All,

Pursuant to the Awareness Process for FOIA Productions memorandum, dated May 24, 2018, I am seeking comments from all PAS, NCSE, or Schedule C employees whose names appear in the attached records.

If you are receiving this message, then your name appears in one or both of the attached files. In accordance with the aforementioned memorandum, **you have up to 72 hours to review and comment on these records.** If no comment is received, then the Department will assume you have none.

Assistants for Secretary Zinke and Deputy Secretary Bernhardt should note that these records may concern both the assistants and principles. They should be reviewed as such.

Thank you for your attention to this matter.

Justin

From: Benjamin Wolfgang
To: Swift, Heather
Subject: Alaska issues
Date: Thursday, July 27, 2017 8:26:29 AM

Heather, is this report true? https://www.adn.com/politics/2017/07/26/trump-administration-signals-that-murkowskis-health-care-vote-could-have-energy-repercussions-for-alaska/

Is the administration changing positions on King Cove, ANWR, or anything else solely because of Murkowski's health care vote?

Hi Heather,

Just wanted to check in to confirm whether reports that Secretary Zinke warned the two Alaska Senators about energy policies in light of Senator Murkowski's healthcare stance are accurate.

Thanks,
Valerie

Alex, can you please respond to all the reporters asking about the alaska memo with the following

Insinuating any predetermined results based upon a review is premature. Statements by external groups stating that a policy has been set are not accurate. The Department is committed to working with the people of Alaska on how to best manage their wildlife and habitat. -- Heather Swift, Department of the Interior press secretary

Laura,

I spoke to the BLM folks in New Mexico and Nevada today. BLM Nevada said Caroline Boulton had already contacted them about the upcoming trip.

Your contact in New Mexico will be Donna Hummel, BLM NM Communications Chief (505) 954-2018 w or (b) (6) mobile, dhummel@blm.gov. Donna will be the BLM press lead on the ground in Las Cruces, Santa Fe and Albuquerque. Sherman Hogue will be the videographer. I have asked BLM New Mexico to assemble a media list for you for Las Cruces as well as Santa Fe and Albuquerque.

Your contact in Nevada will be Rudy Evenson, Acting BLM NV Communications Chief, (775) 861-6629 w or (b) (6) mobile. Rudy will be the BLM press lead on the ground in Las Vegas. John Asselin (BLM Public Affairs Las Vegas) will be the videographer/photographer. BLM Nevada has assembled a media list and will highlight some reporters that cover the BLM.

Please let me know if you need anything else. Let me know if we should set up a call with you, Donna, Rudy and WO BLM Communications.

Jeff

BLM Proposes to Rescind Rule on Hydraulic Fracturing

Action Supports President's Priorities for Streamlining Permitting

WASHINGTON, D.C. — As part of President Trump's goal to reduce the burden of Federal regulations that hinder economic growth and energy development, the Bureau of Land Management (BLM) today announced in the *Federal Register* a proposal to rescind the 2015 final rule on hydraulic fracturing—a rule that was never in effect due to pending litigation. The proposal includes the opportunity for public comment.

"America's public lands offer outstanding commercial, recreational, and conservation opportunities, and energy development is one of them," said Katharine S. MacGregor, Acting Assistant Secretary for Land and Minerals Management. "Maintaining positive, productive working relationships with our state and tribal partners is a top priority of this Administration. ~~We are committed to working collaboratively with them to ensure the safe and environmentally responsible development of our Nation's energy resources within established regulatory frameworks~~. Our proposal to rescind the 2015 final rule answers the President's call to reduce regulatory burdens, foster job growth, and serve the energy needs of America's families, small businesses, and manufacturers."

The BLM reviewed the 2015 final rule as part of Interior Secretary Ryan Zinke's Secretarial Order No. 3349, *Promoting Energy Independence and Economic Growth*, issued on March 29, 2017. During the review, the BLM found that all of the 32 states with Federal oil and gas leases have regulations to address hydraulic fracturing. Furthermore, since the 2015 final rule was published, more companies are using state regulatory agencies and/or databases such as FracFocus to disclose the chemical content of hydraulic fracturing fluids.

The BLM estimates that about 90 percent of the approximately 2,800 production wells drilled in 2013 on Federal and Indian lands used hydraulic fracturing techniques to stimulate production. During the past 15 years, there have been significant technological advances in horizontal drilling. The technique is now frequently combined with hydraulic fracturing to help release significant quantities of oil and gas from large shale deposits.

The BLM's proposal supports Administration priorities that: require agencies to seek ways to reduce the costs of regulatory compliance (Executive Order 13771, *Reducing Regulation and Controlling Regulatory Costs*), and; require the Secretary to review four specific rules, including the BLM's 2015 final rule on hydraulic fracturing (Executive Order 13783, *Promoting Energy Independence and Economic Growth*).

Public comments on this proposed rescission are due to the BLM on or before Sept. 25, 2017. The BLM is not obligated to consider, or include in the administrative record, comments received after this date or delivered to an address other than those listed below in making its decisions on the final rule.

ADDRESSES:

Mail: U.S. Department of the Interior, Director (630), Bureau of Land Management, Mail Stop 2134LM, 1849 C St., N.W., Washington, D.C. 20240, Attention: 1004-AE52.

Personal or messenger delivery: U.S. Department of the Interior, Bureau of Land Management, 20 M Street, S.E., Room 2134 LM, Washington, D.C. 20003, Attention: Regulatory Affairs.

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions at the website.

The BLM manages more than 245 million acres of public land, the most of any Federal agency. This land, known as the National System of Public Lands, is primarily located in 12 Western states, including Alaska. The BLM also administers 700 million acres of sub-surface mineral estate throughout the nation. The BLM's mission is to sustain the health, diversity, and productivity of America's public lands for the use and enjoyment of present and future generations. In Fiscal Year 2015, the BLM generated $4.1 billion in receipts from activities occurring on public lands.

Heather –

Reaching out to see if the Secretary has any comment on this Alaska Dispatch story. Specifically, if he made the calls in this paragraph.

> Early Wednesday, Trump took to Twitter to express displeasure with Murkowski's vote. By that afternoon, each of Alaska's two Republican senators had received a phone call from Interior Secretary Ryan Zinke letting them know the vote had put Alaska's future with the administration in jeopardy.

Many thanks,
Jillian

Hi Heather-
Can you confirm that Secretary Zinke called each of Alaska's senators today at the request of the president?
Did he tell them that Alaska-focused projects are coming to a "complete" stop? And that it is a White House response to Sen Murkowski's healthcare vote on Tuesday?
I'm on my cell- 202-436-4234. Working on a story for ASAP.
Thanks,
Erica

Hey, any statement from Interior and can you confirm the recent article about Zinke calling Murkowski and Sullivan yesterday to say there would be repercussions for Murkowski's vote on healthcare regarding Interior advancing their Alaska related goals from the agency? What exactly did he threaten to do or not do as a result and to what extent would that affect the administration's energy goals? Also, did he call Sen. Collins re her vote on healthcare and did he bring up any things she may want that the agency may or may not do that are now in danger? If so, what was discussed.

Thanks, Esther

Subject: Circling back on Zinke/health care
Date: Thursday, July 27, 2017 1:55:23 PM

Wanted to touch base one more time for a response on this Zinke/Murkowski/health care situation. Rep. Grijalva just said released a statement about the whole situation, calling the Secretary a "bag man" and likening him to Kremlin officials.

“Running a department of the federal government means you serve the American people as a protector of their rights and freedoms,” Rep. Raul Grijalva, Arizona Democrat and ranking member on the House Natural Resources Committee, said in a statement. “It doesn’t mean you serve the president as a bag man for his political vendettas. Threatening to punish your rivals as political blackmail is something we’d see from the Kremlin. Secretary Zinke’s willingness to deliver these threats speaks volumes about his ethical standards and demonstrates that Interior’s policy positions are up for political grabs, rather than based on science or the public interest.”

Does Interior have a response to that, or any other general comment on this?

Thanks,

Ben

Details in Interior Secretary Ryan Zinke's calendars have become sparser. The agency's Freedom of Information Act Office has posted Zinke's calendar from March through June, but only one of those -- April -- offers topic descriptions and names of non-staff attendees of the meetings.

Did the secretary change his policy on what parts of the calendar he makes available or how the calendar is kept? A response, tonight, if possible would be great but I am interested in finding out the answer in general even after deadline. Thanks, Esther

Dear Ms. Whieldon:

On July 5, 2017, you filed a Freedom of Information Act (FOIA) request seeking the following:

> Copies of Zinke's calendars for March, April and May.

On July 6, 2017, we acknowledged your request and advised you of your fee status under the FOIA. Your request states, "I am not waiving any material as non-responsive." We are writing to respond to your request on behalf of the Office of the Secretary. A search for responsive documents located 70 pages in aggregate. Of these, no pages are being withheld, therefore all 70 pages are being released in full. Please find attached one file consisting of 70 pages of responsive documents.

Portions of the enclosed documents have been redacted pursuant to Exemption 5 of the FOIA (5 U.S.C. § 552 (b)(5)) under the following privileges:

Confidential Commercial Information

Exemption 5 allows an agency to withhold "inter-agency or intra-agency memorandums or letters which would not be available by law to a party... in litigation with the agency" 5 U.S.C. § 552 (b)(5). As such, the Exemption 5 "exempt[s] those documents... normally privileged in the civil discovery context." National Labor Relations Bd. v. Sears, Roebuck & Co., 421 U.S. 132, 149 (1975). The exemption incorporates the privileges that protect materials from discovery in litigation. These privileges include deliberative process, confidential commercial information, attorney work-product, and attorney-client. See id.; see also Federal Open Market Committee v. Merrill, 443 U.S. 340, 363 (1979) (finding a confidential commercial information privilege under Exemption 5).

Confidential Commercial Information Privilege

When the government enters the marketplace as an ordinary commercial buyer or seller, the government information is protected from competitive disadvantage under Exemption 5. Government Land Bank v. General Services Administration, 671 F.2d 663, 665 (1st Cir. 1982). Exemption 5 prevails "where the document contains 'sensitive information not otherwise available,' and disclosure would significantly harm the government's commercial interest." Id. at 666; see also Merrill, 443 U.S. at 363.

Pursuant to the confidential commercial information privilege, conference call codes and passcodes have been withheld under Exemption 5. This information constitutes "intra-agency" documents because they are only shared with members of the Department of the Interior for the purpose of conducting official government business. Moreover, this information qualifies as "confidential commercial information" because the government entered the marketplace as an ordinary commercial buyer.

In line with Land Bank and Merrill, the information is "sensitive and not otherwise available." If the information was released, the government's financial interest would be significantly harmed. The conference calls would no longer be private since unknown, non-governmental parties would have the ability to listen in to the calls. The funds spent on purchasing the information would therefore be wasted, and the information would be of no use.

Because we reasonably foresee that the release of this information would significantly harm the government's financial interest by publicizing sensitive information, the Office of the Secretary is withholding it in accordance with Exemption 5 of the FOIA.

Portions of these documents have been redacted in part or withheld in full pursuant to Exemption 6 of the FOIA (5 U.S.C. § 552(b)(6)) because they fit certain categories of information:

Home addresses and personal phone numbers
Personal email addresses
Personally identifiable information
Names of private individuals
Employment information of private individuals

Exemption 6 allows an agency to withhold "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." The courts have held that the phrase "similar files" involves all information that applies to a particular person. Hertzberg v. Veneman, 273 F. Supp. 2d 67, 85 n.11 (D.D.C. 2003).

To determine whether releasing requested information would constitute a clearly unwarranted invasion of personal privacy, we are required to perform a "balancing test." This means that we must weigh the individual's right to privacy against the public's right to disclosure.

> (1)First, we must determine whether the individual has a discernable privacy interest in the information that has been requested.
> (2)Next, we must determine whether release of this information would serve "the public interest generally" (i.e., would "shed light on the performance of the agency's statutory duties").
> (3)Finally, we must determine whether the public interest in disclosure is greater than the privacy interest of the individual in withholding.

The information that we are withholding consists of personal information, and we have determined that the individual(s) to whom this information pertains have a substantial privacy interest in it. Additionally, we have determined that the disclosure of this information would shed little or no light on the performance of the agency's statutory duties and that, on balance, the public interest to be served by its disclosure does not outweigh the privacy interest of the individual(s) in question, in withholding it. Nat'l Ass'n of Retired Fed. Employees v. Horner, 879 F.2d 873, 879 (D.C. Cir. 1989).

Furthermore, the information that we are withholding consists of the Secretary's email address. We are withholding it based on our determination that the Secretary has a substantial privacy interest in the information that is not outweighed by the public interest to be served by its disclosure. *Shurtleff v. EPA*, 991 F. Supp. 2d 1, 39-40 (D.D.C. 2013).

In summation, we have determined that release of the information that we have withheld would constitute a clearly unwarranted invasion of the privacy of these individuals, and that it therefore may be withheld, pursuant to Exemption 6.

Gabriel D. Lohr, Attorney-Advisor in the Office of the Solicitor, was consulted in reaching this decision. Clarice Julka, Office of the Secretary FOIA Officer, is responsible for making this decision.

Fees

Because your entitlements as a "media-use requester" (s*ee* 43 C.F.R. § 2.39) were sufficient to cover all applicable FOIA charges, there is no billable fee for the processing of this request.

This completes our response to your request.

Appeals

You may appeal this response to the Department's FOIA/Privacy Act Appeals Officer. If you choose to appeal, the FOIA/Privacy Act Appeals Officer must receive your FOIA appeal **no later than 90 workdays** from the date of this letter. Appeals arriving or delivered after 5 p.m. Eastern Time, Monday through Friday, will be deemed received on the next workday.

Your appeal must be made in writing. You may submit your appeal and accompanying materials to the FOIA/Privacy Act Appeals Officer by mail, courier service, fax, or email. All communications concerning your appeal should be clearly marked with the words: "FREEDOM OF INFORMATION APPEAL." You must include an explanation of why you believe the Office of the Secretary's response is in error. You must also include with your appeal copies of all correspondence between you and Office of the Secretary concerning your FOIA request, including your original FOIA request and Office of the Secretary's response.

Failure to include with your appeal all correspondence between you and Office of the Secretary will result in the Department's rejection of your appeal, unless the FOIA/Privacy Act Appeals Officer determines (in the FOIA/Privacy Act Appeals Officer's sole discretion) that good cause exists to accept the defective appeal.

Please include your name and daytime telephone number (or the name and telephone number of an appropriate contact), email address and fax number (if available) in case the FOIA/Privacy Act Appeals Officer needs additional information or clarification of your appeal.

For your information, Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA. See 5 U.S.C. § 552(c). This response is limited to records that are subject to the requirements of the FOIA. This is a standard notification that is given to all our requesters and should not be taken as an indication that excluded records do, or do not, exist.

The 2007 FOIA amendments, the Office of Government Information Services (OGIS) was created to offer mediation services to resolve disputes between FOIA requesters and Federal agencies as a non-exclusive alternative to litigation. Using OGIS services does not affect your right to pursue litigation. You may contact OGIS in any of the following ways:

The National Archives and Records Administration
Office of Government Information Services
8601 Adelphi Road- OGIS
College Park, MD 20740-6001
E-mail: ogis@nara.gov
Web: https://ogis.archives.gov
Telephone: 202-741-5770
Fax: 202-741-5769
Toll-free: 1-877-684-6448

Please note that using OGIS services does not affect the timing of filing an appeal with the Department's FOIA & Privacy Act Appeals Officer.

If you have any questions about our response to your request, do not hesitate to contact Karmen Young by phone at 202-513-0765, by fax at 202-219-2374, by email at osfoia@ios.doi.gov, or by mail at U.S. Department of the Interior, 1849 C Street, NW, MS-7328, Washington, D.C. 20240. You also may seek dispute resolution services from our FOIA Public Liaison, Clarice Julka.

Sincerely,

Clarice Julka
Office of the Secretary
FOIA Officer

4pm - 5pm Interview: Shawn Regan | National Review Magazine

Video call:
(b)(5)

Where: (b) (6)
Calendar: (b)(6)Ryan Zinke @ios.doi.gov
Created by: Caroline Boulton
Who: Heather Swift, (b)(6)Ryan Zinke @ios.doi.gov
Description:
Topic: It will be a policy-focused profile piece, describing a bit of Zinke's background as a freshman congressman-turned-Interior Secretary but mostly looking at the issues facing the department today. I'd like to discuss Sec. Zinke's priorities and positions on major western land issues like energy development, the national park maintenance backlog, and the recent conflicts over grazing rights. I know he's mentioned many of those as priorities, including building front-line trust with local communities. Just trying to get some quotes to go along with the piece. It will largely be meant to introduce him to a national audience who may not know much about him, exploring his positions on the major issues and describing the challenges the department faces today.

(b)(6)Ryan Zinke @ios.doi.gov

6pm - 8:30pm Shakespeare and the Law Panel: The Rules of War

Video call:
(b)(5)

Where: Lansburgh Theatre

Subject:	DOI and NPS Grant Press Release Draft
Date:	Tuesday, July 18, 2017 3:55:46 PM
Attachments:	Alaska DOI NPS Awards.docx

Hi Heather,

Here's the state press release template for the DOI and NPS parks and rec grants. Let us know what you think and we'll finish up the other state releases.

Thanks,
Will

Department of Interior Announces $750,000 to Alaska for Development of Muldoon Town Square Square Park

National announcement includes $13.3 Million to 22 cities in 17 states

WASHINGTON – The U.S. Department of the Interior and the National Park Service announced today that $750,000 was awarded to Alaska through the Outdoor Recreation Legacy Partnership. The Municipality of Anchorage will receive the funds for the development of Muldoon Town Square Park. This project encompasses acquiring a 1.6 acre abandoned industrial property and converting into parkland with the construction of bike/pedestrian trail to create a continuous green space connecting Buffalo Bend Nature and Hidalgo Parks. This connection will create and enhance recreational opportunities in the Magnolia Park neighborhood which is one of the oldest Hispanic communities within the Houston region.

The U.S. Department of the Interior and the National Park Service announced this grant as part of $13.3 million to assist 22 cities in 17 states with projects to plan, build, and enhance parks and other outdoor recreation facilities in underserved communities. These public-private partnerships leverage Federal funding with resources provided by partners to improve accessibility of playgrounds, create canoe and kayak launches and fishing piers, restore vacant industrial land for park uses, and make other important investments in parks across the country.

“Every kid deserves the opportunity to get outside and play. Whether it's downtown Detroit or rural Wyoming, investing in public lands is an investment in communities. The Outdoor Recreation Legacy Partnership program is an innovative public-private-partnership which revitalizes communities through improving infrastructure, creating jobs, and enhancing neighborhoods,” said U.S. Secretary of the Interior Ryan Zinke. “It connects people to the great outdoors by encouraging and enabling a variety of recreational opportunities in under-served communities.”

ORLP is funded through the Land and Water Conservation Fund (LWCF). For more than 50 years, the LWCF has invested revenue from federal offshore oil and gas royalties into more

than 40,000 outdoor recreation facilities and conservation projects in every state.

Congress created the ORLP program, in 2014 to complement the agency's existing LWCF State and Local Assistance Program. The program, administered by the National Park Service, seeks to identify and highlight new ways of providing opportunities for expanding outdoor play in areas with great need, as well as promoting the development of new or enhanced partnerships for outdoor recreation in urban communities across the nation. The grants must be matched at a minimum 1:1 ratio, at least doubling the impact of the federal investment in these communities.

The complete list of ORLP grants are listed below. For more information about LWCF and these grants, visitwww.nps.gov/subjects/lwcf/index.htm.

Recipient	State	Project Title	Federal Amount
Municipality of Anchorage	Alaska	Development of Muldoon Town Square Park	$750,000
City of San Francisco	California	Bay View Park Playground Improvement Project	$375,225

The Municipality of Anchorage will receive the funds for the development of Muldoon Town Square Park. This project encompasses acquiring a 1.6 acre abandoned industrial property and converting into parkland with the construction of bike/pedestrian trail to create a continuous green space connecting Buffalo Bend Nature and Hidalgo Parks. This connection will create and enhance recreational opportunities in the Magnolia Park neighborhood which is one of the oldest Hispanic communities within the Houston region.

The U.S. Department of the Interior and the National Park Service announced this grant as part of $13.3 million to assist 22 cities in 17 states with projects to plan, build, and enhance parks and other outdoor recreation facilities in underserved communities. These public-private partnerships leverage Federal funding with resources provided by partners to improve accessibility of playgrounds, create canoe and kayak launches and fishing piers, restore vacant industrial land for park uses, and make other important investments in parks across the country.

“Every kid deserves the opportunity to get outside and play. Whether it's downtown Detroit or rural Wyoming, investing in public lands is an investment in communities. The Outdoor Recreation Legacy Partnership program is an innovative public-private-partnership which revitalizes communities through improving infrastructure, creating jobs, and enhancing neighborhoods,” said U.S. Secretary of the Interior Ryan Zinke. “It connects people to the great outdoors by encouraging and enabling a variety of recreational opportunities in under-served communities.”

ORLP is funded through the Land and Water Conservation Fund (LWCF). For more than 50 years, the LWCF has invested revenue from federal offshore oil and gas royalties into more than 40,000 outdoor recreation facilities and conservation projects in every state.

Congress created the ORLP program, in 2014 to complement the agency's existing LWCF State and Local Assistance Program. The program, administered by the National Park Service, seeks to

identify and highlight new ways of providing opportunities for expanding outdoor play in areas with great need, as well as promoting the development of new or enhanced partnerships for outdoor recreation in urban communities across the nation. The grants must be matched at a minimum 1:1 ratio, at least doubling the impact of the federal investment in these communities.

The complete list of ORLP grants are listed below. For more information about LWCF and these grants, visitwww.nps.gov/subjects/lwcf/index.htm.

Recipient	**State**	**Project Title**	**Federal Amount**
Municipality of Anchorage	Alaska	Development of Muldoon Town Square Park	$750,000
City of San Francisco	California	Bay View Park Playground Improvement Project	$375,225
East Bay Regional Park District	California	Bay Point Wetland Restoration and Public Access Project	$750,000
City of Hartford	Connecticut	Renovation of Colt Park Athletic Fields	$750,000
City of Wilmington	Delaware	Father Tucker Park Playground and Spray Pad	$306,447
City of Atlanta	Georgia	Enota Park Development	$600,000
City of Dubuque	Iowa	Comiskey Park Development	$508,000
City of Baltimore	Maryland	Youth Campground Improvements in Gwynns Falls Leakin Park	$750,000
Michigan DNR (Detroit)	Michigan	Belle Isle Park Multi-Use Looped Trail Development	$750,000
City of Duluth	Minnesota	Lincoln Park Restoration	$750,000

City of Columbia	Missouri	Clary-Shy Park Urban Demonstration Farm	$400,000
St. Louis Co. Port Authority	Missouri	Sparta Court Soccer Fields	$450,000
City of Camden	New Jersey	North Camden Waterfront Park	$ 750,000
City of Newark	New Jersey	Jesse Allen Park	$750,000
City of Raleigh	North Carolina	Central Plaza John Chavis Memorial Park Revitalization	$747,600
Metroparks of the Toledo Area	Ohio	Manhattan Marsh park Development	$475,000
City of Austin	Texas	Edward Rendon Sr Metro Park - further development	$750,000
City of Houston	Texas	Buffalo Bend Hidalgo Park Greenway	$750,000
City of Burlington	Vermont	New Neighborhood Park on Burlington's Waterfront Land Acquisition	$500,000
King County Parks	Washington	Skyway Park Revitalization	$ 369,626
Metro Parks Tacoma	Washington	Swan Creek Park Trail Network	$750,000
Milwaukee Rec/Public Schools	Wisconsin	Burnham Park Redevelopment Project	$399,255
		Total	**$13,381,153**

Subject:	FOR REVIEW: #FindYourWay on America's Wild and Scenic Rivers
Date:	Wednesday, July 19, 2017 5:24:39 AM

Laura and Heather,

We're continuing to work with our land management bureaus to celebrate our national trails, and wild and scenic rivers as they turn 50 years old next year.

Since we've already covered trails in June, we thought it would be great to highlight some of the rivers people can explore. We'd like to do the blog post next Monday or Tuesday for those who are still looking for adventures this summer.

Let me know if you have any edits. Thanks!

#FindYourWay on America's Wild and Scenic Rivers

Spending time along a river refreshes and renews. Rivers feed our desire to explore -- to daydream about what lies downstream and around the next bend. America's rivers have long served as workhorses supporting the exploration, transportation systems, and industrial and agricultural development of our nation.

In 1968 Congress passed the Wild and Scenic Rivers Act to ensure that some of our most cherished river segments are conserved in their natural, untamed state for us and for future generations, and next year marks the 50th anniversary of this landmark act. From placid canoe streams to rushing whitewater kayak runs, from icy trout-filled brooks to lazy cypress lined bayous, the system contains America's best free-flowing waterways. There are 208 river segments in 40 states that are part of the system.

Whether you want to hike, fish, canoe, camp or just relax along the bank, below is a sampling of 15 stream segments around the U.S. that highlight opportunities to explore the diversity and beauty of America's Wild and Scenic Rivers.

What are you waiting for? #FindYourWay today!

Rogue Wild and Scenic River in Oregon

The Rogue River's mighty salmon runs were made famous by author Zane Grey and continue to offer some of the best fishing on the West Coast. The wild Rogue, one of the original eight Wild and Scenic Rivers designated in 1968, offers multi-day whitewater rafting trips through a deep canyon lined with majestic Douglas-fir forest. Those more inclined to view the river from shore can hike the 35-mile-long Rogue River Trail. The Rogue's headwaters start on the west slopes of the peaks surrounding Crater Lake in Oregon and twist and descend for 215 miles through the Cascade, Siskiyou and Coastal Ranges before

spilling into the Pacific at Gold Beach.

Bruneau Wild and Scenic River in Idaho

Among the stark volcanic tablelands of southern Idaho, several rivers have carved deep canyons into the dark basalt -- hidden from view until one is right on the rim of the surrounding landscape that was designated as wilderness in 2009. None is more spectacular than the gorge of the Bruneau River, carving an 800-foot chasm that is almost as narrow as it is deep. Even peering from high above on the rim, one can tell that the whitewater is for experienced paddlers only. The river churns in a series of seemingly endless class III and IV rapids and sometimes covers the entire width of the canyon floor.

Merced Wild and Scenic River in California

The Merced River begins as snowmelt from the high Sierra gathers into glacier-polished channels and then pours over spectacular granite waterfalls before slowing to a sluggish meander through the incomparable Yosemite Valley in California. Once the river exits Yosemite National Park, it makes a headlong rush for the lowlands and its class III and IV whitewater rapids provide thrills to rafters and kayakers. Spring visitors are treated to splashy array of wildflowers along the lower canyon, which is lined by a trail and roadside pullouts for those who prefer not to get wet, even as the upper river remains locked in snow and ice.

Upper Missouri Wild and Scenic River in Montana

Canoeists can float from several days to weeks and follow in the footsteps of famous explorers Lewis and Clark as they traverse the geological folds and faults of “Breaks” country at Montana’s Upper Missouri River. The roadless canyon boasts broad vistas where fishermen are likely to catch goldeye, drum, sauger, walleye, northern pike, channel catfish, carp, smallmouth buffalo and paddlefish. Floaters might even spot some of the many elk and mule deer that inhabit the area, or they can scan the cliffs to get a glimpse of Rocky Mountain bighorn sheep.

Rio Grande Wild and Scenic River in New Mexico

The Río Grande Wild and Scenic River (named by early Spaniards as the “Great River of the North”) enters New Mexico in a deep basalt canyon where trout inhabit the deep green pools and birds of prey nest along the ochre cliffs. Adventurous whitewater boaters float the “Taos Box,” which contains numerous class IV and even V rapids. Milder but still exciting, class II and III runs are found downstream. Landlubbers can enjoy the river at the Canyon Rims Recreation Area, which has camp and picnic sites perched high on the canyon rim. The area has attracted people since prehistoric times. Evidence of ancient use is found throughout the area in the form of petroglyphs, prehistoric dwelling sites and many other types of archaeological sites.

Fortymile Wild and Scenic River in Alaska

Take a trip to gold country in Alaska. Canoeists along the Fortymile River can see modern prospectors working the river gravels, as well as remnants of several large historic dredges, as they float through thick stands of black spruce and tussocks that grow above the permafrost. It never truly gets dark here in summer, making more time for fun and exploring. The long days melt into a pink dusk that slowly transitions into a lengthy dawn. This is the longest river in the system with the main stem and tributaries stretching for almost 400 miles.

Little Beaver Creek Wild and Scenic River in Ohio

A remarkably wild stream is tucked in a forested valley among the pastoral farmlands of eastern Ohio. The clear waters of Little Beaver Creek River support 63 species of fish, including a popular smallmouth bass fishery. Add to this list 49 mammal species, 270 species of migratory and resident birds, and 46 species of reptiles and amphibians, and one gets a picture of the ecological diversity packed into the corridor. Little Beaver Creek is also believed to be the only riparian corridor in the United States, which shows geologic evidence of all five ice ages. Canoeing, camping, hiking and horseback riding are all popular activities along Little Beaver Creek.

Clarion Wild and Scenic River in Pennsylvania

The Clarion River is a success story in river renewal. Trout and smallmouth bass now flourish where waste from historic tanneries and mine acid drainage once tainted the water of this Pennsylvania river. The Clarion is a destination for canoe paddlers or inner tube floats with fishing, hiking and wildlife-watching also among popular activities. Towering white pines rise above the birch, oak and maple forests, which provide spectacular fall foliage. Bald eagles now nest along the Clarion and osprey sightings are on the rise.

St. Croix Wild and Scenic River in Wisconsin

Visitors to the St. Croix River can follow the paths of French fur traders who plied the river, trapping and trading their pelts in Wisconsin. The St. Croix and Namekagon Rivers stretch for over 200 miles, offering a diversity of recreation experiences and protecting an iconic stream of the upper Midwest. Here eagles and osprey compete with fishermen to catch smallmouth bass. Rapids and riffles are interspersed among stretches of flatwater that offer varying paddling experiences. Don’t miss the Dalles of the St. Croix -- a deep basalt gorge with glacial potholes and other spectacular rock formations. Hiking and historic towns along the corridor offer recreation alternatives for landlubbers.

Eightmile Wild and Scenic River in Connecticut

Surrounded by some of America’s earliest industrialized areas, the Eightmile River Watershed has retained a remarkable degree of naturalness with large areas of unfragmented wildlife habitat, an array of rare and diverse wildlife, scenic vistas, high water quality and significant cultural features. This Connecticut corridor is a great example of local municipalities, land trusts, environmental groups and residents working with state and

federal agencies to protect a cherished community resource.

Musconetcong Wild and Scenic River in New Jersey

Located only 45 miles from Manhattan, the Musconetcong River seems a world apart as it flows through the rural highlands of northwestern New Jersey. In the 18th century, the surrounding hills were logged as a source of charcoal for the iron industry and the water was diverted for the Morris Canal to bring coal from Pennsylvania to northern New Jersey. The regenerated forest hides remnants of the canal and the area only contains traces of its early development. Human history in the Musconetcong Valley can be traced back approximately 12,000 years to the end of the last ice age. The Plenge Site along the lower river in Warren County was the first major Paleo-Indian archaeological site excavations in New Jersey, and is considered one of the most significant in the northeastern United States. The Musconetcong River is known as the best trout fishery in the state. Paddlers enjoy the river's rapid flows, and hikers enjoy the miles of hilly trails that flank the river and afford stunning views of the river corridor.

Wekiva Wild and Scenic River in Florida

The Wekiva River originates at Wekiwa Springs, where 42 million gallons of water bubbles from the limestone bedrock each day from two vents -- the largest of which is 35 by 5 feet and located 15 feet under the water. The clear, bluish-green water flows northeast through a primeval landscape just minutes away from the traffic and crowds of Orlando and is one of Florida's best-kept secrets. A state park along the corridor offers a variety of adventures from canoeing and kayaking to biking or relaxing at waters edge. Wildlife abounds and lucky visitors might spot a Florida black bear and in rare instances, even a manatee.

Niobrara Wild and Scenic River in Nebraska

The Niobrara River winds through dramatic bluffs with small waterfalls in Nebraska, making it a popular float for inner tubes, canoes, kayaks and cow tanking. Its heartland setting means that both eastern and western bird species mingle here. The corridor’s wildlife diversity stretches back much further in time though. For more than 145 years, the central Niobrara River Valley has been an important source for mammal, fish and reptile fossils. These fossil deposits have figured prominently in scientific studies of evolution, and collections of fossils from Niobrara are housed in research institutions including New York's American Museum of Natural History, Chicago's Field Museum of Natural History and the Smithsonian's Museum of Natural History.

Wilson Creek Wild and Scenic River in North Carolina

Located in North Carolina’s famed Blue Ridge, the scenic Wilson Creek River is popular for hiking, car camping, backpacking, fly fishing, canoeing, kayaking and swimming. The Wilson Creek Gorge has class III, IV and V rapids and is considered to be the most challenging run in the Blue Ridge by experienced whitewater paddlers. The boiling hydraulics and powerful rapids include 10-foot waterfalls and an 18-foot stair step drop. Parts of the stream are managed as wild trout waters and have populations of both rainbow

and brown trout. There are native eastern brook trout in its uppermost headwaters.

Amargosa Wild and Scenic River in California

The Amargosa River in California is often called the “Crown Jewel of the Mojave Desert” and exemplifies the diversity of the Wild and Scenic River system. It flows through the hottest and driest part of the U. S. and remains below the surface for much of its course before emptying out into Badwater Basin in Death Valley. Along the wild and scenic segment, the river flows at the surface and is saltier than the ocean but is still critical for desert life. The tiny Amargosa pupfish has evolved to swim in the warm salty water, and the Amargosa vole, possibly the rarest mammal in the U. S. with less than 100 individuals, only lives in the wetland rushes along the river. The corridor provides exceptional birdwatching opportunities and scenic desert hikes during the cooler months.

Subject:	FOR REVIEW: Blog post on Interior heroes
Date:	Friday, July 21, 2017 4:14:29 PM

Hi all,

Katie pulled together this short blog post on work by a few Interior employees for next week's theme of Heroes. Thanks to Joan for her help on figuring out who to feature!

Let us know if there are any red flags. We'd like to publish this by Tuesday or Wednesday.

Everyday heroes at the Interior

You don't have to wear a cape to be a hero. At the Interior Department, ordinary men and women sometimes find themselves called to act in extraordinary circumstances. Many have gone above and beyond their job descriptions. Some get recognized, and others spend their time quietly protecting the nation's public and tribal lands, and those who visit them.

This week, we're highlighting a few of Interior's heroic employees.

Bureau of Indian Affairs Police Officer saves elderly resident
Officer Justin C. White of the Bureau of Indian Affairs was dispatched to an area home in North Dakota that was engulfed in smoke. When White arrived, he found a wheelchair-bound elderly resident trapped in the home. With little thought for his own safety, White shattered a bedroom window, then crawled through the broken glass to retrieve and successfully evacuate the resident. This act of bravery won him a Valor Award -- one of 30 Interior employees to receive the award this year.

National Park Service ranger rises to the challenge
Throughout her 21-year career in the National Park Service, Leslie Reynolds has dangled 200 feet from a helicopter to rescue climbers, led search parties, treated major wounds, helped preserve our national treasures, and assisted countless visitors. Her skill, courage and dedication were recognized last year when she was named the recipient of the park service's most prestigious award -- the Harry Yount Award for Excellence in the Art of Rangering. Reynolds's career has taken her to Yosemite, Shenandoah and Grand Canyon National Parks. She currently serves at Cape Cod National Seashore in Massachusetts and is an unfailing leader among her fellow rangers.

Bureau of Reclamation engineer pivotal at river restoration
Bureau of Reclamation's own Jennifer Bountry was named Federal Engineer of the Year for her achievements in river restoration. Bountry was a key manager of the Elwha River Restoration Project, which looked to restore salmon and treaty obligations with the Lower

Elwha Klallam Tribe. Thanks to Bountry's work, nearly 100 acres of new coastal beach has been created, fish access has been restored to 70 miles of river, and fish habitats have been rehabilitated. Bountry is one of the many Interior employees whose work benefits Americans across the country.

Federal Wildlife Officer acts quickly to save Boy Scouts
Matt Belew, a Federal Wildlife Officer with the U.S. Fish and Wildlife Service, was honored with the Valor Award for his incredible courage and bravery in May 2015 when a tornado blew through Wichita Mountains National Wildlife Refuge in Oklahoma. Belew evacuated 65 boy scouts camping at the wildlife refuge about 30 minutes before the tornado hit. Belew didn't stopped there and returned to make sure no one was left behind. Belew's actions led to an outpouring of thanks from the scouts, their families and the local community.

Jackson Hotshot crew respond to national emergencies
Since it was created in 1997, the Jackson Hotshot crew have fought disastrous wildland fires from Alaska to Florida. In addition, they have been called upon to assist with numerous national emergencies, including Ground Zero after 9/11 and search and recovery operations from the Space Shuttle Columbia. The Hotshots were also available for recovery efforts following several devastating hurricanes, including Katrina, Rita and Sandy.

Many of Interior's other employees are unsung heroes just by their dedication and perseverance in doing their everyday jobs. Join us in thanking all the heroes in your community this week!

Email (with subject line options):

- Not all heroes wear capes at Interior
- Interior employees lead with courage and bravery
- Celebrating everyday heroes at Interior
- Stepping up to the challenge: the mark of an Interior employee

Body:
Not all heroes wear a cape. At Interior, employees across the Department sometimes find themselves called to act in extraordinary circumstances. Interior employees step up to the challenge their job presents, often going above and beyond what is expected of them.

They're everyday heroes who -- through their determination and selflessness -- risk their lives in their jobs managing public lands, waterways, resources and visitors. Whether it's shielding the public from harm, rescuing a troop of boy scouts before a tornado hit or pitching in when a natural emergency strikes, many say that they were "just doing their job."

As we celebrate the heroes in our communities, learn more about some of the courageous

and inspiring acts of Interior employees, and be sure to thank all the heroes in your community this week!

Subject: FOR REVIEW: Draft DOI release on $3.6M in WaterSMART funding
Date: Tuesday, July 18, 2017 5:37:07 PM
Attachments: 07- 17 Small Scale Water Efficiency Grants.docx

Laura et al--As you requested, I revised the Reclamation release to make it a release on DOI letterhead with a new lede and a draft quote (highlighted) from the Secretary.

(b) (5) [redacted]

As usual, feel free to revise the quote if that or anything else is worded inaccurately.

In addition, I added the **list of states** to the release in case we want to send the release to our state lists for the 15 states.

The draft release is attached and below. Joan

Date: July __, 2017
Contact: Interior_Press@ios.doi.gov

Interior Department Announces Grants for WaterSMART Small-Scale Water Efficiency Projects in 15 States

$3.6 million in Reclamation grants will be leveraged with local and state funding to support $7.47 million in efficiency improvements projects

WASHINGTON –Secretary of the Interior Ryan Zinke announced today that Interior's Bureau of Reclamation has selected 57 Small-Scale Water Efficiency Projects in 15 states to receive a total of $3.6 million as part of the WaterSMART grants program. The WaterSMART grants are leveraged with local and state funding to support $7.47 million in efficiency

improvements.

(b) (5) [redacted]

Projects range from installation of automated systems to lining irrigation canals to purchasing water meters. They include a variety of innovations using the latest technologies in Advanced Metering Infrastructure, Supervisory Control and Data Acquisition (SCADA) and other "smart" control and monitoring systems.

The 57 communities awarded grants are found in Arizona, California, Colorado, Idaho, Kansas, North Dakota, Nebraska, New Mexico, Nevada, Oklahoma, Oregon, South Dakota, Texas, Utah, and Washington. The list of selected projects can be found at <insert link>.

Small-Scale Water Efficiency Projects are part of Reclamation's WaterSMART Program. The program aims to improve water conservation and sustainability, helping water resource managers make sound decisions about water use. The WaterSMART Program identifies strategies to ensure this generation and future ones will have sufficient amounts of clean water for drinking, economic activities, recreation and ecosystem health. To learn more, please visit www.usbr.gov/watersmart.

Funding will be leveraged with local and state funding to support projects in 15 states

WASHINGTON - The Bureau of Reclamation announced that 57 projects were selected to receive $3,645,544 for Small-Scale Water Efficiency Projects, part of the WaterSMART grant program. The projects selected seek to conserve, better manage or make more efficient use of water supplies and are leveraging with local and state funding to support $7.47 million in efficiency improvements.

The selected projects will support water efficiency in 15 western states. Projects range from installation of automated systems to lining irrigation canals to purchasing water meters. The list of selected projects can be found at <insert link>.

Small-Scale Water Efficiency Projects are part of the WaterSMART Program. It aims to improve water conservation and sustainability, helping water resource managers make sound decisions about water use. The WaterSMART Program identifies strategies to ensure this generation and future ones will have sufficient amounts of clean water for drinking, economic activities, recreation and ecosystem health. Date:	Wednesday, July 19, 2017 2:31:34 PM
Attachments:	FINAL DRAFT Gay Vietzke Named Director of Northeast Region - PR edits.docx

Hi Todd-

I serve as the POC in the DOI Communications Office on issues related to NPS and FWS. In ensuring ASFWP sign-off on certain materials, I wanted to check in with you to determine the best process.

In this case, I've attached a release regarding the announcement of the new Northeast Region Director for NPS. They'd like to put this out on Friday, July 21.

After my initial review, ASFWP office will serve as final policy review. I'll take those edits and do a final review for Comms and route through Laura/Heather/Russell prior to sending materials back to the bureau for release.

Please let me know if this process works. If not, we can adjust accordingly. Thank you.

Gay Vietzke Named Director of National Park Service's Northeast Region

WASHINGTON – Today, acting National Park Service (NPS) Director Michael T. Reynolds announced the selection of Gay Vietzke as regional director for the Northeast Region of the NPS. Vietzke currently serves as the superintendent of National Mall and Memorial Parks in Washington, D.C.

In her new role, Vietzke will oversee operations for 83 national parks, 22 national heritage areas, 1,102 national heritage landmarks, 154 national natural landmarks and many other associated sites within the states of Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, and West Virginia.

The Northeast Region has a budget of nearly $320 million and more than 3,000 employees.

"Gay's expertise and experience leading one of the NPS's most visible and complex parks and her familiarity with the Northeast Region makes her the right choice for the role of Regional Director," said Reynolds "Gay's strong stewardship of the National Mall and Memorial Parks earned her the respect and admiration of her colleagues and park supporters in D.C., and I am confident that her commitment to strong partnerships and parks will serve her and the Northeast Region well."

Vietzke served as the Northeast Region's deputy regional director from 2011 to 2015, leading the region's park operations, resource stewardship and science, and external affairs and partnerships programs.

Among her many other NPS assignments, she served as the superintendent of Fort McHenry National Monument and Historic Shrine, and Hampton National Historic Site in Maryland, where she was instrumental in creating a Baltimore-based youth employment program. She managed the design and construction of the eco-friendly Fort McHenry Visitor and Education Center; a $15 million partnership-funded facility. Additionally, she served as superintendent of Sagamore Hill National Historic Site in Oyster Bay, N.Y., where she oversaw the park's general management plan, strengthened relationships with partners and opened the newly rehabilitated Old Orchard Museum.

Vietzke holds a bachelor of arts in art history from the University of Connecticut and a master of science in historic preservation from the University of Pennsylvania.

Vietzke will begin her assignment with the Northeast Region in early September. An announcement regarding leadership at of National Mall and Memorial Parks after Veitzke's departure will be made soon.

-NPS-

About the National Park Service. More than 20,000 National Park Service employees care for America's 417 national parks and work with communities across the nation to help preserve local history and create close-to-home recreational opportunities. Visit us at www.nps.gov, on Facebook www.facebook.com/nationalparkservice,

Twitter www.twitter.com/natlparkservice, and
YouTube www.youtube.com/nationalparkservice.

About the Northeast Region. The Northeast Regional Office supports the parks and program areas in the northeast states, from Maine to Virginia. The role and function of the regional office is to provide employees with specialized expertise and tools that will foster growth, development, and safety of regional park service employees, volunteers, and partners. The regional directorate provides employees with current information and policy, filtering and interpreting necessary information to and from the Washington office.

NPS RELEASES ENVIRONMENTAL ASSESSMENT FOR PROPOSED UTILITY AND ROADWAY CROSSINGS AND A VISITOR TRAIL WITHIN TULE SPRINGS FOSSIL BEDS NATIONAL MONUMENT

LAS VEGAS – The National Park Service is seeking public comment on an environmental assessment for proposed utility and roadway crossings and a visitor trail at Tule Springs Fossil Beds National Monument.

The proposal would involve the NPS working with the City of North Las Vegas to acquire an existing easement from the city that currently bisects the monument. In exchange, the city would obtain easements providing access and utilities to a planned community that is surrounded by NPS-managed land. The proposed exchange also includes construction of a trail that would provide visitors access to the monument in a manner that protects park resources.

The environmental assessment provides a decision-making framework that analyzes all reasonable alternatives to meet the objectives of the proposal, evaluates potential issues and impacts to resources and values, and identifies mitigation measures to lessen the degree of extent of these impacts.

The document is available for review at area libraries and online at http://parkplanning.nps.gov. Comments may be submitted electronically via the website. Written comments should be mailed to Lake Mead NRA, Compliance Office, 601 Nevada Way, Boulder City, NV 89005. Comments must be received by August 30, 2017.

Heather,

My name is Anna Swick and I do press for Congressman Jim Banks (IN-03), who will be at the event tomorrow. Is it okay for us to let our local media know about the event?

And do you have any additional guidance on how I should go about all things press-related?

Best,
Anna

Team Indiana. For those who are planning to attend tomorrow (still need to hear back from Banks office), please see the relevant information for the event. Cassie, you mentioned press. Heather (Press Secretary) is cc'd. She can work with you on that. What I would say is that

there is already press confirmed to attend and there will be a media availability after the round table, so just want to make sure nobody is getting ahead of what's already being done.

One more point, when this event was originally sent to me, it was largely focused on RV and now it has grown into a larger Made in America Outdoor Rec Industry event so there will be a good amount discussed during the round table that is outside the RV sphere. If your boss would like to just come to the press portion and meet the industry people in attendance, that is fine. I just don't want to waste their time or have them wondering why they're sitting through a round table that will be wider than the RV discussion. It's up to you, but please let us know your plans.

Also, please do not share the attachments for the event.

Micah
...

Thank you so much for your help and enthusiasm regarding RECREATION DAY!
I wanted to share a variety of docs which we believe are the latest information on plans for Tuesday, July 18th.

1. An overview of the day's three key activities;
2. A description of the Made in America Outdoor Recreation Media Event;
3. Our narrative description of 27 opportunities for expanded partnerships – together providing for more than $80M in private investment at Interior sites and then producing a sustainable supplemental revenues stream of $20M annually above appropriations, I addition to delivering better visitor access and enjoyment.
4. Our anticipated list of participants in the 10:45 AM meeting;
5. Info on the three recreation media reps who, collectively, can allow the Secretary to reach the recreation industry via trade publications and millions of American households with recreation consumer publications;
6. Some key economic impact of recreation bullets; and
7. Information on the Outdoor Recreation Industry Roundtable.

I'll be in meetings for much of the day but can be reached by email and on my cell – 703-624-0495. Plus Cathy and Ben will be available in the ARC office.

RECREATION LEADERSHIP MEETING AT US DEPARTMENT OF THE INTERIOR, JULY 18, 2017
DRAFT SCHEDULE

10 AM: Assemble ORIR team in the Secretary's Conference Room, 5th Floor. Assigned seats. Approximately 16 seats for ORIR representatives and rec industry VIPs; supplemental seating for another 10 on periphery. Premeeting conversation with some key Interior folks. Expected Interior participants: Todd Willens (Associate Deputy Secretary), Doug Domenech (Senior Advisor), Mike Reynolds (Acting Director, NPS), perhaps 1-2 more.

10:45 AM: Secretary arrives , shakes hands with ORIR group. Candid photos. Open media.

10:50 AM: Secretary and others take seats and Secretary welcomes group to Interior, comments on initial meeting in April and eagerness to learn about the ideas being brought to today's meeting. Brief but forceful rejection of label of privatization on campgrounds as well as parks overall.

11:00 AM: Secretary listens as those at the table identify themselves. Thanks media and excuses them, telling them they can preview the Made in America exhibits. Invites Thom Dammrich to begin the discussions/presentation. Thom provides overview and explains that the nearly 30 opportunities being presented are a first wave of thousands more opportunities that will emerge over the next few months. Presentations will be delivered by 3-4 persons, beginning with NPS-related opportunities coming from concessioners (Terry MacRae will outline approximately 18, but highlighting 3-5). Tim Rout will describe the proposed NPS regional pilot for WiFi expansion. Tim Buche will outline BLM proposals to support OHV activities. Total of 30 minutes for presentations utilizing room's very modern AV capabilities. Then time for reactions and further discussions about culture change, getting opportunities accomplished and topics like recreation czar and Secretarial Order(s).

12:00 Noon: Meeting wraps. Informal discussions and pictures for 15 minutes.

12:15 PM: Secretary leads group out to 1849 C Street NW entrance where RVs, boats, Polaris Ranger and snowmobile, SEMA-provided off-road truck, archery equipment and more is on display on closed street and adjacent Bolivar park. Media invited to talk with Zinke, industry leaders and learn more about rec industry economics. Tour of exhibited equipment and info on recreation segment employment – and connection between factory jobs and use of products on public lands and waters across the nation. Special invitations to RV and Boat Caucus leaders to be part of this event. Food (barbeque) and beverages in Bolivar Park. Secretary makes 5 minutes of remarks re Made in America week and the outdoors, calls upon a recreation spokesperson and one or more Members of Congress to add flavor. Open media.

1:00 PM: Secretary boards RV with 4-5 reporters (rec trade and consumer (coveringRV/camping, boating, powersports and hunting/fishing, plus AP reporter) for discussions on a trip to key nearby sites like memorials on the National Mall, perhaps Theodore Roosevelt Island. Return to Interior by 2 PM. Invited media

7/16/17

OVERVIEW: Made in America Outdoor Recreation Media Event

Date: Tuesday, July 18
Time: Approximately 11:30 am to 1 pm
Description: **Made in America Outdoor Recreation Media Event**
Location: C Street, NW between 18th and 19th Streets (entrance to USDoI) and adjacent Bolivar Park
Overview: We intend to show a sample of Made in America recreation products along with signage that describes the number of manufacturing jobs associated with the company and industry involved with that product.
Types of products: Open to all products linked to outdoor recreation. Confirmed/likely products are: RVs (several types), boats (several types), Polaris Ranger ATV, Polaris snowmobile. Exploring coolers, archery equipment, off-road truck, canoes and kayaks. Exploring Indian and other iconic US brands plus electronics. Must be manufactured in USA.
Messaging: ORIR's media team will prepare a news release on the exhibit and its role in Made in America Week. Trade association and manufacturer employees are welcome to discuss/show product.
Participants: 100-250, including ORIR members, key Interior officials and staff, media and Members of Congress.
Food: VistaOutdoor and American Recreation Coalition will provide lunch. Barbeque, cole slaw, desserts, beverages. Cleared by Solicitor and ethics office (cost of $17.10 pp) under Take Pride in America Act authority.
Remarks: US Secretary of the Interior Ryan Zinke, perhaps an industry spokesperson and a Member of Congress

No rain date likely. ORIR cannot supply power, tables or chairs – displays must be totally self-reliant. Interior coordination through:

Jason Funes, Special Assistant for Intergovernmental and External Affairs
Office of the Secretary, US Department of the Interior
202-208-5541 and Jason_funes@ios.doi.gov.

Recreation Enhancements Through Partnerships on Federal Lands

EXAMPLES OF PLEDGED ACTIONS

• Delaware North operates the 358 room Yavapai Lodge located along the South Rim of Grand Canyon National Park. Of the 358 rooms, only 198 rooms have air conditioning. The rooms with air conditioning are extremely popular. Concessioner will install air conditioning units within the remaining 160 rooms. The investment to install the air conditioning units would be fully funded with Delaware North's funds and we would not use any repair and maintenance reserves. To off-set the investment of approximately $1 million plus additional operating costs, NPS will need to approve a rate increase for these specific rooms to an already approved NPS rate for rooms now offering air conditioning. The NPS would receive an estimated $1.4M in additional franchise fees as well as an estimated $289k in additional maintenance reserve fees.

• The lodging and ancillary services at the North Rim of the Grand Canyon are operated seasonally by Forever Resorts, from May 15 to October 15. The park is extremely popular – with the lodging being 100% occupied virtually every day of the season. With the popularity of "rim to rim" hiking in the cooler months of the year, a two-week extension in lodging operations from October 16 – October 31 would be a welcome visitor service enhancement and allow a 2% increase in visitation. Visitation to the North Rim, in contrast to the South Rim, is substantially below levels of 20 years ago, and the early closure impacts local gateways. NPS already staffs the visitor center and the entrance station during this period, and the concessioner is required to continue operation of its retail and food operations. Lodging has extended for a short period twice during the past six years for special NPS-related purposes with no challenges. Sustainable additional revenues to NPS will exceed $265,000 annually for the two weeks, including added franchise fees, maintenance reserve fees and entrance fees.

• Grand Teton Lodge Company provides most visitor services in Grand Teton National Park and is unable to fully meet visitor demand for food services during peak periods at String Lake and Jenny Lake with existing convenience store and snack bar services. The company is willing to invest an estimated $250,000 to test the viability of augmented food services with food trucks operating in two parking spaces at existing lots during periods of high demand, estimated at 120 days per year. No new utility service will be required, and all food would be prepared in NPS-monitored kitchen facilities. NPS additional revenues of $20,000 are pledged, and are likely to be substantially higher. This test would help guide the next iteration of the concessions contract for the park and is an alternative to a multi-million-dollar facility being discussed.

• Forever Resorts operates visitor services in Badlands National Park. It proposes Phase II of a very successful project that delivered a Win-Win-Win for park visitors, the National Park Service, and the concessioner. Six years ago, 23 guest cabins that were in very poor condition were replaced with new energy and environmentally efficient cabins with features today's visitors expect. Guests willingly pay for the improved quality. The rate for these cabins is virtually double that of the old. Not only is occupancy up substantially for this seasonal operation, the average number of nights stayed has jumped as well! This project will install 10 more of these high-demand cabins at a cost of about $1,000,000 with now Leasehold Surrender Interest. The new cabins are projected to increase NPS revenues by at least $70,000 annually. To amortize the investment, the current contract would be extended by three years – an action which also reduces NPS staff and contractor costs required for prospectus development costs.

• Fort Sumter Tours originated ferry service to this park unit in Charleston harbor and has provided year-round public access for decades. It offers the city's 4th grade classes free transportation during non-peak periods – serving thousands annually. The most recent NPS-prepared prospectus deleted a traditional, optional and visitor-valued service of group and family pictures taken as visitors board the ferry without explanation, and despite a request from the concessioner to reinstate the service, the agency declined to consider the request. The decision forced elimination of three concessioner-provided jobs and an estimated $25,000 in sustainable NPS revenue. After finally achieving senior NPS attention, the grounds for the elimination have been reviewed and there is agreement that the basis was in error. The concessioner has applied to reinstate this visitor service immediately and is awaiting NPS confirmation.

• Historic Tours of America operates the high-speed ferry service from Key West to Dry Tortugas National Park, a spectacular, unique and lesser visited park unit. Before the current concession, two boat operators each carried 100 passengers daily (200 total). The new contract required the single new concessioner to build a vessel rated to carry 250 passengers, but restricted passage to 150 passengers a day. The result is a significant decline in visitation – well below the NPS- defined carrying capacity. That level has never been reached since the inception of the concessions agreement. Three years ago, the concessioner requested permission to carry 25 additional passengers daily. Despite universal support, including by the superintendent, it took two years to receive authorization. The addition has significantly increased revenues to the park and added some 6,000 additional annual visitors – a clear victory. Yet visitation remains below carrying capacity and there remains unmet demand, as potential passengers line up on the dock seeking last minute spots from "no-shows." In exchange for the increased passenger level and a two-year contract extension, NPS would also receive at least $150,000 in additional, sustainable revenues annually.

• The Recreational Boating and Fishing Foundation, American Sportfishing Association, GEICO and other partners will invest an estimated $400,000 and substantial in-kind support to initiate FirstCatch programs at two USFWS refuges (Heinz National Wildlife Refuge in Philadelphia, PA, and Laguna Atascosa National Wildlife Refuge in Rio Hondo, TX. These "First Catch Centers" will establish an incubator-type for newcomers to learn and develop fishing and boating skills and conservation ethics. Elements of state and government agency programs, education institution programs, camps and after school events and boating programs with fishing elements will all be included, providing a positive and fun experience for families and youth alike, with an overall objective of helping grow national participation in the sports.

• Delaware North operates lodging and additional concessioner services in Shenandoah National Park. It recently remodeled 66 guest rooms within two lodges. The improved facilities have received very positive feedback from guests. The concessioner now seeks to remodel the remaining 132 rooms. The room remodel investment would be fully funded with Delaware North's funds and we would not use any repair and maintenance reserves. To off-set the capital investment, NPS would approve a rate increase for these rooms to the already approved NPS rate for the remodeled rooms as well as a 5-year contract extension. The NPS would receive an estimated $2.1M in additional franchise fees and an estimated $6.6M in additional repair and maintenance reserves.

• Guest access to broadband service in NPS's developed frontcountry areas is a top visitor complaint and a deterrent to modernizing delivery of safety and interpretive information. Costs to the NPS and visual concerns have hampered progress in expansion of connectivity. NPS has now piloted a clear route to success at Lake Mead NRA, using a concessioner with a proven, no-cost-to government strategy that

has been utilized at DoD facilities nationwide. AccessParks designs, constructs and operates the broadband access, providing key free information and enhanced access on a fee and sponsorship basis, a format widely used by hotels and airports. In addition to high speed access at visitor centers, campgrounds, marinas, restaurants and more, AccessParks has other exciting capabilities including solar-powered kiosks offering limited area opportunities for quickly downloading regularly updated information ranging from maps and brochures to videos and safety information to smartphones. AccessParks is also proposing to offer downloadable confirmation of visits to key trails and other sites and even facilitate visitor contributions designed to help fund maintenance of NPS facilities. AccessParks proposes to expand its contract for Lake Mead NRA to one of two NPS regions – either Intermountain or Pacific West. Expected investment for units in either region now facing insufficient connectivity is $50,000,000 in private funding – all of which will be recovered through the initial contract.

• Bryce Canyon National Park visitor services are provided by Forever Resorts. The concessioner proposes to convert the boys' dorm, located right in the center of the principal visitor services area of the park, including other lodging. The dorm would be converted to lower priced "hostel-style" accommodations. Visitors would have a new, quality lower-priced lodging option – allowing an estimated increase in in-park stays of 3,000 persons. Employees now utilizing the boys' dorm would be provided accommodations outside of the park. This would also eliminate employee cars parked inside the Park, as a shuttle service would be provided. Forever estimates capital costs of $300,000 for the dorm plus some costs for the alternative employee housing. Gross receipts would increase by between $750,000 and $1M, and annual net increased funds to NPS are projected to be $107,000.

• Forever Resorts proposes to improve the campgrounds in Big Bend National Park. The current NPS campgrounds at Chisos Mountain, Castalon, and Rio Grand Village offer only dry campsites with no electric service or water hookups. At concession operations in Grand Teton NP and Badlands NP, the NPS has turned these operations over to Forever for operations while still providing interpretation and other important and visible roles. Forever would invest in electric hookups for 30% -40% of the spaces in each campground. The NPS would substantially reduce its operating expenses savings and receive substantially more franchise fee revenue. Forever projects a capital investment of $300,000, likely reductions of at least $100,000 in annual NP operations and approximately $140,000 in new franchise and related fees each year.

• Forever Resorts proposes to improve the campgrounds on the North Rim of Grand Canyon National Park. The current NPS campground offers only dry campsites with no electric service or water hookups. At concession operations in Grand Teton NP and Badlands NP, the NPS has turned these operations over to Forever for operations while still providing interpretation and other important and visible roles. Forever would invest in electric hookups for 30% -40% of the spaces in each campground. The NPS would substantially reduce its operating expenses savings and receive substantially more franchise fee revenue. Forever projects a capital investment of $150,000, likely reductions of at least $100,000 in annual NP operations and approximately $160,000 in sustained new NPS franchise and related fees each year.

• Grand Teton Lodge Company has a need for augmented and improved in-park staff housing. The concessioner will design and construct new housing units for seasonal and year-round staff at Jackson Lake Lodge and Jenny Lake Lodge through capital expenditures of an estimated $2,000,000, investments well beyond its requirements under the current contract. The lodging would offer capacity for safe, secure housing for 25-30 people and could be achieved without award of LSI through a contract extension of three years.

• Grand Teton Lodge Company proposes to extend fiber optic lines to Colter Bay cabins, RV park and tent cabins (344 total units). This will allow for WiFi access in front-country areas where cell service and connectivity is poor. Internet service is currently only available in a few locations which serves tens of thousands of visitors each year and often forces travel to other park locations for communications purposes. Projected capital investment is $3M. These costs would be recovered through higher prices and/or charges for robust internet access. The increase in overall revenues are projected to generate some $100,000 additional in annual franchise fee payments by the concessioner to the park unit.

• Hornblower's Alcatraz Cruises proposes to expand popular night tours from 600 visitors per day to 1,200 per day. The concessioner further proposes expansion of the new "Behind the Scenes" tour from 60 visitors per day to 240 per day. Both products have top ratings and sell out 4---6 weeks in advance. No additional investment would be required. Hornblower projects additional gross revenues of $6,750,000 and a net gain to NPS of $2,750,000 annually.

• Hornblower's Alcatraz Cruises proposes to add a new island tour product that is shorter in duration, with a scaled back audio tour that features other now-unused cellblock areas and parts of the island not utilized to avoid overcrowding and differentiate tour participants. Investment of at least $1M would be undertaken by the concessioner, addressing current backlog maintenance and safety needs, and the new tour is projected to generate $10M annually in gross revenues and a net gain to NPS of $4,750,000 annually.

• Hornblower's Alcatraz Cruises proposes to initiate themed food service on the island. Visitors would be offered the chance to utilize the renovated food service facility within a cellblock building, offering authentic menus and food from the 1933---1963 period of prison operations. Alcatraz was renowned for its prisoner meals. Renovation costs would be at least $4M and would increase visitation to the site and add a new dimension to park interpretation in the dining hall. Hornblower projects additional gross revenues of $3,267,000 and a net gain to NPS of $750,000 annually. Moreover, the availability of food service for visitors would facilitate experimentation with special, high-ticket "bucket" experiences in partnership with the National Park Foundation or other partners.

• Hornblower's Alcatraz Cruises proposes to undertake major upgrades and repairs of the current fixed wharf substructure on Alcatraz to assure the safety of the visitors, and the long-term viability of the service to the island. Much of the investment need is the result of deferred maintenance and further delays will drive up costs and threaten interruption of public access. Hornblower's experience in maritime construction will allow rapid, cost-effective improvements.

• Hornblower's Statue Cruises proposes a significant expansion to evening programming on Liberty Island, including access several nights per week during Spring --- Fall. Visitor services would include food service and patriotic music or interpretive programs that highlight the NYC skyline. The last cruise now currently departs NYC at 4PM despite major public demand for later departures. Expected increase in annual visitation is 300,000 per year. Hornblower offers to take on $500,000 in capital spending and projects an increase in gross revenues of $5,400,000 annually, and a net gain of $3,000,000 to the NPS.

• The Glade Run Recreation Area northeast of Farmington spans 19,000 acres and provides 42 miles of trails for use by motorized off-highway vehicles. The New Mexico Department of Game and Fish contributed $600,000 from the Trail Safety Fund for construction of the park, which will include a small riding track for youths, a skills training track, primitive camp sites, toilets and a pavilion. Off-highway motor vehicle registration and user fees support the Trail Safety Fund. RTP funds have also been

allocated. The local recreation manager is finding it difficult to implement the project due to myriad problems. Funding and expertise are available to make this a high-quality riding area that will attract a wide array of users, but the need to set up a new assistance agreement between BLM and technical experts is making it difficult to get necessary work accomplished.

• The 4,795 acre Sand Mountain Recreation Area is a designated OHV fee site located in the high desert of west central Nevada twenty-five miles south east of Fallon on U.S. 50 in Churchill County. The most dominant feature of the dune system is Sand Mountain which is approximately 3.5 miles long, 1 mile wide and 600 feet in height, making it the largest single dune in the Great Basin. In addition to OHV riding on the open dunes, there are 23 miles of riding available on the designated trail system that was established in 2008 to preserve the Kearny Buckwheat habitat and protect the Sand Mountain Blue Butterfly which is endemic only to the Sand Mountain area. This is a heavily visited area that needs upgraded/improved infrastructure. Continued heavy visitation is expected. With proper management this area will be a prime OHV recreation spot; however, without needed improvements this area could face serious issues. A limited investment now will prevent the need for extensive expenditures later. Trailhead improvements, signing, parking lot improvements and attention to other accommodations are needed.

• Glendive Short Pines OHV Area consists of approximately 2,800 acres. This recreation area is composed of an Open OHV area as well as areas which are limited to existing roads and trails. OHV trails, rock hounding, wildlife viewing and camping are available at this site. There are no designated camping spots or water available. However, dispersed camping is allowed. As it stands the local recreation manager is overstretched as she also is responsible for responding to the NEPA needs of the Miles City BLM Office's minerals management program (oil & gas). Maps, signing, engineering and maintenance are examples of needed improvements.

• The National Park Hospitality Association proposed a RentMyTent program in late 2013 to increase the convenience of camping in national parks by offering a "package" of equipment provided at NP campsites. The "package" was designed to attract visitors who: (1) do not own camping equipment but have an interest in a camping experience, especially at the low cost of camping; (2) those who own equipment but who will be reaching the national parks in a way which makes bringing their own equipment challenging (for example, by air travel); (3) those who want to spend time in a national park but are unable to reserve lodging because rooms are unavailable; and (4) like the convenience of driving up to a campsite and unloading just needed personal items, but who are likely to rely on other park visitor facilities like food service and who want to avoid the uncertainties of weather and timing associated with use of their own equipment. The Rent-a-Tent program would address the significant decline in overnight campground stays within national parks over the past two decades (tent camper nights are down some 1.2 million, while RV camper nights are down some 2 million). The pilot program would revise a complex plan developed in response to the NPHA initiative that required reservation of campsites via www.recreation.gov, and allow active promotion by concessioners and other recreation and tourism partners. Likely parameters are a minimum 3-day stay and an option, at an additional charge, for put-up and take-down services. The basic camping "package" will include a tent, cots, a cooler, and a lantern. Alternative lodging, including RVs and yurts, could also be tested by the program.

• Recreational Boating and Fishing Foundation and the Pennsylvania Fish & Boat Commission (PFBC) will join other partners in a unique effort to introduce fishing to urban participants: FirstCatch. Using a mobile "first catch center" (a trailer or motorhome), the program will enlist participants where they are,

including in their neighborhoods. The concept allows easy transportation of all equipment and materials, and allows for sponsors to be featured via a vehicle wrap. Planned events will be ongoing -- approximately 2-3 per week, and will introduce some 9,000 individuals annually. PFBC has put forth a list of many local partners to help with capacity and promotion. Participant data will be collected at the time of the event, for ongoing communication, and to determine successes/future involvement in the sport. PFBC will team up and host events at the Heinz National Wildlife Refuge in Philadelphia. Initial funding of some $250,000 has been provided by a charitable contribution, along with RBFF, Boat U.S. and Geico Insurance funding.

• Recreational Boating and Fishing Foundation will team up with Fishing's Future (FF), a Texas-based 501 c3 founded in 2007 by a man with a passion for fishing, for a second FirstCatch effort in and around Laguna Atascosa National Wildlife Refuge. This refuge is the largest protected area of natural habitat left in Texas' Lower Rio Grande Valley, near the state's southernmost tip. Programs and instructors are 100% volunteers, predominantly state agency aquatic education certified instructors. Based upon the experience at this refuge, the partners hope to add up to eight additional FirstCatch programs, mostly in Texas near Houston and Dallas, in 2018. Initial start-up investment and first year operation is projected at $250,000.

Outdoor Recreation Industry Roundtable

Outdoor Recreation Industry Roundtable is a coalition of America's leading outdoor recreation trade associations working to promote the policy and legislative reforms needed to grow the outdoor recreation economy. Roundtable members represent the thousands of U.S. businesses that produce vehicles, equipment, gear, apparel and services for the millions of Americans who enjoy our nation's parks, waterways, byways, trails and outdoor spaces. Combined, the various business sectors within the outdoor recreation industry generate $887 billion-per-year in economic activity and provide an estimated 7.6 million direct jobs. Coalition members produce the 8 largest recreation tradeshows in the U.S. and annually contribute $40 billion in federal excise tax, sales tax and duties.

The Outdoor Recreation Industry Roundtable strives to achieve the following:

1. **Ensure** the primary drivers of the outdoor recreation economy across the U.S. are recognized
2. **Foster** federal collaboration that will enable the outdoor recreation economy to reach its full potential
3. **Remove** barriers that prevent private investment from being made on public lands and waters
4. **Change** the mindset of federal agencies so recreational access and high quality visitor experiences are prioritized

Thinkstockphotos.com, Airstream, RV A

American Horse Council is a nonprofit trade association based in Washington, D.C., that works with Congress and other federal agencies on issues related to the U.S. equine industry. Topics range from trail access on public lands, immigration, taxes, gambling, equine welfare, import/export issues, disease control, and more. The ultimate goal of the AHC is to ensure that the equine industry works together to "Keep Opportunities Open" for the horse industry. For more information: **www.horsecouncil.org**

American Recreation Coalition is a nonprofit association providing a unified voice for recreation interests. Since 1979, ARC has forged public private partnerships to enhance, protect and promote outdoor recreation opportunities and resources. ARC organizes the annual Partners Outdoors conference, plays a primary role in key national coalitions, and leads the national effort to celebrate June as Great Outdoors Month, including activities inviting children to enjoy healthy, active outdoor lives. For more information: **www.funoutdoors.com**

The American Sportfishing Association is the sportfishing industry's trade association committed to representing the interests of the sportfishing and boating industries as well as the entire sportfishing community. We give the industry and anglers a unified voice when emerging laws and policies could significantly affect sportfishing business or sportfishing itself. For more information: **www.ASAfishing.org**

Archery Trade Association is the organization for manufacturers, retailers, distributors, sales representatives and others working in the archery and bowhunting industry. Founded in 1953, ATA is dedicated to making the industry profitable by decreasing business overhead, reducing taxes and government regulation, and increasing participation in archery and bowhunting. For more information: **www.archerytrade.org**

BoatU.S. is the nation's largest organization of recreational boat owners, with over half a million members. Founded in 1966, it provides diverse services, including insuring over eight billion dollars' worth of boats, operating the largest on the water towing fleet, representing boaters' interests on Capitol Hill, providing financing for boat buyers, publishing the most widely circulated boating publication, acting as a consumer protection mediator and more. For more information: **www.boatus.com**

International Snowmobile Manufacturers Association is an organization representing the four snowmobile manufacturers. It coordinates industry committees focused on snowmobile safety, the promotion of the lifestyle activity of snowmobiling, keeping accurate statistics, and reporting the growth of the industry and the positive economic impact snowmobiling has throughout the world. For more information: **www.snowmobile.org**

Marine Retailers Association of America is comprised of boat dealers, marine parts and accessories vendors, marina operators, boatyards, marine service providers, and all those whose livelihood is affected by the marine industry. Founded in 1972, MRAA serves its members by providing them with tools, resources and educational programs and by representing them with a powerful voice. For more information: **www.mraa.com**

Motorcycle Industry Council is a nonprofit trade association supporting motorcyclists in the U.S. by representing manufacturers, distributors, dealers and retailers of motorcycles, scooters, ATVs, ROVs, and related parts, accessories, goods and services as well as members of allied trades such as insurance, finance and others with a commercial interest in the industry. The association, known as MIC since 1970, was founded in 1914. For more information: **www.mic.org**

National Association of RV Parks and Campgrounds (arvc) is the only national association exclusively representing the interests of private RV parks and campgrounds in the U.S. Members include RV park and campground owners and operators, industry suppliers and those interested in getting into the industry. For more information: **www.arvc.org**

National Marine Manufacturers Association is the nation's leading trade association representing boat, marine engine and accessory manufacturers that produce an estimated 80 percent of marine products used in North America. NMMA works to strengthen and grow boating and protect the interests of its members. Formed in 1979 by the merger of the Boating Industry Association of Chicago (BIA) and the National Association of Engine & Boat Manufacturers of New York (NAEBM), its roots can be traced to NAEBM's founding in 1904. For more information: **www.nmma.org**

National Shooting Sports Foundation, Inc. is the trade association for the firearms industry. Its mission is to promote, protect and preserve hunting and the shooting sports. Formed in 1961, NSSF has a membership of more than 12,000 manufacturers, distributors, firearms retailers, shooting ranges, sportsmen's organizations and publishers. For more information: **www.nssf.org**

Outdoor Industry Association (OIA) is the national trade association for thousands of suppliers, manufacturers and retailers across the country in the $646 billion outdoor recreation industry. The outdoor industry supports more than 6.1 million American jobs and makes other significant contributions toward the goal of healthy communities and healthy economies across the United States. For more information: **www.outdoorindustry.org**

Recreation Vehicle Dealers Association (RVDA) is the only national association dedicated to advancing RV retailers' interests through education, member services, industry leadership, and market expansion programs to promote the increased sale and use of RVs and enhance RV travel. For more information: **www.rvda.org**

Recreation Vehicle Industry Association is the national trade association representing RV manufacturers and their component parts suppliers that build more than 98 percent of all RVs produced in the U.S. RVIA is a unifying force for safety and professionalism within the RV industry, works with government agencies to protect and promote member interests, serves as a clearinghouse of industry information, and works with the media to educate the public about the benefits of RVing. For more information: **www.rvia.org**

Recreational Off Highway Vehicle Association is a not for profit trade association formed to promote the safe and responsible use of recreational off highway vehicles (ROVs) [sometimes referred to as side by sides or UTVs], manufactured or distributed in North America. For more information: **www.rohva.org**

SnowSports Industries America is the nonprofit, North American member owned trade association representing suppliers of consumer snow sports. Established in 1954, SIA collaborates with all components of the industry to promote the growth of snow sports. Its members include alpine, snowboard, AT, backcountry, cross country, snowshoe, apparel and accessories companies, retailers, reps, resorts, regional and national associations and buying groups. For more information: **www.snowsports.org**

Specialty Equipment Market Association is a nonprofit trade association composed of over 6,600 members including manufacturers, distributors, retailers, publishing companies, auto restorers, street rod builders, restylers, car clubs, race teams and more. The industry employs over one million Americans and offers custom auto accessories to enhance a vehicle's appearance, performance, comfort, convenience and safety. For more information: **www.sema.org**

Specialty Vehicle Institute of America is a not for profit industry association that promotes the safe and responsible use of all terrain vehicles through rider training, public awareness campaigns and state legislation. The SVIA is a resource for ATV research, statistics and vehicle standards. For more information: **www.svia.org**

Sports & Fitness Industry Association is the trade association of more than 1,000 leading industry sports and fitness brands, suppliers, retailers and partners. Founded in 1906, the association works to enhance industry vitality and foster participation in sports, fitness and active lifestyles. It supports its member companies and promotes a healthy environment for the sporting goods industry by providing access to thought leadership, industry and public affairs, research and member services. For more information: **www.sfia.org**

Keeping the "GREAT" in America's Great Outdoors

EMBRACING THE OUTDOORS AS A POWERFUL ECONOMIC DRIVER

Outdoor recreation in America generates 7.6 million direct American jobs, contributes $887 billion per year to the economy and attracts nearly 20 million foreign visitors seeking a world class experience unrivaled anywhere on earth.

Federal lands cover 30% of the nation's surface. These lands offer opportunities for awe-inspiring experiences, but dated infrastructure and limited access are barriers to realizing this potential. Theodore Roosevelt championed time outdoors with words and actions. Yet today, we see a declining percentage of Americans embracing outdoor-recreation rich lifestyles on federally-managed lands. The nation needs a strategy to modernize, expand and sustain the infrastructure and access visitors expect.

PARTNERSHIPS ARE THE SOLUTION

Federal land managers' ability to provide quality experiences is handicapped by the burden of $20 billion in deferred maintenance. America's outdoor recreation industry stands ready to help put "Great" Back in America's Great Outdoors through common sense policy changes modeled after proven public-private partnerships successes such as world-class ski areas on National Forests, iconic lodges in National Parks and marinas that are gateways to U.S. Army Corps of Engineers lakes.

TAKING ACTION

The Outdoor Recreation Industry Roundtable has identified 5 initial steps to create jobs by improving the quality of outdoor experiences on federal lands.

Thinkstockphotos.com, Airstream, SMA

1. **Fast track the implementation** of the Outdoor Recreation Jobs and Economic Impact Act (P.L. 114-249) by requiring federal agencies to complete implementation by the end of Fiscal Year 2017 and institutionalize the use of this information into federal agency decision making.

2. **Prioritize federal agency budgets** on recreation-related infrastructure improvement, because outdoor recreation is the largest driver of economic activity on federal lands.

3. **Establish public-private partnerships** as an entrepreneurial mechanism for addressing deferred maintenance and world class facilities for world class locations. Bring focus to inaccessible and undeveloped areas and areas near population centers.

4. **Achieve better balance** in decisions involving recreation and conservation. Quality outdoor recreation enjoyment and conservation of America's natural resources are not mutually exclusive efforts. Congress mandated this in 1916 when it created the National Park Service. The Administration must champion policies that support conservation, recreation and economic development in equal measure.

5. **Develop and deploy** a digital information strategy for outdoor recreation on federal lands. Americans need current and accurate information about where to go for the experiences they seek, which they are then eager to share digitally in real time. Federal land managers must embrace, not resist, modernization to keep the shared legacy of our Great Outdoors relevant and to capitalize on free, real-time, communications sharing how enjoyable outdoor recreation on federal lands can be.

OUTDOOR RECREATION IS VITAL TO AMERICA'S ECONOMY

- Outdoor recreation contributes $887 billion in direct spending to the American economy
- Outdoor recreation supports 7.6 million jobs in all 50 states

BOATING

- 95% of all boats sold in the United States are made in America
- Boating manufacturing employs 38,400 jobs in America and supports 472,000 marine jobs
- There are 35,000 recreational boating businesses in the U.S.
- 142 million boaters took to the water in the U.S. in 2014
- Recreational boating has a total economic impact in the United States of $121.5 billion

RVs

- RV manufacturers and suppliers support 104,131 jobs and $6.6 billion in wages
- RV manufacturing has a total economic output of $26.1 billion
- RVs have a total economic output of $50 billion
- 99% of all RVs sold in the United States are made in America, with 80% made in Indiana alone

POWERSPORTS

- Snowmobile and ATV manufacturing supports 9,785 jobs
- 10,407 U.S. powersports retailers employ 81,500 people with a total payroll of $3.2 billion
- The economic value of the powersports retail marketplace is $41.7 billion

PARK CONCESSIONS

- Concessioners employ some 25,000 persons during peak park visitor periods
- Concessioners use private capital to build needed visitor infrastructure and maintain that infrastructure as part of agreements with the NPS
- In 2017, concessioners will provide $1.5B in services and goods to visitors – lodging, food, transportation, souvenirs and guide services used by 1/3 of park visitors under some 600 agreements in more than 100 park units
- Concessioners not only maintain park buildings they use, they pay franchise and other fees to NPS totaling about $150M annually
- Concessions operations are easy to overlook. In proximity to Interior's headquarters, concessioners offer paddleboats on the Tidal Basin and food and transportation services on the National Mall, marinas on the Potomac River, golf courses, canoe, kayak and fishing equipment rentals at Fletcher's Boat House and sailing and rock climbing lessons.
- Concessions began in the very early days of national parks – long before the creation of the NPS – and thrived under the first NPS Director Stephen Mather

Titus Statement on Zinke Visit

Washington, D.C. – Today Rep. Dina Titus of Nevada's First Congressional District released the following statement about her upcoming meeting with advocates of Nevada's public lands and Interior Secretary Ryan Zinke on Monday in Mesquite.

"I will send Secretary Zinke a clear message when he arrives in our state: Keep your hands off our National Monuments. For years, I fought alongside advocates in the community to create the Basin and Range and Gold Butte monuments. While I appreciate the Secretary's visit, he

and Trump are sorely mistaken if they think they can hack away at our natural treasures and cultural artifacts without meeting overwhelming resistance."

Subject:	FYI I'm a scientist. I'm blowing the whistle on the Trump administration. - The Washington Post
Date:	Wednesday, July 19, 2017 5:49:01 PM

https://www.washingtonpost.com/opinions/im-a-scientist-the-trump-administration-reassigned-me-for-speaking-up-about-climate-change/2017/07/19/389b8dce-6b12-11e7-9c15-177740635e83_story.html?utm_term=.d987c76fc21c

I'm a scientist. I'm blowing the whistle on the Trump administration.

Joel Clement was director of the Office of Policy Analysis at the U.S. Interior Department until last week. He is now a senior adviser at the department's Office of Natural Resources Revenue.

I am not a member of the deep state. I am not big government.

I am a scientist, a policy expert, a civil servant and a worried citizen. Reluctantly, as of today, I am also a whistleblower on an administration that chooses silence over science.

Nearly seven years ago, I came to work for the Interior Department, where, among other things, I've helped endangered communities in Alaska prepare for and adapt to a changing climate. But on June 15, I was one of about 50 senior department employees who received letters informing us of involuntary reassignments. Citing a need to "improve talent development, mission delivery and collaboration," the letter informed me that I was reassigned to an unrelated job in the accounting office that collects royalty checks from fossil fuel companies.

I am not an accountant — but you don't have to be one to see that the administration's excuse for a reassignment such as mine doesn't add up. A few days after my reassignment, Interior Secretary Ryan Zinke testified before Congress that the department would use reassignments as part of its effort to

eliminate employees; the only reasonable inference from that testimony is that he expects people to quit in response to undesirable transfers. Some of my colleagues are being relocated across the country, at taxpayer expense, to serve in equally ill-fitting jobs.

Keep Reading

I believe I was retaliated against for speaking out publicly about the dangers that climate change poses to Alaska Native communities. During the months preceding my reassignment, I raised the issue with White House officials, senior Interior officials and the international community, most recently at a U.N. conference in June. It is clear to me that the administration was so uncomfortable with this work, and my disclosures, that I was reassigned with the intent to coerce me into leaving the federal government.

On Wednesday, I filed two forms — a complaint and a disclosure of information — with the U.S. Office of Special Counsel. I filed the disclosure because eliminating my role coordinating federal engagement and leaving my former position empty exacerbate the already significant threat to the health and the safety of certain Alaska Native communities. I filed the complaint because the Trump administration clearly retaliated against me for raising awareness of this danger. Our country values the safety of our citizens, and federal employees who disclose threats to health and safety are protected from reprisal by the Whistleblower Protection Act and Whistleblower Protection Enhancement Act.

Removing a civil servant from his area of expertise and putting him in a job where he's not needed and his experience is not relevant is a colossal waste of taxpayer dollars. Much more distressing, though, is what this charade means for American livelihoods. The Alaska Native villages of Kivalina, Shishmaref and Shaktoolik are perilously close to melting into the Arctic Ocean. In a region that is warming twice as fast as the rest of the planet, the land upon which citizens' homes and schools stand is newly vulnerable to storms, floods and waves. As permafrost melts and protective sea ice recedes, these Alaska Native

villages are one superstorm from being washed away, displacing hundreds of Americans and potentially costing lives. The members of these communities could soon become refugees in their own country.

Alaska's elected officials know climate change presents a real risk to these communities. Gov. Bill Walker (I) and Sen. Lisa Murkowski (R) have been sounding the alarm and scrambling for resources to help these villages. But to stave off a life-threatening situation, Alaska needs the help of a fully engaged federal government. Washington cannot turn its back.

While I have given small amounts to Democratic candidates in the past, I have no problem whatsoever working for a Republican administration. I believe that every president, regardless of party, has the right and responsibility to implement his policies. But that is not what is happening here. Putting citizens in harm's way isn't the president's right. Silencing civil servants, stifling science, squandering taxpayer money and spurning communities in the face of imminent danger have never made America great.

Now that I have filed with the Office of Special Counsel, it is my hope that it will do a thorough investigation into the Interior Department's actions. Our country protects those who seek to inform others about dangers to American lives. The threat to these Alaska Native communities is not theoretical. This is not a policy debate. Retaliation against me for those disclosures is unlawful.

Let's be honest: The Trump administration didn't think my years of science and policy experience were better suited to accounts receivable. It sidelined me in the hope that I would be quiet or quit. Born and raised in Maine, I was taught to work hard and speak truth to power. Trump and Zinke might kick me out of my office, but they can't keep me from speaking out. They might refuse to respond to the reality of climate change, but their abuse of power cannot go unanswered.

Department of the Interior Announces $13.3 Million for Improvements to Local Parks and Recreation in 22 Cities

Public-Private Partnerships Benefit Underserved Communities

WASHINGTON – The U.S. Department of the Interior and the National Park Service announced today $13.3 million through the Outdoor Recreation Legacy Partnership (ORLP) program to assist 22 cities in 17 states with projects to plan, build, and enhance parks and other outdoor recreation facilities in underserved communities. These public-private partnerships leverage $13.3 million in federal funding with $21.2 million from local governments, private firms, and non-profit organizations to improve accessibility of playgrounds, create canoe and kayak launches and fishing piers, restore vacant industrial land for park uses, and make other important investments in parks across the country.

“Every kid deserves the opportunity to get outside and play. Whether it's downtown Detroit or rural Wyoming, investing in public lands is an investment in communities. The Outdoor Recreation Legacy Partnership program is an innovative public-private partnership which revitalizes communities through improving infrastructure, creating jobs, and enhancing neighborhoods,” said U.S. Secretary of the Interior Ryan Zinke. “It connects people to the great outdoors by encouraging and enabling a variety of recreational opportunities in under-served communities.”

The ORLP is funded through the Land and Water Conservation Fund (LWCF). For more than 50 years, the LWCF has invested revenue from federal offshore oil and gas royalties into more than 40,000 outdoor recreation facilities and conservation projects in every state.

Congress created the ORLP program in 2014 to complement the agency's existing LWCF State and Local Assistance Program. The program, administered by the National Park Service, seeks to identify and highlight new ways of providing opportunities for expanding outdoor play in areas with great need, as well as promoting the development of new or enhanced partnerships for outdoor recreation in urban communities across the nation. The grants must be matched at a minimum 1:1 ratio, at least doubling the impact of the federal investment in these communities.

The complete list of ORLP grants are listed below. For more information about LWCF and these grants, visit www.nps.gov/subjects/lwcf/index.htm.

Recipient	State	Project Title	Federal Amount
Municipality of Anchorage	Alaska	Development of Muldoon Town Square Park	$750,000
City of San Francisco	California	Bay View Park Playground Improvement Project	$375,225
East Bay Regional Park District	California	Bay Point Wetland Restoration and Public Access Project	$750,000
City of Hartford	Connecticut	Renovation of Colt Park Athletic Fields	$750,000
City of Wilmington	Delaware	Father Tucker Park Playground and Spray Pad	$306,447
City of Atlanta	Georgia	Enota Park Development	$600,000
City of Dubuque	Iowa	Comiskey Park Development	$508,000
City of Baltimore	Maryland	Youth Campground Improvements in Gwynns Falls Leakin Park	$750,000
Michigan DNR (Detroit)	Michigan	Belle Isle Park Multi-Use Looped Trail Development	$750,000
City of Duluth	Minnesota	Lincoln Park Restoration	$750,000
City of Columbia	Missouri	Clary-Shy Park Urban Demonstration Farm	$400,000
St. Louis Co. Port Authority	Missouri	Sparta Court Soccer Fields	$450,000

City of Camden	New Jersey	North Camden Waterfront Park	$ 750,000
City of Newark	New Jersey	Jesse Allen Park	$750,000
City of Raleigh	North Carolina	Central Plaza John Chavis Memorial Park Revitalization	$747,600
Metroparks of the Toledo Area	Ohio	Manhattan Marsh park Development	$475,000
City of Austin	Texas	Edward Rendon Sr Metro Park - further development	$750,000
City of Houston	Texas	Buffalo Bend Hidalgo Park Greenway	$750,000
City of Burlington	Vermont	New Neighborhood Park on Burlington's Waterfront Land Acquisition	$500,000
King County Parks	Washington	Skyway Park Revitalization	$ 369,626
Metro Parks Tacoma	Washington	Swan Creek Park Trail Network	$750,000
Milwaukee Rec/Public Schools	Wisconsin	Burnham Park Redevelopment Project	$399,255
		Total	**$13,381,153**

Youngstown, OH — Eastern Daylight Time (EDT)

Advance:		**Cell Phone:**
Security Advance	(b) (7)(C), (b) (6)	(b) (7)(C), (b) (6)
Advance	Rusty Roddy	

Traveling Staff:
None

Attire:
Business Attire

Tuesday, July 25, 2017

Washington, DC → Youngstown, OH → Washington, DC

2:50-3:30pm EDT: **Depart Department of the Interior en route Andrews Air Force Base (KADW)**
Vehicle Manifest:
Secretary's Vehicle: RKZ
(b) (7)(C), (b) (6)

3:30-3:40pm EDT: **Arrive Andrews Air Force Base (KADW) & Board Air Force One**

4:15pm EDT: **The President & Mrs. Trump arrive Andrews Air Force Base & Board Air Force One**

4:25pm EDT-
5:25pm EDT: **Wheels up Washington, DC (DCA) en route Youngstown - Warren Regional Airport (KYNG)**
Flight: Air Force One
Principals: POTUS
The First Lady
RKZ
Secretary Rick Perry
Secretary David Shulkin
Flight time: ~1 hour

5:25pm EDT: **Wheels down Youngstown - Warren Regional Airport (KYNG)**
Location: Air Reserve Station
Building 407
3796 King - Graves Road
Vienna, Ohio 44473

5:25-5:35pm EDT: **Proceed to Motorcade Vehicle & Await POTUS Arrival to Motorcade**

5:35-5:55pm EDT: **Depart Airport en route AMVETS Post 44**
Location: AMVETS Post 44
Northside Rear Entrance
205 Elm Street
Struthers, OH 44471
Vehicle Manifest:
Secretary's Vehicle:
RKZ
Rusty Roddy
(b) (7)(C), (b) (6)
Ben Collins

5:55-6:00pm EDT: **Arrive Salute to American Heroes Event & Proceed to Offstage Announce Area**
Attendees: Terry Stocker, Mayor of Struthers, OH
150 invited service members and veterans
Press: Pool Press

6:00-6:35pm EDT: **Participate in Salute to American Heroes Event**
Backdrop: American flag, Ohio flag, Armed Services flags, Red, White & Blue
Salute to American Heroes step & repeat banner, local veterans
Staging: Podium with Presidential seal & mic; ground level wooden floor stage

Program: Offstage announce of Secretary Rick Perry
Secretary Rick Perry delivers remarks (2 minutes) & introduces RKZ
RKZ delivers remarks (2 minutes) & introduces Secretary David Shulkin
Secretary David Shulkin delivers remarks (2 minutes) & introduces POTUS
POTUS delivers remarks

Note: Prior to speaking, Secretaries Perry, Zinke & Shulkin wait in offstage announce area until being announced to the stage. After speaking, Secretaries Perry, Zinke & Shulkin stand stage right while POTUS delivers remarks

6:35-6:40pm EDT: **Proceed to Motorcade Vehicle & Await POTUS Arrival to Motorcade**

6:40-6:50pm EDT: **Depart AMVETS Post 44 en route Covelli Center**

Location: Covelli Center
Rear Loading Dock Entrance
229 East Front Street
Youngstown, Ohio 44503

Vehicle Manifest:

Secretary's Vehicle:

RKZ
Rusty Roddy
(b) (7)(C), (b) (6)
Ben Collins

6:50-7:00pm EDT: **Arrive Covelli Center & Proceed to Staff & Guest Viewing Area**

Location: Covelli Center arena floor
Front of Section 218

Note: POTUS & the First Lady will participate in photo op with local Supporters prior to rally

7:00-7:45pm EDT: **Make America Great Again Rally**

Attendance: 7,000

7:45-8:00pm EDT: **Proceed to Motorcade Vehicle & Await POTUS Arrival to Motorcade**

Note: POTUS & the First Lady will participate in photo op with law enforcement at conclusion of rally prior to departure

8:00-8:20pm EDT: **Depart Covelli Center en route Youngstown - Warren Regional Airport (KYNG)**

Location: Air Reserve Station
Building 407
3796 King - Graves Road
Vienna, Ohio 44473

Vehicle Manifest:

Secretary's Vehicle:

RKZ
Rusty Roddy
(b) (7)(C), (b) (6)
Ben Collins

8:20-8:30pm EDT: **Arrive Airport & Board Air Force One**

8:30pm EDT-

9:35pm EDT: **Wheels up Youngstown - Warren Regional Airport (KYNG) en route Washington, DC (KADW)**

Flight: Air Force One
Principals: POTUS
The First Lady
RKZ
Secretary Rick Perry
Secretary David Shulkin
Flight time: ~1 hour, 5 minutes

9:35-9:45pm EDT: **Wheels down Andrews Air Force Base & Board Vehicle**

9:45-10:00pm EDT: **Depart Andrews Air Force Base en route Residence**

Vehicle Manifest:

Secretary's Car: RKZ

Greetings: Laura Zuckerman here, hope keeping well. I'm again needing your aid for a Reuters story.

I'm seeking to confirm that the two 14 July memos -- one to acting dx of NPS, the other to acting dx of USFWS, concerning regs for national preserves and Kenai refuge respectively -- by Acting Assistant Secretary for Fish, Wildlife and Parks Virginia Johnson are authentic.

I appreciate your statement sent yesterday tied to memo to NPS but confirmation needed that that memo and the additional one -- relating to Kenai -- are legit, many thanks & bests, Laura Z

36 Senators Send Letter to Secretary Zinke in Support of New OCS Five-Year Leasing Program

Washington, D.C. – A robust group of 36 Republican Senators today sent a letter to Secretary Ryan Zinke in support of the Department of the Interior's new Outer Continental Shelf (OCS) Five-Year Oil and Gas Leasing Program for 2019-2024. The plan promises to increase offshore access and development, which will in turn boost our economy, keep energy affordable, and reinforce the United States' position as an energy dominant superpower.

“Pursuing a new Five-Year Program will provide a meaningful review to guarantee that the offshore leasing program contributes to U.S. energy dominance and to ensure some of the most prolific regions of the United States have not been arbitrarily excluded from competitive leasing,” the Senators wrote. “We encourage you to carefully review those areas that were not included in the 2017-2022 Five-Year Program to ensure that opportunities are not missed.”

A total of 94 percent of the federal OCS is currently unavailable for leasing. According to the Bureau of Ocean Energy Management, the nation’s OCS contains 89.9 billion barrels of oil and 327.5 trillion cubic feet of natural gas.

“Offshore development has undergone rapid technological innovation ensuring it is cheaper, safer, and provides access to previously out-of-reach areas,” the group wrote. “Offshore leasing benefits the economies of all of the states, helps reduce the federal deficit, provides affordable energy to families and businesses, and strengthens our national security.”

The Outer Continental Shelf Lands Act, which governs the development of the nation’s offshore energy resources, declares that “the outer Continental Shelf is a vital national resource reserve held by the Federal Government for the public, which should be made available for expeditious and orderly development, subject to environmental safeguards, in a manner which is consistent with the maintenance of competition and other national needs.”

“Offshore projects often have long lead times, so it is important to start today to make sure that the United States is planning for the future to maintain its steady and stable supply of production,” the Senators concluded. “We look forward to working with the Department of the Interior as you advance the new Five-Year Program.”

The letter, which was led by Sen. Murkowski, R-Alaska, was also signed by Sen. John Cornyn, R-Texas; Sen. Bill Cassidy, R-La.; Sen. Luther Strange, R-Ala.; Sen. Shelley Moore Capito, R-W.Va.; Sen. John Barrasso, R-Wyo.; Sen. Jim Risch, R-Idaho; Sen. Orrin Hatch, R-Utah; Sen. Dan Sullivan, R-Alaska; Sen. Mike Lee, R-Utah; Sen. Roger Wicker, R-Miss.; Sen. Cory Gardner, R-Colo.; Sen. BLM Proposes to Rescind Rule on Hydraulic Fracturing

Action Supports President's Priorities for Streamlining Permitting

WASHINGTON, D.C. — As part of President Trump's goal to reduce the burden of Federal regulations that hinder economic growth and energy development, the Bureau of Land Management (BLM) today announced in the *Federal Register* a proposal to rescind the 2015 final rule on hydraulic fracturing, a rule that was never in effect due to pending litigation. The proposal includes the opportunity for public comment.

“America’s public lands offer outstanding commercial, recreational, and conservation opportunities and energy development is one of them,” said Katharine S. MacGregor, Acting Assistant Secretary for Land and Minerals Management. “Maintaining positive, productive working relationships with our state and tribal partners is a top priority of this Administration. We are committed to working collaboratively with them to ensure the safe and environmentally responsible development of our Nation's energy resources within established regulatory frameworks. Our proposal to rescind the 2015 final rule answers the President's call to reduce regulatory burdens, foster job growth, and serve the energy needs of America's families, small businesses, and manufacturers."

The BLM reviewed the 2015 final rule as part of Interior Secretary Ryan Zinke’s Secretarial Order No. 3349, *Promoting Energy Independence and Economic Growth*, issued on March 29, 2017. During the review, the BLM found that all 32 of the 32 states with Federal oil and gas leases have regulations to address hydraulic fracturing. Furthermore, since the 2015 final rule was published, more companies are using state regulatory agencies and/or databases such as FracFocus to disclose the chemical content of hydraulic fracturing fluids.

The BLM estimates that about 90 percent of the approximately 2,800 production wells drilled in 2013 on Federal and Indian lands used hydraulic fracturing techniques to stimulate production. During the past 15 years, there have been significant technological advances in horizontal drilling. The technique is now frequently combined with hydraulic fracturing to help release significant quantities of oil and gas from large shale deposits.

The BLM’s proposal supports the Administration’s priorities that require agencies to seek ways to reduce the costs of regulatory compliance (Executive Order 13771, *Reducing Regulation and Controlling Regulatory Costs*) and that require the Secretary to review four specific rules, including the BLM’s 2015 final rule on hydraulic fracturing (Executive Order 13783, *Promoting Energy Independence and Economic Growth*).

Public comments on this proposed rescission are due to the BLM on or before September 25, 2017. The BLM is not obligated to consider, or include in the administrative record, comments received after this date or delivered to an address other than those listed below in making its decisions on the final rule.

ADDRESSES:

Mail: U.S. Department of the Interior, Director (630), Bureau of Land Management, Mail Stop 2134LM, 1849 C St., N.W., Washington, D.C. 20240, Attention: 1004-AE52.

Personal or messenger delivery: U.S. Department of the Interior, Bureau of Land Management, 20 M Street, S.E., Room 2134 LM, Washington, D.C. 20003, Attention: Regulatory Affairs.

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions at the website.

The BLM manages more than 245 million acres of public land, the most of any Federal agency. This land, known as the National System of Public Lands, is primarily located in 12 Western states, including Alaska. The BLM also administers 700 million acres of sub-surface mineral estate throughout the nation. The BLM's mission is to sustain the health, diversity, and productivity of America's public lands for the use and enjoyment of present and future generations. In Fiscal Year 2015, the BLM generated $4.1 billion in receipts from activities occurring on public lands.

Todd----I missed seeing you at the National Fish and Wildlife Foundation reception at the Renwick Gallery November 6th--(b) (6) Jeff Crane called me afterwards and said you'd approached him and asked for names of people knowledgeable with the application and implementation of the ESA. In response I sent Jeff the email below. Jeff approached me because of my years of experience with the Act, because I know most of the players across the American landscape, and the fact that I'm currently writing a book on the history, application and problems with the ESA.....and, as a sequel to my book that was released last year on environmental litigation titled Inside the Equal Access to Justice Act. David Bernhardt was interviewed for that book and knows me. If and when I can be a resource to you in the personnel regard, you can best contact me on my mobile (b) (6). Best for Thanksgiving, Lowell

Subject: Recommendations for DOI

Jeff, following are a couple of names that I can offer of people

I've worked
with, and in whom I have confidence in their capabilities of working with
the Endangered Species Act's implementation and management. They are both
former state directors of their respective game and fish departments, Nevada
and Arizona.

The 1973 ESA as amended is a highly technical piece of legislation together
with years of supporting regulations and policies that requires many years
of experience to understand and manage. It forces the U.S. Fish and Wildlife
Service to work closely and cooperatively with the 50 states and 6
territories in applying and administering the ESA, starting well before the
petition process with pre-petition conservation actions that can avoid
listing species to begin with. These two fellows have that kind of
experience having run state agencies for years.

Ken Mayer was the unfortunate scape goat in a political battle between his
governor and the legislature just prior to retiring from running the Nevada
wildlife agency. He's been working with WAFWA since then on a variety of
consulting projects. I'm not sure that he'd even consider coming to
Washington, but he's available and qualified. Larry Voyles just retired from
running the Arizona Game and Fish Department after his 42 year career with
the state, starting in law enforcement. His bio is attached. He's a past
President of the Association of Fish and Wildlife Agencies, and had earlier
asked to be considered for the directorship of the U.S. Fish and Wildlife
Service. Larry is likewise imminently qualified in understanding how the ESA
works and is applied and administered. Their respective contact information
is below. I have another person in mind, but need to get his updated contact
information first before I can send you a recommendation. I'll

be glad to
help as needed, and will pass along additional
recommendations as they occur
to me, Lowell

Larry Voyles

Hi Lori,

Well, the interview seemed to go fine enough - I at least got a better idea of what I'd be getting into and I think it'd be an incredible opportunity. I appreciate how candid he was! It was nice to meet Gareth and Natalie as well. At the end, Mr. Bernhardt asked for writing samples and I mentioned that I'd sent some along to you - thought I'd let you know he asked again just in case it doesn't come out of the blue for you. (understandably he's busy!)

After the interview, I did as he suggested and visited the DOI library to find plat books of DC. (did you know there used to be an ice cream creamery on North Capitol?) Beautiful room.

Thank you again for passing along my resume etc and for considering me! Let me know if you need anything else along the way.

Katie

Hi Lori,

Thanks for your patience (turns out my aunt's wifi is down so here I am in a Seattle Starbucks, which seems more authentic I suppose simply because it's Seattle).

I've attached my resume and copied a few writing samples below. Let me know what things look like for a conversation on Thursday or Friday of next week, or the week of October 16. Please feel free to call/text my cell and I'll do what I can to respond in a timely fashion!
(b) (6)

Thanks again for considering me!

Katie

PS – we hosted a National Monuments half-day event at Heritage on Wednesday with

Sutherland Institute, Senator Lee, and Congressman Bishop…wanted to pass along a big thanks to DOI for attending (Jason Funes attended the whole event). Three of the panelists we brought in were from out of town (Utah, Maine, and a NE fisherman's association) and they were incredibly thankful for the opportunity and spoke highly of their interactions with Secretary Zinke so far.

Let me chat with Steve.

Also, would you be able to participate in a quick conference call next Wednesday (9/6) at 5pm EST about the career SES payscale? I know it is really early in the morning over there then, but that was the latest I could get it scheduled.

Steve,

Thank you for the honor you did me today, and particularly for some time to think about it. I'm so glad the Senator was in the office, we had a great talk, he's very supportive.

Please find attached my resume. My federal undergrad internships fell off over time, but they may be relevant for conflict checks and similar, so they were:
- FWS, SCEP Student Intern, Wildlife Biology, Summer 2003 (YK Delta), Summer 2004 (Tetlin)
- DOE, Student Intern, Statistics, Lawrence Berkeley National Laboratories, 2002-2003
- USGS, Student Field Intern, Herpetology, Sacramento NWR Complex, Summer 1998
- DOD, Honors Student Intern, Marine Science, Romburg Tiburon Oceanographic Center, 1997-1998

Also, please find attached additional resumes for your consideration from (b) (6) and (b) (6) - (b) (6) resume is forthcoming. I spoke to each today and they were grateful and enthusiastic about the potential opportunity to join your staff. Each have outstanding bona fides, as you'll see, but more than that, they are intelligent, trustworthy, highly skilled, and voracious workhorses. They understand Alaska, and are peerless in their areas of expertise.

Thanks again, please let me know if there is anything else you need.

Since you have a TS/SCI clearance in your current military reserve position, this process should be expedited. I have been advised that your DOI clearance will not jeopardize your current USAF clearance.

I can not resolve your frustration, but I will assist you in this process in any way I can.

Micah and Lori.

First step for your "to do list"

Here Is my "draft" of 150 word Bio. You are welcome to edit as needed.

Timothy R. Petty, Ph.D., of Washington, D.C., to be Assistant Secretary for Water & Science at the Department of the Interior (DOI). Dr. Petty serves as Deputy Legislative Director and Legislative Assistant on issues of water, natural resources, environment, science, technology and telecommunications and space for U.S. Senator James E. Risch of Idaho, a member of the Senate Committee on Energy and Natural Resources. Previously, Dr. Petty served as Acting Assistant Secretary and Deputy Assistant Secretary for Water & Science at DOI under President George W. Bush. He earned a Ph.D. from the University of Alaska Fairbanks; an M.S. from University of Maryland University College; and a B.S. from Purdue University (Indiana). Prior to his current Senate service, Dr. Petty worked for U.S. Senators Connie Mack of Florida and Rick Santorum of Pennsylvania. In addition, Dr. Petty worked in California and Indiana as a geologist and hydrogeologist.
# # #

“working” Quotes List:

1. Senator James Risch, Idaho
2. Senator Crapo, Idaho
3. Congressman Simpson, Idaho
4. Gov. Otter, Idaho
5. Dr. Mark Myers, Former Director, USGS, DOI
6. Mr. Mark Limbaugh, former A/S Water and Science, DOI
7. Mr. Bob Johnson, former Commissioner, BOR, DOI
8. Gov. Dirk Kempthorne, former Sec. of Interior, DOI
9. Mr. Ian Lyle, Vice President, National Water Resources Association
10. Dr. William Schnabel, Univ of Alaska Fairbanks, Institute of Northern Engineering
11. Dr. Anupma Prakash, Univ of Alaska Fairbanks, Geophysics Dept.
12. Mr. Paul Arrington, President, Idaho Water Users Association
13. Dr. Richard Allen, Univ of Idaho, Professor of Water Resources Engineering

Micah and Lori.

First step for your "to do list"

Here Is my "draft" of 150 word Bio. You are welcome to edit as needed.

Timothy R. Petty, Ph.D., of Washington, D.C., to be Assistant Secretary for Water & Science at the Department of the Interior (DOI). Dr. Petty serves as Deputy Legislative Director and Legislative Assistant on issues of water, natural resources, environment, science, technology and telecommunications and space for U.S. Senator James E. Risch of Idaho, a member of the Senate Committee on Energy and Natural Resources. Previously, Dr. Petty served as Acting Assistant Secretary and Deputy Assistant Secretary for Water & Science at DOI under President George W. Bush. He earned a Ph.D. from the University of Alaska Fairbanks; an M.S. from University of Maryland University College; and a B.S. from Purdue University (Indiana). Prior to his current Senate service, Dr. Petty worked for U.S. Senators Connie Mack of Florida and Rick Santorum of Pennsylvania. In addition, Dr. Petty worked in California and Indiana as a geologist and hydrogeologist.

Lori,

If you have not sent over my draft of 150 word bio yet to the White House, I would like one edit if possible.

Can we Switch out "Washington DC" and replace with my home state of "Indiana". I have lived here 20 years, but Indiana is still home. (b) (5) [redacted]

If it is too late I understand. (I was getting some editing help today and I did not even conceive of WDC. It was always Indiana in my head. I read it again tonight and was sad I missed that edit). Hopefully it will not be to late.

Thanks,
Tim.

Thank you Lori to at least trying.

No worries if they were not able to make the edit. All is well. But it would be great if they did.

As for the bigger picture here, It would be great if the WH announces me today ..... because today is my birthday! It would be a fun celebration on many levels.

Thank you very much for all you have done for me and for the Zinke team as it comes together. Looking forward to getting over to DOI and getting to work!

I will stay in touch with you through out the day today.
Tim

more qualified individual than Tim to support the Secretary of the Interior as Assistant Secretary for Water & Science. I don't feel my office is losing his incredible talent, rather our country is gaining it and will be exceptionally served under his leadership."

Senator Mike Crapo, Idaho
"As a member of Senator Risch's staff, Dr. Petty has intimate knowledge of Idaho's water rights and the legal status of state control over water within our borders," said Senator Mike Crapo. "Idahoans, and water users in general, are getting the right nominee for Interior in Dr. Petty."

Congressman Mike Simpson, Idaho
"I applaud Secretary Zinke on his nomination of Tim Petty for Assistant Secretary for Water and Science at DOI," said Congressman Simpson. "There is no doubt in my mind that Tim's experience at DOI and in Congress will serve the agency well. It is also great for Idaho that someone with such direct knowledge of the issues in our state will be leading the way on solutions. I look forward to working with Tim and congratulate him on his nomination."

Governor C.L. Otter, Idaho
Contact: Sam Eaton | Legal Counsel, Office of Governor C.L. "Butch" Otter. (208) 334-2100/ sam.eaton@gov.idaho.gov
"I am extremely pleased to hear that Tim Petty was tapped by the current administration to serve as Assistant Secretary for Water and Science for the Department of the Interior. Tim has a deep understanding of western water and environmental issues and will be a valuable resource for the Department and the State of Idaho."

Statement by Dirk Kempthorne, former Secretary of the U.S. Department of the Interior:
"I strongly support Dr. Tim Petty's nomination to be Assistant Secretary for Water and Science. When I was Secretary of the Interior, I worked with him. Tim is thoughtful. He listens to all viewpoints. He is a problem solver. He has experience in working on issues related to water and science. These skills are essential for the policy leader who will oversee the US. Geological Survey and the Bureau of Reclamation."

Mark Limbaugh, former Assistant Secretary for Water and Science under President George W. Bush
(202) 261-3699 email: mlimbaugh@tfgnet.com

" Tim Petty is a natural choice and is uniquely qualified to be the next Assistant Secretary for Water and Science at the Department of the Interior. Tim has extensive practical experience with the Bureau of Reclamation's many critical Western water issues, and thoroughly understands the important work of the U.S. Geological Survey," said Mark Limbaugh, former Assistant Secretary for Water and Science under President George W. Bush. "Tim is a well-respected professional, and will bring his honesty, integrity and intelligence to this position. He will serve the Department, the Administration and the Nation very well."

Dr. Mark Myers, former Director of the USGS and Alaska Commissioner of Natural Resources
mdarmyers@gmail.com / (907) 222-4864

“Dr. Tim Petty is an outstanding choice for Assistant Secretary for Water and Science,” said Mark Myers, former Director of the USGS and Alaska Commissioner of Natural Resources. “Tim has extensive experience and in-depth knowledge with both western water issues and applied scientific research. He brings with him a superb understanding of the role of peer reviewed science in public policy and a long history of integrity in public service.”

Dan Keppen, Executive Director, Family Farm Alliance
(541) 892-6244 / dankeppen@charter.net

“Tim Petty is the perfect candidate for this position, ” said Dan Keppen, executive director of the Family Farm Alliance, which represents farmers and ranchers in the 17 Western states. “His experience on Capitol Hill, his past leadership role at Interior, and his technical and professional expertise make him uniquely qualified to oversee the Bureau of Reclamation and USGS, two agencies of critical importance to Western irrigators.”

Ian Lyle, Executive Vice President, National Water Resources Association (NWRA)
ilyle@nwra.org / 202-698-0693

"Dr. Petty is an exceptionally qualified individual that brings a critical combination of scientific understanding and on the ground experience to water management. His experience in water began on an Indiana farm and ranged to federal service in the Department of the Interior and the U.S. Senate. He is an unflappable professional that treats every point of view fairly. Tim’s perspective, demeanor and leadership will be vital as the nation works to meet the challenges facing agricultural and municipal water supply." – Ian Lyle, Executive Vice President, National Water Resources Association ilyle@nwra.org (202-698-0693).

Dr. William Schnabel, Univ of Alaska Fairbanks, Director of Institute of Northern Engineering
weschnable@alaska.edu / (907) 474-7789

Dr. Petty has demonstrated a passion for water resources from an early age. He understands that maintaining a safe and plentiful water supply is critical to the health and prosperity of our nation. He appreciates the power contained within our flowing waters - a power that can be constructive when harnessed for energy, or destructive when unleashed during times of flood. Moreover, he recognizes that utilizing our ever-growing capacities for science, technology, and engineering is the key to managing our nation's water supply now and in the future. Dr. Petty's experience provides him with a unique blend of administrative acumen and well-grounded scientific insight. This experience, combined with his unassailable integrity, will serve Dr. Petty well as our new DOI Assistant Secretary for Water & Science.

Paul Arrington, Executive Director and General Counsel, Idaho Water Users Association
paul@iwua.org / (208) 404-9436

“We are thrilled to learn of Dr. Petty’s nomination as Assistant Secretary for Water and Science. As a Congressional Staffer focusing on water issues in the office of Senator Risch (ID), we had the opportunity to work closely with Dr. Petty on resource issues. His expertise, combined with his ability to understand different sides of difficult issues, make him a natural choice for this position.”

Tim Petty,
(b) (6) / (b) (6)

“I am grateful to President Trump and his administration for this opportunity to serve at the Department of Interior,” said Tim Petty. “Secretary Zinke has a clear vision for addressing our nation’s water and earth science challenges, and I would be humbled to work alongside him to advance responsible solutions.”

“I am extremely pleased to hear that Tim Petty was tapped by the current administration to serve as Assistant Secretary for Water and Science for the Department of the Interior. Tim has a deep understanding of western water and environmental issues and will be a valuable resource for the Department and the State of Idaho."

Statement by Dirk Kempthorne, former Secretary of the U.S. Department of the Interior:
“I strongly support Dr. Tim Petty’s nomination to be Assistant Secretary for Water and Science. When I was Secretary of the Interior, I worked with him. Tim is thoughtful. He listens to all viewpoints. He is a problem solver. He has experience in working on issues related to water and science. These skills are essential for the policy leader who will oversee the US. Geological Survey and the Bureau of Reclamation.”

Mark Limbaugh, former Assistant Secretary for Water and Science under President George W. Bush
(202) 261-3699 email: mlimbaugh@tfgnet.com

“ Tim Petty is a natural choice and is uniquely qualified to be the next Assistant Secretary for Water and Science at the Department of the Interior. Tim has extensive practical experience with the Bureau of Reclamation’s many critical Western water issues, and thoroughly understands the important work of the U.S. Geological Survey,” said Mark

Limbaugh, former Assistant Secretary for Water and Science under President George W. Bush. “Tim is a well-respected professional, and will bring his honesty, integrity and intelligence to this position. He will serve the Department, the Administration and the Nation very well.”

Dr. Mark Myers, former Director of the USGS and Alaska Commissioner of Natural Resources
(b) (6) / (907) 222-4864

“Dr. Tim Petty is an outstanding choice for Assistant Secretary for Water and Science,” said Mark Myers, former Director of the USGS and Alaska Commissioner of Natural Resources. “Tim has extensive experience and in-depth knowledge with both western water issues and applied scientific research. He brings with him a superb understanding of the role of peer reviewed science in public policy and a long history of integrity in public service.”

Dan Keppen, Executive Director, Family Farm Alliance
(541) 892-6244 / dankeppen@charter.net

“Tim Petty is the perfect candidate for this position, ” said Dan Keppen, executive director of the Family Farm Alliance, which represents farmers and ranchers in the 17 Western states. “His experience on Capitol Hill, his past leadership role at Interior, and his technical and professional expertise make him uniquely qualified to oversee the Bureau of Reclamation and USGS, two agencies of critical importance to Western irrigators.”

Ian Lyle, Executive Vice President, National Water Resources Association (NWRA)
ilyle@nwra.org / 202-698-0693

"Dr. Petty is an exceptionally qualified individual that brings a critical combination of scientific understanding and on the ground experience to water management. His experience in water began on an Indiana farm and ranged to federal service in the Department of the Interior and the U.S. Senate. He is an unflappable professional that treats every point of view fairly. Tim’s perspective, demeanor and leadership will be vital as the nation works to meet the challenges facing agricultural and municipal water supply." – Ian Lyle, Executive Vice President, National Water Resources Association ilyle@nwra.org (202-698-0693).

Dr. William Schnabel, Univ of Alaska Fairbanks, Director of Institute of Northern Engineering
weschnable@alaska.edu / (907) 474-7789

Dr. Petty has demonstrated a passion for water resources from an early age. He understands that maintaining a safe and plentiful water supply is critical to the health and

prosperity of our nation. He appreciates the power contained within our flowing waters - a power that can be constructive when harnessed for energy, or destructive when unleashed during times of flood. Moreover, he recognizes that utilizing our ever-growing capacities for science, technology, and engineering is the key to managing our nation's water supply now and in the future. Dr. Petty's experience provides him with a unique blend of administrative acumen and well-grounded scientific insight. This experience, combined with his unassailable integrity, will serve Dr. Petty well as our new DOI Assistant Secretary for Water & Science.

Paul Arrington, Executive Director and General Counsel, Idaho Water Users Association
paul@iwua.org / (208) 404-9436

“We are thrilled to learn of Dr. Petty’s nomination as Assistant Secretary for Water and Science. As a Congressional Staffer focusing on water issues in the office of Senator Risch (ID), we had the opportunity to work closely with Dr. Petty on resource issues. His expertise, combined with his ability to understand different sides of difficult issues, make him a natural choice for this position.”

Tim Petty,
(b) (6) / (b) (6)

“I am grateful to President Trump and his administration for this opportunity to serve at the Department of Interior,” said Tim Petty. “Secretary Zinke has a clear vision for addressing our nation’s water and earth science challenges, and I would be humbled to work alongside him to advance responsible solutions.”

Hi Margaret,

I have been given two extra names that need to be vetted for RPC:

Jerry Strickland from Texas (State- Alternate)
Daniel Rusz from Wood MacKenzie (Academia/Public Interest Primary)

Just when you get back if you wouldn't mind asking Exec Sec to vet these.

Thank you and hope you are enjoying your vacation!

Good Morning,

Yes, of course. We'll vet those individuals asap.

Hope you're both having a good week!

See you on Monday.

Margaret

> • **September 20: Department-level Release:** DOI and NPS will announce $94.3 million to be distributed from the Land and Water Conservation Fund to all 50 States, the Territories, and the District of Columbia for State-identified outdoor recreation and conservation

projects.

• **September 22: Department-level Release:** DOI and BLM will announce the totals from all September oil and gas lease sales.

National Park Service

• **September 20: Local NPS Release:** NPS Southeastern Region announces new superintendent of Cape Lookout National Seashore.

• **September 22: Local NPS Release:** NPS Pacific West Region announces the new superintendent of Redwood National & State Parks.

• **September 23**: Antifa activists are planning a demonstration at Arlington House, the Robert E. Lee Memorial (ARHO), and in the confederate section of Arlington National Cemetery, according to social media posts. The National Park Service and United States Park Police are coordinating with local law enforcement and Arlington National Cemetery. No additional details are available at this time.

• **September 25 (tent.): Local NPS Release:** The National Park Service will notify the public of the availability of Glacier National Park's Lake McDonald Properties Management Plan Environmental Assessment (EA). The EA will be available for a 30-day public review period. Following the public review, the park will prepare a formal decision document. The EA analyzes alternatives to manage NPS-owned properties surrounding Lake McDonald, which includes buildings listed on the National Register of Historic Places. The proposed alternative includes management options for each property, including historic leasing, park or concessioner use, stabilization of properties or removal of buildings. Throughout the planning process, the park received local media and public interest with little to no controversy. Public comments were very supportive of historic leasing options.

• **September 25 (tent.): National BLM Release:** BLM will announce that it is seeking public nominations for open positions on 18 of its 36 Resource Advisory Councils (RACs). As published in a notice in the *Federal Register*, the BLM will consider nominations for 30 days.

• **September 27: Local NPS Release:** NPS will issue a news release regarding the independent review panel findings that Golden Gate National Recreation Area dog rule process was unaffected by inappropriate personal email use.

• **September 27:** The NPS National Capital Region's National Historic Landmark Program will host a stakeholder meeting as part of a joint research project underway by the NPS and the Organization of American Historians to identify potential National Historic Landmarks (NHLs) associated with Lesbian, Gay, Bisexual, Transgender & Queer (LGBTQ) history in the region. Invited stakeholders include state historic preservation offices, staff from selected NCR parks, local LGBTQ history representatives, and local governments' historic preservation staff.

U.S. Fish and Wildlife Service

- **September 22: Local FWS Release:** FWS plans to send to the Federal Register a final listing determination for the Kenk's amphipod, a crustacean from Maryland, Virginia and the District of Columbia. This action is not controversial. Stakeholders are the Center for Biological Diversity, Friends of the Capital Crescent Trail, Fort A.P. Hill, and the NPS.

- **September TBD: National FWS Release:** FWS will announce National Wildlife Refuge Week, which will take place October 8-14. Refuge Week is an annual celebration of the nation's wildlife conservation heritage and the national wildlife refuges that protect it. The timing provides notice for print and online media to announce the annual celebration and regional events for the public to plan ahead, as well as for the regions and refuges to begin preparing additional promotional information.

Bureau of Land Management

- **September 21: National BLM Release:** BLM-Eastern States will hold an online oil and gas lease sale for three parcels in Monroe County, OH, totaling 141.56 acres, and 3 parcels in Catahoula and Bienville Parishes, LA, totaling 50.15 acres. The sale in Ohio is expected to be controversial. Bidding is not expected to be robust.

- **September 21: National BLM Release:** BLM-WY will hold an online oil and gas lease sale for 141 parcels totaling 118,055.54 acres in Niobrara, Weston, Goshen, Crook, Converse, Campbell, Johnson, Fremont, Big Horn, Washakie, Weston, and Sheridan Counties, WY. The sale is not expected to be controversial. Bidding is not expected to be robust.

- **September 25:** The 60-day public comment period for the proposed rule to rescind the BLM's 2015 Hydraulic Fracturing Rule will end. The BLM's proposal rule aligns with Administration priorities to seek ways to reduce regulatory burdens and compliance costs. The BLM will review the comments received and take appropriate actions to address those that are substantive. Publication of a final rule in the Federal Register is anticipated in December 2017 or January 2018.

- **September 25 (tent.): National BLM Release:** BLM will issue a release regarding their announcement to seek nominations for 18 of their 36 Resource Advisory Councils.

- **September 26:** BLM-MT Butte Field Manager Scott Haight and Geologist David Williams will meet with Jefferson County and Montana Department of Environmental Quality in Boulder, MT, to discuss the future of the Montana Tunnels mine site. Montana Tunnels is an open pit mine in Jefferson County that has been inactive since 2008. It is behind on the state's bond request and owes Jefferson Co. $5 million in back taxes, and the site is deteriorating. The meeting is the first to discuss the future of the mine site, including topics of bonding and scope of what's needed for eventual reclamation and site stabilization. The mine is located on a mix of private and BLM lands.

U.S. Geological Survey

- **September 20: National USGS Release:** The release will highlight an article in *Nature* announcing findings that a parasite-related infectious disease of tadpoles, called Severe Perkinsea infections (SPI), might represent the third most common infectious disease in frogs after ranavirus infections and chytridiomycosis. SPI mortality events affected numerous frog species and occurred over a broad geographic area in the U.S. during the study.

Bureau of Reclamation

- **September 26:** U.S./Mexico Cooperative Process – Colorado River ("Minute 323"): Minute 323 of the Water Treaty with Mexico will be signed by the United States and Mexico commissioners of the International Boundary and Water Commission. On June 12, the Governor's representatives from the seven Colorado River Basin States communicated to Secretary of the Interior Zinke their goal of finishing the drafting of the necessary U.S. (domestic) agreements needed to allow the U.S. and Mexico to finalize a cooperative agreement by mid-July (completion of these draft agreements would put the U.S. and Mexico in position to finalize a successor agreement to the current plan - known as Minute 319 - later this fall). The domestic agreements will also be signed on September 26. The State Department finalized consultations with the Senate Foreign Relations Committee in early August and is prepared to proceed when the Basin States clearances are complete. The State Department/IBWC will handle press.

- **September 27:** A ceremony celebrating the signing of Minute 323 to the 1944 Water Treaty with Mexico will occur on the opening day of biennial Colorado River Symposium in Santa Fe, New Mexico. Deputy Secretary of the Interior David Bernhardt will attend and offer brief remarks.

Office of Insular Affairs

- **September 25: National OIA Release:** OIA will issue a media reado-out regarding the Federated States of Micronesia President Peter Christian Visit with the Secretary

- **September TBD:** OIA Release American Samoa Authorization to Proceed – Insular ABCs – Repairs in the Public Schools

- **September TBD:** FSM Compact Infrastructure and Technical Assistance ~ $1.5 million

- **September TBD:** RMI Press Release Compact Infrastructure $149,436; Ebeye Special Needs $300,000; Health Care Program for 4 Atolls (Section 177) $697,387

- **September TBD:** FY 2017 CIP Infrastructure funding for Guam and CNMI ~ $10 million

Bureau of Safety and Environmental Enforcement

• **September 19: National BSEE Release:** BSEE will put out a read-out of Director Angelle's remarks at the Louisiana Oil and Gas Association Fall Meeting. The Director's remarks focused on the path forward for robust offshore energy production.

