres Bellotas Road along Fresnal Wash between TCA-TUS-298 and TCA-TUS-036 from June 1 to September 30 to avoid disturbance to cuckoos in suitable habitat.

As part of the proposed action for this project, CBP is working in coordination with the USFWS to develop an interagency agreement with USFWS to provide funding to support high priority activities for conservation and recovery of the Chiricahua leopard frog, yellow-billed cuckoo and northern Mexican gartersnake which may be found in the vicinity of the Action Area of this project.

CONCLUSION

Pima Pineapple Cactus

Environmental Baseline

The Pima pineapple cactus is a low-growing hemispherical cactus that may be found as single or multi-stemmed plants. Adults measure 4-18 inches tall and 3-7 inches in diameter. The spines are stout and arranged in clusters with one central hooked spine and 6-15 radial straight spines. Spines are originally straw colored, but become black with age. Flowers are yellow and the fruit is a green ellipsoid (US Fish and Wildlife Service 2017). The Pima pineapple cactus was listed as endangered without critical habitat throughout the species range on September 23, 1993 (58 FR 49875). This cactus species grows in the transition zone between the semi-desert grasslands and Sonora desert scrub on alluvial bajadas (lower slopes of mountains characterized by loose alluvial sediments and poor soil development) and slopes of less than 10 percent grade at elevations between 2,300 and 4,200 feet above sea level. The U.S. range of the Pima pineapple cactus is bordered by the Baboquivari Mountains to the west, and the Santa Rita Mountains to the east, and extends from the U.S./Mexico border north to the vicinity of Tucson. Individual plants are often widely scattered in low density across the suitable habitat (US Fish and Wildlife Service 2016c). The proposed action includes some areas of occupied Pima pineapple cactus habitat.

Effects of the Proposed Action

Because the proposed action is to replace existing SBInet towers, CBP conducted a previous consultation with the USFWS covering the original construction of the SBInet towers. This consultation was completed in 2008. Known occurrences of Pima pineapple cacti are based on results from the 2008 preconstruction surveys, disturbance at tower sites and temporary impact areas during initial tower construction in 2008 and 2009, and additional surveys in 2017. There are six towers in this project located in suitable Pima pineapple cactus habitat (TUS-035, TUS-041, TUS- 085, TUS-290, TUS-298 and TUS-299). There are no cacti at these tower sites within the fenced enclosure. Pima pineapple cactus located outside of the fenced enclosure, and within the 100 foot by 100-foot temporary impact area could be damaged or destroyed by construction activities during the project. However, during preconstruction surveys for the Tucson West project in 2008, a protocol survey for Pima pineapple cactus only identified the species within the potential construction disturbance footprint at the TUS-290 tower site. Informal surveys for Pima pineapple cactus performed at these six tower sites on May 25, 2017 located no Pima pineapple cactus.

Because the construction of the replacement towers will occur within the existing footprint of the original towers, no Pima pineapple cacti or habitat is expected to result from the proposed action. In addition, CBP has determined that the occurrence of Pima pineapple cacti within the temporary disturbance areas of the original construction that have germinated subsequent to the original construction is extremely unlikely. Impacts to individual plants outside of the temporary impact zone could result from fugitive dust. Because construction and travel will be within existing footprints of the original construction and because of the proposed conservation measures included in the proposed action, it is expected that dust effects will be minimal.

Conclusion

The Service concurs with your determination that the proposed action may affect, but is not likely to adversely affect the Pima pineapple cactus, based upon the following:

- Because the proposed action will occur within areas disturbed by the original tower construction in 2008 and which continue to be disturbed, there is a very low likelihood that Pima pineapple cacti will be affected by the proposed action. Therefore, effects due to trampling or crushing are discountable.
- Effects on Pima pineapple cacti from fugitive dust would be minimized through the use of BMPs. The numbers of individuals that could be impacted is very small. Therefore, such effects will be insignificant.
- During Section 7 consultation on the Tucson West tower project (Consultation #22410-2008-F-0373), CBP agreed to mitigate for all Pima pineapple cactus habitat loss at towers within suitable habitat through purchase of conservation credits at a USFWS-approved conservation bank. In April 2017, CBP delivered a report to USFWS quantifying the impacts to Pima pineapple cactus during tower construction; and in May 2017, USFWS concurred with the analysis of impacts to Pima pineapple cactus as presented in that report. The construction footprint for the Block 1 Replacement Project at towers within the Pima pineapple cactus range is identical to the construction footprint for the initial tower construction. Therefore, any potential impacts to this species arising from this project have

already been fully mitigated.

Chiricahua Leopard Frog and Critical Habitat

Environmental Baseline

The Chiricahua leopard frog is a leopard frog with a distinctive color pattern of small, raised, cream-colored spots on the thigh against a dark background with relatively rough skin on the back and sides, dorsolateral folds that are interrupted and deflected medially, and often green on the head and back. A distinctive call (a snore of 1 to 2 seconds duration) also separates this species from other leopard frogs (US Fish and Wildlife Service 2017).

The Chiricahua leopard frog was listed as threatened on June 13, 2002 (67 FR 40790). The listing was revised and critical habitat was designated for the species in Arizona and New Mexico on March 20, 2012 (77 FR 16324). The 2012 listing re-states the threats to the Chiricahua leopard frog and its habitat throughout its range that were outlined in the 2007 recovery plan for the species: mining, including mining-related contaminants; other contaminants; dams; diversions; stream channelization; groundwater pumping; woodcutting; urban and agricultural development; road construction; grazing by livestock and elk; climate change; and altered fire regimes (USFWS 2007, 2012). Although these threats are widespread and varied, a threats assessment that was accomplished as part of the recovery plan showed chytridiomycosis and predation by nonnative species as consistently more important threats than these habitat-based factors (USFWS 2007, 2012). The Recovery Plan for the species identifies 8 recovery units in Arizona, New Mexico, and Mexico. Each recovery unit has one or more management areas (MAs) within it where the USFWS believes the potential for successful recovery actions is greatest (USFWS 2007).

The range of the Chiricahua leopard frog includes central and southeastern Arizona; west-central and southwestern New Mexico; and in Mexico, northeastern Sonora, the Sierra Madre Occidental of northwestern and west-central Chihuahua, and possibly as far south as northern Durango (USFWS 2007, 2012).Within its geographical range, the Chiricahua leopard frog historically inhabited a variety of aquatic habitats including montane and river valley cienegas, springs, pools, tanks, lakes, reservoirs, streams, and rivers. It is a habitat generalist that historically, but is now limited to the comparatively few aquatic systems that support few or no non-native predators (e.g. American bullfrogs, fishes, and crayfishes) including livestock tanks and some streams. The species also requires permanent or semi-permanent pools for breeding, water characterized by low levels of contaminants and moderate pH, and may be excluded or exhibit periodic die-offs where a pathogenic chytridiomycete fungus is present.

The project area falls within Recovery Unit 1 for the Chiricahua leopard frog, and includes portions of two of the three MAs identified in the recovery plan for this recovery unit: the Buenos Aires Central Tanks MA and Pajarito Wilderness MA. There are also other occupied sites within project area that fall within Recovery Unit 1 but are east of the Buenos Aires Central Tanks MA and north of the Pajarito Wilderness MA.

The Buenos Aires Central Tanks MA continues to support one of the strongest metapopulations known within the range of the species due to the removal of bullfrogs from Buenos Aires National Wildlife

Refuge (BANWR) (USFWS 2011, C. Crawford, pers. comm. 2017). The number of breeding sites in this metapopulation has ranged from 4 to 8 annually since 2011, although the number of breeding sites on BANWR itself has decreased during this time period (C. Crawford, pers. comm. 2017). Chango Tank is one of the seven sites in the MA where breeding was detected in 2016. Garcia Tank at the southern U.S. end of the MA is considered an isolated population and not part of a metapopulation (USFWS 2012). Breeding has not been verified at Garcia Tank since the mid-2000s but frogs were last seen at this site in 2015 (C. Crawford, pers. comm. 2017). There are also 17 lentic sites on BANWR that do not hold water year round but have had records of Chiricahua leopard frogs during the monsoon season when they hold water (C. Crawford, pers. comm. 2017).

The Pajarito Wilderness MA includes two metapopulations of Chiricahua leopard frogs, one of which is in the project vicinity. Bullfrog eradication efforts have occurred and continue to be monitored throughout this MA. The number of breeding sites in the Bonita, Upper Turner, and Mojonera metapopulation in the MA has ranged from 2 to 3 annually since 2011 (C. Crawford, pers. comm. 2017). In 2016 and 2017, Chiricahua leopard frogs were discovered in 4 lentic sites at the northern end of the MA and an additional 3 lentic sites to the north of the MA that likely dispersed from known breeding sites of this metapopulation or from the Buenos Aires Central Tanks metapopulation described in the previous paragraph (C. Crawford, pers. comm. 2017).

Chiricahua leopard frogs routinely disperse during the monsoon season, and are known to move up to one mile overland, 3 miles along intermittent stream channels, and 5 miles along perennial streams from breeding sites they occupy (USFWS 2012). Recent studies of Chiricahua leopard frogs revealed that these frogs will move further than previously thought based on the 1-3-5 rule described above. For instance, Hinderer et al. (2017) found that radio-telemetered adult frogs moved an average of 97 m a day and up to 1,658 m in a day with a maximum total movement of a frog measured at 9,888 m over 36 days. Such movements are likely aided by permanent or ephemeral waters that serve as stepping stones within the landscape.

The primary constituent elements of the physical or biological features essential to the conservation of the Chiricahua leopard frog included in designated critical habitat for the species (US Fish and Wildlife Service 2012) are:

(i) Aquatic breeding habitat and immediately adjacent uplands exhibiting the following characteristics:

(A) Standing bodies of fresh water (with salinities less than 5 parts per thousand, pH greater than or equal to 5.6, and pollutants absent or minimally present), including natural and manmade (e.g., stock) ponds, slow-moving streams or pools within streams, off-channel pools, and other ephemeral or permanent water bodies that typically hold water or rarely dry for more than a month. During periods of drought, or less than average rainfall, these breeding sites may not hold water long enough for individuals to complete metamorphosis, but they would still be considered essential breeding habitat in non-drought years.

(B) Emergent and or submerged vegetation, root masses, undercut banks, fractured rock substrates, or some combination thereof, but emergent vegetation does not completely cover the surface of water bodies.

(C) Nonnative predators (e.g., crayfish (Orconectes virilis), bullfrogs (Lithobates catesbeianus), nonnative predatory fish) absent or occurring at levels that do not preclude presence of the Chiricahua leopard frog.

(D) Absence of chytridiomycosis, or if present, then environmental, physiological, and genetic conditions are such that allow persistence of Chiricahua leopard frogs.

(E) Upland habitats that provide opportunities for foraging and basking that are immediately adjacent to or surrounding breeding aquatic and riparian habitat.

(ii) Dispersal and nonbreeding habitat, consisting of areas with ephemeral (present for only a short time), intermittent, or perennial water that are generally not suitable for breeding, and associated upland or riparian habitat that provides corridors (overland movement or along wetted drainages) for frogs among breeding sites in a metapopulation with the following characteristics:

(A) Are not more than 1.0 mile (1.6 kilometers) overland, 3.0 miles (4.8 kilometers) along ephemeral or intermittent drainages, 5.0 miles (8.0 kilometers) along perennial drainages, or some combination thereof not to exceed 5.0 miles (8.0 kilometers).

(B) In overland and non-wetted corridors, provide some vegetation cover or structural features (e.g., boulders, rocks, organic debris such as downed trees or logs, small mammal burrows, or leaf litter) for shelter, forage, and protection from predators; in wetted corridors, provide some ephemeral, intermittent, or perennial aquatic habitat.

(C) Are free of barriers that block movement by Chiricahua leopard frogs, including, but not limited to: urban, industrial, or agricultural development; reservoirs that are 50 acres (20 hectares) or more in size and contain predatory nonnative fish, bullfrogs, or crayfish; highways that do not include frog fencing and culverts; and walls, major dams, or other structures that physically block movement.

Two critical habitat units within Recovery Unit 1 are located in the project vicinity (see Figure 3). These critical habitat units are: Garcia Tank and Buenos Aires National Wildlife Refuge Central Tanks. Together, these two units comprise 1,721 acres or 16 percent of the designated critical habitat. The Garcia Tank critical habitat unit is within the action area. The portions the Buenos Aires National Wildlife Refuge Central Tanks critical habitat unit within the action area include Chango Tank (PCE1) and Las Moras Wash (PCE2).

Chiricahua leopard frogs are found in other sites within the project area outside of critical habitat. CBP has included a number of conservation measures and BMPs to address potential effects to Chiricahua leopard frogs and designated critical habitat in all areas of the proposed action.

Effects of the Proposed Action

The most likely direct impact to Chiricahua leopard frog would be injury or death from construction vehicle traffic along access roads and at tower sites during the monsoon season (July 1 to October 1) when juvenile and adult Chiricahua leopard frogs move out of perennial lentic sites to adjacent terrestrial habitat or disperse to other perennial or intermittent sites. Two of the nine tower sites and four roads

which will be used for access to tower sites during tower construction activities are located within one mile overland from known occupied sites or they cross intermittent drainages within three miles of occupied sites that are likely used for dispersal by Chiricahua leopard frogs (Cat Crawford, USFWS, personal communication, September 25, 2017). The two tower sites are Tower TCA-TUS-032 and TCA-TUS-299 and the four roads are: (1) Highway 286 from the intersection with Highway 289(Arivaca-Sasabe Road) and south for a distance of 8.5 miles, (2) Highway 289 from the junction with Highway 286 and east for a distance of 2.4 miles to the far side of Puertocito Wash, (3)Tres Boleros Road within one mile overland distance of Garcia Tank, and (4) Tres Bellotas Road beginning north of TCA-TUS-036 and continuing in a northeast direction to its intersection with Arivaca Road. CBP will implement conservation measures or BMPS as outlined in the proposed action above, that will effectively address the potential effect of injury or death from construction vehicle traffic.

Transmission of disease vectors and invasive non-native aquatic species can occur if vehicles cross infected or infested streams or other waters and water or mud remains on the vehicle. If these vehicles subsequently cross or enter uninfected or non-infested waters, the disease or invasive species may be introduced to the new area. Because chytridomycosis is known to occur in Chiricahua leopard frog populations in Recovery Unit 1, necessary precautions will be taken to minimize the likelihood of spreading the disease such as avoiding contact with wetted areas. However, if vehicles or other equipment use will occur in wetted areas (including ponds, impoundments, or ephemeral or permanent streams) that equipment will be a) cleaned of mud and debris and then sprayed with a 10% bleach, 70% ethanol, or 1% quaternary ammonium solution, or b) allowed to dry completely, before moving to another wetted area (see Appendix G of the Chiricahua Leopard Frog Recovery Plan for protocols) (USFWS 2007). Treatments as just described, will not be required for travel along paved routes or portions of Ruby Road that are in the action area, as these routes are heavily traveled by the public and cleaning/sterilization of project vehicles will do little to prevent movement of disease via vehicular travel.

There are two Chiricahua leopard frog critical habitat units within the action area. Chango Tank, Garcia Tank are designated critical habitat for the species and contain PCE1. Las Moras Wash downstream of Chango Tank is also included in critical habitat and contains PCE2. Las Moras Wash is a paved low water crossing on Highway 286. Chango Tank is less than 400 feet overland from Highway 286 and Garcia Tank is less than 1,600 feet from Tres Boleros Road.

Conclusion

We concur with your determination that the proposed action is not likely to adversely affect the Chiricahua leopard frog, nor designated critical habitat for the following reasons:

- CBP will implement conservation measures and BMPs as described above. These measures will reduce potential effects to the Chiricahua leopard frog to insignificant or discountable levels.
- Both Garcia Tank and Chango Tank are located upstream and uphill from project activities. For this reason, there is no pathway by which Block 1 Replacement Project construction activities could directly impact these tanks, and the project would not result in effects that would diminish the value of primary constituent elements within either of the critical habitat units. There are also

no potential effects from the proposed action to PCE 2 in Las Moras Wash where it crosses Highway 286.

Jaguar and Critical Habitat

Environmental Baseline

The jaguar is a large, heavy-bodied, big-headed cat. Yellowish to tawny, spotted with black rosettes or rings in horizontal rows along the back and sides; most rings are tan inside, with 1 or 2 black spots. Legs, head, and tail have smaller, solid spots, usually giving way to incomplete bands near the end of the tail (US Fish and Wildlife Service 2017).

The jaguar was listed as endangered throughout the species range in March 28, 1972 as a foreign species (37 CFR 6476). On July 27, 1997, the jaguar was listed as an endangered species in the United States (62 FR 39147). On March 5, 2014, the USFWS published a final rule to designate critical habitat for the jaguar in southeast Arizona and southwest New Mexico (79 FR 12571). The critical habitat totals approximately 764,207 acres in six units in Pima, Santa Cruz, and Cochise Counties, Arizona, and Hidalgo County, New Mexico.

Jaguars are known from a variety of vegetation communities in North and South America. Range-wide, jaguars are mostly found in tropical and subtropical zones. In the southwestern United States, the more open, dry habitat has been suggested as being marginal in terms of water, cover, and prey densities, although historically there was a presumably larger and naturally breeding population. Jaguar populations in northwestern Mexico and the southwestern United States occur in arid areas, especially thornscrub, mesquite grassland, Madrean oak woodland, and pineoak woodland communities. Based on 25 historical (from 1902 to 2001) reliable and spatially accurate jaguar sighting records in Arizona, the majority of jaguars were observed in scrub grasslands (56%) and
Madrean evergreen forests (20%), all were within 6.2 miles of a water source, and most occurred in moderately rugged to extremely rugged terrain. Additionally, river valleys and other drainage features likely “provide travel corridors for jaguars, along with higher prey densities, cooler air, and denser vegetation than surrounding habitats”. In the United States–Mexico borderlands, peccaries (javelina [*Tayassu tajacu*]) and deer (white-tailed [*Odocoileus virginianus*] and mule [*O. hemionus*]) are presumably dietary mainstays; range-wide, the list of prey taken by jaguars includes more than 85 species, including numerous species of turtles, birds, fish, and livestock. Other potential prey species in the southwestern United States include white nosed coatis (*Nasua nasua*), skunk (*Mephitis* spp., *Spilogale gracilis*), raccoon (*Procyon lotor*), and jackrabbit (*Lepus* spp.) (USGS 2016).

The southwestern United States lies at the extreme northern limit of the jaguar’s range. An estimated that 21% to 30% of Arizona (23,940–34,200 square miles) is potentially suitable jaguar habitat; however, the species currently occurs on an occasional basis in only a small portion of this area (USGS 2016).

The primary constituent elements of jaguar critical habitat are expansive open spaces in the southwestern United States of at least 38.6 square miles in size that:

1. Provide connectivity to Mexico;
2. Contain adequate levels of native prey species;
3. Include surface water sources available within 12.4 miles of each other;
4. Contain 1% to 50% canopy cover within Madrean evergreen woodland or semidesert grassland vegetation communities;
5. Are characterized by rugged terrain;
6. Are characterized by minimal to no human population density, no major roads, or no stable night time lighting over any 0.4-square-mile area; and
7. Are below 6,562 feet amsl in elevation.

With regard to jaguar critical habitat in the project area, the project is bounded on the west by the Baboquivari Critical Habitat Unit, and on the east by the Atascosa Critical Habitat Unit. There are two towers, TUS-085 and TUS-287, located within approximately 0.5 miles of the Baboquivari Critical Habitat Unit. There are also two towers, TUS-036 and TUS-041, located within approximately 0.5 miles of the Atascosa Critical Habitat Unit. In addition, approximately 4.4 miles of Tres Bellotas Road, which will be used by construction traffic, is located within the Atascosa Critical Habitat Unit. CBP is not constructing any additional roads with the Block 1 Replacement Project.

On December 20, 2016, USFWS released a draft recovery plan for the species. This $605 million recovery plan characterizes jaguar habitat within the US as secondary habitat which is not anticipated to support breeding jaguars. The recovery plan contains a discussion of the value of secondary habitat, in terms of species conservation.

Effects of the Proposed Action

Potential direct impacts on jaguar include the risk of direct injury and mortality from construction vehicles accessing towers, and changes in behavior resulting from noise and other disturbances associated with human presence during tower construction activities. Occurrences of jaguar in the project vicinity are extremely rare. Jaguars have not been located in the project vicinity in a number of years, but a male jaguar recently occupied the Santa Rita Mountains (approximately 25 miles to the northeast of the project area) for an extended period of time. In addition, new jaguars, both males, have been documented within the last year in the Huachuca and Chiricahua mountains. While these new detections are many miles east of the project area, they do provide evidence that habitat connectivity for movement of jaguars into the United States still occurs and that jaguars can occur in any areas of suitable habitat in Arizona, even if they have not been documented there previously. However, due to the rarity of jaguar in the project vicinity, the risk of injury or mortality arising from construction vehicles is unlikely.

Project activities would occur in previously disturbed areas, and would result in no degradation, modification, or habitat fragmentation of undisturbed areas where jaguars potentially occur. The presence of construction crews and equipment, and their associated noise, could cause jaguars to move away from an area or otherwise modify their behavior. Because construction activities would be short term in nature, any displacement or other associated adverse effects would be temporary and minor. As described above, jaguars currently occur at such low densities that the potential for individual jaguars to encounter project activities is extremely unlikely to occur.

There are no Block 1 project towers located within jaguar critical habitat. Construction traffic will use approximately 4.4 miles of existing Tres Bellotas Road to access tower sites. However, because Tres Bellotas and other roads proposed for use during this project are all existing roadways, there is a reduced likelihood that the proposed action will adversely affect the PCEs of jaguar critical habitat.

Conclusion

We have analyzed the effects of the proposed action and concur with the determination that the proposed action may affect, but is not likely to adversely affect jaguars or jaguar critical habitat for the following reasons:

- While jaguars are known to currently occupy areas of southern Arizona, there are no recent records of jaguars in the project vicinity. It is very unlikely that jaguars will be killed or injured by construction traffic associated with the proposed action. Therefore, these effects are discountable.
- All project activities will use existing roadways and stay within the previously disturbed footprint of the tower sites. Therefore, effects to jaguar habitat, including jaguar critical habitat will be insignificant.

Northern Mexican Gartersnake

Environmental Baseline

The northern Mexican gartersnake may occur with other native gartersnake species and can be difficult for people without herpetological expertise to identify. With a maximum known length of 44 inches, it ranges in background color from olive to olive-brown to olive-gray with three stripes that run the length of the body. The middle dorsal stripe is yellow and darkens toward the tail. The pale yellow to light-tan lateral stripes distinguish the Mexican gartersnake from other sympatric (co-occurring) gartersnake species because a portion of the lateral stripe is found on the fourth scale row, while it is confined to lower scale rows for other species. Throughout its range wide distribution, the northern Mexican gartersnake occurs at elevations from 130 to 8,497 feet (Rossman et al.1996, p. 172). The northern Mexican gartersnake is considered a riparian obligate (restricted to riparian areas when not engaged in dispersal behavior) (US Fish and Wildlife Service 2017).

On July 8, 2014, the USFWS issued a final rule listing the northern Mexican gartersnake as threatened throughout the species range (79 FR 38677). On July 10, 2013, critical habitat was proposed for 421,423 acres in Arizona and New Mexico (78 FR 41549).

The northern Mexican gartersnake generally occurs at elevations ranging from 3,000 to 5,000 feet within Arizona and New Mexico. Important components of northern Mexican gartersnake habitat include a stable supply of native prey, and dense vegetation when co-occurring with harmful non-native species. The northern Mexican gartersnake occurs chiefly in the following general habitat types: 1) source-area wetlands (e.g., cienegas), or stock tanks (small earthen impoundment); 2) large river riparian woodlands and forests; and 3) streamside gallery forests (as defined by well-developed broadleaf deciduous riparian

forests with limited, if any, herbaceous ground cover or dense grass) (US Fish and Wildlife Service 2017).

This species occurs in central, western, and southeastern Arizona and extreme southwestern New Mexico. Within Arizona, the most-viable populations occur in the middle and upper Verde River drainage (including Bubbling Ponds State Fish Hatchery along Oak Creek), lower Tonto Creek, the Bill Williams watershed, and within the San Rafael Valley.
Since 1970, there have only been two records of the species in the Action Area vicinity, the most recent being in 2001. However, surveys for northern Mexican gartersnakes have not occurred in this area since approximately the year 2000. The status of the population within the Action Area vicinity remains largely undetermined at this time (Jeff Servoss, USFWS, personal communication, September 29, 2017). If the species persists in the Action Area, it most likely occurs at a very low density and is most-closely associated with the Arivaca Cienega, in the location of a 2001 record.

The primary constituent elements of critical habitat for this species (US Fish and Wildlife Service 2013b) consist of the following:

1. Aquatic or riparian habitat that includes:

   a. Perennial or spatially intermittent streams of low to moderate gradient that possess appropriate amounts of in- channel pools, off-channel pools, or backwater habitat, and that possess a natural, unregulated flow regime that allows for periodic flooding or, if flows are modified or regulated, a flow regime that allows for adequate river functions, such as flows capable of processing sediment loads; or

   b. Lentic wetlands such as livestock tanks, springs, and cienegas; and

   c. Shoreline habitat with adequate organic and inorganic structural complexity to allow for thermoregulation, gestation, shelter, protection from predators, and foraging opportunities (e.g., boulders, rocks, organic debris such as downed trees or logs, debris jams, small mammal burrows, or leaf litter); and

   d. Aquatic habitat with characteristics that support a native amphibian prey base, such as salinities less than 5 parts per thousand, pH greater than or equal to 5.6, and pollutants absent or minimally present at levels that do not affect survival of any age class of the northern Mexican gartersnake or the maintenance of prey populations.

2. Adequate terrestrial space (600 feet [183 meters] lateral extent to either side of bankfull stage) adjacent to designated stream systems with sufficient structural characteristics to support life history functions such as gestation, immigration, emigration, and brumation (extended inactivity).

3. A prey base consisting of viable populations of native amphibian and native fish species.

4. An absence of nonnative fish species of the families Centrarchidae and Ictaluridae, bullfrogs, and/or

crayfish, or occurrence of these nonnative species at low enough levels such that recruitment of northern Mexican gartersnakes and maintenance of viable native fish or soft-rayed, nonnative fish populations (prey) is still occurring.

The only proposed critical habitat unit in the Action Area vicinity is Buenos Aires National Wildlife Refuge (see Figure 4). The entire 117,335-acre refuge has been proposed as critical habitat for the species (US Fish and Wildlife Service 2013b). There are 5 towers located within this critical habitat unit.

Effects of the Proposed Action

Northern Mexican gartersnakes are generally active from March through October in southern Arizona, although they may be active any day of the year when the daily low temperature is above freezing. The species may be active in upland areas (typically within about 600 feet of ephemeral or perennial water sources), but up to one mile or more from a given water body or in and along drainages and depressions during the monsoon season (Jeff Servoss, US Fish and Wildlife Service, personal communication, September 29, 2017). The Block 1 Replacement Project does not involve any actions within 600 feet of perennial water sources. Therefore, any potential direct effects to the species are likely confined to dispersal periods. The most likely direct effect to the species during dispersal periods would be injury or death from construction vehicle traffic along access roads and at tower sites.

The primary constituent elements for northern Mexican gartersnake critical habitat include: aquatic habitat, adequate terrestrial space adjacent to the aquatic habitat to support critical life history functions, an adequate prey base and an absence of invasive species. The Block 1 Replacement Project construction activities are located at least 0.25 miles from any of these primary constituent elements. The construction activities are confined to existing roads and previously disturbed sites. For these reasons, the Block 1 project is unlikely to have any significant effects on primary constituent elements for northern Mexican gartersnake proposed critical habitat.

Conclusion

We have analyzed the effects of the proposed action and concur with your determination that the proposed action may affect, but is not likely to adversely affect, the threatened northern Mexican gartersnake for the following reasons:

- The northern Mexican gartersnake occurs in the action area in very low densities. Potential effects to the gartersnake from road fatalities are discountable.
- CBP will implement conservation measures and BMPs as outlined above. This will reduce other potential effects to an insignificant level.

Yellow-Billed Cuckoo

Environmental Baseline

Yellow-billed cuckoos (or cuckoos) are fairly large, long, and slim birds. The mostly yellow bill is almost

as long as the head, thick and slightly down-curved. Wings appear pointed and swept back in flight. Yellow-billed cuckoos are warm brown above and clean whitish below. Their blackish face mask is accompanied by a yellow eye ring. In flight, the outer part of the wings flash rufous. From below, the tail has wide white bands and narrower black ones.

A western Distinct Population Segment (DPS) of the yellow-billed cuckoo was designated as threatened on October 3, 2014 (USFWS 2013c, 2014c; 78 FR 61622, 79 FR 59992). On August 15, 2014 (79 FR 48547) USFWS proposed 546,335 acres of critical habitat in Arizona, California, Colorado, Idaho, New Mexico, Nevada, Texas, Utah and Wyoming (USFWS 2014b; 79 FR 48548). Following publication of the draft proposed critical habitat rule, cuckoos have been found in previously unknown locations and habitats in Arizona. The largest remaining breeding areas are in southern and central California, Arizona, along the Rio Grande in New Mexico, and in northwestern Mexico (USFWS 2014c; 79 FR 59992).
In Arizona, the species was a common resident in the (chiefly lower) Sonoran zones of southern, central, and western Arizona (Phillips et al. 1964). The yellow-billed cuckoo now nests primarily in the central and southern parts of the state, as well as at revegetation sites along the lower Colorado River (Corman and Magill 2000, McFarland and Horst 2015, 2017; USFWS 2013c, 2014b, 2014c, McNeil et al. 2013).

The western yellow-billed cuckoo breeds in riparian (hydro- and xero- riparian) woodlands, and in Madrean evergreen woodland drainages and mesquite woodlands of arid areas. Habitat conditions are typically cooler and more humid than in the surrounding environment (USFWS 2014b,c). The vegetation making up the breeding habitat of the western yellow-billed cuckoo varies across the species' range and includes native and nonnative -riparian and upland nonriparian species including cottonwood (*Populus* spp.), willow (*Salix* spp.), mesquite (*Prosopis* spp.), box elder (*Acer negundo*), sycamore (*Platanus* spp.), ash (*Fraxinus* ssp.), walnut (*Juglans* spp.), alder (*Alnus* spp.), hackberry (*Celtis spp.*), soapberry (*Sapindus saponaria*), oak (*Quercus* spp.), acacia (*Acacia* spp.), desert willow (*Chilopsis linearis*), elderberry (*Sambuccus mexicanus*), juniper (*Juniperus* spp.), pine (*Pinus* spp.), Russian olive (*Elaeagnus angustifolia*), and tamarisk (*Tamarix* spp.) (Gaines 1974, pp. 7–9; Gaines and Laymon 1984, pp. 59–66; Laymon and Halterman 1989, pp. 274–275; Laymon 1980; Corman and Magill 2000; Dettling and Howell 2011, p. 28; MacFarland and Horst 2015).

In most of the DPS, the western yellow-billed cuckoo primarily breeds in large riparian woodlands dominated by willow and cottonwood along low-gradient rivers and streams, and in open riverine valleys that provide wide floodplain conditions (USFWS 2014a,b). In the Southwest, however, cuckoos can also breed in higher gradient drainages, and narrower and drier reaches of riparian habitat (Corman and Magill 2000;WestLand Resources; Inc. 2013a, 2013b, 2013c, 2015a, 2015b, 2015c; Arizona Game and Fish Department 2016; MacFarland and Horst 2015, 2017; Tucson Audubon 2015; Cornell Lab of Ornithology 2017). Large expanses of gallery riparian woodland habitat supports greater densities of cuckoos than less dense reaches of scattered riparian trees or more xero-riparian woodlands. However, these less dense reaches of scattered riparian trees and more xero-riparian woodlands are also important to yellow-billed cuckoos as nesting substrate, foraging habitat, and as a buffer between more hydric sites and the adjacent, xeric uplands (USFWS 2014b, 2014c; Griffin 2015; Groschupf 2015; McFarland and Horst 2015, 2017).
To distinguish between the western yellow-billed cuckoo breeding habitat in riparian areas throughout the range and breeding habitat found in more arid areas of the Southwest, we use the terms "Rangewide" and "Southwestern" breeding habitat, respectively. We describe both the Rangewide and Southwestern breeding habitat below:

Southwestern breeding habitat

Southwestern breeding habitat is located in the Southwestern United States (particularly in Arizona) and is comprised of riparian woodlands, mesquite woodlands, or Madrean evergreen woodlands with a variable overstory canopy and understory component within drainages at least 200 ac (81 ha) in size. In addition to cottonwood, willow, and mesquite, occupied riparian habitat in Arizona may also contain a greater proportion of xero-riparian species than in the rest of the DPS. Oak, hackberry, sycamore, walnut, ash, acacia, tamarisk, and juniper are among the most common xero-riparian species in Southwestern breeding habitat (Corman and Magill 2000, Corman and Wise-Gervais 2005, USFWS unpubl. data). Tamarisk may be a component of breeding habitat, but there is usually a native riparian tree component within the occupied habitat (Gaines and Laymon 1984, Johnson et al. 2008, McNeil et al. 2013, Sechrist et al. 2013, Carstensen et al. 2015). Habitat patches in the arid Southwest contain a greater proportion of xero-riparian and nonriparian tree species than elsewhere in the DPS. Habitat patches are often interspersed with large openings and include narrow stands of trees, small groves of trees, or sparsely scattered trees. As such, the canopy closure is variable, and where trees are sparsely scattered, canopy closure may be dense only at the nest tree. Southwestern breeding habitat types are as follows:

- Riparian woodland is more water-limited, contains a greater proportion of xero-riparian species, and is often narrower, patchier, and sparser than where water is more abundant. This more arid riparian woodland occurs in perennial and intermittent drainages and floodplains throughout the Southwest.
- Mesquite-dominated woodland habitat occurs in floodplains, adjacent terraces, and adjacent uplands in perennial, intermittent, and ephemeral drainages throughout the Southwest.

- Madrean evergreen woodland (usually oak-dominated) habitat occurs in intermittent and ephemeral drainages and adjacent hillsides in the foothills and mountains of southeastern Arizona, up to 7000 ft in elevation. The amount of oak varies and may be interspersed with mesquite and other species in Madrean evergreen woodland.

In addition to the dense nesting grove or tree, often referred to as the core area, western yellow-billed cuckoos need adequate foraging areas near the nest. Foraging areas can be less dense or patchy with lower levels of canopy cover and may be a mix of shrubs, ground cover, and scattered trees (Sechrist et al. 2009, 2013; Carstensen et al. 2015; Griffin 2015; USFWS, unpubl. data). Cuckoos often forage in open areas, woodlands, orchards, and adjacent streams (Hughes 1999), which include stands of smaller mesquite trees and even tamarisk (Rosenberg et al. 1991). In Arizona, adjacent habitat is usually more arid than occupied nesting habitat. This adjacent habitat can be used for foraging where large insects are produced.

Proposed Critical Habitat. There is one unit of proposed yellow-billed cuckoo critical habitat within the Action Area. This critical habitat unit is AZ-23, the Arivaca Wash/San Luis Wash Unit. This 5,765-acre

proposed critical habitat unit is made up of two washes that join to form a 17-mi long continuous segment that is comprised of 9 mi of Arivaca Wash and 8 mi of San Luis Wash. Approximately 1,014 ac, or 18 percent, of proposed unit AZ–23 are privately owned; 89 ac, or 2 percent, are in State ownership and managed by the Arizona State Lands Department; and 4,662 ac, or 81 percent, are in Federal ownership located on the Buenos Aires NWR managed by the U.S. Fish and Wildlife Service. This unit represents about one percent of the 546,335 acres of critical habitat which has been proposed for this species (US Fish and Wildlife Service 2014c).

Towers TCA-TUS-035 and TCA-TUS-290. Within the Arivaca Wash/San Luis Wash proposed critical habitat unit, numerous western yellow-billed cuckoo detections, including pairs, from previous years have been documented by Corman and Magill (2000, pp. 42, 43, 47), Griffin (2015, p. 22), and Cornell Lab of Ornithology (2017, eBird data).
Towers TCA-TUS-035 and TCA-TUS-290 are near occupied cuckoo habitat. Towers TCA-TUS-035 and TCA-TUS-290 are within approximately 0.75 miles from the eastern border of the proposed Arivaca Wash/San Luis Wash Critical Habitat Unit. Tower TCA-TUS-035 is also immediately adjacent to an unnamed drainage bordered by large dense mesquite. This ephemeral drainage flows into Arivaca Wash and may be suitable cuckoo breeding habitat. Habitat surrounding TCA-TUS-290 consists of short stature mesquite and ocotillo. Cuckoos may be foraging in the habitat adjacent to these towers. Within the proposed Arivaca Wash/San Luis Wash Critical Habitat Unit, nine western yellow-billed cuckoo use areas at three sites were identified in the 4.1 km (2.5 mi) surveyed in 2015, including eight pairs (Griffin 2015, p. 22). Breeding was confirmed at all three sites in 2015; Arivaca Cienega, Arivaca Creek–Honnas Pond, and Arivaca Creek (Griffin 2015, p. 19, 22).

Griffin (2015, p. 19) detected most western yellow-billed cuckoos in cottonwood and willow riparian forest and woodland vegetation, but sometimes with ash, hackberry, mesquite and a dense shrub understory. Despite the fact that the riparian vegetation changes from more mesic communities upstream to more xeric communities downstream, western yellow-billed cuckoos likely breed along the entire length of Arivaca Creek. Use areas seemed to include more upland woodland of mesquite than riparian forest vegetation. The three western yellow- billed cuckoo use areas within the Arivaca Cienega site differed in vegetative composition and structure (Griffin 2015, p. 23) and included: (1) a large, low-statured mesquite woodland or “bosque” that included open areas of native grassland and cienega marsh, and a patch of mature cottonwood-willow forest; (2) patches of mature Goodding’s willow, velvet ash, and hackberry-mesquite; and (3) a large patch of cottonwood-willow riparian forest with minor upland woodland components of mesquite, hackberry, and open areas. Other sites within the unit (Arivaca Creek–Honnas Pond, Arivaca Creek) had similar habitat and western yellow-billed cuckoo use.

Tower TCA-TUS-41. Cuckoos have been found during the breeding season along Arivaca Lake and tributaries, with suitable breeding habitat within 0.5 miles of TCA-TUS-41. Sparsely scattered mesquite surround this tower on an elevated site next to a paved and well-used road. The nearest cuckoo detections reported were approximately 0.7, 0.9, and 1.3 miles respectively from TCA-TUS-41 (Cornell Lab of Ornithology 2017). Tucson Audubon detected seven occupied territories with repeated detections, including three pairs, where they surveyed the tributaries and lake in 2015 (MacFarland and Horst 2015, pp. 17–18). The seven territories documented is an underestimate, as only a small portion of suitable habitat was surveyed. Western yellow-billed cuckoos were detected at the lake on every visit during 2015 and habitat surrounding the lake and side canyons is considered highly suitable 2015. Additional records

exist from previous years (Cornell Lab of Ornithology 2017). Habitat is composed of riparian and Madrean evergreen woodland. The overstory vegetation is composed of primarily mesquite, with willow, cottonwood, ash, hackberry, and oak (MacFarland and Horst 2015, p.121).

Cuckoo Detections along Tres Boleros Road and Tres Bellotas Road. Cuckoos have been detected from tower TCA-TUS-287 to TCA-TUS-299 and from TCA-TUS 298 on Tres Boleros Road and on Tres Bellotas Road to TCA-TUS-036 during the breeding season (Cornell Lab of Ornithology 2017). Four detections records exist along Fresnal Wash along the Tres Boleros Road (Cornell Lab of Ornithology 2017). Although the drainages that cross the Tres Boleros and Tres Bellotas Road have not been surveyed, they contain suitable cuckoo habitat.

Tower TCA-TUS-287. Foraging habitat consisting primarily of mesquite appears to be suitable surrounding tower TCA-TUS-287, only 0.2 mile from La Osa Wash. La Osa Wash contains large riparian trees, but no surveys have been conducted.

Tower TCA-TUS-299. This tower is near suitable breeding and foraging habitat. Washes with large riparian trees are within 0.25 miles of this tower. Large mesquite, wolfberry, and hackberry trees occupy these washes.

Towers TCA-TUS-298 and TCA-TUS-036. Tres Bellotas Road meanders within and adjacent to Fresnal Wash, with suitable cuckoo habitat and flowing water inthe drainage. Large ash, willow, mesquite, hackberry, wolfberry, acacia, and walnut trees border the drainage between towers TCA-TUS-0298 and TCA-TUS-036. On October 23, 2017 water was flowing in the wash in reaches where the wash becomes the road and where the wash crosses the road. A manmade pond surrounded by riparian trees within 0.25 miles of tower TCA-TUS-036 may also support breeding cuckoos. Towers TCA-TUS-298 and TCA-TUS-036 are far enough away from suitable breeding habitat in Fresnal Wash that construction is not likely to adversely affect cuckoos at these tower sites, as long as construction traffic avoids the Tres Bellotas Road between these towers from June 1 to September 30. Both of these towers are on elevated sites surrounded by sparse mesquite and oak trees; this habitat may be used as foraging habitat but construction activities are not likely to adversely affect cuckoos. Fresnal Wash has not been surveyed between these two towers and is not visited very often by birders due to its remote location and proximity to the border. However, some cuckoo information does exist for this area. Cuckoo were detected on August 26, 2000 and July 8, 2001 during the breeding season (Cornell Lab of Ornithology 2017). Based on past detections, presence of water, and suitable riparian habitat, Fresnal Wash is considered to be occupied cuckoo breeding habitat.

Western yellow-billed cuckoos have been detected incidentally by birders and refuge staff in suitable breeding habitat in mesquite woodland and Madrean evergreen woodland, sometimes far from mesic drainages, in other parts of the refuge (Griffin 2015, pp. 25, 28; Cornell Lab of Ornithology 2017 (eBird data)).

Effects of the Proposed Action

Yellow-billed cuckoo are reported within Buenos Aires National Wildlife Refuge and the adjacent Coronado National Forest, with recent breeding behavior and nests confirmed (Corman and Magill 2000;

Griffin 2015; MacFarland and Horst 2015, 2017; Cornell Lab of Ornithology 2017). In recent years, cuckoos have been located near the following towers or associated roads: TCA-TUS-035, TCA-TUS-036, TCA-TUS-041, TCA-TUS 290, TCA-TUS 298, and TCA-TUS 299 during the breeding season from June 1 to September 30. In addition, suitable habitat exists near tower TCA-TUS 287.

It is possible that cuckoos could be exposed to noise from Block 1 Replacement Project construction activities. Noise will be generated by both vehicles accessing tower sites and by construction activities at tower sites. Available research indicates that medium and heavy trucks, such as cranes and cement trucks, will generate noise levels in the range of 80 to 85 dBA at speeds less than 35 miles per hour on tower access routes (Minister of Public Works and Government Services, Canada 2001).

As stated in the Section 2.0 of the biological assessment, an estimated 25 to 30 trips by medium to heavy trucks will be required to each tower site. Trips by these medium to heavy trucks will be scattered over the 40 to 60-day construction window at each tower site. The balance of trips along the access roads will be via pick-up truck, which has a noise footprint similar to a majority of the vehicles currently operating in the project vicinity. Cuckoos along these access routes could be exposed to elevated noise levels associated with these medium to heavy trucks for a duration of 30 seconds to 1 minute during each trip to a tower. Therefore, the total exposure of any cuckoos to elevated noise levels along access roads during construction at a tower is estimated to be 30 to 60 minutes. At the tower sites, the medium to heavy vehicles would be in operation for durations ranging from an hour, in the case of delivery of a load of concrete, to several days in the case of tower foundation excavation. Noise levels from operation of these medium to heavy vehicles would be similar to noise levels along access routes. Federal Highway Administration (2006) estimates noise generated by cement trucks at 79 dBA at a distance of 50 feet, and 81 dBA for cranes and excavators at a distance of 50 feet. Operation of these vehicles at tower sites would be scattered over the construction duration. Any cuckoos in the immediate vicinity of towers could be subject to up to several days of elevated noise levels during tower construction. Industrial Noise Control (2017) indicates that 70 decibels is used as a general base of comparison. This level is considered the baseline of normal, everyday activity such as a passenger car driving by or TV/radio music or a vacuum cleaner. Eighty decibels is two times as loud as 70 decibels and 90 decibels is four times as loud as 70 decibels.

The noise generated during the life of the project could result in short term noise exposure to cuckoos along the access roads or in the immediate vicinity of towers. The most commonly recorded response of birds to noise or other human disturbance is flushing. However, researchers have also reported no flushing response from Mexican spotted owls and bald eagles exposed to noise levels twice as loud (92 dBA) as noise levels predicted from the proposed action (Delaney et al. 1999 and Brown et al.1999). Significantly, even when flushing has occurred, researchers have reported no change in either reproductive success or number of young fledged in birds exposed to short term noise events (Delaney et al. 1999 and Delaney et al. 2002). Other authors have reported that exposure to short term noise events does not lead to chronic physiological stress in birds (Bisson et al. 2009 and Tempel 2003). In another study, researchers reported that infrequent and unpredictable vehicle operations in the immediate vicinity of nests was not correlated with the number of young fledged (Hayden et al. 2002).

Towers TCA-TUS-035 and TCA-TUS-290. These two towers are located near proposed yellow-billed cuckoo critical habitat and approximately 2 miles of roads partially located within the proposed yellow-

billed cuckoo critical habitat unit AZ31. Both towers are on elevated locations outside the riparian corridor. Tower TCA-TUS-035 is immediately adjacent to a drainage bordered by large dense mesquite and breeding cuckoos may be affected by construction activity during the breeding season. Construction activity during the breeding season (June 1 through September 30) will be avoided at tower TCA-TUS-035. Tower TCA-TUS-290 is on a hill on the opposite side of a well-used paved road from Aravaipa Creek. This tower is elevated and far enough away from breeding habitat so that construction activity at the tower will likely not adversely affect breeding and foraging cuckoos. However, the access road starts near occupied habitat along Aravaipa Creek and the hundreds of vehicle trips may cause disturbance to breeding and foraging cuckoos.

Tower TCA-TUS-41. Although the nearest cuckoo detections reported were approximately 0.7, 0.9, and 1.3 miles respectively from TCA-TUS-41 (Cornell Lab of Ornithology 2017), this tower is on an elevated site along a paved road that already receives some traffic and construction is not likely to adversely affect cuckoos.

Tower TCA-TUS-287. This tower is only 0.2 mile from La Osa Wash, which contains large riparian trees that may be breeding habitat. Construction activity may adversely affect breeding and foraging cuckoos. Construction activity during the breeding season (June 1 through September 30) will be avoided at this tower.

Tower TCA-TUS-299. This tower is near suitable breeding and foraging habitat and construction activities may advserely affect breeding cuckoos. Construction activities will be avoided during part of the breeding season (July 1 through September 30) and protocol surveys will be conducted from June 1 through June 30 at this tower.

Towers TCA-TUS-298 and TCA-TUS-036. These towers are far enough away from suitable breeding habitat in Fresnal Wash that construction is not likely to affect cuckoos at these tower sites, but the Tres Bellotas Road between these towers is in and adjacent to suitable cuckoo habitat. The hundreds of additional vehicles traveling between these two towers during the breeding season would create additional noise and visual disturbance that would likely adversely affect cuckoos using habitat along the Tres Bellotas Road and in Fresnal Wash. CBP will avoid using Tres Bellotas Road along Fresnal Wash between TCA-TUS-298 and TCA-TUS-036 from June 1 to September 30 to avoid disturbance to cuckoos in suitable habitat.

Conclusion

We have analyzed the effects of the proposed action and concur with your determination that the proposed action may affect, but is not likely to adversely affect, the western yellow-billed cuckoo for the following reasons:

- The tower sites where construction of replacement towers will generally occur are in areas of raised topography and not within drainages where western yellow-billed cuckoos typically breed. In addition, although cuckoo upland foraging habitat is adjacent to some tower sites, the tower site footprints do not contain upland foraging habitat. In addition, as discussed above, CBP has proposed conservation measures and best management practices to avoid or reduce disturbance

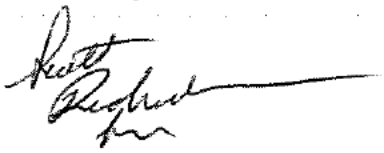
effects to cuckoos in suitable breeding habitat and adjacent foraging habitat within 0.25 miles of the tower sites. Therefore, effects to yellow billed cuckoos from disturbance associated with tower construction will be insignificant.

- A number of roadways proposed for use during this project do occur along drainages or in other areas that support suitable western yellow-billed cuckoo habitat. CBP has proposed conservation measures and BMPs to avoid and minimize disturbance of cuckoos in these areas. Therefore, these effects will be insignificant.

Thank you for your continued coordination related to this consultation. No further section 7 consultation is required for this project at this time. Should project plans change, or if additional information on the distribution or abundance of listed species or critical habitat becomes available, this determination may need to be reconsidered. Additionally, we encourage you to coordinate the review of this project with the Arizona Fish and Game Department and the appropriate land management agencies and private landowners.

For further information please contact Scott Richardson (520) 670-6150(x242). Please refer to the consultation number, 02EAAZ00-2018-I-0091 in future correspondence concerning this project.

Sincerely,



Steven L. Spangle

From: Andrew, Jonathan
Subject: Southwest Border PA for Section 106 of the NHPA
Date: Tuesday, February 14, 2017 2:33:02 PM
Attachments: SB PA Annual Report FINAL_2016 (1).pdf

CBP has provided their Annual Report (attached).

They will schedule a time to conference and go over the report and answer any questions you might have. I will get back in touch when the conf call is being scheduled.

Chapter 1. Introduction

This report has been prepared in accordance with Stipulation XII of the *Programmatic Agreement Among U. S. Customs And Border Protection, the Historic Preservation Officers of the States of Arizona, California, New Mexico, and Texas, General Services Administration, U.S. Department of Agriculture, U.S. Department of The Interior, United States Section of the International Boundary and Water Commission, New Mexico State Land Office, California Valley Miwok Tribe, Cocopah Indian Tribe, Delaware Nation, Fort Yuma-Quechan Tribe, Pechanga Band of Luiseno Mission Indians, Rincon Band of Luiseno Mission Indians, Tohono O'odham Nation, Tonkawa Tribe of Oklahoma, Yavapai-Prescott Indian Tribe, and The Advisory Council on Historic Preservation Regarding CBP Undertakings in States Located Along the Southwest Border Of The United States* (Southwest Border Programmatic Agreement). In accordance with Stipulation XII.A, a copy of this report is being provided to all parties except the Advisory Council on Historic Preservation who has requested not to receive the annual report.

A teleconference with all parties to the Southwest Border Programmatic Agreement will be held on a to be determined date and time in April or May to summarize and discuss the work carried out pursuant to the terms of the agreement.

2016 is the second year that the Southwest Border Programmatic Agreement has been in place.

CBP Organizational Changes

In 2016, CBP underwent an agency-wide reorganization. As a result, many CBP offices were renamed and some duties were realigned to improve the agency's operations.

The Southwest Border Programmatic Agreement references the Environmental and Energy Division (EED). This department is now known as the Energy and Environmental Management Division (EEMD). Its historic preservation duties have not changed nor has its oversight role within the agency. CBP does not believe that this change is significant enough to require revisions to the document.

CBP has also named a new Federal Preservation Officer, Mr. Francis Dutch, Director of the Facilities Management and Engineering Division.

Barry M. Goldwater Range (BMGR) Damage to Archeological Sites

Though the Southwest Border Programmatic Agreement does not apply at BMGR, CBP wishes to report on the current status of this situation as we are aware that the New Mexico SHPO is aware of the damage and other federal agencies in the region may be aware of it as well.

On January 3, 2017, CBP was notified by the Advisory Council on Historic Preservation (ACHP) that they were in receipt of a letter from BMGR stating that two eligible archeological

sites had been disturbed by CBP operations. Multiple CBP offices including both Yuma Sector and Tucson Sector of the U.S. Border Patrol worked together to research the issue and determine what had occurred. It was determined that agents in the Wellton Station Area of Responsibility were moving trucks containing mobile technology and disturbed the sites. Yuma Sector has taken the lead on working with BMGR and as of January 18th the following actions have occurred: a meeting between the Yuma Sector Chief and BMGR leadership about the issue and improving communications between CBP and BMGR; a field visit with BMGR Range staff, the Wellton Station Chief, the Yuma Station Public Lands Liaison Agent (PLLA) to the sites to inspect the damage; drafting of a Memorandum of Understanding between BMGR and both sectors regarding information sharing and road designations to prevent such an occurrence from happening again; a meeting led by Yuma Sector's Public Lands Liaison Agent (PLLA) with tribes that have ties to the impacted sites to apologize for the damage caused by CBP; and discussions are occurring about how best to reeducate agents on Environmental issues, including archeological issues, in Wellton Station and both Sectors. CBP has spoken with the ACHP about the actions taken to date and will be sending them a formal letter regarding the situation and our response.

CBP takes this situation seriously and is committed to preventing a reoccurrence in the future.

1.1. 2017 Legislative Changes

CBP has one legislative item to report on this year.

Executive Order 13767: Border Security and Immigration Enforcement Improvements

On January 25, 2017 President Trump signed Executive Order 13767 (EO 13767) focused on border security along the Southern Border. EO 13767 directs CBP to immediately plan, design, and construct a physical wall using the most appropriate materials and technology to effectively achieve complete operational control of the southern border. CBP is currently working on its comprehensive study which must be briefed to the President within 180 days of the order's signing. The comprehensive study is required to address the current state of southern border security; the geophysical and topographical conditions; the availability of both federal and state resource; and provide a strategy to obtain and maintain complete operational control.

EO 13767 also requires that the Department of Homeland Security uses all legally available resources to immediately construct, operate, control, or establish contracts to construct, operate, or control facilities to detain cross border violators at or near the land border with Mexico. The extent of CBP involvement is undetermined at this time, but programs developed in the past several months may be used or expanded. At the end of 2016, CBP developed a temporary housing model that is similar to the base camps used by the Federal Emergency Management Agency. Soft sided housing units and portable sanitation facilities can be installed on paved

areas at existing CBP facilities to provide safe and secure temporary housing until individuals are transferred to another agency.

EO 13767 also directs CBP to hire an additional 5,000 Border Patrol agents. CBP has been updating its Border Patrol facilities across southwest in the last decade and the newer facilities may be able to accommodate the hiring surge. Older facilities may require modifications, additions, or replacement. The nature and extent of this need is undetermined at this time and will likely evolve over time.

Chapter 2. 2016 Implementation of the PA

In 2016, CBP conducted 21,827 Undertakings in the Southwest Border Programmatic Agreement area of potential effects. Fifty-three (53) Undertakings met Stipulation VI of the Southwest Border Programmatic Agreement. 21,734 Undertakings met Stipulation VII of the Southwest Border Programmatic Agreement. One (1) Undertakings resulted in an Adverse Effect determination.

The information is broken down by state below.

2.1. Arizona

In 2016, CBP conducted 10,697 Undertakings in the State of Arizona. Undertakings have consisted primarily of operations activities, facility and Tactical Infrastructure maintenance, technology programs, and lease renewals. A summary of Arizona Undertakings is provided in Appendix A (page 13), including a table with narrative description for non-operations Undertakings.

2.1.1. Use of Stipulation VI

Ten (10) Undertakings met Stipulation VI of the Southwest Border Programmatic Agreement. These Undertakings used a total of 19 different stipulations: VI-A (2); VI.B (9); VI.C (1); VI.D (1); VI.E (1); VI.F (5). A breakdown of each stipulation used by CBP, followed by the number of times is was used, is provided below:

- VI.A
  - VI.A.1- 1
  - VI.A.5- 1
- VI.B
  - VI.B.1- 1
  - VI.B.1(c)- 2
  - VI.B.1(d)- 2
  - VI.B.2- 1
  - VI.B.3- 1
  - VI.B.3(d)- 1
  - VI.B.4- 1
  - VI.B.7- 1
  - VI.B.8- 1
- VI.C
  - VI.C.8- 2
- VI.D
  - VI.D.1- 1

- VI.E
  - VI.E.3- 1
- VI.F
  - VI.F.1- 1
  - VI.F.2- 1
  - VI.F.3- 1
  - VI.F.6- 1
  - VI.F.7- 1

2.1.2. Use of Stipulation VII

CBP had 10,677 Undertakings that met Stipulation VII.A of the Southwest Border Programmatic Agreement and no Undertakings that met Stipulation VII.B.

10,672 Undertakings involved Law Enforcement Activities and Operational Readiness, including the pursuit of cross-border violators and response to credible threats. These pursuits were reported to DOI and USDA. There were no inadvertent discoveries during pursuits.

CBP developed new technologies to locate potential cross-border tunnels in 2016 resulting in five (5) Undertakings that met Stipulation VII.A.2. The technology was designed to be non-invasive and minimize ground disturbance. These investigations were focused on high probability areas in the various areas of interest for each Border Patrol Sector in Arizona. Not all investigations resulted in CBP tunnel remediation projects. In some cases, the technology did not locate tunnels, while in other cases CBP was part of an inter-agency team and other agencies handled the remediation activities.

No activities involved the closure of cross-border tunnels.

2.1.3. Adverse Effects

CBP had no Adverse Effect determinations in the State of Arizona.

2.1.4. Emergency Reviews

CBP had no emergency reviews in the State of Arizona.

2.1.5. Post-Review Discoveries

CBP had no post review discoveries in the State of Arizona.

2.2. California

In 2016, CBP conducted 5,210 Undertakings in the State of California. Undertakings have consisted of operations activities, facility maintenance, technology programs, and lease renewals.

A summary of California Undertakings is provided in Appendix B (page 18), including a table with narrative description for non-operations Undertakings.

2.2.1. Use of Stipulation VI

Eleven (11) Undertakings met Stipulation VI of the Southwest Border Programmatic Agreement. These Undertakings used a total of seven (7) different stipulations: VI.A (1); VI.B (4); VI.C (1); and VI.F (1). A breakdown of each stipulation used by CBP, followed by the number of times is was used, is provided below:

- VI.A
  - VI.A.1- 4
- VI.B
  - VI.B.1(c)- 1
  - VI.B.1(d)- 3
  - VI.B.2- 2
  - VI.B.8- 1
- VI.C
  - VI.C.8- 5
- VI.F
  - VI.F.6- 1

2.2.2. Use of Stipulation VII

CBP had 5,191 Undertakings that met Stipulation VII.A of the Southwest Border Programmatic Agreement and two (2) Undertakings that met Stipulation VII.B.

5,183 Undertakings involved Law Enforcement Activities and Operational Readiness, including the pursuit of cross-border violators and response to credible threats. These pursuits were reported to DOI and USDA. There were no inadvertent discoveries during pursuits.

CBP developed new technologies to locate potential cross-border tunnels in 2016 resulting in eight (8) Undertakings that met Stipulation VII.A.2. The technology was designed to be non-invasive and minimize ground disturbance. These investigations were focused on high probability areas in the various areas of interest for each Border Patrol Sector in California. Not all investigations resulted in CBP tunnel remediation projects. In some cases, the technology did not locate tunnels, while in other cases CBP was part of an inter-agency team and other agencies handled the remediation activities.

Two (2) Undertakings involved the closure of cross-border tunnels under Stipulation VII.B. These tunnels occurred in the vicinity of Calexico and Otay Mesa. Both tunnels were located within areas that had been previously disturbed by construction and were reported to the appropriate consulting parties in accordance with the terms of the Programmatic Agreement.

Monitoring reports were prepared for neither of these closures as CBP was able to establish that previous ground disturbance, other than the creation of the tunnel, had occurred within the APE. There were no inadvertent discoveries or impacts to historic properties from the closure of these tunnels.

2.2.3. Adverse Effects

CBP had no Adverse Effect determinations in the State of California.

2.2.4. Emergency Reviews

CBP had no emergency reviews in the State of California.

2.2.5. Post-Review Discoveries

CBP had no post review discoveries in the State of California.

2.3. New Mexico

In 2016, CBP conducted 2,101 Undertakings in the State of New Mexico. Undertakings have consisted of operations activities, facility and Tactical Infrastructure maintenance, and technology programs. A summary of New Mexico Undertakings is provided in Appendix C (page 23), including a table with narrative description for non-operations Undertakings.

2.3.1. Use of Stipulation VI

Seven (7) Undertakings met Stipulation VI of the Southwest Border Programmatic Agreement. These Undertakings used a total of nine (9) different stipulations: VI.A (1); VI.B (6); VI.C (1); and VI.F (1). A breakdown of each stipulation used by CBP, followed by the number of times is was used, is provided below:

- VI.A
  - VI.A.1- 1
- VI.B
  - VI.B.1- 1
  - VI.B.1(c)- 1
  - VI.B.1(d)- 1
  - VI.B.2- 1
  - VI.B.3- 2
  - VI.B.3(d)- 1
- VI.C
  - VI.C.8- 1
- VI.F
  - VI.F.4- 1

2.3.2. Use of Stipulation VII

CBP had 2,091 Undertakings that met Stipulation VII.A of the Southwest Border Programmatic Agreement and no Undertakings that met Stipulation VII.B.

2,087 Undertakings involved Law Enforcement Activities and Operational Readiness, including the pursuit of cross-border violators and response to credible threats. These pursuits were reported to DOI and USDA. There were no inadvertent discoveries during pursuits.

CBP developed new technologies to locate potential cross-border tunnels in 2016 resulting in four (4) Undertakings that met Stipulation VII.A.2. The technology was designed to be non-invasive and minimize ground disturbance. These investigations were focused on high probability areas in the various areas of interest for each Border Patrol Sector in New Mexico. Not all investigations resulted in CBP tunnel remediation projects. In some cases, the technology did not locate tunnels, while in other cases CBP was part of an inter-agency team and other agencies handled the remediation activities.

No activities involved the closure of cross-border tunnels.

2.3.3. Adverse Effects

CBP had one (1) Adverse Effect determinations in the State of New Mexico. Summary information on each Undertaking is provided below.

- Tactical Infrastructure Maintenance and Repair (TIMR) Project; Hidalgo and Luna Counties; New Mexico SHPO, New Mexico Bureau of Land Management (BLM), and New Mexico State Land Office (NMSLO)- Potential CBP maintenance activities along 51 miles of existing roads located on land managed by the BLM and 27.38 miles of existing roads located on land managed by the NMSLO. While CBP is consulting on the maintenance on approximately 88 miles of existing roads on BLM and NMSLO lands, it is not anticipated that work would occur on all roads, or even the entire length of a given road, in any one year. There are a number of factors that will determine if and when CBP will fund maintenance activities over time, including operational needs and funding availability. CBP expects maintenance to occur on an as needed basis in discrete areas within this road network subject to the availability of funding. Three surveys have identified 55 archeological sites within the Area of Potential Effect (APE), of which 20 are eligible for the National Register of Historic Places (NRHP), 23 are of undetermined eligibility, and 12 are not eligible for the NRHP. CBP has determined that the Undertaking does not meet Stipulation VI.C of the Southwest Border Programmatic Agreement due to the presence of undetermined and National Register eligible historic properties within the APE. The activities have the potential to affect historic properties, and in some cases those affects could be adverse due to their locations. However, the degree of potential effects to these sites varies greatly and cannot be fully determined

until final design decisions are made. In most cases sites will not be impacted or the impacts can be minimized or avoided through modification to project designs and managing project activities to avoid sites. A project-specific programmatic agreement has been proposed and is under development between the parties. It will include standard treatment measures that are appropriate to the potential level of impact and which would be implemented prior to conducting work within 1,000 feet of an eligible site. Consultation began October 2015.

2.3.4. Emergency Reviews

CBP had no emergency reviews in the State of New Mexico.

2.3.5. Post-Review Discoveries

CBP had no post review discoveries in the State of New Mexico.

2.4. Texas

In 2016, CBP conducted 3,821 Undertakings in the State of Texas. Undertakings have consisted of operations activities, facility and Tactical Infrastructure maintenance, technology programs, and lease renewals. A summary of Texas Undertakings is provided in Appendix D (page 26), including a table with narrative description for non-operations Undertakings.

2.4.1. Use of Stipulation VI

Twenty five (25) Undertakings met Stipulation VI of the Southwest Border Programmatic Agreement. These undertakings used a total of 16 different stipulations: VI.A (2); VI.B (8); VI.C (3); VI.D (1); VI.E (1); and VI.F (1). A breakdown of each stipulation used by CBP, followed by the number of times is was used, is provided below:

- VI.A
  - VI.A.1- 7
  - VI.A.4- 5
- VI.B
  - VI.B.1- 2
  - VI.B.1(c)- 1
  - VI.B.1(d)- 3
  - VI.B.2- 3
  - VI.B.3- 3
  - VI.B.3(d)- 2
  - VI.B.4- 1
  - VI.B.7- 3
- VI.C

    - VI.C.1- 5
    - VI.C.2- 5
    - VI.C.8- 10
- VI.D
    - VI.D.1- 3
- VI.E
    - VI.E.3- 1
- VI.F
    - VI.F.4- 2

2.4.2. Use of Stipulation VII

CBP had 3,773 Undertakings that met Stipulation VII.A of the Southwest Border Programmatic Agreement and no Undertakings that met Stipulation VII.B.

3,759 Undertakings involved Law Enforcement Activities and Operational Readiness, including the pursuit of cross-border violators and response to credible threats. These pursuits were reported to DOI and USDA. There were no inadvertent discoveries during pursuits.

CBP developed new technologies to locate potential cross-border tunnels in 2016 resulting in 14 Undertakings that met Stipulation VII.A.2. The technology was designed to be non-invasive and minimize ground disturbance. These investigations were focused on high probability e areas in the various areas of interest for each Border Patrol Sector in Texas. Not all investigations resulted in CBP tunnel remediation projects. In some cases, the technology did not locate tunnels, while in other cases CBP was part of an inter-agency team and other agencies handled the remediation activities.

No activities involved the closure of cross-border tunnels.

2.4.3. Adverse Effects

CBP had no Adverse Effect determinations in the State of Texas.

2.4.4. Emergency Reviews

CBP had no emergency reviews in the State of Texas.

2.4.5. Post-Review Discoveries

CBP had no post review discoveries in the State of Texas.

Chapter 3. Disputes and Objections

There have been no disputes between the consulting parties regarding the Southwest Border Programmatic Agreement.

There have been no objections received by CBP regarding the execution of the Southwest Border Programmatic Agreement.

Chapter 4. Recommendations

There are no proposed amendments or revisions to the Southwest Border Programmatic Agreement.

Appendix A: Arizona Undertaking Details

10,697 Total Undertakings

- 10- PA Used- Stipulation VI
- 10,672- PA Used- Stipulation VII.A.1 (operations not included in summary table below)

- 2- No potential to cause effects per 36 CFR 800.3(a)(1)

CBP Project Title Consultation Information Project Description
AVDL Childs Mountain **Consultation Done** Install, operate, and maintain an aircraft video downlink (AVDL) system on an existing U.S. Customs and Border Patrol (CBP) tower at Childs Mountain in Pima County, Arizona, which includes obtaining a special use permit from Cabeza Prieta National Wildlife Refuge. The Proposed Action will occur at an existing communication tower facility on Childs Mountain in the Cabeza Prieta National Wildlife Refuge, Pima County, Arizona at the following coordinates: 12N 316313.788, 3591507.128 (decimal degrees: 32.445577, -112.954036).
AZ0006 Naco LPOE VACIS Concrete Slab **PA Used- VI.D.1** Removing approx. 2300 sq ft of existing A/C pavement and replacing it with 9" thick 4000 psi concrete over 6" thick ABC over 8" thick compacted subgrade. Also, installing two 4" PVC conduits 24" below grade for future use.
AZ0017 Rio Rico Rail Inspection Facility Lease **No potential to cause effects per 36 CFR 800.3(a)(1)** Lease of free space from Union Pacific for rail inspectors at 863 E. Frontage Rd. (UPRR Milepost 56.8) in Rio Rico, AZ. The 1250 square-foot facility in the Union Pacific Railyard was completed in 2016.
AZ0045/AZ14916 - Tucson Vault Maintenance Contract **PA Used- VI.B.1(c), VI.B.1(d), VI.B.2, VI.B.3(a), VI.B.3(d), VI.B.4, VI.B.7, and VI.B.8** Maintenance and repair of the 2012 facility, building, and mechanical systems.
AZ999AZ2027 TUS-036 LSTAR Deployment **PA Used- VI.C.8** Placement and operation of LSTAR equipment at the existing USBP facility located at TB/Fresnel Integrated Fixed Tower (IFT) (Latitude 31.48465, Longitude -111.37735) located in Pima County, Arizona within Coronado National Forest within the USBP Nogales Station, Tucson Sector Area of Responsibility (AOR). The new platform will not exceed 12' by 12' (length x width), the temporary platform will be a level surface elevated above the existing chain link fencing (approximately 8 ft.). Platforms will leave access to the earth's surface. No vegetation clearing or modification of ground resources is necessary for installation of the LSTAR equipment within the existing USBP complex. The Proposed Action does not include the installation, modification, or construction of any new or existing approach or access road.

CBP Project Title Consultation Information Project Description
AZ999AZ2028 TUS-041 LSTAR Deployment **PA Used- VI.C.8** Placement and operation of LSTAR equipment at the existing USBP facility located at Arivaca Lake Integrated Fixed Tower (IFT) (Latitude 31.525325, Longitude -111.289237) located in Pima County, Arizona on Arizona state lands within the USBP Nogales Station, Tucson Sector Area of Responsibility (AOR). The new platform will not exceed 12' by 12' (length x width), the temporary platform will be a level surface elevated above the existing chain link fencing (approximately 8 ft.). Platforms will leave access to the earth's surface. No vegetation clearing or modification of ground resources is necessary for installation of the LSTAR equipment within the existing USBP complex. The Proposed Action does not include the installation, modification, or construction of any new or existing approach or access road.
CA TEX TCA Tucson Air Branch [AZ0045] Ramp Apron Expansion **Consultation Done** Expand the existing concrete aircraft ramp apron by 13,650.94 square feet (0.31 acre) in a previously disturbed area immediately adjacent to the existing apron located south of hangar 1144.
CATEX BBT DRT EPT LRT TCA BPFTI Firing Range Maintenance and Lead Reclamation **Consultation Done** Perform maintenance and lead reclamation on active outdoor firing ranges. Work will including excavating the soil from the existing berms, sifting out the lead bullets and drum for recycling, then returning the soil to the berms. Erosion control measures will be added as necessary to minimize surface water flow off and erosion. The range included in this project is: • Ajo White Hills Range, Ajo, AZ
CATEX TCA AJO CAG Maintenance and Repair of Tohono O'odham Nation Roads **Consultation Done** The proposed action is to maintain and repair approximately 220 miles of existing dirt and crushed rock roads located on the Tohono O'odham Nation (TON). The road segments are in the Baboquivari, Hickiwan, Gu Vo, Pisinimo, Sells, and Chukut Kuk Districts. CBP will receive permission from the TON to conduct the maintenance and repair in the form of a written instrument or Tribal Resolution. Maintenance and repair of the existing roads would consist of filling in potholes, regrading road surfaces, implementing water drainage measures (e.g., ensuring road crowns shed water and establishing drainage ditches, culverts, or other water-control features, as needed to control runoff and prevent deterioration to existing infrastructure or surrounding land), applying soil stabilization agents, controlling vegetation and debris, and adding lost road surface material to reestablish intended surface elevation needed for adequate drainage.
CATEX TCA Christmas Pass AZ TACCOM LMR Temporary Repeater Installation **Consultation Done** Install and operate the temporary and semi-portable TACCOM Land Mobile Radio (LMR) site at Christmas Pass and minor maintenance and repair (M&R) of communications equipment and structures. The proposed Christmas Pass LMR site is located 60 miles west of Yuma in the Cabeza Prieta Mountains within the Cabeza Prieta Wilderness and Sonoran Desert in Yuma County, AZ. The site is situated near Christmas Pass and the Drift Hills approximately 7 miles north of the U.S./Mexico border and is currently undeveloped.

CBP Project Title Consultation Information Project Description
CATEX YUM Camp Grip AZ Tower Relocation TACCOM **PA Used- VI.F.6 and VI.F.7** Camp Grip is a remote U.S Customs and Border Patrol (CBP) site in Yuma County, Arizona, located 37 miles southwest of the Ajo Border Patrol Station (BPS) and within the Cabeza Prieta National Wildlife Refuge (CPNWR). CBP proposes to remove the existing cellular-on-wheels (COW) 106-foot tall guyed tower and equipment located northeast of the facility and install a self-support lattice tower/equipment on a modular foundation adjacent to the existing camp. The total height of the new tower, including lightning protection and other additions, will not exceed 199 feet. The proposed new tower and equipment will be installed within a 20 ft. by 20 ft. disturbed area with little to no existing vegetation. The foundation will consist of modular cell blocks (on top of the ground). A fiberglass shelter, generator, and 100 ft. tall self-support lattice tower equipped with several antennas and microwave dishes will be installed. The site will be contained within an area located east of the main modular building access road and just north of the existing El Camino del Diablo Trail. Equipment will be brought in by trailer and the adjacent existing right-of-way (road area) will be used for staging. A minimum number of vehicle trips to the site are planned.
CATEX YUM Camp Grip Well Installation **Consultation Done** The proposed action at forward operating base Camp Grip is to permit, drill, and install a domestic water supply well; design and install a water treatment system; and plumb the new well and system to the existing water holding tanks. The Camp Grip well design depth would be 400 feet below ground surface with drilling continuing depending on when groundwater is encountered up to 1400 feet below ground surface. The proposed location of the well is near the northeast corner of the helipad at Camp Grip in a previously disturbed area. Plumbing from the well would run underground along the south side of the east-west trending runway matting east of the helipad. The well plumbing would connect to a connex on the northeast corner of Camp Grip that currently houses the water storage tanks. A water treatment system would be installed inside the connex. Effluent would discharge to a dry well at least three feet deep. The dry well would be gravel filled with perforated pipe in a gravel lined trench plumbed from the water treatment system discharge component. Power would be brought to the well pump from an existing generator located west of the parking area via underground electrical conduit.
CATEX YUM WEL Temporary Deployment of Mobile Observation Platform **PA Used- VI.A.5** The proposed action involves the temporary deployment of a mobile observation platform on the Cabeza Prieta National Wildlife Refuge (CPNWR). The mobile observation platform does not require ground disturbance and will be deployed in a previously disturbed location adjacent to existing roads. The observation platform consists of a ladder and basic scaffolding— there are no lights, generators, or other mechanical or electrical components associated with the platform. No new roads will be required to deploy the platform, and operations will not change as a result of the temporary deployment. The platform is trailer mounted and will be driven to the sites utilizing existing roadways. The platform can be set-up and torn down in approximately one hour. The mobile observation platform will be temporarily deployed at the intersection of Eagle Tank Road and Old Papago Road—there is currently a rescue beacon at this location.

CBP Project Title Consultation Information Project Description
CATEX YUM Yuma Border Lighting Retrofit and Utility Trenching **Consultation Done** CBP is proposing to retrofit the existing metal halide lamps utilized for border lighting located near the San Luis POE in the Border Patrol Yuma Sector with energy efficient LED lights. The existing lights along approximately 7.2 miles of border would be replaced. The light poles would be reduced in height from 60 to 40 feet, the fixtures would be replaced to accommodate the LED bulbs, and the fixtures would be oriented downward to eliminate light pollution. Existing access roads to and along the border would be used for the transport of personnel, vehicles, material, and equipment. An existing staging area would be used for the storage of material and equipment. The proposed action also includes extending electrical service across the Sanchez Canal along the border by trenching approximately 75 feet from the current terminus of electrical service to the corridor of the lighting project and installing electrical conduit. The trenching would begin approximately 75 feet northwest of the Sanchez Canal and proceed southwest until reaching the canal, at which point the electrical conduit would be bracket mounted to the bridge to cross the canal. The pre-manufactured bridge was installed by CBP in 2007. A new junction box would also be installed on the south side of the bridge within the corridor of the lighting project at the end of the trench route. The trench would be approximately three feet wide by two feet deep, and would be backfilled around the electrical conduit with native material.
Douglas Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the Douglas Station.
Lukeville Single Family Housing Interior Repairs **PA Used- VI.B.1; VI.B.1(d)** Interior repair of three CBP-owned housing units in Lukeville, AZ. Proposed action work will include: • Repairs to the base concrete floor in order to allow for the installation of new laminate flooring throughout all areas of the house except the kitchen, bathroom, and laundry/furnace room flooring which will remain untouched. • Installing new residential master key lock system
Naco Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the Naco Station.
REC LEXRIS Lukeville **PA Used- VI.A.1** Field and operate two LEXRIS portals at the Lukeville Port of Entry (POE) in Pima County, Arizona for the purpose of conducting non-intrusive inspections of vehicles for the presence of contraband, including weapons of mass destruction, explosives, and illicit drugs. The systems will be portal (stationary) configurations that will be installed along existing traffic lanes. Vehicles will be scanned as they are driven through the portal. The portal LEXRIS will be installed on previously disturbed, developed surfaces (pavement and asphalt) at the Lukeville Facility. Minor excavations and trenching will be required to install the systems which will affect approximately 280 square feet to a maximum depth of 4 feet. Soils at the POE have been subject to grading and possibly filling to establish traffic lanes and other surfaces, such as inspection areas. Excavated soil will be used to backfill the project site.

CBP Project Title Consultation Information Project Description
San Luis POE Tunnels Team Deployment **No potential to cause effects per 36 CFR 800.3(a)(1)** Study to characterize the geophysical properties of the U.S./Mexico international border region in Yuma County to determine the potential locations of illegal tunnels.
San Luis Region of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the San Luis Station.
Sasabe Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within Sasabe Station.
TCA-SON-0115 and TCA-SON-0117 Proposed Maintenance, Upgrade, and Repair **PA Used- VI.E.3, VI.F.1, VI.F.2, VI.F.3** Maintenance and repair of existing communications towers at Sonoita Station [TCA-SON-0117] and Red Mountain [TCA-SON-0115] to include structural reinforcement and addition of grounding and lightning protection for both towers.
Tucson OCC Break Room Renovation **PA Used- VI.B.1(c)** Interior office space renovation. Proposed action work will include: • Adding a new counter and sink.
UAC and FAMU Temporary Housing (Tent City) **PA Used- VII.A.2** Construct soft-sided housing units at existing CBP facilities to provide safe and secure temporary housing for UACs and FAMUs. The facility will be located at: • San Luis II, Arizona
Yuma Polygraph Room Interior Renovation **Consultation Done** Interior office space renovations to new CBP polygraph room standards. Proposed action work will include: • Renovating two existing polygraph rooms by increasing the Sound Transmission Class (STC) and adding electronic security measures. • Dividing one office into two polygraph rooms and add insulation and electronic security measures. • Convert an existing office into a Dedicated Observation Room with A/V feed from the four polygraph rooms.

Appendix B: California Undertaking Details

5,210 Total Undertakings

- 11- PA Used- Stipulation VI
- 5,183- PA Used- Stipulation VII.A.1 (operations not included in summary table below)
- 8- PA Used- Stipulation VII.A.2
- 2- PA Used- Stipulation VII.B
- 1- Consultation Done
- 5- No potential to cause effects per 36 CFR 800.3(a)(1)

CBP Project Title Consultation Information Project Description
Algodones Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
CA El Centro Superstition Mtn LSTAR **PA Used- VI.C.8** Placement and operation of LSTAR equipment at the existing USBP facility located at Superstition Mountain located in Imperial County, California. The new platform will not exceed 12' by 12' (length x width), the temporary platform will be a level surface elevated above the existing chain link fencing (approximately 8 ft.). Platforms will leave access to the earth's surface. No vegetation clearing or modification of ground resources is necessary for installation of the LSTAR equipment within the existing USBP complex. The Proposed Action does not include the installation, modification, or construction of any new or existing approach or access road.
CA0004 CATEX Calexico West Rail Inspection Facility Lease **No potential to cause effects per 36 CFR 800.3(a)(1)** Lease of free space from Union Pacific for rail inspectors. The facility in the Union Pacific Railyard was completed in 2014.
CA0025 Oakland Seaport Lease Renewal **No potential to cause effects per 36 CFR 800.3(a)(1)** Renewal of free space lease from Port of Oakland. The facility is located on the Port and was completed in the 1990s.
CA0144 - Service Processing Center (SPC) Re-Activation, Haitian Surge **PA Used- VI.B.1(c) and VI.B.1(d)** Re-activation of the Service Processing Center (SPC) in El Centro, California as a processing facility for inadmissible Haitian nationals. The facility has been in off-line for approximately 2 years; with minimal systems (HVAC, electric, water) being maintained during this period. It is anticipated not all systems may function when brought back to full operation. CBP will be responsible for the startup of essential systems to include: HVAC, electric, water, fire, and other building services required for public use. No changes to the existing facilities will be required. An additional 30 computer workstations will be installed into the existing space.

CBP Project Title Consultation Information Project Description
CA0175 Checkpoint 86 LSTAR Deployment **PA Used- VI.C.8** Placement and operation of LSTAR equipment at the existing USBP facility located at the Highway 86 Checkpoint located in Imperial County, California. The new platform will not exceed 12' by 12' (length x width), the temporary platform will be a level surface elevated above the existing chain link fencing (approximately 8 ft.). Platforms will leave access to the earth's surface. No vegetation clearing or modification of ground resources is necessary for installation of the LSTAR equipment within the existing USBP complex. The Proposed Action does not include the installation, modification, or construction of any new or existing approach or access road.
Calexico Region Of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the Calexico Station.
Calexico West LPOE Rail Inspection Facility UP **No potential to cause effects per 36 CFR 800.3(a)(1)** Lease of free space from Union Pacific for rail inspectors. The facility in the Union Pacific Railyard was completed in 2015.
CATEX Riverside Air Unit Security Access Points Repairs **PA Used- VI.B.1(d) and VI.B.2** Interior office space renovation at Riverside Air Unit building at 1355 Customs Way in Riverside. Proposed action work will include: • Replace existing locks with new PIV card readers on six (6) doors. • Install computer system in existing server room.
CATEX SDC Brown Field BPS Property Acquisition **No potential to cause effects per 36 CFR 800.3(a)(1)** The proposed action consists of acquiring two adjacent properties at the intersection of Highway 94 and Campbell Ranch Road in Dulzura, California. The larger of the two properties is 118 acres and is situated north of the California Department of Forestry and Fire Protection (Cal Fire) Dulzura Station. The smaller of the two properties is one acre and is situated east of the Cal Fire Dulzura Station. A Phase I Environmental Site Assessment (ESA) as well as biological and cultural resource surveys are underway at the site. Elevation at the site ranges from 1,125 feet to 1,350 ft. Surrounding properties include cultivated fields of crops, grazing areas for livestock, private properties and homes. The portion of the property that is most suitable for potential construction consists of approximately 22 acres of relatively flat, previously cultivated fields and 96 acres of rolling hills, drainages and slopes. An intermittent stream is located at the extreme northwestern corner of the larger property. The primary rationale for the proposed acquisition is that the property is suitable for potential development and construction of a new US Border Patrol (USBP) Brown Field Border Patrol Station (BPS). However, if CBP is unable to eventually move forward with the BPS, CBP believes there are other potential uses for the property. CBP does not yet have sufficient funding to construct a new BPS. Thus, any actual development and construction of the site for a new BPS is contingent upon CBP obtaining sufficient funding.

CBP Project Title Consultation Information Project Description
CATEX SDC IMB NOLF Tower and Surveillance Camera Installation **PA Used- VI.F.6** Installation of a surveillance tower at a maximum of 60' above ground level and mount a camera to provide visibility to the coast line. The proposed action consists of reinstalling a structure at this location adjacent to existing CBP equipment. The tower would be installed within a maximum 20'x20' area enclosed with a new 10' high chain link fence at the southwest corner of the existing repel tower area.
CATEX SDC Replacement of Highway Sign Systems at I-5 Checkpoint **PA Used- VI.B.8** The San Clemente Border Patrol Station and Checkpoint (BPS) is located on Interstate 5 (I-5) approximately five miles south of San Clemente, California. The proposed action includes the replacement of six existing solid state highway signs along I-5 at the San Clemente BPS with six LED dynamic message signs. The sizes of the new signs would match the existing. No alterations would be made to the supporting metal structures on which the signs are posted. The metal structures are owned by Caltrans. In addition, the power systems would be replaced to provide sufficient power to run the new signs. Future maintenance, as well as potential repairs of a minor nature, of the new sign systems would be expected. All work would be conducted within the footprint of the existing sign systems.

