---

Dear all,

Attached is the Southwest Region's contribution for the Department's Weekly Report. Also in the attachment are suggestions for FishBites along with recent significant media contacts. Please let me know if you have any questions or need additional information.

Matt - please see updates in the attached file.

Best,
Chris

Christine R. Tincher

Through October 27, 2017

FishBites Report

FWS hosts Second Resilience Nature Retreat for Cancer Survivors

- Topic: It is said that a triumph over cancer is a joyous feat, and that following the long, hard battle comes the opportunity for new life and new challenges. It takes resilience. To aid in the healing process, the FWS Wichita Mountains Wildlife Refuge, in Oklahoma is hosting the second annual Resilience Nature Retreat for cancer survivors. This retreat provides a beautiful, peaceful setting in nature that will provide the much needed healing support as participants continue their journey and growth process. The event is taking place October 12 - 15, in recognition of National Cancer Awareness Month. Several women at different stages of their cancer journeys will participate in the four-day retreat to face a series of outdoor challenges, as they meet new friends and experience the healing power of nature. During this outdoor adventure, these tenacious fighters will try their hand at archery, rappelling, kayaking, and fishing. Take a look at coverage from the 2016 event and listen to their touching and inspirational testimonies at: http://www.kswo.com/story/33510482/breast-cancer-survivor-empowerment-at-retreat (R2 – Southwest Region)
- Supportive Stakeholders: Partners, Friends of the Refuge, cancer well-being coaches and support groups, cancer survivors, and their families.
- Impacted Location: Oklahoma

Mexican wolf Relocated to Apache-Sitgreaves National Forest

- **Topic**: On Oct. 5, the Navajo Nation requested the assistance of the Arizona Game and Fish Department to relocate a young Mexican wolf that dispersed from the Diamond Pack in Arizona and was detected on the Navajo Nation north of Interstate 40. The capture and relocation of the wolf was done in consultation with Navajo Nation, FWS, Arizona Game and Fish Department, and New Mexico Department of Game and Fish. The Arizona State agency had the best logistical capability and biological expertise to capture the wolf within the requested timeframe. Using satellite telemetry, the wolf was tracked, safely sedated, and captured. It was examined by a veterinarian on site and found to be in good health before being transported and released back to its historical range within the Apache-Sitgreaves National Forest, as required by law under the 2015 10 (j) rule of the ESA. The wolf was produced by the Diamond Pack in spring of 2016 on the Fort Apache Indian Reservation. It dispersed from the pack in September and was tracked by its collar as it moved northward from the pack territory, largely through grasslands, west of U.S. Highway 191 in Arizona. The dispersal behavior by this young male is not unusual, as males of this age typically move long distances in search of a mate. After its capture, the wolf was released in a location that optimizes the potential to encounter a female wolf and potentially establish a new wolf pack. (R2 – Southwest Region)
- **Supportive Stakeholders:** Navajo Nation, Arizona Game and Fish Department, New Mexico Department of Game and Fish and FWS
- **Impacted Location:** Arizona

Twenty-first Release Celebrated as Condors Take Flight

- **Topic**: FWS, The Peregrine Fund and cooperating agencies released to the wild two California condors in Vermilion Cliffs National Monument in northern Arizona on September 30. (A third condor had self-released days earlier after its crate was chewed through by a suspected coyote.) This was the 21st release of condors to the wild and despite the fact that it occurs in a remote setting (and is considered by some to be a destination event), the release continues to be very popular and well attended. Supporters, partners, and members of the public came from all over to view the impressive sight as the released condors spread their magnificent wings – with a span of 10 feet – and soar through the sky. A series of scopes are set up in key locations to aid in viewing opportunities. There are now 77 condors in the wild in the canyon country of northern Arizona and southern Utah. (R2 – Southwest Region)
- **Supportive Stakeholders:** Arizona Game and Fish Department, The Peregrine Fund and FWS and others

Impacted Location: Arizona and Utah

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
KUNM Wolf	Oct 12 8a to 9a MT	Update on KUNM live call-in show. The call took place Oct. 12. Sherry Barrett and John Oakleaf were in studio for the KUNM live call-in show. KUNM also invited Mike Phillips, executive director of the Turner Endangered Species Fund & Ladder Ranch (by phone), Karen Cowen from the New Mexico Cattlegrowers Association (in studio), Craig Miller from Defenders of Wildlife (by phone), and Sisto Hernandez, of the Mexican Wolf Livestock Council (by phone) to participate.
Multiple expected wolf	Oct 14	Mexican wolf relocation. See Fishbites above for details.
E&E Owl	Oct 10	March 29, 2017 court ruling being reviewed. "The cactus ferruginous pygmy-owl is at the center of a court fight over the meaning of an ambiguous phrase in the Endangered Species Act." Read the story at: https://www.eenews.net/greenwire/2017/10/10/stories/1060062939

Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel

Hurricane Impacts in Texas - Updates are posted on the FWS Southwest webpage at: https://www.fws.gov/southwest/hurricaneinfo/index.htmnews

In October - FWS will be sent out for external, independent scientific peer review a draft species status assessment for the Bone Cave harvestman. See ES Items of Note. (R2 – Southwest Region)

In October - FWS anticipates publishing a Notice of Availability for a draft Habitat Conservation Plan request from the San Antonio Water Systems. See ES Items of Note for details. (R2 – Southwest Region)

In October – FWS anticipates receipt of peer-reviewed comments on the Lesser Prairie-Chicken Species Status Assessment. See ESA Listing Actions for details. (R2 – Southwest Region)

October 8-14 - FWS celebrates National Wildlife Refuge Week. See list of events below for activities in the Southwest.

October 14 - FWS is hosting the annual Rio Reforestation event on the Lower Rio Grande Valley National Wildlife Refuge in Texas. See Refuges for details. (R2 – Southwest Region)

October 15 – FWS Havasu NWR will close the public comment period on the draft Environmental Assessment for the Sacramento Wash Improvements Project. See Refuges for details. (R2 – Southwest Region)

October 16 through December – RD will participate in introductory calls and/ or meet-and-greet meetings with Members within the Southwest Region. (R2 – Southwest Region)

October 18 – Consultation meeting with the White Mountain Apache Tribe's Tribal Council in Arizona to discuss Statement of Relations with incoming Regional Director. Proposed discussion will include existing Statement of Relations and updates on shared interests. (R2 – Southwest Region)

Oct 21 - FWS San Marcos Aquatic Resource Center hosts a kids fishing day in Texas.

Oct 23 - FWS Southwest Regional Director planning to travel to Texas to meet with CARE Group and tour areas impacted by Hurricane Harvey on the gulf coast. (Potentially the Acting Director planning to attend as well.) (R2 – Southwest Region)

Oct 24 - FWS announces grants from the Bats for the Future Fund, which will be used to help defeat WNS. FWS is working with NFWF and Shell Oil Company on this media announcement in Houston, Texas. (HQ, R4 lead, R2)

Hot Topics - Week Ahead Announcements and Actions

Nov 1 – FWS is tentatively proposing to co-host a Mussel 101 Congressional briefing for District staffers with the Texas Parks and Wildlife Department and the Office of the Texas Comptroller. The event will be held at the Office of the Texas Comptroller in Austin, Texas. (R2 – Southwest Region)

Upcoming Workshops & Meetings

October 21 – A media conference regarding the proposed border wall is tentatively being planned by the local community at or near FWS Santa Ana National Wildlife Refuge. See Border-related Activities for details. (R2 – Southwest Region)

October, November and December – Meet and Greet meetings, or introductory phone calls will be arranged between incoming Regional Director and Members of the Congressional Delegation within the Southwest Region, when possible. (R2 – Southwest Region)

Endangered Species Act Recovery Actions

UPDATED: Twenty-first release of California condors in the wild - FWS, The Peregrine Fund and cooperating agencies released to the wild two California condors in Vermilion Cliffs National Monument in northern Arizona on September 20. (A third condor had self-released days earlier after its crate was chewed through by a suspected coyote.) This was the 21st annual public release and despite the fact that the release occurs in a remote setting and is considered a destination event, it continues to be very popular and well attended. Supporters, partners, and members of the public came from all over to view the impressive sight from a series of spotting scopes. The release coincided with National Public Lands Day. There are now 77 condors in the wild in the canyon country of northern Arizona and southern Utah. (R2 – Southwest Region)