• **September 20:** BSEE staff will be holding a public forum to receive input on possible revisions to Well Control Rule, in Houston TX. Two New York Times reporters have registered to attend.

Office of Wildland Fire

• **September 19-21:** National Association of State Foresters Annual Meeting in Charleston, WV. Director Bryan Rice and Communications GG will be attending to provide the Wildland Fire Committee update, representation, and outreach.

> - *This week the Secretary is …*

- **October 4: Department-level Release:** DOI and BLM will announce the totals from all September oil and gas lease sales.

- **October 5: Department-level Release:** DOI and BOEM press release on Proposed Notice of Sale for Gulf of Mexico Lease Sale 250.

Interior Social Media Updates

- **October 5 (tent.): Department-level blog post:** DOI to publish a story on how FWS first responders saved women in Puerto Rico who was trapped under her mobility scooter thanks to the help of her dog.

- **October 10: Department-level video:** DOI to release a video highlighting national wildlife refuges for National Wildlife Refuge Week.

- **October 11: Department-level blog post:** DOI to publish a blog post on tips for fishing on public lands.

National Park Service

- **October 4: National NPS Release:** NPS will put out a release regarding National Fossil Day. Started in 2010 by the National Park Service and the American Geological Institute to promote public awareness and stewardship of fossils. This year, more than 300 partners, including museums, federal and state agencies, fossil sites, science and education organizations, avocational groups, and national parks

- **October 5 (tent.): National NPS Release:** NPS will announce the Director's Partnership Awards, which recognizes 17 NPS partners who supported six different complex, multi-year projects, including historic building rehab and trail construction projects.

- **October 6: Local NPS Release:** War in the Pacific NHP, American Memorial Park superintendent announcement. PWR aiming to release by the end of the week.

- **October TBD: National NPS Release:** Historic Preservation Tax Credits: NPS and/or DOI announcement of annual Rutgers report on NPS Federal Historic Preservation Tax Incentives Program economic impact. Tax credits 2016 contributed $12.3 billion in output to the U.S. economy, added $6.2 billion in GDP. Historic preservation tax incentives encourage investments in historic preservation and revitalization of communities small and large across the country.

U.S. Fish and Wildlife Service

- **October 4: National FWS Release:** FWS will announce National Wildlife Refuge Week, which will take place October 8-14. Refuge Week is an annual celebration of

the nation’s wildlife conservation heritage and the national wildlife refuges that protect it. The timing provides notice for print and online media to announce the annual celebration and regional events for the public to plan ahead, as well as for the regions and refuges to begin preparing additional promotional information.

- **October 5: Local FWS Release(s):** FWS will send 12-month findings on 25 species, finding that none warrant ESA protections. These findings are for 14 Nevada springsnail species, Barbour's map turtle, Big Blue Springs cave crayfish, Bicknell's thrush, black-backed woodpecker, boreal toad, fisher, Florida Keys mole skink, Great Sand Dunes tiger beetle, Kirtland's snake, Pacific walrus and San Felipe gambusia. Outreach will be conducted on a region-by-region basis, including news releases with supporting FAQs where appropriate, to be sent to stakeholders and members of Congress. Some findings may be controversial. The Bicknell’s thrush, fisher and Pacific walrus will likely attract significant media attention.

- **October TBD: Local FWS Release:** FWS will announce the final listing of four Everglades plants—the Everglades bully, Florida pineland crabgrass, pineland sandmat and Florida prairie-clover, plants that occur in south Florida. This action is not controversial.

- **October TBD: Local FWS Release:** FWS will announce a six-month extension of the final determination of list the Louisiana pine snake, found in Louisiana and Texas. While the Louisiana pine snake listing is controversial, the six-month extension is not expected to be controversial.

Bureau of Land Management

- **October 4: National BLM Release:** BLM will issue a release regarding the opening of public comment period for greater sage grouse issues.

- **October 4: National BLM Release:** BLM will issue a release regarding the cancellation of a 10 million acre Sagebrush focal area withdraw proposal and the conclusion of the associated NEPA process.

- **October 5: National BLM Release:** BLM will issue a release regarding the delay/suspension of the Waste Prevention Rule (Venting and Flaring).

- **October 10–11:** BLM-AK Fire Service will host the Alaska Wildfire Coordinating Group Interagency Fall Review in Fairbanks. The annual interagency review is a forum for federal, state, local and tribal wildland fire partners, land managers and agency administrators to focus on the response to this season's fires, issues with the Wildland Fire Decision Support system and fire management plans and other issues of interest to various agencies in Alaska.

- **October 11:** BLM-WY Casper Field Office will meet with local ranchers to discuss their concerns about tribal consultation on split-estate and wells built on private surface that intersect both private and federal minerals in Douglas.

- **Bureau of Safety and Environmental Enforcement**

  - **October 4: National BSEE Release:** BSEE will put out a read-out highlighting BSEE Director Angelle's activities and meetings in Anchorage, Alaska. Social media platforms will be used to amplify News Brief.

Bureau of Indian Affairs

- **October 2:** Gavin Clarkson, Deputy Assistant Secretary for Indian Energy and Economic Development will lead a consultation on revisions of the "Licensed Indian Traders" regulations at the Native American Finance Officers Association (NAFOA) 2017 Fall Finance & Tribal Economies Conference, River Spirit Casino Resort, 8330 Riverside Pkwy, Tulsa, OK**.**

Office of Insular Affairs

- **October 4 (tent.): Local IA Release:** IA will issue a release on AS Domenech's trip to the USVI Thursday to meet and confer with FEMA and local officials.

the names and see if you know any of them or see any issues? We have done a background check as well as a political background check and did not see anything questionable, but would still like your opinion.

They are having their meeting on Friday, so I would like to approve them today or tomorrow if possible.

I attached the charter of the boards they would be serving on. As you can see, some are reappointments.

I included the organization they represent with their info.

The names presented to us are the following:

Thomas Edward Moorman (Appointment) {Primary}
(b) (6)
[redacted]
Ducks Unlimited

Gerald Anthony Wasley (Reappointment)
(b) (6)
[redacted]
Nevada Dept of Wildlife
Appointed January 10, 2017 with a term end date of March 31, 2017

David Eric Nomsen (Reappointment)

(b) (6)
[redacted]

Pheasants Forever, Inc.

Appointed June 20, 2017 with a term end date of March 31, 2017

James Thomas Leach (Appointment)

(b) (6)
[redacted]

(b) (6)

Minnesota Dept of Natural Resources

Thank you!
Natalie

Refineries slowly restart after Harvey, but price impact could persist

By Ben Lefebvre

09/01/2017 02:28 PM EDT

Gulf Coast refineries are slowly coming back on line after the historic flooding brought by Hurricane Harvey, but high fuel prices could last into the winter, analysts said.

Harvey's path from Corpus Christi, where it made landfall on Aug. 25, up the Texas coast and into Louisiana inundated the region that's home to about half the U.S. refining capacity with several feet of rain. Many workers at those refineries are only now able to get back into their plants to inspect for damage.

"Satan himself could not have designed a storm more destructive for Texas refining," said Tom Kloza, global head of energy analysis at OPIS. "That's not hyperbole."

The outages have increased wholesale gasoline prices by 40-60 cents a gallon, increases that will start to work into the retail prices, Kloza added.

As of Friday, the average retail price for a gallon of gas had climbed 16 cents to $2.52 since Harvey made landfall, according to AAA.

Valero Energy, Flint Hills Resources and others have restarted their plants in Corpus Christi, and some refineries in Houston are expected to be up and running by the end of the week, Kloza told reporters. Each refinery is dealing with its own unique circumstances: Valero's Houston refinery survived the storm without shutting down, while Shell's refinery outside Houston could be closed for weeks because of flood damage, sources familiar with the operations said.

But those in Port Arthur — some of the country's largest — are still assessing damage. Those refineries, including Motiva's mammoth 600,000 barrel-a-day refinery, may not begin restarting until the middle of September, with some parts of the refineries remaining offline for months longer, Kloza said.

In all, 10 refineries with a combined capacity of three million barrels per day were still shut as of Friday morning, according to the DOE.

Pipeline problems are also adding to the fuel market's woes. Though some refineries emerged from Harvey with barely a scratch, they are unable to ship gasoline and diesel to market because of power outages or pipeline problems, analysts said.

The problem could grow more acute along the East Coast because the Colonial Pipeline, which delivers up to one million barrels a day of fuel from the Gulf Coast up to New England, is unable to receive supplies from further west than Lake Charles, La., the company said.

A DOE spokeswoman did not immediately reply to questions on whether the department plans to release fuel from its Northeast Gasoline Supply Reserve, a stash of one million barrels of gasoline kept around New York Harbor, Boston and Maine.

But even if the NGSR was opened, the fuel would barely cover one day of Colonial shipments. The NGSR would have to hold significantly more fuel to provide a buffer for the damage Harvey brought, said Andy Lipow, head of oil market analysis firm Lipow Oil Associates

"It's too late for Northeast Gasoline reserve for now," Lipow said.

Subject: Report: Trump to travel to Utah to announce shrinking of Bears Ears, Grand Staircase-Escalante
Date: Tuesday, November 28, 2017 2:06:14 PM

By Esther Whieldon

11/28/2017 02:03 PM EDT

President Donald Trump is slated to travel to Utah on Monday to announce he will shrink the Bears Ears and Grand Staircase-Escalante national monuments, the Salt Lake Tribune reports, citing sources familiar with the trip.

In late August, Interior Secretary Ryan Zinke reportedly recommended that Trump shrink the Utah monuments as well as the Cascade-Siskiyou monument in Oregon and California and the Gold Butte monument in Nevada. Zinke also recommended opening up six other monuments and marine monuments to commercial fishing, timber harvesting and mining.

The move is likely to please the Utah delegation and other Republican lawmakers who accused President Barack Obama of federal overreach by creating monuments despite local opposition and using the Antiquities Act to cut off commercial activity. But any action by Trump is likely to prompt a slew of lawsuits from environmental groups.

Grand Staircase-Escalante National Monument holds coal reserves and the Bears Ears' monument has oil and and gas fields.

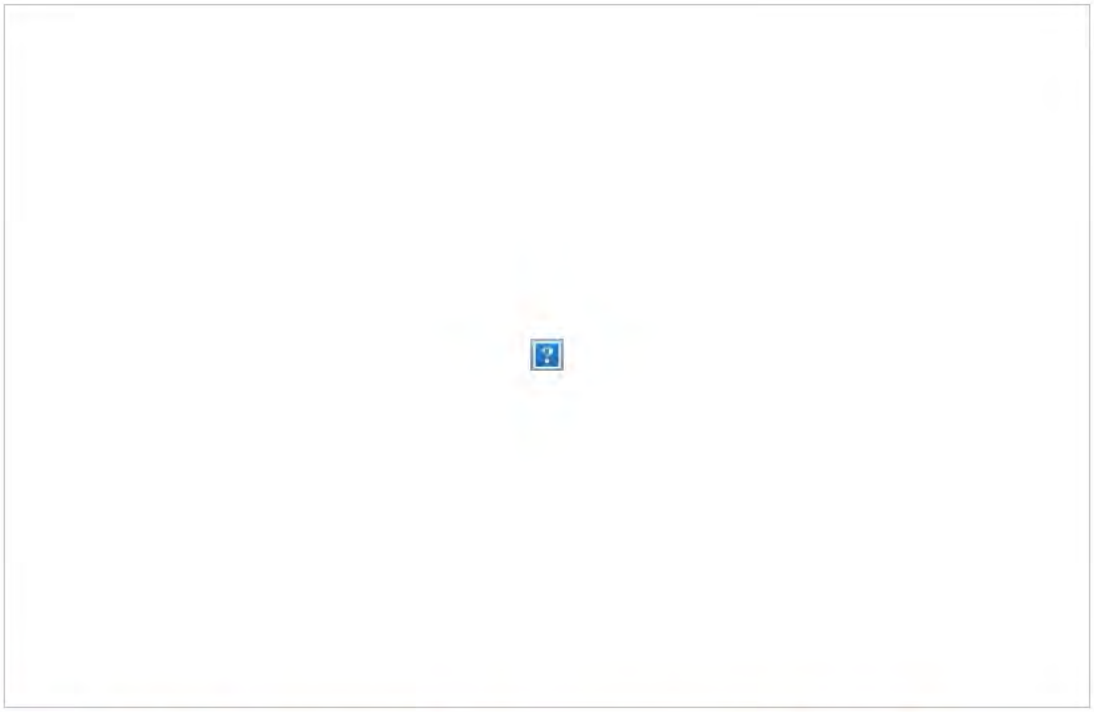
An inside look at ME/CFS research funding with NINDS Director, Dr. Walter Koroshetz

Our Chief Scientific Officer/Vice President of Research Dr. Zaher Nahle sat down recently with the Director of the National Institute of Neurological Disorders (NINDS) Dr. Walter Koroshetz on the nationally televised program the White House Chronicle with host Llewellyn King. Drs. Nahle and Koroshetz discussed current research and funding for ME/CFS, including the recent NIH-funded ME/CFS consortia projects.

This episode is the second episode of White House Chronicle featuring SMCI. If you missed the episode featuring SMCI President Carol Head, watch it here: http://go.solvecfs.org/e/192652/crsvhMeC11U/7vdfz/49434027

Dr. Nahle featured in two ME/CFS Articles

Dr. Zaher Nahle was recently featured in two articles highlighting recent ME/CFS advancements. The articles investigate the potential impact of the National Institutes of Health's (NIH) recent investment to fund three Collaborative Research Centers (CRCs) and a Data Management Coordinating Center (DMCC). Although still insufficient, we see positive trends in research support that promise to advance our understanding of ME/CFS and bring broader recognition and treatments from the scientific community. **READ MORE**



Dr. Nahle Attends International ME/CFS

Conference in Sweden

In October, RME (The Swedish National Association for ME-patients) organized two open conferences aimed at engaging health care professionals in Stockholm (Oct. 18) and Malmö (Oct. 19). SMCI's Chief Scientific Officer and VP for Research Dr. Zaher Nahle was invited to attend a roundtable meeting to discuss ongoing research and clinical developments. The roundtable meeting, held October 17 -18, was international in attendance and scope. It covered findings and planned research in Sweden, Denmark, the United Kingdom, and the United States. **READ MORE**

2016 Ramsay Team 2 Research Update

Subject: RGGI states plan further 30 percent emissions cuts by 2030
Date: Wednesday, August 23, 2017 2:17:59 PM

By Alex Guillén

08/23/2017 02:12 PM EDT

The nine member states of the Regional Greenhouse Gas Initiative have agreed on a plan to reduce carbon dioxide emissions by 30 percent between 2020 and 2030, RGGI announced today.

Most of the states have also agreed to a reserve program under which allowances could be pulled from auctions if prices drop below certain thresholds, thus driving more emissions reductions, according to RGGI. Maine and New Hampshire do not plan to implement reserves.

Overall, regional emissions will be capped at about 78.2 million tons of CO2 per year in 2020 and drop to around 55.7 million tons in 2030. That ultimate 2030 goal represents a 65-percent drop from 2009 levels, when RGGI was formed, the group said.

"RGGI states are demonstrating our commitment to a strengthened RGGI program that will utilize innovative new mechanisms to secure significant carbon reductions at a reasonable price on into the next decade, working in concert with our competitive energy markets and reliability goals," said Katie Dykes, chair of RGGI's board as well as Connecticut's Public Utilities Regulatory Authority.

Detailed numbers on emissions caps, allowance pricing and reserve sizes can be found here.

WHAT'S NEXT: RGGI will take public comment at a Sept. 25 meeting in Baltimore.

Secretaries Zinke and Perdue Host Inter-Agency Forestry & Wildfire Listening Session with Federal, Congressional and State Stakeholders.

WASHINGTON – Yesterday, U.S. Secretary of the Interior Ryan Zinke and U.S. Department of Agriculture Secretary Sonny Perdue hosted an inter-agency listening session with federal, congressional, and state stakeholders. Photos for media use are available here.

"Wildfires affect all of us so it only makes sense that we all work together to prevent and fight them," **said Secretary of the Interior Ryan Zinke**. "Our inter-agency and partner meeting was the first of what I hope will be many to identify and implement better practices to manage our forests and save lives and communities."

“Yesterday was a good opportunity to reflect on the 2017 fire season, to recognize what did and didn’t work, and to collaborate on how we can move forward into 2018,” **Agriculture Secretary Sonny Perdue said**. “With this being the costliest fire season in history, it is clear that we need a permanent fix to fire funding. I’m encouraged by the work being done in Congress and it’s imperative that we continue to communicate with stakeholders, so we can figure out how best to work together to manage forests and ultimately prevent fires the best that we can.”

Accompanied by House Natural Resources Chairman Rob Bishop (UT), Congressman Bruce Westerman (AR) and stakeholders representing conservation, hunting, forestry, and state associations, conversation centered around fixing the wildfire funding problems, possible improvements to wildfire management, innovative ways to detect and suppress wildfires, and ways to improve cooperation between industry, state, and federal authorities.

Secretary Zinke, Secretary Perdue, and Congressman Rob Bishop participate in the listening session

Next steps include figuring out which discussion points could become action items before the next season and sharing them with agency, state, and congressional partners.

A partial list of officials attending today's listening session is below.

Senior Federal Officials

- Secretary Ryan Zinke
- Secretary Sonny Perdue

- Chairman Rob Bishop
- Congressman Bruce Westerman

Federal Officials

- Director of Wildland Fire, Jeff Rupert
- Deputy Assistant Secretary of Public Safety, Resource Protection, Emergency Services, Harry Humbert
- Director of Bureau of Indian Affairs, Bryan Rice
- Acting Director of National Parks, Mike Reynolds
- Principal Deputy Director of the USFWS, Greg Sheehan

Conservation and Hunting Partners

- Rocky Mountain Elk Foundation
- Boone and Crockett
- National Wild Turkey Foundation

Forestry Partners

- National Alliance of Forest Owners

Secretary Names Bryan Rice Director of Bureau of Indian Affairs

Experienced federal administrator to lead agency serving 567 Tribal communities

WASHINGTON – U.S. Secretary of the Interior Ryan Zinke today announced the selection of Bryan Rice, a veteran federal administrator and citizen of the Cherokee Nation of Oklahoma, as the new Director of the Bureau of Indian Affairs (BIA), the federal agency that coordinates government-to-government relations with 567 federally recognized tribes in the United States.

"Bryan has a wealth of management expertise and experience that will well serve Indian Country as the BIA works to enhance the quality of life, promote economic opportunity, and carry out the federal responsibility to protect and improve the trust assets of American Indians, Indian tribes and Alaska Natives," **Secretary Zinke said**. "I have full confidence that Bryan is the right person at this pivotal time as we work to renew the department's focus on self-determination and self-governance, give power back to the tribes, and provide real meaning to the concept of tribal sovereignty."

"Secretary Zinke's naming of Bryan Rice as director of the BIA brings an accomplished individual to that post who is well-versed in the Bureau's mission and has extensive knowledge about its work, particularly in the area of forestry and combatting wildland fires," **said Acting Assistant Secretary – Indian Affairs John Tahsuda**. "Bryan will be a strong leader for the Bureau and closely follow the Secretary's plans for reforming the BIA into a top-notch service delivery agency for tribes and tribal leaders."

"Native Americans face significant regulatory and bureaucratic hurdles to economic freedom and success," **Rice said**. "I am honored to accept this position and look forward to implementing President Trump's and Secretary Zinke's regulatory reform initiative for Indian Country to liberate Native Americans from the bureaucracy that has held them back

economically."

Rice, who will start his new position on Monday, October 16, 2017, recently led Interior's Office of Wildland Fire, and has broad experience leading Forestry, Wildland Fire, and Tribal programs across Interior, BIA, and the U.S. Department of Agriculture. His federal government career has spanned nearly 20 years, beginning with service on the Helena Interagency Hotshot Crew for the U.S. Forest Service in Montana. He served as a Peace Corps Volunteer in Nepal, working in both community forestry and rural development and supervised numerous timber operations as a timber sale officer on the Yakama Reservation as well as a forester on the Tongass National Forest in Alaska. Rice also served in leadership capacities internationally in Tanzania, Mexico, Brazil and Australia for both Interior and the U.S. Forest Service.

Rice has served in two Senior Executive Service natural resources management leadership positions, including as Deputy Director for the BIA Office of Trust Services from 2011 to 2014, and as Director of Forest Management in the U.S. Forest Service from 2014 to 2016.

Rice spent his school years in the Midwest in Whitewater, Wisconsin and Peoria, Illinois. He holds a Bachelor of Science degree in Forestry from the University of Illinois at Urbana-Champagne and a Master of Business Administration from the University of Alaska – Southeast, focusing on rural development and transportation systems. He is a licensed pilot, and enjoys time outside hunting and fishing.

Secretary Zinke also announced that Jeff Rupert will be the acting Director of the Office of Wildland Fire starting on Monday, October 16. Rupert was the chief of the Division of Natural Resources for the National Wildlife Refuge System, overseeing the Fire Management, Refuge Resource and Private Lands programs. He has been an active member of the Interior Fire Executive Council for the last several years. He is a graduate of Class #18 from the Interior Senior Executive Service Candidate Development Program and holds a Bachelor of Science degree in Biology from Baker University and a Master of Science degree in Biology from the University of Texas – Pan American.

The BIA carries out its core mission through four offices: the Office of Indian Services operates the BIA's general assistance, disaster relief, Indian child welfare, tribal government, Indian Self-Determination, and reservation roads programs; the Office of Justice Services directly operates or funds law enforcement, tribal courts, and detention facilities on Federal Indian lands; the Office of Trust Services works with tribes and individual American Indians and Alaska Natives in the management of their trust lands, assets, and resources; and the Office of Field Operations oversees 12 regional offices and 83 agencies which carry out the BIA mission at the tribal level. In Fiscal Year 2017, the BIA had 4,794 employees and a budget of $1.9 billion.

Secretary Zinke & BLM invite sportsmen to enjoy upcoming deer season at the Sabinoso Wilderness

Donation of 3,500 Acres of land made the Sabinoso publicly accessible for first time ever

Taos, N.M. – U.S. Secretary of the Interior Ryan Zinke and the Bureau of Land Management are pleased to announce that the Sabinoso Wilderness – which contains some of the most pristine habitat in the country for elk, mule deer, and other wildlife – is for the first time ever accessible to the public for hunting, fishing, and other recreational activities. The 16,000-acre Sabinoso was previously wholly surrounded by non-federal land, making it inaccessible to the general public. However, a donation of 3,595 acres (formerly known as the Rimrock Rose Ranch) that are adjacent to Sabinoso Wilderness was accepted by the Secretary and is now public.

"I'm happy to announce today the Sabinoso Wilderness Area is finally open and accessible to hunters and all members of the public for the first time ever," **said Secretary Zinke.** "Expanding access to hunting, fishing, and recreation on federal lands is one of my top priorities as Secretary. I originally had concerns about adding more wilderness-designated area, however after hiking and riding the land it was clear that access would only be improved. Thanks to the donation of a private organization, we we continue to move toward delivering this nonpartisan win for sportsmen and the community."

“The BLM strives to be a good neighbor in the communities we serve, and along with our partners we are pleased to better connect the public to the Sabinoso,” **said Acting BLM Director Michael D. Nedd.** “This action will provide folks with exceptional opportunities for hunting and fishing, as well as outdoor activities such as hiking, horseback riding, and backcountry camping in a pristine environment.”

"The Mule Deer Foundation commends Secretary Zinke on the completion of this project which will go a long way toward expanding and enhancing opportunities to access otherwise difficult to reach lands," **said Miles Moretti, President/CEO of MDF.** "This is yet another

example of Secretary Zinke's execution of a pro-sportsman policy agenda which he announced immediately upon being sworn in to his position."

“For years, hunters and anglers have called on Congress and federal agencies to help us gain access to landlocked public lands. We applaud Secretary Zinke for his commitment to this priority and look forward to ‘unlocking the gate’ so that America’s sportsmen and women can experience what the Sabinoso has to offer by truly ‘Making Public Lands Public’,” **said Jeff Crane, President of the Congressional Sportsmen’s Foundation.**

Encompassing approximately 16,000 acres in northeastern New Mexico, the Sabinoso Wilderness previously was fully surrounded by private land, making it inaccessible to the public. However, by adding the donated land – approximately 3,500 acres formerly known as the Rimrock Rose Ranch – the Sabinoso now connects with neighboring BLM-managed land, making it publicly accessible for the first time since its Congressional designation as a Wilderness Area in 2009.

Now that the area is fully accessible, the BLM invites the public to experience the Sabinoso’s unique and wild beauty. However, please be aware that Sabinoso is a wilderness area, and along with that designation the following items are prohibited: motorized vehicles and equipment, aircraft (including drones), and mechanical transport including off-road vehicles and bicycles.

For more information, please visit https://www.blm.gov/programs/national-conservation-lands/new-mexico/sabinoso-wilderness or call acting BLM Taos Field Manager Brad Higdon at 575-758-1620.

-BLM-

The BLM manages more than 245 million acres of public land, the most of any federal agency. This land is primarily located in 12 Western states, including Alaska. The BLM also administers 700 million acres of sub-surface mineral estate throughout the nation. The BLM's mission is to manage and conserve the public lands for the use and enjoyment of present and future generations under our mandate of multiple-use and sustained yield."

Secretary Zinke and Colorado Senator Gardner Announce more than $50 Million for National Parks Infrastructure

NPS Centennial Challenge Program is Matching $20 Million in Congressional Funding with $33 Million from Partner Organizations to Support Maintenance Projects at National Parks

WASHINGTON – U.S. Secretary of the Interior Ryan Zinke and Colorado Senator Cory Gardner announced today that the National Park Service is teaming up with partners across the nation to distribute nearly $50 million in high priority maintenance and infrastructure projects at 42 parks in 29 states. Congress provided $20 million for the projects as part of the Centennial Challenge program which will be matched by $33 million from more than 50 park partners to improve trails, restore buildings, and increase visitor access to parks.

Secretary Zinke and Senator Gardner made the announcement while visiting Rocky Mountain National Park, which will receive $200,000 in federal funds matched by $200,000 from the Rocky Mountain Conservancy to reduce deferred maintenance on the Alluvial Fan Trail.

“Our national parks span twelve time zones and attract more than 330 million visitors every year. Some locations, like Rocky Mountain National Park, attract millions of visitors alone. This puts an incredible stress on the aging infrastructure at our parks and thanks to Centennial Grants and the generosity of public-private partners, we are able to distribute funds to rebuild our parks,” **said Secretary Zinke**. “Using public-private partnerships to help address the deferred maintenance backlog remains a priority for the Department and the Trump Administration. Park infrastructure includes trails, signage, restrooms, lodges, roads, bridges and waterlines. These funds will help us continue to provide a world-class experience to visitors and ensure that these amazing places are around for future generations.”

“Today, I stood alongside Secretary Zinke as he announced critical funding grants for Colorado’s Rocky Mountain National Park,” **said Senator Cory Gardner**. “We must continue to be good stewards of our National Parks and protect these treasures for future generations. I want to thank Secretary Zinke for highlighting a crown jewel of Colorado’s public lands, Rocky Mountain National Park, and the dedicated Park employees that care for this land every day.”

“Many of the national parks that Americans treasure today would simply not exist without the strong partnerships and philanthropy that have benefited the national park idea for over a century,” **said Acting National Park Service Director Michael T. Reynolds**. “The Centennial Challenge program continues that proud tradition by matching dollars from Congress with generous donations from dedicated partners to make high-impact improvements in parks.”

Examples of the more than 50 projects the Centennial Challenge program will fund this year using partner donations and federal matching funds include:

- Centennial Challenge funds will complement a donation announced last year from philanthropist David M. Rubenstein to the National Park Foundation that will repair and restore the Lincoln Memorial in addition to expanding educational resources and public access.
- Funding from Yellowstone Forever will improve overlooks along the Grand Canyon of the Yellowstone.
- Friends of Hawai'i Volcanoes National Park will restore heavily used frontcountry trails in the park.
- The Gettysburg Foundation will help create a multi-use trail at Gettysburg National Military Park that will connect the visitor center to a historic farm that was used as a field hospital during the battle.
- Friends of Saguaro National Park, the Western National Park Association, and G. Arthur Jansson are teaming up to create an accessible outdoor classroom space at Saguaro National Park.

Since 2015 the National Park Service has leveraged over $45 million in funding from congress through the Centennial Challenge program to attract more than $77 million from partner organizations to support over hundreds of projects across the country that have improved visitor services and strengthened partnerships to reinvigorate national parks.

For a complete list of centennial challenge projects and partners please visit http://www.nps.gov/subjects/centennial/nps-centennial-challenge-projects.htm

Park Name	State	Project Title	Federal $	Partner $	Partner

Secretary Zinke and Interior Leadership host First-Ever Public Lands Access for Veterans Meeting at Interior

WASHINGTON – As part of “National Hunting and Fishing Month” today, U.S. Secretary of the Interior Ryan Zinke hosted a first-of-it's-kind meeting with veteran service organizations to share experiences and ideas to make public lands more accessible to veterans with and without disabilities. The Hunting and Fishing Access for Veterans roundtable discussion was hosted by Secretary Zinke and included members of his leadership team. More than 20 veteran advocates participated, including many who specialize in hunting and fishing therapy for returning warriors.

“Hunting and fishing are more than a pastime. They are a way for us to connect with the land and the people we're with, while also helping recharge body, mind, and soul in the solace of nature," **said Secretary Zinke**.

"Hunting and fishing present such an incredible healing opportunity for our veterans who return home with physical and emotional wounds. Unfortunately, many of our public lands are either inaccessible to individuals with various physical disabilities, or we just don't offer programs to encourage veterans to access and use them. I want these warriors to be able to return home from their service and enjoy the very lands they fought to protect. I want to make sure hunting and fishing on public lands is easily accessible and available. Hearing ideas from leaders in the veteran community about how to achieve this goal has given my team some much-needed insight as we move forward."

Army Green Beret John Wayne Walding and Benghazi warrior Mark "Oz" Geist, both motivational speakers and combat veterans, shared their personal stories about how hunting on public lands helped them recover from battlefield injuries and strengthened the bonds with their families. Walding spoke of the first hunt he took in Alaska after having his leg amputated, which proved to be the motivational force for him to reenter the military and return to duty. Geist spoke about the bond developed between him and his WWII veteran father stalking and hunting on Colorado public lands.

Secretary Zinke addresses the veterans group

Following the opening remarks, breakout sessions were held so Interior leadership could solicit feedback regarding veteran affairs and veteran accessibility on public lands.

Secretary Zinke Announces $94.3 Million to States for Parks and Outdoor Recreation through Land and Water Conservation Fund

Federal grants invest in state and local parks using earnings from offshore oil and gas leasing

WASHINGTON – U.S. Secretary of the Interior Ryan Zinke today announced that $94.3 million will be distributed for outdoor recreation and conservation projects to the 50 states, U.S. territories, and the District of Columbia from the Land and Water Conservation Fund (LWCF), which is funded through offshore oil and gas leasing. These funds are awarded through federal matching grants that leverage public and private investment in America's state and local public parks.

"The Land and Water Conservation Fund state grant program has been a resounding success that makes physical investments in our communities," **Secretary Zinke said**. "From Detroit, Michigan, to Lake Tahoe, California, the program benefits citizens across the nation by helping state and local governments make infrastructure investments in urban, suburban, and rural parks. By advancing the Administration's offshore energy goals, we will be able to generate more revenue for the fund to improve conservation and recreation opportunities for generations to come."

"I have long supported the Land and Water Conservation Fund and I'm very pleased to see Secretary Zinke's announcement today, including $2.3 million for North Carolina parks and outdoor recreation," **said Senator Richard Burr**. "The LWCF, which is funded through oil and gas royalties from federal lands at no cost to the taxpayer, has a proven track record of conserving our parks, open spaces, and wildlife habitats for the benefit of future generations. I'm pleased to see Secretary Zinke's commitment to the program, and I will continue to work with my colleagues in Congress to permanently reauthorize it going forward."

“The Land and Water Conservation Fund has played a large role in protecting Tennessee’s outdoors for over 50 years – providing morethan $200 million to conservation and outdoor recreation efforts in our state," **said Senator Lamar Alexander**. "Today’s announcement that Tennessee will receive more than $1.7 million from LWCF is good news as it will help continue to preserve our state’s beautiful land, water resources and recreation areas so future generations have the same opportunities to enjoy them as we have.”

The LWCF was established by Congress in 1965 to ensure access to outdoor recreation resources for present and future generations. The funds enable state and local governments to improve existing parks and other recreation areas in their communities through rehabilitation and upgrade projects. These funds are also used to develop and expand parks, trail systems, and recreation opportunities.

“As leading providers of parks and natural areas for outdoor recreation, counties welcome the Department of the Interior's investments in local communities through the Land and Water Conservation Fund," **said National Association of Counties Executive Director Matthew Chase**. “These matching grants help counties maintain open spaces that contribute to vibrant communities across the country.”

“Having access to a local park is part of what makes a city a great place to live, work and play,” **said Clarence E. Anthony, CEO and Executive Director of the National League of Cities (NLC).** “The Land and Water Conservation Fund plays an invaluable role in helping cities create and improve parks, open space and outdoor recreation opportunities. The fund also protects our wetlands, refuges and wildlife habitats and helps cities build stronger, healthier and more resilient communities.”

Since the inception of the LWCF, more than $4.1 billion has been made available to state and local governments to fund more than 42,000 projects throughout the nation.

The allocation for the State and Local Assistance grant (stateside) program is determined based on a formula set in the LWCF Act and the Gulf of Mexico Energy Security Act. For more information, please visit www.nps.gov/lwcf.

Fiscal Year 2017 Total Apportionments by State

State	Total
Alabama	$1,485,537

Secretary Zinke Announces 76 Million Acres Offered in Gulf of Mexico Region-Wide Oil and Gas Lease Sale

All Unleased Areas of Federal Waters Available, Shallow Water Leases to See Reduced Royalties

WASHINGTON – U.S. Secretary of the Interior Ryan Zinke today announced that the Department will offer 75.9 million acres offshore Texas, Louisiana, Mississippi, Alabama, and Florida for oil and gas exploration and development. The region-wide lease sale scheduled for August 16, 2017 will include all available unleased areas in federal waters of the Gulf of Mexico and provide a reduced royalty rate for shallow water leases to encourage exploration and production under current market conditions.

Lease Sale 249, scheduled to be livestreamed from New Orleans, will be the first offshore sale under the National Outer Continental Shelf (OCS) Oil and Gas Leasing Program for 2017-2022. Under this program, ten region-wide lease sales are scheduled for the Gulf, where resource potential and industry interest are high, and oil and gas infrastructure is well established. Two Gulf lease sales will be held each year and include all available blocks in the combined Western, Central, and Eastern Gulf of Mexico Planning Areas.

On June 29, President Donald J. Trump and Secretary Zinke announced the public comment period for a new Five-Year National OCS Oil and Gas Leasing Program. The comment period is the first step in executing the new program. The 2017-2022 Program, which begins with the lease sale announced today, will continue to be executed until the new National OCS Oil and Gas Leasing Program is complete.

"Our Outer Continental Shelf lands offer vast energy development opportunities and we are committed to encouraging increased energy exploration and production in these offshore areas to maintain the Nation's global dominance in energy production," **Secretary Zinke said.** "As

a global energy leader, we will foster energy security and resilience for the benefit of the American people. A strong offshore energy plan that responsibly harnesses more of our resources will spur economic opportunities for industry, states, and local communities, creating jobs and revenue. That's why we also are developing a new national Outer Continental Shelf oil and gas program that will best meet our future energy needs."

Lease Sale 249 will include about 14,220 unleased blocks, located from three to 231 miles offshore, in the Gulf's Western, Central and Eastern planning areas in water depths ranging from nine to more than 11,115 feet (three to 3,400 meters). Excluded from the lease sale are blocks subject to the Congressional moratorium established by the Gulf of Mexico Energy Security Act of 2006; blocks that are adjacent to or beyond the U.S. Exclusive Economic Zone in the area known as the northern portion of the Eastern Gap; and whole blocks and partial blocks within the current boundary of the Flower Garden Banks National Marine Sanctuary.

"To advance commonsense domestic energy production, the terms of this sale have been developed through extensive environmental analysis, public comment, and consideration of the best available information," said **Counselor to the Secretary on Energy Policy Vincent DeVito**. "This will ensure appropriate resource development and further our energy dominance strategy."

The Gulf of Mexico OCS, covering about 160 million acres, has technically recoverable resources of 550 million barrels of oil and 1.25 trillion cubic feet of gas, accounting for nearly three-fourths of the oil and a fourth of the natural gas produced on federal lands.

The lease sale terms include stipulations to protect biologically sensitive resources, mitigate potential adverse effects on protected species, and avoid potential conflicts associated with oil and gas development in the region. Additionally, BOEM has included appropriate fiscal terms that take into account market conditions and ensure taxpayers receive a fair return for use of the OCS. These terms include a 12.5 percent royalty rate for leases in less than 200 meters of water depth, and a royalty rate of 18.75 percent for all other leases issued pursuant to the sale.

The 12.5 percent royalty rate for leases in less than 200 meters is lower than the proposed 18.75 percent royalty rate for shallow water leases that BOEM published in the Proposed Notice of Sale. The purpose of this change is to adjust the royalty rate to reflect recent market conditions, thereby encouraging competition and continuing to receive a fair and equitable return on oil and gas resources.

"The rate change reflects this Administration's willingness to swiftly respond to economic indicators," said DeVito. "The 12.5 percent royalty rate is closer in harmony with the current market and federal onshore lease sales."

As of July 3, 2017, 15.6 million acres on the U.S. OCS are under lease for oil and gas development (2947 active leases) and 4.1 million of those acres (842 leases) are producing oil and natural gas. More than 97 percent of these leases are in the Gulf of Mexico; about 3 percent are on the OCS off California and Alaska.

All terms and conditions for Gulf of Mexico Region-wide Sale 249 are detailed in the Final Notice of Sale (FNOS) information package, which is available at: http://www.boem.gov/Sale-249/. Copies of the FNOS maps can be requested from the Gulf of Mexico Region's Public Information Unit at 1201 Elmwood Park Boulevard, New Orleans, LA 70123, or at 800-200-GULF (4853).

The Notice of Availability of the FNOS is available today for inspection in the Federal Register at: http://www.archives.gov/federal-register/public-inspection/index.html and will be published in the Federal Register on July 17, 2017.

Secretary Zinke Announces Largest Oil & Gas Lease Sale in U.S. History

March 2018 sale to offer 76.9 million acres in Gulf of Mexico

NEW ORLEANS – U.S. Secretary of the Interior Ryan Zinke today announced that the Department is proposing the largest oil and gas lease sale ever held in the United States - -76,967,935 acres in federal waters of the Gulf of Mexico, offshore Texas, Louisiana, Mississippi, Alabama, and Florida. The proposed region-wide lease sale, offering an area about the size of New Mexico, is scheduled for March 2018 and includes all available unleased areas on the Gulf's Outer Continental Shelf, surpassing last year's region-wide lease sale by about one million acres.

"In today's low-price energy environment, providing the offshore industry access to the maximum amount of opportunities possible is part of our strategy to spur local and regional economic dynamism and job creation and a pillar of President Trump's plan to make the United States energy dominant," **Secretary Zinke said**. "And the economic terms proposed for this sale include a range of incentives to encourage diligent development and ensure a fair return to taxpayers."

Proposed Lease Sale 250, which will be livestreamed from New Orleans, will be the second offshore sale under the National Outer Continental Shelf Oil and Gas Leasing Program for 2017-2022. Lease Sale 249, held in New Orleans last August, received $121 million in high bids. In addition to the high bids and rental payments, the Department will receive royalty payments on any future production from these leases. Outer Continental Shelf (OCS) lease revenues are directed to the U.S. Treasury, Gulf Coast states, the Land and Water Conservation Fund and Historic Preservation Fund.

"In order to strengthen America's energy dominance, we must anticipate and plan for our

needs for decades to come," **said Senator Lisa Murkowski, Chairman of the Senate Committee on Energy & Natural Resources**. "The administration's decision to move forward with the largest offshore lease sale in our nation's history is a key part of that effort. Whether in Alaska or the Gulf of Mexico, we should all support responsible development because it creates high-paying jobs, strengthens national security, and keeps energy affordable for our families and businesses."

"President Trump's team is following through on their commitment to advancing America's energy independence," **said Senator Roger Wicker**. "Unlike the previous administration, this one understands that expanded offshore energy development benefits working families, consumers, and our national security. This is a win for Mississippi and the entire country."

"President Trump and his administration are following through on their promise to end the war on American energy," **said Senator Bill Cassidy**. "Investing in energy creates better jobs with better benefits for working families, strengthens our national security and strengthens our energy independence."

"This is great news that our oil and gas industry in Louisiana sorely needs. This is the largest sale in U.S. history, and it will create jobs and bolster our state and national economy," **said Senator John Kennedy**. "Our Louisiana workers are ready to go back to work."

"President Donald Trump made clear his desire to ensure Americans can use our own natural resources to produce the energy vital to our economy and national security," **said Alabama Governor Kay Ivey.** "As he has done time and again, President Trump has proven to the people of Alabama that he is a man of his word, and we are grateful to him and to Secretary Ryan Zinke for their determination to open a vast tract of American waters to oil and gas exploration. This decision is not only in the best interest of all Americans, it allows Gulf Coast states, like Alabama, to utilize our natural resources not only to provide energy for our nation, but increased economic opportunities for our people."

"Mississippi welcomes Secretary Zinke's action to carry out the president's vision for American energy dominance," **said Mississippi Governor Phil Bryant**. "This will strengthen our state's status as a leader in oil and gas exploration and create good jobs for hardworking Mississippians."

"If we're serious about energy dominance and long-term energy affordability, we must create certainty about future access in the Outer Continental Shelf," **said Congressman Rob Bishop, Chairman of the House Committee on Natural Resources.** "Secretary Zinke should be commended for his leadership to create that certainty and realign Interior as a partner for industry to advance responsible energy development. This is a welcomed announcement on that front. Congressionally, we will continue to move forward on a comprehensive overhaul of onshore and offshore federal lands energy policy to help Interior expand even greater access, streamline permitting and increase revenues to both states and the U.S. Treasury."

"Secretary Zinke's announcement is welcome news and I look forward to continuing to work with the administration to put consumer's interests first while promoting job creation and modernizing our nation's energy infrastructure," **said Congressman Greg Walden, Chairman of the House Committee on Energy & Commerce**. "The president and his administration have placed energy independence and security at the top of their agenda, and this committee has been leading the way in examining policies that seek to streamline siting and permitting of the nation's oil and gas pipelines."

"President Trump has stated that he wants our country to exert 'energy dominance' throughout the world, and this lease sale is another bold step in that direction," **said House Majority Whip Steve Scalise**. "I applaud today's announcement by Secretary Ryan Zinke to offer the largest offshore oil and gas lease sale in U.S. history. My constituents in Southeast Louisiana will be leading the way in this exploration and development that will create good jobs and kickstart more economic growth. This bold action helps us continue fighting for the responsible development of our natural resources that bring critical dollars to restore our coast."

“As a long-time advocate for opening up more of the Gulf of Mexico, it’s refreshing to work with an Administration that understands it’s true energy potential," **said Congressman Pete Olson**. "Oil production, when done safely and responsibly, is a win for Texas and the Gulf Coast economy, and adds to America’s energy security. I applaud Secretary Zinke for moving forward with this lease sale and hope these opportunities to tap into our energy potential continue.”

“Secretary Zinke’s announcement of the largest oil and gas lease sale in our country’s history is welcome news. The oil and gas industry provides thousands of direct and indirect jobs to the people of Mississippi," **said Congressman Gregg Harper**. "This lease sale has the potential to create new opportunities for our state and nation as advances in technology continue to make the United States a world leader in natural resource production.”

“I applaud Secretary Zinke and the Department of Interior for their efforts to spur energy production and support communities along the Gulf Coast. Revenue from these leases will be a huge boost for Gulf states, like Alabama, and will help us continue conservation and preservation of our treasured coastal areas," **said Congressman Bradley Byrne**. "Through developments like this, we can ensure American energy dominance and make life better for Gulf Coast families.”

The estimated amount of resources projected to be developed as a result of the proposed region-wide lease sale ranges from 0.21 to 1.12 billion barrels of oil and from 0.55 to 4.42 trillion cubic feet of gas. Most of the activity (up to 83% of future production) from the proposed lease sale is expected to occur in the Central Planning Area.

Proposed Lease Sale 250 includes 14,375 unleased blocks, located from 3 to 230 miles offshore, in the Gulf’s Western, Central and Eastern planning areas in water depths ranging from 9 to more than 11,115 feet (three to 3,400 meters). Excluded from the lease sale are blocks subject to the Congressional moratorium established by the Gulf of Mexico Energy Security Act of 2006; blocks that are adjacent to or beyond the U.S. Exclusive Economic Zone in the area known as the northern portion of the Eastern Gap; and whole blocks and partial blocks within the current boundary of the Flower Garden Banks National Marine Sanctuary.

“American energy production can be competitive while remaining safe and environmentally sound,” **said Vincent DeVito, Counselor for Energy Policy at Interior**. “People need jobs, the Gulf Coast states need revenue, and Americans do not want to be dependent on foreign oil. We have heard their message loud and clear.”

The lease sale terms include stipulations to protect biologically sensitive resources, mitigate potential adverse effects on protected species, and avoid potential conflicts associated with oil and gas development in the region. The terms and conditions for Lease Sale 250 in the Proposed Notice of Sale are not final. Different terms and conditions may be employed in the

Final Notice of Sale, which will be published at least 30 days before the sale.

The Bureau of Ocean Energy Management (BOEM) estimates that the OCS contains about 90 billion barrels of undiscovered technically recoverable oil and 327 trillion cubic feet of undiscovered technically recoverable gas. The Gulf of Mexico OCS, covering about 160 million acres, has technically recoverable resources of over 48 billion barrels of oil and 141 trillion cubic feet of gas.

All terms and conditions for Gulf of Mexico Region-wide Sale 250 are detailed in the Proposed Notice of Sale (PNOS) information package, which is available at: http://www.boem.gov/Sale-250/. Copies of the PNOS maps can be requested from BOEM's Gulf of Mexico Region's Public Information Unit at 1201 Elmwood Park Boulevard, New Orleans, LA 70123, or at 800-200-GULF (4853).

The Notice of Availability of the PNOS will be available for inspection in the Federal Register on October 26, 2017 at: https://www.archives.gov/federal-register/public-inspection.

Secretary Zinke Appoints Members to the Royalty Policy Committee, Announces First Meeting

Significant Step Toward Restoring Public Trust, Collaborative Development of Federal Lands

WASHINGTON – U.S. Secretary of the Interior Ryan Zinke today announced the appointment of 20 primary and 18 alternate members to the Department of the Interior's Royalty Policy Committee (Committee) that will serve a critical role in advising the Secretary on policy and strategies to improve management of the multi-billion dollar, federal and American Indian mineral revenue program. The Committee's first meeting will be held on Wednesday, October 4.

"Working closely with the Committee, we will come up with solutions for modernizing the management of public and American Indian assets, while building greater trust and transparency in how we value our nation's public mineral resources," **said Secretary Zinke**. "It's important that the taxpayers and tribes get the full and fair value of traditional and renewable energy produced on public lands and offshore areas."

The Committee may also advise the Secretary on the potential impacts of proposed policies and regulations related to revenue collection from energy and mineral development on public lands, including whether a need exists for regulatory reform. To underscore the Department's commitment to reforming revenue management and royalty collections, the Committee, which may consist of up to 28 members, reflects the diverse perspectives of a wide-range of stakeholders, including representatives of western states and American Indian tribes that produce energy, energy stakeholders, academic groups and the general public, as well as Interior officials. Non-federal members will serve three-year terms.

The Secretary appointed Vincent DeVito, Counselor to the Secretary for Energy Policy, as Chairman of the Committee. "On behalf of the Secretary, I am committed to aligning this Committee with our continuing drive toward making the Department a better business partner and delivering better results for American taxpayers," **said Chairman DeVito**.

The agenda and meeting materials will be posted on the Committee website at www.doi.gov/rpc.

The meeting is open to members of the public, who may attend in person or view the documents and presentations under discussion via WebEx at http://bit.ly/1cR9W6t and listen to the proceedings at telephone number 1-888-455-2910 or International Toll number 210-839-8953 (passcode: 7741096). The public will be invited to make statements during the meeting and file written statements with the Committee for consideration. To submit written comments, contact Kim Oliver at rpc@ios.doi.gov or mail your written comments to Royalty Policy Committee, Attn: Kim Oliver, 1849 C Street NW MS 5134, Washington, D.C. 20240.

Secretary Zinke signed a charter in March of this year establishing the Royalty Policy Committee to review revenues collected from oil and gas drilling, coal mining and renewable energy production on federal lands and offshore areas, and provide regular advice to the Secretary on the fair market value of and collection of

revenues from these Federal and Indian mineral and energy leases. Interested persons were invited in the Federal Register to submit their names under the process outlined in the Federal Advisory Committee Act.

The Secretary appointed the following non-federal members to the Committee:

States

Primary Members
Andrew McKee, State of Wyoming
Brent Sanford, State of North Dakota
John Crowther, State of Alaska
William Darby, State of Texas
Clinton Carter, State of Alabama
John Andrews, State of Utah

Alternate Members
Hans Hunt, State of Wyoming
Lynn Helms, State of North Dakota
Daniel Saddler, State of Alaska
Jerry Strickland, State of Texas
Mark Edwards, State of New Mexico
Shawn Thomas, State of Montana

Tribes

Primary Members
Russell Begaye, Navajo Nation
Christopher Adam Red, Southern Ute Indian Tribe
Charles Robertson, Choctaw Nation of Oklahoma
Everett Waller, Osage Minerals Council

Alternate Members
Bidtah Becker, Navajo Nation
Leslie Shakespeare, Eastern Shoshone Tribe
Neil McCaleb, Chickasaw Nation
Harry Barnes, Blackfeet Nation

Mineral/Energy Stakeholders

Primary Members
Randall Luthi, National Ocean Industries Association

Patrick Noah, ConocoPhillips Company

Estella Alvarado, Anadarko Petroleum Corporation
John Sweeney, VWR Corporation
Matthew Adams, Cloud Peak Energy
Marissa Mitchell, Intersect Power

Alternate Members

Albert Modiano, US Oil & Gas Association

Kevin Simpson, Shell Exploration and Production Co.

Greg Morby, Chevron North America E&P
Kathleen Sgamma, Western Energy Alliance
Gabrielle Gerholt, Concho Resources
Jennifer Cadena Fortier, Incremental Oil & Gas USA

Academia and Public Interest Groups

Primary Members
Roderick Eggert, Colorado School of Mines
Van Romero, New Mexico Institute of Mining and Technology
Monte Mills, University of Montana School of Law
Daniel Rusz, Wood Mackenzie

Alternate Members
Graham Davis, Colorado School of Mines
Kwame Awuah-Offei, Missouri University of Science and Technology

The Federal Register Notice announcing the first meeting of the Committee can be accessed via the web at: https://www.federalregister.gov/. Additional information about the Committee and meeting materials can be found on the Committee website.

Secretary Zinke Directs Interior Bureaus to Take Aggressive Action to Prevent Wildfires

WASHINGTON– Today, U.S. Secretary of the Interior Ryan Zinke directed all Department of the Interior bureaus, superintendents, and land managers at all levels to adopt more aggressive practices, using the full authority of the Department, to prevent and combat the spread of catastrophic wildfires through robust fuels reduction and pre-suppression techniques.

This year-to-date, 47,700 wildfires have burned 8 million acres across the country, with the majority of the devastation in the states of California and Montana. High-profile fires in Yosemite and Glacier National Parks have caught national headlines, however millions of acres of forest and grassland have burned in recent months.

"This Administration will take a serious turn from the past and will proactively work to prevent forest fires through aggressive and scientific fuels reduction management to save lives, homes, and wildlife habitat. It is well settled that the steady accumulation and thickening of vegetation in areas that have historically burned at frequent intervals exacerbates fuel conditions and often leads to larger and higher-intensity fires," **said Secretary Zinke**. "These fires are more damaging, more costly, and threaten the safety and security of both the public and firefighters. In recent fire reviews, I have heard this described as 'a new normal.' It is unacceptable that we should be satisfied with the status quo. We must be innovative and where new authorities are needed, we will work with our colleagues in Congress to craft management solutions that will benefit our public lands for generations to come."

The Secretary is directing managers and superintendents of units that have burnable vegetation to address the threat of fire in all of their activities, and to use the full range of existing authorities, to reduce fuels.

Bryan Rice, Director of the Office of Wildland Fire, said, "It is critical to fully consider the benefits of fuels reduction in the everyday management activities that we carry out for our

public land management objectives, such as clearing along roadsides, around visitor use areas like campgrounds and trails, near employee housing areas, and within administrative site areas subject to wildfire."

The Department has lost historic structures in wildfires like Glacier National Park's historic Sperry Chalet lodge. In an effort to help prevent future losses, the Secretary is also directing increased protection of Interior assets that are in wildfire prone areas, following the Firewise guidance, writing: "If we ask local communities to 'be safer from the start' and meet Firewise standards, we should be the leaders of and the model for 'Firewise-friendly' standards in our planning, development, and maintenance of visitor-service and administrative facilities."

“I welcome Secretary Zinke’s new directive and his attention to the catastrophic fires taking place in many western states,” **said Senator Lisa Murkowski, Chairman of the Senate Energy and Natural Resources Committee.** “Treating our landscapes mitigates wildfire risk, increases firefighter safety, and makes our forests and rangelands healthy and resilient. We can no longer delay the implementation of this important work.”

House Natural Resources Chairman Rob Bishop said, "We must ensure our land management agencies have the tools and resources they need to protect communities and landscapes from catastrophic wildfire. Over the long term, Congress and the Administration must work together to reverse the sorry state of our federal forests and grasslands. I’m heartened to finally have an Administration that’s focused on actively managing and addressing the on-the-ground conditions that are contributing to our historic wildfire crisis. I hope to build on this by enacting comprehensive legislation to restore the health and resiliency of federal lands.”

"If we don't start managing our forests, the forests are going to start managing us," **said Montana Senator Steve Daines**."The fires burning across Montana are a catastrophe, and we need all available resources to combat this threat. I applaud Secretary Zinke’s action to focus resources on attacking wildfires."

“I applaud Secretary Zinke’s effort to thin the threat. If we can reduce the fuel loads in our forests and rangelands we will provide our fire fighters more defensible space to do their jobs," **said Idaho Senator James Risch**. "We need bold actions like this not just for the hurricanes in the south and east but also to avert the devastation caused by the wildfires in the west.”

“More than 50 million acres in the United States are currently at risk for catastrophic wildfire. That is why we must act to prevent calamitous fires. Management actions taken by Secretary Zinke today will not completely stop the risk, but it is an important step forward in our fight to turn unhealthy, overgrown, and infested forests into thriving, healthy ecosystems," **said Congressman Bruce Westerman**. "I commend Secretary Zinke for recognizing this emergency situation and taking steps to address prevent further loss of life and property due to these preventable, catastrophic wildfires. I am committed to working with him and my colleagues in Congress to find a permanent solution to this problem that emphasizes active forest management as the first line of defense against catastrophic wildfires.”

With Western Fire season reaching its natural peak in September, the National Multi-Agency Coordinating Group (NMAC) elevated the National Fire Preparedness Level to “5”, the highest level NMAC declares, on August 10, 2017. Above normal major-fire activity continues to be observed across portions of the Pacific Northwest, Northern Rockies, northern

Great Basin, and northern California. Fuel moisture levels and fire danger indices in these areas are at near-record to record levels for severity. Drier and warmer than average conditions across the central Great Basin and Southern California are allowing for the fine fuels to become more receptive to fire activity.

See the full memo below.

Memorandum

To: Assistant Secretaries
Heads of Bureaus and Offices
Regional Directors
State Directors
Superintendents
Refuge Managers
District Managers
Field Office Managers

From: Secretary

Subject: Wildland Fire Directive

In June of this year, Secretary of Agriculture Sonny Perdue and I gave direction on a broad strategy for addressing wildfire by managing our firefighting assets in the most efficient way possible. (2017 Direction to Wildland Fire Leadership Memorandum). As we anticipated, 2017 is challenging our wildland firefighting capabilities with a significant number of fires and acres burned to date. Nonetheless, I am pleased that you have taken to heart our direction to work together more effectively and to seek more opportunities to work with state and local partners. Secretary Perdue and I heard in Montana from local fire chiefs and county officials about the degree to which our teams have "collaborated from Day 1." This collaboration has already made a difference, and I thank you.

It is well settled that the steady accumulation of vegetation in areas that have historically burned at frequent intervals exacerbates fuel conditions and often leads to larger and higher-intensity fires. These fires are more damaging, more costly, and threaten the safety and security of both the public and firefighters. In recent fire reviews, I have heard this described as "a new normal." However, that does not mean that we should continue to address our challenges in the same ways that we have in the past. We must think differently about the threat of wildfire and how we manage public lands in ways that integrate fuels reduction – where it makes sense – into all our activities.

To our line officials – the field, district and refuge managers, and park and agency superintendents – I want to thank you for your response in deploying key staff to the wildfire emergencies (and now hurricanes) across the Nation. As the public continues to visit their lands in great numbers, we cannot await a weeks-off, season-ending event to think about how best to address the potential threat of catastrophic wildfires. Even as fires continue to burn, I ask that you think about a different way of managing public lands to better incorporate fuels management into your resource-management planning.

One of our Federal fire strategic goals is to ensure that landscapes and communities across all jurisdictions are resilient to fire-related disturbances in accord with management objectives. A

key part of implementing such a strategy is carrying out activities that address vegetation composition and structure and also alters fuel loads to reduce hazards. Such methods of fuel treatment safeguard public and firefighter safety and protect our landscapes, scenic vistas, and natural and historic objects; our neighbors, nearby communities, and infrastructure; and our own administrative and visitor service assets and facilities.

For our managers and superintendents of units that have burnable vegetation, I am directing you to think about fire in a new and aggressive way. Address the threat of fire in all of your activities, rather than engaging only the fire staff. All land managers across the Department of the Interior (Department) have a responsibility, using the full range of existing authorities, to consider using fuels management to achieve their programs' and units' resource- and land-management objectives. Where dead and dying trees have become hazards that can carry fire across our boundaries or into areas that are a threat to values-at-risk, we must move aggressively to minimize that threat. If we don't have the people on hand, we have authorities to contract it to capable resource managers in the private sector. It makes little sense to be thinning to protect structures when we see flames on the ridge and smoke in the air—fuel management is more effective when undertaken before fires break out.

Where our roads have narrowed over the years as vegetation and trees have encroached, even into ditches and onto shoulders, we should be clearing this vegetation away. In our administrative and employee housing areas where we have allowed the natural landscape to grow closer to our structures, we should remove the fire threat to create defensible space. If we ask local communities to "be safer from the start" and meet Firewise standards, we should be *the* leaders of and the model for "Firewise-friendly" standards in our planning, development, and maintenance of visitor-service and administrative facilities.

I will be asking our program officials at the Department level to call for appropriate reviews and identification of resource needs and data gaps. Each of you should ensure your fire management plans are up to date and include the identified needs for a robust fuels-management program to support wildfire prevention and suppression efforts to be developed and implemented by both fire and other resource staff.

I ask you to do the following: 1) use our existing policies more aggressively; 2) think differently about how those policies may be applied; 3) look for opportunities to partner with adjacent agencies, state and local governments, tribes, and private landowners to maximize resources; 4) look carefully at your existing management plans and ask if you are doing all you can today to address the threats of tomorrow; and 5) ensure that our landscapes are restored and maintained to meet our mission.

In our June memo, Secretary Perdue and I emphasized our implementation of Federal wildland fire policy and its emphasis on firefighter and public safety. That emphasis remains.

We must also identify ways to address the realities we face in a safer and more effective manner. We simply cannot afford to continue business as usual. We must do everything we can to address the steady accumulation of fuels on our Nation's public lands and the resulting increased threats from catastrophic wildfires.

You and your staff are critical to making the changes necessary to better address the challenges we will face together in the future.

NOTE: Heads of bureaus and offices shall distribute this memorandum to all regional and/or state directors, district managers, field office managers, superintendents, and/or refuge

managers.

Secretary Zinke Names John Tahsuda III the Principal Deputy Assistant Secretary for Indian Affairs

WASHINGTON – U.S. Secretary of the Interior Ryan Zinke today announced that he has named John Tahsuda III, a member of the Kiowa Tribe of Oklahoma, as DOI's Principal Deputy Assistant Secretary – Indian Affairs (PDAS). The appointment was effective September 3, 2017. The PDAS serves as the first assistant and principal advisor to the Assistant Secretary – Indian Affairs in the development and interpretation of policies affecting Indian Affairs bureaus, offices and programs.

"I want to welcome John Tahsuda to my Indian Affairs leadership team," said Secretary Zinke. "John possesses extensive experience in federal Indian law and tribal government, and deeply understands and respects our government-to-government relationship with tribes. He'll be a strong leader for the Indian Affairs organization."

"I appreciate Secretary Zinke for giving me this tremendous opportunity to bring greater prosperity to tribes and their communities," Tahsuda said. "I'm looking forward to working with tribal leaders on finding ways to make Indian Affairs programs more responsive to their needs."

Tahsuda joined the Department from Washington, D.C.-based Navigators Global, LLC, where he was a principal. Navigators Global is a company that specializes in and offers a wide range of political services to multiple industry sectors, including financial services, insurance, energy, health care, defense, emergency management, American Indian tribal affairs, and high tech/telecommunications.

He led the company's tribal affairs practice providing clients with advocacy and counsel services on a range of tribal affairs policy issues at state and federal levels, including gaming, tax incentives, tobacco sales, land-into-trust issues, health care, economic development, energy policy, federal recognition, and self-governance.

Before joining Navigators Global, Tahsuda had served on the staff of the U.S. Senate Committee on Indian Affairs since 2002, first as senior counsel and later as staff director, where he directed policy and legislative efforts relating to Indian tribes. He also was directly responsible for federal policy and legislation affecting gaming, federal recognition, self-governance, and Indian health care.

Prior to joining the Committee's staff, Tahsuda was engaged in private practice providing legal advice and legislative counseling to Indian tribes and tribal organizations. From 1999 to 2001, he served as general counsel and legislative director of the National Indian Gaming Association (NIGA), the Indian gaming industry's trade association, where he monitored legislation and policy issues affecting the organization's 180 member tribes and assisted them in their lobbying efforts.

In the years preceding his tenure at NIGA, Tahsuda served the Oneida Indian Nation of New York as acting general counsel with responsibilities that included overseeing its legal needs and business enterprises. From 1997 through 2001, he also served as an adjunct professor of law at Cornell Law School where he taught courses on federal Indian law, policy and history.

Tahsuda received a *juris doctorate* from Cornell Law School in 1993 and a Bachelor of Science degree from Oklahoma State University in 1990.

Secretary Zinke Recommends Keeping Federal Lands in Federal Ownership, Adding Three New Monuments

WASHINGTON – Today, in accordance with President Donald J. Trump's April 26, 2017, Executive Order (EO), U.S. Secretary of the Interior Ryan Zinke released the final report outlining recommendations he made to the President on some national monument designations under the Antiquities Act.

Recommendations Secretary Zinke made in the final report included the following:

- **Keep federal lands federal** - the report does not recommend that a single acre of federal land be removed from the federal estate. If land no longer falls within a monument boundary it will continue to be federal land and will be managed by whichever agency managed the land before designation
- **Add three new national monuments** - Secretary Zinke recommended beginning a process to consider three new national monuments: The Badger II Medicine Area (Montana), Camp Nelson (Kentucky), and the Medgar Evers Home (Mississippi).
- **Modify the boundaries and management of four monuments** - Bears Ears, Grand Staircase, Cascade-Siskiyou, and Gold Butte National Monuments
- **Expand access for hunting and fishing** - Maintain an ongoing review to ensure public access to encourage more hunting and fishing in monuments

"America has spoken and public land belongs to the people," **said Secretary Zinke**. "As I visited the Monuments across this country, I met with Americans on all sides of the issue -- from ranchers to conservationists to tribal leaders -- and found that we agree on wanting to protect our heritage while still allowing public access to public land. My recommendations to the President reflect that, in some circumstances, proclamations should be amended, boundaries revised, and management plans updated."

FACT VS FICTION: Antiquities Act and Monument Review

Myth: No president has shrunk a monument.
False: Monuments have been reduced at least eighteen times under presidents on both sides of the aisle. Some examples include President John F. Kennedy excluding Bandelier National Monument, Presidents Taft, Wilson, and Coolidge reducing Mount Olympus National Monument, and President Eisenhower reducing the Great Sand Dunes National Monument in Colorado.

Myth: The monument review will sell/transfer public lands to states.
False: This is not true. The Secretary adamantly opposes the wholesale sale or transfer of public lands. The Antiquities Act only allows federal land to be reserved as a national monument. Therefore, if any monument is reduced, the land would remain federally owned and would be managed by the appropriate federal land management agency, such as the BLM, U.S. Forest Service, U.S. Fish and Wildlife Service, or the National Park Service (NPS).

Myth: Removing the monument designation from land will leave Native American artifacts and paleontological objects subject to looting or desecration.
False: This is not true. Whether these resources are found on land designated as a monument, national forest, BLM- managed public land, or other federal land, it is generally illegal to remove or disrupt these resources without a permit issued by the federal government.

Myth: The monument review will close/sell/transfer national parks.
False: No national parks are under review.

Myth: The review was done without meeting advocates for national monuments.
False: The Secretary visited eight monuments in six states and personally hosted more than 60 meetings attended by hundreds of local stakeholders. Attendees included individuals and organizations representing all sides of the debate ranging from environmental organizations like the Wilderness Society and the Nature Conservancy to county commissioners and, residents, and ranchers who prefer multiple use of the land.

Myth: Tribal Nations were not consulted.
False: This is patently false. Before traveling to Utah, the Secretary met with Tribal representatives in his office. On his first day in Utah in May, the Secretary met with the Bears Ears Inter-Tribal Coalition in Salt Lake City, for just under two hours. Throughout the four-day survey of the Utah monuments, the Secretary also met with local Tribal representatives who represent different sides of the debate. The Secretary also met with Tribal representatives for their input on several other monuments from Maine to New Mexico to Oregon and everywhere in between. Additionally, the Department hosted several Tribal listening sessions at the Department and across the country, including a four hour session with the Acting Deputy Secretary on May 30th.

Secretary Zinke signs Secretarial Order to Support Sportsmen & Enhance Wildlife Conservation

Order seeks to expand access on public and private lands and to promote hunting and fishing among youth, veterans, and minority communities

WASHINGTON – Today, U.S. Secretary of the Interior Ryan Zinke signed Secretarial Order 3356, which will support and expand hunting and fishing, enhance conservation stewardship, improve wildlife management, and increase outdoor recreation opportunities for all Americans. Secretarial Order 3356 is an extension of Secretarial Order 3347, issued on Zinke's first day, March 2, 2017. That order identified a slate of actions for the restoration of the American sportsmen conservation ethic, which was established by President Theodore Roosevelt.

The new order comes days after the U.S. Fish and Wildlife Service announced a survey that found there are 2.2 million fewer hunters in America now than in 2011. The order seeks to improve wildlife management and conservation, increase access to public lands for hunting, shooting, and fishing, and puts a new and a greater emphasis on recruiting and retaining new sportsmen conservationists, with a focus on engaging youths, veterans, minorities, and other communities that traditionally have low participation in outdoor recreation activities.

“Hunting and fishing is a cornerstone of the American tradition and hunters and fishers of America are the backbone of land and wildlife conservation,” **said Secretary Zinke**. “The more people we can get outdoors, the better things will be for our public lands. As someone who grew up hunting and fishing on our public lands - packing bologna sandwiches and heading out at 4AM with my dad - I know how important it is to expand access to public lands for future generations. Some of my best memories are hunting deer or reeling in rainbow trout back home in Montana, and I think every American should be able to have that experience.

“Today’s Secretarial Order is the latest example of how the Trump Administration is actively moving to support hunting and other forms of outdoor recreation on public lands. This means finding ways to expand hunting and fishing on public lands, improving access, and taking

necessary actions to facilitate the enjoyment of these time-honored activities by any member of our society."

Secretarial Order 3356 directs bureaus within the department to:

- Within 120 days produce a plan to expand access for hunting and fishing on BLM, USFWS and NPS land.
- Amend national monument management plans to ensure the public's right to hunt, fish and target shoot.
- Expand educational outreach programs for underrepresented communities such as veterans, minorities, and youth.
- In a manner that respects the rights and privacy of the owners of non-public lands, identify lands within their purview where access to Department lands, particularly access for hunting, fishing, recreational shooting, and other forms of outdoor recreation, is currently limited (including areas of Department land that may be impractical or effectively impossible to access via public roads or trails under current conditions, but where there may be an opportunity to gain access through an easement, right-of-way, or acquisition), and provide a report detailing such lands to the Deputy Secretary.
- Within 365 days, cooperate, coordinate, create, make available, and continuously update online a single "one stop" Department site database of available opportunities for hunting, fishing, and recreational shooting on Department lands.
- Improve wildlife management through collaboration with state, Tribal, territorial, and conservation partners.

"On behalf of the 5 million hunters, recreational shooters and members of the NRA, we commend Secretary Zinke for continuing to follow Teddy Roosevelt's sportsman legacy by opening more land and water to hunting and target shooting," **said Chris Cox, Executive Director of the National Rifle Association**. "In the past, management plans for federal lands have been put in place to ban hunting and shooting. Sportsmen and women can now breathe a sigh of relief that those days are over. This administration values access to public lands for sportsmen and we commend them for it."

"For too long, sportsmen's access to our federal lands has been restricted, with lost opportunity replacing the ability to enjoy many of our best outdoor spaces. This extension to Secretarial Order 3356 will go a long way to reversing that trend and help grow the next generation of hunters, fishermen, and recreational shooters," **said Senator Lisa Murkowski, Chairman of the Senate Energy and Natural Resources Committee**. "I appreciate this new order and am committed to working with Secretary Zinke and my colleagues to do everything we can to expand and enhance access to our federal lands for all Alaskans, and all Americans, so that we can continue our rich sportsmen's heritage."

"Restoring wildlife habitat and expanding opportunities for hunting, fishing, and other outdoor recreation will help increase wildlife populations and connect millions of Americans with our nation's natural treasures," **said Collin O'Mara, President and CEO of the National Wildlife Federation**. "Secretary Zinke's order demonstrates his commitment to collaborate closely with conservation organizations and state agencies to achieve these critical conservation outcomes. We look forward to working with the Secretary, the Department, and our conservation partners to recover America's wildlife and connect every American with nature."

"Secretary Zinke's action today follows in the great tradition of President Teddy Roosevelt

and recognizes the central role that hunters play in conservation and successful wildlife management," **said Lawrence G. Keane, Senior Vice President and General Counsel of the National Shooting Sports Foundation**. "The National Shooting Sports Foundation is deeply grateful to Secretary Zinke for the historic Secretarial Order that he signed today. NSSF has worked closely with, and in support of, Interior Department officials on these priorities and other positive steps announced today. Today's action will serve to benefit current and future generations for years to come."

"Americans depend on reliable and affordable access to public lands to participate in outdoor sporting and recreational activities," **said Chairman Rob Bishop**. "Unfortunately, these lands are not being managed to facilitate consistent, open access. Today's Secretarial Order to increase these opportunities strengthens the foundation of our country's hunting and fishing heritage and helps ensure that sportsmen and women continue to enjoy access to our federal lands and waterways."

"For many Americans, hunting and fishing wouldn't be possible without public land and the access it provides for these pastimes. Secretarial Order 3356 represents a renewed commitment to working with our nation's sportsmen and women to ensure that our legacy of hunting and fishing-driven conservation continues to stand the test of time," **said Congressional Sportsmen's Foundation President Jeff Crane**. "We applaud Secretary Zinke for recognizing the critically important role that expanded federal land access plays in achieving this goal."

"We support Secretary Zinke's order to expand opportunities for hunters and anglers on BLM, Fish and Wildlife Service and Park Service lands as well as on private lands," **said David Allen, President and CEO of the Rocky Mountain Elk Foundation**. "Access to quality wildlife habitat remains one of the most significant factors impacting hunting and fishing participation throughout the country. This order will help ensure sportsmen and women continue to have opportunities for quality recreational experiences on public lands and potentially private lands."

"Generations of Idahoans, including me, have passed on their love of hunting, fishing, and shooting sports to their children and grandchildren," **said Senator James Risch, Co-Chairman of the Congressional Sportsmen's Caucus**. "I applaud Secretary Zinke's quick action to protect those fundamental rights and expand access for sportsmen and women across the country."

On his first day in office, Secretary Zinke reversed an order that would have banned lead ammo and tackle on National Wildlife Refuge lands, and he began the process of expanding hunting and fishing opportunities on public lands across the Department.

In August, the Secretary announced a proposal to expand hunting and fishing opportunities at 10 national wildlife refuges, and he announced the initial stages of a plan to acquire land to make the Bureau of Land Management Sabinoso Wilderness Area accessible for the first time ever to hunters, hikers, and wildlife watchers.

In addition, Secretary Zinke recently made recommendations to President Trump on 27 national monuments that call for changes to some that, while still protecting the land, would also protect and expand public access to that land for citizens who want to hunt, fish, and hike and experience the joy and beauty of these special places.

Secretary Zinke to Hold Media Availability in Bunkerville, Nevada

WASHINGTON – On Sunday, July 30, U.S. Secretary of the Interior Ryan Zinke will hold a media availability to discuss the ongoing National Monument review of both the Gold Butte and the Basin and Range National Monuments, in accordance with President Donald J. Trump's April 26, 2017 Executive Order 13792.

Secretary Zinke is in the midst of a multi-day swing through the Western United States, which will conclude Sunday. To date, he has met with advocacy groups, state and local officials, and Tribal leaders. The Secretary will be meeting with federal representatives and their staff over the course of the trip as well.

WHO: **Ryan Zinke,** U.S. Secretary of the Interior

WHAT: Media availability to discuss the National Monument review of both the Gold Butte and the Basin and Range National Monuments, in accordance with President Donald J. Trump's April 26, 2017 Executive Order 13792

WHEN: Sunday, July 30, 2017

Media Check-In: 5:00 PM PDT

Media Availability: 5:30 PM PDT

WHERE: Bunkerville, NV

MEDIA: Members of the media must RSVP to Chris Rose at crose@blm.gov. More logistics details will be sent upon confirmation.

Subject: Senate budget opens door to ANWR debate
Date: Friday, September 29, 2017 12:08:42 PM

By Nick Juliano

09/29/2017 12:02 PM EDT

The Senate Budget released this morning opens the door for oil drilling in the Arctic National Wildlife Reserve or other off-limits areas without having to overcome a Democratic filibuster.

The budget asks the Energy and Natural Resources Committee to find $1 billion for deficit reduction, according to a summary. That money could come from authorizing new drilling in ANWR, a longtime priority of Alaskans including ENR Chairwoman Lisa Murkowski.

POLITICO reported earlier this week on the plan to include the pro-drilling language in the budget. Authorizing ANWR through budget reconciliation would allow Republicans to circumvent a filibuster, but could be a risky strategy as two GOP senators have opposed such provisions in the past.

Subject: Senate Energy committee approves ANWR drilling bill
Date: Wednesday, November 15, 2017 12:33:51 PM

By Ben Lefebvre

11/15/2017 12:31 PM EDT

The Senate Energy and Natural Resources Committee today advanced a bill that would open up a section of Arctic Natural Wilderness Refuge to oil and gas drilling.

The 13-10 vote represented a major win for committee Chairman Sen. Lisa Murkowski (R-Alaska), who has advocated opening ANWR to drilling for years. West Virginia Sen. Joe Manchin was the only Democrat to cross over on an otherwise party-line vote.

The bill directs the Interior Department to offer two ANWR leases of at least 400,000 acres each within 10 years of the bill passing. It now goes to the Senate Budget Committee to be included in the wider budget reconciliation package.

Critics have charged that opening ANWR will damage a pristine environment, including an area important for porcupine caribou calving. They also contend that it won't come close to raising the $1 billion over 10 years that Murkowski said it will.

Murkowski disputed those criticisms, saying that the land being offered up for drilling would only be a small sliver of the greater 19.3 million-acre refuge.

The committee added an amendment offered by Sen. Bill Cassidy (R-La.) that would increase the share of money coastal states receive as part of revenue sharing with the federal government and use some funding to rebuild Louisiana's coastal wetlands.

WHAT'S NEXT: The ANWR bill was drafted under budget reconciliation instructions, which would allow it to pass the Senate without overcoming a filibuster. Its fate is tied to the tax bill that Republicans also are planning to pass using reconciliation.

Subject: SMCI This Week | Victories and publicity from coast to coast
Date: Tuesday, September 12, 2017 6:14:38 PM

This weekly update for the ME/CFS community includes media and partnership announcements, upcoming events and national policy victories for ME/CFS nationwide.

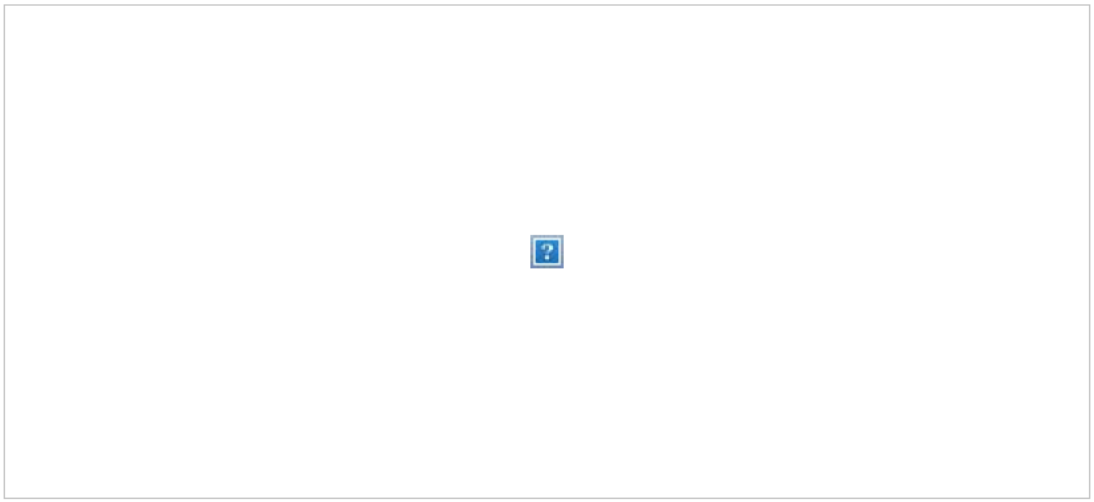
Email not displaying correctly?
View it in your browser.

Did you see ME/CFS on PBS last week?

In 2015, Tom Camenzind appeared to have it all. He was an accomplished sophomore at Stanford University. But one day, things went horribly wrong. His health deteriorated rapidly and the diagnosis was heartbreaking: he had ME/CFS.

Today, Tom cannot speak. He is frozen in time, bedridden and unable to stand light, sound or touch. But if there is one tiny silver lining, it is that the world is about to learn of his plight – shedding light on this disease well beyond our ME/CFS community. Severely ill patients like Tom cannot speak for themselves; we are determined to speak to the world for them.

A national, televised program on Tom's plight aired last week on the show, "The White House Chronicle," with host Llewellyn King. Watch this new, half-hour program includes heartrending interviews with Tom's parents and powerful comments from SMCI President Carol Head.



Pictured above: Longtime ME/CFS Advocate Courtney Miller and SMCI Director of Advocacy and Public Relations Emily Taylor hold a copy of the NV delegation letter

First of its kind! Nevada delegation sends letter to NIH on ME/CFS

On September 8th, Nevada's full Congressional Delegation sent a letter to Director Collins of the National Institutes of Health urging him to "strengthen and accelerate" its work on ME/CFS! The letter was led by Representative Amodei from Reno and signed by Senators Catherine Cortez Masto and Dean Heller, and Representatives Jackie Rosen, Ruben Kihuen and Dina Titus. We are so pleased to have teamed up with Courtney and Bob Miller, Anita Patton and people with ME/CFS across Nevada to bring the very first ME/CFS delegation letter. Thank you to the many residents of Nevada who took action to make this possible. View the complete letter here.

Pictured above: Simmaron Board chairman Jan Armstrong and SMCI Director of Advocacy and Public Relations Emily Taylor

Simmaron Research Institute Hosts Patient Day Research Update

On September 9th, the Simmaron Research Institute (SRI) hosted its annual Patient Day and Research Update in Incline Village, Nevada. The program featured remarks from SRI's partner researchers, clinical care team and staff. Dr. Maureen Hanson of SMCI's Research Advisory Council presented a summary of her recent work including data from the partnership with SMCI and data obtained from an NIH R21 grant. A full summary of the event will be included in next week's e-newsletter Research 1st.

Solve ME/CFS Initiative partners with Jennifer Brea's film "Unrest"

We are pleased to announce that Solve ME/CFS Initiative (SMCI) has joined forces with the *Time for Unrest* impact campaign for the ground-breaking documentary film, Unrest, directed by and featuring Jennifer Brea. SMCI is now an official partner of *Time for Unrest*, a global impact campaign to change the way the world sees, supports, treats, understands, and funds research for ME. The campaign launched with two events in

Washington DC.

Learn more about the *Unrest* screening on September 13th

Ask your member of congress to attend an *Unrest* event

If you're interested in hosting a screening with SMCI, please e-mail Emily Taylor at ETaylor@SolveCFS.org

---

SMCI national tour makes first stop in Minnesota

Minnesota Board members, Steve Curry and Sue Perpich, are hosting two seminal events on ME/CFS in Bloomington, MN. The public is invited to two receptions in Minnesota on September 28th with SMCI President Carol Head and Chief Scientific Officer and Vice President for Research Dr. Zaher Nahle for a discussion about ME/CFS. This event is part of a national tour describing the progress and success of SMCI's programs and research. If you are interested in attending, please contact Diana Sagini at 704-364-0016 ext. 208, or by e-mail at dsagini@solvecfs.org

---

Senate Appropriations Committee recommends restoring ME/CFS funding

On September 7, the ME/CFS community breathed a sigh a relief as the Senate Appropriations Committee passed S. 1711 with accompanying committee report language that recommends restoring the $5.4 million chronic fatigue syndrome program under the CDC's National Center for Emerging and Zoonotic Diseases. In July, the House version of the budget (H.R. 3358) had zeroed out these funds in the House Committee report. Both the House and Senate reports include several recommendations to CDC, NIH, and HHS that were proposed by SMCI, #MEAction, and other advocates during the May ME/CFS Advocacy Week. We are pleased to see this support and growth of interest reflected in the Senate appropriations bills and look forward to continuing to fight for these items to be included after the reconciliation process in the final budget legislation in October.

The work of SMCI is entirely fueled by gifts large and small from people just like you.

Trump Administration Acts to Reduce Dependence on Foreign Critical Minerals and Strengthen National Security

WASHINGTON, D.C. – Today, Congressional Western Caucus Chairman **Paul A. Gosar D.D.S. (AZ-04)**, Vice-Chairman for Policy and Appropriations **Mark Amodei (NV-02)**, Vice-Chairman for Indian Affairs and Oceans **Don Young (AK-At Large)**, Chief Infrastructure and Forestry Officer **Bruce Westerman (AR-04)**, House Committee on Natural Resources Chairman **Rob Bishop (UT-01)** and Western Caucus Members **Mike Johnson (LA-04)**, **Doug Lamborn (CO-05)**, **Doug LaMalfa (CA-01)**, **Adrian Smith (NE-03)**, **Jason Smith (MO-08)**, **Greg Gianforte (MT-At Large)**, **Andy Biggs (AZ-05) and Tom Emmer (MN-06)** issued the following statements following President Donald J. Trump's executive order to break America's dependence on foreign minerals and U.S. Secretary of the Interior Ryan Zinke's secretarial order to begin work on identifying immediate domestic sources for critical minerals:

Chairman Gosar said, "Our reliance on foreign nations of questionable stability and demonstrated hostile intentions towards the United States for critical minerals constitutes a serious security threat. This situation has come about even though the United States could readily procure the vast majority of the 23 minerals identified in the USGS Report domestically and sustainably, were we only to choose to greenlight development of our bounty of mineral resources. At a recent hearing of the Energy and Mineral Resources Subcommittee which I chair, I emphasized the extent to which arbitrary mineral withdrawals and a federal bureaucracy loathe to authorize mineral projects have brought us to this precarious juncture. But there is a way forward. I applaud President Trump and Secretary Zinke for taking action to advance American energy dominance and strengthen our national security."

Congressman Amodei stated, "Having introduced critical minerals legislation that has passed out of the House the last three Congresses in a row – and watching that bill run straight into Senate paralysis – I appreciate the fact that the Administration has taken the

lead on this issue and is moving the ball toward the goal line."

"The unique and resource rich geology in Alaska makes the state an excellent candidate for finding critical minerals," said **Congressman Don Young.** "This strategic decision by President Trump will ensure that the U.S. is more self-sufficient and that our military can operate without risk of losing access to these crucial minerals while helping create jobs and boost both the Alaskan and national economy."

Congressman Westerman stated, "America's dependence on foreign sources of materials for manufacturing has been a concern among leaders in Congress, the executive branch, and industry for many decades. President Trump's action addresses those concerns and puts America on the road to mineral independence. I appreciate the President and Secretary Zinke's leadership in addressing this important security and economic challenge."

"Tapping into our abundant domestic supply of critical minerals is good defense policy that has the added bonus of creating jobs and economic growth. These actions underscore President Trump's commitment to responsibly develop more of our own resources and reverse America's dependency on foreign sources. I look forward to continuing our work with the administration to achieve this shared objective," said **Congressman Rob Bishop.**

Congressman Mike Johnson stated, "The president's decision marks an important turning point in prioritizing our nation's sovereignty and security. America's mineral resources are among our greatest assets and our independence in this area is key to strengthening our national defense. Once again, President Trump and Secretary Zinke have shown real leadership in reducing U.S. dependence on foreign resources."

Congressman Lamborn said, "Today less than half the minerals American manufacturers need come from our own soil. That fosters dependence on foreign aid and poses a significant problem for national security. While serving as Chairman of the Subcommittee on Energy and Mineral Resources for six years, this is an issue I worked on intensively. President Trump's Executive Order changes course for the better. We will no longer rely on foreign competitors for vital minerals needed to keep our country safe. Secretary Zinke's order backs the president's decision by increasing American mineral production. The new administration is putting America first and making American security the top priority. Putting critical mineral control back in the hands of domestic companies ensures a safer, better tomorrow."

"America's reliance on foreign nations for important minerals and resources that our military needs puts our national security in jeopardy. We must make it easier to identify and produce these minerals so that everything our armed forces need can be made right here on our soil. I support the President's decision to issue this Executive Order that will create jobs as well as streamline and safeguard our supply lines," **Congressman LaMalfa** remarked.

Congressman Adrian Smith stated, "New efforts to mine rare earth minerals in places like Elk Creek, Nebraska, demonstrate we are capable of mining and refining these critical inputs for 21st century technology at home. I applaud President Trump and Secretary Zinke for recognizing the need to grow our economy by utilizing resources which already exist within our borders."

"The number one responsibility of your government is to keep you and your loved ones safe. Energy security – knowing we can do everything from building the best equipment for our military to putting gas in our cars and heating our homes – is a major part of that safety and security. But for too long, the government has been dependent on foreign countries supplying us with these critical resources when we have them right here in southeast Missouri. President Trump's action to change this will make us less reliant on countries like Russia and China who don't have our best interests at heart and will secure America's energy independence while bringing jobs back to the United States," said **Congressman Jason Smith**.

Congressman Gianforte stated, "Montana is home to the only platinum and palladium production in North America. Rare earth elements and platinum metals are integral parts of high-tech components, from batteries to computer chips to display screens to engines, that are vital for our economy and national defense. With Russia controlling much of the world's platinum group production and China controlling nearly 80 percent of rare earth production, greater domestic production of these materials would protect us from relying on other nations. Opening a mine in the U.S. is difficult, and this order will improve the process. I applaud the efforts of the president and look forward to making it easier to create high-paying mining jobs in Montana."

"By increasing exploration and production of key minerals in the United States, President Trump has kept his promise to prioritize our national strategic interests. Arizonans will see expanded job growth and trade opportunities. I applaud this administration for protecting our affairs," said **Congressman Biggs**.

"Like so many states across this great nation, Minnesota is fully prepared to step up and help unleash America's full mining potential," concluded **Congressman Emmer** whose MINER Act, which reverses the misguided, last-minute actions of the Obama Administration to stop any exploration of one of the most valuable precious metal deposits in the world, passed the House last month. "This will add jobs and bring economic prosperity; improve national security and decrease our reliance on foreign countries like Russia and China; and enhance the lives of every American. Further, our current environmental regulations ensure that we can secure critical minerals while protecting our nation's big, beautiful landscape. I am glad this administration agrees sound economic, environmental, and security policy can and should coexist. I commend Secretary Zinke and the President for their work to support our miners, streamline the permitting and review process, and enhance our national defense with this important order today."

Secretary Zinke, Senator Heller and Chairman Gosar chat following the SO signing.

Background:

Courtesy of the White House

Yesterday, President Donald J. Trump signed an Executive Order to reverse the decades-long trend of increasing dependence on foreign imports of critical minerals that are essential to American prosperity and national security.

The comprehensive order aims to identify new sources of critical minerals, ensure miners and producers have access to the best data, and streamline the leasing and permitting process to expedite production, reprocessing and recycling of minerals at all levels of the supply chain.

Courtesy of the Department of the Interior:

Today, U.S. Secretary of the Interior Ryan Zinke signed a secretarial order directing the initial steps to producing the first nationwide geological and topographical survey of the United States in modern history. The order also directs Interior bureaus to begin work on identifying immediate domestic sources for critical minerals.

Earlier this week, the Department of the Interior and the U.S. Geological Survey released a report that detailed the extent to which the United States is fully, majorly, or partially dependent upon foreign competitors and even adversaries for our supply of "critical minerals." The report identified 23 of the minerals that are most-needed to sustain our national defense and economy and are used in manufacturing everything from batteries and computer chips to equipment used by our military. The report shows a troubling trend of foreign dependency.

Courtesy of the Western Caucus

On December 12, 2017, the House Committee on Natural Resources Subcommittee on Energy and Mineral Resources held an oversight hearing on the arduous and uncertain regulatory scheme governing domestic mineral development and resulting impacts on America's economic and national security. Panel members discussed America's reliance on foreign minerals and the benefits of increasing domestic production.

Each of the last three Congresses, the House has passed Vice-Chairman Amodei's National Strategic and Critical Minerals Production Act. This legislation sought to address delays in the permitting of American mining projects, which can currently take seven to ten years or longer. This bill required the lead permitting agency to identify a project lead to coordinate with all involved, set and adhere to deadlines, establish clear goals, and track progress. It also streamlined judicial review and litigation.

DOI In The News

Lisa Murkowski, Ryan Zinke Reach Health Care Detente Over Beers.

The Washington Times (8/3, Wolfgang) reports that Interior Secretary Ryan Zinke tweeted a photo of himself drinking Alaskan beer with Sen. Lisa Murkowski in what the Times describes as a "detente" after the two had quarreled over the senator's no vote on Affordable Care Act repeal. Zinke had "reacted by calling Ms. Murkowski and Alaska Sen. Dan Sullivan, a Republican, and threatening to pull the plug on key Alaska projects," and the next day, "Ms. Murkowski delayed committee votes on several high-level nominees for the Interior Department, though committee officials denied that the move was retaliation to Mr. Zinke's threat."

The AP (8/3, Daly) reports that "Zinke invited Murkowski to his home Wednesday night and tweeted the photo of the two smiling over beers to his nearly 50,000 followers on his official Interior Department account." Zinke wrote, "I say dinner, she says brews. My friends know me well."

E&E Publishing (8/3, Northey) reports that "the tweet drew a chuckle from environmental groups and commenters, with Aaron Weiss, a spokesman for the Center for Western Priorities, writing, 'Decided you need your nominees confirmed after all?'" Interior spokeswoman Heather Swift, "who has called reporting of Zinke's phone call 'sensational,'" said the "Twitter photo reflects an ongoing and warm relationship between the secretary and Murkowski." She said, "They talk and meet often in both a professional and friendly capacity."

Coverage by the AP was also picked up by the Helena (MT) Independent Record (8/3, Daly), the Bristol (VA) Herald Courier (8/3, Daly), the Daily Mail (8/3), the Washington (DC) Times (8/3, Daly), Bloomberg News (8/3, Daly), the Minneapolis (MN) Star Tribune (8/3, Daly), Philly (PA) (8/3, Daly), the Washington (DC) Post (8/3, Matthew Daly |, Ap), and the Denver (CO) Post (8/3, Daly).

Additional coverage was provided by CNN International (8/3, Hauck), the Washington (DC) Free Beacon (8/3, Heretik), and the Daily Caller (8/3, Bastasch).

Senate Panel Approves Five Interior, Energy Nominees After Delayed Vote. The Hill (8/3, Cama) reports Senate Energy and Natural Resources Committee on Thursday "approved five of President Trump's nominees for senior roles in the Interior and Energy departments after a delayed vote." The panel "approved Doug Domenech, who led Interior's transition effort for Trump, to be assistant secretary of insular affairs at the department by a 13-8 vote." The article says that "the remaining four nominees were approved by voice vote: Mark Wesley Menezes to be undersecretary at Energy, Paul Dabbar to be undersecretary for science at Energy; Brenda Burman to the Bureau of Reclamation at Interior; and Susan Combs to be assistant secretary of

policy management and budget at Interior."

Additional coverage was provided by the Washington Examiner (8/3, Siciliano).

Interior Watchdog Launches 'Preliminary Investigation' Into Zinke Calls. The Hill (8/3, Henry) reports that the Interior Department's Office of the Inspector General "says it has begun a 'preliminary investigation' into reports that Secretary Ryan Zinke made phone calls pushing Alaska's senators to support a GOP healthcare bill or risk losing federal support for economic development efforts in their state." In a letter to two House Democrats on Thursday, Deputy Inspector General Mary Kendall said, "The OIG is undertaking a preliminary investigation into this matter. We will advise you about what further action the results of this inquiry lead the OIG to take."

Additional coverage was provided by the Washington Examiner (8/3, Siciliano).

President Trump's Strong-arm Tactics Backfire In Senate, Experts Say. USA Today (8/3, Kelly) reports that according to "experts," President Trump's "strong-arm negotiating tactics may have worked against business opponents but they are backfiring with Republican senators, who resent being bullied to vote with the president on health care and other issues and have the political clout to resist him." USA Today quotes Syracuse University political scientist Grant Reeher as saying, "No matter how strong or dominant a personality the president has, he is going to have trouble taking on an American political institution as powerful as the US Senate. Senators have a strong sense of independence and sense of self that says 'I don't get pushed around that way.' And they're pushing back."

Natural Selection? Critics Say Zinke's National Monument Review Resembles A Reality TV Show.

In an analysis, the Washington Times (8/3, Wolfgang) reports that critics of Interior Secretary Ryan Zinke's ongoing review of national monuments say that the review, which has so far spared four monuments and resulted in calls for cuts in the fifth, is "playing out less like a typical government review and more like a season" of reality television. Zinke's decision to forgo "issuing one comprehensive study at the end" of his review of national monuments and instead to announce "winners and losers as he goes" is drawing fire. Zinke's most recent announcement Wednesday that the Upper Missouri River Breaks National Monument should remain unchanged drew criticism from some, who "argue that such an announcement is a wholly inappropriate way of treating the entire process" and who "argue that Mr. Zinke hasn't adequately explained his decision-making process and has left monument backers – including lawmakers, Indian tribes and other stakeholders – in the dark."

Group Seeks Preservation Of National Monument In Arizona. The AP (8/3) reports that "a group led by a member of the House has called for the preservation of Ironwood Forest National Monument in southern Arizona to protect its desert plants and wildlife." The group, "which includes U.S. Rep. Raul Grijalva, five environmentalists, a Tohono O'odham tribal official and aide to Pima County Supervisor Sharon Bronson, credits the monument for creating tourism and job opportunities." Grijalva and "other officials have asked Interior Secretary Ryan Zinke for transparency during the monument review process."

Additional coverage was provided by Arizona Public Media (8/3, O'Gara).

Bernhardt Warns Employees Not To 'Parrot' Special Interests.

Greenwire (8/3) reports that Interior Deputy Secretary David Bernhardt "told department employees this week that he expects respectful and healthy disagreement from them, but also an adherence to facts rather than 'special interests.'" Bernhardt "pledged a commitment to public service and sought to align himself with the career employees he now leads in his first departmentwide email as Interior's No. 2." In an email sent Tuesday to all Interior employees, Bernhardt wrote, "Given the hyperbole of today's public discourse, you and I, and everyone else within the Interior, really are in the soup together. We may not like it. But it is the way it is. This means my conduct will reflect on you. Yours will reflect on me and your other colleagues. All of our conduct reflects on the Secretary."

DOI Doesn't Know How Much Land $815M Got.

The Daily Caller (8/3, Barton) reports that Interior Department officials "have no idea how much land was bought with $815 million, nor if the properties are being used for their intended purpose, a government watchdog reported Wednesday." According to the report, "the department's officials couldn't provide its inspector general (IG) with data about its land purchase programs." The IG "consequently surveyed 108 programs and found that just 16 of those

awarded 701 grants between 2014 and 2015 to purchase $815 million worth of land."

Additional coverage was provided by the Daily Signal (8/3, Barton).

Trump Administration Touts Streamlining Of Mine Permit Review.

The Charleston (WV) Gazette-Mail (8/3, Ward) reports that "in the run-up to President Trump's visit," to West Virginia, Administration officials – "with help from the coal industry and state political leaders – this week touted work" by the Interior Department "to speed up approval of a permit for a new underground coal mine that could bring 200 mining jobs to the depressed coalfields of McDowell County." However, "the scope of what Interior officials did to ease the way for approval of a permit for the Berwind Mine...isn't exactly clear yet."

What Will The Federal Sage Grouse Review Mean In Wyoming?

No One Is Sure. The Casper (WY) Star-Tribune (8/3, Richards) reports that "two months ago, Interior Secretary Ryan Zinke said sage grouse management in the West needed to be reviewed to mirror the administration's vision and give voice to those who felt they'd been left out of the bird's conservation strategy on public lands." The article says that "the deadline for that report is Friday, but whether it will change the federal approach to saving the imperiled bird from extinction is uncertain." It's also "unclear if the Department of the Interior review will be made public immediately, or where the experts' recommendations will drive the federal agency."

The Trump Administration Vs. The Sage Grouse — One More Way To Undermine The Endangered Species Act. In a piece for the Los Angeles Times (8/3, Leslie), Jacques Leslie writes that the review is "a means of chipping away at American environmental law, especially the foundational Endangered Species Act." She concludes that "what the administration, its allies and some congressional Republicans are after, it appears, is not just wider access to sage grouse habitat but an end to habitat — and species — protection itself."

Editorial: Forests Burn As Congress Ponders Funding.

In an editorial, the Albany (OR) Democrat-Herald (8/3) urges Congress "to change the way we pay for firefighting." The paper supports a proposal where "money to battle the largest wildfires would come from a separate disaster account similar to one that's used to battle other natural disasters." According to the editorial, "using a separate account to help cover the costs of fighting the nation's largest fires should help preserve money that's currently earmarked for other programs."

Bureau Of Indian Affairs

Cherokee Nation, BIA Place Ochelata Health Center Land Into Trust.

The Cherokee Nation (OK) (8/3) reports that "a 240-acre tract of land in Ochelata owned by the Cherokee Nation was recently placed into federal trust by the Bureau of Indian Affairs' Eastern Oklahoma Regional office." Principal Chief Bill John Baker and BIA Deputy Regional Director Jessie Durham "signed the deed, transferring the site from fee simple status into trust status."

Halftown Leadership Challenged.

The Finger Lakes (NY) Times (8/3, SHAW) reports that Syracuse attorney Joe Heath is "challenging a July 14 decision by the U.S. Bureau of Indian Affairs that named the Clint Halftown faction as official leaders of the Cayuga Indian Nation." According to the article, "Heath filed a motion Friday with the Interior Board of Indian Appeals in Washington, claiming the decision naming the Halftown faction was invalid because the person making the ruling, Michael Black, was removed as acting assistant secretary of Indian Affairs June 28, prior to issuing his July 14 decision." The filing also "claims the decision by Black should be declared void because of irregularities in Halftown's distribution of voting ballots to Cayuga Nation members regarding support for him as leader."

Bureau Of Land Management

Tipton Introduces Bill Supporting Sage-grouse, Mule Deer Habitat.

The Alamosa (CO) Valley Courier (8/3) reports that Reps. Scott Tipton and Chris Stewart have "introduced the Sage-Grouse and Mule Deer Habitat Conservation and Restoration Act (H.R.

3543), a bill that would streamline the approval process for vegetation management projects to protect or restore the habitat of the sage-grouse and mule deer." The legislation would allow the Bureau of Land Management "to quickly engage in habitat restoration and proactive vegetation management projects to protect the species and improve ecological conditions." Tipton said, "The current vegetation management process isn't allowing Western states to keep up with the rapid growth of invasive species in sagebrush habitat. To combat invasive species effectively, we must streamline the process through which BLM must go to protect and restore threatened habitats and address potential areas of concern. Our bill cuts through the unnecessary red tape that has prevented BLM from acting quickly in the past."

Wild Horse Advocates Encouraged By BLM's Recent Work At Sand Wash Basin.

The Craig (CO) Daily Press (8/3, Ross) reports that "the level of collaboration between the BLM and the Sand Wash Advocate Team stands out as a special case in the thorny problem of how to leave some mustangs on the arid grasslands of the American West while protecting the resource and allowing wildlife grazing." Aleta Wolf, program manager for the Sand Wash Advocate Team or SWAT, "which takes a special interest in working with the BLM to help manage the wild horses that roam the Sand Wash Basin Wild Horse Management Area west of Steamboat Springs in Moffat County, said the slaughter issue is not specifically mentioned on the agenda for Saturday's meeting, but she expects the topic to surface." Courtney Whiteman, BLM spokesperson in Denver, said "on Aug. 2 that Acting BLM Colorado State Director Greg Shoop is very familiar with last fall's plan to remove wild horses from Sand Wash without relying on helicopters, as well as the collaboration between his agency and SWAT."

GAO Won't Reconsider Protest Over BLM Helicopter Contract.

Law360 (8/3, Stanley) reports that the Government Accountability Office has "denied a helicopter company's request to reconsider its bid protest claiming the parameters of a Bureau of Land Management contract are impossible to meet, rejecting the company's argument that FAA statements contradict the GAO's previous decision."

Bureau Of Ocean Energy Management

Feds Set To Release Cape Wind Impact Statement.

The Greenfield (MA) Recorder (8/3, Young) reports that "facing opposition from lawmakers, fishermen, local officials, residents and environmental groups, the long-discussed Cape Wind Energy Project appears poised to secure permission from federal regulators to continue its efforts to build a wind farm in Nantucket Sound." According to hte article, "a project official and project opponents said the federal Bureau of Ocean Energy Management (BOEM) last week released a Final Supplemental Environmental Impact Statement (FSEIS) on the Cape Wind project which keeps the project's lease intact." However, agency spokesman Stephen Boutwell said that an FSEIS on Cape Wind will be published Aug. 4.

Additional coverage was provided by the Cape Cod (MA) Times (8/3, Bragg).

DONG Energy, Dominion Developing Virginia Wind Farm.

Marine Log (8/3) reports that "Dominion Energy Virginia recently signed an agreement and strategic partnership with Denmark's DONG Energy to build two 6 MW turbines about 27 miles off the coast of Virginia Beach in a federally leased site." The two firms are "ironing out details for engineering, procurement and construction." DONG Energy has "begun engineering and development work on what is being called the Coastal Virginia Offshore Wind project, with an expected installation by the end of 2020."

Additional coverage was provided by Workboat (8/3, Moore).

Bureau Of Reclamation

DOI Watchdog Wants Better Tribal Water Project Oversight.

Law360 (8/3, Sieniuc) reports that the Bureau of Reclamation "could save $2.5 billion if it did more to speed up the completion of American Indian tribes' water supply projects in rural areas through better oversight of construction, the U.S. Department of the Interior's Office of Inspector General said in a new report released on Wednesday."

Small New Mexico Communities Struggle To Deliver Clean Water.

The AP (8/2, Moss) reports that hundreds of New Mexico water systems "are small, rural, poorly funded operations serving low-income people." Bill Conner, "president of the New Mexico Rural Water Association, said the systems can't afford to upgrade aging infrastructure and improve water quality on their own, and it can take years for them to get grants, loans or capital outlay funding from the state Legislature." Across the state, water infrastructure needs "are estimated to exceed $1 billion, he said." The article adds that a 2011 study of the Santa Cruz area "by the New Mexico Bureau of Geology and Mineral Resources and Los Alamos National Laboratory, which assessed the area's mining potential for weapons-grade uranium, found some wells in the region had as much as 1,820 ppb of uranium." John Marquez, president of the Santa Cruz Water Association "for the past eight years, has been trying to fix the water problems for years." The "volunteer-based association has followed the state's recommendations, he said. 'So as long as we stay in compliance, we don't get fined.'"

Fish And Wildlife Service

The True Story Of Two Fatal Grizzly Bear Attacks That Changed Our Relationship With Wildlife.

The Washington Post (8/3, Brulliard) reports on how two fatal grizzly bear attacks, which took place in Glacier National Park 50 years ago this summer, "marked a turning point in relations between North Americans and the continent's largest predators, revolutionizing how public agencies deal with bears and inspiring new paths of research on grizzly behavior." According to the article, "the impact of the deaths still echoed in federal officials' recent decision to remove Yellowstone-area grizzlies from the endangered species list." John Waller, Glacier's bear biologist, said, "We've certainly had our share of other types of fatalities, but none of them seemed to live like that particular event does. It was a watershed moment for bear management, not just in Glacier but the whole National Park Service. It fundamentally changed how we view our relationship with bears."

2 Tons Of Seized Ivory Crushed To Protest Illegal Trade.

The AP (8/3, Esch, Frederick) reports that "trinkets, statues and jewelry crafted from the tusks of at least 100 slaughtered elephants were fed Thursday into a rock crusher in Central Park to demonstrate the state's commitment to smashing the illegal ivory trade." State environmental officials and Wildlife Conservation Society members, "who partnered with Tiffany & Co. for the 'Ivory Crush' of nearly 2 tons (1.8 metric tons) of ivory, said no price justifies slaughtering elephants for their tusks." John Calvelli, the Society's executive vice president and director of the 96 Elephants Campaign, said, "By crushing a ton of ivory in the middle of the world's most famous public park, New Yorkers are sending a message to poachers, traffickers and dealers who try to set up shop right here on our streets. We won't stand for the slaughter of elephants. Nobody needs an ivory brooch that badly."

Additional coverage was provided by the Christian Science Monitor (8/3, Esch) and the Washington (DC) Post (8/3).

Weston Mill Dam Will Be Removed Aug. 10.

The Burlingame-Hillsbrough (CA) Patch (8/3, Hubbard) reports that "the Weston Mill Dam in Manville will be removed Aug. 10 to help restore the migratory routes of fish." According to the article, "the dam's removal is part of a larger project undertaken by various agencies to restore migratory fish populations in the Raritan River Basin."

Climate Change And Oil Prices Should Bury Arctic Drilling Forever.

For the "Pundits" blog of The Hill (8/3, Super), David A. Super, a professor of law at Georgetown Law, opposes building a road through the Izembek National Wildlife Refuge and drilling in the Arctic National Wildlife Refuge. Super claims that "arguments about energy independence also make little sense anymore." Moreover, "heedless demands to drill in Arctic Refuge are also tragically anachronistic in light of accelerating climate change."

National Park Service

U.S. National Parks, Led By Utah's Zion, Weigh Limits On Visitors.

Reuters (8/3, Zuckerman) reports that Zion National Par is "considering a first-ever admissions cap in a move supported by conservation advocates and veteran park employees to stem overcrowding at a time of record visitation." Public Employees for Environmental Responsibility, "a watchdog group representing U.S. park rangers, foresters and other land managers, endorsed setting visitation limits for Zion while urging similar restrictions for national parks across the board." In a statement on Thursday, PEER "credited Zion as one of the few national parks seeking to remedy 'crippling overcrowding' but faulted the National Park Service as failing to widely heed a little-known mandate requiring 'carrying capacities' to be established for all 108 of its major park units in the United States."

Additional coverage was provided by the Lake Powell Life (8/3, Hopkins).

National Park Service Will Offer Free Eclipse Glasses, Viewers For Total Solar Eclipse.

The Oak Ridge (TN) Today (8/3, Huotari) reports that the National Park Service will "distribute free eclipse glasses and free eclipse viewers at two viewing sites in Oak Ridge during the total solar eclipse on Monday, August 21." According to the article, "the two viewing sites are: American Museum of Science and Energy/Manhattan Project National Historical Park Visitor Center at 300 South Tulane Avenue in central Oak Ridge, and East Tennessee Technology Park, 200 Heritage Center Boulevard, in west Oak Ridge."

Additional coverage of the eclipse was provided by TIME (8/3, Calfas).

Under The Mushroom Cloud: Will Nagasaki's Story Be Told At Hanford's New National Park?

The Seattle Times (8/3, Bernton) reports that National Park Service officials "want exhibits" at the Manhattan Project National Historical Park" to explore not only the high-stakes push to produce the bombs — dropped Aug. 6, 1945, on Hiroshima and three days later on Nagasaki — but the human costs and historical debate over the decision to unleash them." The article says that the stories of the "the thousands of Nagasaki 'hibakusha' — survivors of the atomic bomb that gained its awesome power from plutonium produced at a reactor at the secret Hanford site outside Richland, Wash." "are a chapter still untold in Richland's saga of wartime patriotism, sacrifice and scientific achievement that unfolded in the sagebrush lands east of the Cascades."

Additional coverage was provided by the Seattle Times (8/3).

How Beaufort County's Revolutionary War History Might Live Again.

The Beaufort (SC) Gazette (8/3, Fastenau) reports that "a National Park Service grant will help better define the area where troops waged the Battle of Port Royal Island." The $85,600 grant from the NPS "will go to the Georgia American Revolution Preservation Alliance to define the battlefield, record what fighting took place and 'assist in all local activities to follow,' a news release said."

Officials: Watch Hill Marina On Fire Island Won't Reopen Until 2018.

Newsday (NY) (8/3, Gralla) reports that "boaters anticipating the reopening of Fire Island's Watch Hill marina later this summer will have to wait a bit longer." The National Park Service announced Thursday that "a $5.4 million project to repair damage inflicted by superstorm Sandy in 2012 now will cost an additional $1.5 million and not be finished until the end of the year." Fire Island National Seashore facility manager Jim Dunphy said in a statement, "With more time, unforeseen and necessary repairs to the substructure can be made so boaters and visitors can safely enjoy Watch Hill in the future."

Pipelines And Protests: Why Environmentalists Oppose Funneling Natural Gas Under The Potomac River.

The Washington Post (8/3, Sullivan) reports environmentalists are concerned that TransCanada's proposed pipeline that would cross under the Potomac River would endanger the water supply for about 6 million people, including most of the Washington-metropolitan area. The pipeline is only about 3.5 miles long and would bring natural gas to the eastern panhandle of West Virginia.

Beach Access And Park Issues.

The Island Free Press (NC) (8/3) reports that the Outer Banks Preservation Association (OBPA), the North Carolina Beach Buggy Association (NCBBA) and the National Park Service (NPS) have unveiled "the first sign of a new campaign aimed at addressing the trash problem on the

beaches." The launch of the "Pack it In, Pack it Out" program on Wednesday "represented months of effort on the parts of both the NPS and the OBPA, and was a symbolic event that linked the two organizations in a collaborative effort." Cape Hatteras National Seashore Superintendent David Hallac said, "This is a symbolic day that represents a culmination [of our partnership] with the Outer Banks Preservation Association. …We're so excited that OBPA is helping us take the next step in the 'Pack it In, Pack it Out' campaign."

Death Valley Set Record For Hottest Month In U.S.

History With Average Temperature Of 107.39 Degrees. USA Today (8/3, Rice) reports that "with an average temperature of 107.39 degrees in July, Death Valley set the record for hottest month at a single location in U.S. history." According to the article, "July's hottest day was the 7th, when Death Valley hit 127 degrees."

Natchez Trace Parkway Employee Receives Prestigious Award.

The Mississippi Business Journal (8/3) reports that "Lana Lollar, Budget Analyst for the Natchez Trace Parkway, recently received the Department of the Interior's prestigious Superior Service Award." Lollar was recognized for "the contributions she made to the Department through her service to the National Park Service's budget program."

Spouse Of Woman Lost In Grand Canyon Says Water Ran Out.

The AP (8/3, Snow, Davenport) reports that "the husband of a Texas doctor said Thursday that she died at the bottom of the Grand Canyon after she ran out of water and grew dizzy from heat exhaustion on a hike with their daughter and a nephew." In a Facebook post, Scott Beadle said that Dr. Sarah Beadle "died Wednesday afternoon while hiking with the two school-aged children who were later found safe." Beadle "said authorities contacted him early Thursday to report the discovery of the body in an area of 100-degree heat and no drinking water."

Officials: Woman Found Dead In US Park Was From China.

The AP (8/3) reports that "authorities say the woman found dead in Yosemite National Park was from China." Park spokesman Scott Gediman "says the woman has been identified as 27-year-old Chaocui Wang of China."

Suspects Identified In GSMNP Hit-and-run Incident.

WVLT-TV Knoxville, TN (8/2, Anderson) reports that "two suspects have been identified by the National Park Service Investigative Services Branch in connection with a hit-and-run incident that hurt a 13-year-old girl in the Great Smoky Mountains National Park on Saturday."

Office Of Insular Affairs

Additional Coverage: Trump Budget Threatens Multiple Programs That USVI Depends On, Plaskett Says.

Additional coverage that Delegate to Congress Stacey Plaskett discussed impacts of the White House's proposed budget on the US Virgin Islands was provided by the Virgin Islands Consortium (VIR) (8/3).

US Geological Survey

Environmental Scientists Gather At UMass To Discuss Climate Change, Invasive Species.

The Amherst (MA) Bulletin (8/3, Christensen) reports that "around 100 experts from academia, conservation organizations and government agencies...gathered July 27 for the first day of the Northeast Climate Science Center's first ever regional invasive species and climate change symposium held at the University of Massachusetts Amherst." The goal of the conference is "to help conservationists and government officials better prepare for future realities." Toni Lyn Morelli, one of the event's organizers and a research ecologist with the Northeast Climate Science Center, said, "We wanted to see how we could bring people together to learn from each other."

Does The Bible Say There's Oil In Israel?T housands Are Paying A Dallas Company To Find Out.

The Dallas Morning News (8/3, Mosier) reports that "with the Bible as its North Star, Zion Oil & Gas has spent more than $150 million of investors' money on a 'special task, in a special country' — Israel." In June, Zion "started drilling its latest well at a location in Israel that some Christians believe will be the site of the eventual battleground of Armageddon." Christopher Schenk, a research geologist for the U.S. Geological Survey, "said the agency found the potential for significant amounts of oil but no guarantees." The USGS report "estimated a range of possibilities with 800 million barrels of oil as an average."

Top National News

Mueller Has Empaneled Grand Jury In Russia Probe.

The news that special counsel Robert Mueller has empaneled a grand jury in his probe into possible links between President Trump's 2016 campaign and Russia led all three broadcast network newscasts and opened a new round of speculation about what it may mean for the President, although several analysts pointed out that such an action is common. At the same time, senators of both parties introduced legislation intended to keep the President from dismissing Mueller.

David Muir opened ABC World News Tonight (8/3, lead story, 2:55) by reporting on "new signs the special prosecutor looking into Russian meddling and any possible collusion with the Trump campaign is now ramping up his investigation." Mueller "is now putting a grand jury to work. Tonight, the key questions: For how long now, and what evidence are they looking at?" ABC's Jonathan Karl: "Tonight, a sign the Russia investigation has entered an entirely new phase. The Wall Street Journal reports special counsel Robert Mueller has empaneled a grand jury... [that] has been secretly working for weeks as Mueller investigates whether President Trump or any of his associates colluded with the Kremlin. The President's personal lawyer insists there's still no indication the President himself is a target." Jay Sekulow: "With respect to the empaneling of the grand jury, we have no reason to believe that the President's under investigation here."

Lester Holt said in opening NBC Nightly News (8/3, lead story, 2:45), "The slow drumbeat of the Russia investigation that has haunted the Trump Administration all summer long is picking up tempo tonight. ... The move opens up broad new running room to an investigation that has apparently now expanded beyond just the question of whether there was coordination between Russia and members of the Trump campaign." Wolf Blitzer reported on CNN's Situation Room (8/3) that Ty Cobb, Trump's personal attorney, issued a statement saying the White House "favors anything that accelerates the conclusion" of the probe, and "is committed to fully cooperating with Mr. Mueller."

In the lead story on the CBS Evening News (8/3, lead story, 1:20), Anthony Mason called it "breaking news late today." But CBS' Jan Crawford was measured, stating, "This is a standard tool that federal prosecutors use, day in and day out, to conduct investigations. It's how they would issue subpoenas and compel the production of documents or testimony, and as special counsel, Mueller had authority to use a grand jury. It was widely assumed that he would, just like special prosecutors have done in the past. It doesn't mean that indictments or charges are imminent. It's just like a vehicle that Mueller and his team will use to carry out this investigation."

CNN's Situation Room (8/3) said Mueller's probe is "focusing in on financial ties between Russia and President Trump, his family, and his company." John Roberts said on Fox News Special Report (8/3) that there are reports the Mueller grand jury has already subpoenaed records from the Trump Tower meeting with Trump Jr., Jared Kushner, Paul Manafort, and Russian lawyer Natalia Veselnitskaya. However, Roberts said he's spoken with "a few people who were involved in the meeting," and "so far, no indication any of them have received subpoenas to appear before a grand jury just yet."

Sekulow said on Fox News' Hannity (8/3), "The mission of the special counsel was...to investigate allegations regarding the Russian government's effort to interfere with the 2016 election, and also if there was any coordination and links between the Russian government and individuals associated with the campaign of the President. ... This idea that they are now investigating real estate deals from what nine or ten years ago? That's not inside the scope of the mandate."

The Wall Street Journal (8/3, A1, Wilber, Tau), which broke the news just before 4:00 p.m., said that it indicates that Mueller's inquiry is likely to continue for months. USA Today (8/3, Jackson, Johnson) reports that the news "appeared to take the Trump team by surprise." The

New York Times (8/3, Apuzzo) reports that several lawyers involved in the case said that Mueller has issued subpoenas from a grand jury, but the Washington Post (8/3, Leonnig, Horwitz, Zapotosky) reports, "A White House adviser said the president and his son-in-law, Jared Kushner, had not received subpoenas, nor had the White House."

Reuters (8/3, Freifeld) reports in an exclusive that grand jury subpoenas "have been issued in connection with the June 2016 meeting between Donald Trump Jr., a Russian lawyer and others." Breitbart (8/3, Mason) reports that Reuters "specified 'two sources' for their claims, indicating those close to the grand jury are breaking the confidence of that body."

Howard Fineman tweeted, "With #Congress gone & #Trump in Bedminster, #DC press hanging around in August have nothing to write about except...#Mueller & his targets." However, Preet Bharara tweeted, "Not sure why all the hyperventilating re: Russia grand jury. Mueller hired 16 prosecutors. Of course there would be GJ. This will take time." Jeffrey Toobin similarly said on CNN's The Lead (8/3), "Just because there's a grand jury does not mean that anyone is going to get indicted. ... It's a very important step, but, I think it is important that we not overstate how important it is and not suggest that this means that criminal charges are inevitable or are even going to happen."

CNN: Trump Concerned By Reported Focus On Financial Dealings. CNN (8/3, Perez, Brown, Prokupecz) reports on its website that Mueller's team has "seized on Trump and his associates' financial ties to Russia as one of the most fertile avenues for moving their probe forward, according to people familiar with the investigation," and that "hasn't gone unnoticed by Trump, who warned Mueller, via an interview with The New York Times, that his financial dealings were a red line that investigators shouldn't cross."

On the CBS Evening News (8/3, story 2, 1:20, Mason), Jeff Pegues said, "We know that this is an investigation that is intensifying, and we know that because the special counsel is adding to his team. He's brought on, most recently, an expert in foreign bribery. And so we know that investigators are trying to follow the money, but also investigate whether there were any improper contacts between the Trump campaign and Russian operatives."

Former CIA Director Leon Panetta said on CNN's Situation Room (8/3), "I can't understand how the President would assume that somehow his finances could be separated from an investigation into this whole Russia issue." Panetta said Mueller will look at the money trail "in terms of whether or not it leads to a possibility of collusion as a result of that or possible blackmail. There are all kinds of ways this is tied to the larger investigation."

Former Watergate special prosecutor Richard Ben-Veniste said on CNN's Situation Room (8/3) said that "financial documents are certainly fair game for the special counsel to determine whether there are motivations that involve the Russians between United States citizens, perhaps campaign officials, perhaps the President himself that explain the relationship."

Laura Ingraham said on Fox News Special Report (8/3), "This is not good news for the Trump legal team. ... This is an investigation that's by all indications going to be sprawling and it's going to reach into aspects of the Trump business empire, his family business interests, way beyond I think what people initially believed would be covered by this."

Bipartisan Senate Legislation Aims To Prevent Trump From Firing Mueller. Reuters (8/3, Zengerle) reports that senators of both parties introduced two pieces of legislation on Thursday that could block Trump from firing Mueller. USA Today (8/3, Estepa) reports that a bill by Sens. Cory Booker and Lindsey Graham "would require a judicial review to remove a special counsel from office," while a bill by Sens. Chris Coons and Thom Tillis "would allow a special counsel to challenge their removal in federal court. A panel of judges would be required to review the challenge within 14 days."

The Washington Post (8/3, Demirjian) reports, "Senators have raised concerns that the president might try to rearrange his administration in order to get rid of Mueller." While Trump cannot fire Mueller directly, "many have raised concerns in recent weeks that he might seek to replace" Attorney General Sessions with an attorney general who would do so.

Sen. Richard Blumenthal tweeted, "Make no mistake – Special Counsel Mueller's investigation will continue and conclude fairly and fully." Sen. Sheldon Whitehouse tweeted, "Now more than ever, it is important that we protect Special Counsel Mueller so that he can follow the facts wherever they may lead."

The Los Angeles Times (8/3, Savage) reports that rules put in place two decades ago "to ensure the independence" of probes by special prosecutors "may be about to face their first real test." MSNBC's Joy Reid tweeted, "Trump has been told in no uncertain terms he can't fire Mueller. Congressional Republicans would shed their obedience if he did." David Ignatius tweeted, "Bravo to senators 'thinking about the unthinkable.'" The Washington Times (8/3, Dinan) and

Politico (8/3, Samuelsohn) also have reports.

Vox: 10 Or More "Senior Law Enforcement Officials" May Be Questioned. Vox (8/3, Waas) reports that "as many as 10, and possibly more, of the nation's most senior law enforcement officials are likely to be questioned as part of the investigation." One "senior law enforcement official" said, "What you are going to have is the potential for a powerful obstruction case. You are going to have the [former] FBI director testify, and then the acting director, the chief of staff to the FBI director, the FBI's general counsel, and then others, one right after another. This has never been the word of Trump against what [James Comey] has had to say. This is more like the Federal Bureau of Investigation versus Donald Trump."

Flynn Files Amended Financial Disclosure. The Washington Post (8/3, Hamburger, Gold) reports that former National Security Adviser Michael Flynn "filed an amended federal financial disclosure report late Thursday providing new details about his contracts with the Trump presidential transition, a company connected to an Iranian American businessman, and the parent company of a data science firm that worked for the Trump campaign."

Russian Bank Hired Trump Attorney Kasowitz. The New York Times (8/2, Kramer) reports that Russian state bank Sberbank hired defense attorney Marc Kasowitz in a New York lawsuit, in part because he has been a personal attorney for the President. The lawsuit "appears unrelated" to the Russia probe.

DHS: 33 States, 36 Localities Sought Assistance With Election Systems Last Year. The Washington Times (8/3, Blake) reports that a DHS document shows that "a total of 33 states and 36 local governments" asked the department "to assess their election systems for vulnerabilities during last year's White House race, and a handful of others have requested federal assistance in the months since President Trump entered office."

DeSantis Seeks DOJ Probe Of Ex-Wasserman Schultz Aide. Politico (8/3, Ducassi, Caputo) reports that Rep. Ron DeSantis (R-FL) has called on the Justice Department "to take a deeper look at the finances" of Imran Awan, a former staffer for Rep. Debbie Wasserman Schultz (D-FL). Awan "is accused of attempting to defraud the Congressional Federal Credit Union by obtaining a $165,000 home equity loan for a rental property, which is against the credit union's policies since it is not the owner's primary residence." USA Today (8/3, Ventura) reports that Wasserman Schultz said Thursday that "she 'did the right thing' by not immediately firing" Awan.

WPost: Allegations That White House Had Role In Seth Rich Story Cannot Be Discounted. Citing allegations that the White House collaborated with Fox News Channel and "a wealthy supporter" of the President "to create a story," which has since been discredited, that murdered Democratic National Committee aide Seth Rich "had leaked Democratic Party emails and was killed by operatives working on behalf of Hillary Clinton," the Washington Post (8/3) says in an editorial that it is "sad that the White House track record for honesty is such that allegations that should be preposterous can't easily be dismissed."

Trump Decries Russia Probe Before Upbeat West Virginia Crowd.