CATEX SDC UESC ECMs for San Diego, El Cajon, San Ysidro, and Otay Sites
Consultation Done
 	
The U.S. Customs and Border Protection (CBP) has awarded the Utility Energy Savings Contract (UESC) to the San Diego Gas & Electric Company (SDG&E) for implementation of energy conservation measures (ECMs) at several San Diego County, CA sites.
• San Diego (SD) Firing Range (BE CA0250) is located at 2301 McCain Road, San Diego, CA 92101. The facility was built in the 1980s. Lat/Long 32.7298 -117.2089.
• El Cajon BPS (BE CA0172) is located at 225 Kenney Street, El Cajon, CA 92020. The oldest building was built in 1983. Lat/Long 32.8297 -116.9645.
• The Chula Vista BPS and Beyer Complex are located on one contiguous property but have different building designations. The oldest building was constructed in the 1950s and renovations have occurred over the years. Lat/Long 32.5608 -117.0529.
  o Chula Vista BPS also known as "San Ysidro" (BE CA0122) is located at 311 Athey Avenue, San Ysidro, CA 92173.
  o Beyer Complex also known as the Beyer Campus (BE CA0141) is located 3752 Beyer Boulevard, San Ysidro, CA 92173.
• Pogo Row Sector Support Facility also known as "Pogo Row Complex" or Border Patrol Sector Headquarters (BPSHQ) Support Facility (BE CA0186) is located at 7682 Pogo Road, San Diego/Otay, CA 92154. This facility was built in the 2000s and was previously used as the Brown Field Air Unit. Lat/Long 32.5777 -116.9797.
 	
Construction activities will include installation of digital direct controls (DDCs), heating, ventilating and air conditioning (HVAC) retrofits, HVAC controls, interior lighting, exterior lighting, vending misers (vending machine device/sensor), photovoltaics (solar electric), roofing, and other energy savings implementations. Post construction activities (performance testing, training, and final documentation) occurs April 2016 through June 2017.

El Centinela Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.

CBP Project Title Consultation Information Project Description
El Centro IA Temp Relocation **No potential to cause effects per 36 CFR 800.3(a)(1)** Temporary relocation of 20 staff members to the existing CBP building at 1111 North Imperial Avenue, El Centro, CA. No renovations to the space are necessary.
FY 16 MEMXRIS Calexico **PA Used- VI.A.1 and VI.C.8** Field and operate a MEMXRIS at the Calexico Port of Entry, Calexico, Imperial County, California for non-intrusive inspections (NIIs) of cargo containers. The MEMXRIS will be moved to any location within the landport suitable for conducting inspections, as required. In addition, the system will be operated on developed surfaces. This mobile system consists of a dual energy X-ray imaging platform mounted on a truck chassis and is optimized for roof-to-axle scanning of unoccupied vehicles in moving mode (system moves past stationary vehicles) or container-only scanning of trucks towing containers in stationary mode (trucks drive through the stationary system).
FY 16 MEMXRIS Carson **PA Used- VI.A.1 and VI.C.8** Field and operate a MEMXRIS at the Container Examination Station (CES), Carson, Los Angeles County, California for non-intrusive inspections (NIIs) of cargo containers. The MEMXRIS will be moved to any location within the landport suitable for conducting inspections, as required. In addition, the system will be operated on developed surfaces. This mobile system consists of a dual energy X-ray imaging platform mounted on a truck chassis and is optimized for roof-to-axle scanning of unoccupied vehicles in moving mode (system moves past stationary vehicles) or container-only scanning of trucks towing containers in stationary mode (trucks drive through the stationary system).
FY 16 MEMXRIS Oakland **PA Used- VI.A.1 and VI.C.8** Field and operate a MEMXRIS at the Container Examination Station (CES), Oakland, Oakland County, California for non-intrusive inspections (NIIs) of cargo containers. The MEMXRIS will be moved to any location within the landport suitable for conducting inspections, as required. In addition, the system will be operated on developed surfaces. This mobile system consists of a dual energy X-ray imaging platform mounted on a truck chassis and is optimized for roof-to-axle scanning of unoccupied vehicles in moving mode (system moves past stationary vehicles) or container-only scanning of trucks towing containers in stationary mode (trucks drive through the stationary system).
Near Rancho Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
REC ELC Queen II Tunnel Remediation **PA Used- VII.B.1** Closure of the Queen II tunnel located on the eastside of Calexico, California along the U.S.-Mexico international border in Imperial County, California.

CBP Project Title Consultation Information Project Description
REC LEXRIS CalexicoW **PA Used- VI.A.1** Field and operate LEXRIS portal at the Calexico West Port of Entry (POE) for the purpose of conducting non-intrusive inspections of vehicles for the presence of contraband, including weapons of mass destruction, explosives, and illicit drugs. The system will be portal (stationary) configurations that will be installed along existing traffic lanes. Vehicles will be scanned as they are driven through the portal. The portal LEXRIS will be installed on previously disturbed, developed surfaces (pavement and asphalt) at the facility. Minor excavations and trenching will be required to install the systems which will affect approximately 280 square feet to a maximum depth of 4 feet. Soils at the POE have been subject to grading and possibly filling to establish traffic lanes and other surfaces, such as inspection areas. Excavated soil will be used to backfill the project site.
REC SDC Customhouse Tunnel Remediation **PA Used- VII.B.1** Closure of the Customhouse tunnel located approximately 0.5 miles west of the Otay Mesa Port of Entry (POE) along the U.S.-Mexico international border in San Diego County, California.
Replacement of Door Locks with PIV Card Readers **PA Used- VI.B.1(d) and VI.B.2** Interior office space renovation at World Trade Center, Long Beach. Proposed action work will include: • Replace existing locks with new PIV card readers on six (6) doors. • Install computer system in existing server room.
San Diego and Tijuana Region of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the San Diego and Tijuana Stations.
Tecate Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the Tecate Station.
Tierra Del Sol Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
UAC and FAMU Temporary Housing (Tent City) **PA Used- VII.A.2** Construct soft-sided housing units at existing CBP facilities to provide safe and secure temporary housing for UACs and FAMUs. The facility will be located at: • Otay Mesa, California

- 2- No potential to cause effects per 36 CFR 800.3(a)(1)

CBP Project Title Consultation Information Project Description
Antelope Wells AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the Antelope Wells Station.
CATEX EPT Deming [BE: NM0150] Horse Stable Floor Repair **PA Used- VI.B.1** The proposed action is to resurface the floor of the existing horse stables at the Deming (DNM) Border Patrol Station (BPS). This involves the repair of the existing concrete floor by filing in chips and cracks and adding a new seal coat to the floor. The concrete slab will also be scarified to reduce the potential for animal slips when the concrete is wet.
CATEX EPT Lease Termination and Equipment Removal for Multiple TACCOM Sites in NM and TX **No potential to cause effects per 36 CFR 800.3(a)(1)** Termination of leases for decommissioned legacy sites where equipment has already been removed at the following locations: • San Antone Mtn (remote location on USDA lands near Vallecitos, NM) • Taos (space on USFS Carson National Forest tower and in existing shelter near Taos, NM) • Turkey Mountain (space on NM IT tower and in existing shelter near Watrous, NM) • Wheatland (space on NM IT tower and in existing shelter near Tucumcari, NM) • Mount Taylor (space on NM IT tower and in existing shelter near Cubero, NM) • La Mosca (space on NM IT tower and in existing shelter near Cubero, NM) • Elida Kenna (space on NM IT tower and in existing shelter near Santa Fe, NM) • Cornudas TX Land Only (remote location on private lands near Sonora, NM)
CATEX EPT Roof Replacement at Four Existing Checkpoints **PA Used- VI.B.3** Replace in-kind the roofs at four existing checkpoints located in the El Paso Sector. The project may also include the in-kind replacement of the associated rain gutter system to ensure the new roofs function properly. The old roofing material will be hauled away by the contractor and disposed of at an approved landfill or recycling facility. The checkpoints that will receive roof replacements are located in Texas and New Mexico and listed below: • I-10 Checkpoint [NM11387] – 1941 Square Feet • I-25 Checkpoint [NM0039] – 1956 Square Feet • HWY 62/180 Checkpoint [TX0471] – 2191 Square Feet • HWY 185 Checkpoint [NM11388] – 751 Square Feet

CBP Project Title Consultation Information Project Description
CATEX EPT STN BPS [NM0023] Repair Firing Range Floor **Consultation Done** The current firing range floor layout consists of concrete walkways that run parallel to the firing lines. In between the concrete walkways are large areas of compacted earth that have a thin layer of crushed gravel acting as a surface cap. The health hazards with having a soil base walking surface is that over time it will collect and trap lead dust and other byproducts of gunfire. This potential hazard has recently increased as a result of partially enclosing the outdoor firing range by installing walls along the exterior of the range which has decreased natural ventilation. In order to address this potential occupational health problem the portion of the range floor that is currently compacted earth will be excavated and replaced with concrete. The undertaking includes excavation and disposal of five inches of soil from the range complex walking surface and the placement of concrete slabs in the areas of soil removal. The concrete will be a 4 inch thick slab. The STN BPS is a modern facility constructed in the mid-1990s that is located at 1005 HWY 9 in Santa Teresa, New Mexico.
CATEX EPT STN BPS [NM0023] Replace Lighting System at the Small Arms Firing Range **PA Used- VI.B.3(d)** The proposed action includes the replacement and maintenance of the existing lighting system located at the existing Santa Teresa (STN) Border Patrol Station (BPS) Small Arms Firing Range. The range is located under a canopy within the fenced in STN BPS compound. The Santa Teresa (STN) Border Patrol Station (BPS) is a modern facility constructed in the mid-1990s that is located at 1005 HWY 9 in Santa Teresa, New Mexico.
CATEX EPT Water Treatment Installation at Six Existing Facilities **PA Used- VI.B.1(c)** Design, labor, equipment, and materials to install water filtration and treatment systems that consist of a particulate filtration system, UV treatment, disinfection system, and appropriately sized storage tank (as necessary) to maintain capacity. Work will include evaluation of the existing water supply infrastructure system at each location, development of a recommended filtration system, treatment system, and water storage system suitable for each location that is reliable and requires minimal maintenance and is easy to maintain. All work will occur on the interior of the facilities. The facilities currently have water storage tanks, if new water storage tanks are required they will be in-kind replacements. Water treatment systems will be installed at the following facilities: • FOB Bounds (Antelope Valley, NM) – NM0005 • FOB Garza (Animas Valley, NM) – NM5397 • FOB Ramsey (20 miles east of Columbus, NM) – NM0152 • HWY I-10 Checkpoint – NM11387 • HWY I-25 Checkpoint – NM0039 • HWY 185 Checkpoint – NM11388
CATEX Lease Termination and Equipment Removal for the Mount Kenna NM TACCOM Site **No potential to cause effects per 36 CFR 800.3(a)(1)** Termination of lease for decommissioned legacy site leased from the Transwestern Pipeline Company located near Kenna, Chaves County, NM where equipment has already been removed. CBP had space on an existing tower and shelter.

CBP Project Title Consultation Information Project Description
CATEX NASOC-Albuquerque Security Systems and Measures Repairs **PA Used- VI.B.1(d), VI.B.2, VI.B.3, and VI.F.4** Replace or install surveillance and security equipment on an existing building at the NASOC-Albuquerque compound at 2701 Kirtland Drive SE, Albuquerque, NM. The proposed project consists of the following actions: • Remove and replace the facility access control and intrusion detection system; • Remove and replace the building's perimeter windows; • Replace four sets of aluminum framed doors; and • Add 5 additional security cameras. No trenching or ground disturbance is anticipated.
Columbus AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the Columbus Station.
NM Playas Block 1 Transition to IFT Demonstration **PA Used- VI.C.8** Test project for up to two (2) months for a new surveillance technology program. Equipment will be mounted on an existing CBP tower. Support equipment consisting of 2 Conex boxes and a trailer, measuring 8'x 20' will be located at the base of the tower.
REC LEXRIS Santa Teresa **PA Used- VI.A.1** Field and operate LEXRIS portal at the Santa Teresa Port of Entry (POE) for the purpose of conducting non-intrusive inspections of vehicles for the presence of contraband, including weapons of mass destruction, explosives, and illicit drugs. The system will be portal (stationary) configurations that will be installed along existing traffic lanes. Vehicles will be scanned as they are driven through the portal. The portal LEXRIS will be installed on previously disturbed, developed surfaces (pavement and asphalt) at the facility. Minor excavations and trenching will be required to install the systems which will affect approximately 280 square feet to a maximum depth of 4 feet. Soils at the POE have been subject to grading and possibly filling to establish traffic lanes and other surfaces, such as inspection areas. Excavated soil will be used to backfill the project site.
Santa Teresa AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the Santa Teresa Station.
Sunland Park AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the Sunland Park Station.

Appendix D: Texas Undertaking Details

3,819 Total Undertakings

- 25- PA Used- Stipulation VI
- 3,759- PA Used- Stipulation VII.A.1 (operations not included in summary table below)
- 14- PA Used- Stipulation VII.A.2
- 0- PA Used- Stipulation VII.B
- 17- Consultation Done
- 4- No potential to cause effects per 36 CFR 800.3(a)(1)

CBP Project Title Consultation Information Project Description
Boldts Ranch Surveillance System, Webb County, Laredo West AoR, Laredo Sector, Texas **Consultation Done** Installation, operation, maintenance, repair, and eventual dismantlement and removal of surveillance systems on private property in Webb County. Each system is comprised of the following: • a 40' by 40' level pad for the mooring station; • a 20' by 7' gravel pad for the storage container; • a 20' by 7' pad for the helium trailer; • a 14' by 7' gravel pad for the operations trailer; • a portable tower that extends up to 107'; • a cleared footprint free from tress and vegetation with a 100' radius; • three 8' by 8' gravel pads for generators; • a 258' by 258', 3 strand barb wire fence with posts every 10'; and • a 12' wide standard cattle gate at the access point.
Brownsville AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
CATEX BBT DRT EPT LRT TCA BPFTI Firing Range Maintenance and Lead Reclamation **Consultation Done** Perform maintenance and lead reclamation on active outdoor firing ranges. Work will including excavating the soil from the existing berms, sifting out the lead bullets and drum for recycling, then returning the soil to the berms. Erosion control measures will be added as necessary to minimize surface water flow off and erosion. The ranges included in this project are: • Fabens Range, Fabens, TX • Marfa Range, Marfa, TX • Amistad Range, Del Rio, TX • Carrizo Springs Range, Carrizo Springs, TX • Freer Range, Freer, TX

CBP Project Title Consultation Information Project Description
CATEX BBT SBT [TX11607] Disposal of Former Sierra Blanca BPS **Consultation Done** Excessing real property formally utilized as Former Sierra Blanca Border Patrol Station (BPS near Sierra Blanca, Texas. CBP will be working with the General Services Administration (GSA) under the standard process to excess real Federal property. GSA will evaluate the buildings and facilitate the process for arranging for new Federal, state, or local government use of the facilities.
CATEX DRT Abilene TX New Lease and MR TACCOM **Consultation Done** New antenna lease at 2720 Industrial Boulevard, Abilene, Taylor County, TX 79605. The site includes space for an antenna at 200 to 270 ft. on a 279 ft. tall tower owned by Texas Department of Public Safety [TXDPS], built in 2012 (FCC # 1282187), space in the shelter, and associated equipment. . The Proposed Action includes obtaining a new lease and minor maintenance and repair (M&R) of communications equipment at the site. M&R will take place within the existing site footprint and where disturbances have already occurred. M&R activities associated with the Proposed Action may include: • Repair, maintenance, installation and/or replacement of telecommunications equipment and cable systems. • Minor repairs to structures, buildings, security fences, and portable shelters. • M&R of ancillary equipment such as heating, air conditioning, power systems and associated equipment, backup power generators, fuel storage, solar power panels, security monitoring systems, and facility grounding and lightning protection systems, and other equipment as needed. • Repairs to interior and exterior electrical systems. The Proposed Action would not increase or change the footprint of the existing site and there would be no new ground disturbance. The activities would not significantly increase the height or width of the structure(s). All equipment required for the Proposed Action can be accommodated using the existing road and parking area. No new construction or major site improvements are associated with the Proposed Action. Any replaced or retired equipment or material would be recycled or otherwise properly disposed.
CATEX DRT COM Disposal of Former COM BPS [TX0157] and Associated Facilities **Consultation Done** Excessing real property formally utilized as the old Comstock (COM) Border Patrol Station (BPS), old Comstock Checkpoint, and old Comstock Lake Task Force near Comstock, Texas. For owned assets, CBP will be working with the General Services Administration (GSA) under the standard process to excess real Federal property. GSA will evaluate the buildings and facilitate the process for arranging for new Federal, state, or local government use of the facilities. CBP will be returning leased assets to the original lessors. The old Comstock BPS consists of four parcels of land located along the southern side of U.S. 90 within the Comstock city limits. The old Border Patrol Checkpoint is located approximately four miles east of Comstock, Texas on the northern side of U.S. 90. The old Comstock Lake Task Force consists of a modern modular trailer located adjacent to Lake Amistad on a parcel of land owned by the National Park Service.

CBP Project Title Consultation Information Project Description
CATEX DRT/LRT Briscoe Ranch TX MOU, Antennas, and M&R TACCOM **Consultation Done** The Proposed Action includes adding an antenna similar to the existing antennas and minor maintenance and repair (M&R) of communications equipment. M&R will take place within the existing site footprint and where disturbances have already occurred. M&R activities associated with the Proposed Action may include: • Repair, maintenance, installation and/or replacement of telecommunications equipment and cable systems. • M&R of ancillary equipment such as heating, air conditioning, power systems and associated equipment, backup power generators, fuel storage, solar power panels, security monitoring systems, and facility grounding and lightning protection systems, and other equipment as needed. • Repairs to interior and exterior electrical systems.
CATEX EPT El Paso Air Branch Security System Repairs **PA Used- VI.B.1(d) and VI.B.2** Make repairs to the existing security systems at the El Paso Air Branch facilities, located at 1740 American Way, El Paso, TX 79925; 7301 Boeing Drive, El Paso, TX 79925; and 6812 Northrop Drive, El Paso, TX 79925. In order to meet security standards, CBP proposes to replace or install surveillance and security equipment at three existing facilities. The proposed project consists of the following actions: • Repair or replace the access control system, the video surveillance system, and the intrusion detection system at these three facilities; and • Replace the glazing in the windows of the Northrop facility. No trenching or ground disturbance is anticipated.
CATEX EPT EPS [BE: TX0241] Parking Lot Resurfacing **PA Used- VI.D.1** Resurface and restripe the 372,230 square foot parking lot for the El Paso Border Patrol Station. Included in the proposed action is an inspection of the existing parking lot condition, removal of surface debris (i.e. rocks, dirt, and trash) on the existing parking surface, repairing cracks, resurfacing the parking lot with a sealcoating, and restriping the parking lot.
CATEX EPT EPS Riverside Air Unit HVAC and Ceiling Upgrades **PA Used- VI.B.1, VI.B.1(c), VI.B.3, and VI.B.4** Replace an aging and ineffective heating, ventilation and air conditioning (HVAC) system at the El Paso Air Unit Riverside facility at 6812 Northrop Drive, El Paso, TX.. The proposed project consists of the following actions: • Installation of a new split (indoor/outdoor) HVAC system with associated electrical interconnections, condensate pump and piping, and ceiling/roof repairs around replacement vents.
CATEX EPT Lease Termination and Equipment Removal for Multiple TACCOM Sites in NM and TX **No potential to cause effects per 36 CFR 800.3(a)(1)** Termination of leases for decommissioned legacy sites where equipment has already been removed at the following locations: • FAA Mount Franklin (space on FAA tower and in existing shelter near El Paso, TX) • Ranger Peak II (space on Crown Castle tower and in existing shelter near El Paso, TX) • Comanche Peak I (space on Sinclair Broadcast tower and in existing shelter near El Paso, TX) • Comanche Peak II (space on rooftop near El Paso, TX)

CBP Project Title Consultation Information Project Description
CATEX EPT Sector HQ [BE: TX0180] Building A Parking Lot Resurfacing **PA Used- VI.D.1** Resurface and restripe the 21,318 square foot parking lot for Building A at the El Paso Sector (EPT) Headquarters Facility. Included in the proposed action is an inspection of the existing parking lot condition, removal of surface debris (i.e. rocks, dirt, and trash) on the existing parking surface, repairing cracks, resurfacing the parking lot with a sealcoating, and restriping the parking lot.
CATEX EPT Sector HQ [BE: TX0180] Upgrade Internal Duress Alarm **PA Used- VI.B.1(d)** Repair/upgrade the existing internal duress alarm located in the El Paso Sector (EPT) Headquarters facility. Upgrades will occur in the lobby and other key friction points within the HQ complex. The upgrades will bring the facility into compliance with current Internal Affairs standards.
CATEX EPT SOG HQ [BE: TX11610] Exterior Painting **PA Used- VI.B.3** Repair and repaint the exterior facades of two modern modular structures located at the El Paso Sector (EPT) Special Operations Group (SOG) Headquarters (HQ) on Fort Bliss. The SOG HQ is located at the corner of SSG Sims and Duncan Street on Biggs Army Airfield, Ft. Bliss, TX 79916. The modular facilities were installed in 2003. Proposed work includes preparing and painting the exterior of the existing facilities (i.e. Buildings 11163 and P1163).
CATEX EPT YST [BE: TX0183] Force Protection Upgrade **PA Used- VI.B.1(d), VI.B.2, and VI.B.3(d)** Upgrade the existing force protection in the lobby of the existing Ysleta (YST) Border Patrol Station (BPS). The proposed action includes the following; • Replacing current interior walls of the lobby with Class Level III ballistic resistant fiber glass paneling • The glass pane doors with ballistic rate teller window with two way audio and a drawer for hand to hand transaction • Installing a CCTV with view of the parking area & reception area • Adding under the counter duress for the receptionist to signal the station personnel of incoming threats • Install a level III ballistic rated door with the proper electronic control access entrance technology The building was constructed in 1993 and is located at 12245 Pine Springs Drive, El Paso, TX 79936.
CATEX EPT YST HWY 62-180 Checkpoint [TX0471] Install Water Well **Consultation Done** Provide a new water well and appropriately-sized pump with necessary filtering equipment to feed an existing 2600 gallon storage tank on site at the HWY 62-180 Checkpoint.

CBP Project Title Consultation Information Project Description
CATEX LRT Fairfield SW150 TX Lease Renewal and MR TACCOM **Consultation Done** Fairfield SW150 is located at 127 State Highway 75 South, Fairfield, Freestone County, TX 75830. The site includes rented space for an antenna on a 500 ft. tall guyed commercial tower (Huffman Communications, FCC # 1053780, built in 1981), space in shelter for equipment, and associated equipment. The Proposed Action includes renewing the site lease and minor maintenance and repair (M&R) of communications equipment at the site. M&R will take place within the existing site footprint and where disturbances have already occurred. Road access and parking area is available and not maintained by CBP. M&R activities associated with the Proposed Action may include: • Repair, maintenance, installation and/or replacement of telecommunications equipment and cable systems. • Minor repairs to structures and/or buildings where equipment is located. • M&R of ancillary equipment such as heating, air conditioning, power systems and associated equipment, backup power generators, fuel storage, solar power panels, security monitoring systems, and facility grounding and lightning protection systems, and other equipment as needed. • Repairs to interior and exterior electrical systems. The Proposed Action would not increase or change the footprint of the existing site and there would be no new ground disturbance. The activities would not significantly increase the height or width of the structure. All equipment required for the Proposed Action can be accommodated using existing roads and parking area.
CATEX RGV RGC BPS TX TACCOM Tower Antenna Space Outlease **No potential to cause effects per 36 CFR 800.3(a)(1)** Outleasing antenna space at the Rio Grande City (RGC) Border Patrol Station (BPS) at 730 Border Patrol Lane, Rio Grande City, Starr County, TX. The site consists of a CBP-owned 250 ft. tall self-support lattice tower, shelters, and associated equipment. CBP intends to grant an outlease to the U.S. Department of Agriculture (USDA) Tick Riders for antenna space at 147 ft. height on the tower and equipment space within the existing shelter. A structural analysis has been performed for the tower and proposed additions. The USDA will install equipment on the tower and will place batteries, electrical wiring, and other equipment as needed within the existing shelter.
CATEX RGV TACCOM – Riviera #2 TX Site Lease and M&R **Consultation Done** Renew site leases and minor maintenance and repair (M&R) of communications equipment and structures at the Riviera #2 site, located at E. County Road (CR) 2335 (northeast of the intersection of E. CR 2335 and South CR 1070), Riviera, Kleberg County, TX
CATEX RGV TACCOM – Roma Repeater TX Site Lease and M&R **Consultation Done** Renew site leases and minor maintenance and repair (M&R) of communications equipment and structures at the Roma Repeater site located off N. Estrella Street, (approximately 200 feet northwest of the intersection of Woodland Circle and N. Estrella Street), Roma, Starr County, TX.
Cienegas Creek AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.

CBP Project Title Consultation Information Project Description
Ciudad Juarez Region of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
Cowboy Ranch Surveillance System, Zapata Station, Laredo Sector **Consultation Done** Installation, operation, maintenance, repair, and eventual dismantlement and removal of surveillance systems on private property in Zapata County. Each system is comprised of the following: • a 40' by 40' level pad for the mooring station; • a 20' by 7' gravel pad for the storage container; • a 20' by 7' pad for the helium trailer; • a 14' by 7' gravel pad for the operations trailer; • a portable tower that extends up to 107'; • a cleared footprint free from tress and vegetation with a 100' radius; • three 8' by 8' gravel pads for generators; • a 258' by 258', 3 strand barb wire fence with posts every 10'; and • a 12' wide standard cattle gate at the access point.
Del Rio Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
Eagle Pass AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
El Paso MEMXRIS **PA Used- VI.A.1 and VI.C.8** Field and operate a MEMXRIS at the El Paso Port of Entry, El Paso, El Paso County, Texas for non-intrusive inspections (NIIs) of cargo containers. The MEMXRIS will be moved to any location within the landport suitable for conducting inspections, as required. In addition, the system will be operated on developed surfaces. This mobile system consists of a dual energy X-ray imaging platform mounted on a truck chassis and is optimized for roof-to-axle scanning of unoccupied vehicles in moving mode (system moves past stationary vehicles) or container-only scanning of trucks towing containers in stationary mode (trucks drive through the stationary system).

CBP Project Title Consultation Information Project Description
Encinitos Aerostat to Valley View, USBP Weslaco AoR, RGV Sector **Consultation Done** Installation, operation, maintenance, repair, and eventual dismantlement and removal of surveillance systems from the existing Encinitos site to the existing Valley View site in Hidalgo County. Each system is comprised of the following: • a 40' by 40' level pad for the mooring station; • a 20' by 7' gravel pad for the storage container; • a 20' by 7' pad for the helium trailer; • a 14' by 7' gravel pad for the operations trailer; • a portable tower that extends up to 107'; • a cleared footprint free from tress and vegetation with a 100' radius; • three 8' by 8' gravel pads for generators; • a 258' by 258', 3 strand barb wire fence with posts every 10'; and • a 12' wide standard cattle gate at the access point.
Ft. Brown Surveillance System Sites, Ft. Brown AoR, USBP RGV Sector **Consultation Done** Installation, operation, maintenance, repair, and eventual dismantlement and removal of surveillance systems at nine locations on private property in the Laredo West and Zapata Station areas of responsibility. Each system is comprised of the following: • a 7' by 7' gravel pad for the operations trailer; • a 40' by 40' level pad for the mooring station; • three concrete barriers to be used as anchors; • a portable tower that extends up to 107'; and • a cleared footprint free from tress and vegetation with a 100' radius.
FY 16 MEMXRIS Eagle Pass **PA Used- VI.A.1 and VI.C.8** Field and operate a MEMXRIS at the Eagle Pass Port of Entry, Eagle Pass, Maverick County, Texas for non-intrusive inspections (NIIs) of cargo containers. The MEMXRIS will be moved to any location within the landport suitable for conducting inspections, as required. In addition, the system will be operated on developed surfaces. This mobile system consists of a dual energy X-ray imaging platform mounted on a truck chassis and is optimized for roof-to-axle scanning of unoccupied vehicles in moving mode (system moves past stationary vehicles) or container-only scanning of trucks towing containers in stationary mode (trucks drive through the stationary system).
FY 16 MEMXRIS El Paso **PA Used- VI.A.1 and VI.C.8** Field and operate a MEMXRIS at the El Paso Port of Entry, El Paso, El Paso County, Texas for non-intrusive inspections (NIIs) of cargo containers. The MEMXRIS will be moved to any location within the landport suitable for conducting inspections, as required. In addition, the system will be operated on developed surfaces. This mobile system consists of a dual energy X-ray imaging platform mounted on a truck chassis and is optimized for roof-to-axle scanning of unoccupied vehicles in moving mode (system moves past stationary vehicles) or container-only scanning of trucks towing containers in stationary mode (trucks drive through the stationary system).
Hidalgo AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.

CBP Project Title Consultation Information Project Description
Houston Airport MEMXRIS **PA Used- VI.A.1 and VI.C.8** Field and operate a MEMXRIS at the Houston Airport, Houston, Harris County, Texas for non-intrusive inspections (NIIs) of cargo containers. The MEMXRIS will be moved to any location within the landport suitable for conducting inspections, as required. In addition, the system will be operated on developed surfaces. This mobile system consists of a dual energy X-ray imaging platform mounted on a truck chassis and is optimized for roof-to-axle scanning of unoccupied vehicles in moving mode (system moves past stationary vehicles) or container-only scanning of trucks towing containers in stationary mode (trucks drive through the stationary system).
La Casita Surveillance System, Rio Grande City Station, RGV Sector **Consultation Done** Installation, operation, maintenance, repair, and eventual dismantlement and removal of surveillance systems on private property in Starr County. Each system is comprised of the following: • a 40' by 40' level pad for the mooring station; • a 20' by 7' gravel pad for the storage container; • a 20' by 7' pad for the helium trailer; • a 14' by 7' gravel pad for the operations trailer; • a portable tower that extends up to 107'; • a cleared footprint free from tress and vegetation with a 100' radius; • three 8' by 8' gravel pads for generators; • a 258' by 258', 3 strand barb wire fence with posts every 10'; and • a 12' wide standard cattle gate at the access point.
Laredo AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
Laredo MEMXRIS **PA Used- VI.A.1 and VI.C.8** Field and operate a MEMXRIS at the Laredo Port of Entry, Laredo, Webb County, Texas for non-intrusive inspections (NIIs) of cargo containers. The MEMXRIS will be moved to any location within the landport suitable for conducting inspections, as required. In addition, the system will be operated on developed surfaces. This mobile system consists of a dual energy X-ray imaging platform mounted on a truck chassis and is optimized for roof-to-axle scanning of unoccupied vehicles in moving mode (system moves past stationary vehicles) or container-only scanning of trucks towing containers in stationary mode (trucks drive through the stationary system).
LEXRIS Portals for Hidalgo and Pharr **PA Used- VI.A.1** Field and operate two LEXRIS portals at the Hidalgo and Pharr Ports of Entry (POE) in Texas for the purpose of conducting non-intrusive inspections of vehicles for the presence of contraband, including weapons of mass destruction, explosives, and illicit drugs. The systems will be portal (stationary) configurations that will be installed along existing traffic lanes. Vehicles will be scanned as they are driven through the portal. The portal LEXRIS will be installed on previously disturbed, developed surfaces (pavement and asphalt) at the Hidalgo and Pharr Facilities. Minor excavations and trenching will be required to install the systems which will affect approximately 280 square feet to a maximum depth of 4 feet. Soils at the POE have been subject to grading and possibly filling to establish traffic lanes and other surfaces, such as inspection areas. Excavated soil will be used to backfill the project site.

CBP Project Title Consultation Information Project Description
Nine Surveillance Systems, Laredo West and Zapata Stations Area of Responsibility **Consultation Done** Installation, operation, maintenance, repair, and eventual dismantlement and removal of surveillance systems at nine locations on private property in the Laredo West and Zapata Station areas of responsibility. Each system is comprised of the following: • a 40' by 40' level pad for the mooring station; • a 20' by 7' gravel pad for the storage container; • a 20' by 7' pad for the helium trailer; • a 14' by 7' gravel pad for the operations trailer; • a portable tower that extends up to 107'; • a cleared footprint free from tress and vegetation with a 100' radius; • three 8' by 8' gravel pads for generators; • a 258' by 258', 3 strand barb wire fence with posts every 10'; and • a 12' wide standard cattle gate at the access point.
Pharr AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
Presidio AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
Presidio Housing Maintenance, Repair, and Site Improvement **PA Used- VI.B.1, VI.B.2, VI.B.3, VI.B.3(d), and VI.D.1** Maintenance, repair, and site improvement activities at the Presidio, Texas Housing Complex. Work will include: • Provide new exterior paint on mobile homes. Paint siding, soffits, trim window sills and doors. • Remove shutters from existing windows and replace with matching wood trim around all four sides of each window. This effort will extended life of the exterior siding • Install new exterior motion detector security lighting on mobile homes for security purposes. • Repair existing horizontal slide vehicle security gate located at entrance to the 700/800 housing for security purposes. • Install landscape island features throughout the front and back yard areas of housing. This effort will improve tenant security and promote a sense of family community. The work shall be performed at the CBP housing units located on Bunton Street. • Replace the existing deteriorating carpet with new vinyl flooring at the mobile housing units in the McKeel housing area. • Installation of new barrier fencing and landscaping to limited areas in the CBP 700/800 housing area to improve security and enhance the appearance of the area. • Repair and restore walk paths. Under this task, the Contractor shall replace any missing aggregate to establish a uniform depth of aggregate throughout entire walk path. Install new concrete sidewalks and steps where deteriorated beyond repair. • Install exterior window screens on 700/800 series homes to replace ones with holes and are falling apart. • Replace existing lighting fixtures past their useful life span with new ones in housing units. • Install new appliances.

CBP Project Title Consultation Information Project Description
REC LEXRIS Del Rio **PA Used- VI.A.1** Field and operate two LEXRIS portals at the Del Rio Port of Entry (POE) in Val Verde County, Texas for the purpose of conducting non-intrusive inspections of vehicles for the presence of contraband, including weapons of mass destruction, explosives, and illicit drugs. The systems will be portal (stationary) configurations that will be installed along existing traffic lanes. Vehicles will be scanned as they are driven through the portal. The portal LEXRIS will be installed on previously disturbed, developed surfaces (pavement and asphalt) at the Del Rio Facility. Minor excavations and trenching will be required to install the systems which will affect approximately 280 square feet to a maximum depth of 4 feet. Soils at the POE have been subject to grading and possibly filling to establish traffic lanes and other surfaces, such as inspection areas. Excavated soil will be used to backfill the project site.
Relampago Surveillance System, Weslaco Station, Rio Grande Valley Sector **Consultation Done** Installation, operation, maintenance, repair, and eventual dismantlement and removal of surveillance systems on private property near Mercedes, Texas. Each system is comprised of the following: • a 40' by 40' level pad for the mooring station; • a 20' by 7' gravel pad for the storage container; • a 20' by 7' pad for the helium trailer; • a 14' by 7' gravel pad for the operations trailer; • a portable tower that extends up to 107'; • a cleared footprint free from tress and vegetation with a 100' radius; • three 8' by 8' gravel pads for generators; • a 258' by 258', 3 strand barb wire fence with posts every 10'; and • a 12' wide standard cattle gate at the access point.
Relocatable Surveillance System Alternate Sites USBP Laredo West Station Laredo Sector **PA Used- VI.A.4, VI.C.1, VI.C.2, VI.C.8** Installation, operation, maintenance, repair; dismantlement, removal, and relocation of supporting infrastructure for Surveillance System deployment (RAID towers) to four previously established sites located in Webb County. • Boldt RAID Tower Site (28.050363 -99.560192) • Trevino RAID Tower Site (27.86115 -99.89055) • LRW Station (27.7068 -99.7283) • TXDOT Site (27.7084 -99.7283)
Relocation and Redeployment of RAID Aerostat from Valley View to Refugio, USBP, Rio Grande City Station, Rio Grande Valley Sector **PA Used- VI.A.4, VI.C.1, VI.C.2, VI.C.8** Dismantlement and removal of surveillance systems on private property in Valley View Texas to and relocation to an existing site in the Lower Rio Grande Valley National Wildlife Refuge managed by USFWS. Maintenance of existing access road to Refugio site on USFWS lands. Work includes grading the existing road, reestablishing the road crown for proper drainage where required, and the addition and compaction of caliche or other flexible road base as needed. Areas adjacent to the road may also have vegetation control to establish a 3' buffer and 15' canopy height clearance to ensure visibility and maintain safe conditions.
Rio Grande City AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.

CBP Project Title Consultation Information Project Description
Roma AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
San Isidro AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
San Pedro Surveillance System, USBP Weslaco Station, Rio Grande Valley Sector **Consultation Done** Installation, operation, maintenance, repair, and eventual dismantlement and removal of surveillance systems on private property in Hidalgo County. Each system is comprised of the following: • a 40' by 40' level pad for the mooring station; • a 20' by 7' gravel pad for the storage container; • a 20' by 7' pad for the helium trailer; • a 14' by 7' gravel pad for the operations trailer; • a portable tower that extends up to 107'; • a cleared footprint free from tress and vegetation with a 100' radius; • three 8' by 8' gravel pads for generators; • a 258' by 258', 3 strand barb wire fence with posts every 10'; and • a 12' wide standard cattle gate at the access point.
Santa Cruz Surveillance System RAID Tower, Rio Grande City Station, Rio Grande Valley Sector **PA Used- VI.A.4, VI.C.1, VI.C.2, VI.C.8** Installation, operation, maintenance, repair, and eventual dismantlement and removal of surveillance systems on an existing site in the Lower Rio Grande Valley National Wildlife Refuge managed by USFWS. Maintenance of existing access road to Santa Cruz site on USFWS lands. Work includes grading the existing road, reestablishing the road crown for proper drainage where required, and the addition and compaction of caliche or other flexible road base as needed. Areas adjacent to the road may also have vegetation control to establish a 3' buffer and 15' canopy height clearance to ensure visibility and maintain safe conditions.
Sauzal AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
TX RVSS Relocatable Towers McAllen Sector **PA Used- VI.A.4, VI.C.1, VI.C.2, VI.C.8** Installation, operation, maintenance, repair, and eventual dismantlement and removal of mobile RVSS towers on 6 sites, 5 alternate sites, and 3 relay sites in McAllen vSector. Equipment is rotated between sites based on operational needs. Each system is comprised of the following: • a portable tower that extends up to 107'; • a cleared footprint free from tress and vegetation with a 100' radius; • three 8' by 8' gravel pads for generators; • a 258' by 258', 3 strand barb wire fence with posts every 10'; and • a 12' wide standard cattle gate at the access point.

CBP Project Title Consultation Information Project Description
TX RVSS Relocatable Towers, Laredo Sector **PA Used- VI.A.4, VI.C.1, VI.C.2, VI.C.8** Installation, operation, maintenance, repair, and eventual dismantlement and removal of mobile RVSS towers on 6 sites, 5 alternate sites, and 3 relay sites in Laredo Sector. Equipment is rotated between sites based on operational needs. Each system is comprised of the following: • a portable tower that extends up to 107'; • a cleared footprint free from tress and vegetation with a 100' radius; • three 8' by 8' gravel pads for generators; • a 258' by 258', 3 strand barb wire fence with posts every 10'; and • a 12' wide standard cattle gate at the access point.
TX0029 Paso Del Norte Ready Lanes **PA Used- VI.B.7** Installation of vehicle pipe gates, lane delineators, flexible bollards, and directional signage to segregate Ready Lanes from regular travel lanes.
TX0030 Bridge of the Americas El Paso Ready Lanes **PA Used- VI.B.7** Installation of vehicle pipe gates, lane delineators, flexible bollards, and directional signage to segregate Ready Lanes from regular travel lanes.
TX0031 Ysleta Ready Lanes **PA Used- VI.B.7** Installation of vehicle pipe gates, lane delineators, flexible bollards, and directional signage to segregate Ready Lanes from regular travel lanes.
TX0040 Freeport Port Lease Renewal **No potential to cause effects per 36 CFR 800.3(a)(1)** Renewal of free space lease from Port of Freeport. The facility is located on the Port and was completed in the 2013.
TX0087TX15339 LPOE Ft Hancock Canopy LSTAR Deployment **PA Used- VI.F.4** Test project for a new surveillance program. Equipment will be mounted on an existing CBP building at the Ft. Hancock LPOE.
TX0401 CatEx El Paso Rail Inspection Facility Lease **No potential to cause effects per 36 CFR 800.3(a)(1)** Free space lease of a 1,664 sq ft building located within the Union Pacific railyard. No renovations to the space are necessary.
TX0457 CatEx Brownsville Seaport Office Lease **No potential to cause effects per 36 CFR 800.3(a)(1)** Renewal of a free space lease of 681 sq ft of office space located within the Harbor Master's Building. The building was constructed in 1996. No renovations to the space are necessary.
TX0531TX0729 LPOE Tornillo K-9 LSTAR Deployment **PA Used- VI.F.4** Test project for a new surveillance program. Equipment will be mounted on an existing CBP building at the Tornillo LPOE.

CBP Project Title Consultation Information Project Description
UAC and FAMU Temporary Housing (Tent City) **PA Used- VII.A.2** Construct soft-sided housing units at existing CBP facilities to provide safe and secure temporary housing for UACs and FAMUs. The facilities will be located at: • Tornillo, Texas; and • Donna, Texas

Hi Jim

Wanted to talk with you about this incoming letter and our response. As we understand it now, the Department (Brent?? vice Jon Andrews) also received it. So likely a Departmental response.

Let me know when we can discuss.

Thanks

Cynthia

(b) (6)(b) (6)(b) (6)(b) (6)
(b) (6)(b) (6)(b) (6)

AUG 25 2017

U.S. Customs and Border Protection

Mr. Robert Jess
United States Fish and Wildlife Service
Lower Rio Grande Valley National Wildlife Refuge
3325 Green Jay Road
Alamo, TX 78516

Dear Mr. Jess:

U.S. Customs and Border Protection (CBP) is in the initial stages of planning for proposed levee wall along 28 miles of existing levee located in Hidalgo County, Texas within the U.S. Border Patrol's McAllen and Weslaco stations area of responsibility (AOR) and 32 miles of bollard wall in Starr County, Texas within the U.S. Border Patrol's Rio Grande City station AOR. In addition, CBP is in the planning stages of its second phase of gate installation to close 35 gaps in existing border fence in Hidalgo and Cameron counties. The 35 gates were funded in CBP's fiscal year (FY) 2017 appropriation, while the proposed 28 miles of levee wall and 32 miles of bollard wall are included in the President's FY18 budget request to Congress.

In Hidalgo County, CBP is proposing 28 miles of levee wall. The proposed levee wall alignment will be on the south face of the northern U.S. International Boundary Water Commission (IBWC) levee. The proposed design includes construction of a reinforced concrete levee wall to the height of the existing levee with 18-foot tall steel bollards installed on the top of the levee wall, a possible 150-foot enforcement zone on the south/river side of the levee wall, detection technology, enforcement zone lighting, video surveillance, automated vehicle gates, pedestrian gates, and an all-weather patrol road parallel to the levee wall. In addition, CBP will install gates within 20 gaps in existing border levee wall within Hidalgo County and in 15 existing gaps within Cameron County.

In Starr County, CBP is proposing 32 miles of bollard wall. The proposed design includes construction of 20 to 30-foot tall steel bollards, a possible 150-foot enforcement zone on the south/river side of the bollard wall, detection technology, enforcement zone lighting, video surveillance, and an all-weather patrol road parallel to the bollard wall.

Additional details of the possible components of the proposed action are as follows:

- **Levee Wall** -The levee wall will be a concrete wall to the height of the levee crest with 18 foot tall bollards installed in the top of the levee wall.
- **Bollard Wall** – The bollard wall will be 20 to 30 feet high utilizing 8-inch diameter, concrete filled steel bollards.
- **150 Foot Enforcement Zone** – The enforcement zone will be an area extending from the south/river side of the levee wall or bollard wall approximately 150 feet. All vegetation within the 150-foot enforcement zone will be cleared.
- **Gates** - Automated vehicle gates will be installed with a minimum height of 18 feet and minimum width of 20 feet. In addition, gates designed to allow for farming equipment will be installed where appropriate and range in width from 40 to 50 feet. All gates will be motorized overhead sliding gates with an enclosed drive and operator system.

- **Lighting** - LED lighting will be installed as part of this project. CBP will work with the appropriate stakeholders to develop solutions to avoid excess lighting beyond the enforcement zone.
- **All Weather Road** - An all-weather aggregate patrol road (type FC-2) will be constructed on the south side and parallel to the levee or bollard wall and within the 150-foot enforcement zone. The specific location of the road within the enforcement zone will be determined during the design phase of the project.
- **Cameras** - A camera surveillance system will be installed to ensure visibility of the enforcement zone and southern approach.

The purpose of the proposed action is to increase CBP's ability to impede or deny illegal border crossings, and to provide improved surveillance and detection capabilities to the areas of greatest risk of illegal cross-border activity located within the US. Border Patrol Rio Grande Valley Sector. The proposed action will be similar to other levee and border wall systems located within the Rio Grande Valley Sector. The proposed action will also support CBPs action under Executive Order (EO) 13767, where CBP is directed to "...secure the southern border of the United States through the immediate construction of a physical wall on the southern border, monitored and supported by adequate personnel so as to prevent illegal immigration, drug and human trafficking, and acts of terrorism."

CBP will evaluate the potential environmental impacts associated with the proposed action. CBP is gathering data and input from state and local government agencies, federal agencies, and Native American Tribes that may be affected by or otherwise have an interest in the proposed actions. Since your agency or organization may have particular knowledge and expertise regarding the potential environmental impacts from CBP's proposed action, your input is sought regarding the likely or anticipated effects to biological, cultural, and natural resources from the implementation of the proposed actions. Your response should include any state and local restrictions, permitting or other requirements with which CBP should consider during project siting, construction, and operation.

This letter is intended to provide initial information for CBP's proposed projects in the Rio Grande Valley and seek comments and concerns from potentially affected parties and interested groups. CBP intends similar outreach in other border regions as projects are identified and defined. Your prompt attention to this request is appreciated. Comments and information will be accepted up to 30 days following the date of this letter. If you have any questions or comments please contact me at commentsenv@cbp.dhs.gov. Please include "RGV Wall and Gates Construction" in the title of your email. Thank you for your cooperation.

Sincerely,

being prepared to talk about this effort. I am copying Barbara here as well as my colleague Linda Walker, who is acting Chief of the National Wildlife Refuge System for Cynthia today.

Here is some material from FWS that I think will be helpful to the effort:

- There are 164 miles of U.S Fish & Wildlife Service lands and 10 National Wildlife Refuges directly on the Southwest border.
- Currently 19 Federal Wildlife Officers (FWOs) patrol over 1.9 million acres of National Wildlife Refuges on the Southwest border.

U.S. Customs and Border Protection, for example, operates a sub-station at Cabeza Prieta National Wildlife Refuge in Arizona, and the Service's law enforcement officers have a seamless relationship built over several decades of partnership and working together.

Here's a note we received yesterday from OCO.

"As the Department of Homeland Security, U.S. Border Patrol, and the Department of Interior's Office of Law Enforcement and Security, continue to foster an already strong relationship, both agencies have initiated an effort to coordinate field deployment operations, which will increase situational awareness in a shared capacity within Department of Interior public lands that abut the

international border with Mexico. As Directed by Department of Interior Secretary Ryan Zinke, additional DOI Law Enforcement Officers will be deployed to southwest border public lands in an enhanced posture to support the President's directive for increased enforcement operations along the southwest border, while the border wall is being constructed. These Department of Interior Law Enforcement Officers will be performing their routine missions aimed at protecting public lands, gaining situational awareness on threats entering illegally and traversing national parks, wildlife areas, and wilderness areas while coordinating with the U.S. Border Patrol."

Please let me know if you have any questions. Thanks much.

Subject: CBP Migratory Bird Programmatic Permit Application Documentation

All,

I have attached the documentation and appendices for CBP's Programmatic Permit request.

We are currently working on getting the first page of the Special Purpose – Miscellaneous Permit Application Form signed and should have it to you next week.

Please let me know if there is any additional information or documentation that you require.

Thank you very much for the coordination throughout this effort.

Click here for addresses.

Return to: U.S. Fish and Wildlife Service (USFWS)

Type of Activity: | **Special Purpose – Miscellaneous**

☑ **New Application**
☐ **Requesting Renewal or Amendment of Permit #** _____

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual			
1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
2. Date of birth (mm/dd/yyyy)	3. Social Security No.	4. Occupation	5. Affiliation/ Doing business as (see instructions)
6.a. Telephone number	6.b. Alternate telephone number	6.c. Fax number	6.d. E-mail address

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution			
1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (dba)	
Customs and Border Protection		N/A	
2. Tax identification no.	3. Description of business, agency, or institution		
N/A	Border security law enforcement agency		
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
(b) (6)	(b) (6)	(b) (6) (b) (6)	
5. Principal officer title		6. Primary contact name	
Director, Facilities Management and Engineering		(b) (6)(b) (6)	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address
(b) (6)	(b) (6)	(b) (6)(b) (6)	(b) (6)(b) (6)(b) (6)(b) (6)

C. All applicants complete address information				
1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)				
(b) (6)(b) (6)(b) (6)(b) (6)				
1.b. City	1.c. State	1.d. Zip code/Postal code:	1.e. County/Province	1.f. Country
Washington	DC	20004	NA	USA
2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)				
(b) (6)(b) (6)(b) (6)(b) (6)(b) (6)(b) (6)				
2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country
Washington	DC	(b) (6)	NA	USA

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount** | **$100.00** |. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Do you currently have or have you ever had any Federal Fish and Wildlife permits?
Yes ☑ If "yes," list the number of the most current permit you have held or that you are applying to renew/re-issue: MB37271C-0 No ☐

3. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature (**in blue ink**) of applicant/person responsible for permit (No photocopied or stamped signatures) — Date of signature (mm/dd/yyyy): 6/8/18

Please continue to next page

SECTION E. SPECIAL PURPOSE - MISCELLANEOUS
(Migratory Bird Treaty Act, 50 CFR 21.27)

Note: A Federal Special Purpose - Miscellaneous permit is required to address migratory bird activities that are not covered by other existing permit types. Activities must benefit the migratory bird resource, address important research, address human concerns for individual birds, or show other compelling justification. You must be at least 18 years of age to apply for a permit. Special Purpose Permits may be valid up to 3 years.

Please provide the following information. You may use the space provided as well as a separate sheet of paper with your responses numbered according to the application questions below. You should be as thorough and specific as possible in your responses. Incomplete applications will be returned, delayed or abandoned.

1. The species (scientific and common name) and quantity of migratory birds, parts, nests, and eggs to be covered by the permit.

2. A detailed description of the project or activity, including the purpose. Include copies of supporting documentation, research proposals, and any other information that may be useful for evaluating your request.

3. The exact location (physical – address and/or GPS coordinates in decimal degree; or geographic, as appropriate) where the activity would be conducted.

4. A full description of your background and expertise in conducting the proposed activities.

5. If live birds will be maintained in captivity, describe the facilities. Attach photographs and diagrams of your enclosures. Diagrams must include dimensions (length, width, and height) and a description of interior and exterior construction materials, such as flooring and netting materials.

6. Indicate the intended disposition of the specimens, including, if applicable, the name and address of the public, scientific, or educational institution to which all specimens ultimately will be donated upon completion of activity.

7. Anyone who will be assisting you with the permitted activities or acting as your agent must either have their own Federal migratory bird permit for the activity or be identified by you, in writing, as a subpermittee under your permit. They may also require a State permit. Subpermittees must be at least 18 years old. As the primary permittee, you will be responsible for ensuring that your subpermittees are properly trained and adhere to the terms of your permit. Provide the name of anyone besides yourself who will be conducting activities under your permit. For anyone handling or caring for live birds, briefly describe what they will be doing and their qualifications.

8. You must retain records relating to the activities conducted under your permit for at least 5 years from the date of expiration of your permit. Is the physical address you provided in Section C on page 1 of this application the address where your records will be kept? Indicate "yes" or "no." If "no," provide the physical address.

9. **Any permit issued as a result of this application is not valid unless you also have any required State or tribal permits or approvals associated with the activity.** Have you obtained all required State or tribal permits or approvals to conduct this activity? **If "yes," attach a copy of the approval(s).** If "no," indicate whether your "have applied" or whether "none is required." **If you "have applied," send a copy when it is issued.**

10. **Disqualification factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c))

    Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above? If not, indicate "no." If you have, indicate "yes," and provide the following: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

PERMIT APPLICATION FORM INSTRUCTIONS

The following instructions pertain to an application for a U.S. Fish and Wildlife Service or CITES permit. The General Permit Procedures in 50 CFR 13 address the permitting process. For simplicity, all licenses, permits, registrations, and certificates are referred to as a permit.

GENERAL INSTRUCTIONS:

- Complete all blocks/lines/questions in Sections A or B, and in C, D, and E.
- **An incomplete application may cause delays in processing or may be returned to the applicant. Be sure you are filling in the appropriate application form for the proposed activity.**
- Print clearly or type in the information. Illegible applications may cause delays.
- Sign the application in blue ink. Faxes or copies of the original signature will not be accepted.
- Mail the original application to the address at the top of page one of the application or if applicable on the attached address list.
- **Keep a copy of your completed application.**
- **Please plan ahead. Allow at least 60 days for your application to be processed. Some applications may take longer than 90 days to process. (50 CFR 13.11)**
- Applications are processed in the order they are received.
- Additional forms and instructions are available from http://permits.fws.gov.

COMPLETE EITHER SECTION A OR SECTION B:

Section A. **Complete if applying as an individual:**

- Enter the complete name of the responsible individual who will be the permittee if a permit is issued. Enter personal information that identifies the applicant. ***Fax and e-mail are not required if not available.***
- If you are applying on behalf of a client, the personal information must pertain to the client, and a document evidencing power of attorney must be included with the application.
- **Affiliation/ Doing business as (dba)**: business, agency, organizational, or institutional affiliation *directly* related to the activity requested in the application (e.g., a taxidermist is an individual whose business can *directly* relate to the requested activity). The Division of Management Authority (DMA) will **not** accept *doing business as* affiliations for individuals.

Section B. **Complete if applying as a business, corporation, public agency, Tribe, or institution:**

- Enter the complete name of the business, agency, Tribe, or institution that will be the permittee if a permit is issued. Give a brief description of the type of business the applicant is engaged in. Provide contact phone number(s) of the business.
- **Principal Officer** is the person in charge of the listed business, corporation, public agency, Tribe, or institution. The principal officer is the person responsible for the application and any permitted activities. Often the principal officer is a Director or President. **Primary Contact** is the person at the business, corporation, public agency, Tribe, or institution who will be available to answer questions about the application or permitted activities. Often this is the preparer of the application.

ALL APPLICANTS COMPLETE SECTION C:

- For all applications submitted to the Division of Management Authority (DMA) a physical U.S. address is **required**. Province and Country blocks are provided for those USFWS programs which use foreign addresses and are not required by DMA.
- **Mailing address** is address where communications from USFWS should be mailed if different than applicant's physical address.

ALL APPLICANTS COMPLETE SECTION D:

Section D.1 **Application processing fee:**

- An application processing fee is required at the time of application; unless exempted under 50 CFR13.11(d)(3). The application processing fee is assessed to partially cover the cost of processing a request. **The fee does not guarantee the issuance of a permit. Fees will not be refunded for applications that are approved, abandoned, or denied.** We may return fees for withdrawn applications prior to any significant processing occurring.
- **Documentation of fee exempt status is not required for Federal, Tribal, State, or local government agencies; but must be supplied by those applicants acting on behalf of such agencies**. Those applicants acting on behalf of such agencies must submit a letter on agency letterhead and signed by the head of the unit of government for which the applicant is acting on behalf, confirming that the applicant will be carrying out the permitted activity for the agency.

Section D.2 **Federal Fish and Wildlife permits:**

- List the number(s) of your most current FWS or CITES permit or the number of the most recent permit if none are currently valid. If applying for re-issuance of a CITES permit, the original permit must be returned with this application.

Section D.3 **CERTIFICATION:**

- **The individual identified in Section A, the principal officer named in Section B, or person with a valid power of attorney (documentation must be included in the application) must sign and date the application in blue ink.** This signature binds the applicant to the statement of certification. This means that you certify that you have read and understand the regulations that apply to the permit. You also certify that everything included in the application is true to the best of your knowledge. Be sure to read the statement and re-read the application and your answers before signing.

ALL APPLICANTS COMPLETE SECTION E.

APPLICATION FOR A FEDERAL FISH AND WILDLIFE PERMIT
Paperwork Reduction Act, Privacy Act, and Freedom of Information Act – Notices

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501, *et seq.*) and the Privacy Act of 1974 (5 U.S.C. 552a), please be advised:

1. The gathering of information on fish and wildlife is authorized by:
(Authorizing statutes can be found at: http://www.gpoaccess.gov/cfr/index.html and http://www.fws.gov/permits/ltr/ltr.html.)

   a. Bald and Golden Eagle Protection Act (16 U.S.C. 668), 50 CFR 22;
   b. Endangered Species Act of 1973 (16 U.S.C. 1531-1544), 50CFR 17;
   c. Migratory Bird Treaty Act (16 U.S.C. 703-712), 50 CFR 21;
   d. Marine Mammal Protection Act of 1972 (16 U.S.C. 1361, *et. seq.*), 50 CFR 18;
   e. Wild Bird Conservation Act (16 U.S.C. 4901-4916), 50 CFR 15;
   f. Lacey Act: Injurious Wildlife (18 U.S.C. 42), 50 CFR 16;
   g. Convention on International Trade in Endangered Species of Wild Fauna and Flora (TIAS 8249), http://www.cites.org , 50 CFR 23;
   h. General Provisions, 50 CFR 10;
   i. General Permit Procedures, 50 CFR 13; and
   j. Wildlife Provisions (Import/export/transport), 50 CFR 14.

2. Information requested in this form is purely voluntary. However, submission of requested information is required in order to process applications for permits authorized under the above laws. Failure to provide all requested information may be sufficient cause for the U.S. Fish and Wildlife Service to deny the request. We may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

3. Certain applications for permits authorized under the Endangered Species Act of 1973 (16 U.S.C. 1539) and the Marine Mammal Protection Act of 1972 (16 U.S.C. 1374) will be published in the **Federal Register** as required by the two laws.

4. Disclosures outside the Department of the Interior may be made without the consent of an individual under the routine uses listed below, if the disclosure is compatible with the purposes for which the record was collected. (Ref. 68 FR 52611, September 4, 2003)

   a. Routine disclosure to subject matter experts, and Federal, Tribal, State, local, and foreign agencies, for the purpose of obtaining advice relevant to making a decision on an application for a permit or when necessary to accomplish an FWS function related to this system of records.
   b. Routine disclosure to the public as a result of publishing **Federal Register** notices announcing the receipt of permit applications for public comment or notice of the decision on a permit application.
   c. Routine disclosure to Federal, Tribal, State, local, or foreign wildlife and plant agencies for the exchange of information on permits granted or denied to assure compliance with all applicable permitting requirements.
   d. Routine disclosure to Captive-bred Wildlife registrants under the Endangered Species Act for the exchange of authorized species, and to share information on the captive breeding of these species.
   e. Routine disclosure to Federal, Tribal, State, and local authorities who need to know who is permitted to receive and rehabilitate sick, orphaned, and injured birds under the Migratory Bird Treaty Act and the Bald and Golden Eagle Protection Act; federally permitted rehabilitators; individuals seeking a permitted rehabilitator with whom to place a bird in need of care; and licensed veterinarians who receive, treat, or diagnose sick, orphaned, and injured birds.
   f. Routine disclosure to the Department of Justice, or a court, adjudicative, or other administrative body or to a party in litigation before a court or adjudicative or administrative body, under certain circumstances.
   g. Routine disclosure to the appropriate Federal, Tribal, State, local, or foreign governmental agency responsible for investigating, prosecuting, enforcing, or implementing statutes, rules, or licenses, when we become aware of a violation or potential violation of such statutes, rules, or licenses, or when we need to monitor activities associated with a permit or regulated use.
   h. Routine disclosure to a congressional office in response to an inquiry to the office by the individual to whom the record pertains.
   i. Routine disclosure to the Government Accountability Office or Congress when the information is required for the evaluation of the permit programs.
   j. Routine disclosure to provide addresses obtained from the Internal Revenue Service to debt collection agencies for purposes of locating a debtor to collect or compromise a Federal claim against the debtor or to consumer reporting agencies to prepare a commercial credit report for use by the FWS.

5. For individuals, personal information such as home address and telephone number, financial data, and personal identifiers (social security number, birth date, etc.) will be removed prior to any release of the application.

6. The public reporting burden on the applicant for information collection varies depending on the activity for which a permit is requested. The relevant burden for a Special Purpose – Miscellaneous permit application is 2 hours and 30 minutes for recordkeeping. This burden estimate includes time for reviewing instructions, gathering and maintaining data and completing and reviewing the form. You may direct comments regarding the burden estimate or any other aspect of the form to the Service Information Clearance Officer, U.S. Fish and Wildlife Service, Mail Stop 222, Arlington Square, U.S. Department of the Interior, 1849 C Street, NW, Washington D.C. 20240.

Freedom of Information Act – Notice

For organizations, businesses, or individuals operating as a business (i.e., permittees not covered by the Privacy Act), we request that you identify any information that should be considered privileged and confidential business information to allow the Service to meet its responsibilities under FOIA. Confidential business information must be clearly marked "Business Confidential" at the top of the letter or page and each succeeding page and must be accompanied by a non-confidential summary of the confidential information. The non-confidential summary and remaining documents may be made available to the public under FOIA [43 CFR 2.26 – 2.33].

Subject: CBP Migratory Bird Programmatic Permit Application Documentation

All,

I have attached the documentation and appendices for CBP's Programmatic Permit request.

We are currently working on getting the first page of the Special Purpose – Miscellaneous Permit Application Form signed and should have it to you next week.

Please let me know if there is any additional information or documentation that you require.

Thank you very much for the coordination throughout this effort.

> Good Day All,

As you may have heard, I have been on vacation for the past week and am just getting back to he office. I will be responding to emails over the next few days. I just came acrc down in Naco, AZ last week A yearling bear was seen climbing the fence and walking along the top for a few minutes It then climbed down and walked away

This picture was release to the media and has circulated, but I wanted to make sure y'all saw it too Have a great day!

Respectfully,

Good morning everyone,

This is just an FYI, I didn't know if you already knew of the Burrowing Owl colony along the border where fence construction is taking place. We are working with the San Diego Zoo to try to save the remaining owls. They have a permit that allows burrowing owl relocation research, so I am planning to increase the authorization on that permit to cover all of the remaining owls at the border.

I'm available today, tomorrow, and Thursday this week if you have any questions.

Best,
Jen

Hi Amedee and Thomas,

Susan Wynn went down to an area of the border fence in San Diego that is being replaced and discovered that the work was proceeding in an area that has a high density of Burrowing Owls nesting. The work had already bulldozed one area with many Burrowing Owls. She surveyed the next segment where work is slotted to begin and observed 30 or so Owls. Susan is going to coordinate with the San Diego Zoo which holds a permit to capture and relocate Owls to rescue as many of the Burrowing Owls as they can next week. They are going to put out cameras to try to identify which burrows are active. Susan said that the Zoo would send us a summary of what they found and what they planned to do on Monday. The Zoo had identified a relocation site that will be protected in the Otay Mesa area. On the positive side, the border patrol has granted access for the relocation effort, though it doesn't sound like the work will be slowed at all. I told Karen Goebel that this would probably be covered by the recent Nest Destruction Memo, but please let me know if we

should try to issue an additional permit or extension for the Zoo permits. I cc'd Jen and Rob in case she has any recommendations about permits.

In any case, I just got this news and thought I would share it even if my quick second-hand summary is not completely accurate. I'll keep you posted as I get more information.

Sorry for the bad news late on a Friday!

Tom

Hello everyone,
Here is an update from our site visit on Friday. We plan to return Monday afternoon (around 1 pm) to place cameras for additional observations of the owls to better understand which owls have young juveniles, etc.

I've attached a spreadsheet with all of the details, but here is a summary of how many owls were observed (between 6/25 visit and 6/29 visit):

10 pairs/families
2 single adults
1+ dispersing fledglings
Total of 47 BUOW observed so far (22 adults, 25 juveniles)

We used light pole numbers or fence panel numbers to identify where the owls are (Location column is spreadsheet).

In the field, we discussed a couple of different activities that will be occurring that may/will impact the owls. In order to plan appropriately, we need a better understanding of the timeline of these activities and how much disturbance they will cause. We identified these activities as:

1. Breaking up of concrete along primary fence
2. Work on Low Water Crossings
3. Staging of materials for fence
4. Removal/replacement of primary fence

We have put together the schedule below (per the field meeting with Susan, Pat, (b)(6) and (b)(6)), but the specifics of our trapping efforts will depend on the timelines for the activities above. It would be helpful to know if the breaking up of the concrete will continue immediately and how fast it will occur.

This acvity is lik ely to cause disturbance in the immediate area where it's occurring, and will destroy the 2 burrows that are at the base of the primary fence (panel 858, panel 936/937), so we would want to prioriz e burrows in the order they will be disturbed. This is also the case for the repairs on the low water crossings and it would be helpful to know the size of the areas of impact, the ming , and types of acvies (hea vy equipment work, etc.). If we can map all of this out in space and me, w e can come up with a strategy for geng the o wls out of harm's way in the most effecv e and safe manner

Schedule for Zoo and Agencies
7/2 (Monday): prep receiver sites/burrows--USFWS, CDFW?
7/5 & 7/6 (Thursday/Friday): install release cages (up to 5) at receiver sites--Zoo, USFWS?, CDFW?
7/9 (Monday): begin trapping of owls for translocation (actives) or transmitter application (passives)--Zoo
7/10 and beyond: Trapping will continue as long as necessary--Zoo
TBD: exclusion of burrows--who is responsible for this?
TBD: scoping and collapse of burrows--who is responsible for this?
TBD: Further planning/strategies to discourage recolonization of squirrels and owls ahead of the planned replacement of the secondary fence in early 2019

Our trapping efforts can happen both during the day and night depending on which birds we are targeng.

Thank you for working with us to try to get the owls out of the way ahead of the work that's occurring Please let me know if you have any quesons about our schedule or s trategy for removing the owls.

Thank you,
Colleen

Address is technically 3100 monument drive but it might not show up on Google maps. The trailer is located next to the IBWC water treatment facility and should be visible from road. The USACE trailer is the far left facing the gate as you enter into the facility

Hi (b)(6), et al - I'm thinking it might be helpful to meet in person to talk things through rather then trying to play phone tag - Pat and I could come down tomorrow am and meet with you all - Do you have an estimate of when you might be there? If not - the phone is always an option.
thanks
Susan

Subject: Re: [EXTERNAL] San Diego Fence Replacement Project - Call with FWS

Hi (b)(6)

Thanks for giving us access to the area. After discussing the owls east of the Otay border crossing with Susan and Dave Mayer (CDFW), the next step for the zoo team is to do more observations to determine the numbers and ages of the juveniles to determine further next steps. Would it be possible for us to get access to the area on Friday to conduct observations of the owls?

Thanks,

Colleen

Subject: RE: [EXTERNAL] San Diego Fence Replacement Project - Call with FWS

Colleen and Susan: thanks for the support today. Please keep (b)(6) in the loop on your next steps. We have some work in one of the low water crossings east of Otay Mesa in mid-July (will be near but not where some owls are currently). We will be moving into full construction in the area in early August.

Thanks

Hello all - I was able to get a hold of the folks from the zoo - they can survey the area on monday - Colleen Wisinski (included on this email) is your point of contact - please let her know how to access the area.

thank you everyone for the quick response and coordination.

Hello everyone,

I hope all of you had a wonderful 4th! Here is a BUOW update at the Otay border fence project in S. CA.

I will be doing a detail in another program for the next 3 weeks, but I will do my best to stay on top of this and continue passing along the info that comes in.

I hope everyone has a good weekend!

Hi Jen and Esther,
I've been working on putting the translocation document for the border fence replacement project together but it's going a little slower than I anticipated with all of the work we're doing in the field right now. I'll send the whole thing to you once it's complete, but I wanted to make sure you had the info you need.

We are planning to move 2 family groups from the fence area (see yellow lines in table) starting tonight and the others will be passively relocated. We got 3 transmitters out last night on some of those birds and will continue to try to get transmitters on a few more so we can better understand where they go in response to the work on the fence. We are working closely with USFWS and

CDFW to do the best we can in terms of getting birds out of harm's way and collapsing burrow to the extent possible.

Below is a table with the maximum numbers of adults and juveniles we've observed since our observations began on June 25 and I've attached maps of the impact area and release area.

Please let us know if there's any other info you need immediately.
Thanks,
Colleen

P.S. Jen, thank you for amending our MBTA permit!

Locaon	Max Adults Seen	Max Juveniles Seen	Notes		Translocaon T ype
Light 16-19	2	4 fledglings	Concrete removal work occurred in this area on 7/2/18 and the owls seem to have le.		Passive
Panel 500A	1	1 fledgling	burrow near grade stake; fledgling may be from 16-19 family		Passive
Light 27/28	2		freshly molted, may be past breeding, camera installaon not possible		Probable Passive
Light 30	2 (male=A/41)	unknown	owls molng , may be past breeding		Possible Passive
Light 35	2 (female=81/Y)	3 fledglings			Passive
Light 38/39	2	3 fledglings			Passive

Looks like it's our day for big media inquiries. I'm checking with our regional folks and also with our FOIA lead to see whether a draft of a letter should have been released to begin with. Nevertheless, we are left with needing to respond to this inquiry. Usually, we bump border wall stuff to CBP, but we aren't going to be able to do this here. Thoughts?

From: **Grandoni, Dino** <Dino.Grandoni@washpost.com>
Date: Fri, Dec 7, 2018 at 11:33 AM
Subject: [EXTERNAL] Question from WaPo reporter about letter sent to CBP about south Texas border wall
To: Gavin_Shire@fws.gov <Gavin_Shire@fws.gov>, Laury_Parramore@fws.gov <Laury_Parramore@fws.gov>, Vanessa_Kauffman@fws.gov <Vanessa_Kauffman@fws.gov>

Hi all,

Hope you're all well today. I'm writing in to ask about a pair of letters — one draft and the other final — related to a proposed border wall in southern Texas.

On Aug. 25, 2017, U.S. Customs and Border Patrol sent a letter to the U.S. Fish and Wildlife Service seeking the agency's input on the environmental impacts of constructing 28 miles of levee wall in Hidalgo County and 32 miles of bollard wall in Starr County (Doc 1 attached).

According to a draft letter released under the Freedom of Information Act to Defenders of Wildlife and other litigants, USFWS staffers drafted a letter in Sept. 2017 outlining their concerns, which included reduction of habitat connectivity, flood and fire risk and direct mortality for animals in the area (Doc 2).

However, the final letter sent to CBP dated Oct. 13 did not included those risks listed above (Doc 3).

My questions: Why did the USFWS decide to edit those risks out of the final letter? And who made that decision?

Feel free to give me a call at 716-818-0825 if you have any questions for me.

All the best,
Dino

(b) (6)(b) (6)(b) (6)(b) (6)
(b) (6)(b) (6)(b) (6)

AUG 25 2017

U.S. Customs and Border Protection

Mr. Robert Jess
United States Fish and Wildlife Service
Lower Rio Grande Valley National Wildlife Refuge
3325 Green Jay Road
Alamo, TX 78516

Dear Mr. Jess:

U.S. Customs and Border Protection (CBP) is in the initial stages of planning for proposed levee wall along 28 miles of existing levee located in Hidalgo County, Texas within the U.S. Border Patrol's McAllen and Weslaco stations area of responsibility (AOR) and 32 miles of bollard wall in Starr County, Texas within the U.S. Border Patrol's Rio Grande City station AOR. In addition, CBP is in the planning stages of its second phase of gate installation to close 35 gaps in existing border fence in Hidalgo and Cameron counties. The 35 gates were funded in CBP's fiscal year (FY) 2017 appropriation, while the proposed 28 miles of levee wall and 32 miles of bollard wall are included in the President's FY18 budget request to Congress.

In Hidalgo County, CBP is proposing 28 miles of levee wall. The proposed levee wall alignment will be on the south face of the northern U.S. International Boundary Water Commission (IBWC) levee. The proposed design includes construction of a reinforced concrete levee wall to the height of the existing levee with 18-foot tall steel bollards installed on the top of the levee wall, a possible 150-foot enforcement zone on the south/river side of the levee wall, detection technology, enforcement zone lighting, video surveillance, automated vehicle gates, pedestrian gates, and an all-weather patrol road parallel to the levee wall. In addition, CBP will install gates within 20 gaps in existing border levee wall within Hidalgo County and in 15 existing gaps within Cameron County.

In Starr County, CBP is proposing 32 miles of bollard wall. The proposed design includes construction of 20 to 30-foot tall steel bollards, a possible 150-foot enforcement zone on the south/river side of the bollard wall, detection technology, enforcement zone lighting, video surveillance, and an all-weather patrol road parallel to the bollard wall.

Additional details of the possible components of the proposed action are as follows:

- **Levee Wall** -The levee wall will be a concrete wall to the height of the levee crest with 18 foot tall bollards installed in the top of the levee wall.
- **Bollard Wall** – The bollard wall will be 20 to 30 feet high utilizing 8-inch diameter, concrete filled steel bollards.
- **150 Foot Enforcement Zone** – The enforcement zone will be an area extending from the south/river side of the levee wall or bollard wall approximately 150 feet. All vegetation within the 150-foot enforcement zone will be cleared.
- **Gates** - Automated vehicle gates will be installed with a minimum height of 18 feet and minimum width of 20 feet. In addition, gates designed to allow for farming equipment will be installed where appropriate and range in width from 40 to 50 feet. All gates will be motorized overhead sliding gates with an enclosed drive and operator system.

- **Lighting** - LED lighting will be installed as part of this project. CBP will work with the appropriate stakeholders to develop solutions to avoid excess lighting beyond the enforcement zone.
- **All Weather Road** - An all-weather aggregate patrol road (type FC-2) will be constructed on the south side and parallel to the levee or bollard wall and within the 150-foot enforcement zone. The specific location of the road within the enforcement zone will be determined during the design phase of the project.
- **Cameras** - A camera surveillance system will be installed to ensure visibility of the enforcement zone and southern approach.

The purpose of the proposed action is to increase CBP's ability to impede or deny illegal border crossings, and to provide improved surveillance and detection capabilities to the areas of greatest risk of illegal cross-border activity located within the US. Border Patrol Rio Grande Valley Sector. The proposed action will be similar to other levee and border wall systems located within the Rio Grande Valley Sector. The proposed action will also support CBPs action under Executive Order (EO) 13767, where CBP is directed to "...secure the southern border of the United States through the immediate construction of a physical wall on the southern border, monitored and supported by adequate personnel so as to prevent illegal immigration, drug and human trafficking, and acts of terrorism."

CBP will evaluate the potential environmental impacts associated with the proposed action. CBP is gathering data and input from state and local government agencies, federal agencies, and Native American Tribes that may be affected by or otherwise have an interest in the proposed actions. Since your agency or organization may have particular knowledge and expertise regarding the potential environmental impacts from CBP's proposed action, your input is sought regarding the likely or anticipated effects to biological, cultural, and natural resources from the implementation of the proposed actions. Your response should include any state and local restrictions, permitting or other requirements with which CBP should consider during project siting, construction, and operation.

This letter is intended to provide initial information for CBP's proposed projects in the Rio Grande Valley and seek comments and concerns from potentially affected parties and interested groups. CBP intends similar outreach in other border regions as projects are identified and defined. Your prompt attention to this request is appreciated. Comments and information will be accepted up to 30 days following the date of this letter. If you have any questions or comments please contact me at commentsenv@cbp.dhs.gov. Please include "RGV Wall and Gates Construction" in the title of your email. Thank you for your cooperation.

Sincerely,

(b) (6)

U.S. Customs and Border Protection
(b) (6)(b) (6)(b) (6)
(b) (6)(b) (6)

Dear (b) (6) :

Thank you for your letter dated August 25, 2017, regarding U.S. Customs and Border Protection's (CBP) proposed border infrastructure in South Texas which includes the installation of 35 gates in existing border fence gaps, 32 miles of bollard wall, and 28 miles of levee wall. The U.S. Fish and Wildlife Service (Service) reviewed your letter and is providing our initial concerns related to Federally listed species, other Federal trust resources, and Santa Ana and Lower Rio Grande Valley National Wildlife Refuges (NWR). Once there is a proposed action, that is spatially explicit, we can provide a formal response and coordination under the National Environmental Policy Act, National Wildlife Refuge System (Refuge System) Improvement Act, Migratory Bird Treaty Act, and Endangered Species Act.

Over the past several years, there has been a substantial increase in coordination between the Service, CBP, and the U.S. Border Patrol Rio Grande Valley Sector along the Texas border. The Service appreciates the excellent communication and information sharing that has occurred and looks forward to maintaining this relationship into the future.

The Refuge System lands in the Lower Rio Grande Valley are considered to be one of the most biodiverse in the continental United States. The Service supports CBP addressing direct and indirect impacts of the proposed border activities on Federally listed species and other Federal trust resources in the project area. In general, concerns are similar to those discussed during initial border wall/fence construction in 2008. The Service will continue to work with CBP on the proposed activities, with a focus on ensuring impacts to Santa Ana and Lower Rio Grande Valley NWRs and its ecotourism-based economy are analyzed and minimized, to the extent possible.

In response to the possible components of the proposed action identified in your letter, the Service's informal comments are as follows:

<u>Levee and bollard walls</u>
In general, the Service recommends considering technology, additional border patrol agents and other mechanisms, when possible, instead of installation of levee or bollard walls.

Connectivity
The Service understands that 10.2 miles of border wall will be constructed on Santa Ana and Lower Rio Grande Valley NWRs in Hidalgo County, Texas. The Service does not currently have information on specific alignments on Lower Rio Grande Valley NWR in Starr County. Currently, there are 34 miles of existing levee wall in Hidalgo County; the proposed 28 mile addition would result in 62 miles of impermeable barrier, precluding access to habitats by the Federally listed endangered ocelot and jaguarundi, along with other terrestrial species. Reduction of habitat connectivity in portions of the existing wildlife corridor will affect ocelot and jaguarundi movement, impact access to traditional water sources, and reduce potential for gene flow. The Service recommends wildlife openings to allow ocelots, jaguarundis and other wildlife to move through the wall to maintain habitat connectivity.

In Hidalgo County, Santa Ana NWR will be bisected, with substantial acreage south of the proposed wall and less acreage north of the wall. Any acres north of the wall that do not have habitat corridors will represent a direct loss of habitat particularly for ocelots and jaguarundis on refuge land in Texas. The Service requests CBP document and assess these impacts for Starr County when the border wall alignments are determined.

Flooding
The Lower Rio Grande Valley is a flood-prone area. The Service is concerned the levee wall in Hidalgo County could be subject to catastrophic natural flood events, leaving terrestrial wildlife trapped behind the levee wall to drown or starve. This project will likely cause widespread mortality for terrestrial organisms during catastrophic flood events. The Service recommends an assessment of escape routes and consideration of constructing elevated berms south of the levee to allow terrestrial animals to retreat from rising waters during flooding events, as well as leaving the gates open during those events.

Fire
The Santa Ana and Lower Rio Grande Valley NWRs experience numerous wildfires each year. Fighting wildfire is dangerous, particularly if escape routes are limited due to a border wall. Natural resource protection may be impacted due to public safety and challenges of fighting wildfires south of a border wall.

Direct Mortality
The Service requests best management practices, such as capping hollow bollard/posts, during construction to prevent entrapment of wildlife species during placement of vertical posts/bollards.

Socio-economic & Visitor Impacts
The Service is specifically concerned with potential tourism and visitor impacts. Ongoing efforts by the Service, the state of Texas, private landowners, and non-profit organizations have helped create a wildlife corridor linking numerous isolated habitat fragments in the Lower Rio Grande Valley. These efforts have helped produce habitats that are harboring unique species of plants and animals, making the area a destination for ecotourists.

The economics of Lower Rio Grande Valley wildlife and habitat diversity are important to the international border region, as over 150,000 tourists contribute approximately $10.8 million annually to the regional economy. The Santa Ana NWR is the most accessible public land for residents of Hidalgo County and approximately 70 percent of visitors come from outside of the local area. Visitors participating in outdoor recreational activities economically benefit the local community. The Service recommends a socio-economic analysis of the proposed wall.

Construction of the border wall, as proposed, will likely affect visitation and the quality of visitor experience. Construction of the border wall along the levee will separate the Santa Ana NWR visitor

center and all administrative facilities (equipment storage, residences, parking lots, etc.) from the rest of the refuge (99 percent of refuge lands). The proposal could result in visitors entering and exiting Santa Ana NWR through a large gate, similar to going through a security checkpoint. This could result in a reduction in visitation due to a perceived unsafe and unwelcoming atmosphere.

Enforcement Zones

Construction of a 150-foot enforcement zone will directly remove habitat. The enforcement zone will also create barriers and restrict wildlife movement, especially for species such as ocelots, which require dense brush to travel through. The Service recommends minimizing this zone, as operations allow, especially in and near thick thornscrub and walking trails. We also recommend calculating the direct habitat loss of the 150-foot enforcement zone based on a vegetation and endangered species survey. The proposed cleared enforcement zone in Hidalgo County will directly remove approximately 170 acres of habitat from Lower Rio Grande Valley and Santa Ana NWRs reducing the ability to meet refuge purposes. In Hidalgo County, Refuge System lands will have approximately 7,800 acres south of the proposed wall and 2,400 acres north of the wall. The 2,400 acres represent a direct loss of habitat for ocelots and jaguarundis on Refuge System lands in Texas.

Lighting

Increased lighting at night, along the wall, will likely have negative impacts on ocelot, jaguarundi and other nocturnal species by making them more susceptible to predation. The Service recommends down shielding lights to focus away from thornscrub habitat and shining lights only within the enforcement zone. The Service recommends CBP continue to analyze the effects of lighting to nocturnal wildlife and work with the Service to minimize impacts.

All Weather Roads

The Service recommends the width of all roads created or maintained by CBP be measured and recorded using Geographic Information System (GPS) coordinates and integrated into the CBP GPS database. The Service suggests maintenance actions not increase the width of the roadbed or the amount of disturbed area beyond the roadbed. The all-weather road within the enforcement zone is capable of high speed use, causing concern for public safety and increased wildlife mortality. The Service requests coordination to address speeding issues.

We appreciate the opportunity to provide informal comments and look forward to future opportunities to discuss the proposed project. Please feel free to contact me at 505-248-6282 if I can be of further assistance.

Sincerely,

Regional Director

(b) (6)(b) (6)
(b) (6)(b) (6)(b) (6)(b) (6)(b) (6)(b) (6)
U.S. Customs and Border Protection
(b) (6)(b) (6)(b) (6)(b) (6)
(b) (6)(b) (6)(b) (6)

Dear (b) (6)(b) (6)

Thank you for your letter dated August 25, 2017, regarding U.S. Customs and Border Protection's (CBP) proposed border infrastructure in South Texas which includes the installation of 35 gates in existing border fence gaps, 32 miles of bollard wall, and 28 miles of levee wall. The U.S. Fish and Wildlife Service (Service) reviewed your letter and is providing our initial concerns related to Federally listed species, other Federal trust resources, and Santa Ana and Lower Rio Grande Valley National Wildlife Refuges (NWR). Once there is a spatially explicit proposed action, assuming no waiver is issued by Department of Homeland Security, we can provide a formal response and coordination under applicable Federal laws, including the National Environmental Policy Act, National Wildlife Refuge System (Refuge System) Improvement Act, Migratory Bird Treaty Act, and Endangered Species Act.