President Trump's Thursday night rally in Huntington, West Virginia receives positive coverage from in-state media, while coverage from national outlets is limited and more neutral. Coverage tends to lead with Trump's comments on the Russia inquiry, while Gov. Jim Justice's announcement at the event that he is switching from the Democratic Party to the GOP is a major sub-story.

The AP (8/3, Superville) reports that "at a boisterous campaign rally in Trump-friendly West Virginia," the President said that he "hopes for a 'truly honest' outcome from the Russia investigation...and he challenged Democrats to either continue their 'obsession with a hoax' or begin serving the interests of the American people." The President "slammed the investigation as a 'fake story that is demeaning to all of us and most of all demeaning to our country and demeaning to our Constitution.'"

The Charleston (WV) Gazette-Mail (8/3, Zuckerman) reports, "If reports of the assembling of a grand jury" in the Russia inquiry "rattled" the President, "he didn't let it show" before the "raucous crowd. ... Although news broke of the jury's formation mere hours before the rally, Trump doubled down on his narrative that the allegations are just much ado about nothing." Trump said, "There were no Russians in our campaign, there never were. We didn't win because of Russia, we won because of you."

The Los Angeles Times (8/3, Bierman) reports that the President "prompted an overflow crowd of supporters...to chant 'Lock her up!' and then paused to encourage their taunts at Hillary Clinton." He said, "What the prosecutors should be looking at are Hillary Clinton's 33,000 deleted emails." WVNS-TV Bluefield, WV (8/3, 10:23 p.m. EDT) reported, In "a speech that touched on

jobs, healthcare and immigration, the President also lashed out again at the investigation into potential coordination between his campaign and Russia." Business Insider (8/3, Logan) headlines a report "Trump Trolls In West Virginia: 'Are There Any Russians Here Tonight, Any Russians?'"

Both the Huntington (WV) Herald-Dispatch (8/3, Stuck) and the Clarksburg (WV) Exponent-Telegram (8/3, Ali) say in headlines that Trump "energize[d]" the crowd. The Herald-Dispatch reports that Trump was "making good on a promise he made on his campaign trail" to visit the state, where he took 69 percent of the vote last year to Clinton's 27 percent. The President "said coal exports were up 60 percent, and oil, steel and manufacturing jobs were on their way back as well." The Exponent-Telegram reports that the crowd "didn't need much fuel to fire it up." Trump told them, "I am thrilled to be back in the very, very beautiful state of West Virginia. I am proud to stand before you and celebrate the hard-working people who are the absolute backbone of America, thank you." The New York Times (8/3, Martin, Shear) reports that Trump "bragg[ed] about keeping his promises on immigration, the economy, the environment and crime" in his remarks.

WOVA-TV - Pakersburg, WV (8/3, 10:08 p.m. EDT) reported that Trump "was in friendly company tonight visiting the Mountain State that he won easily last November." WSAZ-TV Huntington, WV (8/3, 11:23 p.m. ET) reported, "For the second time in as many weeks, President Donald Trump has come to West Virginia touting his agenda and his message of making America great again."

The President tweeted early Friday, "Thank you West Virginia! All across the country, Americans of every kind are coming together w/one simple goal: to MAKE AMERICA GREAT AGAIN!" Eric Trump tweeted after the event, "So great being with @realDonaldTrump in the great state of #WestVirginia!!! #MAGA".

CNN (8/3, Merica) reports that the President "has already declared his intent to run again in 2020, and his reelection campaign is already up and running, including raising money and hosting events across the country. To date, the President has headlined campaign rallies in Florida, Tennessee, Kentucky, Pennsylvania, Iowa and Ohio." In a Washington Post (8/3) column headlined "Trump Is Delusional About His Popularity," Eugene Robinson writes, "Let's assume, for the sake of argument, that Trump has a solid base of about 35 percent of voters who will stick with him no matter what. ... How long will Trump's base stay with him? I don't know, but clearly he's worried." Trump "makes laughable claims about having accomplished more than any other president in his first months because he knows his support will slowly leak away if he fails at his central promise, which is to get stuff done. Thus far he has been a failure."

Stuart Rothenberg tweeted, "Donald Trump has love for West Virginia in his heart. Ha. At the Greenbrier maybe."

West Virginia Governor Announces Switch To GOP At Trump Rally. The CBS Evening News (8/3, story 5, 0:15, Mason) reported in a brief item, "The President is promising a big announcement at a rally this evening in West Virginia. Spoiler alert: The news is the governor of West Virginia is switching parties. Democrat Jim Justice is becoming a Republican." The AP (8/3) reports that Justice made his announcement as Trump "visited the increasingly conservative state. ... Justice says Trump is his friend, a good man with real ideas who cares about West Virginians." The Washington Post (8/3, Phillip) reports that Justice "praised Trump as a 'great president.' He also touted his relationships with Trump's children, including Eric Trump and Donald Trump Jr., both of whom he said he has gotten to know personally."

Politico (8/3, Lima) reports, "Justice's rightward turn is far from a surprise." The Charleston (WV) Gazette-Mail (8/3, Kabler) reports that before he ran for governor last year, "Justice had been a registered Republican and also a political independent. Still, many of West Virginia's Democratic leaders embraced his run."

The Clarksburg (WV) Exponent-Telegram (8/3, Ali) reports that reactions were mixed. Melody Potter, a Republican National Committee member from West Virginia, said the party "welcomes anyone who shares in the party's conservative values, but she questioned whether Justice fit the bill," while "the right-leaning advocacy group Americans for Prosperity West Virginia organization issued a statement calling Justice's announcement 'political theater,'" slamming Justice for proposing what it called "the largest tax increase in West Virginia's history earlier this year." The Washington Examiner (8/3, Trunko) reports that the state GOP "attacked" Justice in a tweet "mere hours before it was reported that Justice would switch to the Republican Party."

The Wheeling (WV) Intelligencer (8/3) reports that Justice's move "is another blow for Democrats in a state they once ran without opposition," and The Hill (8/3, Greenwood) reported that Justice's "party switch is a blow for the Democratic Governors Association, which spent more than $1 million in an effort to get him elected last year, while the Republican Governors

Association spent $3.7 million backing his GOP rival." Writing in "The Fix" on the website of the Washington Post (8/3, Phillips), Amber Phillips said that Justice's move "underscores just how fragile Democrats' hold on power is. With one politician's decision to switch parties, Democrats now hold a record-low number of governorships – and Republicans hold a record high." The Washington Times (8/3, Miller) reports that Justice's "defection will leave Democrats with just 15 governors."

Administration Officials Tout Progress On Coal Mine. The Charleston (WV) Gazette-Mail (8/3, Ward) reports that "in the run-up to President Trump's visit," Administration officials – "with help from the coal industry and state political leaders – this week touted work" by the Interior Department "to speed up approval of a permit for a new underground coal mine that could bring 200 mining jobs to the depressed coalfields of McDowell County." However, "the scope of what Interior officials did to ease the way for approval of a permit for the Berwind Mine...isn't exactly clear yet."

Pence: Healthcare "Ain't Over By A Long Shot."

The Washington Examiner (8/3, O'Brien) report that in a speech to the Tennessee GOP 2017 Statesmen's Dinner Thursday, Vice President Pence said that healthcare reform "ain't over by a long shot." According to a press pool report, Pence, who "remains optimistic the GOP can revisit the issue before the end of the year," told the dinner, "This ain't over by a long shot...we won't rest until we end the Obamacare nightmare once and for all. ... We're going to keep fighting until Congress sends a bill to his desk to repeal and replace Obamacare."

Mulvaney: US "Will Never Default On Its Debt."

In a letter to the editor of the Washington Post (8/3), OMB Director Mulvaney, responding to columnist Catherine Rampell's dubbing him "the most dangerous man in Washington," writes, "If being the 'most dangerous' means helping President Trump draft a taxpayer-first budget, fighting for the millions of people who justifiably believe Washington has forgotten them, or advocating for smarter, more effective and more accountable government, then I plead guilty." But he adds, "Let me be clear regarding the debt ceiling: The debt ceiling should be raised. It should be raised sooner, not later. The United States will never default on its debt."

Gramm, Solon: Tax Cuts, Deregulation Could Restore Reagan-Era Growth Rates.

In an op-ed for the Wall Street Journal (8/3), ex-Sen. Phil Gramm, a visiting scholar at the American Enterprise Institute, and Michael Solon, a partner of US Policy Metrics, write that former President Reagan's tax cuts set the stage for 25 years of noninflationary economic growth which waned amid tax increases and greater regulation under former President Barack Obama. Noting that the tax-reform package put forward by Republicans combine deregulation with the 1981 tax cuts and the 1986 tax reform, they argue that the evidence indicates that reversing the Obama-era policies it could restore Reagan-era growth rates.

EPA 'Walks Back' Enforcement Delay Of Obama Ozone Rule.

The Hill (8/2, Cama) reports that "the Trump administration is reversing course on its plan to delay by one year enforcement of the Obama administration's ozone pollution regulation." The delay, announced yesterday, "came a day after 15 states and the District of Columbia sued the Environmental Protection Agency (EPA), saying the delay exceeded the agency's authority under the Clean Air Act," the Hill writes. In a statement on the decision, the article adds, "the EPA emphasized that it will continue to work with states on implementing the ozone rule, which could include more targeted enforcement delays." It quotes EPA Administrator Scott Pruitt saying, "We believe in dialogue with, and being responsive to, our state partners. Today's action reinforces our commitment to working with the states through the complex designation process."

The New York Times (8/3, Friedman) also quotes Pruitt as saying, "Under previous administrations, E.P.A. would often fail to meet designation deadlines, and then wait to be sued by activist groups and others." He says the Trump administration "do[es] not believe in regulation through litigation, and we take deadlines seriously. We also take the statute and the authority it gives us seriously." Reuters (8/3, Valdmanis) and Washington Post (8/3, Fears)also provide coverage.

The Washington Examiner (8/3, Siciliano) reports that the reversal has prompted Democratic attorneys general "to claim victory after suing the agency the night before."

Pruitt Praises Progress On Air Quality Amid Regulatory Rollback. The AP (8/2, Biesecker) reports that EPA Administrator Scott Pruitt "praised significant improvements in the nation's air

quality, even as he moves to roll back regulations aimed at making further gains." The article states that "an EPA report released Wednesday shows that in the 45 years since passage of the Clean Air Act, emissions of six harmful pollutants declined by a combined 73 percent even as U.S. economic output tripled." The AP quotes Pruitt saying, "Despite this success, there is more work to be done. Nearly 40 percent of Americans are still living in areas classified as 'non-attainment' for failing to achieve national standards. EPA will continue to work with states, tribes, and local air agencies to help more areas of the country come into compliance."

NYTimes Analysis: Trump "Cherry-Picks Facts" About The Environment.

A New York Times (8/3, Schwartz, Bennett) reports that many things President Trump "says about coal, climate change and the environment bear a strained relationship with the truth." According to the Times, Trump "often cherry-picks facts that prove to be exaggerations when the broader context is considered," and "he is more likely to repeat than to retract." The Times analysis goes on to highlight what it says are "five of Mr. Trump's most prominent climate and environmental claims as president."

Editorial Wrap-Up

New York Times.

"An Ally Is Set To Execute Critics. Will Mr. Trump Be Silent?" A New York Times (8/3) editorial calls on President Trump to "take advantage of his new friendship with the Saudis and make an immediate appeal to King Salman to halt" the "horrific executions" of 14 Saudi men for allegedly staging political protests.

"Ready To Talk To Korea Or Not?" A New York Times (8/3) editorial says Secretary of State Tillerson's assertion this week that the Administration "is not seeking regime change in the North," but instead a "productive dialogue" represented "a sharp departure from the threats and harsh language that have dominated President Trump's approach." However, the Times cautions that "we have to keep reminding ourselves, is the Trump administration, and it wasn't long before any confidence that Mr. Tillerson was speaking for the president...was called into doubt" by Vice President Pence, who "rejected the idea of talks with the North Koreans." The Times laments that "right now, there is a stalemate, set by years of broken promises and mistrust. Mixed messages from the Trump administration will only make it more difficult to move beyond it."

Washington Post.

"How To Reverse A Catastrophe." A Washington Post (8/3) editorial calls the recommendations from President Trump's Commission on Drug Addiction and the Opioid Crisis "generally worthy," but adds that while the commission urged the President "to declare a national emergency under one of two federal statutes," it "should be possible to act as if there's a national emergency without actually declaring one." Trump and lawmakers, the Post argues, "have spent the bulk of 2017 so far debating how much to cut Medicaid, which happens to pay for about a quarter of all addiction treatment." Such cuts "amid an opioid epidemic makes no sense," the opines, adding, "Perhaps in its final report, the commission will find a way to send that message to Mr. Trump."

"Duterte's Lawless Regime Claims More Victims." In an editorial, the Washington Post (8/3) writes that the "regime" of Philippine President Rodrigo Duterte and his ongoing "drug war" has "claimed the lives of more than 7,000 Filipinos" – a campaign of "extrajudicial executions" and "vigilante killings" that receives support from and is prosecuted by top levels of the Duterte government. The Post concludes that Secretary of State Tillerson should tell Duterte during his upcoming visit to Manila that the US Congress is prepared "to restrict the supply of defense equipment to the Philippine National Police, the force that is leading the drug war," as provided for in legislation introduced by Sens. Ben Cardin and Marco Rubio.

"The White House Is Drawn Into A Conspiracy Theory." Citing allegations that the White House collaborated with Fox News Channel and "a wealthy supporter" of the President "to create a story," which has since been discredited, that murdered Democratic National Committee aide Seth Rich "had leaked Democratic Party emails and was killed by operatives working on behalf of Hillary Clinton," the Washington Post (8/3) says in an editorial that it is "sad that the White House track record for honesty is such that allegations that should be preposterous can't easily be dismissed."

Wall Street Journal.

"Trump's Afghan Choice." In an editorial, the Wall Street Journal (8/3) argues that President Trump will commit a serious foreign policy error if he overrides the advice of generals advising him to deploy 3,000 to 5,000 additional US soldiers to Afghanistan and to add other assets including greater air power as part of the Pentagon's new strategy for the country. The Journal concludes that Presidents cannot avoid national commitments without consequences, and that withdrawing from Afghanistan or overriding his generals advice would amount to a return to the same foreign policy problems of the Obama Administration.

"China's Dissident Chatbots." A Wall Street Journal (8/3) editorial says online postings that are able to escape the filter of China's Internet censorship suggest that resentment of the country's rulers is high.

"'Fat, Dumb, And Happy' At The UAW." In an editorial, the Wall Street Journal (8/3) discusses an indictment that alleges United Automobile Workers Vice President General Holiefield, who passed away in 2015, colluded with an official at Fiat Chrysler, Alphons Iacobelli and other alleged conspirators to skim millions of dollars from the UAW National Training Center, a tax-exempt entity funded by Fiat Chrysler that was created to help provide job training to union automotive workers. The Journal adds that with Nissan workers in Mississippi poised to vote today on whether to join the UAW, those employees should think long and hard – in the wake of the indictment – about whether this is the type of organization they want to pay dues to.

Last Laughs

Late Night Political Humor.

Jimmy Kimmel: "President Trump is about to go on vacation. I don't know if you know. He's off for two blissful weeks on the island of covfefe."

Jimmy Kimmel: "He's going to his Trump golf resort in New Jersey. Some people are angry he's taking vacation for two weeks. I think it is a good thing. I mean, we'll still have a country for two more weeks."

Jimmy Kimmel: "Earlier today, [Trump] teased that he would be making a big announcement. He doesn't just make an announcement. First he announces he's going to make an announcement, then the announcement gets announced."

Jimmy Kimmel: "[West Virginia Gov. Jim Justice] has a lot in common with the President. They're

both former Democrats who switched parties because they love Donald Trump."

Jimmy Kimmel: [Referencing speculation about Rick Perry being appointed to DHS] "I have a general rule of thumb which is, if you've ever been eliminated from 'Dancing with the Stars,' you should be eliminated from running the Department of Homeland Security."

Jimmy Kimmel: "[Scaramucci] sent CNN a memo. The first item on his to-do list was to meet with the chief of staff, John Kelly, which he did, and at that meeting, Kelly fired him. So maybe he shouldn't have done that first."

Jimmy Kimmel: "[Scaramucci] wanted to improve relations with the press, and part of his plan was to have a complaint box for members of the media to air their grievances. Is this the White House or a Cracker Barrel?"

Jimmy Kimmel: "Scaramucci also wanted to take steps to humanize Donald Trump. I don't know about that. If anything, Donald Trump is too human. No one is like, 'The President is so guarded. I wish we could get to know the real Donald Trump.'"

Stephen Colbert: "Robert Mueller has empaneled a grand jury in his investigation of Russia and the Trump campaign! I'm going to say something nobody has ever said before: God, I wish I had jury duty!"

Stephen Colbert: [Referencing Mueller's grand jury] "But really, how are they ever going to find unbiased people to serve on this jury? 'Ma'am, have you ever heard of man by the name of Donald Trump?' 'No, father never mentioned him in our cave-dwelling cult.'"

Stephen Colbert: [Referencing Mueller's grand jury] "So it doesn't mean there's going to be a trial, but there is a strong indication something's going to happen. It's like picking up a blind date and the first thing they say is, 'Hey, I need some condoms. Could we swing by the store?'"

Trevor Noah: [Referencing Mueller's grand jury] "Oh, man! Today must suck for Donald Trump. I just hope if the police ever arrest him, they protect his head when they put him into the car."

Jimmy Fallon: "I read that Trump is trying to impress his new chief of staff, John Kelly, by listing a lot of facts during meetings. They're all Snapple facts, but still."

Jimmy Fallon: "I saw that the President is about to go off on a 17-day vacation. Trump said he could use a little R and R – you know, ranting and re-tweeting."

Jimmy Fallon: "People are speculating that Mark Zuckerberg could run for president in 2020 because he just hired Hillary Clinton's chief campaign strategist. He came highly recommended by everyone, except Hillary Clinton."

Seth Meyers: "According to the Associated Press, President Trump will take a 17-day vacation starting tomorrow at his golf club in New Jersey. Seventeen days in New Jersey doesn't sound like a vacation; it sounds like an episode of 'Survived.'"

Seth Meyers: "According to Politico, former press secretary Sean Spicer, who tendered his resignation last month, gave his family a tour of the White House earlier this week. He even showed them all his favorite hiding spots."

DOI In The News

Republicans Making Progress On Longtime Goal For More Local Control Of Federal Lands.

USA Today (8/10, Sullivan) reports that nearly "eight months into an all-Republican-led effort, it's clear that shift is under way" in the way "the more than 25% of the country that is owned by the federal government is managed." USA Today describes Interior Secretary Ryan Zinke's "views on the evolving Republican House public lands strategy" as "complicated," saying he "says he wants to be a good steward and opposes turning over federal land to local or state governments or private interests." Although "raising revenue from public lands seems in tune with the goals of House Republicans such as Natural Resources Chairman Rob Bishop of Utah, Zinke is not entirely on board with all their agenda." Zinke, USA Today adds, "is steeped in the history of his department but also devoted to the mission to make the country's natural resources pay."

Voters Don't Trust Zinke To Decide On National Monuments. Morning Consult (8/10, Gheorghiu) reports that "a recent Morning Consult/POLITICO poll showed voters don't trust Interior Secretary Ryan Zinke and President Donald Trump to make decisions" on national monuments. The article says that "multiple local groups and representatives have opposed the review" of national monuments and "called the process arbitrary and lacking in transparency, saying it would negatively impact their tourist economies." According to the article, "when it comes to public lands, voters across the country – including Americans in Western states that contain most of the monuments under review – place more trust in state residents and local leaders." Heather Swift, Interior Department spokeswoman, said in an email on Thursday, "The poll shows exactly what the Trump Administration has argued all along: local stakeholders should have more of a say in how federal lands in their communities are managed."

27 National Monuments Are Under Review. Here Are Five To Watch. The New York Times (8/11, FRIEDMAN, POPOVICH, McCANN) reports that Interior Secretary Ryan Zinke is "reviewing 27 national monuments to determine if previous administrations exceeded their authority in setting aside craggy vistas, ancient cliff dwellings and other large tracts of land for protection." However, "not all of the monuments are truly in the administration's cross hairs, and Mr. Zinke has already declared some of them safe from changes." The article highlights five monuments to watch: Grand Staircase-Escalante, Bears Ears, Organ Mountains-Desert Peaks, Katahdin Woods and Waters, and Papahanaumokuakea.

DOI Spent Thousands On Personal Travel.

The Daily Caller (8/10, Pearce) reports that Interior Department employees "spent nearly $40,000 in 2015 and 2016 on inappropriate travel costs," according to an independent audit. The

report "faulted the agency's controls, saying they 'weren't effective in ensuring that all non-payroll costs were appropriate and complied with the Act's administrative requirements.'" The audit focused on the Interior Department's implementation of the Wildlife and Sport Fish Restoration Programs Improvement Act.

Western Values Project Drills Into David Bernhardt At Interior.

The Denver Westword (8/10, Stringer) reports that Interior Secretary Ryan Zinke has "come under fire for stacking his department, which is charged with balancing development and conservation on federal land, with staffers that have ties to the oil and gas industry – including Zinke's deputy, David Bernhardt." The Western Values Project, "a conservation group, is digging deep to track the potential conflicts of interest in Zinke's department while exploring their potential effects on fossil-fuel drilling in Colorado." WVP head Chris Saeger is raising concerns about "a department headed by former lobbyists, industry advocates and corporate boardmembers that is prioritizing fossil-fuel development at the cost of conservation, the public and the outdoor industry."

Bureau Of Indian Affairs

Complaint Filed In Federal Court In Washington D.C. Against U.S. Dept. Of Interior Over Proposed Elk Grove Casino.

Elk Grove News (CA) (8/10) reports that an amended complaint has been filed "in U.S. District Court in Washington D.C. by Stand Up For California (SUFC) against the U.S. Department of the Interior challenging recent decisions that have helped the Wilton Rancheria's pursuit of a $400 million casino to be located in Elk Grove City limits." The complaint, "which was filed on behalf of casino watchdog group SUFC and three Elk Grove residents, continues to challenge the validity of the decision to place the 36-acre parcel located at the site of the unfinished Outlets Collection at Elk Grove shopping center into federal trust. Placement of the parcel into federal trust is required for any Indian casino on non-tribal land." At the center of the argument is "that the decision was made in violation of 1998 Federal Vacancies Reform Act. SUFC contends the decision made by Principal Deputy Assistant Secretary of Indian Affairs, Lawrence Roberts, lacked the authority under the Vacancies Reform Act (VRA)."

Casino Is Win For Elk Grove, Wilton Rancheria Tribe. In an op-ed for the Sacramento (CA) Bee (8/10, Cooper), California State Assemblyman Jim Cooper supports the tribe's plans to build a resort and casino. He has introduced Assembly Bill 1606, which will ratify a tribal gaming compact by the Legislature

Bureau Of Land Management

Judge Scolds Defendant, Orders Him Off Stand.

The Arizona Republic (8/10, Anglen) reports that "a Las Vegas courtroom erupted in drama Thursday when a federal judge ordered a defendant in the Bundy Ranch standoff trial to get off the stand, struck his testimony, dismissed jurors and abruptly left the bench." According to the article, "jurors looked stunned as Eric Parker returned to the defense table with his head hung and then buried his face in his hands, according to lawyers in the case."

The Las Vegas Review-Journal (8/10, Ferrara) reports that Eric Parker was "photographed in April 2014 pointing a long gun through a barrier on an Interstate 15 overpass that overlooked a sandy ditch where protesters had gathered to face Bureau of Land Management agents." The article says that "before the start of the second trial for Parker, a married father of two, and three other men, U.S. District Judge Gloria Navarro barred the defense from referencing constitutional rights to freely assemble and to bear arms." Navarro "also prohibited mention of alleged misconduct or excessive force by law enforcement."

BLM Expects Large Rangeland Seed Buy.

The Salem (OR) Capital Press (8/10, O'Connell) reports that "Ken Koompin has found raising grass seed for dryland range is risky and challenging, and the market for the niche crop is exceedingly volatile." However, "officials with the Bureau of Land Management — a major buyer that uses large quantities of locally adapted seed varieties for its reclamation efforts — say their seed inventories are running low amid a bad wildfire season." BLM officials will "solicit bids from

seed suppliers on Aug. 14 to replenish inventories at their two major seed warehouses, located in Boise and Ely, Nev."

Reward Offered As Cattle Killers Strike Again In Eddy County.

The Carlsbad (NM) Current-Argus (8/10, Hedden) reports that "a $21,000 reward was announced Wednesday by the Eddy County Sheriff's Office" as "reports of cattle being shot on local ranches increase." The article notes that "People for the Ethical Treatment of Animals (PETA) donated $10,000, with the Bureau of Land Management and the New Mexico Cattle Growers Association kicking in $5,000 each." CrimeStoppers of Eddy County "offered the additional $1,000."

America's Mustangs: Let's Have Facts, Not "Fake News".

In a piece for the Huffington Post (8/10, Roy), Suzanne Roy, Executive Director of the American Wild Horse Preservation Campaign, criticizes proposals "to 'solve' our nation's wild horse management issue with radical, long-abandoned ideas, such as killing thousands of animals or shipping them to foreign slaughterhouses." Roy says "it's time for stakeholders to come to the table to implement win-win solutions." She supports "pursuing public/private partnerships to implement fertility control," "applying real science to re-evaluate BLM's arbitrary population limits," "compensating ranchers for reduced use of public grazing allotments in herd management areas, which is far cheaper than rounding up, removing and stockpiling wild horses," and "reducing costs by moving horses from holding pens to holding pastures that cost almost three times less, and returning captured mustangs to public lands where they can live out their lives in non-breeding wild herds requiring no taxpayer money for feed."

Bureau Of Ocean Energy Management

Opponents Press Governor To Comment On Lease Plan.

The Coastal Observer (SC) (8/10, Best) reports that "opponents of oil and gas drilling off the South Carolina coast are making a push for public comments before next week's deadline on a new federal leasing plan." According to the article, "more than 100 residents came to the Waccamaw Library this week to hear a presentation from Stop Offshore Drilling in the Atlantic (SODA)."

South Strand News (SC) (8/11, Stairs) reports that Peg Howell, "a Pawleys Island resident and former oil drilling engineer," told residents that "there are thousands of reasons to oppose offshore drilling for oil and natural gas in the Atlantic Ocean, but three key reasons are: it is bad for the coastal economy, it is not needed to make America energy independent and it is a forever decision that will harm the natural environment far into the future." Howell said at the forum, "The most important thing you can do right now is to get a comment in during BOEM's comment period. It is also important to let our elected officials know that you oppose offshore drilling and seismic testing for oil and to urge them to submit a comment, too."

Meet The Man Who Wants To Bring Offshore Oil And Gas Exploration To North Carolina.

The Wilmington (NC) Port City Daily (8/10, Mannion) reports that "as the debate over offshore drilling in the Atlantic Ocean continues, the organization that wants to bring the oil and natural gas industry to North Carolina is urging people not to rush to judgement on what its local representative said is a safe outlet to secure the country's future energy." While the North Carolina Petroleum Council "eventually hopes to open the opportunity for offshore drilling and refining of oil and natural gas in the Atlantic Ocean," Executive Director David "said that is at least eight to 10 years away." He said that "concerned residents...need to use that time to become informed on the subject at hand."

Oil Companies Position For Emerging Offshore Wind Sector.

Offshore Magazine (8/10) reports oil and gas companies are looking to take advantage of potential growth in US offshore wind projects. Statoil is looking to leverage its experience in offshore oil and gas operations to advance its New Energy Solutions standalone unit, which will focus on offshore wind, solar and energy storage. DONG sold off its offshore oil and gas assets over the past 10 years to focus almost exclusively on wind power. The company now holds the greatest market share of global installed offshore wind capacity.

E&E Publishing (8/10, Klump) also provided coverage.

Bureau Of Reclamation

Southern Californian Could See A Water Rate Hike To Pay For Brown's Tunnels.

The Sacramento (CA) Bee (8/10, Sabalow) reports that "more than 6 million Southern Californian households could pay $3 more a month to help cover the costs of Gov. Jerry Brown's controversial plan to bore two huge tunnels under the Sacramento-San Joaquin Delta." However, "that's cheaper than the $5 a month that households in the Metropolitan Water District of Southern California's service area were expected to pay under projections released four years ago, Jeffrey Kightlinger, the water district's general manager, said Thursday." Kightlinger said in an announcement, "Given the importance of this project to maintain water supply reliability for the region, these are encouraging numbers. It also goes to show the ability of the Southland region to fund major infrastructure projects by pooling our resources."

Fish And Wildlife Service

Feds Put Off Decision On Texas Hornshell's Status.

The Santa Fe New Mexican (8/11, Chacón) reports that the U.S. Fish and Wildlife Service "delayed a decision Thursday on whether to add the last remaining native mussel in New Mexico to the endangered species list, raising concerns about its future amid efforts in Congress to reform the Endangered Species Act." The FWS "announced it was delaying a listing decision on the Texas hornshell for six months and would reopen the comment period for an additional 30 days."

Divers Find No Adult Invasive Mussels In Montana Reservoir.

The AP (8/10) reports that "U.S. Fish and Wildlife Services scuba divers searched for three days but did not find any indication of adult aquatic invasive mussels on the face of Tiber Dam in north-central Montana." The divers were "brought in this week because a juvenile mussel was found in a water sample taken from Tiber Reservoir near Chester last fall." That discovery and "a suspect sample taken from Canyon Ferry Reservoir near Townsend led Montana to increase its efforts to prevent the possible spread of the shellfish that can clog water pipes and displace native species."

Wis. Bear Hunters Who Use Dogs Under Attack By Wolf Advocates.

The Minneapolis Star Tribune (8/10, Marcotty) reports that "a national watchdog group says Wisconsin bear hunters are harassing wolves with their dog packs — then claiming state compensation when their hounds are killed — and wants the federal government to launch a criminal investigation." In a letter to the U.S. Fish and Wildlife Service, an attorney for Professional Employees for Environmental Responsibility (PEER) said that "the practice amounts to 'a state-sanctioned financial subsidy for hunters engaged in the criminal harassment' of wolves." Adam Carlesco, staff counsel for PEER, said, "It is harassment of an endangered species, committed by a relatively small number of hunters."

Most Plovers Have Fledged, Much Of Refuge Beach Reopens.

The North Andover (MA) Eagle Tribune (8/10, Lodge) reports that "much of the Parker River National Wildlife Refuge beach, which had been closed since April to protect nesting piping plovers, reopened on Friday." The U.S. Fish & Wildlife Service "annually closes its six miles of refuge beach and parking lots 2 through 7, which connect to the beach, to keep humans from disturbing the nesting shorebirds." Kaytee Hojnacki, "a biology technician at the refuge who had been monitoring the status of the plovers and their nests for the past three months, said 24 plover pairs produced 53 chicks that fledged (they are able to fly), which is down from the high last year of 77, but still 'our third-highest fledgling count ever, and still very good.'"

Site Chosen For Refuge Open House.

The Mohave Valley (AZ) Daily News (8/10, Richards) reports that the U.S. Fish and Wildlife Service's Havasu National Wildlife Refuge plans "to hold an open house listening session on Thursday, Aug. 17, to accept written public comments on a draft recreational boating compatibility determination (CD)." Comments will be accepted through Aug. 30.

US-China Cooperation On Wildlife Smuggling: An Opportunity.

In a piece for the Huffington Post (8/10, Devlin), Kathleen Devlin, a Master's Graduate of the Global Affairs Program at the Yale Jackson Institute, writes that the United States and China "have access to frameworks that could facilitate collaboration on wildlife issues." She also points out that "the United States and China are far and away the two largest markets of unlawful animal products and plants, so both have an outsized duty to take leadership roles and aggressively tackle the issue head-on." Devlin argues that "because of their combined market share, any collective action successfully adopted and carried out would have noticeable effects on the international stage."

National Park Service

Data-driven Decisions For National Parks.

Government Computer News (8/10) reports, that "data on visitors has been collected for many years, but the National Park Service hasn't been able to analyze it or use it to inform other decisions." According to the article, "to help it make better operations and programming decisions with the data it already has, NPS wants to put its visitor experience data from 1999-present into usable formats so it's easier to review and analyze." The NPS is "looking for a contractor to compile reports and visualizations on visitation trends, funding, staff allocations and interpretive media using existing data from the agency's servicewide interpretive report, visitor use statistics and potentially cross-referencing that information with data from the Census Bureau."

Why Was There A Giant Inflatable Chicken Near The White House?.

The New York Times (8/10, Joseph) reports on the "giant inflatable chicken [that] appeared outside the White House on Wednesday," saying those who saw it "had no trouble identifying its human doppelgänger: President Trump. The chicken was the brainchild of Taran Singh Brar, an artist and documentary filmmaker who lives in Laredo, Calif." Brar said "that he wanted to make a statement about the president being a 'weak and ineffective leader.' He added, 'He's too afraid to release his tax returns, too afraid to stand up to Vladimir Putin, and playing chicken with North Korea.'"

Rat Population Increase Can Have Real Impact On City Infrastructure.

WRC-TV Washington (8/10, Fleischer, Yarborough, Piper, Jones) reports that the rise in the population of rats is having an impact on the D.C. metro area. Of note, the "rat problem" is adding to the expenses of the National Park Service. NPS spokesman Mike Litterst. said, "Certainly if you have rats that are making it worse, adding to that tally, that's something we're trying to avoid."

Yellowstone Park Vehicle Traffic Nearing Capacity.

The AP (8/10, Moen) reports that "sometime within the next four to six years, Yellowstone National Park is expected to reach its capacity for being able to handle all the vehicles that tourists drive through the park." The National Park Service on Thursday "released a pair of studies looking at traffic and parking in the nation's first national park and visitor demographics and expectations." According to the agency, "potential solutions include instituting a reservation system or passenger shuttles to control the number of visitors during peak times for the busiest attractions in the park, but no decisions will be made for at least a couple of years." Yellowstone Superintendent Dan Wenk said in a statement, "Historic and recent trends demonstrate that visitation will increase over the long-term, therefore, it is imperative for us to plan now. Good visitor use management will allow the park to protect resources, encourage access, and improve experiences."

Vehicle Strikes, Fatally Injures Yellowstone Bison.

The AP (8/10) reports that "a bull bison that had wandered out of Yellowstone National Park was killed after suffering severe head and leg injuries when it was struck by a vehicle just east of the park." Wyoming Game and Fish warden Travis Crane, "the bison was walking in circles on the highway after the collision Sunday evening near Wapiti and couldn't be moved." Crane said "he shot and killed the injured bull because the Wyoming Highway Patrol said it was a public safety hazard."

Grand Canyon Water Pipeline Slated For Multimillion-dollar Replacement.

The Arizona Daily Sun (8/10, Conley) reports that "an aging pipeline bringing water to residents, resorts and 6 million visitors a year at the Grand Canyon has broken about 80 times since 2010 and needs a multimillion-dollar replacement, park officials say." According to Grand Canyon spokeswoman Kirby-Lynn Shedlowski, "officials have sutured the breaks over the years, but that is no longer enough." Shedlowski "said it's time to go beyond patchwork and spend up to $124 million to replace it before a major disruption of water service at the international tourist draw."

Gatlinburg Wildfire Records: What We Know, What's Still Secret.

The Knoxville (TN) News Sentinel (8/10, Lakin) reports that "authorities began releasing copies Wednesday of key public records on the deadly Gatlinburg wildfire, nearly nine months after flames swept through town Nov. 28 and killed 14 people." However, the National Park Service has "yet to release records requested under the federal Freedom of Information Act."

Bubonic Plague Detected At Quarai Mission In New Mexico.

The AP (8/10) reports that "an animal case of bubonic plague has been detected at the Quarai mission of Salinas Pueblo Missions National Monument in New Mexico." Monument staff found "a dead rock squirrel in the square kiva at the mission on July 11." According to the article, "a veterinary diagnostic lab says the squirrel tested positive for plague."

Acadia Ramps Up Park Pass Enforcement.

The Mount Desert (ME) Islander (8/10, Broom) reports that Acadia National Park rangers have "started cracking down on people who park their vehicles in the park without displaying an entrance pass." Park officials "said in a press release Tuesday that they are 'enhancing efforts' to ensure that visitors have passes and that rangers will issue a 'fee compliance notice' for vehicles that don't display a valid pass." Park spokesman John Kelly "said the 'notice' is actually a 'citation' that carries a fine of $130." However, "the vehicle's owner or operator can avoid the fine if, within 24 hours, they buy an entrance pass or show proof that they had a valid pass that was not displayed."

Council Of Town Near Grand Canyon Votes For Special Election.

The AP (8/10, Silber) reports that "a small town at the edge of the Grand Canyon will have a special election in November to decide whether to increase the maximum building height in the city and pave the way for new retail and housing development in the community." The town council in Tusayan "voted unanimously Wednesday evening to settle the issue by mail ballot." Critics claim "the building height increase would have serious effects on water usage, impact visitor capacity to Grand Canyon National Park and cause potential damaging consequences for the area's dark skies conservation." The National Park Service "sent a letter to the town expressing those concerns, while environmentalists also remain steadfast any growth in Tusayan would mar the beauty of the area."

New Science Education Program Brings National Parks To Classrooms.

The Knoxville (TN) Focus (8/10) reports that "teachers and students across the country will have the opportunity to participate in a new science education program, Citizen Science 2.0 in National Parks, thanks to a $1 million Veverka Family Foundation donation to the National Park Foundation's Centennial Campaign for America's National Parks." The program is "kicking off this 2017-2018 school year with four national parks: Cabrillo National Monument, Cuyahoga Valley National Park, Great Smoky Mountains National Park, and Rock Creek Park." Will Shafroth, president of the National Park Foundation, said, "Private support from generous partners like the Veverka Family Foundation is making it possible for national parks – some of our richest learning environments – to offer new and innovative education programs like Citizen Science 2.0. Thanks to this $1 million donation to our Centennial Campaign for America's National Parks, teachers and students across the country will experience science outside the textbook and inside national parks."

Fort McHenry Ranger Can't Stay Retired Even After 50-year Career.

The Washington Post (8/10, Pitts) reports that that 79-year-old Paul Plamann "retired July 1 after a 50-year career" at the Fort McHenry National Monument and Historic Shrine. However, "he was back in action this week, reprising his popular role as Beanes in his new guise as a part-time volunteer." According to the article, "the man known to generations of colleagues as 'The Old Ranger'" now plans to be at the Hampton National Historic Site in Towson on Saturdays and at

Fort McHenry on Tuesdays.

Free Entrance To Point Park To Celebrate The National Park Service's Birthday.

The Chattanoogan (TN) (8/10) reports that "to celebrate the National Park Service turning 101 years old, Chickamauga and Chattanooga National Military Park is waiving the entrance fee to Point Park on Friday, Aug. 25."

Lookout Lake Michigan Shipwreck In Two Rivers Gets Historic Status.

The Manitowoc (WI) Herald Times Reporter (8/10) reports that "the Lookout shipwreck in Two Rivers has been listed in the National Register of Historic Places, Wisconsin Historical Society announced Thursday."

Pearl Harbor Nonprofit CEO Leaves Organization.

The AP (8/10, McAVOY) reports that "a nonprofit that supports National Park Service operations at Pearl Harbor said Thursday its CEO is no longer with the organization." Pacific Historic Parks "didn't disclose the reasons for Ray L'Heureux's departure, saying it was a confidential personnel matter." The article notes that "the move came four months after the organization's board placed L'Heureux on paid administrative leave while it investigated allegations made against him in an anonymous letter."

Office Of Insular Affairs

Trump Renews Warning To North Korean Leaders.

Media reports cast President Trump's comments Thursday on North Korea as intensifying his warnings to North Korea's leaders and doubling down on his earlier "fire and fury" warning. All three networks again Thursday night led with the story, dedicating just under 20 minutes to the story – down from 23 minutes the night before. Lester Hold opened NBC Nightly News (8/10, lead story, 3:05, Holt) saying the President Trump "fired off another vague and ominous-sounding threat," and "appeared to paint another red-line, this time over Guam." Trump was shown saying, "Let's see what he does with Guam. If he does something in Guam, it will be an event the likes of which nobody has seen before what will happen in North Korea." Cecilia Vega said on ABC World News Tonight (8/10, lead story, 3:30, Muir) that Trump is "not backing down, but he's also not telegraphing what comes next." The Washington Post (8/10, Rucker, Deyoung) too says Trump "escalated his rhetoric," but when asked what would have been tougher than "fire and fury," Trump replied only, "You'll see. You'll see." He also "would not say whether he is considering a preemptive strike," but said diplomatic efforts "over the years had done little to halt the country's nuclear program."

Trump, the New York Times (8/10, Baker) reports, "escalated his war of words...rejecting critics at home and abroad who condemned his earlier warning as reckless saber-rattling," and Jim Sciutto said on CNN's Situation Room (8/10) that he has "doubled and tripled down...despite" several of his senior advisers on Wednesday trying to "walk...back" his earlier remarks.

Anthony Mason said in the lead story for the CBS Evening News (8/10, lead story, 2:40, Mason) that Trump said "he might not have been tough enough, so he got tougher today, saying that if the North Koreans even think about launching an attack, 'things will happen to them like they never thought possible.'" David Martin said the President "seemed to hold out little hope negotiations could resolve the standoff, and doubted economic sanctions would be effective enough. ... It seems the Commander-in-Chief has already run out of patience."

The President's remarks Thursday, Bloomberg News (8/10, Olorunnipa) reports, "continue days of escalating rhetorical exchanges," and USA Today (8/10, Korte) says he "doubled down on his threats...pushing back against criticism that his aggressive rhetoric might backfire and inflame tensions." Said Trump of his previous statement, "Maybe it wasn't tough enough. It's about time that somebody stuck up for the people of this country and for the people of other countries. So if anything, maybe that statement wasn't tough enough."

Reuters (8/8, Oliphant, Blanchard) reports Trump "took specific aim" at Kim Jong-un, saying he had "disrespected our country greatly. He has said things that are horrific. And with me, he's not getting away with it." The Washington Times (8/10, Muñoz) reports Trump's comments came as Defense Secretary Mattis confirmed Thursday that a "military solution" is in place "should the White House opt to pursue an armed response" to North Korea. Mattis, however, "remained

largely mum on the details." Another Washington Times (8/10, Muñoz) report says Mattis also "declined to comment whether he was taken aback by Mr. Trump's harsh rhetoric."

Trump's "strong language," the Los Angeles Times (8/10, Bierman) reports, "came only hours after...Mattis stressed the importance of diplomacy in the increasingly tense standoff with the nuclear-armed state." A Los Angeles Times (8/10, Lauter) analysis says Trump's rhetoric toward North Korea has "highlighted as never before the tension between the president's duties as chief executive and the role he often seems to prefer as the country's highest-profile TV and Internet commentator." Secretary Tillerson said this week that Americans should "sleep well at night" and has pressed for talks, "albeit with preconditions." On Thursday, "even as Trump said his previous statements were perhaps 'not tough enough,'" Defense Secretary Mattis "emphasized diplomacy." Said Mattis, "Do I have military options? Of course I do. That's my responsibility. But what we're trying to do here is leave it loud and clear...in the diplomatic arena: It is North Korea's choice."

The Wall Street Journal (8/10, Sonne, Radnofsky) reports that earlier Thursday, North Korea said "sound dialogue is not possible" with Trump and repeated the threat it made a day earlier to strike Guam, saying it could surround the island in "enveloping fire" by launching four intermediate-range Hwasong-12 missiles at it. The AP (8/10, Lemire, Lederman) says Trump spoke after North Korea "intensified its own rhetoric by announcing a detailed plan to launch a salvo of ballistic missiles" toward Guam.

Trump: China Can Do More To Resolve Crisis. The CBS Evening News (8/10, story 2, 1:30, Mason) reported President Trump also said Thursday that China can do more to resolve the North Korea crisis, "and he said he thinks China will." However, CBS (Tracy) said "it's unclear at this point how much North Korea will even listen to what China says. In fact, the regime is very upset with China because it went along with those tough US sanctions." Furthermore, Trump on Thursday "sent a US Navy ship into waters that China claims is its own, and that's only antagonized them more. When you consider how much the US needs China right now on this issue of North Korea, these sorts of actions are not likely to help." The Wall Street Journal (8/10, Wong) reports, Trump's rhetoric leaves China as it seeks to reduce tensions with few options.

The New York Times (8/10, Perlez), meanwhile, reports that with US allies in the region "unnerved" by Trump's threats, China "sees a chance to capitalize on the fear and confusion and emerge as the sober-minded power in the region, according to analysts." Trump has "increasingly been seen in China as unreliable," and his comments this week have "only deepened that perception, analysts say." The Washington Post (8/10, Denyer) similarly says China's "narrative about US recklessness was reinforced this week" by Trump's threats. His rhetoric, the Post says, "gave China the perfect platform to project itself as the voice of reason — especially as it had just agreed to join the world in stiffening sanctions against North Korea."

A New York Times (8/10, Ramzy) analysis notes that the last time an American president contemplating how to stop an "isolated, authoritarian state in Asia" from becoming a nuclear power it was China. The Times says that a "look at that time reveals just how perilous such a situation can be, when a new nuclear player emerges and an established power tries to stand in its way. But it also shows that all-out war can be avoided."

US Officials: North Korean Missile Launch Would Take 14 Minutes To Reach Guam. NBC Nightly News (8/10, story 2, 2:50, Holt) reported North Korea is saying its military is developing a plan to strike Guam with "four ballistic missiles they say could be fired in the next week." Barbara Starr reported on CNN's Situation Room (8/10) that if the North launched ballistic missiles at Guam, it would be "unprecedented" and "very dicey," but "there are several layers of missile defense," while ABC World News Tonight (8/10, story 2, 2:55, Muir) reported a launch from North Korea would take only 14 minutes to reach Guam, which is home to 160,000 American civilians and 7,000 US forces on two US military bases. A senior US official told ABC that a "preemptive strike could be on the table in the next six to 12 months, if sanctions do not work, and if Kim Jong-un continues to make progress on a nuclear tipped missile," but ABC's Jim Avila added that "any military retaliation from North Korea could be catastrophic."

The New York Times (8/10, Choe) reports that for Kim, failure of an attack on Guam "would be a potentially costly blunder that could subvert his authority." However, North Korea's threat "also includes some maneuvering room for a possible compromise, South Korean analysts said." With the launches "still in the planning phase" there is the "possibility of delay or cancellation," but the Washington Post (8/10, Fifield) reports, "Still, North Korea is not showing signs of backing down at the moment."

USA Today (8/10, Michaels) reports that if North Korea "follows through on its threat to fire ballistic missiles" at Guam, the US military "probably will try to shoot them down, raising the

stakes even further in a dangerous global standoff." A New York Times (8/10, Gordon, Schmitt) analysis says North Korea's threat Thursday to test-fire ballistic missiles at Guam "deepened the challenge confronting the Trump administration: how to defang Pyongyang's missile programs without risking all-out war." The Times cautions that "even a limited strike against a North Korean missile on its launching pad or the shooting down of a missile in midair would pose risks" that Kim Jong-un "might retaliate, setting off a spiral of escalation that could plunge the Korean Peninsula into war."

A front-page Washington Post (8/10, A1, Fisher, Nakamura) analysis says that "in this moment of heated, belligerent rhetoric, planners in and out of government are diving into decades of plans and projections, playing out war games, engaging in the macabre semi-science of estimating death tolls and predicting how an adversary might behave." According to the Post, the "pathways that have been examined fall into four main categories: doing nothing, hitting Kim Jong Un's regime with tougher sanctions, pushing for talks, and military confrontation."

Guam Governor Reassures Nervous Residents. MSN (8/9) reports that "elected officials in Guam are reassuring constituents that the U.S. territory is safe following North Korea's threat against the island." ABC News (8/9, Caplan) reports that "Guam's governor, Eddie Calvo, released a two-minute video message to the island's residents, in which he said, 'I want to ensure that we are prepared for any eventuality.'"

Additional coverage was provided by the Guam Daily Post (8/9, Calvo).

Additional Coverage. Additional coverage was provided by the Pacific (GUM) Daily News (8/9, Stanglin), the Guam Daily Post (8/9), the Guam Daily Post (8/8, Oliphant, Blanchard), the Pacific (GUM) Daily News (8/10, Raymundo), the Pacific (GUM) Daily News (8/9, Raymundo), the Guam Daily Post (8/9, Roberto, Losinio), the Marianas Variety (8/10), the Pacific (GUM) Daily News (8/10, Mora), and the Guam Daily Post (8/10, Losinio).

Six B-1 Bombers Arrive From South Dakota.

The Guam Daily Post (8/9) reports that "six B-1B Lancers and 350 airmen with the 37th Expeditionary Bomb Squadron from Ellsworth Air Force Base, South Dakota, recently arrived at Andersen Air Force Base for another rotational deployment, the U.S. Pacific Command announced." According to the article, "the squadron arrived after the 9th Expeditionary Bomb Squadron, from Dyess Air Force Base, Texas, completed its Guam rotation that started in February."

Additional Coverage: Hawaii, Guam Get More Funds To Abate Compact Impact.

Additional coverage that the Interior Department has "made available two technical assistance grants totaling $467,095 to support one-stop centers in Guam and Hawaii that provide information and services to migrants from the freely associated states" was provided by the Saipan (MNP) Tribune (8/10), the Pacific (GUM) Daily News (8/10, Engichy), and the Pacific (GUM) Daily News (8/9).

Guam Is Overlooked Asset In Asia.

In an op-ed for the Detroit News (8/9, Lennox), Dennis Lennox, who was executive director of the Republican Party of the Virgin Islands, writes that "North Korea's threat presents a unique opportunity for the federal government to simultaneously fly the flag while empowering Guam to promote the national interest, be it economically or diplomatically." To achieve this, Lennox urges President Trump "to reinvent the way the federal government oversees the territories." Lennox argues that "it's time to use broad authority of the president to transfer Guam and the territories from Interior to a new, standalone cabinet-level agency."

The South Pacific's Strategic Role.

In an op-ed for the Washington Times (8/10, Jacobs), Erik M. Jacobs, a student at Georgetown University's School of Foreign Service, writes that "as China continues its military expansion and modernization and as President Trump and seeks to expand the capabilities of the U.S. Navy to restore traditional American strategic power, the South Pacific will only continue to grow in strategic importance." Jacobs argues that "small and targeted strategic investment in the South Pacific will not only show the U.S. commitment to its strategic value, it will ensure that the U.S. is prepared to deal with current and emerging threats across the broader Asia-Pacific region."

Office Of Surface Mining

West Virginia Governor Wants To Sell Trump On A $4.5 Billion Coal Bailout By Calling It A "Homeland Security Initiative".

The Washington Post (8/10, Ingraham) reports, "Jim Justice, the Republican governor of West Virginia, is floating a federal proposal to bail out the struggling Appalachian coal industry at a cost to taxpayers of up to $4.5 billion a year." The Post says Justice is calling the proposal a "homeland security initiative" to protect "the eastern energy grid." Columbia University Center on Global Energy Policy Director Jason Bordoff said the "claim that taxpayers should subsidize Appalachian coal for national security reasons is meritless."

US Geological Survey

Yellowstone Supervolcano: Map Shows Ground Deformation Around Caldera Over Last Two Years.

Newsweek (8/10, Osborne) reports that "a map showing how the ground around the Yellowstone supervolcano has deformed over the last two years has been released by the U.S. Geological Survey." The map, by USGS geophysicist Chuck Wicks, "shows movement around the caldera between 2015 and 2017 using radar images of Earth's surface collected from orbiting satellites."

Additional coverage was provided by the Daily Mail (8/10, Macdonald).

USGS Upgrades To Broadband From California To Arizona.

KJZZ-FM Phoenix (8/10, Van Blokland) reports that "the USGS is upgrading out-of-date earthquake monitoring sites from analog to digital broadband." According to the article, "for its most remote sites — in which more traditional internet providers don't provide service — the USGS Earthquake Science Center is partnering with a California company to install satellite internet."

Top National News

Trump To McConnell: "Get Back To Work."

Media reports are casting the President's criticism of Senate Majority Leader McConnell as both highly unusual and counterproductive. Some reports, however, indicate the President's comments over the last few days are part of a deliberate strategy. Politico (8/10, Dawsey), citing "four White House officials and Trump friends," reports Trump is "preparing to distance himself from Republicans in Congress if they aren't successful in passing legislation," and that he is "prepared to cast himself as an outsider – and Congress as an 'insider' Washington institution." Breitbart (8/10, Spiering) also sees Trump as "eager to distance himself from the Senate majority leader," and the Wall Street Journal (8/10) editorializes that while Steve Bannon and his White House allies relish the feud as part of their effort to rebrand the GOP, the ongoing dispute only helps Senate Minority Leader Schumer and his party – and risks permanently stalling the President's agenda.

Along those lines, NPR (8/9, Taylor) said the "escalating tension...has the potential to jeopardize the rest of the Republican legislative agenda in the Senate when Congress returns," and the New York Times (8/10) that McConnell is "the one person" Trump "may most need to execute a stalled Republican legislative agenda." David Catanese of US News and World Report said on Fox News' Special Report (8/10) that Trump is "smart to run against Congress, given his own approval rating," but "it's going to come to a head in the fall because...he's going to depend on...McConnell to get" things "done. ... So, short-term gain but long-term problematic to poke at the Majority Leader." David Axelrod similarly argued on CNN's Situation Room (8/10) that if Trump "has any hope of getting his legislative program through, then it seems like a very foolish long-term strategy to be in this sort of tête-à-tête with...McConnell." Under the headline "Donald Trump's Strategy On Mitch McConnell Is Totally Pointless," Chris Cillizza wrote in a piece for CNN (8/10) that "this is a fight" the President "can't win – and shouldn't keep stoking. Which, of course, means he almost certainly will."

To Reuters (8/10), Trump is "venting frustration over Republicans' dramatic failure to repeal and replace the Obamacare healthcare law," and USA Today (8/10, Collins) says "Trump and some conservatives are not ready to give up on repeal," but "it is not clear what the president has in mind for reviving the legislation." The Washington Post (8/10, A1, Wagner) refers to "an extraordinary fight" and Roll Call (8/10, Rahman) to a Trump "crusade against...McConnell," while

the Los Angeles Times (8/10, Mascaro) says the "escalating attacks...underscore the rocky relationship between the White House and what typically would be the president's allies." The AP (8/10, Bykowicz, Werner) refers to "a stunning feud," as "a sitting president openly turning on a Senate majority leader of his own party in such a fashion is practically unheard of – yet another norm destroyed since Trump's rise on the political scene."

As Business Insider (8/10) reported, the McConnell "suggested Tuesday that Trump was frustrated with the healthcare failure because he had 'excessive expectations' due to his lack of experience in politics." Trump first responded to McConnell on Twitter on Wednesday, and continued to chide the GOP leader yesterday, writing, "Mitch, get back to work and put Repeal & Replace, Tax Reform & Cuts and a great Infrastructure Bill on my desk for signing. You can do it!" ABC World News Tonight (8/10, story 3, 2:10, Muir) showed him saying later in the day, "I have been hearing repeal and replace now for seven years. All I hear is repeal and replace. And then I get there and I said, where's the bill, I want to sign it, first day. And they don't have it.. ... Mitch, get to work, and let's get it done. They should have had this last one done. They lost by one vote. For a thing like that to happen is a disgrace. And, frankly, it shouldn't have happened."

The Washington Times (8/10, Dinan) reports Trump also "said...McConnell must prove he can get things done with a GOP majority or else it will be time to talk about ousting the longtime Republican floor leader." The CBS Evening News (8/10, story 4, 1:20, Garrett) showed Trump saying, "If he doesn't get repeal and replace done, and if he doesn't get taxes done, meaning cuts and reform, and if he doesn't get a very easy one to get done, infrastructure, if he doesn't get them done, then you can ask me that question." The comments, says AP (8/10, Bykowicz, Werner), were "far from a vote of confidence," though NBC Nightly News (8/10, story 4, 2:35, Alexander) noted that he added, "I'm disappointed in Mitch, but if he gets these bills passed, I'll be very happy with him, and I'll be the first to admit it."

NBC Nightly News (8/10, story 4, 2:35, Alexander) noted that even as he wages "another battle with Senate's top Republican," the President praised "McConnell's wife, Transportation Secretary Elaine Chao." Trump was shown saying, "She's doing a very good job." The Wall Street Journal (8/9, Tau) covers Trump's remarks in this morning's edition.

Townhall (8/10, Barkoukis) reported White House press secretary Sarah Huckabee Sanders "said Thursday the president is somewhat frustrated with McConnell." Said Sanders, "You can see the president's tweets. Obviously there's some frustration. I don't have anything more to add."

Sean Hannity said in his opening monologue on Fox News' Hannity (8/10), "Now here's a news flash for Sen. McConnell: get to work, Senator. You don't seem to get that to you and your fellow Republicans, you are the ones that set those excessive expectations. ... To these Republicans, if you cannot get your job done, then and it's time for you to step aside. We need new people in those positions."

The Washington Times (8/10, Sherfinski), meanwhile, reports "the open verbal warfare between Mr. Trump and one of the two most powerful Republicans on Capitol Hill has riven their party, with rank-and-file lawmakers and potential candidates picking sides." Sen. Orrin G. Hatch of Utah "backed Mr. McConnell, calling him the best Republican leader in decades, but a host of candidates plotting runs for office sided with Mr. Trump."

NYTimes Analysis: Trump Failing To Show "Any Gratitude" Toward McConnell. The New York Times (8/10) reports that "by preventing President Barack Obama from filling a Supreme Court vacancy," McConnell "secured...Trump the signature accomplishment of his young presidency: the confirmation of Justice Neil M. Gorsuch." Yet "any gratitude President Trump felt for Mr. McConnell's first-of-its-kind maneuver appears to be exhausted as the president, upset at the failed health care repeal, has turned his Twitter fire and fury on" him.

Ylan Mui also said on CNBC's Closing Bell (8/10) that "it is worth remembering that McConnell actually delivered this Administration's biggest win so far, and that is the confirmation of Supreme Court judge Neil Gorsuch. McConnell went nuclear in order to get Gorsuch confirmed. So, he's put it on the line for this President."

Senate Conservative Fund Chief Calls For McConnell's Replacement. The Washington Times (8/10, McLaughlin) reports that "touting...Trump's criticism of...McConnell, a conservative group said Thursday the time is ripe to remove the Kentucky Republican from his leadership post for failing to deliver on campaign promises." The Times adds that "Ken Cuccinelli, the head of the Senate Conservative Fund, said Mr. McConnell recently showed his true colors when attributed part of the GOP's failed efforts to repeal and replace Obamacare to Mr. Trump's lack of governing experience." Said Cuccinelli, "It isn't unreasonable to expect Republicans to keep their promises and McConnell's excuse is yet another example of why he should be replaced as the Republican leader. ... Tell Senate Republicans to replace him now!"

Trump Could Back Primary Challengers To Flake, Heller. Under the headline "Senate Primaries: How Far Will Trump Go For Revenge?" The Hill (8/10, Easley) reported, "Speculation is growing that... Trump will buck his own party and back primary challengers to" Sens. Jeff Flake (R-AZ) and Dean Heller (R-NV) next year, "an exceedingly rare event that would deepen divisions within a party that is already struggling to govern despite controlling the White House and both chambers of Congress. The White House is closely watching" the contests, which "have attracted pro-Trump primary challengers. A couple of other challengers in Arizona with close ties to Trump are still weighing bids and have visited the White House in recent weeks. Heller is not close with Trump, although his allies insist he has a good working relationship with the president. Flake is outright hostile to Trump."

Meanwhile, in an "exclusive," The Hill (8/10, Easley) reported, "Key figures from a major pro-Trump group are joining" the campaign of ex-state Sen. Kelli Ward (R), who is mounting a primary challenge to Flake – "the latest sign that President Trump's allies are gearing up for a serious push to oust the incumbent. Eric Beach, the founder and co-chair of the Great America PAC, and Brent Lowder, the group's executive director, will join Ward's campaign, according to a release." The move "comes as New York hedge fund billionaire and conservative donor Robert Mercer, a Trump supporter whose family is close with White House chief strategist Stephen Bannon, gave $300,000 this week to an outside group supporting Ward's efforts."

The Washington Times (8/10, McLaughlin) reports that businessman Danny Tarkanian (R), who is mounting a primary challenge to Heller, is "siding with President Trump in his public feud with Senate Majority Leader Mitch McConnell." During a Thursday appearance on Fox News, Tarkanian said Trump was justified in criticizing McConnell "over his inability to muster enough support for a bill to do away with Obamacare. 'President Trump says we should repeal Obamacare and Mitch McConnell says well he has too high expectations,' Mr. Tarkanian said," adding, "Why would that be too high expectations when just two years ago most of the same GOP Senators voted to repeal it? Why would anyone think it is too high expectations to actually vote on it now that you have a president who will sign it? Of course I support the president's position."

Caddell: Senate GOP Prevented Trump Recess Appointments. Breitbart (8/10, Riehl) reports that in a conversation Thursday with Breitbart News Daily SiriusXM hist Alex Marlow, pollster and political analyst Pat Caddell criticized Senate Republicans for not going into recess so President Trump could make recess appointments. Caddell argued, "Look at what the Senate did. It didn't even recess so he could appoint recess appointments. That's what the Democrats would have done. All these positions he can't move through the Senate, he could have appointed them the day they recessed. But they made sure he couldn't. They stayed in session, technically."

CNN Poll: Trump "Still More Popular Than Congress." On its website, CNN (8/10, Struyk) reported on what it described as "a silver lining for President Donald Trump: he's still more popular than Congress." The report said that in a CNN poll of 1,018 US "adults," taken Aug. 3-6, 68% of those surveyed judged "the Republican Congress a failure so far after last month's repeal and replace plan died in the Senate. Approval of the current Republican leaders in Congress has dropped from 39% in January to just 24% now." Meanwhile, 34% of those surveyed said "they approve of Democratic leaders in Congress." Trump's approval rating stands at 36%, according to the poll.

Trump Says He Has Given No Thought To Firing Mueller.

President Trump's claim Thursday that he has not given any thought to firing special counsel Robert Mueller, and his comments on the FBI raid of his former campaign manager Paul Manafort's home receive relative light media coverage amid heavy reporting on the ongoing north Korea crisis. Peter Alexander reported on NBC Nightly News (8/10, story 4, 2:35, Alexander) that Trump "insist[ed] he has no plans to fire Special Counsel Robert Mueller," and Reuters (8/10) reports that he said "he has not given any thought to the possibility of firing" Mueller. However, the New York Times (8/10, Schmidt) says Trump's claim that he has not considered firing Mueller "contradict[s] private statements the president has made to his aides and friends about his desire to dismiss Mr. Mueller." According to the Times, Trump "has discussed both the possibility of firing Mr. Mueller and his concerns that the investigation will undermine his presidency."

USA Today (8/10, Korte) says Trump voiced support for "the ongoing Russia investigations, including those taking place on Capitol Hill, where multiple panels are also investigating possible collusion between Trump associates and Russians who sought to influence the 2016 presidential election." Said Trump, "I want them to get on with the task. ... But I also want the Senate and

the House to come out with their findings." According to the Washington Times (8/10, Boyer), Trump also "reiterated that he has nothing to hide," saying, "We have an investigation of something that never took place." Politico (8/10, McCaskill) also reports on Trump's comments, noting that he has "repeatedly dismissed the investigations as a 'witch hunt' and a 'hoax.'"

Also Thursday, Trump reacted for the first time to the FBI raid of former campaign chairman Paul Manafort's home, the CBS Evening News (8/10, story 5, 1:15, Mason) reported. Trump: "I thought it was a very, very strong signal, or whatever. They do that very seldom, so I was surprised to see it. I was very, very surprised to see it." Politico (8/10, Conway) reports that Trump described the raid as "pretty tough stuff." The Daily Caller (8/10, Ross) quotes Trump as saying, "I don't know, but I thought it was pretty tough stuff to wake him up, perhaps his family was there. I think that's pretty tough stuff." Asked if he had spoken to the Attorney General or the FBI about the raid, Trump said, "I have not, but to do that early in the morning, whether or not it was appropriate you'd have to ask them."

The Washington Post (8/10, Wagner, Hamburger) says Trump called Manafort "a very decent man" but added that "he hadn't spoken to him for a long time." ABC World News Tonight (8/10, story 4, 1:10, Muir) showed Trump saying, "I know Mr. Manafort, haven't spoken to him in a long time, but I know him. He was with the campaign as you know, a very short period of time, a relatively short period of time. But I always thought he was a good man."

The Daily Caller (8/10, Ross) reports that Trump attorney John Dowd, in a "notable shift from his praise for Mueller earlier this week," accused the special counsel of "a gross abuse of the judicial process" for conducting the raid, and argued that it was "employed for its shock value to try to intimidate Mr. Manafort." In an email to the Wall Street Journal obtained by Fox News, Dowd wrote, "These methods are normally found and employed in Russia not America." Kevin Corke reported on Fox News' Special Report (8/10) that Dowd reportedly said the raid was "invasive."

Bloomberg News (8/10, Berthelsen, Farrell) describes Mueller as "bearing down" on Manafort, and reports that his investigators have "sent subpoenas in recent weeks from a Washington grand jury to global banks for account information and records of transactions involving Manafort and some of his companies, as well as those of a long-time business partner, Rick Gates, according to people familiar with the matter." In addition, Mueller has "reached out to other business associates, including Manafort's son-in-law and a Ukrainian oligarch," in what was "characterized as an apparent attempt to gain information that could be used to squeeze Manafort, or force him to be more helpful to prosecutors."

Manafort Searching For New Legal Representation. The New York Post (8/10, Dugan) cites "a source familiar with Manafort's plans" who said that he is "searching for new legal representation as he faces an intensifying investigation." Reginald Brown of WilmerHale, "the same DC law firm that employed Mueller until he was appointed special counsel in May," has been representing Manafort, but the Post says the "search for a new lawyer also is motivated by a desire to avoid a potential conflict of interest at WilmerHale, and could lead to the firing of Brown, the source said."

Nation Report: Investigators Now Believe DNC Hack Was An "Inside Job." In a more than 4,000-word piece posted Wednesday on the Nation (8/9, Lawrence) website, Patrick Lawrence wrote that "forensic investigators, intelligence analysts, system designers, program architects, and computer scientists of long experience and strongly credentialed are now producing evidence disproving the official version" of last year's hack of the DNC. They believe the incident was not a hack but "a leak," an "inside job" undertaken "by someone with access to the DNC's system."

Trump Dossier Author Seeks To Avoid Deposition In Libel Suit. Politico (8/10, Gerstein) reports in its "Under The Radar" blog that attorneys for Christopher Steele, the former MI6 officer who authored "an unverified intelligence dossier at the center of the Trump-Russia controversy are fighting an effort to force him into a deposition in connection with a libel suit stemming from BuzzFeed's publication of the salacious document." Steele's lawyers on Thursday "asked a federal judge in Miami not to grant the request, but Steele's lawyers' motion was filed a couple of hours after U.S. District Court Judge Ursula Ungaro issued a formal request for Steele's testimony." Steele's testimony is being sought by "lawyers for Aleksej Gubarev, a Russian internet entrepreneur who was mentioned in the dossier and contends he was libeled by its claims about his ties to Russian President Vladimir Putin."

Trump Declares Opioid Abuse A "National Emergency."

Comments by the President on the opioid crisis generated widespread, generally favorable media coverage, including two brief mentions on the major network newscasts. The Washington Post

(8/10, A1, Wagner) reports Trump "declared the country's opioid crisis a national emergency, saying the scourge exceeded anything he had seen with other drugs in his lifetime." In a story covering remarks by the President on a variety of topics, NBC Nightly News (8/10, story 4, 2:35, Alexander) showed him saying, "I'm saying officially right now, it is an emergency, it's a national emergency. We're going to spend a lot of time, a lot of effort, and a lot of money on the opioid crisis. ... You know, when I was growing up, they had LSD, and they had certain generations of drugs. There's never been anything like what's happened to this country over the last four or five years." The CBS Evening News (8/10, story 6, 0:20, Mason) also noted Trump's statement in a brief report last night.

The Washington Times (8/10, Howell) notes that "declaring a national emergency was the 'first and most urgent' recommendation in the interim report that Mr. Trump's commission on opioid addiction, led by New Jersey Gov. Chris Christie, issued last month." Yesterday, the AP (8/10, Covin, Lemire) reports, "Christie applauded Trump's decision in a statement, saying the president 'deserves great credit.'" Bloomberg News (8/10, Edney) reports Trump had "made the issue a key talking point during his campaign," and Politico (8/10, Ehley) that he "handily won states like West Virginia and Kentucky that have been hit hard by the epidemic."

The New York Times (8/10, Shear) reports, however, that "in the last 48 hours," Trump had "come under criticism from Democrats, who accused him of failing to adequately respond to the growing number of overdoses." For example, "a spokesman for the Democratic National Committee said the president had 'done nothing' for the people affected by the drug crisis." USA Today (8/10, Korte) says Trump's comments "represented an about-face from earlier this week, when Health and Human Services Secretary Tom Price all but ruled out an emergency declaration," saying "said the administration has the resources it needs to combat the epidemic without formally invoking the emergency powers." The Washington Post (8/10, A1, Wagner) also reports that at the time, "Price said that the administration can do the same sorts of things without declaring an emergency, although he said Trump was keeping the option on the table." NPR (8/10, Naylor, Keith) likewise referred to "a change from earlier in the week."

The Wall Street Journal (8/10, Radnofsky) similarly reports the President's announcement in this morning's edition. Vice (8/10, Hamilton) indicates that "it's still unclear what steps Trump intends to take under the state of emergency," but Reuters (8/10, Oliphant) says "the declaration could help unlock more support and resources to address the drug overdose epidemic, such as additional funding and expanded access to various forms of treatment, and it gives the government more flexibility in waiving rules and restrictions to expedite action."

Business Insider (8/10, Ramsey, Jacobs) reported that "one potential benefit of declaring an emergency, according to Bradley Stein, a senior natural scientist at the Rand Corporation who studies substance-use disorders, is that Trump would be able to direct Price to alter or eliminate an obscure Medicaid rule that has been around since the 1960s." Business Insider added that "the Opioid Commission recommended eliminating the exclusion as part of the national emergency."

The New York Daily News (8/10, Greene) reports "a total of 52,404 people died of fatal overdoses in 2015 – a rate of 16.3 per 100,000." The Daily News adds that "of those, more than 33,000 were attributed to opioids, including prescription painkillers as well as heroin and the even more potent fentanyl."

Under the headline "Trump Wants To Prosecute More Drug Offenders To Solve The Opioid Crisis. Here's Why That Won't Work," meanwhile, Mic (8/10, Provenzano) said that "in spite of...research" showing the approach to be ineffectual, "the Trump administration has repeatedly sought to combat the opioid epidemic with more law enforcement, rather than with a treatment-based approach."

Ohio Attorney General: Opioid Makers Must Answer For Addiction Crisis. In a Washington Post (8/10, DeWine) op-ed, Ohio state Attorney General Mike DeWine explains why he is suing "five of the largest manufacturers of brand-name and generic opioids," arguing that opioid makers have "flooded the market with prescription opioids" and offered "grossly misleading information about the risks and benefits of these drugs." He notes that almost "80 percent of heroin users start with prescription opioids" and that opioids "caused 82 percent of all overdose deaths in Ohio." He concludes by commending President Trump's focus on the issue of opioid addiction and calling on pharmaceutical companies "to take responsibility for their actions and stop trying to deceive Ohio and America."

Reuters Analysis: Treatment Of Pass-Throughs Impeding GOP Tax Reform Efforts.

Reuters (8/10, Morgan) reports that so-called pass-through businesses are "one of the thorniest issues" confronting Republican efforts to enact tax reform. While President Trump and Republican

lawmakers "want to give pass-throughs their own tax rate of 15-25 percent," the "danger with this proposal is that high-income people who pay the top individual tax rate could reap enormous windfalls simply by reclassifying their wages and salaries as pass-through business income to qualify for the new low rate," potentially "eras[ing] up to $584 billion from government coffers over the next decade, the nonpartisan Tax Policy Center estimated." Although "policymakers are looking at limiting how much of a business owner's income should get pass-through treatment" to address the issue, it is "hard to define because pass-throughs range from sole proprietorships and partnerships to S-corporations."

Editorial Wrap-Up

New York Times.

"Another Course Correction For City Policing." In an editorial, the New York Times (8/10) writes that Wednesday's decision by district attorneys from Brooklyn, the Bronx, Manhattan, and Queens to move to dismiss 644,000 outstanding arrest warrants for minor offenses at least 10 years old – more than one third of the city's backlog of outstanding summons warrants – was "another major step in the evolving effort to move the city's police practices from an abusive past into a more enlightened future." The Times adds that the district attorneys should follow the warrants expungement decision by expunging the records of those "who may have been unjustifiably caught" in the "zero-tolerance dragnet" in which law enforcement used to issue summons for most common petty offenses.

"Partners In Voter Suppression." In an editorial, the New York Times (8/11) says the Administration "moved deeper into the politics of voter suppression this week by reversing the federal government's opposition to Ohio's effort to purge tens of thousands of voters from the rolls simply because they vote infrequently." The Times calls the case is "a major challenge to the National Voter Registration Act of 1993 and the Help America Vote Act of 2002," and while the Administration "claims Ohio acted responsibly," opponents "see it as a subversion of democracy. The case could be a template for further electoral mischief, boosted now by a shamelessly politicized Justice Department."

Washington Post.

"This Journalist Imprisoned In Syria Must Be Freed." In an editorial, the Washington Post (8/10) calls for the release of Austin Tice, a former Marine captain and journalist who was captured in Syria five years ago covering the civil war when traveling with rebels fighting the government. The Post adds that CIA efforts to open a back channel to the Syrian government to help secure his release have so far failed, and concludes, "To those who imprisoned him, we repeat: He is a journalist who went only to record and report on the plight of people in a wretched war. His ambitions were noble, and he has already paid a very steep price for his courage and determination. It is long past time to set Mr. Tice free."

"The Trump Justice Department Joins The GOP Crusade To Shrink The Vote." The Washington Post (8/10) editorializes that "the idea that voting should be encouraged, and voter registration simple, has been a touchstone of federal law for decades," but "is now under assault by Republicans in statehouses across the country and...in the Trump Justice Department." On Monday, DOJ "political appointees...engineered an about-face in the government's position on a key voting rights case before the Supreme Court, backing Ohio's efforts to purge hundreds of thousands of infrequent voters from the state's voter rolls." Ohio Secretary of State Jon Husted believes "it's okay for a state to disqualify people from voting in the future if they haven't voted in the recent past – specifically, in the past six years." The Post notes that "a few other states...employ a process like Ohio's," but it argues that "there are better methods to maintain 'clean' and current voting rolls, such as using change-of-address forms filed with the Postal Service and death notices."

"West Virginia's Governor Wants A Coal Bailout. Republicans Should Ignore Him." In an editorial, the Washington Post (8/10) writes that the Administration and Congress should "ignore" the recent proposal of West Virginia Gov. Jim Justice for a "massive" federal subsidy to the Eastern coal industry, arguing that subsidies would "punish the gas-production innovators who have been creating jobs that at least partially offset those lost in coal," "impose unfair competition on more-efficient coal producers in Western states," and "cost federal taxpayers...more than $1 billion per year at current coal-consumption rates."

Wall Street Journal.

"John McCain's Defense Cut." In an editorial, the Wall Street Journal (8/10) writes Sen. John McCain's vote to block the Senate bill repealing the Affordable Care Act helped further a problem he should appreciate: that of relatively declining defense spending. The Journal argues that because the ACA has exacerbated a federal budget already burdened by 60 percent mandatory entitlement spending, it will continue to place increasing pressure on lawmakers to decrease the percent of the budget allocated to military expenditures.

"An Aussie Terror Warning" In an editorial, the Wall Street Journal (8/10) writes that a thwarted terror attack in Sydney last month involving two brothers who almost successfully checked luggage in which they placed a meat grinder containing a bomb should serve as a warning to western authorities that the Islamic State is becoming dangerously close to blowing up passenger flights. The Journal concludes that the terrorists will be encouraged to replicate the attack and that the West must examine their screening policies.

"The Trump-McConnell Spat." The Wall Street Journal (8/10) editorializes that while Steve Bannon and his White House allies relish the feud between President Trump and Senate Majority Leader McConnell as part of their effort to rebrand the GOP, the ongoing dispute only helps Sen. Chuck Schumer and his party – and risks permanently stalling the President's agenda.

Interior Department Issues Millions Of Dollars To 'Protect' Historical Landmarks.

The Washington Examiner (8/17, Siciliano) reports that the Interior Department announced Thursday "that it is sending tens of millions of dollars in historic preservation grants to help states preserve 'our national heritage and history.'" Deputy Secretary of Interior David Bernhardt said, "These grants highlight the department's and the National Park Service's commitment to preserving our national history and heritage. Through valuable partnerships, we are able to help communities and protect the diverse historic places, culture and traditions unique to our country for future generations." The funding included "$21 million in grants, representing a total of $58 million awarded to every U.S. state, the District of Columbia, U.S. territories, and partnering nations, according to the agency." The department "pointed out that the funding was derived from fees paid to the Interior Department from oil companies' offshore federal production leases."

WLTZ-TV Columbus, GA (8/17) reports that Bernhardt "announced the distribution of $368,684 in historic preservation grants to Alabama as well as $23,379 for historic preservation grants to a Tribal Historic Preservation Office in the state."

Driller Interest Is Tepid In Gulf-wide Oil And Gas Lease Sale.

The New Orleans Times-Picayune (8/17) reports in continuing coverage that oil and gas companies offered $121.1 million in high bids for 90 tracts in the Gulf of Mexico. Companies bid on far fewer tracts than the previous sale in March, largely because of the weak price environment.

World Oil (8/17) reports Interior Secretary Ryan Zinke discussed the sale and said, "The path to American energy dominance starts in the Gulf, and the hard work of rig and platform workers, support staff onshore, and the industries that support them cannot go unnoticed. ... [Yesterday]'s results will help secure their jobs and create more good paying jobs while generating $121 million in revenue to fund everything from conservation to infrastructure."

UPI (8/17, Graeber) reports that most of the bids were for deepwater areas, despite the effort to attract companies to tracts in shallow waters. The Daily Caller (8/17, Pearce) reports acting assistant secretary for Lands and Minerals Management Katharine MacGregor said, "Through regulatory streamlining, expanded offshore and onshore opportunities and great cooperation with our stakeholders, we expect to encourage competition while continuing to receive a fair and equitable return on oil and gas resources."

Additional coverage was provided by the Thibodaux (LA) Daily Comet (8/17, Magill), the Houma (LA) Courier (8/17, Magill), Natural Gas Intelligence (8/17, Davis), Law360, 24/7 Wall Street (8/17, Ausick), and the Aviation International News (8/17, Huber).

A Dozen Missoulians Protest Zinke, Trump.

The Missoulian (MT) (8/17, Kato) reports that "with signs with slogans like 'Zinke is Stinke' and 'Zinke Public Lands Enemy #1,' a dozen demonstrators gathered in downtown Missoula on Thursday in protest against the Secretary of the Interior and President Donald Trump." Secretary Ryan Zinke's Interior Department is "scheduled to issue recommendations to the president next week regarding the designation of 27 national monuments, following an executive order earlier this spring to review them."

Additional coverage of the review of national monuments was provided by the Ventura County (CA) Star (8/17, James), the Palm Springs (CA) Desert Sun (8/17, James), the Santa Barbara (CA) Edhat (8/17, Hintzen), and The Atlantic (8/17, Meyer).

Gazette Opinion: No Monumental Changes. In an editorial, the Billings (MT) Gazette (8/17) urges Interior Secretary Ryan Zinke to not make to recommendations for "possible reductions or elimination of protections for 27 federal areas that previous presidents set aside as treasured national monuments." The paper notes that "Zinke has declared himself a Teddy Roosevelt Republican." The Gazette urges Zinke to "take that president's advice and strongly recommend that Donald Trump let our national monuments be."

Additional commentary appeared in the Huffington Post (8/17, Bryce, Contributor), the San Gabriel Valley (CA) Tribune (8/17), the Whittier (CA) Daily News (8/17), the Pasadena (CA) Star-News (8/17), and SNEWS (8/17, Cloos).

Birders And Naturalists Ponder The Fate Of The Greater Sage Grouse.

The New York Times (8/18, Axelson) reports that "a revision to the wildlife management plans for sage grouse in the West recently announced by Interior Secretary Ryan Zinke may mean more oil and gas drilling near sage grouse leks soon – and a new round of industry-versus-conservationist skirmishes over an issue that many thought had been settled." On June 8, Zinke "announced that the sage grouse plans will be reviewed to 'protect sage grouse and its habitat while also ensuring conservation efforts do not impede local economic opportunities' to follow through on President Trump's executive order on energy independence." On August 7, Zinke "issued the order to revise the sage grouse plans, including modifying the policy on fluid-mineral leasing and development."

The Feds Should Stop Meddling With Colorado's Sage Grouse. In an op-ed for the Denver Post (8/17, Schafer), Luke Schafer, the West Slope director for Conservation Colorado, criticizes Interior Secretary Ryan Zinke for going "against the wishes of our Gov. John Hickenlooper, a Democrat, and Wyoming's Gov. Matt Mead, a Republican, in announcing that he is taking steps to unravel the collaborative plans put in place in 2015 to protect the Greater sage grouse." According to Schafer, "these plans involved years of Colorado-style hard work, in which ranchers, conservationists, land managers, and the oil and gas industry came together to create plans that saved the sage grouse from being listed on the Endangered Species Act." Schafer asserts that "Zinke's attempts to undermine the 2015 sage grouse plans are an affront to Westerners who value collaboration, counterproductive to the cause of saving sage grouse, and antithetical to established science." He concludes that "Zinke is snatching defeat from the jaws of victory by undermining all of our collective hard work and placing the bird back under the threat of the need of an Endangered Species Act listing."

Cabinet's Silence On Trump's Comments Disturbing To Agency Employees.

CNN (8/17, Marsh, Wallace) reports that "days have passed since President Donald Trump equated white supremacists and neo-Nazis with counterprotesters at a Charlottesville, Virginia rally that sparked violence over the weekend, the President's words are still rippling across the federal workforce at government agencies." Some career employees in cabinet agencies are "deeply disturbed by silence or what they perceive as weak statements, from the Cabinet members who lead their agencies." Notably, Interior Secretary Ryan Zinke has issued a

statement saying, "The racism, bigotry and hate perpetrated by violent white supremacist groups has no place in America. It does not represent what I spent 23 years defending in the United States military and what millions of people around the globe have died for." The statement added "We must respond to hate with love, unity and justice. I fully support President Trump and Attorney General Sessions in uniting our communities and prosecuting the criminals to the fullest extent of the law."

Interior Senior Executives Left In The Dark Amid Reorg, Reassignments.

Federal News Radio (DC) (8/17, Ogrysko) reports that "some of the Interior Department's longest-tenured and most experienced career executives say they're feeling undervalued and overlooked as the agency begins a major effort to restructure and reorganize." The article notes that "their criticisms come as Interior political leadership charges forward with a major reorganization effort that includes the reassignment of 30-to-50 senior executives back in June and another round of job transfers expected in the next few weeks." Several Interior sources said "that the most recent round of reassignments created a 'chilling effect' in the department, and they fear how the reorganization effort will impact the workforce when the department's executive cadre has had 'absolutely no involvement whatsoever' in crafting the agency's plans."

Months Into Office, Trump Has Yet To Appoint Key Agency Watchdogs.

CBS News (8/17, Watson) reports that President Trump has "only nominated one watchdog to fill the 13 current vacancies among inspectors general, even though he pledged to 'drain the swamp' during his campaign." Trump's "inaction...has some government integrity groups concerned." The article notes that the Interior Department "hasn't had a permanent IG since February 2009."

Mead On Turning Down Trump Job: 'I Made The Right Choice'.

The Casper (WY) Star-Tribune (8/17, Rosenfeld) reports that Wyoming Gov. Matt Mead "said he has no regrets about withdrawing his name from consideration for Interior Secretary in the Trump administration last year." In an interview, "Mead said that in addition to a number of standard considerations, such as not wanting to relocate his family to Washington, D.C., he was also concerned about handling potential policy differences with President Donald Trump." Mead said, "I have some disagreements with President Trump and I'm sure in Interior ... I would feel strongly about certain areas and I don't know how — trying to watch it from afar — how that works out when those disagreements come up." According to the article, "Mead was contacted by Trump transition officials last fall about whether he was interested in the Interior job and acknowledged that it was far from certain he would have been offered the job if had been kept his name in the running."

Climate Advisory Group Died Quietly.

E&E Publishing (8/17, Doyle, Patterson) reports that the Advisory Committee on Climate Change and Natural Resource Science, which was established in 2013, is "dead for now," and "if it's revived by the Trump administration, it will likely have a new mission." According to Interior officials, "the panel has been stalled as the new administration considers what to do with advisory groups more broadly." However, "if it's revived, Interior officials signaled it will have fewer members and a different objective."

UM Accepted As Partner In Northwest Climate Science Center Program.

The Missoula Current (MT) (8/17) reports that "as a result of a rigorous scientific review," the Interior Department accepted University of Montana "as an official partner in the Northwest climate science consortium, along with Boise State, Washington State and Western Washington universities." Tom DeLuca, dean of the College of Forestry and Conservation at UM, "said Thursday that the program and its partners look to develop measurable science to protect natural resources from climate change." DeLuca said, "Our college leverages global and regional climate information for specific sectors – from local and regional partnerships with food producers, to global modeling efforts. This is a great opportunity for us to help stakeholders adapt climate products to their needs through the center."

Commissions Sued After Meetings With Interior Secretary.

The AP (8/17) reports that "a Utah group is suing two county commissions after private meetings with Interior Secretary Ryan Zinke." The Southern Utah Wilderness Alliance's lawsuit "against Kane and Garfield's commissions claims their May 10 meetings with Zinke violated open meeting

laws because they were not posted." Garfield County Commission Chairman Leland Pollock called the allegations in the lawsuit "frivolous."

Comment Period Closes On Mining Moratorium.

The Duluth (MN) News Tribune (8/17, Erickson) reports that "Thursday marked the last day of an extended public comment period for people to weigh in on a U.S. Forest Service's proposal to halt mining near the Boundary Waters Canoe Area Wilderness for at least two years, and conduct an environmental review of potential copper-mining impacts." According to the article, "upon completion of the environmental impact statement — barring other action to overturn the moratorium – Interior Secretary Ryan Zinke will make the call on whether or not the two-year halt on mining should extend to 20 years."

Additional Coverage: Virginia To Receive $1 Million In Federal Funding For Wildlife Conservation Projects.

Additional coverage of the funds awarded through the State Wildlife Grants and Tribal Wildlife programs was provided by the Augusta (VA) Free Press (8/17) and KTOO-FM Juneau, AK (8/17, Desroches).

Long-term Commitment To California's Water Resources Is Essential.

In commentary for the Los Angeles Times (8/17, Friedman), California Assemblymember Laura Friedman writes that "to protect both water and National Parks and in response to increasing threats to the California desert's national parks, national monuments and groundwater supplies," she recently introduced Assembly Bill 1000 – the California Desert Protection Act. According to Friedman, the legislation "strengthens environmental protections in the ecologically fragile Mojave Desert and ensures that future water transfers from groundwater basins underlying desert lands do not adversely affect the region's natural or cultural resources, including groundwater resources or habitat." Friedman points to "a series of direct challenges from the Trump administration toward existing federal protections to the California desert," including a water project proposed by Cadiz Inc., as an impetus of the bill.

Lawmakers Should Stop Looking To The Energy Sector For More Federal Revenue.

Independent Institute research director and Utah State University Huntsman School of Business J. Fish Smith Professor in Public Choice William F. Shughart II argues in The Hill (8/17, Shughart) "Pundits Blog" that "a remarkable rise in America's energy production and the creation of more than one million jobs" has presented a new challenge as oil and natural gas companies wrestle to hold on to those gains. He argues that the progress won "thanks to hydraulic fracturing" could "be cut short, however, if Congress singles out the industry by removing certain provisions of the tax code." He urges Congress and the White House to "show an inclination to raise taxes on energy companies" as "raising effective tax rates on the oil and gas industry by denying credits and deductions available to most other businesses could send us down the wrong path, and it might not be possible to correct course fast enough."

Bureau Of Indian Affairs

Eastern Pequots Call State's Third-casino Law 'Unconstitutional'.

The New London (CT) Day (8/17, Hallenbeck) reports that "the Eastern Pequot Tribe on Thursday decried Gov. Dannel P. Malloy's signing in June of legislation granting the Mashantucket Pequot and Mohegan tribes the exclusive right to build the state's third casino on non-reservation land in East Windsor." In a statement, the Easterns claim Malloy's decision to sign Public Act 17-89 is "cloaked in hypocrisy and is unconstitutional." The statement "affirms legal arguments raised by other third-casino opponents – MGM Resorts International and the Schaghticoke Tribal Nation – who have claimed the legislation grants the Mashantuckets and the Mohegans 'an unfair monopoly on commercial gaming.'"

Bureau Of Land Management

There's A New Arctic Drilling Battle Brewing...and It's Not In ANWR.

KTOO-FM Juneau, AK (8/17, Harball) reports that "a series of promising oil discoveries and a

recent move" by the Trump Administration mean the National Petroleum Reserve-Alaska is "about to get a lot more controversial." The article notes that "at an oil and gas conference in Anchorage this May, Interior Secretary Ryan Zinke signed an order that, among other things, requires a review of the Obama administration's plan for managing NPR-A." The article says that "it wasn't clear exactly what that meant until last week, when the Interior Department sent out a call asking which parts of the Reserve should be opened up to oil and gas leasing."

Stewart Introduces Bill To Protect Sage-grouse And Mule Deer Habitat.

The St. George (UT) News (8/17) reports that Reps. Chris Stewart and Scott Tipton "have introduced the Sage-Grouse and Mule Deer Habitat Conservation and Restoration Act, a bill that would streamline the approval process for vegetation management projects to protect or restore the habitat of the sage-grouse and mule deer." According to Stewart, the legislation would "allow the Bureau of Land Management to quickly engage in habitat restoration and proactive vegetation management projects to protect the species and improve ecological conditions."

Judge Delays Ruling On Challenge Of Red Rock Canyon Development.

The Las Vegas Review-Journal (8/17, Davidson) reports that Clark County District Court Judge Jerry Wiese "declined to rule from the bench Thursday on motions to dismiss a lawsuit challenging plans to build more than 5,000 homes atop a hill bordering the Red Rock National Conservation Area." Wiese told lawyers "representing Clark County, mining company Gypsum Resources and environmental nonprofit Save Red Rock that he will make a ruling within one month." According to the article, "the judge appeared hesitant whether to let the case continue because Gypsum Resources is several steps from being able to break ground." First, the company still "needs permission from the U.S. Bureau of Land Management to build a road that would connect the development to state Route 160 on federal land."

Jury In Bunkerville Standoff Case To Resume Deliberations Monday.

The Las Vegas Review-Journal (8/17, Ferrara) reports that "after more than two days of deliberation, jurors are expected to return Monday in the retrial of four men facing federal charges in the 2014 armed standoff in Bunkerville." They were "sent home at about 4:30 p.m. Thursday and are expected to resume deliberations Monday morning, defense attorneys said."

Bureau Of Ocean Energy Management

Governor Urges Trump To Drop Virginia From Offshore Drilling Plan.

Reuters (8/17, Gardner) reports Virginia Governor Terry McAuliffe is urging the Trump Administration to exclude the state from a federal offshore oil and gas drilling plan, over concerns about revenue sharing and environmental issues. In a letter sent to Kelly Hammerle, the national program manager of the BOEM, McAuliffe said he could not trust President Trump to share revenues because he had proposed rescinding the revenue sharing program with Gulf Coast states where drilling already occurs. He also said the Administration is also working to cut funding "from the very agencies that would be charged with protecting Virginia's coastal environment in the event that exploration went forward."

The Hill (8/17, Henry) reports McAuliffe had previously said he could support offshore drilling if the federal government expanded a royalty sharing program that would supply coastal states with the revenue gained from drilling operations. E&E Publishing (8/17) reports executive director Miles Morin of the Virginia Petroleum Council, a division of the API, said that "shutting Virginia off to this economic engine would be short-sighted."

Also reporting the AP (8/16), the Richmond (VA) Times-Dispatch (8/17), the Hampton Roads (VA) Virginian-Pilot (8/17, Mayfield), Newport News (VA) Daily Press (8/17, Holtzclaw), the Roanoke (VA) Times (8/17, Zullo), and WTKR-TV Norfolk (VA) Norfolk, VA (8/17).

Connelly: West Coast Governors Tell Trump: No Oil, Gas Leases Off Our Coast. Joel Connelly writes in his column for the Seattle Post-Intelligencer (8/17, Connelly) that the governors of California, Oregon and Washington told Interior Secretary Ryan Zinke that oil and gas leasing must not be allowed in the sensitive marine waters off the West Coast. Govs. Jerry Brown, Kate Brown and Jay Inslee wrote, "The people of our states understand that the looming catastrophe of unabated climate change requires our nation to move away from unfettered fossil fuel consumption and towards a more prosperous, sustainable and secure clean energy economy." They argue, "A sizeable spill anywhere along our shared coast would have a devastating impact

on our population, recreation, natural resources and our ocean and coastal-dependent economies."

Christie Administration Opposes Trump's Plans For Offshore Drilling In Atlantic Ocean. Politico (8/16, Landergan) reports in continuing coverage that the Christie Administration submitted comments to the BOEM opposing President Trump's plans to permit offshore drilling in the Atlantic Ocean. Department of Environmental Protection Commissioner Bob Martin said that offshore drilling would pose too many "unacceptable risks" to the environment, the public's safety and the state's economy. He wrote, "New Jersey has consistently and steadfastly opposed any industrialization of our coast, including the exploration and development of offshore oil and natural gas resources, nor into any portion of the Atlantic Ocean that could negatively impact New Jersey's precious natural resources." KYW-TV Philadelphia (8/17, Madden) reports that while Christie is out of the country on vacation, he tweeted that he is "delivering on my promise" to oppose offshore drilling. Jeff Tittle, head of New Jersey's Sierra Club, praised the opposition, but said Christie should take his opposition further. Tittle said, "He did come out against drilling in the mid-Atlantic which would also include Maryland and Virginia and also New York, but we still have concerns that there's potential for drilling off North Carolina." NJ Spotlight (8/17, Johnson) reports Martin wrote, "Given the role of New Jersey's coastal waters in our economy, the National OCS program would put at risk not only our coastal economy but a significant portion of our statewide economy." Cindy Zipf, executive director of Clean Ocean Action, applauded Christie for his opposition.

Additional coverage was provided by the Cape May County (NJ) Herald (8/17). Commentary appeared in the Morristown (NJ) Daily Record (8/17) and My Central Jersey (8/17).

House Lawmakers Push Interior To Consider All U.S. Waters. E&E Publishing (8/16) reports more than 100 members of the House wrote a letter to Interior Secretary Ryan Zinke to urge the department to consider all 26 planning areas in the outer continental shelf in the Administration's new five-year leasing plan for offshore oil and gas exploration.

Desperately Seeking Zinke's Attention.

Politico Morning Energy (8/17, Adragna) reports Thursday was "the last day for public comments on BOEM's push to write a new five-year offshore drilling plan." According to the article, "nearly 51,000 comments have already poured in as President Donald Trump's administration is expected to begin the two-to-three year process of writing a plan that would open parts of the Gulf of Mexico and Atlantic Ocean as well as Alaska's Chukchi Sea, Beaufort Sea and Cook Inlet areas to drilling opportunities."

Additional coverage was provided by the Hilton Head Island (SC) Packet (8/17, Angst).

Interior Department Poised To Approve Arctic Oil-Drilling Island.

The Washington Examiner (8/17, Siciliano) reports that the Interior Department "stands poised to approve an energy company's proposed plan to build a gravel island off the coast of Alaska to begin drilling for Arctic oil, while admitting that the move would contribute to climate change." The Bureau of Ocean Energy Management on Wednesday "released its draft environmental impact statement for the proposed Liberty Project, saying the effects of the oil-drilling island on the surrounding ecology would be negligible or minor." The Hilcorp energy company is proposing to "build a small, artificial gravel island in the 19 feet of shallow federal waters in the Beaufort Sea, which is about 20 miles east of Prudhoe Bay, a major hub for drilling in the state."

Additional coverage was provided by KTOO-FM Juneau, AK (8/17, Harball).

Bureau Of Reclamation

With A Crucial Vote Nearing, Gov. Jerry Brown's Detla Tunnels Project Is Struggling To Win Over Some Agricultural Groups.

The Sacramento (CA) Bee (8/17, Kasler, Sabalow) reports that "as California water agencies prepare to vote next month on paying for the tunnels, which are supposed to improve water deliveries to the southern half of the state, the stark difference between urban and rural water users' expected costs illustrates one of the project's main stumbling blocks." For those in Los Angeles, "the cost of building the Delta tunnels might raise your water bill by as little as $2 a month or less – no more than a latte, to quote one of the project's main cheerleaders in Southern California." However, farmers on the west side of the San Joaquin Valley could see an increase of "hundreds of dollars per acre-foot of water." According to the article, "while the controversial

project is moving through the permit process, it can't break ground unless a solid bloc of south-of-Delta water agencies, urban and rural alike, commits to paying the $17 billion tab," and "it's far from certain that all the major water agencies will sign on."

Water Authority To Fund Conservation Work In Mexico.

The Las Vegas Review-Journal (8/17, Brean) reports that the Southern Nevada Water Authority "plans to spend up to $7.5 million in Mexico over the next 10 years in exchange for more Colorado River water." Authority board members "unanimously approved the payments Thursday as they gave their blessing to a sweeping water-sharing agreement the U.S. and Mexico are expected to sign next month." Under the new pact, known as Minute 323 to the Mexican Water Treaty of 1944, "the authority, the U.S. Bureau of Reclamation and water agencies in Arizona and California would provide $31.5 million for water efficiency improvements in Mexico through 2026," and "in return, the contributing agencies would share 229,100 acre-feet of Colorado River water, which is almost enough to supply the entire Las Vegas Valley for one year."

Fish And Wildlife Service

Proposed Rocky Flats Visitor's Center Renews Debate Over What To Do With Former Nuclear Site.

KUNC-FM Greeley, CO (8/17, Buckley) reports that "unless a federal court intervenes, a visitor center will open at the Rocky Flats Wildlife Refuge in Golden in the summer of 2018." According to the article, "five groups are suing the Fish and Wildlife Service over the center: the Rocky Mountain Peace & Justice Center, Candelas Glows/Rocky Flats Glows, Rocky Flats Right to Know, Rocky Flats Neighborhood Association and the Environmental Information Network (EIN) Inc." The groups have "asked a federal judge to halt building on the site, claiming it is not safe for public access."

New Refuge Boating Plan Receives Positive Feedback.

The Havasu (AZ) News-Herald (8/18, Walters) reports that "there were only a handful of comments collected during a six-hour public comment meeting on the Havasu National Wildlife Refuge's newest draft compatibility determination, a far cry from last year's session that saw about 500 people turn out for an earlier draft." According to Havasu National Wildlife Refuge Manager Richard Meyers, "of the few comments reviewed prior to Thursday's meeting, most of the feedback received was 'overwhelmingly positive.'" Meyers said, "The mayor and other pillars of the community like the Marine Association, have spoken in support of it, which has helped."

Biddeford Officials Sell Land Off Mile Stretch Road.

The Biddeford-Saco-OOB (ME) Courier (8/17, McPherson) reports that the United States Fish and Wildlife Service will "purchase two parcels of land along Mile Stretch Road in Biddeford Pool as part of its ongoing conservation efforts." The property "totaled 1.34 acres and will be added to the Rachel Carson National Wildlife Refuge." The city of Biddeford will receive $23,000 once the agreement is finalized.

Hornshell Mussel Endangered Designation On Hold.

The Del Rio (TX) News Herald (8/18, Tackett) reports that the U.S. Fish and Wildlife Service is "extending its final determination as to whether to or not to list the Texas Hornshell Mussel, which habitats the Devil's River, as an endangered species."

National Park Service

Put-In-Bay Township Park District To Receive $325,000 From Interior.

The Port Clinton (OH) News Herald (8/17) reports that the National Park Service "announced that it intends to award a $325,000 cooperative agreement to the Put-In-Bay Township Park District for the restoration of coastal wetland and wet woods at the Lake Erie location." According to the NPS, "the objective of this Agreement is to restore coastal wetland and wet woods in South Bass and Middle Bass Islands in Lake Erie."

Swains Lockhouse In Potomac To Be Renovated With National Park Service Grant.

Bethesda (MD) Magazine (8/17, Zimmermann) reports that "Swains Lockhouse in Potomac—a one-story structure built in 1832 and considered critically in need of maintenance—received a $100,000 grant from the National Park Service, the C&O Canal Trust announced Tuesday." The grant will be "matched by another $108,160 raised by the C&O Canal Trust, the Friends of Historic Great Falls Tavern and the C&O Canal Association."

Vietnam Veterans Memorial Vandalized.

WTTG-TV Washington (8/17) reports that "the Vietnam Veterans Memorial was vandalized with a red, waxy material Wednesday evening, according to officials." The National Park Service "said the material, believed to be a red crayon or lipstick, was discovered at about 8:45 p.m." The agency "said the material was successfully removed."

Also reporting are WRC-TV Washington Washington (8/17, Stabley) and WTOP-FM Washington Washington (8/17, Moore).

Cities Brace For White Nationalist Rallies Post-Charlottesville.

The Washington Times (8/17, Noble) reports that San Francisco Mayor Ed Lee "accused the National Park Service of issuing a permit for an Aug. 26 Patriot Prayer rally without taking public safety concerns into proper consideration." Lee said in a letter to Park Service officials, "San Francisco has a long and storied history of championing freedom of expression and First Amendment rights, but as we have witnessed in recent months, these types of rallies can quickly turn hateful and violent with tragic consequences." He wrote, "Events in Charlottesville and Seattle are proof that rallies such as these attract extreme and racist fringe groups who only want to provide malice and incite brutality."

Also reporting are the San Francisco Chronicle (8/17, Ting), Newsweek (8/17, Lanktree), KPIX-TV San Francisco San Francisco (8/17, Caen), and KXTV-TV Sacramento (CA) Sacramento, CA (8/17, Renee).

Confederate Monuments To Stay At Gettysburg Battlefield.

The AP (8/17) reports that "officials with the National Park Service said the Confederate monuments at Gettysburg National Military Park in Pennsylvania will not be removed from the battlefield." Katie Lawhon, senior adviser for the park service's Gettysburg battlefield office, said that "the site-specific memorials are important, and the park service's job is to historically and objectively tell the stories the monuments commemorate."

Grand Teton Park To Outshine Bigger Yellowstone For Eclipse.

The AP (8/18, Moen) reports for the total solar eclipse Monday, Grand Teton National Park is "expected to outshine, and overshadow" its neighbor, Yellowstone National Park. Grand Teton is "directly in the path of the eclipse — where the sun is completely blocked by the moon," while Yellowstone will "see just a partial eclipse." Grand Teton spokeswoman Denise Germann said, "We anticipate it to be the busiest day in the history of the park. We're trying to create realistic expectations for visitors as well as our staff that there's going to be congestion, there's going to be traffic gridlock."

New Citizens Taking Oath At Women's Rights National Historical Park In Seneca Falls.

The Finger Lakes (NY) Times (8/17, Buchiere) reports that "on Friday, 20 people will become new U.S. citizens, and they'll do it at a place where the movement to obtain additional rights for women, including voting, gained steam." According to the article, "the candidates will state the oath of citizenship and be presented certificates by the U.S. Citizenship and Immigration Services at the Women's Rights National Historical Park." It is "one of many naturalization ceremonies taking place in national parks during Citizenship Week under a partnership between the National Park Service and U.S. Citizenship and Immigration Services."

Severed Septic Line Sparks Closure Of Jones Hole Creek In Dinosaur National Monument.

The Salt Lake (UT) Tribune (8/17, Semerad) reports that "the popular fishing waters of Jones Hole Creek in eastern Utah's Dinosaur National Monument have been closed to recreation after a broken septic line fouled parts of the waterway." In an announcement Thursday, National Park Service officials "said the temporary closure included bans on angling, hiking and swimming along a 4.25-mile length of the creek and adjacent trail, extending from Jones Hole Fish Hatchery to the Green River."

National Park Service Considering Dismantling Part Of Bridge At Settles Bridge Park In Response To Recent Drownings.

The Gwinnett (GA) Daily Post (8/17, O'Brien) reports that "in the past two weeks two young men have died jumping off the bridge at Settles Bridge Park and into the Chattahoochee River." Now the Chattahoochee River National Recreation Area is "talking to the State Preservation Office about partially dismantling the bridge to keep people off of it." According to the article, "since the structure is considered a 'cultural resource,' the CRNRA needs the State Preservation Office's blessing before it can tamper with the bridge's structure."

Dinker-Irvin Cottage Listed On National Register Of Historic Places.

The Coastal Point (DE) (8/18, Titus) reports that the Dinker-Irvin Cottage has been listed in the National Register of Historic Places.

Additional Coverage: U.S. Parks End Bottled-Water Ban.

Additional coverage that the National Park Service is discontinuing its policy allowing a ban on water bottles in national parks was provided by the Washington Post (8/17, Fears), the Wall Street Journal (8/17, Ma), and Plastics News (8/17, Johnson).

Eclipse, Wildfires Bring Focus To Smokies' Fragility.

In an op-ed for the Knoxville (TN) News Sentinel (8/17, Skelton), Will Skelton, a retired attorney, writes that "after last year's devastating wildfires, the Great Smoky Mountains National Park is back in business, and there is no better reason to visit than the upcoming once-in-a-lifetime solar eclipse." He notes that "on Aug. 21, the eastern portion of the park will be within the path of the total eclipse and thousands of visitors are expected for this unique event." Skelton also calls for tackling the backlog in maintenance at national parks.

Office Of Insular Affairs

Tillerson, Mattis: Military Options Remain For North Korea.

The AP (8/17, Pennington) reports Secretary of State Tillerson and Defense Secretary Mattis "sought Thursday to reinforce the threat of possible US military action against North Korea" after chief strategist Steve Bannon "essentially called the commander-in-chief's warnings a bluff." After security talks with Japanese officials in Washington, Tillerson stressed that the US "seeks a peaceful solution to the standoff," but that US-led campaign of economic pressure and diplomacy "needs to be backed by potential military consequences." Washington is "prepared militarily" to respond, if necessary, Tillerson said. The AP notes that "neither Tillerson nor Mattis responded directly" to Bannon's argument in an interview published Wednesday that there's no military solution to the North Korean threat.

Bloomberg Politics (8/17, Wadhams) too says Tillerson and Mattis "said the prospect of US military action remains on the table...rejecting an assertion by...Bannon that there's no such option." Bloomberg says their remarks "made clear that they spurned Bannon's comments" in an interview that there was no "military solution here, they got us." While Tillerson "said he wouldn't comment on Bannon's statement," he "pointedly" added, "Our approach has been endorsed by the president." Politico (8/17, Nelson) likewise calls their remarks "a direct rebuttal" to Bannon.

The Washington Post (8/17, Gearan, Morello) reports Tillerson said Trump's threats are a means to "remind the regime" in Pyongyang what is at stake. "I think the president just felt it was necessary to remind the regime of what the consequences for them would be if they chose to carry out those threats," Tillerson said. Mattis likewise warned Pyongyang that both the US and Japan "will deter, and if necessary defeat, any threat. Any initiation of hostilities will be met with an effective and overwhelming response." The Post notes that Tillerson "declined to comment on reported remarks from...Bannon."

A front-page report in the New York Times (8/16, A1, Perlez, Choe) says the Administration "plunged America's Asian alliances into new confusion Thursday with conflicting signals over how to counter North Korea's nuclear threat." The Times says the "mixed messages about North Korea policy added to the sense of disarray coming from the White House, where Mr. Trump appeared to have all but forgotten the crisis a week after he threatened an ad hoc 'fire and fury' response to North Korea's leader, Kim Jong-un, if he menaced the United States."

On its front page, the Washington Post (8/17, A1, DeYoung) reports Mattis' remarks "fell between President's Trump's warning last week...and this week's remark by...Bannon that North

Korea was a 'sideshow' to which there was 'no military solution.'" The Post says that in the "whirlwind of successive controversies and crises that have become the hallmark of the Trump administration, domestic strife in Charlottesville has quickly overtaken last week's worry about war with North Korea," but US partners in the region and beyond "have continued to seek reassurance that the United States will defend them as vigorously as it will protect itself, if necessary, while refraining from initiating a shooting war on its own."

Reuters (8/17, Torbati) reports Tillerson said the US "wanted dialogue with Pyongyang, but only if it were meaningful." Said Tillerson, "Our effort is to cause them to want to engage in talks but engage in talks with an understanding that these talks will lead to a different conclusion than talks of the past." Another Reuters (8/17) report says Tillerson also told reporters the US would honor its defense treaty agreements with Japan "without reservation."

Department Of Interior Helps With Transition.

The Marshall Islands Journal (8/18) reports that Interior Acting Assistant Secretary Nikolao Pula "made available two technical assistance grants totaling $467,095 to continue support for the Micronesia Resource Center One Stop Shop on Guam and the One Stop Center in Hawaii." Also, "a third grant for $63,249 will be used to strengthen organizations providing family services on Guam, and a fourth grant for $77,349 will support similar efforts in Springdale, Arkansas, which large communities of Marshallese migrants now call home."

US Geological Survey

Beach Erosion A Growing Threat On California Shoreline.

The San Francisco Chronicle (8/17, McPhate) reports that "a study this year by the U.S. Geological Survey predicted that as much as two-thirds of Southern California's beaches could be lost by the end of the century." Patrick Barnard, a geologist and author of the report, pointed to "rising seas and intensified storms, both linked to climate change, as well as hundreds of river dams that are blocking the flow of sand to beaches." Barnard said, "The open question on the climate side is, 'How quickly is this going to happen? Is it going to be 30 years or 50 years?' But we know it's happening. And we know it's coming."

Scientists Work On Math Model To Better Predict Spread Of CWD.

The Minneapolis Star Tribune (8/16, Nelson) reports that "a new, more accurate way to forecast the growth and expansion of chronic wasting disease (CWD) in whitetail deer also could help predict the spread of invasive species such as zebra mussels or the Ebola and Zika viruses, according to researchers." Daniel Walsh, "a U.S. Geological Survey scientist based in Madison, Wis., and an author of a paper describing the newly developed method," said that "the forecasting tool presents the probability of CWD infection in a heat map-like format, with darker 'hot spots' showing where the disease is growing at a faster rate in a study area in southern Wisconsin." Walsh said, "We can model the growth of the disease in an area and how it's spreading through an area. That allows us to look at what's affecting growth in the disease in the area. The other nice thing is that we can look at past management actions to see which ones may be most efficacious or most effective at slowing growth or preventing spread. That's how we think it could be useful."

Top National News

Trump Criticizes Removal Of "Beautiful Statues And Monuments."

Continuing coverage of the aftermath of President Trump's remarks on Charlottesville focuses on his Thursday morning tweets on the removal of Confederate monuments. While some analyses say it was a step away from the racial controversy of the past few days, more link it to Trump's earlier comments that have been portrayed in the media as a defense of white supremacists. Growing Republican criticism is touched on, but is not central to the coverage.

The President wrote on Twitter, "Sad to see the history and culture of our great country being ripped apart with the removal of our beautiful statues and monuments. You can't change history, but you can learn from it. Robert E Lee, Stonewall Jackson – who's next, Washington, Jefferson? So foolish! Also the beauty that is being taken out of our cities, towns and parks will be greatly missed and never able to be comparably replaced!"

Hallie Jackson reported on NBC Nightly News (8/17, story 3, 1:45, Holt) that the President's "response to the domestic attack in Charlottesville is still generating fallout as the President now laments the removal of Confederate monuments." The CBS Evening News (8/17, story 5, 1:50, Brennan) reported that the President "bemoaned the removal of what he called 'beautiful Confederate statues,' and said America history is 'being ripped apart.' In a statement, Republican Sen. Lindsey Graham urged the President to stop. 'You are now receiving praise from some of the most racist and hate-filled individuals and groups in our country,' he said, 'please fix this.'" On ABC World News Tonight (8/17, story 4, 1:55, Muir), Cecilia Vega reported, "President Trump under mounting fire for his leadership in the wake of Charlottesville. … The President's words alarm many top Republicans."

The AP (8/17, Lemire, Superville) reports, "With prominent Republicans openly questioning his competence and moral leadership," the President "burrowed deeper into the racially charged debate over Confederate memorials and lashed out at members of his own party. … Out of sight, but still online, Trump tweeted his defense of monuments to Confederate icons," and "berated his critics who, with increasingly sharper language, have denounced his initially slow and then ultimately combative comments" on Charlottesville. The Washington Post (8/17, Nakamura) reports that while "the political backlash to Trump's handling of the situation has left some White House advisers dispirited," the President "appears to have been emboldened to fight back against his critics and create a cultural wedge issue over the matter that could rally his base of hard-core supporters." However, the Los Angeles Times (8/17, Bierman, Lauter) reports that "by his efforts to please the hard-right activists, the president is pushing mainstream supporters further away."

The New York Times (8/17, Sullivan, Haberman) reports that the President's Thursday tweets did appear "to shift attention away from his remarks that 'both sides' were to blame for the violence in Charlottesville, and instead focus the debate on the historical argument to keep the statues in place." Politico (8/17, Nelson) says the President "waded deeper...into the growing controversy surrounding statues and memorials dedicated to the Confederacy."

The Washington Post (8/17, Costa, Nakamura) writes, "A chorus of Republicans expressed alarm over Trump's words and their potential cost with voters" as "Democrats reacted with horror at Trump's enthusiasm for memorials to the Confederacy." Bloomberg News (8/17, House) reports that Senate Majority Leader McConnell and House Speaker Ryan "tried to distance themselves" from the President's remarks "by issuing statements condemning white supremacy. Neither mentioned the president." Bloomberg News says that their reluctance, and that of other top Republicans, "is the latest sign the party leaders remain unwilling to challenge even the president's most controversial remarks."

The Washington Post (8/17) editorializes, "Let's be clear. No one is talking about ripping the country apart – unless it's the president himself. The tons of Confederate iconography installed long ago were put there as part of an ideological campaign whose goals were to glorify men and women who betrayed the United States in the cause of human slavery and to marginalize descendants of the enslaved. ... To hail the 'beauty' of the statues is to ignore all that, possibly for short-term political advantage." The Wall Street Journal (8/17) says in an editorial that presidents need to choose their words carefully, and that there is no point to reopening a debate about the Civil War.

The Wall Street Journal (8/17, Bender, Kamp), McClatchy (8/16, Pugh), and The Hill (8/17, Fabian) also have reports.

The Economist, Time, New Yorker Covers Link Trump And Hate Groups. The Washington Post (8/17, Borchers) reports, "President Trump collects magazine covers, but he probably won't want to keep these." The latest cover of The Economist "depicts the president bellowing into a white, conical megaphone," while Time's new cover "features a boot-clad white man behind an American flag, held aloft at a 45-degree angle by a pole whose ornament is an outstretched hand, creating the effect of a Nazi salute." Axios (8/17, Treene) reports that the New Yorker also used Klan imagery on its new cover.

Plaque At Trump Golf Course Commemorates Civil War Battle That Did Not Happen. Rolling Stone (8/17, Chen) reports, "A 2015 report about a factually inaccurate plaque featured at Donald Trump's Northern Virginia Trump National Golf Club has resurfaced this week." The plaque reads, "Many great American soldiers, both of the North and South, died at this spot. The casualties were so great that the water would turn red and thus became known as 'The River of Blood.' It is my great honor to have preserved this important section of the Potomac River!" According to the 2015 New York Times report, "three historians asserted that no such battle or designation has ever been given to that spot."

NYTimes Considers Views Of "Trump's Black Friends." The New York Times (8/17, Alcindor,

Haberman) reports under the headline "How Do Trump's Black Friends Feel? It's Complicated" that "the furor that Mr. Trump has created with his equivocation" over Charlottesville "has refocused attention on the president's complex relationship with matters of race. Long before he embarked on his improbable political career, he had courted racial controversy, calling for the death penalty for five black and Latino teens who were later shown to have been wrongly convicted of a rape in Central Park, settling a Justice Department suit that charged the family business with housing discrimination and falsely accusing the nation's first black president of being born in Kenya." But "he made outsize efforts to hang out publicly with African-American celebrities," and "the few African-Americans in his inner circle...describe him as a 71-year-old man with fixed views and a cloistered history."

Pelosi Calls For Removal Of Confederate Statues From Capitol. The New York Times (8/17, Kaplan) reports that House Minority Leader Pelosi called Thursday for the removal of Confederate statues from the United States Capitol. Politico (8/17, Schor) reports, "Congressional GOP leaders have previously stated that decisions on replacing Capitol statues should rest with individual states, and [House Speaker] Ryan's office affirmed that stance earlier this week." The Washington Times (8/17, Sherfinski) also reports on Pelosi's remarks, and the Washington Times (8/17, McLaughlin, Sherfinski) says in an accompanying story that "at least a quarter of the 100 state statues that are part of what is known as the Statuary Hall collection commemorate slave owners."

NBC Nightly News (8/17, story 6, 2:15, Holt) reported on Pelosi's call for removal, while the CBS Evening News (8/17, story 7, 2:40, Mason) reported, "A new poll shows a majority of Americans, 62 percent, want Confederate statues to remain standing as historical symbols. Twenty-seven percent of those polled believed the statues should be removed because they're offensive."

Clarke Bill Would Require Renaming Of Military Installations Named For Confederate Generals. McClatchy (8/17, Douglas, Bergengruen) reports that Rep. Yvette Clarke (D-NY) "is drafting legislation to require the Pentagon rename any military installations named for Confederate generals." Clarke "has 10 co-sponsors, all House Democrats from New York and New Jersey."

LePage: Taking Down Confederate Statues "Just Like" Removing 9/11 Memorial. The AP (8/17, Whittle) reports that MaineGov. Paul LePage said that removing "Confederate figures is 'just like' removing a monument to victims of the 9/11 attacks." LePage added "that the white nationalist and far-left protesters in Charlottesville over the weekend were 'equally as bad' and 'disgusting.'"

Richmond Mayor Favors "Context" Signage For Confederate Monuments. In the Wall Street Journal (8/17), writer Dave Shiflett highlights a plan by Richmond, Virginia Mayor Levar Stoney to add what he described as "context" signage to Confederate monuments to "set the historical record straight."

Confederate Memorial Stands In Arlington National Cemetery. On its front page, the Washington Post (8/17, Shapiro) has a feature on the Confederate Memorial at Arlington National Cemetery, a "32-foot-tall bronze hymn to soldiers of a bygone past" and "a soaring testament to Southern pride, placed in Arlington nearly 50 years after the Civil War ended." While "there are many Rebel monuments on federal property," the Confederate Memorial "stands out, opponents say, for its location on sacred space in Arlington and its offensive depiction of slaves."

Lincoln Monument In Chicago Damaged. The Washington Times (8/17, Ernst) reports that a giant bust of Abraham Lincoln in Chicago's Englewood neighborhood "appears to have been damaged after someone...sprayed and ignited a flammable liquid."

Vice Editor Calls For Blowing Up Mount Rushmore. Breitbart (8/17, Munro) reports that Vice Magazine posted a piece by senior editor Wilbert Cooper which urged "Let's Blow Up Mount Rushmore," although the headline was later changed to "Let's Get Rid of Mount Rushmore." Breitbart says Cooper calls for "Americans' politics, culture, and history to be purified by political fire," writing, "Let's take with us the righteous ideas and beliefs and leave everything else on the pyre."

Red Sox Owner Advocates Renaming Yawkey Way Outside Fenway Park. The New York Post (8/17, Masisak) reports that Boston Red Sox owner John Henry told the Boston Herald he is "ready to lead the charge for renaming Yawkey Way, the famous street outside Fenway Park." The street is named after Tom Yawkey, who owned the franchise from 1933-76. Yawkey's team "was the last in the league to welcome a black player to its roster, a full 12 years after Jackie Robinson first suited up for the Dodgers."

Vespa: Progressives Seek To Erase American History. Matt Vespa writes in a piece for Townhall (8/17, Vespa) that "American progressives" are "engaging in their favorite pastime: erasing American history and slamming our founding. ... The removal of Confederate statues is

the backdoor to this nonsense."

Corker: Trump Yet To Demonstrate Necessary "Stability," "Competence."

Sharp criticism of President Trump by Sen. Bob Corker, delivered at the Rotary Club of Chattanooga, generated extensive media attention including reports on all three major network newscasts. Analysts cast Corker's broadside as evidence of an increasingly isolated chief executive in the wake of his comments on the Charlottesville incident. The Chattanooga (TN) Times Free Press (8/17, Flessner) indicates, however, that "the Tennessee Republican chided Trump" not just for "his comments about the fatal protest rally last weekend," but also for his "'hot rhetoric' about North Korea and his tweets criticizing fellow Republicans in the Congress." The CBS Evening News (8/17, story 4, 0:50, Brennan) showed Corker saying, "There needs to be radical changes taking place at the White House itself. ... The President...has not yet been able to demonstrate the stability, nor some of the competence, that he needs to demonstrate in order to be successful." As quoted by NPR (8/17), Corker added, "And we need for him to be successful. Our nation needs for him to be successful." ABC World News Tonight (8/17, story 5, 0:55, Vega) noted the senator also said, "I think our President needs to take stock of the role that he plays in our nation and move beyond himself. Move way beyond himself."

CNN (8/17) Editor-at-Large Chris Cillizza wrote "Corker is clearly hinting at the possibility that Trump is not simply misguided in some of his policies and pronouncements – but that he may be fundamentally unfit for the office that he currently holds," and Roll Call (8/17, Bennett) summed up Corker's words as "saying the president is driving the United States toward 'great peril' because he lacks the 'stability' and 'competence' for the country's highest office." Moreover, Business Insider (8/17, Relman) reported, "Corker went on to accuse the president of inspiring division for political gain." The Washington Times (8/17, Boyer) quotes the senator as saying, "Helping inspire divisions because it generates support from your political base is not a formula for causing our nation to advance, our nation to overcome the many issues we have to deal with right now."

Senior political analyst Mark Preston said on CNN's Situation Room (8/17), "I have never seen – and I spent a lot of times covering Capitol Hill – I have never seen anything like this in my life. In many ways, maybe it is showing us that...Trump really is not a Republican. Maybe...Trump is...Trump and he used the Republican Party as the vessel for him to get to the White House."

On the CBS Evening News (8/17, story 6, 1:35, Mason), John Dickerson said Corker "is not one of the usual suspects who are always criticizing the President," and that "the reason" his words are "so damning is this is a critique people have had about candidate Trump and then President Trump. ... These are problems, as Sen. Corker has identified themselves, that are in the man himself. He calls on the President to have some self-reflection. So if you're in the White House, you have to hope the President is listening." USA Today (8/17, Collins) reports that Corker "often advises Trump on foreign policy," and Bloomberg News (8/17, Blum, House) that his "criticisms are particularly notable because he has previously been a Trump ally and met with him before his inauguration to discuss the possibility of becoming secretary of State." In fact, said The Hill (8/17, Carney), Corker "got speculation as a potential vice presidential pick."

Jake Tapper said on CNN's The Lead (8/17) that "there are signs that...Trump's rhetoric this week is causing major distress among members on Capitol Hill in a way we have not seen before," and similarly calls Corker's criticism "remarkable" because he "is not one of the President's usual critics."

The Washington Post (8/17, Sullivan) refers to the "new and forceful round of criticism...from a leading Republican senator," who "took some pauses as he spoke, appearing to choose his words carefully." Reuters (8/17) speaks of "one of the most pointed attacks from a Republican official on...Trump," and the AP (8/17, Lardner) of "a stinging rebuke." The Washington Examiner (8/17, Quinn) similarly reported that "though Trump's comments drew the ire of his fellow Republicans, Corker is the first to offer such a blunt assessment of the president."

Political director David Chalian said on CNN's Anderson Cooper 360 (8/17) that while Corker's comments are "significant...we're going to have to separate out the kind of significance. ... Republicans overall are still with this President out in the country. That doesn't make Corker's break with him any less significant. It is incredibly significant. This is man who doesn't really delve into the daily political to-and-fro. He's very much a workhorse in the Senate and he's using language we've not heard."

To the Los Angeles Times (8/17, Mascaro), meanwhile, "Republicans in Congress have tried to stick with...Trump in hopes that despite politically damaging outbursts from the White House,

his pen would ultimately be able to sign their legislative agenda into law." But "in the aftermath of Trump's controversial response to the neo-Nazi rally in Charlottesville, Va., that promise seems ever more distant." Republicans "are now coming to grips with the reality that they are increasingly on their own."

Scott: Trump's "Moral Authority Is Compromised." ABC World News Tonight (8/17, story 5, 0:55, Vega) reported, meanwhile, that "sources close to Senate Majority Leader Mitch McConnell describe him as 'very concerned and very upset," though "McConnell's office denies that." Moreover, "the Senate's only African-American, Republican Tim Scott," said in an interview with Vice, "What we want to see from our President is clarity and moral authority. That moral authority is compromised when Tuesday happens. There's no question about that." NBC Nightly News (8/17, story 4, 1:40, Jackson) likewise showed footage of Scott's words as part of his story on Corker "excoriating" Trump.