Over the past several years, there has been a substantial increase in coordination between the Service, CBP, and the U.S. Border Patrol Rio Grande Valley Sector along the Texas border. The Service appreciates the excellent communication and information sharing that has occurred and looks forward to maintaining this relationship into the future.

The Refuge System lands in the Lower Rio Grande Valley are considered to be one of the most biodiverse in the continental United States. In general, our concerns are similar to those discussed during initial border wall/fence construction in 2008. The Service will continue to work with CBP on the proposed activities, with a focus on ensuring impacts to Santa Ana and Lower Rio Grande Valley NWRs are analyzed and minimized, to the extent possible.

Socio-economic & Visitor Impacts
The Service is specifically concerned with potential tourism and visitor impacts on the affected NWRs. Ongoing efforts by the Service, the state of Texas, private landowners, and non-profit organizations have helped create a wildlife corridor linking numerous isolated habitat fragments in the Lower Rio Grande Valley. These efforts have helped produce habitats that are harboring unique species of plants and animals, making the area a destination for ecotourists.

The economics of Lower Rio Grande Valley wildlife and habitat diversity are important to the international border region, as over 150,000 tourists contribute approximately $10.8 million annually to the regional economy. The Santa Ana NWR is the most accessible public land for residents of Hidalgo County and approximately 70 percent of visitors come from outside of the local area. Visitors participating in outdoor recreational activities economically benefit the local community.

Construction of the border wall, as proposed, will likely affect visitation and the quality of visitor experience to the affected NWRs. Construction of the border wall along the levee will separate the Santa Ana NWR visitor center and all administrative facilities (equipment storage, residences, parking lots, etc.) from the rest of the refuge (99 percent of refuge lands). The proposal could result in visitors entering and exiting Santa Ana NWR through a large gate, similar to going through a security checkpoint. This could result in a reduction in visitation due to a perceived unsafe and unwelcoming atmosphere, which in turn could impact local economies.

Enforcement Zones
Construction of a 150-foot enforcement zone will directly remove habitat used by threatened and/or endangered species and other wildlife in the area. The enforcement zone will also create barriers and restrict wildlife movement, especially for species such as ocelots, which require dense brush to travel through. The Service recommends minimizing this zone, as operations allow, especially in and near thick thornscrub and walking trails. We also recommend calculating the direct habitat loss of the 150-foot enforcement zone based on a vegetation and endangered species survey. The proposed cleared enforcement zone in Hidalgo County will directly remove approximately 170 acres of habitat from Lower Rio Grande Valley and Santa Ana NWRs reducing the ability to meet refuge purposes and impacting the visitor experience. The Service recommends leaving vegetated areas near entrances and exits to public use areas to mitigate the potential impacts to the visiting public and quality of their experience.

Lighting
Increased lighting at night, along the wall, will likely have negative impacts on ocelot, jaguarundi and other nocturnal species by making them more susceptible to predation. The Service recommends down shielding lights to focus away from thornscrub habitat and shining lights only within the enforcement zone. The Service recommends CBP continue to analyze the effects of lighting to nocturnal wildlife and work with the Service to minimize impacts.

All Weather Roads
The Service recommends the width of all roads created or maintained by CBP be measured and recorded using Geographic Information System (GPS) coordinates and integrated into the CBP

GPS database. The Service suggests maintenance actions not increase the width of the roadbed or the amount of disturbed area beyond the roadbed. The all-weather road within the enforcement zone is capable of high speed use, causing concern for public safety and increased wildlife mortality. The Service requests coordination to address speeding issues, especially near high visitor use areas.

The Service's comments in this letter are based upon general information we have been given to date. The Service may change these comments and opinions depending on more specific information regarding the border wall that we expect will be provided by CBP in the future. We appreciate the opportunity to provide informal comments and look forward to continued coordination on the proposed project. Please feel free to contact me at 505-248-6282 if I can be of further assistance.

Sincerely,

Regional Director

Subject: [EXTERNAL] Question from WaPo reporter about letter sent to CBP about south Texas border wall
To: Gavin_Shire@fws.gov <Gavin_Shire@fws.gov>, Laury_Parramore@fws.gov <Laury_Parramore@fws.gov>, Vanessa_Kauffman@fws.gov <Vanessa_Kauffman@fws.gov>

Hi all,

Hope you're all well today. I'm writing in to ask about a pair of letters — one draft and the

other final — related to a proposed border wall in southern Texas.

On Aug. 25, 2017, U.S. Customs and Border Patrol sent a letter to the U.S. Fish and Wildlife Service seeking the agency's input on the environmental impacts of constructing 28 miles of levee wall in Hidalgo County and 32 miles of bollard wall in Starr County (Doc 1 attached).

According to a draft letter released under the Freedom of Information Act to Defenders of Wildlife and other litigants, USFWS staffers drafted a letter in Sept. 2017 outlining their concerns, which included reduction of habitat connectivity, flood and fire risk and direct mortality for animals in the area (Doc 2).

However, the final letter sent to CBP dated Oct. 13 did not included those risks listed above (Doc 3).

My questions: Why did the USFWS decide to edit those risks out of the final letter? And who made that decision?

Feel free to give me a call at 716-818-0825 if you have any questions for me.

All the best,
Dino

(b) (6)(b) (6)(b) (6)

AUG 25 2017

U.S. Customs and Border Protection

Mr. Robert Jess
United States Fish and Wildlife Service
Lower Rio Grande Valley National Wildlife Refuge
3325 Green Jay Road
Alamo, TX 78516

Dear Mr. Jess:

U.S. Customs and Border Protection (CBP) is in the initial stages of planning for proposed levee wall along 28 miles of existing levee located in Hidalgo County, Texas within the U.S. Border Patrol's McAllen and Weslaco stations area of responsibility (AOR) and 32 miles of bollard wall in Starr County, Texas within the U.S. Border Patrol's Rio Grande City station AOR. In addition, CBP is in the planning stages of its second phase of gate installation to close 35 gaps in existing border fence in Hidalgo and Cameron counties. The 35 gates were funded in CBP's fiscal year (FY) 2017 appropriation, while the proposed 28 miles of levee wall and 32 miles of bollard wall are included in the President's FY18 budget request to Congress.

In Hidalgo County, CBP is proposing 28 miles of levee wall. The proposed levee wall alignment will be on the south face of the northern U.S. International Boundary Water Commission (IBWC) levee. The proposed design includes construction of a reinforced concrete levee wall to the height of the existing levee with 18-foot tall steel bollards installed on the top of the levee wall, a possible 150-foot enforcement zone on the south/river side of the levee wall, detection technology, enforcement zone lighting, video surveillance, automated vehicle gates, pedestrian gates, and an all-weather patrol road parallel to the levee wall. In addition, CBP will install gates within 20 gaps in existing border levee wall within Hidalgo County and in 15 existing gaps within Cameron County.

In Starr County, CBP is proposing 32 miles of bollard wall. The proposed design includes construction of 20 to 30-foot tall steel bollards, a possible 150-foot enforcement zone on the south/river side of the bollard wall, detection technology, enforcement zone lighting, video surveillance, and an all-weather patrol road parallel to the bollard wall.

Additional details of the possible components of the proposed action are as follows:

- **Levee Wall** -The levee wall will be a concrete wall to the height of the levee crest with 18 foot tall bollards installed in the top of the levee wall.
- **Bollard Wall** – The bollard wall will be 20 to 30 feet high utilizing 8-inch diameter, concrete filled steel bollards.
- **150 Foot Enforcement Zone** – The enforcement zone will be an area extending from the south/river side of the levee wall or bollard wall approximately 150 feet. All vegetation within the 150-foot enforcement zone will be cleared.
- **Gates** - Automated vehicle gates will be installed with a minimum height of 18 feet and minimum width of 20 feet. In addition, gates designed to allow for farming equipment will be installed where appropriate and range in width from 40 to 50 feet. All gates will be motorized overhead sliding gates with an enclosed drive and operator system.

- **Lighting** - LED lighting will be installed as part of this project. CBP will work with the appropriate stakeholders to develop solutions to avoid excess lighting beyond the enforcement zone.
- **All Weather Road** - An all-weather aggregate patrol road (type FC-2) will be constructed on the south side and parallel to the levee or bollard wall and within the 150-foot enforcement zone. The specific location of the road within the enforcement zone will be determined during the design phase of the project.
- **Cameras** - A camera surveillance system will be installed to ensure visibility of the enforcement zone and southern approach.

The purpose of the proposed action is to increase CBP's ability to impede or deny illegal border crossings, and to provide improved surveillance and detection capabilities to the areas of greatest risk of illegal cross-border activity located within the US. Border Patrol Rio Grande Valley Sector. The proposed action will be similar to other levee and border wall systems located within the Rio Grande Valley Sector. The proposed action will also support CBPs action under Executive Order (EO) 13767, where CBP is directed to "...secure the southern border of the United States through the immediate construction of a physical wall on the southern border, monitored and supported by adequate personnel so as to prevent illegal immigration, drug and human trafficking, and acts of terrorism."

CBP will evaluate the potential environmental impacts associated with the proposed action. CBP is gathering data and input from state and local government agencies, federal agencies, and Native American Tribes that may be affected by or otherwise have an interest in the proposed actions. Since your agency or organization may have particular knowledge and expertise regarding the potential environmental impacts from CBP's proposed action, your input is sought regarding the likely or anticipated effects to biological, cultural, and natural resources from the implementation of the proposed actions. Your response should include any state and local restrictions, permitting or other requirements with which CBP should consider during project siting, construction, and operation.

This letter is intended to provide initial information for CBP's proposed projects in the Rio Grande Valley and seek comments and concerns from potentially affected parties and interested groups. CBP intends similar outreach in other border regions as projects are identified and defined. Your prompt attention to this request is appreciated. Comments and information will be accepted up to 30 days following the date of this letter. If you have any questions or comments please contact me at commentsenv@cbp.dhs.gov. Please include "RGV Wall and Gates Construction" in the title of your email. Thank you for your cooperation.

Sincerely,

(b) (6)

U.S. Customs and Border Protection
(b) (6)(b) (6)(b) (6)
(b) (6)(b) (6)

Dear (b) (6) :

Thank you for your letter dated August 25, 2017, regarding U.S. Customs and Border Protection's (CBP) proposed border infrastructure in South Texas which includes the installation of 35 gates in existing border fence gaps, 32 miles of bollard wall, and 28 miles of levee wall. The U.S. Fish and Wildlife Service (Service) reviewed your letter and is providing our initial concerns related to Federally listed species, other Federal trust resources, and Santa Ana and Lower Rio Grande Valley National Wildlife Refuges (NWR). Once there is a proposed action, that is spatially explicit, we can provide a formal response and coordination under the National Environmental Policy Act, National Wildlife Refuge System (Refuge System) Improvement Act, Migratory Bird Treaty Act, and Endangered Species Act.

Over the past several years, there has been a substantial increase in coordination between the Service, CBP, and the U.S. Border Patrol Rio Grande Valley Sector along the Texas border. The Service appreciates the excellent communication and information sharing that has occurred and looks forward to maintaining this relationship into the future.

The Refuge System lands in the Lower Rio Grande Valley are considered to be one of the most biodiverse in the continental United States. The Service supports CBP addressing direct and indirect impacts of the proposed border activities on Federally listed species and other Federal trust resources in the project area. In general, concerns are similar to those discussed during initial border wall/fence construction in 2008. The Service will continue to work with CBP on the proposed activities, with a focus on ensuring impacts to Santa Ana and Lower Rio Grande Valley NWRs and its ecotourism-based economy are analyzed and minimized, to the extent possible.

In response to the possible components of the proposed action identified in your letter, the Service's informal comments are as follows:

<u>Levee and bollard walls</u>
In general, the Service recommends considering technology, additional border patrol agents and other mechanisms, when possible, instead of installation of levee or bollard walls.

Connectivity
The Service understands that 10.2 miles of border wall will be constructed on Santa Ana and Lower Rio Grande Valley NWRs in Hidalgo County, Texas. The Service does not currently have information on specific alignments on Lower Rio Grande Valley NWR in Starr County. Currently, there are 34 miles of existing levee wall in Hidalgo County; the proposed 28 mile addition would result in 62 miles of impermeable barrier, precluding access to habitats by the Federally listed endangered ocelot and jaguarundi, along with other terrestrial species. Reduction of habitat connectivity in portions of the existing wildlife corridor will affect ocelot and jaguarundi movement, impact access to traditional water sources, and reduce potential for gene flow. The Service recommends wildlife openings to allow ocelots, jaguarundis and other wildlife to move through the wall to maintain habitat connectivity.

In Hidalgo County, Santa Ana NWR will be bisected, with substantial acreage south of the proposed wall and less acreage north of the wall. Any acres north of the wall that do not have habitat corridors will represent a direct loss of habitat particularly for ocelots and jaguarundis on refuge land in Texas. The Service requests CBP document and assess these impacts for Starr County when the border wall alignments are determined.

Flooding
The Lower Rio Grande Valley is a flood-prone area. The Service is concerned the levee wall in Hidalgo County could be subject to catastrophic natural flood events, leaving terrestrial wildlife trapped behind the levee wall to drown or starve. This project will likely cause widespread mortality for terrestrial organisms during catastrophic flood events. The Service recommends an assessment of escape routes and consideration of constructing elevated berms south of the levee to allow terrestrial animals to retreat from rising waters during flooding events, as well as leaving the gates open during those events.

Fire
The Santa Ana and Lower Rio Grande Valley NWRs experience numerous wildfires each year. Fighting wildfire is dangerous, particularly if escape routes are limited due to a border wall. Natural resource protection may be impacted due to public safety and challenges of fighting wildfires south of a border wall.

Direct Mortality
The Service requests best management practices, such as capping hollow bollard/posts, during construction to prevent entrapment of wildlife species during placement of vertical posts/bollards.

Socio-economic & Visitor Impacts
The Service is specifically concerned with potential tourism and visitor impacts. Ongoing efforts by the Service, the state of Texas, private landowners, and non-profit organizations have helped create a wildlife corridor linking numerous isolated habitat fragments in the Lower Rio Grande Valley. These efforts have helped produce habitats that are harboring unique species of plants and animals, making the area a destination for ecotourists.

The economics of Lower Rio Grande Valley wildlife and habitat diversity are important to the international border region, as over 150,000 tourists contribute approximately $10.8 million annually to the regional economy. The Santa Ana NWR is the most accessible public land for residents of Hidalgo County and approximately 70 percent of visitors come from outside of the local area. Visitors participating in outdoor recreational activities economically benefit the local community. The Service recommends a socio-economic analysis of the proposed wall.

Construction of the border wall, as proposed, will likely affect visitation and the quality of visitor experience. Construction of the border wall along the levee will separate the Santa Ana NWR visitor

center and all administrative facilities (equipment storage, residences, parking lots, etc.) from the rest of the refuge (99 percent of refuge lands). The proposal could result in visitors entering and exiting Santa Ana NWR through a large gate, similar to going through a security checkpoint. This could result in a reduction in visitation due to a perceived unsafe and unwelcoming atmosphere.

Enforcement Zones

Construction of a 150-foot enforcement zone will directly remove habitat. The enforcement zone will also create barriers and restrict wildlife movement, especially for species such as ocelots, which require dense brush to travel through. The Service recommends minimizing this zone, as operations allow, especially in and near thick thornscrub and walking trails. We also recommend calculating the direct habitat loss of the 150-foot enforcement zone based on a vegetation and endangered species survey. The proposed cleared enforcement zone in Hidalgo County will directly remove approximately 170 acres of habitat from Lower Rio Grande Valley and Santa Ana NWRs reducing the ability to meet refuge purposes. In Hidalgo County, Refuge System lands will have approximately 7,800 acres south of the proposed wall and 2,400 acres north of the wall. The 2,400 acres represent a direct loss of habitat for ocelots and jaguarundis on Refuge System lands in Texas.

Lighting

Increased lighting at night, along the wall, will likely have negative impacts on ocelot, jaguarundi and other nocturnal species by making them more susceptible to predation. The Service recommends down shielding lights to focus away from thornscrub habitat and shining lights only within the enforcement zone. The Service recommends CBP continue to analyze the effects of lighting to nocturnal wildlife and work with the Service to minimize impacts.

All Weather Roads

The Service recommends the width of all roads created or maintained by CBP be measured and recorded using Geographic Information System (GPS) coordinates and integrated into the CBP GPS database. The Service suggests maintenance actions not increase the width of the roadbed or the amount of disturbed area beyond the roadbed. The all-weather road within the enforcement zone is capable of high speed use, causing concern for public safety and increased wildlife mortality. The Service requests coordination to address speeding issues.

We appreciate the opportunity to provide informal comments and look forward to future opportunities to discuss the proposed project. Please feel free to contact me at 505-248-6282 if I can be of further assistance.

Sincerely,

There hasn't been any contact since then (1/29/19) regarding the inter-agency agreement they will prepare and send to me for signature. Once all the signatures are in place I will get a copy of the agreement and forward to FWS finance in Denver and they will post the reimbursable agreement in FBMS. I've already created the needed WBS tracking numbers in FBMS, and I'll be able to target the funds out to the regions for the specific border wall projects as soon as it posts in FBMS. All border project activity will be reported at the national level.

Please let me know if you have any questions.

Thanks,
gill

Hi Irma,

It was great talking with you this afternoon to coordinate the SOW and IAA for the $1M in funding Border Patrol will transfer to the US Fish and Wildlife Service.

I've revised the amounts in the SOW to reflect the distribution of the $1M to the Sweetwater River and Tijuana River Border Projects. I understand that this interagency agreement will be initiated with FY2019 as the base year and option years to accommodate additional funding transfers if funds become available to complete the projects previously identified.

I'll be ready on this end once your procurement shop has an agreement ready for me to route through my leadership for approval/signatures.

I'll be sure to include you on all correspondence regarding the SOW and IAA so we all stay on the same page. I appreciate that we speak the same budget/agreement language, and look forward to working together on this effort.

Thank you,
Gillian

INTERAGENCY AGREEMENT
STATEMENT OF WORK
BETWEEN
U.S. CUSTOMS AND BORDER PROTECTION AND THE
DEPARTMENT OF INTERIOR (DOI), U.S. FISH AND WILDLIFE SERVICES (FWS)

I. AUTHORITY

The authority of the Department of Homeland Security, U.S. Customs and Border Protection and the Department of Interior, United States Fish and Wildlife Service (FWS) which is acting as the servicing agency (collectively the "Parties") to enter into this Interagency Agreement (IAA) is the Economy Act of 1932 (31 U.S.C. 1535), resulting in an assisted acquisition.

II. OBJECTIVE/PURPOSE

This Interagency Agreement (IAA) is between the Department of Interior, U.S. Fish and Wildlife Services (FWS) and the Department of Homeland Security, U.S. Customs and Border Protection (CBP), Border Wall (BW) Program Management Office (PMO). In accordance with this agreement, FWS (servicing agency), will, on behalf of CBP (requesting agency), use its experience, background, and expertise to chemically and mechanically control non-native invasive plant species that exploit openings in the riparian forest canopy in the Tijuana River Valley and the Sweetwater River Valley which are located in the San Diego Border Patrol Sector.

The overall goals of the project are to: reduce the risk of wildfire; improve habitat for riparian nesting bird species including the federally-endangered least Bell's vireo and Southwestern willow flycatcher; mitigate safety risks to FWS staff and Border Patrol personnel; and improve access and visibility for Border Patrol operations. The San Diego Sector of the U.S. Border Patrol is one of the busiest in the country in terms of illegal entries and smuggling activity from Mexico.

III. SCOPE

This Statement of Work describes the comprehensive scope of support services for CBP's requirements. During the Base Period, U.S. Fish and Wildlife Service will use its best efforts to provide the following services either by contract or by in-house efforts:

a. **Sweetwater River Valley** (using either in-house or contractor resources), including but not limited to:

    1) The primary actions are to chemically and mechanically control non-native invasive plant species that exploit openings in the riparian forest canopy. Chemical treatments would include application of herbicide at the appropriate point of the growth cycle for the chemical to be transported to the roots and kill the plant. Mechanical treatments would include cutting, removal, and chipping. Non-native species that contribute to hazardous fuel loading and are targeted for

removal include giant reed (*Arundo donax*), saltcedar (*Tamarix* spp.), Peruvian peppertree (*Schinus molle*), eucalyptus (*Eucalyptus* spp.), Mexican fan palm (*Washingtonia robusta*), Canary Island date palm (*Phoenix canariensis*), and castor bean (*Ricinus communis*). Planning activities include project plan development, mapping of target species, environmental compliance, contract development and administration, treatment effectiveness monitoring, and reporting. Two units of the Sweetwater River totaling 242 acres would be treated – Unit 1 (upstream of SR 94 to the Refuge boundary with private land) is 124 acres; Unit 2 (downstream of SR 94 to boundary with Sweetwater Authority) is 118 acres.

Follow-up chemical and mechanical treatments will likely be necessary for 3 years to achieve 100% control of invasive plant species and to remove live or dead biomass.

The project area is designated critical habitat for the federally-endangered least Bell's vireo (*Vireo bellii pusillus*) and Southwestern willow flycatcher (*Empidonax traillii extimus*).

b. **Tijuana River Valley** (using either in-house or contractor resources), including but not limited to:

1) The primary actions are to mechanically remove woody debris from the riparian zone and to chemically and mechanically control invasive plant species that exploit openings in the forest canopy created by the beetle infestation. Mechanical treatment of large woody debris would include cutting, removal, and chipping. Invasive plant species would be controlled with herbicides followed by mechanical removal of the dead material. The main species to be targeted include giant reed (*Arundo donax*), saltcedar (*Tamarix* spp.), and castor bean (*Ricinus communis*). Planning activities include project plan development, mapping of target species, environmental compliance, contract development and administration, treatment effectiveness monitoring, and reporting. The total footprint of the project area is approximately 200 acres.

Follow-up mechanical and chemical treatments will likely be necessary for 3-5 years to achieve 100% control of invasive plant species or to remove additional woody debris generated by beetle activity.

Portions of the project area include designated critical habitat for the federally-endangered least Bell's vireo (*Vireo bellii pusillus*).

IV. REQUIREMENTS/TASKS:

a. **Sweetwater River Valley:** The total footprint is 242 acres; and 242 acres would be counted for accomplishments.
   1) Treatment #1: CATNR-FY19-CX-SCA-Units 1,2-BP
   2) Treatment #2: CATNR-FY19-MX-SCA-Units 1,2-BP

b. **Tijuana River Valley:** The total footprint is approximately 200 acres; however, approximately 1,120 acres will be counted for accomplishments (each treatment type is counted once; follow-up treatments will occur for 3-5 years on each unit).
   1) Treatment #1: CATJR-FY19-MX-SCA-Units 1,2-BP
   2) Treatment #2: CATJR-FY19-CX-SCA-Units 3,4-BP
   3) Treatment #3: CATJR-FY20-MX-SCA-Units 1,2-BP
   4) Treatment #4: CATJR-FY20-CX-SCA-Units 3,4-BP
   5) Treatment #5: CATJR-FY20-MX-SCA-Units 1,2-BP
   6) Treatment #6: CATJR-FY20-CX-SCA-Units 1,2-BP

V. ESTIMATED COST BREAKOUT (INCLUDING APPLICABLE FEES):

Project Title	TOTAL COST ESTIMATE
Sweetwater River Valley	
FY19	350,000.00
Sub-Total	**350,000.00**
Tijuana River Valley	
FY19	330,000.00
FY20	320,000.00
Subtotal	**650,000.00**
Grand Total	**1,000,000.00**

Table 1: Project Cost Estimate

The Base Period amount includes all costs for all work included in the scope of this IAA plus the project management costs charged by FWS for the Base Period. Actual costs are dependent on the work performed. This budgetary estimate is based on a summation of all the labor, contract and other direct and indirect costs assumed to be required to fund the mechanical / chemical treatments executed during the Base Period through contract closeout.

VI. DELIVERABLES:

The servicing agency must provide an electronic version of the following:

- Monthly expense burn rate report
- Monthly Project Delivery Schedule

VII. PLACE OF PERFORMANCE

The place of performance for this requirement shall include San Diego Border Patrol Sector.

VIII. PERIOD OF PERFORMANCE

This Agreement is effective from _____ through four years from date of award, which is estimated to be from XXX 2019 – XXX, 2024.

IX. FUNDING

The initial value of the IAA base year is **$1,000,000.00**
Any modifications resulting from a CBP approved change request will be funded from the change management reserve contract line item number (CLIN) 10. Use of the change management reserve funding CLIN 10 is only authorized after receipt of a CBP approved change request. Funding will be provided by CBP BW PMO to the Department of Interior, US Fish and Wildlife Service.

Specific funding information is as follows:

Subject: For your review -- DRAFT email to respond to Hill inquiry on Border Maps
Date: Monday, February 25, 2019 10:29:56 AM

Hi Margaret,

Per our conversation late Friday, we have carefully crafted the following draft message to be sent to House Natural Resources Committee majority staff. We are hoping to get your approval, then Andrea's if necessary, and then run it by Taylor Playforth before sending to HNRC.

The maps we would send are FWS maps and have been reviewed by you and other officials through Cynthia's briefings.

Can you please let me know if this looks good and then I'll figure out if and how best to run it by Andrea?

Thank you!

Marty

The full final proposed response text to be sent in an email is below, and the four maps to attach to the email can be found here:

"Thank you for your inquiry and we apologize for the delay.

Per your request, attached are maps of the La Parida Banco Tract and the El Morillo Banco Tract of the Lower Rio Grande Valley National Wildlife Refuge located on the Texas-Mexico border. Please note that there is a preexisting levee easement held by the International Boundary and Water Commission, indicated in red on the attached maps. Where it crosses National Wildlife Refuge System administered lands, such easement existed prior to these tracts being acquired and added to the Refuge System.

Questions regarding type of barrier construction and timing are not determined by or within the authorities of the U.S. Fish and Wildlife Service; and we suggest contacting U.S. Customs and Border Protection (CBP) to address these types of questions. Here is the congressional affairs contact at CBP: (b)(6), (b)(7)(C) (b)(6), (b)(7)(C) (b)(6), (b)(7)(C) *. This public CBP press release may also be helpful to your inquiry.*

We would like to suggest an in-person briefing to further explain these maps and the land jurisdictional arrangement; please let me know and we can set something up. If so, we propose 2:00

pm Friday, March 1st.

Attachments:

- *Map 1 – Overview map of US-Mexico border*
- *Map 2 – Zoomed-in map of refuge tracts in Southeastern Texas*
- *Map 3 – Satellite image with basic overlay of **La Parida Banco tract**, levee, and the Rio Grande.*
- *Map 4 – Satellite image with basic overlay of **El Morillo Banco tract**, levee, and the Rio Grande.*

can be found here:

"Thank you for your inquiry and we apologize for the delay.

Per your request, attached are maps of the La Parida Banco Tract and the El Morillo Banco Tract of the Lower Rio Grande Valley National Wildlife Refuge located on the Texas-Mexico border. Please note that there is a preexisting levee easement held by the International Boundary and Water Commission, indicated in red on the attached maps. Where it crosses National Wildlife Refuge System administered lands, such easement existed prior to these tracts being acquired and added to the Refuge System.

Questions regarding type of barrier construction and timing are not determined by or within the authorities of the U.S. Fish and Wildlife Service; and we suggest contacting U.S. Customs and Border Protection (CBP) to address these types of questions. Here is the congressional affairs contact at CBP: (b)(6), (b)(6), (b)(7)(C) (b)(6), (b)(7)(C) *This public CBP press release may also be helpful to your inquiry.*

We would like to suggest an in-person briefing to further explain these maps and the land jurisdictional arrangement; please let me know and we can set something up. If so, we propose 2:00 pm Friday, March 1st.

Attachments:

Lesley,

I have attached the MOU. I left the comments in so you could see the responses but cleared out many of the track changes. Let me know if you have any questions and I will start working with my team to figure out next steps on this side.

Thank you.

I'm A-OK with that change. And I understand the issue- it's not the first time I've heard this.

Would you like to chat more about it? Or perhaps we should just make the changes and I can upload a new document into the system for our Director's office?

Hi there (b) (6) and (b) (6),

I am digging through my emails to track the status of various MOUs. This was the last conversation I could find on our MOU, and I thought I'd check in to find out if your team was able to review the changes to the MOU.

I hope things are well!

Lesley

(b) (6) and (b) (6),

Good morning! I've attached the MOU draft with tracked changes and comments from me and our solicitor Philip. Many changes were recommended due to the M Opinion, and the proposed rule that was on the Unified Agenda I shared with you last month. Language now reflects what you might find in NEPA, such as 'reduction of negative impacts'. This is happening to all new and updated MOUs, by the way.

I'll make myself available for a walk-through on the phone or in person if that's helpful to you. Most of the comments are pretty easy to follow, though.

Please let me know your thoughts and if you have any questions or concerns with these changes. I do not believe they are significant enough to warrant any backtracking of FWS review with the regions or Ecological Services. If you are happy with these changes, I will re-initiate the formal review and briefing process here at the Service and within DOI. This will likely need to be reviewed by the Secretary's office now as well, due to any political discussions or perceptions that may or may not be going on presently. But I'm prepared to handle that, so leave that to me.

Have a great Wednesday!

Lesley

Title: ●Migratory Bird Permits; Regulations Governing Take of Migratory Birds

Abstract:

The U.S. Fish and Wildlife Service proposes to establish regulations that define the scope of the Migratory Bird Treaty Act (MBTA or Act) as it applies to conduct resulting in the injury or death of migratory birds protected by the Act. This rule would codify the legal opinion in the Department of the Interior Solicitor's Opinion M 37050 that incidental take re ulting from an otherwi e lawful activity i not prohibited under the MBTA. These regulations would reduce regulatory burdens and uncertainty on the public with regards to complying with bird take prohibitions.

(b) (6) and(b) (6),
Thank you for the call today. Here is a newer version of the MOU, with the adjusted wording we discussed.

Please read it over to ensure you're comfortable with my recommended changes. Where intentional take was mentioned, I did not see a reason to make changes. I'll send this now to our solicitors, as I mentioned, to help keep the ball rolling!

I understand the slide deck used at yesterday's EPW budget briefing was not cleared with FWP leadership before presenting externally, so please forgive me if I'm particularly cautious on what information we provide externally.

Thanks,

Subject: Maps of refuges on the Texas-Mexico border

Hi Lora,

Here is the response to your earlier inquiry received on February 5 and we apologize for the delay.

Per your request, attached are maps of the La Parida Banco Tract and the El Morillo Banco Tract of the Lower Rio Grande Valley National Wildlife Refuge located on the Texas-Mexico border. Please note that there is a preexisting levee easement held by the International Boundary and Water Commission, indicated in red on the attached maps. Where it crosses National Wildlife Refuge System administered lands, such easement existed prior to these tracts being acquired and added to the Refuge System.

Questions regarding the type of construction and timing are not determined by or within the authorities of the U.S. Fish and Wildlife Service, and we suggest contacting U.S. Customs and Border Protection (CBP) to address these types of questions. Here is a congressional affairs contact at CBP: (b) (6)(b) (6) - (b) (6)(b) (6)(b) (6)(b) (6) . This public CBP press release may also be helpful to your inquiry.

Attachments:

- Map 1 – Overview map of US-Mexico border
- Map 2 – Zoomed-in map of refuge tracts in Southeastern Texas
- Map 3 – Satellite image with basic overlay of La Parida Banco tract, levee, and the Rio Grande
- Map 4 – Satellite image with basic overlay of El Morillo Banco tract, levee, and the Rio Grande

Please let me know if you have any further questions

Best,

Devin Helfrich

Wilcox, Chris <chris_wilcox@fws.gov>

IAA with Border Protection for SBI $1M

Fay, Gillian <gillian_fay@fws.gov> Fri, Apr 5, 2019 at 2:03 PM
To: "Mcdonald, Shane" <shane_mcdonald@fws.gov>
Cc: Chris Wilcox <chris_wilcox@fws.gov>, Tate Fischer <tate_fischer@fws.gov>

Shane,
I have the IAA between FWS and CBP attached. I've had Ketti sign for Cynthia, and I signed electronically. Could you please sign as acting for Chris, and I'll get it to CBP so they can go through their signature process.

Hopefully we get word that the 0% was approved by the Director next week and I can get the WBS set up by the time CBP is finished with the IAA.

Thanks,
Gill

since 4/4 in DTS. As a final recovery plan, this does not have a FR notice associated with it and we don't normally bring final recovery plans into HQ for review but this one is a high-profile species that touches on border wall issues.

Thanks in advance for helping us get this one over the finish line. Don't hesitate to write or call if you have any questions or follow up on anything.

DTS NOTE TO REVIEWERS

DCN: 068832

Subject: Outreach Package for Final Recovery Plan for the Jaguar

Background: The Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar. Although the vast majority of the jaguar's population in the Americas is from Mexico to Argentina, this recovery plan focuses on its range in the American Southwest and Mexico, where the United States has the most jurisdiction.

Deadline for completing surname: The Notice of Availability announcing the posting of this final recovery plan to a FWS Region 2 website is targeted for being sent to the *Federal Register* on April 11, 2019. This date is flexible.

Materials: *Outreach plan, news release, FAQs*

Special considerations:

While recovery plans are non-regulatory guidance documents, this action will likely generate significant national and international attention, stakeholder interest and controversy. The jaguar is a charismatic megafauna and its northernmost range extends across the US-Mexico border to the US Southwest. **As such, this issue involves border wall issues.** (The recovery plan for the US includes two 'border dispersal corridors' in rugged, remote areas of Arizona).

Careful messaging has been crafted and prioritized in this outreach to detail political sensitivities and how the US portion of the jaguar's historic range represents just 1/10th of 1 percent of its 19-country range. Outreach to DOI, Congress, stakeholders and media should account for the potential for controversy and misconceptions around this issue.

Service and Binational Team Complete ESA Recovery Plan for America's Largest Wild Cat

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final Endangered Species Act (ESA) recovery plan for the jaguar, currently listed under the act at endangered. The plan provides a recovery framework and goals for improving the species' status throughout its entire 19-country range while focusing on the jaguar populations in northwestern Mexico and the southwestern United States.

The final recovery plan describes two large jaguar recovery units – the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina, and the Northwestern Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. More than 99 percent of the jaguar's range is in Central and South America, so the plan recognizes that countries within the PARU will be the principal contributors to its recovery. The Service will continue to promote jaguar recovery throughout the range of the jaguar, including continued funding support.

The Service has established strong working relationships with state and local partners, conservation groups and the Mexican government. The binational recovery team has not prescribed jaguar reintroductions in the United States but calls for focusing efforts on sustaining potential habitat. In addition, the plan calls for establishing at least two borderland dispersal corridors for jaguars' continued movement through remote, rugged habitat between the countries, eliminating poaching, and improving social acceptance of the jaguar to accommodate their return to the United States.

"The binational recovery team's scientific expertise in protecting the jaguar has been invaluable," said Amy Lueders, the Service's Southwest Regional Director. "We recognize the challenges involved in conserving and recovering a species with such an expansive international range, and the team has laid out a comprehensive plan with goals that are achievable and realistic. We look forward to continuing to work with our diverse partners on this effort within and outside the United States."

Loss of habitat, direct killing of the cats, and depletion of prey are the primary factors contributing to the jaguar's current status and decreasing population trend. Due to past habitat loss, it is unlikely that jaguars will be fully self-sustaining throughout their entire historical range. However, conservation of key jaguar populations and habitat -- including core breeding and connective areas -- will be critical to jaguar recovery. We anticipate it will take a minimum of 50 years to recover the jaguar.

Since 1996, seven individual male jaguars have been documented in the United States, all in southern Arizona and southwestern New Mexico. These jaguars are believed to have come from the nearest core area and breeding population, approximately 130 miles south of the U.S.-Mexico border in Sonora.

Across the jaguar's primary range in Latin America, the Service is actively working with countries and local partners to protect and recover the cat. Conservation efforts include providing incentives for protecting jaguar habitat and prey, education campaigns addressing misinformation and fears, and providing landowners with strategies for co-existing with jaguars.

Recovery plans are not regulatory but provide a framework for recovery of a species so protection under the ESA is no longer necessary. This recovery plan includes scientific information about the species and provides recovery criteria, conservation actions necessary for its recovery and delisting from the ESA and estimates of the time and cost to carry out the measures needed to achieve the plan's goal.

To achieve delisting, viable jaguar populations must be secured throughout their range. This will require protecting jaguar habitat quality and connectivity; providing incentives to protect jaguars and their habitat; reducing human-caused mortality of jaguars, particularly retaliatory killing due to livestock depredation; improving, enacting and/or enforcing effective laws that regulate illegal killing of jaguars, jaguar prey and habitat loss; securing adequate funding to implement recovery actions; and maintaining and developing partnerships in the Americas, particularly in Mexico. These protections must remain in place after delisting to ensure the long-term viability of the species.

The binational Jaguar Recovery Team includes representatives of CONANP (National Commission of Protected Areas in Mexico), CEDES (Commission of Ecology and Sustainable Development of the State of Sonora), U.S. Department of Agriculture APHIS Wildlife Services and U.S. Forest Service, Bureau of Land Management, U.S. Border Patrol, Arizona Game and Fish Department, New Mexico Department of Game and Fish, Tohono O'odham Nation, Altar Valley Conservation Alliance, Malpai Borderlands Group, Naturalia, Panthera and several ranchers, landowners, stakeholders and universities in Mexico and the United States. Additionally, the Conservation Planning Specialist Group and the Wildlife Conservation Society contributed substantially to technical aspects of the recovery plan.

The Jaguar Recovery Plan is available at: https://www.fws.gov/southwest/es/arizona/Jaguar.htm or by request from Field Supervisor, U.S. Fish and Wildlife Service, Arizona Ecological Services Office, 9828 North 31st Avenue, #C3, Phoenix, AZ 85051–2517; phone 602/242-0210.

*The U.S. Fish and Wildlife Service works with others to conserve, protect, and enhance fish, wildlife, plants, and their habitats for the continuing benefit of the American people. U.S. Fish and Wildlife Service

Questions and Answers: Final Recovery Plan for the Jaguar

Arizona Ecological Services Field Office **www.fws.gov/southwest/es/arizona/**

For Release: [Enter date here]
Contacts: Jeff Humphrey 602-242-0210

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, America's largest wild cat. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States and recommends site-specific conservation actions that contribute to jaguar recovery across its range.

Q: What does the jaguar recovery plan tell us?

A: Reversing the decline of the jaguar is possible, but it will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States south to Argentina. The final recovery plan sets goals for improving the species' status across its range and provides a framework for aligning stakeholder efforts to achieve recovery. Critical to the recovery of the jaguar is conservation of key jaguar habitat (including core areas and connective corridors) and populations. Due to past habitat loss, it is unlikely jaguars will be fully self-sustaining throughout their entire historical range. We anticipate that it will take a minimum of 50 years to recover the jaguar.

Q: What are the primary threats to the jaguar?

A: Loss of habitat, killing of individuals and depletion of prey throughout its range are the primary reasons for decreasing populations of jaguars. The recovery plan identifies conservation activities in every country and region for addressing each of these threats. It establishes goals for minimizing threats and for establishing viable populations throughout the jaguar's expansive range.

Q: What is a recovery plan?

A: Recovery plans are not regulatory but provide a framework for recovery of a species so protection under the ESA is no longer necessary. This recovery plan includes scientific information about the species and provides recovery criteria, conservation actions necessary for its recovery and delisting from the ESA and estimates of the time and cost to carry out the measures needed to achieve the plan's goal.

Q: What are the strategies for conserving and recovering the jaguar in the final recovery plan?

A: The recovery plan describes two large jaguar recovery units: the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina, and the Northwestern Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. The plan

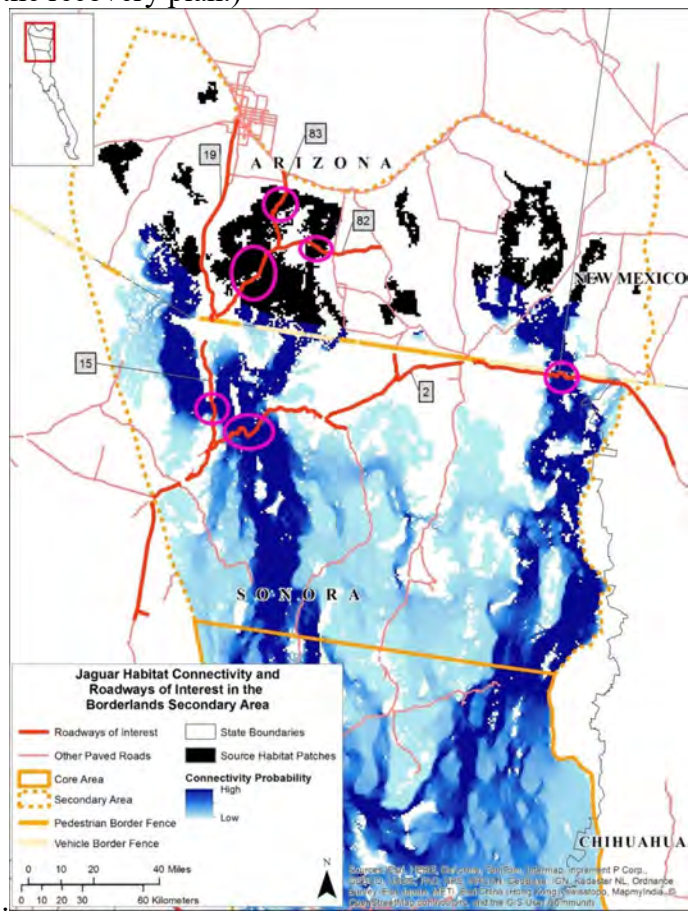
recognizes that countries within the PARU will be the principal contributors to jaguar recovery. As it has in the past, the Service will continue to promote jaguar recovery throughout the range of the jaguar.

The final recovery plan focuses on the NRU because this is where the Service has the most jurisdiction and has an established working relationship with Mexico. The NRU includes the jaguars that occupy the U.S. Southwest borderlands region. Since 1996, seven individual male jaguars have been documented in the United States (southern Arizona and southwestern New Mexico). These jaguars are believed to be expanding their range from the nearest core area and breeding population, which is approximately 130 miles south of the U.S.-Mexico border in Sonora. Recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity.

The binational recovery team has not prescribed jaguar reintroductions in the United States but focuses on efforts to sustain habitat, eliminate poaching, maintain at least two borderland dispersal corridors (see Figure 4 in the final recovery plan), and improve human social acceptance of the jaguar to accommodate jaguars that disperse into the United States.

Q: What are the borderland dispersal corridors referred to in the recovery plan and how critical are they to the recovery of jaguars in the United States?

A: Dispersal corridors are rugged, remote areas that presently male jaguars, presumably from the Sonora Core breeding area in Mexico, use to access secondary area habitat, a portion of which is in southern Arizona and New Mexico. These areas have been identified from habitat characteristics, historical records, recent sightings and photo monitoring in the United States and Mexico. (See Jaguar Habitat Connectivity and Identification of Potential Road Mitigation Locations in the NRU for the Jaguar report, as well as Figure 4 of the recovery plan.)



Continued jaguar access to habitat through transborder linkages is the sole mechanism identified in the recovery plan for continued jaguar occupation in the U.S. portion of the species' range. Maintaining this habitat connectivity is one of the recovery criteria for the Northwestern Recovery Unit. Research documents the importance of animal populations at the extremities of their ranges for the expansion and contraction of species' ranges and, ultimately, the long-term recovery of species.

These jaguar dispersal corridors are rugged and remote areas. Border interventions and operations in these areas, at present, are most practically addressed through surveillance and remote detection (electronics, towers, etc.). The U.S.-Mexico border is currently permeable to jaguar movement at these dispersal corridors. Continued work with the U.S. Customs and Border Protection (CBP) will remain important to allowing ongoing opportunities for cross-border movement of jaguars.

Q: How important is the recovery of jaguars in the United States to their overall recovery across their range?

A: The U.S. range of the jaguar represents the very northernmost edge of its 19-country range that extends all the way to South America. The U.S. range represents just one-tenth of 1 percent of its historic range.

Given that the jaguar is an international species with the vast majority of its range outside of the United States, primary actions to recover the jaguar will occur in other countries. Because more than 95 percent of the jaguar's habitat in the Northwestern Recovery Unit (NRU) is in Mexico, Mexico will be the primary contributor to the jaguar's recovery in the NRU. In the Pan-American Recovery Unit (PARU), countries within the jaguar's range will be the principal contributors to jaguar recovery.

The Service's limited resources are better applied to planning and on-the-ground implementation of conservation actions within the United States boundaries and in partnership with Mexico. Therefore, the Service and the Jaguar Recovery Team have established objective and measurable criteria for recovery and site-specific actions that, if implemented, will conserve viable jaguar populations in the northwestern portion of its range (e.g., the NRU). Priority is given to this unit because this is where the Service has the most jurisdiction, and we have an established working relationship with Mexico on issues of mutual concern.

Q: Was Customs and Border Patrol included in the developing of this plan?

A: Yes. U.S. Border Patrol (Tucson Sector) is represented on the Implementation Subgroup of the Jaguar Recovery Team. Other U.S. border area groups on the subgroup include ranchers, Malpais Borderlands Group, Altar Valley Conservation Alliance (ranching group), and state and federal land and wildlife managers.

Q: What are the actions and partnerships the Service is taking to support recovery of the jaguar in its primary range in 19 Central and South American countries?

A: In recent years, the Service's International Affairs Program has been at the forefront of supporting the conservation of jaguars throughout their range in Mexico, Central America and South America. During the past four years alone, we have supported 23 jaguar-related projects in 10 countries with more than $1 million in conservation funding. When jaguar habitat is conserved, many other species directly benefit.

In addition to providing incentives to protect habitat, many of the projects we support, seek to alleviate fears about jaguars in human communities through education. They also frequently provide

landowners with concrete strategies and methods that reduce conflict in such a way that humans and jaguars can co-exist. As a result, landowners are better able to protect their livelihoods and economic interests while helping protect jaguars. They achieve these goals by discouraging jaguars from coming into contact with their livestock, by reforesting areas of their land, and by helping maintain the species' natural prey populations. Based on project reporting to date, most landowners who employ jaguar-friendly ranching techniques see a dramatic reduction in attacks and subsequent livestock mortality. A project in Paraguay has reduced cattle mortality from jaguar attacks by 80-100 percent at 12 sites that cover an area more than 770 square miles. Another project in the Maya Biosphere of Guatemala has reduced cattle mortality from jaguar attacks by approximately 70 percent at 283 properties, covering about 11,603 hectares of land now under improved management.

Q: What are the requirements for a full recovery of the jaguar?

A: The approach in this Recovery Plan is as follows:

- Two recovery units are included, the Northwestern Recovery Unit (NRU) and the larger Pan-American Recovery Unit (PARU). The NRU extends from south-central Arizona and extreme southwestern New Mexico, United States, south to Colima, Mexico. The PARU encompasses 18 countries from Mexico to Argentina. These units are further divided into core, secondary, and peripheral areas.
- The status of and threats to jaguars in the PARU are summarized and general actions and criteria for addressing these threats and evaluating rangewide recovery are recommended.
- Detailed criteria and actions necessary to recover jaguar populations in the NRU are provided.

The Service will consider removing the jaguar from the ESA list due to recovery when <u>all</u> of the following conditions are met:

<u>A. PARU</u>

i. The status of the jaguar changes to Least Concern (LC) and is maintained under the IUCN Red List criteria (as defined by the World Conservation Union, http://www.iucnredlist.org) for at least 20 more years after first qualifying for LC, which would mean threats have been reduced so the jaguar population is no longer at risk of a $\geq$ 30 percent decline because its area of occupancy, extent of occurrence, and/or habitat quality, as well as actual or potential levels of exploitation, have been stable for at least 40 years.

<u>B. NRU</u>

i. Maintain approximately 60 percent occupancy (proportion of cells) in each of the Core Areas over 40 years (inclusive of the 20 years required to downlist).

ii. Over 40 years, genetic distance (e.g., F_{ST} or G_{ST}) between the Sonora and Jalisco Core Areas does not significantly increase, and inbreeding coefficients (F_{IS} or G_{IS}) within each of the Sonora and Jalisco Core Areas do not significantly increase.

iii. During a period of 40 years, the average of at least 30 percent of the adult population within the Sonora and Jalisco Core Areas are female (based on data gathered through surveying, monitoring, genetic analysis, etc.).

iv. Agency policies and regulations (including transportation siting and design), land-use regulations, and landowner agreements in Mexico are sufficient to ensure the network of ≥ 100-km^2 blocks (the minimum area capable of supporting at least three breeding females) of high-quality habitat and habitat connections between blocks within each Core Area (Sonora and Jalisco) will support genetically and demographically viable jaguar populations for the foreseeable future.

v. Agency policies and regulations (including transportation), land-use regulations, and landowner agreements in Mexico are sufficient to ensure landscape permeability will be maintained for jaguars within the Sinaloa Secondary Area.

vi. Agency policies and regulations (including transportation), land-use regulations, and landowner agreements in the United States and Mexico are sufficient to ensure landscape permeability, including at least two trans-border linkages, will be maintained for jaguars throughout the Borderlands Secondary Area.

vii. The threat of direct human killing of jaguars is decreased or maintained at sustainable levels as measured by acceptable evidence or an index.

viii. Effective federal, state, tribal, and/or local laws are in place in the NRU that ensure killing of jaguars is prohibited or regulated so viable populations of the species can be maintained.

BASIC COMMUNICATIONS STRATEGY

FOR ROUTINE NON-CONTROVERSIAL ANNOUNCEMENTS

SECTION I: GENERAL INFORMATION

1. **Title:** Final Recovery Plan for the Jaguar

2. **DTS number** 068832

3. **What is the action triggering this communications plan?** *(Please explain in no more than three sentences)*

The Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar.

4. **What is the proposed date for this action? Why has it been selected? Is it flexible?**

Proposed date for the announcement is April 11, 2019. The plan was signed by the Southwest Regional Director in July 2018; however, the announcement was delayed to accommodate extensive review and inter-agency coordination. The April 11 date allows for a final review by headquarters, notification of DOI, and facilitation of a coordinated rollout by the Jaguar Recovery Team (state, NGO, tribal and international partners.)

5. **Which office is leading this communications effort and which other programs, regions or groups are involved?**

Region 2 External Affairs and Arizona Ecological Services Office. (The Conservation Planning Specialist Group and the Wildlife Conservation Society contributed substantially to technical aspects of the plan and will be available to contribute technical expertise.)

SECTION II: GOALS AND MESSAGES

6. **What story do we want to tell?**

Reversing the decline of the jaguar (America's largest cat) is possible, but it will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States south to Argentina. The final recovery plan

sets goals for improving the species' status across its range and provides a framework whereby all stakeholders can align their efforts to achieve recovery. Critical to the recovery of the jaguar is conservation of key jaguar habitat (including core habitat areas and corridors) and populations. Due to past habitat loss, it is unlikely jaguars will be fully self-sustaining throughout their entire historical range. We anticipate that it will take a minimum of 50 years to recover the jaguar.

7. What are our key messages? *(These should be top concepts that readers should take away, including an understanding of why this action matters and why they should care, not a list of facts, which should be placed in the appendix. List no more than four!)*

Primary messages:

- Reversing the decline of the jaguar -- America's largest wild cat -- is possible. It will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States to Argentina.
- Through the Endangered Species Act recovery planning process, nineteen nations and diverse conservation organizations are working together to protect this important and charismatic species.
- Primary threats to the jaguar throughout its range are loss of habitat, direct killing and depletion of its prey. The recovery plan identifies conservation activities in every country and region for addressing threats and sets goals for minimizing threats and establishing viable jaguar populations throughout their expansive range.
- The recovery plan proposes two corridors that are in remote and rugged countryside that can accommodate jaguar movements across the United States/Mexico border.
- Border interventions and operations in these areas, at present, are most practically addressed through surveillance and remote detection (electronics, towers, etc.). The U.S.-Mexico border is currently permeable to jaguar movement at these dispersal corridors, and continued work with the U.S. Customs and Border Protection (CBP) will remain important to allow for ongoing opportunities for cross-border movement of jaguars.

Secondary messages:

- The recovery plan describes two large jaguar recovery units – the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina and the Northwestern Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. *The plan recognizes that countries within the PARU will be the principal contributors to its recovery.* Through the NRU, the Service will continue to promote jaguar recovery throughout its range, as it has in the past.
- The final recovery plan focuses on the NRU because this is where the Service has legal jurisdiction. We also have close working relationships with Mexico on

behalf of the jaguar's recovery. The NRU includes jaguars that occupy the U.S. Southwest borderlands region. Since 1996, seven individual male jaguars have been documented in the United States (southern Arizona and southwestern New Mexico). These jaguars are believed to be expanding their range from the nearest core area and breeding population, which is approximately 130 miles south of the U.S.-Mexico border in Sonora. Recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity.

If-Asked Only Statements:

- The Service is working closely with federal and other partners to promote border security while protecting the jaguar and its habitat. The recovery plan proposes two corridors that are in particularly rugged countryside that can accommodate jaguar movements across the United States – Mexico border.
- The Service is not aware of any proposals to build new border fence on the Arizona border. Some existing fence is being replaced, but it is a direct replacement, not an upgrade from vehicle to pedestrian fence.]

The binational recovery team has not prescribed jaguar reintroductions in the United States. The recovery plan focuses on efforts to sustain habitat, eliminate poaching, maintain at least two borderland dispersal corridors, and improve human social acceptance of the jaguar to accommodate jaguars that disperse into the United States.

For additional background and approved messaging on role of CBP and the U.S. Border Patrol in the Jaguar Recovery Plan, see Appendix II below.

SECTION III: IMPLEMENTATION

8. Implementation timeline *(If not known, put TBD or the number of days/hours before/after the announcement*

Target Date	Tactic	Responsible
All times are in the Mountain (ET -2) time zone		
All dates and times are predicated on date determined for release of Final Recovery Plan		

At least 7 days prior to public announcement	Wildlife Conservation Society notification	Humphrey
2-3 days before announcement	Embargoed pitch to AP and/or national reporter(s)? Susan Montoya (AP)	Humphrey/Hires
Afternoon of signature (2 pm MT)	Notify New Mexico and Arizona fish and wildlife agency directors	Lueders or Millsap/Humphrey/McIntyre
Afternoon of signature (2 pm MT)	Notify AZ and NM congressional members, and congressional committees of anticipated availability	R2 Lesli Gray/CLA Alyssa Hausman
Afternoon of signature (2 pm MT)	Notify southern Arizona and New Mexico tribes of anticipated availability	Nystedt/Humphrey
Afternoon of signature (2 pm MT)	Confirm plan availability with recovery team member organizations	Alanen/Stanford
Morning after signature (8 am MT)	Post final recovery plan and news release to Arizona ES, ECOS, and R2 homepage	Kaplan/Crouse/ Campbell
Morning after signature (10 am MT)	Distribute news release to AZ, NM, Mexico, and international environmental news outlets	Humphrey
Morning after signature (10 am MT)	SMEs available for media response	Humphrey/Alanen/Stanford
Morning after signature (10 am MT)	Social media (Facebook) post	Barrus
Week after signature	[*Optional*] Provide written notification to affected parties, agencies	AESO

9. **Which communications tools are needed to support these strategies and tactics?** *(Be as specific as possible about the products identified and who will produce them)*

Tool	Responsible	Due Date
News Release	Humphrey	3/15/2019
Photos (www.flickr.com/photos/usfws_southwest/sets/72157632294203147/)	Humphrey	3/15/2019
"If-asked" border talking points	Humphrey	3/15/2019
Video support: www.fws.gov/southwest/es/arizona/Jaguar.htm	Humphrey	3/15/2019
Jaguar population maps	Alanen	3/15/2019
FAQs (FAQs presently in Item 7 (above) as if-asked only) can be converted into FAQs)	Humphrey	3/15/2019

10. **Social media plan** *(Provide a list of accounts to be used as well as sample hashtags, messages, multimedia and other links, etc. as appropriate)*

https://www.facebook.com/USFWSSouthwest?ref=mf

The Service and its partners in the binational Jaguar Recovery Team can recover the jaguar, but it will take time, effort and collaboration with partners across species' 19-country range. A recently released recovery plan sets goals for improving the species status across its range and provides a framework for achieving recovery.

Here in the Southwest, male jaguars from a core breeding population in Mexico occasionally occupy mountain ranges along our southern border with the country.

See more at: https://www.fws.gov/southwest/es/arizona/Jaguar.htm

11. **Stakeholder contact grids** *(For each, paste in a table that provides organization name, contact person, how the person will be contacted, phone or email address as appropriate and a name of the person who will be making contact)*

APPENDIX: ADDITIONAL BACKROUND INFORMATION AND MATERIALS

DO NOT PUT OTHER MATERIALS SUCH AS FAQs, NEWS RELEASE OR TALKING POINTS IN THIS SECTION. KEEP THOSE AS SEPARATE DOCUMENTS.

(Consider the following: What is the historical context? Does this relate to other issues that may not immediately be apparent (consider other programs and regions)? Is there a scientific basis to this issue? If so what is it?)

APPENDIX 1

Historical Context:

Following a 2009, Arizona District Court decision, FWS determined that developing a recovery plan for jaguars will contribute to their conservation (in recognition that most of the species' habitat and almost all individuals occur outside if the United States).

FWS reconfigured and expanded a binational Jaguar Recovery Team and charged them with developing a recovery outline, which they completed in April 2012. The FWS drew heavily from the data compiled in the recovery outline for the development of jaguar critical habitat designation (in the U.S.), which was finalized in March 2014.

Summary:

In 2010, a binational Jaguar Recovery Team was convened with experts and stakeholders from both the U.S. and Mexico to develop a jaguar recovery plan. The Recovery Plan considers the jaguar throughout its range, but primarily focuses on the Northwestern Recovery Unit (NRU), which extends from the southwestern U.S. to western Mexico. To achieve delisting, viable jaguar populations should be secured by protecting jaguars and their habitat; reducing human-caused mortality of jaguars, particularly retaliatory killing due to livestock depredation; improving, enacting, and/or enforcing effective laws that regulate illegal killing of jaguars, jaguar prey, and habitat loss; securing adequate funding to implement recovery actions; and maintaining and developing partnerships in the Americas, particularly in Mexico.

Regarding the role of the U.S. in recovering the jaguar, recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity. Actions to implement this involve identifying and mapping corridors and potential impediments to these linkages, along with developing and implementing strategies to maintain connectivity. Recovery actions to maintain connectivity and overall ecosystem/watershed health are ongoing in many areas in the U.S. by the U.S. Forest Service or Bureau of Land Management, where much of the linkage habitat into the U.S. occurs.

We received over 13,000 public comments on the draft Recovery Plan. We requested five peer reviews and received comments from two, both from Mexico. We also received comments from the Arizona Game and Fish Department, New Mexico Game and Fish Department, and the San Carlos Apache Tribe. We incorporated all substantive comments into the final Recovery Plan. If we did not incorporate substantive comments, we responded to them in our response to comments documents. Review of the Recovery Plan was also coordinated with the New Mexico Ecological Services Field Office, and Buenos Aires and San Bernardino National Wildlife Refuges.

MAIN DECISION OR MESSAGE: Due to past habitat loss, it is unlikely that jaguars will be fully self-sustaining throughout their historical range; however, conservation of key jaguar habitat and populations in their current range will be critical to the recovery of jaguars. We anticipate that it will take a minimum of 50 years to recover the jaguar. The estimated cost to recovery is $605,648,000 (among 19 countries over 50 years).

APPENDIX II

Jaguar Recovery Plan - Customs and Border Protection/U.S. Border Patrol Involvement
August 31, 2018

Customs and Border Protection (CBP) via U.S. Border Patrol (USBP) has been involved through all phases of jaguar draft and final recovery plan planning processes. In 2010, at the inception of the binational Jaguar Recovery Team (JRT), USBP was invited to serve as a member of the Implementation Subgroup of the JRT, as an official representative of USBP. Since 2010, USBP has had a member on the JRT through the present (Charles Trost).

CBP also has significantly financially supported several projects, described in Table 3 of the Jaguar Recovery Plan (JRP), that were conducted to inform important content for the Plan and implement recovery actions identified in the JRP. These projects include genetics studies, habitat modeling, jaguar surveying and monitoring, citizen science education and outreach, rancher incentives, road crossing designs, citizen attitude surveys, and portions of Population Viability Analyses (PVA and PHVA) (see Table 3 below).

USBP participated in many meetings to discuss and prepare the JRP, and did not express significant concerns about border issues. In the spirit of cooperation, CBP permitted FWS and Jaguar Recovery Team to use their GIS layers of the border to develop a map that illustrates degrees of border permeability (no fences, including a vehicle or pedestrian fence), and this information is illustrated on Figure 4 of the JRP. Both this figure and the JRP indicate that portions of the border are currently permeable to jaguar movement and that continued work between FWS and CBP will remain important to allow for ongoing opportunities for cross-border jaguar movement.

As part of outreach on the JRP, CBP was informed of the option to comment during the public comment period, and did not provide any comments. Throughout the development of the JRP, CBP has had opportunities to address border issues and through these and related actions CBP's and BP's concerns have been fully incorporated into the Jaguar Recovery Plan.

Table 3. Summary of U.S. Customs and Border Protection-funded projects and their conservation benefit to jaguars. NRU = Northwestern Recovery Unit for the jaguar. USFWS = U.S. Fish and Wildlife Service. Final reports of these projects can be found at https://www.fws.gov/southwest/es/arizona/Jaguar.htm.

Project	Final Deliverable(s)	Purpose/Conservation Benefit
Genetics	*Jaguar taxonomy and genetic diversity for southern Arizona, U.S., and Sonora, Mexico*	Investigates unique genetic diversity of jaguars at the northern edge of the range and answers taxonomic question of whether or not northern jaguars are a distinct subspecies
PVAs	*Population Viability Analysis for the Jaguar (Panthera onca) in the Northwestern Range*	Describes demographic viability of the jaguar metapopulation defined as the NRU
PVAs (cont.)	*Addendum: Population Viability Analysis for the Jaguar (Panthera onca) in the Northwestern Range*	Describes the structure, implementation, and interpretation of a new set of demographic simulations of jaguar population viability in core areas of the NRU
Habitat Modeling	*Digital Mapping in Support of Recovery Planning for the Northern Jaguar*	Assisted USFWS in digital mapping aspects of recovery planning for the northern jaguar (habitat models used in population viability analyses, above, and Recovery Outline for the Jaguar)
	Jaguar Habitat Modeling and Database Update	Updates jaguar database with additional observations, conducts analyses of different selections of jaguar observations, produces five revised versions of the habitat model (habitat models used in population viability analyses, above, as well as this Recovery Plan)
	jaguardata.info	Converts jaguar observations database to web-based platform allowing stakeholders, general public, and scientific community to search and access jaguar data; provides an interface for administrators to add, edit, and delete jaguar observations in the NRU
Jaguar Survey and Monitoring (U.S. portion of NRU)	*Jaguar Surveying and Monitoring in the United States: Final Report*	Culver (2016) provides results and analyses of the two-year investigation of jaguars, prey base, and habitat in the U.S. portion of the NRU to inform recovery planning; multiple photos of one jaguar (and three ocelots) provided to USFWS and posted on USFWS Flickr site
Jaguar Survey and Monitoring (Tohono O'odham Nation; TON)	*Jaguar Surveying and Monitoring on the Tohono O'odham Nation*	Provides results and analyses of surveys for jaguars and ocelots on the TON to inform recovery planning

Citizen Science, Education, Outreach, and Grant Writing	*Citizen Science Teams*	Developed and implementing a citizen science program to survey and monitor for jaguars within the U.S. portion of the NRU
	K-12 Jaguar Educational Curricula	Developed and implementing formal educational curricula on jaguar and ocelot conservation for different educational levels to promote an understanding of feline conservation
Citizen Science, Education, Outreach, and Grant Writing (cont.)	*Jaguar Conservation Outreach*	Developed and presented a PowerPoint presentation on jaguar and ocelot biology and conservation for the general public to promote an understanding of feline conservation
	Education and Outreach Materials	Developed posters, stickers, etc. to promote jaguar conservation within the NRU
	Grant Writing	Applied for funding opportunities to continue aspects of jaguar survey and monitoring effort currently being conducted, to continue and/or expand the volunteer citizen science program, and to continue and/or expand public outreach and school education programs
Rancher Incentive Program	*Complete Project Overview*	See http://udallcenter.arizona.edu/jaguarproject/ for project summary, additional information, and reports
	Assessment of Rancher Knowledge	Pilot assessment of nine ranch owner/manager's knowledge of jaguar conservation issues
	Ranch Owner/Manager Survey Questionnaire	Survey of ranch owner/manager knowledge about and attitudes toward jaguar conservation issues
	Results of Ranch Owner/Manager Survey Questionnaire	Summary of survey results included in Results of Rancher Workshops report (below); comprehensive analysis of data still to be published
	Report on PES sources	Conducted research policy analysis of payment for ecosystem services (PES) program and analysis of jaguar-friendly ranch management options for distribution; available at http://extension.arizona.edu/pubs/payments-ecosystem-services-southern-arizona-ranchers
	Rancher Workshops	Developed workshops to enhance rancher knowledge of jaguar conservation, jaguar friendly ranch management practices, and conservation incentive programs; as well as receive feedback from ranchers regarding incentive programs that may generate participation

	Brochures	Provides a simple program of actions for landowners to implement for promoting jaguar conservation on their lands
Survey of Residents' Attitudes on Jaguar Conservation	*Results of Survey of Residents' Attitudes on Jaguar Conservation*	Provides insights into attitudes, mores, and level of knowledge of stakeholders in the U.S. portion of the NRU regarding jaguars to understand what is needed from a social perspective to create an environment that is conducive to jaguar conservation
Jaguar Survey and Monitoring Protocol	*Review of Jaguar Survey and Monitoring Techniques and Methodologies* (English and Spanish)	Provides a review of literature on jaguar and, as appropriate, other large felid survey and monitoring techniques and methodologies
	Jaguar Survey and Monitoring Protocol (English and Spanish)	Provides a jaguar survey and monitoring protocol applicable in measuring occupancy recovery criteria (3.3.1.B.i. and 3.3.2.B.i.) in the NRU, as well as other areas rangewide
Review and Develop Recommendations for Road Crossing Designs	*Review of Road Passage Designs for Jaguars*	Conducts a review of enhancements (e.g., underpasses, overpasses, guiding fences, etc.) that allow for passage of large carnivores, particularly jaguars, across road corridors
	Road Passage Design Recommendations (English and Spanish)	Develops recommendations for enhancements (e.g., underpasses, overpasses, guiding fences, etc.) that allow for passage of jaguars across road corridors that would be effective in a variety of different habitat types in the NRU
	Road Passage Location Recommendations (English and Spanish)	Identifies potential areas in the NRU where enhancements (e.g., underpasses, overpasses, guiding fences, etc.) would improve the passage of jaguars across different types of road corridors that would be effective in a variety of different habitat types

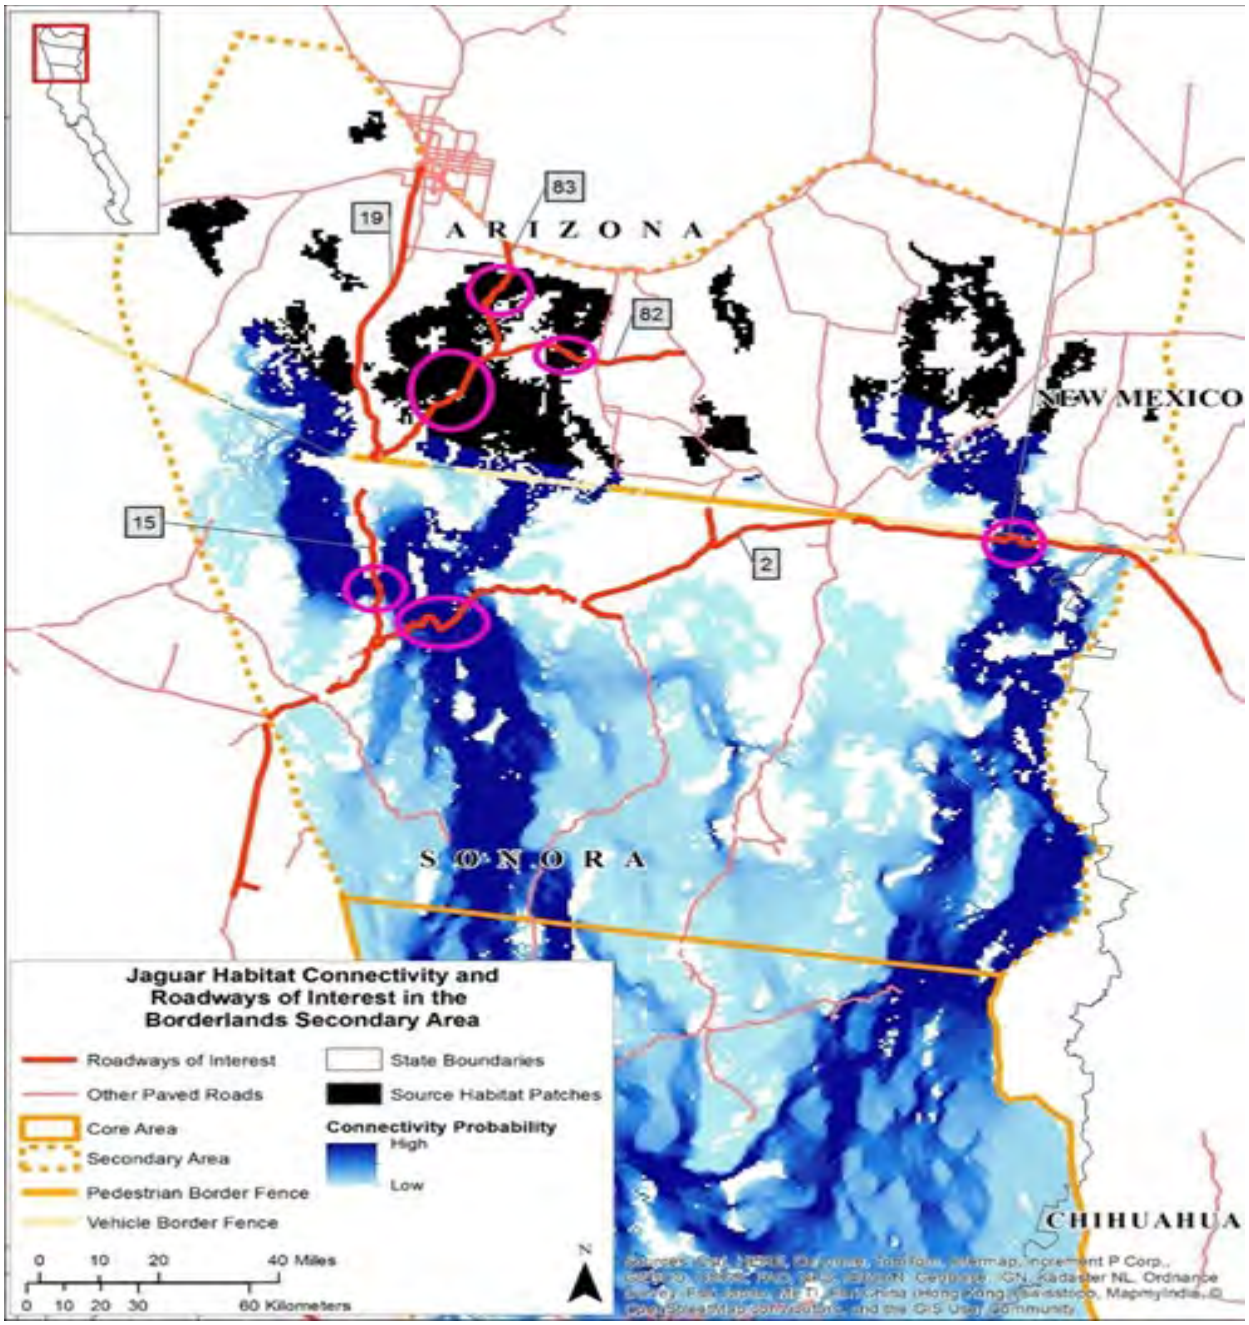

Figure 4. Map of habitat connectivity and roadways of interest in the Borderlands Secondary Area as modeled by Stoner et al. (2015) (some road segments in densely populated areas omitted). A visual examination of this connectivity model, which extends across the entirety of the Northwestern Recovery Unit, reveals three corridors that extend across the U.S.-Mexico border. These corridors are intersected by Mexico Federal Highways 2 and 15. U.S. State Routes 82 and 83 also intersect with "source" habitat patches (used for modeling purposes), which may impact jaguar habitat connectivity. These areas are good candidates for further assessment to determine the potential for road crossing mitigation structures.

Hi Charisa,

Please see attached requested items, for announcing the final jaguar recovery plan. Let me know you think they'd also like to see the actual final recovery plan as a PDF (it's a fairly large file). Thanks,

Brian

DTS NOTE TO REVIEWERS

DCN: 068832

Subject: Outreach Package for Final Recovery Plan for the Jaguar

Background: The Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar. Although the vast majority of the jaguar's population in the Americas is from Mexico to Argentina, this recovery plan focuses on its range in the American Southwest and Mexico, where the United States has the most jurisdiction.

Deadline for completing surname: The Notice of Availability announcing the posting of this final recovery plan to a FWS Region 2 website is targeted for being sent to the *Federal Register* on April 11, 2019. This date is flexible.

Materials: *Outreach plan, news release, FAQs*

Special considerations:

While recovery plans are non-regulatory guidance documents, this action will likely generate significant national and international attention, stakeholder interest and controversy. The jaguar is a charismatic megafauna and its northernmost range extends across the US-Mexico border to the US Southwest. **As such, this issue involves border wall issues.** (The recovery plan for the US includes two 'border dispersal corridors' in rugged, remote areas of Arizona).

Careful messaging has been crafted and prioritized in this outreach to detail political sensitivities and how the US portion of the jaguar's historic range represents just 1/10th of 1 percent of its 19-country range. Outreach to DOI, Congress, stakeholders and media should account for the potential for controversy and misconceptions around this issue.

Service and Binational Team Complete ESA Recovery Plan for America's Largest Wild Cat

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final Endangered Species Act (ESA) recovery plan for the jaguar, currently listed under the act at endangered. The plan provides a recovery framework and goals for improving the species' status throughout its entire 19-country range while focusing on the jaguar populations in northwestern Mexico and the southwestern United States.

The final recovery plan describes two large jaguar recovery units – the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina, and the Northwestern Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. More than 99 percent of the jaguar's range is in Central and South America, so the plan recognizes that countries within the PARU will be the principal contributors to its recovery. The Service will continue to promote jaguar recovery throughout the range of the jaguar, including continued funding support.

The Service has established strong working relationships with state and local partners, conservation groups and the Mexican government. The binational recovery team has not prescribed jaguar reintroductions in the United States but calls for focusing efforts on sustaining potential habitat. In addition, the plan calls for establishing at least two borderland dispersal corridors for jaguars' continued movement through remote, rugged habitat between the countries, eliminating poaching, and improving social acceptance of the jaguar to accommodate their return to the United States.

"The binational recovery team's scientific expertise in protecting the jaguar has been invaluable," said Amy Lueders, the Service's Southwest Regional Director. "We recognize the challenges involved in conserving and recovering a species with such an expansive international range, and the team has laid out a comprehensive plan with goals that are achievable and realistic. We look forward to continuing to work with our diverse partners on this effort within and outside the United States."

Loss of habitat, direct killing of the cats, and depletion of prey are the primary factors contributing to the jaguar's current status and decreasing population trend. Due to past habitat loss, it is unlikely that jaguars will be fully self-sustaining throughout their entire historical range. However, conservation of key jaguar populations and habitat -- including core breeding and connective areas -- will be critical to jaguar recovery. We anticipate it will take a minimum of 50 years to recover the jaguar.

Since 1996, seven individual male jaguars have been documented in the United States, all in southern Arizona and southwestern New Mexico. These jaguars are believed to have come from the nearest core area and breeding population, approximately 130 miles south of the U.S.-Mexico border in Sonora.

Across the jaguar's primary range in Latin America, the Service is actively working with countries and local partners to protect and recover the cat. Conservation efforts include providing incentives for protecting jaguar habitat and prey, education campaigns addressing misinformation and fears, and providing landowners with strategies for co-existing with jaguars.

Recovery plans are not regulatory but provide a framework for recovery of a species so protection under the ESA is no longer necessary. This recovery plan includes scientific information about the species and provides recovery criteria, conservation actions necessary for its recovery and delisting from the ESA and estimates of the time and cost to carry out the measures needed to achieve the plan's goal.

To achieve delisting, viable jaguar populations must be secured throughout their range. This will require protecting jaguar habitat quality and connectivity; providing incentives to protect jaguars and their habitat; reducing human-caused mortality of jaguars, particularly retaliatory killing due to livestock depredation; improving, enacting and/or enforcing effective laws that regulate illegal killing of jaguars, jaguar prey and habitat loss; securing adequate funding to implement recovery actions; and maintaining and developing partnerships in the Americas, particularly in Mexico. These protections must remain in place after delisting to ensure the long-term viability of the species.

The binational Jaguar Recovery Team includes representatives of CONANP (National Commission of Protected Areas in Mexico), CEDES (Commission of Ecology and Sustainable Development of the State of Sonora), U.S. Department of Agriculture APHIS Wildlife Services and U.S. Forest Service, Bureau of Land Management, U.S. Border Patrol, Arizona Game and Fish Department, New Mexico Department of Game and Fish, Tohono O'odham Nation, Altar Valley Conservation Alliance, Malpai Borderlands Group, Naturalia, Panthera and several ranchers, landowners, stakeholders and universities in Mexico and the United States. Additionally, the Conservation Planning Specialist Group and the Wildlife Conservation Society contributed substantially to technical aspects of the recovery plan.

The Jaguar Recovery Plan is available at: https://www.fws.gov/southwest/es/arizona/Jaguar.htm or by request from Field Supervisor, U.S. Fish and Wildlife Service, Arizona Ecological Services Office, 9828 North 31st Avenue, #C3, Phoenix, AZ 85051–2517; phone 602/242-0210.

Questions and Answers: Final Recovery Plan for the Jaguar

Arizona Ecological Services Field Office **www.fws.gov/southwest/es/arizona/**

For Release: [Enter date here]
Contacts: Jeff Humphrey 602-242-0210

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, America's largest wild cat. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States and recommends site-specific conservation actions that contribute to jaguar recovery across its range.

Q: What does the jaguar recovery plan tell us?

A: Reversing the decline of the jaguar is possible, but it will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States south to Argentina. The final recovery plan sets goals for improving the species' status across its range and provides a framework for aligning stakeholder efforts to achieve recovery. Critical to the recovery of the jaguar is conservation of key jaguar habitat (including core areas and connective corridors) and populations. Due to past habitat loss, it is unlikely jaguars will be fully self-sustaining throughout their entire historical range. We anticipate that it will take a minimum of 50 years to recover the jaguar.

Q: What are the primary threats to the jaguar?

A: Loss of habitat, killing of individuals and depletion of prey throughout its range are the primary reasons for decreasing populations of jaguars. The recovery plan identifies conservation activities in every country and region for addressing each of these threats. It establishes goals for minimizing threats and for establishing viable populations throughout the jaguar's expansive range.

Q: What is a recovery plan?

A: Recovery plans are not regulatory but provide a framework for recovery of a species so protection under the ESA is no longer necessary. This recovery plan includes scientific information about the species and provides recovery criteria, conservation actions necessary for its recovery and delisting from the ESA and estimates of the time and cost to carry out the measures needed to achieve the plan's goal.

Q: What are the strategies for conserving and recovering the jaguar in the final recovery plan?

A: The recovery plan describes two large jaguar recovery units: the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina, and the Northwestern Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. The plan

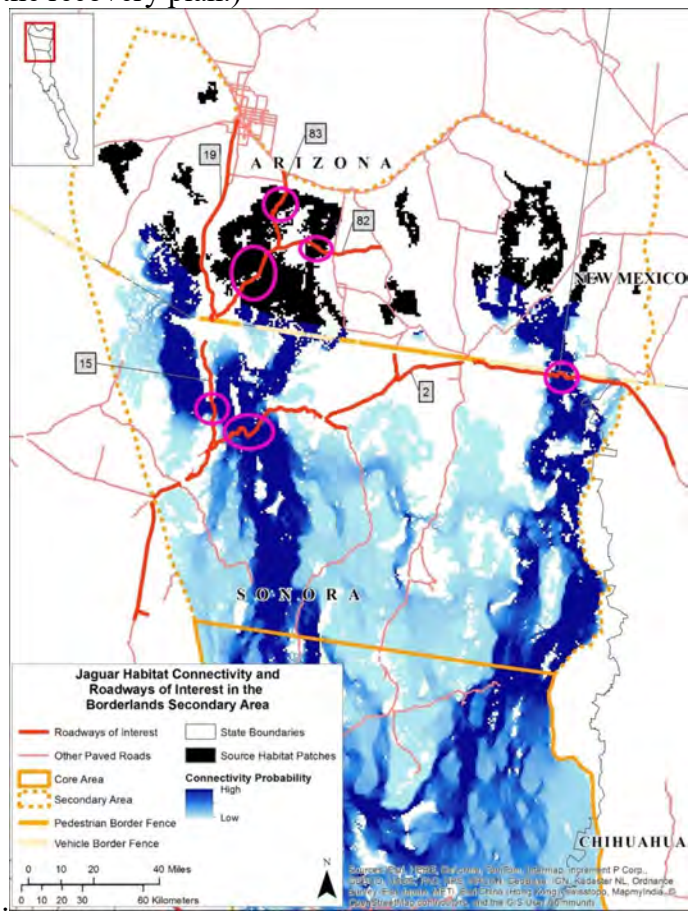
recognizes that countries within the PARU will be the principal contributors to jaguar recovery. As it has in the past, the Service will continue to promote jaguar recovery throughout the range of the jaguar.

The final recovery plan focuses on the NRU because this is where the Service has the most jurisdiction and has an established working relationship with Mexico. The NRU includes the jaguars that occupy the U.S. Southwest borderlands region. Since 1996, seven individual male jaguars have been documented in the United States (southern Arizona and southwestern New Mexico). These jaguars are believed to be expanding their range from the nearest core area and breeding population, which is approximately 130 miles south of the U.S.-Mexico border in Sonora. Recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity.

The binational recovery team has not prescribed jaguar reintroductions in the United States but focuses on efforts to sustain habitat, eliminate poaching, maintain at least two borderland dispersal corridors (see Figure 4 in the final recovery plan), and improve human social acceptance of the jaguar to accommodate jaguars that disperse into the United States.

Q: What are the borderland dispersal corridors referred to in the recovery plan and how critical are they to the recovery of jaguars in the United States?

A: Dispersal corridors are rugged, remote areas that presently male jaguars, presumably from the Sonora Core breeding area in Mexico, use to access secondary area habitat, a portion of which is in southern Arizona and New Mexico. These areas have been identified from habitat characteristics, historical records, recent sightings and photo monitoring in the United States and Mexico. (See Jaguar Habitat Connectivity and Identification of Potential Road Mitigation Locations in the NRU for the Jaguar report, as well as Figure 4 of the recovery plan.)



Continued jaguar access to habitat through transborder linkages is the sole mechanism identified in the recovery plan for continued jaguar occupation in the U.S. portion of the species' range. Maintaining this habitat connectivity is one of the recovery criteria for the Northwestern Recovery Unit. Research documents the importance of animal populations at the extremities of their ranges for the expansion and contraction of species' ranges and, ultimately, the long-term recovery of species.

These jaguar dispersal corridors are rugged and remote areas. Border interventions and operations in these areas, at present, are most practically addressed through surveillance and remote detection (electronics, towers, etc.). The U.S.-Mexico border is currently permeable to jaguar movement at these dispersal corridors. Continued work with the U.S. Customs and Border Protection (CBP) will remain important to allowing ongoing opportunities for cross-border movement of jaguars.

Q: How important is the recovery of jaguars in the United States to their overall recovery across their range?

A: The U.S. range of the jaguar represents the very northernmost edge of its 19-country range that extends all the way to South America. The U.S. range represents just one-tenth of 1 percent of its historic range.