On Twitter, Trump Takes On "Toxic" Flake, "Publicity Seeking" Graham. The Weekly Standard (8/17, Lifhits) reported Trump "fought back against lawmakers' criticism Thursday," using a series of tweets to describe Sen. Lindsey Graham as "publicity seeking" and Sen. Jeff Flake as "toxic." Wrote Trump, "Great to see that Dr. Kelli Ward is running against Flake. Jeff Flake, who is WEAK on borders, crime and a non-factor in Senate. He's toxic!" Trump also tweeted, "Publicity seeking Lindsey Graham falsely stated that I said there is moral equivalency between the KKK, neo-Nazis & white supremacists...and people like Ms. Heyer. Such a disgusting lie. He just can't forget his election trouncing. The people of South Carolina will remember!" Politico (8/17, Nelson) noted that "in a follow-up post to Twitter, the president also complained that his comments regarding the hate-fueled violence over the weekend had been purposely misrepresented to the public by the media." Wrote Trump, "The public is learning (even more so) how dishonest the Fake News is. They totally misrepresent what I say about hate, bigotry etc. Shame!"

The Washington Post (8/17, Nakamura) reports Flake wrote in a recently published book that "Republicans abandoned their principles in the face of Trump's unorthodox campaign and surrendered to the 'politics of anger,'" while Graham "was among the Republicans who criticized Trump for failing to offer a full-throated condemnation of the white supremacist rally in Charlottesville."

Politico (8/17, Wright) notes that as part of his criticism Thursday, "Corker took aim at Trump for using his Twitter feed to promote a Republican primary challenger to...Flake." Said Corker, "The White House would be well-served to embrace the character, the substance, of someone like Sen. Flake. ... He's one of the finest people I've served with."

Reuters, USA Today Analysis: Trump Alienating Senators Who Could Save Him From Impeachment. Reuters (8/17, Cowan) reports Trump "has stepped up his attacks on Republican senators, an approach he may regret if he is someday impeached and the Senate has to weigh charges against him stemming from an investigation into Russian meddling in the 2016 US election." Reuters adds that "more than half of the 11 Republicans on the Senate Judiciary Committee, which would be central to any proceeding to remove Trump from office, have tangled with the Republican president, including on Thursday when he fired off early-morning tweets."

USA Today (8/17, Kelly) similarly indicates that Trump "is alienating congressional Republicans who might otherwise be his biggest defenders in the ongoing probe of the Trump campaign's ties to Russia, political analysts say." Said Barry Burden, a professor of political science and director of the Elections Research Center at the University of Wisconsin, "Trump's criticism of the very people he would need to defend him are potentially his undoing down the road. ... They really have very little incentive to stand by him," Burden said. "Whether that would result in impeachment or some sort of censure motion, it's too soon to know. But I think most Republicans in Congress would be very content to see (Vice President) Mike Pence take Trump's place."

The Washington Post (8/17, Sullivan), at any rate, reports that yesterday, "Corker did not advocate specific steps Congress ought to collectively take to punish the president or compel him to change," and when "asked for his reaction to the push by Rep. Steve Cohen (D-Tenn.) to try to impeach Trump, Corker did not endorse the move."

In a column titled "History Will Remember The Republicans Who Stick Around," meanwhile, Eugene Robinson writes in the Washington Post (8/17) that "Trump has dropped all pretense and proudly raised the banner of white racial grievance," and "the time has come for Republicans in Congress to decide whether this is what they signed up for."

"Network Of Russian Propaganda Tools Amplified" Trump Tweet Slamming Flake. Under the headline "Russian Network Amplified Trump's Flake Criticism," USA Today (8/17, Dorell) reports that in the wake of Trump's tweet criticizing Flake, "a network of Russian propaganda tools

amplified the message across the twitterverse, following a pattern of sowing division in the US and in Europe. ... Later Thursday, 'Flake,' 'Phoenix' and 'Arizona' were among the top five trending topics under discussion by a network of 600 Twitter accounts that amplify messages developed by the Kremlin for the US audience. The list of accounts is compiled and tracked by a new database created by the German Marshall Fund of the United States, a Washington, D.C., think tank that promotes cooperation between North America and Europe."

Trump Offers Sympathy, US Help In Wake Of Deadly Terror Attack In Barcelona.

The terrorist attack in Barcelona largely dominated the news cycle, leading all three major network newscasts. Reports indicate ISIS has claimed responsibility for the slaughter, and that while two suspects are in custody, a manhunt continues for the driver of the van. Hours after the news broke, the President tweeted, "The United States condemns the terror attack in Barcelona, Spain, and will do whatever is necessary to help. Be tough & strong, we love you!" The Washington Post (8/17, Nakamura) reports "Trump's tweet...stood in sharp contrast to" his "reaction Saturday to an attack in Charlottesville," where he "blamed the actions of people 'on many sides.'" In its story on Trump's tweet, The Hill (8/17, Fabian) similarly indicated that the president has not described the Charlottesville incident a "terror attack." The President's reaction to yesterday's carnage also received coverage from all three broadcasts – although it merited only a sentence in reports from CBS and ABC. The CBS Evening News (8/17, story 4, 0:50, Brennan) briefly reported that Trump "condemned the Barcelona attack and offered US help," and ABC World News Tonight (8/17, story 4, 1:55, Muir) that he was "offering to do whatever is necessary to help." NBC and cable outlets, meanwhile, focused on a follow-up remark that was cast as "debunked" as well as "inflammatory" to Muslims.

The AP (8/17, Superville, Lee) reports the White House said Trump "was...briefed on developments in Spain by his chief of staff, John Kelly." First lady Melania Trump tweeted her "'thoughts and prayers' to Barcelona before the president condemned the attack." The Daily Caller (8/17, Athey) noted, meanwhile, that Secretary of State Tillerson "told terrorists Thursday regarding a Barcelona terrorist attack that the United States 'will find you and bring you to justice.'"

Catherine Herridge reported on Fox News' Special Report (8/17) that the US government has been "completely engaged" from the "moment that the attack happened." Intelligence officials are going through watch lists and other databases to see if the suspects identified by Spanish authorities are in their systems. Herridge noted that Spain is a visa waiver country, "which means they can travel freely into" the US without a visa. Former CIA officer Phil Mudd noted on CNN's Situation Room (8/17) that "a lot of Americans presumably were there in that area...visiting Barcelona, including six American...college basketball teams."

ABC World News Tonight (8/17, lead story, 3:10, Muir) reported on the "horrific scene playing out in Barcelona in an historic shopping district where many tourists visit. A driver jumping the curb and his van barreling through the crowd. Children believed to be among the victims tonight." Spanish Prime Minister Mariano Rajoy is calling the attack "jihadist terrorism." NBC Nightly News (8/17, lead story, 3:05, Holt) noted "ISIS is now claiming responsibility, saying it was carried out by one of its soldiers, but it offered no evidence." Spanish investigators are looking at the attack as "part of a wider plot," saying that it's related to an explosion at a house yesterday, "so what happened today doesn't look like it was the work of some lone actor with a van." Catherine Herridge similarly reported on Fox News' Special Report (8/17) that the explosion 90 miles from Barcelona is a "very important development because it suggests that we are dealing with multiple actors in this plot."

The CBS Evening News (8/17, lead story, 2:45, Mason) reported the attack by "a terrorist in a van" is the "latest in a string of attacks in Europe where vehicles are the weapon." Authorities have arrested two people, "but police have categorically stated they were not driving the van that mowed into pedestrians." The driver of the van is reportedly still on the run. ABC World News Tonight (8/17, story 2, 2:10, Muir) reported one of the two men in custody is 28-year old Moroccan-born Driss Oukabir, who authorities say "recently traveled to Morocco, arriving back in Spain just last Sunday, and then rented the van used in the attack." Oukabir claims someone stole his license, and that he is not involved in anyway. Another "terror suspect is dead." Jim Sciutto reported on CNN's Situation Room (8/17) that there was another incident in Barcelona "where a car rammed police at a police check point." A policeman who was injured in the incident killed that suspect, "but police not saying yet whether they know there is a connection between that incident and" the deadly van attack.

The New York Times (8/17, Walsh, Bolon, Karasz) reports that "in the past year, the Islamic

State has devoted resources to translating their channels and messages into Spanish." While "countries like France and Britain have repeatedly been named in Islamic State propaganda urging followers to plan and stage attacks, Spain has been less in the cross hairs." However, "the country has, however, been a transit point for recruits of the militant group, both for those going to Syria and those returning," and "Spanish police arrested nine people in April who they said may have been connected with deadly attacks in France and Spain." The Washington Times (8/17, Arostegui) quotes an unnamed "high-level Spanish police official" saying, "We have dismantled dozens of plots and conducted about 300 arrests and detentions of terror suspects over the last two years, but some were bound to get through."

The Washington Post (8/17, A1, Booth, Adam, Murphy) also reports "Spanish authorities had been worried about being a target, after having been spared mass-casualty terrorist violence since a 2004 attack on the Madrid rail system." ISIS "supporters celebrated the Barcelona attack on Thursday and promoted previous threats made against Spain, according to the SITE Intelligence Group." USA Today (8/17, Stanglin, Mir) notes that SITE "said the Amaq News agency, which is linked to the Islamic State, reported that the extremist group had claimed responsibility for the attack." The New York Post (8/17, Brown) also highlights the Amaq report.

The Los Angeles Times (8/17, Zavis, Rocha, Almadani) recounts that "the attack occurred on Las Ramblas, a street popular with tourists and lined with shops and stalls running through the center of Barcelona. It has a wide pedestrian path running down its center, with cars traveling on both sides." Bloomberg News (8/17, Duarte, White, Orihuela) reports that "with about 100 more people injured, Catalonia's regional government said the death toll could rise." Reuters (8/17, Suarez, Rubio), the Washington Times (8/17, Noble, Sherfinski), The Hill (8/17, Manchester) and The Wall Street Journal (8/17, Neumann, Sloat), among other news outlets, run similar accounts of the day's events.

Five Suspected Terrorists Killed Near Barcelona As Police Thwart New Attack. The AP (8/17) reports "the police force for Spain's Catalonia region says...five suspects shot and killed in the resort town of Cambrils were carrying bomb belts, which have been detonated by the force's bomb squad."

Media Analyses, Democrats: Trump Tweeted A "Debunked, Violent, Anti-Muslim Myth." NBC Nightly News (8/17, story 3, 1:45, Holt) reported that while Trump denounced the attack, "he's also under fire for following that up with a tweet, reviving a debunked myth that many Muslims find inflammatory." NBC (Jackson) added, "As an example of how to get tough on what he called radical Islamic terror, he cited a debunked, violent, anti-Muslim myth about US General John Pershing cracking down on unrest in the Philippines a century ago." Jake Tapper said on CNN's The Lead (8/17), "That story is not true. There is no evidence backing up...Trump's claim that in the early 1900s, Gen. John Pershing tried to quell a Muslim uprising in the Philippines by dipping 50 bullets in pig's blood, which is offensive to Muslims, and shooting 49 Muslim insurgents and telling the [fiftieth] to go tell everyone what he saw. Historians say there is zero evidence to that. None. Not true." Tapper added, "So, just to be clear, what happened...in the face of a horrific terrorist attack, where people are still finding out that loved ones have been killed or injured," the President "just told the world to study a story that is not true."

USA Today (8/17, Jackson) reports, meanwhile, that "historians have found only a single letter from a soldier who said Pershing had a local chieftain buried with a bloody pig, a claim written decades after the alleged incident. A memoir by Pershing cited a letter from another US officer who said several Filipinos were buried in a grave with a bloody pig." The New York Times (8/17, Qiu) says "various versions of this myth began circulating around the time of the Sept. 11, 2001, attacks, often in email chains and on discussion boards online." In one, "in a column published in National Review in December 2002, a few months before the invasion of Iraq, the act was attributed to unnamed troops under Pershing's command."

The Washington Post (8/17, Nakamura) says Trump "recycled a largely discredited Internet tale that he promoted on the campaign trail as a way to call attention to what he has called 'radical Islamic terrorism.'" The Post adds "the story has been found to be unsubstantiated by numerous fact-checkers in the media." The Hill (8/17, Fabian) calls the account "a dubious story," and the New York Post (8/17, Moore) notes that when Trump told it during a campaign rally last year, Politifact rated it "pants on fire," writing, "In all, Trump's claim is ridiculous, so we rate it Pants on Fire."

Gloria Borger reported on CNN's Situation Room (8/17) that in his tweet Thursday, Trump said there was no more radical Islamic terror for 35 years after what Pershing did, but claimed it was "25 years" when he first made the claim in February. Borger said that is "concerning" because it again shows Trump's "casual relationship with the truth," and added that it is "more

concerning" that Trump thinks the tweet "represents...the right response" to the terror attack in Barcelona.

Phil Mudd said on CNN's Situation Room (8/17) that Trump "is making an amateur move" by showing ISIS that they have his attention, which is what ISIS wants. Paul Cruickshank added that Trump's "offensive" and "very inflammatory words" will fuel "ISIS propaganda" and put "Americans at risk overseas."

Sen. Ben Cardin said on CNN's Situation Room (8/17) that "fake news is fake news and doesn't make a difference how many times you tell it, it's a lie." Cardin added it's "outrageous" that Trump would continue to repeat the story when he is "clearly wrong."

Rep. Joaquin Castro said on CNN's Situation Room (8/17) that Trump's tweet is "not helpful at all," adding that it's "very odd for the President...to be getting on Twitter and spreading a myth about General Pershing and one that has been debunked, especially to do it on the same day of the attack."

Rep. Kathleen Rice said on CNN's Situation Room (8/17) said she believes Trump is losing the moral authority of the presidency, and criticized him for being inconsistent with his messaging following the attack in Barcelona. She said his first tweet regarding the attack seemed to be "an appropriate response for the President...and then within a short period of time he puts out another tweet that contains false information that is meant to do nothing but insight fear with people and also even more damaging to make our allies question the resolve of this administration and our country in fighting the terrorism."

CNN's Blitzer, Sciutto Wonder If Attack Carried Out By Charlottesville "Copycats." The Federalist (8/17) reported that after the terrorist attack in Barcelona, "CNN repeatedly suggested that the Barcelona terrorists got the idea to kill people with cars from Charlottesville." Wolf Blitzer said on CNN Wolf (8/17), "There will be questions about copycats. There will be questions if what happened in Barcelona, was at all, at all, a copycat version of what happened in Charlottesville, Virginia. Even though they may be different characters and different political ambitions, they use the same killing device, a vehicle going at high speed into a group, a large group, of pedestrians." The Federalist noted that CNN's Chief National Security Correspondent Jim Sciutto also "suggested that ISIS, the terror group which has taken responsibility for the attack, was taking a page from the Charlottesville suspect's playbook, a suggestion at odds with the fact that radical Islamic terrorists have used vehicles as weapons for years." Sciutto "later doubled down on the idea. Twice."

Sciutto said on CNN Wolf (8/17) that "in light of the uproar over the last several days, five days apart you have white supremacists in Charlottesville use a vehicle to kill and here you have attackers at least following the modus operandi of terrorists using vehicles apparently to kill as well. And those shared tactics...should be alarming." Breitbart (8/17, Hanchett) and Townhall (8/17, Vespa) also noted the comments.

Ex-FBI Official: Very Difficult To Stop Vehicle Attacks. ABC World News Tonight (8/17, story 3, 0:55, Muir) reported authorities in the US are "on high alert tonight amid the calls from ISIS to use vehicles in attacks." However, former Assistant FBI Director Ron Hosko said on the CBS Evening News (8/17, story 2, 2:05, Mason) that it's "almost impossible" to protect civilians from vehicle attacks, adding, "We can harden targets that are high-concentration areas, but we're always going to be vulnerable."

USA Today (8/17, Gomez) says if the attack "sounds familiar, that's because it follows a disturbing trend of terrorism that requires little organization, manpower or technological know-how. Whatever the attacker's motive, the method has become commonplace."

Rep. Kathleen Rice said on CNN's Situation Room (8/17) discussed the difficulty of preventing people from being inspired over the Internet and then getting in a car and "inflict[ing] massive damage." She said the "key to all of this is if you see something, say something."

Counterterror Experts: Attack Could Be ISIS Response To Losses In Iraq And Syria. Fran Townsend, a homeland security adviser to President George W. Bush, said on the CBS Evening News (8/17, story 3, 1:50, Mason) that it's not surprising ISIS has claimed responsibility, because "as we're succeeding against them in places like Iraq and Syria, they're clearly looking for opportunities to strike back, and it's easier asymmetrically against civilian populations. ... We'll see whether or not this was foreign fighters, which are far more prevalent in places like France, Germany, Brussels."

Former National Counterterrorism Center Director Michael Leiter said on NBC Nightly News (8/17, story 2, 1:30, Holt) that military efforts against ISIS in the Middle East are "an important strategic step, to disrupt the organization and ultimately take some of the wind out of

their sails, but that doesn't really help in these tactical situations because the fact is, ISIS has launched a message, and that network of people, even if not connected and speaking to individuals in Syria and Iraq, are still taking steps like this to be soldiers in ISIS' army."

Michael Waltz, who served as senior counterterrorism advisor to former Vice President Dick Cheney, said on Fox News' Special Report (8/17) that "terrorists have found the perfect weapon that requires no training" in vehicle attacks, and that is why it's "so important" that the US and its allies "stabilize Syria, to finish off ISIS as a state," and remain "engaged" in Iraq, Afghanistan, Pakistan, and other countries where terrorist organizations exist. He acknowledged it's "frustrating" that the war on terror has gone on "for so long," but "we are in a generational effort against Islamic extremism and we have to stay engaged offense."

Counterterrorism specialist Paul Cruickshank said on CNN's Situation Room (8/17), "The first thing to say is [ISIS] provided no proof they were actually behind this or connected to this attack any way." He noted ISIS has falsely claimed responsibility before after an attack in Manila. However, he added that if the attack is linked back to ISIS, it's an attack "on the entire international community," because ISIS has previously focused on countries involved in the anti-ISIS coalition in Syria, and he said Spain is less involved in that effort.

In an editorial, the Wall Street Journal (8/17) urges European governments to crack down on terror funding and increase coordination to stem the terror threat. To the Journal, the danger affects the entire continent, and it makes little sense for each nations to attempt to tackle it individually.

Democratic Senators Eyeing Tax Reform As Opportunity To Push Carbon Tax.

The New York Times (8/17, Friedman) reports that two Senate Democrats, Sens. Sheldon Whitehouse and Brian Schatz, see "a sweeping overhaul of the tax code" as "the moment to broach the third rail of climate change policy: a carbon tax." While their plan "to level a $49 per metric ton fee on greenhouse gas emissions is widely acknowledged as a long shot," the senators, "along with climate activists and a cadre of conservative supporters, insist the tax reform is a way to create bipartisan support." The Times adds that they "hope to have an ally in President Trump's economic adviser, Gary D. Cohn, who met in February with a prominent group of Republicans advocating a similar plan."

Paulsen, Brady Make Case For Tax Reform.

The Minneapolis Star Tribune (8/17, Coolican) reports that Rep. Erik Paulsen appeared Thursday along with House Ways and Means Committee Chairman Rep. Kevin Brady at Best Buy headquarters in an effort to build support for tax reform, "one of his own top priorities as Republicans in Washington struggle for major accomplishments." Paulsen and Brady "said that they expect by the end of the year to send President Donald Trump a major tax bill that he will sign. It will lower tax rates for families and businesses, they said, and also make the tax code simpler."

Editorial Wrap-Up

New York Times.

"The Justice Department Goes Fishing In DreamHost Case." In an editorial, the New York Times (8/18, Board) writes that "you should be alarmed by the shockingly broad search warrant sought by the Justice Department, and approved by a judge in Washington, DC, last month, targeting DreamHost," an Internet hosting company that hosts a website that helped organize anti-Trump protests on Inauguration Day. As part of its continuing investigation into the protest, the Justice Department demanded that DreamHost turn over "all records or other information" relating to the site. The Times writes that if the company "turns over the requested data, any constitutional violation may not be revealed until years later, when a diligent defense lawyer is challenging a conviction in a single criminal case. That's a bad recipe for protecting all Americans' right to freely associate, and to be free of unreasonable government intrusion, in the digital age."

"Reset The Clock For Malpractice Suits." The New York Times (8/18, Board) editorializes that Gov. Andrew Cuomo should sign a measure passed by the New York state legislature extending the time cancer patients have to file malpractice suits to two-and-a-half years. Cuomo's aides "say only that he is evaluating the bill's details." Trial lawyers want the signed, and but "medical societies and hospitals, warning that their insurance premiums would rise and predicting some doctors would leave the state, want a veto."

Washington Post.

"It's Time For A Full And Fair Reckoning With Confederate Statues." The Washington Post (8/17) editorializes, "Let's be clear. No one is talking about ripping the country apart – unless it's the president himself. The tons of Confederate iconography installed long ago were put there as part of an ideological campaign whose goals were to glorify men and women who betrayed the United States in the cause of human slavery and to marginalize descendants of the enslaved. ... To hail the 'beauty' of the statues is to ignore all that, possibly for short-term political advantage."

"Trump Needs To Stop Sabotaging Obamacare-- Before It's Too Late." In an editorial, the Washington Post (8/17) writes that a Congressional Budget Office report released Tuesday estimated that an Administration decision to pull federal subsidy payments to insurance companies – an option the White House has been weighing – would cause average premiums to jump by 20 percent next year and cost the government $194 billion over a decade. The Post concludes that, rather than undermining insurance markets that the Affordable Care Act created, President Trump "should commit to keeping the subsidies going permanently, to enforcing the individual mandate and to working with Congress on a bipartisan bill that would bolster insurance markets."

"Burma Covers Up Its Systematic Abuse Of A Minority Group." In an editorial, the Washington Post (8/17) writes that the Burmese government's recent investigation into complaints of human rights abuses by the government against its Rohingya Muslim minority – an investigation that found "no evidence of crimes" – "lacked credibility from the outset" and directly contradicted the findings of the United Nations' detailed report on the country's "systematic" human rights abuses. The Post concludes that the international community should "renew calls to allow a U.N. fact-finding mission to visit the country" and that Congress "should rethink the idea of expanding American military ties with Burma or, at the very least, consider imposing a vetting process and human rights benchmarks for any further military engagement."

Wall Street Journal.

"All The President's Advisers." In an editorial, the Wall Street Journal (8/17) questions whether comments by President Trump's chief strategist Steve Bannon to American Prospect were daring White House chief of staff Kelly to fire him. The Journal adds that if Trump decides to keep Bannon, he will risk losing other aides.

"This Times, Terror Hits Spain." In an editorial, the Wall Street Journal (8/17) urges European governments to crack down on terror funding and increase coordination to stem the terror threat. To the Journal, the danger affects the entire continent, and it makes little sense for each nations to attempt to tackle it individually.

"Refighting The Civil War." The Wall Street Journal (8/17) says in an editorial that presidents need to choose their words carefully, and that there is no point to reopening a debate about the Civil War.

Washington Schedule

Today's Events In Washington.

White House:
PRESIDENT TRUMP — Participates in a briefing with the National Security Council.
VICE PRESIDENT PENCE — Joins the President in a briefing with the National Security Council.
US Senate: 10:00 AM Senate convenes for pro forma session
On recess until 5 September.
US House: On recess until 5 September.

Other: No notable event scheduled.

Last Laughs

Late Night Political Humor.

Jimmy Kimmel: "If we're going to start taking down every monument that pays tribute to racists, we should probably take down every building with the name 'Trump' on it, you know?"

Jimmy Kimmel: "They did a survey, an international survey. Most countries now have more confidence in Vladimir Putin than Donald Trump. Out of 37 countries, 22 of them said they have more faith in Putin. Other countries are now watching Rocky IV and hoping Draggo wins."

Stephen Colbert: "So removing Confederate statutes isn't about denying that slavery happened. It's about not celebrating the people who fought to keep it going. That's why we remember the Titanic, but we don't erect monuments to the iceberg. Although, thanks to Donald Trump pulling out of the Paris Climate Accords, soon, all icebergs will need a memorial."

James Corden: "Trump thinks these 100-year-old Confederate monuments are 'beautiful,' which is weird. Usually Trump doesn't call anything beautiful if it's over 30 years old."

Jimmy Fallon: "The President tweeted that removing Confederate statues takes beauty out of our parks that can never be replaced. Then he said, 'Now, if you'll excuse me, I have to go cut down a bunch of trees and build a hotel and golf course.'"

Seth Meyers: "In a new interview, Kim Kardashian revealed that she did karaoke with former President Obama. Said Obama, 'That was just the national anthem.'"

Seth Meyers: "A new study by economists found that income inequality in Russia is reaching similar levels to that of the United States. Some Russians are so poor they're forced to live inside each other."

Seth Meyers: "So Trump's staff isn't upset he's a racist; they're upset we found out about it."

Seth Meyers: "According to New York Times, Ivanka and Kushner urged Trump to take a more moderate stance, but as with so many other critical moments in Trump's presidency, the two were on vacation, this time in Vermont. Oh, that is Bernie Sanders' worst nightmare, his home state infiltrated by a millionaire and a billionaire."

Conan O'Brien: "In a tweet this morning, President Trump called Confederate statues beautiful. People were shocked because it's the first time Trump has complimented anything that's over 40 years old."

Conan O'Brien: "President Trump said that North Korean leader Kim Jong-Un's choice to not attack Guam was a wise and well-reasoned decision. And Trump said, 'Someday I'm going to make one of those.'"

Conan O'Brien: "Hillary Clinton is coming out with a book called 'What Happened.' Out of habit, Bill Clinton immediately came out with his own book called 'Baby, I Can Explain.'"

Western Monuments Set To Be Reduced Under Proposal To Trump.

Bloomberg News (8/24, Flavelle) reports that Interior Secretary Ryan Zinke "is recommending scaling back but not overturning some controversial national monument designations" which would otherwise "put oil, timber and mineral riches out of reach." Zinke communicated the recommendations to President Trump on Thursday "at the end of a four-month review of 27 national monuments created under the previous three presidents," which opens the possibility of a "significant shift" in government land use policy.

The Hill (8/24, Cama) reports that Zinke proposes reducing the size of "a handful" of national monuments, but his official report "will not ask the president to eliminate any of the 27 protected areas that were under review since an April executive order." The Wall Street Journal (8/24, Carlton) quotes a Thursday statement from Zinke saying that the recommendations would "provide a much needed change for the local communities who border and rely on these lands for hunting and fishing, economic development, traditional uses, and recreation."

Reuters (8/24, Volcovici) reports that Republican Rob Bishop, chairman of the House natural resources committee, "said he has not yet seen the full report but was briefed on some aspects of it by Zinke." Bishop "said his committee will eventually take up legislation to carry out some of Zinke's recommendations and attempt to reform the Antiquities Act." He said, "If we don't do reform of the Antiquities Act, we will have failures in the future. We don't need to eliminate the Antiquities Act totally but need to go back to what its original purpose was."

The Washington Post (8/24, Eilperin, Fears) says the move is "certain to trigger major legal fights." The Post adds that the White House confirmed that the President received the report "but would not say when it would be released or when the president would act on Zinke's recommendations." The Los Angeles Times (8/24, Boxall, Halper) says the "blueprint" delivered to Trump "represents an unprecedented effort to roll back protections on federal land." The Times adds that even before the report's release, "state attorneys general, environmental groups and Native Americans have put the administration on notice that acting on it would be illegal."

The Hill (8/24, Henry) reports that opponents of Zinke's "push to shrink national monuments say they will sue the Trump administration if the president follows through on Zinke's suggestions." Drew Caputo, the vice president of litigation for lands, oceans and wildlife at Earthjustice, said, "The law is clear: only Congress has the authority to change a national monument designation under the Antiquities Act – not the president." He said, "If President Trump attempts to carry out any recommendations to gut or shrink our national monuments, we will see him in court."

According to the New York Times (8/24, Turkewitz, Friedman), parts of the Bears Ears National Monument in Utah "could lose their strict federal protection as a national monument," under Zinke's recommendation. The Times adds that shrinking the monument "would be widely seen as a direct blow to former President Barack Obama's environmental legacy, and the first major test" of the Antiquities Act.

Also reporting are the Washington Times (8/24, Wolfgang), the Washington Examiner (8/24, Siegel), the Los Angeles Times (8/24, Boxall, Halper), USA Today (8/24, Roth), Reuters (8/24, Volcovici), CNN (8/24, Green), CBS News (8/24), CBS News (8/24), NPR (8/24, Siegler), NPR (8/24), PBS NewsHour (8/24, Akpan), MarketWatch (8/24, Carlton), the Huffington Post (8/24, D'angelo), TIME (8/24, Waxman), TIME (8/24, Steinmetz), the Chicago Tribune (8/24,

Eilperin, Fears), the Albuquerque (NM) Journal (8/24, Coleman), the Albuquerque (NM) Journal (8/24, Coleman), the Bangor (ME) Daily News (8/24, Sambides), Colorado Daily (8/24, Brennan), the Orange County (CA) Register (8/24, Scauzillo), the San Luis Obispo (CA) Tribune (8/24, Ferreira), the San Gabriel Valley (CA) Tribune (8/24, Scauzillo), the Bend (OR) Bulletin (8/24, Hamway), Santa Fe New Mexican (8/24, Oxford), the Denver Post (8/24, Flesher), the Deseret (UT) News (8/24, O'Donoghue), the Boston Globe (8/24, Abel), the Daily Intelligencer (NY) (8/24, Raymond), the Colorado Springs (CO) Gazette (8/24, Bunch), Southern California Public Radio (8/24), and KEYT-TV Santa Barbara (CA) Santa Barbara, CA (8/24, Flores, Carls), National Geographic (8/24, Parker), the Missoula Current (MT) (8/24, Devlin), the Missoula Current (MT) (8/24, Kidston), the Daily Mail (8/24), The Guardian (UK) (8/24, Tobias, Agencies), The Guardian (UK) (8/24, Calvert), The Guardian (UK) (8/24, Tobias), Vox (8/24, Arrieta-Kenna), Vice (8/24, Sherman), GQ (8/24, Darby), Salon (8/24, Rozsa), and Yahoo! Feinstein Calls On Trump Admin To Release National Monuments Report. The Hill (8/24, Delk) reports that Sen. Dianne Feinstein "demanded Thursday that Interior Secretary Ryan Zinke make public a formal report asking President Trump to reduce protections on a number of national monuments." The senator "pushed back on any potential plans to shrink parkland while calling for Zinke to release his full report." She said, "The American people have the right to see his entire report. A proposal to strip protections from public lands should be made public immediately."

California Mulls Lawsuit Against Trump's National Monuments Decision. The Washington Examiner (8/24, Chaitin) reports that "California is open to the possibility of suing the Trump administration should it move to shrink national monuments located in the state." McClatchy (8/24, Luna) reports that California Gov. Jerry Brown is "ready to sue the federal government if the Trump administration decides to allow drilling, mining or timber harvesting at national monuments in the Golden State."

Supporters Of New Mexico Monument Areas Vow To Keep Pushing. The AP (8/24, Bryan) reports that "tribal leaders, conservationists and elected leaders gathered Thursday to express their frustrations and keep pressure on the White House to ensure two national monument areas in New Mexico remain intact." Sen. Martin Heinrich and "several dozen people packed an REI store in Albuquerque while others took to the historic Mesilla plaza in southern New Mexico to show their support for Organ Mountains-Desert Peak and the Rio Grande del Norte." Heinrich said, "These places aren't just about outdoor recreation. They're not just about land. They're about our culture and history and trying to live up to the greatest potential of that culture and history."

Fate Of 1st Atlantic Marine Monument Likely Headed To Court. The AP (8/24, Whittle) reports that "environmentalists and fishing groups said Thursday they are prepared for a legal battle in the wake of Interior Secretary Ryan Zinke's decision to preserve the nation's first Atlantic Ocean marine monument." The Northeast Canyons and Seamounts Marine National Monument has "been contested from the beginning." Some fishing groups have claimed "it was created through an illegal use of the Antiquities Act of 1906 and jeopardizes their industry, and they've sued to challenge its creation." However, "conservationists said the monument protects marine mammals, sea turtles and underwater habitats."

Editorial: Trump's Threat To The Outdoors. The San Francisco Chronicle (8/24) editorializes

that "both presidential power and wilderness preservation are at stake as the Trump team decides how far to go in trimming outdoors protections that past presidents and millions of Americans support." The paper is concerned by "troubling impacts" as it sees "a likely rollback on millions of acres, mostly in the West, which are safeguarded from logging, drilling and mining by presidential decree." The paper argues that "protecting wild places against intrusive human activities was the reason for the Antiquities Act, and it should remain a timely and necessary tool."

How US Heritage Is Reflected In Our National Parks. In an op-ed for the San Diego Union-Tribune (8/23, Beck), Larry Beck, a professor in the L. Robert Payne School of Hospitality and Tourism Management at San Diego State University, argues that "at a time when visitation to our parks is skyrocketing, and causing congestion problems in places such as Yosemite and Zion, reducing land protected within established park monuments is nonsensical." He claims that "this action would simultaneously exacerbate climate change."

Commentary: Zinke Leaves San Juan County In Economic Limbo. In an op-ed for the Salt Lake (UT) Tribune (8/24, Kurth), Nazz Kurth, president of Petzl America, writes that "instead of getting on with sorting out the issues in the Bears Ears, President Trump has left San Juan County in a kind of economic limbo, by ordering a review of all monuments over 100,000 acres that were established since 1996, and demanding an expedited review of the Bears Ears." Interior Secretary Ryan Zinke has "weighed in, adding to San Juan County's economic uncertainty by issuing an 'interim report' – following a selective and cursory public review of Bears Ears – recommending that the monument be shrunk and that Congress take up legislation to create National Recreation and Conservation Areas." Kurth claims that "Zinke is ignoring the painstaking three-year Public Land Initiative that recently failed trying to do just that." Kurth believes that "there is no reason to think that Congress can succeed this time." Kurth concludes that "if President Trump and Secretary Zinke truly want improved economic conditions and more jobs for San Juan County, the answer is readily available, commit the resources needed to move forward with a management plan for the Bears Ears National Monument."

Zinke's Decision To Keep Maine Monument Worth Celebrating. In his column for the Bangor (ME) Daily News (8/24, Holyoke), John Holyoke welcomes Interior Secretary Ryan Zinke's decision on the Katahdin Woods and Waters National Monument. Holyoke says that allowing "some form of limited logging activity in part of the monument," which may be under consideration, is "a workable compromise."

Trump And Our National Monuments: What America's Hunters And Anglers Want The White House To Do. In an op-ed for Fox News (8/24, Tawney), Land Tawney, the president and CEO of Backcountry Hunters & Anglers, writes that sportsmen are "standing up in support of the Antiquities Act." Tawney raises concerns that "recommendations made by Secretary Zinke, if adopted, could erode the strength of the act, blunt a powerful conservation tool and diminish our national monuments system overall." Tawney joins with American hunters and anglers who "demand leadership from the secretary that upholds – and advances – Theodore Roosevelt's legacy."

Lien: Sportsmen Want Trump To Leave Monuments Intact (Column). In an op-ed for the Vail (CO) Daily (8/24, Lien), David Lien, a former Air Force officer and chairman of the Colorado Backcountry Hunters & Anglers, expects that "currently protected public lands will be opened to extractive industries, such as mining and oil and gas development, most likely." Lien joins with sportsmen and women who "call on Zinke to make good on his word, to uphold Theodore Roosevelt's protected public-lands legacy by expanding America's rich system of national monuments – not diminishing it."

Cabinet Secretaries Say Lawsuits Prolong Forest Fire Problem.

The Missoulian (MT) (8/24, Chaney) reports that Interior Secretary Ryan Zinke and Agriculture Secretary Sonny Perdue "joined two-thirds of Montana's congressional delegation at the Lolo Peak fire base to decry the effect of lawsuits on firefighting." They were joined by Montana Republican Sen. Steve Daines and Rep. Greg Gianforte in "arguing that litigation was keeping forests in an unhealthy state." Zinke also said "front-line government workers were too burdened by micromanagement and bureaucracy to get out in the field." He said, "We need more resources on the front line, to give them the flexibility they need and get rid of the lawsuits so they can do their jobs. That's where we can focus on near-term gains."

Also reporting are the Billings (MT) Gazette (8/24, Chaney), the Missoula Current (MT) (8/24, Kidston), the Huffington Post (8/24, D'angelo), KECI-TV Missoula (MT) Missoula, MT (8/24, Georgiou), and KGVO-FM Missoula (MT) Missoula, MT (8/24, Christian).

Interior Secretary To Visit Smokies Friday.

WBIR-TV Knoxville, TN (8/24) reports that Interior Secretary Ryan Zinke will "visit Great Smoky Mountains National Park on Friday to mark the 101st anniversary of the founding of the National Park Service." Zinke will "visit Rainbow Falls Trail with U.S. Sen. Lamar Alexander on Friday morning." In the afternoon, Zinke will "visit the Pisgah Inn on top of Mt. Pisgah on the Blue Ridge Parkway."

Environmental Groups Say Industry Had Undue Influence On Sage Grouse Review.

The Casper (WY) Star-Tribune (8/24, Richards) reports that "environmental groups are crying foul after a letter from an oil and gas advocacy group to Interior Secretary Ryan Zinke surfaced indicating energy may have played a significant role in the department's recent, and controversial, sage grouse decision." In the July letter, Western Energy Alliance "recommended 15 changes to federal sage grouse conservation plans to make it easier for industry firms to do business in the bird's habitat." A review of federal conservation plans by a panel of sage grouse experts earlier this month "included 13 of WEA's suggestions."

Additional coverage of the sage grouse was provided by the High Country (CO) News (8/24, Wiles), the Denver Post (8/24), and the Mesquite (NV) Local News (8/24, Mitchell).

Greg Walden On Bundy-led Standoffs: Protesters 'Need Not Be Armed.'

The Oregonian (8/24, Friedman) reports following a visit to Intel's Hillsboro facilities on Wednesday, Rep. Greg Walden was asked at a press conference "what, if anything, Congress should do to deter future would-be insurrections on federal property." Walden said, "Those that violate the law should be prosecuted." He added, "It's important that we respect the rights of the people who work in those facilities, and it was very problematic for the federal employees who were there at the wildlife refuge, the Bureau of Land Management office. It was very problematic for the city of Burns and Harney County. However these protests take place, they need not be armed, they need not be violent, they need not be vile."

Ex-Interior Secretary Who Helped Conserve Alaska Land Dies.

The AP (8/25, Kruesi, Ridler) reports: "Former Interior Secretary Cecil V. Andrus, who engineered the conservation of millions of acres of Alaska land during the Carter administration, has died. He was 85. Andrus died late Wednesday of complications from lung cancer, daughter Tracy Andrus said."

Additional Coverage: Government Considers Zinke Investigation: Preliminary Probe Opened Into Call With Murkowski.

Additional coverage that "the Office of the Inspector General has opened a preliminary investigation into phone calls made from Secretary of the Interior Zinke to Alaska senators Lisa Murkowski and Dan Sullivan" was provided by the Ketchikan (AK) Daily News (8/24, Halaschak).

Sportsmen Can Thank Themselves For Attack On Public Lands.

In an op-ed for the Albuquerque (NM) Journal (8/24, Williams), Ted Williams writes that without the support of sportsmen, "Trump wouldn't be president and Zinke wouldn't be running Interior." Williams decries their "hypocrisy" and their silence "about the felonious, 41-day armed occupation and trashing of the Malheur National Wildlife Refuge in Oregon."

Bureau Of Indian Affairs

Order Allowing Drilling At Van Hook Extended.

The Bismarck (ND) Tribune (8/24, Dalrymple) reports that "a federal judge has extended an order allowing oil drilling near the Van Hook arm of Lake Sakakawea through at least Oct. 31." US District Court Judge Daniel Hovland, "who last week ruled Slawson Exploration could continue drilling until a hearing scheduled for Aug. 29, has since canceled that hearing." The federal government "agreed to the extension and requested the court case before Hovland be put on hold while an administrative appeal within the Department of Interior continues."

Tribe Pushes To Revive Suit Over Calif. Gov. Casino OK.

Law360 (8/24, Powell) reports that "the United Auburn Indian Community continued Wednesday to press the California Supreme Court to revive its lawsuit challenging Gov. Jerry Brown's role in

greenlighting another tribe's competing off-reservation casino project, calling his arguments that he had not exceeded his authority or violated the separation of powers among government branches 'off the mark.'"

Bureau Of Land Management

APNewsBreak: Investigators Say US Land Agent Took Evidence.

The AP (8/24, Whitehurst) reports that "a Bureau of Land Management agent who has been scrutinized for past behavior took valuable stones held as evidence and handed them out 'like candy' to colleagues and a contractor, federal investigators said in a report made public Thursday." Daniel Love, "played a command role in an April 2014 standoff involving backers of Nevada rancher and states' rights figure Cliven Bundy," was "previously faulted for using his influence to get tickets to a sold-out Burning Man counterculture festival in Nevada's Black Rock Desert that he was helping oversee security for and manipulating a job search for a friend." US Department of Interior investigators "also found Love told an employee to delete some emails that contained bureau information requested by then-U.S. Rep. Jason Chaffetz."

Also reporting are the Deseret (UT) News (8/24, O'Donoghue), the Salt Lake (UT) Tribune (8/25, Maffly), the Daily Caller (8/24, Pearce), and the Daily Caller (8/24, Barton).

Judge Sends Vegas Water Pipeline Plan Back To Feds For A Fix.

The AP (8/24, Ritter) reports that "a federal judge tapped the brakes Thursday but didn't stop a proposal for a massive and expensive water pipeline to draw underground water from rural valleys along Nevada's eastern edge to supply the growing Las Vegas metropolitan area." The Bureau of Land Management "needs to take another look at possible environmental effects of the Southern Nevada Water Authority project and identify what can be done about them, U.S. District Judge Andrew Gordon said." Gordon "characterized the fixes he ordered as 'narrow deficiencies' in environmental impact statements."

Additional coverage was provided by the Las Vegas Review-Journal (8/24, Brean) and Law360 (8/24, Powell).

Department Of Justice Says Clark County Owes Federal Government $75 Million In Unpaid Rent On Bali Hai Golf Course.

The Nevada Independent (8/24, Valley, Snyder) reports that the Justice Department "is asking Clark County for more than $75 million in alleged unpaid rent at a major property on federal land managed by the county and developed by prominent Las Vegas gambler Billy Walters." Clark County, "acting as the facilitator for the Bureau of Land Management, entered into a 99-year profit-sharing lease with a development company owned by Walters, recently convicted of insider trading, for the course in 2000, but the arrangement never made any money." The Justice Department "contends the county should have been collecting roughly $1.3 million in rent annually from Walters and, thus, deserves that money," but "the county disagrees."

The Las Vegas Review-Journal (8/24, Lockhead) reports that "in a letter to the county dated Aug. 18, U.S. Department of Justice attorney John Kresse wrote that a 2011 amendment to a lease between the county and gambler Bill Walters set the 155-acre property's $100,000 annual rent below fair market value, thereby violating the Southern Nevada Public Land Management Act (SNPLMA)." County Commission Chairman Steve Sisolak "said the county sent the new deal to the Bureau of Land Management for approval, but never heard back. 'They didn't approve it. They didn't deny it. They just sat on it,' he said. 'We've been stuck in limbo.'"

Oil Lessee Seeks Quick Win In Canceled Lease Suit.

Law360 (8/24, Lidgett) reports that "an oil and gas lessee of portions of a Montana national forest on Thursday moved for a quick win in its case in Washington, D.C., district court alleging the U.S. Department of the Interior improperly voided the lease, calling the move arbitrary and capricious." W.A. Moncrief "moved for summary judgment in its suit challenging the 'wrongful cancellation' of its 35-year-old lease in an area of Lewis and Clark National Forest."

BLM Seeks Comment On Possible Oil And Gas Leases.

The Elko (NV) Daily Free Press (8/24) reports that the Bureau of Land Management is "seeking public comments to assist in preparing an environmental assessment analyzing the impacts of offering 38 oil and gas parcels, totaling approximately 67,311.79 acres, for lease in the Elko

District." Comments will be accepted until close of business Sept. 24.

Bureau Of Ocean Energy Management

Does Local Opposition Impact Offshore Drilling Decisions?

The Jacksonville (NC) Daily News (8/24, Buckland) reports that "local communities are again lining up to oppose efforts by the federal government to open up the Mid-Atlantic to seismic testing for potential offshore drilling." However, local resolutions are "not legally binding as the U.S. Bureau of Ocean Energy Management (BOEM) moves forward to review seismic testing off the East Coast." The article says that "in the midst of adopting them, some local officials question their efficacy."

Additional coverage was provided by the New Bern (NC) Sun Journal (8/24, Buckland).

Expanding Offshore Energy Opportunities Will Benefit American Energy Consumers.

Offshore Source (8/24, Peterson) reports that API is urging the Trump Administration "to expand the next five-year offshore oil and natural gas leasing program to include areas of the Outer Continental Shelf, including the Atlantic, Eastern Gulf of Mexico, and Arctic, with potential for new domestic energy resources, job creation, increased government revenue, and strengthened national security." API Upstream Director Erik Milito said, "We have an opportunity in the next offshore leasing plan to truly embrace our nation's energy potential and ensure American consumers and businesses continue to benefit from the U.S. energy renaissance. In addition to contributing to the economy, creating thousands of jobs, and providing billions in government revenue, developing our abundant offshore resources will also strengthen our national security. The ability to explore our resources in the Arctic, Atlantic, and the Eastern Gulf of Mexico in the next five-year program is a critical part of advancing the long-term energy security of our nation, and we urge the administration to consider these benefits as they prepare a new offshore leasing program."

Bureau Of Safety And Environmental Enforcement

Big Industry Hunkers Down Ahead Of Harvey.

The Houston Chronicle reports industrial activity on the Gulf Coast slowed as energy companies evacuated offshore oil platforms and ships left port in preparation for Hurricane Harvey. About 5 percent of oil platforms in the Gulf were evacuated as of midday Thursday, while 10 percent of all Gulf oil production was cut off. Shell said it had halted production and secured its Perdido platform.

USA Today (8/24, Rice, Stanglin) reports Harvey is now forecast to hit the Gulf Coast as a Category 3 hurricane with winds up to 115 mph late Friday into Saturday. About 700,000 people live where the hurricane warning is in effect, approximately half are in the Corpus Christi area. Reuters (8/24, Forsythe) reports the storm forced gasoline prices to a three-week high as two refineries in Corpus Christi are shutting down. Approximately 167,000 bpd, or 9.6 percent, of crude output capacity in the Gulf was shut.

Offshore Magazine (8/24) reports offshore operators said personnel have been evacuated from 39 production platforms, 5.29 percent of the 737 manned platforms in the Gulf.

Additional coverage was provided by the New York Post (8/24, Moore), Reuters (8/24), Reuters (8/24), AP (8/24), Fox Business (8/24, McKenna), Fox Business (8/24, Rocco), Washington (DC) Examiner (8/24, Siciliano), Houston (TX) Business Journal (8/24, Mann), Offshore Technology (8/24), MarketWatch (8/24, Sjolin), and MarketWatch (8/24, Saefong).

Fish And Wildlife Service

Sea Ice Loss Dooms Walrus If Not Protected, Groups Claim.

Courthouse News (8/24, YOUNG-GRINDLE) reports that "as sea ice melts at an alarming rate, 21 environmental groups urged the U.S. Fish and Wildlife Service to complete the endangered species listing for the Pacific walrus." The Center for Biological Diversity and "allied groups sent a letter to the USFWS regarding the upcoming court-determined Sept. 30 deadline for the agency to either begin the endangered species listing process for the Pacific walrus or remove it from the

candidate list." However, listing the animal under the Endangered Species Act "could endanger the current administration's plans for offshore drilling in the Arctic."

NM Votes To Support Federal Wolf Recovery Plan.

The Albuquerque (NM) Journal (8/24, Reed) reports that the New Mexico State Game Commission "voted 6-1 Thursday to support the U.S. Fish and Wildlife Service's recently revised Mexican wolf recovery plan." Paul Kienzle, game commission chairman, "said he would entertain a motion to support the federal plan, subject to review if it was substantively changed, and also to submit a transcript of the commission's discussion at the meeting as a comment on the plan."

Iron County Plans For Renewed Federal Oversight Of Prairie Dogs.

The St. George (UT) News (8/24, Sullivan) reports that "after three years of being free from federal oversight, Iron County is now forced to return to regulations mandated by the U.S Fish and Wildlife Service regarding the relocation of prairie dogs on private property." Iron County Commissioners "met Tuesday for an emergency meeting to discuss returning to their old habitat conservation plan in the interim while the FWS prepares a separate general conservation plan that will determine how the county deals with the prairie dogs." Commissioners "remain hopeful, however, the rules in the GCP will not resemble those they once operated under for many years."

Teen Tells Judge He Bought Tiger Cub On Streets Of Tijuana.

The AP (8/24, Watson) reports that "U.S. border officials confiscated a Bengal tiger cub after inspecting a car heading from Mexico to California, federal authorities said Friday." According to the article, "a California teenager who says he bought a Bengal tiger cub on the streets of Tijuana for $300 was arrested when he tried to bring it into the United States in his 2017 Chevy Camaro." Luis Eudoro Valencia was "charged with smuggling a Bengal tiger into the United States after U.S. Customs and Border Protection officials found the furry cub lying on the floor of the passenger side of his car during an inspection around 1:30 a.m. Wednesday at the Otay Mesa border crossing."

Also reporting are CNN (8/25, Mossburg, Simon), USA Today (8/24, Jansen), the Arizona Republic (8/24, Santistevan), and the Los Angeles Times (8/24, Queally).

High Court Must Review ESA Decision That Endangers Ability To Appeal Agency Actions.

In a piece for Forbes (8/24, Samp), Rich Samp urges the Supreme Court to review "a US Court of Appeals for the Fifth Circuit decision that dramatically expands the scope of the Endangered Species Act." He says that the group of Louisiana landowners' "concerns are well-justified; the appeals court upheld land-use restrictions imposed by the Fish and Wildlife Service (FWS) for the purpose of protecting an endangered species of frog – even though the frog does not exist in Louisiana and could not live on the Petitioners' land unless they substantially modified it." However, Samp argues that "Supreme Court review is warranted for an additional and perhaps more important reason: the Fifth Circuit agreed with FWS that the Service's refusal to undertake a cost-benefit analysis of its actions was not subject to judicial review."

Fish And Wildlife Is Right On Endangered Frogs.

In an op-ed for the Sacramento (CA) Bee (8/24, Solvesky), Ben Solvesky, a biologist with the US Fish and Wildlife Service from 2008 to 2014, and now with a Sierra Nevada conservation group, defends the critical habitation designation for two frog species and the Yosemite toad. Solvesky asserts that the US Fish and Wildlife Service "painstakingly reviewed the best available science" on the animals. According to Solvesky, the FWS "also invited extensive input and thoroughly responded to public comments on the potential economic and social effects." He adds that "the service bent over backward to assure that the 1.8 million acres of critical habitat would include little private property – only 0.6 percent of habitat for the Yosemite toad and 7 percent and 0.01 percent for the two frog species."

National Park Service

Celebrate With Free Entrance To National Parks.

The Las Cruces (NM) Sun-News (8/24, Prewitt) reports that "the National Park Service turns 101 years old on Friday, Aug. 25." To celebrate the occasion, "also known as Founders Day – a day that commemorates the establishment of the National Park Service – several national monuments

that charge an entrance fee will offer free admission to everyone."

Also reporting are the Newport News (VA) Daily Press (8/23, Heeter), the San Francisco Chronicle (8/24, Dowd), and the Rapid City (SD) Journal (8/24).

Everglades National Park Entrance Fees To Rise In January 2018.

The Miami New Times (8/24, De Varona) reports that Everglades National Park "plans to raise its entrance fees beginning in January 2018 to pay for $88 million in overdue maintenance work." According to the article, "walk-in, paddle-in, and bike-in visitors would pay $12 instead of $8, while annual memberships would rise from $40 to $50." Fees would "rise again in October 2018 to $15 and $60, respectively."

UP Road Lands On National Register Of Historic Places.

The Traverse City (MI) Record-Eagle (8/24, Freedman) reports that Brockway Mountain Drive in the northwestern Upper Peninsula, has been added to the National Register of Historic Places. The National Park Service "recognized the 9-mile road built by the Keweenaw County Road Commission in 1933 for its historic importance in recreation, entertainment, transportation, social history and landscape architecture."

73-Year-Old Dies After Climbing Fall In Rocky Mountain Park.

The AP (8/24) reports that "a 73-year-old man has died after a fall while descending a peak in Rocky Mountain National Park." According to park spokeswoman Kyle Patterson, "the body of Ken Teselle of Estes Park was recovered by helicopter on Thursday from the Chasm Lake area." The National Park Service "says Teselle was a volunteer at the park but was off-duty at the time of his fall."

National Park Service & Federal Lands – Over-Protection.

In an op-ed for the National Review (8/25, DeVoe), Philip H. DeVoe writes that "on the 101st anniversary of the NPS, we must toast a noble division of the federal government, but continue fighting government over-protection of state lands." He argues that "we need to save a program conservative in its conception but toxically liberal in its present form." DeVoe warns that "the government itself has become the avaricious vandals the NPS was created to resist, and our conservative heritage, our federalist history, and our representative democracy are on the line."

The Park Service's Botched Bottle Ban.

In an editorial, the Wall Street Journal (8/24) writes that the Trump Administration's recent reversal of an Obama Administration ban on bottled water in national parks highlights what the Journal calls a teachable moment in the unintended consequences of environmental policy. Despite the National Park Service's desire to reduce plastic waste by banning bottled water, studies found that bottled beverage consumption did not decrease, as park-goers switched to drinking bottled sodas, which use more plastic.

Office Of Insular Affairs

US Provides $$ For Compact Impact.

The Marshall Islands Journal (8/25) reports that Interior Acting Assistant Secretary Nikolao Pula "made available $3 million in discretionary 'Compact impact' funding for fiscal year 2017, as an additional federal contribution toward defraying the costs that Guam, Hawaii, the Commonwealth of the Northern Mariana Islands (CNMI), and American Samoa bear due to the presence of migrants from the freely associated states (FAS)." According to the article, "Guam received $1,491,000, Hawaii $1,276,000, the CNMI $231,000, and American Samoa $2,000." Pula said, "The governors of the affected jurisdictions have reported that the Federal government is not providing sufficient funds to cover the costs they bear for the impact of migrants from the freely associated states on social services. Both Guam and Hawaii have each reported costs exceeding $100 million a year."

Conference Focuses On Improving The Accountability Of Island Governments.

The Marshall Islands Journal (8/25) reports on this week's 38th Association of Pacific Islands Public Auditors (APIPA) annual conference. Of note, Graduate School USA President and CEO Jack Maykoski "said the school's partnership with the US Department of Interior to provide trainings to

US-affiliated islands in the Pacific saw over 200,000 people trained over the years."

In Photos, North Korea Signals A More Powerful ICBM In The Works.

In continuing coverage, Reuters (8/24, Kim, Yang) reports that experts say photos of a new rocket design are a North Korean "message that it is working on an intercontinental ballistic missile (ICBM) more powerful than any it has previously tested." State Department spokeswoman Heather Nauert said, "We consider it overall a good first step that there haven't been any missile launches or testing for ...three-plus weeks or so." She also said it wasn't clear, in Reuters' words, "if the photos were taken before or after Secretary of State Rex Tillerson on Tuesday welcomed what he called the restraint North Korea had shown recently in its weapons programs."

US Military To Install Radar In Pacific's Palau.

Rappler (PHL) (8/24) reports that "the United States has announced plans to install radar systems in Palau, a move that will increase its monitoring ability in the western Pacific region recently rocked by threats from North Korea." In a joint statement, the US Defense Department and the Palau government "said they were working to finalize the location of radar towers on the archipelago nation of 22,000 people." The Jagran Josh (8/24, Krishnan) reports that the statement said, "The radar systems will provide Palau enhanced maritime law enforcement capability... while also providing the US with greater air domain awareness for aviation safety and security."

'We Have To Make Tough Decisions If We Want To Survive'.

The Virgin Islands Consortium (VIR) (8/23) reports that Governor Kenneth Mapp said on talk radio on Tuesday "that the territory's financial condition demands difficult choices relative to government spending, stating that the territory's survival depends on its ability to live within its means." Mapp said, "We're just at a point where we simply have to make the tough decisions if we want to survive. Liken it to you in the community that have your family, if you're a two parent or one parent household and somebody gets laid off or your hours get reduced. Or if you're operating a business and the season goes off and the revenue is lower, you've got to make changes to survive because you can't just spend the way that you normally spend; you can't do the things that you normally do, so you must make the adjustments in order to remain balanced."

Additional Coverage: Key Player In Paris Climate Deal Dies In Majuro At 72.

Additional coverage on the passing of Marshall Islands Climate Ambassador Tony deBrum was provided by Marianas Variety (8/24, Johnson).

Top National News

Trump Criticizes McConnell And Ryan For Handling Of Debt Ceiling Issue.

In a pair of tweets at 8:19 a.m. yesterday, the President wrote, "I requested that Mitch M & Paul R tie the Debt Ceiling legislation into the popular V.A. Bill (which just passed) for easy approval. They didn't do it so now we have a big deal with Dems holding them up (as usual) on Debt Ceiling approval. Could have been so easy-now a mess!" At 9:42 a.m., he tweeted, "The only problem I have with Mitch McConnell is that, after hearing Repeal & Replace for 7 years, he failed! That should NEVER have happened!" The CBS Evening News (8/24, story 3, 0:35, Mason) briefly reported on the "political storm in Washington that pits the President against fellow Republicans." The coverage splits along two themes: Most analyses see the tweets as another sign of presidential frustration and GOP divisions, but some say Trump may be intentionally separating himself from his adopted party.

In an analysis, for example, the Washington Post (8/24, Rucker, Sullivan, Debonis) writes that "Trump is strategically separating himself from Republicans in Congress, an extraordinary move to deflect blame if the GOP agenda continues to flounder." Robert Delahunty of The Federalist (8/24, Delahunty) writes, "This is a risky game for Trump to play" as he looks to 2020, though the GOP "establishment is dangerously out of touch with its majority" and "without Trump voters, Republicans will not control Congress for very long." In an editorial, meanwhile, the Wall Street Journal (8/24) says that Trump is effectively governing as an independent – and that the Capitol Hill GOP should treat him as one.

The AP (8/24, Thomas, Lucey) reports, "Fanning the flames of GOP discord," the President

accused GOP congressional leaders "of botching efforts to avoid an unprecedented default on the national debt." His "sharp words underscored the perilous state of play" over raising the debt ceiling. Bloomberg News (8/24, Olorunnipa, Wasson, Harris) reports that Trump "blasted" GOP leaders "for ignoring his advice on raising the debt ceiling and creating a 'mess.'" The New York Times (8/24, Sullivan, Fandos) reports that a White House official said Trump was referring to tying debt ceiling approval to popular Veterans Affairs legislation. Congressional aides said that while "there had indeed been a short-lived effort late last month" to link the two, "the idea was never given serious consideration." The Wall Street Journal (8/24, Ballhaus, Peterson) reports that the idea originated with McConnell, not with Trump, according to a Republican source.

The Washington Post (8/24, Rucker, Paletta) reports that the tweets "escalate a feud" between Trump and congressional leaders, though Politico (8/24, Cheney, Kim) indicates that that President "is working to convene a meeting with McConnell and Ryan" as well as Senate Minority Leader Schumer and House Minority Leader Pelosi, but "it could be an awkward meeting" given Trump's Twitter attacks. The Los Angeles Times (8/24, Mascaro) writes, "Trump, in tweet after scalding tweet, has turned on McConnell...and at times" Ryan, "in a relentless barrage that continued Thursday, long after each sides' offices had tried to put the matter to rest by pledging to work together on shared GOP priorities." The Times says "the outbursts from the president have not only driven a wedge between the White House and its Capitol Hill allies, they have also exposed the limits of the president's understanding of how to interact with Congress and how the legislative branch works."

The Hill (8/24, Lillis) writes that because of the tweets, "the difficult task of raising the debt ceiling just got tougher." Still, Roll Call (8/24, McPherson) reports that Ryan told CNBC on Thursday that "he didn't regard" the tweet "as an attack." Ryan said, "I don't really take it as going after me." Ryan said on CNBC's Closing Bell (8/24), "I am really not worried about this. We have plenty of options ahead of us. ... We will pass a debt limit increase before we hit the debt limit."

The Washington Times (8/24, Persons) reports that Sen. Lindsey Graham "commented on the president's negative tweets" during an appearance on Hugh Hewitt's syndicated radio show, "explaining that the remarks come out of frustration with a lack of progress." Graham said, "We're all dealing with President Trump the best way we can, and he is frustrated about not fulfilling promises. So am I."

The Wall Street Journal (8/24) editorializes under the headline "Trump Divorces The GOP Congress" that Trump's attacks will not help him pass his agenda, but if there is a strategy behind it, it is that Trump may be trying to distance himself from a legislature that has achieved little. The Journal says congressional Republicans must start to treat Trump as an independent, not as a member of their party. Ex-Sen. John Danforth writes in the Washington Post (8/24, Danforth), "The fundamental reason Trump isn't a Republican is far bigger than words or policies. He stands in opposition to the founding principle of our party – that of a united country." Danforth writes, "We Republicans must disassociate ourselves from Trump by expressing our opposition to his divisive tactics and by clearly and strongly insisting that he does not represent what it means to be a Republican."

Reuters (8/24, Alexander, Brice, Rascoe), the Washington Times (8/24, Persons), and Roll Call (8/24, Bennett) also have reports.

Poll: McConnell Has Lowest Favorability Rating Of Any Major US Elected Official. The Hill (8/24, Easley) reported that McConnell "has the lowest favorability rating of any elected official with a national profile, according to a new Harvard-Harris" nationwide survey of 2,263 US voters, taken Aug. 17-22. McConnell's favorable rating stands at 18%, with 49% viewing him unfavorably. Trump's favorable rating stands at 41%, with 55% viewing him unfavorably. And Ryan's favorable rating stands at 33%, with 47% viewing him unfavorably.

Flake: Trump's Governing Approach "Inviting" A 2020 Primary Challenge. On its website, CNN (8/24, Kaczynski) reported that during an appearance on Georgia Public Broadcasting's "Political Rewind" program, Sen. Jeff Flake (R-AZ) "said Wednesday that President Donald Trump is inviting a primary challenge in 2020 with his style of governing." Asked about the possibility of Trump facing a primary challenge, Flake replied, "I think that certainly depends on him. I think he could govern in a way that he wouldn't. But, I think that the way that – the direction he's headed right now, just kinda drilling down on the base rather than trying to expand the base – I think he's inviting one." Flake, who faces reelection next year, "has been a frequent critic of Trump." The President, meanwhile, has publicly criticized Flake and praised the senator's GOP primary challenger, ex-state Sen. Kelli Ward (R).

Flake said on Fox News' Fox & Friends (8/24), "I will work and vote with the President

when I believe he's right and challenge him when I believe he's wrong. That's what I've done with every President, Republican or Democrat. I didn't always vote with George W. Bush. I voted against the prescription drug benefit or No Child Left Behind but I worked with him on most things. I think that's what Arizona voters expect me to do."

On its website, CNN (8/24, Diaz) reported that during his appearance on Fox News, Flake was asked about "why Trump is not his biggest fan." Flake replied, "I don't know. I want to work with the President when I think that he's right, and I'll challenge him when I think that he's wrong." Politico (8/24, Siu) reported on Flake's remarks on Trump "inviting" a primary challenge, then added that the GOP lawmaker "took a friendlier tone toward Trump in interviews Thursday, even inviting the president to look at portions of the Arizona-Mexico border together."

White House Seeks "Clean" Debt Ceiling Increase. The Washington Times (8/24, Miller) reports, "President Trump wants Congress to pass a 'clean' bill to raise the government's debt ceiling, the White House said Thursday, conceding for the first time to a demand from Democrats to extend the country's credit limit." White House press secretary Sarah Sanders said, "It's our job to inform Congress of the debt ceiling and it's their job they raise it. We need to make sure we pay our debts. We're still committed to making sure that gets raised."

Rep. Charlie Dent (R-PA) said on CNBC's Closing Bell (8/24), "I agree with the Speaker that we will, in fact, raise the debt limit. We have no choice. A default would be catastrophic." However, McClatchy (8/24, Douglas) reports that "hardcore conservatives on Capitol Hill and allied outside groups are insisting that no measure to raise the debt ceiling should pass without provisions to curb government spending," and are "warning that unless they get some concessions, other White House agenda items, such as overhauling the tax code, could lose conservative support."

Pelosi: Debt Ceiling Increase Is GOP's Responsibility. The Washington Times (8/24, Dinan) reports, "Democrats hinted Thursday that they won't be too eager to help the GOP raise the government's debt ceiling." Pelosi said, "With the White House, House, and Senate under one party control, the American people expect and deserve a plan from Republicans to avert a catastrophic default and ensure the full faith and credit of the United States. With so much at risk for hard-working families, Republicans need to stop the chaos and sort themselves out in a hurry."

Investors Appear To Be Taking Default Threat Seriously. James Mackintosh of the Wall Street Journal (8/24, Mackintosh) writes that there are indications in the bond markets that investors see the risk of default as substantial, and are acting accordingly.

Trump To Kick Off Tax Reform Push With Visit To Missouri.

Bloomberg News (8/24, Talev) cites "an administration official familiar with the plans" who said President Trump "will kick off a campaign to overhaul U.S. tax policy next week with a visit to Missouri." Trump's Wednesday visit to Springfield "was expected to be the first of several presidential stops around the country in the coming weeks, said the official," who added that the President "is not expected to set forth his own plan or many specifics." Rather, Trump "sees his role as leading a public campaign to rally support as a group of House, Senate and administration officials seek to develop a unified approach."

Politico (8/24, Wilhelm) reports that White House officials said in July that President Trump would use the month of August "to lay the groundwork for tax reform before administration and congressional negotiators wrapped up their high-level work in September." However, with Congress set to return in less than two weeks, "and Republican leaders hoping to launch a major push to get tax legislation to the president's desk by the end of the year, Trump has barely mentioned the subject." White House press secretary Sarah Huckabee Sanders "said at a press briefing Thursday that tax reform could be a public focus for the White House as soon as next week."

Under the headline, "White House yielding to Congress on tax details," Politico (8/24, White) says the White House will not "release its own version of a tax reform plan and will instead leave that to the congressional leadership and the major tax-writing committees, a senior administration official said Thursday." Bloomberg News (8/24, Kapur) says the Administration "has sent mixed signals about how many details to expect as Congress returns from its monthlong recess next month," and with her statement Thursday, Sanders "provided no new specifics on how Trump plans to push for tax legislation." Congressional leaders see a July statement from the so-called Big Six group of White House officials and congressional leaders involved in tax negotiations "as having built the four walls of the house and believe it's the job of congressional tax writers to furnish it, according to one of the people."

White House Willing To Compromise On State, Local, Property Tax Deductions. The New York Post (8/24, Schultz) cites a "senior White House official" who said the Administration "is willing to compromise on a proposal to eliminate deductions on federal tax returns for state, local and property taxes – which would clobber high-tax states like New York." Rep. Tom Reed is "floating a compromise option to create a tax credit for state and local taxes – rather than a deduction," and a "senior White House official who is working on tax reform said the White House is open to this solution." The official said, "We were there to put the framework together and if committee members decide they want to do a credit and that's what we need to move this forward, then so be it."

Ryan: Tax Legislation Won't Include Temporary Cuts For Businesses. Reuters (8/24, Morgan, Zargham) reports that House Speaker Ryan on Thursday "rejected speculation that future tax legislation could include temporary tax cuts for businesses, saying macro-economic elements of tax reform including rates must be permanent." Ryan told CNBC (8/24), "We very passionately believe that permanence is very, very important. So the big decision-making provisions in the tax code? – That stuff's got to be permanent. ... There are other things you can do that can have time dates on it, to make sure that the numbers work. But the big macro-economic policies – the rates and things like that – that stuff has to be made permanent." Ryan added that Republicans "intend to keep a popular homeowner deduction for mortgage interest payments," but "indicated the deduction could change." Ryan said, "We recognize, acknowledge and believe you need to maintain the mortgage interest deduction. Whether it can be improved and how it works, that's a discussion we'll have on an ongoing basis."

USA Today Analysis: Trump Racking Up Victories On Energy Agenda.

USA Today (8/24, Collins) reports that since being inaugurated, President Trump has "signed executive orders opening the door for construction of the controversial Dakota Access and Keystone XL pipelines"; discontinued "a moratorium on coal leasing on federal land; blocked regulations on power-plant carbon emissions; overturned a ban on oil and gas drilling in the Arctic Ocean; delayed rules intended to prevent methane leaks from oil and gas wells; and announced plans for the US to pull out of the Paris climate agreement." USA Today adds that while Trump's vow "to repeal and replace the Affordable Care Act suffered a stunning defeat in Congress, and the prospects for his tax-reform pledge" remain uncertain, "when it comes to energy policy, the administration has managed to forge ahead on numerous initiatives aimed at not only making the US energy independent but turning it into a dominant energy force."

DOE Report: Government Should Make It "Easier And Cheaper" To Run Power Plants. The AP (8/23, Koenig) said that a report on the electric grid released Wednesday by the US Energy Department says "government should make it easier and cheaper to operate power plants, including coal and nuclear plants, to strengthen the nation's electric grid." The report finds that "the closure of many plants that once formed the backbone of the grid has raised the risk that consumers might not have reliable electricity." The AP said a "key recommendation" of the report "urges the federal government to make licensing and permitting faster and cheaper for facilities 'such as nuclear, hydro, coal, advanced generation technologies, and transmission.'"

Bloomberg News (8/23, Polson) said that the "long-anticipated" report "makes the case for rescuing the nation's coal industry from widespread plant shutdowns," but does not amount to "an assault on renewable power." Reuters (8/24, Volcovici) reports that Energy Secretary Rick Perry "commissioned the study in April to evaluate whether 'regulatory burdens' imposed by past administrations, including that of former President Barack Obama, had hurt the grid by forcing shutdowns of baseload plants, which provide nonstop power, like those fired by coal and nuclear fuel."

Administration Scraps Obama-Era Rule On Public Works Projects.

The New York Times (8/24, Hsu) reports that the Trump Administration is "abandoning" an Obama-era initiative, "killing a plan to allow cities to set aside work for local residents on federally funded public works projects." The Transportation Department gave no reason for it's "withdrawal of the plan, set to take effect on Friday." The Times adds that the future of "a related pilot program, which gave case-by-case approval for local hiring provisions on selected transportation and construction projects, is now in doubt."

Editorial Wrap-Up

New York Times.

"Say No To Sheriff Joe Arpaio, Mr. Trump." The New York Times (8/24) editorializes, "It would be difficult for President Trump, who has insulted judges and tried to interfere with a federal investigation, to show much more disrespect for the rule of law. But if he makes good on his implicit vow to pardon" former Sheriff Joe Arpaio, the President "would be scorning the Constitution itself." The Times argues that in refusing to stop practices that a federal judge found to be unconstitutional, Arpaio placed himself "above the law and the Constitution that he had sworn to uphold."

"The Slaughter Of Children In Yemen." In an editorial, the New York Times (8/25) writes that Saudi Arab should not be able to again change a United Nations draft report to keep its coalition in the Yemen conflict "off the list of armies that kill and maim children." While the Times acknowledges "no side is innocent of atrocities," the Saudi coalition "and its American enablers," the Times argues, "cannot be allowed to continue killing civilians and destroying what little is left of Yemen." To stop it, the Times calls for publicly identifying "the unconscionable slaughter of innocents for what it is" in the "hope that this will shame Saudi Arabia and its American backers to search for a humane end to Yemen's hell."

Washington Post.

"Don't Play Down A Sinister Attack On Diplomats In Cuba." In an editorial, the Washington Post (8/24, Board) lamenting the "dismal" results of the restoration of relations with Cuba, argues that the "small, highly disciplined police state where next to nothing goes unobserved by the regime" is most likely the cause of the injuries and that "sonic attacks would be in keeping with, if an escalation of, harassment that U.S. diplomats have long suffered in Havana, including constant surveillance and home and vehicle break-ins." The Post concludes that perhaps the State Department should not be giving Cuba "the benefit of the doubt" on this issue.

"What Could Have Prevented Tragedy In Charlottesville." In an editorial, the Washington Post (8/24, Board) criticizes Virginia state and local law enforcement agencies for their planning in advance of the violent protests in Charlottesville, arguing that while "things could have been much worse," with "better planning and execution...the tragedy in Charlottesville might have been contained or avoided."

"Don't Believe The Hype: The Justice Department Isn't Cracking Down On Anti-Trump Dissent." The Washington Post (8/24) editorializes that prosecutors "are investigating serious violations of public order that cannot be considered legitimate dissent in a rule-of-law society," and argues that "unlike other controversial episodes that have raised concerns about electronic privacy, the government is not operating in secret or behind the back of the judiciary." While the Post concedes that "courts must avoid chilling free speech and free association with overbroad warrants that discourage people from visiting protest websites for fear their data will be revealed and misused," prosecutors have "appropriately narrowed and clarified" their request for information, "assuring that" they "would seal away any data it collected that is irrelevant to the criminal investigation."

Wall Street Journal.

"Trump Divorces The GOP Congress." In an editorial, the Wall Street Journal (8/24) says that President Trump is effectively governing as an independent – and that the Capitol Hill GOP should treat him as one.

"The Park Service's Botched Bottle Ban." In an editorial, the Wall Street Journal (8/24) writes that the Administration's recent reversal of an Obama Administration ban on bottled water in national parks highlights what the Journal calls a teachable moment in the unintended consequences of environmental policy. Despite the National Park Service's desire to reduce plastic waste by banning bottled water, studies found that bottled beverage consumption did not decrease, as park-goers switched to drinking bottled sodas, which use more plastic.

"Macron's Test For France." In an editorial, the Wall Street Journal (8/23) writes that French President Emmanuel Macron's falling approval ratings continue despite Macron's attempts to fulfill his campaign promise to pursue economic reform – starting with a cut in housing benefits. The Journal argues that Macron received a mandate when he won to cut government jobs, reduce corporate taxes, and slash labor and pension regulations, and the Journal concludes wondering whether French voters ever intended him to fulfill his promises for supply-side reforms.

Washington Schedule

Today's Events In Washington.

White House:
PRESIDENT TRUMP — Receives his daily intelligence briefing; meets with Secretary of State Rex Tillerson; departs the White House en route to Camp David; arrives at Camp David.
VICE PRESIDENT PENCE — No scheduled public events.
US Senate: 11:30 AM Senate convenes for pro forma session * Senate on recess from 3 Aug – 5 Sep. Location: TBD http://www.senate.gov/. Contacts: Senate 1 202 224 3121.
US House: 11:00 AM House of Representatives convenes for pro forma session * House on recess from 28 Jul – 5 Sep. Location: TBD http://www.house.gov/. Contacts: House of Representatives Press Gallery 1 202 225 3945.
Other: 10:00 AM Secretary of Defense Employer Support Freedom Awards – 2017 Secretary of Defense Employer Support Freedom Award ceremony, for the highest honor given by the DoD to employers for support of National Guard and Reserve employees, presented by Deputy Secretary of Defense Pat Shanahan. 2017 recipients are Accordia Urgent Care & Family Practice, Boston Scientific, Cargill, Inc., Comcast NBC Universal, CSI Aviation, Hensel Phelps Construction Company, Howard County Fire & Rescue, Indianapolis Fire Department, Johnson & Johnson, Mesa Natural Gas Solutions, Office of the District Attorney Eighteenth Judicial District, Renown Health, Salt River Project, Tesoro and Zapata, Inc. * Awards established under the Employer Support of the Guard and Reserve office. Location: Pentagon, Arlington, VA http://www. FreedomAward.mil https://twitter.com/DeptofDefense #SecDefFreedomAward. Contacts: DoD press 1 703 697 5131. Journalists who do not regularly cover the Pentagon should RSVP by 1 p.m. EDT, Thursday, Aug. 24, by contacting Defense Press Operations at 703-697-5131. Foreign journalists without a Pentagon building pass must plan on being escorted from the River Entrance Pedestrian Bridge only, or, if arriving at the Pentagon Metro Entrance Facility, must contact 703-697-5131 a minimum of one hour prior to your arrival. Please arrive no later than 1 hour before the briefing if coming by Metro. US journalists without a Pentagon building pass will be picked up at the River Entrance Pedestrian Bridge or the Pentagon Metro Visitors Entrance only. If arriving by Metro, please contact 703-697-5131 a minimum of one hour prior to your arrival, and plan to arrive no later than 45 minutes before the event; have proof of affiliation and photo identification. Please call 703-697-5131 for escort into the building.

Last Laughs

Late Night Political Humor.

Trevor Noah: [On Hillary Clinton's new book] "Oh, snap! Hillary going hard on Donald Trump, and she's smart, too. She's doing it in the one place he'll never find her – a book."

Trevor Noah: [On Clinton's new book] "I'm excited to read this book because all through the campaign, half of the time I'm wondering, 'I wonder what's going through Hillary's mind now.' It doesn't happen with Trump. It's, like, could you stop telling us what's going through your mind now?"

Trevor Noah: [On Clinton's new book] "Trump is not saving anything for the book. He'll be the first president whose memoirs will be like a pop-up book."

Trevor Noah: [On Trump's speeches] "Every day this week, we have seen a wildly different Donald Trump address the nation, right? … Trump is like a Japanese toilet – too many settings to figure out."

Trevor Noah: [On Trump's speeches] "Serious Trump, somber Trump, free-style Trump. Personally, I'm waiting for the first appearance of reggae Trump. That's what I'm waiting for."

Oregon's 18 Timber Counties To Get $1.4M In Federal Payments.

The AP (11/30) reports that "financially strapped counties in western Oregon that rely on logging revenue will receive nearly $1.4 million that had been withheld by the federal government due to budget caps, authorities said Thursday." The Association of O&C Counties announced "Thursday the counties will see the funds soon." Interior Secretary Ryan Zinke said Thursday the Bureau of Land Management "will issue payments totaling $19.5 million to the 18 counties, including the $1.4 million." Zinke said in a statement, "My next priority is ensuring that these lands continue to provide sustainable timber harvests that support the community and strengthen the health of the forest."

The Roseburg (OR) News-Review (11/30, Cegavske) reports that Douglas County Commissioner Tim Freeman, who is also president of the Association of O&C Counties, "credited" Zinke and "other Interior Department officials with convincing the federal Office of Management and Budget to release the funds." Freeman "also thanked U.S. Rep. Greg Walden, R-The Dalles, for helping the association and the Interior Department communicate about the timber payments."

Also reporting are the Albany (OR) Democrat-Herald (11/30), the Oregonian (11/30), the Corvallis (OR) Gazette-Times (11/30), KDRV-TV Medford (OR) Medford, OR (11/30, Balkenbush), KTVZ-TV Bend (OR) Bend, OR (11/30), KOBI-TV Medford (OR) Medford, OR (11/30), and KAJO-AM Grants Pass (OR) Grants Pass, OR (11/30, Marsh).

Local TV coverage was provided by KOBI-TV Medford, OR (11/30).

U.S. Interior Dept. Says Federal Energy, Mineral Revenues Rose By $1 Billion.

Reuters (11/30, Volcovici) reports that "energy and mineral production on federal and tribal land generated $7.1 billion in disbursements in fiscal year 2017, $1 billion more than the previous year, the U.S. Interior Department said on Thursday." Interior "attributed the increase in disbursements to a larger number of lease sales totaling higher acreage, efforts to streamline permitting and reduce regulatory burdens, and higher oil and gas prices experienced during the year." Interior's Office of Natural Resources Revenue "disbursed $1.44 billion to five western states, $676 million to tribal governments and individual mineral rights owners and $950 million to the Land and Water Conservation Fund, which supports state and local parks." Interior Secretary Ryan Zinke said, "As the administration continues to cut red tape and end the overregulation of responsible energy development, we will be able to direct more funds to local communities and create more good-paying American jobs."

In the Albuquerque (NM) Journal (11/30, Coleman) "Inside the Beltway Blog", Michael Coleman states that "New Mexico reaped $455 million from energy and mineral production on

federal and Indian lands in fiscal year 2017," which is an increase of $86.5 million from last "year's total, according to the U.S. Department of Interior." The increase is the biggest among any state within the US.

Trump Expected To Shrink 2 Utah Monuments By Two-Thirds.

The AP (11/30, Daly) reports that President Trump will "announce plans next week to shrink two sprawling Utah national monuments by nearly two-thirds, an action that environmentalists and tribal leaders called illegal and another affront to Native Americans." The article says that "leaked documents obtained by The Associated Press show that Trump plans to shrink Bears Ears National Monument by nearly 85 percent and reduce Grand Staircase-Escalante National Monument by almost half." Trump has told Sen. Orrin Hatch and "other Utah officials that he will follow the recommendation of Interior Secretary Ryan Zinke to shrink both monuments, but the White House and Zinke's office have not offered details about how they'd redraw the monument boundaries."

Also reporting are the Washington Post (11/30, Eilperin), CNN (11/30, SchwarzCnn's Cover/, line), the Huffington Post (11/30, D'Angelo), the Deseret (UT) News (11/30, Roche), the St. George (UT) News (11/30, Daly), the Logan (UT) Herald Journal (11/30, Daly), the Grand Junction (CO) Daily Sentinel (12/1, Harmon), the Adventure Journal (11/30, Casimiro), and KSL-TV Salt Lake City Salt Lake City (11/30, Roche).

Why A Newly Signed Water Agreement Is Good News For The Pechanga Band Of Luiseno Indians.

The Riverside (CA) Press Enterprise (11/30, Horseman) reports that "the Pechanga Band of Luiseño Indians and the federal government have finalized an agreement that protects the tribe's access to regional groundwater, gives the tribe more than $30 million for water infrastructure and settles a longstanding water rights dispute." Interior Secretary Ryan Zinke, "along with Pechanga Tribal Chairman Mark Macarro and Rancho California Water District President Stephen Corona, signed the Pechanga Water Settlement Agreement on Wednesday, Nov. 29, at a Washington, D.C. ceremony." In a news release, Zinke said: "The federal government has a critical responsibility to uphold our trust responsibilities, especially tribal water rights."

Chickasaw Vietnam Vets Honored.

The Chickasaw Times (OK) (12/1) reports that several Chickasaw Vietnam War veterans "witnessed the 35th anniversary commemoration of the Vietnam Veterans War Memorial in Washington during a tour of the nation's capital sponsored by the Chickasaw Nation to honor their service, dedication and bravery." According to the article, "during the memorial, Chickasaw veterans received thanks for their service and sacrifice by top military officials, Department of Interior Secretary Ryan Zinke and passersby who swarmed the area located immediately northeast of the Lincoln Memorial on the National Mall."

Dem Pushes For Oversight On Trump Officials Using Private Jets.

The Hill (11/30, Sullivan) reports Rep. Frank Pallone Jr., the ranking Democrat on the House Energy and Commerce Committee, called on Chairman Greg Walden to hold oversight hearings concerning the use of private planes by Trump Administration officials. Pallone's letter Thursday cited former Health and Human Services Secretary Tom Price's extensive use of the planes and mentioned reports of improper use by EPA Administrator Scott Pruitt, Secretary of Energy Rick Perry, Interior Secretary Ryan Zinke and Treasury Secretary Steven Mnuchin. The letter said, "American taxpayers deserve assurances that their tax dollars are not wasted by the government's highest officials."

Bureau Of Indian Affairs

Senate Unanimously Approves Plan To Improve Conditions At Columbia River Tribal Fishing Sites.

The Oregonian (11/30, Harbarger) reports that "a unanimous U.S. Senate vote this week has given new hope to backers of promised housing for Native Americans along the Columbia River east of Portland." The legislation, "which was introduced in March and approved by the Senate on Wednesday, calls on the U.S. Bureau of Indian Affairs to visit the sites and study what is needed to improve them, then bring the infrastructure in line with the amount of use they get." The

article notes that "officials have not attached a dollar figure to the bill, nor has any money been allocated."

Additional coverage was provided by KTVZ-TV Bend, OR (11/30).

Supreme Court Won't Hear Local Land Trust Case.

The Utica (NY) Observer Dispatch (11/30, Madison) reports that "the U.S. Supreme Court earlier this week declined to hear a case regarding the United States taking more than 13,000 acres of land into trust for the Oneida Indian Nation." According to the article, "Upstate Citizens for Equality and the Town of Vernon have been challenging the authority of the U.S. Department of the Interior to take any land into trust for the Oneida Indian Nation for years."

Bureau Of Land Management

Sage Grouse Plan Should Stay As Is, Sen.

Bennet Says. The Grand Junction (CO) Daily Sentinel (12/1, Harmon) reports that "Westerners should oppose a move by the Interior Department to change plans established under the Obama administration for the greater sage-grouse, U.S. Sen. Michael Bennet, D-Colo., said Thursday." Bennet said, "Westerners agreed to their own solutions to safeguard sage-grouse habitat." He said that those plans are "at risk with (Interior Secretary Ryan Zinke's) insistence to rewrite" them. Bennet's comments came in advance of Friday's "deadline to comment on the plans."

Additional coverage was provided by the Craig (CO) Daily Press (11/30, Blair).

San Juan County Is Suing The Feds For Access To A Trail Near American Indian Archaeological Sites.

The Salt Lake (UT) Tribune (11/30, Wieber) reports that San Juan County is "suing the federal government, saying it is the rightful owner of access to Recapture Canyon." The lawsuit, "filed in U.S. District Court for Utah on Wednesday, seeks dominion of a path in Bureau of Land Management territory that was closed to motorized use in 2007 due to damage at nearby archaeological sites." The lawsuit claims "the county has a right to the path into the canyon, referred to in the suit as County Road D5314, because of historical ownership and maintenance."

Oregon Refuge Standoff Figure Free On House Arrest In Nevada.

The AP (11/30, Ritter) reports that Ammon Bundy, who was "at the center of an armed standoff with government agents near his family ranch in Nevada in 2014 and a takeover of an Oregon wildlife refuge in 2016 was released Thursday from federal custody in Las Vegas." On Wednesday, Chief U.S. District Judge Gloria Navarro offered "to release him, his father, Cliven Bundy, and a co-defendant from jail to house arrest with friends during their ongoing trial on charges in the armed standoff that stopped a federal roundup of Bundy cattle from public land." However, Cliven Bundy "refused the offer and remains in custody."

Also reporting is Reuters (11/30, Smith).

House Passes Bill To Reopen Areas Near BWCAW To Copper-nickel Exploration.

The St. Paul (MN) Pioneer Press (11/30, Myers) reports that "legislation that would reopen areas near the Boundary Waters Canoe Area Wilderness to copper-nickel exploration and potential mining cleared the U.S. House on Thursday." The bill "would end an Obama-administration ban on exploration and mining near the federal wilderness." The legislation "also prohibits any president from creating any new national monument in Minnesota without congressional approval."

Vandals Cause $25K In Damage To Historic Mining Structures.

The Rapid City (SD) Journal (11/30, Holland) reports that vandals "caused an estimated $25,000 damage" to two powder houses at the former Homestake Gold Mine. Chip Kimball, manager of the Bureau of Land Management's South Dakota field office in Belle Fourche, said, "It hurts my heart to see these buildings damaged. They're beautiful old buildings that are absolutely neat to see." The damage has "prompted BLM officials to offer a reward of up to $1,000 for information leading to the arrest and conviction of those responsible."

Additional coverage was provided by KNBN-TV Rapid City, SD (11/30, Olson).

Bureau Of Reclamation

Bureau Of Reclamation To Negotiate Water Exchange With State Of Utah Plan Would Divert River Water To Lake Powell Pipeline.

The Moab (UT) Times-Independent (11/30) reports that the U.S. Bureau of Reclamation and the state of Utah are "initiating negotiations for a water exchange contract, which proposes exchanging the state's assigned Green River water right for the use of Colorado River Storage Project water released from Flaming Gorge Dam." According to a press release from the BOR, "the exchange will provide Utah with a reliable and certain water supply, while assisting the bureau in meeting its legal obligations." The negotiation meeting is scheduled for Dec. 4.

Delta Residents Vent About Jerry Brown's Twin Tunnels Water Plan.

The San Francisco Chronicle (12/1, Fimrite) reports that about 200 people on Thursday attended a town hall meeting at the Jean Harvie Community Center to learn "about Gov. Jerry Brown's plan to solve California's water delivery problems." But "the folks from the river towns and rural communities along the Sacramento-San Joaquin River Delta didn't like what they heard about the plan that is being called California WaterFix."

Fish And Wildlife Service

Arctic Drilling Hits Speed Bumps In U.S. Tax Bill.

Reuters (11/30, Gardner) reports in continuing coverage that the GOP's bid to open Alaska's Arctic National Wildlife Refugeto drilling hit an obstacle after a nonpartisan Senate official ruled that the exploration was subject to environmental assessments by the Interior Department. The official said the energy committee measure did not adequately consider requirements under a national environmental law. However, Republicans offered new language to the measure and said drilling would advance if the tax bill passes.

Roll Call (11/30, McPherson) reports a dozen House Republicans wrote a letter to GOP leaders urging them not to allow drilling in the ANWR, potentially complicating the negotiations for a tax bill that can pass both chambers. The group wrote, "For decades, Congress has voted to prohibit oil and gas development in the Refuge, with the overwhelming support of the American public. ... Support for this protection remains strong today. After years of debate, the Arctic Refuge stands as a symbol of our nation's strong and enduring natural legacy." The House bill did not include an ANWR provision, but it is not clear if the representatives' concerns would be enough to prevent a vote on a final tax bill if the drilling measure is present.

U.S. Recovery Plan For Endangered Mexican Wolf Assailed By Environmentalists.

Reuters (11/29, Zuckerman) reports that the Trump Administration on Wednesday "unveiled a recovery plan for the endangered Mexican wolf, but environmentalists immediately assailed the program as so deficient it would lead to the demise of one of North America's most imperiled mammals." Environmental groups such as the Center for Biological Diversity "said the U.S. Fish and Wildlife Service plan is deeply flawed and would further endanger a creature that has struggled to make a comeback despite decades of conservation efforts." According to Michael Robinson, a conservation advocate with the center, "specifically, the government's recovery program would cause further geographic isolation of the wolves, suppressing their numbers and leading to greater inbreeding."

Also reporting are the Arizona Republic (11/30, Devoid) and Courthouse News (11/30, YOUNG-GRINDLE).

Biologists: Grizzly Numbers Hold Steady Around Yellowstone.

The AP (11/30, Brown) reports that "grizzly bear numbers in and around Yellowstone National Park are holding relatively steady, according to figures released Thursday, as state wildlife officials begin discussions on whether to hold the first public hunts for the animals in decades." According to the leader of the Interagency Grizzly Bear Study Team, "there are an estimated 718 bears in the Yellowstone region that includes portions of Wyoming, Montana and Idaho." Study team leader Frank van Manen with the U.S. Geological Survey noted that "that's up slightly from last year's tally of 695 bruins, but is not considered a significant increase because of uncertainties around the estimates."

Additional coverage was provided by the Bozeman (MT) Daily Chronicle (11/30, Wright).

The Tree That Rocked The Music Industry.

NPR (11/30, Benincasa) reports that "new regulations on the international movements of rosewood have hit hard in parts of the music industry, which has long relied on rosewood as a 'tonewood' used in many kinds of instruments, including guitars, cellos and clarinets." According to the article, "the reason for the crackdown" is "Chinese consumers' growing demand for rosewood or 'hongmu' furniture." However, U.S. manufacturers "say the regulations are misguided," and some officials agree. Craig Hoover, who manages the CITES treaty for the United States at the U.S. Fish and Wildlife Service, said, "I think the question of whether we're regulating more than we need to is really the one that's on the table for us right now. And we need to examine whether or not there are things that we can let go, in terms of CITES controls, and still achieve the conservation results we want to achieve. So, I don't think we have come to the conclusion that we got it exactly right."

Swift Foxes Swiftly Spreading Into Western Wyoming.

Wyoming Public Radio (11/30, Edwards) reports that the swift fox is "gaining in numbers on the western half of the state, according to recent surveys by the U.S. Fish and Wildlife Service." Non-game biologist Nichole Bjornlie said, "for some reason, the species has long done well in Wyoming and Colorado but was almost wiped out in Montana and Canada"

National Park Service

President And First Lady Light National Christmas Tree.

ABC World News Tonight (11/30, story 14, 0:10, Muir) reported that President Trump and the First Lady lit the National Christmas Tree in Washington on Thursday. NBC Nightly News (11/30, story 13, 0:15, Holt) reported that this year's event was co-hosted by Kathie Lee Gifford and "featured several performers including the Beach Boys."

The AP (12/1, Colvin) reports that the President "counted down from 10 before his wife, Melania, pushed a button to set the tree aglow with golden lights and silver stars." Said Trump, "Today's a day that I've been looking very much forward to all year long. And now, as the president of the United States, it's my tremendous honor to finally wish America and the world a very merry Christmas."

Politico (11/30, Nussbaum, D'Abruzzo) reports that "25,000 visitors are expected to participate in public tours" of the newly decorated White House during the holiday season. The White House plans to host about 20 receptions honoring groups such as the press, the Secret Service, members of Congress, White House staff, and military families.

The Washington Post (11/30, Heil) reports that the First Family appears to have started a new tradition by introducing an official Christmas ornament, "a glittery gold-colored ornament bearing the presidential coat of arms." It is not clear yet how many of the ornaments will be distributed.

Visits To Katahdin Woods Quadruple From Last Year's Season.

The AP (11/30) reports that the Katahdin Woods and Waters National Monument is "likely to draw nearly 15,000 visitors by the end of the year — four times the number of people who visited during an abbreviated first season." According to Superintendent Tim Hudson, "7,162 vehicles visited the area for the year as of Saturday, and Hudson says he conservatively estimates the vehicles carried a total of two people each — a total of 14,323 visitors."

WMEA-FM Portland, ME (11/30, Sambides) reports that "reactions to the 2017's vehicle count were, predictably, mixed." Katahdin Area Chamber of Commerce President Jamie Brundrett said the figure was "exactly what we were all hoping for." However, monument opponent and Maine Snowmobile Association President Bob Meyers called the turnout "pretty underwhelming."

Road To Fort Pickens To Reopen Saturday After Repairs.

The Pensacola (FL) News Journal (11/30, Gabriel) reports that "the National Park Service road between Pensacola Beach and historic Fort Pickens will reopen early Saturday after repairs from Hurricane Nate." Gulf Islands National Seashore "said Thursday that contractors have finished repairs to washed-out asphalt and to the honeycomb-like matting designed to keep the road bed in place."

Fort Sumter National Monument Seeks Public Comment.

The Charleston (SC) Moultrie News (11/30) reports that Fort Sumter National Monument is seeking public input on "the proposed replacement of the existing and inoperable accessibility chairlifts with a combination of ramps and an enclosed elevator which will meet guidelines with the Architectural Barriers Act (ABA) and the Americans with Disabilities Act (ADA) as well as the National Historic Preservation Act (NHPA)."

Continuing Coverage: Maine AG Joins Bipartisan Coalition Opposing Nat'l Park Fee Hikes.

Continuing coverage of proposed fee hikes at national parks was provided by the Free Press (ME) (11/30, O'Brien), the Ellsworth (ME) American (11/30, Dodson), the Greene County (VA) Record (11/30, Beigie), the Moab (UT) Times-Independent (11/30, Egelhoff, Knight), the Missoulian (MT) (11/30, Erickson), the Helena (MT) Independent Record (11/30, Erickson), and the Belgrade (MT) News (11/30).

Office Of Insular Affairs

Bernie Sanders Unveils Massive Puerto Rico Reconstruction Bill.

The Huffington Post (11/28, Marans, Kaufman) reports that Sen. Bernie Sanders "introduced a bill Tuesday to rebuild and modernize the infrastructure of Puerto Rico and the U.S. Virgin Islands with a massive federal investment of $146 billion." The legislation, titled "The Puerto Rico and U.S. Virgin Islands Equitable Rebuild Act of 2017," would "transform the U.S. territories' energy, housing, education, agriculture, transportation and health care systems, addressing problems that have bedeviled the islands since long before two massive hurricanes plunged them into a state of full-on humanitarian crisis in September." However, the bill "faces a bleak future in the Republican-controlled Congress."

What Bikini Atoll Looks Like Today.

Medium (11/20, Scott) reports that Stanford biology professor Stephen Palumbi visisted Bikini Atoll "for a 10-day research trip featured in Big Pacific, a documentary that aired this summer on PBS." He found that the atoll, "nearly 60 years after the last of 23 nuclear explosions in its land, air and water...again looks like the idyllic Pacific paradise it was in 1946." Palumbi saw "a reassembling ecosystem, including schools of large fish, reef sharks and robust coral, which may have begun life as little as a decade after the area's annihilation."

Federal Government Now Demanding Priority Over VI Bondholders Before Releasing $500 Million Loan.

The Virgin Islands Consortium (VIR) (11/30) reports that "the Legislature of the Virgin Islands on Wednesday took no action on a bill aimed at authorizing the Government of the Virgin Islands to receive hundreds of millions of dollars in low-interest loans from the federal government." However, "what was once an authorization for a community disaster loan through the Federal Emergency Management Agency (FEMA) to the local government that lawmakers were ready to quickly pass, now includes a sticking point that has placed the senators in an almost impossible position." In a letter the Legislature, Gov. Kenneth Mapp wrote "that the U.S. Treasury and FEMA were requiring priority payments from the Matching Fund Revenue (MMR) and Gross Receipt Tax (GRT) bonds over the Government of the Virgin Islands' current bondholders."

Guam Student Scores Improve, But Still Low.

The Pacific (GUM) Daily News (11/30, Eugenio) reports that "Guam public school students' test scores for school year 2016-2017 were better than last year, especially in English." However, "island students still test low in reading and math. And, overall, Guam students' scores still are lower than the national average."

People In Marshall Islands Face Existential Threats From Climate Change.

Taiwan News (11/29, Pei-ju) reports that in "parts of the Pacific Ocean, the number of environmental refugees continues to mount due to sea level rise, surging temperatures, unusual storms, and enduring droughts." According to the United Nations Framework Convention on Climate Change, "violent storm Cyclone Pam wreaked havoc in the Pacific ocean in 2015 which left 75,000 residents in Vanuatu displaced or homeless, and more than 20,000 people from the Marshall Islands have emigrated to the U.S, owing to the impacts of extreme weather conditions in their homeland."

Official: CW Program Still Needed While Nurses Transition To Other Visas.

Marianas Variety (11/30, Lirio) reports that Commonwealth Healthcare Corp. Chief Executive Officer Esther Muna "said the hospital still needs the CW program for its nonresident nurses and other healthcare staff while CHCC applies for other types of U.S. work visas." Muna "said their nurses and other critical staff cannot be 'out of status' which means they will have to leave the island."

US Geological Survey

Rare Earthquake Shakes East Coast.

ABC World News Tonight (11/30, story 3, 1:35, Muir) reported that a rare earthquake was felt on Thursday "in DC, Philly and New York." The quake was centered near Dover, Delaware. No damage or injuries have been reported. NBC Nightly News (11/30, story 4, 1:20, Holt) reported that the quake had a magnitude of 4.1 and hit just before 5:00 p.m. "This is a large earthquake for the East Coast. It's one of the largest in the last decade and is felt from New York to Washington, DC," said seismologist Lucy Jones. Additional coverage was provided by the CBS Evening News (11/30, story 3, 0:20, Mason).

The AP (11/30, Chase) reports that Paul Caruso, "a geophysicist with the USGS's earthquake information center in Colorado, said he didn't expect any significant damage from the small quake, which he described as unusual."

Also reporting are CNN (11/30, Almasy), USA Today (11/30, Goss, James, Network), the Washington Post (11/30, Achenbach), Reuters (11/30, Maler), Newsday (NY) (11/30, Gralla, Dowdy), the Baltimore Sun (11/30, Dance), and WTOP-FM Washington Washington (11/30, Hensley).

Opinion Pieces

Developing Alaska's Wildlife Refuge Is A Win-win-win.

Sen. Dan Sullivan asserts in a Washington Post (11/30, Sullivan) op-ed that in an editorial criticizing a decision to develop part of Alaska's Arctic National Wildlife Refuge, the Post "recycled stale, 40-year-old talking points without adding a single voice from the vast majority of Alaskans — Democrats and Republicans — who support the development." Sullivan emphasizes that the development "will create jobs, grow the economy, increase energy security for Americans, and, importantly, help protect the global environment and strengthen our national security."

Alaska Drilling Dividend. The Wall Street Journal (11/30) editorializes that potential drilling in the Arctic National Wildlife Refuge is another growth dividend that the new Republican tax reform legislation will offer. The Journal argues that the economic benefits of the potential drilling far outweigh the minimal environmental impact.

A Man Is Dead. But How?

The Washington Post (11/30) editorializes that US Park Police, which "rarely finds itself the subject of intense scrutiny," now "is under the microscope for a barely explained incident Nov. 17 in which at least one of its officers opened fire on an apparently unarmed motorist after an alleged hit-and-run accident on the G.W. Parkway." The motorist died on Monday. According to the Post, "it is anyone's guess why this incident ended in death, because everyone even tangentially involved in it has clammed up – the Park Police, whose officer or officers shot the man at least twice in the head; the Fairfax County police, whose own officers, tailing the Park Police vehicle, apparently recorded the shooting with their dashboard camera; and the FBI, to which the Park Police transferred the investigation a few days after the incident." The Post argues that "the public also deserves a detailed explanation of what happened."

Trump Fails Test For Small Government.

For the "Congress" blog of The Hill (11/30, Hopper), M. Reed Hopper, a senior attorney with the Pacific Legal Foundation, writes in disappointment that the Trump Administration has failed to live up to its promise to curb "regulatory overreach and overzealous enforcement" with its stance on the designation of "1,500 acres of private land in Louisiana as 'critical habitat' for the dusky gopher frog." In Markle v. U.S. Fish and Wildlife Service, Hopper writes, "along with the new

habitat rule, provided a test for the Trump administration." However, "based on recent pleadings in the Markle case and in a similar case where the service designated thousands of acres of unsuitable land as 'critical habitat' for the Gunnison sage-grouse, it appears the Trump administration has abandoned its promise to rein in runaway federal agencies, at least in the area of ESA regulations and will continue the previous administration's practice of pushing the limits of federal power to the breaking point."

Parks, Duke Rate Hikes And Cheesy Distinctions: This Week's Report Card.

The editorial board of the Asheville (NC) Citizen-Times (11/30) gave a "A to the National Park Service rangers and others whose efforts prevented the fire a year ago in Gatlinburg from becoming even worse than it was." According to the board, "the toll was high – 14 lives lost, 17,000 acres burned, $2 billion in property damage – but it would have been worse had it not been for the efforts of the two score rangers and other first responders under the direction of Jared St. Clair, Tennessee District supervisor for the park service."

Top National News

White House Reportedly Planning To Replace Tillerson With Pompeo, Place Cotton At CIA.

Multiple sources report that Secretary of State Tillerson is expected to be replaced by CIA Director Pompeo in the near future, with Sen. Tom Cotton then nominated to lead the CIA. While the White House did not confirm the plan, reportedly crafted by Chief of Staff Kelly, nor did officials defend Tillerson on Thursday. Analyses say that Pompeo would be a more aggressive force at Foggy Bottom, and also one much more aligned with President Trump than Tillerson has been.

In opening the CBS Evening News (11/30, lead story, 2:35), Anthony Mason reported that CBS "has confirmed the White House has a plan to force Tillerson out." CBS' Margaret Brennan: "Today, President Trump refused to answer questions about a White House plan to replace Secretary of State Rex Tillerson after less than a year on the job. Mr. Trump has been publicly frustrated with his top diplomat." Trump: "We disagree on a couple of things. Sometimes I'd like him to be a little bit tougher." Brennan: "That comment came just three days after Tillerson held an extraordinary news conference last month to shoot down reports that he had called the President a 'moron.'"

On ABC World News Tonight (11/30, story 4, 2:45, Muir), Cecilia Vega reported that there was "hardly a vote of confidence from President Trump. Do you want Rex Tillerson on the job, Mr. President?" Trump: "He's here. Rex is here." Vega: "But the question tonight: for how much longer? ABC News has learned White House officials have a plan to replace [Tillerson], an ouster that could come in a matter of weeks. ... Trump has repeatedly and very publicly undercut his own Secretary of State, saying Tillerson was 'wasting his time' trying to negotiate with North Korea, even calling him weak."

NBC Nightly News (11/30, story 5, 1:15, Holt) reported on "the drama erupting inside the President's Cabinet." NBC's Hallie Jackson said that Trump's Thursday remarks were not a

"ringing endorsement for Tillerson, as speculation swirls around his future in the Cabinet." The Wall Street Journal (11/30, Bender, Nicholas) reports under the headline "Trump Declines To Quash Speculation About Rex Tillerson's Ouster" that the President did not refute the reports.

On CNN's Situation Room (11/30), Jim Acosta reported that Tillerson "appears to be on his way out," adding that "it's no secret Tillerson has been on thin ice for weeks ever since he was quoted calling the President a 'moron.'" Rich Edson reported on Fox News Special Report (11/30) that the reports of White House plans to "transition Tillerson out" come as "officials acknowledge low morale at the State Department" due to staffing cuts amid Tillerson's "effort to redesign" the department.

The AP (11/30, Colvin, Lederman) reports "Administration officials" said the White House "is discussing a plan to oust" Tillerson and replace him with Pompeo, who would in turn be replaced by Cotton, "one of Trump's staunchest defenders on foreign policy in Congress." The New York Times (11/30, Baker, Haberman, Harris) reports that Cotton "has signaled that he would accept the job if offered," though Cotton told Fox News Special Report (11/30), "Sarah Sanders said today that she had no personnel announcements to make, and we are in the middle of voting on a very important tax bill in the Senate. I will be going back there shortly to cast those votes where I am proud to be representing the people of Arkansas."

The Washington Post (11/30, Rucker, Parker, Gearan) reports that the plan to replace Tillerson with Pompeo and Pompeo with Cottton was "hatched by" Chief of Staff Kelly. The Post writes, "Chatter about Tillerson's potential ouster reached a fever pitch in October, after NBC News reported that Tillerson had called Trump 'a moron.' Though Tillerson had told friends he wanted to make it as secretary of state for a full year and has insisted publicly that he had no plans to quit, rumors of his impending departure gained a nickname – Rexit." Tillerson "has alienated both onetime allies at the White House and his underlings at the State Department with what many call a highhanded and tone-deaf manner."

The Los Angeles Times (11/30, Wilkinson, Bierman) says that "multiple media reports said Trump was actively considering replacing Tillerson" with Pompeo "in another top level shakeup of an administration that has seen an unusual turnover of senior officials." The change is expected before January 20, when Trump will mark one year in office. The Hill (11/30, Fabian, Easley) reports that Sanders "refused to say" whether the Trump still has confidence in Tillerson. The Washington Free Beacon (11/30, Kugle) reports that the press secretary said Tillerson "will 'close out the year' just like reporters 'because that's how the calendar works.'"

The Washington Post (11/30, Gearan, Morello) reports that Tillerson "went about his day as usual." Politico (11/30, McCaskill) reports that Tillerson "made what a State Department spokeswoman said were two ordinary trips to the White House. Neither his public schedule nor the daily White House guidance had included a visit to the White House." Roll Call (11/30, Bennett) headlines its report "White House Won't Discuss Tillerson's Future Beyond Year's End." CNBC's Christina Willkie tweeted, "It used to be that having 'the full confidence of the president' was the kiss of death for staffers (Spicer, Price, Flynn). But they won't even give Tillerson that much lip service. He's just 'here.'"

In the New York Times (11/30), former Deputy Secretary of State Anthony Blinken writes, "It's hard to overstate the lasting harm Mr. Tillerson's tenure will do to America's diplomacy." In November, Barbara Stephenson of the American Foreign Service Association "reported that 'our leadership ranks are being depleted at a dizzying speed.' Since January, the department has lost 60 percent of its career ambassadors – the equivalent of four-star generals – more than 40 percent of its three-star-equivalent career ministers and about 14 percent of its two-star-equivalent minister counselors." Blinken writes, "In the absence of an engaged, diplomatically energized America, others will set the agenda...and probably not in ways that advance our interests or values."

Bloomberg News (11/30, Jacobs) and Reuters (11/30, Walcott, Holland) also have stories on the reported change at State.

Pompeo Has Reportedly Been Getting Ready To Move To State. The Washington Post (11/30, Rogin) reports that "since well before the White House plan...became public Thursday, Pompeo had been informally preparing to take over in Foggy Bottom, reaching out to potential candidates for positions and collecting ideas." Pompeo "has been calling around to friends and top Republican foreign policy hands and asking them to help him get ready to be America's top diplomat." Politico's Blake Hounshell tweeted, "It seems Mike Pompeo is already measuring the drapes on the seventh floor of the Truman Building."

In another report, the Washington Post (11/30, Gearan, Morello) says that several top congressional figures were noncommittal. Senate Foreign Relations Chairman Bob Corker said, "I

really have no way of rating Pompeo. ... I could barely pick Pompeo out of a lineup." Rep. Adam Smith (D-WA), ranking member on the House Armed Services Committee, told C-SPAN, "I've served with Congressman Pompeo. I'm not sure he's a significant upgrade from Secretary Tillerson."

However, Reuters (11/30, Mohammed) writes that Pompeo "would have three assets Rex Tillerson did not: experience in government, the confidence of President Donald Trump, and a defter touch with Congress and the bureaucracy." Still, he "would suffer from problems that have afflicted Tillerson, chief among them a boss who has shown little regard for diplomacy and no qualms about undermining his secretary of state with tweets," according to current and former officials.

McClatchy (11/30, Shorman, Kumar) reports that Pompeo "has taken aggressive foreign policy stances, saying the West faces increasing threats. But he has also said the greatest threat facing America is its national debt." Aaron Blake of the Washington Post (11/30) writes that while heading the CIA, "a job that often requires independence from the White House and politics more generally," Pompeo "has made conspicuously pro-Trump moves...to the point where he has reportedly given intelligence officers heartburn."

The New York Times (11/30) editorializes, "The problem is that Mr. Pompeo may be too chummy. ... Pompeo has never shed his partisan clothing," and "has not been shy about mixing politics with intelligence and policy and may feel even freer to do so at the State Department." David Ignatius writes in his Washington Post (11/30) column that under Pompeo, "the atmospherics will be a more activist, hawkish, extroverted US foreign policy. Pompeo is good at the things Tillerson isn't. And he has the president's confidence and speaks with the tough, sure voice that Trump wants to project."

Max Boot of the Council on Foreign Relations tweeted, "Odds are that Pompeo will do better than Tillerson – it would be nearly impossible to do any worse. But that doesn't mean that US foreign policy will become any more coherent or effective."

Cotton Would Become Youngest-Ever CIA Chief. The New York Times (11/30, Davis) reports that if the 40-year-old Cotton, an Iraq War veteran and first-term senator, does succeed Pompeo, "the youngest member of the Senate would also be the youngest person ever to lead the nation's premier intelligence agency. Serving as C.I.A. director would seal his reputation as a young man in a hurry in Washington, underlined by his lack of experience relevant to the job." The Times says, "It is unclear how leaving the Senate would affect Mr. Cotton's outsize political ambition, widely believed to include an eventual run for president."

Paul Kane of the Washington Post tweeted, "Cotton-to-CIA would be high risk to national ambition: GHWB only agency director to ever become POTUS. It can end in infamy (Tenet, Petraeus) or as capstone to career (Goss, Brennan)."

Other Top Officials May Soon Exit West Wing. The Wall Street Journal (11/30, Bender) reports that other key Administration figures may also exit before January 20, including National Economic Council Director Gary Cohn, Deputy Chief of Staff Rick Dearborn, and Legislative Affairs Director Marc Short. Reuters (11/30, Mason) reports that one "Trump adviser" said, "You're definitely going to see some people leave after tax cuts get done."

Outraged UK Officials Call For Cancellation Of Trump Invitation Following Retweets.

Second-day coverage of President Trump's retweeting of three videos shared by British anti-Muslim activist Jayda Fransen slowed, with only CBS running a detailed report, and ABC and NBC running briefer items. Continuing coverage deals primarily with the uproar in the UK, where Prime Minister Theresa May is under pressure to cancel an invitation for Trump to make a state visit.

On the CBS Evening News (11/30, story 6, 2:10, Mason), Charlie D'Agata reported, "The far-right anti-Muslim group Britain First is used to street fighting to drive home its extremist message. But now, a day after President Trump re-tweeted the group's inflammatory videos, the fight has spread to parliament." Labour MP Stephen Doughty: "He is either a racist, incompetent, or unthinking, or all three." D'Agata: "Opposition politicians piled on the pressure to cancel the official state visit that has been extended to the President. ... Even members of the Conservative government agreed." Sajid Javid, a member of May's Cabinet, tweeted, "So POTUS has endorsed the views of a vile, hate-filled racist organisation that hates me and people like me. He is wrong and I refuse to let it go and say nothing."

ABC World News Tonight (11/30, story 8, 0:40, Muir) reported on the "growing backlash" against Trump, with "the London mayor and members of Parliament across the political spectrum expressing outrage." Labour MP Dennis Skinner: "Action is needed now, not a slap on the wrist. Cancel the state visit." Muir: "Calls are growing louder for the Prime Minister to withdraw the

invitation of a state visit to President Trump." NBC Nightly News (11/30, story 6, 1:00, Holt) showed a clip of May saying, "The fact that we work together does not mean that we're afraid to say when we think the United States have got it wrong." Casting Trump's retweets as "an unforced diplomatic error," Fox News Special Report (11/30) reported that Trump "hadn't bothered to check on who the group was" before he posted the videos. Politico (11/30, Lima) reports that British Ambassador to the US Kim Darroch "said that the people of Britain 'overwhelmingly reject the prejudiced rhetoric'" of Britain First.

The New York Times (11/30, Castle) reports, "Pressure was growing in Britain on Thursday to withdraw President Trump's invitation for a state visit, as trans-Atlantic tensions increased." British politicians "have reacted with incredulity" to the retweets, "and they held an urgent debate on the matter in Parliament on Thursday. Opposition politicians demanded that the idea of a state visit should be dropped, with some critics arguing that it would place Queen Elizabeth II, as host, in an invidious position."

Bloomberg News (11/30, Donaldson, Penny) reports that in a statement, London Mayor Sadiq Khan said, "I have previously called on Theresa May to cancel her ill-judged offer of a state visit to President Trump. After this latest incident, it is increasingly clear that any official visit at all from President Trump to Britain would not be welcomed." British political columnist Matthew D'Ancona writes in the New York Times (11/30), "Trump's state visit to Britain should be canceled without delay. The withdrawal of the invitation...would indeed be a diplomatic embarrassment and – given Mr. Trump's vindictive temperament – would be unlikely to go unpunished. ... But it must be taken."

The Washington Post (11/30, Adam, Booth) reports under the headline "Britain Furious, Trump Unapologetic As Fallout Swells From Anti-Muslim Videos" that "in a sign of the disruptive wake unleashed by Trump, Britain's Home Secretary Amber Rudd had to remind Parliament and the public that Britain's relationship with the United States was bigger than one president – and that important trade, security and intelligence sharing are ongoing." The Wall Street Journal (11/30, Douglas, Gross) reports that the has strained relations and created sudden and unexpected tension between two close allies. In an editorial, the Wall Street Journal (11/30) says that this may be the greatest real damage caused by Trump's recklessness.

Reuters (11/30) and the Los Angeles Times (11/30, Boyle, King) have similar coverage of the British response.

Sanders: Trump's Retweets "Elevate The Conversation." Bloomberg News (11/30, Olorunnipa, Epstein) reports that White House press secretary Sarah Sanders defended Trump's retweets "as contributions that 'elevate' debate on terrorism and national security." Sanders said, "What he's done is elevate the conversation to talk about a real issue and a real threat, that's extreme violence and extreme terrorism, something that we know to be very real and something the President feels strongly about."

The Washington Post (11/30, Wagner) reports that Sanders "said she did not think Trump knew who the activist was who originally posted the videos." CNN's Situation Room (11/30) reported that Sanders also "dodged" questions about whether the videos are accurate amid revelations that an "attacker" in one of the videos who is alleged to be a Muslim migrant was actually born and raised in the Netherlands. Politico (11/30, Lima) briefly covers Sanders' comments.

State Department Warned White House That Retweets Could Spark Embassy Protests. CNN (11/30, Labott, Phillip) reports on its website that "multiple State Department officials said the department communicated to the White House that there was concern that protests could happen at US embassies." Officials feared that the retweets "would spark a reprise of the violent protests at US embassies in the Middle East which are already on high security alert."

More Than 30 Senators Have Criticized Retweets. PBS' NewsHour (11/29, Desjardins) reports on its website that it "reached out to every US senator for their reactions to these Trump retweets," and of the 50 to respond so far, 29 Democrats and four Republicans "criticized the tweets, two Democrats and 11 Republicans said they haven't seen them, and three declined to comment." PBS has the senators' comments. The Hill (11/30, Manchester) reports on the PBS tally.

Legislators, Commentators Critical. CNN (11/30, Vazquez) reports on its website that Rep. Adam Kinzinger (R-IL) told CNN that Trump's retweets do not "help the fight against terrorism." Kinzinger said, "I think we have ISIS on its heels. We're fighting, frankly, these forces of evil all over the world. But I do think it matters if you retweet a video that's not real or that is put out by an extremist in the UK."

Rep. Suzanne Bonamici (D-OR) tweeted, "The President tweeting insulting anti-Muslim

videos was offensive, dangerous, and just plain wrong. I stand with our Muslim neighbors, friends, and allies and against bigotry and hate." Rep. Keith Ellison (D-MN) tweeted, "If Courts have any doubt about whether Trump's Muslim travel ban is a Muslim travel ban, they should review Trump's retweeted anti-Muslim videos." Rep. Nita Lowey (D-NY) tweeted, "@POTUS's retweet of anti-Muslim videos is not only indefensible – it betrays our values & could put our diplomats & military service in danger." Rep. Betty McCollum (D-MN) tweeted, "When the President of the United States embraces and emboldens hate groups, at home or abroad, Congress must formally examine his fitness for office and his ability to continue to lead this great nation."

Former Defense Secretary Leon Panetta said on CNN's Situation Room (11/30) that Trump's actions were "extremely reckless and careless." He said there is a "danger" that by giving those videos a platform, Trump may "create disruptions abroad and demonstrations at US embassies...that jeopardize lives." Former DNI James Clapper similarly said on CNN's Anderson Cooper 360 (11/30) that Trump's decision to retweet the videos "smacks of recklessness if not abject carelessness. It's very concerning to me to see this unnecessary risk to our people overseas."

In his Washington Post (11/30) column, Eugene Robinson asks, "How long are we going to pretend that President Trump is fully rational? How long are we going to ignore the signs that he is dangerously out of control?" Robinson writes that Trump "continues to entertain paranoid conspiracy theories of the kind usually found beneath tinfoil hats," and that "the problem is...serious – and it's getting worse."

Anne Applebaum writes in her Washington Post (11/30) column, "If the president's account was not the president's account, then counter-extremist teams in the British government or at the tech companies would now track it, and might eventually suspend it: After all, it has successfully given extremists some mainstream endorsement. But it is the president's account."

Washington Post columnist Michael Gerson tweeted, "When a president endorses anti-Muslim propaganda, he is defaming millions of Muslim Americans, encouraging hate crimes, alienating Muslim allies in the war against terrorism, and increasing the risk to American military forces fighting beside those allies."

Senate Tax Bill Delayed As Parliamentarian Rejects "Trigger," JCT Predicts Higher Deficit.

In a development that the New York Times (11/30) says "complicated the Republican argument" that their tax bill "will essentially pay for itself," the Joint Committee on Taxation said Thursday "that economic growth induced by the tax cut would only offset $407 billion of its $1.5 trillion cost over the next decade." Ylan Mui reported on CNBC's Closing Bel (11/30) that the $407 billion figure "does appear to be lower than what Senate Republicans were hoping for," and the Los Angeles Times (11/30, Mascaro, Puzzanghera) says that according to the report, "the bill still would add $1 trillion to the deficit, undercutting assertions by Republican leaders and Trump administration officials that the additional growth spurred by the bill's large tax cuts would pay for themselves over time." USA Today (11/30, Shesgreen) says the report "could introduce fresh uncertainty to the Senate deliberations just as Republicans appeared to be on the brink of passing their sweeping tax package."

The Washington Post (11/30, A1, Long) reports in a front-page story that Republicans appeared "almost shocked by how little credit the report gave to the power of tax cuts to drive economic growth," and some "argued that the tax committee's report just couldn't be correct." However, "outside experts were not surprised by the results, which align with the view of many mainstream economists and several independent analyses."

Senate Finance Committee Chairman Chuck Grassley took issue with the score, telling CNBC's Closing Bell (11/30), "In Washington, DC generally, but particularly in the Congressional Budget Office and only recently in the Committee on Joint Tax, there's been a bureaucratic opposition to considering anything in a dynamic scoring area. So I think you're going to see them to be very, very conservative because of that long-term opposition to doing dynamic scoring, and I think it just proves to me that we're going to do a lot better because of their bureaucratic resistance to dynamic scoring." However, the Washington Times (11/30, Sherfinski) reports that Sen. Ron Wyden, the ranking Democrat on the Senate Finance Committee, said, "The score ends the fantasy about magical growth, about unicorns and growth fairies suddenly showing that tax cuts pay for themselves."

Meanwhile, Bloomberg News (11/30) reports that Senate Majority Leader McConnell said Thursday that votes on the measure will resume at 11 a.m. Friday "as the collapse of a key compromise to win a majority for a Senate tax overhaul left Republicans scrambling to salvage

the legislation." According to the Senate parliamentarian, "a so-called trigger," which "would have increased taxes if revenue targets weren't met," did not "pass procedural muster." Bloomberg adds that "at least three Republicans," Sens. Bob Corker, Jeff Flake, and James Lankford "had tied their votes to the mechanism," and are "now demanding that leaders agree to other changes in the bill to avoid a huge deficit increase." The Washington Post (11/30, A1, Werner, Debonis, Paletta) says Corker and Flake "demanded the bill be fundamentally changed to add tax revenue back into the package, a concern that had become heightened because" of the JCT's finding.

Axios (11/30, Owens) says Republicans now need "to find hundreds of billions of dollars to make deficit hawks happy or the bill might die – and many Republicans don't like any other ideas to raise taxes." Nancy Cordes said on the CBS Evening News (11/30, story 2, 2:35, Mason) that "many Republicans are worried they'll miss the moment if they tinker with the bill any longer." A front-page story in the Wall Street Journal (11/30, Hughes) casts the development as a major complication for Republicans.

Politico (11/30, Kim, Wilhelm) quotes Senate Majority Whip Cornyn as saying, "It doesn't look like the trigger is going to work, according to the parliamentarian. ... So we have an alternative, frankly: a tax increase we don't want to do to try to address Sen. Corker's concerns." Reuters (11/30, Cornwell, Becker) reports that Republicans were "considering building future tax increases into their bill as they sought to lock in votes needed for approval." Sen. David Perdue said, "It's not a threshold anymore. It's just a tax increase. ... The only thing that's come off the table is the trigger concept."

In what Bloomberg News (11/30) calls "a potential nightmare scenario for Republicans," GOP leaders are "contemplating a variety of potentially unpalatable measures – including making some tax cuts on the individual and corporate side end within six or seven years." The Hill (11/30, Bolton, Jagoda) says Senate Republican leaders "have agreed to roll back $350 billion in tax relief in response to a procedural ambush by deficit hawks led by" Corker "that nearly killed the GOP tax reform bill." According to Cornyn "the details of the proposal are being worked out," but Perdue "said the estimated reduction in tax relief would be $350 billion over a decade."

McCain Says He Will Support Tax Bill. In what the AP (11/30, Gordon, Ohlemacher) describes as a "major boost" for the bill, Sens. John McCain and Lisa Murkowski "announced their support." Similarly, The Hill (11/30, Carney) calls McCain's support "the latest boost to Republicans, after every GOP senator voted to start debate on the legislation Wednesday evening." Capitol Hill Correspondent Kasie Hunt said on NBC Nightly News (11/30, lead story, 2:35, Holt) that even if Republicans "do pass this plan, they still have a long way to go. They'll have to reconcile major differences with the House proposal."

Sean Hannity said on Fox News' Hannity (11/30), "Who do you trust? The Obama sycophants that gave us these failed policies, their cohorts in the liberal media, the friends on the left side of the aisle? They want this bill to fail when they failed all of us for eight years? Or what about this President that has literally put confidence in the heart of American corporations by getting rid of Obama regulations and red tape. We now have seen what economic growth could mean and what an economic turn-around could be. This bill must pass. Our economic future depends on it."

Treasury Employees Say Department Not Preparing Detailed Analysis Of Tax Bill. The New York Times (11/30, Rappeport) reports that Treasury Secretary Mnuchin has said "that over 100 people in Treasury are 'working around the clock on running scenarios for us,'" and "promised that Treasury will release its analysis in full," as the Senate prepares to vote, "the administration has yet to produce the type of economic analysis that it is citing as a reason to pass the tax cut." People in Treasury's Office of Tax Policy say they "are not working on the type of detailed analysis that he has mentioned," and an "economist at the Office of Tax Analysis" said the Department "had not released a 'dynamic' analysis showing that the tax plan would be paid for with economic growth because one did not exist."

The Los Angeles Times (11/30, Puzzanghera) says the Department's inspector general "has launched an inquiry into whether the department hid an analysis of the Republican tax bill – or even did one at all." After the New York Times story was posted Thursday, Sen. Elizabeth Warren "wrote to Treasury Inspector General Eric M. Thorson...asking for an inquiry." Warren wrote, "Either the Treasury Department has used extensive taxpayer funds to conduct economic analyses that it refuses to release because those analyses would contradict the Treasury secretary's claims, or Secretary Mnuchin has grossly misled the public about the extent of the Treasury Department's analysis ... I am deeply concerned about either possibility."

NYTimes, WPost Analyses: Despite Trump's Claims, Wealthy Will Benefit From Tax Bill. A New York Times (11/30, Stewart) reports that while the President has argued that the tax reform

legislation will not benefit "the wealthy and well connected," and will cost him "a fortune," the proposals "seem almost tailor-made to enrich the president and people like him." Trump "has not released his tax returns, so it's impossible to know to what extent he would personally benefit from the legislation. But there's little doubt that he would." The Washington Post (11/30, Bump) reports in an analysis that the JCT and CBO have both concluded that "the benefits of the Republican proposal is weighted to wealthier Americans."

ABC News: Americans Earning Up To $75,000 Will See Tax Increase Under Senate Bill. David Muir reported on ABC World News Tonight (11/30, story 6, 2:10, Karl) that an "independent analyst" found that "the top one percent of Americans would get 62 percent of the benefit in ten years." Jonathan Karl added that while the bill's "corporate tax cuts are permanent, the individual rates go back up in ten years. For Americans earning up to $75,000 a year, that will mean a tax increase."

NBC Analysis: More Than Nine Million Households Have Medical Expenses Exceeding Tax Bills' New Standard Deductions. NBC Nightly News (11/30, story 2, 2:00, Holt) examined what the tax proposals will mean "for Americans' ability to pay for healthcare." Tom Costello reported that in 2016, "nearly nine million households claimed medical deductions, more than half, 65-years or older, including for in-home therapy, costly medications and nursing care, expenses that often total much more than the new standard deductions Republicans are posing of $12,000 for individuals, $24,000 for couples." Moreover, if the ACA's individual mandate is eliminated, "nonpartisan experts predict everyone's ins premiums will jump at least 10 percent, all of that on top of killing a host of deductions that Americans take for state and local taxes, mortgage interest, alimony, student loans, even school supplies teachers buy."

USA Today (11/30) editorializes against the tax bill's provision to repeal the individual mandate, which it says is "is vital to ensure the viability of markets where individuals can buy coverage." In an opposing op-ed for USA Today (11/30, Matthews), Merrill Matthews. a resident scholar with the Institute for Policy Innovation in Dallas, argue that the bill "doesn't end the health insurance mandate; it just eliminates the tax penalty if people choose not to buy, or can't afford, government-approved health coverage," and calls the provision "a huge tax cut for uninsured Americans."

Trump: NYTimes Has Become A "Virtual Lobbyist" Against Senate Tax Bill. Politico (11/30, Nelson) reports after the New York Times' editorial page posted a series of tweets Wednesday criticizing the Senate tax bill, President Trump accused the paper "of becoming 'a virtual lobbyist'" against the legislation. Trump tweeted, "The Failing @nytimes, the pipe organ for the Democrat Party, has become a virtual lobbyist for them with regard to our massive Tax Cut Bill. They are wrong so often that now I know we have a winner!" and, "The Failing @nytimes has totally gone against the Social Media Guidelines that they installed to preserve some credibility after many of their biased reporters went Rogue!" USA Today (11/30, Korte) reports that Times Deputy Managing Editor Clifford Levy "tweeted that Trump was 'mistaken' in his assertion that the tweets violated the Times social media rulebook." According to Levy, the tweets "were sent by the Opinion section...and the guidelines apply only to the newsroom."

Trump Slams Acquittal Of Immigrant Accused Of Murder In San Francisco.

Reuters (11/30, Dobuzinskis) reports that an undocumented immigrant from Mexico "was acquitted of murder and manslaughter by a San Francisco jury on Thursday in the fatal shooting of a woman that Donald Trump used as a rallying cry against 'sanctuary cities' during his presidential campaign." Jose Ines Garcia Zarate, who had been deported to Mexico five times, "was charged in the July 1, 2015, killing of Kate Steinle on a San Francisco pier." Defense attorneys said Garcia Zarate "found the gun and it accidentally discharged, the bullet ricocheting off the ground...before striking the woman." President Trump tweeted about the verdict, "A disgraceful verdict in the Kate Steinle case! No wonder the people of our country are so angry with illegal immigration."

The AP (12/1) reports the President called the verdict "disgraceful," tweeting, "No wonder the people of our Country are so angry with Illegal Immigration." Also reporting on the President's reaction, CNN (11/30, Tatum) notes Trump "often cited Steinle's death...during his presidential run as an example of the dangers of sanctuary cities."

The San Francisco Chronicle (12/1, Ho) says the verdict "set off a flurry of reactions," with Attorney General Sessions blaming the killing "on San Francisco's policy of refusing cooperation with immigration agents." The Washington Times (11/30, Dinan) quotes Sessions as saying, "When jurisdictions choose to return criminal aliens to the streets rather than turning them over to federal immigration authorities, they put the public's safety at risk. I urge the leaders of the

nation's communities to reflect on the outcome of this case and consider carefully the harm they are doing to their citizens by refusing to cooperate with federal law enforcement officers."

The New York Times (11/30, Dickerson, Fuller, Stevens) reports Steinle's death "fed into a fierce debate over whether immigrants without legal status should be deported more aggressively, and over the role local law enforcement should play."

Trump: China's North Korea Diplomacy Has "No Impact On Little Rocket Man."

Reuters (11/30, Brice, Osborn) reports President Trump Thursday "dismissed a Chinese diplomatic effort to rein in North Korea's weapons program as a failure," while Secretary of State Tillerson "said Beijing was doing a lot, but could do more to limit oil supplies to Pyongyang." In a tweet, Trump "delivered another insulting barb" against North Korean leader Kim Jong-un, who he called Wednesday "Little Rocket Man" and a "sick puppy." Wrote the President, "The Chinese envoy, who just returned from North Korea, seems to have had no impact on Little Rocket Man." Tillerson, meanwhile, "welcomed Chinese efforts on North Korea," saying, "The Chinese are doing a lot. We do think they could do more with the oil. We're really asking them to please restrain more of the oil, not cut it off completely."

A second Reuters (11/30) report says Defense Secretary Mattis on Thursday also said that he has "confidence in diplomatic efforts on North Korea," saying, "I am not willing to say that diplomacy has not worked. We will continue to work diplomatically, we will continue to work through the United Nations, the United Nations Security Council and we will be unrelenting in that."

Rep. Tulsi Gabbard (D-HI) said on CNN's The Lead (11/30), "The fact that we are in this position today where we have no good options left to us really is a failure of past leadership, both Democrat and Republican. And so the only viable option that I see before us today is a diplomatic one."

France Calls For New Sanctions. Bloomberg News (11/30, Viscusi) reports French Defense Minister Florence Parly Thursday "said further sanctions are needed to rein in North Korea's ballistics program," which she warned is "progressing and progressing fast." In an interview with BFM TV, Parly said, "This summer, we thought we weren't in range. Now, it seems that very few Western cities aren't."

Photos Suggest New Missile Bigger And More Powerful. The New York Times (11/30, Choe) reports the ICBM North Korea launched this week was "a new type of missile bigger and more powerful than any the country had tested before," South Korean officials said Thursday. Photos from the North's official Korean Central News Agency "are providing valuable clues about the capabilities of the missile, named the Hwasong-15."

Satellite Photos Show North Korea Constructing New Launch Site. Satellite images obtained by Fox News (11/30, Friling) "show what appears to be another launch pad being constructed at the Panghyon Airbase in North Pyongyang, North Korea, in the past week – at the same site of the July 4 intercontinental ballistic missile launch." According to analysts at Image Sat International, this marks "the first time that they have decided to rebuild a site that they have used before."

Editorial Wrap-Up

New York Times.

"Help Wanted: Top Diplomat Sought." The New York Times (11/30) editorializes, "The problem is that [CIA Director] Pompeo may be too chummy. ... Pompeo has never shed his partisan clothing," and "has not been shy about mixing politics with intelligence and policy and may feel even freer to do so at the State Department."

"Kellyanne Conway Might As Well Be 'Opioid Czar.'" The New York Times (11/30) editorializes that while President Trump "sees the opioid epidemic as a media opportunity," he has not taken several necessary steps to progress in fighting the crisis. Trump has not named a "permanent director for the Office of National Drug Control Policy since" his previous nomination, Rep. Tom Marino, was withdrawn. Additionally, Trump's "2018 budget request would increase addiction treatment funding by less than 2 percent, even including $500 million already appropriated by Congress in 2016 under the 21st Century Cures Act."

Washington Post.

"Rename The Block In Front Of The Russian Embassy." The Washington Post (11/30)

editorializes that in 1984, "Congress voted to name a stretch of 16th Street immediately outside the then-Soviet Embassy "Andrei Sakharov Plaza," in honor of the Soviet Union's best-known dissident. The move infuriated Moscow," and now the DC Council is considering "a new renaming that would be equally worthy" – "Boris Nemtsov Plaza," in honor of the opposition leader who was gunned down in February 2015. The Post says that while it "won't be surprising if there is opposition from the Trump administration to the renaming," it gives council members "the opportunity to demonstrate that street names should be under their authority."

"Why Is Homeland Security So Insecure About The Travel Ban?" A Washington Post (11/30) editorial calls it "troubling" that DHS "has spent almost two months determining" whether information in a report by Inspector General John Roth on the rollout of President Trump's first travel ban "can be released to the public." The Post sees "no reason for delay" and calls on the Department to "allow the inspector general to release as much of the report as possible within the normal bounds of government disclosure."

Wall Street Journal.

"Alaska Drilling Dividend." The Wall Street Journal (11/30) editorializes that potential drilling in the Arctic National Wildlife Refuge is another growth dividend that the new Republican tax reform legislation will offer. The Journal argues that the economic benefits of the potential drilling far outweigh the minimal environmental impact.

"A Goodfriend For The Fed." In an editorial, the Wall Street Journal (11/30) praises President Trump's nomination of Marvin Goodfriend to the Fed Board of Governors, calling Goodfriend an experienced and sound choice.

"Mr. Trump Trolls Mrs May." In an editorial, the Wall Street Journal (11/30) says that the strain on US-UK relations may be the greatest damage caused by President Trump's recklessness in re-tweeting three videos shared by British anti-Muslim activist Jayda Fransen.

Washington Schedule

Today's Events In Washington.

White House:
PRESIDENT TRUMP — Meets with the Prime Minister Fayez al-Sarraj of Libya; has lunch with Secretary of State Rex Tillerson and Secretary of Defense James Mattis; gives remarks at the White House Christmas Reception.
VICE PRESIDENT PENCE — No public schedule announced.
US Senate: No public schedule announced.
US House: 8:00 AM House Armed Services subcommittee hearing on amphibious warfare – Readiness Subcommittee hearing on 'Amphibious Warfare Readiness & Training: Interoperability, Shortfalls, and the Way Ahead', with testimony from U.S. Marine Corps Deputy Commandant for Plans, Policies, and Operations Lt. Gen. Brian Beaudreault; Deputy Chief of Naval Operations for Operations, Plans and Strategy (N3/N5) Vice Adm. Andrew Lewis; and Government Accountability Office Defense Capabilities and Management Team Director Cary Russell Location: Rayburn House Office Building, Rm 2212, Washington, DC www.armedservices.house.gov https://twitter.com/HASCRepublicans

9:00 AM House expected to vote Preserving Access to Manufactured Housing Act – House of Representatives meets for legislative business, with agenda expected to include completion of consideration of 'H.R. 1699 – Preserving Access to Manufactured Housing Act of 2017' Location: Washington, DC http://www.house.gov/

9:30 AM House Appropriations subcommittee hearing on HUD community block grants – Transportation, Housing and Urban Development, and Related Agencies Subcommittee hearing on 'Department of Housing and Urban Development, Community Block Grants – Disaster Recovery', with testimony from Assistant Secretary of Housing and Urban Development for Community

Planning and Development Neal Rackleff Location: Rayburn House Office Building, Rm 2358-A, Washington, DC http://appropriations.house.gov/ https://twitter.com/HouseAppropsGOP
Other: 10:00 AM Brookings discussion on attitudes on President Trump's foreign policy – 'The Middle East and Russia: American attitudes on Trump's foreign policy' Brookings Institution discussion, including the release of a new Brookings Center for Middle East Policy public opinion poll on American attitudes toward the Middle East, including the Israeli-Palestinian conflict, Iran, and Russia's role in the region. Speakers include University of Maryland Anwar Sadat Professor for Peace and Development Shibley Telhami, Brookings Institution Foreign Policy Senior Fellow and Deputy Director Suzanne Maloney, and former U.S. Ambassador to Israel Daniel Shapiro Location: The Brookings Institution, 1775 Massachusetts Ave NW, Washington, DC http://www.brookings.edu https://twitter.com/BrookingsInst #Saban17

12:00 PM 'Supreme Court Showdown on Sports Betting' Spectrum Gaming Group media briefing – Spectrum Gaming Group media briefing on 'Supreme Court Showdown on Sports Betting', ahead of oral arguments at the U.S. Supreme Court in the case of Christie vs. National Collegiate Athletic Association (4 Dec). Speakers include Democratic Rep. Frank Pallone Jr., Villanova University Jeffrey S. Moorad Center for the Study of Sports Law Executive Director Andrew Brandt, Hunton & Williams Partner Elbert Lin, Theodore Olson (Gibson Dunn), Joe Asher (William Hill US), Michael Pollock and Adam Steinberg (Spectrum Gaming Group), Daniel Wallach (Becker & Poliakoff), Sara Slane (American Gaming Association), and Jake Williams (Sportradar) * Stockton University Lloyd D. Levenson Institute of Gaming, Hospitality & Tourism serves as academic advisor to the briefing Location: National Press Club, 529 14th St NW, Washington, DC http://www.spectrumgaming.com/

2:00 PM Smithsonian hosts 'The Long Conversation' event – Smithsonian hosts 'The Long Conversation', experimental program of 15-minute talks over a period of eight hours on the question 'What makes you optimistic about the future?' from 'various leaders, innovators, and luminaries'. Also includes announcement of 'Smithsonian 2022' five-year plan for expanding the institution's reach, a pop-up bar, immersive art/tech installations, a docent robot welcoming guests, and some surprise performances. Attendees include Smithsonian Board of Regents Member Democratic Rep. Doris Matsui and National Museum of Natural History Sant Director Kirk Johnson Location: Smithsonian Arts & Industries Building, 900 Jefferson Dr. SW., Washington DC www.si.edu https://twitter.com/smithsonian

6:00 PM Brookings annual Saban Forum – Brookings Institution Center for Middle East Policy 14th annual Saban Forum Opening Gala, with speakers including Republican Sen. Tom Cotton, former U.S. Special Envoy to Israeli-Palestinian Negotiations Martin Indyk, U.S. Marine Corps Gen. (Ret.) John Allen, and former Israeli Prime Minister Ehud Barak * Event is an annual dialogue between senior U.S. and Israeli leaders from across the political and social spectrum Location: InterContinental The Willard Washington DC, 1401 Pennsylvania Ave NW, Washington, DC http://www.brookings.edu/saban.aspx https://twitter.com/brookingsFP #Saban17

Last Laughs

Late Night Political Humor.

Jimmy Kimmel: "I had an interesting day today. So I woke up. I wrestled the kids. I took a shower. I drove into work. I sat down on my desk. Somehow found myself in a Twitter war with Roy Moore."

Jimmy Kimmel: "Meanwhile, at the White House tonight, our President, President Trump, and his wife, Moldavia, took part in the 95th and final National Christmas Tree lighting."

Jimmy Kimmel: "Earlier this year, President Trump declared opioids to be a national emergency, so he allocated $12 million to fight them for the whole country. He spent $80 million this year on golf, so he is serious about this."

Stephen Colbert: "Tillerson was always kind of an unusual pick for Secretary of State. He was a multi-millionaire oil executive with no diplomatic experience. Though he wasn't afraid to stand up to some of the world's most dangerously unhinged leaders – he called one of them a moron."

Stephen Colbert: "The nonpartisan Congressional Budget Office found the Senate version of [the tax] cuts would create a $1.4 trillion hole in the budget. It doesn't even cut everyone's taxes

equally. By 2027, people making $40-to-$50,000 a year will pay a combined $5.3 billion more in taxes while the group earning $1 million or more will get a $5.8 billion cut. Don't worry, that will trickle down to the rich when they throw their money in the air and dance underneath it in joy."

Stephen Colbert: "You know, folks, President Trump has been very tough on immigrants, but it hasn't all been deportations. He's also detaining some foreigners against their will. For instance, Melania."

James Corden: "The New York Times is reporting that Donald Trump is expected to fire his Secretary of State, Rex Tillerson, in the coming weeks, or as Rex Tillerson is calling it, a Christmas miracle."

James Corden: "The co-author of Donald Trump's book, 'The Art of the Deal,' says that according to two secret sources, White House staffers are starting to express concern over the President's mental health. Wow, that's some great investigative journalism right there. Or he could have just checked Twitter!"

Trevor Noah: "The House version of the [tax] bill would allow churches to directly endorse political candidates, which would make for extremely interesting sermons. 'And with Jesus's final breath, he said, "It is finished." But what's not finished is the race, so elect him as the next mayor.'"

Trevor Noah: "I just wish one time, Donald Trump would re-tweet a cat video, something fun. I wish just one time, we'd open Twitter and it would be like, 'What did Trump tweet?' 'It's a kitten.'"

Jimmy Fallon: "Earlier tonight, President Trump and his family lit the National Christmas Tree. That was very nice. Of course, Trump refused to light it until everyone agreed his tree had the most lights in history."

Jimmy Fallon: "It came out that Trump wants to replace Secretary of State Rex Tillerson. He decided not to when he heard Tillerson was his secret Santa."

Conan O'Brien: "Last night...Today show team hosted the lighting of the Rockefeller Christmas tree. There was no mention of Matt Lauer. No mention. NBC executives said, 'We think one exposed piece of wood is enough for tonight.'"

Conan O'Brien: "Two large properties decided to disassociate from Donald Trump. Big story. A big deal. One is the Trump SoHo Hotel and the other is the Kremlin."

Conan O'Brien: "A sixth woman has come forward to accuse Sen. Al Franken of sexually inappropriate behavior. On the plus side, if Franken resigns as senator from Minnesota, he can still be elected the senator from Alabama."

Jordan Klepper: "[Roy] Moore is also being brutally attacked by his opponent, Democrat Doug Jones, who is using the low-down, dirty tactic of inviting Moore out in public into an elitist trap, known as a debate. But Moore is too smart for that liberal sleight of mouth, which is why he is totally refusing. Good work, Roy. Debates are pointless and stupid."

DOI In The News

Spread The Swamp? Trump Administration Wants To Move Government Offices Out Of Washington.

The Los Angeles Times (12/7, Halper) reports that Interior Secretary Ryan Zinke is "aiming to move the headquarters of the Bureau of Land Management, the Fish and Wildlife Service and the Bureau of Reclamation out of Washington as soon as logistically possible." The plan was examined Thursday during a hearing of the House Natural Resources Committee.

The Huffington Post (12/7, D'Angelo) reports that the hearing titled "Transforming the Department of the Interior for the 21st Century," examined "goals and policy ideas for reorganizing and relocating parts of the Department of the Interior and its bureaus," according to a committee memorandum. In his opening statement, Rep. Bruce Westerman, the subcommittee's chairman, "said that Interior has 'lost touch' with the concerns of the U.S. public, and that 'decades of top-down directives issued from Washington' have rendered the department inefficient and unaccountable." However, Rep. Donald McEachin "dismissed the notion that Interior staffers need to be closer to the people they serve, noting that 90 percent of the department's personnel are already working outside of Washington."

E&E Publishing (12/7, Doyle) reports that a volunteer energy adviser to the Interior Department "cautioned" Thursday "against some of the more dramatic reorganization proposals floated" by Zinke. According to the article, "while emphatically agreeing that Interior could usefully relocate some operations out West, Western Energy Alliance President Kathleen Sgamma identified potential problems in some concepts that Zinke has aired for the Bureau of Land Management and other agencies." Sgamma said she is also "concerned about potential plans for a rotating command structure, similar to a unified command structure in the military," since Interior agencies have different missions.

Senate Confirms Two Interior, EPA Nominees.

The Hill (12/7, Henry) reports the Senate Thursday confirmed Joe Balash "as assistant secretary for land and minerals management at the Interior Department," and Susan Bodine to head "the Environmental Protection Agency's (EPA) Office of Enforcement and Compliance Assurance, which oversees enforcement of pollution laws." Sen. Sen. Dan Sullivan, for whom Balash worked as chief of staff, called him "probably one of the most qualified people to hold this job in the entire country."

The Washington Examiner (12/7, Siciliano) reports that "industry officials bemoaned that it

took months of 'needless delay' before Balash was finally given a vote." Ethan Lane, Executive Director of the Public Lands Council and the National Cattlemen's Beef Association, said, "A fully staffed Department of the Interior is critical to the business operation of western ranches, and we are pleased to see another critical position filled."

Also reporting are the Fairbanks (AK) News-Miner (12/8, Granger), the Alaska Dispatch News (12/7, DeMarban), the Alaska Public Radio Network (12/7, Ruskin), and Must Read Alaska (12/7, Downing).

Senate Panel Considers Nominees For Interior Department, Energy Department. DailyEnergyInsider (12/7, Martin) reports that the Senate Energy and Natural Resources Committee on Tuesday considered President Trump's nominations of Tim Petty to serve as assistant secretary of the Interior for water and science and Linda Capuana to serve as administrator of the Energy Information Administration. Petty served in the Interior Department's water and science division under President George W. Bush. Committee Chair Sen. Lisa Murkowski (R-AK) said, "I am confident that both of our nominees are well positioned for these roles, and it is certainly my hope to move their nominations quickly through committee to full Senate confirmation."

President Trump's National Monument Cuts Draw 5th Lawsuit.

The AP (12/7) reports that a coalition of conservation groups filed a lawsuit Thursday to stop President Trump's cuts to Bears Ears National Monument. The lawsuit filed by "11 organizations including the Sierra Club is the fifth legal challenge to Trump's reductions to Bear Ears and Grand Staircase-Escalante national monuments" and "it is the third lawsuit focused on Bears Ears." The article notes that "the complaint echoes arguments made in the two previous Bears Ears lawsuits, claiming that Trump exceeded his power and jeopardized protections for 'irreplaceable archaeological sites.'"

Outdoors Industry Groups Ratchet Up Trump Criticism. The Hill (12/7, Henry) reports that "President Trump's decision this week to shrink two national monuments escalated a fight between the outdoors industry and his administration." Retailers such as Patagonia and REI blasted "Trump's decision, equating it to theft, while lining up to challenge its legality." Interior Secretary Ryan Zinke, "who has made conservation and outdoorsmanship a cornerstone of his political persona, has taken the brunt of the criticism from the retailers." Zinke responded by slamming "Patagonia as a 'special interest' that is using the monument issue to help their bottom line." Also, Interior spokeswoman Heather Swift "noted that the industry is 'not monolithic' in its approach to public lands." She said, "There's certainly a separation between the many honest people in the outdoor industry and those who spend millions of dollars to lie to the American people in a shameful effort to boost the sales of their foreign-made products."

Bloomberg News (12/7, Harris) reports apparel maker Patagonia Inc. filed a lawsuit against President Trump late Wednesday over his decision to reduce the size of the Bears Ears national monument in Utah. Patagonia is joined by other conservation and preservation groups, all claiming the decision "exceeds his authority under the 1906 Antiquities Act." Patagonia and the other groups, who filed papers in a US District Court in Washington, "are seeking a court order blocking the move."

The Wall Street Journal (12/7, Carlton) says outdoor-recreation goods retailer REI also posted a message in opposition to the decision, and promised to ramp up its efforts to better protect public lands. The Journal says at least 1,300 employees of companies represented by the Outdoor Industry Association have sent letters to 426 members of Congress protesting the downsizing. It also quotes Interior Secretary Ryan Zinke as calling Patagonia's claim a "nefarious, false and a lie." Zinke stated that such outdoor companies represent special interests that have tried to block federal land from public use, whereas shrinking the monuments is meant to allow multiple uses of the land. He added that removing the lands from monument status still leaves monuments larger than some national parks, and that the removed lands would remain under federal protection.

Also reporting are the New York Times (12/8, Popovich), the Denver Post (12/7, Blevins), The Guardian (UK) (12/7, McCarthy), the Christian Science Monitor (12/7, McCombs, Price), and Slate (12/7, Bonnington).

'Largest Ever' Drilling Lease Sale In Alaska Yields Few Bids.

The Hill (12/7, Henry) reports that despite auctioning 900 tracts of land in the National Petroleum Reserve in Alaska, totaling 10.3 million acres, the BLM only received bids worth $1.16 million for seven tracts. The Trump Administration pitched the sale as part of its "American Energy

Dominance" plan, but the auction brought in fewer bids than other recent NPR-A sales. E&E Publishing (12/7) reports ConocoPhillips Alaska and Anadarko bid in partnership for all seven offerings. The companies selected land directly southwest of Conoco's Willow oil discovery, which is estimated to hold around 300 million barrels of recoverable oil. The state of Alaska held a separate lease sale yesterday, which brought in $21.1 million in winning bids. The winning bidders purchased most of the remaining blocks of state-owned land on the North Slope.

Dems Use Alaska Oil Lease Sale Numbers To Undermine GOP ANWR Push. The Daily Caller (12/7, Bastasch) reports Democrats and environmentalists are using the weak sale to counter the GOP's efforts to open the Arctic National Wildlife Refuge to drilling. The sale brought in $14.99 an acre, which would only translate to $11 million in federal revenue for the 1.5 million ANWR coastal plain. The spokesman for Democrats on the Senate Committee on Energy and Natural Resources said, "There's simply no market for oil leasing in the Arctic." However, Alaska Natural Resources Commissioner Andy Mack said the results should not be compared. He said, "The biggest point is this is wide open, with not one existing lease in this area." The Washington Examiner (12/7, Siegel) reports Sen. Maria Cantwell said, "The dismal response to this lease sale proves what we've been saying all along: Even the small amount the GOP claims will be raised by drilling in the Arctic is a sham. ... Congress should strike the language turning the Arctic National Wildlife Refuge (ANWR) into an oilfield and start over." Rep. Raul Grijalva sent a letter to Keith Hall, the director of the Congressional Budget Office, requesting a reassessment of the revenue drilling ANWR would generate. Grijalva said, "In light of yesterday's lease sale in the National Petroleum Reserve, which generated a paltry $1.2 million for an offering of 10.3 million acres, or only 12 cents per acre, we request that you reassess the cost estimate for the provisions that would open the Arctic National Wildlife Refuge to oil and gas leasing."

UPI (12/7, Graeber) reports Sens. Elizabeth Warren, Jeff Merkley, and Tom Udall, along with Rep. Alan Lowenthal, joined members of Alaska's indigenous communities to voice opposition to ANWR drilling efforts. Adrenne Titus, an Inupiaq, said, "The Inupiaq people do not want this drilling. ... We do not want to open the Arctic Refuge to drilling."

Additional coverage was provided by the Alaska Public Radio Network (12/7, Ruskin).

Six Wildfires Continue To Devastate California.

The CBS Evening News (12/7, lead story, 2:50, Glor) reported that six major wildfires are burning in Southern California, and that the fires have claimed their first death, a woman in Ventura County. Over "100 homes have been destroyed or damaged," while "at least 330,000 people have been evacuated." "Anyone anytime we have erratic winds like this, we're never out of danger. We're not letting our guard down. Firefighters are still down the street here working on structure protection," said Rick Macklin of the Ventura County Fire Department.

ABC World News Tonight (12/7, lead story, 3:20, Muir) reported that wind gusts in Ventura exceeded 80 miles per hour. The Thomas Fire has now burned over 150 square miles. The Skirball Fire in Los Angeles is 20% contained. NBC Nightly News (12/7, lead story, 3:25, Holt) reported that 20,000 homes are still threatened by the fires. 55,000 firefighters are working to attack the fires from the ground. In San Diego, hot embers flew through the air and ignited spot fires that can be very devastating very quickly.

The CBS Evening News (12/7, story 2, 1:45, Glor) reported that the Thomas Fire has burned 96,000 acres and "is only five percent contained." Santa Ana winds are expected to "continue through Saturday with wind gusts between 40 and 60 miles per hour." NBC Nightly News (12/7, story 2, 1:00, Soboroff) reported that Gary Monday, the Ventura County Fire Department Battalion Chief, said, "This wind event is a historic wind event for our county and the destruction that it's created. With the drought years that we've had, just a bad combination."

ABC World News Tonight (12/7, story 4, 0:40, Muir) reported that "red flag warnings now have been extended to Sunday with the most extreme fire conditions in the next 12 hours." Winds will be "gusting 40 to 60 miles an hour over the next 24 to 36 hours." ABC World News Tonight (12/7, story 3, 2:35, Muir) also reported that Ventura County Fire Chief Mark Lorezen is most concerned about the winds going into the evening. He also said that without rain, the active, multiple fire situation could easily stretch until Christmas. The Los Angeles Times (12/7, Vives, Parvini, Cosgrove, Sahagun, Serna) reports that "in Sylmar, where the Creek fire is burning, 12,605 acres had been destroyed and the blaze was 10% contained by Thursday morning." The New York Times (12/7, Medina, Healy) reports that the fire in San Diego County "spread to more than 2,000 acres in five hours, destroying and damaging a relatively small number of homes but threatening at least 1,000 more." In the area around Bel Air, "much of the chaparral that normally covers the hills was ash."

The New York Times (12/7, Medina, Jordan, Pérez-Peña) reports that "Gov. Jerry Brown declared an emergency in San Diego County on Thursday evening as local officials there widened the evacuation zone and warned that conditions were expected to worsen." Additionally, state officials have "used the highest category in their color-coded fire hazard warning system," using purple to color much of Southern California. At least 322 schools in the Los Angeles Unified School District have canceled Thursday and Friday classes.

The Washington Post (12/7, Wilson, Berman, Rosenberg) reports that veteran firefighters have described the situation "as a challenge unlike any fire they had battled before." Los Angeles Fire Department Chief Ralph Terrazas warned "that the forecast of the city's weather and humidity conditions for Friday still put it in the 'extreme range' of fire risk." However, in Los Angeles, "officials announced that the majority of residents who had evacuated would be allowed to return to their homes."

Additional coverage is provided by ABC World News Tonight (12/7, story 2, 1:50, Muir) and Bloomberg News (12/7, Caronello, Cannon).

Zinke Spent $6,250 On A Helicopter Trip To Ride Horses With Pence.

Business Insider (12/7, Choi) reports that according to previously undisclosed travel logs obtained by Politico (12/7, Lefebvre), Interior Secretary Ryan Zinke spent thousands of taxpayer dollars on government helicopter trips, including one trip – costing $6,250 – to ride horses with Vice President Pence. Travel records showed that the helicopter trips altogether cost more than $14,000 over the summer.

The Washington Examiner (12/7, Phillips) reports that in response to the Politico report, Heather Swift, a spokesperson for the Interior Department, said, "It's complete garbage and yellow journalism at its worst." She said, "After a congressional hearing, the Secretary attended an official Congressional event with the new Congressman from Montana (who replaced him) and the Speaker of the House before going to an emergency management briefing. On the other occasion he did an aerial survey of a power line corridor, which was pending before the Department, while traveling back from meetings in southern Virginia in order to get to a meeting with the Vice President."

Additional coverage is provided by The Hill (12/7, Carter), Newsweek (12/7, Sinclair), the Huffington Post (12/8, Visser), and the New York Daily News (12/8, Chia).

Bureau Of Indian Affairs

Wampanoag Tribe Takes Land Into Federal Trust.

The Vineyard (MA) Gazette (12/7, Kennedy) reports that the Bureau of Indian Affairs "this week announced plans to accept into trust about 15 acres of land for the Wampanoag Tribe of Gay Head (Aquinnah), a swath that borders current tribal lands and has frontage along State Road." The land was "actually purchased by the tribe in late 2014, but the BIA decision would join the land with another 480 acres held in trust by the federal government for the tribe's benefit." The article notes that "the move also raises questions about how the tribe might ultimately use the land."

Bureau Of Land Management

U.S. Delays Rule On Methane Emissions From Federal Lands.

Reuters (12/7, Gardner) reports that the Bureau of Land Management announced it will delay an Obama-era rule limiting methane emissions from oil and gas operations on federal and tribal lands. The agency said the decision was intended to "avoid imposing likely considerable and immediate compliance costs on operators for requirements that may be rescinded or significantly revised in the near future." The Washington Examiner (12/7, Siegel) reports that the Trump administration's delay for Obama-era methane emissions regualtions will extend for two years.

The Washington Post (12/7, Fears) reports that as the Trump administration appears to back away from a focus on methane leaks, the American Petroleum Institute "has stepped in with a program to reduce the leaks." According to API's Erik Milito, director of upstream and industry operations, "The program overall is set up to continuously improve the environmental performance for onshore operators throughout the country through the process of learning, collaborating and taking action. This is a very robust program."

E&E Publishing (12/7) reports, "Interior's suspension of the Obama-era rule fits into a broader review of regulations that the Trump administration says 'potentially burden' domestic energy production."

Additional coverage was provided by the AP (12/7, Daley), the Washington Post (12/7, Grandoni), the Washington Times (12/7, Wolfgang), the Lake Powell Life (12/7, Batchelor), and the World Oil (12/7).

Cliven Bundy's Fight Against The Feds Has Roots In Interpretation Of Mormon Scripture.

The Washington Post (12/7, Sottile) reports that "fifteen years before Nevada rancher Cliven Bundy led an armed standoff against federal agents near his arid desert ranch, the practicing Mormon combed through Latter-day Saints scripture and writings with his neighbor, another rancher upset about how the government regulates the public land around them." The two "found support for their beliefs, and they have since passed their findings on to others who continue to challenge what they consider federal overreach and a collapse of the U.S. Constitution." The pair "compiled the works, highlighted and annotated, into an anthology called 'The Nay Book,' named for rancher Keith Nay, Bundy's late neighbor." The document is "rarely found outside Bundy's inner circle, and it appears to lay a religious foundation for the rancher's strong and consistent views that the federal government has been trampling his rights."

Burning Man May Expand To 100,000 People By 2019.

The Reno (NV) Gazette-Journal (12/7, Kane) reports that "despite complaints from some critics that Burning Man is already too big, the organization may make their main event even bigger." As Bureau of Land Management officials in Nevada "review how the annual, weeklong arts festival has affected the surrounding environment and communities since it moved to Nevada in 1990, Burning Man is proposing that the BLM allow the event to grow to 100,000 people in the future." According to the article, "BLM officials and Burning Man organizers met with locals this week from Gerlach, Reno and Lovelock, the three communities most affected by Burning Man, to hear their concerns about growth."

Additional coverage was provided by USA Today (12/7, Kane).

23 Parcels Of Land Leased In 2 Counties For Oil, Gas Drilling.

The Grand Junction (CO) Daily Sentinel (12/8, Harmon) reports that the Bureau of Land Management on Thursday "leased 23 parcels in Mesa and Garfield counties for oil and gas development, rejecting protests filed by environmental organizations." Baseline Minerals Inc. "paid $337,480 for the leases, which include 14 in Mesa County, eight in Garfield County and one in both counties." The BLM had "offered 28 leases for lease and the remaining five will continue to be available on a non-competitive basis for two years, after which time they would have to be renominated and go through the formal leasing process."

BLM To Offer 43 Parcels At Quarterly Lease Sale.

The Moab (UT) Sun News (12/7) reports that the Bureau of Land Management will "offer 43 parcels, totaling approximately 51,401 acres in Grand and San Juan counties, at its March 2018 quarterly oil and gas lease sale." Acting Canyon County District Manager Gary Torres said, "BLM continues to support a balanced approach to energy exploration and working landscapes on public lands. We carefully considered comments from the public and our partners in developing the list of parcels and resource protection measures for this lease sale."

Bureau Of Reclamation

Trump Administration Throws Up Hurdles For First New Tribal Water Rights Settlements.

The Nation Sun News (12/7) reports that the Trump Administration is "expressing major concerns about the first new tribal water rights settlements being considered in Congress." According to the article, "even though the Senate Committee on Indian Affairs rushed through a hearing on the settlements on Wednesday in order for members to get to votes, there was plenty of time for a senior official from the Department of the Interior to outright oppose a bill for Hualapai Tribe and to call for additional work on another for the Navajo Nation." Alan Mikkelsen, the second-highest ranking leader at the Bureau of Reclamation, said the administration "cannot support" S.1770, the Hualapai Tribe Water Rights Settlement Act.

Community Meeting On Future Resorts Set For Lake Berryessa.

The Napa Valley (CA) Register (12/7) reports that the Bureau of Reclamation and Napa County will" host a Lake Berryessa community meeting on resort development next week at the Lake Berryessa Senior Center." The community forum will be held Wednesday at the Lake Berryessa Senior Center.

Bureau Of Safety And Environmental Enforcement

BSEE Issues Safety Alert Following Drillship Fatality.

Marine Log (12/7) reports the Bureau of Safety and Environmental Enforcement issued a safety alert after a fatality on Transocean's Petrobras 10,000 drillship. The worker was employed by Spencer Ogden and was working on pipe handling operations at the time of the injury. The BSEE issued the alert because many of the factors in the incident are common to many drilling rigs in the Gulf. The agency is recommending that all operators and drilling contractors review hazardous areas and safe work practices.

Additional coverage was provided by Maritime Executive (12/7).

Fish And Wildlife Service

U.S. Would Expedite Permit Reviews For Drilling In Alaska's Arctic Refuge.

Bloomberg News (12/7, Nussbaum) reports that a Trump Administration official said Thursday that it "has a plan in place to speed up permit reviews for drilling in Alaska's Arctic National Wildlife Refuge if Congress approves exploration there." Energy Department Counselor Vincent DeVito said, "We do have a plan for expediting that," adding, "the pathway toward energy dominance runs through Alaska." DeVito "declined to predict a timeline for the process, but said the department is getting 'a regular stream' of inquiries from industry about the potential for exploring in the area." Reuters (12/7, Resnick-Ault) reports DeVito emphasized the expediting the process would not come at the expense of environmental stewardship.

U.S. Fish And Wildlife Service Issues Revenue Sharing Payments In Winona Area.

The Winona (MN) Daily News (12/7) reports that "under the provisions of the Refuge Revenue Sharing Act, payments totaling $190,953 were made in July 2017 to counties, cities and townships in the states of Minnesota, Wisconsin, Iowa and Illinois for lands administered by the U.S. Fish and Wildlife Service and managed as part of the Upper Mississippi River National Wildlife and Fish Refuge." The article says that the "annual payment is made to local units of government as compensation for the loss of tax revenue on lands that are part of the National Wildlife Refuge System, National Fish Hatcheries, or Waterfowl Production Areas."

Watchdog To Sue Trump Administration Over 'Injection' Of Politics Into Science.

The Sputnik News (12/7) reports that the environmental group Center for Biological Diversity said Thursday that it is suing the federal government "over a new policy that gives state governors veto power over including an animal on the endangered species list." The group contended that "assessment teams for evaluating species that could be considered endangered were meant to include only groups of scientists, not representatives of US states' governors, who may not have scientific backgrounds."

Wolf Ruling Has Agency Wrestling With Grizzlies.

Courthouse News (12/7, YOUNG-GRINDLE) reports that "a court ruling regarding the removal of a wolf population from Endangered Species Act protection has spurred reconsideration of a similar decision for Yellowstone grizzlies." The holding "stems from a lawsuit filed by the Humane Society of the United States in response to the U.S. Fish and Wildlife's action to remove the Western Great Lakes population of gray wolves from federal protection."

Fed Agencies: Permit "Not Likely To Adversely Affect" Endangered Species.

The Sierra Vista (AZ) Herald (12/7, Neff) reports that "a federal judge was told last week the U.S. Army Corps of Engineers and the U.S. Fish and Wildlife Service concur that a permit needed for the Villages at Vigneto project 'may affect, but is not likely to adversely affect' three species or their critical habitat." In a Nov. 30 filing, the U.S. Department of Justice told U.S. Magistrate

Judge Lynnette Kimmins that the FWS "concurred with the Corps' previous determination about the impact on the northern Mexican gartersnake, the southwestern willow flycatcher, and the western yellow-billed cuckoo of a Clean Water Act section 404 permit held by developer El Dorado Benson."

Air Force To Expand Training Area Into Nevada Wildlife Refuge.

The Las Vegas Review-Journal (12/7, Brean) reports that an environmental impact statement was released Thursday opening the public comment period on "the Air Force's plans to expand its vast training range and close off more of Desert National Wildlife Refuge north of Las Vegas." The Air Force seeks "to add 301,507 acres to the Nevada Test and Training Range, which already covers more than 2.9 million acres in Clark, Lincoln and Nye counties." The article notes that "roughly 278,000 acres of the expansion would be carved from Desert National Wildlife Refuge, about half of which is already under military control."

Public Input Sought On Fishing Plan For Wildlife Refuge.

The Port Clinton (OH) News Herald (12/7) reports that the U.S. Fish and Wildlife Service is seeking public input on a proposal by the Ottawa National Wildlife Refuge to allow recreational fishing within the Metzger Marsh unit.

National Park Service

Pearl Harbor Survivors In Their 90s Attend Solemn Ceremony.

The AP (12/7, McAVOY) reports that "survivors gathered Thursday at the site of the Japanese attack on Pearl Harbor to remember fellow servicemen killed in the early morning raid 76 years ago, paying homage to the thousands who died with a solemn ceremony marking the surprise bombing raid that plunged the U.S. into World War II." According to the article, "about 20 survivors attended the event at a grassy spot overlooking the harbor and the USS Arizona Memorial. They were joined by about 2,000 Navy sailors, officials and members of the public."

Also reporting are the Honolulu Star-Advertiser (12/7, Cole), the Boston Globe (12/7, Thompson), The Times (UK) (12/8), and the International Business Times (12/7, Varandani).

Bill To Create A Pacific War Memorial Passes House.

KITV-TV Honolulu (12/7, Ako) reports that "a bill establishing a memorial for U.S. soldiers who lost their lives in the Pacific during World War II, passed the U.S. House of Representatives by unanimous consent Thursday." H.R. 4300, the Admiral Lloyd R. "Joe" Vasey Pacific War Commemorative Act, "directs the National Park Service and the non-profit Pacific Historic Parks to create the memorial." A similar bill is circulating in the Senate.

Zion Sets Visitation Record, Highlighting Crowding Concerns.

The AP (12/7) reports that Zion National Park has "already set a new visitation record with a month left to go in 2017, a milestone that highlights concerns about overcrowding at the iconic red-rock landscape." According to the article, "nearly 4.4 million people visited the park through the end of November, an increase of about 5 percent over last year." The new figures "come as park officials weigh a first-of-its kind reservation system and the National Park Service considers hiking fees to $70 per car during the peak summer season at several popular parks, including Zion."

NPS Extends Comment Period On Reservation Plan.

The Moab (UT) Times-Independent (12/7, Egelhoff) reports that the National Park Service has "extended the comment period for its traffic congestion management plan at Arches National Park, with the new deadline set for Dec. 18." The original deadline was set for Nov. 23. Kate Cannon, superintendent of the Southeast Utah Group of National Parks, "said that the extended comment period will give NPS the opportunity to receive more feedback on the reservation system proposed in the plan and is necessary given what she calls 'the confusing timing of the traffic plan announcement.'"

Prehistoric Sea Cow Fossils Discovered In California Could Be Species Entirely New To Science.

Newsweek (12/7, Dovey) reports that "while mapping fault lines in California, scientists

accidentally stumbled upon the 20 to 25 million-year-old fossilized remains of a now-extinct sea cow, a relative of the modern-day manatee and dugong." The researchers "believe the remains may be of a previously unidentified sea cow species, and now want to run tests to confirm the discovery of this possibly previously unknown creature." The sea cow remains were discovered on Santa Rosa Island.

Surveillance Cameras Coming To Downtown As Part Of Partnership With Park Service.

The St. Augustine (FL) Record (12/7, Keever) reports that a wireless camera system, known as WildFire, has been installed to monitor the St. Augustine downtown area as part of a partnership between the St. Augustine Police Department , Flagler College and the National Park Service. WJXT-TV Jacksonville, FL (12/7, Henning) reports that the National Park Service "invested around $40,000 for the 14 cameras that are already up and running around the city. The city has invested about $7,000 dollars in the system."

Park Has A New Superintendent.

The Pike County (PA) Courier (12/7) reports that Kirsten Talken-Spaulding has been named Acting Superintendent of Delaware Water Gap National Recreation Area. John J. Donahue "recently retired from the position of Superintendent after 14 years in the park." Talken-Spaulding said, "I am really looking forward to learning more about Delaware Water Gap National Recreation Area and helping with the transition to a new superintendent. There are a lot of exciting projects going on in the park right now and I want to maintain that positive momentum moving forward."

Osuna Ranch Joins National Register Of Historic Places.

The Encinitas (CA) Coast News (12/7, Macone-Greene) reports that the Osuna Ranch has joined the National Register of Historic Places.

Office Of Insular Affairs

The U.S. Virgin Islands Clean Up For The Holidays.

The Washington Post (12/7, Sachs) reports that more than two months after Hurricane Irma hit St. Thomas, the U.S. Virgin Islands is "slowly, steadily, painstakingly" improving. The article says that "as high season nears, the U.S. Virgin Islands are scrambling to clean house before the guests arrive." According to the article, "before Thanksgiving, the Virgin Islands Water and Power Authority had restored 40 percent of the power on St. Thomas, St. Croix and St. John; the utility company expects the number to rise to 90 percent by Christmas." Also, "crews are clearing tree limbs, power lines and piles of debris from roadways, and patching up holes the size of moon craters." Meanwhile, "cruise ships are tying up in St. Thomas and St. Croix, and JetBlue and Delta flights are landing on a daily basis."

Opinion Pieces

Ryan Zinke: Why We Shrunk The Monuments.

In an op-ed for CNN (12/7, Zinke), Interior Secretary Ryan Zinke explains why he recommended that President Trump shrink the Bears Ears and the Grand Staircase-Escalante monuments. Zinke asserts that in recent years, "presidents have abused the Antiquities Act to lock up vast swaths of public land." He argues that the Antiquities Act is "not a tool for presidents to use to restrict access for outdoor recreation on land that belongs to all of us." Zinke writes that "the President's actions focus on protecting land within the smallest area necessary while restoring traditional uses of these lands and prioritizing the voice of the people over that of the special interest groups." He also notes that "this action does not transfer one square inch of this land out of federal ownership." Zinke concludes by pledging to ensure that public lands are used "'for the benefit and enjoyment of the people,' as the words above the Roosevelt Arch in Yellowstone National Park so proudly proclaim."

President Trump, Come See What Makes America Great

Montana Governor Steve Bullock argues in the Washington Post (12/7) that Trump's decision to shrink two national monuments in Utah "reveals how at the most basic level he and his

administration misunderstand what it means to preserve and protect our history – our heritage – for future generations." He adds, "Frankly, it makes me wonder whether the president is truly committed to investing in what makes America great, because a fundamental part of what makes America great is our land." Bullock argues that public lands "are one of this country's great equalizers" because they belong to everyone, no matter "where we lived, what we did for a living or whom we voted for." He concludes, "Public lands are our history, our heritage and our birthright, and we will not see them diminished. Not on our watch."

Utah National Monuments: Donald Trump Downsizing Follows Federal Law.

In an op-ed for the National Review (12/7, Bishop), Rep. Rob Bishop writes that President Trump's "historic action" to reduce the Grand Staircase–Escalante and Bears Ears National Monuments "demonstrates that the Trump administration is committed to abiding by the law – whether a majority of Americans want him to or not." According to Bishop, his "decision to shrink the two Utah monuments, which are bigger than all five of the state's national parks combined, indicates that he is serious about squaring the use of the Antiquities Act with the intent of the Congress that passed it." Bishop applauds Trump for "standing up for local communities and adhering to the fundamental props of American government: federalism and the rule of law."

Newt Gingrich: Trump's Monuments Move Won't Harm The Environment – Ignore The Naysayers.

In an op-ed for Fox News (12/7, Gingrich), Newt Gingrich writes that the Trump Administration's move "this week to reduce the size of the Bears Ears and Grand Staircase-Escalante national monuments in Utah was neither unique nor even out of the ordinary." He notes that "similar actions have been taken at various federal monument sites nearly 20 times before by presidents such as John F. Kennedy, Woodrow Wilson, and Dwight D. Eisenhower." Moreover, Gingrich asserts that "redefining the boundaries of these monuments will not harm the environment, open the flood gates for dangerous mining or natural resource exploitation, or endanger Native American artifacts or historic locations." He writes that "the land around the monuments will continue to be federally protected and managed by one of our several highly-qualified federal land management agencies – which are the same agencies that manage national monuments." Gingrich concludes that President Trump, along with Interior Secretary Ryan Zinke, "are well within the law – and are, in fact, working to correct past illegal behavior which deprived the people of Utah any say over how land in their state could be used."

Top National News

Continuing Resolution Clears Congress As Trump Meets With Leaders On Budget.

As the House and Senate passed a continuing resolution to push the government shutdown deadline back to December 22, President Trump met at the White House with Senate Majority Leader McConnell, Senate Minority Leader Schumer, House Speaker Ryan, and House Minority Leader Pelosi to discuss budget matters. But coverage focuses mainly on the CR vote, with most sources saying that crafting a budget over the next two weeks will be a very difficult task.

ABC World News Tonight (12/7, story 8, 0:25, Muir) called it "a reprieve from a possible government shutdown tomorrow night. President Trump meeting with Republican and Democratic leaders of Congress at the White House today, to discuss a new budget, both sides calling it 'productive.' Meantime, the House and the Senate both voting to move the shutdown deadline, now to December 22, three days before Christmas. Obviously, that puts off the tough negotiating now for another two weeks." Hallie Jackson reported on NBC Nightly News (12/7, story 6, 1:00, Holt), "Bottom line: No shutdown, at least for now." Jackson said the White House meeting had "plenty of talking, just not a lot of agreement: Republicans pushing for more military spending, Democrats looking for immigration concessions."

The AP (12/8, Taylor, Fram) reports that the "stopgap spending bill...passed the House 235-193, mostly along party lines, and breezed through the Senate on a sweeping 81-14 tally barely an hour later. It would keep the government running through Dec. 22, when another, and more difficult, shutdown problem awaits." The Los Angeles Times (12/7, Mascaro) reports, "Congress faces a time crunch to reach agreement amid broad divisions. Thursday's vote essentially punts the potential crisis to right before the Christmas weekend."

The New York Times (12/7, Kaplan) reports, "The approval came as congressional leaders from both parties met with Mr. Trump at the White House to talk about the thicket of issues facing lawmakers as the end of the year approaches," including "the passage of bipartisan legislation intended to stabilize health insurance markets under the Affordable Care Act," the allocation of "tens of billions of dollars in response to this year's hurricanes," and funding for the Children's Health Insurance Program.

The Washington Post (12/7, Debonis) reports that Trump said at the Oval Office meeting, "We're all here today as a very friendly, well-unified group, well-knit-together group of people. We hope that we're going to make some great progress for our country. I think that will happen, and we'll appreciate it very much." However, the Post writes, "there are clear obstacles to any deal. Trump himself cast doubt Wednesday, telling reporters that Democrats 'want to have illegal immigrants pouring into our country, bringing with them crime, tremendous amounts of crime.'"

The Hill (12/7, Carney) reports that McConnell "said the stopgap measure would 'provide us with the time we need to complete discussions on a long-term solution.'" The Wall Street Journal (12/7, Peterson) reports that Ryan said, "We'll be working together in the next two weeks to find a long-term solution to our funding needs while maintaining fiscal discipline."

Politico (12/7, Bresnahan, Ferris, Cook) writes that though "Congress passed a two-week funding bill...a day ahead of the deadline," lawmakers "face a turbulent next few weeks as they try to clinch a broader budget deal by the end of the year." Fox News (12/7, Chamberlain) similarly reports that "while the bill keeps the government running for now, it would set up a pre-Christmas showdown."

A Daily Caller (12/7, Brufke) report is headlined "Congress Dodges Gov't Shutdown, Passes Two-Week Spending Bill," while Reuters (12/7, Cowan) and Bloomberg News (12/7, Wasson, Litvan) also have reports.

Violence Erupts In Wake Of Trump's Recognition Of Jerusalem As Israel's Capital.

Media reporting on the reaction to President Trump's Wednesday recognition of Jerusalem as Israel's capital is once again very negative. Reports highlight the violent protests that erupted Thursday in the region and continued criticism of the move by US allies.

All three networks reported last night on the protests. NBC Nightly News (12/7, story 8, 1:20, Holt) reported, "In the Middle East, violence erupting over President Trump's controversial decision." The Palestinians, who are "rejecting the President's declaration" and "say they've lost confidence in the United States' ability to be an honest broker," are clashing with Israeli troops.

The New York Times (12/7, Kershner) reports Palestinians clashed with Israeli forces Thursday "as widespread predictions of unrest were realized a day after President Trump took the high-risk move of recognizing Jerusalem as Israel's capital." The Israeli military said it was sending additional troops to the West Bank in response to the protests, while the Palestinian response "appeared to be teetering between a limited wave of protests and a full-blown explosion of violence."

ABC World News Tonight (12/7, story 9, 1:20, Muir) reported that "just 24 hours after" Trump's announcement, the clashes have already left more than 100 people injured in Palestinian territories. The "fear...is if people really start to believe that the peace process is dead, then these [clashes] will grow." In fact, ABC's James Longman continued, leaders of Hamas have "even call[ed] for a third intifada," and Fox News Special Report (12/7) reported that in Lebanon, Hezbollah's leader "echoed the battle cry." The region is "bracing for more violence" on Friday, when "there could also be widespread anti-US, anti-Israeli demonstrations." The AP (12/7, Federman) likewise says Israeli forces "were bracing for the possibility of even stronger violence on Friday, when tens of thousands of Palestinians attend weekly prayers at Jerusalem's Al Aqsa Mosque."

The Washington Post (12/7, Eglash, Morris) reports the Israeli army "said it was preparing for an increase in violence in the coming days," and US institutions in the region "were also readying themselves for a possible violent fallout."

On the CBS Evening News (12/7, story 10, 1:00, Glor), Seth Doane covered some of the clashes from Bethlehem in the West Bank. Doane: "You can hear that tear gas being fired over and over again. ... You can see some of these guys [Palestinians] have slingshots. They are firing rocks toward the much-better-armed Israelis."

The Washington Post (12/7, Cunningham, El-Ghobashy), meanwhile, reports that leaders from across the Middle East condemned President Trump's decision, "with US allies and foes alike denouncing the move as reckless and likely to ignite further violence in the region." Criticism of the move "poured in from US allies and foes alike, from Morocco to Saudi Arabia to Iran. ... Even stalwart US allies in the Gulf – normally enthusiastic fans of Trump's presidency, reprimanded the administration."

The Wall Street Journal (12/7, Jones, Stancati) reports Saudi Arabia in a statement Thursday criticized the Administration's decision and called on the White House to reverse the "irresponsible and unwarranted step," saying it would lead to "a drastic regression" in peace prospects. Iraq's Foreign Ministry summoned US Ambassador Douglas A. Silliman to hand him a letter of protest over the decision.

Reuters (12/7) reports that a senior Palestinian official in President Mahmoud Abbas's Fatah party said Thursday that Vice President Pence, due to visit the region later this month, "is unwelcome in Palestine." Jibril Rajoub said, "We will not welcome Trump's deputy in the Palestinian Territories. He asked to meet (Abbas) on the 19th of this month in Bethlehem, such a meeting will not take place." The AP (12/7, Federman) likewise says Rajoub "said the Palestinians would not meet with Pence during his visit to the region later this month," but "a White House official said Pence still plans to meet with Palestinian President Mahmoud Abbas as scheduled." Politico (12/7, Nussbaum) quotes a "White House official" as saying Pence "still intends to meet with Abbas and Palestinian leaders and thinks any decision to pull out of the meeting would be counterproductive."

The Los Angeles Times (12/7, Zedan, Bulos) reports Palestinian politician Mustafa Barghouthi argued that Trump's decision "forbids Palestinians from having any contact with the US," which, he said, "has completely lost its role as a broker of the peace process."

"White House officials" told the Jerusalem Post (12/7, Wilner) that Trump's decision "was made separately from a deliberative, 10-month effort to restart direct peace talks between Israelis and Palestinians led by Jared Kushner, the president's son-in-law and senior adviser." Trump's action, the said, "was ultimately driven by the president himself." One White House official said. "This was a separate decision from the [peace] process. But as you can see from the President's speech, we remain incredibly committed." Administration officials told the Post "they take seriously Palestinian and Arab concerns and understand the reaction that has followed Trump's speech," but they "hope their anger will pass."

The Washington Times (12/7, Persons) reports US Ambassador to Israel David Friedman said Thursday that Trump's move "brings a greater chance of peace in the region." Friedman said on Fox News' Fox & Friends (12/7), "The President didn't want the Israelis to show up at the bargaining table and be forced to negotiate for something they already had." He added that the move "reflects the popular will." Friedman also said on Fox News' Fox & Friends (12/7), "If you

look at the peace process if you will over the past 25 years, the Palestinians have had a basket of issues that they have been attempting to advance during the course of the negotiations. ... The President made very clear he wasn't seeking to foreclose any of those issues. But here's what the President did want to foreclose. He wanted to foreclose the fantasy, and that's all it is a fantasy, that somehow Jerusalem could be disconnected from the state of Israel."

On its front page, the New York Times (12/7, A1, Landler, Halbfinger, Kershner) says that while Trump declared the US still supported a two-state solution, chief Palestinian negotiator Saeb Erekat said in an interview Thursday that Trump and Prime Minister Benjamin Netanyahu of Israel "have managed to destroy that hope." He added, "They've left us with no option. This is the reality. We live here. Our struggle should focus on one thing: equal rights." The Times says that while Erekat's "change of heart is unlikely to change Palestinian policy," the fact that he is "speaking openly about it attests to the turmoil caused in the Middle East by Mr. Trump's recognition of Jerusalem."

"All but two of 11" former US ambassadors to Israel contacted by the New York Times (12/7, Chan) said they thought the plan was "wrongheaded, dangerous or deeply flawed." One of the exceptions was Ogden R. Reid, who served as ambassador from 1959 to 1961, who said, "I think it's the right decision. Not a lot more to say." The other exception was Edward S. Walker Jr., who was ambassador from 1997 to 1999, who said, "I think it's about time. We've been remiss in not recognizing realities as they are. We all know Israel has a capital, it's called Jerusalem, and over my 35 years of service in the Middle East no one ever questioned that."

Fareed Zakaria writes in his Washington Post (12/7) column that with the decision, Trump "did something puzzling for a person who claims to be a great dealmaker. He made a massive, preemptive concession to one side in a complicated negotiation without getting anything for it in return." He writes that "if this move were part of a larger strategic plan, that would be one thing," but "instead, it appears to be a one-off decision, designed largely to delight core elements of Trump's base at home – evangelical Christians and pro-Israel donors."

White House Says US To Attend Winter Olympics Despite Haley Remarks.

The New York Times (12/7, Shear, Mullany) reports that US officials "expressed concern about security at the Winter Olympics in South Korea in February, initially raising the possibility of withdrawing from the games but later insisting that American athletes will compete." UN Ambassador Haley said Tuesday night on Fox News' The Story (12/5) that it was an "open question" whether American athletes would participate in the Winter Games, given the tensions on the Korean Peninsula. White House press secretary Sarah Sanders "echoed" Haley's remarks during Thursday's press briefing, saying that "no official decision has been made" about participation. But "moments later," Sanders "took to Twitter to clarify," saying that "the US looks forward to participating in the Winter Olympics in South Korea. The protection of Americans is our top priority and we are engaged with the South Koreans and other partner nations to secure the venues." However, Mark Jones, a spokesman for the US Olympic Committee, "said there had been no discussion of American athletes' staying away."

The Washington Post (12/7, Maese) likewise reports that "despite Haley's remarks," Jones said, "We have not had any discussions, either internally or with our government partners, about the possibility of not taking teams to the 2018 Olympic and Paralympic Winter Games. We plan on supporting two full delegations in PyeongChang."

Bloomberg News (12/7, Olorunnipa) says Sanders' tweet "came less than an hour" after she told reporters "that the US government – and President Donald Trump – had yet to decide whether to participate, appearing to raise doubts" about their safety. A "US official" told NBC Nightly News (12/7, story 9, 1:25, Holt) that "Haley's comments were taken out of context. Still, it all underscores the escalating tensions with North Korea."

Noting the comments by both Haley and Sanders, The Hill (12/7, Mitchell) notes that National Security Adviser McMaster, meanwhile, "earlier this week told Fox News that Americans should feel safe attending the games."

Lavrov: North Korea Open To Direct Talks With US. The Guardian (12/7, Borger) reports Russian Foreign Minister Sergei Lavrov Thursday conveyed to Secretary of State Tillerson that "North Korea is open to direct talks with the US over their nuclear standoff." According to Russia's Interfax news agency, Lavrov said during an international conference in Vienna, "We know that North Korea wants above all to talk to the United States about guarantees for its security. We are ready to support that, we are ready to take part in facilitating such negotiations. ... Our American colleagues, [including] Rex Tillerson, have heard this." The Guardian reports that Tillerson didn't immediately respond to Lavrov's comments.

North Korea: US Threats Make War Unavoidable. Reuters (12/7, Kim, Yang) reports that two US B-1B heavy bombers joined large-scale combat drills over South Korea on Thursday "amid warnings from North Korea that the exercises and US threats have made the outbreak of war 'an established fact.'" North Korea's Foreign Ministry said the drills and "confrontational warmongering" by US officials for making war inevitable. "The remaining question now is: when will the war break out?" it said in a statement. "We do not wish for a war but shall not hide from it."

Cotton: China More Of An Adversary Than An Ally On North Korea. In an interview with the AP (12/7, Lardner, Kellman), Sen. Tom Cotton "said China is more of an adversary than an ally on North Korea." In response, Cotton told the AP that the US "should expand its military presence on and around the Korean Peninsula to pressure China into being a serious partner in the campaign to defuse North Korea's nuclear program."

Official: Trump Will Release Infrastructure Plan In January.

Bloomberg News (12/7, Niquette) reports that "a senior administration official" said President Trump plans to release "his long-promised infrastructure proposal in early January." According to the official, Trump plans "to release a detailed document of principles, rather than a drafted bill, for upgrading roads, bridges, airports and other public works before the Jan. 30 State of the Union address." The official added that the plan "is essentially complete and Trump recently reviewed it." It calls for "allocating at least $200 billion in federal funds over 10 years to spur at least $800 billion in spending by states, localities and the private sector." However, Bloomberg says "infrastructure advocates" question whether congressional Republicans can "pass a spending plan with enough federal funding if it's already approved a tax measure that official estimates say would bloat the budget deficit. Some say the administration missed its best opportunity to deliver a meaningful public works initiative by not incorporating it into the tax bill."

Trump Open To Reforming Biofuel Policy.

Reuters (12/7, Cornwell) reports that President Trump would be "open to reforming the country's biofuels policy if it can be done in a way that protects jobs in both the refining and agriculture industries, senators said on Thursday after a meeting with Trump on the issue." The revelation came after a meeting requested by nine lawmakers who argued "that the Renewable Fuel Standard, or RFS, a law requiring refiners to blend increasing amounts of biofuels like corn-based ethanol into the fuel supply every year, was threatening to put refineries in their districts out of business." Sen. Ted Cruz said that the group agreed to reconvene next week.

Trump Administration Rolls Back Oil Train Brake Rules.

The AP (12/7) reports on the Trump Administration's decision to drop the Obama Administration's rule change that would have required the installation of electronically controlled pneumatic brakes by 2021 on trains carrying hazardous or flammable materials. The rule and brake system was "intended to help prevent fiery oil train wrecks like the one that happened in the Oregon last year, Oregon Public Broadcasting reported Thursday." Columbia Riverkeeper Conservation Director Dan Serres said, "we're definitely frustrated that the Trump administration is weakening standards that are not strong enough to begin with."

The Seattle Post-Intelligencer (12/7, Connelly) reports, "The U.S. Department of Transportation is junking a key, 2015 initiative enacted in the wake of the Lac-Mégantic explosion and fire in which a runaway oil train wiped out the center of the small Quebec town and killed 47 people."

DOT Kills Rules Requiring Airlines To Disclose Fees.

Bloomberg News (12/7, Levin) reports that the Department of Transportation announced that it was withdrawing one pending regulation that "would have required airlines and ticket agents to disclose to consumers all fees during the process of buying a ticket" and another that "would have collected more detailed revenue information from large carriers." The withdrawals are part of the Trump Administration's "effort to reduce regulatory burden on US businesses." "Having the DOT step back from developing rules to allow consumers to know the full price of travel and to be able to comparison shop is an affront to America," said Travelers United, an advocacy group for passengers, in a statement.

Trump EPA Vows To Replace Clean Power Plan.

The Hill (12/7, Cama) reports that the EPA is pursuing a replacement for the Clean Power Plan

after the Trump administration vowed to repeal the regulation. The Trump administration's climate rule "is likely to be far weaker than Obama's, which sought a 32 percent reduction in the power sector's carbon emissions."

The Washington Examiner (12/7, Siegel) reports that in his first testimony before Congress on Thursday, EPA Administrator Scott Pruitt said he "plans to replace the Obama-era Clean Power Plan, instead of just killing it outright." However, Pruitt has also criticized the endangerment finding, – which forces the EPA to regulate carbon dioxide and other greenhouse gas, – saying the endangerment finding was "accelerated" and "short-shrifted."

The Hill (12/7, Henry) reports that EPA Administrator Scott Pruitt claimed the EPA under the Obama administration engaged in a "breach of process" when it relied on United Nations science for part of its endangerment funding. Pruitt cited a Bush adminstration-era ruling that determined federal law had not declared greenhouse gases as dangerous enough to warrant regulations.

EPA Chief Preparing For Climate Change Debates. Reuters (12/7, Volcovici) reports that the EPA could launch a "red team, blue team" debate on climate change as soon as January, according to EPA Administrator Scott Pruitt. Pruitt "is reportedly vetting a list of scientists that have expressed doubts over climate change to take part in the upcoming debates, including some that have been recommended by conservative groups like the Heritage Foundation."

Paris Climate Accord Unlikely To Be Revived Under Trump, Experts Say.

E&E Publishing (12/7, Chemnick) reports that the Trump administration has said that any plans to return to the Paris climate accord would involve a "heads-of-state discussion" to find "more favorable terms" for the United. Others, however, believe that any path back to the agreement would "involve Chinese President Xi Jinping." According to Jim Connaughton, former White House Council on Environmental Quality chief under President George W. Bush, "The only thing that matters, in my view, is agreement between the U.S. and China." He "he acknowledged that neither Xi nor Trump is likely to ask for a new climate deal," and "the Chinese leader is comfortable with the status quo, and Trump doesn't care about the issue."

Announcing His Resignation, Franken Takes Shots At Trump, Moore.

Under intense pressure from his Democratic colleagues, Sen. Al Franken – speaking from the Senate floor – on Thursday announced his resignation, amid accusations of sexual misconduct. In his remarks, Franken, without mentioning them by name, jabbed at President Trump and Alabama Senate candidate Roy Moore, both of whom have been accused of sexual misconduct – comments highlighted in nearly every report on the Minnesota Democrat's speech. In addition, much of the coverage emphasizes two themes: that Democrats are moving to contrast their tough stance on sexual harassment with that of the GOP; and Franken did not apologize to his accusers for his alleged behavior.

On ABC World News Tonight (12/7, story 5, 3:00), David Muir reported that in his resignation speech, "Franken pointed to what he called the irony, the allegations against the current president and against Roy Moore running for Senate, both with strong support from the" GOP. Franken was shown saying, "I, of all people, am aware that there is some irony in the fact that I am leaving, while a man who has bragged on tape about his history of sexual assault sits in the Oval Office, and a man who has repeatedly preyed on young girls campaigns for the Senate with the full support of his party."

On the CBS Evening News (12/7, story 3, 2:15, Glor), Nancy Cordes reported that "Franken bowed to pressure today, but did not bow to his accusers." Franken was shown saying, "Some of the allegations against me are simply not true. Others, I remember very differently." Cordes said, "If anything, Franken suggested he is the victim of a double standard." Franken: "I am leaving while a man who has bragged on tape about his history of sexual assault sits in the Oval Office." Cordes added, "Like President Trump, Franken is accused of groping multiple women before he came to Washington."

On NBC Nightly News (12/7, story 5, 2:00, Holt), Kasie Hunt reported that Franken "had been fighting to keep his job after seven women came forward to accuse him of sexual misconduct – too many for 15 women senators who demanded he step down. Franken insisting today he did nothing wrong. ... But this photo of Franken on a USO tour in 2006 with a sleeping Leeann Tweeden, for which he apologized, unleashed a half dozen more accusations."

The Los Angeles Times (12/7, Decker) reports, "The criticism of Trump set the tone for an unusual resignation speech. Franken's remarks did not include an apology – indeed, he appeared to have pulled back from a Nov. 16 statement in which he said he was 'ashamed' of behavior that was 'completely inappropriate' when it came to one of the women who has accused him of

misconduct." The AP (12/7, Fram) reports that while Franken "reluctantly" resigned in the face of "a torrent of sexual harassment allegations and evaporating support from" his Democratic colleagues, "he fired a defiant parting shot at...Trump and other Republicans he said have survived much worse accusations." The AP describes Franken as delivering "largely unapologetic remarks."

Reuters (12/7, Brice) reports that Franken "said he would be leaving in a few weeks," but "denied some of the allegations against him and questioned others. 'I know in my heart that nothing I've done as a senator – nothing – has brought dishonor on this institution,' Franken said. 'Nevertheless, today I am announcing that in the coming weeks, I will be resigning as a member of the United States Senate.'" The Minneapolis Star Tribune (12/7, Brooks, Rao) reports, "A spokesman later said there was not yet a set timeline for Franken to resign and that he would continue to perform regular Senate duties in the meantime." On its front page, the Wall Street Journal (12/7, A1, Andrews, Hook) reports that Franken described himself as a "champion of women" and "someone who respects the women I work alongside every day." Referring to the allegations, Franken said a "very different picture has been painted of me over the last few weeks, but I know who I really am."

The Washington Times (12/7, Miller) reports that Franken "said he was stepping down despite knowing he was not guilty of the behavior described by his accusers. He said it was the right thing to do for the people of Minnesota. 'I may be resigning my seat but I am not giving up my voice,'" Franken said, "vowing to continue his work as a political activists." The Hill (12/7, Carney) reported that Franken "expressed confidence that an ethics panel would have cleared him." Bloomberg News (12/7, Litvan) reports, "The ethics probe now will be canceled."

The Washington Post (12/7, Kindy) reports, "In interviews, Franken's accusers said the lawmaker made the right decision." However, Tina Dupuy, a former Democratic congressional aide who on Wednesday had accused Franken of groping her in 2009, said of Franken's remarks, "His speech was about his experience, his grief, his embarrassment and his pain and had nothing to do with the female experience of what he did against his accusers. It was a very un-empathetic speech to the women who told him and the public that it was not okay. There was no apology."

The Minneapolis Star Tribune (12/7, Brooks) quotes Sen. Amy Klobuchar, a fellow Minnesota Democrat, as saying of Franken's speech, "I know that he didn't really apologize to the people and that would have been nice." In an editorial, the Washington Post (12/7) says, "As with the departure of Mr. Conyers, Mr. Franken's choice to leave Congress sends an important message that even powerful men can be held accountable for their misconduct. It's disappointing that the senator, who appears to recognize the power of this cultural moment, chose to dwell on his accomplishments during his resignation speech rather than apologize."

The St. Paul (MN) Pioneer Press (12/7, Orrick) reports that Franken's "departure means Democrats can attempt to claim the moral high ground on sexual misconduct, having purged their ranks." The Washington Post (12/7, O'Keefe, Viebeck, Tumulty) reports that the resignations this week of Rep. John Conyers and Franken "over allegations of inappropriate behavior points to the wider reckoning taking place around the country as women come forward to accuse powerful men of misconduct."

The New York Times (12/7, Stolberg, Alcindor, Fandos) reports, "Democrats and their leaders forced Mr. Conyers and Mr. Franken out in a succession of coordinated statements that made clear that their continued presence would be untenable. ... Democrats appear determined to grab the moral high ground in an environment in which they hope sexual harassment becomes a wedge issue in the 2018 midterm elections – even if it costs them popular colleagues and political icons." In an analysis for the Dallas Morning News (12/7, Gillman), Todd Gillman writes, "Heading into the 2018 elections," Franken's forced resignation "means Democrats can claim some high ground. They're the party of moral rectitude, in contrast to the Republicans who tolerate – or even rally around – Roy Moore."

The Washington Post (12/7, Tumulty) reports that with Democrats "looking for a way out of the wilderness," forcing Franken to resign "was both a moral and political calculation. It was the Democrats' strongest declaration yet that they – unlike the Republicans – are willing to sacrifice their own in the interest of staking out the high ground." Politico (12/7, Dovere) reported, "For a party heading into 2018 planning to run against Republicans as morally and legally corrupt," Democrats "know they need a clean argument. ... And with the standard now set by Conyers and Franken, they know that will likely mean the end of" freshman Rep. Ruben Kihuen (D-NV) "along with any other Democrat confronted with credible allegations of harassment or assault."

In her Wall Street Journal (12/7, Noonan) column, Peggy Noonan says that the tone of Franken's resignation speech was bitter and lacked modesty. Noonan also says the Democratic

Party is moving to seize the moral high ground, should Moore win. The Christian Science Monitor (12/7, Kiefer) says that the resignations of Conyers and Franken "put Democrats on the moral high ground – albeit one with twists and turns. The party has shown itself willing to sacrifice two iconic political figures as the country grapples with a systemic scourge. And, as Democrats are well aware, it puts them in stark contrast to Republicans, who have been divided over how to respond to sexual misconduct allegations against" Moore and Trump.

Writing for McClatchy (12/7, Murphy), Brian Murphy says, "Democrats are moving swiftly and forcefully to remove congressional colleagues accused of sexual misconduct and revamp the way settlements are handled," citing the resignations of Conyers and Franken. Murphy adds, "Republicans have proceeded at a slower pace."

In an editorial, the New York Times (12/7) says, "In demanding Mr. Franken's resignation, the Democratic Party seized an opportunity to atone for its own bad history, including President Bill Clinton's sexual misconduct and, just last month, foot-dragging by leadership on the fate of...Conyers." The Times adds, "Democrats are also drawing a bright moral contrast with the Republican Party and President Trump, who boasted on tape of using his power as 'a star' to sexually assault women." The Times also highlights Trump's and the RNC's support of Moore.

In an editorial, the Wall Street Journal (12/7) says that Franken denied his accusers' allegations, contended the Ethics Committee would have cleared him, blasted Trump and Moore as having committed far more serious misdeeds than him, yet still resigned. The reality, says the Journal, is that Franken, for political reasons, was forced to resign by fellow Democrats, so they can claim the moral high ground in attacking Trump, Moore, other GOP candidates and their supporters.

Sen. Bernie Sanders said on CNN's The Lead (12/7), "Al Franken acknowledged that he acted inappropriately. He acknowledged that, he asked forgiveness, and then he ended up resigning. We have a president who on tape, a tape that everybody in America has seen, acknowledged basically that he was assaulting women and well over a dozen women have made that complaint. And what happens to him? He says, 'No. It's fine. It's okay.' I think that's an issue we have to deal with."

Rep. Jackie Speier (D-CA) was asked on MSNBC's Morning Joe (12/7) how to ensure due process for lawmakers accused by anonymous accusers and whether the "potential for this to have a chilling effect on the hiring of women." Speier said that "if there is an office that refuses to hire women that's a violation of Title VII of the Civil Rights Act there. ... In terms of due process, we're not talking about a criminal act here. We're talking about a violation of the Civil Rights Act." Speier added, "We need an independent authority to do this kind of investigation and review. ... Right now the system we have provides all the protection for the harasser and none for the victim, a 90-day period of time before you can even file a complaint and you have to continue to work in that harasser's office and of course, the funding of settlements comes from the taxpayers which is in many respects just untenable."

Rep. Kathleen Rice (D-NY) said on CNN's Anderson Cooper 360 (12/7), "I don't think the American public is going to be too surprised if there are more revelations about people here in Washington as there will continue to be across the country in various different businesses. The reason why it's so important for us to have a national conversation about this now is we can talk about all the famous people in Hollywood or the politicians in Washington but how many women, and men, are there across this country in everyday life, everyday people who are being harassed in the workplace who have to go every day to a hostile workplace and they have no recourse and no voice? That has got to stop. This is what I hope is going be the beginning of a national conversation to address everyone who has been victimized by this."

Marcus Questions "Whether Justice Was Done" With Franken's Resignation. In her Washington Post (12/7) column, Ruth Marcus says "that Democrats are better off with" Franken having resigned. However, Marcus questions "whether justice was done." Marcus says that Franken muddled "Democrats' case against alleged groper President Trump and alleged child molester Roy Moore. Franken paid not only for their sins but also for the alleged behavior of Bill Clinton two decades ago. Democrats underreacted then and consequently were impelled to overreact now. Or, at least, act quickly. I don't know where I would ultimately come down on the propriety of Franken's continued service in the Senate because I don't have a full grasp of the facts. Do you? Did his colleagues?"

In her New York Times (12/7) column, Michelle Goldberg discusses Franken's resignation, and adds that Trump "has been accused of sexual assault or harassment by over a dozen women, but has faced few consequences. His administration is hostile to sexual harassment victims; in March, for example, he reversed a 2014 Obama administration rule that made it harder for

federal contractors to keep sexual harassment and discrimination cases secret." Goldberg adds, "So while the current frenzy to expose sexual harassers is, in large part, a reaction to the trauma of Trump's election, it has not yet touched Trump himself."

In an editorial, USA Today (12/7) says that while Franken resigned, "lopping off a few convenient heads will not foster lasting change. ... If Congress is going to change the culture that has allowed harassment to flourish across the country, it needs to keep its eye on the most egregious cases – those where a power imbalance has allowed men to prey on women who feel powerless to do anything about it."

Media Analyses: Franken Exit Boosts GOP's Hopes Of Flipping Seat Next Year. The AP (12/7, Potter, Potter, Beaumont) reports that Franken's "departure is a headache for Democrats, exposing another seat in a [2018] midterm election that already had them defending two dozen incumbents. Republicans are eager to recapture a seat that Franken won in 2008 by a tiny margin and only after a monthslong recount. They're also hoping the sexual harassment scandal that engulfed Franken will saddle Democrats with enough baggage to help Republicans break through in 2018."

The Washington Times (12/7, Persons) reports, "The Cook Political Report changed its rating for Minnesota's Senate race to 'tossup' in the wake of...Franken's resignation." Writing for Roll Call (12/7, Gonzales), Nathan Gonzales said that Franken's "resignation puts another Democratic seat into the 2018 mix, but it's still unclear whether his departure provides Republicans with a legitimate takeover opportunity." Gonzales added that "we don't know whom Democratic-Farmer-Labor Gov. Mark Dayton will appoint" to succeed Franken, "if that person would seek election to fill the remainder of the term, and who the eventual GOP nominee will be. ... We'll add the seat to the 2018 class as Likely Democratic until some of those outstanding questions have answers."

On its website, NBC News (12/7) reported that with Franken's seat to be on the ballot in 2018, in the form of a special election, Republicans are "now on the hunt for a top-tier candidate in a politically competitive state where President Donald Trump lost by less than 2 percentage points last year. The unexpected opportunity could be a 'total game-changer in terms of control of the Senate,' said Republican strategist Alex Conant, a Minnesota native who worked in communications roles for the Republican National Committee and former Minnesota Gov. Tim Pawlenty's 2012 presidential campaign. 'If,' he added, 'we field a strong candidate.'"

In an online analysis, CNN (12/7, Cillizza, Bradner) reported that Franken's exit "creates a special election to fill his seat in 2018 – a race where Republicans will have at least a fighting chance of a pickup, depending on how candidate recruitment shakes out." The Wall Street Journal (12/7, Hook) reports that Dayton on Thursday said that he'd decide on a successor to Franken "in the next couple of days." The person Dayton appoints would face a special election in November of next year to serve out the final two years of Franken's term, which ends in January 2021. The Journal says that Lt. Gov. Tina Smith (D) is viewed as a likely choice.

Editorial Wrap-Up

New York Times.

"What Congress Can Learn From Al Franken." In an editorial, the New York Times (12/7) says, "In demanding [Sen. Al] Franken's resignation, the Democratic Party seized an opportunity to atone for its own bad history, including President Bill Clinton's sexual misconduct and, just last month, foot-dragging by leadership on the fate of Representative John Conyers Jr." The Times adds, "Democrats are also drawing a bright moral contrast with the Republican Party and President Trump, who boasted on tape of using his power as 'a star' to sexually assault women." The Times also highlights President Trump's and the RNC's support of Alabama Republican Senate candidate Roy Moore.

"The Trump Administration's Coal Bailout." A New York Times (12/7) editorial argues that Energy Secretary Perry's proposal to subsidize power plants "amounts to a devious and reckless attempt to prop up coal-fired plants." The Times says research suggests the proposal "could add around $11 billion a year to the cost of electricity. ... Yet it would do little to improve the electrical grid." It further asserts that the proposal uses blackouts and electrical reliability "as a ruse to prop up its favored fossil fuel and stick ratepayers with the bill."

Washington Post.

"An Unnamed American Remains In Custody With No Lawyer. His Jailer Is The US

Military." The Washington Post (12/7) editorializes that the US government should inform the American citizen believed to be an Islamic State fighter and detained by the Defense Department in early September of his right to habeas corpus, and allow him access to the judicial system as the constitution guarantees. The Post says the government has been holding the man in custody for nearly three months while it "decides whether the case against him would be strong enough to win a conviction in US criminal court," but otherwise not "making any case for why this delay is necessary or constitutional." Meanwhile, the Justice Department has said the ACLU cannot represent the man, who remains anonymous. Yet this is permitting the government to "effectively block a prisoner's access to the justice system by keeping his identity secret."

"Al Franken's Departure Is A Welcome Sign." In an editorial, the Washington Post (12/7) says, "As with the departure of [Rep. John] Conyers, [Sen. Al] Franken's choice to leave Congress sends an important message that even powerful men can be held accountable for their misconduct. It's disappointing that the senator, who appears to recognize the power of this cultural moment, chose to dwell on his accomplishments during his resignation speech rather than apologize."

"Barbara Comstock Offers A Realistic Lifeline For Metro." The Washington Post (12/7) editorializes that Rep. Barbara Comstock (R-VA) has proposed legislation that might contain "the last, best hope to rescue Metro." The goal of the legislation is "to mandate a massive systemic overhaul that would establish a temporary Metro reform board, replacing the bloated existing one and stripping it of elected officials." The Post opines that the bill "is a clear message to Republicans, who need convincing, that the Washington area's transit system is important and needs additional money."

Wall Street Journal.

"Jerry Brown's Pension Epiphany." The Wall Street Journal (12/7) editorializes that California Gov. Jerry Brown's intervention in a state Supreme Court case concerning his 2012 pension reforms and their constitutionality is noteworthy. The reforms limit pension spiking and have been challenged by unions.

"Al Franken's Non-Sequitor." In an editorial, the Wall Street Journal (12/7) says that Sen. Al Franken denied his accusers' allegations, contended the Ethics Committee would have cleared him, blasted President Trump and Alabama Republican Senate candidate Roy Moore as having committed far more serious misdeeds than him, yet still resigned. The reality, says the Journal, is that Franken, for political reasons, was forced to resign by fellow Democrats, so they can claim the moral high ground in attacking Trump, Moore, other GOP candidates and their supporters.

"Merkel's Not-So-Grand Coalition." In an editorial, the Wall Street Journal (12/7) criticizes German Chancellor Angela Merkel's proposal to form a grand coalition with the center-left Social Democrat Party (SPD) rather than hold a new election or form a minority government. The Journal questions the proposal given the failure of Merkel's previous attempt at forming a coalition with center-left parties and voters' disapproval of the SDP in government. It also argues such a coalition could have negative policy consequences by pulling Mrs. Merkel away from promised tax cuts or realistic migration policies, and political consequences because it will send the signal that voter preferences don't matter to leaders.

Washington Schedule

Today's Events In Washington.

White House:
PRESIDENT TRUMP — Has lunch with Vice President Mike Pence; meets with Secretary of Defense James Mattis; participates in a Make America Great Again Rally.
VICE PRESIDENT PENCE — No public schedule announced.
US Senate: Deadline for new funding deal to avert federal govt shutdown – Funding for the federal govt due to expire, unless extended, following the passage of 'H.R. 601, the Continuing

Appropriations Act, 2018 and Supplemental Appropriations for Disaster Relief Requirements Act, 2017' – a short-term continuing resolution, providing a 10-week extension in funding – through both chambers of Congress in September * Last week, a further short-term CR was introduced in the House of Representatives which would extend funding for a further two weeks Location: TBD https://twitter.com/WhiteHouse

US House: 9:00 AM House expected to vote on Community Institution Mortgage Relief Act – House of Representatives meets for legislative business, with agenda expected to include completion of consideration of 'H.R. 3971 – Community Institution Mortgage Relief Act of 2017' Location: Washington, DC http://www.house.gov/

9:00 AM House Energy subcommittee hearing on the role of the DOE in energy sector cybersecurity – Oversight and Investigations Subcommittee hearing on 'Examining the Role of the Department of Energy in Energy Sector Cybersecurity', with testimony from Assistant Secretary of Energy for Electricity Delivery and Energy Reliability Bruce Walker Location: Rayburn House Office Building, Rm 2123, Washington, DC http://energycommerce.house.gov/ https://twitter.com/HouseCommerce

Deadline for new funding deal to avert federal govt shutdown – Funding for the federal govt due to expire, unless extended, following the passage of 'H.R. 601, the Continuing Appropriations Act, 2018 and Supplemental Appropriations for Disaster Relief Requirements Act, 2017' – a short-term continuing resolution, providing a 10-week extension in funding – through both chambers of Congress in September * Last week, a further short-term CR was introduced in the House of Representatives which would extend funding for a further two weeks Location: TBD https://twitter.com/WhiteHouse

Other: 8:00 AM International LGBTQ Leaders Conference continues – International LGBTQ Leaders Conference, themed 'Representation is Power', day two, with speakers including Democratic Reps. Dan Kildee and Mark Takano and 'Women Out to Win' reception with Democratic Sen. Tammy Baldwin and Virginia Delegate-Elect Danica Roem Location: Washington Hilton, 1919 Connecticut Ave NW, Washington, DC www.lgbtleaders.org https://twitter.com/VictoryFund

10:00 AM Attorney General Jeff Sessions hosts roundtable on drug policy with Heritage Foundation representatives Location: Department of Justice, 950 Pennsylvania Ave, Washington, DC www.justice.gov https://twitter.com/TheJusticeDept

10:00 AM DNC Unity Reform Commission final meeting – Democratic National Committee Unity Reform Commission final meeting, with attendees including Commission Chair Jen O'Malley Dillon and Vice Chair Larry Cohen. The commission – made up of 21 members selected by 2016 presidential candidates Hillary Clinton and Sen. Bernie Sanders and DNC Chair Tom Perez – will recommend improvements to ensure the presidential nomination process is accessible, transparent, and inclusive Location: Washington Marriott Wardman Park, 2660 Woodley Rd NW, Washington, DC http://www.democrats.org/ https://twitter.com/TheDemocrats

12:00 PM Conservative Women's Network hosts discussion with Republican Rep. Mark Meadows Location: Heritage Foundation, 214 Massachusetts Ave NW, Washington, DC www.cblpi.org https://twitter.com/LuceLadies

Last Laughs

Late Night Political Humor.

Stephen Colbert: "Yesterday, we finally got congressional testimony from Donald Trump Jr. His grilling by the House Intelligence Committee lasted roughly eight hours, making it the first time a Trump has put in a full work day."

Trevor Noah: "Regardless of how you feel about Al Franken, he does have a point. The Democrats are draining their swamp, while Republicans are installing the jungle gym in Roy Moore's new office."

Trevor Noah: "If Al Franken was a Republican, for better or worse, he would still have his job. He was just in the wrong party, that's all, like a dude who shows up at a wedding wearing a toga. Wrong party."

Jimmy Fallon: "After Franken resigned, another senator is expected to resign tomorrow. I'm not basing this on any news. I'm just assuming there will be another senator who has to resign."

Conan O'Brien: "Vladimir Putin announced he's running for re-election as President of Russia. Putin's campaign slogan is, 'I made America great again.'"

Conan O'Brien: "Ireland will be collecting $15 billion from Apple in a settlement from back taxes. Ireland will receive the money on Friday, and Guinness will have it all by Monday."

DOI In The News

Thousands Of Interior Dept. Employees Report Harassment And Intimidation At Work.

The New York Times (12/14, Cochrane) reports that around 35 percent of 30,000 Interior Department employees who responded to a recent department-wide survey "reported that they had experienced harassment or intimidation at work." Over "85 percent of those employees said they had to continue to interact with the person responsible for the mistreatment." Additionally, "8 percent of employees reported sexual harassment, 20 percent reported negative treatment based on their age and 16 percent based on their sex."

The AP (12/14, DALY, BROWN) reports that "the Bureau of Indian Affairs and National Park Service reported the most incidents, with 40 percent of BIA workers and 39 percent of parks workers reporting some form of harassment." Interior Secretary Ryan Zinke said in a statement Thursday he has "zero tolerance for any type of workplace harassment," adding that he has directed agency heads to move quickly "to improve accountability and transparency with regard to this absolutely intolerable behavior."

CNN (12/14, Green) reports that "Zinke said that he has already fired 'a number of predators,' actions he said previous administrations were too scared to take." He said, "From day one, I made it clear that I have zero tolerance for any type of workplace harassment, and I have directed leadership across the entire Department to move rapidly to improve accountability and transparency with regard to this absolutely intolerable behavior. All employees have the right to work in a safe and harassment-free environment. I've already fired a number of predators who other administrations were too afraid to remove or just turned a blind eye to. Under my leadership we don't protect predators. When I say 'zero tolerance' I mean that these people will be held accountable for their abhorrent actions."

The Hill (12/14, Cama) reports that Deputy Interior Secretary David Bernhardt "also blamed the Obama administration for not taking care of the problem." Bernhardt said in a statement, "The previous administration failed to aggressively address these problems and it shows. The culture across the department will change." Bernhardt "asked each bureau within the department to submit plans within 45 days to address the findings, Interior said."

Also reporting are ABC News (12/14), ABC News (12/14, Ebbs), the Daily Beast (12/14), Voice of America (12/14), and Outside (12/14, Ogles).

Congressional Committee Testily Debates Proposed National Park In Utah.

The Deseret (UT) News (12/14, Romboy) reports that the House Natural Resources' federal lands subcommittee held the first hearing Thursday on Rep. Chris Stewart's bill that would put into law President Trump's "order splitting the Grand Staircase-Escalante National Monument into three significantly smaller monuments and creating a new national park." The hearing "delved into former President Bill Clinton's use of the Antiquities Act to create Grand Staircase-Escalante in 1996, the merits of the law itself and how the new monuments and proposed park would help or

hurt tourism and rural economies." Rep. Colleen Hanabusa "questioned the timing of the bill, pointing out it is incomplete and contains no maps for the park." Hanabusa "also noted that no National Park Service representatives were invited to speak at the hearing."

Conservation Group Launches $1M Ad Campaign Hitting Trump Monument Decision.

The Hill (12/14, Henry) reported that the "conservation group" Western Values Project "is launching a $1 million television and radio advertisement campaign targeting three House Republicans over President Trump's decision to shrink monument protections in Utah." The spots target "Reps. Greg Walden (R-Ore.), Jaime Herrera Beutler (R-Wash.) and Martha McSally (R-Ariz.). The ads tell viewers about Trump's executive order shrinking the Bears Ears and Grand Staircase-Escalante National Monuments in Utah, and highlights potential public land policy changes in the three states it is set to air in. The group calls on viewers to tell" the GOP lawmakers "to 'stop the attacks on public lands because your American birthright is not for sale.'"

Also reporting is the Oregonian (12/14, Theen).

Montana Republican Gets Behind Yellowstone Mining Ban.

The AP (12/14) reports that Rep. Greg Gianforte is "sponsoring legislation to withdraw land near Yellowstone National Park from future mining, after describing an identical Senate measure as 'dead on arrival' in the House." Gianforte spokesman Travis Hall "said the Republican has been working with other lawmakers to make sure the bill introduced Thursday can pass." An identical bill sponsored by Sen. Jon Tester had stalled.

Additional coverage was provided by the Billings (MT) Gazette (12/14, French), Yellowstone Insider (12/14, Reichard), and KBZK-TV Butte, MT (12/14, Dyas).

Federal Tax Bill Would Raise Louisiana's Cap For Oil Revenue That Pays For Coastal Restoration.

The New Orleans Times-Picayune (12/14, Baurick) reports that congressional representatives from Louisiana "have worked a provision into the Republicans' sweeping tax bill that would substantially raise the limit on offshore oil and gas revenues Louisiana and other Gulf states can use." The measure was announced on Thursday by Republicans Sen. Bill Cassidy and Rep. Steve Scalise, which would increase the amount of shareable revenue from $500 to $650 million for the years 2020 to 2021. Additionally, it would "allow the sale of 5 million barrels of oil from the Strategic Petroleum Reserve in either 2026 and 2027."

Additional coverage was provided by The Lens (12/14, Hasselle).

How Interior Secretary Ryan Zinke's Views Have Changed Under Trump.

NPR (12/14) reports on how Interior Secretary Ryan Zinke's "reputation as a conservationist conservative" has changed since he joined the Cabinet. In an interview, Outside Magazine's Elliott Woods discussed his profile: "Ryan Zinke Is Trump's Attack Dog on the Environment."

Bureau Of Indian Affairs

Homeowners Want Answers On Pueblo Roads Deal.

The Albuquerque (NM) Journal (12/14, Bennett) reports that "homeowners living on roads claimed by area pueblos are calling on Santa Fe County to do its own historical research before signing off on any road agreements with the local tribes and the federal government" .State Rep. Carl Trujillo and Deputy County Manager Tony Flores took questions Wednesday night, "in the first of a series of public meetings intended to help residents of the Pojoaque Valley understand terms of potential agreements between the county, federal agencies, and the pubelos of Nambe, Pojoaque, Tesuque and San Ildefenso."

City In Iowa Challenges Approval Of Nearby Tribal Gambling.

Law360 (12/14, Posses) reports that "an Iowa city filed suit in federal court Wednesday challenging the National Indian Gaming Commission's decision allowing a Nebraska tribe to use land in the Hawkeye State for gambling, contending that the determination is contrary to the law and would threaten the city's nearby gambling facilities." The city of Council Bluffs, Iowa's federal court complaint claims "that the NIGC and the U.S. Department of the Interior shouldn't have concluded last month that the Ponca Tribe of Nebraska's trust parcel in Carter Lake, Iowa, is eligible for gambling."

Bureau Of Land Management

Bennet Backs BLM Move To Western State.

The Grand Junction (CO) Daily Sentinel (12/14, Harmon) reports that "moving the Bureau of Land Management headquarters out of Washington, D.C., has the conditional support" of Sen.. Michael Bennet. His office said in a statement that Bennet could support any move out of DC "as long as the move is more than symbolic and includes resources to better manage our public lands."

Additional coverage was provided by KCNC-TV Denver (12/14, Bush).

Vern Buchanan Calls On Paul Ryan To Keep Ban On Slaughtering Horses In Place.

The Sunshine State (FL) News (12/14, Derby) reports that Rep. Vern Buchanan, cochairman of the Animal Protection Caucus, urged House Speaker Paul Ryan "to keep the ban on horse slaughtering in place." Buchanan "rounded up 20 fellow members of Congress" to urge Ryan and Rep. Rodney Frelinghuysen, the chairman of the U.S. House Appropriations Committee, "to urge they keep the ban in effect as the House and Senate try to reach a final agreement on spending." As it stands now, "extending the ban is included as part of the Senate's legislation but not the House's."

O&C Counties Seek Summary Judgment In BLM Lawsuit.

The Albany (OR) Democrat-Herald (12/14, Paul) reports that "the Association of O&C Counties on Tuesday filed a summary judgment memorandum in U.S. District Court in Washington, D.C., asking the court to rule on whether the Bureau of Land Management's resource management plan lives up to a decades-old contract outlining annual timber harvests and resulting payments to 17 counties in western Oregon." The lawsuit claims "the resource management plan would allocate three-quarters of 2.5 million acres for fish, water and wildlife issues, but fails to address the long-standing contract, which calls for an annual timber harvest of at least 500 million board feet of timber." Linn County Commissioner John Lindsey "said several Oregon counties are already experiencing severe budget issues, due in part from the continued decline of payments from the O&C timber sales."

BLM Investigator Alleges Misconduct By Feds In Bundy Ranch Standoff.

The Oregonian (12/14, Bernstein) reports that "a scathing memo from the lead investigator who assessed how federal officers handled the 2014 armed standoff with Nevada rancher Cliven Bundy accuses agents of far-reaching misconduct, recklessness and unrestrained antipathy toward the family." The 18-page document is dated Nov. 27. According to the article, "prosecutors shared it last Friday with defense lawyers for Bundy, his two sons and co-defendant Ryan Payne as they were in the midst of their conspiracy trial, but it's not part of the public court record." The document "prompted Cliven Bundy's lawyer to file a motion early Monday to dismiss the case, already in disarray over concerns raised previously about the government's failure to promptly share evidence with the defense."

BLM Will Offer Grand San Juan Parcels For Lease.

The Moab (UT) Times-Independent (12/14) reports that, per a press release, the Bureau of Land Management is offering up "43 parcels, totaling approximately 51,401 acres in Grand and San Juan counties at its March quarterly oil and gas lease sale." If the leases are issued, certain environmental protection measures will be required in addition to an environmental review. The public is able to protest the offered parcels up until Jan. 2, 2018.

State Land Office And BLM Propose Land Exchange For Economic Opportunities.

The Alamogordo (NM) Daily News (12/14, Devine) reports that "the timing and costs of a proposed land swap between the New Mexico State Land Office (NMSLO) and the Bureau of Land Management (BLM) drew sharp criticism from members of the public and from the Otero County Commission Thursday." In October, the Interior Department "approved the agreement to exchange land that would consolidate holdings within the Río Grande del Norte National Monument and the Sabinoso Wilderness Area under federal control."

BLM Conducts Tour Of Indian Lakes Holding Corrals.

The Nevada Appeal (12/14, Ranson) reports that the Bureau of Land Management "offered a tour last week of its Indian Lakes Off-Range Wild Horse and Burro Corral northeast of Fallon to update

the care of horses and announce an improved website for horse and burro adoptions." John Neill, BLM's facility manager for Palomino Valley, and Jason Lutterman, the bureau's spokesman for the national wild horse and burro program, "took 14 people on a one-hour tour of the corrals, the second tour of the year."

Bureau Of Reclamation

Dam Construction Bill Puts Washington Senator In Tough Spot.

Bloomberg BNA (12/14, Schultz) reports that House Republicans are pushing "a years-in-the-making bill that would speed up federal approvals of dam projects in the West," and, "in doing so, they could also force Pacific Northwest Democrats into a tough spot." According to the article, "for years, Republicans have been trying to pass legislation that would put a cap on the amount of money and time the Bureau of Reclamation can spend studying the environmental impact of proposed dam projects." However, "these bills have always been thwarted in the Senate by a united Democratic opposition, led primarily by Sen. Maria Cantwell (D-Wash.)." This time, however, the legislation's "backers have a trick up their sleeve: They've added a measure to the legislation that would give the green light to a $737 million water resources project in Cantwell's home state, a project she's been championing for years." But "Cantwell said the Republicans' tactics won't work on her."

Ex-Federal Official Indicted In Bribery Scheme At Hoover Dam.

The AP (12/14, Sonner) reports that "a longtime former official for the U.S. Bureau of Reclamation in Nevada has been indicted on federal fraud charges for his alleged role in a bribery scheme involving a government contract at the Hoover Dam." The grand jury indictment accuses Fredrick Leavitt of "accepting a $200,000 bribe to help steer a contract to a local accounting and tax firm in 2015." Dustin Lewis, a certified public accountant at the firm, was also named in the indictment.

Additional coverage was provided by KXNT-AM Las Vegas (12/13), KLAS-TV Las Vegas (12/14), and KNPR-FM Las Vegas (12/14).

Bureau Of Safety And Environmental Enforcement

US Considers Weakening Offshore Safety Rules To Promote More Drilling.

Platts (12/14, Scheid) reports that the Trump Administration could potentially ease "offshore oil and natural gas safety regulations, including eliminating certain requirements for Arctic drilling put in place by the Obama administration, and cutting testing requirements for rules developed in response to BP's Deepwater Horizon disaster, an Interior Department document showed Thursday." The plan states that the "BSEE is reviewing existing regulations to determine whether they may potentially burden the development or use of domestically produced energy resources, constrain economic growth, or prevent job creation." The plan also said it is considering substantial changes to blowout prevention methods as well as well control approaches, which were finalized in 2016.

Fish And Wildlife Service

Here's What Oil Drilling Looks Like In The Arctic Refuge, 30 Years Later.

The New York Times (12/15, Fountain) reports that "satellite images of a small part of the Arctic National Wildlife Refuge show the site of what, so far, is the only oil well ever drilled in the refuge, an exploratory well known as KIC-1 that was completed in the mid-1980s." The well was "plugged and abandoned, and the drilling equipment and a special timber pad it sat on have long since been removed," but "even after three decades, the well's footprint — about 600 feet long on its longest side — is easily distinguishable from the undisturbed tundra around it." The drillers "took care to protect the tundra," but "KIC-1 shows how even when care is taken, the delicate landscape of northern Alaska can be damaged by drilling activities, and that the damage can persist."

US And Canada Struggle With Status Of Grizzly Bears.

Courthouse News (12/14, Lundquist) reports that "at its year-end meeting this week, the Interagency Grizzly Bear Committee reviewed the status of six Northwestern grizzly bear populations and discussed what's needed for the species to recover over the next five years." The binational committee "recently oversaw the process of delisting the Yellowstone subpopulation of grizzly bears after the population had reached the goals of 500 bears total and 48 females with cubs." Grizzly Bear Study Team ecologist Frank Van Manen was "fairly confident Wednesday that the Yellowstone population was doing fine, estimating that the population has grown to 718 grizzlies bears, including 57 females with cubs."

Wolf Decision Could Undermine Plan To Remove Grizzly Bears From Endangered List. The Helena (MT) Independent Record (12/14, Chaney) reports that "an appeals court ruling in a federal lawsuit challenging how the U.S. Fish and Wildlife Service removed Great Lakes gray wolves from the Endangered Species Act list could unravel plans to delist grizzlies in the Greater Yellowstone Ecosystem." FWS grizzly recovery coordinator Hillary Cooley said during a meeting of the Interagency Grizzly Bear Committee in Missoula on Tuesday, "We had put our final delisting rule out in July and within a week we got the court opinion. The Great Lakes wolves were listed for the entire Lower 48 states, and then they carved out a DPS (Distinct Population Segment) and tried to delist them. That's what we've done with the Greater Yellowstone Ecosystem, as well, so we thought we should take a look."

U.S. Fish And Wildlife Service Requests Public Comment On Yellowstone Grizzly Delisting. Wyoming Public Radio (12/14, Kudelska) reports that "federal officials are reviewing the June decision to take grizzly bears in the Greater Yellowstone Ecosystem off the endangered species list." The FWS will "review how the delisting of grizzlies in the Greater Yellowstone Ecosystem could affect the bear's population in its historical range throughout the lower 48."

Endangered Species Are Influenced By Politics, A New Report Finds.

Wyoming Public Radio (12/14, Kudelska) reports that a new report says decisions on endangered species are influenced by politics, according to the Endangered Species Coalition. The report focuses on "ten fish, plant and wildlife conservation decisions where they say science was ignored or suppressed." The article says that "conservation decisions have long been influenced by politics," but Coalition member Leda Huta "said the current administration is worse than others." Huta said, "Under President Trump, that pressure from special industry interest is worsening. And has become almost indebted and infiltrated into the leadership position within these agencies and as a result, we're seeing a decline in scientific decisions around species."

National Park Service

National Park Service Reduces Free Admission Days.

CNN (12/14, Gray) reports that the national parks will offer fewer fee-free days in 2018 as part of "an effort by the park service to address an $11 billion maintenance backlog, spokeswoman Kathy Kupper said." Maintenance is needed for "projects like infrastructure or things that directly benefit the visitor – overlooks, campgrounds, roads, bridges – all the way down to the programs that are done for the visitors," Kupper said. Another way the NPS is "hoping to address the maintenance backlog is by increasing entrance fees at 17 of its most popular parks, including Yellowstone, Grand Canyon and Yosemite."

Additional coverage was provided by the St. George (UT) Spectrum (12/14, DeMille).

New Players In Fee Hike Debate.

The Mount Desert (ME) Islander (12/14, Shepherd) reports that the Pew Charitable Trust is weighing in on proposal by the National Park Service to increase visitor fees. Kathie Summers-Grice "said the organization is not recommending any specific course of action, but advocating for a thoughtful conversation in Congress." Summers-Grice said, "Pew wanted to highlight the problem and provide a [plan for a] reliable funding stream for the parks. It is Pew's view that this is a puzzle [and] we believe there is an equation and a number of measured options that [does not] include an increase away across the board."

Entry Fee Hike Could Hurt Rocky Mountain National Park.

The Fort Collins (CO) Coloradoan (12/15, Marmaduke) reports that "Coloradoan analysis and research, including an interview with an economics professor who's researched national park visitation, highlighted a few potential impacts" of a fee hike to Rocky Mountain National Park.

Colorado State University economics professor Stephan Weiler expects the fee hike to "drive away some visitors." Also, it could "inspire visitors to buy a different kind of pass that results in less money going directly to Rocky."

Atlantic Coast Pipeline Gets Another Approval.

The Richmond (VA) Times-Dispatch (12/14) reports that the National Park Service has "given the Dominion Energy-led Atlantic Coast Pipeline another key approval, authorizing construction and operation of the pipeline under the Blue Ridge Parkway." The NPS has "issued construction and right of way permits for the crossing, concluding it 'is consistent with the long-term conservation of scenery, wildlife and cultural resources under the agency's care,' Dominion said in a statement." Dominion said, "The agency's approval was reached after more than three years of careful study and meaningful engagement with the public and other agencies. In consultation with the agency, we adopted the most protective crossing method for the Parkway that will completely avoid surface impacts and preserve public view sheds."

Also reporting is the Staunton (VA) News Leader (12/14, Peters).

Shenandoah National Park Announces Launch Of Curriculum On Park Establishment.

The Augusta (VA) Free Press (12/14) reports that Shenandoah National Park Superintendent Jennifer Flynn "announced the release of 'The Spirit of the Mountain,' a new web-based interactive curriculum designed to tell the complex story of the Park's establishment and its effect on the local region." Flynn said, "We are excited to offer this additional method for the public to understand the complex story of the Park's establishment and to present this content in way that allows teachers across the country to use our story to teach important concepts in their Social Studies classes."

Yellowstone's Stephens Creek Capture Facility Closer To Housing Quarantine Program.

The Bozeman (MT) Daily Chronicle (12/14, Wright) reports that a second fence line was "built in September so that portion of the Stephens Creek Capture Facility could host a quarantine program, a process through which bison can be deemed free of the disease brucellosis." According to the article, "the designation would allow them to be moved elsewhere, like the Fort Peck Indian Reservation in northeastern Montana." Yellowstone National Park officials had "hoped the bison would already be at the Fort Peck Indian Reservation by now, but political and scientific disputes have kept that from happening."

Yellowstone National Park To Open For Winter Season.

The AP (12/15) reports that Yellowstone National Park will "open to the public on Friday for motorized over-snow travel."

Northwest Indiana Wild Bison Herd Nearly Doubles In Year.

The AP (12/14) reports that "a wild bison herd has almost doubled since being brought to a northwest Indiana prairie in 2016." The Nature Conservancy "brought 23 bison to its Kankakee Sands preserve in October 2016." The bison have "given birth to 10 calves this year — five bulls and five cows." In addition, "ten more bison were brought from Wind Cave National Park in South Dakota to join the herd in October."

Blue Ridge Parkway Reopens In Asheville Corridor After Snow.

The AP (12/14) reports that the Blue Ridge Parkway has "reopened in the Asheville corridor, one week after a snowstorm closed it down in North Carolina." The National Park Service "says the parkway is now open from milepost 375 at Bull Gap to Milepost 384." The Blue Ridge Parkway Visitor Center and the Folk Art Center in Asheville are also open.

Eagle Point Park Added To National Register Of Historic Places.

KCRG-TV Cedar Rapids, IA (12/14, Scheinblum) reports that Eagle Point Park has joined the National Register of Historic Places.

Office Of Insular Affairs

Palau Compact Renewed But Awaits Funding Approval.

The Guam Daily Post (12/14) reports that "after years of delay, the Compact agreement between

Palau and the United States has finally been renewed, but approval of the funds promised in the agreement is still pending." The Palau Compact was included in the 2018 National Defense Authorization Act that President Trump signed into law Wednesday in Washington. Assistant Secretary for Insular Areas Doug Domenech said, "Finalization of this agreement with Palau is long overdue. We look forward to final action from Congress to provide the appropriations necessary to finalize this important U.S. government commitment to Palau." Interior Secretary Ryan Zinke "underscored the need to approve the funding, saying, 'it's an important element of the Pacific national security strategy to maintain stability in the Western Pacific Region.'"

US Geological Survey

Pesticides May Have Poisoned Canada Geese.

The Coeur d'Alene (ID) Press (12/14, Bartholdt) reports that "dead geese found in Hayden and on the Rathdrum prairie this year died from ingesting rodent pesticides, according to the Idaho Department of Fish and Game." The department "sent four geese to the USGS National Wildlife Health Center in Madison, Wis., for a necropsy." Biologists found "the geese tested negative for lead poisoning and avian influenza, and asked the lab tests be continued." Kara Campbell, regional wildlife biologist, said, "A few more weeks went by with no word, but then I received an email from the USGS lab with results indicating phosphine poisoning as the cause of death."

Opinion Pieces

Hurrah For Camp Nelson Progress, Boo To Trump's Threat To Sacred Monuments.

In an editorial, the Lexington (KY) Herald-Leader (12/14) supports designating Camp Nelson in Jessamine County as a national monument status, "as Rep. Andy Barr and, as of last week, Interior Secretary Ryan Zinke have recommended." However, the paper says that "it's hard to celebrate...when national monuments sacred to Native Americans are at risk of losing protections because of actions by the Trump administration that Barr and other congressional Republicans support." It concludes that everyone should be able to "agree that this tribute to courage that resisted racism should not come at the expense of land held sacred by other American survivors of racial violence."

Tax Reform Bill Would Give Back Alaskans Control Of Their Energy Future.

In an op-ed for the Daily Signal (12/14, Loris), Nicolas Loris, a fellow at The Heritage Foundation, supports giving "Alaskans more control over their energy future by opening the Arctic National Wildlife Refuge." Loris argues that "the energy potential of Section 1002 is enormous, while the industry's footprint would be minimal." He also asserts that "Alaskans understand that energy development, tourism, recreation, and wildlife protection harmoniously co-exist."

Top National News

Trump Touts Administration's Efforts To Roll Back Regulations.

President Trump on Thursday highlighted his Administration's efforts to roll back Federal rules, saying they have cut 22 regulations for every new one implemented. The network news broadcasts did not cover the White House event, and coverage in print and online is relatively light. Generally, however, the reporting is positive, focusing on the President's comments, though a number of accounts note the criticism from environmental and other groups who say the push for deregulation endangers the safety of Americans.

The Washington Times (12/14, Boyer) reports that Trump said, "We blew our target out of the water. ... We beat our goal by a lot." According to Trump, in the first 11 months of 2017, his Administration "canceled or delayed over 1,500 planned regulatory actions, more than any previous president by far." He added, "The never-ending growth of red tape in America has come to a sudden, screeching and beautiful halt." The Washington Examiner (12/14, Westwood) says Trump "credited his deregulatory push with the economic growth that has occurred during the first year of his presidency." However, the Washington Post (12/14, Eilperin) says many of the rules "were either in the planning stages or, in the case of 244 of them, had languished for some time and have now been classified as inactive."

Bloomberg News (12/14, Sink, Levin) reports that Trump "cut a red ribbon between two stacks of paper, a smaller one marked 1960 and a larger one marked 'Today,'" and said that "the federal regulatory code had grown from 20,000 pages to 185,000 pages during the period." Business Insider (12/14, Kranz) reports that Trump sent a tweet after the event, which read, "Today, we gathered in the Roosevelt Room for one single reason: to CUT THE RED TAPE! For many decades, an ever-growing maze of regs, rules, and restrictions has cost our country trillions of dollars, millions of jobs, countless American factories, & devastated entire industries." Townhall (12/14, Pavlich) reports that the White House said that "federal agencies are expected to cut $9.8 billion in unnecessary regulation costs in 2018."

The New York Times (12/14, Lipton, Tackett) reports that Trump said his Administration was answering "a call to action," and described its progress as the "most far-reaching regulatory reform" in US history, "a claim he did not back up." The Times adds that while Trump's efforts "have brought cheers from the business community," they have "generated fierce pushback from state attorneys general and environmental groups who say that pulling back regulations has left the environment more vulnerable to pollution and consumers with fewer of the protections that were adopted after the financial crisis." The AP (12/14) also points to "critics" who say Trump "has tried to dismantle important protections for the environment, consumers and others."

The Hill (12/14, Wheeler) says regulatory advocates called the "deregulatory push 'self-serving' and dangerous to Americans," while the New York Post (12/14, Fredericks) says while Trump contends "that there are too many rules stifling economic growth," critics argue "that claim is overstated and accuse Trump of trying to dismantle important protections for the environment and consumers."

USA Today (12/14, Korte) reports that Trump said his "goal is to shrink the code of federal regulations to its 1960 level." However, Neomi Rao, the director of the White House's Office of Information and Regulatory Affairs, "suggested it wouldn't be that easy." Rao said, "I think returning to 1960s levels would likely require legislation. It's hard for me to know what that looks like. ... Deregulation also takes time. If we're doing something consistent with law, it takes time to reduce rules." Politico (12/14, McCaskill, Nussbaum) says Rao "also appeared to throw some cold water" on Trump's assertion that he has "cut more regulations that any president in history — by far, it's not even a contest." Rao said that "it's hard to measure what that is. ... Under Reagan, my understanding is that they had years of net reductions, but I'm not sure that there has been. … I don't think there has been anything like this since Reagan, at least."

FCC Votes To Repeal Obama-Era Net Neutrality Rule. The CBS Evening News (12/14, story 3, 1:40, Glor) reported that the FCC "voted to roll back Obama-era regulations on the companies that provide Internet service." NBC Nightly News (12/14, lead story, 2:45, Holt) indicated that "critics say the decision to end it affects everything from streaming services like Netflix to how quickly websites load, even to what websites you see."

ABC World News Tonight (12/14, story 6, 1:00, Muir) reported that the FCC voted to

repeal net neutrality, which is described as "rules that were designed to ensure equal access to the Internet." The repeal "will allow Internet providers Verizon and Comcast to block or slow down what websites customers see or favor the websites of companies that pay them." "It's painful for me to say this, that this is the new norm at the FCC. A norm where the majority ignores the will of the people," said FCC Commissioner Mignon Clyburn. The Los Angeles Times (12/14, Puzzanghera) reports that "Internet service providers now will be required only to disclose their online practices, with the Federal Trade Commission policing them for anti-competitive practices." Republicans claim that "they are simply restoring government oversight of the internet to where it was before 2015, reestablishing the light-touch regulatory approach that allowed the online ecosystem to flourish and develop into an economic force." "Entrepreneurs and innovators guided the internet far better than the heavy hand of government ever could have," said FCC chairman Ajit Pai.

USA Today (12/14, Snider) reports that the new riles, referred to as the Restoring Internet Freedom order, will "officially take effect after publication in the Federal Register." The order requires that "ISPs...must disclose any cases in which they prioritize some content, whether its their own or that of a paying partner, over other content." In response, "some in Congress say they will introduce Congressional Review Act legislation to overturn the measure." The Washington Post (12/14, Fung) reports that the FCC "also rejected some of its own authority over the broadband industry in a bid to stymie future FCC officials who might seek to reverse the Republican-led ruling." The vote was 3-2 along party lines. Critics of the vote have argued that eventually consumers "could begin to see packages and pricing schemes that would steer them toward some content over others." In response to the vote, "the hacking group Anonymous said it will 'make these men realize what a terrible mistake they made,' threatening to 'come after' Pai and his allies."

The New York Times (12/14, Kang) reports that "several Democratic state attorneys general, including Eric T. Schneiderman of New York, said they would file a suit to stop the change." Additionally, "several public interest groups including Public Knowledge and the National Hispanic Media Coalition also promised to file a suit." The Internet Association, a trade group representing Facebook, Google, and other tech firms, "said it also was considering legal action." The AP (12/14) reports that Pai opined that it "certainly wasn't heavy-handed government regulation" that contributed to the "phenomenal" development of the Internet. Pai also asserted that "broadband providers...will have stronger incentives to build networks, especially in underserved areas." He believes that the regulatory rollback will result in a "free, more open internet."

Reuters (12/14, Shepardson, Bartz, Johnson) reports that the meeting was "held amid protests online and in front of the FCC headquarters in Washington." Before the vote, the meeting was evacuated "for about 10 minutes due to an unspecified security threat," before resuming "after law enforcement with sniffer dogs checked the room." White House spokeswoman Sarha Sanders said that the Trump Administration "supports the FCC's efforts. At the same time, the White House certainly has and always will support a free and fair internet." The AP (12/14, Arbel, Ortutay) also reports that the vote on Thursday "also eliminates certain federal consumer protections, bars state laws that contradict the FCC's approach, and largely transfers oversight of internet service to another agency altogether, the Federal Trade Commission." AT&T senior executive vice president Bob Quinn asserted in a statement on a blog that the Internet "will continue to work tomorrow just as it always has." He promised that "the company won't block websites and won't throttle or degrade online traffic based on content."

The Washington Times (12/14, Richardson) reports that "American Civil Liberties Union senior policy analyst Jay Stanley urged fans of net neutrality to pressure Congress to use the Congressional Review Act to 'nuke' the 'misguided agency rules.'" Sen. Ted Cruz praised the FCC for eliminating rules that granted "sweeping power to unelected bureaucrats who would have the ability to dictate every aspect of the internet." "Moving forward, the message for government regulators and Congress should be simple: The internet should be free of taxation, censorship and regulation," said Cruz. Politico (12/14, McGill) reports that the FCC also "voted to consider whether to change or kill the national media ownership cap that limits broadcasters to reaching no more than 39 percent of the U.S. market."

The Washington Free Beacon (12/14, Harrington) reports that "the FCC said ISPs will again be classified as an 'information service' under Title I of the Communications Act, which was affirmed by the Supreme Court in 2005." Additionally, "mobile broadband internet services will...be reinstated as private mobile services by the FCC." The Washington Examiner (12/14, Quinn) reports that FCC Commissioner Jessica Rosenworcel "called Thursday's action 'rash' and said the FCC has been disrespectful to U.S. citizens by undoing the net neutrality rules." "Net

neutrality is Internet freedom. I support that freedom," she said. "I dissent from this rash decision to roll back net neutrality rules. I dissent from the corrupt process that has brought us to this point. And I dissent from the contempt this agency has shown our citizens in pursuing this path today. This decision puts the Federal Communications Commission on the wrong side of history, the wrong side of the law, and the wrong side of the American public."

Breitbart (12/14, Moran) reports that Congressman Mike Doyle commented on Tuesday, "All you have to do is look at what went on over the last 10 or 15 years to see how the [internet service providers] repeatedly sought to crush potential competitors and challenged the FCC's previous net neutrality rules in court to understand why the Open Internet Order was needed — and to see what will happen if the Open Internet Order is repealed." The Wall Street Journal (12/14, McKinnon) reports that zero-rating deals, which exempt some services or websites from mobile carriers' data caps, could become widespread under the new rules.

The Wall Street Journal (12/14, Board) editorializes that the FCC made the correct decision in allowing markets to direct innovation and competition. The Journal believes that the net neutrality rules positioned the FCC as a political gatekeeper over the Internet, which was inappropriate. The publication believes that consumers and content producers will enjoy benefits from increased investment in fiber and wireless technology following the rollback.

NLRB Overturns Obama-Era Rule That Aided Worker Challenging Chains. The New York Times (12/14, Scheiber) reports that the NLRB on Thursday overturned an "Obama-era precedent that had given workers significant leverage in challenging companies like fast-food and hotel chains over labor practices." The 3-to-2 party line vote "changes the standard for holding a company responsible for labor law violations that occur at another company, like a contractor or franchisee, with which it has a relationship." It "restores the pre-2015 standard, which deemed a fast-food corporation a joint employer only if it exercised direct and immediate control over workers at the franchise, and in a way that was not limited."

Pence Delays Middle East Trip To Be Available For Tax Vote.

Reuters (12/14, Holland) reports that "a senior White House official" said Thursday that Vice President Pence will delay his upcoming trip to the Middle East in case his tie-breaking vote is needed to pass tax reform legislation in the Senate. Pence had planned to leave for the trip on Saturday, but will now leave sometime Tuesday. Said the "senior White House official," "We don't expect his vote to be needed but we don't want the scenario where he's on the other side of the world and we have to come back." Roll Call (12/14, Bennett) sees Pence's decision to delay the trip as "a signal GOP leaders expect to thread the needle."

Seib: Bill's Passage Would Allow Trump To End Year With A Win. In a piece for the Wall Street Journal (12/14, Seib), Gerald Seib reviews President Trump's first year in office. Seib writes that after a number if legislative stumbles, passage of tax reform would allow the Administration to end the year with a victory that will have long-standing political and business impacts.

Bartiromo: Tax Reform Will Continue Positive Economic Trends. In an op-ed for the Wall Street Journal (12/14, Bartiromo), Fox News and Fox Business anchor Maria Bartiromo touts Trump's economic record and argues that tax reform will help the positive economic trend continue.

Rubio Holds Out For Expanded Child Tax Credit.

The New York Times (12/14, A1, Rappeport, Kaplan) reports that while Republicans "expect to unveil the final bill on Friday and vote on the legislation early next week so that it can be sent to President Trump before Christmas," their plans "were thrown into some disarray on Thursday" by Sen. Marco Rubio, who, USA Today (12/14, Jackson, King) reports, said that he will oppose the bill if the child tax credit is not expanded to assist families who do not owe income taxes.

The Miami Herald (12/14, Daugherty) says a Rubio amendment to the Senate bill to expand the credit "was shot down two weeks ago after Republican senators chafed at raising corporate taxes to pay for it" and when conferees "decided to raise a proposed corporate tax cut to pay for a lower tax rate for wealthy individuals," Rubio "wasn't happy." Rubio said Thursday, "My concern is, you found the money to lower the top rate and you found the money to add in (but) you can't find a little bit to somewhat increase the refundable portion of it?. ... There's ways to do it and we'll be very reasonable." Senate Majority Whip Cornyn "said leadership is working with Rubio to get him on board," and told reporters, "I think he'll be satisfied." The Washington Post (12/14, A1, Stein) reports that Rubio has been in direct negotiations with bill conferee Sen. Tim Scott. While Senate negotiators "have told Rubio they are open to expanding the program some," it is "on a smaller scale than he wants." The (12/14, Wilhelm, Faler) Wall Street Journal (12/14, A1,

Hughes, Peterson, Rubin) reports that Scott said he thinks progress is being made. Politico (12/14, Wilhelm, Faler) says Rubio "said he's received no assurances his concerns will be addressed, though he said President Donald Trump alluded to them Wednesday in a speech."

Kasie Hunt said on NBC Nightly News (12/14, story 3, 1:50, Holt) that "Republicans could be at risk of falling short of the 50 votes they need to pass the bill." Similarly, the AP (12/14, Ohlemacher, Gordon) says Rubio's stance "jeopardiz[es] the Republicans' razor-thin margin as they try to muscle the $1.5 trillion bill through Congress next week." Losing his vote "would leave the Republicans with little wiggle room to pass their first major legislation" of the Trump presidency. Votes against the measure by Rubio and Sen. Bob Corker, who voted against the original bill, would leave the vote "at 50-50, with Vice President Mike Pence prepared to cast the tie-breaker for passage. Corker said Thursday he is undecided." Further complicating the matter, Sen. John McCain is hospitalized with side effects of brain cancer treatment, and Sen. Thad Cochran "had a non-melanoma lesion removed from his nose earlier this week," though "GOP leaders are hopeful they will be available next week." Bruce said on ABC World News Tonight (12/14, story 2, 0:45, Muir), "We're told he's looking forward to getting back to work here on the Hill, but no word yet on when that will be." Senate Republicans "are hoping to act on tax reform early next week, and...they are going to need every vote they can get."

David Muir said in the lead story for ABC World News Tonight (12/14, lead story, 3:15, Muir) that Trump is "still promising it will be the 'greatest Christmas present that a lot of people have ever received," but Mary Bruce said he "is aware...there are signs of trouble." Bloomberg News (12/14) reports that Trump told reporters Thursday that he is "very sure" Rubio will vote for the bill. Trump said, "I think that Senator Rubio will be there. ... Very sure." White House Council of Economic Advisers Chairman Kevin Hassett said on CNN's Out Front (12/14), "I expect they'll work something out. I don't think anyone thinks Rubio will hold up this bill." Asked if the Administration would accept the child tax credit getting bigger, Hassett said that "the child credit level, it's very generous right now and I don't think it needs to be expanded, I don't think anyone in the White House does. But we respect Senator Rubio and the process."

However, Rubio is not the only potential hold-out. An aide to Sen. Mike Lee, who, along with Rubio, cosponsored an amendment to the original Senate bill to expand the child tax credit said Thursday that the senator is undecided on whether to support the bill, Reuters (12/14, Cowan) reports. The Washington Times (12/14, Sherfinski) quotes Lee spokesman Conn Carroll as saying, "Sen. Lee continues to work to make the CTC as beneficial as possible to American working families."