Given that the jaguar is an international species with the vast majority of its range outside of the United States, primary actions to recover the jaguar will occur in other countries. Because more than 95 percent of the jaguar's habitat in the Northwestern Recovery Unit (NRU) is in Mexico, Mexico will be the primary contributor to the jaguar's recovery in the NRU. In the Pan-American Recovery Unit (PARU), countries within the jaguar's range will be the principal contributors to jaguar recovery.

The Service's limited resources are better applied to planning and on-the-ground implementation of conservation actions within the United States boundaries and in partnership with Mexico. Therefore, the Service and the Jaguar Recovery Team have established objective and measurable criteria for recovery and site-specific actions that, if implemented, will conserve viable jaguar populations in the northwestern portion of its range (e.g., the NRU). Priority is given to this unit because this is where the Service has the most jurisdiction, and we have an established working relationship with Mexico on issues of mutual concern.

Q: Was Customs and Border Patrol included in the developing of this plan?

A: Yes. U.S. Border Patrol (Tucson Sector) is represented on the Implementation Subgroup of the Jaguar Recovery Team. Other U.S. border area groups on the subgroup include ranchers, Malpais Borderlands Group, Altar Valley Conservation Alliance (ranching group), and state and federal land and wildlife managers.

Q: What are the actions and partnerships the Service is taking to support recovery of the jaguar in its primary range in 19 Central and South American countries?

A: In recent years, the Service's International Affairs Program has been at the forefront of supporting the conservation of jaguars throughout their range in Mexico, Central America and South America. During the past four years alone, we have supported 23 jaguar-related projects in 10 countries with more than $1 million in conservation funding. When jaguar habitat is conserved, many other species directly benefit.

In addition to providing incentives to protect habitat, many of the projects we support, seek to alleviate fears about jaguars in human communities through education. They also frequently provide

landowners with concrete strategies and methods that reduce conflict in such a way that humans and jaguars can co-exist. As a result, landowners are better able to protect their livelihoods and economic interests while helping protect jaguars. They achieve these goals by discouraging jaguars from coming into contact with their livestock, by reforesting areas of their land, and by helping maintain the species' natural prey populations. Based on project reporting to date, most landowners who employ jaguar-friendly ranching techniques see a dramatic reduction in attacks and subsequent livestock mortality. A project in Paraguay has reduced cattle mortality from jaguar attacks by 80-100 percent at 12 sites that cover an area more than 770 square miles. Another project in the Maya Biosphere of Guatemala has reduced cattle mortality from jaguar attacks by approximately 70 percent at 283 properties, covering about 11,603 hectares of land now under improved management.

Q: What are the requirements for a full recovery of the jaguar?

A: The approach in this Recovery Plan is as follows:

- Two recovery units are included, the Northwestern Recovery Unit (NRU) and the larger Pan-American Recovery Unit (PARU). The NRU extends from south-central Arizona and extreme southwestern New Mexico, United States, south to Colima, Mexico. The PARU encompasses 18 countries from Mexico to Argentina. These units are further divided into core, secondary, and peripheral areas.
- The status of and threats to jaguars in the PARU are summarized and general actions and criteria for addressing these threats and evaluating rangewide recovery are recommended.
- Detailed criteria and actions necessary to recover jaguar populations in the NRU are provided.

The Service will consider removing the jaguar from the ESA list due to recovery when <u>all</u> of the following conditions are met:

<u>A. PARU</u>

i. The status of the jaguar changes to Least Concern (LC) and is maintained under the IUCN Red List criteria (as defined by the World Conservation Union, http://www.iucnredlist.org) for at least 20 more years after first qualifying for LC, which would mean threats have been reduced so the jaguar population is no longer at risk of a $\geq$ 30 percent decline because its area of occupancy, extent of occurrence, and/or habitat quality, as well as actual or potential levels of exploitation, have been stable for at least 40 years.

<u>B. NRU</u>

i. Maintain approximately 60 percent occupancy (proportion of cells) in each of the Core Areas over 40 years (inclusive of the 20 years required to downlist).

ii. Over 40 years, genetic distance (e.g., F_{ST} or G_{ST}) between the Sonora and Jalisco Core Areas does not significantly increase, and inbreeding coefficients (F_{IS} or G_{IS}) within each of the Sonora and Jalisco Core Areas do not significantly increase.

iii. During a period of 40 years, the average of at least 30 percent of the adult population within the Sonora and Jalisco Core Areas are female (based on data gathered through surveying, monitoring, genetic analysis, etc.).

iv. Agency policies and regulations (including transportation siting and design), land-use regulations, and landowner agreements in Mexico are sufficient to ensure the network of ≥ 100-km^2 blocks (the minimum area capable of supporting at least three breeding females) of high-quality habitat and habitat connections between blocks within each Core Area (Sonora and Jalisco) will support genetically and demographically viable jaguar populations for the foreseeable future.

v. Agency policies and regulations (including transportation), land-use regulations, and landowner agreements in Mexico are sufficient to ensure landscape permeability will be maintained for jaguars within the Sinaloa Secondary Area.

vi. Agency policies and regulations (including transportation), land-use regulations, and landowner agreements in the United States and Mexico are sufficient to ensure landscape permeability, including at least two trans-border linkages, will be maintained for jaguars throughout the Borderlands Secondary Area.

vii. The threat of direct human killing of jaguars is decreased or maintained at sustainable levels as measured by acceptable evidence or an index.

viii. Effective federal, state, tribal, and/or local laws are in place in the NRU that ensure killing of jaguars is prohibited or regulated so viable populations of the species can be maintained.

BASIC COMMUNICATIONS STRATEGY

FOR ROUTINE NON-CONTROVERSIAL ANNOUNCEMENTS

SECTION I: GENERAL INFORMATION

1. **Title:** Final Recovery Plan for the Jaguar

2. **DTS number** 068832

3. **What is the action triggering this communications plan?** *(Please explain in no more than three sentences)*

The Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar.

4. **What is the proposed date for this action? Why has it been selected? Is it flexible?**

Proposed date for the announcement is April 11, 2019. The plan was signed by the Southwest Regional Director in July 2018; however, the announcement was delayed to accommodate extensive review and inter-agency coordination. The April 11 date allows for a final review by headquarters, notification of DOI, and facilitation of a coordinated rollout by the Jaguar Recovery Team (state, NGO, tribal and international partners.)

5. **Which office is leading this communications effort and which other programs, regions or groups are involved?**

Region 2 External Affairs and Arizona Ecological Services Office. (The Conservation Planning Specialist Group and the Wildlife Conservation Society contributed substantially to technical aspects of the plan and will be available to contribute technical expertise.)

SECTION II: GOALS AND MESSAGES

6. **What story do we want to tell?**

Reversing the decline of the jaguar (America's largest cat) is possible, but it will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States south to Argentina. The final recovery plan

sets goals for improving the species' status across its range and provides a framework whereby all stakeholders can align their efforts to achieve recovery. Critical to the recovery of the jaguar is conservation of key jaguar habitat (including core habitat areas and corridors) and populations. Due to past habitat loss, it is unlikely jaguars will be fully self-sustaining throughout their entire historical range. We anticipate that it will take a minimum of 50 years to recover the jaguar.

7. What are our key messages? *(These should be top concepts that readers should take away, including an understanding of why this action matters and why they should care, not a list of facts, which should be placed in the appendix. List no more than four!)*

Primary messages:

- Reversing the decline of the jaguar -- America's largest wild cat -- is possible. It will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States to Argentina.
- Through the Endangered Species Act recovery planning process, nineteen nations and diverse conservation organizations are working together to protect this important and charismatic species.
- Primary threats to the jaguar throughout its range are loss of habitat, direct killing and depletion of its prey. The recovery plan identifies conservation activities in every country and region for addressing threats and sets goals for minimizing threats and establishing viable jaguar populations throughout their expansive range.
- The recovery plan proposes two corridors that are in remote and rugged countryside that can accommodate jaguar movements across the United States/Mexico border.
- Border interventions and operations in these areas, at present, are most practically addressed through surveillance and remote detection (electronics, towers, etc.). The U.S.-Mexico border is currently permeable to jaguar movement at these dispersal corridors, and continued work with the U.S. Customs and Border Protection (CBP) will remain important to allow for ongoing opportunities for cross-border movement of jaguars.

Secondary messages:

- The recovery plan describes two large jaguar recovery units – the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina and the Northwestern Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. *The plan recognizes that countries within the PARU will be the principal contributors to its recovery.* Through the NRU, the Service will continue to promote jaguar recovery throughout its range, as it has in the past.
- The final recovery plan focuses on the NRU because this is where the Service has legal jurisdiction. We also have close working relationships with Mexico on

behalf of the jaguar's recovery. The NRU includes jaguars that occupy the U.S. Southwest borderlands region. Since 1996, seven individual male jaguars have been documented in the United States (southern Arizona and southwestern New Mexico). These jaguars are believed to be expanding their range from the nearest core area and breeding population, which is approximately 130 miles south of the U.S.-Mexico border in Sonora. Recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity.

If-Asked Only Statements:

- The Service is working closely with federal and other partners to promote border security while protecting the jaguar and its habitat. The recovery plan proposes two corridors that are in particularly rugged countryside that can accommodate jaguar movements across the United States – Mexico border.
- The Service is not aware of any proposals to build new border fence on the Arizona border. Some existing fence is being replaced, but it is a direct replacement, not an upgrade from vehicle to pedestrian fence.]

The binational recovery team has not prescribed jaguar reintroductions in the United States. The recovery plan focuses on efforts to sustain habitat, eliminate poaching, maintain at least two borderland dispersal corridors, and improve human social acceptance of the jaguar to accommodate jaguars that disperse into the United States.

For additional background and approved messaging on role of CBP and the U.S. Border Patrol in the Jaguar Recovery Plan, see Appendix II below.

SECTION III: IMPLEMENTATION

8. Implementation timeline *(If not known, put TBD or the number of days/hours before/after the announcement*

Target Date	Tactic	Responsible
All times are in the Mountain (ET -2) time zone		
All dates and times are predicated on date determined for release of Final Recovery Plan		

At least 7 days prior to public announcement	Wildlife Conservation Society notification	Humphrey
2-3 days before announcement	Embargoed pitch to AP and/or national reporter(s)? Susan Montoya (AP)	Humphrey/Hires
Afternoon of signature (2 pm MT)	Notify New Mexico and Arizona fish and wildlife agency directors	Lueders or Millsap/Humphrey/McIntyre
Afternoon of signature (2 pm MT)	Notify AZ and NM congressional members, and congressional committees of anticipated availability	R2 Lesli Gray/CLA Alyssa Hausman
Afternoon of signature (2 pm MT)	Notify southern Arizona and New Mexico tribes of anticipated availability	Nystedt/Humphrey
Afternoon of signature (2 pm MT)	Confirm plan availability with recovery team member organizations	Alanen/Stanford
Morning after signature (8 am MT)	Post final recovery plan and news release to Arizona ES, ECOS, and R2 homepage	Kaplan/Crouse/ Campbell
Morning after signature (10 am MT)	Distribute news release to AZ, NM, Mexico, and international environmental news outlets	Humphrey
Morning after signature (10 am MT)	SMEs available for media response	Humphrey/Alanen/Stanford
Morning after signature (10 am MT)	Social media (Facebook) post	Barrus
Week after signature	[*Optional*] Provide written notification to affected parties, agencies	AESO

9. **Which communications tools are needed to support these strategies and tactics?** *(Be as specific as possible about the products identified and who will produce them)*

Tool	Responsible	Due Date
News Release	Humphrey	3/15/2019
Photos (www.flickr.com/photos/usfws_southwest/sets/72157632294203147/)	Humphrey	3/15/2019
"If-asked" border talking points	Humphrey	3/15/2019
Video support: www.fws.gov/southwest/es/arizona/Jaguar.htm	Humphrey	3/15/2019
Jaguar population maps	Alanen	3/15/2019
FAQs (FAQs presently in Item 7 (above) as if-asked only) can be converted into FAQs)	Humphrey	3/15/2019

10. **Social media plan** *(Provide a list of accounts to be used as well as sample hashtags, messages, multimedia and other links, etc. as appropriate)*

https://www.facebook.com/USFWSSouthwest?ref=mf

The Service and its partners in the binational Jaguar Recovery Team can recover the jaguar, but it will take time, effort and collaboration with partners across species' 19-country range. A recently released recovery plan sets goals for improving the species status across its range and provides a framework for achieving recovery.

Here in the Southwest, male jaguars from a core breeding population in Mexico occasionally occupy mountain ranges along our southern border with the country.

See more at: https://www.fws.gov/southwest/es/arizona/Jaguar.htm

11. **Stakeholder contact grids** *(For each, paste in a table that provides organization name, contact person, how the person will be contacted, phone or email address as appropriate and a name of the person who will be making contact)*

APPENDIX: ADDITIONAL BACKROUND INFORMATION AND MATERIALS

DO NOT PUT OTHER MATERIALS SUCH AS FAQs, NEWS RELEASE OR TALKING POINTS IN THIS SECTION. KEEP THOSE AS SEPARATE DOCUMENTS.

(Consider the following: What is the historical context? Does this relate to other issues that may not immediately be apparent (consider other programs and regions)? Is there a scientific basis to this issue? If so what is it?)

APPENDIX 1

Historical Context:

Following a 2009, Arizona District Court decision, FWS determined that developing a recovery plan for jaguars will contribute to their conservation (in recognition that most of the species' habitat and almost all individuals occur outside if the United States).

FWS reconfigured and expanded a binational Jaguar Recovery Team and charged them with developing a recovery outline, which they completed in April 2012. The FWS drew heavily from the data compiled in the recovery outline for the development of jaguar critical habitat designation (in the U.S.), which was finalized in March 2014.

Summary:

In 2010, a binational Jaguar Recovery Team was convened with experts and stakeholders from both the U.S. and Mexico to develop a jaguar recovery plan. The Recovery Plan considers the jaguar throughout its range, but primarily focuses on the Northwestern Recovery Unit (NRU), which extends from the southwestern U.S. to western Mexico. To achieve delisting, viable jaguar populations should be secured by protecting jaguars and their habitat; reducing human-caused mortality of jaguars, particularly retaliatory killing due to livestock depredation; improving, enacting, and/or enforcing effective laws that regulate illegal killing of jaguars, jaguar prey, and habitat loss; securing adequate funding to implement recovery actions; and maintaining and developing partnerships in the Americas, particularly in Mexico.

Regarding the role of the U.S. in recovering the jaguar, recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity. Actions to implement this involve identifying and mapping corridors and potential impediments to these linkages, along with developing and implementing strategies to maintain connectivity. Recovery actions to maintain connectivity and overall ecosystem/watershed health are ongoing in many areas in the U.S. by the U.S. Forest Service or Bureau of Land Management, where much of the linkage habitat into the U.S. occurs.

We received over 13,000 public comments on the draft Recovery Plan. We requested five peer reviews and received comments from two, both from Mexico. We also received comments from the Arizona Game and Fish Department, New Mexico Game and Fish Department, and the San Carlos Apache Tribe. We incorporated all substantive comments into the final Recovery Plan. If we did not incorporate substantive comments, we responded to them in our response to comments documents. Review of the Recovery Plan was also coordinated with the New Mexico Ecological Services Field Office, and Buenos Aires and San Bernardino National Wildlife Refuges.

MAIN DECISION OR MESSAGE: Due to past habitat loss, it is unlikely that jaguars will be fully self-sustaining throughout their historical range; however, conservation of key jaguar habitat and populations in their current range will be critical to the recovery of jaguars. We anticipate that it will take a minimum of 50 years to recover the jaguar. The estimated cost to recovery is $605,648,000 (among 19 countries over 50 years).

APPENDIX II

Jaguar Recovery Plan - Customs and Border Protection/U.S. Border Patrol Involvement
August 31, 2018

Customs and Border Protection (CBP) via U.S. Border Patrol (USBP) has been involved through all phases of jaguar draft and final recovery plan planning processes. In 2010, at the inception of the binational Jaguar Recovery Team (JRT), USBP was invited to serve as a member of the Implementation Subgroup of the JRT, as an official representative of USBP. Since 2010, USBP has had a member on the JRT through the present (Charles Trost).

CBP also has significantly financially supported several projects, described in Table 3 of the Jaguar Recovery Plan (JRP), that were conducted to inform important content for the Plan and implement recovery actions identified in the JRP. These projects include genetics studies, habitat modeling, jaguar surveying and monitoring, citizen science education and outreach, rancher incentives, road crossing designs, citizen attitude surveys, and portions of Population Viability Analyses (PVA and PHVA) (see Table 3 below).

USBP participated in many meetings to discuss and prepare the JRP, and did not express significant concerns about border issues. In the spirit of cooperation, CBP permitted FWS and Jaguar Recovery Team to use their GIS layers of the border to develop a map that illustrates degrees of border permeability (no fences, including a vehicle or pedestrian fence), and this information is illustrated on Figure 4 of the JRP. Both this figure and the JRP indicate that portions of the border are currently permeable to jaguar movement and that continued work between FWS and CBP will remain important to allow for ongoing opportunities for cross-border jaguar movement.

As part of outreach on the JRP, CBP was informed of the option to comment during the public comment period, and did not provide any comments. Throughout the development of the JRP, CBP has had opportunities to address border issues and through these and related actions CBP's and BP's concerns have been fully incorporated into the Jaguar Recovery Plan.

Table 3. Summary of U.S. Customs and Border Protection-funded projects and their conservation benefit to jaguars. NRU = Northwestern Recovery Unit for the jaguar. USFWS = U.S. Fish and Wildlife Service. Final reports of these projects can be found at https://www.fws.gov/southwest/es/arizona/Jaguar.htm.

Project	Final Deliverable(s)	Purpose/Conservation Benefit
Genetics	*Jaguar taxonomy and genetic diversity for southern Arizona, U.S., and Sonora, Mexico*	Investigates unique genetic diversity of jaguars at the northern edge of the range and answers taxonomic question of whether or not northern jaguars are a distinct subspecies
PVAs	*Population Viability Analysis for the Jaguar (Panthera onca) in the Northwestern Range*	Describes demographic viability of the jaguar metapopulation defined as the NRU
PVAs (cont.)	*Addendum: Population Viability Analysis for the Jaguar (Panthera onca) in the Northwestern Range*	Describes the structure, implementation, and interpretation of a new set of demographic simulations of jaguar population viability in core areas of the NRU
Habitat Modeling	*Digital Mapping in Support of Recovery Planning for the Northern Jaguar*	Assisted USFWS in digital mapping aspects of recovery planning for the northern jaguar (habitat models used in population viability analyses, above, and Recovery Outline for the Jaguar)
	Jaguar Habitat Modeling and Database Update	Updates jaguar database with additional observations, conducts analyses of different selections of jaguar observations, produces five revised versions of the habitat model (habitat models used in population viability analyses, above, as well as this Recovery Plan)
	jaguardata.info	Converts jaguar observations database to web-based platform allowing stakeholders, general public, and scientific community to search and access jaguar data; provides an interface for administrators to add, edit, and delete jaguar observations in the NRU
Jaguar Survey and Monitoring (U.S. portion of NRU)	*Jaguar Surveying and Monitoring in the United States: Final Report*	Culver (2016) provides results and analyses of the two-year investigation of jaguars, prey base, and habitat in the U.S. portion of the NRU to inform recovery planning; multiple photos of one jaguar (and three ocelots) provided to USFWS and posted on USFWS Flickr site
Jaguar Survey and Monitoring (Tohono O'odham Nation; TON)	*Jaguar Surveying and Monitoring on the Tohono O'odham Nation*	Provides results and analyses of surveys for jaguars and ocelots on the TON to inform recovery planning

Citizen Science, Education, Outreach, and Grant Writing	*Citizen Science Teams*	Developed and implementing a citizen science program to survey and monitor for jaguars within the U.S. portion of the NRU
	K-12 Jaguar Educational Curricula	Developed and implementing formal educational curricula on jaguar and ocelot conservation for different educational levels to promote an understanding of feline conservation
Citizen Science, Education, Outreach, and Grant Writing (cont.)	*Jaguar Conservation Outreach*	Developed and presented a PowerPoint presentation on jaguar and ocelot biology and conservation for the general public to promote an understanding of feline conservation
	Education and Outreach Materials	Developed posters, stickers, etc. to promote jaguar conservation within the NRU
	Grant Writing	Applied for funding opportunities to continue aspects of jaguar survey and monitoring effort currently being conducted, to continue and/or expand the volunteer citizen science program, and to continue and/or expand public outreach and school education programs
Rancher Incentive Program	*Complete Project Overview*	See http://udallcenter.arizona.edu/jaguarproject/ for project summary, additional information, and reports
	Assessment of Rancher Knowledge	Pilot assessment of nine ranch owner/manager's knowledge of jaguar conservation issues
	Ranch Owner/Manager Survey Questionnaire	Survey of ranch owner/manager knowledge about and attitudes toward jaguar conservation issues
	Results of Ranch Owner/Manager Survey Questionnaire	Summary of survey results included in Results of Rancher Workshops report (below); comprehensive analysis of data still to be published
	Report on PES sources	Conducted research policy analysis of payment for ecosystem services (PES) program and analysis of jaguar-friendly ranch management options for distribution; available at http://extension.arizona.edu/pubs/payments-ecosystem-services-southern-arizona-ranchers
	Rancher Workshops	Developed workshops to enhance rancher knowledge of jaguar conservation, jaguar friendly ranch management practices, and conservation incentive programs; as well as receive feedback from ranchers regarding incentive programs that may generate participation

	Brochures	Provides a simple program of actions for landowners to implement for promoting jaguar conservation on their lands
Survey of Residents' Attitudes on Jaguar Conservation	*Results of Survey of Residents' Attitudes on Jaguar Conservation*	Provides insights into attitudes, mores, and level of knowledge of stakeholders in the U.S. portion of the NRU regarding jaguars to understand what is needed from a social perspective to create an environment that is conducive to jaguar conservation
Jaguar Survey and Monitoring Protocol	*Review of Jaguar Survey and Monitoring Techniques and Methodologies* (English and Spanish)	Provides a review of literature on jaguar and, as appropriate, other large felid survey and monitoring techniques and methodologies
	Jaguar Survey and Monitoring Protocol (English and Spanish)	Provides a jaguar survey and monitoring protocol applicable in measuring occupancy recovery criteria (3.3.1.B.i. and 3.3.2.B.i.) in the NRU, as well as other areas rangewide
Review and Develop Recommendations for Road Crossing Designs	*Review of Road Passage Designs for Jaguars*	Conducts a review of enhancements (e.g., underpasses, overpasses, guiding fences, etc.) that allow for passage of large carnivores, particularly jaguars, across road corridors
	Road Passage Design Recommendations (English and Spanish)	Develops recommendations for enhancements (e.g., underpasses, overpasses, guiding fences, etc.) that allow for passage of jaguars across road corridors that would be effective in a variety of different habitat types in the NRU
	Road Passage Location Recommendations (English and Spanish)	Identifies potential areas in the NRU where enhancements (e.g., underpasses, overpasses, guiding fences, etc.) would improve the passage of jaguars across different types of road corridors that would be effective in a variety of different habitat types

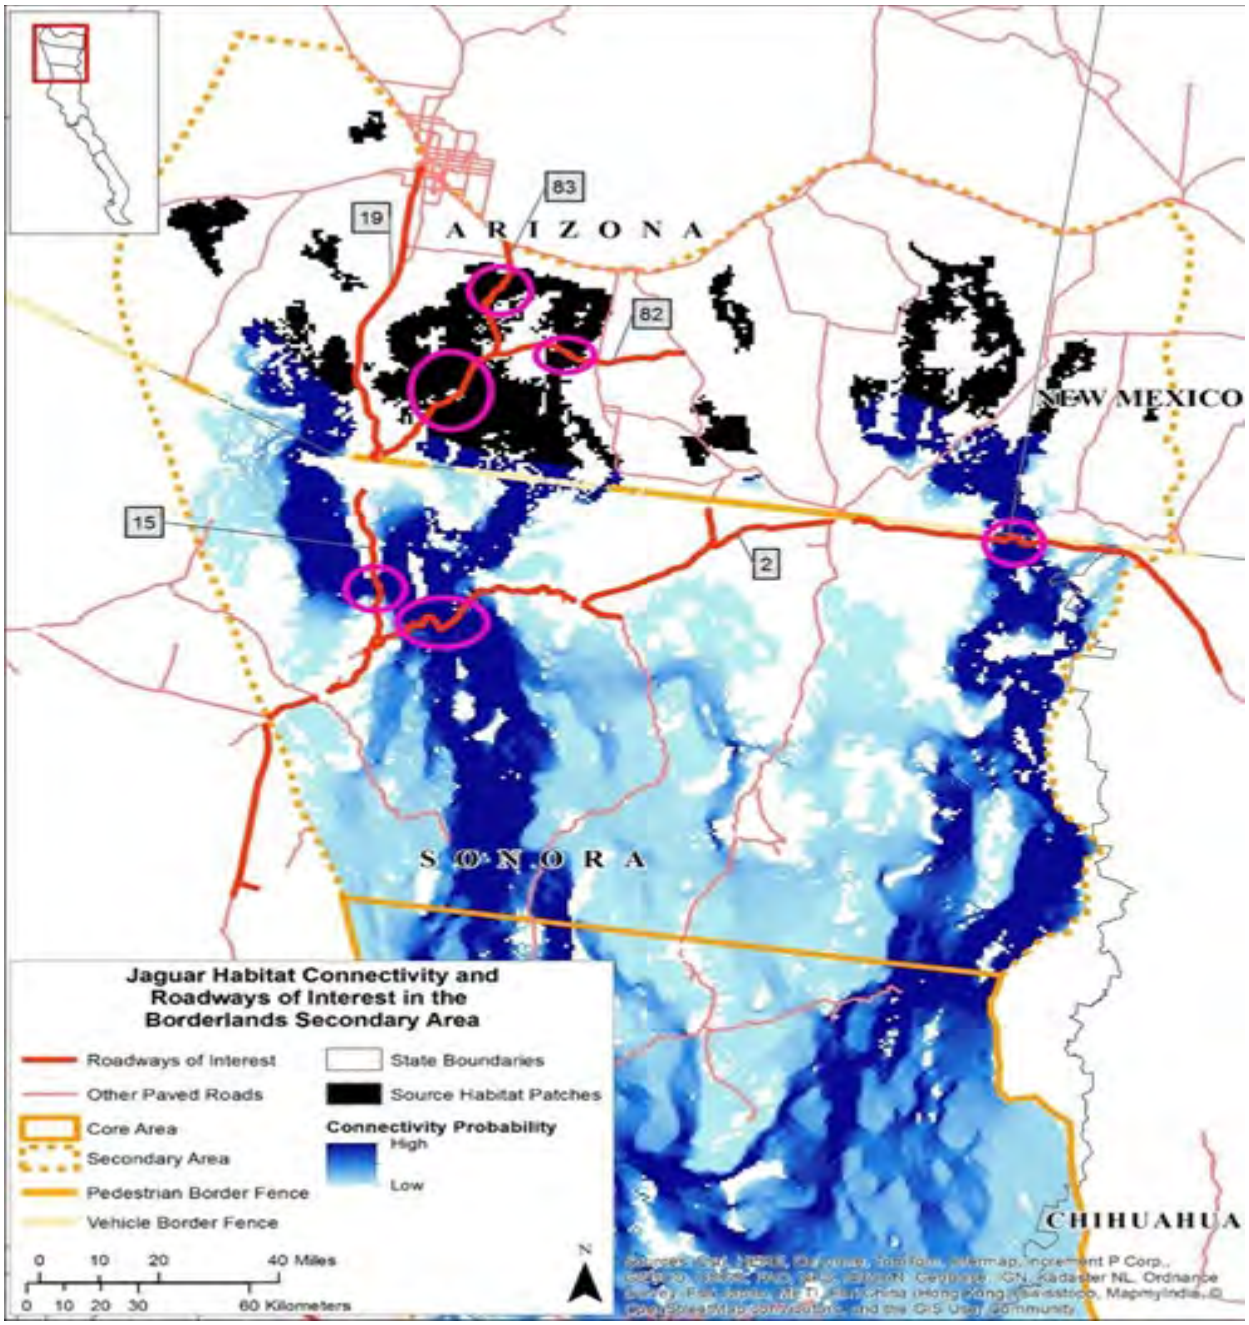

Figure 4. Map of habitat connectivity and roadways of interest in the Borderlands Secondary Area as modeled by Stoner et al. (2015) (some road segments in densely populated areas omitted). A visual examination of this connectivity model, which extends across the entirety of the Northwestern Recovery Unit, reveals three corridors that extend across the U.S.-Mexico border. These corridors are intersected by Mexico Federal Highways 2 and 15. U.S. State Routes 82 and 83 also intersect with "source" habitat patches (used for modeling purposes), which may impact jaguar habitat connectivity. These areas are good candidates for further assessment to determine the potential for road crossing mitigation structures.

Hi Charisa,

Please see attached requested items, for announcing the final jaguar recovery plan. Let me know you think they'd also like to see the actual final recovery plan as a PDF (it's a fairly large file). Thanks,

Brian

final recovery plan, that our regional office would like to announce this Thursday 4/11 or as soon as possible after that date.

As an FYI, It looks like this outreach has been with the Assistant Secretary's office since 4/4 in DTS. As a final recovery plan, this does not have a FR notice associated with it and we don't normally bring final recovery plans into HQ for review but this one is a high-profile species that touches on border wall issues.

Thanks in advance for helping us get this one over the finish line. Don't hesitate to write or call if you have any questions or follow up on anything.

BASIC COMMUNICATIONS STRATEGY

FOR ROUTINE NON-CONTROVERSIAL ANNOUNCEMENTS

SECTION I: GENERAL INFORMATION

1. **Title:** Final Recovery Plan for the Jaguar

2. **DTS number** 068832

3. **What is the action triggering this communications plan?** *(Please explain in no more than three sentences)*

   The Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar.

4. **What is the proposed date for this action? Why has it been selected? Is it flexible?**

   Proposed date for the announcement is April 11, 2019. The plan was signed by the Southwest Regional Director in July 2018; however, the announcement was delayed to accommodate extensive review and inter-agency coordination. The April 11 date allows for a final review by headquarters, notification of DOI, and facilitation of a coordinated rollout by the Jaguar Recovery Team (state, NGO, tribal and international partners.)

5. **Which office is leading this communications effort and which other programs, regions or groups are involved?**

   Region 2 External Affairs and Arizona Ecological Services Office. (The Conservation Planning Specialist Group and the Wildlife Conservation Society contributed substantially to technical aspects of the plan and will be available to contribute technical expertise.)

SECTION II: GOALS AND MESSAGES

6. **What story do we want to tell?**

   Reversing the decline of the jaguar (America's largest cat) is possible, but it will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States south to Argentina. The final recovery plan

sets goals for improving the species' status across its range and provides a framework whereby all stakeholders can align their efforts to achieve recovery. Critical to the recovery of the jaguar is conservation of key jaguar habitat (including core habitat areas and corridors) and populations. Due to past habitat loss, it is unlikely jaguars will be fully self-sustaining throughout their entire historical range. ~~We anticipate that it will take a minimum of 50 years to recover the jaguar.~~

7. **What are our key messages?** *(These should be top concepts that readers should take away, including an understanding of why this action matters and why they should care, not a list of facts, which should be placed in the appendix. List no more than four!)*

Primary messages:

- Reversing the decline of the jaguar -- America's largest wild cat -- is possible. It will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States to Argentina.
- Through the Endangered Species Act recovery planning process, nineteen nations and diverse conservation organizations are working together to protect this important and charismatic species.
- Primary threats to the jaguar throughout its range are loss of habitat, direct killing and depletion of its prey. The recovery plan identifies conservation activities in every country and region for addressing threats and sets goals for minimizing threats and establishing viable jaguar populations throughout their expansive range.
- The recovery plan proposes two corridors that are in remote and rugged countryside that can accommodate jaguar movements across the United States/Mexico border.
- Border interventions and operations in these areas, at present, are most practically addressed through surveillance and remote detection (electronics, towers, etc.). The U.S.-Mexico border is currently permeable to jaguar movement at these dispersal corridors, and continued work with the U.S. Customs and Border Protection (CBP) will remain important to allow for ongoing opportunities for cross-border movement of jaguars.

Secondary messages:

- The recovery plan describes two large jaguar recovery units – the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina and the Northwestern Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. *The plan recognizes that countries within the PARU will be the principal contributors to its recovery.* Through the NRU, the Service will continue to promote jaguar recovery throughout its range, as it has in the past.
- The final recovery plan focuses on the NRU because this is where the Service has legal jurisdiction. We also have close working relationships with Mexico on

behalf of the jaguar's recovery. The NRU includes jaguars that occupy the U.S. Southwest borderlands region. Since 1996, seven individual male jaguars have been documented in the United States (southern Arizona and southwestern New Mexico). These jaguars are believed to be expanding their range from the nearest core area and breeding population, which is approximately 130 miles south of the U.S.-Mexico border in Sonora. Recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity.

If-Asked Only Statements:

- The Service is working closely with federal and other partners to promote border security while protecting the jaguar and its habitat. The recovery plan proposes two corridors that are in particularly rugged countryside that can accommodate jaguar movements across the United States – Mexico border.
- The Service is not aware of any proposals to build new border fence on the Arizona border. Some existing fence is being replaced, but it is a direct replacement, not an upgrade from vehicle to pedestrian fence.]

The binational recovery team has not prescribed jaguar reintroductions in the United States. The recovery plan focuses on efforts to sustain habitat, eliminate poaching, maintain at least two borderland dispersal corridors, and improve human social acceptance of the jaguar to accommodate jaguars that disperse into the United States.

For additional background and approved messaging on role of CBP and the U.S. Border Patrol in the Jaguar Recovery Plan, see Appendix II below.

SECTION III: IMPLEMENTATION

8. Implementation timeline *(If not known, put TBD or the number of days/hours before/after the announcement*

Target Date	Tactic	Responsible
All times are in the Mountain (ET -2) time zone		
All dates and times are predicated on date determined for release of Final Recovery Plan		

At least 7 days prior to public announcement	Wildlife Conservation Society notification	Humphrey
2-3 days before announcement	Embargoed pitch to AP and/or national reporter(s)? Susan Montoya (AP)	Humphrey/Hires
Afternoon of signature (2 pm MT)	Notify New Mexico and Arizona fish and wildlife agency directors	Lueders or Millsap/Humphrey/McIntyre
Afternoon of signature (2 pm MT)	Notify AZ and NM congressional members, and congressional committees of anticipated availability	R2 Lesli Gray/CLA Alyssa Hausman
Afternoon of signature (2 pm MT)	Notify southern Arizona and New Mexico tribes of anticipated availability	Nystedt/Humphrey
Afternoon of signature (2 pm MT)	Confirm plan availability with recovery team member organizations	Alanen/Stanford
Morning after signature (8 am MT)	Post final recovery plan and news release to Arizona ES, ECOS, and R2 homepage	Kaplan/Crouse/ Campbell
Morning after signature (10 am MT)	Distribute news release to AZ, NM, Mexico, and international environmental news outlets	Humphrey
Morning after signature (10 am MT)	SMEs available for media response	Humphrey/Alanen/Stanford
Morning after signature (10 am MT)	Social media (Facebook) post	Barrus
Week after signature	[*Optional*] Provide written notification to affected parties, agencies	AESO

9. **Which communications tools are needed to support these strategies and tactics?** *(Be as specific as possible about the products identified and who will produce them)*

Tool	Responsible	Due Date
News Release	Humphrey	3/15/2019
Photos (www flickr.com/photos/usfws_southwest/sets/72157632294203147/)	Humphrey	3/15/2019
"If-asked" border talking points	Humphrey	3/15/2019
Video support: www fws.gov/southwest/es/arizona/Jaguar htm	Humphrey	3/15/2019
Jaguar population maps	Alanen	3/15/2019
FAQs (FAQs presently in Item 7 (above) as if-asked only) can be converted into FAQs)	Humphrey	3/15/2019

10. **Social media plan** *(Provide a list of accounts to be used as well as sample hashtags, messages, multimedia and other links, etc. as appropriate)*

https://www facebook.com/USFWSSouthwest?ref=mf

The Service and its partners in the binational Jaguar Recovery Team can recover the jaguar, but it will take time, effort and collaboration with partners across species' 19-country range. A recently released recovery plan sets goals for improving the species status across its range and provides a framework for achieving recovery.

Here in the Southwest, male jaguars from a core breeding population in Mexico occasionally occupy mountain ranges along our southern border with the country.

See more at: https://www fws.gov/southwest/es/arizona/Jaguar htm

11. **Stakeholder contact grids** *(For each, paste in a table that provides organization name, contact person, how the person will be contacted, phone or email address as appropriate and a name of the person who will be making contact)*

APPENDIX: ADDITIONAL BACKROUND INFORMATION AND MATERIALS

DO NOT PUT OTHER MATERIALS SUCH AS FAQs, NEWS RELEASE OR TALKING POINTS IN THIS SECTION. KEEP THOSE AS SEPARATE DOCUMENTS.

(Consider the following What is the historical context? Does this relate to other issues that may not immediately be apparent (consider other programs and regions)? Is there a scientific basis to this issue? If so what is it?)

APPENDIX 1

Historical Context:

Following a 2009, Arizona District Court decision, FWS determined that developing a recovery plan for jaguars will contribute to their conservation (in recognition that most of the species' habitat and almost all individuals occur outside if the United States).

FWS reconfigured and expanded a binational Jaguar Recovery Team and charged them with developing a recovery outline, which they completed in April 2012. The FWS drew heavily from the data compiled in the recovery outline for the development of jaguar critical habitat designation (in the U.S.), which was finalized in March 2014.

Summary:

In 2010, a binational Jaguar Recovery Team was convened with experts and stakeholders from both the U.S. and Mexico to develop a jaguar recovery plan. The Recovery Plan considers the jaguar throughout its range, but primarily focuses on the Northwestern Recovery Unit (NRU), which extends from the southwestern U.S. to western Mexico. To achieve delisting, viable jaguar populations should be secured by protecting jaguars and their habitat; reducing human-caused mortality of jaguars, particularly retaliatory killing

due to livestock depredation; improving, enacting, and/or enforcing effective laws that regulate illegal killing of jaguars, jaguar prey, and habitat loss; securing adequate funding to implement recovery actions; and maintaining and developing partnerships in the Americas, particularly in Mexico.

Regarding the role of the U.S. in recovering the jaguar, recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity. Actions to implement this involve identifying and mapping corridors and potential impediments to these linkages, along with developing and implementing strategies to maintain connectivity. Recovery actions to maintain connectivity and overall ecosystem/watershed health are ongoing in many areas in the U.S. by the U.S. Forest Service or Bureau of Land Management, where much of the linkage habitat into the U.S. occurs.

We received over 13,000 public comments on the draft Recovery Plan. We requested five peer reviews and received comments from two, both from Mexico. We also received comments from the Arizona Game and Fish Department, New Mexico Game and Fish Department, and the San Carlos Apache Tribe. We incorporated all substantive comments into the final Recovery Plan. If we did not incorporate substantive comments, we responded to them in our response to comments documents. Review of the Recovery Plan was also coordinated with the New Mexico Ecological Services Field Office, and Buenos Aires and San Bernardino National Wildlife Refuges.

MAIN DECISION OR MESSAGE: Due to past habitat loss, it is unlikely that jaguars will be fully self-sustaining throughout their historical range; however, conservation of key jaguar habitat and populations in their current range will be critical to the recovery of jaguars. We anticipate that it will take a minimum of 50 years to recover the jaguar. The estimated cost to recovery is $605,648,000 (among 19 countries over 50 years).

APPENDIX II

Jaguar Recovery Plan - Customs and Border Protection/U.S. Border Patrol Involvement
August 31, 2018

Customs and Border Protection (CBP) via U.S. Border Patrol (USBP) has been involved through all phases of jaguar draft and final recovery plan planning processes. In 2010, at the inception of the binational Jaguar Recovery Team (JRT), USBP was invited to serve as a member of the Implementation Subgroup of the JRT, as an official representative of

USBP. Since 2010, USBP has had a member on the JRT through the present (Charles Trost).

CBP also has significantly financially supported several projects, described in Table 3 of the Jaguar Recovery Plan (JRP), that were conducted to inform important content for the Plan and implement recovery actions identified in the JRP. These projects include genetics studies, habitat modeling, jaguar surveying and monitoring, citizen science education and outreach, rancher incentives, road crossing designs, citizen attitude surveys, and portions of Population Viability Analyses (PVA and PHVA) (see Table 3 below).

USBP participated in many meetings to discuss and prepare the JRP, and did not express significant concerns about border issues. In the spirit of cooperation, CBP permitted FWS and Jaguar Recovery Team to use their GIS layers of the border to develop a map that illustrates degrees of border permeability (no fences, including a vehicle or pedestrian fence), and this information is illustrated on Figure 4 of the JRP. Both this figure and the JRP indicate that portions of the border are currently permeable to jaguar movement and that continued work between FWS and CBP will remain important to allow for ongoing opportunities for cross-border jaguar movement.

As part of outreach on the JRP, CBP was informed of the option to comment during the public comment period, and did not provide any comments. Throughout the development of the JRP, CBP has had opportunities to address border issues and through these and related actions CBP's and BP's concerns have been fully incorporated into the Jaguar Recovery Plan.

Table 3. Summary of U.S. Customs and Border Protection-funded projects and their conservation benefit to jaguars. NRU = Northwestern Recovery Unit for the jaguar. USFWS = U.S. Fish and Wildlife Service. Final reports of these projects can be found at https://www.fws.gov/southwest/es/arizona/Jaguar.htm.

Project	Final Deliverable(s)	Purpose/Conservation Benefit
Genetics	*Jaguar taxonomy and genetic diversity for southern Arizona, U.S., and Sonora, Mexico*	Investigates unique genetic diversity of jaguars at the northern edge of the range and answers taxonomic question of whether or not northern jaguars are a distinct subspecies
PVAs	*Population Viability Analysis for the Jaguar (Panthera onca) in the Northwestern Range*	Describes demographic viability of the jaguar metapopulation defined as the NRU

PVAs (cont.)	*Addendum Population Viability Analysis for the Jaguar (Panthera onca) in the Northwestern Range*	Describes the structure, implementation, and interpretation of a new set of demographic simulations of jaguar population viability in core areas of the NRU
Habitat Modeling	*Digital Mapping in Support of Recovery Planning for the Northern Jaguar*	Assisted USFWS in digital mapping aspects of recovery planning for the northern jaguar (habitat models used in population viability analyses, above, and Recovery Outline for the Jaguar)
	Jaguar Habitat Modeling and Database Update	Updates jaguar database with additional observations, conducts analyses of different selections of jaguar observations, produces five revised versions of the habitat model (habitat models used in population viability analyses, above, as well as this Recovery Plan)
	jaguardata.info	Converts jaguar observations database to web-based platform allowing stakeholders, general public, and scientific community to search and access jaguar data; provides an interface for administrators to add, edit, and delete jaguar observations in the NRU
Jaguar Survey and Monitoring (U.S. portion of NRU)	*Jaguar Surveying and Monitoring in the United States Final Report*	Culver (2016) provides results and analyses of the two-year investigation of jaguars, prey base, and habitat in the U.S. portion of the NRU to inform recovery planning; multiple photos of one jaguar (and three ocelots) provided to USFWS and posted on USFWS Flickr site
Jaguar Survey and Monitoring (Tohono O'odham Nation; TON)	*Jaguar Surveying and Monitoring on the Tohono O'odham Nation*	Provides results and analyses of surveys for jaguars and ocelots on the TON to inform recovery planning
Citizen Science, Education, Outreach, and Grant Writing	*Citizen Science Teams*	Developed and implementing a citizen science program to survey and monitor for jaguars within the U.S. portion of the NRU
	K-12 Jaguar Educational Curricula	Developed and implementing formal educational curricula on jaguar and ocelot conservation for different educational levels to promote an understanding of feline conservation
Citizen Science, Education, Outreach, and Grant Writing (cont.)	*Jaguar Conservation Outreach*	Developed and presented a PowerPoint presentation on jaguar and ocelot biology and conservation for the general public to promote an understanding of feline conservation

	Education and Outreach Materials	Developed posters, stickers, etc. to promote jaguar conservation within the NRU
	Grant Writing	Applied for funding opportunities to continue aspects of jaguar survey and monitoring effort currently being conducted, to continue and/or expand the volunteer citizen science program, and to continue and/or expand public outreach and school education programs
Rancher Incentive Program	*Complete Project Overview*	See http://udallcenter.arizona.edu/jaguarproject/ for project summary, additional information, and reports
	Assessment of Rancher Knowledge	Pilot assessment of nine ranch owner/manager's knowledge of jaguar conservation issues
	Ranch Owner/Manager Survey Questionnaire	Survey of ranch owner/manager knowledge about and attitudes toward jaguar conservation issues
	Results of Ranch Owner/Manager Survey Questionnaire	Summary of survey results included in Results of Rancher Workshops report (below); comprehensive analysis of data still to be published
	Report on PES sources	Conducted research policy analysis of payment for ecosystem services (PES) program and analysis of jaguar-friendly ranch management options for distribution; available at http://extension.arizona.edu/pubs/payments-ecosystem-services-southern-arizona-ranchers
	Rancher Workshops	Developed workshops to enhance rancher knowledge of jaguar conservation, jaguar friendly ranch management practices, and conservation incentive programs; as well as receive feedback from ranchers regarding incentive programs that may generate participation
	Brochures	Provides a simple program of actions for landowners to implement for promoting jaguar conservation on their lands
Survey of Residents' Attitudes on Jaguar Conservation	*Results of Survey of Residents' Attitudes on Jaguar Conservation*	Provides insights into attitudes, mores, and level of knowledge of stakeholders in the U.S. portion of the NRU regarding jaguars to understand what is needed from a social perspective to create an environment that is conducive to jaguar conservation
Jaguar Survey and Monitoring Protocol	*Review of Jaguar Survey and Monitoring Techniques and Methodologies* (English and Spanish)	Provides a review of literature on jaguar and, as appropriate, other large felid survey and monitoring techniques and methodologies

	Jaguar Survey and Monitoring Protocol (English and Spanish)	Provides a jaguar survey and monitoring protocol applicable in measuring occupancy recovery criteria (3.3.1.B.i. and 3.3.2.B.i.) in the NRU, as well as other areas rangewide
Review and Develop Recommendations for Road Crossing Designs	*Review of Road Passage Designs for Jaguars*	Conducts a review of enhancements (e.g., underpasses, overpasses, guiding fences, etc.) that allow for passage of large carnivores, particularly jaguars, across road corridors
	Road Passage Design Recommendations (English and Spanish)	Develops recommendations for enhancements (e.g., underpasses, overpasses, guiding fences, etc.) that allow for passage of jaguars across road corridors that would be effective in a variety of different habitat types in the NRU
	Road Passage Location Recommendations (English and Spanish)	Identifies potential areas in the NRU where enhancements (e.g., underpasses, overpasses, guiding fences, etc.) would improve the passage of jaguars across different types of road corridors that would be effective in a variety of different habitat types

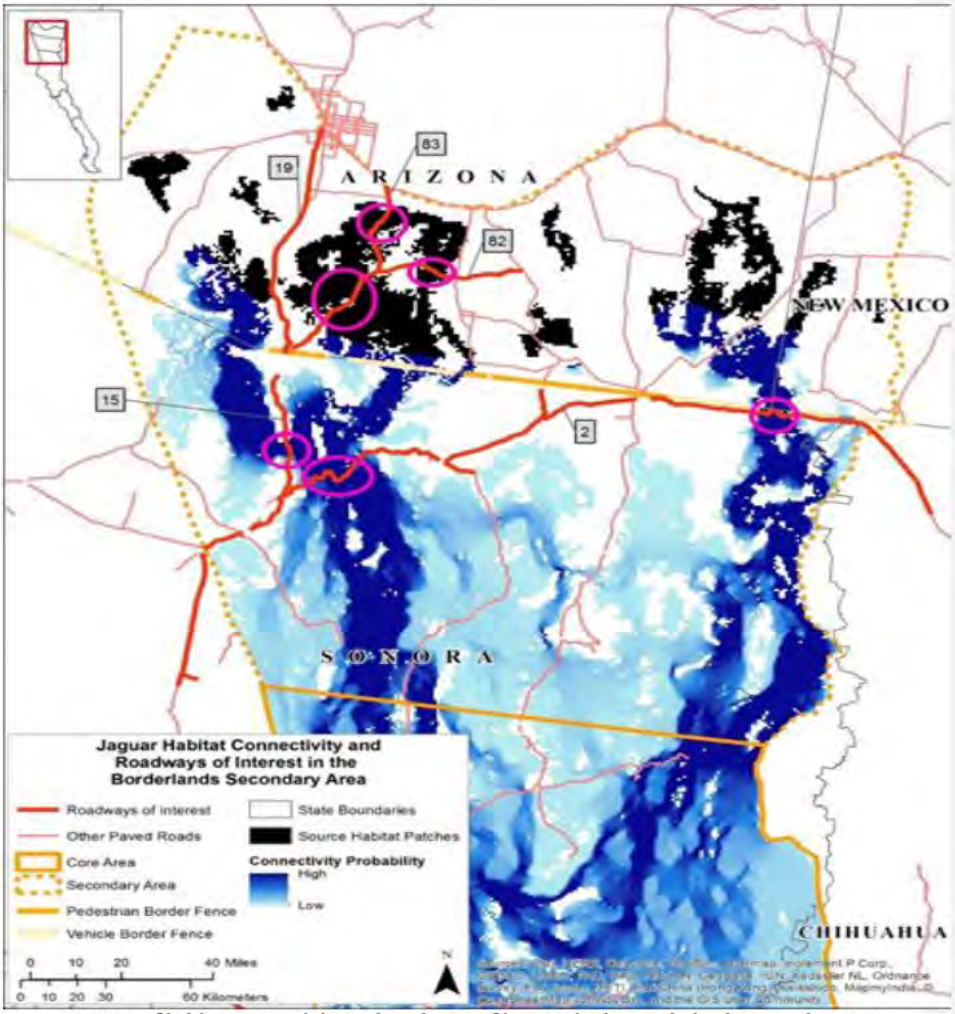

Figure 4. Map of habitat connectivity and roadways of interest in the Borderlands Secondary Area as modeled by Stoner et al. (2015) (some road segments in densely populated areas omitted). A visual examination of this connectivity model, which extends across the entirety of the Northwestern Recovery Unit, reveals three corridors that extend across the U.S.-Mexico border. These corridors are intersected by Mexico Federal Highways 2 and 15. U.S. State Routes 82 and 83 also intersect with "source" habitat patches (used for modeling purposes), which may impact jaguar habitat connectivity. These areas are good candidates for further assessment to determine the potential for road crossing mitigation structures.

U.S. Fish and Wildlife Service

Questions and Answers: Final Recovery Plan for the Jaguar

Arizona Ecological Services Field Office **www.fws.gov/southwest/es/arizona/**

For Release: [Enter date here]
Contacts: Jeff Humphrey 602-242-0210

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, America's largest wild cat. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States and recommends site-specific conservation actions that contribute to jaguar recovery across its range.

Q: What does the jaguar recovery plan tell us?

A: Reversing the decline of the jaguar is possible, but it will require the long-term, coordinated efforts of agencies and conservation organizations in 19 countries, from the United States south to Argentina. The final recovery plan sets goals for improving the species' status across its range and provides a framework for aligning stakeholder efforts to achieve recovery. Critical to the recovery of the jaguar is conservation of key jaguar habitat (including core areas and connective corridors) and populations. Due to past habitat loss, it is unlikely jaguars will be fully self-sustaining throughout their entire historical range. ~~We anticipate that it will take a minimum of 50 years to recover the jaguar.~~

Q: What are the primary threats to the jaguar?

A: Loss of habitat, killing of individuals and depletion of prey throughout its range are the primary reasons for decreasing populations of jaguars. The recovery plan identifies conservation activities in every country and region for addressing each of these threats. It establishes goals for minimizing threats and for establishing viable populations throughout the jaguar's expansive range.

Q: What is a recovery plan?

A: Recovery plans are not regulatory but provide a framework for recovery of a species so protection under the ESA is no longer necessary. This recovery plan includes scientific information about the species and provides recovery criteria, conservation actions necessary for its recovery and delisting from the ESA and estimates of the time and cost to carry out the measures needed to achieve the plan's goal.

Q: What are the strategies for conserving and recovering the jaguar in the final recovery plan?

A: The recovery plan describes two large jaguar recovery units: the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina, and the Northwestern

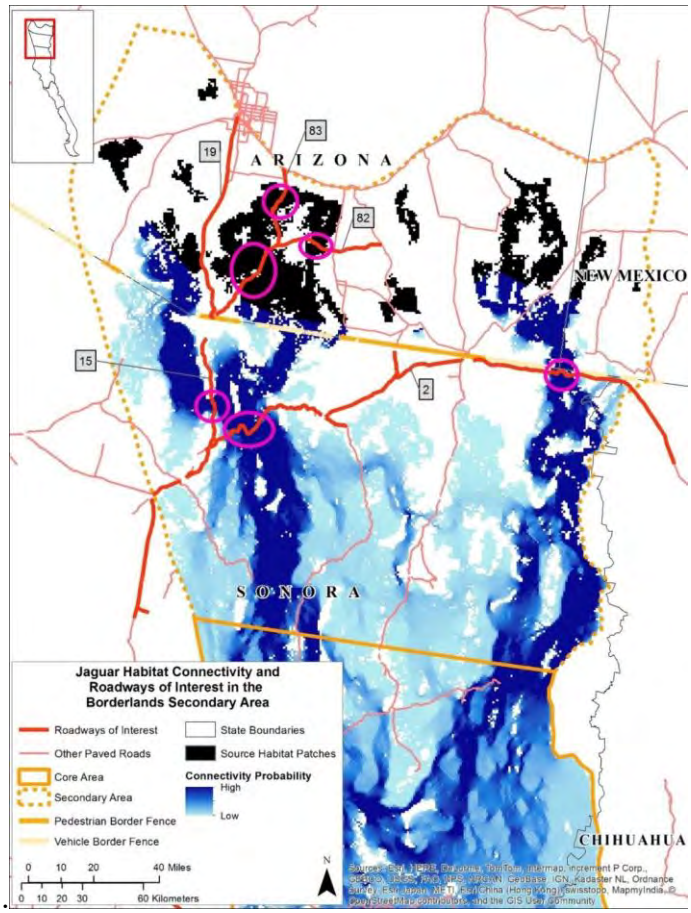
Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. The plan recognizes that countries within the PARU will be the principal contributors to jaguar recovery. As it has in the past, the Service will continue to promote jaguar recovery throughout the range of the jaguar.

The final recovery plan focuses on the NRU because this is where the Service has the most jurisdiction and has an established working relationship with Mexico. The NRU includes the jaguars that occupy the U.S. Southwest borderlands region. Since 1996, seven individual male jaguars have been documented in the United States (southern Arizona and southwestern New Mexico). These jaguars are believed to be expanding their range from the nearest core area and breeding population, which is approximately 130 miles south of the U.S.-Mexico border in Sonora. Recovery criteria in the Borderlands Secondary Area address mapping and implementing plans to ensure permeability of at least two transborder linkages to provide connectivity.

The binational recovery team has not prescribed jaguar reintroductions in the United States but focuses on efforts to sustain habitat, eliminate poaching, maintain at least two borderland dispersal corridors (see Figure 4 in the final recovery plan), and improve human social acceptance of the jaguar to accommodate jaguars that disperse into the United States.

Q: What are the borderland dispersal corridors referred to in the recovery plan and how critical are they to the recovery of jaguars in the United States?

A: Dispersal corridors are rugged, remote areas that presently male jaguars, presumably from the Sonora Core breeding area in Mexico, use to access secondary area habitat, a portion of which is in southern Arizona and New Mexico. These areas have been identified from habitat characteristics, historical records, recent sightings and photo monitoring in the United States and Mexico. (See Jaguar Habitat Connectivity and Identification of Potential Road Mitigation Locations in the NRU for the Jaguar report, as well as Figure 4 of the recovery plan.)



Continued jaguar access to habitat through transborder linkages is the sole mechanism identified in the recovery plan for continued jaguar occupation in the U.S. portion of the species' range. Maintaining this habitat connectivity is one of the recovery criteria for the Northwestern Recovery Unit. Research documents the importance of animal populations at the extremities of their ranges for the expansion and contraction of species' ranges and, ultimately, the long-term recovery of species.

These jaguar dispersal corridors are rugged and remote areas. Border interventions and operations in these areas, at present, are most practically addressed through surveillance and remote detection (electronics, towers, etc.). The U.S.-Mexico border is currently permeable to jaguar movement at these dispersal corridors. Continued work with the U.S. Customs and Border Protection (CBP) will remain important to allowing ongoing opportunities for cross-border movement of jaguars.

Q: How important is the recovery of jaguars in the United States to their overall recovery across their range?

A: The U.S. range of the jaguar represents the very northernmost edge of its 19-country range that extends all the way to South America. The U.S. range represents just one-tenth of 1 percent of its historic range.

Given that the jaguar is an international species with the vast majority of its range outside of the United States, primary actions to recover the jaguar will occur in other countries. Because more than 95 percent of the jaguar's habitat in the Northwestern Recovery Unit (NRU) is in Mexico, Mexico will be the primary contributor to the jaguar's recovery in the NRU. In the Pan-American Recovery Unit (PARU), countries within the jaguar's range will be the principal contributors to jaguar recovery.

The Service's limited resources are better applied to planning and on-the-ground implementation of conservation actions within the United States boundaries and in partnership with Mexico. Therefore, the Service and the Jaguar Recovery Team have established objective and measurable criteria for recovery and site-specific actions that, if implemented, will conserve viable jaguar populations in the northwestern portion of its range (e.g., the NRU). Priority is given to this unit because this is where the Service has the most jurisdiction, and we have an established working relationship with Mexico on issues of mutual concern.

Q: Was Customs and Border Patrol included in the developing of this plan?

A: Yes. U.S. Border Patrol (Tucson Sector) is represented on the Implementation Subgroup of the Jaguar Recovery Team. Other U.S. border area groups on the subgroup include ranchers, Malpais Borderlands Group, Altar Valley Conservation Alliance (ranching group), and state and federal land and wildlife managers.

Q: What are the actions and partnerships the Service is taking to support recovery of the jaguar in its primary range in 19 Central and South American countries?

A: In recent years, the Service's International Affairs Program has been at the forefront of supporting the conservation of jaguars throughout their range in Mexico, Central America and South America. During the past four years alone, we have supported 23 jaguar-related projects in 10 countries with more than $1 million in conservation funding. When jaguar habitat is conserved, many other species directly benefit.

In addition to providing incentives to protect habitat, many of the projects we support, seek to alleviate fears about jaguars in human communities through education. They also frequently provide landowners with concrete strategies and methods that reduce conflict in such a way that humans and jaguars can co-exist. As a result, landowners are better able to protect their livelihoods and economic interests while helping protect jaguars. They achieve these goals by discouraging jaguars from coming into contact with their livestock, by reforesting areas of their land, and by helping maintain the species' natural prey populations. Based on project reporting to date, most landowners who employ jaguar-friendly ranching techniques see a dramatic reduction in attacks and subsequent livestock mortality. A project in Paraguay has reduced cattle mortality from jaguar attacks by 80-100 percent at 12 sites that cover an area more than 770 square miles. Another project in the Maya Biosphere of Guatemala has reduced cattle mortality from jaguar attacks by approximately 70 percent at 283 properties, covering about 11,603 hectares of land now under improved management.

Q: What are the requirements for a full recovery of the jaguar?

A: The approach in this Recovery Plan is as follows:

- Two recovery units are included, the Northwestern Recovery Unit (NRU) and the larger Pan-American Recovery Unit (PARU). The NRU extends from south-central Arizona and extreme southwestern New Mexico, United States, south to Colima, Mexico. The PARU encompasses 18 countries from Mexico to Argentina. These units are further divided into core, secondary, and peripheral areas.
- The status of and threats to jaguars in the PARU are summarized and general actions and criteria for addressing these threats and evaluating rangewide recovery are recommended.
- Detailed criteria and actions necessary to recover jaguar populations in the NRU are provided.

The Service will consider removing the jaguar from the ESA list due to recovery when all of the following conditions are met:

A. PARU

i. The status of the jaguar changes to Least Concern (LC) and is maintained under the IUCN Red List criteria (as defined by the World Conservation Union, http://www.iucnredlist.org) for at least 20 more years after first qualifying for LC, which would mean threats have been reduced so the jaguar population is no longer at risk of a ≥ 30 percent decline because its area of occupancy, extent of occurrence, and/or habitat quality, as well as actual or potential levels of exploitation, have been stable for at least 40 years.

B. NRU

i. Maintain approximately 60 percent occupancy (proportion of cells) in each of the Core Areas over 40 years (inclusive of the 20 years required to downlist).

ii. Over 40 years, genetic distance (e.g., F_{ST} or G_{ST}) between the Sonora and Jalisco Core Areas does not significantly increase, and inbreeding coefficients (F_{IS} or G_{IS}) within each of the Sonora and Jalisco Core Areas do not significantly increase.

iii. During a period of 40 years, the average of at least 30 percent of the adult population within the Sonora and Jalisco Core Areas are female (based on data gathered through surveying, monitoring, genetic analysis, etc.).

iv. Agency policies and regulations (including transportation siting and design), land-use regulations, and landowner agreements in Mexico are sufficient to ensure the network of ≥ 100-km^2 blocks (the minimum area capable of supporting at least three breeding females) of high-quality habitat and habitat connections between blocks within each Core Area (Sonora and Jalisco) will support genetically and demographically viable jaguar populations for the foreseeable future.

v. Agency policies and regulations (including transportation), land-use regulations, and landowner agreements in Mexico are sufficient to ensure landscape permeability will be maintained for jaguars within the Sinaloa Secondary Area.

vi. Agency policies and regulations (including transportation), land-use regulations, and landowner agreements in the United States and Mexico are sufficient to ensure landscape permeability, including at least two trans-border linkages, will be maintained for jaguars throughout the Borderlands Secondary Area.

vii. The threat of direct human killing of jaguars is decreased or maintained at sustainable levels as measured by acceptable evidence or an index.

viii. Effective federal, state, tribal, and/or local laws are in place in the NRU that ensure killing of jaguars is prohibited or regulated so viable populations of the species can be maintained.

Service and Binational Team Complete ESA Recovery Plan for America's Largest Wild Cat

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final Endangered Species Act (ESA) recovery plan for the jaguar, currently listed under the Aact at endangered. The plan provides a recovery framework and goals for improving the species' status throughout its entire 19-country range while focusing on the jaguar populations in northwestern Mexico and the southwestern United States.

The final recovery plan describes two large jaguar recovery units – the Pan-American Recovery Unit (PARU) where jaguars occupy habitat from eastern Mexico to northern Argentina, and the Northwestern Recovery Unit (NRU) extending from Colima State in western Mexico to the U.S. Southwest. More than 99 percent of the jaguar's range is in Central and South America, so the plan recognizes that countries within the PARU will be the principal contributors to its recovery. The Service will continue to promote jaguar recovery throughout the range of the jaguar, including continued funding support.

The Service has established strong working relationships with state and local partners, conservation groups and the Mexican government. The binational recovery team has not prescribed jaguar reintroductions in the United States but calls for focusing efforts on sustaining potential habitat. In addition, the plan calls for establishing at least two borderland dispersal corridors for jaguars' continued movement through remote, rugged habitat between the countries, eliminating poaching, and improving social acceptance of the jaguar to accommodate their return to the United States.

"The binational recovery team's scientific expertise in protecting the jaguar has been invaluable," said Amy Lueders, the Service's Southwest Regional Director. "We recognize the challenges involved in conserving and recovering a species with such an expansive international range, and the team has laid out a comprehensive plan with goals that are achievable and realistic. We look forward to continuing to work with our diverse partners on this effort within and outside the United States."

Loss of habitat, direct killing of the cats, and depletion of prey are the primary factors contributing to the jaguar's current status and decreasing population trend. Due to past habitat loss, it is unlikely that jaguars will be fully self-sustaining throughout their entire historical range. However, conservation of key jaguar populations and habitat -- including core breeding and connective areas -- will be critical to jaguar recovery. ~~We anticipate it will take a minimum of 50 years to recover the jaguar.~~

Since 1996, seven individual male jaguars have been documented in the United States, all in southern Arizona and southwestern New Mexico. These jaguars are believed to have come from the nearest core area and breeding population, approximately 130 miles south of the U.S.-Mexico border in Sonora.

Across the jaguar's primary range in Latin America, the Service is actively working with countries and local partners to protect and recover the cat. Conservation efforts include providing incentives for protecting jaguar habitat and prey, education campaigns addressing misinformation and fears, and providing landowners with strategies for co-existing with jaguars.

Recovery plans are not regulatory but provide a framework for recovery of a species so protection under the ESA is no longer necessary. This recovery plan includes scientific information about the species and provides recovery criteria, conservation actions necessary for its recovery and delisting from the ESA and estimates of the time and cost to carry out the measures needed to achieve the plan's goal.

To achieve delisting, viable jaguar populations must be secured throughout their range. This will require protecting jaguar habitat quality and connectivity; providing incentives to protect jaguars and their habitat; reducing human-caused mortality of jaguars, particularly retaliatory killing due to livestock depredation; improving, enacting and/or enforcing effective laws that regulate illegal killing of jaguars, jaguar prey and habitat loss; securing adequate funding to implement recovery actions; and maintaining and developing partnerships in the Americas, particularly in Mexico. Once recovery is achieved and the jaguar is delisted, the states manage the species ~~These protections must remain in place after delisting~~ to ensure its ~~the~~ long-term viability~~. of the species.~~

The binational Jaguar Recovery Team includes representatives of CONANP (National Commission of Protected Areas in Mexico), CEDES (Commission of Ecology and Sustainable Development of the State of Sonora), U.S. Department of Agriculture APHIS Wildlife Services and U.S. Forest Service, Bureau of Land Management, U.S. Border Patrol, Arizona Game and Fish Department, New Mexico Department of Game and Fish, Tohono O'odham Nation, Altar Valley Conservation Alliance, Malpai Borderlands Group, Naturalia, Panthera and several ranchers, landowners, stakeholders and universities in Mexico and the United States. Additionally, the Conservation Planning Specialist Group and the Wildlife Conservation Society contributed substantially to technical aspects of the recovery plan.

The Jaguar Recovery Plan is available at: https://www.fws.gov/southwest/es/arizona/Jaguar.htm or by request from Field Supervisor, U.S. Fish and Wildlife Service, Arizona Ecological Services Office, 9828 North 31st Avenue, #C3, Phoenix, AZ 85051–2517; phone 602/242-0210.

MEMORANDUM OF UNDERSTANDING
BETWEEN THE
UNITED STATES CUSTOMS AND BORDER PROTECTION
AND THE
U.S. FISH AND WILDLIFE SERVICE

Regarding Implementation of Executive Order 13186: "Responsibilities of Federal Agencies to Protect Migratory Birds"

This Memorandum of Understanding (MOU) is entered into between the U.S. Customs and Border Protection (CBP) and the U.S. Fish and Wildlife Service (FWS), herein collectively referred to as the Parties.

A. Purpose and Scope

The Parties enter into this MOU pursuant to Executive Order (EO) 13186 (66 FR 3853, Jan. 17, 2001) concerning the responsibilities of Federal agencies to protect migratory birds. The EO directs executive departments and agencies to take certain actions to further implement the Migratory Bird Treaty Act (MBTA)[1]. This MOU focuses on avoiding and minimizing adverse impacts on migratory birds and strengthening migratory bird conservation through enhanced collaboration between the Parties. This MOU does not waive any applicable legal requirements and does not authorize the take of migratory birds.

B. Authority

The Parties enter into this MOU under the provisions of the following laws and other authorities available to the Parties:

- Bald and Golden Eagle Protection Act (Eagle Act) of 1940, as amended (16 U.S.C. 668–668d);
- Coastal Zone Management Act (CZMA), as amended (16 U.S.C. 1451–1466);
- Endangered Species Act (ESA) of 1973, as amended (16 U.S.C. 1531–1544);
- Executive Order 13186, Responsibilities of Federal Agencies to Protect Migratory Birds, 2001 (66 Fed. Reg. 3853, Jan. 17, 2001);
- Federal Water Pollution Control Act (Clean Water Act), as amended (33 U.S.C.

[1] This MOU focuses on improving bird conservation actions under the provisions of the MBTA. However, some birds are protected by other environmental laws and associated regulations such as the Endangered Species Act (ESA) and the Bald and Golden Eagle Protection Act (Eagle Act). As such, the coordination, permitting procedures; and requirements under these statutes are different. Therefore, if migratory bird species also covered by the ESA or the Eagle Act are present, CBP should coordinate with FWS to ensure compliance with the specific considerations of these statutes.

1251–1388);
- Fish and Wildlife Act of 1956, as amended (16 U.S.C. 742a–j-2 *et seq*.);
- Fish and Wildlife Conservation Act of 1980, as amended (16 U.S.C. 2901–2911);
- Fish and Wildlife Coordination Act of 1980, as amended (16 U.S.C. 661–667d);
- Fish and Wildlife Improvement Act of 1978, as amended (16 U.S.C. 742l);
- Migratory Bird Conservation Act of 1929, as amended (16 U.S.C. 715–715r);
- Migratory Bird Treaty Act of 1918, as amended (16 U.S.C. 703–712); and
- National Environmental Policy Act (NEPA) of 1969, as amended (42 U.S.C. 4321–4347).

C. Missions of Both Parties

CBP

CBP is the largest federal law enforcement agency of the U.S. Department of Homeland Security (DHS) charged with the dual mission of securing the Nation's borders while facilitating legitimate trade and travel. As the guardian of U.S. borders, CBP protects approximately 4,000 miles of the international border between the contiguous United States and Canada, as well as 1,000 miles between Alaska and Canada, 1,900 miles of international border with Mexico, and 95,000 miles of shoreline in the contiguous United States.

CBP serves as the front line in defending the United States against terrorists and instruments of terror and protects the economic security of the United States by regulating and facilitating the lawful movement of goods and people across the U.S. border. CBP protects the U.S. economy by enforcing trade laws, intellectual property rights, and collection of revenue on goods imported into the United States; protects the food supply and agricultural industry from pests and disease; and increases the security of our airspace. CBP accomplishes its goals by:

- Effective targeting - each year, more than 11 million maritime containers arrive at U.S. seaports. At land borders, another 11 million containers arrive by truck and 2.7 million by rail. CBP is responsible for knowing the contents of these containers and any safety issues they might pose to the American people. In addition, CBP assesses all people and cargo entering the United States from abroad for terrorist risk.

- Enforcing trade laws – CBP works with internal and external stakeholders to facilitate legitimate trade and address areas of non-compliance while effectively communicating the terms of trade agreements and preferential trade legislation. CBP enforces import and export laws at port-of-entry locations under provisions of the Migratory Bird Treaty Act and the Endangered Species Act. CBP inspects for potential signs of violation of environmental laws such as transnational smuggling of migratory bird parts, invasive species, or other wildlife items. CBP also confirms that all cargo is legally possessed and collects proper revenues for imports.

- Fostering legitimate and safe travel - a key goal of CBP, which increases passenger security through effective risk assessment.

- Inspection technology and equipment - given the magnitude of CBP's responsibility, the development and deployment of sophisticated detection technology is essential. Deployment of nonintrusive inspection technologies is increasing. These technologies are viewed as "force multipliers" that enable CBP officers to screen or examine a larger portion of the stream of commercial traffic. CBP does not rely on any single technology or inspection process. Instead, officers and agents use various technologies in different combinations to substantially increase the likelihood that terrorist weapons, including a nuclear or radiological weapon, will be detected and interdicted.

- Outbound inspections: Keeping weapons and money out of terrorist hands - CBP has the authority to search outbound as well as inbound shipments and uses targeting to carry out its mission in this area. Targeting of outbound shipments and people is a multi-dimensional effort that is enhanced by interagency cooperation.

- Protecting border areas between official ports of entry - Border Patrol agents and Air and Marine Operations personnel are securing areas between the ports of entry by implementing a comprehensive border enforcement strategy, expanding, integrating, and coordinating the use of technology and communications.

In carrying out its statutory mandate to control and guard the border of the United States, CBP performs a number of operational, administrative, and management-related activities and projects that potentially impact migratory birds and their habitat. These activities include, but are not limited to, construction, demolition, operation, maintenance, and repair of:

- Facilities - defined as ports of entry, U.S. Border Patrol Stations, forward operating bases, Air and Marine Operations Facilities, Customs Quarters (housing), camps, checkpoints, or other CBP operated installations, which consists of the land, buildings, on-site roadways, and parking lots that CBP owns, leases, or uses as free space.

- Tactical infrastructure - defined by CBP as any physical component designed to consistently slow, delay, and act as an obstacle to illegal cross-border activity. These components include: fences and gates; roads; bridges, crossovers, and low-water crossings; drainage management structures; boat ramps; lighting and ancillary power systems; remote surveillance systems; mobile detection and inspection technologies and equipment; underground sensors; traffic checkpoints; license-plate readers; and barriers to prohibit illegal vehicle entry.

- Towers and aerostats with infrastructure - to support communications and surveillance activities. This includes fixed-site, tether-controlled approximately 200 foot-long aerostats operating up to 10,000 feet Mean Sea Level (MSL) and smaller relocatable aerostats tethered up to 5000 feet Above Ground Level (AGL) from under 200-foot tower

systems.

- Landscape and vegetation maintenance - to support surveillance activities and Border Patrol safety by improving line of sight and reducing physical obstacles when monitoring cross-border activity.

CBP is committed to executing its mission in an environmentally responsible manner and in compliance with environmental laws, regulations, and EOs, including EO 13186. As part of CBP's commitment to migratory bird conservation, CBP prepared a Migratory Bird Treaty Act Handbook to meet its responsibility to avoid and minimize negative effects to migratory birds and/or their habitats.

FWS

The mission of the FWS is to work with others to conserve, protect, manage, and enhance fish, wildlife, plants, and their habitats for the continuing benefit of the American people. The FWS Migratory Bird Program serves as the focal point in the United States for policy development and strategic planning, program implementation, and evaluation of actions designed to conserve migratory birds and their habitats.

The FWS is legally mandated to implement the conservation provisions of the MBTA, which includes responsibilities for managing migratory bird populations, domestic and international coordination, and the development and enforcement of regulations. The Migratory Bird Conservation Act and the Fish and Wildlife Coordination Act mandate migratory bird habitat conservation including habitat protection through acquisition, enhancement, and/or management, and avoidance and minimization of impacts.

FWS programs that involve bird conservation activities include:

1. The Division of Migratory Bird Management and the Migratory Bird Programs in the FWS Regional Offices serve as focal points for policy development and strategic planning. These offices develop and implement monitoring and management initiatives and issue permits for intentional take. Migratory Bird Programs help maintain healthy populations of migratory birds and their habitats to provide continued opportunities for citizens to enjoy bird-related recreation.

2. The Division of Bird Habitat Conservation is instrumental in supporting habitat conservation partnerships through the administration of bird conservation grant programs and development of Joint Ventures that serve as major vehicles for implementing the various bird conservation plans across the country.

3. Ecological Services Field Offices across the country serve as the primary contacts for technical assistance and environmental reviews of projects involving migratory bird issues. The Field Offices coordinate with the Regional FWS Migratory Bird Offices, as necessary,

during these reviews, regarding permits and overall migratory bird conservation strategies.

4. The Office of Law Enforcement (OLE) is the principal FWS program that enforces the legal provisions of the MBTA, Eagle Act, ESA, and other laws pertaining to migratory bird conservation.

5. The Convention on International Trade in Endangered Species (CITES) provides the basis for international cooperation and collaboration to ensure trade does not contribute to decline in wild populations of animals and plants, including protected bird species. All documents must be validated or certified by an officially recognized, originating country CITES-inspection authority at the time of export. FWS receives inspection documentation on all regulated CITES commodities including migratory birds and migratory bird parts after CBP completes its inspections.

6. The National Wildlife Refuge System manages National Wildlife Refuges, Waterfowl Protection Areas, and Wetland Management Districts across the country. Many units of this system were established to protect and conserve migratory birds. Refuges not only protect important habitat, but also focus on monitoring migratory bird populations and native habitat restoration for the benefit of migratory birds. The Division of Refuge Law Enforcement enforces the legal provisions of wildlife laws on National Wildlife Refuges, Waterfowl Production Areas, and National Fisheries. The Division of Refuge Law Enforcement also assists OLE when needed.

7. The Science Applications program works with other Service programs and partners to ensure that the necessary science, tools, and capacity are available for planning and implementing the most efficient and effective best management practices (BMPs) to protect fish and wildlife including migratory birds. They facilitate regional self-directed science management partnerships called Landscape Conservation Cooperatives to develop and apply shared science capacity to conservation.

D. Statement of Mutual Interest and Benefit

Both Parties agree that migratory birds are important components of biological diversity. Their conservation will help to sustain ecological integrity and serve the public demand for outdoor recreation, conservation education, wildlife viewing, and hunting opportunities. Further, the Parties agree that it is important to identify measures that will: 1) promote migratory bird conservation; 2) avoid and minimize negative effects to migratory birds and their habitats; and 3) recognize that actions that may provide long-term benefits to migratory bird populations as a whole may result in short-term negative effects on individual birds. It is in the interest of both Parties that potential impacts, direct and indirect, are thoroughly assessed and unavoidable impacts are appropriately mitigated.

Nothing in this MOU is intended to prevent Border Patrol agents from exercising existing exigent/emergency authorities to access lands, including authority to conduct motorized off-road pursuit of cross border violators at any time.

E. Obligations of Both Parties

To the extent allowed by law, subject to the availability of appropriations and within administration budgetary limits, and in accord with the CBP and FWS missions and capabilities, each Party shall:

1. Support the conservation intent of EO 13186 and the migratory bird conventions, to the extent practicable, by: 1) integrating bird conservation principles, measures, and practices into agency actions, and 2) avoiding and minimizing negative effects on migratory birds and their habitat.

2. Develop BMPs and implement accepted BMPs that are consistent with EO 13186 resulting in the avoidance, minimization, and reduction of negative effects on migratory birds and their habitat.

3. Promote economic and recreational value of birds to the general public as appropriate by developing and integrating information on migratory birds and their habitats into environmental studies, outreach, and education materials.

4. To the extent practicable, protect, restore, and enhance habitat of migratory birds on facilities and lands administered (controlled or leased) by CBP and prevent and minimize the loss or degradation of remaining natural habitats. This includes:

    a. Collaboration on development and implementation of management practices to avoid and minimize negative effects on migratory bird populations and/or their migration, breeding, nesting, foraging, staging, or wintering habitats.

    b. Working collaboratively with other Federal and State agencies, Tribes, non-governmental organizations, private landowners, and other partners, where appropriate, in joint efforts to identify, protect, restore, enhance, monitor, and manage important migratory bird areas (e.g., Important Bird Areas, other significant bird sites that occur on CBP properties) potentially affected by agency actions, focusing efforts in areas of current or future project activities.

5. Promote research and information exchange related to migratory bird conservation including inventorying and monitoring, developing studies related to agency decisions and management practices that may impact migratory birds, and information on environmental contaminants and other physical and biological stressors that are relevant to the conservation of migratory birds. Share information through online tools such as the Avian Knowledge Network (AKN) and Information, Planning, and Conservation (IPaC) decision support

system. The Parties agree to:

a. As practicable and compatible with other study needs and program mandates, collaborate in developing studies: 1) on migratory bird species that may be potentially affected by agency actions, with an emphasis on Birds of Conservation Concern; 2) on the effects of management activities; 3) on avoiding and minimizing degradation of migratory bird habitat; and 4) on creating a framework for implementing appropriate mitigation measures for CBP actions that will negatively effect migratory birds.

b. Identifying BMPs for: 1) avoiding and minimizing negative effects on migratory birds and their habitat; 2) conserving and restoring migratory bird habitats; 3) promoting bird conservation; and 4) inventorying and monitoring migratory birds. Feasible BMPs will be incorporated into online tools, job aids, guidance, and agency policy documents where appropriate.

c. Developing partnerships to further migratory bird conservation, as practicable. This includes cooperation, coordination, and data sharing with other Federal or State agencies, universities, potential developers or their contractors, and nongovernmental organizations involved in monitoring and research studies to provide reliable and comparable information on the distribution and abundance or status and trends of migratory bird populations. Utilize and contribute information to online data sharing sites, such as AKN or IPaC.

d. Promoting the implementation of existing regional or national inventory and monitoring programs and systems such as Breeding Bird Survey (BBS), eBIRD, Christmas Bird Counts, bird atlas projects, or migratory game bird surveys when practicable.

e. Collaborating on studies and research to understand the effects of agency actions on migratory birds, and monitoring bird population responses to BMPs once these practices have been developed and implemented.

f. Contributing information on migratory bird resources to partners developing outreach and education materials and activities.

6. Promoting training opportunities in the most appropriate methods and techniques to: 1) increase migratory bird conservation awareness in compliance with applicable legislation, regulations, and policies; 2) evaluate impacts of projects on migratory birds; and 3) develop management practices that avoid and minimize adverse impacts and promote beneficial proactive approaches to migratory bird conservation.

7. As new information on effectiveness of BMPs become available, evaluate the measures described in this MOU intended to protect, restore, and enhance migratory bird populations and their habitats, including avoiding and minimizing adverse impacts to migratory birds. The FWS Division of Migratory Bird Management, FWS Ecological Services Offices and

CBP agree to design and implement feasible and effective BMPs.

8. Participate, as appropriate, in the interagency Council for the Conservation of Migratory Birds (through DHS representatives) to share information on the conservation of migratory birds. The Council's duties include:

    a. Sharing the latest resource information to assist in the conservation and management of migratory birds.

    b. Developing an annual report of accomplishments and recommendations related to EO 13186. CBP will provide information to be incorporated in the DHS highlighted page.

    c. Fostering partnerships to further the goals of EO 13186.

    d. When appropriate, CBP can nominate a project that exemplifies the implementation of EO 13186 for consideration of the Presidential Migratory Bird Federal Stewardship Award for contributions to the protection of migratory birds.

F. CBP Obligations:

The appropriateness and practicality of implementing any specific conservation measure that reduces negative effects on migratory birds and destruction of migratory bird habitat will be determined on a case-by-case basis. Best management practices (BMPs) have been developed to benefit a variety of migratory bird species and their associated habitats. CBP will work cooperatively with FWS to provide information on existing BMPs, develop new BMPs as needed, and provide recommendations regarding feasible BMPs for CBP projects and actions that have the potential to negatively affect migratory birds. To the extent allowed by law, subject to the availability of appropriations and within Administration budgetary limits, and consistent with CBP missions and capabilities, CBP shall:

1) Follow CBP guidance as outlined in the internal *CBP Migratory Bird Treaty Act Handbook for CBP Preparers* (Sept. 4, 2013) regarding CBP's responsibility to avoid and minimize negative effects to migratory birds and/or their habitats pursuant to the MBTA and EO 13186.

2) Prior to starting CBP activities that are associated with general BMP measures (described in #9), utilize credible online tools such as IPaC and AKN to identify activities that are likely to result in negative effects on migratory birds. If additional information is needed, CBP shall engage in early planning and scoping with the FWS to identify migratory bird species likely to occur in areas affected by a proposed action.

3) Integrate migratory bird conservation principles, measures, and practices into agency activities. Avoid and minimize, to the extent practicable, adverse impacts on migratory bird

resources when conducting agency actions, in compliance with, and supporting the purposes of the MBTA, the Eagle Act, the ESA, NEPA, and other applicable statutes.

4) During the NEPA process CBP will assess the potential adverse impacts of proposed actions on migratory birds and their habitat, proactively address migratory bird conservation (including conservation measures in budgeting), initiate appropriate actions to avoid and minimize negative effects on migratory birds, and assess and document effects on species of concern. CBP will use the best available demographic, population, and/or habitat association data in the assessment of effects on species of concern.

5) To the extent practicable, protect, restore, and enhance habitat of migratory birds on facilities and lands administered (controlled or leased) by CBP and prevent and minimize the loss or degradation of remaining natural habitats. This includes the following:

    a) Prevent, contain, or abate pollution detrimental to migratory birds and their habitats.

    b) Prevent or abate detrimental alteration of migratory bird habitats, to the extent practicable.

    c) Communicate with FWS, as practicable, to resolve any negative effects on migratory birds occurring during immediate actions taken by CBP to respond to exigent/emergency situations involving human life, health, safety of persons, posing threat to national security. Examples of such CBP actions include pursuit of cross-border violators, search and rescue, response to credible threat, or, in some cases, emergency repair of certain strategic communications equipment. Communication may occur through most expedient channels including through coordination with uniformed FWS law enforcement personnel.