Senate Finance Committee Chairman Orrin Hatch said on Fox News' Special Report (12/14), "We have to work out those problems. That always happens toward the end of these very, very difficult appropriation battles. There is always somebody trying to get something more. Those are important issues, those child credits. ... I think it will get worked out one way or the other but it's going to take good faith on both sides to be able to do it. Like anything else, we've got to get it resolved in order to get the bill passed." The Washington Post (12/14, Werner, Paletta) reports that Hatch said Republicans "are looking at shortening the duration of tax cuts that their plan would give to families and individuals," in order to "free up more revenue for additional changes to their tax overhaul." However, the move "could also heighten complaints that the bill prioritizes cuts for corporations over households." Hatch said, "That's one of the things we're looking at. ... They're looking at every possible thing they can to meet the revenue needs, as always at the end of the thing we're looking at everything."

Chief congressional correspondent Nancy Cordes reported in the lead story for The CBS Evening News (12/14, lead story, 2:15, Glor) that while Trump has called the bill "a Christmas present," Democrats "argue it's mostly a gift to big business, permanently slashing the corporate rate tax rate from 35 percent to 21 percent without cutting many corporate loopholes," while "the personal tax cuts...are temporary, and Obamacare's individual mandate is eliminated, which could boost the number of uninsured Americans." Lester Holt said on NBC Nightly News (12/14, story 4, 2:00, Holt) that Republicans were "unable to repeal and replace Obamacare," so they are "instead trying to undermine it."

Sen. Ron Wyden told CNN's Situation Room (12/14) that "people understand that this is a betrayal of the middle class and in fact, the tax breaks in the Senate bill for the multinational corporations are permanent, the ones for the working people are temporary, and by the way, if Marco Rubio extracts the concession that may be a very good one, are we going to shorten the bill that's already temporary for the middle class to pay for it so the middle class people would get hosed once more?"

Bill Opponents Seek To Sway Collins. The New York Times (12/14, Rappeport) reports that

opponents of the tax bill are mounting an effort to convince Sen. Susan Collins to vote against it. Collins, "cut several deals with Republican leaders in exchange for going along" with the Senate bill, and "those trade-offs still seem to be in place as far as Ms. Collins is concerned." However, since she "is one of the few Republican senators who sometimes votes against her party, the pressure from opponents of the tax plan to flip her vote is rising as the bill inches closer to final passage."

Despite Trump, States Working To Cut Carbon Emissions.

The AP (12/14, Casey) reports ever since President Trump said he would withdraw the US from the Paris climate pact, "states looking to tackle carbon pollution have been forced to go it alone." Over a dozen created "an alliance committed to reducing emissions in line with the Paris accord, an international agreement that aims to halt the rise in global temperatures." Several leaders from those states "were in Paris this week for a climate summit two years after the historic accord was signed." Others states "are taking a look at the country's only regional program that mandates emission reductions in the power sector. Known as the Regional Greenhouse Gas Initiative, it covers nine states in the Northeast and mid-Atlantic and is poised to expand."

Editorial Wrap-Up

New York Times.

"Who Will Judge The Judge?" The New York Times (12/14) editorializes that Alex Kozinski "is one of the nation's most respected and influential federal judges," and "if Judge Kozinski were anything but a federal judge with life tenure, he'd most likely be out of a job by now." According to the Times, "in what has become a painfully familiar phrase over the last two months, the judge's conduct was an 'open secret' in the federal court system, law schools, and the legal profession at large." The Times adds that "there's a good reason for keeping impeachment of judges very rare: The federal judiciary must remain as free as possible from intrusion by the political branches," but "that is not a defense if the judiciary itself can't meaningfully address unacceptable behavior in its ranks." Judge Kozinski's case "provides an opportunity to show that it can."

Washington Post.

"Congress Should Help Puerto Rico – Not Hurt It." A Washington Post (12/14)editorial highlights the "still grim" conditions in Puerto Rico after Hurricane Maria and decries what it describes as the "disgraceful treatment of Puerto Rico as an afterthought," which "is evident in tax measures being proposed by the GOP in its overhaul of the tax code." The Post says the House and Senate bills "would impose new taxes on U.S. companies with operations in Puerto Rico, lumping the U.S. territory into the same category as foreign countries." Puerto Rico Gov. Ricardo Rosello said the provisions "would actually kill American jobs in Puerto Rico, devastating an already struggling economy." The Post calls on Congress to "drop these unfair taxes and...approve the federal aid needed to get Puerto Rico on its feet."

"Corruption Makes Ukraine Even More Vulnerable To Russia." A Washington Post (12/14) editorial says Ukraine President Petro Poroshenko's government, "which promised to put an end to the endemic corruption that has haunted Ukraine since it became independent in 1991, has instead become a major obstacle to reform." The Post argues that so long as Ukraine "fails to clean up its institutions and firmly embrace the rule of law, it will remain deeply vulnerable to Russian subversion." The US and EU "should insist that [Poroshenko] stop targeting anti-corruption investigators and create a special anti-corruption court."

"The Supreme Court Gets A Second Change To Quash Gerrymandering." The Washington Post (12/14, Board) editorializes that in October, the Supreme Court heard arguments "over whether it should limit politicians from tinkering with legislative district lines to advantage their own party." According to the Post, "partisan gerrymandering has become both increasingly sophisticated and increasingly anti-democratic, as parties cement their hold on power at the cost of public faith in representative government." The court's decision "to consider Wisconsin's skewed map was the first sign in years that the justices might be willing to intervene," and now, the court "has taken on a second challenge," which "concerns gerrymandering by Maryland Democrats seeking to unseat a Republican member of Congress." The Post adds that "the addition of the Maryland case may signal the court's willingness to strike down extreme gerrymanders," and argues that "making clear that there's a limit to constitutionally acceptable

gerrymandering would deter lawmakers from chicanery going forward."

Wall Street Journal.

"The Internet Is Free Again." The Wall Street Journal (12/14, Board) editorializes that the FCC made the correct decision in allowing markets to direct innovation and competition. The Journal believes that the net neutrality rules positioned the FCC as a political gatekeeper over the Internet, which was inappropriate. The publication believes that consumers and content producers will enjoy benefits from increased investment in fiber and wireless technology following the rollback.

"Beauties And The Beasts." In an editorial, the Wall Street Journal (12/14) condemns attacks and death threats against Miss Iraq, Sarah Idan, after she posed for a photo with Miss Israel, Adar Gandelsman, at a beauty contest in Tokyo last month.

"The US Is Left Behind On Trade." The Wall Street Journal (12/14) editorializes that the recent trade deal finalized between Japan and the EU highlights how Japanese Prime Minister Shinzo Abe's is responding to the Trump Administration's withdrawal from the TPP by turning to other allies, perhaps in hopes of luring the US back in. The Journal argues that the EU-Japan deal threatens to leave American firms in many sectors at a significant disadvantage.

Location: U.S. Chamber of Commerce, 1615 H St NW, Washington, DC www.hiringourheroes.org https://twitter.com/USChamber.

12:00 PM U.N. official concludes visit to U.S. with press conference – United Nations Special Rapporteur on Extreme Poverty and Human Rights Philip Alston concludes visit to the U.S. with a press conference, sharing his preliminary observations and recommendations * While in the U.S., Special Rapporteur Alston examined govt efforts to eradicate poverty in the country and how they relate to U.S. obligations under international human rights law. Location: 2121 K St NW, Washington, DC www.ohchr.org https://twitter.com/UNHumanRights.

2:30 PM AG Sessions press conference on efforts to reduce violent crime. – Attorney General Jeff Sessions will hold a press conference to discuss efforts to reduce violent crime. OPEN

PRESS. NOTE: Please RSVP to press@usdoj.gov and Sarah Sutton at sarah.e.sutton@usdoj.gov. All media must present a government-issued photo I.D. (such as a driver's license) as well as valid media credentials. Media must enter the building at the visitor's entrance on Constitution Avenue between Ninth and Tenth Streets. Media may begin arriving as early as 12:30 p.m. EDT and cameras must be pre-set by 1:30 p.m. EDT. This announcement will be LIVESTREAMED at justice.gov/live. Questions regarding logistics should be directed to the Office of Public Affairs at 202-514-2007. Location: Department of Justice Seventh Floor Conference Room 950 Pennsylvania Ave., NW. www.justice.gov https://twitter.com/TheJusticeDept.

Last Laughs

Late Night Political Humor.

Jimmy Kimmel: "The FCC did something despicable today, they voted to put an end to net neutrality. This is the rule that says everyone gets equal access to the Internet – a big company or somebody selling crocheted owls from their house in the Midwest."

Jimmy Kimmel: "But I just want to say, thank you, President Trump. Thanks to you and this jack-hole you appointed to run the FCC, big corporations are about to take full control of the Internet. So Merry Christmas, everybody. And by the way, tomorrow is the last day maybe ever to enroll for health care under the Affordable Care Act. … Do it now, because once net neutrality's gone, we might not even have WebMD anymore."

Stephen Colbert: "Earlier this afternoon, the FCC voted to repeal net neutrality. What that really means is repealing regulations that prevented your Internet provider from blocking certain websites or slowing down your data. Now they can, and that's wrong because the only thing that should slow your Internet speed is the number of people also sitting at Starbucks working on their screenplays."

Stephen Colbert: "Until this afternoon, the rules prohibited broadband providers from striking special deals that would give some websites or apps priority over others. So now a big player like Google could make their site load faster than a smaller one like Etsy, which is bad news for my Etsy shop, Steve's sleeves."

Stephen Colbert: "This is a real hot-button issue, as evidenced by the fact that the FCC received 22 million public comments. But an investigation has revealed as many as 2 million of those comments were fake, and half a million originated from Russian email addresses. Come on, Russia. Can't you just leave America alone? Go rig the winner of Norway's Got Talent or something."

Stephen Colbert: "After Trump tweeted how Sen. Kirsten Gillibrand begged for campaign contributions and would do anything for them, the USA Today's editorial board wrote a 'President who would all but call Sen. Kirsten Gillibrand a whore is not fit to clean the toilet in the Barack Obama Presidential Library.' Wow. That is incredible. That is brutal. That is scathing, especially from the USA Today. It could really hurt Trump among La Quinta Inn rewards club members."

Jimmy Fallon: "Hey guys, do you remember that old episode of 'The Apprentice' where Trump fires Omarosa and she flips out? Well, I guess they aired a rerun the other night at the White House."

Jimmy Fallon: "But Omarosa's trying to put a positive spin on things. She said her goal all along was to reach one year of working in the White House, which is funny because that's actually Trump's goal too."

Jimmy Fallon: "Meanwhile, Trump said that he wants to give people a giant tax cut for Christmas. Yeah. Leave it to Trump to give you a Christmas present that's actually just your own money. It's like, 'Oh, you shouldn't have.' 'I didn't.'"

Jimmy Fallon: "Today, the FCC voted to repeal net neutrality, which will make people pay for faster Internet service. People called it greedy and unfair. Then the cable company said, 'Have we

not met? Hi, yeah, we're the cable company. That's what we do.'"

Seth Meyers: "Now, polls show that Americans overwhelmingly support net neutrality, with 83 percent overall in favor of keeping the FCC rules, including 75 percent of Republicans, and it makes sense Republicans would favor an open Internet. Otherwise, they would have to get their news from newspapers or CNN, instead of Facebook group Patriot Eagle MAGA 1776."

DOI In The News

U.S. Launches Effort To Reduce Reliance On Imports Or Critical Minerals.

Reuters (12/21, Volcovici) reports that Interior Secretary Ryan Zinke on Thursday "launched an effort to reduce U.S. dependence on foreign supplies of critical minerals used in smartphones, computers and military equipment, which he said poses a national security and economic risk." Under a directive from President Trump, Zinke will "work with Defense Secretary Jim Mattis to publish in 60 days a list of non-fuel minerals that are vulnerable to supply chain disruptions and necessary for manufacturing and will develop a strategy to lessen U.S. dependence on foreign suppliers." According to the article, "the policy would aim to identify new domestic sources of critical minerals; increase domestic exploration, mining and recycling; giving miners and producers electronic access to better mapping and geological data; and streamlining leasing and permitting for new mines."

The Las Vegas Review-Journal (12/21, Martin) reports that "Zinke said the campaign would focus on a mapping, much of it aerial, to find the minerals, increase geological data, and streamline the application process to expedite domestic mining and production." At a signing ceremony, Zinke said, "Right now, the United States is almost completely reliant on foreign adversaries and competitors for many of the minerals that are deemed critical for our national and economic security," Zinke said at a ceremony at the Department of Interior.

The Elko (NV) Daily Free Press (12/21) reports that Sen. Dean Heller, who attended the

signing ceremony, said, "I applaud Secretary Zinke for initiating a review of the outdated, job-crushing policies that inhibit our ability to utilize our own mineral resources. Nevada is one of the most mineral rich locations on earth, and hard rock mining contributes to thousands of jobs in our state. In order to harness our nation's true mineral potential and end our reliance on foreign production, we need to streamline and update these policies, and that's why I authored legislation that would do just that. I thank Secretary Zinke for his leadership on this issue and his work to help allow Nevada and this country to enact a strategy to fully maximize our nation's mineral potential."

Additional coverage was provided by Platts (12/21, Innace) and the Financial Times (12/21, Sanderson).

Trump Halts Funding For Offshore Drilling Safety Study.

The Hill (12/21, Cama) reports the Trump Administration has halted "its funding for a major study meant to improve how regulators enforce offshore oil and natural gas drilling safety." On Thursday, the "congressionally chartered" National Academies of Sciences, Engineering and Medicine said the Department of Interior's Bureau of Safety and Environmental Enforcement "sent a stop-work order for the study earlier this month." In a statement the National Academies said it is "disappointed" that the "important study has been stopped." The Washington Post (12/21, Fears) reports Interior spokesman Gregory Julian "said the study was suspended because it might not be needed." On Thursday afternoon he stated, "Simply put, we paused the study because it appeared to be duplicative of ongoing work."

The AP (12/21, Michael Virtanen) reports a Dec. 7 letter from the bureau "ordering the suspension of all work under the contract said that within 90 days the department would decide whether to lift the order or terminate the study altogether." The New Orleans Times-Picayune (12/21, Schleifstein) reports Jacqueline Savitz, "senior vice president for U.S. oceans with the environmental group Oceana," said, "One thing we should all be able to agree on is that safety is of paramount importance, so preventing a study like this simply flies in the face of common sense."

Also reporting are the CBS Evening News (12/21, story 11, 0:20, Glor), the Washington Post (12/21, Fears), BuzzFeed (12/21, Vergano), and the Union of Concerned Scientists (12/21).

Secretary Zinke Urged To Recover $84.8 Million Misspent On Delta Tunnels.

Bay Area (CA) Indymedia (12/21, Bacher) reports that six House Democrats on December 15 sent a letter to Interior Secretary Ryan Zinke "urging the federal government to recover $84.8 million in taxpayer funds that were misused to benefit a select few wealthy San Joaquin Valley agricultural water districts participating in the controversial Delta Tunnels planning process." The letter asks Zinke "to recover the missing funds and 'to shed more light on the scheme,' including whether similar undisclosed subsidies were provided to any other parties, or if the water districts that benefitted from this arrangement might still be reimbursed by taxpayers." The lawmakers wrote, "These decisions by the Interior Department, dating back to 2007, appear to violate multiple laws and policies, including the state law requirement that the beneficiaries of a Sacramento-San Joaquin Delta conveyance facility must pay for 'costs of the environmental review, planning, design, construction, and mitigation' of any new facility."

Bernhardt's Schedules Reveal His Wide-Ranging Portfolio.

E&E Publishing (12/21, Doyle) reports that schedules obtained under the Freedom of Information Act show Interior Deputy Secretary David Bernhardt's priorities since assuming office. According to the article, "the sage grouse debate captivated" Bernhardt "from his earliest days in office," and it has "lingered atop his agenda." The schedules also show "the outside advocacy groups and assorted individuals who have secured face time with Bernhardt in his sixth-floor Interior Department office, which visitors enter by passing next to a large stuffed polar bear."

Barrasso Advises Caution On Population Targets For Sage Grouse, Echoing Governor And Environmental Groups.

The Casper (WY) Star-Tribune (12/21, Richards) reports that "the tumult over sage grouse management in recent months appears to have calmed, but in a recent letter Sen. John Barrasso reminded the feds once again to avoid controversial strategies for managing the imperiled bird, like setting population targets." In his letter, Barrasso implied that "managing the bird by population, as is done with some species but scientists don't recommend for grouse, does not compliment Wyoming's way of doing things," according to the article. Barrasso's "words of

caution echo similar sentiments from the environmental community and Gov. Matt Mead, and they are in response to both the favorable attitude towards population targets from Interior Sec. Ryan Zinke and an Interior review of the sage grouse plans published in August."

Cummings Seeks Reorganization Plans From OMB To Avoid 'Degradation Of Federal Workforce'.

Federal News Radio (DC) (12/21, Thornton) reports that House Oversight and Government Reform Committee Ranking Member Elijah Cummings has sent a letter to Mick Mulvaney, director of the Office of Management and Budget, "requesting copies of each agency's reorganization proposal by Jan. 3." Cummings is unsatisfied "with the handful of disclosures agencies have publicly made so far about their plans." According to the article, "Cummings and other Democrats on the committee have been calling for hearings since October, concerned about possible 'degradation of the federal workforce,' a phrase that returns in his most recent letter calling for transparency."

Regulations, Pipelines And Public Lands.

E&E Publishing (12/21, Gilmer) reports that the oil and gas sector has seen a litigious year in 2017. The largest disputes have been focused on rolling back methane emissions, fracking, and royalty rules.

Bureau Of Indian Affairs

Feds Look To Toss Chickasaw Casino Land Dispute.

Law360 (12/21, Reddan) reports that the Interior Department "told an Oklahoma federal court Wednesday that the Comanche Nation's challenge to the land acquisition for a Chickasaw Nation casino should be dismissed because the claims are barred by a statute of limitations on challenges to federal regulations."

Beloit Casino 'Promising,' But Illinois Legislator Says It Would Hurt Rockford.

The Rockford (IL) Register-Star (12/21, Braun) reports that "prospects look good for a casino with an indoor water park to be built in Beloit, Wisconsin, in time for a 2021 opening, backers of the project said at a news conference Thursday." Officials of the city of Beloit and Ho-Chunk Nation "shared results of a November economic impact study that shows the $405.5 million project would employ 1,500 people." Beloit City Manager Lori Luther said she expects the Bureau of Indian Affairs to approve "the project by the end of next year."

Additional coverage was provided by the Beloit (WI) Daily News (12/21, Montgomery) and WIFR-TV Rockford, IL (12/21, Adams).

Bureau Of Indian Education

Alaska's Only Tribal College Will Waive Tuition For Alaska Native Students.

KTOO-FM Juneau, AK (12/21, Koenig) reports that earlier this month, "Iḷisagvik College in Utqiagvik – the only federally recognized tribal college in Alaska – announced that it will waive tuition for all Alaska Native students, starting next semester." Pearl Brower, President of Iḷisagvik College, "said that students have expressed concern with the price of tuition, which for a full course load runs over $3,000." The college is "planning to cover the cost of the waiver internally, although the price will be defrayed by the Bureau of Indian Education, which gives Iḷisagvik money for each full course load being taken by Alaska Native or American Indian students."

Additional coverage was provided by the AP (12/22).

Bureau Of Land Management

AG Sessions Orders Examination Of Bundy Case After Mistrial Over Prosecution Bungling.

The Washington Times (12/21, Richardson) reports that, following a mistrial due to the prosecutors failure to disclose information to the defense, Attorney General Jeff Sessions ordered a third-party examination of the Bundy prosecution. Ian D. Prior, the department's principal deputy director of public affairs, said in a statement, "The attorney general takes this issue very

seriously and has personally directed that an expert in the [Justice Department's] discovery obligations be deployed to examine the case and advise as to the next steps." Acting US Attorney Steven W. Myhre, who oversees the prosecution, said, "The office welcomes the assistance of the attorney general as we continue to evaluate the case in light of the court's ruling."

In analysis piece, the Los Angeles Times (12/21, Montero) writes that "the government has largely failed to obtain convictions" against the Bundys, "apparently because of bad tactics and missteps." Meanwhile, Bundy legal team's narrative "that the family is pushing back against an unjust and oppressive government" has "possibly swayed some jurors."

The New York Times (12/21, Pérez-Peña), the AP (12/21, Ritter), Oregon Public Broadcasting (12/21, Notarianni) also cover the Bundy case.

King II Coal Mine Approved For Expansion.

The Durango (CO) Herald (12/21, Romeo) reports that the King II coal mine has received "quick approval for an expansion that will extend operations until at least 2023." GCC Energy, which has operated the mine near Hesperus since 2007, "asked the Bureau of Land Management for an expansion of 950 acres of underground workings." According to the article, "the request for expansion was granted Dec. 15 by the Interior Department in Washington, D.C. rather than going through the BLM's state office in Denver – a process that sped up the approval and eliminated the possibility for appeal." Steven Hall, spokesman for the BLM in Denver, "said the decision reflects the Trump administration's orders to expedite energy development, as well as streamline decision-making processes as it relates to the extraction industry."

Arch Coal Can Begin Roadwork To Expand Mine.

The Grand Junction (CO) Daily Sentinel (12/22, Webb) reports that U.S. District Court Judge Philip Brimmer "denied a request Thursday by environmental groups for a temporary restraining order that would have kept Arch Coal from beginning to clear roads and build pads to do exploratory drilling in the Sunset Roadless Area." The ruling "clears the way for Arch Coal subsidiary Mountain Coal Co. to immediately begin bulldozing in the roadless area if conditions permit despite this week's snowfall." It "comes less than a week after the Interior Department approved two Bureau of Land Management coal lease modifications covering the roughly 1,700 acres, just days after the U.S. Forest Service consented to issuing those leases."

Oklahoma Ranch Offers Up-Close Look At Wild Horses.

The AP (12/21) reports that "an Oklahoma ranch offers visitors an up-close look at wild horses through a federal program aimed at protecting the symbols of the American West but also managing public land for multiple uses." Mowdy Ranch in Coalgate is "one of the Bureau of Land Management's three ecosanctuaries for mustangs." According to the BLM's Debbie Collins, with the agency's horse and bureau program, the ranch "houses 150 mares relocated from Nevada."

Mother Of Teen Who Drowned At Otter Creek Reservoir Sues Feds.

WTVA-TV Columbus, MS (12/21) reports that "the mother of an Arizona teen who drowned in a culvert at Otter Creek Reservoir filed a wrongful death lawsuit Wednesday against the federal agencies that manage the waterway." Chase Leroy Clark, 17, was "sucked into the culvert that runs under Otter Creek Road and drowned despite efforts to free him." According to the article, "Melisa Betley, the boy's mother, alleges in the lawsuit that the Interior Department, Bureau of Land Management and Army Corps of Engineers failed to remedy or guard against the hazard."

Bureau Of Ocean Energy Management

WorkBoat Show: There's Still A Lot Going On.

Workboat (12/21, Krapf) reports that at the International WorkBoat Show, Walter Cruickshank, the acting director of the Bureau of Ocean Energy Management, was the featured speaker at the Offshore Program. Cruickshank, described as "upbeat," noted "that the first lease sale of the Trump administration in August was the biggest in history – 76 million acres – and the next one in March 2018 will be even bigger at 77 million acres."

BOEM's New York Bight Webinar Responds To NYSERDA Offshore Wind Proposal.

The Windpower Engineering & Development (12/21, O'Hearn) reports that "eight weeks after NYSERDA released its Area for Consideration for at least four new offshore wind energy areas

(WEAs) in the New York Bight, the U.S. Department of Interior's Bureau of Ocean Energy Management (BOEM) held a half-day webinar to present the bureau's response." On December 4, the Intergovernmental Renewable Energy Task Force for the New York Bight met via webinar. According to the artricle, "BOEM experts Luke Feinberg and Isis Johnson-Farmer outlined the offshore wind lease auction process and covered changes that had been made to NYSERDA's proposal, including the addition of two small Proposed Call Areas to the east of the Area for Consideration, removal of the Hudson Canyon from the WEAs, an extension of the navigation Traffic Separation Scheme (TSS) and the removal of a scallop rotational area from the WEAs."

Bureau Of Reclamation

New Operations Chief Named For Central Valley Project.

The Central Valley (CA) Business Times (12/21) reports that Kristin White has been named deputy operations manager for the Bureau of Reclamation's Mid Pacific Region Central Valley Operations Office in Sacramento.

Bureau Of Safety And Environmental Enforcement

BP Spill Settlement Money Could Fund These 4 Outdoor Recreation Projects.

The New Orleans Times-Picayune (12/20, Baurick) reports that not all of the settlement funds paid by BP arising out of the 2010 Deepwater Horizon incident are being used for restoration projects. Roughly $86 million out of the $5 billion allotted for Louisiana "will go toward enhancing outdoor recreation in areas affected by the disaster." The Louisiana Trustee Implementation Group issued a draft plan for the funds this week covering $22 million that will be used for recreation projects. The plan is open for public comment.

Fish And Wildlife Service

Jones Reintroduces N. Topsail Beach Bill.

The Coastal Review (12/21) reports that Rep. Walter Jones "announced Wednesday that he had reintroduced a bill to change 30-year-old federal mapping that Jones and others say 'incorrectly' placed much of North Topsail Beach off-limits to federal money for development and disaster assistance, including the National Flood Insurance Program." According to the article, "Jones and North Topsail Beach officials have long maintained that the U.S. Fish and Wildlife Service's mappers in the early 1980s incorrectly classified more than 6,000 acres at the north end of Topsail Island as 'undeveloped.'" Jones' legislation would direct the Secretary of Interior to revise the Coastal Barrier Resources Act map for North Topsail Beach.

Are Those Venus Flytraps Near Carolina Forest In Danger Of Extinction?

The Myrtle Beach (SC) Online (12/21, Hudson) reports, the federal government says the native habitat of Venus flytraps "in the Carolinas may be in peril and require a protective listing under the Endangered Species Act." The plants "thrive in the Lewis Ocean Bay Heritage Preserve, but the U.S. Fish and Wildlife Service says they suspect the population there has declined due to changes in the surrounding habitat, along with residential and commercial development."

Atlantic Coast Pipeline Wants To Start Cutting Down Trees.

The Richmond (VA) Times-Dispatch (12/21, Zullo) reports that "though it still lacks several key approvals, the Dominion Energy-led Atlantic Coast Pipeline project has asked federal regulators to allow workers to begin cutting down trees along some portions of the 600-mile route in West Virginia, Virginia and North Carolina." Dominion submitted the request to the Federal Energy Regulatory Commission last week. Before FERC can approve the tree-cutting, however, "Dominion must finish consulting with the U.S. Fish and Wildlife Service on potential effects on sensitive species and reach an executed agreement as required under the National Historic Preservation Act."

Lawsuit May Stall Suncoast Parkway Extension.

The Tampa (FL) Tribune (12/20, Behrendt) reports that "a last-minute lawsuit may put the

brakes on the long-awaited extension of the Suncoast Parkway north into Citrus County." On Dec. 15, the Friends of Etna Turpentine Camp, Inc., "filed a lawsuit against the U.S. Fish and Wildlife Service over documents it says the agency has failed to provide to the public." Construction was set to start early next year.

Rare Bighorn Hunt Lets Armed Civilians Onto Bombing Range.

The AP (12/22, Brean) reports that an "exclusive" hunt is "now under way at the Nevada Test and Training Range, where 15 hunting tags have been issued in three mountain ranges normally off-limits to the public." According to Maj. Christina Sukach, a public affairs officer at Nellis Air Force Base, "the bombing range has been opening its gates to hunters a few weeks a year for decades under an arrangement that dates back to the 1950s at least." The article notes that "the test and training range includes about 846,000 acres of the neighboring Desert National Wildlife Refuge, and though that land is closed to the public, it is co-managed by both the Air Force and the U.S. Fish and Wildlife Service."

World's Oldest Albatross Returns To Midway Atoll, Lays Egg.

Maui (HI) Now (12/21) reports the world's oldest known breeding bird has laid an egg on Midway Atoll. Sixty-seven-years-old Wisdom "flies thousands of miles each year to return to Midway Atoll in Papahanaumokuakea Marine National Monument, along with millions of other albatross, to nest and raise their young." US Fish and Wildlife Service Refuge staff "spotted Wisdom and her mate, Akeakamai, near their nest in late November, and on December 13 staff confirmed that Akeakamai was on the nest incubating an egg."

EPA Might Let Bee-Killing Pesticide Be Sprayed On 165M Acres Of Farmland.

Newsweek (12/21, Guarnieri) reports that the Environmentmental Protection Agency "might allow the spraying of a bee-killing pesticide, thiamethoxam, on more than 165 million acres of farmland." Syngenta "submitted a proposal to the federal agency last Friday to increase the use of the pesticides across the country, according to the nonprofit Center for Biological Diversity." The article notes that "the proposal comes on the heels of a University of San Diego California study published Wednesday that found neonicotinoids and pesticides from intensive agriculture are 50 percent more harmful to bees than scientists previously thought."

National Park Service

Park Service Upgrade Could Gin Up 1,100 NM Jobs.

The Taos (NM) News (12/21, Krasnow) reports that work to repair and maintain assets of the National Park Service "has the potential to create 110,000 jobs around the country," according to a new report by the Cadmus Group for the Pew Charitable Trusts. Pew said, "As the NPS begins its second century, it is grappling with $11.3 billion in deferred maintenance at the more than 400 sites it manages. Roads are crumbling, trails are blocked, buildings are deteriorating, and water and sewer pipes are leaking. Years of inconsistent congressional funding have made it difficult for NPS to make all of the needed repairs, which means the agency has had to postpone less critical maintenance."

Civitan Park Gets Federal Grant For Splash Pad.

MuskogeeNOW (OK) (12/21, Wright) reports that Rep. Avery Frix announced Thursday "that the Muskogee Parks and Recreation Department has been conditionally approved for a National Park Service grant of $237,608 to build a splash pad at Citivan Park in Muskogee." The money come from the Land and Water Conservation Fund.

Drakes Estero Diver Sues Park Contractors.

The Point Reyes (CA) Light (12/21, Guth) reports that "Matt Zugsberger, a diver employed last year to help pull the remains of Drakes Bay Oyster Company from Drakes Estero, has filed a lawsuit in district court against the two companies hired by the National Park Service to complete the $4 million job." Zugsberger claims "that the companies T.L. Peterson and Galindo Construction defrauded the park service by disposing of toxic waste pulled from the estero at unauthorized sites." He also alleges "negligence on the job site resulting in his personal injury and claims he was wrongfully terminated after voicing his concerns."

Conservancy Gets $50,000 For Land Near Bear Den Overlook.

The McDowell (NC) News (12/21) reports that the Cannon Foundation "awarded a $50,000 grant to Foothills Conservancy of North Carolina on Monday to help the land trust transfer a 208-acre property adjoining the Blue Ridge Parkway at the Bear Den Overlook into public ownership." The conservancy has "until September 2018 to pay off the loan used to purchase the property." According to the article, "once the loan is paid off, Foothills Conservancy will donate the property to the National Park Service for addition to the Blue Ridge Parkway system."

Gillibrand: Add Rochester Cemetery To National Register Of Historic Places.

The Auburn (NY) Citizen (12/21, Harding) reports that Sen. Kirsten Gillibrand supports adding Mount Hope Cemetery to the National Register of Historic Places. The article notes that "among those who are buried in the cemetery are Susan B. Anthony, a prominent women's rights activist, and abolitionist Frederick Douglass." In a letter to the National Park Service, Gillibrand wrote, "Placing this site on the National Register would bring much-deserved recognition of its important historical and regional role."

Fort Lauderdale African-American Cemetery Added To Historic Register.

The South Florida Sun Sentinel (12/21, Sweeney) reports that Woodlawn Cemetery, "the only remaining segregation-era African-American cemetery in Fort Lauderdale," has been added to the National Register of Historic Places.

Remains Found At Grand Canyon Thought To Be California Hiker.

The AP (12/21) reports that "Grand Canyon National Park rangers say remains have been found that are believed to be those of a California hiker who went missing in June." The National Park Service "announced Thursday that people on a private river rafting trip discovered remains while on a day hike." According to the article, "rangers found evidence indicating the remains are those of 72-year-old Raafat 'Ralph' Amin Nasser-Eddin of Los Angeles."

Office Of Insular Affairs

Interior Provides $3M Compact Grant To Palau.

The Saipan (MNP) Tribune (12/22) reports that Interior Assistant Secretary for Insular Areas Doug Domenech has "advanced a partial Compact grant payment of $2.5 million to the Republic of Palau and an additional $500,000 grant to conduct the FY 2017 Single Audit." Domenech said, "As long as we continue to operate under a continuing resolution, we can only make a partial payment to Palau, however we are hopeful that Congress will soon finalize a budget for FY2018 and also act to appropriate full funding for the Palau Compact Agreement we signed with Palau in 2010. The time has come for Congress to finalize the Compact agreement that embodies our unique and special relationship with Palau."

Saipan: The Island Where Chinese Mothers Deliver American Babies.

The Wall Street Journal (12/21, Emont) reports the number of Chinese citizens traveling to give birth on the island of Saipan, the only US soil Chinese can visit without a visa, is climbing. The Journal writes the phenomenon of "birth tourism" on the island is growing, and US authorities are pursuing individuals who take advantage of such tourists by exploiting them, and those tourists who overstay their visit.

Here Are The 7 Small Nations That Sided With U.S. And Israel On U.N.'s Jerusalem Vote.

USA Today (12/21, Durando, Dorell) reports that "the seven countries that sided Thursday with the United States and Israel on a U.N. General Assembly resolution declaring 'null and void' President Trump's recognition of Jerusalem as Israel's capital are all small and obscure as world players" are Guatemala, Honduras, Marshall Islands, Micronesia, Nauru, Palau, and Togo.

National Park In St. John Is Now 'All Open,' NPS Says.

The Virgin Islands Consortium (VIR) (12/19) reports that the Virgin Islands National Park has "declared all roads, trails and beaches open at the park in St. John, 105 days after Hurricane Irma ravaged the island of St. John, the National Park Service announced Wednesday." Interior Secretary Ryan Zinke said, "Virgin Islands National Park is home to some of the most beautiful beaches in America and is a major economic contributor to the Island's economy, which is why it

will be an important part of rebuilding after this devastating hurricane season. We are very excited to declare the park open for business, just in time for the holidays when many tourists visit the Islands."

Also reporting is CNN (12/21, Hetter).

Final Version Of US Tax Bill Excludes Credit For American Samoa.

The Seafood Source (12/20, Bittenbender) reports that the U.S. tax reform bill will "not include an extension of an economic development credit for American Samoa." However, U.S. Delegate Aumua Amata "said she's hopeful the program, which StarKist's chief executive officer has called critical to the company's operations in the South Pacific territory, will be taken up next year." Amata said in a statement, "We're also encouraged with the prospects of further consideration in 2018 of the American Samoa Economic Development Credit specifically, along with a series of similar tax extender requests from other territories and around the country. We look forward to continuing to work with Governor Lolo Matalasi Moliga on this ongoing effort to strengthen our economy."

Office Of Surface Mining

Surface-Mining Health Study That Trump Halted Could Be Finished With Other Funding.

The Lexington (KY) Herald-Leader (12/21, Estep) reports that "a national science panel might use donations to finish a study that the Trump Administration halted on whether people face greater health risks from living near surface coal mines in Central Appalachia." The National Academies of Sciences, Engineering, and Medicine "said in a news release Thursday that private donors have expressed interest in financing the completion of the study." The release said, "Given how important this study is to the citizens and communities surrounding these surface mining sites in Appalachia, the National Academies believe the study should be completed and are exploring options to do so."

Additional coverage was provided by WFPL-FM Louisville, KY (12/22, Young).

US Geological Survey

'Worst-case Scenario': Deadly Snake Fungus Threatens Species Across The World.

USA Today (12/21, Hafner) reports that "a deadly fungus that forms fast-spreading lesions across a snake's body can be found in 23 species in the United States and poses a global threat for the reptiles." A new study published Wednesday in the journal Science Advances "warns of the fungus known as Ophidiomyces ophidiodiicola." Microbiologist Jeffrey Lorch, a co-author of the study at the U.S. Geological Survey National Wildlife Health Center, said, "These diseases have had such great impacts because they affect multiple species, and it now looks like the same is true of snake fungal disease."

3 Small Earthquakes Recorded In Central Oklahoma By USGS.

The AP (12/21) reports that the US Geological Survey recorded three earthquakes in Oklahoma Wednesday night into Thursday morning. The earthquakes' magnitudes measured 3.4, 3.0, and 2.3. The earthquakes did not cause any reported injuries or damages. Numerous Oklahoma earthquakes in recent years "have been linked to underground wastewater injection from oil and gas production."

Opinion Pieces

National Monuments Continue To Be At Risk From Trump.

In an editorial, the Santa Rosa (CA) Press Democrat (12/21) criticizes the Trump Administration's move to reduce the size of national monuments. The paper acknowledges both sides of the issue, but argues that "in this deeply partisan era, Americans may not be ready to reach consensus. If so, lawmakers should err on the side of preservation." But "in the meantime," the editorial says that "allowing public lands to bounce back and forth between protection and active extraction based on who lives in the White House serves no one."

Editorial: Public Comments On Grizzlies' Return Ignored.

In an editorial, the Everett (WA) Herald (12/21) criticizes the Trump Administration for ignoring public comments on "a proposal to reintroduce small numbers of grizzly bears into the North Cascades National Park" after the decision by the Interior Department "to shut down a North Cascades National Park committee's review of an environmental impact statement for four scenarios that sought to slowly restore a small self-sustaining population of grizzly bears to the North Cascades." The paper argues that "shutting down the review of the proposal before comments and testimony have received full consideration favors neither supporters nor critics and demonstrates no respect for bears, people or democratic government."

It's Long Past Time To Drill For Oil And Gas In The Arctic National Wildlife Refuge.

In an op-ed for the Daily Caller (12/22, Brower, Jr.), Harry K. Brower, Jr., mayor of the North Slope Borough of Alaska, supports oil and gas exploration in the Arctic National Wildlife Refuge. Brower also notes that "the majority of local, tribal and regional leadership" in the North Slope Borough, as well as "the majority of residents from the Village of Kaktovik – the only people living within the 1002 coastal plain of ANWR – support oil and gas development there." Simply put, "the people who stand to be most impacted by development at ANWR widely support drilling in the refuge."

Top National News

Lawmakers Avert Government Shutdown, Put Off Key Issues Till January.

Congress on Thursday approved a stopgap spending bill to avert a partial government shutdown and keep the government operating at current funding levels until Jan. 19. The tone of the coverage is somewhat negative, highlighting that while lawmakers were able to avoid a shutdown, in their eagerness to begin the holiday recess, they left a number of issues unresolved and will have to address them when they return in January.

The Hill (12/21, Marcos, Zanona) reports that hours before the House vote, President Trump "urged House Republicans to get on board and pass the stopgap bill to avoid distracting from tax reform." Trump tweeted, "House Democrats want a SHUTDOWN for the holidays in order to distract from the very popular, just passed, Tax Cuts. House Republicans, don't let this happen. Pass the C.R. TODAY and keep our Government OPEN!" The Washington Examiner (12/21, Ferrechio) says that while House Minority Leader Pelosi "led a majority of House Democrats to vote against the bill," in the Senate "Democrats would have faced blame for a partial government shutdown because they are needed to pass legislation in the upper chamber."

Reuters (12/21) describes lawmakers as "eager to begin a holiday recess until Jan. 3," and says both chambers "scurried to pass the hastily written bill." Lester Holt said on NBC Nightly News (12/21, story 5, 2:10, Holt) that the measure "leaves a lot of unfinished business hanging until the new year." Mary Bruce said on ABC World News Tonight (12/21, story 5, 0:35, Muir) lawmakers "punt[ed], essentially, on many tricky political debates until after the new year." The CBS Evening News (12/21, story 2, 0:15, Glor) also reported briefly on the stop gap

measure.

The AP (12/22, Taylor) reports that lawmakers did "the bare minimum in a sprint toward the holidays and punt[ed] disputes on immigration, health care and the budget to next year." When lawmakers return, they will face "enormous challenges on immigration, the federal budget, health care and national security along with legislation to increase the government's authority to borrow money," each of which "is sure to test the unity that Republicans are enjoying now."

Likewise, the New York Times (12/21, Kaplan) says that although the stopgap bill "saves Republicans from what would have been a colossal embarrassment just after they celebrated passage of the biggest tax rewrite in decades," the "lack of a resolution to several pressing issues leaves lawmakers facing a tough task when they return after the holidays, with the possibility of a high-stakes showdown when the next government funding deadline approaches." The Wall Street Journal (12/21, Peterson) also raises the specter of an unpleasant showdown in January.

USA Today (12/21, Collins) says the bill "provides $2.85 billion in funding for the popular Children's Health Insurance Program, or CHIP, through the end of March." Bloomberg News (12/21, Edgerton, Litvan) reports that the stopgap measure also includes "a waiver of a budget rule that would trigger automatic cuts to Medicare and dozens of other federal programs because of the deficit impact of the tax overhaul passed this week. The waiver would clear the way for Trump to sign the tax legislation before the end of the year rather than waiting until January."

A Roll Call (12/21, McPherson) story posted after the House vote but before the Senate vote said the measure "reauthorizes Section 702 of the Foreign Intelligence Surveillance Act through the same date." The New York Post (12/21, Schultz, Jaeger) says in a story between the two chambers' votes that the measure "includes $673.5 million to fix the USS McCain and Fitzgerald, which both crashed in the Pacific over the summer due to crew errors, and $884 million for ballistic-missile defenses seen as integral in the face of a nuclear North Korea's recent saber-rattling." In addition, it "provides $2.1 billion in mandatory funding for veterans health services."

However, the Los Angeles Times (12/21, Mascaro) reports that lawmakers "left undone a long list of priorities that members of both parties had hoped to finish this year." The measure passed the House 231 to 188, and the Senate "quickly followed, voting 66 to 32." Among the matters left unresolved is "protection for the Dreamers, who face the threat of deportation starting in March because of President Trump's decision to end the Obama-era Deferred Action for Childhood Arrivals program, or DACA, which allowed them to stay and work in the U.S." A Breitbart (12/21, Binder) story passed after the House vote but before the Senate vote said that "a DACA amnesty plan is likely to be pushed by the Republican establishment and Democrats to be slipped into an omnibus spending bill" in January.

Politico (12/20, Bade, Bresnahan) says the Congressional Hispanic Caucus met with Senate Minority Leader Schumer on Thursday afternoon, pressing him to persuade Democrats "to reject the funding bill," but, "it was clear after the meeting that there would not be enough Democratic senators to block the bill later Thursday over immigration." The Washington Post (12/21, O'Keefe) says members of the caucus "walked off the House floor Thursday afternoon and headed across the U.S. Capitol to Schumer's office suite" for a meeting "several participants" described as "a tense and heated exchange." The Washington Times (12/21, Dinan) describes Congress as "brushing aside demands of illegal immigrant Dreamers," and says Democrats "weren't willing to risk a shutdown for the Dreamers, and enough of them joined Republicans in the Senate to overcome the filibuster threshold, ensuring the bill would pass."

Also left unresolved, the Washington Post (12/21, Debonis, Werner) reports, was the issue of "federal aid for victims of recent hurricanes and wildfires." While the House "passed a separate $81 billion disaster relief bill," the Senate "did not immediately take it up amid Democratic objections."

The Washington Post (12/21, A1, Debonis, Werner) reports that "some frustrations lingered" among House Republicans. As many "burst into applause after passing the short-term spending measure," Rep. Thomas Rooney of Florida, who has sought aid for hurricane-impacted citrus growers, said, "That we're clapping for a three-week CR just basically shows we can't do appropriations, we can't take care of our constituents back home, we just have to punt for three more weeks so we can leave for Christmas. ... For some reason, that justifies applause. I don't get it. I don't get this place." Also unhappy were "advocates of increased military spending," who "fumed after House GOP leaders abandoned a plan to attach a defense bill directing more than $600 billion to warfighters through September."

Officials Tout Tax Bill Trump Is Expected To Sign Friday.

The Hill (12/21, Fabian) cites a "White House official" who said President Trump will likely sign the Republican tax bill on Friday. Said the official, "There's a very good chance the president

signs it tomorrow."

During a year-end briefing called by the White House "to highlight President Trump's accomplishments," a "senior administration official" on Thursday "congratulated reporters on receiving tax cuts," the Washington Examiner (12/21, Nelson) reports. After "giving a rundown of 2017 happenings and describing future ambitions," the official said, "I hope you like your tax cut or bonus." The Examiner adds that officials "declined to make their rosy reflections on the record, but stressed the passage of 81 pieces of legislation crowned by this week's tax cut bill, which also repeals Obamacare's individual mandate and opens an Alaska wildlife refuge to oil drilling."

Counselor to the President Kellyanne Conway said on Fox News' Fox & Friends (12/21), "I think there are so many men and women in this country who are going to now start a small business, who are going to say 'I like what I see.' The regulations are fewer. The tax code is simpler. The tax cuts are more robust. ... I bet all those entrepreneurs out there, those moms and pops, those moms and dads who have been waiting for a President who is a leader to give them more of their hard-earned money, are going to go ahead and start more businesses." Also on Fox News' Fox & Friends (12/21), Ivanka Trump said, "I'm really looking forward to doing a lot of traveling April when people realize the effect that this has both on the processes of filling out of their taxes, the vast majority will be doing so on a single postcard. But also, having experienced the relief that will be starting as early as February. So then it will be a real privilege to show not only what the companies are doing, but the personal impact that it is going to have to so many people across this country."

Sen. Chris Van Hollen took a different view of the legislation on MSNBC's Morning Joe (12/21), arguing, "The reality is what Republicans promised repeatedly with respect to their latest version of trickle-down, is that workers would get a $4,000 pay increase, permanent pay increase. So over a 10-year period, that would be $40,000. We're going to be asking every six months whether people got their $4,000 annual raise throughout this period. It's not coming."

UNGA Votes 128-9 To Condemn US Over Jerusalem.

On Thursday, the United Nations General Assembly voted 128-9 in favor of a resolution to condemn the US position on Jerusalem. Media coverage cast the outcome as an overwhelming rebuke of President Trump's decision to recognize Jerusalem as Israel's capital, and to move the US embassy there. It also focused heavily on Ambassador Haley's threats to cut aid to countries that voted against the US.

The Washington Post (12/21, Morello, Eglash) describes the outcome as "a pointed rebuke not only to President Trump but also to a U.S. pressure campaign to sway votes by threatening to cut funding." The Post notes 35 nations abstained from the vote, and only the US, Israel, and seven other nations – none of which "are powerhouses" – voted against it. Another 21 countries, including Australia, Canada, Mexico, Poland, and the Philippines, did not cast votes, reports Reuters (12/21), which suggests that Trump's threat to withhold funding "appeared to have some impact, with more countries abstaining and rejecting the resolution than usually associated with Palestinian-related resolutions."

ABC World News Tonight (12/21, story 8, 0:40, Muir) reported that prior to the US being "denounced by most nations in the world," Ambassador Haley warned that "this vote will make a difference on how Americans look at the UN and on how we look at countries who disrespect us in the UN, and this vote will be remembered." Correspondent David Muir said despite Haley's "words, the vote to condemn, overwhelmingly approved, including by nearly every major US ally, and Russia, as well. The resolution is nonbinding, and Haley said it will make no difference in US policy." USA Today (12/21, Dorell) quotes Haley as stating that "'no vote in the United Nations will make any difference' on the U.S. decision to move its embassy to Jerusalem, which will go ahead because 'it is the right thing to do.'"

The Washington Times (12/21, Taylor) reports Haley emphasized "that the resolution was a sign of 'disrespect' for the U.S. and Israel." Politico (12/21, Nelson) reports that she "admonished the world body for its historical criticism of Israel," and "reiterated the Trump administration's defense of its decision: that the move was little more than a recognition of the reality that Jerusalem is Israel's capital and that the U.S. had not taken a side in any final-status issues, including on the borders of Jerusalem itself." Haley again "warned that U.S. financial support was not guaranteed," stressing that because of its "generous contributions" to the UN, the US has "a legitimate expectation that our goodwill is recognized and respected." The Wall Street Journal (12/21, Fassihi) says during the debate and in her address to the General Assembly, Haley was visibly angry.

The CBS Evening News (12/21, story 3, 2:20, Glor) reported that the State Department

"said after the lopsided vote against the United States, the threat to cut off future funding is real and that nations that cross the Trump Administration will now receive extra scrutiny. Judging by this vote, however, it appears many of those countries came to the conclusion Mr. Trump's threat is more bluff than bite." According to the AP (12/21, Lederer), "within hours" of the vote, the Administration "appeared to be backing away from its funding threats," with State Department spokeswoman Heather Nauert saying cuts to those nations that voted against the US are not a foregone conclusion. She said Trump's "foreign policy team has been empowered to explore various options going forward with other nations," but added that "no decisions have been made." NBC Nightly News (12/21, story 2, 2:15, Holt) maintained that the State Department was "trying to spin the vote and this rebuke as a victory because the tally could have been worse."

Meanwhile, the New York Times (12/21, Gladstone) reports, Palestinian foreign minister Riad Malki accused the US of "ignoring the dangerous repercussions of its decision." An "equally defiant" Israeli Prime Minister Benjamin Netanyahu asserted that "Jerusalem is the capital of Israel, whether the U.N. recognizes it or not." The Times says the vote "deepened Mr. Trump's isolation over the issue, threatened to alienate Arab allies of the United States and may have further complicated prospects for a two-state solution to the Israeli-Palestinian conflict." It also "reflected resentment towards threats" by Trump and Haley about US funding, and constituted "a setback for a president who is still looking for a major foreign achievement after nearly a year on the job."

Portman: Threat To Withhold US Aid Was "Totally Appropriate." Sen. Rob Portman was asked on CNN's The Lead (12/21) about the Administration's threat to nations who didn't vote with the US in the UN. Portman said, "I think the people I represent who are paying those dues to the UN – and again about one-third of the peacekeeping is paid for by our taxpayers – I think, you know, they deserve to have a representation in the UN which is Nikki Haley that stands up for us. I think it's totally appropriate. I think it should be an aggregation of all positions, in other words, not just this one position, you've got to look at our alliances around the world to determine who's helping us and who's not. And that should be one of the factors that's considered."

US, South Korean Troops Have Practiced Infiltrating North Korea To Seize WMDs.

Fox News' Special Report (12/21) reported US and South Korean troops have held exercises "practicing ways to infiltrate into North Korea and seize weapons of mass destruction." Fox said the exercises indicate that Kim Jong-un's regime "might be the target of more aggressive planning by the US."

The Telegraph (UK) (12/20, Riley-Smith) says the White House "has 'dramatically' stepped up preparation for a military solution in recent months amid fears diplomacy is not working," according to "well-placed sources." The Telegraph described some options the White House is considering, including "destroying a launch site before it is used by the regime for a new missile test" or targeting "stockpiles of weapons."

Another North Korean Soldier Defects To South Korea. Brian Todd reported on CNN's Situation Room (12/21) that a North Korean soldier in his teens or early 20s defected to South Korea in a "harrowing" escape that involved North Korean troops shooting "to kill" the defector as South Korean troops fired "warning shots" to "fend[] off" those North Koreans. The defection is the fourth this year and the second in the last five weeks. Fox News' Special Report (12/21) showed Mark Fitzpatrick of the International Center for Strategic Studies saying that "there have never been this many defections in any year from North Korea," at least "not in recent memory. It may indicate that there is a real desperation in the North Korean army."

Security Council To Vote On New North Korea Sanctions Resolution. Reuters (12/21, Nichols) reports the UN Security Council will vote Friday "on a US-drafted resolution that seeks to toughen sanctions on North Korea in response to its latest intercontinental ballistic missile launch," according to diplomats. Reuters says the draft resolution "was circulated to the 15-member council on Thursday," and that, also according to diplomats, "The United States has been negotiating with China on the draft resolution for the past week."

Editorial Wrap-Up

New York Times.

"The Trump Administration To Restaurants: Take The Tips!" The New York Times (12/21) editorializes that a rule recently proposed by the Department of Labor that would allow "allowing

employers to pool tips and use them as they see fit as long as all of their workers are paid at least the minimum wage" could hurt bartenders and waiters, since the rule could enable business owners to pocket the tips or spend it on things like building improvements. The Times theorizes that "diners who are no longer certain that their tips will end up in the hands of the server they intended to reward might leave no tip whatsoever" or "seek to covertly slip cash to their server." The Times concludes by opining that the rule could be perceived by restaurant employees, many of whom thought President Trump would fight for their interests, as a giveaway of money that they've earned.

"Forget The Strategy Paper. Watch What He Does." The New York Times (12/21) editorializes that the National Security Strategy report introduced by President Trump on Monday "is so at odds with the way Mr. Trump has been conducting national security policy that it is likely to confuse people even more than they already are, or more likely, to be ignored altogether." The Times asserts that there are contradictions between the contents of the report, "which in some respects reflects mainstream thinking," and "Trump's tweets, statements and actions that present the unpredictable public face of his policies." The Times singles out the subject of Russia, which is accused of "using information tools in an attempt to undermine the legitimacy of democracies" in the report even as Trump is silent on punishment for these alleged acts.

Washington Post.

"17 Good Things That Happened In 2017." In an editorial, the Washington Post (12/21) says, "Many of us found 2017 to be a stressful year, but the news wasn't all bad. In the spirit of the season, we decided to salute 17 good things that happened in 2017." For example, the Post says, "Both the world and U.S. economies continued to grow, continuing one of the most sustained economic expansions ever in the wake of the 2008 financial crash." Another item on the Post's list: "Roy Moore, Republican candidate in the hyper-Republican state of Alabama, lost a special election for the US Senate."

"The Public Has A Right To Know How Much The Tax Bill Benefits Trump." The Washington Post (12/21) argues in an editorial that the American public "has a right to know" how "the president would benefit personally" from the tax Republican bill. The Post says Trump "is the first president in 40 years to hide his returns," adding that he apparently "believes the fallout from the information contained in the returns would be worse than the criticism he receives for withholding them."

Wall Street Journal.

"The Corporate Tax Cut Dividend." A Wall Street Journal (12/21, Board) editorial says Democrats' strategy for 2018 is to run against the Republican tax bill based on its low poll numbers. Democrats, the Journal adds, are hoping the tax cuts will not succeed and workers will not be helped.

"Heritage At True North." The Wall Street Journal (12/21) editorializes that Kay James, the new president of the Heritage Foundation, knows how to develop and lead the think tank on a unifying course into the future. The Journal opines that when it chose James, Heritage remembered its roots as a collection of conservative scholars who set out to inform debates on conservative policy with factually rigorous studies. The publication envisions volatility within the conservative movement in the months to come, but is confident in the choice of James.

"Trump's Present For Putin." The Wall Street Journal (12/21) editorializes that the Trump Administration's approval of the sale of weapons to Ukrainians fighting to stop Moscow-backed separatists in their country is a needed reversal of the polices of the Obama Administration, which did not sell the Ukrainians lethal weapons. The Journal encourages the Administration to sell the Ukrainians more powerful weapons like anti-aircraft and antitank missiles because of Russia's military advantages in those areas. The publication opines that Vladimir Putin will respond more to strong pushback in Ukraine than any rhetoric from President Trump about the US wanting good relations with Russia.

Interior Aims To Speed Oil And Gas Permitting On Public Lands With 30-Day Reviews.

The Washington Post (7/6, Grandoni, Eilperin) reports that as part of the Administration efforts "to loosen restrictions on the fossil fuel industry," Interior Secretary Zinke "issued an order on Thursday designed to speed up the permitting process for drilling." The goal is for the Bureau of Land Management to process applications within 30 days. Zinke said in a statement, "As is outlined in this order, we will look at ways to improve the process and make sure regulations serve their intended purpose rather than create a mountain of useless paperwork." However, it isn't clear that the move will increase domestic energy production. Not only does "the vast majority of onshore oil and gas production" occur on private and state land, but companies aren't producing on leases they already hold. According to the Wilderness Society, only "12.7 million acres of public land of the 27 million acres currently under lease were in production during fiscal 2016." The AP (7/6, Gruver) reports the Interior Department found that the average wait for oil and gas companies is 257 days, while backlogs in Wyoming and Utah have topped 500. Zinke promised that the National Environmental Policy Act would still be upheld, but that some regulations restrict energy development that could be made more environmentally friendly. Zinke said, "We're going to be a fair and prudent partner, but we're not going to be an adversary to creating wealth and opportunity on some of our public lands." The Washington Examiner (7/6, Siciliano) reports the Interior Department recorded a total of 2,802 applications for drilling permits that still await action.

Reuters (7/6, Volcovici) reports Zinke said, "I'm directing the BLM to conduct quarterly lease sales and address these permitting issues. ... We are also looking at opportunities to bring support to our front line offices who are facing the brunt of this workload." The Independent Petroleum Association of America applauded the move, as government relations head Dan Naatz said, "Reinstating quarterly lease sales is vital as independent producers consider future American energy opportunities on federal lands." However, Chris Saeger, executive director of the Western Values Project, said, "With historically low gas prices, these companies aren't using millions of acres of leases they already have, so there's no reason to hand over even more." The Hill (7/6, Cama) reports Zinke said, "Our intent is to strengthen our regulatory environment by streamlining, by providing stability where it's not arbitrary and simplifying it. So if a company wants to operate commercially on federal land, then I think that return on investment should be known within a short period." The Washington Times (7/6, Wolfgang) reports the Interior Secretary indicated the order will help shore up environmental protections. He said, "It's better to

produce energy here under reasonable regulations than to watch it be produced overseas with no regulation. ... We're going to do it right. That means we're going to hold industry accountable. We're looking at how to make rules and regulations, strengthening those rules and regulations by simplifying, providing stability, and streamlining the process up front so a return on investment decisions can be made quickly." The Huffington Post (7/6, D'angelo) reports the API's Erik Milito said, "A key component of a successful policy is repairing the federal permitting process so that companies have the confidence to invest and see their projects move forward." Randi Spivak, public lands director at the Center for Biological Diversity, said the Trump Administration is "trying to fast-track the climate disaster and destroy America's public lands in the process."

Additoinal coverage was provided by E&E Publishing (7/6), the Salt Lake (UT) Tribune (7/6, Maffly), the Alaska Dispatch News (7/6, Martinson), the Farmington (NM) Daily Times (7/6, Moses), the San Francisco (CA) Chronicle (7/6, Alexander), Philly (PA) (7/6, Bruno), The Street (7/6, Bruno), New Mexico Political Report (7/6, Paskus), Sputnik News (7/6), Law360 (7/6, Phillis), and Inside Climate News (7/6, Gustin).

Coverage by the AP was also picked up by the New York (NY) Times (7/6), the Albuquerque (NM) Journal (7/6, Gruver), the Houston (TX) Chronicle (7/6, Gruver, Press), the Salt Lake (UT) Tribune (7/6, Gruver), U.S. News & World Report (7/6, Gruver), the Elko (NV) Daily Free Press (7/6), the Columbia Basin (WA) Herald (7/6, Gruver), Fox Business (7/6, Gruver), the Olean (NY) Times Herald (7/6, Gruver), the Daily Mail (7/6, Gruver), the Minneapolis (MN) Star Tribune (7/6, Gruver), the Fort Collins (CO) Coloradoan (7/7), Philly (PA) (7/6, Gruver), the Washington (DC) Post (7/6, Mead Gruver |, Ap), and KCNC-TV Denver (CO) Denver (7/6, Gruver).

New Mexico Hopes Order Generates Revenue. The AP (7/6, Bryan) reports officials in New Mexico are hoping Zinke's order will help to boost funding for public education and other government services as the state solidifies its finances. The New Mexico Oil and Gas Association has said that the Bureau of Land Management costs the state and federal governments millions in lost royalties and taxes that are badly needed for education and other public services. Ryan Flynn, the head of the industry group, said the additional revenue could help New Mexico recover from a budget crisis.

Coverage by the AP was also picked up by U.S. News & World Report (7/6, Bryan), the Albuquerque (NM) Journal, the Houston (TX) Chronicle (7/6, Bryan, Press), the Washington (DC) Times (7/6, Bryan), the Fort Wayne (IN) Journal-Gazette (7/6, Bryan), the Elko (NV) Daily Free Press (7/6), the Belleville (IL) News-Democrat (7/6, Bryan), the Dubois (PA) Courier-Express (7/6), the Olean (NY) Times Herald (7/6), and the San Francisco (CA) Chronicle (7/6, Bryan).

Interior's Inbox Fills With Comments On National Monuments Review.

The Las Vegas Review-Journal (7/6, Brean) reports that "more than 1.1 million public comments have poured in so far on the Trump administration's review and possible rollback of national monuments in Nevada and elsewhere." The Interior Department will" accept public input through Monday as part of its review of 22 national monuments created or expanded by presidential decree since Jan. 1, 1996." President Trump has given Interior Secretary Ryan Zinke "until Aug. 24 to recommend possible action to scale back or eliminate any monuments deemed too large or too restrictive to public access or economic development." The article adds that "five marine national monuments in the Atlantic and Pacific oceans are also under review in a separate but related process for which public comment deadline is July 26."

Additional coverage was provided by the Las Cruces (NM) Sun-News (7/6), the Hesperia (CA) Star (7/5, McDonald), and KFOX-TV El Paso, TX (7/6, Purvis).

REI Asks Customers To Challenge Zinke Over Public Lands Review. CNN (7/6, Green) reports that "national outdoor retailer REI is urging its customers to challenge Department of the Interior Secretary Ryan Zinke over proposed plans to review what public lands will continue to receive monument classification and federal funding." In an email campaign sent to customers Thursday, REI "explained to buyers that they are the 'public in public lands' and asked them to 'tell Secretary Ryan Zinke why our public lands need to remain protected now and for future generations.'" The note said, "Our country's public lands define who we are. These are the places where we work, where we play and where we connect to our shared history – and today, some of these places are in jeopardy."

It's Magical Legal Thinking To Say Trump Can't Reverse Obama's National Monuments. In an op-ed for the Los Angeles Times (7/6, Gaziano, Yoo), Todd Gaziano, the executive director of the Pacific Legal Foundation's D.C. Center and its senior fellow in constitutional law, and John Yoo, a law professor at UC Berkeley, argue that "a presidential power to create permanent national monuments flies in the face of the plain text of federal law, the conventional relationship between presidents and Congress and historical understandings of executive power." They assert that

"Trump has the right to reverse the national monuments created by previous presidents without an act of Congress, but by the same token, the Constitution creates a check by allowing future presidents to reverse Trump too." They note that "prior presidents acted unilaterally to create or vastly expand several national monuments." The authors conclude that "it's simply unrealistic to pretend that acts created by unilateral presidential decrees cannot be undone in the same manner."

Connelly: Senators Tell Trump – Hands Off Our Monuments. In his column for the Seattle Post-Intelligencer (7/6, Connelly), Joel Connelly writes that the Trump Administration "should keep hands off our national monuments, the six U.S. senators from Washington, Oregon and California have told U.S. Interior Secretary Ryan Zinke in toughly worded letters." Connelly notes that "Zinke has described himself as a 'Roosevelt conservationist.'" He concludes that "the 'study' of 27 monuments will test whether he walks his talk."

Op-ed: Creation Of Bears Ears National Monument Was A Response To Years Of Grave-Robbing. In an op-ed for the Salt Lake (UT) Tribune (7/6, Coriz), Garon Coriz, a tribal member of Santo Domingo Pueblo, N.M., writes that "the brave locals in support" of the Bears Ears National Monument "have grown quiet due to fear of reprisals in the county, but the tribes and their leaders stand firm." According to Coriz, "the outpouring of nearly unanimous support during the public comment period for Bears Ears National Monument, which ends Monday, shows the tribes don't stand alone." He expects that "moving forward, this saga will likely transition needlessly to the courts as Interior Secretary Ryan Zinke and the Trump administration seek to downsize and rescind national monuments across the country."

Op-ed: Grand Staircase-Escalante National Monument Has Been Good For The Community Of Kanab. In an op-ed for the Salt Lake (UT) Tribune (7/6, Hand), Susan Hand, the co-owner and manager of Willow Canyon Outdoor in Kanab, writes that she has "witnessed positive outcomes for our business, our community and the myriad visitors from around the world that gather here in awe" at the Grand Staircase-Escalante National Monument. She notes that "nationwide, over 90 percent of Americans who've commented at our government's site (www.regulations.gov) wrote to protect our national treasures." She urges readers tot "use the website address above to comment by July 10."

Trump Admin Wants To Cut Spending On Lands, Tribes.

Critics Say It Will Backfire. KUOW-FM Seattle (7/6, Ryan) reports that Interior Secretary Ryan Zinke "went to Congress last month to present a $1.6 billion, or 13 percent, budget cut for the Interior Department." Zinke "said the Interior Department is top-heavy and can carry out its core missions with less money." However, Zinke's predecessor, Sally Jewell, said in an interview, "Coming in and slashing and suggesting that there is a mountain of waste, fraud and abuse you can tap into is nonsense. The cuts that have been proposed would be devastating to the mission of the Department of the Interior."

The Energy 202: The One Issue Where Trump Is Standing Up To Russia.

The Washington Post (7/6) reports that "on Wednesday the Interior Department posted the schedule of its secretary, Ryan Zinke, for May online." The article says that "continuing a pattern that defined his first two months in office, Zinke held several more meetings with oil and gas representatives than with conservation groups, while increasing his overall number of tribal consultations." Zinke also "video-conferenced with representatives from two longtime GOP allies, the National Rifle Association and the National Association of Home Builders." Two conservation groups Zinke "met with in May were the Land Trust Alliance and the Partnership of Rangeland Trust."

15 AGs Urge Court To Uphold Congressional Review Act.

Law360 (7/6, Boysen) reports that "the Republican attorneys general of 15 states piled onto a suit that challenges the constitutionality of a regulation rollback law, the Congressional Review Act, on Wednesday, telling an Alaskan federal court the law is perfectly constitutional and urging it to toss the suit and 'preserve this important procedural tool.'" The suit was brought in April by the environmental nonprofit Center for Biological Diversity against Interior Secretary Ryan Zinke, "after Congress used the CRA to repeal rules."

Politics Cited In Trade Show's Move From Utah To Colorado.

The AP (7/6, Wyatt) reports that the Outdoor Retailer trade show on Thursday "confirmed that it is leaving Utah after 20 years and decamping east to Denver." According to the article,

"organizers who made the announcement Thursday were frank that the reason they chose to move from Salt Lake City to Denver, starting in 2018, was because Colorado is more 'progressive' and has a better 'culture' for the industry." The article notes that "show organizers said in February that they were leaving Utah for a new long-term home because of Republican state leaders' opposition to the new Bears Ears National Monument and other public land policies." Marisa Nicholson, director of the Outdoor Retailer trade show, said, "We chose Denver because of Colorado's long-term commitment to protecting and nurturing public lands."

Additional Coverage: Trump Donates To National Park Service, But Still Cutting Their Budget.

Additional coverage of the funding to preserve battlefields was provided by USA Today (7/6), the Martinsville (VA) Bulletin (7/6, Schemmer), the Newport (TN) Plain Talk (7/6, Schemmer), the Northwest Georgia News (7/6, Schemmer), the Rogersville (TN) Review (7/6, Schemmer), the Salamanca (NY) Press (7/6, Schemmer), the Arkansas Democrat Gazette (7/6), Stars And Stripes (7/6, Toscano), WSLS-TV Roanoke (VA) Roanoke, VA (7/6), WFRV-TV Green Bay (WI) Green Bay, WI (7/5, Stafford), WCAX-TV Burlington (VT) Burlington, VT (7/6), KTXL-TV Sacramento (CA) Sacramento, CA (7/5), KAMR-TV Amarillo (TX) Amarillo, TX (7/5, Stafford), and WJXT-TV Jacksonville (FL) Jacksonville, FL (7/5, Stafford).

Additional Coverage: Medal Of Valor Awarded In Pearl Crash.

Additional coverage that Interior Secretary Ryan Zinke presented Bryan Eisenberg with the Medal of Valor on Tuesday was provided by the Honolulu Star-Advertiser (7/6) and KITV-TV Honolulu (7/5).

Zinke's Public Lands Sell-off Is Undermining The "Frontline".

In an op-ed for the Missoulian (MT) (7/6, Richards), Ryan Richards, a senior policy analyst for the Public Lands team at the Center for American Progress, writes that Interior Secretary Ryan Zinke has "been vocal about his vision for the Department of the Interior, saying that he wants to support 'frontline staff' and 'restore trust' with communities neighboring federal land." However, Richards argues that Zinke's statements in Whitefish as the Western Governors Association met — "presumably geared toward appeasing energy interests — contradict these principles." According to Richards, "Zinke's target was a lesser-known but important policy called mitigation, which compensates for the negative impacts development has on our natural heritage by requiring a set amount of restoration elsewhere."

The Real Value Of Our Public Lands.

In a piece for NMPolitics (NM) (7/6, Jimenez), James Jimenez, executive director of New Mexico Voices for Children, writes that "more and more racial and ethnic minorities are pitching tents" and going camping. A recent survey "showed that of the 1 million U.S. households that went camping for the first time in 2016, nearly 40 percent were either Hispanic (13 percent), African American (12 percent) or Asian American (14 percent)," and "much of this shift is due to millennials, who make up a growing share — now 38 percent — of households that are active campers." But "these gains are in danger." Interior Secretary Ryan Zinke "recently announced that he wants to privatize our national park campsites." Jimenez argues that "there are a lot of problems with this — primarily that prices will very likely be raised." Furthermore, "there is generally much less accountability when private companies run government programs." He claims that "it becomes not only more difficult to determine just how our tax dollars are being spent, but there is also more room for subtle forms of discrimination to take place." Jimenez writes that "by definition privatization means an economic focus on the use of public lands rather than a conservation and equity focus."

Commentary: Ownership Of Land Would Be Better Than Paltry PILT Payouts.

In commentary for the Elko (NV) Daily Free Press (7/5, Mitchell), Thomas Mitchell criticizes the Payment in Lieu of Taxes that Neevada received. This past week in Pahrump Interior Secretary Ryan Zinke "announced at a meeting with various Nevada officials that the PILT largesse this year will be $464.6 million, a 6 percent increase over the previous year," but "for some reason, also neither explained nor questioned, Nevada's share of the booty increased by only 2 percent to $26.18 million, about the same as inflation." Mitchell concludes that "instead of sitting around with tin cups waiting for pitiful PILT handouts, Nevada should demand more control of its land and collect all of those revenues to reduce our tax burden."

Bureau Of Indian Affairs

House Committee Schedules Another Hearing On Land-into-trust Process.

The Nation Sun News (7/6) reports that the House Committee on Natural Resources will "meet next week to look at the Indian Reorganization Act." The article says that "the witness list hasn't been posted online but tribal leaders complained about being left out of a prior hearing regarding a law whose purpose is to restore lands to tribal ownership." According to the article, "with Republicans in control of Congress, and a Republican in the White House, tribes fear their trust lands, resources and sovereignty will be targeted in Washington."

Tribes Close In On Federal Recognition.

The Newport News (VA) Daily Press (7/6, Williams) reports thtat "six Virginia Indian tribes that have petitioned for federal recognition are a few congressional votes away from their goal." The Thomasina E. Jordan Indian Tribes of Virginia Federal Recognition Act of 2017, "the bill that would grant these tribes federal recognition, passed in the House of Representatives on May 17." The Senate Committee on Indian Affairs "must consider the legislation before the full upper house can vote on it."

Appeals Court Reverses Ruling Against BIA.

Bartlesville (OK) Radio (7/6) reports that the Tenth Circuit Court of Appeals has "reversed the 2016 Tulsa court ruling that voided the U.S. government's approval of oil and gas leases and drilling permits on Osage tribal land in Osage County." The court "ordered that the ruling made in March of 2016 against the Interior Department, the Bureau of Indian Affairs, and Chaparral Energy be vacated and dismissed."

Sisseton Cattleman Found Guilty Of Fraud In Pasture Grazing Scheme.

The Forum of Fargo-Moorhead (ND) (7/6, Amundson) reports that "a Sisseton cattleman has been found guilty of mail and wire fraud by a federal jury in Aberdeen for defrauding cattle producers of more than $200,000 in a grazing scheme." Keith Hagen, "and his former wife, Amanda Holy Bull, were indicted in February of 2016." According to the article, "the two leased land from the Bureau of Indian Affairs on the Lake Traverse Reservation in far northeast South Dakota."

Bureau Of Land Management

BLM Seeks Comment On 3D Seismic Project.

The Moab (UT) Times-Independent (7/6) reports that the Bureau of Land Management Moab Field Office is "seeking public comment on an environmental assessment (EA) analyzing the potential impacts of a geophysical exploration project." Dawson Geophysical Company and Rose Petroleum, LLC "propose to conduct a 3-D seismic study on approximately 38,700 acres located about 26 miles northwest of Moab."

Rock Springs BLM Approves The Mining Of 9.2 Million Tons Of Coal.

KCWY-TV Casper, WY (7/6) reports that the BLM Wyoming Rock Springs Field Office has "approved a coal lease modification for Black Butte Coal Company, allowing the mining of approximately 9.2 million tons of coal." Black Butte Coal Company applied for the modification of an existing lease within the existing Black Butte Surface Mine "in order to avoid the bypass of mine-able federally managed coal located in two tracts totaling 450 acres."

Bureau Of Ocean Energy Management

Senators Urge Governor To Join Seismic Testing Opposition.

The Maryland Coast Dispatch (7/6, Soper) reports that "a renewed effort to open vast areas of ocean floor off the mid-Atlantic coast to potentially dangerous seismic air gun testing led to Maryland's elected officials firing off a letter this week to Gov. Larry Hogan asking him to intercede on the state's behalf." Sens. Ben Cardin and Chris Van Hollen "fired off a letter to Hogan urging him to act on behalf of the state to block the proposed seismic air gun testing off

the mid-Atlantic coast or at the very least, urge the federal Bureau of Ocean Energy Management (BOEM) to properly vet the proposal through a statutorily mandated Coastal Zone Management Act (CZMA) consultation."

Progress Florida Joins Thousands Opposing Trump's Plan For Seismic Airgun Testing Off Florida Coast. Florida Politics (7/6, Ammann) reports that Progress Florida is "one of the organizations and leaders opposing a plan to use seismic airgun testing for oil and gas exploration off the state's Atlantic coast." The group "says the procedure threatens marine wildlife and coastal economies as well as Florida's tourism and fishing industries." On Thursday, Progress Florida "joined the Boston-based Environmental Action to deliver more than 7,000 citizen petitions to the National Oceanic and Atmospheric Administration urging the agency to deny permits for seismic airgun surveys in protected areas of the Atlantic Ocean, including along the Florida coastline."

Support Safe Offshore Energy Exploration. In an op-ed for the Tallahassee (FL) Democrat (7/6), Mark Alvarez, a U.S. Army veteran and member of Florida Vets4Energy, is "pleased to see the Executive Order by President Trump to explore offshore resources prioritizing safe U.S. energy development." Alvarez points out "the direct correlation between energy security and our country's national security." Alvarez supports seismic surveying because they can "help reduce the risk of damaging the environment by helping to select the most appropriate locations to consider drilling and eliminate many targets well before drilling would even be considered."

It's Time To Move Forward With Offshore Seismic Surveys. In an op-ed for the Greenville (SC) News (7/6, Alario), Robert Alario, managing member of Alario & Associates LLC, a member of the National Ocean Industries Association, and former chairman and president of the Offshore Marine Service Association, supports seismic surveying. He notes that "it has been more than 30 years since the last surveys were made of the Atlantic seaboard's offshore resources." Alario argues that "if we want to hold onto this position of strength and ensure a secure and affordable supply of energy in the years ahead, and improve the economic options available to our state, we must better understand what resources potentially lie off our coasts." He concludes that "the first, reasonable step to doing so is conducting new seismic surveys of our outer continental shelf."

Additional Coverage. Additional coverage of the Trump Administration's offshore drilling plans was provided by the Daily Intelligencer (NY) (7/6, Levitz), the Sarasota (FL) Herald-Tribune (7/6), the Thibodaux (LA) Daily Comet (7/6, Grandoni), the Charleston (SC) Post and Courier (7/7), and UPI (7/6, Graeber).

Bureau Of Reclamation

Saline Lakes Are Drying Up Across The West – And Putting Birds At Serious Risk.

In an op-ed for the Los Angeles Times (7/6, Yarnold), David Yarnold, president and CEO of the National Audubon Society, writes that "in a new study on the effects of water loss and climate change on birds, the National Audubon Society has found that, of the nine western saline lakes most important to birds, more than half have shriveled by 50% to 95%." Yarnold is optimistic because "sensible solutions are possible." As an example, he notes that the Bureau of Reclamation and "several major municipal water utilities have carried out an innovative conservation program across the Colorado River Basin." Yarnold warns that "the West is facing a new normal, with increasing temperatures, cycles of drought and water levels that are shrinking and fluctuating more than at any time in the last century." he concludes that "this new normal demands a new phase of collaboration and innovation when it comes to water policy."

Fish And Wildlife Service

Native Americans Say Grizzly Bear Decision Violates Religion.

The AP (7/6, Volz) reports that "Native American tribes, clans and leaders from seven states and Canada say the U.S. government's recent decision to lift protections for grizzly bears in the Yellowstone National Park area violates their religious freedom." They are "suing to block the government from removing Yellowstone grizzlies from the endangered and threatened species list, which would allow Montana, Wyoming and Idaho to hold grizzly bear hunts." The Native American plaintiffs claim "that trophy hunting for grizzly bears goes against their religious and spiritual beliefs." The lawsuit "filed June 30 asks a federal judge to rule that the U.S. Fish and Wildlife Service must consider the Native Americans' beliefs and consult adequately with them before removing grizzly protections that have been in place since 1975."

Coverage by the AP was also picked up by the Minneapolis (MN) Star Tribune (7/6, Volz), the Detroit (MI) News (7/6, Volz), the Albuquerque (NM) Journal (7/6, Volz), the Houston (TX) Chronicle (7/6, Volz, Press), Philly (PA) (7/6, Volz), the Washington (DC) Times (7/6, Volz), the Boston (MA) Globe (7/7, Volz), WTOP-FM Washington (DC) Washington (7/6), and WRC-TV Washington (DC) Washington (7/6, Volz).

Why Removing Yellowstone Grizzlies From Endangered Species List Is Wrong. For the "Pundits" blog of The Hill (7/6, Molvar, Contributor), Erik Molvar, a wildlife biologist and works as executive director for Western Watersheds Project, writes that conservation groups are "lining up to fight the recent grizzly delisting decision in court" because they "aren't buying the line that stripping federal protections from grizzly bears has a scientific basis." According to Molvar, "it is certainly good news that grizzly populations around Yellowstone have increased since the 1970s, but there is a long way to go before this bear population is secure and interconnected with other grizzlies." To Molvar, "real recovery would mean connecting grizzlies from Yellowstone to the populations to the north and west, not the current isolated and tenuous bear populations that face a number of new threats to their survival." He asserts that "the bottom line is that the grizzly bear is more likely to continue recovering under the federal authority of the Endangered Species Act than it would be under state management."

Pygmy Rabbit Survivors Monitored After Sageland Fire Rips Through Breeding Facility In Douglas County.

The Spokane (WA) Spokesman-Review (7/6, Landers) reports that "wildlife managers are monitoring 32 endangered pygmy rabbits evacuated from a state-managed breeding facility scorched by a wildfire last week in Douglas County near Quincy." Two of those rabbits have been found by Washington Department of Fish and Wildlife biologists, "who continue to search for survivors of the blaze." They estimate that "approximately 70 other rabbits died the night of June 28 when the Sutherland Canyon wildfire overran the 10-acre Beezley Hills breeding compound operated by WDFW on property purchased by a private landowner to support the species' recovery." The article notes that "partners in the project include the U.S. Fish and Wildlife Service (USFWS) and the Nature Conservancy."

Plague Kills Prairie Dog Colonies At Muleshoe National Wildlife Refuge, Some Areas Closed.

The Lubbock (TX) Avalanche-Journal (7/6, Harris) reports that "an outbreak of plague has killed two colonies of prairie dogs at the Muleshoe National Wildlife Refuge, prompting staff to close some areas to visitors out of caution as the disease poses the potential to impact pets, and less likely, people." Jude Smith, project leader for the refuge, "said Paul's Lake — a popular sight for visitors at the refuge — and access roads to the lake are temporarily closed to the public." According to Smith, "the refuge was home to four prairie dog colonies," and "the disease wiped out almost 100 percent of two colonies."

Refuge Occupier Eric Lee Flores Sentenced To 2 Years Probation, 5 Months Home Detention.

The Oregonian (7/6, Bernstein) reports that on Thursday, a federal judge sentenced Eric Lee Flores "to two years of probation, including five months of home detention, for his role in the January 2016 occupation of the Malheur National Wildlife Refuge." According to the Oregonian, Flores, who "lives on the Tualip Reservation in Washington and has been working for the Tualip natural resources department in its fish hatchery business," was "the second defendant to plead guilty on June 9, 2016, admitting he conspired to impede federal employees from carrying out their work at the federal wildlife sanctuary in Harney County through intimidation, threat or force." Flores told FBI agents that he "brought up to seven guns – including two rifles and handguns – to the refuge and handed them out to other occupiers."

Feds Offers Reward In Poisoning Death Of Protected Red Wolf In NC.

The Charlotte (NC) Observer (7/6, Henderson) reports that the U.S. Fish and Wildlife Service is "offering a $2,500 reward for information on the poisoning death of an endangered red wolf in coastal North Carolina." The wolf was "found dead Jan. 27 in Tyrrell County."

National Park Service

Feds Approve Transmission Line Across The River Near Historic Jamestown.

The Washington Post (7/6, Schneider) reports the US Army Corps of Engineers has granted its final approval for Dominion Energy's proposed Surry-Skiffes Creek transmission line, which has faced opposition from environmentalists and historians that fear the project will mar the view from historic Jamestown. For its part, Dominion Energy says the transmission line is needed to ensure reliability for the Peninsula after environmental regulations force the shutdown of the utility's two coal-burning units in Yorktown. Dominion Energy spokeswoman Bonita Billingsley Harris said of the approval, "We believe the U.S. Army Corps of Engineers has done a diligent and thorough review." The article mentions that Dominion Energy has "agreed to take steps to limit the environmental impact" and to use "a design that uses the fewest towers possible and to paint them in a way that minimizes their appearance."

The Newport News (VA) Daily Press (7/6, Ress) reports Dominion Energy will ask the James City County Board of Supervisors on July 11 to approve a permit to build a switching station connecting the line to the grid. Dominion Energy estimates that it will cost about $180 million to build the line and has agreed to a $91 million environmental mitigation plan.

The Newport News Daily Press article is also carried by the Virginia Gazette (7/6, Ress).

Senator Schumer Pens Letter To National Parks To Clean Up Crookes Point.

Staten Island (NY) Live (7/6, Bascome) reports that Sen. Charles E. Schumer sent a letter Thursday to the National Park Service, "urging it to prioritize cleanup efforts at Crookes Point in Great Kills Park." In the letter addressed to acting National Parks Director Mike Reynolds, Schumer "addressed the significance of this space for Staten Island fishermen and the constant stream of garbage reported and documented in the original article." Schumer wrote, "In light of these reports, I urge you to quickly deploy the appropriate resources to ensure that this beautiful and critically important section of the park continues to be clean and safe to use as soon as possible."

Church Recognized As A Contributor To Underground Railroad.

The AP (7/7) reports that "with a new designation from the National Park Service, Second Baptist Church in New Albany is now in the same category as Harriet Tubman's adulthood home and the Frederick Douglass National Historic Site in Washington, D.C." According to the article, "Second Baptist Church's connection to the Underground Railroad has never been unequivocally proven to include housing escaped freedom seekers, although there is a tunnel located underneath the building." But "what is known is that congregation members reflected the 'benevolent' spirit of the Underground Railroad, said Pam Peters, a board member of the Friends of the Town Clock Church and a local historian who filed Second Baptist Church's Network to Freedom application." The article says that "Second Baptist Church's pastors preached against slavery and prayed over escaped freedom seekers when they appeared in town" and "congregation members also taught black soldiers who were recovering from Civil War injuries in the local hospital." Peters "had to prove to the National Park Service that all those things actually happened before Second Baptist Church could receive its Network to Freedom designation." It took Peters three months.

New River Gorge Bridge To Camp Brookside Area Under Repair.

The AP (7/7) reports that "the bridge that provides the only road access to the Camp Brookside area of New River Gorge National River in West Virginia has been closed for repairs." The National Park Service "says the shutdown began Thursday and is expected to last five weeks."

Traffic Triggers Closures Of Cadillac Mountain Summit Road.

The Bangor (ME) Daily News (7/6, Kong, Ring) reports that Acadia National Park "temporarily closed the road to the Cadillac Mountain summit to incoming vehicles seven different times on Sunday and Monday, underscoring the need for a comprehensive transportation plan at the park, according to a park official." The article says that "because of traffic congestion during the busy July 4 weekend, even a quieter side of the park – the Schoodic section – saw a closure for about 90 minutes on Sunday on the road between the entrance to Schoodic Education and Research Center (SERC) and Schoodic Point, according to a table of official road closures." Ocean Drive, "which provides access to Sand Beach, was closed a little more than 15 minutes on Monday afternoon." John T. Kelly, management assistant at Acadia National Park, "said his feeling is that the closures are 'making our transportation plan all that more pertinent.'"

Saving The Shenandoah Salamander..

The Earth Island Journal (7/6, Hendricks) reports on efforts to protect the Shenandoah salamander, which is only found in Shenandoah National Park. Currently, the National Park Service is in talks with the US Fish and Wildlife Service "about updating the recovery plan for the amphibian." In addition to the recovery plan update, Shenandoah National Park and the US Geological Survey are "creating a long-term management plan for the species." Also, the NPS "recently awarded Shenandoah National Park additional natural resources funding to compile data and create an adaptive management plan for the salamander beginning in fiscal year 2019."

Mammoth Cave National Park Gets New Leadership.

WBKO-TV Bowling Green, KY (7/6) reports that the National Park Service "announced leadership changes Thursday for Mammoth Cave National Park." According to the article, "Sarah Craighead will be the Deputy Regional Director, Southeast Region (based in Atlanta), and Barclay Trimble will be Mammoth Cave's next superintendent."

Jasper's Downtown Listed On National Register.

The Dubois County (IN) Herald (7/6) reports that "Jasper's downtown square, referred to as Jasper's Downtown Historic District," has been listed on the National Register of Historic Places.

Office Of Insular Affairs

Amelia Earhart Mystery: Newly Found Photo Could Prove The Pilot Lived—and Was Captured By The Japanese.

Newsweek (7/5, Glum) reports that flight pioneer Amelia Earhart "vanished in 1937 while trying to fly around the world." Now, "almost exactly 80 years later, there may be a new development in her disappearance." Experts said "they believe a recently uncovered photo from the National Archives shows Earhart and navigator Fred Noonan the same year the aviators went missing, the Today Show reported exclusively on Wednesday." The photo is "labeled 'Jaluit Atoll,' which is the name of an area in the Marshall Islands in the Pacific Ocean, and displays the Japanese ship Koshu as it moves a 38-foot-long item."

Additional coverage was provided by the History Channel (7/5, Pruitt).

Marshalls Works Hard For Slight Improvement On Trafficking Issues.

Marianas Variety (7/6) reports that the Marshall Islands has "worked hard over the past 12 months to improve slightly its poor ranking on fighting human trafficking." According to RNZI correspondent Giff Johnson, "being ranked at the bottom had spurred more activity, like a national plan of action, funding for victim services and awareness raising efforts." However, the latest 2017 Trafficking in Persons Report by the U.S. Department of State "said that while the Marshall Islands had made modest efforts to identify trafficking victims, there were no prosecutions or convictions for trafficking offences in the past year."

The Tax-free Shipping Company That Took Control Of A Country's UN Mission.

Climate Home (UK) (7/6, Gibbs) reports on "how the tiny, climate-threatened Marshall Islands came to be represented at UN shipping talks by a private company based in Virginia, 11,000km away." Thanks to International Registries Inc., the Marshall Islands "boasts the second largest fleet of ships in the world and the world's largest fleet of oil tankers." According to the article, "the shipping industry remains out of step with the rest of the world on climate change."

A Look At The US Defense Capabilities To Handle Threat Of North Korean Missile.

Following reports that "North Korea has launched a two-stage intercontinental ballistic missile," ABC News (7/4, Stracqualursi, Martinez) provides an overview of the "extensive missile defense system designed to help protect against a missile attack from that country."

President Trump, There's One Island That Could Form A Pacific Wall Against Chinese Influence.

In a piece for Townhall (7/6, Vespa), Matt Vespa writes that "in the Pacific, China is spreading dollars, subsidizing building projects across Tonga and the Federated States of Micronesia." Vespa argues that the US should "push back" against "China exerting soft power all over the Pacific." According to Vespa, "the key brick that could form President Trump's Pacific Wall against China rests in Guam."

Office Of Surface Mining

The Abandoned Mine Land Fund Should Not Be Treated As A Slush Fund.

For the "Pundits" blog of The Hill (7/6, Wardle, Contributor), Arthur R. Wardle, a research associate at Strata Policy, writes that "Congress, unions and other special interests have repeatedly attempted to tap into: the Abandoned Mine Land fund's "large reserves for their own benefit." He warns that Congress is "currently attempting to throw funding mean for abandoned mines toward "economic revitalization," which would threaten the fund's reclamation objective." Wardle writes that 'vigilant resistance to these changes is the only thing preventing the AML from turning into a slush fund." He argues that "turning the Abandoned Mine Land fund into a slush fund jeopardizes ongoing reclamation work for short-term political favors."

US Geological Survey

Vaccine Shown To Protect Prairie Dogs From Bacterial Disease.

The AP (7/6) reports that "a vaccine developed in Wisconsin has been shown to protect prairie dogs from plague." According to the article, "researchers reported that prairie dogs that ingested vaccine baits were twice as likely to survive outbreaks of plague as prairie dogs that didn't get the vaccine." The vaccine was "developed at the University of Wisconsin-Madison and the U.S. Geological Survey's National Wildlife Health Center in Madison."

Top National News

In Warsaw, Trump Calls On West To Defeat "Radical Islamic Terrorism."

Coverage of President Trump's visit to Warsaw focuses mainly on his speech, with reports saying that Trump addressed a friendly crowd and focused on the defense of the West against terrorism and what more than one report called a "clash of civilizations." Several reports say that the speech had heavy nationalist overtones, and served as a defense of Trump's travel ban as well as some of his other policies. Moreover, Ken Thomas of the AP (7/6) writes that Trump "didn't hesitate to use his quick visit to Poland to air some pointed grievances, blasting his predecessor, casting doubt on his own spy agencies and unloading on news outlets by name." Trump "repeated his longstanding critique of CNN and singled out NBC News, complaining it was 'equally as bad despite the fact that I made them a fortune with The Apprentice but they forgot that.'"

In its lead story, the CBS Evening News (7/6, lead story, 2:40, Brown) reported that in Poland, Trump "committed to defending countries in the NATO alliance." Trump: "We stand firmly behind Article 5." Trump also "delivered his sharpest criticism of Russia to date." Trump: "We urge Russia to cease its destabilizing activities in Ukraine and elsewhere and its support for hostile regimes including Syria and Iran." ABC World News Tonight (7/6, lead story, 3:25, Muir) reported that Trump delivered "an ominous warning, presenting a clash of civilizations between the West and what he called 'radical Islamic terrorism.'"

The New York Times (7/6, Thrush, Davis) reports that Trump delivered "a stark message to a friendly Polish crowd," casting "the West's battle against 'radical Islamic terrorism' as a way to protect 'our civilization and our way of life.' He portrayed his domestic agenda as an equally serious challenge to powerful, entrenched bureaucracies in the United States and Europe."

The Washington Post (7/6, Phillip, Wagner, Birnbaum) says that Trump delivered "a dark and provocative address with nationalist overtones." Trump asked, "Do we have the confidence in our values to defend them at any cost? Do we have enough respect for our citizens to protect our borders? Do we have the desire and the courage to preserve our civilization in the face of those who would subvert and destroy it?"

The Wall Street Journal (7/6, A1, Nicholas, Troianovski) also says that that the speech had nationalist overtones, and called on the West to recognize the existential threat of terrorism. The Journal says the address was intended to add intellectual heft to Trump's travel ban, border wall, and anti-immigration policies. The Hill (7/6, Shelbourne, Swanson) also says Trump "defended controversial new policies" with the speech. The Los Angeles Times (7/6, Lauter, Bennett) says Trump "had expressed similar ethnocentric ideas during his presidential campaign, but had never before described them at such length." The Times says the speech showed the influence of Stephen Bannon and Steven Miller. The latter "wrote much of the speech."

Reuters (7/6, Rampton, Sobczak) reports that the President "affirmed US commitment to the defense of NATO allies" in a speech "that gently criticized Russia, and said Western civilization must stand up to 'those who would subvert and destroy it.'" Bloomberg News (7/6) says the speech "was meant to challenge to Western nations, to ask whether civilizations are confident enough to protect and preserve what Western nations cherish most," according to an aide speaking on condition of anonymity.

The Wall Street Journal (7/6) praises the speech as one that offered principles and ideas beyond the basics of policy, and one that defended Western civilization against radicalism. Matthew Continetti of the Washington Free Beacon (7/6) calls it "one of the most important speeches of his young presidency." Breitbart (7/6, Klukowski) says that Trump "gave a serious speech about the serious threats facing the West as a whole." But in his Washington Post (7/6) column, Eugene Robinson says that the speech "had nothing useful to say about today's interconnected world in which goods, people and ideas have contempt for borders" and instead showed a "dangerous thirst for a clash of civilizations."

McClatchy (7/6, Bergengruen) reports that while Trump did publicly back the US commitment to NATO mutual defense, "that doesn't erase the damage caused by his initial omission and long-stated hostility to the alliance."

Eric Trump said on Fox News' Fox & Friends (7/6) that the President's visit to Poland is "a beautiful symbol to so many of these countries, which they work hard, they fight hard, they've been great friends, they've been great allies."

Pence Praises Speech. Vice President Pence said on Fox News' Hannity (7/6), "President Donald Trump reaffirmed our nation to be the leader of the free world." By reaffirming NATO, calling on NATO members to live up to their commitments, and call on Russia to stop supporting hostile regimes, Trump offered "an example of bracing, direct and candid leadership that people across this country welcome as president."

WPost Wonders Which Values Trump Wants To Defend. The Washington Post (7/6) asks in an editorial, "Which values is he summoning us to defend? There were encouraging elements in his address suggesting that he was referring to the universal values that America celebrated" on July 4, but "perhaps what gives the most doubt is that he celebrated 'the right to free speech and free expression' without mentioning that the government welcoming him has worked worryingly to narrow those freedoms, along with the independence of its judiciary – and without mentioning that, at home, Mr. Trump himself has been far from a tribune of the free press."

Anne Applebaum similarly writes in her Washington Post (7/6) column that Trump "offered his support to a Polish government that is both the most nationalist in Europe and now the most isolated in Europe. ... The free press is under attack in Poland, along with the independence of the judiciary." Applebaum writes that with his speech, "Trump has confirmed Poland's nationalist government in its isolationist and anti-democratic course."

Poland's Ruling Party Bused In Supporters To Cheer Trump. The AP (7/6, Gera) reports, "Poland's conservative government had reportedly promised the US president enthusiastic crowds in its formal invitation," and Trump was welcomed "by an enthusiastic crowd in Warsaw that chanted his name and waved US and Polish flags." Many in the crowd "said they had come from distant cities and towns in buses organized by the country's populist ruling Law and Justice party."

Deputy Assistant to the President Sebastian Gorka, on Fox News' Fox & Friends (7/6), called Trump's speech "a massive moment," comparing it to "President Reagan's speech in 1982 or the speech in '87." Gorka said the speech indicated how the US "will stand shoulder to shoulder with great nations like Poland in this collective defense alliance that is NATO."

Hosts Seated Trump Near Portrait Of King Who Played Role In Defeating Islamic Invasions. Breitbart (7/6, Lane) reports, "The Polish authorities had a great deal of choice for where to host the symbolic first meeting of President Trump's first European visit," but "they chose to sit President Trump besides a portrait of one of Poland's best-known warrior kings," Jan III Sobieski, who played a key role in "ending centuries of Islamic attacks and invasions reaching the heart of Europe."

Trump Has "Awkward Moment" In Greeting Polish First Lady. The AP (7/6) reports, "In yet another awkward moment," Trump "thought the hand extended by Poland's first lady was for him – and not for his wife, Melania." After shaking hands with the American First Lady, Agata Kornhauser-Duda, shook hands with the President. Becket Adams of the Washington Examiner (7/6) writes, "It doesn't quite appear that Poland's first lady snubbed President Trump on Thursday, but you'd think otherwise based on the US press' sloppy and overeager coverage."

Trump Backs Three Seas Initiative. USA Today (7/6, Korte) reports that Trump "lent his

support to a Polish-led effort to build up the infrastructure of eastern Europe on Thursday, casting the newly emerging Three Seas Initiative as a way to counter Russian dominance in the region." The President did not mention Russia by name, but "the invitation for Trump to attend the summit was evidence enough that the 12-member bloc is looking West for economic ties."

Trump Says "A Lot Of People," Not Just Russia, Could Have Meddled In US Election.

President Trump's criticism of Russia's policies in Ukraine and the Middle East in his Warsaw speech is eclipsed in coverage by his assertion that Russia may not have been solely responsible for meddling in the 2016 US presidential election. The Washington Times (7/6, Boyer) reports that Trump "sharpened the lines of division between Washington and Moscow," criticizing Russian actions in Ukraine and Syria. However, ABC World News Tonight (7/6, story 2, 1:10, Muir) reported, "when he was asked about Russian meddling in our election on the eve of his big meeting" with President Vladimir Putin, Trump replied, "Well, I think it was Russia, and I think it could have been other people and other countries. It could have been a lot of people interfered. ... And I won't be specific, but I think a lot of people interfere. I think it has been happening for a long time."

NBC Nightly News (7/6, story 2, 2:25, Guthrie) similarly reported Trump had "unusually harsh words for Russia, while still stopping just short of accepting the conclusion of this country's intelligence agencies that it was Russia who meddled in last year's presidential election." Jim Acosta said on CNN's Situation Room (7/6) that Trump "offered Putin something of a gift, expressing doubts once again about the US intelligence community's clear assessment that Russia interfered in the election. At the news conference in Warsaw earlier today, the President essentially said the jury is still out when it's really not."

The AP (7/6, Thomas, Superville) reports that "hours before a crucial meeting" with Vladimir Putin, President Trump "stopped short Thursday of condemning Moscow for meddling in the US presidential election – and refused to say if he would raise the issue when the leaders go behind closed doors." Trump criticized Russia's actions in Ukraine and backing for Iran and Syria, but his "critique of Russia did not appear to extend to its actions during last year's presidential campaign." Reuters (7/6, Rampton, Mason) reports that Trump said at his Warsaw news conference, "I think it was Russia, but I think it was probably other people and/or countries, and I see nothing wrong with that statement. Nobody really knows. Nobody really knows for sure."

USA Today (7/6, Korte) reports, "Trump again cast a skeptical eye on intelligence community assessments that Russia interfered" with the election, and the Washington Post (7/6, Phillip) reports, "Trump refused Thursday to say definitively that he believes Russia was responsible" for the interference. Politico (7/6, Crowley) reports that Trump "declined to say clearly that he believes the Kremlin interfered in the 2016 election. 'It could have been [that] a lot of people interfered,' Trump said, contradicting the firm assessment of the US intelligence community." Roll Call (7/6, Bennett) headlines its report "Trump Blames Russia – And Others – For Meddling In US Election."

The Washington Times (7/6, Miller) reports that Trump said President Obama "ignored Russian meddling in the election." He said, "The reason is he thought Hillary was going to win. If he thought I was going to win, he would have done plenty about it. His people said he choked. I don't think he choked." Eric Trump said on Fox News' Fox & Friends (7/6) that Fox News Channel is the only one to talk about "how President Obama did absolutely nothing" when informed of Russian interference in the election.

The Washington Times (7/6, Noble) reports that House Intelligence Committee ranking member Rep. Adam Schiff (D-CA) said Trump is "undermining American interests by casting doubt" on the intelligence community's assessment. Schiff said, "The President's comments today, again casting doubt on whether Russia was behind the blatant interference in our election and suggesting – his own intelligence agencies to the contrary – that nobody really knows, continue to directly undermine US interests."

Rep. Adam Kinzinger (R-IL) said on CNN's Situation Room (7/6) that Trump's comments on Russian interference are "alarming. ... I think part of it is President Trump and there are people that are trying to delegitimize the presidency of Trump because of this issue. It is not to delegitimize the President, but this is about defending the institution of democracy." Kinzinger later said on CNN's Anderson Cooper 360 (7/6), "The Russians feel as if the cold war is back on. They're trying to reestablish the Soviet empire through soft power, through election hackings and hard power like in Ukraine and Syria. And I do think that the reaction needs to be strong."

Former DNI James Clapper said on CNN's Situation Room (7/6) that Trump's decision to cast doubt on Russia's interference gives Putin "reassurance and encourages him to keep doing

what he is doing." When asked if there is any doubt in the intelligence community about Russia's role in the 2016 election, Clapper replied, "Absolutely none. That has been reaffirmed by those who are still in positions of responsibility in the intelligence community."

David Satter of the Hudson Institute writes in the Wall Street Journal (7/6) that Trump should not strive to reset US relations with Russia, not solely because of the election meddling but because the US must not make concessions given the international concerns Trump spoke of in Warsaw.

Democrats Call On Trump To Raise Hacking Issue With Putin. The Washington Post (7/6, Demirjian) reports that congressional Democrats are calling on Trump "to raise the subject of Russian meddling in US elections as they excoriate him for not representing the United States' interests over his own." In a letter to the President, Senate Democratic leaders wrote, "Not raising this [election meddling] matter with President Putin would be a severe dereliction of the duty of the office to which you were elected."

Rep. Mike Quigley (D-IL) said on CNN's Situation Room (7/6), "I think if any American, Democrat or Republican had read what we had read, heard what we had heard, you'd want us to go full throttle" in investigating Russian interference in US elections. He added, "We're going to take our time, follow the facts wherever they take us, we all have a responsibility to do this on a bipartisan basis."

Richard Engel reported on NBC Nightly News (7/6, story 3, 2:15, Guthrie), "For President Trump, meeting President Putin may be a way to thumb his nose at critics to show he's not scared of the multiple investigation into his inner circle's ties to the Kremlin, but for Russians who have tried to stand up to Putin, Trump is being played. ... There are likely to be only six people in the room, according to a US official familiar with the planning: Trump, Putin, Secretary of State Tillerson, the Russian foreign minister, and a few translators."

Rep. Adam Kinzinger (R-IL) said on CNN's Situation Room (7/6), "You have to deal with President Putin as he is. He respects power. He respects strength. He will back down when presented a brick wall that he cannot move past." Former US Ambassador to Russia Michael McFaul said on MSNBC's Morning Joe (7/6) that he expects Trump will "like Putin" when they meet, and they will "bond over things like their common dislike of fake news and the deep state." McFaul "fears" that "Putin is going to try to play to Trump's ego to say, 'you and I need to work together against these enemies, especially those in your country."

NYTimes Analysis: Trump's Statement About "Three Or Four" Intelligence Agencies Misleading. The New York Times (7/6, Rosenberg) writes that Trump said "only 'three or four' of the United States' 17 intelligence agencies had concluded that Russia interfered in the presidential election," but those agencies are the CIA, FBI, ODNI, and NSA. The reason "the views of only those four intelligence agencies, not all 17, were included in the assessment is simple: They were the ones tracking and analyzing the Russian campaign. The rest were doing other work."

NYTimes' Chira: Trump-Putin Meeting "The Ultimate Man-Off." Susan Chira of the New York Times (7/6) calls the upcoming meeting "the ultimate man-off" between "two leaders who have staked their appeal on projecting masculinity. ... Each is almost a cartoonish version of hyper-masculinity." Putin "is frequently photographed shirtless on horseback, shooting tigers or flipping judo opponents," while Trump "takes pains to glower at the camera, boasts about the size of his hands (and not just his hands) and recently tweeted a mock video of himself wrestling CNN. And in a telling irony, the fear is that the American leader so invested in proving he's a real man will not prove to be tough enough."

Three Senators Say Trump Should Not Return Diplomatic Compounds To Russia. The Washington Examiner (7/6, Siegel) reports that Sens. Johnny Isakson, Marco Rubio, and Jeanne Shaheen, all members of the Foreign Relations Committee, sent a letter to Trump on Thursday urging him not to return "diplomatic compounds that the US seized late last year in response to the Kremlin's interference" in the election to Russia. They wrote, "The return of these two facilities to Russia while the Kremlin refuses to address its influence campaign against the United States would embolden President Vladimir Putin and invite a dangerous escalation in the Kremlin's destabilizing actions against democracies worldwide."

Russia Sanctions Bill Hits Bump In House. Politico (7/6, Schor) reports that the "bipartisan congressional attempt to constrain Trump's ability to warm up to Russia is running into new trouble." House Democrats have "objected to speedy consideration" of a fix to the sanctions bill, "opening a new partisan schism as Trump prepares to potentially forge a new, more cooperative relationship with Putin." Two House Democratic aides said the "agreed-upon fix would weaken a key provision in the sanctions bill" that lets Congress block Trump from easing sanctions against Moscow.

Vespa Ridicules Democratic Claims Americans May Have Helped Russia Interfere In 2016 Election. Under the heading "Behold, The Latest Russian Collusion Theory Peddled By Democrats That's Backed Up By Zero Evidence," Matt Vespa – writing at Townhall (7/6) – highlighted a July 5 Politico story titled "Democrats: Did Americans Help Russia Hack The Election?" A segment of the article highlighted by Vespa reads, "Hillary Clinton, Virginia Gov. Terry McAuliffe and Mark Warner, the top Democrat on the Senate Intelligence Committee, have all stoked speculation that American insiders may have helped the Russians orchestrate their wide-ranging hacking and disinformation campaign" during the 2016 presidential race – "including with guidance on which political targets to exploit and what kinds of leaked information would most resonate with swing voters." Dismissing such Democratic speculation, Vespa said "there's zero evidence to back up the tin foil hats being doled by the Left."

NYPost Highlights WTimes Article On Hacked DNC Server. Drawing from a Washington Times report that was covered in yesterday's edition of the White House News Summary, the New York Post (7/6, Schultz) says, "Republicans are seeking answers about the Democratic National Committee hacked computer server and the private firm that had exclusive access to its cyber-security system. So far, only the California-based cyber security company, CrowdStrike, which concluded the hack of embarrassing DNC emails was the work of the Russians, has had access to the server," according to the Times' report. Sen. Lindsey Graham (R-SC) is quoted as telling the Times, "I want to find out from the company [that] did the forensics what their full findings were."

Lynch Denies Offering Assurances To Clinton Camp On Email Investigation. Politico (7/6, Wright) reported that ex-US Attorney General Loretta Lynch on Thursday promised "to cooperate with a Senate Judiciary Committee investigation into whether she assured the Hillary Clinton campaign last year that the FBI probe into Clinton's emails wouldn't go too far. In a statement from her lawyer, Lynch also denied ever making such an assurance to a former Clinton campaign aide, Amanda Renteria – an allegation fueled by a Russian intelligence memo that's credibility has been called into question. 'Ms. Lynch does not know Ms. Renteria, did not discuss the Clinton email investigation with Ms. Renteria, and did not communicate to Ms. Renteria, either in words or in substance, that 'she would not let the FBI investigation into Clinton go too far,'" Lynch attorney Robert Raben wrote in a letter "to the leaders of the Judiciary panel."

Sperry: Document Raises Questions About Lynch's Claim On Clinton Probe. Paul Sperry writes in his New York Post (7/6, Sperry), "When former Attorney General Loretta Lynch testified last year about her decision not to prosecute Hillary Clinton for mishandling classified information, she swore she never talked to 'anyone' on the Clinton campaign. That categorical denial," however, "could come back to haunt her. The Senate Judiciary Committee...recently learned of the existence of a document indicating Lynch assured the political director of Clinton's campaign," Renteria, "she wouldn't let FBI agents 'go too far' in probing the former secretary of state." Sperry says that Senate committee "will press her to explain the discrepancy – along with why she reportedly asked former FBI Director James Comey to leave her office when he confronted her with the document. There are three explanations: Either Lynch lied under oath, or she never in fact talked to Renteria, or her categorical denial was meant to later claim she was merely discussing her role post-election."

Trump Avoids Specifics, Vows Confront North Korean Threat "Very Strongly."

On ABC World News Tonight (7/6, story 3, 2:30, Muir), Martha Raddatz said President Trump issued "a stern warning" on Thursday, making it "clear North Korea will not go unpunished," but NBC Nightly News (7/6, story 2, 2:25, Guthrie) said he is "not specifying what exactly that action might be." Reuters (7/6, Mason, Rampton) reports the President vowed Thursday to confront North Korea "very strongly" following its test this week of an intercontinental ballistic missile and "urged nations to show Pyongyang that there would be consequences for its weapons program." Speaking at a news conference with Polish President Andrzej Duda, Trump said North Korea was "a threat, and we will confront it very strongly." He said the US was considering "severe things" for North Korea, but that he would not draw a "red line."

The Washington Post (7/6, Rauhala) reports Trump warned North Korea could face "some pretty severe" consequences in response to what he called "very, very bad behavior," but "did not mention any specific plans." Said Trump, "Something will have to be done about it." The Los Angeles Times (7/6, Cloud, Wilkinson) also notes Trump "declined to provide specifics about potential options under consideration," saying, "I don't like to talk about what we have planned, but I have some pretty severe things that we're thinking about."

According to the AP (7/6, Burns), a "pre-emptive military strike may be among the 'pretty

severe things'...Trump says he is considering...but it's a step so fraught with risk that it ranks as among the unlikeliest options." Even a "so-called surgical strike" is "unlikely to destroy" North Korea's arsenal or "stop its leader, Kim Jong Un, from swiftly retaliating with long-range artillery that could kill stunning numbers in South Korea within minutes."

Bloomberg News (7/6, Capaccio, Foroohar), however, reports that Defense Secretary Mattis said Thursday that this week's launch "doesn't necessarily bring the two nations closer to war," even as Trump announced that he's weighing some "pretty severe things" in response. "I don't believe this capability in itself brings us closer to war," Mattis told reporters at the Pentagon. Mattis also said he wasn't surprised by the launch and added that US "self-restraint" prevented open conflict between the countries.

On CNN's Situation Room (7/6), Michelle Kosinski said Mattis' comments came as Trump delivered "veiled threats," and a day after Ambassador Haley "raised the specter of [military] force." The Washington Times (7/6, Muñoz) reports that "despite...hawkish rhetoric," Mattis "said both the White House and State Department have made 'very clear' the US is pursuing a diplomatic, not military, strategy to address the North Korean threat." Said Mattis, "The military remains ready, in accordance with our alliance with Japan, with [South] Korea. We stand ready to provide options if necessary, but this is a purely diplomatically-led [effort]…buttressed by the military." The AP (7/6, Burns) reports Mattis reiterated his view that military action would be "catastrophic."

Deputy assistant to the President, Dr. Sebastian Gorka, said on Fox News' Fox & Friends (7/6), "We've drawn a line. We have said this cannot go on." He added, "We will not allow this trajectory that North Korea has locked itself onto to further endanger us or our friends. And really, again, it is in now China's interest to reassess its support for this dictatorship. They hold the ace here. They have the real hand to play." Gorka also said, "We never talk about what we're going to do because that's never a good idea," but added, "We understand diplomacy without the option of force is just empty rhetoric."

Rep. Greg Meeks said on CNN's The Lead (7/6), "Sometimes, I don't think that anyone understands what Donald Trump says, not even Donald Trump. Clearly not his members of his cabinet, because they say one thing and he seems to say something else."

A USA Today (7/6) editorial says the "stakes are rising," but the "good news is that Trump has tools to dramatically increase the costs to China for tolerating North Korean provocations and has already started taking steps." Still, it says "more could be done to dissuade North Korea from its ICBM path short of military strikes."

USA Today (7/6, Dorell) reports that among the options possibly under consideration are barring the Bank of China, which has "participated in a money laundering scheme to help finance North Korea's weapons development," from the US financial system. The US and its allies could also "ramp up the interdiction of North Korean and North Korea-linked ships suspected of carrying weapons for sale abroad."

Rep. Mike Quigley said on CNN's Situation Room (7/6), "We need to build a multinational effort to move North Korea away from this kind of activity. ... You have to continue to diplomacy, despite the frustrations that are existing in the past. I think at this point in time, we have to ratchet up those efforts in Beijing and Moscow."

Washington Post (7/6) columnist Fareed Zakaria writes that "pressure will work only if there is also some reason for North Korea to make concessions. Pyongyang has indicated in the past that it seeks a formal end to the Korean War (Washington signed only an armistice in 1953), a recognition of the regime and the lifting of sanctions." Zakaria says that while "it's a bitter pill for Washington to swallow," the "alternative is to hope that China will act against its interests and crush its ally, or that North Korea will finally collapse. But hope is not a strategy."

Washington Post (7/6, Krauthammer) columnist Charles Krauthammer writes that if "the choice is binary: acquiescence or war. War is almost unthinkable," but "acquiescence is not unthinkable."

Russia Blocks US-Drafted UN Resolution. The CBS Evening News (7/6, lead story, 2:40, Brown) reported the threat posed by North Korea will be something President Trump and Russian President Vladimir Putin will discuss on Friday, but the Washington Times (7/6, Miller) reports Russia on Thursday blocked a UN Security Council resolution drafted by the US that called for "significant measures" in response to North Korea's launch Tuesday of an intercontinental ballistic missile. The US circulated the statement among council members, but "Russian officials argued that the missile launch Tuesday had not been verified as an intercontinental missile." A Wall Street Journal (7/6) editorial criticizes the move, which it says was likely because Putin wanted to send a message that he can make trouble if Trump resists a "reset" in US-Russia ties.

Washington Post (7/6, Lane) columnist Charles Lane says Russia "has no interest in a definitive solution," and "as long as the conflict does not erupt in actual war, Moscow is happy to have it drain and distract the United States."

US Weighing Sanctions On Chinese Companies Over North Korea Ties. The AP (7/6, Lederman, Lee) reports that "having lost patience with China," the Administration is "studying new steps to starve North Korea of cash for its nuclear program, including an option that would infuriate Beijing: sanctions on Chinese companies that help keep the North's economy afloat." While it is "an approach that's paid off for the US in the past, especially with Iran...there are significant risks, too, including the possibility of opening a new rift with Beijing that could complicate US diplomatic efforts on other critical issues."

A Wall Street Journal (7/6, Cheng, Page, Gale) analysis of North Korea's international connections reveals that even as it becomes increasingly dependent on China, Pyongyang maintains economic and diplomatic ties with many nations, including Cuba and Syria.

Yale Law School Professor Paul Gewirtz, meanwhile, writes for Politico Magazine (7/6) that Trump "seems rightly to have determined that China isn't doing enough on North Korea," but the Administration "should be wrestling with the full range of China challenges." While "a broader China policy will, of course, require administration officials to deal with the relationship's great complexities, which Trump has shoved to the side," Gewirtz argues that "this may also allow them to set the US-China relationship on a more sustainable and realistic path."

US Prosecutors Attempt To Seize Millions Linked To North Korea. According to Bloomberg News (7/6, Farrell), US prosecutors have "disclosed an effort to seize millions of dollars linked to North Korean entities from eight global banks" after Tuesday's intercontinental ballistic missile test. The US government's action, disclosed Thursday in court filings, "show a continuing determination to identify and shut down Pyongyang's points of access to the US financial system." However, there is "no indication that the government believes that any of banks – Bank of America Corp., Bank of New York Mellon Corp., Citigroup Inc., Deutsche Bank AG, HSBC Holdings Plc, JPMorgan Chase & Co., Standard Chartered Plc and Wells Fargo & Co. – knowingly violated US sanctions against North Korea."

Civilian Satellites Could Help Track North Korea Missiles. The New York Times (7/6, Sanger, Broad) reports that this week's intercontinental ballistic missile has "triggered an urgent, but quiet search for ways to improve America's early-warning ability." According to the Times, the "most intriguing solutions have come from Silicon Valley, where the Obama administration began investing in tiny, inexpensive civilian satellites developed to count cars in Target parking lots and monitor the growth of crops." While "some in the Pentagon...resisted the move...as North Korea's missile program progressed, American officials laid out an ambitious schedule for the first of the small satellites to go up at the end of this year, or the beginning of next."

WPost Analysis: Assassination Of Kim Jong Nam Sheds Light On Chemical Weapons Arsenal. The Washington Post (7/6, A1, Warrick) reports that "for the prosecutors preparing for the first court hearings later this month, some of the mysteries behind Kim Jong Nam's death inside a Malaysian airport terminal will likely never be resolved." But nearly five months after the killing of the North Korean leader's half-brother, "US and Asian officials have a clearer view of the attack's significance. In carrying out history's first state-sponsored VX assassination in a country 3,000 miles from its borders, North Korea has demonstrated a new willingness to use its formidable arsenal of deadly toxins and poisons to kill or intimidate enemies on foreign soil, analysts say."

McConnell: Bill To Fix ACA Needed Should GOP Healthcare Bill Fail.

NBC Nightly News (7/6, story 4, 2:00, Guthrie) reported Senate Majority Leader McConnell "raised new doubts about his ability to get the healthcare bill passed." NBC (Hunt) added that McConnell acknowledged he may not get the 50 Republican votes needed to pass the bill, and said that in such an instance "some kind of action with regard to private health insurance market must occur." Meanwhile, there are "dozens of protests around the country" over the bill. Politico (7/6, Haberkorn) reports McConnell's "remarks could be aimed at Senate conservatives" who want more of the ACA removed.

The Washington Post (7/6, Eilperin, Goldstein) calls McConnell's remarks "a significant shift," and the suggestion that Congress may seek to improve the ACA exchanges "is at odds with Republican talking points that they are beyond repair." The AP (7/6, Schreiner, Fram) reports McConnell's comment is "one of his most explicit acknowledgments" the GOP may not achieve their "top-priority drive to" repeal the ACA and "implicitly meant that" progress on healthcare may require Democratic support. USA Today (7/6, Collins) reports Minority Leader Schumer, "jumped on the Republican leader's comments, saying McConnell 'opened the door to bipartisan

solutions.'" Schumer said, "It's encouraging that Sen. McConnell today acknowledged that the issues with the exchanges are fixable."

Cruz: Repeal ACA Without A Replacement If Senate GOP Healthcare Bill Fails. The Washington Post (7/6, Sullivan) reports Sen. Ted Cruz, following a town hall event here hosted by Concerned Veterans For America, said that if the Senate GOP healthcare bill fails, the Senate should, as President Trump suggested, repeal the Affordable Care Act and provide a replacement "either a year or two years" later. This puts him at odds with Majority Leader McConnell, who suggested working with Democrats on stabilizing insurance markets if the GOP bill fails.

GOP Senators: Vote Not Expected For Weeks. The Hill (7/6, Sullivan) reports, "Republican senators are downplaying the chances of a quick vote next week on" their healthcare bill, with Sens. Pat Toomey, Ted Cruz, and Mitch McConnell giving a time frame of weeks. McConnell "faces a tough task in threading the needle between the demands of conservatives and centrists" who have opposing objections to the current bill.

WPost Analysis: GOP Bill's Deficiencies Stem From Expectation Trump Would Lose. In an analysis, the Washington Post (7/6, Kane) writes that Sen. Pat Toomey offered the "simple, remarkable explanation" for the GOP's struggles in repealing the ACA: "I didn't expect Donald Trump to win, I think most of my colleagues didn't, so we didn't expect to be in this situation." There were no "detailed Republican planning sessions on the Senate Finance Committee" on the matter; every important Republican leader's expectation that Hillary Clinton would "that left Republicans confused and paralyzed about how to proceed when she didn't." This unpreparedness is also reflected in the lack of action on tax reform, infrastructure, and Administration staffing. Still, "Trump's advisers have not always lent a helping hand," often leaving congressional Republicans unsure what policy was currently favored within the White House, and Trump's public comments "sowed division."

Hospital CEO Predicts "Destructive" Results Of GOP Healthcare Reform. Mt. Sinai Health System President and CEO Kenneth Davis, on CNBC's Closing Bell (7/6), predicted Congress could produce two results that "are very destructive potentially to large healthcare centers in urban areas." The first "is that we're going to be losing an awful lot of Medicaid, and that's going to provide the hospital systems with lots more patients with uncompensated care." The second is "that there will be a lot of people with preexisting conditions who can't afford their policies at all, and they are going to come into the hospital with major medical problems and also be uncompensated and once again the hospitals by law will have to take care of them, and it's going to be very difficult to see how a lot of hospitals that already have very small margins are going to survive in that environment. We are fundamentally not dealing with the basic problems in health care which these bills."

US, Other G20 Nations Reportedly "Nearing A Compromise" On Climate Change.

Politico (7/6, Restuccia) reports that the US and other G20 nations are "nearing a compromise on climate change." After days of preliminary talks ahead of today's summit, G20 negotiators are "increasingly hopeful they can settle on a joint communique in which the United States underscores its intent to withdraw from the Paris climate agreement while the other nations emphasize their support for the pact, according to a senior diplomat involved in the discussions." Diplomats, however, "stressed that the text remains fluid and could be rewritten at the insistence" of President Trump and other world leaders.

In Remarks Broadcast At G20 Summit, California Governor Announces Global Climate Meeting. The New York Times (7/6, Friedman) reports that in a videoconference address yesterday evening during the G20 summit in Germany, California Gov. Jerry Brown "reinforced his reputation as America's de facto leader on climate change, announcing to cheering crowds...that his state would gather leaders from around the world for a global warming summit next year." Brown said President Trump "doesn't speak for the rest of America" in withdrawing from the Paris accord. The California summit "will bring together the leaders of states, cities, businesses and others who made pledges to curb heat-trapping greenhouse gas emissions as part of the Paris accord and the thousands of others who were galvanized by Mr. Trump's decision."

France To Stop Selling Gasoline And Diesel Cars By 2040. The New York Times (7/6, Ewing) reports that, in "an expression of European leaders' determination to pursue an environmental agenda despite" President Trump repudiating the Paris climate accord, French Environment Minister Nicolas Hulot announced his country will end the sale of gasoline and diesel cars by 2040. The Times calls the timing of the move "significant," given Trump's current visit to Europe and Volvo's announcement the day before that it will phase out the internal combustion engine. While the target is not as ambitious as Norway plan to sell only electric cars by 2025, India by

2030, the "declaration gave additional momentum to efforts to fight climate change and urban smog."

Editorial Wrap-Up

New York Times.

"Surprise Us, Mr. Trump: Name An Ethics Watchdog With Teeth." In an editorial, the New York Times (7/7) says that with the resignation of Office of Government Ethics Director Walter Shaub, "President Trump now has the chance to appoint an accommodating loyalist who'd give him far less trouble than Mr. Shaub has. Or he could surprise us, and name another independent director committed to the ethical rules of public service." Though Trump's "past behavior doesn't offer much hope," it would "be in his long-term interest to choose a director with integrity."

"The Vatican's Failure In The Abuse Scandal." The New York Times (7/7, Board) editorializes, "For all of Pope Francis' deserved acclaim in leading the Roman Catholic Church to new directions, he is failing badly on his promise to address the child abuse scandal." The Pope's "failure to confront the problem was underlined last week when the pope had to grant one of his closest advisers, Cardinal George Pell of Australia, a leave of absence from the Vatican to answer multiple charges of sexual assault in Melbourne."

Washington Post.

"Trump Wants Us To Defend 'Our Values.' Which Ones?" The Washington Post (7/6) asks in an editorial, "Which values is he summoning us to defend? There were encouraging elements in his address suggesting that he was referring to the universal values that America celebrated" on July 4, but "perhaps what gives the most doubt is that he celebrated 'the right to free speech and free expression' without mentioning that the government welcoming him has worked worryingly to narrow those freedoms, along with the independence of its judiciary – and without mentioning that, at home, Mr. Trump himself has been far from a tribune of the free press."

"The District Should Make This Needed Campaign Finance Reform A Reality." In an editorial, the Washington Post (7/6) encourages the DC Council to join other local and state governments that have begun publicly financing campaigns in order to reduce the influence of "big money" in politics. The Post says a bill now before the Council would give matching funds (5-1) to candidates who forgo corporate and PAC contributions. Among the benefits of the proposition would be giving increased power to small donations, broadening the pool of possible candidates, and releasing donors from the necessity of reliance on wealthy donors for funding. The program's estimate $5 million cost "would be a wise investment toward better government," according to the Post.

"A Worthy Legacy Of The Ebola Catastrophe." The Washington Post (7/6) editorializes that the World Bank is creating a "novel program" based on the issuance of bonds and derivatives and creation of a trust fund to prepare for the world's next epidemic is a "promising and innovative step forward...and a worth legacy of the Ebola catastrophe" in 2014 and 2015. The Post says that as lack of immediate access to a robust funding source was identified as an important flaw in the world's response to Ebola in West Africa, the World Bank's Pandemic Emergency Financing Facility will be an important partner of the WHO to boost preparedness for the next epidemic. Investors will reap premiums , but will also take a risk: in the case of a major outbreak, they will lose some or all of what they have invested.

Wall Street Journal.

"Putin's Assist For North Korea." A Wall Street Journal (7/6) editorial criticizes the move, which it says was likely because Putin wanted to send a message that he can make trouble if Trump resists a "reset" in US-Russia ties.