6) Implement the following approaches for avoiding and minimizing negative effects on migratory birds, focusing first on species of concern, priority habitats, and key risk factors:

    a) Assess and estimate the effects of proposed actions on migratory birds and their habitats through the project planning process (include this analysis in the NEPA document associated with the proposed action whenever possible). Use best available demographic, population, behavioral, and habitat data in the assessment of effects upon migratory birds. If sufficient data are unavailable, attempt to acquire necessary data by working with Federal, State, and other partners. Utilize online tools, such as AKN, for obtaining geospatial and biological data, and IPaC to obtain information regarding practices relating to geospatial data necessary to support the impact analysis.

    b) Evaluate, through the NEPA process, a reasonable range of alternatives in environmental reviews and, as applicable, incorporate practices to avoid and minimize adverse effects to migratory birds or degradation of habitats consistent with CBP's primary mission to protect the Nation's borders and facilitate legitimate trade and travel. Develop practices,

in coordination with FWS, to avoid and minimize impacts to migratory birds and their habitat and determine how to improve evaluation of impacts.

c) Work collaboratively with FWS and other partners, and develop partnerships with non-federal entities, to monitor migratory birds, as resources allow and within the agency's capabilities and authorities, to improve and better understand the need for, and effectiveness of, conservation efforts tied to projects under CBP authority.

7) Encourage incorporation of comprehensive migratory bird management objectives and BMPs in CBP environmental planning and guiding documents, including MBTA Handbook, ESA Handbook, NEPA Handbook, and other environmental documents consistent with NEPA, CEQ regulations, and other Federal environmental mandates.

8) Comply with applicable Federal migratory bird permitting requirements for activities subject to 50 CFR Part 21. While working through the permitting process with FWS, CBP will, to the maximum extent practicable, avoid and minimize the intentional take of migratory bird species, with an emphasis on species of concern, and, if necessary, develop standards and procedures regarding such take.

9) Develop BMPs to avoid and minimize negative effects on migratory birds or migratory bird habitat. The agreed-upon practices should be documented through the NEPA process. These BMPs should emphasize taking steps to avoid and minimize any potential impacts of known stressors associated with the proposed action on migratory birds, which will in turn reduce threats and assist with meeting migratory-bird conservation goals. Examples of BMPs include, but are not limited to:

a) General measures:
   i) Avoid construction, demolition, installation, and maintenance activities during migratory bird nesting/breeding season to the extent practicable. Where project work cannot occur outside the migratory bird nesting season, conduct surveys prior to scheduled activity to determine if active nests are present within the area of impact. Generally, the surveys should be conducted no more than five days prior to scheduled activity. If active nests are identified within or in the vicinity of a project site, avoid the site if practicable until nestlings have fledged or the nest fails. Coordinate with FWS if an active nest needs to be removed or relocated.
   ii) Limit roadside food source or habitat plantings (including landscaping projects near roads) to trees that do not bear fruit (e.g., choosing not to plant attractants like serviceberries, wild cherries, and spicebush, etc.).
   iii) Stay within existing roads and trails to the extent feasible. For motorized off-road pursuits, CBP will use the least intrusive or damaging motorized vehicle readily available, without compromising agent or officer safety. In accordance with the principles of the 2006 MOU (Memorandum of Understanding Among U. S. Department of Homeland Security and U. S. Department of the Interior and U. S. Department of Agriculture Regarding Cooperative National Security and

Counterterrorism Efforts on Federal Lands along the United States' Borders), between CBP-BP and the Department of the Interior (DOI) for Cooperative National Security and Counterterrorism Efforts on Federal Lands along the United States' Border, agents and officers will use their professional judgment in each specific situation based on available evidence to conclude if motorized off-road pursuit is reasonably expected to result in the apprehension of suspected cross-border violators.

iv) Avoid vegetation removal, trimming, and maintenance (e.g., general landscaping activities, tree trimming, grubbing, etc.) during the nesting season to the extent practicable consistent with USBP operational needs to maintain clear lines of sight to the border in key areas of illegal cross-border traffic and otherwise where citizen and agent safety and security is at risk. Periodic vegetation maintenance (e.g. grass mowing once a week) does not require nesting bird surveys prior to each maintenance event. When possible, consider clearing woody vegetation during the non-nesting season a year in advance of a proposed action.

v) Prevent release of non-native plants within project areas and use native plants in CBP facility landscaping where appropriate.

vi) Minimize wildfire potential by reducing hazards that can cause or help spread accidental fires.

b) Lighting, noise, and structural additions:

i) Prevent bird injury or death due to collisions with windows by turning off lights at night or putting up curtains.

ii) To improve avian ability to detect and avoid glass, break up window glass with either a pattern of vertical stripes that are at least ¼ inch wide with a maximum spacing of 4 inches, or horizontal stripes that are at least ¼ inch wide with a maximum spacing of 2 inches. Pattern variations may be appropriate for particular species and habitats.. Patterns should be applied on the outside of see-through windows and reflective glass. The pattern should also contrast enough with the glass to be seen clearly by birds.

iii) Minimize and shield lighting (e.g., downshield lights, install motion sensors).

iv) If migratory birds commonly nest on facilities that must be maintained/repaired during the nesting season, when feasible, prevent nesting by installing anti-perching devices on affected sections of the structure.

c) Communication towers, utilities and energy development:

i) Review BMPs outlined in FWS Guidance and consult with FWS when appropriate on the BMPs that are most suitable for CBP implementation and for prevention of negative effects. Available guidance includes, but is not limited to:

(1) The Federal Aviation Administration's Obstruction Marking and Lighting Advisory Circular AC 70/7460-1L.

(2) Recommended Best Practices for Communication Tower Design, Siting, Construction, Operation, Maintenance, and Decommissioning Division of Migratory Bird Management U. S. Fish and Wildlife Service Falls Church, Virginia August 2016.);

(3) Avian Power Line Interaction Committee – Suggested Practices for Avian Protection on Power Lines (2006);
(4) Avian Power Line Interaction Committee – Reducing Avian Collisions with Power Lines (2012); and
(5) U.S. Fish and Wildlife Service Land-based Wind Energy Guidelines (2012)

CBP will coordinate with FWS, as needed, in considering potential effects on migratory birds of CBP proposals for locating communication towers, utilities, and energy development projects such as power lines or wind turbines. Construction of new communications, utility and energy systems, and associated infrastructure should be designed to avoid and minimize impacts on migratory bird populations where feasible. Existing utilities may also be considered for retrofitting to eliminate or reduce impacts.

10) Consistent with safety and security protocols, allow FWS and other partners reasonable access to CBP properties when necessary for conducting sampling or survey programs such as Monitoring Avian Productivity and Survivorship stations, Breeding Bird Surveys, International Shorebird Survey, and breeding bird atlases.

11) Support efforts by FWS to promote the ecological, economic, and recreational values of migratory birds by supporting outreach and educational activities and materials, when appropriate.

12) Minimize or prevent the pollution or detrimental alteration of the environment used by migratory birds whenever practicable by assessing information on environmental contaminants and other stressors associated with CBP actions or existing infrastructure relevant to migratory bird conservation.

13) Where BMPs require inventorying and monitoring, develop and implement new and/or existing inventory and monitoring programs, at appropriate scales, using national standardized protocols when available, to evaluate the effectiveness of BMPs designed to avoid and minimize take of migratory birds, with emphasis on those actions that have the potential to significantly impact species of concern.

14) Where appropriate and feasible, work with FWS to identify opportunities and processes for CBP vessels and aircraft to accommodate FWS staff ride-alongs where such accommodation will not interfere with CBP mission capability or create a financial burden on CBP, but will enable the FWS to conduct important research beneficial to migratory sea birds.

15) Advise the public of the availability of this MOU through a notice published in the Federal Register.

G. The Fish and Wildlife Service Shall:

1. Work with CBP by providing recommendations to avoid and minimize adverse effects

upon migratory birds from CBP actions. FWS may also incorporate these recommendations into IPaC for ease of reference.

2. Through the Division of Migratory Bird Management, maintain a web page on permits that provides links to all offices responsible for issuing permits and permit application forms for take of migratory birds.

3. Provide essential background information to CBP when requested, or through online tools such as AKN and IPaC, to ensure sound management decisions. This may include:

    a. Migratory bird distributions, status, key habitats, conservation guidelines, and risk factors within each Bird Conservation Region.

    b. Changes to the MBTA and its regulations and procedures or other Acts and their regulations affecting management of migratory birds.

    c. Population trends of species that CBP's activities may affect.

    d. Protection measures for reducing human-caused bird mortality that may be applicable to CBP activities, as new information becomes available.

    e. Proactively share with CBP new guidance documents, tools, and job aids designed to improve understanding of MBTA requirements and further the ability of CBP to promote the conservation of migratory birds.

4. Update the FWS publication of *Birds of Conservation Concern* at regular intervals for reliable reference.

5. Recommend accepted BMPs that CBP could programmatically adopt in dealing with migratory bird issues and reducing negative effects on migratory birds and their habitat.

6. FWS will work cooperatively with CBP to provide information on existing BMPs, develop new BMPs as needed, and provide recommendations regarding feasible BMPs for CBP projects and actions that have the potential to take migratory birds.

7. Work to identify important migratory bird habitats (i.e., migration corridors and staging, wintering, nesting, brood-rearing, stop-over habitats, ecological conditions important to nesting habitats, foraging habitats on or adjoining OCS) to aid in collaborative planning.

8. Through IPAC or through the Regional Migratory Bird office, provide to CBP, upon request, technical assistance on migratory bird species and their habitats.

9. Through the appropriate Ecological Services Field office, provide to CBP, upon request, technical assistance for avoiding and minimizing project-related effects on migratory

birds and their habitat resulting from CBP actions.

10. Review and comment on NEPA documents and other planning documents forwarded by CBP (through the Department of Homeland Security). When appropriate, due to special expertise, join as a cooperating agency for preparation of NEPA documents, consistent with the 2013 Memorandum of Agreement for Environmental Coordination and Review of Border Security Activities between the U.S. Department of the Interior, U.S. Department of Agriculture (USDA) Forest Service and U.S. Customs and Border Protection.

H. Dispute Resolution

To prevent potential conflicts and resolve actual disagreements between the Parties, the appropriate CBP Office and the corresponding FWS Ecological Services Field Office will first attempt to resolve the dispute. The Parties will use collaborative processes, including informal meetings or negotiations, to avoid or minimize a dispute. If necessary, the Parties will use conflict prevention or traditional Alternative Dispute Resolution (ADR) processes to achieve consensus. . If there is no resolution at the field-office level within 30 days the CBP Office should elevate the issue to the CBP Office of Facilities and Asset Management, Facilities Management and Engineering Directorate, Energy and Environmental Management Division, and the FWS Ecological Services Field Office should elevate the issue to the FWS Regional Office. In the event that the Parties cannot resolve the matter at this level within 30 days, CBP may elevate the dispute to the CBP Office of Facilities and Asset Management, Facilities Management and Engineering Directorate and FWS may elevate the dispute to the FWS Headquarters.

Representatives of both agencies agree to enter into a conflict prevention process using collaborative methods or to enter into a traditional ADR process, as appropriate.

I. Agreement

The Parties mutually agree and understand that:

1. This MOU in no way alters either Party's obligations or responsibilities under the authorities listed in Section B of this MOU or any other statute or other legal authority.

2. Documents furnished to a Party under this MOU may be subject to the Freedom of Information Act (FOIA, 5 U.S.C. § 552). A Party shall not release documents originating in the other Party to a FOIA requester. Rather, the Party shall forward such document(s) to the originating Party for review, determination, and response directly to the requester.

3. This MOU is neither a fiscal- nor a funds-obligation document. The Parties will handle any endeavor involving reimbursement, contribution of funds, or other transfer of anything of value between the Parties in accordance with applicable laws, regulations, and procedures,

including those for government procurement and printing. This instrument does not provide such authority.

4. Press releases prepared by either Party that reference this MOU, or the relationship established between the Parties of this MOU, must have prior approval of both Parties appropriate departments.

5. The Parties shall schedule periodic meetings every three years to review progress and identify opportunities for advancing the principles of this MOU.

6. This MOU in no way alters or takes the place of the respective Parties' obligations to comply with applicable requirements pursuant to NEPA, MBTA, ESA, CZMA, the Eagle Act, or other applicable statutes and legal authorities.

7. CBP may incorporate the responsibilities established by this MOU into existing CBP actions; however, CBP may not be able to implement some responsibilities identified in the MOU until CBP has successfully included them in formal planning processes. This MOU does not require changes to current contracts, permits, or other third-party agreements, until such time as CBP has successfully included them in a formal planning process. The Parties will implement this MOU when initiating new actions, when creating new agency guidance documents, and when revising the existing CBP MBTA Handbook, ESA Handbook, NEPA Handbook, or other environmental documents. It does not apply to ongoing CBP actions for which a NEPA decision document was finalized prior to, or within 180 days of the date this MOU was signed, unless supplemental NEPA analysis is subsequently required for the underlying action.

8. This MOU is intended only to improve the internal management of the Executive Branch of the Federal Government and does not create any right or benefit, substantive or procedural, separately enforceable at law or equity by a party against the United States, its agencies or instrumentalities, its officers or employees, or any other person.

9. This MOU takes effect upon the signature of CBP and FWS, and shall be reviewed every three years from the date of execution. This MOU may be amended upon written request of either Party and the subsequent written concurrence of the other Party. Either Party may terminate this MOU, in whole or in part, at any time by providing the other Party 30-days written notice to that effect. This MOU in no way restricts either Party from participating in similar activities with other public or private agencies, governments, organizations, or individuals.

Appendix A

Definitions:

Action – a program, activity, project, official policy, rule, regulation, or formal plan directly carried out by CBP.

Active nest – nest containing viable eggs, unfledged young, or fledged young that are still dependent on the nest, except bald and golden eagles. An active bald or golden eagle nest is defined by regulation as an "in-use nest," which means "a bald or golden eagle nest characterized by the presence of one or more eggs, dependent young, or adult eagles on the nest in the past 10 days during breeding season." 50 C.F.R. § 22.3 (also note additional definitions for "alternate nest" and "eagle nest").

Avian Knowledge Network (AKN) – An online database of bird distribution and abundance dedicated to the development of tools and resources that guide and inform conservation management (www.avianknowledge.net).

Breeding Bird Survey (BBS) – a standardized international survey that provides information on population trends of breeding birds, through volunteer observations located along randomly selected roadside routes in the United States, Canada and Mexico (http://www.mbr-pwrc.usgs.gov/bbs/html).

Birds of Conservation Concern – A list published and periodically updated by the FWS Division of Migratory Bird Management. The overall goal of this list is to identify the migratory and non-migratory bird species that, in addition to species already listed under ESA, represent the FWS's highest conservation priorities. The most current version of the list, Birds of Conservation Concern 2008, is available at http://www.fws.gov/migratorybirds.

CBP Office – All CBP organizational elements, including: Headquarters, Program Management Offices, Facility Divisions or Centers, Field Offices, and any other entity that reports to the Commissioner of CBP.

Conservation Measure – an action undertaken to avoid or minimize action-related environmental effects (in this case specific to migratory birds) and ultimately improve the conservation status of one or more species of migratory birds. Examples include BMPs, surveys and inventories, monitoring, status assessments, land acquisition or protection, habitat restoration, population manipulation, research, and outreach.

Council for the Conservation of Migratory Birds – an interagency council established by the Secretary of Interior to oversee the implementation of Executive Order 13186.

Ecological Condition – the composition, structure, and processes of ecosystems over time and space. This includes the diversity of plant and animal communities, the productive capacity of

ecological systems and species diversity, ecosystem diversity, disturbance processes, soil productivity, water quality and quantity, and air quality. Often referred to in terms of ecosystem health, which is the degree to which ecological factors and their interactions are reasonably complete and functioning for continued resilience, productivity, and renewal of the ecosystem.

Effect (adverse or beneficial) – "effects" and "impacts," as used in this MOU are synonymous. Effects may be direct, indirect, or cumulative, and refer to effects from management actions or categories of management actions on migratory bird populations, habitats, ecological conditions, or significant bird conservation sites.

Facility (CBP) - Ports of Entry, U.S. Border Patrol Stations, Forward Operating Bases, Air and Marine Operations Facilities, Customs Quarters (housing), camps, checkpoints, or other CBP-operated installations, which consists of the land, buildings, on-site roadways, and parking lots that CBP owns, leases, or uses as free space.

Important Bird Areas (IBA) – a network of sites that provide essential habitat for the long-term conservation of birds. In the United States, the IBA network is administered by the American Bird Conservancy and the National Audubon Society. (http://www.audubon.org/bird/iba/).

Information, Planning, and Conservation (IPaC) decision support system - a conservation planning tool for streamlining the environmental review process (http://ecos.fws.gov/ipac).

International Shorebird Survey – a monitoring program started in 1974 to survey shorebirds (sandpipers, plovers, etc.) across the Western Hemisphere. (http://www.manomet.org/programs.shorebirds).

Management Action – an activity by a government agency that could cause a positive or negative effect on migratory bird populations or habitats.

Migratory Bird – an individual of any species protected by the MBTA. A list of migratory birds can be found in 50 CFR § 10.13 and http://www.fws.gov/migratorybirds/intrnltr/mbta/mbtandx.html.

Monitoring Avian Productivity and Survivorship (MAPS) – a program that uses the banding of birds during the breeding season to track the changes and patterns in the number of young produced and the survivorship of adults and young. (http://www.birdpop.org/maps.htm).

Mitigation – For NEPA purposes, mitigation includes (a) avoiding the impact altogether by not taking a certain action or parts of an action, (b) minimizing impacts by limiting the degree or magnitude of the action and its implementation, (c) rectifying the impact by repairing, rehabilitating, or restoring the affected environment, (d) reducing or eliminating the impact over time by preservation and maintenance operations during the life of the action, and (e) compensating for the impact by replacing or providing substitute resources or environments

(from 40 C.F.R. § 1508.20, CEQ Regulations for Implementing the Procedural Provisions of the National Environmental Policy Act).

National Environmental Policy Act (NEPA) – the law that requires Federal agencies to prepare a detailed analysis of the environmental impacts of their proposed action with alternatives and to include public involvement in the decision making process for major federal actions significantly affecting the quality of the human environment. 42 U.S.C. § 4321–4347.

Species of Concern – refers to several categories of birds including: 1) species listed in the periodic report, *Birds of Conservation Concern*, published by the FWS Division of Migratory Bird Management (http://www.fws.gov/migratorybirds); 2) priority migratory bird species documented in the comprehensive bird conservation plans (North American Waterbird Conservation Plan, United States Shorebird Conservation Plan, Partners in Flight Bird Conservation Plans); 3) species or populations of waterfowl identified as high, or moderately high, continental priority in the North American Waterfowl Management Plan; 4) listed threatened and endangered bird species in 50 C.F.R. § 17.11; and 5) MBTA-listed gamebirds of management concern (http://www.fws.gov/migratorybirds).

Take – to pursue, hunt, shoot, wound, kill, trap, capture or collect or attempt to pursue, hunt, wound, kill, trap, capture or collect (50 C.F.R. § 10.12). The Eagle Act defines take to mean pursue, shoot, shoot at, poison, wound, kill, capture, trap, collect, destroy, molest, or disturb bald and golden eagles (16 U.S.C. § 668c). "Disturb" is further defined by regulation to mean "agitate or bother an eagle to a degree that causes, or is likely to cause, based on the best scientific information available, (1) injury to an eagle, (2) a decrease in its productivity, by substantially interfering with normal breeding, feeding, or sheltering behavior, or (3) nest abandonment, by substantially interfering with normal breeding, feeding, or sheltering behavior." 50 C.F.R. § 22.3.

MEMORANDUM OF UNDERSTANDING
BETWEEN THE
UNITED STATES CUSTOMS AND BORDER PROTECTION
AND THE
U.S. FISH AND WILDLIFE SERVICE

Regarding Implementation of Executive Order 13186: "Responsibilities of Federal Agencies to Protect Migratory Birds"

This Memorandum of Understanding (MOU) is entered into between the U.S. Customs and Border Protection (CBP) and the U.S. Fish and Wildlife Service (FWS), herein collectively referred to as the Parties.

A. Purpose and Scope

The Parties enter into this MOU pursuant to Executive Order (EO) 13186 (66 FR 3853, Jan. 17, 2001) concerning the responsibilities of Federal agencies to protect migratory birds. The EO directs executive departments and agencies to take certain actions to further implement the Migratory Bird Treaty Act (MBTA)[1]. This MOU focuses on avoiding and minimizing adverse impacts on migratory birds and strengthening migratory bird conservation through enhanced collaboration between the Parties. This MOU does not waive any applicable legal requirements and does not authorize the take of migratory birds.

B. Authority

The Parties enter into this MOU under the provisions of the following laws and other authorities available to the Parties:

- Bald and Golden Eagle Protection Act (Eagle Act) of 1940, as amended (16 U.S.C. 668–668d);
- Coastal Zone Management Act (CZMA), as amended (16 U.S.C. 1451–1466);
- Endangered Species Act (ESA) of 1973, as amended (16 U.S.C. 1531–1544);
- Executive Order 13186, Responsibilities of Federal Agencies to Protect Migratory Birds, 2001 (66 Fed. Reg. 3853, Jan. 17, 2001);
- Federal Water Pollution Control Act (Clean Water Act), as amended (33 U.S.C.

[1] This MOU focuses on improving bird conservation actions under the provisions of the MBTA. However, some birds are protected by other environmental laws and associated regulations such as the Endangered Species Act (ESA) and the Bald and Golden Eagle Protection Act (Eagle Act). As such, the coordination, permitting procedures; and requirements under these statutes are different. Therefore, if migratory bird species also covered by the ESA or the Eagle Act are present, CBP should coordinate with FWS to ensure compliance with the specific considerations of these statutes.

1251–1388);
- Fish and Wildlife Act of 1956, as amended (16 U.S.C. 742a–j-2 *et seq*.);
- Fish and Wildlife Conservation Act of 1980, as amended (16 U.S.C. 2901–2911);
- Fish and Wildlife Coordination Act of 1980, as amended (16 U.S.C. 661–667d);
- Fish and Wildlife Improvement Act of 1978, as amended (16 U.S.C. 742l);
- Migratory Bird Conservation Act of 1929, as amended (16 U.S.C. 715–715r);
- Migratory Bird Treaty Act of 1918, as amended (16 U.S.C. 703–712); and
- National Environmental Policy Act (NEPA) of 1969, as amended (42 U.S.C. 4321–4347).

C. Missions of Both Parties

CBP

CBP is the largest federal law enforcement agency of the U.S. Department of Homeland Security (DHS) charged with the dual mission of securing the Nation's borders while facilitating legitimate trade and travel. As the guardian of U.S. borders, CBP protects approximately 4,000 miles of the international border between the contiguous United States and Canada, as well as 1,000 miles between Alaska and Canada, 1,900 miles of international border with Mexico, and 95,000 miles of shoreline in the contiguous United States.

CBP serves as the front line in defending the United States against terrorists and instruments of terror and protects the economic security of the United States by regulating and facilitating the lawful movement of goods and people across the U.S. border. CBP protects the U.S. economy by enforcing trade laws, intellectual property rights, and collection of revenue on goods imported into the United States; protects the food supply and agricultural industry from pests and disease; and increases the security of our airspace. CBP accomplishes its goals by:

- Effective targeting - each year, more than 11 million maritime containers arrive at U.S. seaports. At land borders, another 11 million containers arrive by truck and 2.7 million by rail. CBP is responsible for knowing the contents of these containers and any safety issues they might pose to the American people. In addition, CBP assesses all people and cargo entering the United States from abroad for terrorist risk.

- Enforcing trade laws – CBP works with internal and external stakeholders to facilitate legitimate trade and address areas of non-compliance while effectively communicating the terms of trade agreements and preferential trade legislation. CBP enforces import and export laws at port-of-entry locations under provisions of the Migratory Bird Treaty Act and the Endangered Species Act. CBP inspects for potential signs of violation of environmental laws such as transnational smuggling of migratory bird parts, invasive species, or other wildlife items. CBP also confirms that all cargo is legally possessed and collects proper revenues for imports.

- Fostering legitimate and safe travel - a key goal of CBP, which increases passenger security through effective risk assessment.

- Inspection technology and equipment - given the magnitude of CBP's responsibility, the development and deployment of sophisticated detection technology is essential. Deployment of nonintrusive inspection technologies is increasing. These technologies are viewed as "force multipliers" that enable CBP officers to screen or examine a larger portion of the stream of commercial traffic. CBP does not rely on any single technology or inspection process. Instead, officers and agents use various technologies in different combinations to substantially increase the likelihood that terrorist weapons, including a nuclear or radiological weapon, will be detected and interdicted.

- Outbound inspections: Keeping weapons and money out of terrorist hands - CBP has the authority to search outbound as well as inbound shipments and uses targeting to carry out its mission in this area. Targeting of outbound shipments and people is a multi-dimensional effort that is enhanced by interagency cooperation.

- Protecting border areas between official ports of entry - Border Patrol agents and Air and Marine Operations personnel are securing areas between the ports of entry by implementing a comprehensive border enforcement strategy, expanding, integrating, and coordinating the use of technology and communications.

In carrying out its statutory mandate to control and guard the border of the United States, CBP performs a number of operational, administrative, and management-related activities and projects that potentially impact migratory birds and their habitat. These activities include, but are not limited to, construction, demolition, operation, maintenance, and repair of:

- Facilities - defined as ports of entry, U.S. Border Patrol Stations, forward operating bases, Air and Marine Operations Facilities, Customs Quarters (housing), camps, checkpoints, or other CBP operated installations, which consists of the land, buildings, on-site roadways, and parking lots that CBP owns, leases, or uses as free space.

- Tactical infrastructure - defined by CBP as any physical component designed to consistently slow, delay, and act as an obstacle to illegal cross-border activity. These components include: fences and gates; roads; bridges, crossovers, and low-water crossings; drainage management structures; boat ramps; lighting and ancillary power systems; remote surveillance systems; mobile detection and inspection technologies and equipment; underground sensors; traffic checkpoints; license-plate readers; and barriers to prohibit illegal vehicle entry.

- Towers and aerostats with infrastructure - to support communications and surveillance activities. This includes fixed-site, tether-controlled approximately 200 foot-long aerostats operating up to 10,000 feet Mean Sea Level (MSL) and smaller relocatable aerostats tethered up to 5000 feet Above Ground Level (AGL) from under 200-foot tower

systems.

- Landscape and vegetation maintenance - to support surveillance activities and Border Patrol safety by improving line of sight and reducing physical obstacles when monitoring cross-border activity.

CBP is committed to executing its mission in an environmentally responsible manner and in compliance with environmental laws, regulations, and EOs, including EO 13186. As part of CBP's commitment to migratory bird conservation, CBP prepared a Migratory Bird Treaty Act Handbook to meet its responsibility to avoid and minimize negative effects to migratory birds and/or their habitats.

FWS

The mission of the FWS is to work with others to conserve, protect, manage, and enhance fish, wildlife, plants, and their habitats for the continuing benefit of the American people. The FWS Migratory Bird Program serves as the focal point in the United States for policy development and strategic planning, program implementation, and evaluation of actions designed to conserve migratory birds and their habitats.

The FWS is legally mandated to implement the conservation provisions of the MBTA, which includes responsibilities for managing migratory bird populations, domestic and international coordination, and the development and enforcement of regulations. The Migratory Bird Conservation Act and the Fish and Wildlife Coordination Act mandate migratory bird habitat conservation including habitat protection through acquisition, enhancement, and/or management, and avoidance and minimization of impacts.

FWS programs that involve bird conservation activities include:

1. The Division of Migratory Bird Management and the Migratory Bird Programs in the FWS Regional Offices serve as focal points for policy development and strategic planning. These offices develop and implement monitoring and management initiatives and issue permits for intentional take. Migratory Bird Programs help maintain healthy populations of migratory birds and their habitats to provide continued opportunities for citizens to enjoy bird-related recreation.

2. The Division of Bird Habitat Conservation is instrumental in supporting habitat conservation partnerships through the administration of bird conservation grant programs and development of Joint Ventures that serve as major vehicles for implementing the various bird conservation plans across the country.

3. Ecological Services Field Offices across the country serve as the primary contacts for technical assistance and environmental reviews of projects involving migratory bird issues. The Field Offices coordinate with the Regional FWS Migratory Bird Offices, as necessary,

during these reviews, regarding permits and overall migratory bird conservation strategies.

4. The Office of Law Enforcement (OLE) is the principal FWS program that enforces the legal provisions of the MBTA, Eagle Act, ESA, and other laws pertaining to migratory bird conservation.

5. The Convention on International Trade in Endangered Species (CITES) provides the basis for international cooperation and collaboration to ensure trade does not contribute to decline in wild populations of animals and plants, including protected bird species. All documents must be validated or certified by an officially recognized, originating country CITES-inspection authority at the time of export. FWS receives inspection documentation on all regulated CITES commodities including migratory birds and migratory bird parts after CBP completes its inspections.

6. The National Wildlife Refuge System manages National Wildlife Refuges, Waterfowl Protection Areas, and Wetland Management Districts across the country. Many units of this system were established to protect and conserve migratory birds. Refuges not only protect important habitat, but also focus on monitoring migratory bird populations and native habitat restoration for the benefit of migratory birds. The Division of Refuge Law Enforcement enforces the legal provisions of wildlife laws on National Wildlife Refuges, Waterfowl Production Areas, and National Fisheries. The Division of Refuge Law Enforcement also assists OLE when needed.

7. The Science Applications program works with other Service programs and partners to ensure that the necessary science, tools, and capacity are available for planning and implementing the most efficient and effective best management practices (BMPs) to protect fish and wildlife including migratory birds. They facilitate regional self-directed science management partnerships called Landscape Conservation Cooperatives to develop and apply shared science capacity to conservation.

D. Statement of Mutual Interest and Benefit

Both Parties agree that migratory birds are important components of biological diversity. Their conservation will help to sustain ecological integrity and serve the public demand for outdoor recreation, conservation education, wildlife viewing, and hunting opportunities. Further, the Parties agree that it is important to identify measures that will: 1) promote migratory bird conservation; 2) avoid and minimize negative effects to migratory birds and their habitats; and 3) recognize that actions that may provide long-term benefits to migratory bird populations as a whole may result in short-term negative effects on individual birds. It is in the interest of both Parties that potential impacts, direct and indirect, are thoroughly assessed and unavoidable impacts are appropriately mitigated.

Nothing in this MOU is intended to prevent Border Patrol agents from exercising existing exigent/emergency authorities to access lands, including authority to conduct motorized off-road pursuit of cross border violators at any time.

E. Obligations of Both Parties

To the extent allowed by law, subject to the availability of appropriations and within administration budgetary limits, and in accord with the CBP and FWS missions and capabilities, each Party shall:

1. Support the conservation intent of EO 13186 and the migratory bird conventions, to the extent practicable, by: 1) integrating bird conservation principles, measures, and practices into agency actions, and 2) avoiding and minimizing negative effects on migratory birds and their habitat.

2. Develop BMPs and implement accepted BMPs that are consistent with EO 13186 resulting in the avoidance, minimization, and reduction of negative effects on migratory birds and their habitat.

3. Promote economic and recreational value of birds to the general public as appropriate by developing and integrating information on migratory birds and their habitats into environmental studies, outreach, and education materials.

4. To the extent practicable, protect, restore, and enhance habitat of migratory birds on facilities and lands administered (controlled or leased) by CBP and prevent and minimize the loss or degradation of remaining natural habitats. This includes:

    a. Collaboration on development and implementation of management practices to avoid and minimize negative effects on migratory bird populations and/or their migration, breeding, nesting, foraging, staging, or wintering habitats.

    b. Working collaboratively with other Federal and State agencies, Tribes, non-governmental organizations, private landowners, and other partners, where appropriate, in joint efforts to identify, protect, restore, enhance, monitor, and manage important migratory bird areas (e.g., Important Bird Areas, other significant bird sites that occur on CBP properties) potentially affected by agency actions, focusing efforts in areas of current or future project activities.

5. Promote research and information exchange related to migratory bird conservation including inventorying and monitoring, developing studies related to agency decisions and management practices that may impact migratory birds, and information on environmental contaminants and other physical and biological stressors that are relevant to the conservation of migratory birds. Share information through online tools such as the Avian Knowledge Network (AKN) and Information, Planning, and Conservation (IPaC) decision support

system. The Parties agree to:

a. As practicable and compatible with other study needs and program mandates, collaborate in developing studies: 1) on migratory bird species that may be potentially affected by agency actions, with an emphasis on Birds of Conservation Concern; 2) on the effects of management activities; 3) on avoiding and minimizing degradation of migratory bird habitat; and 4) on creating a framework for implementing appropriate mitigation measures for CBP actions that will negatively effect migratory birds.

b. Identifying BMPs for: 1) avoiding and minimizing negative effects on migratory birds and their habitat; 2) conserving and restoring migratory bird habitats; 3) promoting bird conservation; and 4) inventorying and monitoring migratory birds. Feasible BMPs will be incorporated into online tools, job aids, guidance, and agency policy documents where appropriate.

c. Developing partnerships to further migratory bird conservation, as practicable. This includes cooperation, coordination, and data sharing with other Federal or State agencies, universities, potential developers or their contractors, and nongovernmental organizations involved in monitoring and research studies to provide reliable and comparable information on the distribution and abundance or status and trends of migratory bird populations. Utilize and contribute information to online data sharing sites, such as AKN or IPaC.

d. Promoting the implementation of existing regional or national inventory and monitoring programs and systems such as Breeding Bird Survey (BBS), eBIRD, Christmas Bird Counts, bird atlas projects, or migratory game bird surveys when practicable.

e. Collaborating on studies and research to understand the effects of agency actions on migratory birds, and monitoring bird population responses to BMPs once these practices have been developed and implemented.

f. Contributing information on migratory bird resources to partners developing outreach and education materials and activities.

6. Promoting training opportunities in the most appropriate methods and techniques to: 1) increase migratory bird conservation awareness in compliance with applicable legislation, regulations, and policies; 2) evaluate impacts of projects on migratory birds; and 3) develop management practices that avoid and minimize adverse impacts and promote beneficial proactive approaches to migratory bird conservation.

7. As new information on effectiveness of BMPs become available, evaluate the measures described in this MOU intended to protect, restore, and enhance migratory bird populations and their habitats, including avoiding and minimizing adverse impacts to migratory birds. The FWS Division of Migratory Bird Management, FWS Ecological Services Offices and

CBP agree to design and implement feasible and effective BMPs.

8. Participate, as appropriate, in the interagency Council for the Conservation of Migratory Birds (through DHS representatives) to share information on the conservation of migratory birds. The Council's duties include:

    a. Sharing the latest resource information to assist in the conservation and management of migratory birds.

    b. Developing an annual report of accomplishments and recommendations related to EO 13186. CBP will provide information to be incorporated in the DHS highlighted page.

    c. Fostering partnerships to further the goals of EO 13186.

    d. When appropriate, CBP can nominate a project that exemplifies the implementation of EO 13186 for consideration of the Presidential Migratory Bird Federal Stewardship Award for contributions to the protection of migratory birds.

F. CBP Obligations:

The appropriateness and practicality of implementing any specific conservation measure that reduces negative effects on migratory birds and destruction of migratory bird habitat will be determined on a case-by-case basis. Best management practices (BMPs) have been developed to benefit a variety of migratory bird species and their associated habitats. CBP will work cooperatively with FWS to provide information on existing BMPs, develop new BMPs as needed, and provide recommendations regarding feasible BMPs for CBP projects and actions that have the potential to negatively affect migratory birds. To the extent allowed by law, subject to the availability of appropriations and within Administration budgetary limits, and consistent with CBP missions and capabilities, CBP shall:

1) Follow CBP guidance as outlined in the internal *CBP Migratory Bird Treaty Act Handbook for CBP Preparers* (Sept. 4, 2013) regarding CBP's responsibility to avoid and minimize negative effects to migratory birds and/or their habitats pursuant to the MBTA and EO 13186.

2) Prior to starting CBP activities that are associated with general BMP measures (described in #9), utilize credible online tools such as IPaC and AKN to identify activities that are likely to result in negative effects on migratory birds. If additional information is needed, CBP shall engage in early planning and scoping with the FWS to identify migratory bird species likely to occur in areas affected by a proposed action.

3) Integrate migratory bird conservation principles, measures, and practices into agency activities. Avoid and minimize, to the extent practicable, adverse impacts on migratory bird

resources when conducting agency actions, in compliance with, and supporting the purposes of the MBTA, the Eagle Act, the ESA, NEPA, and other applicable statutes.

4) During the NEPA process CBP will assess the potential adverse impacts of proposed actions on migratory birds and their habitat, proactively address migratory bird conservation (including conservation measures in budgeting), initiate appropriate actions to avoid and minimize negative effects on migratory birds, and assess and document effects on species of concern. CBP will use the best available demographic, population, and/or habitat association data in the assessment of effects on species of concern.

5) To the extent practicable, protect, restore, and enhance habitat of migratory birds on facilities and lands administered (controlled or leased) by CBP and prevent and minimize the loss or degradation of remaining natural habitats. This includes the following:

    a) Prevent, contain, or abate pollution detrimental to migratory birds and their habitats.

    b) Prevent or abate detrimental alteration of migratory bird habitats, to the extent practicable.

    c) Communicate with FWS, as practicable, to resolve any negative effects on migratory birds occurring during immediate actions taken by CBP to respond to exigent/emergency situations involving human life, health, safety of persons, posing threat to national security. Examples of such CBP actions include pursuit of cross-border violators, search and rescue, response to credible threat, or, in some cases, emergency repair of certain strategic communications equipment. Communication may occur through most expedient channels including through coordination with uniformed FWS law enforcement personnel.

6) Implement the following approaches for avoiding and minimizing negative effects on migratory birds, focusing first on species of concern, priority habitats, and key risk factors:

    a) Assess and estimate the effects of proposed actions on migratory birds and their habitats through the project planning process (include this analysis in the NEPA document associated with the proposed action whenever possible). Use best available demographic, population, behavioral, and habitat data in the assessment of effects upon migratory birds. If sufficient data are unavailable, attempt to acquire necessary data by working with Federal, State, and other partners. Utilize online tools, such as AKN, for obtaining geospatial and biological data, and IPaC to obtain information regarding practices relating to geospatial data necessary to support the impact analysis.

    b) Evaluate, through the NEPA process, a reasonable range of alternatives in environmental reviews and, as applicable, incorporate practices to avoid and minimize adverse effects to migratory birds or degradation of habitats consistent with CBP's primary mission to protect the Nation's borders and facilitate legitimate trade and travel. Develop practices,

in coordination with FWS, to avoid and minimize impacts to migratory birds and their habitat and determine how to improve evaluation of impacts.

c) Work collaboratively with FWS and other partners, and develop partnerships with non-federal entities, to monitor migratory birds, as resources allow and within the agency's capabilities and authorities, to improve and better understand the need for, and effectiveness of, conservation efforts tied to projects under CBP authority.

7) Encourage incorporation of comprehensive migratory bird management objectives and BMPs in CBP environmental planning and guiding documents, including MBTA Handbook, ESA Handbook, NEPA Handbook, and other environmental documents consistent with NEPA, CEQ regulations, and other Federal environmental mandates.

8) Comply with applicable Federal migratory bird permitting requirements for activities subject to 50 CFR Part 21. While working through the permitting process with FWS, CBP will, to the maximum extent practicable, avoid and minimize the intentional take of migratory bird species, with an emphasis on species of concern, and, if necessary, develop standards and procedures regarding such take.

9) Develop BMPs to avoid and minimize negative effects on migratory birds or migratory bird habitat. The agreed-upon practices should be documented through the NEPA process. These BMPs should emphasize taking steps to avoid and minimize any potential impacts of known stressors associated with the proposed action on migratory birds, which will in turn reduce threats and assist with meeting migratory-bird conservation goals. Examples of BMPs include, but are not limited to:

a) General measures:
   i) Avoid construction, demolition, installation, and maintenance activities during migratory bird nesting/breeding season to the extent practicable. Where project work cannot occur outside the migratory bird nesting season, conduct surveys prior to scheduled activity to determine if active nests are present within the area of impact. Generally, the surveys should be conducted no more than five days prior to scheduled activity. If active nests are identified within or in the vicinity of a project site, avoid the site if practicable until nestlings have fledged or the nest fails. Coordinate with FWS if an active nest needs to be removed or relocated.
   ii) Limit roadside food source or habitat plantings (including landscaping projects near roads) to trees that do not bear fruit (e.g., choosing not to plant attractants like serviceberries, wild cherries, and spicebush, etc.).
   iii) Stay within existing roads and trails to the extent feasible. For motorized off-road pursuits, CBP will use the least intrusive or damaging motorized vehicle readily available, without compromising agent or officer safety. In accordance with the principles of the 2006 MOU (Memorandum of Understanding Among U. S. Department of Homeland Security and U. S. Department of the Interior and U. S. Department of Agriculture Regarding Cooperative National Security and

Counterterrorism Efforts on Federal Lands along the United States' Borders), between CBP-BP and the Department of the Interior (DOI) for Cooperative National Security and Counterterrorism Efforts on Federal Lands along the United States' Border, agents and officers will use their professional judgment in each specific situation based on available evidence to conclude if motorized off-road pursuit is reasonably expected to result in the apprehension of suspected cross-border violators.

iv) Avoid vegetation removal, trimming, and maintenance (e.g., general landscaping activities, tree trimming, grubbing, etc.) during the nesting season to the extent practicable consistent with USBP operational needs to maintain clear lines of sight to the border in key areas of illegal cross-border traffic and otherwise where citizen and agent safety and security is at risk. Periodic vegetation maintenance (e.g. grass mowing once a week) does not require nesting bird surveys prior to each maintenance event. When possible, consider clearing woody vegetation during the non-nesting season a year in advance of a proposed action.

v) Prevent release of non-native plants within project areas and use native plants in CBP facility landscaping where appropriate.

vi) Minimize wildfire potential by reducing hazards that can cause or help spread accidental fires.

b) Lighting, noise, and structural additions:

i) Prevent bird injury or death due to collisions with windows by turning off lights at night or putting up curtains.

ii) To improve avian ability to detect and avoid glass, break up window glass with either a pattern of vertical stripes that are at least ¼ inch wide with a maximum spacing of 4 inches, or horizontal stripes that are at least ¼ inch wide with a maximum spacing of 2 inches. Pattern variations may be appropriate for particular species and habitats.. Patterns should be applied on the outside of see-through windows and reflective glass. The pattern should also contrast enough with the glass to be seen clearly by birds.

iii) Minimize and shield lighting (e.g., downshield lights, install motion sensors).

iv) If migratory birds commonly nest on facilities that must be maintained/repaired during the nesting season, when feasible, prevent nesting by installing anti-perching devices on affected sections of the structure.

c) Communication towers, utilities and energy development:

i) Review BMPs outlined in FWS Guidance and consult with FWS when appropriate on the BMPs that are most suitable for CBP implementation and for prevention of negative effects. Available guidance includes, but is not limited to:

(1) The Federal Aviation Administration's Obstruction Marking and Lighting Advisory Circular AC 70/7460-1L.

(2) Recommended Best Practices for Communication Tower Design, Siting, Construction, Operation, Maintenance, and Decommissioning Division of Migratory Bird Management U. S. Fish and Wildlife Service Falls Church, Virginia August 2016.);

(3) Avian Power Line Interaction Committee – Suggested Practices for Avian Protection on Power Lines (2006);
(4) Avian Power Line Interaction Committee – Reducing Avian Collisions with Power Lines (2012); and
(5) U.S. Fish and Wildlife Service Land-based Wind Energy Guidelines (2012)

CBP will coordinate with FWS, as needed, in considering potential effects on migratory birds of CBP proposals for locating communication towers, utilities, and energy development projects such as power lines or wind turbines. Construction of new communications, utility and energy systems, and associated infrastructure should be designed to avoid and minimize impacts on migratory bird populations where feasible. Existing utilities may also be considered for retrofitting to eliminate or reduce impacts.

10) Consistent with safety and security protocols, allow FWS and other partners reasonable access to CBP properties when necessary for conducting sampling or survey programs such as Monitoring Avian Productivity and Survivorship stations, Breeding Bird Surveys, International Shorebird Survey, and breeding bird atlases.

11) Support efforts by FWS to promote the ecological, economic, and recreational values of migratory birds by supporting outreach and educational activities and materials, when appropriate.

12) Minimize or prevent the pollution or detrimental alteration of the environment used by migratory birds whenever practicable by assessing information on environmental contaminants and other stressors associated with CBP actions or existing infrastructure relevant to migratory bird conservation.

13) Where BMPs require inventorying and monitoring, develop and implement new and/or existing inventory and monitoring programs, at appropriate scales, using national standardized protocols when available, to evaluate the effectiveness of BMPs designed to avoid and minimize take of migratory birds, with emphasis on those actions that have the potential to significantly impact species of concern.

14) Where appropriate and feasible, work with FWS to identify opportunities and processes for CBP vessels and aircraft to accommodate FWS staff ride-alongs where such accommodation will not interfere with CBP mission capability or create a financial burden on CBP, but will enable the FWS to conduct important research beneficial to migratory sea birds.

15) Advise the public of the availability of this MOU through a notice published in the Federal Register.

G. The Fish and Wildlife Service Shall:

1. Work with CBP by providing recommendations to avoid and minimize adverse effects

upon migratory birds from CBP actions. FWS may also incorporate these recommendations into IPaC for ease of reference.

2. Through the Division of Migratory Bird Management, maintain a web page on permits that provides links to all offices responsible for issuing permits and permit application forms for take of migratory birds.

3. Provide essential background information to CBP when requested, or through online tools such as AKN and IPaC, to ensure sound management decisions. This may include:

    a. Migratory bird distributions, status, key habitats, conservation guidelines, and risk factors within each Bird Conservation Region.

    b. Changes to the MBTA and its regulations and procedures or other Acts and their regulations affecting management of migratory birds.

    c. Population trends of species that CBP's activities may affect.

    d. Protection measures for reducing human-caused bird mortality that may be applicable to CBP activities, as new information becomes available.

    e. Proactively share with CBP new guidance documents, tools, and job aids designed to improve understanding of MBTA requirements and further the ability of CBP to promote the conservation of migratory birds.

4. Update the FWS publication of *Birds of Conservation Concern* at regular intervals for reliable reference.

5. Recommend accepted BMPs that CBP could programmatically adopt in dealing with migratory bird issues and reducing negative effects on migratory birds and their habitat.

6. FWS will work cooperatively with CBP to provide information on existing BMPs, develop new BMPs as needed, and provide recommendations regarding feasible BMPs for CBP projects and actions that have the potential to take migratory birds.

7. Work to identify important migratory bird habitats (i.e., migration corridors and staging, wintering, nesting, brood-rearing, stop-over habitats, ecological conditions important to nesting habitats, foraging habitats on or adjoining OCS) to aid in collaborative planning.

8. Through IPAC or through the Regional Migratory Bird office, provide to CBP, upon request, technical assistance on migratory bird species and their habitats.

9. Through the appropriate Ecological Services Field office, provide to CBP, upon request, technical assistance for avoiding and minimizing project-related effects on migratory

birds and their habitat resulting from CBP actions.

10. Review and comment on NEPA documents and other planning documents forwarded by CBP (through the Department of Homeland Security). When appropriate, due to special expertise, join as a cooperating agency for preparation of NEPA documents, consistent with the 2013 Memorandum of Agreement for Environmental Coordination and Review of Border Security Activities between the U.S. Department of the Interior, U.S. Department of Agriculture (USDA) Forest Service and U.S. Customs and Border Protection.

H. Dispute Resolution

To prevent potential conflicts and resolve actual disagreements between the Parties, the appropriate CBP Office and the corresponding FWS Ecological Services Field Office will first attempt to resolve the dispute. The Parties will use collaborative processes, including informal meetings or negotiations, to avoid or minimize a dispute. If necessary, the Parties will use conflict prevention or traditional Alternative Dispute Resolution (ADR) processes to achieve consensus. . If there is no resolution at the field-office level within 30 days the CBP Office should elevate the issue to the CBP Office of Facilities and Asset Management, Facilities Management and Engineering Directorate, Energy and Environmental Management Division, and the FWS Ecological Services Field Office should elevate the issue to the FWS Regional Office. In the event that the Parties cannot resolve the matter at this level within 30 days, CBP may elevate the dispute to the CBP Office of Facilities and Asset Management, Facilities Management and Engineering Directorate and FWS may elevate the dispute to the FWS Headquarters.

Representatives of both agencies agree to enter into a conflict prevention process using collaborative methods or to enter into a traditional ADR process, as appropriate.

I. Agreement

The Parties mutually agree and understand that:

1. This MOU in no way alters either Party's obligations or responsibilities under the authorities listed in Section B of this MOU or any other statute or other legal authority.

2. Documents furnished to a Party under this MOU may be subject to the Freedom of Information Act (FOIA, 5 U.S.C. § 552). A Party shall not release documents originating in the other Party to a FOIA requester. Rather, the Party shall forward such document(s) to the originating Party for review, determination, and response directly to the requester.

3. This MOU is neither a fiscal- nor a funds-obligation document. The Parties will handle any endeavor involving reimbursement, contribution of funds, or other transfer of anything of value between the Parties in accordance with applicable laws, regulations, and procedures,

including those for government procurement and printing. This instrument does not provide such authority.

4. Press releases prepared by either Party that reference this MOU, or the relationship established between the Parties of this MOU, must have prior approval of both Parties appropriate departments.

5. The Parties shall schedule periodic meetings every three years to review progress and identify opportunities for advancing the principles of this MOU.

6. This MOU in no way alters or takes the place of the respective Parties' obligations to comply with applicable requirements pursuant to NEPA, MBTA, ESA, CZMA, the Eagle Act, or other applicable statutes and legal authorities.

7. CBP may incorporate the responsibilities established by this MOU into existing CBP actions; however, CBP may not be able to implement some responsibilities identified in the MOU until CBP has successfully included them in formal planning processes. This MOU does not require changes to current contracts, permits, or other third-party agreements, until such time as CBP has successfully included them in a formal planning process. The Parties will implement this MOU when initiating new actions, when creating new agency guidance documents, and when revising the existing CBP MBTA Handbook, ESA Handbook, NEPA Handbook, or other environmental documents. It does not apply to ongoing CBP actions for which a NEPA decision document was finalized prior to, or within 180 days of the date this MOU was signed, unless supplemental NEPA analysis is subsequently required for the underlying action.

8. This MOU is intended only to improve the internal management of the Executive Branch of the Federal Government and does not create any right or benefit, substantive or procedural, separately enforceable at law or equity by a party against the United States, its agencies or instrumentalities, its officers or employees, or any other person.

9. This MOU takes effect upon the signature of CBP and FWS, and shall be reviewed every three years from the date of execution. This MOU may be amended upon written request of either Party and the subsequent written concurrence of the other Party. Either Party may terminate this MOU, in whole or in part, at any time by providing the other Party 30-days written notice to that effect. This MOU in no way restricts either Party from participating in similar activities with other public or private agencies, governments, organizations, or individuals.

Appendix A

Definitions:

Action – a program, activity, project, official policy, rule, regulation, or formal plan directly carried out by CBP.

Active nest – nest containing viable eggs, unfledged young, or fledged young that are still dependent on the nest, except bald and golden eagles. An active bald or golden eagle nest is defined by regulation as an "in-use nest," which means "a bald or golden eagle nest characterized by the presence of one or more eggs, dependent young, or adult eagles on the nest in the past 10 days during breeding season." 50 C.F.R. § 22.3 (also note additional definitions for "alternate nest" and "eagle nest").

Avian Knowledge Network (AKN) – An online database of bird distribution and abundance dedicated to the development of tools and resources that guide and inform conservation management (www.avianknowledge.net).

Breeding Bird Survey (BBS) – a standardized international survey that provides information on population trends of breeding birds, through volunteer observations located along randomly selected roadside routes in the United States, Canada and Mexico (http://www.mbr-pwrc.usgs.gov/bbs/html).

Birds of Conservation Concern – A list published and periodically updated by the FWS Division of Migratory Bird Management. The overall goal of this list is to identify the migratory and non-migratory bird species that, in addition to species already listed under ESA, represent the FWS's highest conservation priorities. The most current version of the list, Birds of Conservation Concern 2008, is available at http://www.fws.gov/migratorybirds.

CBP Office – All CBP organizational elements, including: Headquarters, Program Management Offices, Facility Divisions or Centers, Field Offices, and any other entity that reports to the Commissioner of CBP.

Conservation Measure – an action undertaken to avoid or minimize action-related environmental effects (in this case specific to migratory birds) and ultimately improve the conservation status of one or more species of migratory birds. Examples include BMPs, surveys and inventories, monitoring, status assessments, land acquisition or protection, habitat restoration, population manipulation, research, and outreach.

Council for the Conservation of Migratory Birds – an interagency council established by the Secretary of Interior to oversee the implementation of Executive Order 13186.

Ecological Condition – the composition, structure, and processes of ecosystems over time and space. This includes the diversity of plant and animal communities, the productive capacity of

ecological systems and species diversity, ecosystem diversity, disturbance processes, soil productivity, water quality and quantity, and air quality. Often referred to in terms of ecosystem health, which is the degree to which ecological factors and their interactions are reasonably complete and functioning for continued resilience, productivity, and renewal of the ecosystem.

Effect (adverse or beneficial) – "effects" and "impacts," as used in this MOU are synonymous. Effects may be direct, indirect, or cumulative, and refer to effects from management actions or categories of management actions on migratory bird populations, habitats, ecological conditions, or significant bird conservation sites.

Facility (CBP) - Ports of Entry, U.S. Border Patrol Stations, Forward Operating Bases, Air and Marine Operations Facilities, Customs Quarters (housing), camps, checkpoints, or other CBP-operated installations, which consists of the land, buildings, on-site roadways, and parking lots that CBP owns, leases, or uses as free space.

Important Bird Areas (IBA) – a network of sites that provide essential habitat for the long-term conservation of birds. In the United States, the IBA network is administered by the American Bird Conservancy and the National Audubon Society. (http://www.audubon.org/bird/iba/).

Information, Planning, and Conservation (IPaC) decision support system - a conservation planning tool for streamlining the environmental review process (http://ecos.fws.gov/ipac).

International Shorebird Survey – a monitoring program started in 1974 to survey shorebirds (sandpipers, plovers, etc.) across the Western Hemisphere. (http://www.manomet.org/programs.shorebirds).

Management Action – an activity by a government agency that could cause a positive or negative effect on migratory bird populations or habitats.

Migratory Bird – an individual of any species protected by the MBTA. A list of migratory birds can be found in 50 CFR § 10.13 and http://www.fws.gov/migratorybirds/intrnltr/mbta/mbtandx.html.

Monitoring Avian Productivity and Survivorship (MAPS) – a program that uses the banding of birds during the breeding season to track the changes and patterns in the number of young produced and the survivorship of adults and young. (http://www.birdpop.org/maps.htm).

Mitigation – For NEPA purposes, mitigation includes (a) avoiding the impact altogether by not taking a certain action or parts of an action, (b) minimizing impacts by limiting the degree or magnitude of the action and its implementation, (c) rectifying the impact by repairing, rehabilitating, or restoring the affected environment, (d) reducing or eliminating the impact over time by preservation and maintenance operations during the life of the action, and (e) compensating for the impact by replacing or providing substitute resources or environments

(from 40 C.F.R. § 1508.20, CEQ Regulations for Implementing the Procedural Provisions of the National Environmental Policy Act).

National Environmental Policy Act (NEPA) – the law that requires Federal agencies to prepare a detailed analysis of the environmental impacts of their proposed action with alternatives and to include public involvement in the decision making process for major federal actions significantly affecting the quality of the human environment. 42 U.S.C. § 4321–4347.

Species of Concern – refers to several categories of birds including: 1) species listed in the periodic report, *Birds of Conservation Concern*, published by the FWS Division of Migratory Bird Management (http://www.fws.gov/migratorybirds); 2) priority migratory bird species documented in the comprehensive bird conservation plans (North American Waterbird Conservation Plan, United States Shorebird Conservation Plan, Partners in Flight Bird Conservation Plans); 3) species or populations of waterfowl identified as high, or moderately high, continental priority in the North American Waterfowl Management Plan; 4) listed threatened and endangered bird species in 50 C.F.R. § 17.11; and 5) MBTA-listed gamebirds of management concern (http://www.fws.gov/migratorybirds).

Take – to pursue, hunt, shoot, wound, kill, trap, capture or collect or attempt to pursue, hunt, wound, kill, trap, capture or collect (50 C.F.R. § 10.12). The Eagle Act defines take to mean pursue, shoot, shoot at, poison, wound, kill, capture, trap, collect, destroy, molest, or disturb bald and golden eagles (16 U.S.C. § 668c). "Disturb" is further defined by regulation to mean "agitate or bother an eagle to a degree that causes, or is likely to cause, based on the best scientific information available, (1) injury to an eagle, (2) a decrease in its productivity, by substantially interfering with normal breeding, feeding, or sheltering behavior, or (3) nest abandonment, by substantially interfering with normal breeding, feeding, or sheltering behavior." 50 C.F.R. § 22.3.

Appendix C: List of Bird Species Not Protected under the MBTA

Federal Register Volume 70 Number 49 - List of Bird Species to Which the Migratory Bird Treaty Act Does Not Apply

Species Not Protected under the MBTA

A. **Species that are (1) nonnative human-introduced and (2) belong to families covered by conventions implemented by the MBTA**

70 FR 12710 (March 15, 2005)

B. **Species that are (1) native and (2) belong to families not covered by any of the conventions implemented by the MBTA**[Q]

Family MEGAPODIIDAE
Megapodius laperouse, Micronesian Megapode+ (NMI)‡
Family PHASIANIDAE
Bonasa umbellus, Ruffed Grouse+ (cont. U.S.)
Centrocercus minimus, Gunnison Sage-Grouse+ (CO, UT)
Centrocercus urophasianus, Greater Sage-Grouse+ (w. U.S.)
Dendragapus obscurus, Blue Grouse+ (w. U.S.)
Falcipennis canadensis, Spruce Grouse (n. U.S.)
Lagopus lagopus, Willow Ptarmigan+ (n. U.S.)
Lagopus leucurus, White-tailed Ptarmigan+ (n. U.S.)
Lagopus mutus, Rock Ptarmigan+ (n. U.S.)
Meleagrus gallopavo, Wild Turkey+ (cont. U.S.)
Tympanuchus cupido, Greater Prairie-Chicken+ (c. & w. U.S.)‡
Tympanuchus pallidicinctus, Lesser Prairie-Chicken+ (c. & w. U.S.)
Tympanuchus phasianellus, Sharp-tailed Grouse+ (n. & w. U.S.)
Family ODONTOPHORIDAE
Callipepla californica, California Quail+ (CA, NV, OR)
Callipepla gambelii, Gambel's Quail+ (sw U.S.)
Callipepla squamata, Scaled Quail+ (sw U.S.)
Colinus virginianus, Northern Bobwhite+ (cont. U.S.)
Cyrtonyx montezumae, Montezuma Quail+ (sw U.S.)
Oreortyx pictus, Mountain Quail+ (w. U.S.)
Family BURHINIDAE
Burhinus bistriatus, Double-striped Thick-knee (TX)
Family GLAREOLIDAE
Glareola maldivarum, Oriental Pratincole (AK)
Family PSITTACIDAE
Amazona vittata, Puerto Rican Parrot+ (PR)‡
Aratinga chloroptera, Hispaniolan Parakeet (PR–Extirpated)
Rhynchopsitta pachyrhyncha, Thick-billed Parrot (AZ, NM)‡
Family TODIDAE
Todus mexicanus, Puerto Rican Tody+ (PR)
Family MELIPHAGIDAE

Moho braccatus, Kauai Oo+ (HI)‡
Family MONARCHIDAE
Chasiempis sandwichensis, Elepaio+ (HI)‡
Clytorhynchus vitiensis, Fiji Shrikebill+ (AS)
Myiagra freycineta, Guam Flycatcher+ (GU)
Monarcha takatsukasai, Tinian Monarch+ (NMI)
Rhipidura rufifrons, Rufous Fantail+ (GU, NMI)
Family TIMALIIDAE
Chamaea fasciata, Wrentit+ (CA, OR, WA)
Family ZOSTEROPIDAE
Zosterops conspicillatus, Bridled White-eye+ (GU, NMI)‡
Family COEREBIDAE
Coereba flaveola, Bananaquit+ (PR, VI)
Family DREPANIDINAE
Hemignathus flavus, Oahu Amakihi+ (HI)
Hemignathus kauaiensis, Kauai Amakihi+ (HI)
Hemignathus lucidus, Nukupuu+ (HI)‡
Hemignathus munroi, Akiapolaau+ (HI)

Telespiza cantans, Laysan Finch+ (HI)‡
Telespiza ultima, Nihoa Finch+ (HI)‡
Vestiaria coccinea, Iiwi+ (HI)

C. Species that are (1) nonnative human-introduced and (2) belong to families not covered by any of the conventions implemented by the MBTA[1]

Family TINAMIDAE
Nothoprocta perdicaria, Chilean Tinamou
Nothura maculosa, Spotted Nothura

Rhynchotus rufescens, Red-winged Tinamou
Tinamus major, Great Tinamou
Family CRACIDAE
Crax rubra, Great Curassow
Ortalis cinereiceps, Gray-headed Chachalaca
Ortalis garrula, Chestnut-winged Chachalaca
Ortalis vetula, Plain Chachalaca (GA)
Penelope purpurascens, Crested Guan
Family PHASIANIDAE
Alectoris barbara, Barbary Partridge
Alectoris chukar, Chukar^ (w. U.S.)
Alectoris graeca, Rock Partridge
Ammoperdix griseogularis, See-see Partridge
Bambusicola thoracica, Chinese Bamboo-Partridge
Bonasia bonasia, Hazel Grouse
Chrysolophus amherstiae, Lady Amherst's Pheasant
Chrysolophus pictus, Golden Pheasant
Coturnix chinensis, Blue-breasted Quail
Coturnix japonica, Japanese Quail^ (HI)
Coturnix pectoralis, Stubble Quail
Francolinus adspersus, Red-billed Francolin
Francolinus clappertoni, Clapperton's Francolin
Francolinus erckelii, Erckel's Francolin^ (HI)
Francolinus francolinus, Black Francolin^ (HI)
Francolinus icterorhynchus, Heuglin's Francolin
Francolinus leucoscepus, Yellow-necked Spurfowl (HI-Extirpated)*
Francolinus pintadeanus, Chinese Francolin
Francolinus pondicerianus, Gray Francolin^ (HI)
Gallus gallus, Red Junglefowl^ (FL, HI)
Gallus sonnerati, Gray Junglefowl
Lophura leucomelanos, Kalij Pheasant^ (HI)
Lophura nycthemera, Silver Pheasant
Melanoperdix nigra, Black Partridge
Numida meleagris, helmeted Guineafowl^ (HI, PR)
Pavo cristatus, Common Peafowl^ (HI)
Perdix perdix, Gray Patridge^ (cont. U.S.)
Phasianus colchicus, Ring-necked Pheasant^ (cont. U.S., HI)
Phasianus versicolor, Green Pheasant
Rollulus rouloul, Crested Partridge
Syrmaticus ellioti, Elliot's Pheasant
Syrmaticus reevesii, Reeve's Pheasant
Syrmaticus soemmerringii, Copper Pheasant
Tetrao tetrix, Black Grouse
Tetrao urogallus, Western Capercaillie
Tetraogallus himalayensis, Himalayan Snowcock^ (NV)
Family TURNICIDAE

Turnix varia, painted Buttonquail
Family ODONTOPHORIDAE
Colinus cristatus, Crested Bobwhite^ (VI–now Extirpated)
Callipepla douglasii, Elegant Quail
Family PTEROCLIDIDAE
Pterocles exustus, Chestnut-bellied Sandgrouse^ (HI)
Family PSITTACIDAE
Agapornis fischeri, Fischer's Lovebird
Agapornis personatus, Yellow-collared Lovebird
Agapornis roseicollis, Peach-faced Lovebird
Amazona aestiva, Blue-fronted Parrot
Amazona albifrons, White-fronted Parrot (FL)*
Amazona amazonica, Orange-winged Parrot
Amazona auropalliata, Yellow-naped Parrot
Amazona autumnalis, Red-lored Parrot (FL–now Extirpated)*
Amazona barbadensis, Yellow-shouldered Parrot
Amazona farinosa, Mealy Parrot
Amazona festiva, Festive Parrot
Amazona finschi, Lilac-crowned Parrot
Amazona ochrocephala, Yellow-crowned Parrot^ (PR)
Amazona oratrix, Yellow-headed Parrot^ (FL, PR)
Amazona pretrei, Red-spectacled Parrot
Amazona ventralis, Hispaniolan Parrot^ (PR, VI)
Amazona viridigenalis, Red-crowned Parrot^ (CA, FL)
Anodorhynchus hyacinthinus, Hyacinth Macaw
Ara ararauna, Blue-and-yellow Macaw^ (PR)
Ara chloroptera, Red-and-green Macaw
Ara macao, Scarlet Macaw
Ara militaris, Military Macaw
Ara severa, Chestnut-fronted Macae (FL)*
Aratinga acuticaudata, Blue-crowned Parakeet (FL)*
Aratinga aurea, Peach-fronted Parakeet
Aratinga canicularis, Orange-fronted Parakeet (FL)*
Aratinga erythrogenys, Red-masked Parakeet (FL)*
Aratinga finschi, Crimson-fronted Parakeet
Aratinga holochlora, Green Parakeet^ (TX)
Aratinga leucophthalmus, White-eyed Parakeet (FL)*
Aratinga mitrata, Mitred Parakeet^ (CA, FL)
Aratinga pertinax, Brown-throated Parakeet^ (FL, PR)
Aratinga rubritorquis, Red-throated Parakeet

Aratinga solstitialis or jandaya, Sun or Jandaya parakeet
Aratinga wagleri, Scarlet-fronted Parakeet
Aratinga weddellii, Dusky-headed Parakeet (FL)*

*Brotogeris chiriri, Yellow-chevroned Parakeet * (FL)*
Brotogeris jugularis, Orange-chinned Parakeet
Brotogeris versicolurus, White-winged Parakeet^ (CA, FL)
Cacatua alba, White Cockatoo
Cacatua galerita, Sulphur-crested Cockatoo (FL–now Extirpated)*
Cacatua goffini, Tanimbar Cockatoo
Cacatua moluccensis, Salmon-crested Cockatoo
Cyanoliseus patagonus, Burrowing Parrot
Diopsittaca nobilis, Red-shouldered Macaw
Eclectus roratus, Eclectus Parrot
Eolophus roseicapillus, Galah
Eos bornea, Red Lory (FL–Extirpated)*
Lorius garrulus, Chattering Lory
Melopsittacus undulatus, Budgerigar^ (FL)
Myiopsitta monachus, Monk Parakeet^ (e. U.S, PR, TX)
Nandayus nenday, Black-hooded Parakeet
Nymphicus hollandicus, Cockatiel
Pionites melanocephala, Black-headed Parrot
Pionus maximiliani, Scaly-headed Parrot
Pionus senilis, White-crowned Parrot
Poicephalus rueppellii, Rueppell's Parrot (FL–now Extirpated)*
Poicephalus senegalus, Senegal Parrot (FL–now Extirpated)*
Propyrrhura auricollis, Golden-collared Macaw
Psephotus haematonotus, Red-rumped Parrot
Pseudos fuscata, Dusky Lory
Psittacula alexandri, Red-breasted Parakeet
Psittacula columboides, Malabar Parakeet
Psittacula cyanocephala, Plum-headed Parakeet
Psittacula eupatris, Alexandrine Parakeet
Psittacula krameri, Rose-ringed Parakeet^ (FL, HI, VA)
Psittacula roseata, Blossom-headed Parakeet
Psittacus erithacus, Gray Parrot
Pyrrhura frontalis, Maroon-bellied Parakeet
Pyrrhura molinae, Green-cheeked Parakeet (FL)*
Rhynchopsitta terrisi, Maroon-fronted Parrot
Trichoglossus chlorolepidotus, Scaly-breasted Lorikeet
Trichoglossus haematodus, Rainbow Lorikeet (FL–now Extirpated)*
Trichoglossus ornatus, Ornate Lorikeet

Family DICRURIDAE
Dicrurus macrocercus, Black Drongo^ (GU, NMI)

Family RHAMPHASTIDAE
Ramphastos sulfuratus, Keel-billed Toucan
Ramphastos citrolaemus, Citron-throated Toucan
Ramphastos toco, Toco Toucan

Family MUSOPHAGIDAE
Musophaga violacea, Violet Turaco

Tauraco corythaix, Knysna Turaco
Tauraco schalowi, Schalow's Turaco
Family BUCEROTIDAE
Tockus nasutus, African Gray Hornbill
Aceros undulatus, Wreathed Hornbill
Ceratogymna brevis, Silvery-cheeked Hornbill
Family BUCORVIDAE
Bucorvus abyssinicus, Abyssinian Ground-Hornbill
Family PYCNONOTIDAE
Hypsipetes madagascariensis, Black Bulbul
Pycnonotus cafer, Red-vented Bulbul^ (FL)
Pycnonotus jocosus, Red-whiskered Bulbul^ (FL, HI)
Family PITTIDAE
Pitta guajana, Banded Pitta
Family IRENIDAE
Irena puella, Asian Fairy-bluebird
Family TIMALIIDAE
Garrulax canorus, Hwamei^ (HI)
Garrulax leucolophus, White-crested Laughingthrush (HI-Extirpated)*
Garrulax pectoralis, Greater Necklaced Laughingthrush^ (HI)
Leiothrix lutea, Red-billed Leiothrix^ (HI)
Family ZOSTEROPIDAE
Zosterops japonicus, Japanese White-eye^ (HI)
Family STURNIDAE
Acridotheres cristatellus, Crested Myna
Acridotheres fuscus, Jungle Myna
Acridotheres tristis, Common Myna^ (FL, HI)
Gracula religiosa, Hill Myna^ (HI, PR)
Lamprotornis superbus, Superb Starling
Mino dumontii, Yellow-faced Myna
Sturnus vulgaris, European Starling^ (cont. U.S., PR)
Family PASSERIDAE
Passer domesticus, House Sparrow^ (cont. U.S., HI, PR, VI)
Passer luteus, Sudan Golden Sparrow
Passer montanus, Eurasian Tree Sparrow^ (IL, MO)
Family PLOCEIDAE
Euplectes afer, Yellow-crowned Bishop^ (PR)
Euplectes ardens, Red-collared Bishop^ (PR)
Euplectes franciscanus, Orange Bishop^ (CA, PR)
Euplectes orix, Red Bishop
Ploceus cucullatus, Village Weaver
Ploceus velatus, African Masked-Weaver
Family ESTRIDIDAE
Amandava amandava, Red Avadavat^ (HI, PR)
Estrilda astrild, Common Waxbill^ (HI, PR)
Estrilda caerulescens, Lavender Waxbill^ (HI)

Estrilda melpoda, Orange-cheeked Waxbill^ (HI, PR)
Estrilda troglodytes, Black-rumped Waxbill^ (HI, PR)
Lonchura atricapilla, Chestnut Munia^ (HI, PR)
Lonchura cantans, African Silverbill^ (HI)
Lonchura cucullata, Bronze Mannikin^ (PR)
Lonchura maja, White-headed Munia
Lonchura malabarica, Indian Silverbill^ (PR)
Lonchura malacca, Tricolored Munia^ (HI, PR)
Lonchura nana, Madagascar Munia
Lonchura punctulata, Nutmeg Mannikin^ (HI)
Padda oryzivora, Java Sparrow^ (HI, PR)
Taeniopygia guttata, Zebra Finch
Uraeginthus bengalus, Red-cheeked Cordonbleu^ (HI)
Vidua macroura, Pin-tailed Whydah^ (PR)

(1)
Symbols: plus sign (+) denotes a native species with breeding populations in the U.S.; hat (^) denotes an introduced species that has established a self-sustaining breeding population; asterisk (*) denotes an introduced species that has nested in the U.S. but has not established a self-sustaining breeding population; double dagger (‡) denotes a species that is covered by the Endangered Species Act in all or part of its U.S. range.

Abbreviations (in parentheses) are used to denote the known U.S. range, and are used only for species with established populations or evidence of breeding: AK = Alaska, AS = American Samoa, AZ = Arizona, CA = California, FL = Florida, GU = Guam, HI = Hawaii, NM = New Mexico, NMI = Northern Marina Islands, NV = Nevada, OR = Oregon, PR = Puerto Rico, TX = Texas, UT = Utah, VI = Virgin Islands, WA = Washington.

Appendix D: Executive Order 13186

Executive Order 13186 - Responsibilities of Federal Agencies to Protect Migratory Birds

Appendix E: Nesting Bird Survey Protocol and Survey Checklist

Pre-construction nesting bird surveys should be conducted during migratory bird nesting season no more than 5 days prior to commencement of a project and during the project if the site was dormant for more than 5 days. The survey area for active bird nests should include the project area and appropriate buffer zone (coordinated with the U.S. Fish and Wildlife Service Ecological Services Field Office, as necessary).

Prior to surveys, a desktop review of bird species (and their preferred habitat) with potential to nest in the project area should be conducted. A special emphasis should be placed on the presence of Birds of Conservation Concern (BCC) within the action area. Please refer to the complete list of BCC species.

Survey should consist of walking transects that will be spaced accordingly to allow complete visual coverage (when possible) of all habitats including: open fields, barren areas, manmade structures (e.g., bridges and buildings), riparian corridors, wooded areas and brush dominated ground cover within, and adjacent to, the project area that could support nesting birds. Appropriate spacing will ultimately be determined by the surveyor in the field, but the following guidelines are recommended to ensure adequate coverage of habitats:

- 100-300 feet for open grasslands
- 25-50 feet for areas with dense brush or shrubs
- <25 feet as needed for a dense stand of trees or very dense vegetation

The survey should also include actively searching for low-level, ground, cavity and tree nests in the vegetation proposed for disturbance. For example, cavity nesting would include searching/inspecting all relevant local features: structures, suitable tree holes and cavities and may require an extension pole with mirror to make a determination.

When breeding or nesting activities are suspected or observed, the surveyor will spend time watching the activity (with the aid of binoculars when appropriate) to determine the status of the observed activity. The following behaviors are indicators that an active nest may be present:

1. Carrying material to build nest within the survey area
2. Copulations
3. Carrying food or feeding young
4. Carrying fecal sacks away from nest
5. Mate-feeding; repeated "bee-line" flying to likely nest site
6. Observation of nest
7. Observation of chicks

8. Alarm calls being given by one or both adults of a pair
9. Females giving call or chip notes alerting their mate that they are off the nest
10. Auditory evidence of chicks

If there is inconclusive evidence to determine whether the nest is being actively utilized, it may be necessary to conduct additional surveys. Up to three additional survey events of the nest itself, up to 2 hours each, should be conducted to document whether nest is active. If breeding activity is noted, but no nest is found, the surveyor should assume the presence of a nest and take appropriate measures to protect the nest from project-related activities.

The location of any confirmed active nest of a migratory bird species should be recorded on a survey form (see next page for a sample of a survey checklist) and submitted to the environmental project lead, preparer and project manager.

If active nests are identified within or in the vicinity of a project site, avoid the site until nestlings have fledged or the nest fails. If activity must occur, establish a buffer zone around the nest and no activities will occur within that zone until nestlings have fledged and left the nest area.

Homeland Security

Nesting Bird Survey Checklist

1. Site Name_____.

2. Day_____ Month_____ Year_____.

3. Locality: Name nearest town or prominent map feature whose latitude and longitude can be looked up: _____ . County/Township _____. State/Province_____.

Locality name (e.g. Smith Marsh, Jones Woods):_____.

Latitude/longitude to nearest minute (optional except for remote areas, but encouraged for regularly-visited sites): Latitude_____. Longitude _____ ____.

4. Observer name(s)_____.

5. Start time (to nearest quarter hour) _____.

6. End time (to nearest quarter hour) _____.

7. Evidence of active nests _____.

If active nest is identified:

Location of a nest _____.

Distance of a nest to construction _____.

Stage of nesting (eggs, nestlings) _____.

Nesting bird species (if known) _____.

Photograph of the nesting bird species (e.g. attached, emailed) _____.

8. Habitat(s) visited (check as many as apply): Deciduous woodland____ Coniferous woodland____ Scrub____ Grassland____ Agricultural____ Rural____ Suburban____ Urban____ Freshwater____ Salt water____ Other_____.

6. Site photographs (e.g. attached, emailed) _____.

Appendix 3

PowerPoint Training Materials for trainings describing MBTA Laws and Regulations

Table of Contents

Tucson Sector specialized environmental awareness training 2
Del Rio, Laredo, and Rio Grande Valley Sector Nesting Bird Awareness Training 16
Draft Proposed MBTA Bird Removal/Relocation Training 17
CTIMR COTR/PM Boot Camp: Environmental Compliance 18
Environmental Stewardship Training Program 21

Tucson Sector specialized environmental awareness training

INTEGRATED FIXED TOWERS
BLOCK 1 REPLACEMENT PROJECT

U.S. BORDER PATROL
TUCSON AREA OF RESPONSIBILITY

TUCSON SECTOR
ENVIRONMENTAL AWARENESS BRIEFING

GENERAL ACTIVITY BMPS

PROJECT ACTIVITIES, INCLUDING STAGING, PARKING AND EQUIPMENT STORAGE WILL BE CONFINED TO THE PREVIOUSLY DISTURBED ROAD CORRIDOR AND THE MARKED 100 FOOT BY 100 FOOT TEMPORARY DISTURBANCE AREA AT ALL SENSOR TOWERS.

PROJECT ACTIVITIES, INCLUDING STAGING, PARKING AND EQUIPMENT STORAGE WILL BE CONFINED TO THE FENCED PERIMETER OF THE TOWER SITE AND PREVIOUSLY DISTURBED ROAD CORRIDOR AT THE COMMUNICATION TOWER.

INVOLVED ENTITIES WILL MINIMIZE THE NUMBER OF VEHICLES TRAVELING TO AND FROM THE PROJECT SITE AND THE NUMBER OF TRIPS PER DAY TO REDUCE THE LIKELIHOOD OF DISTURBING ANIMALS IN THE AREA OR INJURING AN ANIMAL ON THE ROAD, OR DISTURBING THEIR HABITAT.

DISTURBANCE WILL BE MINIMIZED BY LIMITING DELIVERIES OF MATERIALS AND EQUIPMENT TO ONLY THOSE NEEDED FOR EFFECTIVE PROJECT IMPLEMENTATION.

ALL VEHICULAR TRAFFIC WILL USE DESIGNATED/AUTHORIZED ROADS TO ACCESS THE PROPOSED TOWER SITES AND WILL AVOID OFF-ROAD VEHICLE ACTIVITY OUTSIDE OF THE PROJECT FOOTPRINT.

MIGRATORY BIRDS

MIGRATORY BIRDS

A SURVEY FOR MIGRATORY BIRDS MUST BE CONDUCTED PRIOR TO ALL ACTIVITIES TO BE IMPLEMENTED DURING THE NESTING PERIOD (FEBRUARY 1 THROUGH SEPTEMBER 1).

IF AN ACTIVE NEST IS FOUND, A BUFFER ZONE OF 300 FEET MUST BE ESTABLISHED AROUND THE NEST AND NO ACTIVITIES WILL OCCUR WITHIN THAT ZONE UNTIL NESTLINGS HAVE FLEDGED AND ABANDONED THE NEST. CONFIRMATION THAT ALL YOUNG HAVE FLEDGED MUST BE MADE BY QUALIFIED PERSONNEL.

IF PROJECT ACTIVITIES ARE SCHEDULED DURING THE NESTING SEASON, STEPS TO PREVENT NESTING IN THE POTENTIAL IMPACT AREA CAN BE TAKEN, INCLUDING COVERING EQUIPMENT AND STRUCTURES, AND USING NESTING DETERRENTS (E.G., NOISE).

IF PROJECT ACTIVITIES MAY RESULT IN THE "TAKE" (IMPACTS TO ACTIVE NESTS, EGGS, OR FLEDGLINGS) OF A BIRD, COORDINATION WITH USFWS AND/OR ARIZONA GAME AND FISH DEPARTMENT IS REQUIRED.

THREATENED/ENDANGERED & OTHER
PROTECTED SPECIES OVERVIEW

THE ENDANGERED SPECIES ACT (ESA)

THE PURPOSE OF THE ESA IS TO PROTECT AND RECOVER IMPERILED SPECIES AND THE ECOSYSTEMS UPON WHICH THEY DEPEND. IT IS ADMINISTERED BY THE U.S. FISH AND WILDLIFE SERVICE AND THE COMMERCE DEPARTMENT'S NATIONAL MARINE FISHERIES SERVICE. UNDER THE ESA, SPECIES MAY BE LISTED AS EITHER ENDANGERED OR THREATENED.

"ENDANGERED" MEANS A SPECIES IS IN DANGER OF EXTINCTION THROUGHOUT ALL OR A SIGNIFICANT PORTION OF ITS RANGE.

"THREATENED" MEANS A SPECIES IS LIKELY TO BECOME ENDANGERED WITHIN THE FORESEEABLE FUTURE.

ALL SPECIES OF PLANTS AND ANIMALS (EXCEPT PEST INSECTS) ARE ELIGIBLE FOR LISTING AS ENDANGERED OR THREATENED. FOR THE PURPOSES OF THE ESA, CONGRESS DEFINED SPECIES TO INCLUDE SUBSPECIES, VARIETIES, AND, FOR VERTEBRATES, DISTINCT POPULATION SEGMENTS.

STIFF PENALTIES MAY BE IMPOSED FOR VIOLATIONS OF THE ENDANGERED SPECIES ACT. CRIMINAL ACTIVITIES MAY BE PUNISHED WITH FINES UP TO $50,000 AND/OR ONE YEAR IMPRISONMENT FOR CRIMES INVOLVING ENDANGERED SPECIES, AND $25,000 AND/OR SIX MONTHS IMPRISONMENT FOR CRIMES INVOLVING THREATENED SPECIES.

THREATENED/ENDANGERED & OTHER PROTECTED SPECIES OVERVIEW

IF A LISTED SPECIES IS OBSERVED WITHIN THE PROJECT AREA, WORK IN THE IMMEDIATE VICINITY MUST BE SUSPENDED UNTIL IT MOVES OUT OF HARM'S WAY ON ITS OWN, OR UNTIL IT IS RELOCATED BY A PERMITTED INDIVIDUAL.

THE UNDERSIDE OF ALL VEHICLES AND HEAVY EQUIPMENT MUST BE CHECKED FOR LISTED SPECIES AND OTHER WILDLIFE PRIOR TO MOVING AT THE BEGINNING OF EACH WORKDAY AND AFTER VEHICLES HAVE IDLED FOR MORE THAN 15 MINUTES.

SURFACE WATER FROM UNTREATED SOURCES LOCATED WITHIN ONE MILE OF AQUATIC HABITAT FOR FEDERALLY LISTED AQUATIC SPECIES MUST NOT BE USED.

HABITAT

THE WESTERN YELLOW-BILLED CUCKOO BREEDS IN RIPARIAN HABITAT ALONG LOW GRADIENT (SURFACE SLOPE LESS THAN 3 PERCENT) RIVERS AND STREAMS, AND IN OPEN RIVERINE VALLEYS THAT PROVIDE WIDE FLOODPLAIN CONDITIONS (GREATER THAN 325 FEET).

WITHIN THE BOUNDARIES OF THE DISTINCT POPULATION SEGMENT (DPS), THESE RIPARIAN AREAS ARE LOCATED FROM SOUTHERN BRITISH COLUMBIA, CANADA, TO SOUTHERN SINALOA, MEXICO, AND MAY OCCUR FROM SEA LEVEL TO 7,000 FEET (OR SLIGHTLY HIGHER IN WESTERN COLORADO, UTAH, AND WYOMING) IN ELEVATION.

YELLOW-BILLED CUCKOO

ESA STATUS: *THREATENED*

ALL CONSTRUCTION ACTIVITY AT TUS-35 AND TUS-287, AND ASSOCIATED ACCESS ROADS, MUST CEASE FROM JUNE 1 TO SEPTEMBER 30.

ALL CONSTRUCTION ACTIVITY AT TUS-299 MUST CEASE FROM JULY 1 TO SEPTEMBER 30.

CUCKOO PROTOCOL SURVEYS MUST BE CONDUCTED IN DRAINAGES BORDERED BY TREES WITHIN 0.25 MILES OF TOWER TCA-TUS-299 FROM JUNE 1 TO JUNE 30.

IF ANY CUCKOOS ARE LOCATED WITHIN 0.25 MILES OF THIS TOWER, CBP WILL ENGAGE THE USFWS IN DEVELOPMENT OF MEASURES NECESSARY TO MINIMIZE AND AVOID IMPACTS TO THE SPECIES IN THESE LOCATIONS.

TRES BELLOTAS ROAD ALONG FRESNAL WASH MUST BE AVOIDED BETWEEN TCA-TUS-298 AND TCA-TUS-036 FROM JUNE 1 TO SEPTEMBER 30 TO AVOID DISTURBANCE TO CUCKOOS IN SUITABLE HABITAT.

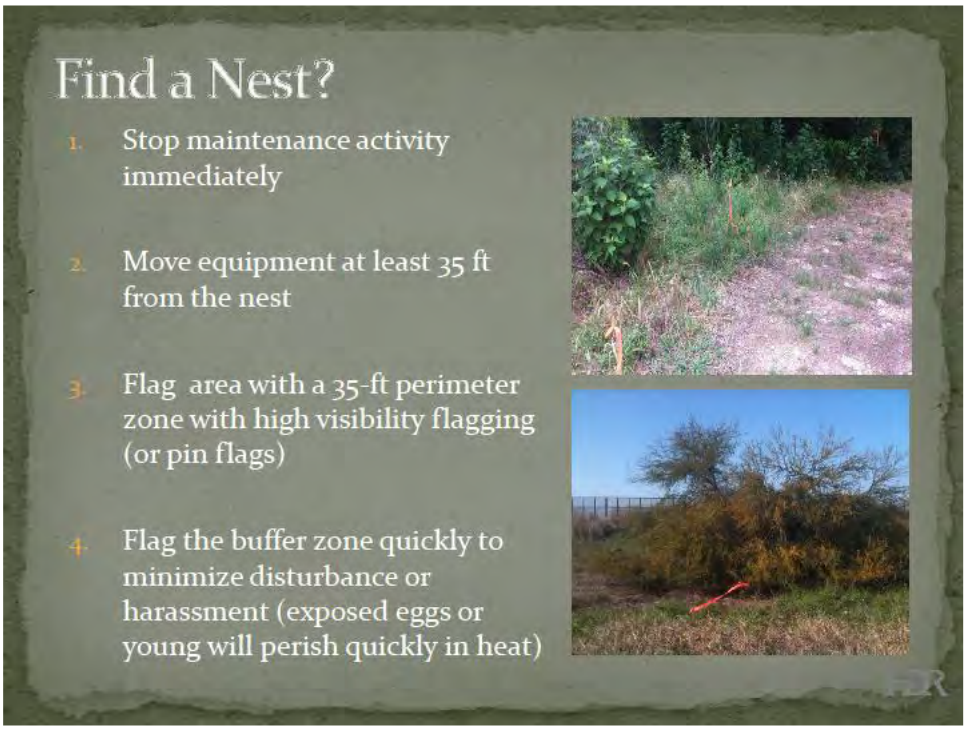
Del Rio, Laredo, and Rio Grande Valley Sector Nesting Bird Awareness Training

This is an example of regionally specific training developed for a maintenance and repair contract. It was administered and required for all Agents, Contractors, Sub-Contractors, COTRs and PMs. Regionally specific training was developed for each area where this contract vehicle was utilized.



Draft Proposed MBTA Bird Removal/Relocation Training

Managing Bird Encounters for CBP Towers

Draft Training for Border Patrol, CBP employees, and Contractors

Managing Bird Encounters for CBP Towers

Draft Training for Border Patrol, CBP employees, and Contractors

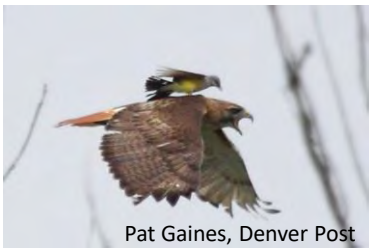
Migratory Bird Treaty Act

- International agreement to protect migratory birds
- Executive Order 13186 (January 2001)
- Agencies are required to take conservation actions to implement the MBTA
- Avoid or minimize adverse impacts on migratory bird resources
- Integrate migratory bird habitat and population conservation into agency plans
- Develop and use practices to decrease unintentional take
- Provide training to employees on methods of avoiding or minimizing take of migratory birds and conserving migratory bird habitat
- THIS TRAINING is to help CBP continue needed repairs, maintenance and operations while complying with the MBTA requirements

Nesting Habitats

- Ground (bare ground, gravel/rocks)
- Woodland
- Grasslands
- Marshes
- Shrubland
- Cavities
- Banks/cliffs
- Sometimes - Towers, Buildings & Equipment

Be Aware Nesting Behavior



Pat Gaines, Denver Post

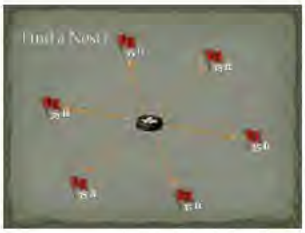
Anna Mlodzinski

- Dive bombing
- Fuss calls
- Subtle calls
- Chasing / circling
- Distraction displays
- Persistent bird in one location
- Some birds will leave the immediate area of their nest when they are disturbed
- Most active in the early morning and late afternoon

Find a Nest?

- Stop maintenance or repair activity immediately
- Move equipment at least 35 ft from the nest Immediately. Further distance may be required if the nest is occupied.
- From a distance if possible observe the nest. If no eggs or baby birds are present remove the nest unless the nest is an eagle nest (which are further protected by the Bald and Golden Eagle Protection Act and cannot be removed without special provisions) and **notify**.
- If eggs or baby birds are present. Flag area with a minimum 100-foot perimeter zone with high visibility flagging (or pin flags). You could reduce the buffer if it appears that a nesting pair is tolerant of disturbance. A designated monitor should watch the nesting birds for signs of stress or disturbance associated with the activities after the buffer is established. The buffer may need to be increased if they appear disturbed. Raptors require even larger buffers. For more guidance concerning appropriate buffer sizes see table 1.
- Flag the buffer zone quickly to minimize disturbance or harassment (exposed eggs or young will perish quickly in heat) and **notify**.

Photo: Duckling being harassed instead of allowing it to leave its nest naturally.



Notify

- BP Agents Notify PLLA (Specific Contact info placed here)
- CBP civilian personnel notify BPAM (Specific Contact info placed here)
- Contractors Notify Contracting Officer Technical Representative (Specific Contact info placed here)
- PLLA and COTR will contact BPAM and BPAM:
  - **If the nest is removed**, will **record the incident**
  - **If the nest is occupied**, will **determine the best course of action**:
    - If there is no critical need for removal the nest will remain until Fledging – record the incident and end of incident
    - If there is a need for removal BPAM will:
      - Contract removal, relocation, rehabilitation with an appropriate contractor as listed in the list of approved relocators and rehabilitators and record the incident – or
      - Arrange removal and transport by a BPAM trained person to an appropriate contractor as listed in the list of approved relocators and rehabilitators and record the incident

Contracting Relocators and Rehabilitators

- It will BPAM's responsibility to ensure that the relocator and the rehabilitation facility are covered by the proper permits
- The following relocators have been identified for this project from the list of approved relocators and rehabilitators
- (Specific Contact information placed here)

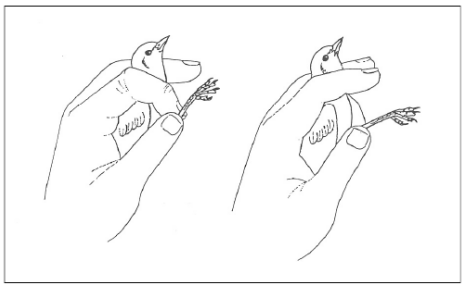
If you are tasked by BPAM to move a nest, eggs, or baby birds (fledglings)

1. Do not take any action until tasked by BPAM to remove and transport.
2. Contact the recipient (the approved rehabilitation facility provided by BPAM) of the bird, nest, eggs, or fledglings to make sure they will be present to receive them when you arrive.
3. Consider the timing to remove the birds, nest, eggs, or fledglings in light of the need to allow the birds to calm down before transport and likely transportation time.

Transporting Birds

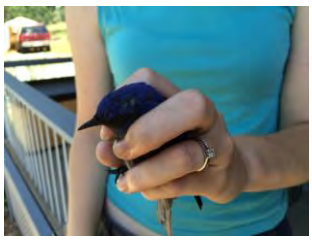
1. *Prepare a container.* Put a soft cloth in a cardboard box or pet carrier of an appropriate size to prevent the bird from sliding or being jostled during transport. If a box, make sure there are air holes.
2. *Protect yourself.* Wear heavy leather gloves if necessary. Some birds may bite or scratch to protect themselves, even if sick or injured. Remember the bird is terrified of you. Smaller birds do not require gloves
3. *Cover the container* with a light sheet or towel. You want to keep the bird warm and calm. Keeping the container dark also will help keep the animal calm.
4. *Gently pick up the bird* and put it in the prepared container. *Extreme fright can kill*
   a. With **a larger bird**, it's important to pick up the bird from the back and secure its wings in one motion. A towel will help in this process.
   b. With **a smaller bird**, its body is like a small water bag and it can be internally injured by too much handling. Do not move your hands around while holding the baby, or turn it upside down, as rapid changes in posture can also kill.
5. *Do not give the animal food or water.* Keep it away from children and pets.
6. After placing the bird into the prepared container:
   1. If it is an adult or injured bird, allow the bird to rest and unstress for at least 20 minutes before transporting. Allow for this time in your transportation estimate to the rehabilitation facility.
   2. If the bird is fledgling or if they are eggs move quickly to ensure that the fledglings or eggs do not cool down or get too hot. No unstress time interval is needed.
7. *Keep the bird warm and calm.* A bottle of warm tap water can provide warmth
8. *Note exactly where you found the bird.* The rehabilitator will want to know this information and BPAM will need the information for the official record.
9. If the bird(s) die during transportation notify the rehabilitation facility AND BPAM.

Handling Birds



THE NORTH AMERICAN BANDERS' STUDY GUIDE

- *Protect yourself.* Wear heavy leather gloves if necessary. Some birds may bite or scratch to protect themselves, even if sick or injured. Remember the bird is terrified of you. Smaller birds do not require gloves
- Approach the bird from the back with your hand. Place your pointer finger and middle finger on either side of the back of the bird's neck (to avoid crushing the bird's airway). Wrap the rest of your fingers around the wings and sides of the bird to keep the wings gently pinned against the body. Be careful not to squeeze very hard and be very careful not to squeeze the breast (they need to be able to breathe).



Merwin (Chip) Brown

Handling Larger Birds

- Approach them from behind, place one gloved hand over the wings, and slide the other hand under the body (touch the back of the bird and slide down until you feel the top of the legs),
- Put your middle finger between the top of the two legs, your pointer finger on the outside of the legs, and your ring finger on the outside of the other leg.
- Always keep control of the legs, the feet are the business end that you want to stay away from if you can.
- Once you have hold of the legs and wings, you can pick the bird up and put it's back against your chest so that you don't have to continue holding the wings, or you can cradle the bird in the crook of your arm, still holding the feet.

Merwin (Chip) Brown

CTIMR COTR/PM Boot Camp

Briefing Provided to CEQ

FM&E

CTIMR COTR/PM Boot Camp

Overview of Environmental Laws

- Congress has enacted numerous environmental laws and created regulatory agencies to enforce them
  - CBP Tactical Infrastructure (TI) maintenance and repair (M&R) activities are subject to some of these laws
  - CBP is committed to complying with these laws

- This session discusses most relevant laws in implementing CTIMR
  - National Environmental Policy Act (NEPA)
  - Endangered Species Act (ESA)
  - Migratory Bird Treaty Act (MBTA)
  - National Historic Preservation Act (NHPA)
  - Clean Water Act (CWA) – Wetland

CTIMR COTR/PM Boot Camp

Migratory Bird Treaty Act (MBTA)

- MBTA makes it unlawful to pursue, hunt, take, capture, kill, or sell birds listed therein ("migratory birds"). The statute does not discriminate between live or dead birds and also grants full protection to any bird parts including feathers, eggs, and nests. Over 800 species are currently on the list
- United States and Mexico entered the treaty in 1936
- Some of these conventions stipulate protections not only for the birds themselves, but also for habitats and environs necessary for the birds' survival
- CTIMR activities covered under the MBTA
  - Preservation of bird habitats protected under the MBTA
  - Curtailed CTIMR activities during the breeding season

Environmental Stewardship Training Program

This training was prepared for COTRs, PMs, Border Patrol Agents, Contractors, Subcontractors, Environmental Monitors, and other personnel with responsibilities in Maintenance and Repair. Although the entire environmental stewardship program was required training, this document only shows portions pertinent to MBTA compliance including general and ESA Best Management Practices.

INTRODUCTION

- This training program provides an overview of the environmental concerns, both biological and cultural, for maintenance and repair activities in Del Rio, Laredo, and Rio Grande Valley (RGV) Sectors. You are required to understand the content of this program.
- The training program will cover BMPs which have been carefully designed to provide protection to natural and cultural resources, including plants and wildlife.
- Environmental stewardship is very important to CBP.
- This presentation identifies specific practices and habitat conservation measures you will be required to implement while maintaining and repairing tactical infrastructure.
- In this module, you will recognize photos outlined in green or red. Photos outlined in red depict actions that are out of compliance with BMPs. These deficiencies are also denoted with an "X" through the photo. Photos outlined in green depict actions that were performed in compliance with the BMPs.

WHAT ARE BMPs?

- BMPs are common-sense actions applied to maintenance and repair activities to promote execution of the work in an environmentally responsible manner, so that wildlife, habitat, water quality, air quality, cultural resources, and landscape integrity are conserved.
- These BMPs were developed in consultation with the USFWS and CBP is obligated to implement them.

Photo (above): Proper dust suppression during excavation activities.

Photo (right): Hydroseeding a temporarily disturbed area.

Photo (right): Properly installed silt fencing and fiber rolls to prevent erosion along waterway.

NOISE

BMP: All Occupational Safety and Health Administration requirements will be followed with respect to maintenance and repair noise impacts. Ensure all motorized equipment possess properly working mufflers and are kept properly tuned to reduce backfires. Ensure all motorized generators will be in baffle boxes (a sound-resistant box that is placed over or around a generator), have an attached muffler, or use other noise-abatement methods in accordance with industry standards. For activities involving heavy equipment, seasonal restrictions might be required to avoid impacts on threatened or endangered species in areas where these species or their potential habitat occur. See species-specific BMPs.

VEGETATION

BMP: Clearly demarcate the perimeter of all new areas to be disturbed using flagging or temporary construction fence. Do not allow any disturbance outside that perimeter. Riparian vegetation should be protected during maintenance activities.

Photo (above): No perimeter markers resulted in disturbance outside the perimeter.

Photos (below and right): Correct demarcation of perimeter.

27

VEGETATION

BMP: Identify fill material, sandbags, hay bales, and mulch brought in from outside the project area by its source location. Use sources that are sterile or weed-free.

BMP: Avoid the removal of mature trees providing shade or bank stabilization within the riparian area of any waterway during maintenance or repair activities.

BMP: If vegetation must be removed, allow natural regeneration of native plants by cutting vegetation with hand tools, mowing, trimming, or using other removal methods that allow root systems to remain intact.

Photo: Obtain weed-free fill material to use on site.

WILDLIFE

BMP: Minimize animal collisions during maintenance and repair activities by not exceeding 35 mph on major unpaved roads (graded with ditches on both sides) and 25 mph on all other unpaved roads. During periods of decreased visibility (e.g., night, poor weather, curves), do not exceed speeds of 25 mph.

Photo (above): Dead bird in grill.

WILDLIFE

BMP: If hollow bollards are necessary, cover hollow bollards (i.e., those that will be filled with a reinforcing material such as concrete) to prevent wildlife from entrapment. Deploy covers (and ensure they remain fully functioning) from the time the posts or hollow bollards arrive on the site and are unloaded, until they are filled with reinforcing material.

Photo (right): Uncovered bollards

BMP: Do not permit pets owned or under the care of the contractor or sector personnel inside the project boundaries, adjacent native habitats, or other associated work areas.

BMP: Clearing of riparian and aquatic vegetation will not occur within 100 feet of natural drainages, ephemeral and perennial aquatic habitats, or other water bodies to provide a buffer area to protect the habitat from sedimentation.

Photo (above): Pet monkey on construction site.

WILDLIFE

BMP: To prevent entrapment of wildlife species, ensure excavated, steep-walled holes or trenches are either completely covered by plywood or metal caps at the close of each work day or provided with one or more escape ramps (at no greater than 1,000-foot intervals and sloped less than 45 degrees) constructed of earth fill or wooden planks.

BMP: Each morning before the start of maintenance activities ensure holes and trenches are thoroughly inspected for trapped animals. Ensure that any animals discovered are allowed to escape voluntarily (by escape ramps or temporary structures), without harassment, before maintenance activities resume; or are removed from the trench or hole by a qualified person and allowed to escape unimpeded.

Photo (right): A turtle fell into an uncovered trench and became stuck in the rebar of the trench. Turtle was successfully recovered

Photo (above): Trench with an exit ramp (at each end of the trench).

WILDLIFE

BMP: Ensure permanent light poles and other permanent pole-like structures have anti-perch devices to discourage roosting by birds.

No bird deterrent

Bird deterrent

WILDLIFE

BMP: If maintenance activities will continue at night, direct shielded light only onto the area required for worker safety and productivity. Lights will not exceed 1.5-foot candles within the lit area.

Photo (above): Lights need to be pointed down and away from surrounding habitat. The light shown in the photo is not directing light onto the work area.

Photo (right): Lights are pointed into active work area.

MIGRATORY BIRDS

BMP: Initial mechanical and chemical vegetation clearing and subsequent mechanical vegetation control should be timed to avoid the migration, breeding, and nesting timeframe of Migratory Bird Treaty Act (MBTA)-covered birds (February 1 through September 1). Herbicide re-treatments could occur throughout the year. When initial mechanical and chemical vegetation control must be implemented during February 1 through September 1, a survey for nesting migratory birds will be conducted immediately prior to the start of activities. If an active nest is found, a buffer zone will be established around the nest and no activities will occur within that zone until nestlings have fledged and abandoned the nest.

Photo (above): Duckling found and removed from a nest in tall grass.

Photo (right): Duckling being harassed instead of allowing it to leave its nest naturally.

BMP: A survey for migratory birds will also be conducted prior to all other maintenance and repair activities to be implemented during the nesting period in areas where MBTA-covered birds might be nesting.

MIGRATORY BIRDS

BMP: If maintenance is scheduled during the migratory bird-nesting season, take steps to prevent MBTA-covered birds from establishing nests in the potential impact area. These steps could include covering equipment and structures, and use of various excluders (e.g., noise). Birds can be harassed to prevent them from nesting on the site. Once a nest is established, they cannot be harassed until all young have fledged and left the nest site. If nesting birds are found during the supplemental survey, defer intrusive maintenance activities until the birds have left the nest. Confirmation that all young have fledged should be made by qualified personnel.

THREATENED, ENDANGERED AND OTHER PROTECTED SPECIES

BMP: Check visible space underneath heavy equipment for listed species and other wildlife prior to moving the equipment at the beginning of each workday and after vehicles have sat idle for more than 15 minutes.

Photos (above): Didn't survive.

Photos (above): Species removed and survived.

Photo (above): Bird nest found in wheel well of equipment that had not been used for less than one week.

BIRD SPECIES

Black-capped Vireo (Del Rio Sector)

BMP: Vegetation control in suitable habitat of threatened or endangered bird species will be limited to the minimum necessary to maintain drivable access roads and to maintain the functionality of other tactical infrastructure. This limited vegetation control will be conducted outside of the nesting season. This restriction does not apply to areas where protocol surveys have been conducted and it has been determined that the area is not occupied and does not contain a primary constituent element (PCE).

Photo: TPWD

Photo (above): Duckling found and removed from a nest in tall grass.

BIRD SPECIES

Black-capped Vireo (Del Rio Sector)

BMP: If vegetation clearing is to be conducted adjacent to suitable habitat of a threatened or endangered bird species, qualified personnel with experience identifying suitable habitat of that species will delineate and clearly mark the suitable habitat to be avoided.

BMP: For all other maintenance activities to be conducted within suitable habitat of a threatened or endangered bird species during the nesting season, the following avoidance measures will apply. A qualified biologist will conduct a survey for threatened and endangered birds prior to initiating maintenance activities. If a threatened or endangered bird is present, a qualified biologist will survey for nests approximately once per week within 500 feet of the maintenance area for the duration of the activity. If an active nest is found, no maintenance will be conducted within 500 feet of the nest until the young have fledged.

D.	**All applicants MUST complete**
1.	Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount** | **$100.00** ⊥ Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))
2.	Do you currently have or have you ever had any Federal Fish and Wildlife permits? Yes ☑ If "yes," list the number of the most current permit you have held or that you are applying to renew/re-issue: MB37271C-0 No ☐
3.	Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature (**in blue ink**) of applicant/person responsible for permit (No photocopied or stamped signatures) — Date of signature (mm/dd/yyyy): 6/8/18

SECTION E. SPECIAL PURPOSE - MISCELLANEOUS
(Migratory Bird Treaty Act, 50 CFR 21.27)

Note: A Federal Special Purpose - Miscellaneous permit is required to address migratory bird activities that are not covered by other existing permit types. Activities must benefit the migratory bird resource, address important research, address human concerns for individual birds, or show other compelling justification. You must be at least 18 years of age to apply for a permit. Special Purpose Permits may be valid up to 3 years.

Please provide the following information. You may use the space provided as well as a separate sheet of paper with your responses numbered according to the application questions below. You should be as thorough and specific as possible in your responses. Incomplete applications will be returned, delayed or abandoned.

1. The species (scientific and common name) and quantity of migratory birds, parts, nests, and eggs to be covered by the permit.

2. A detailed description of the project or activity, including the purpose. Include copies of supporting documentation, research proposals, and any other information that may be useful for evaluating your request.

3. The exact location (physical – address and/or GPS coordinates in decimal degree; or geographic, as appropriate) where the activity would be conducted.

4. A full description of your background and expertise in conducting the proposed activities.

5. If live birds will be maintained in captivity, describe the facilities. Attach photographs and diagrams of your enclosures. Diagrams must include dimensions (length, width, and height) and a description of interior and exterior construction materials, such as flooring and netting materials.

6. Indicate the intended disposition of the specimens, including, if applicable, the name and address of the public, scientific, or educational institution to which all specimens ultimately will be donated upon completion of activity.

7. Anyone who will be assisting you with the permitted activities or acting as your agent must either have their own Federal migratory bird permit for the activity or be identified by you, in writing, as a subpermittee under your permit. They may also require a State permit. Subpermittees must be at least 18 years old. As the primary permittee, you will be responsible for ensuring that your subpermittees are properly trained and adhere to the terms of your permit. Provide the name of anyone besides yourself who will be conducting activities under your permit. For anyone handling or caring for live birds, briefly describe what they will be doing and their qualifications.

8. You must retain records relating to the activities conducted under your permit for at least 5 years from the date of expiration of your permit. Is the physical address you provided in Section C on page 1 of this application the address where your records will be kept? Indicate "yes" or "no." If "no," provide the physical address.

9. **Any permit issued as a result of this application is not valid unless you also have any required State or tribal permits or approvals associated with the activity.** Have you obtained all required State or tribal permits or approvals to conduct this activity? **If "yes," attach a copy of the approval(s).** If "no," indicate whether your "have applied" or whether "none is required." **If you "have applied," send a copy when it is issued.**

10. **Disqualification factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c))

    Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above? If not, indicate "no." If you have, indicate "yes," and provide the following: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

PERMIT APPLICATION FORM INSTRUCTIONS

The following instructions pertain to an application for a U.S. Fish and Wildlife Service or CITES permit. The General Permit Procedures in 50 CFR 13 address the permitting process. For simplicity, all licenses, permits, registrations, and certificates are referred to as a permit.

GENERAL INSTRUCTIONS:

- Complete all blocks/lines/questions in Sections A or B, and in C, D, and E.
- **An incomplete application may cause delays in processing or may be returned to the applicant. Be sure you are filling in the appropriate application form for the proposed activity.**
- Print clearly or type in the information. Illegible applications may cause delays.
- Sign the application in blue ink. Faxes or copies of the original signature will not be accepted.
- Mail the original application to the address at the top of page one of the application or if applicable on the attached address list.
- **Keep a copy of your completed application.**
- **Please plan ahead. Allow at least 60 days for your application to be processed. Some applications may take longer than 90 days to process. (50 CFR 13.11)**
- Applications are processed in the order they are received.
- Additional forms and instructions are available from http://permits.fws.gov.

COMPLETE EITHER SECTION A OR SECTION B:

Section A. **Complete if applying as an individual:**

- Enter the complete name of the responsible individual who will be the permittee if a permit is issued. Enter personal information that identifies the applicant. ***Fax and e-mail are not required if not available.***
- If you are applying on behalf of a client, the personal information must pertain to the client, and a document evidencing power of attorney must be included with the application.
- **Affiliation/ Doing business as (dba)**: business, agency, organizational, or institutional affiliation *directly* related to the activity requested in the application (e.g., a taxidermist is an individual whose business can *directly* relate to the requested activity). The Division of Management Authority (DMA) will **not** accept *doing business as* affiliations for individuals.

Section B. **Complete if applying as a business, corporation, public agency, Tribe, or institution:**

- Enter the complete name of the business, agency, Tribe, or institution that will be the permittee if a permit is issued. Give a brief description of the type of business the applicant is engaged in. Provide contact phone number(s) of the business.
- **Principal Officer** is the person in charge of the listed business, corporation, public agency, Tribe, or institution. The principal officer is the person responsible for the application and any permitted activities. Often the principal officer is a Director or President. **Primary Contact** is the person at the business, corporation, public agency, Tribe, or institution who will be available to answer questions about the application or permitted activities. Often this is the preparer of the application.

ALL APPLICANTS COMPLETE SECTION C:

- For all applications submitted to the Division of Management Authority (DMA) a physical U.S. address is **required**. Province and Country blocks are provided for those USFWS programs which use foreign addresses and are not required by DMA.
- **Mailing address** is address where communications from USFWS should be mailed if different than applicant's physical address.

ALL APPLICANTS COMPLETE SECTION D:

Section D.1 **Application processing fee:**

- An application processing fee is required at the time of application; unless exempted under 50 CFR13.11(d)(3). The application processing fee is assessed to partially cover the cost of processing a request. **The fee does not guarantee the issuance of a permit. Fees will not be refunded for applications that are approved, abandoned, or denied**. We may return fees for withdrawn applications prior to any significant processing occurring.
- **Documentation of fee exempt status is not required for Federal, Tribal, State, or local government agencies; but must be supplied by those applicants acting on behalf of such agencies**. Those applicants acting on behalf of such agencies must submit a letter on agency letterhead and signed by the head of the unit of government for which the applicant is acting on behalf, confirming that the applicant will be carrying out the permitted activity for the agency.

Section D.2 **Federal Fish and Wildlife permits:**

- List the number(s) of your most current FWS or CITES permit or the number of the most recent permit if none are currently valid. If applying for re-issuance of a CITES permit, the original permit must be returned with this application.

Section D.3 **CERTIFICATION:**

- **The individual identified in Section A, the principal officer named in Section B, or person with a valid power of attorney (documentation must be included in the application) must sign and date the application in blue ink.** This signature binds the applicant to the statement of certification. This means that you certify that you have read and understand the regulations that apply to the permit. You also certify that everything included in the application is true to the best of your knowledge. Be sure to read the statement and re-read the application and your answers before signing.

ALL APPLICANTS COMPLETE SECTION E.

APPLICATION FOR A FEDERAL FISH AND WILDLIFE PERMIT
Paperwork Reduction Act, Privacy Act, and Freedom of Information Act – Notices

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501, *et seq.*) and the Privacy Act of 1974 (5 U.S.C. 552a), please be advised:

1. The gathering of information on fish and wildlife is authorized by:
(Authorizing statutes can be found at: http://www.gpoaccess.gov/cfr/index.html and http://www.fws.gov/permits/ltr/ltr.html.)

   a. Bald and Golden Eagle Protection Act (16 U.S.C. 668), 50 CFR 22;
   b. Endangered Species Act of 1973 (16 U.S.C. 1531-1544), 50CFR 17;
   c. Migratory Bird Treaty Act (16 U.S.C. 703-712), 50 CFR 21;
   d. Marine Mammal Protection Act of 1972 (16 U.S.C. 1361, *et. seq.*), 50 CFR 18;
   e. Wild Bird Conservation Act (16 U.S.C. 4901-4916), 50 CFR 15;
   f. Lacey Act: Injurious Wildlife (18 U.S.C. 42), 50 CFR 16;
   g. Convention on International Trade in Endangered Species of Wild Fauna and Flora (TIAS 8249), http://www.cites.org , 50 CFR 23;
   h. General Provisions, 50 CFR 10;
   i. General Permit Procedures, 50 CFR 13; and
   j. Wildlife Provisions (Import/export/transport), 50 CFR 14.

2. Information requested in this form is purely voluntary. However, submission of requested information is required in order to process applications for permits authorized under the above laws. Failure to provide all requested information may be sufficient cause for the U.S. Fish and Wildlife Service to deny the request. We may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

3. Certain applications for permits authorized under the Endangered Species Act of 1973 (16 U.S.C. 1539) and the Marine Mammal Protection Act of 1972 (16 U.S.C. 1374) will be published in the **Federal Register** as required by the two laws.

4. Disclosures outside the Department of the Interior may be made without the consent of an individual under the routine uses listed below, if the disclosure is compatible with the purposes for which the record was collected. (Ref. 68 FR 52611, September 4, 2003)

   a. Routine disclosure to subject matter experts, and Federal, Tribal, State, local, and foreign agencies, for the purpose of obtaining advice relevant to making a decision on an application for a permit or when necessary to accomplish an FWS function related to this system of records.
   b. Routine disclosure to the public as a result of publishing **Federal Register** notices announcing the receipt of permit applications for public comment or notice of the decision on a permit application.
   c. Routine disclosure to Federal, Tribal, State, local, or foreign wildlife and plant agencies for the exchange of information on permits granted or denied to assure compliance with all applicable permitting requirements.
   d. Routine disclosure to Captive-bred Wildlife registrants under the Endangered Species Act for the exchange of authorized species, and to share information on the captive breeding of these species.
   e. Routine disclosure to Federal, Tribal, State, and local authorities who need to know who is permitted to receive and rehabilitate sick, orphaned, and injured birds under the Migratory Bird Treaty Act and the Bald and Golden Eagle Protection Act; federally permitted rehabilitators; individuals seeking a permitted rehabilitator with whom to place a bird in need of care; and licensed veterinarians who receive, treat, or diagnose sick, orphaned, and injured birds.
   f. Routine disclosure to the Department of Justice, or a court, adjudicative, or other administrative body or to a party in litigation before a court or adjudicative or administrative body, under certain circumstances.
   g. Routine disclosure to the appropriate Federal, Tribal, State, local, or foreign governmental agency responsible for investigating, prosecuting, enforcing, or implementing statutes, rules, or licenses, when we become aware of a violation or potential violation of such statutes, rules, or licenses, or when we need to monitor activities associated with a permit or regulated use.
   h. Routine disclosure to a congressional office in response to an inquiry to the office by the individual to whom the record pertains.
   i. Routine disclosure to the Government Accountability Office or Congress when the information is required for the evaluation of the permit programs.
   j. Routine disclosure to provide addresses obtained from the Internal Revenue Service to debt collection agencies for purposes of locating a debtor to collect or compromise a Federal claim against the debtor or to consumer reporting agencies to prepare a commercial credit report for use by the FWS.

5. For individuals, personal information such as home address and telephone number, financial data, and personal identifiers (social security number, birth date, etc.) will be removed prior to any release of the application.

6. The public reporting burden on the applicant for information collection varies depending on the activity for which a permit is requested. The relevant burden for a Special Purpose – Miscellaneous permit application is 2 hours and 30 minutes for recordkeeping. This burden estimate includes time for reviewing instructions, gathering and maintaining data and completing and reviewing the form. You may direct comments regarding the burden estimate or any other aspect of the form to the Service Information Clearance Officer, U.S. Fish and Wildlife Service, Mail Stop 222, Arlington Square, U.S. Department of the Interior, 1849 C Street, NW, Washington D.C. 20240.

Freedom of Information Act – Notice

For organizations, businesses, or individuals operating as a business (i.e., permittees not covered by the Privacy Act), we request that you identify any information that should be considered privileged and confidential business information to allow the Service to meet its responsibilities under FOIA. Confidential business information must be clearly marked "Business Confidential" at the top of the letter or page and each succeeding page and must be accompanied by a non-confidential summary of the confidential information. The non-confidential summary and remaining documents may be made available to the public under FOIA [43 CFR 2.26 – 2.33].

INTERAGENCY AGREEMENT
STATEMENT OF WORK
BETWEEN
U.S. CUSTOMS AND BORDER PROTECTION AND THE
DEPARTMENT OF INTERIOR (DOI), U.S. FISH AND WILDLIFE SERVICES (FWS)

I. AUTHORITY

The authority of the Department of Homeland Security, U.S. Customs and Border Protection and the Department of Interior, United States Fish and Wildlife Service (FWS) which is acting as the servicing agency (collectively the "Parties") to enter into this Interagency Agreement (IAA) is the Economy Act of 1932 (31 U.S.C. 1535), resulting in an assisted acquisition.

II. OBJECTIVE/PURPOSE

This Interagency Agreement (IAA) is between the Department of Interior, U.S. Fish and Wildlife Services (FWS) and the Department of Homeland Security, U.S. Customs and Border Protection (CBP), Border Wall (BW) Program Management Office (PMO). In accordance with this agreement, FWS (servicing agency), will, on behalf of CBP (requesting agency), use its experience, background, and expertise to chemically and mechanically control non-native invasive plant species that exploit openings in the riparian forest canopy in the Tijuana River Valley and the Sweetwater River Valley which are located in the San Diego Border Patrol Sector.

The overall goals of the project are to: reduce the risk of wildfire; improve habitat for riparian nesting bird species including the federally-endangered least Bell's vireo and Southwestern willow flycatcher; mitigate safety risks to FWS staff and Border Patrol personnel; and improve access and visibility for Border Patrol operations. The San Diego Sector of the U.S. Border Patrol is one of the busiest in the country in terms of illegal entries and smuggling activity from Mexico.

III. SCOPE

This Statement of Work describes the comprehensive scope of support services for CBP's requirements. During the Base Period, U.S. Fish and Wildlife Service will use its best efforts to provide the following services either by contract or by in-house efforts:

a. **Sweetwater River Valley** (using either in-house or contractor resources), including but not limited to:

    1) The primary actions are to chemically and mechanically control non-native invasive plant species that exploit openings in the riparian forest canopy. Chemical treatments would include application of herbicide at the appropriate point of the growth cycle for the chemical to be transported to the roots and kill the plant. Mechanical treatments would include cutting, removal, and chipping. Non-native species that contribute to hazardous fuel loading and are targeted for

removal include giant reed (*Arundo donax*), saltcedar (*Tamarix* spp.), Peruvian peppertree (*Schinus molle*), eucalyptus (*Eucalyptus* spp.), Mexican fan palm (*Washingtonia robusta*), Canary Island date palm (*Phoenix canariensis*), and castor bean (*Ricinus communis*). Planning activities include project plan development, mapping of target species, environmental compliance, contract development and administration, treatment effectiveness monitoring, and reporting. Two units of the Sweetwater River totaling 242 acres would be treated – Unit 1 (upstream of SR 94 to the Refuge boundary with private land) is 124 acres; Unit 2 (downstream of SR 94 to boundary with Sweetwater Authority) is 118 acres.

Follow-up chemical and mechanical treatments will likely be necessary for 3 years to achieve 100% control of invasive plant species and to remove live or dead biomass.

The project area is designated critical habitat for the federally-endangered least Bell's vireo (*Vireo bellii pusillus*) and Southwestern willow flycatcher (*Empidonax traillii extimus*).

b. **Tijuana River Valley** (using either in-house or contractor resources), including but not limited to:

1) The primary actions are to mechanically remove woody debris from the riparian zone and to chemically and mechanically control invasive plant species that exploit openings in the forest canopy created by the beetle infestation. Mechanical treatment of large woody debris would include cutting, removal, and chipping. Invasive plant species would be controlled with herbicides followed by mechanical removal of the dead material. The main species to be targeted include giant reed (*Arundo donax*), saltcedar (*Tamarix* spp.), and castor bean (*Ricinus communis*). Planning activities include project plan development, mapping of target species, environmental compliance, contract development and administration, treatment effectiveness monitoring, and reporting. The total footprint of the project area is approximately 200 acres.

Follow-up mechanical and chemical treatments will likely be necessary for 3-5 years to achieve 100% control of invasive plant species or to remove additional woody debris generated by beetle activity.

Portions of the project area include designated critical habitat for the federally-endangered least Bell's vireo (*Vireo bellii pusillus*).

IV. **REQUIREMENTS/TASKS:**

a. **Sweetwater River Valley:** The total footprint is 242 acres; and 242 acres would be counted for accomplishments.
   1) Treatment #1: CATNR-FY19-CX-SCA-Units 1,2-BP
   2) Treatment #2: CATNR-FY19-MX-SCA-Units 1,2-BP

b. **Tijuana River Valley:** The total footprint is approximately 200 acres; however, approximately 1,120 acres will be counted for accomplishments (each treatment type is counted once; follow-up treatments will occur for 3-5 years on each unit).
   1) Treatment #1: CATJR-FY19-MX-SCA-Units 1,2-BP
   2) Treatment #2: CATJR-FY19-CX-SCA-Units 3,4-BP
   3) Treatment #3: CATJR-FY20-MX-SCA-Units 1,2-BP
   4) Treatment #4: CATJR-FY20-CX-SCA-Units 3,4-BP
   5) Treatment #5: CATJR-FY20-MX-SCA-Units 1,2-BP
   6) Treatment #6: CATJR-FY20-CX-SCA-Units 1,2-BP

V. **ESTIMATED COST BREAKOUT (INCLUDING APPLICABLE FEES):**

Project Title	TOTAL COST ESTIMATE
Sweetwater River Valley	
FY19	350,000.00
Sub-Total	**350,000.00**
Tijuana River Valley	
FY19	330,000.00
FY20	320,000.00
Subtotal	**650,000.00**
Grand Total	**1,000,000.00**

Table 1: Project Cost Estimate

The Base Period amount includes all costs for all work included in the scope of this IAA plus the project management costs charged by FWS for the Base Period. Actual costs are dependent on the work performed. This budgetary estimate is based on a summation of all the labor, contract and other direct and indirect costs assumed to be required to fund the mechanical / chemical treatments executed during the Base Period through contract closeout.

VI. **DELIVERABLES:**

The servicing agency must provide an electronic version of the following:

- Monthly expense burn rate report
- Monthly Project Delivery Schedule

VII. PLACE OF PERFORMANCE

The place of performance for this requirement shall include San Diego Border Patrol Sector.

VIII. PERIOD OF PERFORMANCE

This Agreement is effective from _____ through four years from date of award, which is estimated to be from XXX 2019 – XXX, 2024.

IX. FUNDING

The initial value of the IAA base year is **$1,000,000.00**
Any modifications resulting from a CBP approved change request will be funded from the change management reserve contract line item number (CLIN) 10. Use of the change management reserve funding CLIN 10 is only authorized after receipt of a CBP approved change request. Funding will be provided by CBP BW PMO to the Department of Interior, US Fish and Wildlife Service.

Specific funding information is as follows:

Office of Acquisition
(b) (6)(b) (6)(b) (6)(b) (6)(b) (6)
(b) (6)(b) (6)(b) (6)

Dear (b) (6):

Thank you for your correspondence dated October 24, 2017, received in our office on October 24, 2017. This letter documents our review of the U.S. Customs and Border Protection (CBP) Office of Acquisition's proposed Block 1 Tower Replacement Project in the Tucson Border Patrol Station Area of Operation. This project involves the construction of nine IFT sensor towers to replace existing SBInet towers in the general area of the Buenos Aires National Wildlife Refuge (BANWR) and east of the BANWR in Pima County, Arizona. In addition, the BANWR refuge manager and the Coronado National Forest Supervisor have both determined that new special use permits will be issued to authorize this action to construct replacement towers on lands they administer. The special use permit has been issued for the BANWR, but this consultation includes the issuance of the permit by the Coronado National Forest as an element of the proposed action for which CBP is acting as the lead agency for this consultation.

You are requesting informal consultation on the potential effects of this proposed action pursuant to section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1531-1544) (ESA), as amended. You have requested our concurrence with your determination that the proposed project may affect, but is not likely to adversely affect the endangered Pima pineapple cactus (*Coryphanta scheeri* var. *robustispina*), the threatened Chiricahua leopard frog (*Rana chiricahuaensis*) and designated critical habitat, the threatened northern Mexican gartersnake (*Thamnophis eques megalops*), the threatened yellow-billed cuckoo (*Coccyzus americanus*), and the endangered jaguar (*Panthera onca*) and designated critical habitat. We concur with your determinations and provide our rationale below. Critical habitat has been proposed for the northern Mexican gartersnake and the yellow-billed cuckoo and proposed critical habitat for both

species occurs in the area of the proposed action. You have determined that the proposed action will not adversely modify proposed critical habitat for either species and we will not address proposed critical habitat in this consultation.

You also determined the propose action would have no effect on the Kearney's Blue-Star (*Amsonia kearneyana*), the southwestern willow flycatcher (*Empidonax traillii eximus*), the masked bobwhite quail (*Colinus virginianus ssp. ridgwayi*), the lesser long-nosed bat (*Leptoncyteris curasoae yerbabuenae*), and the ocelot (*Leopardus pardalis*). The ESA does not require the U.S. Fish and Wildlife Service to concur with "no effect" determinations. These species will not be addressed in this consultation. However, we strongly recommend that CBP include their justification for these "no effect" determinations in their administrative record.

DESCRIPTION OF THE PROPOSED ACTION

The nine Block 1 sensor towers proposed for replacement in this project are identified as:

1) TCA-TUS-032 M4 occurring on lands owned by Pima County;
2) TCA-TUS-035 Guijas occurring on lands managed by BANWR;
3) TCA-TUS-036 Black Mesa occurring on lands managed by the Coronado NF;
4) TCA-TUS-041 County Line occurring on lands managed by the State of AZ;
5) TCA-TUS-085 Rose occurring on lands managed by BANWR;
6) TCA-TUS-287 De La Osa occurring on lands managed by BANWR;
7) TCA-TUS-290 Spears Property occurring on lands managed by CBP;
8) TCA-TUS-298 Blackberry Hill occurring on lands managed by the Coronado NF; and
9) TCA-TUS-299 Garcia Ranch occurring on lands managed by BANWR (see Figure 1 of the Biological Assessment).

At each of these towers, the entire tower structure and supporting equipment will be replaced. A lattice replacement tower, of similar height and design to the existing tower, with a poured concrete foundation will be constructed within the existing, permanently disturbed tower footprint (typically 50 feet by 50 feet). After construction is completed on the new tower, the above-ground portion of the existing towers will be removed. In order to enable construction of the new tower, the current fence and all support facilities (generator, propane tank, building, and solar panels) will be relocated within the original temporary disturbance footprint. The original 100 foot by 100-foot temporary disturbance footprint will be flagged and no disturbance outside of this area will be allowed. After the existing tower is removed, the grounding system will be rebuilt if and as required. At each of these towers, the existing communication equipment and power generation equipment (solar panels and propane generator) will be replaced. The solar panels will provide the primary power source for operation of the tower. When the IFT system becomes operational, the generator is only anticipated to run for a period of 20 minutes once every seven days, or during infrequent weather events when there is no sunshine for several days. The sound level as measured from the generator is anticipated to be approximately 68 dBA at 28 feet. During construction, the operating time of the generator will increase when the solar panels are removed at the five towers which are not connected to grid power (TCA-35, TCA-36, TCA-41, TCA-85, and TCA-298).

The actual construction activities at each sensor tower are expected last 40 to 60 days, not all consecutively, over the 12- to 18-month duration of the project. During these construction activities, up to an estimated 12 trips by cement trucks for foundation installation, 12 trips by flatbed trucks for delivery of materials, 3 trips for the crane truck and several hundred pick-up truck trips for workers will be required to construct each tower. Construction at towers in the Tucson Border Patrol Station AOR is planned to begin in fall 2017.

The temporary disturbance area will be restored after construction is completed as directed by the land manager. The construction schedule for work at each specific tower has not yet been developed. There will be no night time construction during the period from April 1 to October 1, and nighttime construction during the balance of the construction period is unlikely. There will be no night time operational lighting at the towers.

The Buenos Aires National Wildlife Refuge Manager and the Coronado National Forest Supervisor have both determined that new special use permits will be issued to authorize this action to construct replacement towers on lands they administer. The special use permit for this project has been issued by the Buenos Aires National Wildlife Refuge Manager. This consultation includes issuance of the permit by the Coronado National Forest Supervisor as an element of the proposed action.

CBP has included a number of conservation measures in their proposed action to avoid and minimize adverse effects to U.S. Fish and Wildlife Service trust resources. These include, but are not limited to, the following:

General

1. The government environmental Subject Matter Expert and environmental contract monitor will determine which threatened and endangered species could occur in the vicinity of project activities.

2. To protect individuals of listed species within the project area, suspend work in the immediate vicinity of the individual until it moves out of harm's way on its own, or enlist a qualified specialist (individuals or agency personnel with a permit to handle the species) to relocate the animal to a nearby safe location in accordance with accepted species-handling protocols.

3. CBP will develop (in conjunction with land managers) and implement a training program focusing on Trust Resources for contractor personnel. Training will be provided to all personnel associated with the project before the project begins and before any new personnel begin work on the project. Information presented in the training program will include occurrence of sensitive species in the project area, their general ecology, and sensitivity to human activities; legal protection afforded the species and the penalties for violation of state or Federal laws; implementation of included conservation actions/best management practices; and reporting requirements. Also included in this training program will be color photos of the listed species and maps of federally listed species' habitats. Following the training program, the photos and maps will be posted in the contractor and resident engineer's office, where they will remain through the duration of the project.

4. Check visible space underneath all vehicles and heavy equipment for listed species and other wildlife prior to moving vehicles and equipment at the beginning of each workday and after vehicles have idled for more than 15 minutes.

5. Groundwater or surface water from a treated municipal source will be used when within one-mile habitat for aquatic species.

6. No use of herbicides will be permitted.

7. Contractor shall not drive roads which have become impassable by heavy rains until such roads are repaired.

Migratory Bird BMPs

1. A survey for migratory birds will also be conducted prior to all activities to be implemented during the nesting period in areas where migratory birds might be nesting (February 1 through September 1). If construction is proposed in areas identified by USFWS as suitable breeding habitat for yellow-billed cuckoo, surveys will be conducted using the Halterman et al. (2016) protocol. If an active nest of any migratory bird is found in the Action Area, a buffer zone of 300 feet will be established around the nest and no activities will occur within that zone until nestlings have fledged and abandoned the nest. Confirmation that all young have fledged should be made by qualified personnel.

2. If project activity is scheduled during the migratory bird-nesting season, take steps to prevent migratory birds from establishing nests in the action area. These steps could include covering equipment and structures. Birds can be flushed to prevent them from nesting on the site.

3. If project activities could result in the take (e.g. removal of nest, eggs, and/or fledglings) of a migratory bird; then coordination with the USFWS and/ or the Arizona Game and Fish Department will be required and applicable permits would be obtained prior to project activities.

Species Specific BMPs

<u>Pima Pineapple Cactus</u>

1. No ground disturbance will occur outside the previously disturbed footprint in suitable habitat without further consultation with the USFWS.

2. Within or adjacent to Pima pineapple cactus suitable habitat, to minimize fugitive dust generation, monitor dust during construction, and conduct abatement of fugitive dust when there is a visible plume of dust extending more than 30 feet from the dust source. Abatement would include reducing travel speeds and/or applying dust suppressants, such as water.

<u>Chiricahua Leopard Frog</u>

1. To avoid running over Chiricahua leopard frogs on Highway 286 and Highway 289, construction vehicles will not cross washes when water is flowing along the following portions of these roads: (1) Highway 286 from its junction with Highway 289(Arivaca-Sasabe Road) south for 8.5 miles and (2) Highway 289 from its junction with Highway 286 continuing east for 2.4 miles to the far side of Puertocito Wash.

2. To avoid running over Chiricahua leopard frogs on Tres Boleros and Tres Bellotas Roads, construction vehicles will not travel along designated portions of these roads between July 1st and October 1st, or during rainfall events that occur outside of this time period: Tres Boleros Road within one mile overland distance of Garcia Tank, and Tres Bellotas Road beginning north of TCA-TUS-036 and continuing in a northeast direction to its intersection with Arivaca-Sasabe Road.

3. During the monsoon season, a qualified biologist will monitor the frog-proof fence at tower TCA-TUS-032 and relocate any frogs along this fence to avoid impacts to the species.

4. A site-specific storm water pollution prevention plan (SWPPP) and a spill protection plan will be prepared and regulatory approval sought, as required by regulations. This plan will include, but is not limited to, placing straw bale type sediment traps at the inlet of ponds or stock tanks and upstream of drainages known to be occupied by the species or within critical habitat of the species.

5. To prevent the spread of amphibian diseases among drainages via water or mud on vehicles and equipment, all work within Chiricahua leopard frog Action Area shall conform to amphibian disease prevention protocols as described in the Recovery Plan for the Chiricahua leopard frog (USFWS 2007). Equipment would either be disinfected on-site between uses at different sites or rinsed to remove all dirt and mud and then completely airdried before moving to another site. This measure will not be required for travel along paved routes or portions of Ruby Road that are in the action area, as these routes are heavily traveled by the public and cleaning/sterilization of project vehicles will do little to prevent movement of disease via vehicular travel.

6. Any use or storage of chemicals or fuels will be kept 0.3 miles away from the Chiricahua leopard frog Action Area.

7. Individual animals found in the project area in danger of being harmed will be relocated by a CBP biologist to a nearby safe location in accordance with accepted species handling protocols in Federal and state permits. No animals will be moved to aquatic habitat without prior coordination with the USFWS species lead.

Northern Mexican Gartersnake

1. Within proposed critical habitat for this species, an environmental monitor will be on site during all project activities.

2. Individual animals found in the project area in danger of being harmed will be relocated by a CBP biologist to a nearby safe location in accordance with accepted species handling protocols in Federal and state permits.

Yellow-billed Cuckoo

CBP will avoid all construction traffic and activity at the tower sites and access roads which USFWS has identified as the most likely locations for occupancy by yellow-billed cuckoo.

1. CBP will avoid all construction activity at the following towers and associated access roads from June 1 to September 30: TCA-TUS-35, TCA-TUS-290, and TCA-TUS-287.

2. CBP will avoid all construction activity at TCA-TUS-299 from July 1 to September 30.

3. CBP will conduct cuckoo protocol surveys (Halterman et al. 2016) in drainages bordered by trees within 0.25 miles of tower TCA-TUS-299 from June 1 to June 30. If any cuckoos are located within 0.25 miles of this tower, CBP will engage the USFWS in development of measures necessary to minimize and avoid impacts to the species in these locations.

4. CBP will avoid using Tres Bellotas Road along Fresnal Wash between TCA-TUS-298 and TCA-TUS-036 from June 1 to September 30 to avoid disturbance to cuckoos in suitable habitat.

As part of the proposed action for this project, CBP is working in coordination with the USFWS to develop an interagency agreement with USFWS to provide funding to support high priority activities for conservation and recovery of the Chiricahua leopard frog, yellow-billed cuckoo and northern Mexican gartersnake which may be found in the vicinity of the Action Area of this project.

CONCLUSION

Pima Pineapple Cactus

Environmental Baseline

The Pima pineapple cactus is a low-growing hemispherical cactus that may be found as single or multi-stemmed plants. Adults measure 4-18 inches tall and 3-7 inches in diameter. The spines are stout and arranged in clusters with one central hooked spine and 6-15 radial straight spines. Spines are originally straw colored, but become black with age. Flowers are yellow and the fruit is a green ellipsoid (US Fish and Wildlife Service 2017). The Pima pineapple cactus was listed as endangered without critical habitat throughout the species range on September 23, 1993 (58 FR 49875). This cactus species grows in the transition zone between the semi-desert grasslands and Sonora desert scrub on alluvial bajadas (lower slopes of mountains characterized by loose alluvial sediments and poor soil development) and slopes of less than 10 percent grade at elevations between 2,300 and 4,200 feet above sea level. The U.S. range of the Pima pineapple cactus is bordered by the Baboquivari Mountains to the west, and the Santa Rita Mountains to the east, and extends from the U.S./Mexico border north to the vicinity of Tucson. Individual plants are often widely scattered in low density across the suitable habitat (US Fish and Wildlife Service 2016c). The proposed action includes some areas of occupied Pima pineapple cactus habitat.

Effects of the Proposed Action

Because the proposed action is to replace existing SBInet towers, CBP conducted a previous consultation with the USFWS covering the original construction of the SBInet towers. This consultation was completed in 2008. Known occurrences of Pima pineapple cacti are based on results from the 2008 preconstruction surveys, disturbance at tower sites and temporary impact areas during initial tower construction in 2008 and 2009, and additional surveys in 2017. There are six towers in this project located in suitable Pima pineapple cactus habitat (TUS-035, TUS-041, TUS- 085, TUS-290, TUS-298 and TUS-299). There are no cacti at these tower sites within the fenced enclosure. Pima pineapple cactus located outside of the fenced enclosure, and within the 100 foot by 100-foot temporary impact area could be damaged or destroyed by construction activities during the project. However, during preconstruction surveys for the Tucson West project in 2008, a protocol survey for Pima pineapple cactus only identified the species within the potential construction disturbance footprint at the TUS-290 tower site. Informal surveys for Pima pineapple cactus performed at these six tower sites on May 25, 2017 located no Pima pineapple cactus.

Because the construction of the replacement towers will occur within the existing footprint of the original towers, no Pima pineapple cacti or habitat is expected to result from the proposed action. In addition, CBP has determined that the occurrence of Pima pineapple cacti within the temporary disturbance areas of the original construction that have germinated subsequent to the original construction is extremely unlikely. Impacts to individual plants outside of the temporary impact zone could result from fugitive dust. Because construction and travel will be within existing footprints of the original construction and because of the proposed conservation measures included in the proposed action, it is expected that dust effects will be minimal.

Conclusion

The Service concurs with your determination that the proposed action may affect, but is not likely to adversely affect the Pima pineapple cactus, based upon the following:

- Because the proposed action will occur within areas disturbed by the original tower construction in 2008 and which continue to be disturbed, there is a very low likelihood that Pima pineapple cacti will be affected by the proposed action. Therefore, effects due to trampling or crushing are discountable.
- Effects on Pima pineapple cacti from fugitive dust would be minimized through the use of BMPs. The numbers of individuals that could be impacted is very small. Therefore, such effects will be insignificant.
- During Section 7 consultation on the Tucson West tower project (Consultation #22410-2008-F-0373), CBP agreed to mitigate for all Pima pineapple cactus habitat loss at towers within suitable habitat through purchase of conservation credits at a USFWS-approved conservation bank. In April 2017, CBP delivered a report to USFWS quantifying the impacts to Pima pineapple cactus during tower construction; and in May 2017, USFWS concurred with the analysis of impacts to Pima pineapple cactus as presented in that report. The construction footprint for the Block 1 Replacement Project at towers within the Pima pineapple cactus range is identical to the construction footprint for the initial tower construction. Therefore, any potential impacts to this species arising from this project have

already been fully mitigated.

Chiricahua Leopard Frog and Critical Habitat

Environmental Baseline

The Chiricahua leopard frog is a leopard frog with a distinctive color pattern of small, raised, cream-colored spots on the thigh against a dark background with relatively rough skin on the back and sides, dorsolateral folds that are interrupted and deflected medially, and often green on the head and back. A distinctive call (a snore of 1 to 2 seconds duration) also separates this species from other leopard frogs (US Fish and Wildlife Service 2017).

The Chiricahua leopard frog was listed as threatened on June 13, 2002 (67 FR 40790). The listing was revised and critical habitat was designated for the species in Arizona and New Mexico on March 20, 2012 (77 FR 16324). The 2012 listing re-states the threats to the Chiricahua leopard frog and its habitat throughout its range that were outlined in the 2007 recovery plan for the species: mining, including mining-related contaminants; other contaminants; dams; diversions; stream channelization; groundwater pumping; woodcutting; urban and agricultural development; road construction; grazing by livestock and elk; climate change; and altered fire regimes (USFWS 2007, 2012). Although these threats are widespread and varied, a threats assessment that was accomplished as part of the recovery plan showed chytridiomycosis and predation by nonnative species as consistently more important threats than these habitat-based factors (USFWS 2007, 2012). The Recovery Plan for the species identifies 8 recovery units in Arizona, New Mexico, and Mexico. Each recovery unit has one or more management areas (MAs) within it where the USFWS believes the potential for successful recovery actions is greatest (USFWS 2007).

The range of the Chiricahua leopard frog includes central and southeastern Arizona; west-central and southwestern New Mexico; and in Mexico, northeastern Sonora, the Sierra Madre Occidental of northwestern and west-central Chihuahua, and possibly as far south as northern Durango (USFWS 2007, 2012).Within its geographical range, the Chiricahua leopard frog historically inhabited a variety of aquatic habitats including montane and river valley cienegas, springs, pools, tanks, lakes, reservoirs, streams, and rivers. It is a habitat generalist that historically, but is now limited to the comparatively few aquatic systems that support few or no non-native predators (e.g. American bullfrogs, fishes, and crayfishes) including livestock tanks and some streams. The species also requires permanent or semi-permanent pools for breeding, water characterized by low levels of contaminants and moderate pH, and may be excluded or exhibit periodic die-offs where a pathogenic chytridiomycete fungus is present.

The project area falls within Recovery Unit 1 for the Chiricahua leopard frog, and includes portions of two of the three MAs identified in the recovery plan for this recovery unit: the Buenos Aires Central Tanks MA and Pajarito Wilderness MA. There are also other occupied sites within project area that fall within Recovery Unit 1 but are east of the Buenos Aires Central Tanks MA and north of the Pajarito Wilderness MA.

The Buenos Aires Central Tanks MA continues to support one of the strongest metapopulations known within the range of the species due to the removal of bullfrogs from Buenos Aires National Wildlife

Refuge (BANWR) (USFWS 2011, C. Crawford, pers. comm. 2017). The number of breeding sites in this metapopulation has ranged from 4 to 8 annually since 2011, although the number of breeding sites on BANWR itself has decreased during this time period (C. Crawford, pers. comm. 2017). Chango Tank is one of the seven sites in the MA where breeding was detected in 2016. Garcia Tank at the southern U.S. end of the MA is considered an isolated population and not part of a metapopulation (USFWS 2012). Breeding has not been verified at Garcia Tank since the mid-2000s but frogs were last seen at this site in 2015 (C. Crawford, pers. comm. 2017). There are also 17 lentic sites on BANWR that do not hold water year round but have had records of Chiricahua leopard frogs during the monsoon season when they hold water (C. Crawford, pers. comm. 2017).

The Pajarito Wilderness MA includes two metapopulations of Chiricahua leopard frogs, one of which is in the project vicinity. Bullfrog eradication efforts have occurred and continue to be monitored throughout this MA. The number of breeding sites in the Bonita, Upper Turner, and Mojonera metapopulation in the MA has ranged from 2 to 3 annually since 2011 (C. Crawford, pers. comm. 2017). In 2016 and 2017, Chiricahua leopard frogs were discovered in 4 lentic sites at the northern end of the MA and an additional 3 lentic sites to the north of the MA that likely dispersed from known breeding sites of this metapopulation or from the Buenos Aires Central Tanks metapopulation described in the previous paragraph (C. Crawford, pers. comm. 2017).

Chiricahua leopard frogs routinely disperse during the monsoon season, and are known to move up to one mile overland, 3 miles along intermittent stream channels, and 5 miles along perennial streams from breeding sites they occupy (USFWS 2012). Recent studies of Chiricahua leopard frogs revealed that these frogs will move further than previously thought based on the 1-3-5 rule described above. For instance, Hinderer et al. (2017) found that radio-telemetered adult frogs moved an average of 97 m a day and up to 1,658 m in a day with a maximum total movement of a frog measured at 9,888 m over 36 days. Such movements are likely aided by permanent or ephemeral waters that serve as stepping stones within the landscape.

The primary constituent elements of the physical or biological features essential to the conservation of the Chiricahua leopard frog included in designated critical habitat for the species (US Fish and Wildlife Service 2012) are:

(i) Aquatic breeding habitat and immediately adjacent uplands exhibiting the following characteristics:

(A) Standing bodies of fresh water (with salinities less than 5 parts per thousand, pH greater than or equal to 5.6, and pollutants absent or minimally present), including natural and manmade (e.g., stock) ponds, slow-moving streams or pools within streams, off-channel pools, and other ephemeral or permanent water bodies that typically hold water or rarely dry for more than a month. During periods of drought, or less than average rainfall, these breeding sites may not hold water long enough for individuals to complete metamorphosis, but they would still be considered essential breeding habitat in non-drought years.

(B) Emergent and or submerged vegetation, root masses, undercut banks, fractured rock substrates, or some combination thereof, but emergent vegetation does not completely cover the surface of water bodies.

(C) Nonnative predators (e.g., crayfish (Orconectes virilis), bullfrogs (Lithobates catesbeianus), nonnative predatory fish) absent or occurring at levels that do not preclude presence of the Chiricahua leopard frog.

(D) Absence of chytridiomycosis, or if present, then environmental, physiological, and genetic conditions are such that allow persistence of Chiricahua leopard frogs.

(E) Upland habitats that provide opportunities for foraging and basking that are immediately adjacent to or surrounding breeding aquatic and riparian habitat.

(ii) Dispersal and nonbreeding habitat, consisting of areas with ephemeral (present for only a short time), intermittent, or perennial water that are generally not suitable for breeding, and associated upland or riparian habitat that provides corridors (overland movement or along wetted drainages) for frogs among breeding sites in a metapopulation with the following characteristics:

(A) Are not more than 1.0 mile (1.6 kilometers) overland, 3.0 miles (4.8 kilometers) along ephemeral or intermittent drainages, 5.0 miles (8.0 kilometers) along perennial drainages, or some combination thereof not to exceed 5.0 miles (8.0 kilometers).

(B) In overland and non-wetted corridors, provide some vegetation cover or structural features (e.g., boulders, rocks, organic debris such as downed trees or logs, small mammal burrows, or leaf litter) for shelter, forage, and protection from predators; in wetted corridors, provide some ephemeral, intermittent, or perennial aquatic habitat.

(C) Are free of barriers that block movement by Chiricahua leopard frogs, including, but not limited to: urban, industrial, or agricultural development; reservoirs that are 50 acres (20 hectares) or more in size and contain predatory nonnative fish, bullfrogs, or crayfish; highways that do not include frog fencing and culverts; and walls, major dams, or other structures that physically block movement.

Two critical habitat units within Recovery Unit 1 are located in the project vicinity (see Figure 3). These critical habitat units are: Garcia Tank and Buenos Aires National Wildlife Refuge Central Tanks. Together, these two units comprise 1,721 acres or 16 percent of the designated critical habitat. The Garcia Tank critical habitat unit is within the action area. The portions the Buenos Aires National Wildlife Refuge Central Tanks critical habitat unit within the action area include Chango Tank (PCE1) and Las Moras Wash (PCE2).

Chiricahua leopard frogs are found in other sites within the project area outside of critical habitat. CBP has included a number of conservation measures and BMPs to address potential effects to Chiricahua leopard frogs and designated critical habitat in all areas of the proposed action.

Effects of the Proposed Action

The most likely direct impact to Chiricahua leopard frog would be injury or death from construction vehicle traffic along access roads and at tower sites during the monsoon season (July 1 to October 1) when juvenile and adult Chiricahua leopard frogs move out of perennial lentic sites to adjacent terrestrial habitat or disperse to other perennial or intermittent sites. Two of the nine tower sites and four roads

which will be used for access to tower sites during tower construction activities are located within one mile overland from known occupied sites or they cross intermittent drainages within three miles of occupied sites that are likely used for dispersal by Chiricahua leopard frogs (Cat Crawford, USFWS, personal communication, September 25, 2017). The two tower sites are Tower TCA-TUS-032 and TCA-TUS-299 and the four roads are: (1) Highway 286 from the intersection with Highway 289(Arivaca-Sasabe Road) and south for a distance of 8.5 miles, (2) Highway 289 from the junction with Highway 286 and east for a distance of 2.4 miles to the far side of Puertocito Wash, (3)Tres Boleros Road within one mile overland distance of Garcia Tank, and (4) Tres Bellotas Road beginning north of TCA-TUS-036 and continuing in a northeast direction to its intersection with Arivaca Road. CBP will implement conservation measures or BMPS as outlined in the proposed action above, that will effectively address the potential effect of injury or death from construction vehicle traffic.

Transmission of disease vectors and invasive non-native aquatic species can occur if vehicles cross infected or infested streams or other waters and water or mud remains on the vehicle. If these vehicles subsequently cross or enter uninfected or non-infested waters, the disease or invasive species may be introduced to the new area. Because chytridomycosis is known to occur in Chiricahua leopard frog populations in Recovery Unit 1, necessary precautions will be taken to minimize the likelihood of spreading the disease such as avoiding contact with wetted areas. However, if vehicles or other equipment use will occur in wetted areas (including ponds, impoundments, or ephemeral or permanent streams) that equipment will be a) cleaned of mud and debris and then sprayed with a 10% bleach, 70% ethanol, or 1% quaternary ammonium solution, or b) allowed to dry completely, before moving to another wetted area (see Appendix G of the Chiricahua Leopard Frog Recovery Plan for protocols) (USFWS 2007). Treatments as just described, will not be required for travel along paved routes or portions of Ruby Road that are in the action area, as these routes are heavily traveled by the public and cleaning/sterilization of project vehicles will do little to prevent movement of disease via vehicular travel.

There are two Chiricahua leopard frog critical habitat units within the action area. Chango Tank, Garcia Tank are designated critical habitat for the species and contain PCE1. Las Moras Wash downstream of Chango Tank is also included in critical habitat and contains PCE2. Las Moras Wash is a paved low water crossing on Highway 286. Chango Tank is less than 400 feet overland from Highway 286 and Garcia Tank is less than 1,600 feet from Tres Boleros Road.

Conclusion

We concur with your determination that the proposed action is not likely to adversely affect the Chiricahua leopard frog, nor designated critical habitat for the following reasons:

- CBP will implement conservation measures and BMPs as described above. These measures will reduce potential effects to the Chiricahua leopard frog to insignificant or discountable levels.
- Both Garcia Tank and Chango Tank are located upstream and uphill from project activities. For this reason, there is no pathway by which Block 1 Replacement Project construction activities could directly impact these tanks, and the project would not result in effects that would diminish the value of primary constituent elements within either of the critical habitat units. There are also

no potential effects from the proposed action to PCE 2 in Las Moras Wash where it crosses Highway 286.

Jaguar and Critical Habitat

Environmental Baseline

The jaguar is a large, heavy-bodied, big-headed cat. Yellowish to tawny, spotted with black rosettes or rings in horizontal rows along the back and sides; most rings are tan inside, with 1 or 2 black spots. Legs, head, and tail have smaller, solid spots, usually giving way to incomplete bands near the end of the tail (US Fish and Wildlife Service 2017).

The jaguar was listed as endangered throughout the species range in March 28, 1972 as a foreign species (37 CFR 6476). On July 27, 1997, the jaguar was listed as an endangered species in the United States (62 FR 39147). On March 5, 2014, the USFWS published a final rule to designate critical habitat for the jaguar in southeast Arizona and southwest New Mexico (79 FR 12571). The critical habitat totals approximately 764,207 acres in six units in Pima, Santa Cruz, and Cochise Counties, Arizona, and Hidalgo County, New Mexico.

Jaguars are known from a variety of vegetation communities in North and South America. Range-wide, jaguars are mostly found in tropical and subtropical zones. In the southwestern United States, the more open, dry habitat has been suggested as being marginal in terms of water, cover, and prey densities, although historically there was a presumably larger and naturally breeding population. Jaguar populations in northwestern Mexico and the southwestern United States occur in arid areas, especially thornscrub, mesquite grassland, Madrean oak woodland, and pineoak woodland communities. Based on 25 historical (from 1902 to 2001) reliable and spatially accurate jaguar sighting records in Arizona, the majority of jaguars were observed in scrub grasslands (56%) and
Madrean evergreen forests (20%), all were within 6.2 miles of a water source, and most occurred in moderately rugged to extremely rugged terrain. Additionally, river valleys and other drainage features likely “provide travel corridors for jaguars, along with higher prey densities, cooler air, and denser vegetation than surrounding habitats”. In the United States–Mexico borderlands, peccaries (javelina [*Tayassu tajacu*]) and deer (white-tailed [*Odocoileus virginianus*] and mule [*O. hemionus*]) are presumably dietary mainstays; range-wide, the list of prey taken by jaguars includes more than 85 species, including numerous species of turtles, birds, fish, and livestock. Other potential prey species in the southwestern United States include white nosed coatis (*Nasua nasua*), skunk (*Mephitis* spp., *Spilogale gracilis*), raccoon (*Procyon lotor*), and jackrabbit (*Lepus* spp.) (USGS 2016).

The southwestern United States lies at the extreme northern limit of the jaguar’s range. An estimated that 21% to 30% of Arizona (23,940–34,200 square miles) is potentially suitable jaguar habitat; however, the species currently occurs on an occasional basis in only a small portion of this area (USGS 2016).

The primary constituent elements of jaguar critical habitat are expansive open spaces in the southwestern United States of at least 38.6 square miles in size that:

1. Provide connectivity to Mexico;
2. Contain adequate levels of native prey species;
3. Include surface water sources available within 12.4 miles of each other;
4. Contain 1% to 50% canopy cover within Madrean evergreen woodland or semidesert grassland vegetation communities;
5. Are characterized by rugged terrain;
6. Are characterized by minimal to no human population density, no major roads, or no stable night time lighting over any 0.4-square-mile area; and
7. Are below 6,562 feet amsl in elevation.

With regard to jaguar critical habitat in the project area, the project is bounded on the west by the Baboquivari Critical Habitat Unit, and on the east by the Atascosa Critical Habitat Unit. There are two towers, TUS-085 and TUS-287, located within approximately 0.5 miles of the Baboquivari Critical Habitat Unit. There are also two towers, TUS-036 and TUS-041, located within approximately 0.5 miles of the Atascosa Critical Habitat Unit. In addition, approximately 4.4 miles of Tres Bellotas Road, which will be used by construction traffic, is located within the Atascosa Critical Habitat Unit. CBP is not constructing any additional roads with the Block 1 Replacement Project.

On December 20, 2016, USFWS released a draft recovery plan for the species. This $605 million recovery plan characterizes jaguar habitat within the US as secondary habitat which is not anticipated to support breeding jaguars. The recovery plan contains a discussion of the value of secondary habitat, in terms of species conservation.

Effects of the Proposed Action

Potential direct impacts on jaguar include the risk of direct injury and mortality from construction vehicles accessing towers, and changes in behavior resulting from noise and other disturbances associated with human presence during tower construction activities. Occurrences of jaguar in the project vicinity are extremely rare. Jaguars have not been located in the project vicinity in a number of years, but a male jaguar recently occupied the Santa Rita Mountains (approximately 25 miles to the northeast of the project area) for an extended period of time. In addition, new jaguars, both males, have been documented within the last year in the Huachuca and Chiricahua mountains. While these new detections are many miles east of the project area, they do provide evidence that habitat connectivity for movement of jaguars into the United States still occurs and that jaguars can occur in any areas of suitable habitat in Arizona, even if they have not been documented there previously. However, due to the rarity of jaguar in the project vicinity, the risk of injury or mortality arising from construction vehicles is unlikely.

Project activities would occur in previously disturbed areas, and would result in no degradation, modification, or habitat fragmentation of undisturbed areas where jaguars potentially occur. The presence of construction crews and equipment, and their associated noise, could cause jaguars to move away from an area or otherwise modify their behavior. Because construction activities would be short term in nature, any displacement or other associated adverse effects would be temporary and minor. As described above, jaguars currently occur at such low densities that the potential for individual jaguars to encounter project activities is extremely unlikely to occur.

There are no Block 1 project towers located within jaguar critical habitat. Construction traffic will use approximately 4.4 miles of existing Tres Bellotas Road to access tower sites. However, because Tres Bellotas and other roads proposed for use during this project are all existing roadways, there is a reduced likelihood that the proposed action will adversely affect the PCEs of jaguar critical habitat.

Conclusion

We have analyzed the effects of the proposed action and concur with the determination that the proposed action may affect, but is not likely to adversely affect jaguars or jaguar critical habitat for the following reasons:

- While jaguars are known to currently occupy areas of southern Arizona, there are no recent records of jaguars in the project vicinity. It is very unlikely that jaguars will be killed or injured by construction traffic associated with the proposed action. Therefore, these effects are discountable.
- All project activities will use existing roadways and stay within the previously disturbed footprint of the tower sites. Therefore, effects to jaguar habitat, including jaguar critical habitat will be insignificant.

Northern Mexican Gartersnake

Environmental Baseline

The northern Mexican gartersnake may occur with other native gartersnake species and can be difficult for people without herpetological expertise to identify. With a maximum known length of 44 inches, it ranges in background color from olive to olive-brown to olive-gray with three stripes that run the length of the body. The middle dorsal stripe is yellow and darkens toward the tail. The pale yellow to light-tan lateral stripes distinguish the Mexican gartersnake from other sympatric (co-occurring) gartersnake species because a portion of the lateral stripe is found on the fourth scale row, while it is confined to lower scale rows for other species. Throughout its range wide distribution, the northern Mexican gartersnake occurs at elevations from 130 to 8,497 feet (Rossman et al.1996, p. 172). The northern Mexican gartersnake is considered a riparian obligate (restricted to riparian areas when not engaged in dispersal behavior) (US Fish and Wildlife Service 2017).

On July 8, 2014, the USFWS issued a final rule listing the northern Mexican gartersnake as threatened throughout the species range (79 FR 38677). On July 10, 2013, critical habitat was proposed for 421,423 acres in Arizona and New Mexico (78 FR 41549).

The northern Mexican gartersnake generally occurs at elevations ranging from 3,000 to 5,000 feet within Arizona and New Mexico. Important components of northern Mexican gartersnake habitat include a stable supply of native prey, and dense vegetation when co-occurring with harmful non-native species. The northern Mexican gartersnake occurs chiefly in the following general habitat types: 1) source-area wetlands (e.g., cienegas), or stock tanks (small earthen impoundment); 2) large river riparian woodlands and forests; and 3) streamside gallery forests (as defined by well-developed broadleaf deciduous riparian

forests with limited, if any, herbaceous ground cover or dense grass) (US Fish and Wildlife Service 2017).

This species occurs in central, western, and southeastern Arizona and extreme southwestern New Mexico. Within Arizona, the most-viable populations occur in the middle and upper Verde River drainage (including Bubbling Ponds State Fish Hatchery along Oak Creek), lower Tonto Creek, the Bill Williams watershed, and within the San Rafael Valley.
Since 1970, there have only been two records of the species in the Action Area vicinity, the most recent being in 2001. However, surveys for northern Mexican gartersnakes have not occurred in this area since approximately the year 2000. The status of the population within the Action Area vicinity remains largely undetermined at this time (Jeff Servoss, USFWS, personal communication, September 29, 2017). If the species persists in the Action Area, it most likely occurs at a very low density and is most-closely associated with the Arivaca Cienega, in the location of a 2001 record.

The primary constituent elements of critical habitat for this species (US Fish and Wildlife Service 2013b) consist of the following:

1. Aquatic or riparian habitat that includes:

   a. Perennial or spatially intermittent streams of low to moderate gradient that possess appropriate amounts of in- channel pools, off-channel pools, or backwater habitat, and that possess a natural, unregulated flow regime that allows for periodic flooding or, if flows are modified or regulated, a flow regime that allows for adequate river functions, such as flows capable of processing sediment loads; or

   b. Lentic wetlands such as livestock tanks, springs, and cienegas; and

   c. Shoreline habitat with adequate organic and inorganic structural complexity to allow for thermoregulation, gestation, shelter, protection from predators, and foraging opportunities (e.g., boulders, rocks, organic debris such as downed trees or logs, debris jams, small mammal burrows, or leaf litter); and

   d. Aquatic habitat with characteristics that support a native amphibian prey base, such as salinities less than 5 parts per thousand, pH greater than or equal to 5.6, and pollutants absent or minimally present at levels that do not affect survival of any age class of the northern Mexican gartersnake or the maintenance of prey populations.

2. Adequate terrestrial space (600 feet [183 meters] lateral extent to either side of bankfull stage) adjacent to designated stream systems with sufficient structural characteristics to support life history functions such as gestation, immigration, emigration, and brumation (extended inactivity).

3. A prey base consisting of viable populations of native amphibian and native fish species.

4. An absence of nonnative fish species of the families Centrarchidae and Ictaluridae, bullfrogs, and/or

crayfish, or occurrence of these nonnative species at low enough levels such that recruitment of northern Mexican gartersnakes and maintenance of viable native fish or soft-rayed, nonnative fish populations (prey) is still occurring.

The only proposed critical habitat unit in the Action Area vicinity is Buenos Aires National Wildlife Refuge (see Figure 4). The entire 117,335-acre refuge has been proposed as critical habitat for the species (US Fish and Wildlife Service 2013b). There are 5 towers located within this critical habitat unit.

Effects of the Proposed Action

Northern Mexican gartersnakes are generally active from March through October in southern Arizona, although they may be active any day of the year when the daily low temperature is above freezing. The species may be active in upland areas (typically within about 600 feet of ephemeral or perennial water sources), but up to one mile or more from a given water body or in and along drainages and depressions during the monsoon season (Jeff Servoss, US Fish and Wildlife Service, personal communication, September 29, 2017). The Block 1 Replacement Project does not involve any actions within 600 feet of perennial water sources. Therefore, any potential direct effects to the species are likely confined to dispersal periods. The most likely direct effect to the species during dispersal periods would be injury or death from construction vehicle traffic along access roads and at tower sites.

The primary constituent elements for northern Mexican gartersnake critical habitat include: aquatic habitat, adequate terrestrial space adjacent to the aquatic habitat to support critical life history functions, an adequate prey base and an absence of invasive species. The Block 1 Replacement Project construction activities are located at least 0.25 miles from any of these primary constituent elements. The construction activities are confined to existing roads and previously disturbed sites. For these reasons, the Block 1 project is unlikely to have any significant effects on primary constituent elements for northern Mexican gartersnake proposed critical habitat.

Conclusion

We have analyzed the effects of the proposed action and concur with your determination that the proposed action may affect, but is not likely to adversely affect, the threatened northern Mexican gartersnake for the following reasons:

- The northern Mexican gartersnake occurs in the action area in very low densities. Potential effects to the gartersnake from road fatalities are discountable.
- CBP will implement conservation measures and BMPs as outlined above. This will reduce other potential effects to an insignificant level.

Yellow-Billed Cuckoo

Environmental Baseline

Yellow-billed cuckoos (or cuckoos) are fairly large, long, and slim birds. The mostly yellow bill is almost

as long as the head, thick and slightly down-curved. Wings appear pointed and swept back in flight. Yellow-billed cuckoos are warm brown above and clean whitish below. Their blackish face mask is accompanied by a yellow eye ring. In flight, the outer part of the wings flash rufous. From below, the tail has wide white bands and narrower black ones.

A western Distinct Population Segment (DPS) of the yellow-billed cuckoo was designated as threatened on October 3, 2014 (USFWS 2013c, 2014c; 78 FR 61622, 79 FR 59992). On August 15, 2014 (79 FR 48547) USFWS proposed 546,335 acres of critical habitat in Arizona, California, Colorado, Idaho, New Mexico, Nevada, Texas, Utah and Wyoming (USFWS 2014b; 79 FR 48548). Following publication of the draft proposed critical habitat rule, cuckoos have been found in previously unknown locations and habitats in Arizona. The largest remaining breeding areas are in southern and central California, Arizona, along the Rio Grande in New Mexico, and in northwestern Mexico (USFWS 2014c; 79 FR 59992).
In Arizona, the species was a common resident in the (chiefly lower) Sonoran zones of southern, central, and western Arizona (Phillips et al. 1964). The yellow-billed cuckoo now nests primarily in the central and southern parts of the state, as well as at revegetation sites along the lower Colorado River (Corman and Magill 2000, McFarland and Horst 2015, 2017; USFWS 2013c, 2014b, 2014c, McNeil et al. 2013).

The western yellow-billed cuckoo breeds in riparian (hydro- and xero- riparian) woodlands, and in Madrean evergreen woodland drainages and mesquite woodlands of arid areas. Habitat conditions are typically cooler and more humid than in the surrounding environment (USFWS 2014b,c). The vegetation making up the breeding habitat of the western yellow-billed cuckoo varies across the species' range and includes native and nonnative -riparian and upland nonriparian species including cottonwood (*Populus* spp.), willow (*Salix* spp.), mesquite (*Prosopis* spp.), box elder (*Acer negundo*), sycamore (*Platanus* spp.), ash (*Fraxinus* ssp.), walnut (*Juglans* spp.), alder (*Alnus* spp.), hackberry (*Celtis spp.*), soapberry (*Sapindus saponaria*), oak (*Quercus* spp.), acacia (*Acacia* spp.), desert willow (*Chilopsis linearis*), elderberry (*Sambuccus mexicanus*), juniper (*Juniperus* spp.), pine (*Pinus* spp.), Russian olive (*Elaeagnus angustifolia*), and tamarisk (*Tamarix* spp.) (Gaines 1974, pp. 7–9; Gaines and Laymon 1984, pp. 59–66; Laymon and Halterman 1989, pp. 274–275; Laymon 1980; Corman and Magill 2000; Dettling and Howell 2011, p. 28; MacFarland and Horst 2015).

In most of the DPS, the western yellow-billed cuckoo primarily breeds in large riparian woodlands dominated by willow and cottonwood along low-gradient rivers and streams, and in open riverine valleys that provide wide floodplain conditions (USFWS 2014a,b). In the Southwest, however, cuckoos can also breed in higher gradient drainages, and narrower and drier reaches of riparian habitat (Corman and Magill 2000;WestLand Resources; Inc. 2013a, 2013b, 2013c, 2015a, 2015b, 2015c; Arizona Game and Fish Department 2016; MacFarland and Horst 2015, 2017; Tucson Audubon 2015; Cornell Lab of Ornithology 2017). Large expanses of gallery riparian woodland habitat supports greater densities of cuckoos than less dense reaches of scattered riparian trees or more xero-riparian woodlands. However, these less dense reaches of scattered riparian trees and more xero-riparian woodlands are also important to yellow-billed cuckoos as nesting substrate, foraging habitat, and as a buffer between more hydric sites and the adjacent, xeric uplands (USFWS 2014b, 2014c; Griffin 2015; Groschupf 2015; McFarland and Horst 2015, 2017).
To distinguish between the western yellow-billed cuckoo breeding habitat in riparian areas throughout the range and breeding habitat found in more arid areas of the Southwest, we use the terms "Rangewide" and "Southwestern" breeding habitat, respectively. We describe both the Rangewide and Southwestern breeding habitat below:

Southwestern breeding habitat

Southwestern breeding habitat is located in the Southwestern United States (particularly in Arizona) and is comprised of riparian woodlands, mesquite woodlands, or Madrean evergreen woodlands with a variable overstory canopy and understory component within drainages at least 200 ac (81 ha) in size. In addition to cottonwood, willow, and mesquite, occupied riparian habitat in Arizona may also contain a greater proportion of xero-riparian species than in the rest of the DPS. Oak, hackberry, sycamore, walnut, ash, acacia, tamarisk, and juniper are among the most common xero-riparian species in Southwestern breeding habitat (Corman and Magill 2000, Corman and Wise-Gervais 2005, USFWS unpubl. data). Tamarisk may be a component of breeding habitat, but there is usually a native riparian tree component within the occupied habitat (Gaines and Laymon 1984, Johnson et al. 2008, McNeil et al. 2013, Sechrist et al. 2013, Carstensen et al. 2015). Habitat patches in the arid Southwest contain a greater proportion of xero-riparian and nonriparian tree species than elsewhere in the DPS. Habitat patches are often interspersed with large openings and include narrow stands of trees, small groves of trees, or sparsely scattered trees. As such, the canopy closure is variable, and where trees are sparsely scattered, canopy closure may be dense only at the nest tree. Southwestern breeding habitat types are as follows:

- Riparian woodland is more water-limited, contains a greater proportion of xero-riparian species, and is often narrower, patchier, and sparser than where water is more abundant. This more arid riparian woodland occurs in perennial and intermittent drainages and floodplains throughout the Southwest.
- Mesquite-dominated woodland habitat occurs in floodplains, adjacent terraces, and adjacent uplands in perennial, intermittent, and ephemeral drainages throughout the Southwest.