"The Japan-EU Trade Warning." In an editorial, the Wall Street Journal (7/6) says the agreement's impact will be more far-reaching than bilateral trade, especially as it sends a message to Trump that global trade will continue regardless of American participation. In addition to the Administration's disregard for the TPP and TTIP putting American farmers and exporters at a disadvantage, the Journal says its consideration of punitive tariffs threatens to provoke tit-for-tat trade wars, WTO cases, and more difficult trade negotiations in the future. Top-notch American manufacturing productivity and rebounding employment, the Journal says the Administration's trade policies are harming relationships and allowing other powers to assume trade leadership and achieve prosperity that should belong to Americans.

2 National Monuments Safe From Trump Administration's Review.

The Hill (7/13, Cama) reports that Interior Secretary Ryan Zinke is "formally asking President Trump to keep two national monument designations without any changes." According to the article, "while Zinke's recommendation doesn't necessarily mean Trump won't try to change the protections, the conclusions for Idaho's Craters of the Moon and Washington's Hanford Reach mean they are likely safe." Zinke said in a statement, "When the President and I began the monument review process we absolutely realized that not all monuments are the same and that not all monuments would require modifications."

The AP (7/13, GERANIOS) reports that "Thursday's announcement that no changes will be made to the two monuments came after public comments and conversations with stakeholders, Zinke said." Of the Hanford Reach, Zinke said, "Sportsmen and women from all over the country go to Hanford Reach for some of the best fishing and bird hunting around. It's also home to some of the most well-preserved remnants of human history in the area." Speaking of Craters of the Moon, Zinke said, "As a former geologist, I realize Craters of the Moon is a living timeline of the geologic history of our land on the Great Rift."

The Spokane (WA) Spokesman-Review (7/13, Landers) reports that "Zinke didn't get a thank you from Washington's senators for dropping the Hanford Reach from its review of 27 national monuments created by presidents through the Antiquities Act." Instead, Zinke and the Trump Administration "received a rebuke for wasting the federal time and money on the review in the first place." Sen. Maria Cantwell said, "Now that Secretary Zinke agrees that the protection for the Hanford Reach National Monument should not be changed, the Trump Administration should abandon this review and the ill-advised effort to undermine national monuments altogether. An attack on one of our national monuments is an attack on all of them."

The Washington Post (7/13, Fears) reports that Kate Kelly, the Center for American Progress' public lands director, "praised the decision to leave Hanford Reach and Craters of the Moon alone but said 'the fate of 25 more monuments rests in the hands of a process without logic

or transparency.'" Kelly said, "The only thing that's been consistent throughout Zinke's review is its arbitrariness. From the get-go, it's been a guessing game on … how the review is being conducted and what is driving Zinke's decisions."

Coverage by the AP was also picked up by the Business Insider (7/13, Geranios), the Coeur d'Alene (ID) Press (7/13, Geranios), the Columbia Basin (WA) Herald (7/13, Geranios), the San Francisco (CA) Chronicle (7/13, Geranios), the Seattle (WA) Post-Intelligencer (7/13, Geranios), the Albuquerque (NM) Journal (7/13, Geranios), the Minneapolis (MN) Star Tribune (7/13, Geranios), Philly (PA) (7/13, Geranios), the Washington (DC) Post (7/13, Nicholas K. Geranios |, Ap), the Washington (DC) Times (7/13, Geranios), WAOW-TV Wausau (WI) Wausau, WI (7/13, Geranios), and KTVB-TV Boise (ID) Boise, ID (7/13, Geranios).

Additional coverage was provided by Reuters (7/14, Coffman), the Washington (DC) Examiner (7/13, Siciliano), the Huffington Post (7/13, D'angelo), the Bangor (ME) Daily News (7/13, Sambides), the Tri-City Herald (WA) (7/13, Cary), KOMO-TV Seattle (WA) Seattle (7/13, GERANIOS), and KIVI-TV Boise (ID) Boise, ID (7/13, Bertel).

Republicans To Trump: Shrink Mojave Trails National Monument, Leave Sand To Snow Alone. USA Today (7/14, Roth) reports that "Congressional Republicans are urging President Trump to eliminate nine national monuments, including Bears Ears in Utah, and to shrink 14 others – even as hundreds of thousands of public commenters call for him to keep those monuments in place." Seventeen House Republicans "called for those changes in a letter to Interior Secretary Ryan Zinke." The article notes that "among the monuments targeted for elimination are Berryessa Snow Mountain in California, Grand Canyon-Parashant in Arizona, Katahdin Woods and Waters in Maine and Grand Staircase-Escalante in Utah." They "also asked Trump to shrink 14 other monuments, including four in California: Carrizo Plain, Grand Sequoia, Mojave Trails and San Gabriel Mountains." However, "they advised him not to change the boundaries of four monuments, including Sand to Snow, which stretches from the desert floor near Palm Springs to the peak of Mount San Gorgonio."

New Mexico Governor Supports Monument Review. The U.S. News & World Report (7/13, Bryan) reports that New Mexico Gov. Susana Martinez "supports the review of two national monuments in New Mexico, saying it's important that the designations follow the intent and spirit of the federal law that was used to establish the sites." Martinez "outlined her comments on the Rio Grande del Norte and the Organ Mountains-Desert Peaks national monuments in a letter to U.S. Interior Secretary Ryan Zinke." The letter was made public Thursday.

Coverage by the AP was also picked up by the Bristol (VA) Herald Courier (7/13, Bryan), the San Francisco (CA) Chronicle (7/13, Bryan), the Washington (DC) Times (7/13, Bryan), and the Wichita (KS) Eagle (7/13, Bryan).

Additional coverage was provided by the Albuquerque (NM) Journal and KRWG-FM Las Cruces (NM) Las Cruces, NM (7/13).

Oregon AG Threatens Legal Action To Protect Cascade-Siskiyou National Monument. Oregon Public Broadcasting (7/13, Burns) reports that in a letter to Interior Secretary Ryan Zinke, Oregon Attorney General Ellen Rosenblum threatened to sue if the Trump Administration tries "to revoke or reduce the Cascade-Siskiyou National Monument." The article says that "reports have surfaced that Zinke will be visiting Cascade-Siskiyou National Monument this weekend to meet with stakeholders," but the Interior Department "would not confirm those reports."

On A Mission To Protect National Monuments. In an op-ed for Stars And Stripes (7/13, Tyson), Dj Tyson, who served in the U.S. Army for four years, writes about the importance of public lands to the nation's veterans. Tyson calls the review of national monuments as "nothing more than aggressive attempts to undermine the heritage that belongs to all Americans, and sell or lease that land for fossil fuel production." Tyson asserts that "stripping our land of its natural beauty and displacing its wildlife does not make America great." Tyson writes: "A veteran wouldn't give that treasure away. A veteran would protect it, fight for it and preserve it for all Americans, for all generations. A failure of that mission would be a failure of service to the United States of America."

Additional Coverage. Additional coverage of the review of national monuments was provided by the Woodland (CA) Daily Democrat (7/13, Raskin-Zrihen) and the Albuquerque (NM) Journal (7/14, Arellanes, Montoya, Martinez).

Trump Administration Reduces Royalty Rates In First U.S. Oil, Gas Lease Sale.

Reuters (7/13) reports that the Trump Administration "announced its first offshore oil and gas lease sale on Thursday, offering 76 million acres in the Gulf of Mexico and reduced royalty rates for shallow water leases to encourage drilling at a time of low oil prices." Interior Secretary Ryan

Zinke "said the sale to take place on August 16 will offer leases offshore Texas, Louisiana, Mississippi, Alabama and Florida for exploration and development." Zinke said, "Our Outer Continental Shelf lands offer vast energy development opportunities and we are committed to encouraging increased energy exploration and production in these offshore areas to maintain the country's global dominance in energy production."

Additional coverage was provided by Sputnik News (7/13) and KOBI-TV Medford (OR) Medford, OR (7/13).

Ryan Zinke At Interior Is Implementing MAGAnomics.

The Reno (NV) Gazette-Journal (7/13, Sullivan) reports that "on the same day Budget Director Mick Mulvaney introduced the country to MAGAnomics, he said Ryan Zinke at the Interior Department is doing the best job in the cabinet at implementing its deregulatory agenda to 'make America great again.'" Mulvaney and Zinke "met with a small group of reporters Thursday to discuss efforts to produce sustained 3 percent growth as Mulvaney's Thursday op-ed using the coinage – an alternative to 'Trumponomics' – appeared in The Wall Street Journal." The article says that "as an example of a management approach to improve morale and results, Zinke said his department is 'top heavy' and 'undermanned on the front line,' among park rangers, for example." The article adds that "noting that 16 percent of his department's workforce is already at retirement age and 40 percent will be in five years, he wants to hire with the aim of providing a 30-year career path and end the current uncertainty about how to get promoted."

Interior Secretary Zinke To Meet With Local Officials Saturday.

The Klamath Falls (OR) Herald And News (7/14, Floyd) reports that Interior Secretary Ryan Zinke will visit the Medford area on Saturday "to address land use issues in Southern Oregon." The secretary's "visit comes amid concerns about the recent expansion of the Cascade-Siskiyou National Monument as well as the federal government's obligations to fulfill terms of the OC&E Lands Act." Klamath County Commissioner Donnie Boyd "said he hoped the meeting with Zinke will ultimately prove the Department of the Interior is wiling to work with the people of Klamath County."

Picture Becoming Clearer On New Trump Regulatory Policy.

Bloomberg BNA (7/14, Bolen) reports that the Office of Management and Budget "said it will release the week of July 17 the Spring 2017 Unified Agenda of Federal Regulatory and Deregulatory Actions, which will list for the first time the regulations that agencies intend to eliminate or modify to offset the costs of their new regulations." The report will "provide a long-awaited missing piece of President Donald Trump's new one-in, two-out regulatory policy, which requires agencies to eliminate two regulations and to offset the costs of each new regulation they want to issue." The Interior Department, "for example, is proposing to reduce its regulatory stockpile by 50 percent and withdraw 152 regulatory actions, said Interior Secretary Ryan Zinke."

DOI Touts Support From Tribes, Congressman For New Official.

Law360 (7/13, Westney) reports that Interior Secretary Ryan Zinke "said Wednesday that a former department official will return in a key role at the DOI with the backing of Native American leaders and the Republican congressman he served as chief of staff." Todd Willens, "who served at the Department of the Interior from 2006 to 2008 before working as chief of staff for Steve Pearce, R-N.M., from 2010 through this year, will serve as assistant deputy secretary for the department under Deputy Secretary David Bernhardt."

New Legislation Tells Fourth Graders To Take A Hike.

For the "Congress" blog of The Hill (7/13, Ostfeld, Contributor), Jackie Ostfeld, Outdoors Associate Director for the Sierra Club, and Founder and Chair of the Outdoors Alliance for Kids, lauds the introduction of the bicameral and bipartisan Every Kid Outdoors Act. Ostfeld argues that the legislation will promote the "health and welfare of our children," as well as bolstering the outdoor recreation economy. He notes that "the legislation is inspired by the Every Kid in a Park program which has leveraged substantial investments from the private sector." Calling the Every Kid Outdoors Act "a low-cost, commonsense solution to encourage children to get active and learn about the public lands, waters, and shores that make America so unique," Ostfeld urges Congress to "pass it without delay."

Trump: Russia Knows 'I'm Going To Produce Much More Energy' Than Clinton Would

Have.

The Hill (7/13, Henry) reports that while speaking to reporters, President Trump promised to "produce much, much more energy than anyone else who was ever running for office." Trump used the opportunity to argue that Russia would have preferred Hillary Clinton's energy platform, saying, "your energy prices right now would be double" if she had one. Trump also said, "I'm a tremendous fracker, coal, natural gas, alternate energy, wind – everything, right? ... But I'm going to produce much, much more energy than anyone else who was ever running for office. Ever."

Bureau Of Indian Affairs

US House Passes Tribal Land Trust Bill.

The Coos Bay (OR) World (7/13, Cole) reports that "the U.S. House of Representatives passed a bill on Wednesday that proponents say will expand land rights for three southern Oregon Native American tribes." The Western Oregon Tribal Fairness Act (H.R. 1306) "provides land in trust to the Cow Creek Band of Umpqua Tribe of Indians and to the Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Indians." It now goes to the Senate for further consideration.

Additional coverage was provided by KUOW-FM Seattle (7/13).

Indian Country Outnumbered At Hearing On Indian Reorganization Act.

The Nation Sun News (7/13) reports that the House Committee on Natural Resources "took a second look at the land-into-trust process on Thursday morning." According to the article, "the biggest reveal was that Republican leaders once again failed to invite an actual tribal leader to a talk about one of the most important issues in Indian Country." Also, "Democrats on the committee were only allowed to pick one witness."

Bureau Of Land Management

Sessions 'Not Taking Sides' On Bundys.

E&E Publishing (7/13, Yachnin) reports that Attorney General Jeff Sessions on Wednesday "praised the lead attorney in the government's prosecution of Nevada rancher Cliven Bundy but also said he would not be 'taking sides' in the trials related to the 2014 armed standoff between ranchers and federal agents near Bunkerville, Nev." In an appearance in Nevada, Sessions said, "I've got to tell you, it's impressive when you have a tough case, a controversial case, and you've got the top guy leading the battle, going to court, standing up and defending the office and the principles of the law." However, he added: "I'm not taking sides or commenting on the case. Just want to say that leadership requires, a lot of times, our people to step up and be accountable." The article says that "Sessions' refusal to take a position on the Bunkerville trials is notable because the Bundys and their supporters hoped the Trump administration would offer them some relief in their battle with the federal government."

Will Congress Fix Wildfire Funding This Year?

The High Country (CO) News (7/13, Worby) reports that with "the West is in the midst of another intense wildfire season," and with President Trump "proposing to cut the Forest Service's firefighting budget by nearly $300 million, the question of how to manage and fund wildfire suppression on public lands has again reared its head." The Resilient Federal Forests Act "addresses wildfire management funding, an increasingly urgent problem." Under the bill, the Forest Service and the Bureau of Land Management "would be able to tap into Federal Emergency Management Agency funds to fight catastrophic fires."

Judge Rejects Utah Ranchers' Plea To Evict Wild Horses.

The Salt Lake (UT) Tribune (7/13, Maffly) reports that "a federal judge on Tuesday tossed a lawsuit brought by Utah ranchers demanding the Bureau of Land Management remove 'excess' wild horses from several areas in the West Desert they say are overrun with free-roaming horses that displace their cattle." Represented by Karen Budd-Falen, a Wyoming attorney "who sources say is undergoing final vetting to serve as the BLM's next director, the ranchers argued that federal law requires the removal of horses that exceed population targets the agency has set for particular herd areas." However, U.S. District Judge Jill Parrish held "that roundups are not

compulsory, unless certain conditions are met."

Bureau Of Ocean Energy Management

US Approves Alaska Offshore Drilling From Gravel Island.

The AP (7/13, Joling) reports that "petroleum exploration has largely ceased in federal waters off Alaska but an Italian multinational oil and gas company has received permission to move ahead with modest drilling plans on leases sold in 2005." The Bureau of Ocean Energy Management "late Wednesday announced conditional approval of an exploratory drilling plan submitted by Eni US Operating Co. Inc., part of Eni S.p.A." The AP writes that "the company plans to drill four exploration wells from the Spy Island drill site, an 11-acre (.04-square kilometer) artificial gravel island constructed in state of Alaska waters 6 to 8 feet (1.8 to2.4 meters) deep." It also points out that "former President Barack Obama last year banned oil and gas exploration in most of the Arctic Ocean. President Trump in April ordered Interior Secretary Ryan Zinke to review the ban with the goal of opening offshore areas."

Coverage by the AP was also picked up by U.S. News & World Report (7/13, Joling), Business Insider (7/13, Joling), the Elko (NV) Daily Free Press (7/13, Joling), the San Luis Obispo (CA) Tribune (7/13, Joling), the Seattle (WA) Post-Intelligencer (7/13, Joling), the Daily Mail (7/13), the Minneapolis (MN) Star Tribune (7/13, Joling), Newsday (NY) (7/13), Philly (PA) (7/13, Joling), and the Washington (DC) Times (7/13, Joling).

Additional coverage was provided by The Hill (7/13, Cama), Reuters (7/13, Gardner), Morning Consult (7/13, Gheorghiu), Offshore Engineer (7/13, Sustaita), and Splash 24/7 (SGP) (7/13, Scully).

Fish And Wildlife Service

Jeffco Officials Dig In Their Heels Against Proposed Prairie Dog Relocation At Rocky Flats.

The Denver Post (7/13, Aguilar) reports that Jefferson County officials are "recommending against a controversial proposal to move a colony of prairie dogs from Longmont to Rocky Flats." According to the article, "in a letter dated Wednesday and made public Thursday, county manager Donald Davis told consultants working with developer HSW Land that county staff 'would not recommend relocation of these destructive rodent pests from Boulder County to Jefferson County.'" The article notes that "Davis did not give a reason for recommending against the relocation, a decision that would be up to the county commissioners."

'BioBlitz' Finds Scores Of Creatures In Springfield's Abbey Brook Conservation Area.

The Springfield (MA) Republican (7/13, Treeger) reports that "the public participated in a fun, scientific and educational 'BioBlitz' on Thursday at the Abbey Brook Conservation area, where they helped identify and inventory wildlife, tree and plant species." The Sustainable Springfield Partnership "conducted the event at the conservation area, with the staging site located in the rear parking lot of the Springfield Renaissance School." David Sagan, private lands biologist with the U.S. Fish and Wildlife Service, said, "We have found and identified 54 different species in just the first two hours. We are right behind Springfield's Renaissance school, which is an awesome opportunity to not only work on science but also to engage the next generation of conservationists."

Is Sound The Secret For Saving The Manatees?

NBC News (7/13, Trani) reports that "watercraft strikes kill" about 100 manatees each year, "making boats the leading cause of manatee death." But marine mammal scientists Edmund and Laura Gerstein from Boca Raton "believe they have an acoustic solution to curb manatee mortality." They have "developed a submerged alarm system that shoots a beam of high-frequency sound from the front of the boat, warning manatees to steer clear."

National Park Service

Warner, Kaine Announce More Than $4.2M For 9 Historic Battlefields In Virginia.

WSLS-TV Roanoke, VA (7/13) reports that Sens. Mark R. Warner and Tim Kaine "announced

more than $4.2 million to preserve nine historic battlefields in Virginia." The grants were awarded through the National Park Service's American Battlefield Protection Program, funded through the Land and Water Conservation Fund. The senators said, "Virginia is home to some of our nation's most significant history, and this National Park Service program has been invaluable in partnering with the Civil War Trust and localities to protect these sites from development. Preserving this land is critical to ensuring that our children and their children can learn from our past."

Additional coverage was provided by the Lynchburg (VA) News & Advance (7/13, Carmel).

Ga. Cities Get $90K In Federal Historic Grants.

The Atlanta Journal-Constitution (7/13, Ibata) reports that "seven Georgia cities, including four in the metro Atlanta area, will receive federal grants totaling more than $90,000 to support historic preservation activities, the Historic Preservation Division of the state Department of Natural Resources announced." The grants are awarded through the Historic Preservation Fund of the National Park Service.

Grand Canyon National Park Plans To Bring Back River Unit.

The AP (7/13) reports that Grand Canyon National Park is "considering recreating a river unit that was dismantled 16 months ago following a report by a federal watchdog that found a longstanding pattern of sexual harassment there." According to the article, "park employees presented a draft of their plan to reinstate river operations at a community meeting in Flagstaff on Tuesday." The article says that "under the proposed changes, the river district would operate as an independent work group within the park and would be overseen by a newly created river operations manager, who reports directly to the superintendent."

Additional coverage was provided by the Arizona Daily Sun (7/13, Cowan).

Conservationists, National Park Service And Point Reyes Ranchers Reach Settlement On Disputed Land.

The Los Angeles Times (7/13, Serna) reports that "environmentalists, the National Park Service and ranchers have reached a settlement over disputed usage rights at Point Reyes National Seashore." The agreement, "which was announced Wednesday, would give conservationists, ranch owners and others an opportunity to offer input on an amended general management plan for the rugged Bay Area peninsula." The NPS, "which leases land for cattle grazing, must complete the plan by 2021."

Additional coverage was provided by the Santa Cruz (CA) Sentinel (7/12) and YubaNet (CA) (7/13).

Dog Off-leash Backers Question 'secret' Examination Of Disputed Emails.

The Marin (CA) Independent Journal (7/13, Prado) reports that "a process to look at controversial emails that led up to the decision for more restrictive dog leash requirements is being questioned by a San Rafael off-leash advocate who says it is occurring in secret." The National Park Service in December "released details of its final environmental impact statement on new dog leash requirements, setting the stage for more restrictions in Marin, San Francisco and San Mateo counties that were to take effect this year." However, "in January, the park service announced it was holding off after requests from lawmakers for a delay, and the revelation of emails that showed park employees were critical of dog backers, raising questions about impartiality during the process." According to the article, "the documents appear to show a park staffer using a personal email address to seek support from various advocacy groups to back the new rules to limit dogs off leash."

Wetlands Trail Reopens At Lake Mead After Three-year Closure.

The Las Vegas Review-Journal (7/13, Hershkovitz) reports that the Wetlands Trail at Lake Mead National Recreation Area has "reopened after a three-year closure," the National Park Service announced Thursday. According to the NPS, "the trail closed in early 2014 as crews installed a control structure to prevent erosion in the Las Vegas Wash to protect stability of a bridge." The article says that "the control structure also will protect the Lake Las Vegas dam and outlet works."

Master Plan Underway For Historic Trail From Abingdon To Elizabethton.

WCYB-TV Bristol, VA (7/13, Bailey) reports that the Overmountain Victory Trail was "designated a national trail in 1980, but not all of the trail is accessible by walking and biking." The National

Park Service hopes "to open up the full 330-mile route." The agency aims "to have master plans completed for the nine sections of trail by 2020."

Park Volunteers Recognized With Southeast Regional Service Awards.

The Sevier (TN) News Messenger (7/13) reports that Great Smoky Mountains National Park officials announced that several dedicated Volunteers in Park "received regional recognition for their outstanding service." Volunteers Raymond Palmer, Frank March, Daniel Metcalf, and the Centennial Volunteer Ambassador group were "selected as recipients of Southeast Regional Service Awards for their exemplary service from over 42,000 volunteers who donated their time, skills, and talents in 66 national park units across 9 states in the southeast region." Park Superintendent Cassius Cash said, "We are so very proud of the work accomplished by these enthusiastic and talented volunteers. They have not only further established the next generation of park supporters and advocates through their outreach, they have each contributed to the legacy of this park through their service. We are truly grateful for their dedication and support."

Chiricahua National Monument Open After Closure Due To Fire.

The AP (7/13) reports that Chiricahua National Monument has reopened "after being closed because of a nearby southeastern Arizona wildfire." Officials "said the monument was closed Wednesday a precaution, but an announcement Thursday on the monument's Facebook page says the park was open 'but could be evacuated on short notice if fire conditions change.'" The blaze was "10 percent contained Thursday."

Natchez, National Park Service Advance Forks Of The Road Donation Process.

The Natchez (MS) Democrat (7/14, Hamilton) reports that "the City of Natchez and the National Park Service Tuesday entered into an agreement advancing the historic Forks of the Road land donation process." The agreement "essentially moves the donation process along and lays out responsibilities of the city and NPS until the land is donated, Natchez National Historical Park Superintendent Kathleen Bond said."

This Bobcat Brings In $308,000 A Year.

The Washington Post (7/13, Bittel) reports that a new study estimates the value of "one specific bobcat" at Yellowstone National Park "at a whopping $308,105 a year." According to the article, "in recent years, at least one cat has managed to make a living along the Madison River by ambushing ducks and other birds that ply these waters year-round." The article says that "the bobcat's exploits have caught the attention of wildlife outfitters and photographers who now schedule entire expeditions around observing and capturing the feline on film." Mark Elbroch, the puma program lead scientist for the global wild cat conservation organization Panthera, and his colleagues published their findings last week in the journal Biodiversity and Conservation.

Whitman Mission Receives EPA Award.

The East Oregonian (7/13) reports that Whitman Mission National Historic Site has been "selected to receive an award from the U.S. Environmental Protection Agency for water conservation after the park lowered its water usage by 36 percent in 2016." The recognition "comes from the Federal Green Challenge, part of the EPA's Sustainable Materials Management Program, which challenges government offices throughout the country to reduce their environmental impact."

Utah Sheriff: 1 Dead, 5 Injured In Explosion On House Boat.

The AP (7/13) reports that "a Colorado woman is dead and five other people are injured after a nighttime explosion on a houseboat along the Utah-Arizona border, authorities said Thursday." According to authorities, "a generator exploded about 10 p.m. Wednesday as a large group that included about 20 other people vacationed on a privately owned boat on Lake Powel." The National Park Service and sheriff's office are investigating.

Monarchs, Bees And Other Insects Take Over Yosemite Milkweed Fields.

The Sacramento (CA) Bee (7/13, Caraccio) reports that Yosemite National Park has released a video "from its Nature Notes series showing how active butterflies, bees, birds and other insects are in the milkweed fields at the California tourist destination."

Washington Memorial Chapel, Valley Forge, Added To National Register Of Historic Place.

The Pottstown (PA) Mercury (7/13, Puleo) reports that the Washington Memorial Chapel has been

added to the National Register of Historic Places.

Ken Burns And Dayton Duncan On Denali National Park.

In a piece for USA Today (7/13, Duncan, Burns), Dayton Duncan and Ken Burns, the creators of the PBS documentary The National Parks: America's Best Idea, celebrate Denali National Park and Preserve turning 100 years old this year.

Additional Coverage: $10 Lifetime National Parks Pass For Seniors Will Increase To $80 Next Month.

Additional coverage that the new America the Beautiful lifetime senior passes will begin being issued for $80 was provided by MLive (MI) (7/13, Gmiter), the Atlanta (GA) Journal-Constitution (7/13), the Bangor (ME) Daily News (7/13, Koenig), WMEA-FM Portland (ME) Portland, ME (7/13, Morin), and WLTX-TV Columbia (SC) Columbia, SC (7/13, Harrison).

Office Of Insular Affairs

U.S. Dept. Of Interior Provides $250,000 In Funding To USVI For New Consumer Price Index.

The Virgin Islands Consortium (VIR) (7/12) reports that the Office of Insular Affairs has "awarded the U.S. Virgin Islands a $250,000 grant for the development and implementation of a 2017 Consumer Price Index (CPI)." Interior Secretary Ryan Zinke "presented the grant award to Governor of the U.S. Virgin Islands Kenneth E. Mapp during their meeting at Interior Headquarters on Monday." Acting Assistant Secretary for Insular Areas Nikolao Pula said, "The new CPI will be based on a new 2016 Household Income and Expenditure Survey. The major focus of the project is to provide current data on consumer expenditures in the U.S. Virgin Islands, congruent with national standards. This is critical in order to better assess and evaluate price trends in various sectors of the economy and prospects for economic growth and development."

Virgin Islands Consortium (VIR) (7/12) reports that Interior Department officials "say they will support the territory's efforts to establish a 'day visa' program, expand parking in Christiansted, resolve longstanding issues within the National Park on St. John and back a permanent increase in the amount of federal rum excise taxes returned to the local treasury." Governor Kenneth Mapp "described his meeting this week with Interior Secretary Ryan Zinke in Washington D.C. as highly productive."

The St. Thomas Source (7/12) reports that Interior Department officials told Gov. Kenneth Mapp this week that "they will back a permanent increase in the amount of federal rum excise taxes returned to the local treasury, according to Government House." Zinke has "pledged to support the territory's effort to lobby Congress to permanently increase the federal rum excise taxes returned to the U.S. Virgin Islands." Mapp said, "Making this increase permanent is a small matter for Congress, but makes a significant difference in our ability to budget. I truly thank Secretary Zinke for his commitment in this regard."

Additional coverage was provided by the Virgin Islands Daily News (7/14, Blackburn).

Governor And Senate Of CNMI Criticize Marianas Trench National Monument.

Hawaii Public Radio (7/13, Conan) reports that both CNMI governor Ralph Torres and the Senate of the Commonwealth of the Northern Mariana Islands criticized the Marianas Trench National Monument in a letter to the Interior Secretary Ryan Zinke. In the letter, Torres "said that the federal government has failed to live up to its promises." Also, "a resolution passed by a vote of eight to one" in the Senate "called for the Monument designation to be withdrawn."

American Samoa Pleads For More US Funding.

Radio New Zealand (7/11) reports that American Samoa's governor Lolo Matalasi Moliga has "asked the territory's Congresswoman Aumua Amata to introduce federal legislation providing for annual funding for the territory of $US50 million dollars." Lolo Maliga noted that "the territory's $US23 million Grant in Aid has not increased since 1986." He "said he has asked Aumua Amata to introduce legislation calling for the Congressional annual funding to increase to $US50 million dollars to finance government operations including $US25 million dollars for capital improvement projects to replace deteriorating infrastructure."

H.R.2 810 – National Defense Authorization Act For Fiscal Year 2018.

Newsroom America (7/13) reports that the Trump Administration "supports a number of provisions in H.R. 2810, the National Defense Authorization Act." The legislation "supports key Administration priorities, including ending the defense sequester, rebuilding our military readiness, and modernizing our force for the future." The legislation "authorizes funding for our ongoing efforts to destroy the Islamic State of Iraq and Syria (ISIS), to deter potential adversaries, and to bolster our allies."

Explore A Tropical Paradise Through The Eyes Of The Colorblind.

Wired (7/13, Mallonee) reports that "an unusually high number of Pingelapese are completely colorblind, a condition called achromatopsia." Belgian photographer Sanne de Wilde "spent a month in Pingelap and the neighboring island of Pohnpei to get a better sense of how the Pingelapese see the world." De Wilde's finding are contained in "the incredible new book Island of the Colorblind__."

US Geological Survey

House Panel Backs Earthquake Early Warning System, Defying Trump's Plan To Kill It.

The Los Angeles Times (7/13, Lin) reports that "with bipartisan support, a congressional panel voted Wednesday to keep funding a West Coast earthquake early warning system that could have been shut down under President Trump's proposed budget." A House of Representatives subcommittee "said that the U.S. Geological Survey program should be allowed to continue and receive the same $10.2 million the network received in the last budget." Rep. Ken Calvert, chairman of the subcommittee, "said he would oppose any effort to cut the program as the budget bill moves through Congress."

Additional coverage was provided by Breitbart (7/13, Street).

Top National News

Trump Defends Son, Downplays Significance Of Veselnitskaya Meeting.

President Trump's comments during a joint news conference with French President Emmanuel Macron about his son Donald Trump Jr.'s meeting with a Russian lawyer dominate what continues to be heavy media coverage of Russia story. Trump is portrayed almost universally as defending his son and downplaying the significance of the meeting – amid vocal criticism from Democrats and calls for Trump Jr. to testify before Congress. In what is generally cast as an attempt to shift blame away from his White House, Trump also opened a new front in the story, claiming that the Obama Administration was responsible for letting the Russian lawyer, Natalia Veselnitskaya, into the country.

Cecilia Vega said on ABC World News Tonight (7/13, story 2, 3:45, Muir) that Trump's visit to France was "overshadowed" by the story, and Lester Holt, in the lead story for NBC Nightly News (7/13, lead story, 3:00) called Trump's defense of his son "uncharacteristically muted," while Kristen Welker said Trump was "steadfastly defending his son." Breitbart (7/13, Key) says Trump "defended his son's decision to take a meeting with a Russian attorney," while the New York Post (7/13, Fredericks) reports that Trump "staunchly defended his eldest son," saying, "I think the press made a very big deal over something that really a lot of people would do." Politico (7/13, McCaskill) says Trump "downplay[ed] the significance" of the meeting. Mark Phillips said on the CBS Evening News (7/13, story 2, 2:20, Mason) that Trump "was sticking to his story, that it was all part of the nasty game of politics," and "he insisted, the story was being overblown, not because the meeting shouldn't have taken place, but apparently because it produced nothing useful." Phillips added that Trump's answers "won't likely satisfy those who say that Donald Trump Jr. should never have taken that meeting. Instead, they say, he should have reported the approach to the FBI."

On its cover, TIME (7/13, Von Drehle) features a black and white photo of Trump Jr. and the words "Red Handed" below his face. The cover story, which calls the revelation of Trump Jr.'s "enthusiastic response to 'obviously very high level and sensitive' morsels supposedly collected by the Kremlin" a "bombshell," declares, "So much for White House efforts to deny a Russia problem." TIME adds that while "treason" is "an extremely hard case to make," a "more plausible charge is obstruction of justice – and here the President himself might be vulnerable."

Trump, the AP (7/13, Jalonick, Tucker) reports, characterized the meeting "as standard campaign practice and maintain[ed] that 'nothing happened' as a result of the June sit-down." Trump told reporters that "politics is not the nicest business in the world" and that "it's standard for candidates to welcome negative information about an opponent." Trump added that in this case, "nothing happened from the meeting, zero happened from the meeting." The AP highlights that the President's comments "stood in contrast to the position of his nominee for FBI director, Christopher Wray" during his confirmation hearing Wednesday.

Townhall (7/13, Pavlich) says Trump "defended" his son, as does the New York Times (7/13, Haberman), which quotes the President as calling Trump Jr. a "wonderful young man," who "took a meeting with a Russian lawyer. Not a government lawyer; a Russian lawyer." The Washington Post (7/13, Parker) quotes Trump as saying, "I do think this: I think from a practical standpoint most people would have taken that meeting. ... It's called opposition research or even research into your opponent."

However, USA Today (7/13, Jackson, Schouten) reports that "campaign and ethics experts have also disputed the Trumps' claims that the meeting constituted normal opposition research," and Vega said on ABC World News Tonight (7/13, story 2, 3:45, Muir) that while Trump said the lawyer was "not a government lawyer," in "those emails, it was crystal clear. Don Jr. agreed to meet with a quote, 'Russian government attorney,' who he was told had incriminating information on Hillary Clinton."

In a comment that media reports cast as an attempt to shift some responsibility on to the Obama Administration, Trump also claimed Veselnitskaya was allowed into the country "by the Obama Justice Department under extraordinary circumstances on a lobbying campaign with Congress and others to change US adoption policy toward Russia," the Washington Times (7/13, Boyer) reports. Trump said, "She was in the halls of Congress, also. ... Somebody said that her visa or her passport to come into the country was approved by Attorney General [Loretta] Lynch. Maybe that's wrong. I just heard that a little while ago. That's why she was here, because of Lynch." John Roberts reported on Fox News' Special Report (7/13) that Trump "pointed fingers at the press, arguing the incident have been overblown, blaming the Obama Administration for the fact that...Veselnitskaya was in the country at all."

The Hill (7/13, Fabian) says Trump "appeared to blame the Obama administration" for allowing Veselnitskaya into the country, and calls the comment "an attempt to deflect attention away from his son's decision to take the meeting." Similarly, Roll Call (7/13, Bennett) says the comment "appeared an attempt to at the least shift blame for her presence on top Democrats, and at most suggest top Democrats knew about her pending meeting with Trump Jr. and wanted it to occur." Tucker Carlson said on Fox News Tucker Carlson Tonight (7/13) that Lynch "personally got involved in helping that lawyer come to the United States. Once here, the lawyer/spy/diabolical hacker of democracy didn't just meet with Donald Trump Jr. She also sat in on a congressional hearing, she lobbied on behalf of her government, she went to events around Washington, including a dinner attended by at least one member of Congress who, for the record, is not named Trump. In other words, the story is considerably more complex than you may have heard."

Rep. Adam Schiff, ranking Democrat on the House Intelligence Committee, blasted Trump's comments on CNN's The Lead (7/13), saying that "for the President today...to defend Donald Jr. by saying, first of all, well this attorney wasn't a government attorney when that's how she was purported to be, and to go on to say, well, lots of people would have taken that meeting, is the equivalent of saying lots of people do unethical things, and so we did too. And we're okay with that. It's not okay. ... Whether it's illegal is another question, but it ought to be appalling to anyone with ethical standards."

Senate Intelligence Committee ranking member Mark Warner said on Fox News' Special Report (7/13) he "can't believe" that Trump would describe Trump Jr.'s actions as standard politics. Warner said, "Here it was in black and white, an email that said 'hey, meet with this Russian lawyer acting as an agent of the Russian government.' This is part of the Russian government's effort to help then-candidate Trump and discredit Clinton.' I don't know anybody, Democrat or Republican, that would take that kind of meeting with not only a foreign government, but a foreign adversary, and frankly a government that we've learned was trying to hack into our whole electoral process." When asked if he's seen other evidence of collusion, Warner said the committee is just now beginning to talk to people affiliated with the Trump campaign so "there is no evidence yet."

Sen. Ben Cardin said on CNN's Situation Room (7/13) that Trump Jr. owes the American people "an explanation. What he did is extremely troubling" and it is "not standard politics."

When asked about Trump saying Lynch let the Russian lawyer into the country, Cardin said, "Getting into the country is certainly not relevant to meeting with a person to get information to use in a campaign from another country. We let foreigners in our country. What is unusual is a campaign accepting information from a foreign agent that could be used against your opponent."

Sen. Amy Klobuchar said on MSNBC's Morning Joe (7/13), "We heard time and time again how the Hillary campaign wasn't as good as the Trump campaign when it came to this targeting and social media. That may be true but if you start to learn that the reason is that the Trump campaign was colluding with a foreign entity, that's a whole other world. . ... I don't know all the facts here, I'm a former prosecutor, I like to wait until I see the facts, but this is a very grave matter."

Rep. Joaquin Castro said on CNN's Situation Room (7/13), "I completely disagree" with Trump's claim that Trump Jr.'s actions are common in politics. Castro said, "Yes, opposition research is common in politics, but meeting with officials of...an adversary" of the US "is not standard practice at all."

Major Garrett reported on the CBS Evening News (7/13, story 3, 1:10, Mason) that "the Senate Intelligence Committee will request documents from Trump Jr. and Jared Kushner about that meeting, and it wants to interview, as you might expect, anyone in the Trump campaign who had contact with Russians." Sen. Sheldon Whitehouse said on MSNBC's Morning Joe (7/13) that Trump is "the only President or presidential candidate not to reveal his tax returns. There is credible information to suggest that the tax returns would reveal contacts with Russia. He is exactly the model of the business mark that the Russians target in their election interference strategies which has been written up over and over again, and he won't do it."

Michael Gerson writes in the Washington Post (7/13) that while some have "employed the excuse that members of the Trump team are new to politics," the "their innocence...is proved by their guilt." Gerson argues that this explanation "does not cover egregious acts of wrongdoing. Putting a future president in the debt of a foreign power — and subject, presumably, to blackmail by that power — is the height of sleazy stupidity." Rather than "a mistake born of greenness; it is evidence of a vacant conscience." Charles Krauthammer said on Fox News' Special Report (7/13), "I'm not impressed by the story about the lawyer. I think it's a red herring the size of a whale. She was a pawn. It doesn't change the central fact of the scandal. The scandal is the email received from an intermediary by Donald Trump, Jr. that said a Russian government lawyer...would be coming with dirt on Hillary and that the Kremlin was supporting his campaign and that the...state prosecutor in the Kremlin had a trove of documents. That's the story. I don't think it's illegal. I don't think anybody's claiming it's illegal," but it "totally undermines a six-month story from the White House, to which I was sympathetic, that there wasn't any collusion."

Senate Majority Whip Cornyn said on Fox News' Fox & Friends (7/13), "I firmly believe that Putin was trying to interfere with our election. He expected Hillary Clinton to win. It didn't turn out that way. But this is not about personalities, which is what the mainstream media wants to make it. This is Russia against the United States. Always has been, always will be. And that's what we ought to be focusing on and protecting our elections and institutions from." The CBS Evening News (7/13, story 5, 1:35, Mason) showed part of "a discussion with CBS News contributor Frank Luntz," between six Republican and six Democratic members of Congress about Russian meddling in the 2016 election.

Trump: Democrats' Focus On Russia Is "A Big Mistake." According to a pool report released Thursday, in remarks to reporters on Air Force One Wednesday, Trump argued "that Democrats had overplayed their hand on what he called 'the Russia thing,' saying the American people don't believe the accusations against him," Politico (7/13, Conway) reports. Trump said, "It's a witch hunt and they understand that. ... When they say 'treason' — you know what treason is? That's Julius and Ethel Rosenberg for giving the atomic bomb, OK?" Trump added that Democrats are "making a big mistake" by focusing on the issue. Said Trump, "My people and the people that support me, who are incredible people, those people are angry because they feel it's being unfair and a witch hunt." In a piece for the Washington Examiner (7/13), Michael Barone warns Democrats against "overreach," writing that the "overeagerness to find a smoking gun ignores the fact that the Constitution's standard for impeachment and removal from office is not the criminal code but 'high crimes and misdemeanors' – breaches of the public trust serious enough that two-thirds of senators feel justified in overriding the results of a presidential election."

Trump Says Putin Would Have Preferred Clinton As President. Also Thursday, in a pre-taped interview broadcast on Christian Broadcasting Network's 700 Club (7/13), Trump said Russian President Vladimir Putin would have preferred if Hillary Clinton had won the election. Trump argued, "We're the most powerful country in the world, and we're getting more and more

powerful because I'm a big military person. As an example, if Hillary had won, our military would be decimated, our energy would be much more expensive. That's what Putin doesn't like about me. ... From day one, I want a strong military; he doesn't want to see that. From day one, I want fracking and everything else to get energy prices low and to create tremendous energy. We're going to be self-supporting. ... He doesn't like that. He would like Hillary, where she wants to have windmills. ... There are many things I do that are the exact opposite of what he would want. When I keep hearing he would rather have Trump, I think, probably not." Trump also said in an interview broadcast on Christian Broadcasting Network's 700 Club that he and Putin "had a good meeting," adding, "I do believe it is important to have a dialogue. if you don't have a dialogue, it is a lot of problems for our country and for their country." Later in the interview, Trump said Putin "wants what is good for Russia and I want what is good for the United States" and "sometimes you're not going to get along on things, and sometimes you will." Trump added, "I think we got along very well, and that's a good thing, that's not a bad thing."

The New York Times (7/13, Haberman, Landler) says Trump told reporters on Air Force One that he confronted Putin twice about allegations that Russia interfered in the 2016 election, "and changed the subject after Mr. Putin flatly denied it because, 'What do you do? End up in a fistfight?'" In his "first extended account of a dramatic closed-door meeting he held with Mr. Putin last week in Hamburg, Germany," Trump said, "I said to him, 'Were you involved in the meddling with the election?' ... He said, 'Absolutely not. I was not involved.' He was very strong on it. I then said to him, in a totally different way, 'Were you involved with the meddling?' He said, 'I was not — absolutely not.'"

Bloomberg News (7/13, Epstein, Sink) reports that while Trump "repeatedly sidestepp[ed] questions about whether he believed Putin's denials of meddling in the 2016 presidential election," he told reporters on Air Force One that "he's willing to invite Russian President Vladimir Putin to the White House 'at the right time.'" Trump said, "Look, it's very easy for me to say absolutely, I won't" invite Putin to Washington, adding, "That's the easy thing for me to do, but that's the stupid thing to do. Let's be the smart people not the stupid people." Bloomberg also reports that Trump's comments to reports during the flight were given "on condition their conversation wouldn't be published," but those conditions "were reversed hours later by Trump himself." In his Washington Post (7/13, Zakaria) column, Fareed Zakaria questions why Trump has "had such a rosy attitude toward Russia" and Putin. Zakaria posits that Trump just "admires Putin as a leader" or "has bought in to the worldview of his senior adviser Stephen K. Bannon, in which Russia is not an ideological foe but a cultural friend, a white Christian country battling swarthy Muslims." Or there could be "some other explanation for this decade-long fawning over Russia and its leader."

Trump Voters Seemingly Unfazed By Russia Story. The Tennessean (7/13, Boucher) reports that residents of Wayne County, Tennessee, which "overwhelmingly voted for Trump," are largely unfazed by the Russia story. The story features comments from a number of local residents, including one Trump voter said that while "talk of Russia, special prosecutors and election tampering won't change his mind," he "might support someone else in the next election if Trump can't deliver on health care."

Study Criticizes Media, Contrasts Trump-Russia Coverage With Clinton-Uraniaum Coverage. The Washington Times (7/13, Harper) reports that a new study for the "conservative press watchdog" Newsbusters.org says that over the past four nights, "the "Big Three" networks devoted over 62 minutes of airtime" to the Russia story, but "those same news sources all but ignored 'Hillary Clinton's Russia-Uranium scandal' two years ago." According to analyst Geoffrey Dickens, the networks dedicated "a grand total of three minutes during the entire two-year period" to that story.

In an op-ed for the Washington Post (7/13, Abernathy), Gary Abernathy, publisher and editor of the (Hillsboro, Ohio) Times-Gazette, that while journalists react to Trump's claims of "fake news" with "public outrage, their popping veins nearly bursting through their thin skins," the media "has approval numbers lower than the president's," and it is "hard to persuade most Americans to feel our pain." Abernathy adds that "even liberals can't argue with a straight face that he's wrong about mainstream media bias." If the media "can prove Trump wrong through the evidence of their work," he continues, "the president's attacks will lose their steam. That day is not here."

Breitbart: Veselnitskaya Worked For "Many Democrats," May Have Opposed Trump Election. Breitbart (7/13, Wong) reports that while Democrats have portrayed Veselnitskaya as a Russian government official, "numerous reports and photos show she has a long record of working with US political figures, including many Democrats." Breitbart adds that although "critics have

accused her of being a high-level Russian agent trying to help the Trump administration, there is no indication she ever wanted to help the Trump campaign, and there are indications she actually opposed Trump's election."

Ryan: Trump Jr. Should Testify Before Congress. Reuters (7/13, Rascoe, Zengerle) reports that House Speaker Ryan on Thursday urged Trump Jr. "to testify to a congressional committee about the alleged links between Trump's election team and Russia." According to CNN, Senate Judiciary Committee Chairman Charles Grassley "planned to send a letter on Thursday to the younger Trump to ask him to appear before his committee in a public session."

As part of a more than 2,000 word profile of Trump Jr. for Politico Magazine (7/13), author Gwenda Blair writes that it is not clear whether the meeting "will lead to criminal charges or be written off as what White House chief of staff Reince Priebus has called 'a big nothing burger,'" but it "provides an opportunity to see whether Donald Jr....has finally emerged as his own man; or whether, in wanting too much to please his father, he has been an overeager and incautious servant."

Democrats Call For Kushner's Security Clearance To Be Revoked. Peter Alexander said on NBC Nightly News (7/13, story 2, 1:55, Holt) that Democrats are questioning why Jared Kushner "still has his security clearance," as he is "under scrutiny for sitting in that meeting with the Kremlin connected Russian lawyer, later omitting it on his security form." Alexander added that Trump "is the only person who can revoke Kushner's top security clearance or fire him."

McClatchy (7/13, Daugherty) reports that Rep. Debbie Wasserman Schultz has introduced two amendments to revoke Kushner's security clearance. The first amendment "would prohibit federal funding for presidential security clearances for someone who is under a criminal investigation by a federal law enforcement agency for aiding a foreign government." The second would bar "funding for security credentials for anyone who 'deliberately fails' to disclose a meeting with a foreign national if the disclosure is required as part of the individual's security clearance credentialing process." Both failed on a party-line vote in committee.

Asked on MSNBC's Morning Joe (7/13) if Kushner should lose his security clearance, Sen. Chris Murphy said, "I think the bigger question is why Jared Kushner still has a job. There seems to be two scenarios here. Either Jared Kushner didn't tell his superiors, didn't tell his boss, the President of the United States that he had this meeting," and he was "potentially compromised inside the White House," or "he did tell people that he had this meeting, that he changed his disclosure forms, and the White House, from the President on down to his spokesman, continued to lie about their campaign's contacts with the Russian government. Either scenario is damning for this White House." In his New York Times (7/13), Nicholas Kristof argues for stripping Kushner of his security clearance, arguing that he "attended a secret meeting whose stated purpose was to advance a Kremlin effort to interfere in the US election, he then failed to report it, and finally he sought a secret channel to communicate with the Kremlin."

Politico (7/13, Palmeri) reports that Kushner "has been pressing other White House aides to more vigorously defend the meeting," but "has faced resistance from some of Trump's top press aides, according to six sources familiar with the matter." According to those sources, Kushner "wants the White House to more aggressively push out surrogates and talking points to change the narrative around the latest twist in the Russia scandal," but "some of the communications aides, including press secretary Sean Spicer, and other senior staffers have expressed reservations," arguing that it is "best to leave it to outside counsel to handle the furor around Trump Jr."

Eugene Robinson writes in the Washington Post (7/13) that while Kushner and his wife, Ivanka Trump, "have tried their best to soar gracefully above the raging dumpster fire" of the Trump Administration, "unhappily for the handsome couple, gravity makes no allowances for charm."

Groups File FEC Complaint Against Trump Jr., Kushner, Manafort. Reuters (7/13, Rascoe, Zengerle) reports that "watchdog groups" have filed a complaint with the FEC against Trump. Jr., the President's son-in-law and adviser Jared Kushner, and former campaign manager Paul Manafort, "arguing the three violated the law by meeting with the Russian." Meanwhile, the FEC "declined on Thursday to conduct a review of foreign interference in the 2016 election," as the three Republicans on the give-member panel "said they could not support moving forward because not all the facts were available."

Bloomberg Analysis: Investigators Scrutinizing Trump's 2013 Visit To Moscow. A Bloomberg News (7/13, Silver, Pismennaya) analysis highlights Trump's 2013 visit to Moscow, during which he "hobnobbed with Russian-Azerbaijani pop star Emin Agalarov, the son of the pageant's host," who "last year had his manager, Rob Goldstone, arrange" the meeting between Trump Jr. and

Veselnitskaya. Bloomberg says that with "multiple probes scrutiniz[ing] Trump ties to Russia, nearly every moment of that November 2013 weekend in Moscow is fraught with potential significance." It is, Bloomberg adds, "a microcosm of both his business world and the legal storm now engulfing his presidency."

Begala: US Should Consider Bombing Russia Over Election Meddling. Townhall (7/13, Vespa) reports that Democratic strategist Paul Begala suggested on CNN Wednesday that the US "bomb Russia in response to their election meddling." Begala argued, "We were and are under attack by a hostile foreign power, and they seem to be abetting that hostile foreign power, We should be debating how many sanctions we should place on Russia or whether we should blow up the KGB, GSU, or GRU [Russia's foreign military intelligence agency]. We should be retaliating massively because, by the way, if I were a Trump supporter I would want to retaliate massively because it has tainted his victory."

Spokesman: Pence Did Not Meet With Officials Linked To Russian Government During Campaign. Politico (7/13, Nussbaum) reports that "after repeatedly dodging the question" during a Fox News interview, Vice President Pence's spokesman Marc Lotter said the Vice President did not meet with any officials linked to the Russian government during the 2016 campaign. Fox News asked Lotter three times "whether Pence had any such meetings," but he "declined to answer." In a statement Thursday, Lotter said, "The Vice President had no meetings with any individual associated with the Russian government during the campaign or transition."

Sessions Releases Government Form Detailing His Contacts With Foreign Nationals. Reuters (7/13, Ainsley) reports that Attorney General Sessions on Thursday released a largely redacted "government form dealing with contacts he has had with foreign nationals, including Russian government officials." While the form "indicated Sessions has had no immediate contact with any foreign government or its representatives in the past seven years," he "has said he met with Russian ambassador Sergey Kislyak in the run-up to the 2016 US presidential election." The Washington Post (7/13, Nakashima) reports that while officials say Sessions' omission of the Kislyak meetings "may not be a violation of security clearance rules as long as the contacts occurred in his capacity as a lawmaker," other experts "say he should have erred on the side of transparency."

Gorka: Administration May Return Diplomatic Compounds To Russia. The Washington Examiner (7/13, Quinn) reports that deputy assistant to the President Sebastian Gorka told CNN Thursday that "the Trump administration is weighing the return of two Russian diplomatic compounds because it wants to give 'collaboration and cooperation a chance.'" Gorka said, "The fact is we may not share the same philosophy, we may not share the same type of statesman view of the world but the fact is there are some issues of common concern." According to Gorka, "the White House may decide to return the compounds if the administration sees 'acts of good faith' from Russia and cited the recent ceasefire in Russia as an example." He said, "If we see good faith, remember more than 400,000 people have been killed in Syria. That is horrific. If we can see acts of good faith come out of the Kremlin with regards to things such as a ceasefire, then perhaps there is a chance for what [Secretary of State] Rex Tillerson wants to see happen, which is an improvement in relations between our two capitals."

Clinton Campaign Spokesman: Democrats "Erred" In Mocking Romney Over Russia. The Washington Free Beacon (7/13, Rutz) reports that Hillary Clinton's former campaign spokesman Brian Fallon tweeted Wednesday that "Democrats 'erred' in their mocking of Mitt Romney in 2012 for calling Russia the nation's top geopolitical foe." Along with link "to a clip of Max Boot, who advised Romney on foreign policy in 2012, sparring with Fox News host Tucker Carlson on Wednesday evening," Fallon tweeted, "Bravo @MaxBoot for calling out Putin lovers in Trump's GOP. We Dems erred in '12 by mocking Boot/Romney Russia worry."

WPost Analysis: Trump Won't Follow Advice Of His Lawyers. Under the headline "Trump's Legal Team Faces Tensions – And A Client Who Often Takes His Own Counsel," the Washington Post (7/13, A1, Rucker, Parker, Barrett) reports, "The challenge for President Trump's attorneys has become, at its core, managing the unmanageable – their client. He won't follow instructions," or "compartmentalize" or "discipline himself. Trump's legal team, led by Marc E. Kasowitz of New York, is laboring to underscore the potential risk to the president if he engages without a lawyer in discussions with other people under scrutiny in widening Russia inquiries, including Jared Kushner." The Post adds that Trump's "and Kushner's attorneys are struggling to enforce traditional legal boundaries to protect their clients, according to half a dozen people with knowledge of the internal dynamics and ongoing interactions. ... Compounding the challenges have been tensions between Trump's and Kushner's legal teams in a frenzied, siege-like environment."

Senate Panel "Very Interested" In Smith's Oppo Research Operation. The Chicago Sun-Times (7/13, Sweet) reports, "An adjunct faculty member at the Illinois Institute of Technology and a recently deceased Lake Forest business executive who played a key role in disclosing sexual misconduct allegations against President Bill Clinton in the 1990s have surfaced as players in the Trump Russia scandal." The Sun-Times says "that the Senate Intelligence Committee, which is investigating Russian meddling in the 2016 presidential campaign and whether there was collusion with the Trump campaign, is 'very interested' in the opposition research operation put together by Peter W. Smith, the Lake Forest resident who died on May 14, and his business associate, John J. Szobocsan" of IIT. The Sun-Times quotes "a source close to the committee" as saying, "The committee will want to speak with or get documents from everybody associated with the Peter Smith operation."

The Chicago Tribune (7/13, Skiba) reports that Smith a GOP "donor and operative...who said he had tried to obtain Hillary Clinton's missing emails from Russian hackers," committed suicide "in a Minnesota hotel room days after talking to The Wall Street Journal about his efforts, public records show." The Tribune says that the Journal "reported it had seen emails written by Smith showing his team considered retired Lt. Gen. Michael Flynn, then a top adviser to Republican Donald Trump's campaign, as an ally."

Kasowitz Says He'll Apologize For Email Threats. The New York Times (7/13, Lafraniere) reports that Trump's lawyer Marc Kasowitz said Thursday that he will "apologize for a series of threatening and profane emails he sent to a stranger who had suggested that he resign." According to ProPublica, which published the email exchange, the unidentified stranger "sent Mr. Kasowitz's law firm an email with the subject line 'Resign Now,'" in which he "wrote that while he did not know Mr. Kasowitz, he believed that 'no good can come' from the lawyer's efforts to defend Mr. Trump." In response, Kasowitz sent "four obscenity-laced emails in 33 minutes," in which he "gave a phone number, demanded that the man call him and told him to 'watch his back.'" Kasowitz wrote, "I already know where you live, I'm on you. ... You will see me. I promise." Kasowitz said in a statement released by his spokesman that "his response to the man was 'inappropriate' and that he wished he could take back his words."

Fusion GPS Founder Won't Testify Before Senate Panel Next Week. Politico (7/13, Dawsey, Cheney) reports that Fusion GPS Co-founder Glenn Simpson "will not testify next week before the Senate Judiciary Committee, according to two sources familiar with his plans." Earlier this week, the panel announced a July 19 hearing that listed Simpson as a witness, but "the request for Simpson to appear was voluntary, and it's unclear whether the committee will seek to compel his testimony."

Media Analyses: Trump Takes Warmer Approach To Macron During Paris Trip.

Media coverage of the President's trip to Paris cast his meeting with French President Emmanuel Macron as warmer than their first meeting. Reports – including coverage on all three networks Thursday night – also cast Trump as presenting a much friendlier view of Paris than he has in the past, but his remarks to the French First Lady are drawing negative coverage. ABC World News Tonight (7/13, story 2, 3:45, Muir), for example, said Trump's "new-found friendship" with Macron was "on display" Thursday, "but it wasn't always that way. ... Starting with that handshake tug of war during their first meeting. Not to mention, the President's repeated Paris bashing." NBC Nightly News (7/13, lead story, 3:00) reported that while Trump "has repeatedly disparaged the city of Paris," he took a "very different tone" on Thursday. Trump: "You're going to have a very, very peaceful and beautiful Paris, and I'm coming back."

Sara Murray reported on CNN's Situation Room (7/13) reported that while Trump made Paris "his punching bag in the past, particularly on national security issues," on Thursday the President "lavished praise on his French counterpart." The CBS Evening News (7/13, story 2, 2:20, Mason) said "the hope is this visit might cement what seemed to be a fractious relationship between the two presidents."

The Washington Post (7/13, Johnson, McAuley) reports the two leaders and their wives dined Thursday evening at the Eiffel Tower after "a day filled with frequent backslaps, handshakes, toothy smiles, knee pats, photo ops and a shared determination to find common ground." While their relationship "up til now...has been largely defined by their stark differences...it is becoming clear the two leaders have a lot in common."

The New York Post (7/13, Brown) notes the two leaders "exchanged a warm handshake" as Macron received the President and First Lady "in a grand arrival ceremony at Les Invalides museum, home to Napoleon's tomb." The Post called it a "very different scene to their famously tense greeting at a NATO summit in May." Politico Europe (7/13, Herszenhorn) likewise says

Thursday's meeting was visit "full of pomp and circumstance," and the Wall Street Journal (7/13, Ballhaus, Horobin) reports the two leaders praised each other as they touted the growing bond between their two nations. Trump told reporters the two allies are "together, perhaps more so than ever" and called Macron a "great leader" and a "tough president."

Trump, Reuters (7/13, Lough, Rascoe) reports even "held the door open to a reversal of his decision to pull the United States out of the Paris climate accord," but "did not say what he would need in return to persuade him to do so." Speaking to reporters at a joint news conference with Macron, Trump said, "Something could happen with respect to the Paris accords, let's see what happens. If it happens, that will be wonderful, and if it doesn't, that'll be OK too."

USA Today (7/13, Bhatti, Onyanga-Omara, Jackson) reports Trump also pledged that the US "would work to protect the environment," dispute leaving the accord. "The United States remains committed to being a leader in environmental protection," he said. For his part, Macron said while the leaders have a "number of disagreements" on the threat of global warming, he respected Trump's decision to pull out of the agreement. The AP (7/13, Salama) says the two leaders "set aside lingering differences on climate change...asserting that it shouldn't prevent them from working together toward a post-war roadmap for Syria and to enhance Mideast security." While acknowledging their differences, Macron said, "Should that have an impact on the discussions we're having on all other topics? No, absolutely not."

Breitbart (7/13, Montgomery) reports Macron said the two had a "long discussion" on a range of different security challenges, and Trump indicated they discussed ways their countries could "strengthen [their] vital security partnerships."

The Washington Times (7/13, Taylor) reports that protesters have planned rallies for Thursday night and Friday, angered by Macron's invitation to Trump. They also plan to "slam Mr. Trump's withdrawal from the Paris climate...as well as the Trump administration's ban on refugees and travel to the US from several Muslim-majority nations." The protests, however, "are not expected to turn violent."

Trump's Comments About French First Lady Prompt Criticism. The New York Times (7/13, Stack) reports that shortly after he arrived in France, President Trump "took a moment to tell the country's first lady, Brigitte Macron, what he thought of her physical appearance." The President was overheard telling Mrs. Macron, "You're in such good shape." He then turned to Macron, and said, "She's in such good physical shape. Beautiful." The encounter was "broadcast live on a Facebook video stream on Mr. Macron's official Facebook account," and quickly went viral. McClatchy (7/13, Hadley) says Trump's "often controversial relationship with women took another downward turn" after many viewed the comments "as sexist and objectifying." On social media, "many users blasted" Trump's comments, calling them "creepy" and "inappropriate." Others, however, "defended Trump's comments and said they have been blown out of proportion." Politico Europe (7/13, Murphy) also reports the exchange.

US Journalists Angered At Trump For Calling On Chinese Reporter. The Washington Times (7/13, Boyer) reports that American journalists traveling with President Trump in Paris "were in a huff Thursday after he called on a Chinese reporter at a press conference instead of a US journalist." The "perceived slight" came at a joint press conference with French President Emmanuel Macron. The Times notes that it was the "second press kerfuffle of the day in Paris." Earlier, when Trump greeted staff at the US Embassy, "pool reporters were kept out of the event."

White House Releases Remarks After Trump Asks Why Off-The-Record Comments Weren't Published. USA Today (7/13, Estepa) reports President Trump had an off-the-record conversation on Wednesday with reporters aboard Air Force One. According to pool reports, deputy press secretary Sarah Huckabee Sanders "declared that it was off the record," but the President later "asked why his comments weren't used." White House official officials later told reporters that "excerpts of the conversation would be released." USA Today notes that "this does appear to be the first time the White House has retroactively made a conversation on the record."

Nice To Mark One-Year Anniversary Of Terror Attack. The Washington Times (7/13, Taylor) reports that on Friday, Nice will mark the one-year anniversary of an ISIS-inspired attack in which a terrorist drove a large, white truck into a crowd celebrating Bastille Day. The Times says that while Paris "was rocked in November 2015 by a coordinated assault that killed 130 people, authorities say, the Nice massacre was a kind of watershed moment that was followed by a macabre wave of similar low-tech terrorist strikes in several Western European nations."

USA Today (7/13, Berton) reports that Hanane Charrihi, whose mother was killed in last year's terror attack in Nice, plans to mark the anniversary of her mother's death on Friday by launching "an association aimed at stopping the radicalization of young Muslims through education."

Media Analyses: New Healthcare Bill Already Opposed By Two GOP Senators.

Senate Majority Leader McConnell rolled out a revised version of the Better Care Reconciliation Act on Thursday, with analysts saying that most of the changes were intended to win over conservatives who opposed the original legislation. But while Sen. Ted Cruz said that he now supports the bill, most coverage says that the bill – and GOP prospects for repeal and replacement of the Affordable Care Act as a whole – are in danger because Sens. Susan Collins and Rand Paul remain opposed, meaning that no other Republicans can vote "no" without killing the legislation.

On ABC World News Tonight (7/13, story 3, 2:25, Muir), Mary Bruce reported, "A new healthcare bill, but the same old problem: Can it get the votes to pass? To appease conservatives, the new version would allow insurers to offer cheaper bare-bones plans that don't cover essential health benefits. It could bring down costs for some. ... But critics worry Americans that need the most care, like people with preexisting conditions could end up paying a lot more." Collins: "We're talking about the health infrastructure in rural America and some of our most vulnerable citizens." Bruce: "To try and sway other moderates, the new version keeps two Obamacare taxes on the wealthy, includes $70 billion that could be used to help reduce premiums, and adds $45 billion to fight the opioid epidemic. But right now, two Republicans say they're voting no. Just one more no vote would sink the bill."

Anthony Mason said on the CBS Evening News (7/13, story 7, 1:45) that the "retooled healthcare plan" is "already in critical condition." CBS' Nancy Cordes: "The response from Republican hold-outs to their party's 'Plan B' was cautious best." Sen. Dean Heller: "We'll read it over the weekend and come up with a decision and see if there is any improvement." Cordes: "The new bill reinstates those taxes to help pay for $45 billion in new opioid funding. But it does not reverse the first bill's deep cuts to Medicaid, the big sticking point for moderates like Ohio's Rob Portman." Portman: "We're still working on ways to ensure that folks who are currently getting coverage under expanded Medicaid have only shuns." Cordes: "The only Republican who went from 'no' to 'yes' today was Ted Cruz."

Kasie Hunt reported on NBC Nightly News (7/13, story 3, 2:10, Holt) that McConnell "has to convince every one of the 50 remaining Republicans to vote yes or the bill fails. What's your bet on whether Mitch McConnell can pull this off?" Senate Majority Whip Cornyn: "Well, he's good. He's pulled more than one rabbit out of the hat." The Washington Times (7/13, Howell) reports that Cornyn said on Fox News, "A 'no' vote on this bill is essentially a vote for Obamacare." But the AP (7/13, Werner, Fram) reports under the headline "New Senate GOP Health Care Bill Teeters On The Brink" that GOP leaders are "increasingly desperate," and Reuters (7/13, Cornwell) says the new bill is "already in trouble."

The New York Times (7/13, A1, Pear, Kaplan) says the changes "may not have been enough to bridge the vast divide that has opened" between GOP conservatives and moderates. While the GOP "said the revised bill would provide roughly $70 billion in additional funds that states could use to help reduce premiums, hold down out-of-pocket costs and otherwise make health care more affordable," it "would still convert Medicaid from an open-ended entitlement to a system of fixed payments to states." The Washington Post (7/13, A1, Sullivan, Snell, Eilperin) says the draft also "leaves in place proposed deep cuts to Medicaid."

The Hill (7/13, Sullivan) writes that "overall, McConnell appears to have shifted the revised bill more toward the conservatives than the moderates," while USA Today (7/13, Kelly, Collins) headlines a report "Republicans Woo Conservatives In Latest Draft." The Wall Street Journal (7/13, A1, Armour, Peterson) reports that the most significant changes were those sought by Cruz and Sen. Mike Lee to permit insurers that sell ACA-compliant plans to also offer plans that do not comply. USA Today (7/13, O'Donnell) reports that the Cruz-Lee measure has been criticized by insurers who say it "would lead to an 'un-level playing field.'" The New York Times (7/13, Park, Parlapiano, Sanger-Katz) reports that the new bill also "lets people use money from health savings accounts to pay premiums," something sought by conservatives.

Still, one key conservative was unmoved. Paul said on Fox News' Fox & Friends (7/13), "The new plan actually doesn't repeal Obamacare. It keeps about half of the Obamacare taxes, keeps most of the Obamacare regulations, keeps most of the Obamacare subsidies and it creates a giant insurance bailout superfund. And I just can't vote for a bill that creates a $200 billion dollar fund to bail out insurance companies."

The Los Angeles Times (7/13, Mascaro, Levey) writes that "with their bid to roll back the Affordable Care Act only a vote away from collapse, Republican leaders scrambled Thursday to rally GOP senators behind revised healthcare legislation in hopes of passing it next week." But

Medicaid "appeared to remain as a major stumbling bloc for at least half a dozen wavering GOP senators." Kayla Tausche said on CNBC's Closing Bel (7/13) that "there are about half a dozen undecideds who either they need to read the bill further, they want to talk about exactly changes could be coming, or they need to talk to their constituents about whether this bill makes wholesale changes far enough to actually win their support." Politico (7/13, Everett, Haberkorn, Karlin-Smith) reports, "Senate Republican leaders are praying that their fragile whip count holds over the weekend."

The Washington Post (7/13) says in an editorial that the new version "is arguably worse than the unpopular bill that preceded it." It "would deeply slash Medicaid" and "would still use the savings to fund an array of tax cuts, including a break for medical-device manufacturers. It would even add a new tax break expanding tax-advantaged health savings accounts, which would mostly benefit wealthier people who have savings to put into them." The New York Times (7/13, Board) similarly editorializes, "Republican leaders in the Senate have accomplished what seemed impossible a few weeks ago: They have made their proposal to destroy the Affordable Care Act even worse." McConnell "has clearly chosen to make the legislation more appealing to conservatives...rather than find ways to address the concerns of centrists." However, the Wall Street Journal (7/13) says in an editorial that the new version retains a tax on investment income, something supported by moderates, but that they still will not commit to the bill.

The CBS Evening News (7/13, story 8, 1:50, Mason) ran a feature on how "the proposed cuts in Medicaid" could impact residents of McConnell's home state of Kentucky. McClatchy (7/13, Pugh, Clark), the Washington Examiner (7/13, King), and Roll Call (7/13, Williams) also have reports on the new legislation.

Alaska Would Get Extra Federal Funding Under Bill. Bloomberg News (7/13, Edney, Recht, Litvan) reports that another change "would send hundreds of millions of extra federal dollars to Alaska," home to wavering Sen. Lisa Murkowski. The money "comes from the legislation's $182 billion in funding meant to help stabilize insurance markets and help states provide coverage. Under the formulas, states – in this case just Alaska – with disproportionately higher premiums would get extra funds from that account."

Graham, Cassidy Working On Alternative Bill. Politico (7/13, Everett) reports that Sen. Lindsey Graham is floating a proposal that he is crafting with Sen. Bill Cassidy that would direct a large share of ACA funding directly to the states. Politico says it "could offer a starting point for Congress if the Senate GOP effort fails next week."

Hawaii Federal Judge Expands List Of Exemptions To Travel Ban.

The AP (7/14, Kelleher) reports that US District Judge Derrick Watson in Honolulu "expanded the list of family relationships needed by people seeking new visas from six mostly Muslim countries to avoid" President Trump's travel ban, ordering the government "not to enforce the ban on grandparents, grandchildren, brothers-in-law, sisters-in-law, aunts, uncles, nieces, nephews and cousins" of those in the US. Watson said in his ruling, "Common sense, for instance, dictates that close family members be defined to include grandparents." Another AP (7/14) report says the ruling also said that the "travel ban can't be enforced against refugees who have assurance that an agency will receive the refugee and provide placement services."

The Washington Post (7/14, Schmidt) reports that the state of Hawaii "had asked Watson to rule on the federal government's interpretation of the Supreme Court's ruling on Trump's executive order, arguing that the list of exemptions to the travel ban was too narrow." Reuters (7/14, Levine, Rosenberg) says that Watson's ruling "dealt a fresh courtroom defeat" to the President. Politico (7/14, Hesson) reports that Neal Katyal, "an attorney for the plaintiffs, the state of Hawaii and a local imam, celebrated the momentary legal win, which could be met with appeals by the federal government." Katyal tweeted, "Sweeping victory in #hawaiivstrump just now."

CBO Report Sees Trump's Budget Proposal As "Overly Optimistic."

The New York Times (7/13, Rappeport) reports that a CBO report released Thursday cast President Trump's inaugural budget "as overly optimistic, expressing doubt about his promises to balance the federal budget." While Trump's budget "projected that by 2027, the economy would achieve a small budget surplus," the CBO analysis said that "the deficit would remain at $720 billion, or 2.6 percent of gross domestic product." The Times adds that the CBO "did not agree that its proposals would generate as much economic growth as the White House has suggested." The budget office "said that the average gross domestic product growth over 10 years is currently 1.8, and that under Mr. Trump's plan it would be 1.9 percent — far lower than the 3 percent the

administration assumes." The Washington Times (7/13, Dinan) says the report, which said that Trump's "deep spending cuts on everything from health care to education would save an additional $3.3 trillion over the next 10 years," but "still never reaches balance," undercuts "the White House's claims that the president would solve the sea of red ink within a decade."

The Wall Street Journal (7/13, Davidson) reports that the CBO said it did not have sufficient information about Trump's economic policy proposals to determine their impact on the budget. The report said, "The president's proposals would affect the economy in a variety of ways; however, because the details on many of the proposed policies are not available at this time, CBO cannot provide an analysis of all their macroeconomic effects or of the budgetary feedback that would result from those effects."

The Washington Post (7/13, Paletta, Swanson, Ehrenfreund) says the CBO report "cast[s] doubt on a plan the White House has touted as central to achieving the president's domestic agenda." The Post says the CBO report was "one of several big questions that emerged Thursday about whether Trump would be able to deliver on the central promises of his populist agenda for governing." The "combination of setbacks and delays on key policy initiatives," the Post adds, "highlight how the president is struggling to advance a populist vision of governing in a Republican Party that historically has not been receptive to such an approach." The Washington Free Beacon (7/13, Meyer) offers a more positive assessment of the CBO report, highlighting that the budget office said Trump's budget "would reduce the deficit over the next decade by $160 billion and increase GDP at the same time."

USA Today (7/13, Collins) says the CBO report came a day after "the White House released a video accusing the CBO of inaccurately forecasting economic statistics in the health care legislation Republicans are trying to pass."

Federal Budget Ran $90 Billion Deficit In June.

The Wall Street Journal (7/13, Davidson) reports that the federal budget deficit for June was $90 billion, in contrast with the $6 billion surplus of June 2016. Since October, when the current fiscal year began, the deficit is up 31 percent from the same period a year earlier.

Trump Asks Sessions To Issue Guidance On Religious Protections For Federal Agencies.

The Hill (7/13, Greenwood) reports President Trump has directed Attorney General Sessions to issue to government agencies new guidance for interpreting federal religious liberty protections. The Attorney General revealed the directive Tuesday in a speech to "the conservative Christian legal group Alliance Defending Freedom."

ABC, NBC Label Christian Group A "Hate Group." The Federalist (7/13, Hemingway) reports ABC News' Pete Madden and Erin Galloway "smeared Christians who believe the Bill of Rights secures religious liberty" as a "hate group," in an article this week headlined, "Jeff Sessions Addresses 'Anti-LGBT Hate Group,' But DOJ Won't Release His Remarks." The story read: "Attorney General Jeff Sessions delivered a speech to an alleged hate group at an event closed to reporters on Tuesday night, but the Department of Justice is refusing to reveal what he said." Townhall (7/13, Barkoukis) reports that both ABC and NBC News described the Alliance Defending Freedom as a "hate group" in headlines this week after Sessions addressed the group. NBC's headline read: "Attorney General Jeff Sessions Criticized for Speaking to 'Hate Group.'"

Trump Administration Puts Obama-Era Regulations On "Long-Term Hold."

Bloomberg News (7/13, Dlouhy, Levin) reports the Trump Administration is putting a number of Obama-era rules "on long-term hold," which the piece says is a "a legally questionable tactic that sidesteps the cumbersome rulemaking process." Among these rules is one by the Federal Highway Administration that requires "local governments monitor greenhouse gas emissions," as well as a "congressionally ordered update of penalties for automakers that fail to meet fuel economy standards." Georgetown University regulatory law professor, William Buzbee commented, "These agencies are saying they're not going to do the job they've previously said needs to be done, and they're hoping to get away with that by promising some future replacement regulation."

Court Allows EPA To Put Methane Rule On Hold For 14 Days.

The Hill (7/13, Cama) reports the Court of Appeals for the District of Columbia Circuit is delaying its own ruling requiring the EPA enforce compliance on a methane pollution rule for 14 days to give the Trump Administration time to consider appealing the ruling. The court wrote that delaying the rule "longer would hand the agency, in all practical effect, the very delay in

implementation this panel determined to be" improper.

Laffer And Moore: Trump Tax Cuts Would Help Cities And States.

In a Wall Street Journal (7/13) op-ed, economist Arthur Laffer and Stephen Moore of the Heritage Foundation, co-chairmen of the Committee to Unleash Prosperity, argue that federal tax cuts will be beneficial to states and cities because they would leave more money in the hands of local businesses and consumers. Rather than pressing for federal aid, they argue, governors and mayors should be lobbing for the tax cuts proposed by President Trump.

Editorial Wrap-Up

New York Times.

"A Scary New Senate Health Care Bill." The New York Times (7/13, Board) editorializes, "Republican leaders in the Senate have accomplished what seemed impossible a few weeks ago: They have made their proposal to destroy the Affordable Care Act even worse." Senate Majority Leader McConnell "has clearly chosen to make the legislation more appealing to conservatives...rather than find ways to address the concerns of centrists. ... Senators who vote for this bill will be sending a simple message to their constituents: If you get sick, you are on your own."

"The Spirit Of Liu Xiaobo." A New York Times (7/13) editorial says Chinese dissident Liu Xiaobo's death is "soul-crushing for his supporters, and there are no signs China will open the door to political reform anytime soon." Now, "it will now be up to Mr. Liu's admirers to dedicate themselves to his dream of a modern China that embraces 'universal values,' which will outlive the ruthless leaders who sought to crush him but never could."

"A Twist In The Sheldon Silver Saga." The New York Times (7/14, Board) says in an editorial that when a federal appeals court overturned the corruption conviction of former New York legislative leader Sheldon Silver, "the judges did not find Mr. Silver to be a blameless man who'd been wronged," but instead acted because of a 2016 US Supreme Court ruling that "narrowed the definition of what types of official misconduct could sustain a corruption prosecution." The judges "flatly rejected" Silver's arguments "that there wasn't sufficient evidence to find him guilty of taking nearly $4 million in illicit payments."

Washington Post.

"The New Senate Healthcare Bill May Be Worse Than The Old One." The Washington Post (7/13) says in an editorial that the new version of the Senate Republican healthcare bill "is arguably worse than the unpopular bill that preceded it." It "would deeply slash Medicaid" and "would still use the savings to fund an array of tax cuts, including a break for medical-device manufacturers. It would even add a new tax break expanding tax-advantaged health savings accounts, which would mostly benefit wealthier people who have savings to put into them."

"True Honor Lies Not With China's Rulers But With The Man They Imprisoned Until His Death." The Washington Post (7/13) editorializes that late Chinese dissident Liu Xiaobo "epitomized the dissident tradition, fighting back relentlessly but peacefully against a regime in his country that epitomized modern-day authoritarianism."

"Would Selling Naming Rights For Metro Stations Really Be Worth It?" In an editorial, the Washington Post (7/13) writes that the DC Metro Board Finance Committee's recent proposal to seek corporate sponsorship for certain stations as one option to raise revenue for the DC metro system shouldn't be carried out. Although the Post notes that other transit systems have generated "millions of dollars selling the opportunity to name stations," it adds, "It is hard to imagine...how the system would avoid controversy if iconic names such as L'Enfant Plaza or Metro Center were muddied with corporate logos." Instead of selling naming rights, the Post argues, "Congress and the system's regional partners need to establish a dedicated revenue stream for Metro."

Wall Street Journal.

"ObamaCare Moment Of Truth." The Wall Street Journal (7/13) says in an editorial that the new version of the Senate Republican healthcare bill retains a tax on investment income, something supported by moderates, but that they still will not commit to the bill.

"California's Cap-And-Trade Problem." The Wall Street Journal (7/13) editorializes that if Republicans go along with California Gov. Jerry Brown's plan to extend cap and trade, they will

relieve pressure from Democrats in low-income districts that face competitive reelection races. Such Democrats are reluctant to extend the program after voting earlier this year to raise gas taxes and impose a new vehicle registration fee, policies that already will strain the finances of manufacturers, oil refiners, and food processors – major employers in low-income areas.

"China's Empty Nobel Chair." On its editorial page, the Wall Street Journal (7/13) hails late Chinese dissident Liu Xiaobo's work in trying to bring democracy to China, and says his death is a reminder to the world to keep attention on China's rights abuses.

Last Laughs

Late Night Political Humor.

Jimmy Kimmel: "The President and the First Lady arrived in Paris today at the invitation of French President Emmanuel Macron. There they are together. Last time they had a handshake, it lasted longer than like two of Trump's marriages."

Stephen Colbert: "I don't blame Donald Trump for skipping town. The man has had a really rough week. His son admitted to colluding with Russia. His healthcare plan is looking dead in the water. And his press secretary still has his head stuck in that honey pot."

Stephen Colbert: "Today Trump met with France's elegant First Lady Brigitte Macron, and of course, he treated her like any other woman, by objectifying her."

Stephen Colbert: "Polls show that only 12 percent of Americans support [the current GOP healthcare bill]. To put that in perspective, 12 percent is the Rotten Tomato score of the talking cat movie Nine Lives. Coincidentally, Nine Lives is also what you will need to survive TrumpCare."

Stephen Colbert: "Ted Cruz's amendment would allow insurers to sell cheaper plans with fewer benefits that would likely attract younger and healthier Americans, so instead of a comprehensive plan, insurers could charge you a little bit each month for a service that doesn't give you everything you really want. Like Netflix, but you die."

Trevor Noah: "As we speak, President Trump is in France celebrating Bastille Day with French President Emmanuel Macron, who declared war on Trump by making him go to a museum with him, and President Trump retaliated by hitting on the French First Lady in full view of everyone."

Conan O'Brien: "The new Republican healthcare bill is out. The bad news is older people still pay more than younger people. Of course, the good news is they don't pay more for long."

Conan O'Brien: "President Trump and the First Lady are visiting France. Now there have been some misunderstandings due to the language barrier like at dinner when Melania was offered a crepe, and she said, 'No thanks. I'm married to one.'"

Trump Administration Cancels Hundreds Of Obama-Era Regulations.

The Washington Post (7/20, Eilperin, Paletta) reports that OMB on Thursday described "how it would jettison hundreds of existing or planned regulations as part of its larger push to ease federal restrictions on the private sector." The agency issued a list that "shows the extent to which this administration is determined to erase many of the Obama administration's policy priorities." In all, the Administration "said it was pulling or suspending 860 pending regulations" including 469 that "were being completely withdrawn" and 391 that were "being set aside or reevaluated."

The Washington Times (7/20, Boyer) reports that OMB Director Mulvaney "accused the Obama administration...of keeping a 'secret list' of proposed regulations during Mr. Obama's eight-year regulatory onslaught against businesses." According to Mulvaney, 179 of the "860 rules or proposed rules that the Trump administration has killed...came from what he called Mr. Obama's 'secret' list." Mulvaney said, "They had a bunch of things that they wanted to regulate. ... They just didn't want to tell you about it. They thought it would be bad for their re-election prospects in 2012, so they created a secret list of regs that were not disclosed to you folks. We are disclosing it."

Reuters (7/20, Shepardson, Volcovici) reports the Trump Administration identified almost 300 regulations from the EPA, DOI and DOE relating to energy production and environmental protection that it plans to rescind, review or delay. Trump had identified many of the targeted regulations in his March energy executive order, but the rules will now undergo a formal rulemaking process to be rescinded or revised. The Hill (7/20, Wheeler) reports the EPA announced plans to redefine US waters and is extending delays on emission standards. The agency is also planning to propose a rule that would withdraw the Clean Power Plan. The Hill (7/20, Cama) reports the Clean Water Rule is also going to be altered. The Interior Department plans to publish formal changes to two regulations, one regulating hydraulic fracturing on federal

land and one governing methane emissions from oil and gas drilling on federal land. The DOI is also considering action on a rule that would have allowed for higher royalty rates from energy extraction on federal land. The Department of Energy is looking to consider energy efficiency rules and regulations for small-scale LNG exports.

Daily Caller (7/20, Bastasch) and E&E Publishing (7/20, Skibell) also provided coverage.

Interior Dept. Ordered Glacier Park Chief, Other Climate Expert Pulled From Zuckerberg Tour.

The Washington Post (7/20, Rein) reports that days before Facebook chief executive Mark Zuckerberg's visit to Glacier National Park on Saturday "to tour the melting ice fields that have become the poster child for climate change's effects on Montana's northern Rockies," the Trump Administration "abruptly removed two of the park's top climate experts from a delegation scheduled to show him around, telling a research ecologist and the park superintendent that they were no longer going to participate in the tour." The Post calls the "decision to micromanage" Zuckerberg's visit "highly unusual – even for a celebrity visit," and points out that the Facebook founder, along "with the broader tech community in Silicon Valley has positioned himself as a vocal critic of President Trump."

The AP (7/20) reports that an official for the Interior Department "says the agency pulled Glacier National Park's superintendent from a recent park tour with Facebook founder Mark Zuckerberg to save money, not to mute criticism over climate change." Agency spokeswoman Heather Swift said Thursday that the decision "was about using government resources and tax dollars responsibly." Swift "says the climate debate did not factor into the Interior Department's decision, and that 'every tax dollar matters.'"

Dem To Seek Investigation Into Interior Staff Reassignments.

The Hill (7/20, Cama) reports that Sen. Maria Cantwell "wants an investigation into an Interior Department employee's claim that he was reassigned due to his work on climate change." Cantwell "said at a Thursday hearing that she would officially ask Interior's inspector general to look into the matter." Cantwell's "request came a day after Joel Clement, the former director of Interior's Office of Policy Analysis, wrote a Washington Post op-ed saying he was improperly reassigned to an accounting position because of his work on helping Alaskan communities cope with climate change."

Additional coverage was provided by Roll Call (7/20, Nawaguna), NPR (7/20), the New Orleans (LA) Times-Picayune (7/20, Sneath), the Portland (ME) Press Herald (7/20, Woodard), the Daily Caller (7/20, Pearce), the Huffington Post (7/20, D'angelo), the Nation Sun News (7/20), and GQ (7/20, Moore).

'Iron Curtain' Of Russia Coverage Blocks News.

The Washington Times (7/20, Harper) reports that the Western Conservative Summit "begins Friday and features a host of accomplished, optimistic speakers," including Interior Secretary Ryan Zinke. Jeff Hunt, director of the Centennial Institute and chairman of the summit, said, "Secretary Zinke is a patriot and true leader of the West. He understands the values and views of Western conservatives."

Senate Advances Controversial Trump Interior Nominee.

The Hill (7/20, Henry) reports that by a 56-39 margin, the Senate voted Thursday "to end debate on David Bernhardt's nomination to be deputy secretary of the Interior Department." Democrats had "raised concerns about Bernhardt's nomination because of his experience in the George W. Bush Interior Department, where he was solicitor general, and his work in the private sector." The article notes that "no Republican voted against the procedural motion on Thursday, and seven Democrats voted to advance Bernhardt's nomination."

Alaskan Joe Balash Nominated For Senior Interior Department Post.

The Fairbanks (AK) News-Miner (7/20, Friedman) reports that the Interior Department "announced Thursday that President Donald Trump intends to nominate Joe Balash to serve as the department's Assistant Secretary for Land and Minerals Management." Interior Secretary Ryan Zinke said, "It's been a long time since the Department had an Assistant Secretary from Alaska, and the president's nomination of Joe Balash further proves his commitment to Alaska and rural America as a whole. Joe is no stranger to the Department of the Interior having worked alongside the department on a number of projects in Alaska. He brings an incredible combination

of state and federal experience to the table, and he will be very effective in helping the department work with Congress to do the work of the American people. I look forward to his speedy confirmation in the Senate."

The Alaska Journal of Commerce (7/20, Brehmer) reports that Balash said, "As a nation, we are blessed with tremendous public lands and resources that give our people unparalleled opportunities for recreation and job creation for generations to come. I look forward to working with Secretary Zinke and his incredible team to seize on those opportunities and deliver on President Trump's America First Energy Plan."

Additional coverage was provided by the Alaska Public Radio Network (7/20, Ruskin).

Susan Combs Promises Senators A More "Collaborative" Interior Department.

The Houston Chronicle (7/20) reports that "former Texas comptroller Susan Combs, who has been nominated for a top position at the Department of Interior, assured senators Thursday she would work closely with states on conservation policies that can impact oil and gas drilling and other development on federal lands." During a hearing before the Senate Energy and Natural Resources Committee, Combs "promised a 'collaborative' approach during questioning from western states including Sen. Lisa Murkowski, R-Alaska, and Sen. Mike Lee, R-Utah." She said, "Secretary [Ryan] Zinke did discuss trust a number of times. He wants to be sure field offices are out there working in an open collaborative way."

Murkowski To Use August Work Extension To Approve Energy Nominees.

The Washington Examiner (7/20, Siciliano) reports that Senate Energy and Natural Resources Committee Chairwoman Lisa Murkowski will "use the delay in the August congressional recess to move as many of President Trump's energy nominees as possible through to confirmation." Murkowski "made the comments Thursday while holding a hearing to consider six nominees to serve the Energy and Interior departments, noting that confirming Trump's nominees is taking longer than expected." According to the article, "with the August session extended by two weeks, the chairwoman said her priority will be to 'move these nominees as quickly' as possible to confirm them 'before we leave in August.'"

Agencies Investigate If Military Training Set Oregon Fires.

The AP (7/20) reports that "federal and state agencies are investigating if there was a link between a series of wildfires in southeastern Oregon and military training exercises." In 2015, the Interior Department, the U.S. Environmental Protection Agency and Oregon's Department of Fish and Wildlife "all warned of potential wildfire risk from flare use, citing species such as sage grouse that could be threatened by loss of habitat from wildfire." According to the article, "all three agencies asked the Air National Guard to restrict its use of flares during periods of 'high' fire danger, rather than just during 'extreme' fire danger."

Additional Coverage: Secretary Zinke Announces Formation Of Made In America Recreation Advisory Committee.

Additional coverage that Interior Secretary Ryan Zinke met with representatives from America's outdoor recreation industry on Tuesday was provided by the Los Alamos (NM) Daily Post (7/20), AmmoLand (7/20, Evans), and Power Sports Business (7/20).

Additional Coverage: Zinke Asks Key Questions About Cascade-Siskiyou Monument.

Additional coverage of the review of national monuments was provided by the Salem (OR) Capital Press (7/20), Oregon Public Broadcasting (7/20, Moriarty), Ashland (OR) Jefferson Public Radio (7/20, Moriarty), th eSonoran News (AZ) (7/20), What's Up Newp (RI) (7/19, Belmore), and the Hi-Desert (CA) Star (7/20, Anacker).

Additional Coverage: Interior Department Awards Maritime Heritage Grants.

Additional coverage that Interior Secretary Ryan Zinke on July 7 "announced the recipients of the 2016 Maritime Heritage Grants" was provided by the Maritime Executive (7/20, Krepp).

Communication Breakdown.

In a piece for the Flathead (MT) Beacon (7/20, Reece), Myers Reece criticizes the contradicting statements on Glacier National Park's loosening of motorized boat restrictions on park waters. Reece writes that it's "troubling to see anything resembling a bureaucratic breakdown in communication at a time when Glacier is bursting at the seams with visitors, especially when it

involves an issue as critical as aquatic invasive species."

Bureau Of Indian Affairs

Tribes, Governor Sign Changes To Compact Allowing New Casino.

The AP (7/20) reports that Connecticut Gov. Dannel P. Malloy and the Mashantucket Pequot and Mohegan tribal leaders "on Thursday signed amended compacts and memoranda of understanding between the state and the two federally recognized tribes." The General Assembly and the federal Bureau of Indian Affairs must still approve the agreement "that could lead to a new satellite tribal casino." According to the article, "the revised agreements ensure the proposed, jointly owned casino the tribes want to build in East Windsor will not compromise the state's current revenue-sharing arrangement with the tribes, who own and operate Foxwood Resort Casino and Mohegan Sun."

Additional coverage was provided by the New Haven (CT) Register (7/20, Stuart) and the Springfield (MA) Republican (7/20, Glaun).

Federal Bills Could Help Mashpee Tribe.

The Falmouth (MA) Enterprise (7/20, Houghton) reports that "a subcommittee of the US Congress could help the Mashpee Wampanoag Tribe in its efforts to solidify land previously granted in trust in Mashpee and Taunton." The House Committee on Natural Resources's Subcommittee on Indian, Insular and Alaska Native Affairs "heard testimony from four witnesses on Thursday, July 13, during a hearing on a proposal to update the 1934 Indian Reorganization Act." During the hearing, several members of the panel "said that they would like to move forward with a 'clean Carcieri fix.'"

DOI, Calif. Tribe Say Casino Challenge Should Be Tossed.

Law360 (7/20, Westney) reports that the Interior Department and a California tribe "each urged a federal judge on Wednesday to toss a suit challenging department-issued procedures that allow the tribe to pursue an off-reservation casino, saying the procedures don't violate federal gaming or environmental law."

Bureau Of Land Management

Tribe Wants Centuries-Old Remains Found In Idaho.

The AP (7/20, Ridler) reports that "at least one tribe will seek possession of human bones found protruding from an Idaho badger hole after tests determined they weren't from modern day homicide victims but belonged to people who lived five centuries ago." Shoshone-Paiute Tribe Chairman Ted Howard "said Thursday that Shoshones have occupied the southwestern Idaho area for thousands of years and the well-preserved bones of a young adult and a 10- to 15-year-old should be returned to the tribe for proper burial." Michael Williamson, a spokesman for the U.S. Bureau of Land Management, "said the agency is working through a process required by the Native American Graves Protection and Repatriation Act to return the bones to a tribe." According to the article, "as part of that process, the agency is mailing out formal letters to about a half dozen tribes that might be culturally affiliated with the area where the bones were found."

Springfield BLM/Forest Service Office Runs Out Of Bargain-rate $10 Lifetime Senior Recreation Passes.

The Eugene (OR) Register-Guard (7/20, Wihtol) reports that "local senior citizens in 51/2 hours Thursday drained the Springfield regional office of the U.S. Forest Service and Bureau of Land Management of all its $10 lifetime senior passes to federal recreation sites, but the agencies have ordered more and hope to have some available Friday." Meanwhile, "nationwide, people 62 or older are swamping the federal government with last-minute applications for the credit-card-size senior passes, ahead of an eightfold price increase to take effect Aug. 28."

Quiet Recreation Generates Economic Bang.

The Redding (CA) Record-Searchlight (7/21, Benda) reports that "a first-of-its kind study shows non-motorized recreation on Bureau of Land Management lands in far Northern California generated more than $40 million in direct spending in 2015." According to the article, "authored

by ECONorthwest and commissioned by The Pew Charitable Trusts, the study focuses on BLM's Redding and Arcata offices, which are developing a combined draft resource plan for the 396,000 acres of public lands they manage."

Additional coverage was provided by the Eureka (CA) Times Standard (7/20, Houston).

BLM Approves Crooked River Ranch Emergency Exit.

KTVZ-TV Bend, OR (7/20, Allen) reports that the Prineville District of the Bureau of Land Management "announced Thursday it has approved an emergency exit for Crooked River Ranch, partnering with residents and Deschutes County to develop the route while maintaining recreational opportunities and supporting conservation as part of the agency's multiple-use mission."

Bureau Of Ocean Energy Management

NC Governor On Trump Drilling Plan: 'Not Off Our Coast'.

The AP (7/12) reports that "under pressure from President Donald Trump, North Carolina's governor announced his opposition on Thursday to drilling for natural gas and oil off the Atlantic coast, saying it poses too much of a threat to the state's beaches and tourism economy." Ahead of "a Friday deadline for comment from elected officials on the Trump administration's request for companies to perform seismic testing under Atlantic waters, Democratic Gov. Roy Cooper held a news conference at a coastal state park to announce he'll be registering the state's opposition." Cooper said, "There is a threat looming over this coastline that we love and the prosperity it brings, and that's the threat of offshore drilling." He continued, "As governor, I'm here to speak out and take action against it. I can sum it up in four words: 'not off our coast.'"

Additional coverage was provided by McClatchy (7/20, Murawski).

Chris Hall: Protecting South Carolina's Beaches And Economy.

In an op-ed for the South Strand News (SC) (7/21, Hall), Chris Hall is the Chair for the South Carolina Chapter of the Sierra Club, opposes "offshore drilling in South Carolina – an industry that would permanently damage the coast, deplete billions of dollars in tourist revenues, and would not benefit local economies." He claims that "national efforts to allow drilling are out of touch with the wishes of the communities that would bear the risks associated with offshore drilling and an oil spill." Moreover, he argues that "South Carolina is especially likely to get the short end of the stick if drilling takes place off our coast, because any jobs created would likely go to Virginia, not South Carolina."

Fish And Wildlife Service

House Clears Path For Alaska's Long-awaited King Cove Road.

The Washington Times (7/20, Wolfgang) reports that the House of Representatives passed 248 to 179 a bill authorizing a "massive land swap" between the state of Alaska and the federal government that would allow for the construction of a road connecting King Cove, Alaska – an isolated community accessible only by water or air – to nearby Cold Bay. Under the legislation, tens of thousands of acres of state land would be exchanged for several hundred acres of the Izembek Wildlife Refuge, through which the road would run. President Trump "appears ready and willing" to sign the bill.

The AP (7/20, Daly) reports that "Republicans on the House Natural Resources Committee said in a report this week that at least 19 people have died as a result of plane crashes or waiting to be medically evacuated to Cold Bay, the nearest town with an all-weather airport." On the other hand, "environmental groups say the rural community has other, better alternatives, such as boats, and for decades have fought an intrusion into the refuge."

Coverage by the AP was also picked up by the Washington (DC) Times (7/20, Daly), ABC News (7/20, Daly), the Minneapolis (MN) Star Tribune (7/20, Daly), the San Francisco (CA) Chronicle (7/20, Daly), the Daily Mail (7/20), and KAAL-TV Austin (MN) Austin, MN (7/20, Daly).

Additional coverage was provided by the Alaska Native News (7/20).

NY: Endangered Karner Blue Butterfly Exceeds Recovery Goals.

The AP (7/20, Esch) reports that "the Karner blue butterfly has exceeded recovery goals in the

rare New York habitat where it was discovered by Russian author Vladimir Nabokov in the 1940s, officials announced Thursday." The butterfly, "federally listed as endangered 25 years ago, is doing well in the sandy pine barrens west of Albany, the Albany Pine Bush Preserve Commission said." According to the article, "the population has grown from less than 1,000 to more than 15,000 in 10 years." The 2003 federal Karner blue recovery plan for the Albany Pine Bush Preserve "set a goal of 3,000 as the minimum population for survival."

Additional coverage was provided by the Albany (NY) Spotlight News (7/20, Franco) and WAMC-AM Albany, NY (7/20, Lucas).

Hearing Saturday On Mexican Gray Wolf Plan.

The Santa Fe New Mexican (7/21, Moss) reports that "after more than three decades, the U.S. Fish and Wildlife Service is in the final stages of creating a new management plan for the Mexican gray wolf." The draft species management plan was "released at the end of June." On Saturday, "during a meeting with Fish and Wildlife officials in Albuquerque, the public will have an opportunity to weigh in on the wolves' future in the state."

In an editorial, the Santa Fe New Mexican (7/20) urges "all sides" to "speak up so that a stronger recovery plan emerges."

Court Denies Amicus Brief In Trout Lawsuit.

The Alamosa (CO) Valley Courier (7/20, Geiger) reports that "the Colorado District Court has denied the 10-county coalition's amicus curiae brief filing, which was filed earlier in the year to aid litigation on the Rio Grande cutthroat trout." The Center for Biological Diversity "filed a lawsuit against U.S. Fish and Wildlife Service (FWS) last July for removing the Rio Grande cutthroat trout from the endangered species list." The group "argues that fish is still endangered while the government says that local conservation efforts have helped enough that it is no longer endangered."

James Gill: In St. Tammany, It's A Question Of Favoring Frogs Over People (and Extinction).

In his column for the Baton Rouge (LA) Advocate (7/20, Gill), James Gill writes that even if the U.S. Supreme Court hears an appeal in the dusky gopher frog case, "its decision will not save the frog." According to Gill, "a reversal of the lower courts, and a finding that Fish and Wildlife exceeded its authority, would be the frog's death warrant." However, "to uphold them would leave its fate to the tender mercies of the thwarted landowners."

National Park Service

There Will Be No Change To Name Of V.I. National Parks, NPS Says; Legal Authority Remains The Same.

The Virgin Islands Consortium (VIR) (7/20) reports that "following a press release issued by Senate President Myron Jackson stating that the National Park Service (NPS) had suddenly reorganized the Virgin Islands National Park to the Caribbean National Parks," the National Park Service Southeast Regional Office "issued a statement to The Consortium on Thursday afternoon, strongly denying those claims." Saudia Muwwakkil, an NPS spokesperson, explained, "Each Caribbean unit of the National Park System is significant to America's natural and cultural heritage. The Southeast Regional director recently realigned the parks' reporting relationships to push decision-making closer to the field. The superintendents of each Caribbean park will now report to a group superintendent stationed in the Caribbean. This adjustment establishes a working relationship between the parks that breaks down silos and opens access to resources and expertise. There will be no changes to the parks' names or legal authorities."

Park Service May Soon Acquire Wright Factory.

The Dayton (OH) Daily News (7/20, Gnau) reports that the Dayton Aviation Heritage National Historical Park "may soon get bigger." Tony Sculimbrene, executive director at the National Aviation Heritage Alliance , "said the alliance is hoping to gain control of the former Wright Airplane Factory — located between U.S. 35 and Third Street near Home Avenue — possibly in the next 30 days." The goal is "to make the former factory — the first airplane factory in the world — part of the park."

Meanwhile, the My Dayton (OH) Daily News (7/20, Gnau) reports that Dean Alexander,

superintendent at the Dayton Aviation Heritage National Historical Park, was set to retire Thursday.

Glacier National Park Still Has Glaciers, For Now.

USA Today (7/20, Villano) reports that "long-term studies indicate that the famous ice fields that inspired" Glacier National Park's "name are, in fact, shrinking." The research "predicts that all 25 named glaciers likely will be gone by 2030." However, "these large-scale changes are still at least a decade away, and the park has plenty of grandeur to go around until then."

Company Finishes Oil Search In Big Cypress; Damage Assessment Underway.

The Naples (FL) Daily News (7/20, Staats) reports that "a Texas-based company has wrapped up a look for oil in the Big Cypress National Preserve, for now at least, but the agency in charge of monitoring the work doesn't know the extent of any environmental damage, a spokeswoman said this week." Burnett Oil Co. "crews drove 30-ton trucks with giant tires into the preserve's backcountry to press vibrating steel plates against the ground and record seismic signals." National Park Service "staff members worked before, during and after the seismic survey to 'record, capture and mitigate any potential impacts from the survey,' preserve spokeswoman Ardrianna McLane wrote in an email."

Utah's Crowded Zion National Park May Require Reservations.

The AP (7/21, Whitehurst) reports that Zion National Park is considering requiring reservations "to manage an overwhelming surge of visitors." According to the article, "people without reservations could pay an entrance fee and drive through the park, but they couldn't stop to hike or picnic." The article says that "after a series of public meetings, Zion rangers are proposing an online reservation system, similar to the way campsites are reserved now."

Carlsbad Caverns National Park Proposed Fee Hike.

The AP (7/20) reports that "officials at Carlsbad Caverns National Park are proposing to raise general admission fees from $10 to $12 per person starting in October." Park officials "said Thursday that revenues from admission fees are used to pay for deferred maintenance projects not covered by the park's base budget."

Additional coverage was provided by KRWG-FM Las Cruces, NM (7/20).

Something Old: Historic Bank's Beauty Lures Brides-To-Be.

The AP (7/20, Brown) reports that the Second Bank of the United States is attracting "wedding photographers and soon-to-be brides and grooms." According to the article, "the Greek Revival-style bank is one of the most popular places for wedding photos in the city, so much so that the National Park Service set up a permit office to accommodate wedding photo shoot requests." Independence National Historical Park "issued over a dozen wedding shoot permits at the bank in June, its busiest month for wedding shoots and about 400 permits in 2016, according to park ranger Adam Duncan." However, "the number is likely much higher because not all couples apply for a permit."

Yosemite-area Fire Destroys Almost 50 Structures.

USA Today (7/20, Visalia (calif.), Times-Delta) reports that "a wildfire that started about 10 miles outside the borders of Yosemite National Park grew Thursday to more than 100 square miles and destroyed 45 structures, fire officials said." According to the article, "more than 3,100 firefighters are on hand to continue to try to contain it, looking to protect the historic foothills town of Mariposa, Calif.," and keep "one of the nation's most popular national parks open to its estimated 20,000 daily visitors." Cal Fire "said lines supplying power to Yosemite National Park continue to be threatened." Jaime Richard, Yosemite National Park spokeswoman, said, "Here in Yosemite National Park, we are seeing impacts from the smoke, so we advise anyone in the park with asthma to be aware of air quality. But, Yosemite National Park is open and we aren't seeing a significant impact at this time."

Small Wildfires In National Park Are 50 Percent Contained.

The AP (7/20) reports that "two small wildfires burning in Theodore Roosevelt National Park in western North Dakota are 50 percent contained." Both blazes are "in remote, rugged territory and are less than a square mile in size." The National Park Service "says the Jones Creek Fire is 5 acres and the Halliday Well Fire is 11 acres."

Aztec Ruins Event Focuses On Native American Art.

The Farmington (NM) Daily Times (7/21, Smith) reports that "for the second year, Aztec Ruins National Monument will present an event this weekend focusing on arts and crafts produced by Native American artists." Park Ranger Cyresa Bloom "said the event will feature 14 artists from across the Southwest, including members of the Navajo and Hopi tribes and from the pueblos of Kewa and Zuni."

Plateau-style Long Tent On Exhibit At Whitman Mission National Historic Site.

The Walla Walla (WA) Union-Bulletin (7/20) reports that Whitman Mission National Historic Site will "showcase a traditional southern Plateau tribal long tent for public view and education from July 26-Aug. 2." According to the article, "construction of the structure will include more than 125 tepee poles and eight full-size tepee canvases, in order to make an extended tepee that is 65 feet long, 18 feet high and 25 feet wide."

Controversial $5.5 Million Home For Sale Inside Black Canyon Of The Gunnison National Park.

KDVR-TV Denver (7/20, Dahlke) reports that "a controversial home located inside Black Canyon of the Gunnison National Park in southwest Colorado is up sale for $5.5 million." The article notes that "the residence is the only luxury home located inside a National Park in the U.S., according to the real estate listing." It was "the center of controversy when it was built."

Additional Coverage: Unexploded World War II-Era Ordnance Found On Outer Banks.

Additional coverage that "more unexploded World War II-era ordnance has been found on the North Carolina coast" was provided by the AP (7/20) and the Raleigh (NC) News & Observer (7/20, Moody).

Office Of Insular Affairs

Insular Affairs Nominee Is A Petroleum Advocate And Climate-Change Skeptic.

The St. John Source (7/20) reports that "the U.S. Senate Committee on Energy and Natural Resources will hold a hearing Thursday to consider Doug Domenech, President Donald Trump's nominee for assistant secretary of insular affairs within the Department of the Interior." According to the Interior Department, Domenech has "support from V.I. Gov. Kenneth Mapp as well as the governors of the other insular territories under the auspices of Insular Affairs." Domenech is "a strong proponent of fossil fuels who asserts that man has very little role in climate change and that climate change is not a major concern."

MINA Struggles With Budget Cut.

The Saipan (MNP) Tribune (7/20, Bautista) reports that "federal budget cuts are seriously affecting environmental watchdog Micronesia Island Nature Alliance and the continued survival of many of its programs." According to MINA executive director Roberta Guerrero, "the group is currently faced with a 30-percent cut in its annual budget and its Tasi Ranger Watch Program faces the most damage if nothing is done about the lack of funding." According to Guerrero, MINA is short "about $55,000 to continue with many projects."

Yap Cultural Delegation Performs In Shenzhen, China.

Marianas Variety (7/20) reports that "the Yap delegation on a cultural-exchange tour in China had the honor of performing a second time in the city of Shenzhen in Guangdong Province on July 13, 2017 at the China Development Institute." According to the article, "the group's stay in Shenzhen was sponsored in part by the Pacific Islands Trade & Invest-Beijing office, the China Development Institute and the Liancheng company doing business as Luen Thai in Micronesia and across the Pacific region."

Office Of Surface Mining

DEP's Caperton Calls Federal Conflict Of Interest Review 'Offensive'.

The Charleston (WV) Gazette-Mail (7/20, Ward) reports that "the Justice administration's top

environmental regulator is complaining that a federal Interior Department review to ensure he has no financial ties to coal mines is 'both troubling and offensive,' according to documents released under West Virginia's Freedom of Information Act." Austin Caperton, secretary of the state Department of Environmental Protection, "objected when a federal ethics officer asked him to provide additional information about his personal finances and his consulting firm, Caperton Energy Co." The Office of Surface Mining Reclamation and Enforcement "requires financial disclosures so it can enforce a federal law that prohibits anyone who regulates the coal industry from having a direct or indirect financial interest in a coal-mining operation." In a May 23 letter to the OSM, Caperton "eventually provided some additional information, but he also insisted there was no reason for federal officials to ask for it, or to continue to examine his current finances or his employment prior to being appointed to the DEP post by Gov. Jim Justice in January."

Top National News

Trump Asks About Pardoning Himself As Mueller Expands His Investigation.

President Trump has reportedly asked advisers about his power to pardon aides, members of his family, and himself. Word of Trump's inquiries about pardons came on the same day media reports say special counsel Robert Mueller has expanded his probe into Trump's business transactions and a day after Trump said in an interview with The New York Times that any investigation beyond Russia would be outside Mueller's mandate. Coverage is negative for the President, casting his comments to the Times as a veiled threat to fire Mueller – a possibility that lawmakers and pundits say could lead serious consequences for Trump.

The Washington Post (7/20, Leonnig, Parker, Helderman, Hamburger) reports that Trump's lawyers have been "discussing the president's authority to grant pardons, according to people familiar with the effort." The Post adds that one of the people said that Trump "has asked his advisers about his power to pardon aides, family members and even himself in connection with the probe." While Trump's lawyers "declined to comment," one adviser "said the president has simply expressed a curiosity in understanding the reach of his pardoning authority, as well as the limits of Mueller's investigation." The Post quotes an adviser as saying, "This is not in the context of, 'I can't wait to pardon myself.'"

Meanwhile, The Hill (7/20, Chalfant) says Trump is "ramping up his criticism" of Mueller, "warning that the special counsel investigating Russian election interference would cross the line by looking into his finances." However, in a development that is "sure to exacerbate Trump's frustration with the Russia probe," Mueller is "reportedly doing just that." Bloomberg News (7/20, Farrell, Berthelsen) cites "a person familiar with" Mueller's investigation who said that the special counsel "is examining a broad range of transactions involving Trump's businesses as well as those of his associates." Investigators "are looking at Russian purchases of apartments in Trump buildings, Trump's involvement in a controversial SoHo development in New York with Russian associates, the 2013 Miss Universe pageant in Moscow and Trump's sale of a Florida mansion to a Russian oligarch in 2008, the person said."

Business Insider (7/20, Bertrand) says Mueller appears to be "interested in learning more about Trump's relationship with Aras Agalarov, a billionaire Azerbaijani-Russian developer who paid Trump $20 million to bring his Miss Universe pageant to Moscow in 2013." It is Agalarov's son, Emin, who "requested a meeting between [Donald] Trump Jr. and a Russian lawyer last June at Trump Tower." The AP (7/20, Day) says investigating the Trump family's "sprawling business ties would bring an investigation the president has called a partisan "witch hunt" even closer to the Oval Office."

Townhall (7/20, O'Brien) reports that Trump's lawyer John Dowd "says the probe has now strayed too far from Mueller's initial task." Dowd wrote in an email, "Those transactions are in my view well beyond the mandate of the Special counsel; are unrelated to the election of 2016 or any alleged collusion between the Trump campaign and Russia and most importantly, are well beyond any Statute of Limitation imposed by the United States Code." However, another Bloomberg News (7/20, Barrett) report says the special counsel "appears to have ample authority to examine a broad range of activities involving Trump's businesses." Mueller's appointment "included an extraordinarily broad mandate." The CBS Evening News (7/20, story 3, 2:00, Mason) reported that Mueller's mandate "is broad and allows him to investigate any matters that arose or may arise directly from the investigation."'

The Washington Times (7/20, Boylan, Miller) reports that the expansion of Mueller's investigation "has rattled his conservative base with fears that the New York billionaire could be brought down by shady business deals – not collusion with Russia." However, Trump's

"staunchest supporters...remain convinced that there was never collusion with Russia and that the special counsel is part of an open conspiracy to remove the president."

The CBS Evening News (7/20, story 2, 2:30, Reid) reported that in the New York Times interview, Trump criticized Mueller "for accepting the job as head of the Russia investigation just one day after interviewing with Mr. Trump to be FBI director." Trump: "What the hell is this all about? You talk about conflicts, he was interviewing for the job." The Washington Post (7/20, Blake) reports in its "The Fix" blog that Trump "didn't quite say he would try to fire Mueller for such a thing, but he sure hinted at it." Asked if would "fire Mueller if he went outside of certain parameters of what his charge is," Trump said, "I can't, I can't answer that question, because I don't think it's going to happen."

Hallie Jackson said on NBC Nightly News (7/20, story 5, 2:15) that Trump's "warning to the special counsel could sound to some like a threat." John Dickerson said on the CBS Evening News (7/20, story 4, 1:35, Mason) of Trump's conduct, "He's saying exactly what is on his mind, even if it breaks the normal rules. Whether those rules are about criticizing an attorney general or criticizing Special Counsel Mueller, even though that criticism could be considered interference in the investigation, which is one of the things the President is being investigated for."

Timothy L. O'Brien writes in a column for Bloomberg View (7/20) that Trump "has undoubtedly been pondering what a close examination of his finances and deals might unveil," which is "why he issued the warning to Mueller, and why there's a strong possibility that Mueller's time at the helm of this investigation will end badly, a la James Comey." Jeffrey Toobin also anticipated Mueller's eventual firing by Trump, telling CNN's Situation Room (7/20), "I think Robert Mueller is standing on a banana peel." Toobin added that "there could well come a time when the President – just as he did with James Comey, the former director of the FBI – says, 'I won't tolerate this anymore' and asks his subordinates in the Justice Department to fire Mueller. The interesting question will be, as in 1973 when Richard Nixon ordered the firing of Archibald Cox, the Watergate special prosecutor, how many members of the Justice Department's staff...will quit rather than do it or take the order and follow him. We could be at that moment at any point."

Sen. Chris Coons warned of serious consequences if Trump fires Mueller, telling CNN's The Lead (7/20), "I think there would be very widespread rejection of that action as being a fundamental threat to the rule of law in our country and I think strong action would be taken on a bipartisan basis by the Senate and the House." Coons added that "if the President steps in and cuts it off by firing Bob Mueller, I think he will pay a very heavy price here in Congress." Rep. Joaquin Castro (D-TX), a member of the Intelligence Committee, said on CNN's Situation Room (7/20) that it's "inappropriate for the President to try to dictate the boundaries of the investigation," and if he tries to fire Mueller, "you're going to see a strong bipartisan backlash in Congress. ... I would think you would have calls for impeachment on the Republican side if that happened."

Charles Krauthammer said on Fox News' Tucker Carlson Tonight (7/20), "I think the problem here at root is the whole ideal idea of the special counsel, the special prosecutor. Their mandates are essentially unlimited. Their resources are unlimited. Politically, they are unfireable. Legally, yes, but we know what happened with Nixon when he tried to fire a special prosecutor. I think the same would happen to Trump."

A Politico (7/20, Samuelsohn, Dawsey) analysis says that while Trump's "decision to talk off the cuff about the Russia probe to reporters allowed him to put out his version of events," it also "increased the legal risks to him, as well as to his children and the growing number of associates who have been pulled into the expanding investigation." Interviews "can be used to establish facts or intent, offering investigators a gold mine of information but potentially creating conflicts for others that can lead to headaches for their various lawyers – or to criminal charges including perjury or obstruction of justice."

FBI Investigation Relying On Discredited Dossier. The Washington Times (7/20, Scarborough) reports that the FBI "routinely" asks witnesses in its investigation "about the accusations in a dossier against Donald Trump, further expanding the reach of a discredited opposition research paper sourced from the Kremlin and financed and distributed by Democrats." According to "a source close to the investigation," the dossier serves as "a checklist agents tick off as they go over numerous unverified charges denounced as fabrications by President Trump and his aides."

Trump Reshuffling His Legal Team. On its website, CNN (7/20, Borger, Bash, Brown, Diamond) reports that Trump is "reshuffling his legal team." Lead attorney Marc Kasowitz "will see his role recede, according to two sources with knowledge of the matter." John Dowd and Jay

Sekolow "will now be the President's primary personal attorneys for the investigation, according to the two sources with knowledge of the situation. Dowd will take the lead." Inside the White House, attorney Ty Cobb "will take the lead...when he formally starts his job on July 31." Politico (7/20, Dawsey) reports that Mark Corallo, the spokesman for Trump's legal team, "has resigned within two months of being on the job, according to people familiar with the matter." Corallo "had grown frustrated with the operation and the warring factions and lawyers," and he was "concerned about whether he was being told the truth about various matters."

Mueller Investigating Possible Money Laundering By Manafort. The Wall Street Journal (7/20, Orden) reports that Mueller is also investigating possible money laundering by former Trump campaign manager Paul Manafort, who for years worked for a pro-Russia party in Ukraine.

NYTimes Rejects Manafort's Call For A Retraction. Politico (7/20, Gold) reports in its "On Media" blog that The New York Times has rejected Manafort's request that it retract a story published Wednesday which reported that "he had been in debt to pro-Russia interests by as much as $17 million before he joined Trump's presidential campaign in March 2016."

Trump Team Investigating Mueller's Investigators. The New York Times (7/20, Schmidt, Haberman, Apuzzo) reports that Trump's lawyers and aides are looking into "the professional and political backgrounds" of investigators hired by Mueller, "looking for conflicts of interest they could use to discredit the investigation – or even build a case to fire Mr. Mueller or get some members of his team recused, according to three people with knowledge of the research effort." The search "includes scrutinizing donations to Democratic candidates, investigators' past clients and Mr. Mueller's relationship with James B. Comey." The Times calls the effort "another sign of a looming showdown between Mr. Trump and Mr. Mueller." The Washington Post (7/20, Leonnig, Parker, Helderman, Hamburger) says Trump's lawyers are seeking to "limit or undercut" Mueller's investigation, "building a case against what they allege are his conflicts of interest."

Senate Panel Preapproves Subpoenas For Trump Jr., Manafort, Simpson. As Mueller's investigation proceeds, the Senate Judiciary Committee has preapproved subpoenas for Trump Jr. and Manafort should they fail to accept by Friday evening an invitation to appear before the panel next week. The Washington Post (7/20, Demirjian) reports that Chairman Charles Grassley said Thursday that if Manafort, Trump Jr., and Fusion GPS co-founder Glenn Simpson do not accept the invitation by Friday night, "subpoenas would be issued 'almost immediately.'"

The Washington Post (7/20, Bump, Guskin) reports that a Post-ABC News poll this month found that 63 percent of Americans said the "meeting between relatives of Donald Trump and his campaign chairman and a Kremlin-linked Russian attorney" was not appropriate. SurveyMonkey asked "how concerned people were about the meeting coordinated," and "more than half...said that they had only some or very little concern about the meeting, while a bit under half said that they had 'quite a bit' or a lot of concern."

Kelly, Bossert Confirm Russia Tried To Manipulate 2016 Election. USA Today (7/20, Johnson) reports that while Trump will not "say whether he believes the Russia government meddled in the presidential election," DHS Secretary Kelly and Counterterrorism adviser Thomas Bossert "this week affirmed the US intelligence community's unqualified assessment that it did." Both Kelly and Bossert "said they backed the conclusion that Russia carried out a campaign of cyberattacks and fake news to influence the election in favor of Trump." Politico (7/20, Watkins) reports that Bossert said Thursday that Russia's government "clearly tried to manipulate the 2016 election," a "widely held conclusion that his boss in the Oval Office has repeatedly questioned." Bossert said the hacking and release of DNC emails were "unacceptable efforts and behaviors by a foreign nation state," but he stressed "that there had been no manipulation of ballot counts."

The Washington Free Beacon (7/20, Gertz) reports that Bossert said the Administration "is preparing to conduct aggressive action against foreign nations that hit the United States with cyber attacks." The policy the White House will unveil next month "will seek to create cyber deterrence – making hostile actors pay a steep price for attacking through the cyber realm." Said Bossert, "I'm ready to put some policy changes in place that are going to increase the cost to the bad actor and unify the like-minded so that we can throw the people that are not on that page out of the internet, if necessary."

Trump's Ambassadorial Nominees Balk At Question Of Russian Interference. The AP (7/20, Lardner) reports that some members of the Senate Foreign Relations Committee were "troubled" Thursday by the "unwillingness" of several of the President's ambassadorial nominees "to say unequivocally whether Russia sought to interfere in the 2016 presidential election." Lewis Eisenberg, Trump's choice for ambassador to Italy "told the committee he'd prefer to 'reserve judgment' on whether Moscow interfered until ongoing investigations are completed." Woody Johnson, Trump's nominee to be the ambassador to the UK, "said he hasn't 'studied the evidence

on the inside,' so he can only go by what he reads." Kelly Knight Craft, "nominated by Trump to be the ambassador to Canada, said based on the publicly available material she's read, 'it looks as if, yes.'" Trump's nominee for NATO ambassador, Kay Bailey Hutchison, "said there is a 'good likelihood, yes' that Russia interfered." K.T. McFarland, who was nominated to be ambassador to Singapore, said simply, "Yes."

Obama Administration Had Plan To Counter Election Day Cyberattack. TIME (7/20, Calabresi) reports that the Obama Administration, in October 2016, "quietly produced a plan...to counter a possible Election Day cyber attack that included extraordinary measures like sending armed federal law enforcement agents to polling places, mobilizing components of the military and launching counter-propaganda efforts." The plan "stipulates that 'in almost all potential cases of malicious cyber activity impacting election infrastructure, state, local, tribal, and territorial governments' would have primary jurisdiction to respond." However, in the event of a "'significant incident' the White House had several 'enhanced procedures' it was prepared to take," including "the deployment of 'armed federal law enforcement agents' to polling places if hackers managed to halt voting."

RIA Report: US, Russia In Talks To Create Joint Cyber Security Working Group. Reuters (7/20) cites a report from Russia's RIA news agency which said that the Russia and the US "are in talks to create a joint cyber security working group." Andrey Krutskikh, "a special presidential envoy on cyber security," said, "The talks are underway ... different proposals are being exchanged, nobody denies the necessity of holding the talks and of having such contacts."

Democrats Accused Of Dragging Out Nunes Ethics Investigation. The Washington Free Beacon (7/20, Kredo) cites "multiple sources" who said that Democrats on the House Ethics Committee are "intentionally dragging out an investigation into Intelligence Committee Chair Devin Nunes" in "an attempt to influence the Intelligence Committee's sensitive Russia probe and promote their own political careers." These Democrats are accused of blocking the Ethics panel's investigation into allegations that Nunes "disclosed classified information in comments alleging Obama administration officials had accessed classified intelligence reports in order to gain information on Trump associates," in "an effort to discredit the top Republican and keep him sidelined from the sensitive Russia probe, which Democrats have increasingly used to score political points against Trump and boost their own political profiles."

In an op-ed for the Washington Post (7/20), former White House chief of staff Denis McDonough defends the Obama Administration's response to Russian interference and argues that "it remains important that the new administration follows through on the steps we took to make clear that the United States is united in our opposition to Russian interference and will not tolerate such activities in the future."

White House: Trump "Disappointed" In Sessions, But "Clearly He Has Confidence In Him."

Most media reports on the President's criticism of Attorney General Sessions cast Trump in a decidedly negative light. The coverage, which included stories on all three network newscasts, drew the picture of a White House roiled by the Russia meddling probe and of a president turning on a loyal ally. The CBS Evening News (7/20, story 2, 2:30, Reid) reported that in a "long, rambling interview" with the New York Times, the President said "Sessions should have never recused himself" from the Russia investigation, "and if he was going to recuse himself, he should have told me before he took the job and I would have picked somebody else." Trump's comments sparked speculation about Sessions' standing in Team Trump. The AP (7/20, Tucker, Lemire), for example, says the President's "airing of his long-simmering frustrations...raised significant new questions about the future of the nation's top prosecutor," and the Los Angeles Times (7/20, Bierman) that they led to "immediate speculation whether the attorney general would resign or be fired."

Jeff Zeleny said on CNN's Situation Room (7/20) that a "White House official" said Trump's comments about Sessions had a "chilling effect" inside the White House, as aides' "thinking went something like this, 'If this could happen to Jeff Sessions, it could perhaps happen to any of us.'" To the Los Angeles Times (7/20, Bennett, Bierman), "Trump's remarks...reinforced the sense that no person close to the president is safe, even if the attack might appear to undermine the president as much as the object of his anger." The Washington Post (7/20, Phillip), meanwhile, says "Sessions learned...the loyalty Trump expects isn't always reciprocated."

The question of whether Trump was looking for Sessions' resignation came up during a White House briefing. NBC Nightly News (7/20, story 5, 2:15) showed Deputy White House Press Secretary Sarah Huckabee Sanders saying, "I think you know this president well enough to know that if he wanted somebody to take an action, he would make that quite clear." ABC

World News Tonight (7/20, story 5, 2:50, Vega) noted that she added, "Clearly he has confidence in him or he would not be the attorney general." The Washington Times (7/20, Boyer) reports Sanders went on to point "to 'progress' at the Justice Department on issues like cracking down on the MS-13 gang, immigration and cybersecurity," and remarked, "Those are great examples of successes they've had at the Department of Justice." The Hill (7/20, Stanage) indicated that she also said "more broadly...'the president is frustrated by the continued witch hunt' of the Russia investigation." At any rate, the Washington Examiner (7/20, Westwood) reports, "the White House spokeswoman said Trump and Sessions have not spoken in the last 24 hours."

USA Today (7/20, Page) says that "to get anything done in office...Trump needs friends," yet "he has lashed out at one of his few original loyalists," the very "first senator to endorse his presidential bid and a regular surrogate on the campaign trail last year." In an editorial, the Wall Street Journal (7/20) similarly concludes that an unconventional political figure such as Trump is in dire need of seasoned aides such as the Attorney General, Defense Secretary Mattis, or Gary Cohn. To the Journal, experienced figures such as those help protect Trump from his own impetuousness. A New York Times (7/20) editorial is particularly harsh: "In less than an hour on Wednesday afternoon...Trump found a way to impugn the integrity and threaten the livelihoods of nearly all of the country's top law enforcement officials, including some he appointed, for one simple reason: They swore an oath to defend the Constitution, not him."