- Madrean evergreen woodland (usually oak-dominated) habitat occurs in intermittent and ephemeral drainages and adjacent hillsides in the foothills and mountains of southeastern Arizona, up to 7000 ft in elevation. The amount of oak varies and may be interspersed with mesquite and other species in Madrean evergreen woodland.

In addition to the dense nesting grove or tree, often referred to as the core area, western yellow-billed cuckoos need adequate foraging areas near the nest. Foraging areas can be less dense or patchy with lower levels of canopy cover and may be a mix of shrubs, ground cover, and scattered trees (Sechrist et al. 2009, 2013; Carstensen et al. 2015; Griffin 2015; USFWS, unpubl. data). Cuckoos often forage in open areas, woodlands, orchards, and adjacent streams (Hughes 1999), which include stands of smaller mesquite trees and even tamarisk (Rosenberg et al. 1991). In Arizona, adjacent habitat is usually more arid than occupied nesting habitat. This adjacent habitat can be used for foraging where large insects are produced.

Proposed Critical Habitat. There is one unit of proposed yellow-billed cuckoo critical habitat within the Action Area. This critical habitat unit is AZ-23, the Arivaca Wash/San Luis Wash Unit. This 5,765-acre

proposed critical habitat unit is made up of two washes that join to form a 17-mi long continuous segment that is comprised of 9 mi of Arivaca Wash and 8 mi of San Luis Wash. Approximately 1,014 ac, or 18 percent, of proposed unit AZ–23 are privately owned; 89 ac, or 2 percent, are in State ownership and managed by the Arizona State Lands Department; and 4,662 ac, or 81 percent, are in Federal ownership located on the Buenos Aires NWR managed by the U.S. Fish and Wildlife Service. This unit represents about one percent of the 546,335 acres of critical habitat which has been proposed for this species (US Fish and Wildlife Service 2014c).

Towers TCA-TUS-035 and TCA-TUS-290. Within the Arivaca Wash/San Luis Wash proposed critical habitat unit, numerous western yellow-billed cuckoo detections, including pairs, from previous years have been documented by Corman and Magill (2000, pp. 42, 43, 47), Griffin (2015, p. 22), and Cornell Lab of Ornithology (2017, eBird data).
Towers TCA-TUS-035 and TCA-TUS-290 are near occupied cuckoo habitat. Towers TCA-TUS-035 and TCA-TUS-290 are within approximately 0.75 miles from the eastern border of the proposed Arivaca Wash/San Luis Wash Critical Habitat Unit. Tower TCA-TUS-035 is also immediately adjacent to an unnamed drainage bordered by large dense mesquite. This ephemeral drainage flows into Arivaca Wash and may be suitable cuckoo breeding habitat. Habitat surrounding TCA-TUS-290 consists of short stature mesquite and ocotillo. Cuckoos may be foraging in the habitat adjacent to these towers. Within the proposed Arivaca Wash/San Luis Wash Critical Habitat Unit, nine western yellow-billed cuckoo use areas at three sites were identified in the 4.1 km (2.5 mi) surveyed in 2015, including eight pairs (Griffin 2015, p. 22). Breeding was confirmed at all three sites in 2015; Arivaca Cienega, Arivaca Creek–Honnas Pond, and Arivaca Creek (Griffin 2015, p. 19, 22).

Griffin (2015, p. 19) detected most western yellow-billed cuckoos in cottonwood and willow riparian forest and woodland vegetation, but sometimes with ash, hackberry, mesquite and a dense shrub understory. Despite the fact that the riparian vegetation changes from more mesic communities upstream to more xeric communities downstream, western yellow-billed cuckoos likely breed along the entire length of Arivaca Creek. Use areas seemed to include more upland woodland of mesquite than riparian forest vegetation. The three western yellow- billed cuckoo use areas within the Arivaca Cienega site differed in vegetative composition and structure (Griffin 2015, p. 23) and included: (1) a large, low-statured mesquite woodland or “bosque” that included open areas of native grassland and cienega marsh, and a patch of mature cottonwood-willow forest; (2) patches of mature Goodding’s willow, velvet ash, and hackberry-mesquite; and (3) a large patch of cottonwood-willow riparian forest with minor upland woodland components of mesquite, hackberry, and open areas. Other sites within the unit (Arivaca Creek–Honnas Pond, Arivaca Creek) had similar habitat and western yellow-billed cuckoo use.

Tower TCA-TUS-41. Cuckoos have been found during the breeding season along Arivaca Lake and tributaries, with suitable breeding habitat within 0.5 miles of TCA-TUS-41. Sparsely scattered mesquite surround this tower on an elevated site next to a paved and well-used road. The nearest cuckoo detections reported were approximately 0.7, 0.9, and 1.3 miles respectively from TCA-TUS-41 (Cornell Lab of Ornithology 2017). Tucson Audubon detected seven occupied territories with repeated detections, including three pairs, where they surveyed the tributaries and lake in 2015 (MacFarland and Horst 2015, pp. 17–18). The seven territories documented is an underestimate, as only a small portion of suitable habitat was surveyed. Western yellow-billed cuckoos were detected at the lake on every visit during 2015 and habitat surrounding the lake and side canyons is considered highly suitable 2015. Additional records

exist from previous years (Cornell Lab of Ornithology 2017). Habitat is composed of riparian and Madrean evergreen woodland. The overstory vegetation is composed of primarily mesquite, with willow, cottonwood, ash, hackberry, and oak (MacFarland and Horst 2015, p.121).

Cuckoo Detections along Tres Boleros Road and Tres Bellotas Road. Cuckoos have been detected from tower TCA-TUS-287 to TCA-TUS-299 and from TCA-TUS 298 on Tres Boleros Road and on Tres Bellotas Road to TCA-TUS-036 during the breeding season (Cornell Lab of Ornithology 2017). Four detections records exist along Fresnal Wash along the Tres Boleros Road (Cornell Lab of Ornithology 2017). Although the drainages that cross the Tres Boleros and Tres Bellotas Road have not been surveyed, they contain suitable cuckoo habitat.

Tower TCA-TUS-287. Foraging habitat consisting primarily of mesquite appears to be suitable surrounding tower TCA-TUS-287, only 0.2 mile from La Osa Wash. La Osa Wash contains large riparian trees, but no surveys have been conducted.

Tower TCA-TUS-299. This tower is near suitable breeding and foraging habitat. Washes with large riparian trees are within 0.25 miles of this tower. Large mesquite, wolfberry, and hackberry trees occupy these washes.

Towers TCA-TUS-298 and TCA-TUS-036. Tres Bellotas Road meanders within and adjacent to Fresnal Wash, with suitable cuckoo habitat and flowing water inthe drainage. Large ash, willow, mesquite, hackberry, wolfberry, acacia, and walnut trees border the drainage between towers TCA-TUS-0298 and TCA-TUS-036. On October 23, 2017 water was flowing in the wash in reaches where the wash becomes the road and where the wash crosses the road. A manmade pond surrounded by riparian trees within 0.25 miles of tower TCA-TUS-036 may also support breeding cuckoos. Towers TCA-TUS-298 and TCA-TUS-036 are far enough away from suitable breeding habitat in Fresnal Wash that construction is not likely to adversely affect cuckoos at these tower sites, as long as construction traffic avoids the Tres Bellotas Road between these towers from June 1 to September 30. Both of these towers are on elevated sites surrounded by sparse mesquite and oak trees; this habitat may be used as foraging habitat but construction activities are not likely to adversely affect cuckoos. Fresnal Wash has not been surveyed between these two towers and is not visited very often by birders due to its remote location and proximity to the border. However, some cuckoo information does exist for this area. Cuckoo were detected on August 26, 2000 and July 8, 2001 during the breeding season (Cornell Lab of Ornithology 2017). Based on past detections, presence of water, and suitable riparian habitat, Fresnal Wash is considered to be occupied cuckoo breeding habitat.

Western yellow-billed cuckoos have been detected incidentally by birders and refuge staff in suitable breeding habitat in mesquite woodland and Madrean evergreen woodland, sometimes far from mesic drainages, in other parts of the refuge (Griffin 2015, pp. 25, 28; Cornell Lab of Ornithology 2017 (eBird data)).

Effects of the Proposed Action

Yellow-billed cuckoo are reported within Buenos Aires National Wildlife Refuge and the adjacent Coronado National Forest, with recent breeding behavior and nests confirmed (Corman and Magill 2000;

Griffin 2015; MacFarland and Horst 2015, 2017; Cornell Lab of Ornithology 2017). In recent years, cuckoos have been located near the following towers or associated roads: TCA-TUS-035, TCA-TUS-036, TCA-TUS-041, TCA-TUS 290, TCA-TUS 298, and TCA-TUS 299 during the breeding season from June 1 to September 30. In addition, suitable habitat exists near tower TCA-TUS 287.

It is possible that cuckoos could be exposed to noise from Block 1 Replacement Project construction activities. Noise will be generated by both vehicles accessing tower sites and by construction activities at tower sites. Available research indicates that medium and heavy trucks, such as cranes and cement trucks, will generate noise levels in the range of 80 to 85 dBA at speeds less than 35 miles per hour on tower access routes (Minister of Public Works and Government Services, Canada 2001).

As stated in the Section 2.0 of the biological assessment, an estimated 25 to 30 trips by medium to heavy trucks will be required to each tower site. Trips by these medium to heavy trucks will be scattered over the 40 to 60-day construction window at each tower site. The balance of trips along the access roads will be via pick-up truck, which has a noise footprint similar to a majority of the vehicles currently operating in the project vicinity. Cuckoos along these access routes could be exposed to elevated noise levels associated with these medium to heavy trucks for a duration of 30 seconds to 1 minute during each trip to a tower. Therefore, the total exposure of any cuckoos to elevated noise levels along access roads during construction at a tower is estimated to be 30 to 60 minutes. At the tower sites, the medium to heavy vehicles would be in operation for durations ranging from an hour, in the case of delivery of a load of concrete, to several days in the case of tower foundation excavation. Noise levels from operation of these medium to heavy vehicles would be similar to noise levels along access routes. Federal Highway Administration (2006) estimates noise generated by cement trucks at 79 dBA at a distance of 50 feet, and 81 dBA for cranes and excavators at a distance of 50 feet. Operation of these vehicles at tower sites would be scattered over the construction duration. Any cuckoos in the immediate vicinity of towers could be subject to up to several days of elevated noise levels during tower construction. Industrial Noise Control (2017) indicates that 70 decibels is used as a general base of comparison. This level is considered the baseline of normal, everyday activity such as a passenger car driving by or TV/radio music or a vacuum cleaner. Eighty decibels is two times as loud as 70 decibels and 90 decibels is four times as loud as 70 decibels.

The noise generated during the life of the project could result in short term noise exposure to cuckoos along the access roads or in the immediate vicinity of towers. The most commonly recorded response of birds to noise or other human disturbance is flushing. However, researchers have also reported no flushing response from Mexican spotted owls and bald eagles exposed to noise levels twice as loud (92 dBA) as noise levels predicted from the proposed action (Delaney et al. 1999 and Brown et al.1999). Significantly, even when flushing has occurred, researchers have reported no change in either reproductive success or number of young fledged in birds exposed to short term noise events (Delaney et al. 1999 and Delaney et al. 2002). Other authors have reported that exposure to short term noise events does not lead to chronic physiological stress in birds (Bisson et al. 2009 and Tempel 2003). In another study, researchers reported that infrequent and unpredictable vehicle operations in the immediate vicinity of nests was not correlated with the number of young fledged (Hayden et al. 2002).

Towers TCA-TUS-035 and TCA-TUS-290. These two towers are located near proposed yellow-billed cuckoo critical habitat and approximately 2 miles of roads partially located within the proposed yellow-

billed cuckoo critical habitat unit AZ31. Both towers are on elevated locations outside the riparian corridor. Tower TCA-TUS-035 is immediately adjacent to a drainage bordered by large dense mesquite and breeding cuckoos may be affected by construction activity during the breeding season. Construction activity during the breeding season (June 1 through September 30) will be avoided at tower TCA-TUS-035. Tower TCA-TUS-290 is on a hill on the opposite side of a well-used paved road from Aravaipa Creek. This tower is elevated and far enough away from breeding habitat so that construction activity at the tower will likely not adversely affect breeding and foraging cuckoos. However, the access road starts near occupied habitat along Aravaipa Creek and the hundreds of vehicle trips may cause disturbance to breeding and foraging cuckoos.

Tower TCA-TUS-41. Although the nearest cuckoo detections reported were approximately 0.7, 0.9, and 1.3 miles respectively from TCA-TUS-41 (Cornell Lab of Ornithology 2017), this tower is on an elevated site along a paved road that already receives some traffic and construction is not likely to adversely affect cuckoos.

Tower TCA-TUS-287. This tower is only 0.2 mile from La Osa Wash, which contains large riparian trees that may be breeding habitat. Construction activity may adversely affect breeding and foraging cuckoos. Construction activity during the breeding season (June 1 through September 30) will be avoided at this tower.

Tower TCA-TUS-299. This tower is near suitable breeding and foraging habitat and construction activities may advserely affect breeding cuckoos. Construction activities will be avoided during part of the breeding season (July 1 through September 30) and protocol surveys will be conducted from June 1 through June 30 at this tower.

Towers TCA-TUS-298 and TCA-TUS-036. These towers are far enough away from suitable breeding habitat in Fresnal Wash that construction is not likely to affect cuckoos at these tower sites, but the Tres Bellotas Road between these towers is in and adjacent to suitable cuckoo habitat. The hundreds of additional vehicles traveling between these two towers during the breeding season would create additional noise and visual disturbance that would likely adversely affect cuckoos using habitat along the Tres Bellotas Road and in Fresnal Wash. CBP will avoid using Tres Bellotas Road along Fresnal Wash between TCA-TUS-298 and TCA-TUS-036 from June 1 to September 30 to avoid disturbance to cuckoos in suitable habitat.

Conclusion

We have analyzed the effects of the proposed action and concur with your determination that the proposed action may affect, but is not likely to adversely affect, the western yellow-billed cuckoo for the following reasons:

- The tower sites where construction of replacement towers will generally occur are in areas of raised topography and not within drainages where western yellow-billed cuckoos typically breed. In addition, although cuckoo upland foraging habitat is adjacent to some tower sites, the tower site footprints do not contain upland foraging habitat. In addition, as discussed above, CBP has proposed conservation measures and best management practices to avoid or reduce disturbance

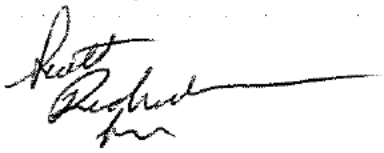
effects to cuckoos in suitable breeding habitat and adjacent foraging habitat within 0.25 miles of the tower sites. Therefore, effects to yellow billed cuckoos from disturbance associated with tower construction will be insignificant.

- A number of roadways proposed for use during this project do occur along drainages or in other areas that support suitable western yellow-billed cuckoo habitat. CBP has proposed conservation measures and BMPs to avoid and minimize disturbance of cuckoos in these areas. Therefore, these effects will be insignificant.

Thank you for your continued coordination related to this consultation. No further section 7 consultation is required for this project at this time. Should project plans change, or if additional information on the distribution or abundance of listed species or critical habitat becomes available, this determination may need to be reconsidered. Additionally, we encourage you to coordinate the review of this project with the Arizona Fish and Game Department and the appropriate land management agencies and private landowners.

For further information please contact Scott Richardson (520) 670-6150(x242). Please refer to the consultation number, 02EAAZ00-2018-I-0091 in future correspondence concerning this project.

Sincerely,



Steven L. Spangle

Chapter 1. Introduction

This report has been prepared in accordance with Stipulation XII of the *Programmatic Agreement Among U. S. Customs And Border Protection, the Historic Preservation Officers of the States of Arizona, California, New Mexico, and Texas, General Services Administration, U.S. Department of Agriculture, U.S. Department of The Interior, United States Section of the International Boundary and Water Commission, New Mexico State Land Office, California Valley Miwok Tribe, Cocopah Indian Tribe, Delaware Nation, Fort Yuma-Quechan Tribe, Pechanga Band of Luiseno Mission Indians, Rincon Band of Luiseno Mission Indians, Tohono O'odham Nation, Tonkawa Tribe of Oklahoma, Yavapai-Prescott Indian Tribe, and The Advisory Council on Historic Preservation Regarding CBP Undertakings in States Located Along the Southwest Border Of The United States* (Southwest Border Programmatic Agreement). In accordance with Stipulation XII.A, a copy of this report is being provided to all parties except the Advisory Council on Historic Preservation who has requested not to receive the annual report.

A teleconference with all parties to the Southwest Border Programmatic Agreement will be held on a to be determined date and time in April or May to summarize and discuss the work carried out pursuant to the terms of the agreement.

2016 is the second year that the Southwest Border Programmatic Agreement has been in place.

CBP Organizational Changes

In 2016, CBP underwent an agency-wide reorganization. As a result, many CBP offices were renamed and some duties were realigned to improve the agency's operations.

The Southwest Border Programmatic Agreement references the Environmental and Energy Division (EED). This department is now known as the Energy and Environmental Management Division (EEMD). Its historic preservation duties have not changed nor has its oversight role within the agency. CBP does not believe that this change is significant enough to require revisions to the document.

CBP has also named a new Federal Preservation Officer, Mr. Francis Dutch, Director of the Facilities Management and Engineering Division.

Barry M. Goldwater Range (BMGR) Damage to Archeological Sites

Though the Southwest Border Programmatic Agreement does not apply at BMGR, CBP wishes to report on the current status of this situation as we are aware that the New Mexico SHPO is aware of the damage and other federal agencies in the region may be aware of it as well.

On January 3, 2017, CBP was notified by the Advisory Council on Historic Preservation (ACHP) that they were in receipt of a letter from BMGR stating that two eligible archeological

sites had been disturbed by CBP operations. Multiple CBP offices including both Yuma Sector and Tucson Sector of the U.S. Border Patrol worked together to research the issue and determine what had occurred. It was determined that agents in the Wellton Station Area of Responsibility were moving trucks containing mobile technology and disturbed the sites. Yuma Sector has taken the lead on working with BMGR and as of January 18th the following actions have occurred: a meeting between the Yuma Sector Chief and BMGR leadership about the issue and improving communications between CBP and BMGR; a field visit with BMGR Range staff, the Wellton Station Chief, the Yuma Station Public Lands Liaison Agent (PLLA) to the sites to inspect the damage; drafting of a Memorandum of Understanding between BMGR and both sectors regarding information sharing and road designations to prevent such an occurrence from happening again; a meeting led by Yuma Sector's Public Lands Liaison Agent (PLLA) with tribes that have ties to the impacted sites to apologize for the damage caused by CBP; and discussions are occurring about how best to reeducate agents on Environmental issues, including archeological issues, in Wellton Station and both Sectors. CBP has spoken with the ACHP about the actions taken to date and will be sending them a formal letter regarding the situation and our response.

CBP takes this situation seriously and is committed to preventing a reoccurrence in the future.

1.1. 2017 Legislative Changes

CBP has one legislative item to report on this year.

Executive Order 13767: Border Security and Immigration Enforcement Improvements

On January 25, 2017 President Trump signed Executive Order 13767 (EO 13767) focused on border security along the Southern Border. EO 13767 directs CBP to immediately plan, design, and construct a physical wall using the most appropriate materials and technology to effectively achieve complete operational control of the southern border. CBP is currently working on its comprehensive study which must be briefed to the President within 180 days of the order's signing. The comprehensive study is required to address the current state of southern border security; the geophysical and topographical conditions; the availability of both federal and state resource; and provide a strategy to obtain and maintain complete operational control.

EO 13767 also requires that the Department of Homeland Security uses all legally available resources to immediately construct, operate, control, or establish contracts to construct, operate, or control facilities to detain cross border violators at or near the land border with Mexico. The extent of CBP involvement is undetermined at this time, but programs developed in the past several months may be used or expanded. At the end of 2016, CBP developed a temporary housing model that is similar to the base camps used by the Federal Emergency Management Agency. Soft sided housing units and portable sanitation facilities can be installed on paved

areas at existing CBP facilities to provide safe and secure temporary housing until individuals are transferred to another agency.

EO 13767 also directs CBP to hire an additional 5,000 Border Patrol agents. CBP has been updating its Border Patrol facilities across southwest in the last decade and the newer facilities may be able to accommodate the hiring surge. Older facilities may require modifications, additions, or replacement. The nature and extent of this need is undetermined at this time and will likely evolve over time.

Chapter 2. 2016 Implementation of the PA

In 2016, CBP conducted 21,827 Undertakings in the Southwest Border Programmatic Agreement area of potential effects. Fifty-three (53) Undertakings met Stipulation VI of the Southwest Border Programmatic Agreement. 21,734 Undertakings met Stipulation VII of the Southwest Border Programmatic Agreement. One (1) Undertakings resulted in an Adverse Effect determination.

The information is broken down by state below.

2.1. Arizona

In 2016, CBP conducted 10,697 Undertakings in the State of Arizona. Undertakings have consisted primarily of operations activities, facility and Tactical Infrastructure maintenance, technology programs, and lease renewals. A summary of Arizona Undertakings is provided in Appendix A (page 13), including a table with narrative description for non-operations Undertakings.

2.1.1. Use of Stipulation VI

Ten (10) Undertakings met Stipulation VI of the Southwest Border Programmatic Agreement. These Undertakings used a total of 19 different stipulations: VI-A (2); VI.B (9); VI.C (1); VI.D (1); VI.E (1); VI.F (5). A breakdown of each stipulation used by CBP, followed by the number of times is was used, is provided below:

- VI.A
  - VI.A.1- 1
  - VI.A.5- 1
- VI.B
  - VI.B.1- 1
  - VI.B.1(c)- 2
  - VI.B.1(d)- 2
  - VI.B.2- 1
  - VI.B.3- 1
  - VI.B.3(d)- 1
  - VI.B.4- 1
  - VI.B.7- 1
  - VI.B.8- 1
- VI.C
  - VI.C.8- 2
- VI.D
  - VI.D.1- 1

- VI.E
  - VI.E.3- 1
- VI.F
  - VI.F.1- 1
  - VI.F.2- 1
  - VI.F.3- 1
  - VI.F.6- 1
  - VI.F.7- 1

2.1.2. Use of Stipulation VII

CBP had 10,677 Undertakings that met Stipulation VII.A of the Southwest Border Programmatic Agreement and no Undertakings that met Stipulation VII.B.

10,672 Undertakings involved Law Enforcement Activities and Operational Readiness, including the pursuit of cross-border violators and response to credible threats. These pursuits were reported to DOI and USDA. There were no inadvertent discoveries during pursuits.

CBP developed new technologies to locate potential cross-border tunnels in 2016 resulting in five (5) Undertakings that met Stipulation VII.A.2. The technology was designed to be non-invasive and minimize ground disturbance. These investigations were focused on high probability areas in the various areas of interest for each Border Patrol Sector in Arizona. Not all investigations resulted in CBP tunnel remediation projects. In some cases, the technology did not locate tunnels, while in other cases CBP was part of an inter-agency team and other agencies handled the remediation activities.

No activities involved the closure of cross-border tunnels.

2.1.3. Adverse Effects

CBP had no Adverse Effect determinations in the State of Arizona.

2.1.4. Emergency Reviews

CBP had no emergency reviews in the State of Arizona.

2.1.5. Post-Review Discoveries

CBP had no post review discoveries in the State of Arizona.

2.2. California

In 2016, CBP conducted 5,210 Undertakings in the State of California. Undertakings have consisted of operations activities, facility maintenance, technology programs, and lease renewals.

A summary of California Undertakings is provided in Appendix B (page 18), including a table with narrative description for non-operations Undertakings.

2.2.1. Use of Stipulation VI

Eleven (11) Undertakings met Stipulation VI of the Southwest Border Programmatic Agreement. These Undertakings used a total of seven (7) different stipulations: VI.A (1); VI.B (4); VI.C (1); and VI.F (1). A breakdown of each stipulation used by CBP, followed by the number of times is was used, is provided below:

- VI.A
  - VI.A.1- 4
- VI.B
  - VI.B.1(c)- 1
  - VI.B.1(d)- 3
  - VI.B.2- 2
  - VI.B.8- 1
- VI.C
  - VI.C.8- 5
- VI.F
  - VI.F.6- 1

2.2.2. Use of Stipulation VII

CBP had 5,191 Undertakings that met Stipulation VII.A of the Southwest Border Programmatic Agreement and two (2) Undertakings that met Stipulation VII.B.

5,183 Undertakings involved Law Enforcement Activities and Operational Readiness, including the pursuit of cross-border violators and response to credible threats. These pursuits were reported to DOI and USDA. There were no inadvertent discoveries during pursuits.

CBP developed new technologies to locate potential cross-border tunnels in 2016 resulting in eight (8) Undertakings that met Stipulation VII.A.2. The technology was designed to be non-invasive and minimize ground disturbance. These investigations were focused on high probability areas in the various areas of interest for each Border Patrol Sector in California. Not all investigations resulted in CBP tunnel remediation projects. In some cases, the technology did not locate tunnels, while in other cases CBP was part of an inter-agency team and other agencies handled the remediation activities.

Two (2) Undertakings involved the closure of cross-border tunnels under Stipulation VII.B. These tunnels occurred in the vicinity of Calexico and Otay Mesa. Both tunnels were located within areas that had been previously disturbed by construction and were reported to the appropriate consulting parties in accordance with the terms of the Programmatic Agreement.

Monitoring reports were prepared for neither of these closures as CBP was able to establish that previous ground disturbance, other than the creation of the tunnel, had occurred within the APE. There were no inadvertent discoveries or impacts to historic properties from the closure of these tunnels.

2.2.3. Adverse Effects

CBP had no Adverse Effect determinations in the State of California.

2.2.4. Emergency Reviews

CBP had no emergency reviews in the State of California.

2.2.5. Post-Review Discoveries

CBP had no post review discoveries in the State of California.

2.3. New Mexico

In 2016, CBP conducted 2,101 Undertakings in the State of New Mexico. Undertakings have consisted of operations activities, facility and Tactical Infrastructure maintenance, and technology programs. A summary of New Mexico Undertakings is provided in Appendix C (page 23), including a table with narrative description for non-operations Undertakings.

2.3.1. Use of Stipulation VI

Seven (7) Undertakings met Stipulation VI of the Southwest Border Programmatic Agreement. These Undertakings used a total of nine (9) different stipulations: VI.A (1); VI.B (6); VI.C (1); and VI.F (1). A breakdown of each stipulation used by CBP, followed by the number of times is was used, is provided below:

- VI.A
  - VI.A.1- 1
- VI.B
  - VI.B.1- 1
  - VI.B.1(c)- 1
  - VI.B.1(d)- 1
  - VI.B.2- 1
  - VI.B.3- 2
  - VI.B.3(d)- 1
- VI.C
  - VI.C.8- 1
- VI.F
  - VI.F.4- 1

2.3.2. Use of Stipulation VII

CBP had 2,091 Undertakings that met Stipulation VII.A of the Southwest Border Programmatic Agreement and no Undertakings that met Stipulation VII.B.

2,087 Undertakings involved Law Enforcement Activities and Operational Readiness, including the pursuit of cross-border violators and response to credible threats. These pursuits were reported to DOI and USDA. There were no inadvertent discoveries during pursuits.

CBP developed new technologies to locate potential cross-border tunnels in 2016 resulting in four (4) Undertakings that met Stipulation VII.A.2. The technology was designed to be non-invasive and minimize ground disturbance. These investigations were focused on high probability areas in the various areas of interest for each Border Patrol Sector in New Mexico. Not all investigations resulted in CBP tunnel remediation projects. In some cases, the technology did not locate tunnels, while in other cases CBP was part of an inter-agency team and other agencies handled the remediation activities.

No activities involved the closure of cross-border tunnels.

2.3.3. Adverse Effects

CBP had one (1) Adverse Effect determinations in the State of New Mexico. Summary information on each Undertaking is provided below.

- Tactical Infrastructure Maintenance and Repair (TIMR) Project; Hidalgo and Luna Counties; New Mexico SHPO, New Mexico Bureau of Land Management (BLM), and New Mexico State Land Office (NMSLO)- Potential CBP maintenance activities along 51 miles of existing roads located on land managed by the BLM and 27.38 miles of existing roads located on land managed by the NMSLO. While CBP is consulting on the maintenance on approximately 88 miles of existing roads on BLM and NMSLO lands, it is not anticipated that work would occur on all roads, or even the entire length of a given road, in any one year. There are a number of factors that will determine if and when CBP will fund maintenance activities over time, including operational needs and funding availability. CBP expects maintenance to occur on an as needed basis in discrete areas within this road network subject to the availability of funding. Three surveys have identified 55 archeological sites within the Area of Potential Effect (APE), of which 20 are eligible for the National Register of Historic Places (NRHP), 23 are of undetermined eligibility, and 12 are not eligible for the NRHP. CBP has determined that the Undertaking does not meet Stipulation VI.C of the Southwest Border Programmatic Agreement due to the presence of undetermined and National Register eligible historic properties within the APE. The activities have the potential to affect historic properties, and in some cases those affects could be adverse due to their locations. However, the degree of potential effects to these sites varies greatly and cannot be fully determined

until final design decisions are made. In most cases sites will not be impacted or the impacts can be minimized or avoided through modification to project designs and managing project activities to avoid sites. A project-specific programmatic agreement has been proposed and is under development between the parties. It will include standard treatment measures that are appropriate to the potential level of impact and which would be implemented prior to conducting work within 1,000 feet of an eligible site. Consultation began October 2015.

2.3.4. Emergency Reviews

CBP had no emergency reviews in the State of New Mexico.

2.3.5. Post-Review Discoveries

CBP had no post review discoveries in the State of New Mexico.

2.4. Texas

In 2016, CBP conducted 3,821 Undertakings in the State of Texas. Undertakings have consisted of operations activities, facility and Tactical Infrastructure maintenance, technology programs, and lease renewals. A summary of Texas Undertakings is provided in Appendix D (page 26), including a table with narrative description for non-operations Undertakings.

2.4.1. Use of Stipulation VI

Twenty five (25) Undertakings met Stipulation VI of the Southwest Border Programmatic Agreement. These undertakings used a total of 16 different stipulations: VI.A (2); VI.B (8); VI.C (3); VI.D (1); VI.E (1); and VI.F (1). A breakdown of each stipulation used by CBP, followed by the number of times is was used, is provided below:

- VI.A
  - VI.A.1- 7
  - VI.A.4- 5
- VI.B
  - VI.B.1- 2
  - VI.B.1(c)- 1
  - VI.B.1(d)- 3
  - VI.B.2- 3
  - VI.B.3- 3
  - VI.B.3(d)- 2
  - VI.B.4- 1
  - VI.B.7- 3
- VI.C

    - VI.C.1- 5
    - VI.C.2- 5
    - VI.C.8- 10
- VI.D
    - VI.D.1- 3
- VI.E
    - VI.E.3- 1
- VI.F
    - VI.F.4- 2

2.4.2. Use of Stipulation VII

CBP had 3,773 Undertakings that met Stipulation VII.A of the Southwest Border Programmatic Agreement and no Undertakings that met Stipulation VII.B.

3,759 Undertakings involved Law Enforcement Activities and Operational Readiness, including the pursuit of cross-border violators and response to credible threats. These pursuits were reported to DOI and USDA. There were no inadvertent discoveries during pursuits.

CBP developed new technologies to locate potential cross-border tunnels in 2016 resulting in 14 Undertakings that met Stipulation VII.A.2. The technology was designed to be non-invasive and minimize ground disturbance. These investigations were focused on high probability e areas in the various areas of interest for each Border Patrol Sector in Texas. Not all investigations resulted in CBP tunnel remediation projects. In some cases, the technology did not locate tunnels, while in other cases CBP was part of an inter-agency team and other agencies handled the remediation activities.

No activities involved the closure of cross-border tunnels.

2.4.3. Adverse Effects

CBP had no Adverse Effect determinations in the State of Texas.

2.4.4. Emergency Reviews

CBP had no emergency reviews in the State of Texas.

2.4.5. Post-Review Discoveries

CBP had no post review discoveries in the State of Texas.

Chapter 3. Disputes and Objections

There have been no disputes between the consulting parties regarding the Southwest Border Programmatic Agreement.

There have been no objections received by CBP regarding the execution of the Southwest Border Programmatic Agreement.

Chapter 4. Recommendations

There are no proposed amendments or revisions to the Southwest Border Programmatic Agreement.

Appendix A: Arizona Undertaking Details

10,697 Total Undertakings

- 10- PA Used- Stipulation VI
- 10,672- PA Used- Stipulation VII.A.1 (operations not included in summary table below)
- 5- PA Used- Stipulation VII.A.2
- 0- PA Used- Stipulation VII.B
- 8- Consultation Done
- 2- No potential to cause effects per 36 CFR 800.3(a)(1)

CBP Project Title Consultation Information Project Description
AVDL Childs Mountain **Consultation Done** Install, operate, and maintain an aircraft video downlink (AVDL) system on an existing U.S. Customs and Border Patrol (CBP) tower at Childs Mountain in Pima County, Arizona, which includes obtaining a special use permit from Cabeza Prieta National Wildlife Refuge. The Proposed Action will occur at an existing communication tower facility on Childs Mountain in the Cabeza Prieta National Wildlife Refuge, Pima County, Arizona at the following coordinates: 12N 316313.788, 3591507.128 (decimal degrees: 32.445577, -112.954036).
AZ0006 Naco LPOE VACIS Concrete Slab **PA Used- VI.D.1** Removing approx. 2300 sq ft of existing A/C pavement and replacing it with 9" thick 4000 psi concrete over 6" thick ABC over 8" thick compacted subgrade. Also, installing two 4" PVC conduits 24" below grade for future use.
AZ0017 Rio Rico Rail Inspection Facility Lease **No potential to cause effects per 36 CFR 800.3(a)(1)** Lease of free space from Union Pacific for rail inspectors at 863 E. Frontage Rd. (UPRR Milepost 56.8) in Rio Rico, AZ. The 1250 square-foot facility in the Union Pacific Railyard was completed in 2016.
AZ0045/AZ14916 - Tucson Vault Maintenance Contract **PA Used- VI.B.1(c), VI.B.1(d), VI.B.2, VI.B.3(a), VI.B.3(d), VI.B.4, VI.B.7, and VI.B.8** Maintenance and repair of the 2012 facility, building, and mechanical systems.
AZ999AZ2027 TUS-036 LSTAR Deployment **PA Used- VI.C.8** Placement and operation of LSTAR equipment at the existing USBP facility located at TB/Fresnel Integrated Fixed Tower (IFT) (Latitude 31.48465, Longitude -111.37735) located in Pima County, Arizona within Coronado National Forest within the USBP Nogales Station, Tucson Sector Area of Responsibility (AOR). The new platform will not exceed 12' by 12' (length x width), the temporary platform will be a level surface elevated above the existing chain link fencing (approximately 8 ft.). Platforms will leave access to the earth's surface. No vegetation clearing or modification of ground resources is necessary for installation of the LSTAR equipment within the existing USBP complex. The Proposed Action does not include the installation, modification, or construction of any new or existing approach or access road.

CBP Project Title Consultation Information Project Description
AZ999AZ2028 TUS-041 LSTAR Deployment **PA Used- VI.C.8** Placement and operation of LSTAR equipment at the existing USBP facility located at Arivaca Lake Integrated Fixed Tower (IFT) (Latitude 31.525325, Longitude -111.289237) located in Pima County, Arizona on Arizona state lands within the USBP Nogales Station, Tucson Sector Area of Responsibility (AOR). The new platform will not exceed 12' by 12' (length x width), the temporary platform will be a level surface elevated above the existing chain link fencing (approximately 8 ft.). Platforms will leave access to the earth's surface. No vegetation clearing or modification of ground resources is necessary for installation of the LSTAR equipment within the existing USBP complex. The Proposed Action does not include the installation, modification, or construction of any new or existing approach or access road.
CA TEX TCA Tucson Air Branch [AZ0045] Ramp Apron Expansion **Consultation Done** Expand the existing concrete aircraft ramp apron by 13,650.94 square feet (0.31 acre) in a previously disturbed area immediately adjacent to the existing apron located south of hangar 1144.
CATEX BBT DRT EPT LRT TCA BPFTI Firing Range Maintenance and Lead Reclamation **Consultation Done** Perform maintenance and lead reclamation on active outdoor firing ranges. Work will including excavating the soil from the existing berms, sifting out the lead bullets and drum for recycling, then returning the soil to the berms. Erosion control measures will be added as necessary to minimize surface water flow off and erosion. The range included in this project is: • Ajo White Hills Range, Ajo, AZ
CATEX TCA AJO CAG Maintenance and Repair of Tohono O'odham Nation Roads **Consultation Done** The proposed action is to maintain and repair approximately 220 miles of existing dirt and crushed rock roads located on the Tohono O'odham Nation (TON). The road segments are in the Baboquivari, Hickiwan, Gu Vo, Pisinimo, Sells, and Chukut Kuk Districts. CBP will receive permission from the TON to conduct the maintenance and repair in the form of a written instrument or Tribal Resolution. Maintenance and repair of the existing roads would consist of filling in potholes, regrading road surfaces, implementing water drainage measures (e.g., ensuring road crowns shed water and establishing drainage ditches, culverts, or other water-control features, as needed to control runoff and prevent deterioration to existing infrastructure or surrounding land), applying soil stabilization agents, controlling vegetation and debris, and adding lost road surface material to reestablish intended surface elevation needed for adequate drainage.
CATEX TCA Christmas Pass AZ TACCOM LMR Temporary Repeater Installation **Consultation Done** Install and operate the temporary and semi-portable TACCOM Land Mobile Radio (LMR) site at Christmas Pass and minor maintenance and repair (M&R) of communications equipment and structures. The proposed Christmas Pass LMR site is located 60 miles west of Yuma in the Cabeza Prieta Mountains within the Cabeza Prieta Wilderness and Sonoran Desert in Yuma County, AZ. The site is situated near Christmas Pass and the Drift Hills approximately 7 miles north of the U.S./Mexico border and is currently undeveloped.

CBP Project Title Consultation Information Project Description
CATEX YUM Camp Grip AZ Tower Relocation TACCOM **PA Used- VI.F.6 and VI.F.7** Camp Grip is a remote U.S Customs and Border Patrol (CBP) site in Yuma County, Arizona, located 37 miles southwest of the Ajo Border Patrol Station (BPS) and within the Cabeza Prieta National Wildlife Refuge (CPNWR). CBP proposes to remove the existing cellular-on-wheels (COW) 106-foot tall guyed tower and equipment located northeast of the facility and install a self-support lattice tower/equipment on a modular foundation adjacent to the existing camp. The total height of the new tower, including lightning protection and other additions, will not exceed 199 feet. The proposed new tower and equipment will be installed within a 20 ft. by 20 ft. disturbed area with little to no existing vegetation. The foundation will consist of modular cell blocks (on top of the ground). A fiberglass shelter, generator, and 100 ft. tall self-support lattice tower equipped with several antennas and microwave dishes will be installed. The site will be contained within an area located east of the main modular building access road and just north of the existing El Camino del Diablo Trail. Equipment will be brought in by trailer and the adjacent existing right-of-way (road area) will be used for staging. A minimum number of vehicle trips to the site are planned.
CATEX YUM Camp Grip Well Installation **Consultation Done** The proposed action at forward operating base Camp Grip is to permit, drill, and install a domestic water supply well; design and install a water treatment system; and plumb the new well and system to the existing water holding tanks. The Camp Grip well design depth would be 400 feet below ground surface with drilling continuing depending on when groundwater is encountered up to 1400 feet below ground surface. The proposed location of the well is near the northeast corner of the helipad at Camp Grip in a previously disturbed area. Plumbing from the well would run underground along the south side of the east-west trending runway matting east of the helipad. The well plumbing would connect to a connex on the northeast corner of Camp Grip that currently houses the water storage tanks. A water treatment system would be installed inside the connex. Effluent would discharge to a dry well at least three feet deep. The dry well would be gravel filled with perforated pipe in a gravel lined trench plumbed from the water treatment system discharge component. Power would be brought to the well pump from an existing generator located west of the parking area via underground electrical conduit.
CATEX YUM WEL Temporary Deployment of Mobile Observation Platform **PA Used- VI.A.5** The proposed action involves the temporary deployment of a mobile observation platform on the Cabeza Prieta National Wildlife Refuge (CPNWR). The mobile observation platform does not require ground disturbance and will be deployed in a previously disturbed location adjacent to existing roads. The observation platform consists of a ladder and basic scaffolding— there are no lights, generators, or other mechanical or electrical components associated with the platform. No new roads will be required to deploy the platform, and operations will not change as a result of the temporary deployment. The platform is trailer mounted and will be driven to the sites utilizing existing roadways. The platform can be set-up and torn down in approximately one hour. The mobile observation platform will be temporarily deployed at the intersection of Eagle Tank Road and Old Papago Road—there is currently a rescue beacon at this location.

CBP Project Title Consultation Information Project Description
CATEX YUM Yuma Border Lighting Retrofit and Utility Trenching **Consultation Done** CBP is proposing to retrofit the existing metal halide lamps utilized for border lighting located near the San Luis POE in the Border Patrol Yuma Sector with energy efficient LED lights. The existing lights along approximately 7.2 miles of border would be replaced. The light poles would be reduced in height from 60 to 40 feet, the fixtures would be replaced to accommodate the LED bulbs, and the fixtures would be oriented downward to eliminate light pollution. Existing access roads to and along the border would be used for the transport of personnel, vehicles, material, and equipment. An existing staging area would be used for the storage of material and equipment. The proposed action also includes extending electrical service across the Sanchez Canal along the border by trenching approximately 75 feet from the current terminus of electrical service to the corridor of the lighting project and installing electrical conduit. The trenching would begin approximately 75 feet northwest of the Sanchez Canal and proceed southwest until reaching the canal, at which point the electrical conduit would be bracket mounted to the bridge to cross the canal. The pre-manufactured bridge was installed by CBP in 2007. A new junction box would also be installed on the south side of the bridge within the corridor of the lighting project at the end of the trench route. The trench would be approximately three feet wide by two feet deep, and would be backfilled around the electrical conduit with native material.
Douglas Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the Douglas Station.
Lukeville Single Family Housing Interior Repairs **PA Used- VI.B.1; VI.B.1(d)** Interior repair of three CBP-owned housing units in Lukeville, AZ. Proposed action work will include: • Repairs to the base concrete floor in order to allow for the installation of new laminate flooring throughout all areas of the house except the kitchen, bathroom, and laundry/furnace room flooring which will remain untouched. • Installing new residential master key lock system
Naco Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the Naco Station.
REC LEXRIS Lukeville **PA Used- VI.A.1** Field and operate two LEXRIS portals at the Lukeville Port of Entry (POE) in Pima County, Arizona for the purpose of conducting non-intrusive inspections of vehicles for the presence of contraband, including weapons of mass destruction, explosives, and illicit drugs. The systems will be portal (stationary) configurations that will be installed along existing traffic lanes. Vehicles will be scanned as they are driven through the portal. The portal LEXRIS will be installed on previously disturbed, developed surfaces (pavement and asphalt) at the Lukeville Facility. Minor excavations and trenching will be required to install the systems which will affect approximately 280 square feet to a maximum depth of 4 feet. Soils at the POE have been subject to grading and possibly filling to establish traffic lanes and other surfaces, such as inspection areas. Excavated soil will be used to backfill the project site.

CBP Project Title Consultation Information Project Description
San Luis POE Tunnels Team Deployment **No potential to cause effects per 36 CFR 800.3(a)(1)** Study to characterize the geophysical properties of the U.S./Mexico international border region in Yuma County to determine the potential locations of illegal tunnels.
San Luis Region of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the San Luis Station.
Sasabe Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within Sasabe Station.
TCA-SON-0115 and TCA-SON-0117 Proposed Maintenance, Upgrade, and Repair **PA Used- VI.E.3, VI.F.1, VI.F.2, VI.F.3** Maintenance and repair of existing communications towers at Sonoita Station [TCA-SON-0117] and Red Mountain [TCA-SON-0115] to include structural reinforcement and addition of grounding and lightning protection for both towers.
Tucson OCC Break Room Renovation **PA Used- VI.B.1(c)** Interior office space renovation. Proposed action work will include: • Adding a new counter and sink.
UAC and FAMU Temporary Housing (Tent City) **PA Used- VII.A.2** Construct soft-sided housing units at existing CBP facilities to provide safe and secure temporary housing for UACs and FAMUs. The facility will be located at: • San Luis II, Arizona
Yuma Polygraph Room Interior Renovation **Consultation Done** Interior office space renovations to new CBP polygraph room standards. Proposed action work will include: • Renovating two existing polygraph rooms by increasing the Sound Transmission Class (STC) and adding electronic security measures. • Dividing one office into two polygraph rooms and add insulation and electronic security measures. • Convert an existing office into a Dedicated Observation Room with A/V feed from the four polygraph rooms.

Appendix B: California Undertaking Details

5,210 Total Undertakings

- 11- PA Used- Stipulation VI
- 5,183- PA Used- Stipulation VII.A.1 (operations not included in summary table below)
- 8- PA Used- Stipulation VII.A.2
- 2- PA Used- Stipulation VII.B
- 1- Consultation Done
- 5- No potential to cause effects per 36 CFR 800.3(a)(1)

CBP Project Title Consultation Information Project Description
Algodones Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
CA El Centro Superstition Mtn LSTAR **PA Used- VI.C.8** Placement and operation of LSTAR equipment at the existing USBP facility located at Superstition Mountain located in Imperial County, California. The new platform will not exceed 12' by 12' (length x width), the temporary platform will be a level surface elevated above the existing chain link fencing (approximately 8 ft.). Platforms will leave access to the earth's surface. No vegetation clearing or modification of ground resources is necessary for installation of the LSTAR equipment within the existing USBP complex. The Proposed Action does not include the installation, modification, or construction of any new or existing approach or access road.
CA0004 CATEX Calexico West Rail Inspection Facility Lease **No potential to cause effects per 36 CFR 800.3(a)(1)** Lease of free space from Union Pacific for rail inspectors. The facility in the Union Pacific Railyard was completed in 2014.
CA0025 Oakland Seaport Lease Renewal **No potential to cause effects per 36 CFR 800.3(a)(1)** Renewal of free space lease from Port of Oakland. The facility is located on the Port and was completed in the 1990s.
CA0144 - Service Processing Center (SPC) Re-Activation, Haitian Surge **PA Used- VI.B.1(c) and VI.B.1(d)** Re-activation of the Service Processing Center (SPC) in El Centro, California as a processing facility for inadmissible Haitian nationals. The facility has been in off-line for approximately 2 years; with minimal systems (HVAC, electric, water) being maintained during this period. It is anticipated not all systems may function when brought back to full operation. CBP will be responsible for the startup of essential systems to include: HVAC, electric, water, fire, and other building services required for public use. No changes to the existing facilities will be required. An additional 30 computer workstations will be installed into the existing space.

CBP Project Title Consultation Information Project Description
CA0175 Checkpoint 86 LSTAR Deployment **PA Used- VI.C.8** Placement and operation of LSTAR equipment at the existing USBP facility located at the Highway 86 Checkpoint located in Imperial County, California. The new platform will not exceed 12' by 12' (length x width), the temporary platform will be a level surface elevated above the existing chain link fencing (approximately 8 ft.). Platforms will leave access to the earth's surface. No vegetation clearing or modification of ground resources is necessary for installation of the LSTAR equipment within the existing USBP complex. The Proposed Action does not include the installation, modification, or construction of any new or existing approach or access road.
Calexico Region Of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the Calexico Station.
Calexico West LPOE Rail Inspection Facility UP **No potential to cause effects per 36 CFR 800.3(a)(1)** Lease of free space from Union Pacific for rail inspectors. The facility in the Union Pacific Railyard was completed in 2015.
CATEX Riverside Air Unit Security Access Points Repairs **PA Used- VI.B.1(d) and VI.B.2** Interior office space renovation at Riverside Air Unit building at 1355 Customs Way in Riverside. Proposed action work will include: • Replace existing locks with new PIV card readers on six (6) doors. • Install computer system in existing server room.
CATEX SDC Brown Field BPS Property Acquisition **No potential to cause effects per 36 CFR 800.3(a)(1)** The proposed action consists of acquiring two adjacent properties at the intersection of Highway 94 and Campbell Ranch Road in Dulzura, California. The larger of the two properties is 118 acres and is situated north of the California Department of Forestry and Fire Protection (Cal Fire) Dulzura Station. The smaller of the two properties is one acre and is situated east of the Cal Fire Dulzura Station. A Phase I Environmental Site Assessment (ESA) as well as biological and cultural resource surveys are underway at the site. Elevation at the site ranges from 1,125 feet to 1,350 ft. Surrounding properties include cultivated fields of crops, grazing areas for livestock, private properties and homes. The portion of the property that is most suitable for potential construction consists of approximately 22 acres of relatively flat, previously cultivated fields and 96 acres of rolling hills, drainages and slopes. An intermittent stream is located at the extreme northwestern corner of the larger property. The primary rationale for the proposed acquisition is that the property is suitable for potential development and construction of a new US Border Patrol (USBP) Brown Field Border Patrol Station (BPS). However, if CBP is unable to eventually move forward with the BPS, CBP believes there are other potential uses for the property. CBP does not yet have sufficient funding to construct a new BPS. Thus, any actual development and construction of the site for a new BPS is contingent upon CBP obtaining sufficient funding.

CBP Project Title Consultation Information Project Description
CATEX SDC IMB NOLF Tower and Surveillance Camera Installation **PA Used- VI.F.6** Installation of a surveillance tower at a maximum of 60' above ground level and mount a camera to provide visibility to the coast line. The proposed action consists of reinstalling a structure at this location adjacent to existing CBP equipment. The tower would be installed within a maximum 20'x20' area enclosed with a new 10' high chain link fence at the southwest corner of the existing repel tower area.
CATEX SDC Replacement of Highway Sign Systems at I-5 Checkpoint **PA Used- VI.B.8** The San Clemente Border Patrol Station and Checkpoint (BPS) is located on Interstate 5 (I-5) approximately five miles south of San Clemente, California. The proposed action includes the replacement of six existing solid state highway signs along I-5 at the San Clemente BPS with six LED dynamic message signs. The sizes of the new signs would match the existing. No alterations would be made to the supporting metal structures on which the signs are posted. The metal structures are owned by Caltrans. In addition, the power systems would be replaced to provide sufficient power to run the new signs. Future maintenance, as well as potential repairs of a minor nature, of the new sign systems would be expected. All work would be conducted within the footprint of the existing sign systems.

CATEX SDC UESC ECMs for San Diego, El Cajon, San Ysidro, and Otay Sites
Consultation Done
 	
The U.S. Customs and Border Protection (CBP) has awarded the Utility Energy Savings Contract (UESC) to the San Diego Gas & Electric Company (SDG&E) for implementation of energy conservation measures (ECMs) at several San Diego County, CA sites.
• San Diego (SD) Firing Range (BE CA0250) is located at 2301 McCain Road, San Diego, CA 92101. The facility was built in the 1980s. Lat/Long 32.7298 -117.2089.
• El Cajon BPS (BE CA0172) is located at 225 Kenney Street, El Cajon, CA 92020. The oldest building was built in 1983. Lat/Long 32.8297 -116.9645.
• The Chula Vista BPS and Beyer Complex are located on one contiguous property but have different building designations. The oldest building was constructed in the 1950s and renovations have occurred over the years. Lat/Long 32.5608 -117.0529.
  o Chula Vista BPS also known as "San Ysidro" (BE CA0122) is located at 311 Athey Avenue, San Ysidro, CA 92173.
  o Beyer Complex also known as the Beyer Campus (BE CA0141) is located 3752 Beyer Boulevard, San Ysidro, CA 92173.
• Pogo Row Sector Support Facility also known as "Pogo Row Complex" or Border Patrol Sector Headquarters (BPSHQ) Support Facility (BE CA0186) is located at 7682 Pogo Road, San Diego/Otay, CA 92154. This facility was built in the 2000s and was previously used as the Brown Field Air Unit. Lat/Long 32.5777 -116.9797.
 	
Construction activities will include installation of digital direct controls (DDCs), heating, ventilating and air conditioning (HVAC) retrofits, HVAC controls, interior lighting, exterior lighting, vending misers (vending machine device/sensor), photovoltaics (solar electric), roofing, and other energy savings implementations. Post construction activities (performance testing, training, and final documentation) occurs April 2016 through June 2017.

El Centinela Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.

CBP Project Title Consultation Information Project Description
El Centro IA Temp Relocation **No potential to cause effects per 36 CFR 800.3(a)(1)** Temporary relocation of 20 staff members to the existing CBP building at 1111 North Imperial Avenue, El Centro, CA. No renovations to the space are necessary.
FY 16 MEMXRIS Calexico **PA Used- VI.A.1 and VI.C.8** Field and operate a MEMXRIS at the Calexico Port of Entry, Calexico, Imperial County, California for non-intrusive inspections (NIIs) of cargo containers. The MEMXRIS will be moved to any location within the landport suitable for conducting inspections, as required. In addition, the system will be operated on developed surfaces. This mobile system consists of a dual energy X-ray imaging platform mounted on a truck chassis and is optimized for roof-to-axle scanning of unoccupied vehicles in moving mode (system moves past stationary vehicles) or container-only scanning of trucks towing containers in stationary mode (trucks drive through the stationary system).
FY 16 MEMXRIS Carson **PA Used- VI.A.1 and VI.C.8** Field and operate a MEMXRIS at the Container Examination Station (CES), Carson, Los Angeles County, California for non-intrusive inspections (NIIs) of cargo containers. The MEMXRIS will be moved to any location within the landport suitable for conducting inspections, as required. In addition, the system will be operated on developed surfaces. This mobile system consists of a dual energy X-ray imaging platform mounted on a truck chassis and is optimized for roof-to-axle scanning of unoccupied vehicles in moving mode (system moves past stationary vehicles) or container-only scanning of trucks towing containers in stationary mode (trucks drive through the stationary system).
FY 16 MEMXRIS Oakland **PA Used- VI.A.1 and VI.C.8** Field and operate a MEMXRIS at the Container Examination Station (CES), Oakland, Oakland County, California for non-intrusive inspections (NIIs) of cargo containers. The MEMXRIS will be moved to any location within the landport suitable for conducting inspections, as required. In addition, the system will be operated on developed surfaces. This mobile system consists of a dual energy X-ray imaging platform mounted on a truck chassis and is optimized for roof-to-axle scanning of unoccupied vehicles in moving mode (system moves past stationary vehicles) or container-only scanning of trucks towing containers in stationary mode (trucks drive through the stationary system).
Near Rancho Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
REC ELC Queen II Tunnel Remediation **PA Used- VII.B.1** Closure of the Queen II tunnel located on the eastside of Calexico, California along the U.S.-Mexico international border in Imperial County, California.

CBP Project Title Consultation Information Project Description
REC LEXRIS CalexicoW **PA Used- VI.A.1** Field and operate LEXRIS portal at the Calexico West Port of Entry (POE) for the purpose of conducting non-intrusive inspections of vehicles for the presence of contraband, including weapons of mass destruction, explosives, and illicit drugs. The system will be portal (stationary) configurations that will be installed along existing traffic lanes. Vehicles will be scanned as they are driven through the portal. The portal LEXRIS will be installed on previously disturbed, developed surfaces (pavement and asphalt) at the facility. Minor excavations and trenching will be required to install the systems which will affect approximately 280 square feet to a maximum depth of 4 feet. Soils at the POE have been subject to grading and possibly filling to establish traffic lanes and other surfaces, such as inspection areas. Excavated soil will be used to backfill the project site.
REC SDC Customhouse Tunnel Remediation **PA Used- VII.B.1** Closure of the Customhouse tunnel located approximately 0.5 miles west of the Otay Mesa Port of Entry (POE) along the U.S.-Mexico international border in San Diego County, California.
Replacement of Door Locks with PIV Card Readers **PA Used- VI.B.1(d) and VI.B.2** Interior office space renovation at World Trade Center, Long Beach. Proposed action work will include: • Replace existing locks with new PIV card readers on six (6) doors. • Install computer system in existing server room.
San Diego and Tijuana Region of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the San Diego and Tijuana Stations.
Tecate Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the Tecate Station.
Tierra Del Sol Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
UAC and FAMU Temporary Housing (Tent City) **PA Used- VII.A.2** Construct soft-sided housing units at existing CBP facilities to provide safe and secure temporary housing for UACs and FAMUs. The facility will be located at: • Otay Mesa, California

CBP Project Title Consultation Information Project Description
Antelope Wells AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the Antelope Wells Station.
CATEX EPT Deming [BE: NM0150] Horse Stable Floor Repair **PA Used- VI.B.1** The proposed action is to resurface the floor of the existing horse stables at the Deming (DNM) Border Patrol Station (BPS). This involves the repair of the existing concrete floor by filing in chips and cracks and adding a new seal coat to the floor. The concrete slab will also be scarified to reduce the potential for animal slips when the concrete is wet.
CATEX EPT Lease Termination and Equipment Removal for Multiple TACCOM Sites in NM and TX **No potential to cause effects per 36 CFR 800.3(a)(1)** Termination of leases for decommissioned legacy sites where equipment has already been removed at the following locations: • San Antone Mtn (remote location on USDA lands near Vallecitos, NM) • Taos (space on USFS Carson National Forest tower and in existing shelter near Taos, NM) • Turkey Mountain (space on NM IT tower and in existing shelter near Watrous, NM) • Wheatland (space on NM IT tower and in existing shelter near Tucumcari, NM) • Mount Taylor (space on NM IT tower and in existing shelter near Cubero, NM) • La Mosca (space on NM IT tower and in existing shelter near Cubero, NM) • Elida Kenna (space on NM IT tower and in existing shelter near Santa Fe, NM) • Cornudas TX Land Only (remote location on private lands near Sonora, NM)
CATEX EPT Roof Replacement at Four Existing Checkpoints **PA Used- VI.B.3** Replace in-kind the roofs at four existing checkpoints located in the El Paso Sector. The project may also include the in-kind replacement of the associated rain gutter system to ensure the new roofs function properly. The old roofing material will be hauled away by the contractor and disposed of at an approved landfill or recycling facility. The checkpoints that will receive roof replacements are located in Texas and New Mexico and listed below: • I-10 Checkpoint [NM11387] – 1941 Square Feet • I-25 Checkpoint [NM0039] – 1956 Square Feet • HWY 62/180 Checkpoint [TX0471] – 2191 Square Feet • HWY 185 Checkpoint [NM11388] – 751 Square Feet

CBP Project Title Consultation Information Project Description
CATEX EPT STN BPS [NM0023] Repair Firing Range Floor **Consultation Done** The current firing range floor layout consists of concrete walkways that run parallel to the firing lines. In between the concrete walkways are large areas of compacted earth that have a thin layer of crushed gravel acting as a surface cap. The health hazards with having a soil base walking surface is that over time it will collect and trap lead dust and other byproducts of gunfire. This potential hazard has recently increased as a result of partially enclosing the outdoor firing range by installing walls along the exterior of the range which has decreased natural ventilation. In order to address this potential occupational health problem the portion of the range floor that is currently compacted earth will be excavated and replaced with concrete. The undertaking includes excavation and disposal of five inches of soil from the range complex walking surface and the placement of concrete slabs in the areas of soil removal. The concrete will be a 4 inch thick slab. The STN BPS is a modern facility constructed in the mid-1990s that is located at 1005 HWY 9 in Santa Teresa, New Mexico.
CATEX EPT STN BPS [NM0023] Replace Lighting System at the Small Arms Firing Range **PA Used- VI.B.3(d)** The proposed action includes the replacement and maintenance of the existing lighting system located at the existing Santa Teresa (STN) Border Patrol Station (BPS) Small Arms Firing Range. The range is located under a canopy within the fenced in STN BPS compound. The Santa Teresa (STN) Border Patrol Station (BPS) is a modern facility constructed in the mid-1990s that is located at 1005 HWY 9 in Santa Teresa, New Mexico.
CATEX EPT Water Treatment Installation at Six Existing Facilities **PA Used- VI.B.1(c)** Design, labor, equipment, and materials to install water filtration and treatment systems that consist of a particulate filtration system, UV treatment, disinfection system, and appropriately sized storage tank (as necessary) to maintain capacity. Work will include evaluation of the existing water supply infrastructure system at each location, development of a recommended filtration system, treatment system, and water storage system suitable for each location that is reliable and requires minimal maintenance and is easy to maintain. All work will occur on the interior of the facilities. The facilities currently have water storage tanks, if new water storage tanks are required they will be in-kind replacements. Water treatment systems will be installed at the following facilities: • FOB Bounds (Antelope Valley, NM) – NM0005 • FOB Garza (Animas Valley, NM) – NM5397 • FOB Ramsey (20 miles east of Columbus, NM) – NM0152 • HWY I-10 Checkpoint – NM11387 • HWY I-25 Checkpoint – NM0039 • HWY 185 Checkpoint – NM11388
CATEX Lease Termination and Equipment Removal for the Mount Kenna NM TACCOM Site **No potential to cause effects per 36 CFR 800.3(a)(1)** Termination of lease for decommissioned legacy site leased from the Transwestern Pipeline Company located near Kenna, Chaves County, NM where equipment has already been removed. CBP had space on an existing tower and shelter.

CBP Project Title Consultation Information Project Description
CATEX NASOC-Albuquerque Security Systems and Measures Repairs **PA Used- VI.B.1(d), VI.B.2, VI.B.3, and VI.F.4** Replace or install surveillance and security equipment on an existing building at the NASOC-Albuquerque compound at 2701 Kirtland Drive SE, Albuquerque, NM. The proposed project consists of the following actions: • Remove and replace the facility access control and intrusion detection system; • Remove and replace the building's perimeter windows; • Replace four sets of aluminum framed doors; and • Add 5 additional security cameras. No trenching or ground disturbance is anticipated.
Columbus AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the Columbus Station.
NM Playas Block 1 Transition to IFT Demonstration **PA Used- VI.C.8** Test project for up to two (2) months for a new surveillance technology program. Equipment will be mounted on an existing CBP tower. Support equipment consisting of 2 Conex boxes and a trailer, measuring 8'x 20' will be located at the base of the tower.
REC LEXRIS Santa Teresa **PA Used- VI.A.1** Field and operate LEXRIS portal at the Santa Teresa Port of Entry (POE) for the purpose of conducting non-intrusive inspections of vehicles for the presence of contraband, including weapons of mass destruction, explosives, and illicit drugs. The system will be portal (stationary) configurations that will be installed along existing traffic lanes. Vehicles will be scanned as they are driven through the portal. The portal LEXRIS will be installed on previously disturbed, developed surfaces (pavement and asphalt) at the facility. Minor excavations and trenching will be required to install the systems which will affect approximately 280 square feet to a maximum depth of 4 feet. Soils at the POE have been subject to grading and possibly filling to establish traffic lanes and other surfaces, such as inspection areas. Excavated soil will be used to backfill the project site.
Santa Teresa AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the Santa Teresa Station.
Sunland Park AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity within the Sunland Park Station.

Appendix D: Texas Undertaking Details

3,819 Total Undertakings

- 25- PA Used- Stipulation VI
- 3,759- PA Used- Stipulation VII.A.1 (operations not included in summary table below)
- 14- PA Used- Stipulation VII.A.2
- 0- PA Used- Stipulation VII.B
- 17- Consultation Done
- 4- No potential to cause effects per 36 CFR 800.3(a)(1)

CBP Project Title Consultation Information Project Description
Boldts Ranch Surveillance System, Webb County, Laredo West AoR, Laredo Sector, Texas **Consultation Done** Installation, operation, maintenance, repair, and eventual dismantlement and removal of surveillance systems on private property in Webb County. Each system is comprised of the following: • a 40' by 40' level pad for the mooring station; • a 20' by 7' gravel pad for the storage container; • a 20' by 7' pad for the helium trailer; • a 14' by 7' gravel pad for the operations trailer; • a portable tower that extends up to 107'; • a cleared footprint free from tress and vegetation with a 100' radius; • three 8' by 8' gravel pads for generators; • a 258' by 258', 3 strand barb wire fence with posts every 10'; and • a 12' wide standard cattle gate at the access point.
Brownsville AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
CATEX BBT DRT EPT LRT TCA BPFTI Firing Range Maintenance and Lead Reclamation **Consultation Done** Perform maintenance and lead reclamation on active outdoor firing ranges. Work will including excavating the soil from the existing berms, sifting out the lead bullets and drum for recycling, then returning the soil to the berms. Erosion control measures will be added as necessary to minimize surface water flow off and erosion. The ranges included in this project are: • Fabens Range, Fabens, TX • Marfa Range, Marfa, TX • Amistad Range, Del Rio, TX • Carrizo Springs Range, Carrizo Springs, TX • Freer Range, Freer, TX

CBP Project Title Consultation Information Project Description
CATEX BBT SBT [TX11607] Disposal of Former Sierra Blanca BPS **Consultation Done** Excessing real property formally utilized as Former Sierra Blanca Border Patrol Station (BPS near Sierra Blanca, Texas. CBP will be working with the General Services Administration (GSA) under the standard process to excess real Federal property. GSA will evaluate the buildings and facilitate the process for arranging for new Federal, state, or local government use of the facilities.
CATEX DRT Abilene TX New Lease and MR TACCOM **Consultation Done** New antenna lease at 2720 Industrial Boulevard, Abilene, Taylor County, TX 79605. The site includes space for an antenna at 200 to 270 ft. on a 279 ft. tall tower owned by Texas Department of Public Safety [TXDPS], built in 2012 (FCC # 1282187), space in the shelter, and associated equipment. . The Proposed Action includes obtaining a new lease and minor maintenance and repair (M&R) of communications equipment at the site. M&R will take place within the existing site footprint and where disturbances have already occurred. M&R activities associated with the Proposed Action may include: • Repair, maintenance, installation and/or replacement of telecommunications equipment and cable systems. • Minor repairs to structures, buildings, security fences, and portable shelters. • M&R of ancillary equipment such as heating, air conditioning, power systems and associated equipment, backup power generators, fuel storage, solar power panels, security monitoring systems, and facility grounding and lightning protection systems, and other equipment as needed. • Repairs to interior and exterior electrical systems. The Proposed Action would not increase or change the footprint of the existing site and there would be no new ground disturbance. The activities would not significantly increase the height or width of the structure(s). All equipment required for the Proposed Action can be accommodated using the existing road and parking area. No new construction or major site improvements are associated with the Proposed Action. Any replaced or retired equipment or material would be recycled or otherwise properly disposed.
CATEX DRT COM Disposal of Former COM BPS [TX0157] and Associated Facilities **Consultation Done** Excessing real property formally utilized as the old Comstock (COM) Border Patrol Station (BPS), old Comstock Checkpoint, and old Comstock Lake Task Force near Comstock, Texas. For owned assets, CBP will be working with the General Services Administration (GSA) under the standard process to excess real Federal property. GSA will evaluate the buildings and facilitate the process for arranging for new Federal, state, or local government use of the facilities. CBP will be returning leased assets to the original lessors. The old Comstock BPS consists of four parcels of land located along the southern side of U.S. 90 within the Comstock city limits. The old Border Patrol Checkpoint is located approximately four miles east of Comstock, Texas on the northern side of U.S. 90. The old Comstock Lake Task Force consists of a modern modular trailer located adjacent to Lake Amistad on a parcel of land owned by the National Park Service.

CBP Project Title Consultation Information Project Description
CATEX DRT/LRT Briscoe Ranch TX MOU, Antennas, and M&R TACCOM **Consultation Done** The Proposed Action includes adding an antenna similar to the existing antennas and minor maintenance and repair (M&R) of communications equipment. M&R will take place within the existing site footprint and where disturbances have already occurred. M&R activities associated with the Proposed Action may include: • Repair, maintenance, installation and/or replacement of telecommunications equipment and cable systems. • M&R of ancillary equipment such as heating, air conditioning, power systems and associated equipment, backup power generators, fuel storage, solar power panels, security monitoring systems, and facility grounding and lightning protection systems, and other equipment as needed. • Repairs to interior and exterior electrical systems.
CATEX EPT El Paso Air Branch Security System Repairs **PA Used- VI.B.1(d) and VI.B.2** Make repairs to the existing security systems at the El Paso Air Branch facilities, located at 1740 American Way, El Paso, TX 79925; 7301 Boeing Drive, El Paso, TX 79925; and 6812 Northrop Drive, El Paso, TX 79925. In order to meet security standards, CBP proposes to replace or install surveillance and security equipment at three existing facilities. The proposed project consists of the following actions: • Repair or replace the access control system, the video surveillance system, and the intrusion detection system at these three facilities; and • Replace the glazing in the windows of the Northrop facility. No trenching or ground disturbance is anticipated.
CATEX EPT EPS [BE: TX0241] Parking Lot Resurfacing **PA Used- VI.D.1** Resurface and restripe the 372,230 square foot parking lot for the El Paso Border Patrol Station. Included in the proposed action is an inspection of the existing parking lot condition, removal of surface debris (i.e. rocks, dirt, and trash) on the existing parking surface, repairing cracks, resurfacing the parking lot with a sealcoating, and restriping the parking lot.
CATEX EPT EPS Riverside Air Unit HVAC and Ceiling Upgrades **PA Used- VI.B.1, VI.B.1(c), VI.B.3, and VI.B.4** Replace an aging and ineffective heating, ventilation and air conditioning (HVAC) system at the El Paso Air Unit Riverside facility at 6812 Northrop Drive, El Paso, TX.. The proposed project consists of the following actions: • Installation of a new split (indoor/outdoor) HVAC system with associated electrical interconnections, condensate pump and piping, and ceiling/roof repairs around replacement vents.
CATEX EPT Lease Termination and Equipment Removal for Multiple TACCOM Sites in NM and TX **No potential to cause effects per 36 CFR 800.3(a)(1)** Termination of leases for decommissioned legacy sites where equipment has already been removed at the following locations: • FAA Mount Franklin (space on FAA tower and in existing shelter near El Paso, TX) • Ranger Peak II (space on Crown Castle tower and in existing shelter near El Paso, TX) • Comanche Peak I (space on Sinclair Broadcast tower and in existing shelter near El Paso, TX) • Comanche Peak II (space on rooftop near El Paso, TX)

CBP Project Title Consultation Information Project Description
CATEX EPT Sector HQ [BE: TX0180] Building A Parking Lot Resurfacing **PA Used- VI.D.1** Resurface and restripe the 21,318 square foot parking lot for Building A at the El Paso Sector (EPT) Headquarters Facility. Included in the proposed action is an inspection of the existing parking lot condition, removal of surface debris (i.e. rocks, dirt, and trash) on the existing parking surface, repairing cracks, resurfacing the parking lot with a sealcoating, and restriping the parking lot.
CATEX EPT Sector HQ [BE: TX0180] Upgrade Internal Duress Alarm **PA Used- VI.B.1(d)** Repair/upgrade the existing internal duress alarm located in the El Paso Sector (EPT) Headquarters facility. Upgrades will occur in the lobby and other key friction points within the HQ complex. The upgrades will bring the facility into compliance with current Internal Affairs standards.
CATEX EPT SOG HQ [BE: TX11610] Exterior Painting **PA Used- VI.B.3** Repair and repaint the exterior facades of two modern modular structures located at the El Paso Sector (EPT) Special Operations Group (SOG) Headquarters (HQ) on Fort Bliss. The SOG HQ is located at the corner of SSG Sims and Duncan Street on Biggs Army Airfield, Ft. Bliss, TX 79916. The modular facilities were installed in 2003. Proposed work includes preparing and painting the exterior of the existing facilities (i.e. Buildings 11163 and P1163).
CATEX EPT YST [BE: TX0183] Force Protection Upgrade **PA Used- VI.B.1(d), VI.B.2, and VI.B.3(d)** Upgrade the existing force protection in the lobby of the existing Ysleta (YST) Border Patrol Station (BPS). The proposed action includes the following; • Replacing current interior walls of the lobby with Class Level III ballistic resistant fiber glass paneling • The glass pane doors with ballistic rate teller window with two way audio and a drawer for hand to hand transaction • Installing a CCTV with view of the parking area & reception area • Adding under the counter duress for the receptionist to signal the station personnel of incoming threats • Install a level III ballistic rated door with the proper electronic control access entrance technology The building was constructed in 1993 and is located at 12245 Pine Springs Drive, El Paso, TX 79936.
CATEX EPT YST HWY 62-180 Checkpoint [TX0471] Install Water Well **Consultation Done** Provide a new water well and appropriately-sized pump with necessary filtering equipment to feed an existing 2600 gallon storage tank on site at the HWY 62-180 Checkpoint.

CBP Project Title Consultation Information Project Description
CATEX LRT Fairfield SW150 TX Lease Renewal and MR TACCOM **Consultation Done** Fairfield SW150 is located at 127 State Highway 75 South, Fairfield, Freestone County, TX 75830. The site includes rented space for an antenna on a 500 ft. tall guyed commercial tower (Huffman Communications, FCC # 1053780, built in 1981), space in shelter for equipment, and associated equipment. The Proposed Action includes renewing the site lease and minor maintenance and repair (M&R) of communications equipment at the site. M&R will take place within the existing site footprint and where disturbances have already occurred. Road access and parking area is available and not maintained by CBP. M&R activities associated with the Proposed Action may include: • Repair, maintenance, installation and/or replacement of telecommunications equipment and cable systems. • Minor repairs to structures and/or buildings where equipment is located. • M&R of ancillary equipment such as heating, air conditioning, power systems and associated equipment, backup power generators, fuel storage, solar power panels, security monitoring systems, and facility grounding and lightning protection systems, and other equipment as needed. • Repairs to interior and exterior electrical systems. The Proposed Action would not increase or change the footprint of the existing site and there would be no new ground disturbance. The activities would not significantly increase the height or width of the structure. All equipment required for the Proposed Action can be accommodated using existing roads and parking area.
CATEX RGV RGC BPS TX TACCOM Tower Antenna Space Outlease **No potential to cause effects per 36 CFR 800.3(a)(1)** Outleasing antenna space at the Rio Grande City (RGC) Border Patrol Station (BPS) at 730 Border Patrol Lane, Rio Grande City, Starr County, TX. The site consists of a CBP-owned 250 ft. tall self-support lattice tower, shelters, and associated equipment. CBP intends to grant an outlease to the U.S. Department of Agriculture (USDA) Tick Riders for antenna space at 147 ft. height on the tower and equipment space within the existing shelter. A structural analysis has been performed for the tower and proposed additions. The USDA will install equipment on the tower and will place batteries, electrical wiring, and other equipment as needed within the existing shelter.
CATEX RGV TACCOM – Riviera #2 TX Site Lease and M&R **Consultation Done** Renew site leases and minor maintenance and repair (M&R) of communications equipment and structures at the Riviera #2 site, located at E. County Road (CR) 2335 (northeast of the intersection of E. CR 2335 and South CR 1070), Riviera, Kleberg County, TX
CATEX RGV TACCOM – Roma Repeater TX Site Lease and M&R **Consultation Done** Renew site leases and minor maintenance and repair (M&R) of communications equipment and structures at the Roma Repeater site located off N. Estrella Street, (approximately 200 feet northwest of the intersection of Woodland Circle and N. Estrella Street), Roma, Starr County, TX.
Cienegas Creek AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.

CBP Project Title Consultation Information Project Description
Ciudad Juarez Region of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
Cowboy Ranch Surveillance System, Zapata Station, Laredo Sector **Consultation Done** Installation, operation, maintenance, repair, and eventual dismantlement and removal of surveillance systems on private property in Zapata County. Each system is comprised of the following: • a 40' by 40' level pad for the mooring station; • a 20' by 7' gravel pad for the storage container; • a 20' by 7' pad for the helium trailer; • a 14' by 7' gravel pad for the operations trailer; • a portable tower that extends up to 107'; • a cleared footprint free from tress and vegetation with a 100' radius; • three 8' by 8' gravel pads for generators; • a 258' by 258', 3 strand barb wire fence with posts every 10'; and • a 12' wide standard cattle gate at the access point.
Del Rio Area of Interest Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
Eagle Pass AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
El Paso MEMXRIS **PA Used- VI.A.1 and VI.C.8** Field and operate a MEMXRIS at the El Paso Port of Entry, El Paso, El Paso County, Texas for non-intrusive inspections (NIIs) of cargo containers. The MEMXRIS will be moved to any location within the landport suitable for conducting inspections, as required. In addition, the system will be operated on developed surfaces. This mobile system consists of a dual energy X-ray imaging platform mounted on a truck chassis and is optimized for roof-to-axle scanning of unoccupied vehicles in moving mode (system moves past stationary vehicles) or container-only scanning of trucks towing containers in stationary mode (trucks drive through the stationary system).

CBP Project Title Consultation Information Project Description
Encinitos Aerostat to Valley View, USBP Weslaco AoR, RGV Sector **Consultation Done** Installation, operation, maintenance, repair, and eventual dismantlement and removal of surveillance systems from the existing Encinitos site to the existing Valley View site in Hidalgo County. Each system is comprised of the following: • a 40' by 40' level pad for the mooring station; • a 20' by 7' gravel pad for the storage container; • a 20' by 7' pad for the helium trailer; • a 14' by 7' gravel pad for the operations trailer; • a portable tower that extends up to 107'; • a cleared footprint free from tress and vegetation with a 100' radius; • three 8' by 8' gravel pads for generators; • a 258' by 258', 3 strand barb wire fence with posts every 10'; and • a 12' wide standard cattle gate at the access point.
Ft. Brown Surveillance System Sites, Ft. Brown AoR, USBP RGV Sector **Consultation Done** Installation, operation, maintenance, repair, and eventual dismantlement and removal of surveillance systems at nine locations on private property in the Laredo West and Zapata Station areas of responsibility. Each system is comprised of the following: • a 7' by 7' gravel pad for the operations trailer; • a 40' by 40' level pad for the mooring station; • three concrete barriers to be used as anchors; • a portable tower that extends up to 107'; and • a cleared footprint free from tress and vegetation with a 100' radius.
FY 16 MEMXRIS Eagle Pass **PA Used- VI.A.1 and VI.C.8** Field and operate a MEMXRIS at the Eagle Pass Port of Entry, Eagle Pass, Maverick County, Texas for non-intrusive inspections (NIIs) of cargo containers. The MEMXRIS will be moved to any location within the landport suitable for conducting inspections, as required. In addition, the system will be operated on developed surfaces. This mobile system consists of a dual energy X-ray imaging platform mounted on a truck chassis and is optimized for roof-to-axle scanning of unoccupied vehicles in moving mode (system moves past stationary vehicles) or container-only scanning of trucks towing containers in stationary mode (trucks drive through the stationary system).
FY 16 MEMXRIS El Paso **PA Used- VI.A.1 and VI.C.8** Field and operate a MEMXRIS at the El Paso Port of Entry, El Paso, El Paso County, Texas for non-intrusive inspections (NIIs) of cargo containers. The MEMXRIS will be moved to any location within the landport suitable for conducting inspections, as required. In addition, the system will be operated on developed surfaces. This mobile system consists of a dual energy X-ray imaging platform mounted on a truck chassis and is optimized for roof-to-axle scanning of unoccupied vehicles in moving mode (system moves past stationary vehicles) or container-only scanning of trucks towing containers in stationary mode (trucks drive through the stationary system).
Hidalgo AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.

CBP Project Title Consultation Information Project Description
Houston Airport MEMXRIS **PA Used- VI.A.1 and VI.C.8** Field and operate a MEMXRIS at the Houston Airport, Houston, Harris County, Texas for non-intrusive inspections (NIIs) of cargo containers. The MEMXRIS will be moved to any location within the landport suitable for conducting inspections, as required. In addition, the system will be operated on developed surfaces. This mobile system consists of a dual energy X-ray imaging platform mounted on a truck chassis and is optimized for roof-to-axle scanning of unoccupied vehicles in moving mode (system moves past stationary vehicles) or container-only scanning of trucks towing containers in stationary mode (trucks drive through the stationary system).
La Casita Surveillance System, Rio Grande City Station, RGV Sector **Consultation Done** Installation, operation, maintenance, repair, and eventual dismantlement and removal of surveillance systems on private property in Starr County. Each system is comprised of the following: • a 40' by 40' level pad for the mooring station; • a 20' by 7' gravel pad for the storage container; • a 20' by 7' pad for the helium trailer; • a 14' by 7' gravel pad for the operations trailer; • a portable tower that extends up to 107'; • a cleared footprint free from tress and vegetation with a 100' radius; • three 8' by 8' gravel pads for generators; • a 258' by 258', 3 strand barb wire fence with posts every 10'; and • a 12' wide standard cattle gate at the access point.
Laredo AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
Laredo MEMXRIS **PA Used- VI.A.1 and VI.C.8** Field and operate a MEMXRIS at the Laredo Port of Entry, Laredo, Webb County, Texas for non-intrusive inspections (NIIs) of cargo containers. The MEMXRIS will be moved to any location within the landport suitable for conducting inspections, as required. In addition, the system will be operated on developed surfaces. This mobile system consists of a dual energy X-ray imaging platform mounted on a truck chassis and is optimized for roof-to-axle scanning of unoccupied vehicles in moving mode (system moves past stationary vehicles) or container-only scanning of trucks towing containers in stationary mode (trucks drive through the stationary system).
LEXRIS Portals for Hidalgo and Pharr **PA Used- VI.A.1** Field and operate two LEXRIS portals at the Hidalgo and Pharr Ports of Entry (POE) in Texas for the purpose of conducting non-intrusive inspections of vehicles for the presence of contraband, including weapons of mass destruction, explosives, and illicit drugs. The systems will be portal (stationary) configurations that will be installed along existing traffic lanes. Vehicles will be scanned as they are driven through the portal. The portal LEXRIS will be installed on previously disturbed, developed surfaces (pavement and asphalt) at the Hidalgo and Pharr Facilities. Minor excavations and trenching will be required to install the systems which will affect approximately 280 square feet to a maximum depth of 4 feet. Soils at the POE have been subject to grading and possibly filling to establish traffic lanes and other surfaces, such as inspection areas. Excavated soil will be used to backfill the project site.

CBP Project Title Consultation Information Project Description
Nine Surveillance Systems, Laredo West and Zapata Stations Area of Responsibility **Consultation Done** Installation, operation, maintenance, repair, and eventual dismantlement and removal of surveillance systems at nine locations on private property in the Laredo West and Zapata Station areas of responsibility. Each system is comprised of the following: • a 40' by 40' level pad for the mooring station; • a 20' by 7' gravel pad for the storage container; • a 20' by 7' pad for the helium trailer; • a 14' by 7' gravel pad for the operations trailer; • a portable tower that extends up to 107'; • a cleared footprint free from tress and vegetation with a 100' radius; • three 8' by 8' gravel pads for generators; • a 258' by 258', 3 strand barb wire fence with posts every 10'; and • a 12' wide standard cattle gate at the access point.
Pharr AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
Presidio AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.
Presidio Housing Maintenance, Repair, and Site Improvement **PA Used- VI.B.1, VI.B.2, VI.B.3, VI.B.3(d), and VI.D.1** Maintenance, repair, and site improvement activities at the Presidio, Texas Housing Complex. Work will include: • Provide new exterior paint on mobile homes. Paint siding, soffits, trim window sills and doors. • Remove shutters from existing windows and replace with matching wood trim around all four sides of each window. This effort will extended life of the exterior siding • Install new exterior motion detector security lighting on mobile homes for security purposes. • Repair existing horizontal slide vehicle security gate located at entrance to the 700/800 housing for security purposes. • Install landscape island features throughout the front and back yard areas of housing. This effort will improve tenant security and promote a sense of family community. The work shall be performed at the CBP housing units located on Bunton Street. • Replace the existing deteriorating carpet with new vinyl flooring at the mobile housing units in the McKeel housing area. • Installation of new barrier fencing and landscaping to limited areas in the CBP 700/800 housing area to improve security and enhance the appearance of the area. • Repair and restore walk paths. Under this task, the Contractor shall replace any missing aggregate to establish a uniform depth of aggregate throughout entire walk path. Install new concrete sidewalks and steps where deteriorated beyond repair. • Install exterior window screens on 700/800 series homes to replace ones with holes and are falling apart. • Replace existing lighting fixtures past their useful life span with new ones in housing units. • Install new appliances.

CBP Project Title Consultation Information Project Description
REC LEXRIS Del Rio **PA Used- VI.A.1** Field and operate two LEXRIS portals at the Del Rio Port of Entry (POE) in Val Verde County, Texas for the purpose of conducting non-intrusive inspections of vehicles for the presence of contraband, including weapons of mass destruction, explosives, and illicit drugs. The systems will be portal (stationary) configurations that will be installed along existing traffic lanes. Vehicles will be scanned as they are driven through the portal. The portal LEXRIS will be installed on previously disturbed, developed surfaces (pavement and asphalt) at the Del Rio Facility. Minor excavations and trenching will be required to install the systems which will affect approximately 280 square feet to a maximum depth of 4 feet. Soils at the POE have been subject to grading and possibly filling to establish traffic lanes and other surfaces, such as inspection areas. Excavated soil will be used to backfill the project site.
Relampago Surveillance System, Weslaco Station, Rio Grande Valley Sector **Consultation Done** Installation, operation, maintenance, repair, and eventual dismantlement and removal of surveillance systems on private property near Mercedes, Texas. Each system is comprised of the following: • a 40' by 40' level pad for the mooring station; • a 20' by 7' gravel pad for the storage container; • a 20' by 7' pad for the helium trailer; • a 14' by 7' gravel pad for the operations trailer; • a portable tower that extends up to 107'; • a cleared footprint free from tress and vegetation with a 100' radius; • three 8' by 8' gravel pads for generators; • a 258' by 258', 3 strand barb wire fence with posts every 10'; and • a 12' wide standard cattle gate at the access point.
Relocatable Surveillance System Alternate Sites USBP Laredo West Station Laredo Sector **PA Used- VI.A.4, VI.C.1, VI.C.2, VI.C.8** Installation, operation, maintenance, repair; dismantlement, removal, and relocation of supporting infrastructure for Surveillance System deployment (RAID towers) to four previously established sites located in Webb County. • Boldt RAID Tower Site (28.050363 -99.560192) • Trevino RAID Tower Site (27.86115 -99.89055) • LRW Station (27.7068 -99.7283) • TXDOT Site (27.7084 -99.7283)
Relocation and Redeployment of RAID Aerostat from Valley View to Refugio, USBP, Rio Grande City Station, Rio Grande Valley Sector **PA Used- VI.A.4, VI.C.1, VI.C.2, VI.C.8** Dismantlement and removal of surveillance systems on private property in Valley View Texas to and relocation to an existing site in the Lower Rio Grande Valley National Wildlife Refuge managed by USFWS. Maintenance of existing access road to Refugio site on USFWS lands. Work includes grading the existing road, reestablishing the road crown for proper drainage where required, and the addition and compaction of caliche or other flexible road base as needed. Areas adjacent to the road may also have vegetation control to establish a 3' buffer and 15' canopy height clearance to ensure visibility and maintain safe conditions.
Rio Grande City AoI Tunnel Interdiction Activities **PA Used- VII.A.2** Exploratory investigation for potential tunnel locations within an area of interest (AoI) that tends to have a high potential for tunneling activity.

(b) (6)(b) (6)(b) (6)(b) (6)
(b) (6)(b) (6)(b) (6)

AUG 25 2017

U.S. Customs and Border Protection

Mr. Robert Jess
United States Fish and Wildlife Service
Lower Rio Grande Valley National Wildlife Refuge
3325 Green Jay Road
Alamo, TX 78516

Dear Mr. Jess:

U.S. Customs and Border Protection (CBP) is in the initial stages of planning for proposed levee wall along 28 miles of existing levee located in Hidalgo County, Texas within the U.S. Border Patrol's McAllen and Weslaco stations area of responsibility (AOR) and 32 miles of bollard wall in Starr County, Texas within the U.S. Border Patrol's Rio Grande City station AOR. In addition, CBP is in the planning stages of its second phase of gate installation to close 35 gaps in existing border fence in Hidalgo and Cameron counties. The 35 gates were funded in CBP's fiscal year (FY) 2017 appropriation, while the proposed 28 miles of levee wall and 32 miles of bollard wall are included in the President's FY18 budget request to Congress.

In Hidalgo County, CBP is proposing 28 miles of levee wall. The proposed levee wall alignment will be on the south face of the northern U.S. International Boundary Water Commission (IBWC) levee. The proposed design includes construction of a reinforced concrete levee wall to the height of the existing levee with 18-foot tall steel bollards installed on the top of the levee wall, a possible 150-foot enforcement zone on the south/river side of the levee wall, detection technology, enforcement zone lighting, video surveillance, automated vehicle gates, pedestrian gates, and an all-weather patrol road parallel to the levee wall. In addition, CBP will install gates within 20 gaps in existing border levee wall within Hidalgo County and in 15 existing gaps within Cameron County.

In Starr County, CBP is proposing 32 miles of bollard wall. The proposed design includes construction of 20 to 30-foot tall steel bollards, a possible 150-foot enforcement zone on the south/river side of the bollard wall, detection technology, enforcement zone lighting, video surveillance, and an all-weather patrol road parallel to the bollard wall.

Additional details of the possible components of the proposed action are as follows:

- **Levee Wall** -The levee wall will be a concrete wall to the height of the levee crest with 18 foot tall bollards installed in the top of the levee wall.
- **Bollard Wall** – The bollard wall will be 20 to 30 feet high utilizing 8-inch diameter, concrete filled steel bollards.
- **150 Foot Enforcement Zone** – The enforcement zone will be an area extending from the south/river side of the levee wall or bollard wall approximately 150 feet. All vegetation within the 150-foot enforcement zone will be cleared.
- **Gates** - Automated vehicle gates will be installed with a minimum height of 18 feet and minimum width of 20 feet. In addition, gates designed to allow for farming equipment will be installed where appropriate and range in width from 40 to 50 feet. All gates will be motorized overhead sliding gates with an enclosed drive and operator system.

- **Lighting** - LED lighting will be installed as part of this project. CBP will work with the appropriate stakeholders to develop solutions to avoid excess lighting beyond the enforcement zone.
- **All Weather Road** - An all-weather aggregate patrol road (type FC-2) will be constructed on the south side and parallel to the levee or bollard wall and within the 150-foot enforcement zone. The specific location of the road within the enforcement zone will be determined during the design phase of the project.
- **Cameras** - A camera surveillance system will be installed to ensure visibility of the enforcement zone and southern approach.

The purpose of the proposed action is to increase CBP's ability to impede or deny illegal border crossings, and to provide improved surveillance and detection capabilities to the areas of greatest risk of illegal cross-border activity located within the US. Border Patrol Rio Grande Valley Sector. The proposed action will be similar to other levee and border wall systems located within the Rio Grande Valley Sector. The proposed action will also support CBPs action under Executive Order (EO) 13767, where CBP is directed to "...secure the southern border of the United States through the immediate construction of a physical wall on the southern border, monitored and supported by adequate personnel so as to prevent illegal immigration, drug and human trafficking, and acts of terrorism."

CBP will evaluate the potential environmental impacts associated with the proposed action. CBP is gathering data and input from state and local government agencies, federal agencies, and Native American Tribes that may be affected by or otherwise have an interest in the proposed actions. Since your agency or organization may have particular knowledge and expertise regarding the potential environmental impacts from CBP's proposed action, your input is sought regarding the likely or anticipated effects to biological, cultural, and natural resources from the implementation of the proposed actions. Your response should include any state and local restrictions, permitting or other requirements with which CBP should consider during project siting, construction, and operation.

This letter is intended to provide initial information for CBP's proposed projects in the Rio Grande Valley and seek comments and concerns from potentially affected parties and interested groups. CBP intends similar outreach in other border regions as projects are identified and defined. Your prompt attention to this request is appreciated. Comments and information will be accepted up to 30 days following the date of this letter. If you have any questions or comments please contact me at commentsenv@cbp.dhs.gov. Please include "RGV Wall and Gates Construction" in the title of your email. Thank you for your cooperation.

Sincerely,

(b) (6)

>
> Monica and Chris have collectively finalized the EA, Chris has already met with ES (Ernesto) to complete the Intra-Service Section 7, so all that remains is preparation and issuance of the SUP. We have not prepared a Draft SUP since we were uncertain whether this project would move forward in light of reduced funding in the FY18 budget for CBP wall/fence. Now, that it appears they are still interested in moving forward with this project, we can prepare the SUP and have it ready for forwarding to you by COB Monday (May 7). Will that work?

being prepared to talk about this effort. I am copying Barbara here as well as my colleague Linda Walker, who is acting Chief of the National Wildlife Refuge System for Cynthia today.

Here is some material from FWS that I think will be helpful to the effort:

- There are 164 miles of U.S Fish & Wildlife Service lands and 10 National Wildlife Refuges directly on the Southwest border.
- Currently 19 Federal Wildlife Officers (FWOs) patrol over 1.9 million acres of National Wildlife Refuges on the Southwest border.

U.S. Customs and Border Protection, for example, operates a sub-station at Cabeza Prieta National Wildlife Refuge in Arizona, and the Service's law enforcement officers have a seamless relationship built over several decades of partnership and working together.

Here's a note we received yesterday from OCO.

"As the Department of Homeland Security, U.S. Border Patrol, and the Department of Interior's Office of Law Enforcement and Security, continue to foster an already strong relationship, both agencies have initiated an effort to coordinate field deployment operations, which will increase situational awareness in a shared capacity within Department of Interior public lands that abut the

international border with Mexico. As Directed by Department of Interior Secretary Ryan Zinke, additional DOI Law Enforcement Officers will be deployed to southwest border public lands in an enhanced posture to support the President's directive for increased enforcement operations along the southwest border, while the border wall is being constructed. These Department of Interior Law Enforcement Officers will be performing their routine missions aimed at protecting public lands, gaining situational awareness on threats entering illegally and traversing national parks, wildlife areas, and wilderness areas while coordinating with the U.S. Border Patrol."

Please let me know if you have any questions. Thanks much.

The quote in bold was shared with us by Russell Newell in OCO after we talked earlier this week about communications and our interests in being prepared to talk about this effort. I am copying Barbara here as well as my colleague Linda Walker, who is acting Chief of the National Wildlife Refuge System for Cynthia today.

Here is some material from FWS that I think will be helpful to the effort:

- There are 164 miles of U.S Fish & Wildlife Service lands and 10 National Wildlife Refuges directly on the Southwest border.
- Currently 19 Federal Wildlife Officers (FWOs) patrol over 1.9 million acres of National Wildlife Refuges on the Southwest border.

U.S. Customs and Border Protection, for example, operates a sub-station at Cabeza Prieta National Wildlife Refuge in Arizona, and the Service's law enforcement officers have a seamless relationship built over several decades of partnership and working together.

Here's a note we received yesterday from OCO.

Subject: [EXTERNAL] Public Facing Statement - DOI support of Border Security Efforts

Good afternoon Brent and Dennis-

This is the public statement that was approved by USBP. We can still work on it if DOI public affairs feels edits are necessary.

Thank you,

(b) (6)
(b) (6)
USBP HQ
LEOD/Ops Central
(b) (6) Desk
(b) (6) Cell

"As the Department of Homeland Security, U.S. Border Patrol, and the Department of Interior's Office of Law Enforcement and Security, continue to foster an already strong relationship, both agencies have initiated an effort to coordinate field deployment operations, which will increase situational awareness in a shared capacity within Department of Interior public lands that abut the international border with Mexico. As

Directed by Department of Interior Secretary Ryan Zinke, additional DOI Law Enforcement Officers will be deployed to southwest border public lands in an enhanced posture to support the President's directive for increased enforcement operations along the southwest border, while the border wall is being constructed. These Department of Interior Law Enforcement Officers will be performing their routine missions aimed at protecting public lands, gaining situational awareness on threats entering illegally and traversing national parks, wildlife areas, and wilderness areas while coordinating with the U.S. Border Patrol."

Please let me know if you have any questions. Thanks much.
jeff

Can you please get some points to Eli. Probably along the lines of how we have worked well with CBP in the past and our shared resources on staffing and refuge lands have been a good collaboration to protect people and resources etc. Due later today thanks.

Subject: CBP Migratory Bird Programmatic Permit Application Documentation

All,

I have attached the documentation and appendices for CBP's Programmatic Permit request.

We are currently working on getting the first page of the Special Purpose – Miscellaneous Permit Application Form signed and should have it to you next week.

Please let me know if there is any additional information or documentation that you require.

Thank you very much for the coordination throughout this effort.

Return to: U.S. Fish and Wildlife Service (USFWS)

Type of Activity: | **Special Purpose – Miscellaneous**

☑ **New Application**
☐ **Requesting Renewal or Amendment of Permit #** _____

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual			
1.a. Last name	1.b. First name	1.c. Middle name or initial	1.d. Suffix
2. Date of birth (mm/dd/yyyy)	3. Social Security No.	4. Occupation	5. Affiliation/ Doing business as (see instructions)
6.a. Telephone number	6.b. Alternate telephone number	6.c. Fax number	6.d. E-mail address

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution			
1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (dba)	
Customs and Border Protection		N/A	
2. Tax identification no.	3. Description of business, agency, or institution		
N/A	Border security law enforcement agency		
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
(b) (6)	(b) (6)	(b) (6) (b) (6)	
5. Principal officer title		6. Primary contact name	
Director, Facilities Management and Engineering		(b) (6)(b) (6)	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address
(b) (6)	(b) (6)	(b) (6)(b) (6)	(b) (6)(b) (6)(b) (6)(b) (6)

C. All applicants complete address information				
1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes)				
(b) (6)(b) (6)(b) (6)(b) (6)				
1.b. City	1.c. State	1.d. Zip code/Postal code:	1.e. County/Province	1.f. Country
Washington	DC	20004	NA	USA
2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)				
(b) (6)(b) (6)(b) (6)(b) (6)(b) (6)(b) (6)				
2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country
Washington	DC	(b) (6)	NA	USA

D. All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE **in the amount** | **$100.00** |. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – ***attach documentation of fee exempt status as outlined in instructions.*** (50 CFR 13.11(d))

2. Do you currently have or have you ever had any Federal Fish and Wildlife permits?
Yes ☑ If "yes," list the number of the most current permit you have held or that you are applying to renew/re-issue: MB37271C-0 No ☐

3. Certification: I hereby certify that I have read and am familiar with the regulations contained in ***Title 50, Part 13 of the Code of Federal Regulations*** and the other ***applicable parts in subchapter B of Chapter I of Title 50***, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

Signature (**in blue ink**) of applicant/person responsible for permit (No photocopied or stamped signatures) — Date of signature (mm/dd/yyyy): 6/8/18

Please continue to next page

SECTION E. SPECIAL PURPOSE - MISCELLANEOUS
(Migratory Bird Treaty Act, 50 CFR 21.27)

Note: A Federal Special Purpose - Miscellaneous permit is required to address migratory bird activities that are not covered by other existing permit types. Activities must benefit the migratory bird resource, address important research, address human concerns for individual birds, or show other compelling justification. You must be at least 18 years of age to apply for a permit. Special Purpose Permits may be valid up to 3 years.

Please provide the following information. You may use the space provided as well as a separate sheet of paper with your responses numbered according to the application questions below. You should be as thorough and specific as possible in your responses. Incomplete applications will be returned, delayed or abandoned.

1. The species (scientific and common name) and quantity of migratory birds, parts, nests, and eggs to be covered by the permit.

2. A detailed description of the project or activity, including the purpose. Include copies of supporting documentation, research proposals, and any other information that may be useful for evaluating your request.

3. The exact location (physical – address and/or GPS coordinates in decimal degree; or geographic, as appropriate) where the activity would be conducted.

4. A full description of your background and expertise in conducting the proposed activities.

5. If live birds will be maintained in captivity, describe the facilities. Attach photographs and diagrams of your enclosures. Diagrams must include dimensions (length, width, and height) and a description of interior and exterior construction materials, such as flooring and netting materials.

6. Indicate the intended disposition of the specimens, including, if applicable, the name and address of the public, scientific, or educational institution to which all specimens ultimately will be donated upon completion of activity.

7. Anyone who will be assisting you with the permitted activities or acting as your agent must either have their own Federal migratory bird permit for the activity or be identified by you, in writing, as a subpermittee under your permit. They may also require a State permit. Subpermittees must be at least 18 years old. As the primary permittee, you will be responsible for ensuring that your subpermittees are properly trained and adhere to the terms of your permit. Provide the name of anyone besides yourself who will be conducting activities under your permit. For anyone handling or caring for live birds, briefly describe what they will be doing and their qualifications.

8. You must retain records relating to the activities conducted under your permit for at least 5 years from the date of expiration of your permit. Is the physical address you provided in Section C on page 1 of this application the address where your records will be kept? Indicate "yes" or "no." If "no," provide the physical address.

9. **Any permit issued as a result of this application is not valid unless you also have any required State or tribal permits or approvals associated with the activity.** Have you obtained all required State or tribal permits or approvals to conduct this activity? **If "yes," attach a copy of the approval(s).** If "no," indicate whether your "have applied" or whether "none is required." **If you "have applied," send a copy when it is issued.**

10. **Disqualification factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c))

    Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above? If not, indicate "no." If you have, indicate "yes," and provide the following: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

PERMIT APPLICATION FORM INSTRUCTIONS

The following instructions pertain to an application for a U.S. Fish and Wildlife Service or CITES permit. The General Permit Procedures in 50 CFR 13 address the permitting process. For simplicity, all licenses, permits, registrations, and certificates are referred to as a permit.

GENERAL INSTRUCTIONS:

- Complete all blocks/lines/questions in Sections A or B, and in C, D, and E.
- **An incomplete application may cause delays in processing or may be returned to the applicant. Be sure you are filling in the appropriate application form for the proposed activity.**
- Print clearly or type in the information. Illegible applications may cause delays.
- Sign the application in blue ink. Faxes or copies of the original signature will not be accepted.
- Mail the original application to the address at the top of page one of the application or if applicable on the attached address list.
- **Keep a copy of your completed application.**
- **Please plan ahead. Allow at least 60 days for your application to be processed. Some applications may take longer than 90 days to process. (50 CFR 13.11)**
- Applications are processed in the order they are received.
- Additional forms and instructions are available from http://permits.fws.gov.

COMPLETE EITHER SECTION A OR SECTION B:

Section A. **Complete if applying as an individual:**

- Enter the complete name of the responsible individual who will be the permittee if a permit is issued. Enter personal information that identifies the applicant. ***Fax and e-mail are not required if not available.***
- If you are applying on behalf of a client, the personal information must pertain to the client, and a document evidencing power of attorney must be included with the application.
- **Affiliation/ Doing business as (dba)**: business, agency, organizational, or institutional affiliation *directly* related to the activity requested in the application (e.g., a taxidermist is an individual whose business can *directly* relate to the requested activity). The Division of Management Authority (DMA) will **not** accept *doing business as* affiliations for individuals.

Section B. **Complete if applying as a business, corporation, public agency, Tribe, or institution:**

- Enter the complete name of the business, agency, Tribe, or institution that will be the permittee if a permit is issued. Give a brief description of the type of business the applicant is engaged in. Provide contact phone number(s) of the business.
- **Principal Officer** is the person in charge of the listed business, corporation, public agency, Tribe, or institution. The principal officer is the person responsible for the application and any permitted activities. Often the principal officer is a Director or President. **Primary Contact** is the person at the business, corporation, public agency, Tribe, or institution who will be available to answer questions about the application or permitted activities. Often this is the preparer of the application.

ALL APPLICANTS COMPLETE SECTION C:

- For all applications submitted to the Division of Management Authority (DMA) a physical U.S. address is **required**. Province and Country blocks are provided for those USFWS programs which use foreign addresses and are not required by DMA.
- **Mailing address** is address where communications from USFWS should be mailed if different than applicant's physical address.

ALL APPLICANTS COMPLETE SECTION D:

Section D.1 **Application processing fee:**

- An application processing fee is required at the time of application; unless exempted under 50 CFR13.11(d)(3). The application processing fee is assessed to partially cover the cost of processing a request. **The fee does not guarantee the issuance of a permit. Fees will not be refunded for applications that are approved, abandoned, or denied.** We may return fees for withdrawn applications prior to any significant processing occurring.
- **Documentation of fee exempt status is not required for Federal, Tribal, State, or local government agencies; but must be supplied by those applicants acting on behalf of such agencies**. Those applicants acting on behalf of such agencies must submit a letter on agency letterhead and signed by the head of the unit of government for which the applicant is acting on behalf, confirming that the applicant will be carrying out the permitted activity for the agency.

Section D.2 **Federal Fish and Wildlife permits:**

- List the number(s) of your most current FWS or CITES permit or the number of the most recent permit if none are currently valid. If applying for re-issuance of a CITES permit, the original permit must be returned with this application.

Section D.3 **CERTIFICATION:**

- **The individual identified in Section A, the principal officer named in Section B, or person with a valid power of attorney (documentation must be included in the application) must sign and date the application in blue ink.** This signature binds the applicant to the statement of certification. This means that you certify that you have read and understand the regulations that apply to the permit. You also certify that everything included in the application is true to the best of your knowledge. Be sure to read the statement and re-read the application and your answers before signing.

ALL APPLICANTS COMPLETE SECTION E.

APPLICATION FOR A FEDERAL FISH AND WILDLIFE PERMIT
Paperwork Reduction Act, Privacy Act, and Freedom of Information Act – Notices

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501, *et seq.*) and the Privacy Act of 1974 (5 U.S.C. 552a), please be advised:

1. The gathering of information on fish and wildlife is authorized by:
(Authorizing statutes can be found at: http://www.gpoaccess.gov/cfr/index.html and http://www.fws.gov/permits/ltr/ltr.html.)

   a. Bald and Golden Eagle Protection Act (16 U.S.C. 668), 50 CFR 22;
   b. Endangered Species Act of 1973 (16 U.S.C. 1531-1544), 50CFR 17;
   c. Migratory Bird Treaty Act (16 U.S.C. 703-712), 50 CFR 21;
   d. Marine Mammal Protection Act of 1972 (16 U.S.C. 1361, *et. seq.*), 50 CFR 18;
   e. Wild Bird Conservation Act (16 U.S.C. 4901-4916), 50 CFR 15;
   f. Lacey Act: Injurious Wildlife (18 U.S.C. 42), 50 CFR 16;
   g. Convention on International Trade in Endangered Species of Wild Fauna and Flora (TIAS 8249), http://www.cites.org , 50 CFR 23;
   h. General Provisions, 50 CFR 10;
   i. General Permit Procedures, 50 CFR 13; and
   j. Wildlife Provisions (Import/export/transport), 50 CFR 14.

2. Information requested in this form is purely voluntary. However, submission of requested information is required in order to process applications for permits authorized under the above laws. Failure to provide all requested information may be sufficient cause for the U.S. Fish and Wildlife Service to deny the request. We may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

3. Certain applications for permits authorized under the Endangered Species Act of 1973 (16 U.S.C. 1539) and the Marine Mammal Protection Act of 1972 (16 U.S.C. 1374) will be published in the **Federal Register** as required by the two laws.

4. Disclosures outside the Department of the Interior may be made without the consent of an individual under the routine uses listed below, if the disclosure is compatible with the purposes for which the record was collected. (Ref. 68 FR 52611, September 4, 2003)

   a. Routine disclosure to subject matter experts, and Federal, Tribal, State, local, and foreign agencies, for the purpose of obtaining advice relevant to making a decision on an application for a permit or when necessary to accomplish an FWS function related to this system of records.
   b. Routine disclosure to the public as a result of publishing **Federal Register** notices announcing the receipt of permit applications for public comment or notice of the decision on a permit application.
   c. Routine disclosure to Federal, Tribal, State, local, or foreign wildlife and plant agencies for the exchange of information on permits granted or denied to assure compliance with all applicable permitting requirements.
   d. Routine disclosure to Captive-bred Wildlife registrants under the Endangered Species Act for the exchange of authorized species, and to share information on the captive breeding of these species.
   e. Routine disclosure to Federal, Tribal, State, and local authorities who need to know who is permitted to receive and rehabilitate sick, orphaned, and injured birds under the Migratory Bird Treaty Act and the Bald and Golden Eagle Protection Act; federally permitted rehabilitators; individuals seeking a permitted rehabilitator with whom to place a bird in need of care; and licensed veterinarians who receive, treat, or diagnose sick, orphaned, and injured birds.
   f. Routine disclosure to the Department of Justice, or a court, adjudicative, or other administrative body or to a party in litigation before a court or adjudicative or administrative body, under certain circumstances.
   g. Routine disclosure to the appropriate Federal, Tribal, State, local, or foreign governmental agency responsible for investigating, prosecuting, enforcing, or implementing statutes, rules, or licenses, when we become aware of a violation or potential violation of such statutes, rules, or licenses, or when we need to monitor activities associated with a permit or regulated use.
   h. Routine disclosure to a congressional office in response to an inquiry to the office by the individual to whom the record pertains.
   i. Routine disclosure to the Government Accountability Office or Congress when the information is required for the evaluation of the permit programs.
   j. Routine disclosure to provide addresses obtained from the Internal Revenue Service to debt collection agencies for purposes of locating a debtor to collect or compromise a Federal claim against the debtor or to consumer reporting agencies to prepare a commercial credit report for use by the FWS.

5. For individuals, personal information such as home address and telephone number, financial data, and personal identifiers (social security number, birth date, etc.) will be removed prior to any release of the application.

6. The public reporting burden on the applicant for information collection varies depending on the activity for which a permit is requested. The relevant burden for a Special Purpose – Miscellaneous permit application is 2 hours and 30 minutes for recordkeeping. This burden estimate includes time for reviewing instructions, gathering and maintaining data and completing and reviewing the form. You may direct comments regarding the burden estimate or any other aspect of the form to the Service Information Clearance Officer, U.S. Fish and Wildlife Service, Mail Stop 222, Arlington Square, U.S. Department of the Interior, 1849 C Street, NW, Washington D.C. 20240.

Freedom of Information Act – Notice

For organizations, businesses, or individuals operating as a business (i.e., permittees not covered by the Privacy Act), we request that you identify any information that should be considered privileged and confidential business information to allow the Service to meet its responsibilities under FOIA. Confidential business information must be clearly marked "Business Confidential" at the top of the letter or page and each succeeding page and must be accompanied by a non-confidential summary of the confidential information. The non-confidential summary and remaining documents may be made available to the public under FOIA [43 CFR 2.26 – 2.33].

All,

I have attached the documentation and appendices for CBP's Programmatic Permit request.

We are currently working on getting the first page of the Special Purpose – Miscellaneous Permit Application Form signed and should have it to you next week.

Please let me know if there is any additional information or documentation that you require.

Thank you very much for the coordination throughout this effort.

As you may have heard, I have been on vacation for the past week and am just getting back to he office. I will be responding to emails over the next few days. I just came acrc down in Naco, AZ last week A yearling bear was seen climbing the fence and walking along the top for a few minutes It then climbed down and walked away

This picture was release to the media and has circulated, but I wanted to make sure y'all saw it too Have a great day!

Good morning everyone,

This is just an FYI, I didn't know if you already knew of the Burrowing Owl colony along the border where fence construction is taking place. We are working with the San Diego Zoo to try to save the remaining owls. They have a permit that allows burrowing owl relocation research, so I am planning to increase the authorization on that permit to cover all of the remaining owls at the border.

I'm available today, tomorrow, and Thursday this week if you have any questions.

Best,
Jen

Hi Amedee and Thomas,

Susan Wynn went down to an area of the border fence in San Diego that is being replaced and discovered that the work was proceeding in an area that has a high density of Burrowing Owls nesting. The work had already bulldozed one area with many Burrowing Owls. She surveyed the next segment where work is slotted to begin and observed 30 or so Owls. Susan is going to coordinate with the San Diego Zoo which holds a permit to capture and relocate Owls to rescue as many of the Burrowing Owls as they can next week. They are going to put out cameras to try to identify which burrows are active. Susan said that the Zoo would send us a summary of what they found and what they planned to do on Monday. The Zoo had identified a relocation site that will be protected in the Otay Mesa area. On the positive side, the border patrol has granted access for the relocation effort, though it doesn't sound like the work will be slowed at all. I told Karen Goebel that this would probably be covered by the recent Nest Destruction Memo, but please let me know if we

should try to issue an additional permit or extension for the Zoo permits. I cc'd Jen and Rob in case she has any recommendations about permits.

In any case, I just got this news and thought I would share it even if my quick second-hand summary is not completely accurate. I'll keep you posted as I get more information.

Sorry for the bad news late on a Friday!

Tom

Hello everyone,
Here is an update from our site visit on Friday. We plan to return Monday afternoon (around 1 pm) to place cameras for additional observations of the owls to better understand which owls have young juveniles, etc.

I've attached a spreadsheet with all of the details, but here is a summary of how many owls were observed (between 6/25 visit and 6/29 visit):

10 pairs/families
2 single adults
1+ dispersing fledglings
Total of 47 BUOW observed so far (22 adults, 25 juveniles)

We used light pole numbers or fence panel numbers to identify where the owls are (Location column is spreadsheet).

In the field, we discussed a couple of different activities that will be occurring that may/will impact the owls. In order to plan appropriately, we need a better understanding of the timeline of these activities and how much disturbance they will cause. We identified these activities as:

1. Breaking up of concrete along primary fence
2. Work on Low Water Crossings
3. Staging of materials for fence
4. Removal/replacement of primary fence

We have put together the schedule below (per the field meeting with Susan, Pat, (b)(6) and (b)(6)), but the specifics of our trapping efforts will depend on the timelines for the activities above. It would be helpful to know if the breaking up of the concrete will continue immediately and how fast it will occur.

This acvity is lik ely to cause disturbance in the immediate area where it's occurring, and will destroy the 2 burrows that are at the base of the primary fence (panel 858, panel 936/937), so we would want to prioriz e burrows in the order they will be disturbed. This is also the case for the repairs on the low water crossings and it would be helpful to know the size of the areas of impact, the ming , and types of acvies (hea vy equipment work, etc.). If we can map all of this out in space and me, w e can come up with a strategy for geng the o wls out of harm's way in the most effecv e and safe manner

Schedule for Zoo and Agencies
7/2 (Monday): prep receiver sites/burrows--USFWS, CDFW?
7/5 & 7/6 (Thursday/Friday): install release cages (up to 5) at receiver sites--Zoo, USFWS?, CDFW?
7/9 (Monday): begin trapping of owls for translocation (actives) or transmitter application (passives)--Zoo
7/10 and beyond: Trapping will continue as long as necessary--Zoo
TBD: exclusion of burrows--who is responsible for this?
TBD: scoping and collapse of burrows--who is responsible for this?
TBD: Further planning/strategies to discourage recolonization of squirrels and owls ahead of the planned replacement of the secondary fence in early 2019

Our trapping efforts can happen both during the day and night depending on which birds we are targeng.

Thank you for working with us to try to get the owls out of the way ahead of the work that's occurring Please let me know if you have any quesons about our schedule or s trategy for removing the owls.

Thank you,
Colleen

Hi (b)(6), et al - I'm thinking it might be helpful to meet in person to talk things through rather then trying to play phone tag - Pat and I could come down tomorrow am and meet with you all - Do you have an estimate of when you might be there? If not - the phone is always an option.
thanks
Susan

Hi (b)(6)

Thanks for giving us access to the area. After discussing the owls east of the Otay border crossing with Susan and Dave Mayer (CDFW), the next step for the zoo team is to do more observations to determine the numbers and ages of the juveniles to determine further next steps. Would it be possible for us to get access to the area on Friday to conduct observations of the owls?

Thanks,

Colleen

Colleen and Susan: thanks for the support today. Please keep (b)(6) in the loop on your next steps. We have some work in one of the low water crossings east of Otay Mesa in mid-July (will be near but not where some owls are currently). We will be moving into full construction in the area in early August.

Thanks

Hello everyone,

I hope all of you had a wonderful 4th! Here is a BUOW update at the Otay border fence project in S. CA.

I will be doing a detail in another program for the next 3 weeks, but I will do my best to stay on top of this and continue passing along the info that comes in.

I hope everyone has a good weekend!

Hi Jen and Esther,
I've been working on putting the translocation document for the border fence replacement project together but it's going a little slower than I anticipated with all of the work we're doing in the field right now. I'll send the whole thing to you once it's complete, but I wanted to make sure you had the info you need.

We are planning to move 2 family groups from the fence area (see yellow lines in table) starting tonight and the others will be passively relocated. We got 3 transmitters out last night on some of those birds and will continue to try to get transmitters on a few more so we can better understand where they go in response to the work on the fence. We are working closely with USFWS and

CDFW to do the best we can in terms of getting birds out of harm's way and collapsing burrow to the extent possible.

Below is a table with the maximum numbers of adults and juveniles we've observed since our observations began on June 25 and I've attached maps of the impact area and release area.

Please let us know if there's any other info you need immediately.
Thanks,
Colleen

P.S. Jen, thank you for amending our MBTA permit!

Locaon	Max Adults Seen	Max Juveniles Seen	Notes		Translocaon T ype
Light 16-19	2	4 fledglings	Concrete removal work occurred in this area on 7/2/18 and the owls seem to have le.		Passive
Panel 500A	1	1 fledgling	burrow near grade stake; fledgling may be from 16-19 family		Passive
Light 27/28	2		freshly molted, may be past breeding, camera installaon not possible		Probable Passive
Light 30	2 (male=A/41)	unknown	owls molng , may be past breeding		Possible Passive
Light 35	2 (female=81/Y)	3 fledglings			Passive
Light 38/39	2	3 fledglings			Passive
Light 41	2	unknown			TBD
Light 42	2	unknown	owls molng , may be past breeding; adults prey vocal		Possible Passive
Panel 858	2	5 juveniles	burrow at primary fence		Acv e
Light 47	2	5-6 juveniles			Acv e
Light 48	2			These seem to be 2 families that have merged	TBD
Panel 936/937	2	4 fledglings	burrow at primary fence		Passive

Looks like it's our day for big media inquiries. I'm checking with our regional folks and also with our FOIA lead to see whether a draft of a letter should have been released to begin with. Nevertheless, we are left with needing to respond to this inquiry. Usually, we bump border wall stuff to CBP, but we aren't going to be able to do this here. Thoughts?

From: **Grandoni, Dino** <Dino.Grandoni@washpost.com>
Date: Fri, Dec 7, 2018 at 11:33 AM
Subject: [EXTERNAL] Question from WaPo reporter about letter sent to CBP about south Texas border wall
To: Gavin_Shire@fws.gov <Gavin_Shire@fws.gov>, Laury_Parramore@fws.gov <Laury_Parramore@fws.gov>, Vanessa_Kauffman@fws.gov <Vanessa_Kauffman@fws.gov>

Hi all,

Hope you're all well today. I'm writing in to ask about a pair of letters — one draft and the other final — related to a proposed border wall in southern Texas.

On Aug. 25, 2017, U.S. Customs and Border Patrol sent a letter to the U.S. Fish and Wildlife Service seeking the agency's input on the environmental impacts of constructing 28 miles of levee wall in Hidalgo County and 32 miles of bollard wall in Starr County (Doc 1 attached).

According to a draft letter released under the Freedom of Information Act to Defenders of Wildlife and other litigants, USFWS staffers drafted a letter in Sept. 2017 outlining their concerns, which included reduction of habitat connectivity, flood and fire risk and direct mortality for animals in the area (Doc 2).

However, the final letter sent to CBP dated Oct. 13 did not included those risks listed above (Doc 3).

My questions: Why did the USFWS decide to edit those risks out of the final letter? And who made that decision?

Feel free to give me a call at 716-818-0825 if you have any questions for me.

All the best,
Dino

AUG 25 2017

U.S. Customs and Border Protection

Mr. Robert Jess
United States Fish and Wildlife Service
Lower Rio Grande Valley National Wildlife Refuge
3325 Green Jay Road
Alamo, TX 78516

Dear Mr. Jess:

U.S. Customs and Border Protection (CBP) is in the initial stages of planning for proposed levee wall along 28 miles of existing levee located in Hidalgo County, Texas within the U.S. Border Patrol's McAllen and Weslaco stations area of responsibility (AOR) and 32 miles of bollard wall in Starr County, Texas within the U.S. Border Patrol's Rio Grande City station AOR. In addition, CBP is in the planning stages of its second phase of gate installation to close 35 gaps in existing border fence in Hidalgo and Cameron counties. The 35 gates were funded in CBP's fiscal year (FY) 2017 appropriation, while the proposed 28 miles of levee wall and 32 miles of bollard wall are included in the President's FY18 budget request to Congress.

In Hidalgo County, CBP is proposing 28 miles of levee wall. The proposed levee wall alignment will be on the south face of the northern U.S. International Boundary Water Commission (IBWC) levee. The proposed design includes construction of a reinforced concrete levee wall to the height of the existing levee with 18-foot tall steel bollards installed on the top of the levee wall, a possible 150-foot enforcement zone on the south/river side of the levee wall, detection technology, enforcement zone lighting, video surveillance, automated vehicle gates, pedestrian gates, and an all-weather patrol road parallel to the levee wall. In addition, CBP will install gates within 20 gaps in existing border levee wall within Hidalgo County and in 15 existing gaps within Cameron County.

In Starr County, CBP is proposing 32 miles of bollard wall. The proposed design includes construction of 20 to 30-foot tall steel bollards, a possible 150-foot enforcement zone on the south/river side of the bollard wall, detection technology, enforcement zone lighting, video surveillance, and an all-weather patrol road parallel to the bollard wall.

Additional details of the possible components of the proposed action are as follows:

- **Levee Wall** -The levee wall will be a concrete wall to the height of the levee crest with 18 foot tall bollards installed in the top of the levee wall.
- **Bollard Wall** – The bollard wall will be 20 to 30 feet high utilizing 8-inch diameter, concrete filled steel bollards.
- **150 Foot Enforcement Zone** – The enforcement zone will be an area extending from the south/river side of the levee wall or bollard wall approximately 150 feet. All vegetation within the 150-foot enforcement zone will be cleared.
- **Gates** - Automated vehicle gates will be installed with a minimum height of 18 feet and minimum width of 20 feet. In addition, gates designed to allow for farming equipment will be installed where appropriate and range in width from 40 to 50 feet. All gates will be motorized overhead sliding gates with an enclosed drive and operator system.

- **Lighting** - LED lighting will be installed as part of this project. CBP will work with the appropriate stakeholders to develop solutions to avoid excess lighting beyond the enforcement zone.
- **All Weather Road** - An all-weather aggregate patrol road (type FC-2) will be constructed on the south side and parallel to the levee or bollard wall and within the 150-foot enforcement zone. The specific location of the road within the enforcement zone will be determined during the design phase of the project.
- **Cameras** - A camera surveillance system will be installed to ensure visibility of the enforcement zone and southern approach.

The purpose of the proposed action is to increase CBP's ability to impede or deny illegal border crossings, and to provide improved surveillance and detection capabilities to the areas of greatest risk of illegal cross-border activity located within the US. Border Patrol Rio Grande Valley Sector. The proposed action will be similar to other levee and border wall systems located within the Rio Grande Valley Sector. The proposed action will also support CBPs action under Executive Order (EO) 13767, where CBP is directed to "...secure the southern border of the United States through the immediate construction of a physical wall on the southern border, monitored and supported by adequate personnel so as to prevent illegal immigration, drug and human trafficking, and acts of terrorism."

CBP will evaluate the potential environmental impacts associated with the proposed action. CBP is gathering data and input from state and local government agencies, federal agencies, and Native American Tribes that may be affected by or otherwise have an interest in the proposed actions. Since your agency or organization may have particular knowledge and expertise regarding the potential environmental impacts from CBP's proposed action, your input is sought regarding the likely or anticipated effects to biological, cultural, and natural resources from the implementation of the proposed actions. Your response should include any state and local restrictions, permitting or other requirements with which CBP should consider during project siting, construction, and operation.

This letter is intended to provide initial information for CBP's proposed projects in the Rio Grande Valley and seek comments and concerns from potentially affected parties and interested groups. CBP intends similar outreach in other border regions as projects are identified and defined. Your prompt attention to this request is appreciated. Comments and information will be accepted up to 30 days following the date of this letter. If you have any questions or comments please contact me at commentsenv@cbp.dhs.gov. Please include "RGV Wall and Gates Construction" in the title of your email. Thank you for your cooperation.

Sincerely,

(b) (6)

(b) (6)(b) (6)(b) (6)
(b) (6)(b) (6)

Dear (b) (6) :

Thank you for your letter dated August 25, 2017, regarding U.S. Customs and Border Protection's (CBP) proposed border infrastructure in South Texas which includes the installation of 35 gates in existing border fence gaps, 32 miles of bollard wall, and 28 miles of levee wall. The U.S. Fish and Wildlife Service (Service) reviewed your letter and is providing our initial concerns related to Federally listed species, other Federal trust resources, and Santa Ana and Lower Rio Grande Valley National Wildlife Refuges (NWR). Once there is a proposed action, that is spatially explicit, we can provide a formal response and coordination under the National Environmental Policy Act, National Wildlife Refuge System (Refuge System) Improvement Act, Migratory Bird Treaty Act, and Endangered Species Act.

Over the past several years, there has been a substantial increase in coordination between the Service, CBP, and the U.S. Border Patrol Rio Grande Valley Sector along the Texas border. The Service appreciates the excellent communication and information sharing that has occurred and looks forward to maintaining this relationship into the future.

The Refuge System lands in the Lower Rio Grande Valley are considered to be one of the most biodiverse in the continental United States. The Service supports CBP addressing direct and indirect impacts of the proposed border activities on Federally listed species and other Federal trust resources in the project area. In general, concerns are similar to those discussed during initial border wall/fence construction in 2008. The Service will continue to work with CBP on the proposed activities, with a focus on ensuring impacts to Santa Ana and Lower Rio Grande Valley NWRs and its ecotourism-based economy are analyzed and minimized, to the extent possible.

In response to the possible components of the proposed action identified in your letter, the Service's informal comments are as follows:

<u>Levee and bollard walls</u>
In general, the Service recommends considering technology, additional border patrol agents and other mechanisms, when possible, instead of installation of levee or bollard walls.

Connectivity
The Service understands that 10.2 miles of border wall will be constructed on Santa Ana and Lower Rio Grande Valley NWRs in Hidalgo County, Texas. The Service does not currently have information on specific alignments on Lower Rio Grande Valley NWR in Starr County. Currently, there are 34 miles of existing levee wall in Hidalgo County; the proposed 28 mile addition would result in 62 miles of impermeable barrier, precluding access to habitats by the Federally listed endangered ocelot and jaguarundi, along with other terrestrial species. Reduction of habitat connectivity in portions of the existing wildlife corridor will affect ocelot and jaguarundi movement, impact access to traditional water sources, and reduce potential for gene flow. The Service recommends wildlife openings to allow ocelots, jaguarundis and other wildlife to move through the wall to maintain habitat connectivity.

In Hidalgo County, Santa Ana NWR will be bisected, with substantial acreage south of the proposed wall and less acreage north of the wall. Any acres north of the wall that do not have habitat corridors will represent a direct loss of habitat particularly for ocelots and jaguarundis on refuge land in Texas. The Service requests CBP document and assess these impacts for Starr County when the border wall alignments are determined.

Flooding
The Lower Rio Grande Valley is a flood-prone area. The Service is concerned the levee wall in Hidalgo County could be subject to catastrophic natural flood events, leaving terrestrial wildlife trapped behind the levee wall to drown or starve. This project will likely cause widespread mortality for terrestrial organisms during catastrophic flood events. The Service recommends an assessment of escape routes and consideration of constructing elevated berms south of the levee to allow terrestrial animals to retreat from rising waters during flooding events, as well as leaving the gates open during those events.

Fire
The Santa Ana and Lower Rio Grande Valley NWRs experience numerous wildfires each year. Fighting wildfire is dangerous, particularly if escape routes are limited due to a border wall. Natural resource protection may be impacted due to public safety and challenges of fighting wildfires south of a border wall.

Direct Mortality
The Service requests best management practices, such as capping hollow bollard/posts, during construction to prevent entrapment of wildlife species during placement of vertical posts/bollards.

Socio-economic & Visitor Impacts
The Service is specifically concerned with potential tourism and visitor impacts. Ongoing efforts by the Service, the state of Texas, private landowners, and non-profit organizations have helped create a wildlife corridor linking numerous isolated habitat fragments in the Lower Rio Grande Valley. These efforts have helped produce habitats that are harboring unique species of plants and animals, making the area a destination for ecotourists.

The economics of Lower Rio Grande Valley wildlife and habitat diversity are important to the international border region, as over 150,000 tourists contribute approximately $10.8 million annually to the regional economy. The Santa Ana NWR is the most accessible public land for residents of Hidalgo County and approximately 70 percent of visitors come from outside of the local area. Visitors participating in outdoor recreational activities economically benefit the local community. The Service recommends a socio-economic analysis of the proposed wall.

Construction of the border wall, as proposed, will likely affect visitation and the quality of visitor experience. Construction of the border wall along the levee will separate the Santa Ana NWR visitor

center and all administrative facilities (equipment storage, residences, parking lots, etc.) from the rest of the refuge (99 percent of refuge lands). The proposal could result in visitors entering and exiting Santa Ana NWR through a large gate, similar to going through a security checkpoint. This could result in a reduction in visitation due to a perceived unsafe and unwelcoming atmosphere.

Enforcement Zones

Construction of a 150-foot enforcement zone will directly remove habitat. The enforcement zone will also create barriers and restrict wildlife movement, especially for species such as ocelots, which require dense brush to travel through. The Service recommends minimizing this zone, as operations allow, especially in and near thick thornscrub and walking trails. We also recommend calculating the direct habitat loss of the 150-foot enforcement zone based on a vegetation and endangered species survey. The proposed cleared enforcement zone in Hidalgo County will directly remove approximately 170 acres of habitat from Lower Rio Grande Valley and Santa Ana NWRs reducing the ability to meet refuge purposes. In Hidalgo County, Refuge System lands will have approximately 7,800 acres south of the proposed wall and 2,400 acres north of the wall. The 2,400 acres represent a direct loss of habitat for ocelots and jaguarundis on Refuge System lands in Texas.

Lighting

Increased lighting at night, along the wall, will likely have negative impacts on ocelot, jaguarundi and other nocturnal species by making them more susceptible to predation. The Service recommends down shielding lights to focus away from thornscrub habitat and shining lights only within the enforcement zone. The Service recommends CBP continue to analyze the effects of lighting to nocturnal wildlife and work with the Service to minimize impacts.

All Weather Roads

The Service recommends the width of all roads created or maintained by CBP be measured and recorded using Geographic Information System (GPS) coordinates and integrated into the CBP GPS database. The Service suggests maintenance actions not increase the width of the roadbed or the amount of disturbed area beyond the roadbed. The all-weather road within the enforcement zone is capable of high speed use, causing concern for public safety and increased wildlife mortality. The Service requests coordination to address speeding issues.

We appreciate the opportunity to provide informal comments and look forward to future opportunities to discuss the proposed project. Please feel free to contact me at 505-248-6282 if I can be of further assistance.

Sincerely,

Regional Director

Dear (b) (6)(b) (6)

Thank you for your letter dated August 25, 2017, regarding U.S. Customs and Border Protection's (CBP) proposed border infrastructure in South Texas which includes the installation of 35 gates in existing border fence gaps, 32 miles of bollard wall, and 28 miles of levee wall. The U.S. Fish and Wildlife Service (Service) reviewed your letter and is providing our initial concerns related to Federally listed species, other Federal trust resources, and Santa Ana and Lower Rio Grande Valley National Wildlife Refuges (NWR). Once there is a spatially explicit proposed action, assuming no waiver is issued by Department of Homeland Security, we can provide a formal response and coordination under applicable Federal laws, including the National Environmental Policy Act, National Wildlife Refuge System (Refuge System) Improvement Act, Migratory Bird Treaty Act, and Endangered Species Act.

Over the past several years, there has been a substantial increase in coordination between the Service, CBP, and the U.S. Border Patrol Rio Grande Valley Sector along the Texas border. The Service appreciates the excellent communication and information sharing that has occurred and looks forward to maintaining this relationship into the future.

The Refuge System lands in the Lower Rio Grande Valley are considered to be one of the most biodiverse in the continental United States. In general, our concerns are similar to those discussed during initial border wall/fence construction in 2008. The Service will continue to work with CBP on the proposed activities, with a focus on ensuring impacts to Santa Ana and Lower Rio Grande Valley NWRs are analyzed and minimized, to the extent possible.

Socio-economic & Visitor Impacts
The Service is specifically concerned with potential tourism and visitor impacts on the affected NWRs. Ongoing efforts by the Service, the state of Texas, private landowners, and non-profit organizations have helped create a wildlife corridor linking numerous isolated habitat fragments in the Lower Rio Grande Valley. These efforts have helped produce habitats that are harboring unique species of plants and animals, making the area a destination for ecotourists.

The economics of Lower Rio Grande Valley wildlife and habitat diversity are important to the international border region, as over 150,000 tourists contribute approximately $10.8 million annually to the regional economy. The Santa Ana NWR is the most accessible public land for residents of Hidalgo County and approximately 70 percent of visitors come from outside of the local area. Visitors participating in outdoor recreational activities economically benefit the local community.

Construction of the border wall, as proposed, will likely affect visitation and the quality of visitor experience to the affected NWRs. Construction of the border wall along the levee will separate the Santa Ana NWR visitor center and all administrative facilities (equipment storage, residences, parking lots, etc.) from the rest of the refuge (99 percent of refuge lands). The proposal could result in visitors entering and exiting Santa Ana NWR through a large gate, similar to going through a security checkpoint. This could result in a reduction in visitation due to a perceived unsafe and unwelcoming atmosphere, which in turn could impact local economies.

Enforcement Zones
Construction of a 150-foot enforcement zone will directly remove habitat used by threatened and/or endangered species and other wildlife in the area. The enforcement zone will also create barriers and restrict wildlife movement, especially for species such as ocelots, which require dense brush to travel through. The Service recommends minimizing this zone, as operations allow, especially in and near thick thornscrub and walking trails. We also recommend calculating the direct habitat loss of the 150-foot enforcement zone based on a vegetation and endangered species survey. The proposed cleared enforcement zone in Hidalgo County will directly remove approximately 170 acres of habitat from Lower Rio Grande Valley and Santa Ana NWRs reducing the ability to meet refuge purposes and impacting the visitor experience. The Service recommends leaving vegetated areas near entrances and exits to public use areas to mitigate the potential impacts to the visiting public and quality of their experience.

Lighting
Increased lighting at night, along the wall, will likely have negative impacts on ocelot, jaguarundi and other nocturnal species by making them more susceptible to predation. The Service recommends down shielding lights to focus away from thornscrub habitat and shining lights only within the enforcement zone. The Service recommends CBP continue to analyze the effects of lighting to nocturnal wildlife and work with the Service to minimize impacts.

All Weather Roads
The Service recommends the width of all roads created or maintained by CBP be measured and recorded using Geographic Information System (GPS) coordinates and integrated into the CBP

GPS database. The Service suggests maintenance actions not increase the width of the roadbed or the amount of disturbed area beyond the roadbed. The all-weather road within the enforcement zone is capable of high speed use, causing concern for public safety and increased wildlife mortality. The Service requests coordination to address speeding issues, especially near high visitor use areas.

The Service's comments in this letter are based upon general information we have been given to date. The Service may change these comments and opinions depending on more specific information regarding the border wall that we expect will be provided by CBP in the future. We appreciate the opportunity to provide informal comments and look forward to continued coordination on the proposed project. Please feel free to contact me at 505-248-6282 if I can be of further assistance.

Sincerely,

Hi all,

Hope you're all well today. I'm writing in to ask about a pair of letters — one draft and the

other final — related to a proposed border wall in southern Texas.

On Aug. 25, 2017, U.S. Customs and Border Patrol sent a letter to the U.S. Fish and Wildlife Service seeking the agency's input on the environmental impacts of constructing 28 miles of levee wall in Hidalgo County and 32 miles of bollard wall in Starr County (Doc 1 attached).

According to a draft letter released under the Freedom of Information Act to Defenders of Wildlife and other litigants, USFWS staffers drafted a letter in Sept. 2017 outlining their concerns, which included reduction of habitat connectivity, flood and fire risk and direct mortality for animals in the area (Doc 2).

However, the final letter sent to CBP dated Oct. 13 did not included those risks listed above (Doc 3).

My questions: Why did the USFWS decide to edit those risks out of the final letter? And who made that decision?

Feel free to give me a call at 716-818-0825 if you have any questions for me.

All the best,
Dino

(b) (6)(b) (6)(b) (6)

AUG 25 2017

U.S. Customs and Border Protection

Mr. Robert Jess
United States Fish and Wildlife Service
Lower Rio Grande Valley National Wildlife Refuge
3325 Green Jay Road
Alamo, TX 78516

Dear Mr. Jess:

U.S. Customs and Border Protection (CBP) is in the initial stages of planning for proposed levee wall along 28 miles of existing levee located in Hidalgo County, Texas within the U.S. Border Patrol's McAllen and Weslaco stations area of responsibility (AOR) and 32 miles of bollard wall in Starr County, Texas within the U.S. Border Patrol's Rio Grande City station AOR. In addition, CBP is in the planning stages of its second phase of gate installation to close 35 gaps in existing border fence in Hidalgo and Cameron counties. The 35 gates were funded in CBP's fiscal year (FY) 2017 appropriation, while the proposed 28 miles of levee wall and 32 miles of bollard wall are included in the President's FY18 budget request to Congress.

In Hidalgo County, CBP is proposing 28 miles of levee wall. The proposed levee wall alignment will be on the south face of the northern U.S. International Boundary Water Commission (IBWC) levee. The proposed design includes construction of a reinforced concrete levee wall to the height of the existing levee with 18-foot tall steel bollards installed on the top of the levee wall, a possible 150-foot enforcement zone on the south/river side of the levee wall, detection technology, enforcement zone lighting, video surveillance, automated vehicle gates, pedestrian gates, and an all-weather patrol road parallel to the levee wall. In addition, CBP will install gates within 20 gaps in existing border levee wall within Hidalgo County and in 15 existing gaps within Cameron County.

In Starr County, CBP is proposing 32 miles of bollard wall. The proposed design includes construction of 20 to 30-foot tall steel bollards, a possible 150-foot enforcement zone on the south/river side of the bollard wall, detection technology, enforcement zone lighting, video surveillance, and an all-weather patrol road parallel to the bollard wall.

Additional details of the possible components of the proposed action are as follows:

- **Levee Wall** -The levee wall will be a concrete wall to the height of the levee crest with 18 foot tall bollards installed in the top of the levee wall.
- **Bollard Wall** – The bollard wall will be 20 to 30 feet high utilizing 8-inch diameter, concrete filled steel bollards.
- **150 Foot Enforcement Zone** – The enforcement zone will be an area extending from the south/river side of the levee wall or bollard wall approximately 150 feet. All vegetation within the 150-foot enforcement zone will be cleared.
- **Gates** - Automated vehicle gates will be installed with a minimum height of 18 feet and minimum width of 20 feet. In addition, gates designed to allow for farming equipment will be installed where appropriate and range in width from 40 to 50 feet. All gates will be motorized overhead sliding gates with an enclosed drive and operator system.

- **Lighting** - LED lighting will be installed as part of this project. CBP will work with the appropriate stakeholders to develop solutions to avoid excess lighting beyond the enforcement zone.
- **All Weather Road** - An all-weather aggregate patrol road (type FC-2) will be constructed on the south side and parallel to the levee or bollard wall and within the 150-foot enforcement zone. The specific location of the road within the enforcement zone will be determined during the design phase of the project.
- **Cameras** - A camera surveillance system will be installed to ensure visibility of the enforcement zone and southern approach.

The purpose of the proposed action is to increase CBP's ability to impede or deny illegal border crossings, and to provide improved surveillance and detection capabilities to the areas of greatest risk of illegal cross-border activity located within the US. Border Patrol Rio Grande Valley Sector. The proposed action will be similar to other levee and border wall systems located within the Rio Grande Valley Sector. The proposed action will also support CBPs action under Executive Order (EO) 13767, where CBP is directed to "...secure the southern border of the United States through the immediate construction of a physical wall on the southern border, monitored and supported by adequate personnel so as to prevent illegal immigration, drug and human trafficking, and acts of terrorism."

CBP will evaluate the potential environmental impacts associated with the proposed action. CBP is gathering data and input from state and local government agencies, federal agencies, and Native American Tribes that may be affected by or otherwise have an interest in the proposed actions. Since your agency or organization may have particular knowledge and expertise regarding the potential environmental impacts from CBP's proposed action, your input is sought regarding the likely or anticipated effects to biological, cultural, and natural resources from the implementation of the proposed actions. Your response should include any state and local restrictions, permitting or other requirements with which CBP should consider during project siting, construction, and operation.

This letter is intended to provide initial information for CBP's proposed projects in the Rio Grande Valley and seek comments and concerns from potentially affected parties and interested groups. CBP intends similar outreach in other border regions as projects are identified and defined. Your prompt attention to this request is appreciated. Comments and information will be accepted up to 30 days following the date of this letter. If you have any questions or comments please contact me at commentsenv@cbp.dhs.gov. Please include "RGV Wall and Gates Construction" in the title of your email. Thank you for your cooperation.

Sincerely,

(b) (6)

U.S. Customs and Border Protection
(b) (6)(b) (6)(b) (6)
(b) (6)(b) (6)

Dear (b) (6) :

Thank you for your letter dated August 25, 2017, regarding U.S. Customs and Border Protection's (CBP) proposed border infrastructure in South Texas which includes the installation of 35 gates in existing border fence gaps, 32 miles of bollard wall, and 28 miles of levee wall. The U.S. Fish and Wildlife Service (Service) reviewed your letter and is providing our initial concerns related to Federally listed species, other Federal trust resources, and Santa Ana and Lower Rio Grande Valley National Wildlife Refuges (NWR). Once there is a proposed action, that is spatially explicit, we can provide a formal response and coordination under the National Environmental Policy Act, National Wildlife Refuge System (Refuge System) Improvement Act, Migratory Bird Treaty Act, and Endangered Species Act.

Over the past several years, there has been a substantial increase in coordination between the Service, CBP, and the U.S. Border Patrol Rio Grande Valley Sector along the Texas border. The Service appreciates the excellent communication and information sharing that has occurred and looks forward to maintaining this relationship into the future.

The Refuge System lands in the Lower Rio Grande Valley are considered to be one of the most biodiverse in the continental United States. The Service supports CBP addressing direct and indirect impacts of the proposed border activities on Federally listed species and other Federal trust resources in the project area. In general, concerns are similar to those discussed during initial border wall/fence construction in 2008. The Service will continue to work with CBP on the proposed activities, with a focus on ensuring impacts to Santa Ana and Lower Rio Grande Valley NWRs and its ecotourism-based economy are analyzed and minimized, to the extent possible.

In response to the possible components of the proposed action identified in your letter, the Service's informal comments are as follows:

<u>Levee and bollard walls</u>
In general, the Service recommends considering technology, additional border patrol agents and other mechanisms, when possible, instead of installation of levee or bollard walls.

Connectivity
The Service understands that 10.2 miles of border wall will be constructed on Santa Ana and Lower Rio Grande Valley NWRs in Hidalgo County, Texas. The Service does not currently have information on specific alignments on Lower Rio Grande Valley NWR in Starr County. Currently, there are 34 miles of existing levee wall in Hidalgo County; the proposed 28 mile addition would result in 62 miles of impermeable barrier, precluding access to habitats by the Federally listed endangered ocelot and jaguarundi, along with other terrestrial species. Reduction of habitat connectivity in portions of the existing wildlife corridor will affect ocelot and jaguarundi movement, impact access to traditional water sources, and reduce potential for gene flow. The Service recommends wildlife openings to allow ocelots, jaguarundis and other wildlife to move through the wall to maintain habitat connectivity.

In Hidalgo County, Santa Ana NWR will be bisected, with substantial acreage south of the proposed wall and less acreage north of the wall. Any acres north of the wall that do not have habitat corridors will represent a direct loss of habitat particularly for ocelots and jaguarundis on refuge land in Texas. The Service requests CBP document and assess these impacts for Starr County when the border wall alignments are determined.

Flooding
The Lower Rio Grande Valley is a flood-prone area. The Service is concerned the levee wall in Hidalgo County could be subject to catastrophic natural flood events, leaving terrestrial wildlife trapped behind the levee wall to drown or starve. This project will likely cause widespread mortality for terrestrial organisms during catastrophic flood events. The Service recommends an assessment of escape routes and consideration of constructing elevated berms south of the levee to allow terrestrial animals to retreat from rising waters during flooding events, as well as leaving the gates open during those events.

Fire
The Santa Ana and Lower Rio Grande Valley NWRs experience numerous wildfires each year. Fighting wildfire is dangerous, particularly if escape routes are limited due to a border wall. Natural resource protection may be impacted due to public safety and challenges of fighting wildfires south of a border wall.

Direct Mortality
The Service requests best management practices, such as capping hollow bollard/posts, during construction to prevent entrapment of wildlife species during placement of vertical posts/bollards.

Socio-economic & Visitor Impacts
The Service is specifically concerned with potential tourism and visitor impacts. Ongoing efforts by the Service, the state of Texas, private landowners, and non-profit organizations have helped create a wildlife corridor linking numerous isolated habitat fragments in the Lower Rio Grande Valley. These efforts have helped produce habitats that are harboring unique species of plants and animals, making the area a destination for ecotourists.

The economics of Lower Rio Grande Valley wildlife and habitat diversity are important to the international border region, as over 150,000 tourists contribute approximately $10.8 million annually to the regional economy. The Santa Ana NWR is the most accessible public land for residents of Hidalgo County and approximately 70 percent of visitors come from outside of the local area. Visitors participating in outdoor recreational activities economically benefit the local community. The Service recommends a socio-economic analysis of the proposed wall.

Construction of the border wall, as proposed, will likely affect visitation and the quality of visitor experience. Construction of the border wall along the levee will separate the Santa Ana NWR visitor

center and all administrative facilities (equipment storage, residences, parking lots, etc.) from the rest of the refuge (99 percent of refuge lands). The proposal could result in visitors entering and exiting Santa Ana NWR through a large gate, similar to going through a security checkpoint. This could result in a reduction in visitation due to a perceived unsafe and unwelcoming atmosphere.

Enforcement Zones

Construction of a 150-foot enforcement zone will directly remove habitat. The enforcement zone will also create barriers and restrict wildlife movement, especially for species such as ocelots, which require dense brush to travel through. The Service recommends minimizing this zone, as operations allow, especially in and near thick thornscrub and walking trails. We also recommend calculating the direct habitat loss of the 150-foot enforcement zone based on a vegetation and endangered species survey. The proposed cleared enforcement zone in Hidalgo County will directly remove approximately 170 acres of habitat from Lower Rio Grande Valley and Santa Ana NWRs reducing the ability to meet refuge purposes. In Hidalgo County, Refuge System lands will have approximately 7,800 acres south of the proposed wall and 2,400 acres north of the wall. The 2,400 acres represent a direct loss of habitat for ocelots and jaguarundis on Refuge System lands in Texas.

Lighting

Increased lighting at night, along the wall, will likely have negative impacts on ocelot, jaguarundi and other nocturnal species by making them more susceptible to predation. The Service recommends down shielding lights to focus away from thornscrub habitat and shining lights only within the enforcement zone. The Service recommends CBP continue to analyze the effects of lighting to nocturnal wildlife and work with the Service to minimize impacts.

All Weather Roads

The Service recommends the width of all roads created or maintained by CBP be measured and recorded using Geographic Information System (GPS) coordinates and integrated into the CBP GPS database. The Service suggests maintenance actions not increase the width of the roadbed or the amount of disturbed area beyond the roadbed. The all-weather road within the enforcement zone is capable of high speed use, causing concern for public safety and increased wildlife mortality. The Service requests coordination to address speeding issues.

We appreciate the opportunity to provide informal comments and look forward to future opportunities to discuss the proposed project. Please feel free to contact me at 505-248-6282 if I can be of further assistance.

Sincerely,

Regional Director

U.S. Customs and Border Protection
(b) (6)(b) (6)(b) (6)(b) (6)
(b) (6)(b) (6)(b) (6)

Dear (b) (6)

Thank you for your letter dated August 25, 2017, regarding U.S. Customs and Border Protection's (CBP) proposed border infrastructure in South Texas which includes the installation of 35 gates in existing border fence gaps, 32 miles of bollard wall, and 28 miles of levee wall. The U.S. Fish and Wildlife Service (Service) reviewed your letter and is providing our initial concerns related to Federally listed species, other Federal trust resources, and Santa Ana and Lower Rio Grande Valley National Wildlife Refuges (NWR). Once there is a spatially explicit proposed action, assuming no waiver is issued by Department of Homeland Security, we can provide a formal response and coordination under applicable Federal laws, including the National Environmental Policy Act, National Wildlife Refuge System (Refuge System) Improvement Act, Migratory Bird Treaty Act, and Endangered Species Act.

Over the past several years, there has been a substantial increase in coordination between the Service, CBP, and the U.S. Border Patrol Rio Grande Valley Sector along the Texas border. The Service appreciates the excellent communication and information sharing that has occurred and looks forward to maintaining this relationship into the future.

The Refuge System lands in the Lower Rio Grande Valley are considered to be one of the most biodiverse in the continental United States. In general, our concerns are similar to those discussed during initial border wall/fence construction in 2008. The Service will continue to work with CBP on the proposed activities, with a focus on ensuring impacts to Santa Ana and Lower Rio Grande Valley NWRs are analyzed and minimized, to the extent possible.

Socio-economic & Visitor Impacts
The Service is specifically concerned with potential tourism and visitor impacts on the affected NWRs. Ongoing efforts by the Service, the state of Texas, private landowners, and non-profit organizations have helped create a wildlife corridor linking numerous isolated habitat fragments in the Lower Rio Grande Valley. These efforts have helped produce habitats that are harboring unique species of plants and animals, making the area a destination for ecotourists.

The economics of Lower Rio Grande Valley wildlife and habitat diversity are important to the international border region, as over 150,000 tourists contribute approximately $10.8 million annually to the regional economy. The Santa Ana NWR is the most accessible public land for residents of Hidalgo County and approximately 70 percent of visitors come from outside of the local area. Visitors participating in outdoor recreational activities economically benefit the local community.

Construction of the border wall, as proposed, will likely affect visitation and the quality of visitor experience to the affected NWRs. Construction of the border wall along the levee will separate the Santa Ana NWR visitor center and all administrative facilities (equipment storage, residences, parking lots, etc.) from the rest of the refuge (99 percent of refuge lands). The proposal could result in visitors entering and exiting Santa Ana NWR through a large gate, similar to going through a security checkpoint. This could result in a reduction in visitation due to a perceived unsafe and unwelcoming atmosphere, which in turn could impact local economies.

Enforcement Zones
Construction of a 150-foot enforcement zone will directly remove habitat used by threatened and/or endangered species and other wildlife in the area. The enforcement zone will also create barriers and restrict wildlife movement, especially for species such as ocelots, which require dense brush to travel through. The Service recommends minimizing this zone, as operations allow, especially in and near thick thornscrub and walking trails. We also recommend calculating the direct habitat loss of the 150-foot enforcement zone based on a vegetation and endangered species survey. The proposed cleared enforcement zone in Hidalgo County will directly remove approximately 170 acres of habitat from Lower Rio Grande Valley and Santa Ana NWRs reducing the ability to meet refuge purposes and impacting the visitor experience. The Service recommends leaving vegetated areas near entrances and exits to public use areas to mitigate the potential impacts to the visiting public and quality of their experience.

Lighting
Increased lighting at night, along the wall, will likely have negative impacts on ocelot, jaguarundi and other nocturnal species by making them more susceptible to predation. The Service recommends down shielding lights to focus away from thornscrub habitat and shining lights only within the enforcement zone. The Service recommends CBP continue to analyze the effects of lighting to nocturnal wildlife and work with the Service to minimize impacts.

All Weather Roads
The Service recommends the width of all roads created or maintained by CBP be measured and recorded using Geographic Information System (GPS) coordinates and integrated into the CBP

GPS database. The Service suggests maintenance actions not increase the width of the roadbed or the amount of disturbed area beyond the roadbed. The all-weather road within the enforcement zone is capable of high speed use, causing concern for public safety and increased wildlife mortality. The Service requests coordination to address speeding issues, especially near high visitor use areas.

The Service's comments in this letter are based upon general information we have been given to date. The Service may change these comments and opinions depending on more specific information regarding the border wall that we expect will be provided by CBP in the future. We appreciate the opportunity to provide informal comments and look forward to continued coordination on the proposed project. Please feel free to contact me at 505-248-6282 if I can be of further assistance.

Sincerely,

Regional Director

Hi Jeff and Craig,

On 1/29/19 I provided the FWS information (treasury account symbol, DUN's number, tax ID #,etc...) required to establish an interagency agreement to:

(b) (6)(b) (6)
Border Wall Program Management Office
United States Border Patrol
Program Management Office Directorate
office: (b) (6)
cell: (b) (6)
(b) (6)(b) (6)(b) (6)

There hasn't been any contact since then (1/29/19) regarding the inter-agency agreement they will prepare and send to me for signature. Once all the signatures are in place I will get a copy of the agreement and forward to FWS finance in Denver and they will post the reimbursable agreement in FBMS. I've already created the needed WBS tracking numbers in FBMS, and I'll be able to target the funds out to the regions for the specific border wall projects as soon as it posts in FBMS. All border project activity will be reported at the national level.

Please let me know if you have any questions.

Thanks,
gill

Hi Irma,

It was great talking with you this afternoon to coordinate the SOW and IAA for the $1M in funding Border Patrol will transfer to the US Fish and Wildlife Service.

I've revised the amounts in the SOW to reflect the distribution of the $1M to the Sweetwater River and Tijuana River Border Projects. I understand that this interagency agreement will be initiated with FY2019 as the base year and option years to accommodate additional funding transfers if funds become available to complete the projects previously identified.

I'll be ready on this end once your procurement shop has an agreement ready for me to route through my leadership for approval/signatures.

I'll be sure to include you on all correspondence regarding the SOW and IAA so we all stay on the same page. I appreciate that we speak the same budget/agreement language, and look forward to working together on this effort.

Thank you,
Gillian

INTERAGENCY AGREEMENT
STATEMENT OF WORK
BETWEEN
U.S. CUSTOMS AND BORDER PROTECTION AND THE
DEPARTMENT OF INTERIOR (DOI), U.S. FISH AND WILDLIFE SERVICES (FWS)

I. AUTHORITY

The authority of the Department of Homeland Security, U.S. Customs and Border Protection and the Department of Interior, United States Fish and Wildlife Service (FWS) which is acting as the servicing agency (collectively the "Parties") to enter into this Interagency Agreement (IAA) is the Economy Act of 1932 (31 U.S.C. 1535), resulting in an assisted acquisition.

II. OBJECTIVE/PURPOSE

This Interagency Agreement (IAA) is between the Department of Interior, U.S. Fish and Wildlife Services (FWS) and the Department of Homeland Security, U.S. Customs and Border Protection (CBP), Border Wall (BW) Program Management Office (PMO). In accordance with this agreement, FWS (servicing agency), will, on behalf of CBP (requesting agency), use its experience, background, and expertise to chemically and mechanically control non-native invasive plant species that exploit openings in the riparian forest canopy in the Tijuana River Valley and the Sweetwater River Valley which are located in the San Diego Border Patrol Sector.

The overall goals of the project are to: reduce the risk of wildfire; improve habitat for riparian nesting bird species including the federally-endangered least Bell's vireo and Southwestern willow flycatcher; mitigate safety risks to FWS staff and Border Patrol personnel; and improve access and visibility for Border Patrol operations. The San Diego Sector of the U.S. Border Patrol is one of the busiest in the country in terms of illegal entries and smuggling activity from Mexico.

III. SCOPE

This Statement of Work describes the comprehensive scope of support services for CBP's requirements. During the Base Period, U.S. Fish and Wildlife Service will use its best efforts to provide the following services either by contract or by in-house efforts:

a. **Sweetwater River Valley** (using either in-house or contractor resources), including but not limited to:

    1) The primary actions are to chemically and mechanically control non-native invasive plant species that exploit openings in the riparian forest canopy. Chemical treatments would include application of herbicide at the appropriate point of the growth cycle for the chemical to be transported to the roots and kill the plant. Mechanical treatments would include cutting, removal, and chipping. Non-native species that contribute to hazardous fuel loading and are targeted for

removal include giant reed (*Arundo donax*), saltcedar (*Tamarix* spp.), Peruvian peppertree (*Schinus molle*), eucalyptus (*Eucalyptus* spp.), Mexican fan palm (*Washingtonia robusta*), Canary Island date palm (*Phoenix canariensis*), and castor bean (*Ricinus communis*). Planning activities include project plan development, mapping of target species, environmental compliance, contract development and administration, treatment effectiveness monitoring, and reporting. Two units of the Sweetwater River totaling 242 acres would be treated – Unit 1 (upstream of SR 94 to the Refuge boundary with private land) is 124 acres; Unit 2 (downstream of SR 94 to boundary with Sweetwater Authority) is 118 acres.

Follow-up chemical and mechanical treatments will likely be necessary for 3 years to achieve 100% control of invasive plant species and to remove live or dead biomass.

The project area is designated critical habitat for the federally-endangered least Bell's vireo (*Vireo bellii pusillus*) and Southwestern willow flycatcher (*Empidonax traillii extimus*).

b. **Tijuana River Valley** (using either in-house or contractor resources), including but not limited to:

1) The primary actions are to mechanically remove woody debris from the riparian zone and to chemically and mechanically control invasive plant species that exploit openings in the forest canopy created by the beetle infestation. Mechanical treatment of large woody debris would include cutting, removal, and chipping. Invasive plant species would be controlled with herbicides followed by mechanical removal of the dead material. The main species to be targeted include giant reed (*Arundo donax*), saltcedar (*Tamarix* spp.), and castor bean (*Ricinus communis*). Planning activities include project plan development, mapping of target species, environmental compliance, contract development and administration, treatment effectiveness monitoring, and reporting. The total footprint of the project area is approximately 200 acres.

Follow-up mechanical and chemical treatments will likely be necessary for 3-5 years to achieve 100% control of invasive plant species or to remove additional woody debris generated by beetle activity.

Portions of the project area include designated critical habitat for the federally-endangered least Bell's vireo (*Vireo bellii pusillus*).

IV. REQUIREMENTS/TASKS:

a. **Sweetwater River Valley:** The total footprint is 242 acres; and 242 acres would be counted for accomplishments.
   1) Treatment #1: CATNR-FY19-CX-SCA-Units 1,2-BP
   2) Treatment #2: CATNR-FY19-MX-SCA-Units 1,2-BP

b. **Tijuana River Valley:** The total footprint is approximately 200 acres; however, approximately 1,120 acres will be counted for accomplishments (each treatment type is counted once; follow-up treatments will occur for 3-5 years on each unit).
   1) Treatment #1: CATJR-FY19-MX-SCA-Units 1,2-BP
   2) Treatment #2: CATJR-FY19-CX-SCA-Units 3,4-BP
   3) Treatment #3: CATJR-FY20-MX-SCA-Units 1,2-BP
   4) Treatment #4: CATJR-FY20-CX-SCA-Units 3,4-BP
   5) Treatment #5: CATJR-FY20-MX-SCA-Units 1,2-BP
   6) Treatment #6: CATJR-FY20-CX-SCA-Units 1,2-BP

V. ESTIMATED COST BREAKOUT (INCLUDING APPLICABLE FEES):

Project Title	TOTAL COST ESTIMATE
Sweetwater River Valley	
FY19	350,000.00
Sub-Total	**350,000.00**
Tijuana River Valley	
FY19	330,000.00
FY20	320,000.00
Subtotal	**650,000.00**
Grand Total	**1,000,000.00**

Table 1: Project Cost Estimate

The Base Period amount includes all costs for all work included in the scope of this IAA plus the project management costs charged by FWS for the Base Period. Actual costs are dependent on the work performed. This budgetary estimate is based on a summation of all the labor, contract and other direct and indirect costs assumed to be required to fund the mechanical / chemical treatments executed during the Base Period through contract closeout.

VI. DELIVERABLES:

The servicing agency must provide an electronic version of the following:

- Monthly expense burn rate report
- Monthly Project Delivery Schedule

VII. PLACE OF PERFORMANCE

The place of performance for this requirement shall include San Diego Border Patrol Sector.

VIII. PERIOD OF PERFORMANCE

This Agreement is effective from _____ through four years from date of award, which is estimated to be from XXX 2019 – XXX, 2024.

IX. FUNDING

The initial value of the IAA base year is **$1,000,000.00**
Any modifications resulting from a CBP approved change request will be funded from the change management reserve contract line item number (CLIN) 10. Use of the change management reserve funding CLIN 10 is only authorized after receipt of a CBP approved change request. Funding will be provided by CBP BW PMO to the Department of Interior, US Fish and Wildlife Service.

Specific funding information is as follows:

Date:	Monday, February 25, 2019 10:29:56 AM

Hi Margaret,

Per our conversation late Friday, we have carefully crafted the following draft message to be sent to House Natural Resources Committee majority staff. We are hoping to get your approval, then Andrea's if necessary, and then run it by Taylor Playforth before sending to HNRC.

The maps we would send are FWS maps and have been reviewed by you and other officials through Cynthia's briefings.

Can you please let me know if this looks good and then I'll figure out if and how best to run it by Andrea?

Thank you!

Marty

The full final proposed response text to be sent in an email is below, and the four maps to attach to the email can be found here:

"Thank you for your inquiry and we apologize for the delay.

Per your request, attached are maps of the La Parida Banco Tract and the El Morillo Banco Tract of the Lower Rio Grande Valley National Wildlife Refuge located on the Texas-Mexico border. Please note that there is a preexisting levee easement held by the International Boundary and Water Commission, indicated in red on the attached maps. Where it crosses National Wildlife Refuge System administered lands, such easement existed prior to these tracts being acquired and added to the Refuge System.

Questions regarding type of barrier construction and timing are not determined by or within the authorities of the U.S. Fish and Wildlife Service; and we suggest contacting U.S. Customs and Border Protection (CBP) to address these types of questions. Here is the congressional affairs contact at CBP: (b)(6), (b)(7)(C) (b)(6), (b)(7)(C) (b)(6), (b)(7)(C) *. This public CBP press release may also be helpful to your inquiry.*

We would like to suggest an in-person briefing to further explain these maps and the land jurisdictional arrangement; please let me know and we can set something up. If so, we propose 2:00

pm Friday, March 1st.

Attachments:

- *Map 1 – Overview map of US-Mexico border*
- *Map 2 – Zoomed-in map of refuge tracts in Southeastern Texas*
- *Map 3 – Satellite image with basic overlay of **La Parida Banco tract**, levee, and the Rio Grande.*
- *Map 4 – Satellite image with basic overlay of **El Morillo Banco tract**, levee, and the Rio Grande.*

The language looks good to me. We will need to get it down to Andrea for a quick review. I will forward it to her and copy you.
Best
Margaret

Andrea,
Please take a look at the language below and let me know if you have any comments or questions. We will also be running this through Taylor in 0CL.
Thank you
Margaret

I'm A-OK with that change. And I understand the issue- it's not the first time I've heard this.

Would you like to chat more about it? Or perhaps we should just make the changes and I can upload a new document into the system for our Director's office?

Hi there (b) (6) and (b) (6),

I am digging through my emails to track the status of various MOUs. This was the last conversation I could find on our MOU, and I thought I'd check in to find out if your team was able to review the changes to the MOU.

I hope things are well!

Lesley

(b) (6) and (b) (6),

Good morning! I've attached the MOU draft with tracked changes and comments from me and our solicitor Philip. Many changes were recommended due to the M Opinion, and the proposed rule that was on the Unified Agenda I shared with you last month. Language now reflects what you might find in NEPA, such as 'reduction of negative impacts'. This is happening to all new and updated MOUs, by the way.

I'll make myself available for a walk-through on the phone or in person if that's helpful to you. Most of the comments are pretty easy to follow, though.

Please let me know your thoughts and if you have any questions or concerns with these changes. I do not believe they are significant enough to warrant any backtracking of FWS review with the regions or Ecological Services. If you are happy with these changes, I will re-initiate the formal review and briefing process here at the Service and within DOI. This will likely need to be reviewed by the Secretary's office now as well, due to any political discussions or perceptions that may or may not be going on presently. But I'm prepared to handle that, so leave that to me.

Have a great Wednesday!

Lesley

Title: ●Migratory Bird Permits; Regulations Governing Take of Migratory Birds

Abstract:

The U.S. Fish and Wildlife Service proposes to establish regulations that define the scope of the Migratory Bird Treaty Act (MBTA or Act) as it applies to conduct resulting in the injury or death of migratory birds protected by the Act. This rule would codify the legal opinion in the Department of the Interior Solicitor's Opinion M 37050 that incidental take re ulting from an otherwi e lawful activity i not prohibited under the MBTA. These regulations would reduce regulatory burdens and uncertainty on the public with regards to complying with bird take prohibitions.

(b) (6) and(b) (6),
Thank you for the call today. Here is a newer version of the MOU, with the adjusted wording we discussed.

Please read it over to ensure you're comfortable with my recommended changes. Where intentional take was mentioned, I did not see a reason to make changes. I'll send this now to our solicitors, as I mentioned, to help keep the ball rolling!

To: "Wainman, Barbara" <barbara_wainman@fws.gov>
Cc: "Helfrich, Devin" <devin_helfrich@fws.gov>, "Kodis, Martin" <martin_kodis@fws.gov>, Angela Gustavson <angela_gustavson@fws.gov>

I understand the slide deck used at yesterday's EPW budget briefing was not cleared with FWP leadership before presenting externally, so please forgive me if I'm particularly cautious on what information we provide externally.

Thanks,

> > >
> > > *Per your request, a ached are maps of the La Parida Banco Tract and the El Morillo Banco Tract of the Lower Rio Grande Valley Naonal Wildlif e Refuge located on the Texas-Mexico border. Please note that there is a*

preexisng le vee easement held by the Internaonal Boundar y and Water Commission, indicated in red on the a ached maps. Where it crosses Naonal Wildlif e Refuge System administered lands, such easement existed prior to these tracts being acquired and added to the Refuge System.

Quesons regarding the type of c onstrucon and ming are not de termined by or within the authories of the U.S. Fish and Wildlife Service, and we suggest contacng U .S. Customs and Border Protecon (CBP) t o address these types of quesons. Here is a c ongressional affairs contact at CBP: (b) (6)(b) (6) (b) (6)(b) (6)(b) (6)(b) (6) *.This public CBP press release may also be helpful to your inquiry.*

A achments:

- *Map 1 – Overview map of US-Mexico border*
- *Map 2 – Zoomed-in map of refuge tracts in Southeastern Texas*
- *Map 3 – Satellite image with basic overlay of **La Parida Banco tract**, levee, and the Rio Grande.*
- *Map 4 – Satellite image with basic overlay of **El Morillo Banco tract**, levee, and the Rio Grande.*