Along similar lines, Jake Tapper said on CNN's The Lead (7/20) that a Republican senator speaking on background told him, "I'm very disturbed that the President would throw Jeff Sessions under the bus. I think Sessions did the right thing ethically and the right thing legally. To undermine the Attorney General is very bad form for the President. ... One gets the impression that the President doesn't understand or he willfully disregards the fact that the Attorney General and law enforcement in general, they are not his personal lawyers to defend and protect him.... It's unclear if he understands that. And that's pretty disturbing." Another unnamed GOP senator said, "I know Jeff Sessions to be a person of real integrity, which is why he recused himself. I don't think it's good for any President of the United States to undermine the federal judiciary."

Under the headline "Republicans Rally Around Sessions After Trump Criticism," The Hill (7/20, Williams, Wong) reports that "Republicans on Thursday rushed to the defense of...Sessions." Said Rep. Chris Collins (R-NY), "I think Jeff Sessions has been and will continue to be an excellent attorney general. ... I don't expect Jeff Sessions to resign, I would not want him to resign." The Hill added that "most Republicans stopped short of criticizing Trump's remarks, characterizing them as 'rhetorical' and evidence of the president's growing frustration with the media frenzy surrounding the various investigations into his campaign's potential ties to Russia." USA Today (7/20, Jackson) noted, however, that "some lawmakers backed Trump's comments on Sessions." Sen. Rand Paul, for example, tweeted, "I agree with @realDonaldTrump, his Attorney General should not have recused himself over reported incidental contacts with Russian officials."

On the other hand, Politico (7/20, Gerstein) reports, "some Democrats" found Trump's comments "alarming." Senate Minority Whip Durbin "said the interview has 'shaken me' and said the nation was 'on the doorsteps of a constitutional crisis.'" Sen. Chris Coons, on CNN's The Lead (7/20), said Trump is "confusing what the role is of the Department of Justice." If Trump "mistakenly thinks the Department of Justice is merely a political extension of the White House, then he ought to have a good look at the Constitution and the importance of the independence of the investigatory functions of the FBI, the DOJ, and in this case, special council Bob Mueller." Asked if he believes Trump was suggesting to Sessions that he should resign, Coons said, "If I were in Jeff Sessions' shoes, if I were attorney general, I think this was a suggestion I should quit. It is strikingly disloyal from someone who should be grateful that...Sessions was the first senator and in some ways the longest and most dogged defender of Donald Trump in the course of his campaign."

The New York Times (7/20, Sullivan, Ruiz) reports, meanwhile, that "Sessions vowed on Thursday to stay in his job," saying "he and his Justice Department colleagues intended to continue to serve and he would do so 'as long as that is appropriate.'" Added Sessions, "We are serving right now. The work we are doing today is the kind of work that we intend to continue. ... I am totally confident that we can continue to run this office in an effective way." The Washington Times (7/20, Miller) quotes Sessions as saying, "We in this Department of Justice will continue every single day to work hard to serve in the national interest and we wholeheartedly join in the priorities of President Trump." The Hill (7/20, Savransky), Politico (7/20, Gerstein), Townhall (7/20, Pavlich) and the Wall Street Journal (7/20, Viswanatha), among other news outlets, run similar accounts of Sessions' remarks. Reuters (7/20, Chiacu, Ainsley) notes the Attorney General "was flanked by Deputy Attorney General Rod Rosenstein and Acting Federal Bureau of

Investigation Director Andrew McCabe, who were both also criticized by the president."

Jeffrey Toobin said on CNN's Situation Room (7/20), "I've never heard a president insult a member of his own staff, Cabinet, with such vehemence, and not fire him. So that's what makes this so unusual. Sometimes presidents fire people, but here you have this rebuke without firing. But, you know, we are in a different land with President Trump in charge and, I think, Attorney General Sessions is just going to keep doing his job and I think he can keep doing it until and unless he just gets out and out fired."

Charles Krauthammer said on Fox News Special Report (7/20) that Sessions "has obviously lost the confidence of the President. They are not going to say it because if you say it, he has to resign. He doesn't want to resign. But I think this sort of limits his tenure. It's only a matter of time."

USA Today (7/20, Groppe, Estepa) reports that "while past presidents have clashed with their top law enforcement officials – which in one case led to a resignation – a president has never directly fired his attorney general." Trump "made headlines when he dismissed acting Attorney General Sally Yates for directing the Justice Department not to defend the president's temporary travel ban," but "that was the exception, not the rule. What's more, Yates was only in that temporary position for 10 days."

The Washington Post (7/20, Zapotosky, Horwitz), meanwhile, reports that "if Sessions were to resign or be fired, that could call into question the future of the special counsel investigation," because "according to federal regulations, the special counsel reports to the attorney general, though because Sessions is recused, Mueller reports to Rosenstein."

McConnell Plans Healthcare Vote For Next Week.

Senate Majority Leader McConnell is expected to hold a vote to proceed on legislation to repeal the ACA next week, but media reports are pessimistic about its chances for passage citing the absence of Sen. John McCain, who has been diagnosed with brain cancer and is in Arizona reviewing treatment options, the CBO's finding that the latest plan would leave 22 million people without coverage, and unsuccessful efforts by GOP leaders to convince holdouts to back the measure.

USA Today (7/20, Collins) says McConnell's task is complicated by McCain's absence. However, a spokesman for McConnell said the vote is still on. USA Today adds that four Republicans have said they will oppose the Senate bill to repeal and replace the ACA, while three have announced their opposition to a plan that would repeal the law without a replacement. It was not clear as of Thursday afternoon which measure would me brought to a vote next week. The Washington Times (7/20, Howell) says the GOP effort faces "an even steeper climb" due to McCain's cancer diagnosis as well as "new budget estimates that say 22 million people fewer people would hold insurance under the latest replacement plan." The Times says McConnell is working to win over holdouts and GOP leaders "want to vote to proceed onto a health care bill Tuesday."

However, Politico (7/20, Haberkorn, Everett, Kim) is pessimistic about the chances for any measures, saying a the "harsh reality" that "they're extremely unlikely to repeal Obamacare in the coming days" is setting in among Senate Republicans. The number are "increasingly working against them, with four Republican senators having announced opposition to starting debate – though the bill could further change – and more unannounced but likely nos." The AP (7/20, Fram) also sees an "uphill drive" as the White House and Republican leaders "fished Thursday for ways to win over recalcitrant senators" but saw "no indications they'd ensured the votes needed to even start debating the party's legislative keystone."

Reuters (7/20, Cornwell, Becker) says "senators expressed irritation" after efforts "to win over holdouts appeared to yield no progress," while the Washington Examiner (7/20, King) describes "confusion" as "lawmakers don't know which bill they will be voting on next week." Republican Conference Chairman Sen. John Thune said, "I think probably straight repeal," but leadership "doesn't have enough votes for either measure to pass."

The New York Times (7/20, Thrush, Haberman) reports that Trump thought he could secure the votes of reluctant Republicans "through pleasantries, cajoling and, ultimately, some Oval Office muscle," but he "scared no one into supporting the bill." The Times says that "fear of a powerful president is the surest lever to move a lawmaker from a 'no' to a 'yes' on a presidential priority," Trump "has proved simply too unpopular nationally...too weak in many senators' home states, too erratic and too disengaged from the details of governing to harness his party, as other new presidents have." Charles Blow writes in his New York Times (7/20) column that Trump "never had any plan" and "campaigned on applause-line policies: Anything that roused a

response from his rabid adherents, he repeated and amplified." Trump, he adds, "never gave details because the details didn't exist, and he wouldn't have been able to understand and articulate them if they did."

However, Eugene Robinson writes in the Washington Post (7/20) that "this isn't the first time the GOP's gratuitously cruel effort to 'repeal and replace' the Affordable Care Act has looked dead," and "it would be a mistake to take anything for granted." Arguing that the "most urgent task right now is to make sure a stake is driven through the heart of the Republican effort," Robinson calls on Americans to "keep the pressure on." A Washington Post (7/20) editorial argues that the CBO's finding that "the latest version of the Senate bill would result in 22 million more people without health coverage by 2026" is proof that the GOP bill should "stay dead," lest it becomes "a painful reality that Republicans imposed on the country, all so they could keep an irresponsible campaign promise."

Paul Says He'll Vote To Proceed In Exchange For Deal On Amendments. The Hill (7/20, Carney) reports in its "Floor Action" blog that Sen. Rand Paul said Thursday "that he would support the motion to proceed to the House-passed healthcare bill, which is being used as a vehicle for any action, if he could get a deal on amendments." Paul said, "If they want my vote, they have to at least agree that we're going to at least have a vote on clean repeal." Paul "floated that Senate leadership should guarantee votes on some of the caucus's most prominent healthcare proposals – including repeal-only, repeal-and-replace and a bill created by" Sens. Susan Collins and Bill Cassidy – "as a way to get him on board."

Paul said on MSNBC's Morning Joe (7/20), "The only difference between the Republican and the Democrat plan is the Democrat plan tried to get you to buy insurance through a mandate, government force. The Republican plan is going to dump the money in on the tail end to subsidize insurance companies. I object to both. In some ways it's actually more morally reprehensible for the government or the taxpayer to be asked to subsidize insurance companies that double their profit under Obamacare and now make $15 billion a year. I just think it's a terrible and a very un-Republican idea to give a major corporation taxpayer money."

GOP Proposal Seeks To Offset Impact Of Medicaid Cuts. The Wall Street Journal (7/20, Radnofsky, Peterson) says that as Senate Republicans seek support for their bill, they pushed a proposal that they said could lighten the impact of the measure's Medicaid cuts on the poor. The plan being advanced by Republicans and CMS head Seema Verma would use revenue from the ACA's taxes to reduce out-of-pocket costs for people who are forced to leave Medicaid as a result of cuts in the Republican bill.

Cruz: Consumer Freedom Option Will Expand Coverage. Sen. Ted Cruz made a case for his Consumer Freedom Option on Fox News' Hannity (7/20), arguing that HHS "concluded that you would see 2.2 million more people get insurance. ... Consumer Freedom expands coverage. More people get health insurance. And then what happens to premiums is dramatic. For people that choose the Freedom plans, that buy a plan off the exchange without the Obamacare mandates, their premiums would drop over $7,000 a year. For those who decide to stay on the Obamacare exchanges, because of the power of competition, their premiums drop by over $5,500 a year. That's real money in people's pockets."

Support For ACA Has Grown Since Election. The New York Times (7/20, Zernike, Goodnough) reports that since the election, support for the ACA "has risen...with more people now viewing the law favorably than unfavorably." The Times says the change "may not denote newfound love of the Affordable Care Act so much as dread of what might replace it."

Federal Judge Declines To Remove Block On Sanctuary Cities Order.

Politico (7/20, Lima) reports that US District Judge William Orrick III in San Francisco "has denied a request by the Trump administration to remove an injunction halting President Donald Trump's executive order on so-called sanctuary cities from being implemented." The denial "further thwarts the Trump White House's attempt to effectively penalize cities providing safe haven to undocumented immigrants by threatening to strip them of federal funding." Judge Orrick "moved to decline a request by the Justice Department to reconsider whether a memo by" Attorney General Sessions "narrowed the scope of Trump's executive action and lifted the need for an injunction," and ruling that "the narrower interpretation released by Sessions did not alter the court's initial April decision to impose the block."

Mulvaney Favors "Lowest Possible Corporate Rate."

OMB Director Mulvaney said on Fox News' Fox & Friends (7/20), "I don't think we have given up on that low as possible corporate rate. I would love to see a 15 percent rate. I would love to

see less. But the truth of the matter is we are still pushing for lowest possible corporate rate we can. ... The Democrats will say it's a give away to big business. It's not. We are trying to get back to a healthy American economy. We define that as three percent growth."

Gore Says Trump Causing Huge "Upsurge" In Climate Activism.

The Hill (7/20, Kamisar) reports former Vice President Al Gore has seen "one bright spot in President Trump's decision to withdraw from the Paris climate agreement: an explosion of pro-climate activism." He "said he is emboldened by the defense he's seen of the climate ever since Trump's controversial decision to pull the U.S. out of the accord." Gore said during a town hall interview for SiriusXM/Variety Magazine, "What we are seeing in the United States of America today is the biggest upsurge of activism in favor of the climate that we have ever experienced. And it's in reaction to what President Trump has said. ... And we are seeing the same thing around the world — the other countries have doubled down on their commitment."

Editorial Wrap-Up

New York Times.

"President Trump's Contempt For The Rule Of Law." In a particularly harsh editorial, the New York Times (7/20) says, "In less than an hour on Wednesday afternoon President Trump found a way to impugn the integrity and threaten the livelihoods of nearly all of the country's top law enforcement officials, including some he appointed, for one simple reason: They swore an oath to defend the Constitution, not him."

"Mr. Macron Starts Making Waves." The New York Times (7/21) in an editorial on French President Emmanuel Macron, says that his "entry to the French presidential stage was about as exciting and theatrical as electoral politics gets," but now, says the Times, the "pushback" has begun, starting with the military, as Pierre de Villiers, the army chief of staff, "used an unprintable epithet before a parliamentary committee" in response to Macron's proposed cutbacks, "and quit." The Times says it is "likely to get worse," because Macron is planning greater budget cuts in order to reduce the deficit to the EU's "limit of 3 percent of gross domestic product."

Washington Post.

"The GOP's Repeal And Replace Plan Should Stay Dead." A Washington Post (7/20) editorial argues that the CBO's finding that the latest version of the Senate healthcare bill "would result in 22 million more people without health coverage by 2026" is proof that the GOP bill should "stay dead," lest it becomes "a painful reality that Republicans imposed on the country, all so they could keep an irresponsible campaign promise."

"Once More, The GOP Is Set To Trample On DC's Sovereignty." In an editorial, the Washington Post (7/20) writes that House Republicans' 28 to 24 vote last Thursday to repeal the "Death With Dignity Act," DC's medical-aid-in-dying law signed in December 2016, represents what DC Del. Eleanor Holmes Norton called "bright-light hypocrisy" for a party that emphasizes the importance of federalism. The Post argues that "there has not been a single documented instance of abuse" from DC's law, and concludes by asking, "The Constitution gives Congress authority over the District, but why would a party that advocates less federal control want to undermine local officials?"

"What A President With Nothing To Hide Would Say To The New York Times." In an editorial, the Washington Post (7/20) says that it "matched a few of [President] Trump's Wednesday comments to the New York Times...with imagined quotations of what an ethical president might say." For example, the Post quotes Trump as telling the Times, "Well, Sessions should have never recused himself, and if he was going to recuse himself, he should have told me before he took the job, and I would have picked somebody else. ... I think [it] is very unfair to the president." The Post then offers it's "imagined" Trump response, "Jeff Sessions was very involved in my campaign, so of course he had to recuse himself from any matters having to do with my campaign. Once it came out, after his confirmation, that he had given inaccurate testimony to the Senate Judiciary Committee about his meetings with Russian officials, it was doubly a no-brainer."

Wall Street Journal.

"Trump's NAFTA Stakes." The Wall Street Journal (7/20) in an editorial says that the priorities

issued by the Administration for NAFTA renegotiation indicate that President Trump may not be pursuing a protectionist agenda. The Journal says that NAFTA has been good for US business, helping US companies to compete internationally, particularly automotive companies that make use of Mexican labor and Canadian raw materials, but also farmers, who benefit from the reduction of Mexico's agricultural tariffs. The Journal adds that many of the Administration's priorities were agreed to by Canada and Mexico in negotiating the Trans-Pacific Partnership. The Journal says that with Canada's recent trade agreement with the EU and Mexico's current negotiations with the EU, both are reducing their dependence on US trade, and urges the President to pursue freer trade with both.

"Sessions Hangs In There." In an editorial, the Wall Street Journal (7/20) concludes that an unconventional political figure such as President Trump is in dire need of seasoned aides such as the Attorney General, Defense Secretary Mattis or Gary Cohn. To the Journal, experienced figures such as those help protect Trump from his own impetuousness.

"The Other Sessions Issue." In an editorial, the Wall Street Journal (7/20) writes that Attorney General Sessions' decision this week to restore a civil asset forfeiture program restricted by Attorney General Eric Holder in 2015 was a decision to revive what many on both the left and the right consider a constitutionally questionable policy with little due process or law enforcement accountability. The Journal also argues that the Justice Department program allows federal law enforcement, such as the Drug Enforcement Administration, to subvert state laws prohibiting non-criminal asset seizures, and concludes that the Supreme Court or Congress should act to end the policy.

Last Laughs

Late Night Political Humor.

Jimmy Kimmel: "In case you didn't know, today marks six months of President Trump. That's right. He's already halfway through his presidency. How could it only be six months? Yesterday alone felt like six months in the Trump Administration."

Jimmy Kimmel: "But he likes what the President is doing. All I know is Donald Trump gets the job, six months later, OJ's out of prison."

Jimmy Kimmel: "You know, as a businessman, Trump made a lot of things in America. The decision to have all his suits and ties made in China was made in America, for instance."

Stephen Colbert: "Say what you want about OJ, he never met with Sergei Kislyak."

Stephen Colbert: "Forget about a Cold War with Russia, I think we may be having a thumb war with France."

Stephen Colbert: "When asked about the Special Prosecutor Robert Mueller, Trump said he shouldn't have been appointed, and Trump warned that Mueller should stay out of investigating his finances. That's not a red flag at all. 'Sure, the police are welcome to search anywhere in my house, as long as they don't dig up the patio. There's nothing down there. Or the shed. And forget the crawlspace, it's way too crowded in there.'"

Trevor Noah: "Mr. President, I hate to be the one to break it to you: Macron wasn't holding your hands because he liked it. He was just trying to keep them off his wife."

Trevor Noah: "This entire interview made it alarmingly clear Donald Trump sees the presidency as one of his companies. It's whole purpose is to serve only him. Attorney General Jeff Sessions recused himself because ethics and legal norms demand it. Good for the country, unfair for Trump, because in his mind it defeats the purpose of the Justice Department, which he thinks is not to uphold law, but to do the President's bidding. The same way he thinks the purpose of the Energy Department is to charge his iPhone. 'Plug it in, Rick, daddy's got to tweet!'"

Trevor Noah: "The only thing more shocking than his autocratic view of power is his willingness to talk so open about it. In a strange way, Donald Trump is both the most honest and dishonest President of all time. I figured it out, people, he's not Hitler, he's Abraham Nixon."

Jimmy Fallon: "On one hand, OJ is a convicted felon. On the other hand, he managed to keep Trump off TV for a whole afternoon, so it's kind of a community service."

Jimmy Fallon: "The other big story is this interview President Trump did with the New York Times. And the paper said that he made several false claims. And Trump was like, 'But you chose to print them, so once again, fake news.'"

Jimmy Fallon: "In the interview, Trump warned Special Counsel Robert Mueller not to look into his family's finances. Then Mueller was like, 'Well, wasn't going to, but now I definitely am.'"

Jimmy Fallon: "Trump also said that Washington, DC should do a big parade down Pennsylvania

Avenue like the Bastille Day parade that he went to in Paris. Trump said it should be just like his inauguration, but with people."

Seth Meyers: "President Trump has now been in office for six months, oh I'm sorry, 6,000 months. That's right. President Trump has now been in office for six months. 'I know,' said Melania."

Seth Meyers: "According to CNN, President Trump has spent almost a quarter of his time at his golf properties during his first six months in office. So it's official, golf is not good exercise."

Seth Meyers: "President Trump said yesterday that he went to speak with Vladimir Putin at the G20 summit dinner because he was seated next to the wife of Japanese Prime Minister Abe, who spoke no English, which means they had at least one thing in common."

Conan O'Brien: "The people behind Game of Thrones are creating a new show about the South winning the Civil War. Yeah. True story. It's called the Trump Administration."

Report: Interior Chief Warns Alaska Senators On Health Care.

The AP (7/27, Daly) reports that the Alaska Dispatch News reported early Thursday that Interior Secretary Ryan Zinke "called Alaska's two Republican senators to warn them of repercussions for the nation's largest state if they failed to toe the Trump administration line on healthcare." Sen. Dan Sullivan, who has supported repeal efforts, "told the newspaper that the call from Zinke heralded a 'troubling message,'" but Sen. Lisa Murkowski, who has opposed several key GOP measures, "confirmed that she received a call from Zinke, but said she did not perceive the call as a threat against her or Alaska."

The Los Angeles Times (7/27, Levey) says that Zinke on Wednesday called the senators "with a warning that Murkowski's vote 'had put Alaska's future with the administration in jeopardy.'" Sullivan said, "I'm not going to go into the details, but I fear that the strong economic growth, pro-energy, pro-mining, pro-jobs and personnel from Alaska who are part of those policies are going to stop."

The Washington Times (7/27, Wolfgang) reports that several projects in Alaska "are now in jeopardy." The article adds that on Wednesday, Murkowski defended her vote, saying, "We're here to govern, we're here to legislate, to represent people that sent us here. And so every day shouldn't be about campaigning. Every day shouldn't be about winning elections. How about doing a little governing around here?"

Coverage by the AP was also picked up by the Boston (MA) Herald (7/27), the Bristol (VA) Herald Courier (7/27, Daly), Philly (PA) (7/27, Daly), the Washington (DC) Post (7/27, Daly), the Washington (DC) Times (7/27, Daly), ABC News (7/27, Daly), the Annapolis (MD) Capital Gazette (7/27, Daly), the Brunswick (GA) News (7/27, Daly), the Chattanooga (TN) Times Free Press (7/27), the Hilton Head Island (SC) Packet (7/27, Daly), the San Francisco (CA) Chronicle (7/27, Daly), U.S. News & World Report (7/27, Daly), the Daily Mail (7/27), the Fort Wayne (IN) News-Sentinel (7/26), the Portland (ME) Press Herald (7/27, Daly), and Yahoo! News (7/27, Daly).

Additional coverage was provided by E&E Publishing (7/27, Koss, Lunney), Roll Call (7/27, Garcia), CNN (7/27, Green), CNN (7/27), CBS News (7/27, Shabad), CBS News (7/27), NPR (7/27, Chappell), MSNBC (7/27, Benen), CNBC (7/27, Pramuk), U.S. News & World Report (7/27, Levy), USA Today (7/27), the Washington (DC) Times (7/27, Wolfgang), Bloomberg News (7/27, Natter), Bloomberg Politics (7/27, Natter), the Alaska Dispatch News (7/27, Martinson), the New York Post (7/27, Eustachewich), the Daily Intelligencer (NY) (7/27, Raymond), Natural Gas Intelligence (7/27, Passut), The Atlantic (7/25, Berman), Quartz (7/27, Fernholz), the Huffington Post (7/27, Shapiro), Newsmax (7/27, Fitzgerald), the National Review (7/28, Goldberg) Vox (7/27, Kliff), Business Insider Australia (7/27, Ramsey), and ABC News Radio (7/27)..

Additional commentary appeared in the Washington (DC) Post (7/27, Viebeck), the

Washington (DC) Post (7/27, Rubin), the Washington (DC) Post (7/27, Eskew), and the Washington (DC) Post (7/27, Sargent).

Democrats Demand Investigation Of 'Political Blackmail' Against Murkowski. Politico (7/27, Lefebvre) reports the House Natural Resources Committee's top Democrat Rep. Raul Grijalva "said Thursday he will request a formal investigation into whether Interior Secretary Ryan Zinke threatened projects important to Alaska in retribution for Sen. Lisa Murkowski's vote against health care legislation." In a statement, Grijalva said, "Running a department of the federal government means you serve the American people as a protector of their rights and freedoms. ... It doesn't mean you serve the president as a bag man for his political vendettas."

The Washington Examiner (7/27, Phillips) reports that Grijalva and Rep. Frank Pallone, "sent letters to the Government Accountability Office and the inspector general at the Interior Department asking the them to look into conversations the secretary had with Alaska Sens. Lisa Murkowski and Dan Sullivan." The letters "ask the agencies to investigate whether Zinke violated federal anti-lobbying laws as well as the Hobbs Act, which 'prohibits actual or attempted robbery or extortion affecting interstate or foreign commerce.'"

Additional coverage was provided by Reuters (7/27, Volcovici) and KTVA-TV Anchorage (AK) Anchorage, AK (7/27, Bowman).

Murkowski's Committee Postponed Confirmation Vote For Trump Nominees. The Hill (7/27, Cama) reports Senate Energy and Natural Resources Committee Chairwoman Lisa Murkowski "postponed a vote on six Trump administration nominees on Wednesday," the "same day" Interior Secretary Ryan Zinke "allegedly threatened retribution against the Alaska Republican over her healthcare vote." Zinke "called Murkowski and Sen. Dan Sullivan (R-Alaska) that afternoon, saying that her vote against debate on the ObamaCare repeal might steer the administration away from policies that benefit her state." Murkowski's staff didn't "return requests for comment on whether the developments are linked, and the committee has not said why the meeting was postponed." The article notes that six nominees include "Brenda Burman to be commissioner of reclamation at Interior; Susan Combs to be assistant secretary of the Interior for policy, management and budget; Doug Domenech to be assistant secretary of the Interior for insular affairs; Paul Dabbar to be undersecretary for science of the Department of Energy (DOE); David Jonas to be general counsel of the DOE; and Mark Wesley Menezes to be undersecretary of the DOE."

The Washington Times (7/27, Persons) reports that "a committee spokesperson said the delay was 'due to uncertainty of the Senate schedule.'"

Zinke Coming To New Mexico In Tightly Controlled Visit.

The AP (7/27) reports that Interior Secretary Ryan Zinke is "visiting New Mexico this week as part of his nationwide tour connected to a review of 27 national monument designations." Zinke is "limiting his availability to reporters and avoiding a Las Cruces, New Mexico, town hall meeting with monument designation supporters and area elected officials." The article says that "his itinerary is tightly controlled and most of his activities will be away from the public eye."

The Las Cruces (NM) Sun-News (7/27) reports that Zinke "flew high above southern New Mexico" Thursday morning to survey Organ Mountains-Desert Peaks National Monument. The Las Cruces (NM) Sun-News (7/28, Soular) reports that Zinke also "met with residents and elected officials in closed-door discussions that are expected to shape the monument's future." According to the article, "by the end of the day, Zinke didn't overtly state support or opposition for reducing the three-year-old monument's current size."

The Albuquerque (NM) Journal (7/27, McKay) reports that Zinke said, "The boundaries are difficult to discern – between private, public, state lands. The features, as a geologist, I was particularly fascinated with the basalts and the volcanics – beautiful ground."

The AP (7/28) reports that Zinke is "scheduled Friday to meet with supporters of the Rio Grande del Norte National Monument in northern New Mexico that is credited with boosting tourism."

Coverage by the AP was also picked up by the Washington (DC) Times (7/27, Contreras) and the San Francisco (CA) Chronicle (7/27).

Additional coverage was provided by KVIA-TV El Paso (TX) El Paso, TX (7/27, Ortegon) and KFOX-TV El Paso (TX) El Paso, TX (7/27, Purvis).

Heinrich: Outdoor Recreation Is An Economic Force In New Mexico. The Sangre De Cristo (NM) Chronicle (7/27, Miller-Goins) reports that ahead of Interior Secretary Ryan Zinke's visit to New Mexico this week, Sen. Martin Heinrich "highlighted the strength of New Mexico's outdoor recreation economy." According to a new report released by the Outdoor Industry Association, "the outdoor recreation economy directly contributes $9.9 billion in consumer spending annually

and employs 99,000 people in New Mexico." Heinrich said, "Outdoor traditions—both new and old—are not only integral to our way of life in New Mexico but also major drivers for our local economies—especially in rural communities. This report demonstrates that our state's growing outdoor recreation industry supports tens of thousands of jobs. These jobs and billions of dollars of economic activity depend upon us keeping New Mexico's incredible public lands open and accessible. Our public lands are where locals and visitors alike go to fill their freezers with elk or wild turkey, camp under the stars, bike on challenging single track, or cast a fly in a trout stream. I will continue standing with New Mexicans who want to make sure our children and all future generations can benefit from our public lands, watersheds, and wildlife."

Ryan Zinke Must Respect Locals On Monument. The Las Cruces (NM) Sun-News (7/27) editorializes that reducing the size of the Organ Mountains-Desert Peaks National Monument "would clearly go against the will of the majority of residents, as was made clear recently when elected officials and boards from Doña Ana County, Las Cruces, Mesilla and Anthony all voted to express their support for the monument at its current size, and to oppose any attempt to reduce its size." The paper is "hopeful that Zinke and other decision-makers will carefully review" public comments "before making any decisions."

The U.S. Interior Department Has A New Mission: To Make Money.

Bloomberg News (7/27, Traywick) reports that Interior Secretary Ryan Zinke "aims to retool" his department "into a federal profit center focused on increasing energy production, according to a plan laid out by his special adviser, Vincent DeVito." During an event in Washington on Thursday, DeVito stressed that the government must be run as if it were a business. He said that "the agency needs to offer federal leaseholders, whom he calls 'investors,' a reason to partner with the government, which hasn't been a particularly good business partner in the past." And "that means opening up more resources, making permitting easier and 'aggressively' cutting regulations on private industry."

Public Outcry Hopes To Sway Trump Administration On Fate Of Two Nevada National Monuments.

KSNV-TV Las Vegas (7/27, O'Neal) reports that "a last-ditch effort is underway to convince the Trump administration to keep Nevada's newest national monuments intact." Sen. Catherine Cortez Masto is "putting political pressure on Interior Secretary Ryan Zinke who is expected to visit Southern Nevada next week."

KLAS-TV Las Vegas (7/27, Marin) reports that "more than 90,000 petitions to try to save two national monuments will be dropped off Thursday at a Nevada Senator Dean Heller's office." Friends of Nevada Wilderness, "who want the land to remain preserved, said Senator Heller has been silent."

Feds Taking More Comments On Trump Marine Monuments Review.

The AP (7/27) reports that the Trump Administration is "reopening the public comment period on a review of national marine sanctuaries and marine national monuments." The National Oceanic and Atmospheric Administration "says it'll formally reopen public comments on the federal Department of Commerce review that began June 26." The NOAA "says the level of public interest in the review has motivated it to accept comments for an additional 15 days, from July 31 to Aug. 14."

Additional coverage was provided by the U.S. News & World Report (7/27, Watkins).

Wyden Revives Outdoor Recreation Bill.

The East Oregonian (7/27, Plaven) reports that Sen. Ron Wyden is "reaching across the political aisle to revive the Recreation Not Red-Tape Act." Supporters say the bill "would make it easier for people to enjoy the great outdoors." The aim "of the bill is to get more people outside enjoying national lands, Wyden said, by expediting the permit process for outfitters and directing federal agencies to prioritize recreation when making land and water management decisions."

Outdoor Industry Rally In Utah For Public Lands Protections.

The AP (7/27, McCOMBS) reports that "thousands of outdoor recreation industry representatives rallied Thursday at the Utah state capitol to show support for preserving public lands in an event that sent one final reminder why they're moving their lucrative trade show next year to Denver." According to the article, "an estimated 3,000 people marched from the convention center where the final show in Utah is being held this week in Salt Lake City to outside the capitol where they

listened to speakers who implored the industry to keep flexing its muscle to advocate for lands protections." Utah Gov. Gary Herbert "defended the state's record of conserving and protecting public lands Thursday in his televised news conference on KUED, while saying he regrets that discussions earlier this year to keep the show didn't work out."

Additional coverage of the show was provided by the Salt Lake (UT) Tribune (7/27, Alberty), the Salt Lake (UT) Tribune (7/27, Maffly), the Deseret (UT) News (7/27, O'Donoghue), and the Albuquerque (NM) Journal (7/27, Boyd).

Vacant Positions Leave Washington Without Watchdogs.

Patricia Harned, chief executive officer of the Ethics & Compliance Initiative (ECI), writes in a piece for The Hill (7/27, Harned) that 13 of the 73 inspector generals in government agencies are vacant, including the Interior Department. Harned says filling such vacancies "should be of highest priority," and Congress should review compensation of IGs, because they "earn their keep."

Bureau Of Indian Affairs

Indian Tribe To Continue Efforts For 2 New Michigan Casinos.

The AP (7/27) reports that The Sault Ste. Marie Tribe of Chippewa Indians "says it will continue its efforts to build gambling facilities in Lansing and near Detroit Metropolitan Airport following a new setback." The tribe says it received a letter this week from the Interior Department "saying that the tribe's applications to put land into trust for the projects have been denied." The tribe claims "the denial is based on flawed legal analysis."

Additional coverage was provided by MLive (MI) (7/27, Lawler), the Detroit News (7/27, Gerstein), the Lansing (MI) State Journal (7/27, Lacy), and Law360 (7/27, Westney).

We Stole It, Indians Bought It Back; Let Them Use It. The Port Huron (MI) Times Herald (7/27) editorializes that the Bureau of Indian Affairs' "argument is logical — but only in a pedantic, fifth-grader sort of way." More importantly, to the paper, is that "the Bureau's decision, like the state of Michigan's continued fight against the spread of tribal gaming is based in the unseemly illogic of racism, Puritanism and greed." The paper concludes: "Michigan was all tribal lands once. We stole it from them. They bought it back. Let them use it to their benefit."

Why Tribal Land Acquisition Developments Are Troubling.

Law360 (7/27, Peterson) reports that "a July 13 hearing held by the Subcommittee on Indian, Insular and Alaska Native Affairs provided a glimpse into the Trump administration's views on various topics of importance to Indian tribes." Acting Deputy Secretary of the Interior Jim Cason "testified to present the views of the U.S. Department of the Interior (DOI), and his expressed views on a number of issues could raise concern among Indian tribes."

Bureau Of Land Management

US Court Asked To Hold Off On Decision Over Fracking Rules.

The AP (7/27, Flowers) reports the 10th US Circuit Court of Appeals has been asked by the Trump Administration "to hold off on a decision regarding a major federal fracking rule implemented by the Obama administration." Earlier this year, "Trump moved to roll back the rule, which was first issued in 2015 by the Interior Department and required drilling companies to disclose what chemicals they used within 30 days of any fracking." The rule "was put on hold last year after a federal district judge in Wyoming said the Bureau of Land Management had no authority to set such a rule." During the court hearing yesterday, "the government asked judges not to decide on the case and instead leave the district court's current ruling in effect until it can replace the rule." E&E Publishing (7/27) previewed the hearing.

Cheney Bill On Federal Coal Leasing Goes Before House.

The Casper (WY) Star-Tribune (7/27, Richards) reports that "on Thursday, the U.S. House's subcommittee on Energy and Mineral Resources will hold a hearing on a bill sponsored by Rep. Liz Cheney." The legislation "would make any attempt to halt leasing for coal mining on public land subject to congressional approval." Receiving that "consent from the House and the Senate would also be subject to a swift 30-day timeline."

Peabody Energy Wants To Expand Its Coal Mining Lease In Northwest Colorado.

The Denver Post (7/27, Paul) reports that the Bureau of Land Management is "weighing whether to allow Peabody Energy to lease new federal to mine up to 4.1 million more tons of coal in northwest Colorado." The BLM "says it is making the decision under the Trump administration's energy policies, which include rescinding Obama-era rules that placed a moratorium on coal leases." Peabody has "applied to lease 640 more aces of federal coal west of Steamboat Springs has part of its Foidel Creek Mine operations."

Commentary: Creating Land Use Planning Efficiencies.

In an op-ed for the Elko (NV) Daily Free Press (7/27, Juen), Jesse J. Juen, president of the Public Lands Foundation, offers suggestions as the Bureau of Land Management reviews its planning process. Among the recommendations is to "administratively fix the public comment period for environmental assessments to no more than 30 days." He also advises to "direct that Resource Management Plans for statutorily dedicated lands, such as the Oregon & California lands in western Oregon, Alaska, and legislated special management areas include alternatives that fully implement the mandates of the specific Acts."

Bureau Of Ocean Energy Management

Georgetown County Voices Opposition To Offshore Oil Drilling.

South Strand News (SC) (7/27, Stairs) reports that Georgetown County has "joined more than 125 coastal municipalities and South Carolina Governor Henry McMaster in opposing offshore oil drilling and seismic testing in the Atlantic Ocean." County Council "adopted a resolution at its July 25 meeting to express Georgetown County's opposition, after the Trump administration recently reopened the Atlantic coast to exploration and development of offshore oil and gas."

Commentary: Riding The Wind.

In an op-ed for the Mount Vernon (VA) Gazette (7/27, Krizek), state Del. Paul Krizek praises Dominion Energy's work in renewable energy, highlighting the utility's recently announced partnership with DONG Energy to build two wind turbines off the coast of Virginia Beach. Krizek writes, "Over the last four years, Dominion Energy has grown its solar portfolio from zero to 2500 acres and this project is a part of the General Assembly's mandate to increase the amount of energy Dominion receives from renewable sources, and they should continue to do more." Krizek continued, "Clearly renewable energy like wind and solar is an exciting opportunity for energy infrastructure investment and will provide a growing source of energy in the future as we expand alternatives to coal and oil beyond the current nuclear and natural gas alternatives."

Fish And Wildlife Service

Farming Within Wildlife Refuges Revamps Klamath Agriculture.

The AP (7/27, Burns) reports that "a new generation of farmers who are making agriculture more compatible with wildlife" inside the Tule Lake and Lower Klamath National Wildlife Refuges. According to the article, "they're adopting irrigation methods that provide habitat for waterfowl, help keep chemicals out of the wildlife refuges, and give growers a premium price for their crops." In addition, "they're helping push the entire Klamath Basin toward a more sustainable agricultural system."

New Video Shows How The Lesser Prairie-Chicken Range-wide Plan Is Working On The Landscape.

The High Plains and Midwest AG (KS) Journal (7/27) reports that the Western Association of Fish and Wildlife Agencies has released a new video that demonstrates the success of the mitigation program in the Lesser Prairie-Chicken Range-wide Conservation Plan in conserving habitat for the animal.

Inside Kankakee Refuge Youth Conservation Corps.

The Kankakee (IL) Daily Journal (7/27, Themer) reports that "the first U.S. Youth Conservation Corps team for the new Kankakee National Wildlife Refuge and Conservation Area is wrapping up eight weeks of work and education Friday under the sponsorship of the U.S. Fish and Wildlife

Service." For "four Pembroke Township high-schoolers," the article says that "the eight-week experience has opened their eyes to the wonder of nature right at home in Pembroke."

Stop The Costly, Unnecessary Road Through Alaska Wildlife Refuge.

For the "Pundits" blog of The Hill (7/27, Super, Contributor), David A. Super, a professor of law at Georgetown Law, opposes the proposed road through Izembek National Wildlife Refuge. He notes that "after reviewing the evidence, Interior Secretary Jewell determined in 2013 that the road made no sense and would cause irreparable damage." Since the House has passed H.R. 218, the King Cove Land Exchange, Super urges the Senate "to stick the bill in a drawer and forget about it."

Op-ed: Private Conservation Might Be The Future Hero For Endangered Species.

In an op-ed for the Salt Lake (UT) Tribune (7/27, Downey, Hansen), Hannah Downey, a research and policy fellow at the Property and Environment Research Center, and Megan Hansen, director of policy at Strata, write that "House Republicans may be endangering the Endangered Species Act (ESA), but that does not mean they are driving endangered species to their prospective graves." According to the authors, "though the ESA is hailed as a monumental piece of legislation designed to stem the loss of species, listing a species under the act does not actively encourage its proliferation." They say that "voluntary conservation of species and their habitat is already happening on private lands across America, and those efforts are poised to continue with or without the ESA." They urge the Interior Department "facilitate the use of voluntary agreements, such as conservation easements and habitat rental agreements, whereby private landowners are financially rewarded for enhancing species habitat." Also, they recommend that the department "walk back regulatory expansions that discourage private conservation investments, such as the designation of critical habitat on private property that is actually inhospitable for protected species anyway."

Our View: Celebrating Lake's Freedom! Don't Let Carelessness Ruin It.

The Havasu (AZ) News-Herald (7/27) editorializes that "there was cause for celebrating boating freedom on Lake Havasu last week when federal officials pulled back wake restrictions in the northern part of the lake and nearby sections of the Colorado River." However, "that celebration may turn to mourning, both for the two people who died on the lake last weekend and for the boating freedom that is threatened by a deadly lake summer." The paper says that "fighting against safety regulations such as speed limits would be much tougher, especially when boaters keep dyiing." It concludes that "anyone who appreciates the lake's reputation for boating freedom needs to help convey a zero tolerance for unsafe boating."

National Park Service

10 At Yellowstone To Be Punished For Harassment.

The AP (7/28, Brown) reports that "as many as 10 workers in Yellowstone National Park's maintenance division will be disciplined after an investigation found they subjected female employees to derogatory comments and other sexual harassment, the park's superintendent told The Associated Press." The decision "comes as widespread reports of harassment, bullying and other misconduct have tarnished the image of the National Park Service and its parent agency, the U.S. Interior Department." According to Yellowstone Superintendent Dan Wenk, "punishments will be proposed by Aug. 1 or soon afterward for the 10 employees and could range from reprimands to suspensions or firing."

Teton Park Gets Cash Boost For Jenny Lake Work.

The Jackson Hole (WY) News & Guide (7/27, Huffman) reports that Grand Teton National Park officials "learned officially this week that they will receive $757,356 through the National Park Service's Centennial Challenge program, which is aimed at completing 'deferred maintenance,' work that should have been done but couldn't get budget money." The funds will be "matched by $1.26 million from the Grand Teton National Park Foundation." The federal and private money will "aid completion of a Jenny Lake renovation project that's now in its fourth year."

Park District Receives $750,000 Grant To Improve Bay Point Regional Shoreline.

East County (CA) Today (7/27) reports that on July 19, the Interior Department and National

Park Service "awarded the East Bay Regional Park District $750,000 for public access improvements at the Bay Point Regional Shoreline." The East Bay (CA) Times (7/27, Davis) reports that it was "one of 22 recipients in the country for the National Park Service's Outdoor Recreation Legacy Partnership program, which is awarded to projects that will improve parks in urban areas."

Missouri Congressmen Lacy Clay, Smith Push Bill To Preserve Civil Rights Movement Sites.

KBIA-FM Kirksville, MO (7/27, Mannies) reports that Reps. Lacy Clay and Jason Smith are "co-sponsors of a bill that passed the U.S. House on Wednesday that would establish the African-American Civil Rights Network." Clay "described the bill as something that 'would authorize the National Park Service to establish a program to preserve and protect the memory of the people and places that were significant in the struggle to secure equal rights for African-Americans.'" The bill next goes to the Senate.

Duncan Bill Honors Late Daily Times Editor Stone With Foothills Parkway Bridge Name.

The Maryville (TN) Daily Times (7/27) reports that Rep. John J. Duncan Jr. "introduced legislation Thursday that would name 'Bridge 2' of the new section of the Foothills Parkway (from Walland to Wears Valley) as the Dean Stone Bridge." Duncan said, "Naming it after Dean Stone is a fitting tribute for all that he did for the Park and this region." Sen. Lamar Alexander said, "There is no one who worked harder for the Foothills Parkway than Dean Stone. I will certainly work with Congressman Duncan and the National Park Service to recognize his tireless efforts."

WWII Pilots Used North Carolina Waters For Target Practice.

Now Their Bombs Are Washing Ashore. The Washington Post (7/27, Gibbons-Neff) reports that "the sudden appearance of two large, rusty and barnacle-encrusted World War II-era munitions on the beaches of Cape Hatteras, N.C., this summer have puzzled the area's park rangers and local historians." Boone Vandzura, the chief ranger of Cape Hatteras National Seashore, said, "We haven't had these in the past." However, "within a week this month, Vandzura received reports of two aging pieces of ordnance."

Park Settlement Leaves Concerns Over Future.

The Point Reyes (CA) Light (7/27, Guth) reports that "two weeks after a settlement agreement was announced by the National Park Service and three nonprofit environmental groups over the future of ranching in the Point Reyes National Seashore, the fate of the historic landscape remains uncertain." The article says that "though both sides characterized the agreement as a victory, concerns continue to swirl for ranchers and their supporters, including Congressman Jared Huffman." Huffman said, "The biggest national environmental groups were conspicuous by their absence in this litigation, yet the small minority of the environmental community that are not comfortable with continued ranching in the pastoral zone are probably enough to create a cloud of uncertainty for years to come."

A Year Later, How Safe Is Gateway?

The Queens (NY) Chronicle (7/27, O'Reilly) reports that "safety in Gateway National Recreation Area has always been on the mind of Howard Beach residents, even long before Karina Vetrano was killed in Spring Creek Park on Aug. 2, 2016." Now, "almost a year later, advocates say while some improvements have been made, more work remains to be done." State Sen. Joe Addabbo Jr. said, "We hold our breath every day that nothing happens in that area while the weeds are so high up. I would still like to see additional U.S. Park Police present ... We need to do more. And more will come, I'm convinced of that, it's just a question of when."

EPA Says It Will Revisit Utah's Haze Plan.

The Moab (UT) Sun News (7/27, Trenbeath) reports that "the State of Utah may get another opportunity to develop a plan for combating regional haze and improving visibility over area national parks after former President Barack Obama's administration rejected its original efforts in August 2016." On a recent visit to Utah, Environmental Protection Agency Administrator Scott Pruitt "said he would review the Obama-era mandate requiring the installation of modern pollution control systems on the Hunter and Huntington coal-fired power plants upwind of Moab." The National Park Service and Utah Division of Air Quality "have identified the two Emery County plants as point-source contributors to regional haze over Utah national parks and congressionally

designated wilderness areas."

$1.8M Restoration Of Perry Memorial Reported On Schedule.

The Port Clinton (OH) News Herald (7/27) reports that "despite windy and rainy weather, workers have completed cleaning 85 percent of the memorial column at Perry's Victory and International Peace Memorial, according to Construction Manager Jeff Ashton." He said that "the restoration project is on schedule." Ashton added "that 20 percent of the work removing the caulking is complete and workers are replacing the mortar in the areas where the caulking has been removed."

'Pizza Nazi' Kicked Out Of Restaurant Space For Harassing Patrons, Hanging Lewd Art.

Fox News (7/27) reports that "Whitney Aycock, who operated the Whit's End pizza shop in Rockaway, was recently ousted from his outpost at Riis Park Beach after beachgoers and park staffers complained of his 'hostile' and 'vulgar' behavior to the National Park Service, some of which included his proclivity for playing profane music and displaying 'lewd' artwork in public." According to the article, "in an eviction notice, which Aycock photographed alongside a package of hash-infused candy and posted to Instagram, the Gateway National Recreation Area described Aycock's actions as 'not in keeping with the mission and values of the National Park Service.'"

Pilot Presumed Dead In Crash In Alaska National Park.

The AP (7/27) reports that "a pilot is presumed dead after a downed aircraft was found burning Thursday in Lake Clark National Park and Preserve." According to park spokeswoman Megan Richotte, "Alaska State Troopers and park rangers are en route to the crash scene and expect to recover the pilot's body."

Why This Dog Rule Must Be Rescinded.

In an op-ed for the Washington Times (7/27, Emanuel), David Emanuel, co-founder of the group Save Our Recreation, opposes the National Park Service's "assault on recreational dog walking" in the Golden Gate National Recreation Area. He notes that one of Interior Secretary Ryan Zinke's "top priorities is to expand recreational access to public lands and waters." Emanuel argues that the rule goes against Zinke's priorities.

Office Of Insular Affairs

Interior Provides Palau $5.4M Under Compact, Other Grants.

Marianas Variety (7/27) reports that Interior Acting Assistant Secretary Nikolao Pula "made available $5,463,578 to the Republic of Palau, most of which is the balance of remaining Compact grant assistance for fiscal year 2017." Pula said, "We are honored to provide assistance to Palau President Tommy Remengesau, Jr., on behalf of the U.S. under the Compact of Free Association. Furthermore, we are pleased to support proper land planning and management, as well as training in maintenance and infrastructure-upkeep. Both are critical to Palau as an island nation."

Money Will Be Available For War Claims.

The Pacific (GUM) Daily News (7/27, Limtiaco) reports that "funding will be available to pay war claims when the filing window closes next June, according to Guam Del. Madeleine Bordallo." Bordallo stated the Office of Insular Affairs "in May clarified that Guam received $68.6 million in Section 30 funds in 2014."

Money For Reparations Uncertain. The Guam Daily Post (7/26, O'Connor) reports that "new correspondence from the U.S. Department of Interior supposedly refutes statements made by Guam Delegate Madeleine Bordallo regarding the threshold for Section 30 funding before war claims can be paid, according to Gov. Eddie Calvo." Calvo said that "Interior's letter did not say that anything above $68 million a year in Section 30 funds would be used to pay for war reparations."

Mapp Paints Economic Doomsday Picture For USVI If Bill Allowing Retirees To Return To Work, And Another Providing Property Tax Cuts, Are Approved.

The Virgin Islands Consortium (VIR) (7/26) reports that Governor Kenneth Mapp during a press conference on Monday, "painted a picture of the USVI so bleak that it could best be described as the territory's economic doomsday." According to the article, "Mapp's depressing outlook was

based on the potential passage of two bills in the Legislature." The first measure, Bill No. 32-0102, "seeks to allow people who retired from the government to return to work in the government without paying into GERS," according to Mapp. The second measure, Bill No. 32-0109, "seeks to give a 25 percent property tax reduction to retirees who are owed retroactive wages."

US Geological Survey

California Quake-safety Support Is Properly Bipartisan.

In an editorial, the Orange County (CA) Register (7/27) calls for bipartisan support to protect "federal funding for the crucial, cheap and cost-effective earthquake early-warning system for the entire West Coast." The paper warns that "if the ongoing funding for ShakeAlert, a cost-efficient early-warning system that would provide up to a crucial minute for those of us who live here to prepare for a major earthquake, were to disappear, it would do so at our peril." The paper lauds Rep. Ken Calvert, "the chairman of California's GOP House delegation and chair of the House appropriations subcommittee that oversees spending by the Department of the Interior," standing "up in support of continuing funding for ShakeAlert."

Top National News

ACA "Skinny Repeal" Fails On McCain No Vote; Trump: "Let ObamaCare Implode, Then Deal."

In a dramatic vote at just before 1:30 a.m. Friday, the Senate rejected the so-called Affordable Care Act "skinny repeal" measure introduced by Senate Majority Leader McConnell, effectively ending GOP repeal efforts for the time being. Vice President Pence had gone to the Senate in expectation of a possible 50-50 vote, but Sen. John McCain ultimately voted no, along with Sens. Susan Collins, Lisa Murkowski, and all 48 members of the Democratic caucus. President Trump tweeted at 2:25 a.m., "3 Republicans and 48 Democrats let the American people down. As I said from the beginning, let ObamaCare implode, then deal. Watch!"

The AP (7/28, Werner, Fram) reports, "Dealing a serious blow" to Trump's agenda, the Senate "rejected a measure to repeal parts of former President Barack Obama's health care law after a night of high suspense in the US Capitol. Unable to pass even a so-called 'skinny repeal,' it was unclear if Senate Republicans could advance any health bill despite seven years of promises to repeal 'Obamacare.'" Reuters (7/28, Cornwell, Cowan) reports that Trump "has offered no legislation of his own and little guidance to the Senate, although he has berated them for their inaction."

Bloomberg News (7/28, Dennis, Tracer, Kapur) reports that McCain "joined with two of his GOP colleagues to block a stripped-down Obamacare repeal bill." McCain's decision "came after weeks of brinkmanship and after his dramatic return from cancer treatment to cast the 50th vote to start debate on the bill earlier this week." McCain "came to the well of the Senate and gave a thumbs down, dooming the repeal bill to loud gasps, mostly from the Democratic side of the aisle." USA Today (7/28, Collins) reports that Pence, McConnell, "and other GOP leaders could be seen lobbying McCain and Murkowski on the Senate floor before the vote." The New York Times (7/28, A1, Pear, Kaplan) calls the vote "a huge setback" for McConnell.

The Week (7/28, Garcia) reports that McConnell called the vote "clearly a disappointing moment," but said, "It's time to move on." McConnell "claimed that due to 'skyrocketing costs,' 'plummeting choices,' and 'collapsing markets, our constituents have suffered through an awful lot under ObamaCare. We thought they deserved better.'" Stuart Rothenberg tweeted that McConnell sounded "shaken."

The Washington Post (7/28, A1, Eilperin, Snell, Sullivan) reports, "Senate Republicans suffered a dramatic failure early Friday in their bid to advance a scaled-back plan to overhaul the Affordable Care Act." McCain "returned to Washington Tuesday and delivered a stirring address calling for a bipartisan approach to overhauling the ACA, while criticizing the process that produced the current legislation. It was a speech that laid the groundwork for Friday's dramatic vote." McClatchy (7/28, Pugh) says the defeat "leaves Republicans in an uncomfortable holding pattern after seven years of promising to repeal the ACA. With control of both houses of Congress and the White House, they appeared to have a clear legislative path to fulfilling their promise," but "public support for the ACA and stubborn resistance to repeal efforts from patient, provider and advocacy groups proved stronger than expected."

The Wall Street Journal (7/28, Peterson, Hackman, Hughes) says McConnell now has not clear next step in efforts to repeal the ACA. The Los Angeles Times (7/28, Mascaro) reports, "The failure sends Senate GOP leaders back to square one in their bid to roll back the healthcare law." The Washington Times (7/28, Howell) reports, "Drained by self-inflicted wounds, shifting aims and unrelenting protests, Republicans' push to kill off President Obama's signature health law sputtered out of gas early Friday." The Huffington Post (7/28, Young) reports, "Seven years of Republican promises to repeal the Affordable Care Act withered away to almost nothing on the Senate floor early Friday morning."

Politico (7/28, Bresnahan, Everett, Haberkorn, Kim) reports that as he left the Senate chamber, McCain said, "I do my job as a senator." He later "issued a statement offering a more thorough explanation of his vote, saying that he has always believed that Obamacare should be repealed and replaced with a solution that 'increases competition, lowers costs and improves care for the American people,'" but that "the 'skinny repeal' that he voted down 'would not accomplish those goals.'"

CBS News (7/28) reports on its website that McCain "urged his colleagues to 'return to the correct way of legislating and send the bill back to committee, hold hearings, receive input from both sides of aisle, heed the recommendations of nation's governors, and produce a bill that finally delivers affordable health care for the American people.'" Roll Call (7/28) reports, "McCain's vote came after a period of tense suspended animation, where much of the attention was on McCain, who seemed to be returning to his maverick persona at just the wrong time for McConnell." Axios (7/28, Baker) headlines its report "McCain Kills Senate Health Care Bill."

NBC News (7/28, Caldwell) reports on its website, "Obamacare stays. For now." On its website, NPR (7/28, Davis, Montanaro) calls the vote "a moment of unexpected high drama." The Hill (7/28, Sullivan) and the CNN (7/28, Lee, Fox, Barrett, Mattingly) and TIME (7/28, Brewster) websites also have reports.

Price: "This Effort Will Continue." ABC News (7/28) reports on its website that HHS Secretary Price "said in a statement the Trump administration will pursue its healthcare goals through regulation. 'This effort will continue,' he said."

Schumer, Other Democrats Comment. Axios (7/28, Rothschild) reports that after McConnell said that some Democratic senators are probably "celebrating," Senate Minority Leader Schumer said, "We are not celebrating. We are relieved – that millions and millions of people who would have been so drastically hurt by the three proposals put forward will at least retain their healthcare."

Several Democratic senators commented on Twitter. Sen. Kamala Harris tweeted, "Tonight health care was saved for millions of Americans. This is your victory. Your calls, letters, and courage made this possible." Sen. Amy Klobuchar tweeted, "Thanks to Lisa Murkowski, Susan Collins and John McCain for showing such strong leadership tonight." Sen. Elizabeth Warren tweeted, "The nightmare is over, at least for now."

Sen. Chris Murphy tweeted, "I ran into John McCain as we walked underground to the Senate for the final vote. Someday I'll get to tell my grandkids what he said to me." He did not elaborate.

"Skinny" Measure Had Been Criticized By Members Of Both Parties. Earlier, the Senate had embarked on a series of votes leading up to the decisive vote on McConnell's proposal, but it was criticized by members of both parties and was pitched to recalcitrant Republicans as essentially a means to keep the quest for repeal alive, and not as a solution in itself. On ABC World News Tonight (7/27, story 2, 2:30, Muir), Mary Bruce reported, "First, they tried to repeal and replace, but that plan failed. Then just repeal, worry about replacement later. That didn't have the votes either. What's left? A pared-down plan being called the 'skinny repeal.' But tonight one leading Republican is blasting the plan." Sen. Lindsey Graham: "The skinny bill as policy is a disaster. The skinny bill as a replacement for Obamacare is a fraud."

The CBS Evening News (7/27, story 3, 2:10, Mason) reported, "Republicans in the Senate, desperate to get something through, are trying a new strategy. But late today, one of their own called it a 'fraud.'" CBS' Nancy Cordes added that "three key Republicans" – Graham, McCain, and Sen. Ron Johnson – "slammed the slimmed-down bill." Graham: "Not only do we not replace Obamacare, we politically own the collapse of healthcare." The New York Times (7/27, Pear, Kaplan, Cochrane) reports that the three senators "were unsparing in their criticism" of the measure.

NBC Nightly News (7/27, story 3, 2:15, Holt) reported, "It's expected to be a very long night in the US Senate." NBC's Kasie Hunt: "Voting is under way tonight as Senate Republicans try to pass something – anything – that would roll back parts of Obamacare."

In order to win over Republicans, Reuters (7/28, Cornwell, Cowan) reports, House Speaker Ryan said he would commit to taking healthcare legislation to conference if the Senate passes the measure. Ryan said in a statement, "If moving forward requires a conference committee, that is something the House is willing to do. But the burden remains on the Senate to demonstrate that it is capable of passing something."

The Washington Times (7/27, Howell) reports, "Few seemed happy with the looming vote, which was a far cry from the repeal-and-replace that the GOP took to voters for the last seven years." The measure would instead "leave Obamacare's economics in shambles, raising the prospect of premium increases for consumers and market disruptions for insurers who prefer certainty." But most GOP senators "said that was better than admitting failure – and said they would vote to approve it, with the understanding that it never become law."

The AP (7/27, Cassata) writes in an analysis, "Vote yes, hope no. Senate Republicans want to back a still-being-written bill...but they don't want the House to quickly approve it." The "uncharacteristic behavior was on full display Thursday, creating a surreal situation on Capitol Hill that would be comical if what lawmakers were doing didn't affect one-sixth of the economy and health coverage for tens of millions of Americans."

USA Today (7/28, Collins) reports that the healthcare debate "turned into a series of 'show votes' – with both parties trying to put the opposition in a tough position and nobody voting on legislation they actually think will pass." The Wall Street Journal (7/27, Hackman, Radnofsky) reports that first up was a single-payer healthcare measure introduced by conservative Republican Sen. Steve Daines that he himself opposes. It failed with not a single vote in support, but with 43 senators voting "present."

The New York Times (7/27) editorializes, "The Senate considers itself an august body of statesmen. But on Thursday it became a theater of the absurd when three top Republicans said they would vote for a health care bill only if House leaders guaranteed that it would not become law." The Times says the GOP "mission to destroy Obamacare has become a farce, albeit one that may yet harm the health of millions of Americans."

Trump Urged Senators To "Do It On Healthcare." The AP (7/27, Werner, Fram) reports that President Trump "tweeted his encouragement" to GOP senators, "albeit with an ominous touch: 'Come on Republican Senators, you can do it on Healthcare. After 7 years, this is your chance to shine! Don't let the American people down!'" He later tweeted, "Go Republican Senators, Go! Get there after waiting for 7 years. Give America great healthcare!"

Kellyanne Conway said on Fox News' Fox & Friends (7/27), "What this president has done in six short months on repeal and replace is remarkable, because it took President Obama 16 months or longer to get his healthcare pushed through, and he was offering goodies and he had a Democratic majority, so that shouldn't have been difficult. This man is appealing to the House and Senate, again, promised to have moral imperative to do what's right by the American people. He is imploring them to go ahead and uproot what hasn't worked and replacing with something that can."

Insurers Oppose Scrapping Individual Mandate. McClatchy (7/28, Pugh) reports that in a letter to McConnell, America's Health Insurance Plans said it "would oppose any plan that scraps the individual coverage mandate without a mechanism to require continuous coverage." The trade group wrote, "Targeted proposals that would eliminate key elements of current law without new stabilizing solutions will not solve the problems in the individual market, and in fact will result in higher premiums, fewer choices for consumers and fewer people covered next year."

The Wall Street Journal (7/26, Armour, Mathews, Hackman) reports that the Blue Cross Blue Shield Association was also critical, saying in a statement, "If there is no longer a requirement for everyone to purchase coverage, it is critical that any legislation include strong incentives for people to obtain health insurance and keep it year-round. A system that allows people to purchase coverage only when they need it drives up costs for everyone."

Zinke Reportedly Warned Alaska Senators About Repercussions Of Murkowski Votes. The AP (7/27, Daly) reports that the Alaska Dispatch News reported early Thursday that Interior Secretary Zinke "called Alaska's two Republican senators to warn them of repercussions for the nation's largest state if they failed to toe the Trump administration line on healthcare." Sen. Dan Sullivan, who has supported repeal efforts, "told the newspaper that the call from Zinke heralded a 'troubling message,'" but Murkowski, who has opposed several key GOP measures, "confirmed that she received a call from Zinke, but said she did not perceive the call as a threat against her or Alaska." Politico (7/27, Lefebvre) reports that House Natural Resources Committee ranking member Rep. Raul Grijalva (D-AZ) said that he will seek a formal investigation into whether Zinke "threatened projects important to Alaska" over Murkowski's healthcare stance.

The Washington Times (7/27, Persons) reports that the Senate Energy and Natural

Resources Committee, which Murkowski chairs, "delayed a vote to confirm several Trump administration appointees on Thursday. ... A committee spokesperson said the delay was 'due to uncertainty of the Senate schedule.'"

Ex-Obama Administration Officials Leading Campaign Against Repeal. The New York Times (7/27, Shear, Pear) profiles Protect Our Care, a group of former Obama Administration officials and other stakeholders "conceived in the hours after" President Trump's November victory that "is at the heart of the effort to oppose a repeal." Among its key players are ex-HHS Secretary Kathleen Sebelius, ex-CMS Administrator Andrew Slavitt, and Obama White House policy advisers Leslie Dach and Jeanne Lambrew. Dach said, "The most important thing is that people understand what repeal means for them. And what repeal means is millions losing their insurance, costs going up, not down, and anxiety coming back in their lives."

Patients Have Faced "Protracted Uncertainty" As Repeal Effort Proceeds. The New York Times (7/27, A1, Hoffman) reports that "for people whose health insurance is at risk," the "months-old war in Congress over repealing and replacing" the ACA "has brought the anguish of protracted uncertainty." Those who spoke with the Times "said they did not know from one day to the next whether they would be able to continue screenings and treatment," or "are postponing or accelerating major medical decisions, weighing whether to move to more insurance-friendly states, or to close modest businesses and search for employment with health benefits."

Media Analyses: Scaramucci Exposes West Wing Rift In "Vulgar" Interview.

All three broadcast networks opened Thursday evening with coverage of new White House Communications Director Anthony Scaramucci's impromptu Wednesday night telephone interview with Ryan Lizza of the New Yorker, which multiple sources call "vulgar" and "profane." Also covered, but with less commentary, is Scaramucci's Thursday morning CNN interview, in which he is said to have suggested that Chief of Staff Priebus is responsible for leaks from the West Wing.

David Muir opened ABC World News Tonight (7/27, lead story, 4:00) by reporting on "a war brewing inside the West Wing. ... There is major tension" between Scaramucci and Priebus, and "it's turned very ugly." ABC's Jonathan Karl: "In an interview with the New Yorker, Scaramucci called Priebus 'a bleeping paranoid schizophrenic.' He also laid a profane attack on Steve Bannon and threatened to fire essentially the entire White House communications staff over leaks, saying, 'They will all be fired by me. I fired one guy the other day. I have three or four people I'll fire tomorrow.' He hints he has information on White House aides, telling the New Yorker, 'I have nailed these guys. I have digital fingerprints on everything they have done through the FBI and the bleeping Department of Justice. They will get prosecuted.' Overnight, Scaramucci said Priebus himself was doing the leaking, tweeting, 'In light of the leak of my financial disclosure which is a felony, I will be contacting FBI and the Justice Department.' He soon deleted the tweet."

In opening the CBS Evening News (7/27, lead story, 3:05), Anthony Mason said, "Not since British troops paid a visit in 1814 has the White House had so many fires to put out." CBS' Major Garrett: "Scaramucci implicated Reince Preibus...as the source of leaked classified information about his finances, though it now appears that information is publicly available. But in an interview the New Yorker published late today Scaramucci said, 'Reince is a [beep], paranoid schizophrenic, a paranoiac.' Scaramucci also went after Steve Bannon with language more fit for the outhouse than the White House: 'I'm not Steve Bannon. I'm not trying to suck my own [beep]. I'm not trying to build my own brand off the [beep] strength of the President.' We spoke to Scaramucci a few moments ago, and he described the interview as a rookie mistake, an unforced error of on-the-record candor."

Lester Holt said in the lead story on NBC Nightly News (7/27, lead story, 3:00), "The man recently tapped by the President to improve the White House's messaging and media coverage has instead emerged as the central figure in a headline-making White House power struggle, exposing an internal rivalry that today led to some nasty allegations, threats and some pretty vulgar language."

Lizza of the New Yorker (7/27) reports that Scaramucci called him on Wednesday night to ask about the source for a Lizza tweet about a White House dinner meeting that Scaramucci had attended. Lizza directly quotes some of the vulgar language censored by the broadcast networks, and reports that Scaramucci "reiterated that Priebus would resign soon" and "cryptically suggested that he had more information about White House aides." Lizza said on CNN's Situation Room (7/27) that Scaramucci called him "because he wanted to know who told me about the dinner. And he was really upset that the dinner and participants in the dinner leaked. ... He

believes the dinner he had was leaked by Reince Priebus because he was paranoid that Scaramucci was bringing folks into the White House without his knowledge. I should say that is wrong. Reince Priebus did not leak that information to me."

The Washington Post (7/27, Johnson, Rucker, Nakamura) reports, "The New Yorker interview gave voice to the profane intensity of the warring West Wing factions that has defined much of Trump's early administration – but the level of candor and raging frustration Scaramucci expressed yet again stunned a Washington political class that has become increasingly inured to the unorthodoxy of this White House." At one point, Scaramucci "switched to speaking in the third person while trying to make his mission clear." Scaramucci said, "Okay, The Mooch showed up a week ago. This is going to get cleaned up very shortly, okay?"

Bloomberg News (7/27, Talev) reports that Scaramucci "assailed rivals" Priebus and Bannon "in a profane tirade that is sure to inflame a running and very public feud among top White House officials." The AP (7/27, Bykowicz, Lemire) writes that "language pouring out of" the White House "sounded more like a mobster movie than a seat of presidential stability."

The New York Post (7/27, Fredericks) writes, "In the latest episode of 'White House Survivor,' the West Wing descended into chaos Thursday, as President Trump and his top aides turned on each other like vicious reality show divas – with no one sure who would be the next to get a knife in their back." Politico (7/27, Dawsey) writes that "in the span of six days," Scaramucci "has launched a brutally edged campaign to identify White House leakers, threatened to 'fire everybody' in the communications shop, and has declared war" on Priebus and Bannon.

Aaron Blake of the Washington Post (7/27) writes, "The Trump administration is one long exercise in desensitization. It has become difficult to be shocked by much of anything that happens. That said," the interview "is crazy. It's vulgar, vindictive and volatile. Scaramucci muses about killing people. He talks about his new White House colleagues performing sex acts upon themselves (metaphorically, of course)."

Charles Krauthammer said on Fox News Special Report (7/27), "This is the degradation of the presidency. ... None of us have ever seen this. The reason is it's not to be done. That kind of language is not to be used. ... The fact of the President is allowing all of this going on, I think it means that it rests with him. He's the only one who can actually restrain this. He appears not to. Perhaps he believes Scaramucci is the guy who will clear the swamp in the White House, but this is really disgraceful."

Tony Lee of Breitbart (7/27) writes, "The new White House communications director called the New Yorker's Ryan Lizza, a member in good standing in The Opposition Party, on Wednesday evening to blast his co-workers in a rambling rant that was so outrageous and discordant that reporters wondered whether Scaramucci drunk-dialed Lizza, was drunk with power, or, revealing he was unqualified for his communications director job, did not know how to smoothly go on and off the record."

John Dickerson said on the CBS Evening News (7/27, story 2, 2:30, Mason), "The kind of scorched earth effort that he outlines in this interview and elsewhere would suggest a White House working atmosphere in which it would be very harsh, where people would be looking over their shoulders, and that's not the way White Houses work. White Houses work when everybody is pulling for the same team, and this kind of a structure that he's talking about might keep people from talking at all, let alone leaking to reporters."

Republican strategist Alex Conant writes in Politico Magazine (7/27) that Scaramucci "is launching a take-no-prisoners mole hunt, promising to stop future leaks. He won't succeed. ... Trump's White House is not leaky because of a few bad apples. The No. 1 reason why it leaks is because his team lacks unity. It's not without irony that many of the leaks are about the very staff infighting that is causing the leaks."

The Hill (7/27, Fabian) reports, "In a tweet after the story published, Scaramucci declined to apologize to his colleagues. He did suggest he would quit using profanity publicly in his new role." Scaramucci tweeted, "I sometimes use colorful language. I will refrain in this arena but not give up the passionate fight for @realDonaldTrump's agenda. #MAGA."

Kellyanne Conway said on Fox News' Hannity (7/27), "Anthony said he uses colorful language. I think he's passionate about the President. It sometimes gets the best of him. But let me know when any of my colleagues in the West Wing call half of the country deplorable and irredeemable. Then we'll talk. Let me know when they look America in the eye and lie to them that they can keep their plan or keep their doctor if they would like to. Then we'll talk."

Roll Call (7/27, Bennett) headlines its report "Scaramucci Predicts Priebus Ouster In Vulgar Call To Reporter," while a Huffington Post (7/27, Levine) piece is headlined "Anthony Scaramucci Goes On Crass, Unhinged Rampage Against Top White House Aides." Axios (7/27, Savitsky) also

calls it a "vulgar interview." The Washington Examiner (7/27, Siegel) also reports on the interview.

USA Today (7/27, Jackson) reports that Scaramucci also "gave an aggressive television interview that appeared to finger" at Priebus. Scaramucci said in phone interview with CNN's New Day (7/27) that "we have a very, very good idea of who the leakers are, who the senior leakers are in the White House. ... As you know from the Italian expression, the fish stinks from the head down. I can tell you two fish that don't stink. That's me and the President. ... When I put out a tweet, I put Reince's name in a tweet, they make the assumption it's him because journalists know who the leakers are. If Reince wants to explain he's not a leaker, let him do that."

The New York Times (7/27, Baker) reports that Scaramucci "called out" Priebus "on live television, suggesting that he may be a leaker – all over a leak that was not actually a leak." Scaramucci "seemed to suggest on Twitter overnight that Mr. Priebus may have had something to do with the 'leak' of Mr. Scaramucci's financial disclosure form to Politico," but Politico reporter Lorraine Woellert "explained that she simply requested the financial disclosure form through normal channels and was provided it by a government agency as required by federal law."

The Wall Street Journal (7/27, Stokols, Bender, Ballhaus) reports that Scaramucci said of his relationship with Priebus, "We have had differences. When I said we were brothers from the podium, that's because we're rough on each other. Some brothers are like Cain and Abel. Other brothers can fight with each other and get along."

Sanders Will Not Say If Trump Has Confidence In Priebus. The Washington Post (7/27, Johnson) reports that White House press secretary Sarah Huckabee Sanders would not say if the President still has confidence in Priebus. Sanders said, "We all serve at the pleasure of the President, and if he gets to a place where that isn't the case, he'll let you know." When pressed, Sanders "said that she had already answered the question, and she noted that this White House has 'a lot of different perspectives because the President hires the very best people.'" Politico (7/27, Nelson) also reports on Sanders' remarks.

Robinson Says "Mad King Donald" Has Hired Scaramucci For "War" Over Mueller. Eugene Robinson writes in his Washington Post (7/27) column, "The Court of Mad King Donald is not a presidency. It is an affliction, one that saps the life out of our democratic institutions, and it must be fiercely resisted if the nation as we know it is to survive. ... The problem is not just that President Trump is selfish, insecure, egotistical, ignorant and unserious. It is that he neither fully grasps nor minimally respects the concept of honor, without which our governing system falls apart. ... Why bring in Scaramucci? Because, I fear, the mad king is girding for war. Trump is reckless enough to fire [Special Counsel Robert] Mueller if he digs too deeply into the business dealings of the Trump Organization and the Kushner Companies."

Scaramucci Reports More Than $50 Million In Assets. The AP (7/27, Condon) reports that Scaramucci "owns property and businesses worth more than $50 million," according to his financial disclosure report. The "biggest source of his wealth is an ownership stake in an investment fund he founded, SkyBridge Capital."

House Republicans Pass $788 Spending Bill Funding Pentagon, Border Wall.

The AP (7/27, Taylor) reports that the House of Representatives passed 235 to 192 a $788 billion spending bill Thursday that provided funding for the departments of Defense, Veterans Affairs, and Energy and the Army Corps of Engineers. The bill "also includes an increase for America's nuclear weapons stockpile managed by the Department of Energy." The vote "both eases a large backlog of unfinished spending bills and gives Trump and his House GOP allies political wins heading into the August recess." The AP adds, however, that the bill is likely to face "more powerful Democratic opposition in the Senate," which may lead to a "potential government shutdown battle" over the border wall measure in the fall. The Las Vegas Review-Journal (7/27, Martin) reports that a series of amendments to block funding for the Yucca Mountain nuclear repository were not included in the $800 billion spending package.

Editorial Wrap-Up

New York Times.

"Congress Defies Trump On Russia." A New York Times (7/27) editorial welcomes the new sanctions on Russia, and urges the President to sign the bill, arguing that sanctions are "a nonviolent tool – and in this case a timely and appropriate one – for making clear when another country's behavior has crossed a line and for applying pressure that could make its leaders

reconsider course."

"Call It 'Sneaky Repeal,' Not 'Skinny Repeal.'" The New York Times (7/27) editorializes, "The Senate considers itself an august body of statesmen. But on Thursday it became a theater of the absurd when three top Republicans said they would vote for a health care bill only if House leaders guaranteed that it would not become law." The Times says the GOP "mission to destroy Obamacare has become a farce, albeit one that may yet harm the health of millions of Americans."

Washington Post.

"Venezuela's Lawless Regime Staggers Toward A Coup." The Washington Post (7/27) argues in an editorial that if constituent assembly in Venezuela is called to rewrite the constitution, the US "should react decisively – but it should do so in ways that punish Venezuela's corrupt rulers, not its long-suffering population."

"The Latest On Tax Reform Is All About Cutting Rates. But What About Raising Revenue?" In an editorial, the Washington Post (7/27) argues that Republican tax negotiators' dismissal of the idea of a border adjustment tax leaves them only "two choices" to replace the $1 trillion in revenue that BAT would have otherwise raised: "scale back their tax-cutting plans or greatly increase the federal deficit." The Post calls on Republicans to do the former and not to "shower new tax breaks on companies and the well-to-do and stick future generations with the tab."

"Metro's Dithering Is Costing Millions." In an editorial, the Washington Post (7/27) argues that state and local officials in the District of Columbia, Maryland, and Virginia "are plodding their way toward establishing" a new safety oversight commission for the transit system after former Transportation Secretary Anthony Foxx deadline for local commission to be established expired in February – costing the three jurisdictions $9 million in withheld federal funds. The Post concludes that "the entire sorry saga is the latest episode illustrating the scope of the challenge of coordinating a collective response among Metro's four distinct governing entities – the two states, the District and the feds."

Wall Street Journal.

"Tax Reform Principles." In an editorial, the Wall Street Journal (7/27) writes that Republicans' abandonment of the border adjustment tax raises the issue of how to secure revenue but that they should also receive credit for planning to offer a tax reform plan this year. The Journal then lays out a series of principle to gauge the effectiveness of any tax reform proposal, including ensuring economic growth, making cuts immediate and permanent, reforming the tax code beyond buts, and finding a way to exit the trap of deficit neutrality – which the Journal concludes could cause the death of tax reform.

"The Nuclear Spirit Of Iran." A Wall Street Journal (7/27) editorial says the US was right to call Iran's launch of a missile Thursday a violation of the spirit of the nuclear agreement, and argues that Iran is making progress on its ballistic missile program, despite the 2015 nuclear deal.

"Trump's Transgender Tweet." A Wall Street Journal (7/27) editorial lambastes President Trump for his announcement that transgender troops will be barred from serving, saying the move diverted the attention of Defense Secretary Mattis and Joint Chiefs Chairman Dunford from the Middle East and North Korea, and faults him for announcing such a significant policy shift via Twitter before the details of the policy have been determined.

Thomas Massie Location: Sheraton Reston Hotel, 11810 Sunrise Valley Drive, Reston, VA www.yaliberty.org https://twitter.com/YALIberty

Last Laughs

Late Night Political Humor.

Stephen Colbert: "I was worried when Sean Spicer left that the communications office of the White House would lose some flavah. Little did I know that he was going to be replaced by a guy who serves up very spicy quotes."

Stephen Colbert: "The latest leak that has the Mooch's fusilli in a twist occurred yesterday when Politico published Scaramucci's financial disclosure form, revealing that he has assets worth as much as $85 million. How humiliating. Now everyone knows he's the poorest person working at the White House."

James Corden: "New White House Communications Director Anthony Scaramucci is on a real tear to stop leaks from the White House. We know this because someone in the White House leaked it."

James Corden: "Scaramucci was livid last night after some of his financial information was leaked, so he went on Twitter and seemingly blamed Chief of Staff Reince Priebus for the leak, but then he deleted the tweet later, which is a great start for a communications director. Now I don't know, Reince Priebus might be the leak, Scaramucci might be lying. Only one thing is certain: I can't spell either of their names."

James Corden: "The only thing Donald Trump and Abraham Lincoln have in common is they both wore silly hats."

James Corden: "Hillary Clinton announced she will be releasing her memoir about the 2016 presidential campaign titled 'What Happened.' The book will be released in hard back, Kindle and 30,000 emails you won't be able to find."

Trevor Noah: "Scaramucci just came in and set fire on Reince Priebus and Steve Bannon. He burnt them like a hoverboard, people. We can't go through all of the interview because it will break our bleep machine."

Trevor Noah: "We were all like, 'Oh, Spicer, we'll never get over you,' and then Scaramucci walked in, and we're like, 'God damn, we're moving on, baby, we're moving on.'"

Trevor Noah: "Oh, if you knew in advance what Jeff Sessions would do, you would have picked someone else. Now you know how America feels about your presidency. We all understand."

Trevor Noah: "Why is Trump so scared of people seeing his tax returns? I'm genuinely flabbergasted. I'm like, 'What you are afraid of?' What could be worse than what we already know about him, what could be worse? We know everything. Like, did he claim himself as Putin's dependent?"

Trevor Noah: "Like if the White House is a clown car, Jeff Sessions is the only clown who knows how to drive. And that's Trump's dilemma."

Jimmy Fallon: "I heard that 'Dancing With the Stars' is reportedly trying to get former White House Press Secretary Sean Spicer to be a contestant, marking the first 'Dancing With the Stars' contestant who's hit rock bottom before he went on the show."

Jimmy Fallon: "Spicer's not the only one doing a reality show. On the next episode of 'Undercover Boss,' Vladimir Putin is going to go work at the White House."

Jimmy Fallon: "Trump's new communications director, Anthony Scaramucci, made news for comparing Trump's attempt to repeal Obamacare to Lincoln abolishing slavery. In a related story, Anthony Scaramucci is now expected to take Sean Spicer's spot on 'Dancing With the Stars.'"

Seth Meyers: "The publisher of Hillary Clinton's upcoming memoir announced today that the title of her book will be the statement 'What Happened.' Well, that's the censored version."

Seth Meyers: "As you may recall during the campaign, when Trump was cynically trying to drive a wedge between Hillary Clinton and Democratic voters, he claimed he would be the true champion of the LGBTQ community. At one point, even holding a gay pride flag at one of his events. Look at him. He looks like a matador trying to make peace with a gay bull."

Seth Meyers: "After getting over a procedural hurdle on Tuesday, Republicans in the Senate have failed to pass several healthcare bills. One that would have only repealed Obamacare, and one that would've repealed and replaced it. Now, they're scrambling to come up with a third option. The GOP is basically a drunk guy trying every key to get into his apartment. 'No, that's my mail key. Ah, I don't even think this is my building.'"

Trump Says U.S. To Withdraw From Paris Climate Accord.

The President's announcement of his decision to withdraw from the Paris climate accord unleashed furious condemnation from media analysts, Democrats, climate activists and foreign dignitaries. The story led all three major network newscasts – which gave it nearly 20 minutes of combined airtime – and replaced the Russia investigation as the main topic of discussion on cable. Media analyses disputed Trump's rationale for leaving the accord and accused him of downgrading the US' role as a global leader – as well as of endangering the planet's very survival. Reuters (6/1, Volcovici), for example, reports that "with Trump's action, the United States will walk away from nearly every nation in the world on one of the pressing global issues of the 21st century," aligning itself only with "Syria and Nicaragua." The New York Times (6/1, A1, Shear), meanwhile, refers to "a remarkable rebuke to fellow heads-of-state, climate activists, corporate executives and members of the president's own staff," and the Washington Post (6/1, A1, Rucker, Mooney) to a decision that "risks rupturing global alliances." NBC Nightly News (6/1, story 2, 2:10, Guthrie) warned viewers that the effects of climate change will "worsen...now that the US...plans to pull out of the...agreement."

Typical of the tenor of much of the commentary was Fareed Zakaria, who said on CNN's Situation Room (6/1) that "the United States...has been the leader of the world," but with Trump's move it "almost resigned" from that role. Brian Williams, on MSNBC (6/1), called Trump's speech "dark," and on Twitter, Nicholas Kristof wrote, "If somebody drives drunk, we arrest him. If he drives national policy recklessly, threatening our planet, we just call him 'Mr. President.'" Politico editor-in-chief Blake Hounshell somberly tweeted, "Paris is going to be America's Brexit." The Huffington Post (6/1, Kaufman), meanwhile, headlined its lead story "Liar, Liar, Planet Of Fire," and the Washington Free Beacon (6/1, Griswold) reports that "billionaire environmentalist and Democratic donor Tom Steyer even said that Trump's actions were an act of war against the American people."

As the Los Angeles Times (6/1, Mascaro) reports, however, "reaction to...Trump's decision...broke swiftly along partisan lines," and most Republicans supported the President – as did conservative media. Thus the Washington Examiner (6/1, Adams) quipped that "politicos and media pundits" weighed in "with over-the-top hyperbole worthy of a street corner end times preacher," Trish Regan warned viewers on Fox News' Special Report (6/1) that they should get ready to "hear a lot of hysteria...from many members of the left," and Steve Hayes the Weekly Standard, also on Fox News' Special Report (6/1), said that "the hysteria from the left...is not just because...Trump is president, but it's based on policy." Trump critic Charles Krauthammer said on Fox News' Special Report (6/1), "I'm all in favor of an international treaty on climate and on controlling emission of CO2, but Paris wasn't that."

With most of the reporting focused on criticism of Trump, nearly all news accounts on Trump's White House remarks highlighted his statement, "I was elected to represent the citizens of Pittsburgh, not Paris." The Drudge Report, in fact, led with a "Pittsburgh, not Paris" banner – which linked to a similarly-headlined AP (6/1, Colvin, Pace) dispatch posted on the Pittsburgh Post-Gazette's website. Jim Acosta said on CNN's The Lead (6/1) that Trump's remarks "seemed to come out of the Steve Bannon playbook," and "when you hear the President use words like 'I represent the citizens of Pittsburgh, not Paris,' you have an announcement that is steeped in campaign rhetoric." Pittsburgh Mayor Bill Peduto took to Twitter shortly afterwords, however, and wrote, "Fact: Hillary Clinton received 80% of the vote in Pittsburgh. Pittsburgh stands with the world & will follow Paris Agreement."

Asked on CNN's Anderson Cooper 360 (6/1) if he has a message for the President, Peduto said last night, "What you did was not only bad for the economy of this country, but also weakened America in this world." Reporting on the reaction to Trump's move by area officials, the

Pittsburgh Post-Gazette (6/2, Hopey) reports the President "received some support from elected officials in Western Pennsylvania," though "in most cases, the battle lines were drawn along party lines." Among those defending Trump were Reps. Mike Kelly and Keith Rothfus.

USA Today (6/1, Korte) says "Trump did not deny the scientific consensus that rising global temperatures" pose "a threat to the planet," though "he has previously called that science 'B.S.' and 'an expensive hoax' perpetrated by the Chinese." Rather, the President "complained that other countries had attached too many conditions to their voluntary agreements," and said, "In short, the agreement doesn't eliminate coal jobs, it just transfers those jobs out of America and the United States, and ships them to foreign countries." In its lead story, the CBS Evening News (6/1, lead story, 3:20, Mason) similarly reported that "this time," Trump "did not call climate change a hoax, but said he is reasserting American sovereignty, and suggested he's willing to negotiate what he sees as a better deal." Likewise, the New York Times (6/1, Landler, Plumer, Qiu) indicates that "one thing Mr. Trump did not do in the Rose Garden on Thursday afternoon was question the underlying science behind climate change." Instead, he "suggested the 194-nation accord did not go far enough in stemming the rise in global temperatures because of greenhouse gas emissions."

The Washington Examiner (6/1, Westwood) quotes Trump as also calling "the agreement...a massive redistribution of United States wealth to other countries," and indicating that "foreign leaders 'went wild' when the Obama administration agreed to the Paris deal because they knew its terms would hamstring the US economy." The Wall Street Journal (6/1, A1, Stokols, Ballhaus) quotes Trump as saying, "This agreement is less about the climate and more about other countries gaining a financial advantage over the US." An AP (6/1, Ritter) analysis disagrees with Trump, and reports that the accord "in many ways was designed to ensure the participation of the United States." For example, "the deal's transparency rules...reflect US priorities," and "even the legal structure of the deal has American fingerprints."

USA Today (6/1, Rice) reports that Nathaniel Keohane of the Environmental Defense Fund said yesterday "the US might as well put up a 'closed for business' sign up across America," which "would signal an American leadership retreat." Jake Schmidt of the Natural Resource Defense Council similarly "said that 'stepping back from such a historic agreement means we're not prepared to be leaders on the global stage.'"

The Los Angeles Times (6/1, Halper, Zavis) refers to "a statement of unabashed nationalism as he turned away from a global leadership role in the fight against climate change." The New York Post (6/1, Fredericks) describes Trump as "fulfilling a campaign promise" but "alarming other world leaders and even going against the wishes of fossil fuel giants like Exxon and BP."

Roll Call (6/1, Nawaguna) reports "Trump said the US will also immediately stop contributing to the Green Climate Fund, a United Nations-affiliated organization that helps developing nations adapt to and mitigate the harmful effects of climate change." Politico (6/1, Restuccia, Adragna, Dawsey) notes, however, that Trump "said he'd be willing to re-enter an international climate deal if he could secure better terms for the United States." Bloomberg News (6/1, Dlouhy) quotes the President as saying, "So we are getting out, but we will start to negotiate and we will see if we can make a deal, and if we can, that's great. And if we can't, that's fine."

McClatchy (6/1, Kumar, Ordoñez) reports "Republicans and conservative groups immediately cheered the decision." Said Speaker Ryan, "The Paris climate agreement was simply a raw deal for America. ... Signed by President Obama without Senate ratification, it would have driven up the cost of energy, hitting middle-class and low-income Americans the hardest." The Los Angeles Times (6/1, Mascaro) reports Senate Majority Leader McConnell "applauded Trump 'for dealing yet another significant blow to the Obama Administration's assault on domestic energy production and jobs,'" and "coal-state lawmakers, including Rep. Alex Mooney (R-WV), were thrilled to attend the White House announcement at the Rose Garden." There were, however, "several Republicans, including Rep. Carlos Curbelo, who represents a swing district in South Florida, and Sen. Susan Collins, the centrist from Maine," who "opposed Trump's decision."

Curbelo said on CNN's The Lead (6/1), "This is a strategic mistake and something that really sets us back. ... We're already seeing the effects of salt water intrusion into the Everglades which threatens our drinking water supply. We're also seeing coastal properties under threat, real estate, billions and billions of dollars. So down here in south Florida we understand that the environment and the economy are one and the same." Asked why so many Republicans do not see climate change as a problem, Curbelo said, "Regrettably this issue has been politicized. The polarization is out of control. I really think it dates back to when former Vice President Gore adopted this cause. Back then a lot of Republicans just assumed that they must be against whatever Mr. Gore was discussing at the time."

Sen. Roger Wicker, writing for USA Today (6/1), says the agreement "stood in the way of...Trump's efforts to eliminate these costly carbon dioxide rules. But this would be the least of its harm. A report released in March by NERA Economic Consulting suggests that the climate deal could cost the US economy nearly $3 trillion and more than 6 million industrial sector jobs by 2040." To Wicker, "The Paris deal would have threatened our country's prosperity."

Sen. Richard Blumenthal, meanwhile, said on CNN's Situation Room (6/1) that the message Trump is sending "to the rest of the world is that the United States is abdicating leadership here. No one who abandons the field can fight and win and the United States essentially is going to sidelines." Rep. Jackie Speier said on CNN's Situation Room (6/1) that Trump "has made himself totally irrelevant," adding that the "biggest thing that has happened as a result of this action today is that our international relations with our European friends is in shambles."

Tucker Carlson said on Fox News Tucker Carlson Tonight (6/1), "We are no longer, obviously, talking about science here. What you're watching is a priesthood defending its faith. The essence of science, meanwhile, is skepticism. That's relentlessly testing what you think you know to make certain you actually know it. ... That's not happening here. It's not allowed. Press for explanations as to what they are talking about and you're attacked as immoral, a denier. The matter is settled. Every word immutable and holy. Questions equal apostasy. Shut up and believe."

Trump Withdraws U.S. From Paris Agreement; Andrew Cuomo, Barack Obama, Scott Pruitt, More Respond. Newsday (NY) (6/1) reports that Interior Secretary Ryan Zinke said, "America's energy and economic destiny should be up to the United States, not the United Nations." Zinke praised Trump for taking "bold and decisive action to pull the U.S. out of the poorly negotiated Paris Accord that would kill American jobs and manufacturing while doing little to protect the environment."

Pence, Pruitt, Perry Defend Trump's Decision. Vice President Pence said on Fox News' Hannity (6/1) that Trump "has demonstrated his commitment not just to keep his word, but to put American workers, American consumers, American energy and the American people first. This was a bad deal from the moment it was signed by the last Administration. It is an international treaty that was never submitted to the Senate probably because it never would have had a chance there. This is an agreement that puts an enormous burden on Americans consumers, on the American economy while allowing countries like India and China to virtually get off scot-free for a decade or more." The President "made a decision to fulfill his word to the American people to get out of the Paris accord, but also to leave the door open to the possibility of negotiating a completely new deal or going back into the agreement under terms that will put the American economy and the American people first."

EPA Administrator Pruitt said on CNN's The Lead (6/1), "We are leading the world with respect to innovation and technology and reducing our CO2 footprint. This agreement was truly about putting America second or last. It was not about learning from what America is doing. It was about putting constraints on the economy as the President talked about. This is not an agreement or a decision with respect to engagement on CO2. America is going to continue engage on CO2. We are going to export innovation and technology. We are going to continue our seat at the table and negotiating with the nations across the globe but with the attitude of putting our interests first, making sure we don't penalize ourselves."

Later in the interview, Pruitt was asked if Trump believes climate change is a hoax. He answered, "This is not about whether climate change is occurring or not. This is about making sure that America, as we renegotiate CO2 reductions, that we do so with an America first approach. That's why it was a bad deal for this country when it was signed. It is a bad deal today. It puts us at economic disadvantage. The President has said unequivocally that he is committed to continuing the discussions about CO2 reductions but with America at the forefront in those discussions."

The Los Angeles Times (6/1, Zavis) reports Energy Secretary Perry said, "Today the president announced that the United States will no longer be bound by an agreement unilaterally entered into by the Obama administration. This was neither submitted to nor ratified by the U.S. Senate, and is not in the best long term economic interest of the United States." He added, "Instead of preaching about clean energy, this administration will act on it. Our work and deeds are more important than empty words. I know you can drive economic growth and protect the environment at the same time, because that is exactly what I did as governor of Texas."

The AP (6/1) reports Perry, who is on a nine-day trip to Japan and China, "said from Tokyo that the U.S. will continue to develop 'next generation technology' in energy, including nuclear

energy, liquefied natural gas and renewables such as wind and solar power." Also mentioning Perry's words are Politico (6/1) and CBS News (6/1).

The Paris Accord Withdrawal Is a Win For the Coal Industry. But It Probably Won't Bring Back Jobs. Fortune (6/1, Abramson) reports, "There is shaky evidence" that withdrawing from the Paris agreement will lead to more coal mining jobs. Even without the Clean Power Plan, "experts say larger market forces – like the increasing use of natural gas and renewable energy – will prevail." James Van Nostrand, a law professor at West Virginia University and the Director of the school's Center for Energy and Sustainable Development, said, "Environmental regulations have a small impact on economics. You make environmental regulations go away, it doesn't change anything at all."

Secretary Zinke Still Soliciting Nominations For Royalty Committee.

The Nation Sun News (6/1) reports that Interior Secretary Ryan Zinke is "still seeking nominations for a new royalty policy committee." Zinke "re-established the committee in March to advise him on mineral policy and leasing issues on Indian and federal lands." The Interior Department has "twice extended the deadline for nominations, with the latest to be announced in the Federal Register on Friday."

CNN Analysis: Administration Avoids Saying "Climate Change."

CNN (6/2, Green) reports that rather than claim climate change is not happening or that "global warming isn't real", "there is an administration-wide reluctance to avoid the topic altogether." Indeed, CNN adds, the Administration "has repeatedly circumvented any mention of those key little words." CNN also report that though the White House says it favors increased study of the climate, it has "cut much of the major funding that would go towards the studies."

DOJ IG Finds Problems With Department's Response To Sexual Misconduct Allegations.

The Washington Post (6/1, Rein) reports that the Justice Department "faces 'potentially significant and recurring' problems in its handling of sexual harassment claims, the agency's watchdog said Thursday, weaknesses that are watering down enforcement of its zero-tolerance policy toward employee misconduct." DOJ Inspector General Michael E. Horowitz, "in a harsh report on how managers in Justice's Civil Division handle accusations of workplace sexual harassment, found 'systemic' issues and inconsistent policies for tracking, investigating and reporting cases," and "as a result, it said, there were weak, often inequitable penalties for employees with documented misconduct." The article notes that "the issue has dogged at least one other agency, the Interior Department, where widespread harassment in the National Park Service has prompted an agency-wide survey of 70,000 employees to gauge the extent of the problem and the effectiveness of the government's response."

Additional Coverage: With New Actions, Zinke Says Alaska Is 'Open For Business'.

Additional coverage that Interior Secretary Ryan Zinke on Wednesday "unveiled plans to update the government's resource assessment for the Arctic National Wildlife Refuge and to open new sections of the National Petroleum Reserve-Alaska to oil and gas leasing" was provided by E&E Publishing (6/1, Hobson), the Washington (DC) Examiner (6/1, Siciliano), Newsweek (6/1, Main), Natural Gas Intelligence (6/1, Passut), Newsmax (6/1, Swanson), Breitbart (6/1, Starr), Oil and Gas Investor (6/1), Stars And Stripes (6/1, DLOUHY), and E&P Magazine (6/1).

Additional Coverage: Wackowski Is New Senior Adviser For Interior Department.

Additional coverage that Steve Wackowski, "who most recently managed the reelection campaign for Sen. Lisa Murkowski, R-Alaska, was named May 30 to be senior adviser for Alaska affairs to Interior Secretary Ryan Zinke," was provided by the Cordova (AK) Times (6/1) and Coastal Television (AK) (6/1, Athens).

King Urges Interior Secretary To Reaffirm Designation Of Katahdin Woods And Waters National Monument.

The Free Press (ME) (6/1) published Sen. Angus King's May 25 letter to Interior Secretary Ryan Zinke. In the letter, King urged Zinke to reconfirm the designation of the Katahdin Woods and Waters National Monument.

Note To Washington: Public Lands Trump Partisanship In These Parts.

In an op-ed for the Idaho Statesman (6/1, Johnson), Rick Johnson, the executive director of the

Idaho Conservation League, welcomes Interior Secretary Ryan Zinke and Agriculture Secretary Sonny Perdue to Idaho. While "Idaho is a conservative place," Johnson says that Idaho also "loves its public lands." Johnson acknowledge that "we all have different ideas of how parts of it should be managed," but writes that "we've done a pretty good job of trying to figure that out, working together." He concludes that "while we all recognize our rural neighbors are sometimes struggling, Idaho overall is doing pretty well, in part, because of our access to a great quality of life, brought to us by our public lands."

Secretary Zinke: Listen To Native Tribes, Not Corporations.

Bernadette Demientieff, executive director of the Gwich'in Steering Committee, writes in the Pundits Blog for The Hill (6/1, Demientieff) urging Interior Secretary Ryan Zinke to listen to Native tribes in Alaska, and not just corporations. Demientieff says that the destruction to Native homeland should not be sacrificed for short-term financial gain. She says that the Gwich'in "people are alarmed. We see the changes in our climate, our land, our animals and our way of life. Villages are falling into the sea, permafrost melt is making infrastructure insecure and food sources are disappearing."

Wild Places Are The True Source Of America's Values.

In an op-ed for the Albuquerque (NM) Journal (6/2, Zedalis), University Of Tulsa Law Professor Rex J. Zedalis writes that "those who urge encroachment on our national monuments, parks, recreation areas or public lands overlook a central truth about America and its big-hearted, industrious and creative people." Zedalis argues that "liberty, opportunity and free thought" grow "out of a sense of complete openness, a sense of an absence of parameters, a sense of the immense scale of time, a sense of ancient and even primordial beginnings." He asserts that "these are the sources of the fundamental values that represent our great country."

Bureau Of Land Management

Budget Cut Would Send Wild Horses To Slaughterhouse, Says Activist.

The Washington Times (6/1, Sherfinski) reports that "activists are warning the country to brace for mass horse slaughterings after President Trump's new budget called for axing $10 million from the government's wild horse management program." The Interior Department's proposal "to cut costs by allowing unrestricted sales of excess wild horses on federal lands could ultimately send thousands of them to slaughter," according to Suzanne Roy, executive director of the American Wild Horse Campaign. Roy said, "It would be nice if President Trump could step in here, because it's hard to imagine that someone who wants to make America great would support destroying the symbols of American freedom and greatness."

Idaho Cattle Industry OK With Proposed Craters Grazing Plan.

The Salem (OR) Capital Press (6/1, O'Connell) reports that Idaho Cattle Association President Jerald Raymond "believes the Bureau of Land Management did a reasonable job in drafting its preferred plan to govern grazing of roughly 275,000 acres within Craters of the Moon National Monument and Preserve." Raymond said, "We actually think it's a pretty good plan they put forth as far as the preferred alternative." Grazing opponents such as the conservation group Western Watersheds Project, however, "vow to formally challenge the plan, arguing it doesn't adequately protect the environment and native sage grouse within the federally protected ancient lava flows."

Bureau Of Reclamation

Boise River Flows Go Higher From Increased Snowmelt.

The Idaho Statesman (6/1, Sowell) reports that "the amount of water flowing through the Boise River is expected to reach its highest level this year on Friday, after additional water is released from Lucky Peak Dam in two stages." The Bureau of Reclamation and the U.S. Army Corps of Engineers "released an extra 500 cubic feet per second beginning late Thursday morning." Then "a few hours later, the agencies announced that an additional 500 cfs will be released beginning at 8 a.m. Friday morning."

Bureau Of Safety And Environmental Enforcement

Our Views: More Oil, Safely Drilled.

In an editorial, the Baton Rouge (LA) Advocate (6/1) says that newly appointed Bureau of Safety and Environmental Enforcement director Scott Angelle will "have his hands full." The paper warns about "political polarization" and that critics of President Trump are "apt to blame him if another safety problem of any major scale comes along." Also, "reversing the 'red tape' that Angelle now criticizes will be difficult and require a lot of hard work." But the paper is "heartened that the industry and Angelle are continuing to make the case that energy development should be both robust and safe."

Opinion: Excellent Pick For Agency Director.

In an op-ed for the Thibodaux (LA) Daily Comet (6/2, Comeaux), Shane Comeaux calls the pick for Scott Angelle to lead the Bureau of Safety and Environmental Enforcement a "home run." Comeaux lists "three areas of focus" for Angelle so that "U.S. energy dominance can become a reality." Comeaux urges Angelle to tackle "required burdensome paperwork," "unclear regulations in the permit process," and "a focused effort toward more offshore drilling."

Fish And Wildlife Service

Environmental Group Targets Border Wall, Says Prototypes Will Imperil Desert Species.

USA Today (6/1, Loomis) reports that the Center for Biological Diversity will "file the third in what promises to be a string of environmental legal challenges to President Trump's border wall plans." The group on Thursday "filed a required notice of its intent to sue the Department of Homeland Security over plans to hire contractors to build 30-foot-long prototypes of reinforced concrete or other materials this summer near San Diego." The organization claims that "such construction north of an existing border fence would harm several legally protected endangered species...and the government has provided no documents assessing or disputing that point."

Yellowstone Grizzlies Await Delisting Rule, Possibly In June.

The Helena (MT) Independent Record (6/1, Chaney) reports that the proposed removal of grizzly bears from federal Endangered Species Act protection "remains in hibernation." Chris Servheen, who retired last year as the Interagency Grizzly Bear Committee's recovery coordinator, said, "It's very unusual to have change of administration and all this time with nobody knowing what's going on. The Fish and Wildlife Service, BLM (Bureau of Land Management), National Park Service – nobody's got any directors. And if this gets politically directed instead of following the biological decision, things are going to go south." However, "the lack of an appointed agency director would not affect progress on the delisting effort, said Gavin Shire, U.S. Fish and Wildlife Service chief of Public Affairs." Shire said, "We can produce a rule with an acting director. Jim Kurth, who was one of our two deputy directors, has assumed the role of acting director as of January 20. We're still hoping for publication (of a final rule) this spring or early summer."

Additional coverage was provided by the Yellowstone Insider (6/1, Reichard).

Grizzly Carcass Dumped In Stillwater River.

The Missoulian (MT) (6/1, Chaney) reports that "someone dumped a male grizzly bear's carcass in the Stillwater River near Whitefish, and state and federal wildlife officials have started an investigation." Boaters discovered "the bear in the water on May 28." U.S. Fish and Wildlife agents "believe the bear may have been dumped from the Farm to Market Road Bridge into the Stillwater west of Whitefish sometime between May 25 and 28."

Additional coverage was provided by the Daily Inter Lake (MT) (6/1), Montana Public Radio (6/1, Hegyi), and KPAX-TV Missoula (MT) Missoula, MT (6/1).

National Park Service

National Parks Spending $287K On Climate Change Internships.

Newsmax (6/1, Crowe) reports that the National Park Service is "spending $287,308 on an internship program for college students to learn about producing messages to communicate the

impact of climate change, according to a grant notice reported by the Washington Free Beacon." George Mason University is partnering with the NPS on the program, "which provides students with paid internships to produce videos, websites, infographics, and other items, according to the program's website."

Republican-linked Developer Says Indiana Dunes Work To Begin.

The AP (6/1, Slodysko) reports that "a Republican Party official with a lucrative privatization deal to redevelop an aging pavilion at Indiana Dunes State Park plans to forge ahead with the project, which was in limbo amid numerous setbacks, and hopes to break ground in the coming months." Steve Patterson, a spokesman for the group Pavilion Partners, whose principal, Chuck Williams, is treasurer of the Indiana Republican Party, said, "As we continue to work with both the state of Indiana and our architects, we anticipate final renderings to be available in late June. Once we receive feedback from the state, we hope to begin renovation of the pavilion around Labor Day." Emily Ferguson, a National Park Service compliance official, "said the state has yet to submit paperwork that would clear the way for the construction of the banquet facility." However, "she says the federal agency does not have a say over work on the pavilion."

Grand Teton's Jenny Lake In Final Year Of Renovation.

The AP (6/1) reports that "this year marks the final summer of construction at one of the most popular destinations in Grand Teton National Park in northwest Wyoming." Grand Teton spokesman Andrew White noted that "this season's work at Jenny Lake is the fourth and final major construction phase on an $18 million renovation project." According to White, "all the visitor services are open at the lake but visitors might encounter altered access routes."

Study: Focus On Elk In Yellowstone Brucellosis Fight.

The AP (6/1) reports that "a new study says wildlife managers should worry more about elk than bison as they seek to reduce the transmission of brucellosis to cattle in the area around Yellowstone National Park." The report from the National Academies of Sciences, Engineering and Medicine suggests agencies "should consider reducing the elk population through hunting, contraception and removing infected elk." It also recommends "reducing the use of supplemental elk feeding grounds in Wyoming during the winter."

Proposed Bike Route In Western Iowa Would Span 6 Counties.

The AP (6/1) reports that "officials from six western Iowa counties are working together to mark a 209-mile bicycle route that would run from Woodbury County to Fremont County." The Frontier Iowa Trails Network is working on the designation of the Lewis and Clark Today Route. Brian Leaders of the National Park Service and others are "raising money for installation of the route's signs, which is expected to cost $200,000."

The Lottery Is Now Open For Permits To Hike Yosemite's Iconic Half Dome This Summer.

The Los Angeles Times (6/1, Forgione) reports that the lottery for a Half Dome hiking permit has started. According to the article, "the cables that guide hikers the last 400 feet to the top of the Yosemite high point will be in place starting Friday."

Office Of Surface Mining

Trump's Loyalty To Coal Is Bad For Taxpayers.

In a piece for the High Country (CO) News (6/1, Zukoski), Ted Zukoski, an attorney with Earthjustice, criticizes President Trump's executive order "which lifted the Obama administration's moratorium on coal leasing on public lands." He argues that reform is "badly needed" because "there is now little or no meaningful competitive bidding for federal coal leases." According to Zukoski, "Trump's order gutted a process meant to ensure that the coal-leasing program, last revised in the 1980s, generates a fair return for Americans and protects the environment."

US Geological Survey

USGS Finds Too Little Methane In Water Wells From Natural Gas Drilling To Worry About.

Natural Gas Intelligence (6/1, Fisher) reports that "a new study by the U.S. Geological Survey

(USGS) said natural gas drilling in the Eagle Ford, Fayetteville and Haynesville shales is not a significant source of methane or benzene found in drinking water wells located in areas of drilling operations." However, the agency "said it could take decades before the effects of unconventional oil and natural gas production on groundwater in Arkansas, Louisiana, and Texas is fully known." The study is the first of these areas "to systematically determine the presence of benzene and methane in drinking water wells near unconventional oil and gas production areas in relation to the age of the groundwater," USGS said. USGS hydrologist Peter McMahon, study lead, said, "Understanding the occurrence of methane and benzene in groundwater in the context of groundwater age is useful because it allows us to assess whether the hydrocarbons were from surface or subsurface sources. The ages indicate groundwater moves relatively slowly in these aquifers. Decades or longer may be needed to fully assess the effects of unconventional oil and gas production activities on the quality of groundwater used for drinking water."

Additional coverage was provided by World Oil.

Big Sur Landslide Added 13 Acres To California's Coastline.

The Daily Mail (6/1, Wilkinson) reports that "when California suffered its biggest-ever mudslide on May 20, it lost a quarter of a mile of Highway 1 near to a terrifying torrent of rock and dirt." However, "it also gained a massive 13 acres of coastline – the equivalent of ten football fields, comprising an estimated 71 million cubic feet of collapsed earth – the US Geological Survey (USGS) has revealed." USGS research geologist Jonathan Warrick "led the project, using aerial photos taken out of the window of a Cessna plane on May 27 to calculate the extent of the collapse." Warrick "found that the equivalent of 2 million cubic meters of rock and dirt – that's 70 million cubic feet, or 200,000 dump trucks' worth of soil – had fallen on the road from as far as 1,100 feet above."

Dreaded White-nose Syndrome Confirmed In Alabama Bat Species For First Time.

Alabama Live (6/1, Pillion) reports that white-nose syndrome has "been confirmed for the first time in a species called the southeastern bat, according to the U.S. Geological Survey." According to the article, "the infected southeastern bat was found in a cave in Shelby County, and is the first member of its species (Myotis austroriparius) confirmed to have white-nose syndrome and the first infected bat of any species found in Shelby County." A USGS lab confirmed the test results this week.

Top National News

Administration Asks Supreme Court To Reinstate Trump's Immigration Order.

The AP (6/1) reports that in a filing Thursday, the Justice Department asked the Supreme Court to reinstate the Trump Administration's "ban on travelers from six mostly Muslim countries." The Department argues in its filing "that the federal appeals court in Richmond, Virginia, made several mistakes in ruling against the Trump travel policy," and that "the nation will be safer if the policy is put in place."

Nunes: Media Ignoring "Unmasking" Of Trump Campaign Aides.

House Intelligence Committee Chairman Devin Nunes, who said in April he would step aside from his panel's Russia investigation, argued Thursday that the media is ignoring former intelligence officials' "unmasking" of Trump campaign aides while focusing on possible collusion between the Trump campaign and Russian officials.

USA Today (6/1, Kelly) highlights a tweet from Nunes Thursday in which he wrote "Seeing a lot of fake news from media elites and others who have no interest in violations of Americans' civil liberties via unmaskings," and says it "echoed" a Thursday morning tweet from the President, who wrote, "The big story is the 'unmasking and surveillance' of people that took place during the Obama Administration." While USA Today says Democrats "have largely dismissed" the "unmasking" issue as "an attempt to divert attention from possible collusion by Trump campaign officials with the Russians," Politico (6/1, Nelson) says "unmasking and other surveillance activities have been a larger priority for the president in the months since he took office. He has accused Obama administration officials of using the unmasking process for political purposes to target Trump campaign and transition officials."

Meanwhile, McClatchy (5/31, Schofield) says Nunes appears to have "launched an investigation of his own" into the unmasking issue, citing reports from "various news outlets" that

the intelligence committee "had subpoenaed three former Obama administration officials," former UN Ambassador Samantha Power, former National Security Adviser Susan Rice and former CIA Director John Brennan, "to address Nunes' allegations" A senor committee aide wrote in an email, "If the reports are accurate, subpoenas related to the 'unmasking' issue would have been sent by Chairman Nunes acting separately from the committee's Russia investigation. ... This action would have been taken without the minority's agreement. Any prior requests for information would have been undertaken without the minority's knowledge." However, another aide "disputed that account, saying that 'the minority was fully informed and consulted in accordance with committee rules.'"

The Washington Times (6/1, Boylan, Taylor) says this is "the first time that Ms. Power has been reported as a possible witness in the ongoing congressional Russia probes." Andrew C. McCarthy writes in a piece for National Review (6/1) that "were a pattern of unmasking established, divorced from any proper foreign-intelligence purpose, that would be a profound abuse of power in the nature of a 'high crime and misdemeanor' – the Constitution's predicate for impeachment."

The New York Times (6/1, Huetteman) reports that Rep. Adam Schiff, the ranking Democrat on the committee, "strongly criticized" Nunes Thursday "for refusing to give up his subpoena power over the investigation into Russian interference in the 2016 election less than two months after announcing he would step away from the inquiry." Schiff said, "When someone says they're going to recuse themselves or step aside from the investigation, you have to expect that they're not going to insist on having final approval over subpoenas, one of the most important tools of an investigation." Politico (6/1, Wright, Conway) reports that Schiff "said Thursday that he was only informed of Nunes' subpoenas the night before they went out."

Reuters (6/1) says that in an interview on MSNBC (6/1) Thursday, Schiff "accused" Nunes of violating his recusal by issuing the subpoenas. Schiff said, "Commitments to recuse himself have not been fully honored," and "added that he and Republican Representative Michael Conaway, the top Republican now leading the panel's probe into alleged Russian meddling in the 2016 U.S. election, would not be distracted from their investigation." The Washington Post (6/1, Demirjian) quotes Schiff as saying, "I think [subpoenas are] part of the White House desire to shift attention away from the Russia probe and on to the issue of unmasking. ... But Mr. Conaway and I are determined not to lose our focus on the Russian investigation, and so we plod on, keeping our eyes on what has to be done, and unwilling to let this other stuff distract us."

Comey To Testify Before Senate Intel Panel June 8.

Senate Intelligence Committee Chairman Richard Burr and ranking member Mark Warner announced Thursday that former FBI Director Comey will testify publicly before their panel on June 8 as part of its investigation into Russia's interference in the 2016 presidential election and possible collusion between the Trump campaign and Russian officials.

The Wall Street Journal (6/1, Tau) reports that Comey's public testimony will be followed by a closed session in the afternoon. The Washington Times (6/1, Noble) says the hearing will be Comey's "first opportunity to testify in public since he was fired by President Trump last month," and ABC World News Tonight (6/1, story 5, 0:20, Muir) said Comey is "expected to answer questions about his one-on-one meetings with President Trump and the memos he kept."

USA Today (6/1, Kelly) says that the testimony, which is "expected to be explosive," could "do major damage to a White House already shaken by five separate investigations into possible collusion between Trump's campaign aides and Russian officials." Rep. Jackie Speier similarly said on CNN's Situation Room (6/1) that Comey's testimony will come in "probably...the most explosive and most watched hearing since Watergate." She thinks he'll be asked questions related to whether Trump "obstructed the investigation that was ongoing around Michael Flynn."

Reuters (6/1, Heavey) says the hearing "could be difficult for President Donald Trump," and Bloomberg Politics (6/1, Dennis) anticipates "intense questioning" of Comey over "what Trump said to him about the Russia investigation before the president fired him on May 9." Comey's testimony, Bloomberg adds, "is sure to be a pivotal event in Trump's already tumultuous presidency."

USA Today (6/1, Kelly) says that the testimony, which is "expected to be explosive," could "do major damage to a White House already shaken by five separate investigations into possible collusion between Trump's campaign aides and Russian officials." Rep. Jackie Speier similarly said on CNN's Situation Room (6/1) that Comey's testimony will come in "probably...the most explosive and most watched hearing since Watergate." She thinks he'll be asked questions related to whether Trump "obstructed the investigation that was ongoing around Michael Flynn."

A New York Times (6/1, Savage) analysis questions whether Trump should "invoke executive privilege to try to block Mr. Comey from talking" and considers "the issues that would be raised by applying executive privilege in this case," while the Washington Times (6/1, Boylan) looks back on the files late-FBI Director J. Edgar Hoover kept in his home, calling them "the most powerful archive of blackmail material on presidents, politicians and pundits compiled in American history." The Times says "the whereabouts of Mr. Comey's files" is among "the most urgent questions lawmakers on Capitol Hill will have for Mr. Trump's next choice to head the bureau."

FBI, Congress Examining Possible Meeting Between Trump, Sessions, Kushner, and Kislyak. Under the headline, "Did Trump, Kushner, Sessions Have An Undisclosed Meeting With Russian?," NBC News (6/1, Dilanian) reports on its website that that according to "multiple officials," the FBI and Congress are looking into "a campaign event last spring during which Donald Trump, Jeff Sessions and Jared Kushner were in a small gathering with Russian ambassador to the US Sergey Kislyak and other diplomats at Washington's Mayflower Hotel." NBC says "five current and former US officials said they are aware of classified intelligence suggesting there was some sort of private encounter between Trump and his aides and the Russian envoy, despite a heated denial from Sessions." However, the officials "acknowledged to NBC News that the evidence does not amount to proof, and they have declined to provide details about it." In an analysis for Townhall (6/1, Benson), political editor Guy Benson takes issue with the NBC story, writing, "It's worth noting that the headline on this story ends with a question mark, a tacit admission that they don't have anything solid."

White House, Russian Bank Offer Different Explanations For Kushner's Meeting. A front-page story in the Washington Post (6/1, Filipov, Brittain, Helderman, Hamburger) reports that the explanations from the White House and a Russian state-owned bank about why "the bank's chief executive and Jared Kushner held a secret meeting during the presidential transition in December" are "very different." While the bank, Vnesheconombank, "maintained this week that the session was held as part of a new business strategy and was conducted with Kushner in his role as the head of his family's real estate business," the White House "says the meeting was unrelated to business and was one of many diplomatic encounters the soon-to-be presidential adviser was holding ahead of Donald Trump's inauguration." The Post says that "contradiction is deepening confusion over Kushner's interactions with the Russians" as he "emerges as a key figure in the FBI's investigation into potential coordination between Moscow and the Trump team."

Foreign Agents Registration Act Central To Flynn, Manafort Investigations. The Wall Street Journal (6/1, Sonne, Wilber, Tau) reports that people familiar with the situation say the Foreign Agents Registration Act, which requires people to disclose when they are acting on behalf of foreign powers in the US is central to the investigations of former national security adviser Mike Flynn and former Trump campaign manager Paul Manafort. According to those sources, investigators are looking into whether Flynn's work involving Turkey and Manafort's work involving Ukraine violated the Act and related laws.

Farage A "Person Of Interest" In FBI's Russia Investigation. The Guardian (UK) (6/1, Kirchgaessner, Hopkins, Harding) cites "sources with knowledge of the investigation" who said that former Ukip leader Nigel Farage is a "person of interest" in the US investigation "into possible collusion between the Kremlin and Donald Trump's presidential campaign." According to the sources, Farage "had raised the interest of FBI investigators because of his relationships with individuals connected to both the Trump campaign and Julian Assange, the WikiLeaks founder whom Farage visited in March." The Guardian points out that Farage "has not been accused of wrongdoing and is not a suspect or a target of the US investigation." Peter Alexander reported on NBC Nightly News (6/1, story 3, 2:15) that Farage is "denying any Russia connection."

Farage said on Fox News Tucker Carlson Tonight (6/1), "If ever there was a case of a fake news, this is it. What they have done is they've tried to join the dots together. I was involved with Brexit. I was involved with the Trump campaign. I was involved with upsetting their little world in 2016. Therefore, I must somehow be associated with the Russians. It is total and utter hysterical nonsense." Reporting on Farage's Fox News appearance, Politico (6/1, Lima) quotes him as saying, "I've never done business in Russia, I have literally no political connections with Russia whatsoever. ... The whole thing is a fantasy from people who cannot accept the fact that they lost badly last year."

Crowley: Democratic Candidates Should Not Focus On Russia In 2018. The Washington Times (6/1, Persons) reports that in an interview with MSNBC's Morning Joe Thursday, Rep. Joe Crowley called the Russia investigation a "Washington issue," and said that "Democratic candidates should not focus on it in 2018." Crowley said, "I think the focus for the DNC has to be,

not what happened in the last election, but about the election now, and that's individual congressional districts. It's hand-to-hand combat. ... Putting aside the Russian issue, that's a Washington issue. What we've been focusing on and telling our folks and candidates to do is focus on your local issues and leave the Washington stuff to Washington." Crowley added, "I think the Russia issue is an important issue for the American people, they are focused on it, but they're more concerned about the economy, whether they can put food on the table, can they afford college, when they graduate from college can they afford the student loan, can they have a job."

Politico Analysis: Trump Says Nonexistent Tax Bill Advancing Through Congress.

During a Rose Garden speech Thursday announcing his decision to withdraw from the Paris climate agreement, President Trump claimed "that tax legislation is advancing through Congress – even though no such bill yet exists," Politico (6/1, McCaskill) reports. Trump said, "Our tax bill is moving along in Congress, and I believe it's doing very well. ... I think a lot of people will be very pleasantly surprised." He continued, "The Republicans...are working very, very hard. We'd love to have support from the Democrats, but we may have to go it alone. But it's going very well."

Mnuchin Confident Congress Will Raise Debt Limit.

Reuters (6/1) reports that in an interview Thursday with Fox Business, Treasury Secretary Mnuchin expressed confidence that Congress will raise the debt limit "'before there's an issue' with US creditworthiness." Mnuchin said, "We're going to get it increased. ... The credit of the United States is the utmost. I've said to Congress they should do it as quickly as they can. But we are very focused on working with them and I'm confident we'll get there before there's an issue."

Demographer Projects Massive Population Shifts From Climate Change.

USA Today (6/1, Bruggers) reports on a study published in Nature Climate Change by University of Georgia demographer Mathew E. Hauer finding that with climate change the US "can expect massive population shifts." He projects that up to "13 million Americans living in coastal areas could be flooded out by 2100," which could result in "tens of thousands...headed toward Indiana, Kentucky, Ohio and Tennessee."

Climate Change Presents National Security Threat.

The Sacramento (CA) Bee (6/1, Bergengruen) reports President Trump is "at odds with the Pentagon, which has been warning for years that climate change poses a critical national security threat." Military leaders have said for more than a decade "that extreme weather patterns and rising sea levels are aggravating social tensions, destabilizing regions and feeding the rise of extremist groups." Meanwhile, at least 128 US military bases are threatened by rising sea levels, with some "already flooding." NPR (6/1, Kelly) reports there is a concern that "the US pulling away from a global leadership role" leaves a void "that America's rivals and adversaries will be keen to fill."

Editorial Wrap-Up

New York Times.

"Our Disgraceful Exit From The Paris Accord." The New York Times (6/1) editorializes that "only future generations will be able to calculate the full consequences of...Trump's incredibly shortsighted approach to climate change, since it is they who will suffer the rising seas and crippling droughts that scientists say are inevitable unless the world brings fossil fuel emissions to heel."

Washington Post.

"Trump Turns His Back On The World." The Washington Post (6/1) editorializes that President Trump "said Thursday that the United States might rejoin the Paris agreement after a period of renegotiation." Yet "given the extent to which other nations already accommodated American demands, the prospect of a radically different treaty is fanciful. So what tangible benefit does this irrational decision bring to Americans? None. None at all."

"The White House Just Took A Step Forward On Transparency. Time For Some More." In an editorial, the Washington Post (6/1) praises the Trump Administration for disclosing the ethics

waivers granted to Administration appointees, but says "the Trump White House should accept other transparency measures that it has so far resisted." The Post says President Trump should release his tax returns and the Administration should "disclose White House visitor logs."

"The World's Biggest Muslim Majority Nation Grapples With Rising Radicalism." In an editorial, the Washington Post (6/1, Board) writes that as "a surge of hard-line Islamist sentiment" shakes Indonesia, "whether the country's political leadership is able to steer a genuinely pluralist course through local and presidential elections over the next two years poses a critical test of whether the secular government in Jakarta will remain a bulwark against Islamic radicalism." The Post cites as an example the "particularly worrying episode" of Jakarta Gov. Basuki Tjahaja Purnama being sentenced to prison and losing an election based on public backlash and blasphemy charges after at first appearing "a clear electoral front-runner" based on a "no-nonsense anti-corruption" platform. The Post says "opportunistic" hard-line Islamists are seeking to "capitalize on a sluggish economy, widespread corruption and popular resentment of ethnic Chinese tycoons" to impose sharia law nationwide. This "would mark a sweeping reversal of Indonesia's relatively easygoing pluralist democracy."

Wall Street Journal:

"Trump Bids Paris Adieu." The Wall Street Journal (6/1) in its editorial mocks the reaction of what it casts as elites around the world to President Trump's decision to withdraw from the Paris agreement, and argues that economic growth and technological innovation are by far the most effective strategies to fight climate change.

"The Trump Jerusalem Waiver." A Wall Street Journal (6/1) editorial says the President's decision to sign the waiver to keep the US embassy in Tel Aviv after he promised to move it damages American credibility, and will encourage the Palestinians to hold out for further concessions.

"Ireland's Reform Example." The Wall Street Journal (6/1) editorializes about the coming choice in Ireland between what the Journal views as two good candidates for prime minister. The majority Fine Gael party must choose a new prime minister after Enda Kenny resigned. The Journal is pleased that both candidates favor free-market reforms. The Journal says that Fine Gael offers a lesson to other European countries, as it recently reduced spending by €10 billion paired with a €5 billion tax increase, and that the focus on cuts helped strengthen the Irish economy.

VICE PRESIDENT PENCE — Participates in an interview with Ainsley Earhardt on Fox & Friends; participates in an interview with Laura Ingraham on The Laura Ingraham Show; participates in an interview with Michael Savage on The Savage Nation.
US Senate: 9:00 AM Senate convenes for pro forma session
On recess until 5 June.
US House: 10:30 AM House of Representatives convenes for pro forma session
On recess until 5 June.
Other: No notable event scheduled.

Last Laughs

Late Night Political Humor.

Trevor Noah: "You know, I don't know what's worse, the fact that Donald Trump may have doomed the planet or the fact that he announced it like it's an episode of 'The Bachelorette'. 'Earth, we had a great time in the hot tub. But I gotta give a rose to coal, my black beauty, I

choose you.'"

Trevor Noah: "After the Earth's temperature crosses a certain threshold, we may not be able to go back. It's like telling your girlfriend that her friend is hot. That problem is man-made and irreversible. You can never take it back."

Trevor Noah: "You can't bring back coal jobs. It may have been big back in the day, but it's not going to work now. You know, it's like 'Baywatch'. You can't save it."

---

All,

Pursuant to the Awareness Process for FOIA Productions memorandum, dated May 24, 2018, I am seeking comments from all PAS, NCSE, or Schedule C employees whose names appear in the attached records.

If you are receiving this message, then your name appears in one or both of the attached files. In accordance with the aforementioned memorandum, **you have up to 72 hours to review and comment on these records.** If no comment is received, then the Department will assume you have none.

The records in question are routine logs that are posted to the OS FOIA Library on a monthly basis.

Thank you for your attention to this matter.

Justin