REPEAT: The Center for Biological Diversity filed a lawsuit (Federal District Court – Tucson) on September 25, regarding a biological opinion (BO) issued on the proposed Rosemont copper mine project in the Santa Rita Mountains, south of Tucson, Arizona, and potential impacts to jaguar (one had been extensively monitored on the project area) and other endangered and threatened species. (To learn more about the lawsuit, visit the Center for Biological Diversity's website) The document in question is the Final Reinitiated BO requested by the U.S. Forest Service (Action Agency) by submittal of the Supplemental Biological Assessment on May 25, 2015. The non-jeopardy BO provides information on the potential incidental take, and as applicable destruction or adverse modification of critical habitat, of the following species: the endangered desert pupfish, Gila chub, Gila topminnow, jaguar, ocelot, lesser long-nosed bat, southwestern willow flycatcher, Huachuca water umbel, and Pima pineapple cactus as well as the threatened western yellow-billed cuckoo, Chiricahua leopard frog and northern Mexican gartersnake. FWS completed its initial BO in Oct. 2013, and reinitiated consultation after receiving new hydrological modeling information, additional species listings, and confirmation of ocelot presence in the area. The reinitiated BO was completed on April 16, 2016, and later amended on April 28, 2016. The Amended BO issued by the FWS' website. (R2 - Southwest Region)

REPEAT: In late October, or early November, FWS will publish a 12-month finding on the listing status of the southwestern willow flycatcher. Pacific Legal Foundation petitioned FWS to

delist the flycatcher and in March 2016 we published a 90-day finding that the petition included substantial information, primarily regarding the subspecies' taxonomy. Upon robust consideration of the petition and the flycatchers' classification, the Southwest Region is completing a 12-month finding that delisting of the southwestern willow flycatcher is not warranted. Outreach is being planned – including a news release and Congressional notifications via email. Interest expected to be moderate. No controversy anticipated. (R2 – Southwest Region)

REPEAT: American Burying Beetle Species Status Assessment and 12-month finding – FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed prior to the issuance of a 12-month finding which is expected at the end of 2017. In June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

Endangered Species Act Listing Actions

REPEAT: Lesser Prairie-Chicken Species Status Assessment – FWS anticipates a Species Status Assessment (SSA) for the lesser prairie-chicken (LPC) will be completed by the end of the calendar year. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. USGS, through its Open File Report (OFR), made available the population model it prepared for FWS. The population model represents one component of the SSA and will be considered alongside of all other available information. On August 25, the draft SSA report was sent to an external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) that FWS has been coordinating with throughout development of the SSA. On August 29, the draft report was sent out for external, independent scientific peer review through a third-party contractor. Comments are due back on October 10, 2017. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the States, and others to plan a face-to-face coordination meeting. WAFWA finalized permanent conservation agreements with three private landowners to conserve 3,682 acres of lesser prairie-chicken habitat in the shortgrass ecoregion of northwestern Kansas. The parcels are located near the 17,290-acre Smoky Valley Ranch, which is owned and managed by The Nature Conservancy. (R2 Southwest Region & R6 Mountain-Prairie Region)

REPEAT: DELISTING - FWS plans to remove the endangered Gila chub and its critical habitat from the Federal List of Endangered and Threatened Wildlife due to taxonomic change. Gila chub was listed with critical habitat in Arizona in 2005. In April 2017, FWS withdrew a proposal to list the headwater and roundtail chubs as a result of new taxonomic information that

the two former species and the Gila chub are a single species (identified as the roundtail chub). (Conducting section 7 consultation and ongoing recovery efforts for Gila chub – a taxon that is no longer recognized – is problematic.) Following proposing to delist the Gila chub, FWS will conduct a status assessment of the now larger taxon of roundtail chub throughout its five-state range. Objection from some taxonomists, desert fishes professionals and environmental groups is anticipated. Communications planning is under development. (Delisitng: R2-Southwest Region. SSA: Regions 2 and 6)

Other Ecological Services Items of Note

UPDATED: Leander Independent School District (LISD) ITP – FWS will announce in the Federal Register a Notice of Intent to prepare a draft National Environmental Policy Act (NEPA) Environmental Assessment on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas after consultation efforts are completed. LISD submitted a draft habitat conservation plan and incidental take permit (ITP). The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties. A follow up meeting occurred on October 3. FWS is now working landowners to arrange a site visit to the properties identified in the application. Local interest anticipated. It has significant Congressional interest, as well as strong opposition from other parties. In support, DOI received a Congressional Inquiry dated June 16 from Texas Representatives McCaul, Carter, Flores, Smith and Williams and a September 25, letter from Senators Cornyn and Cruz. Congressional briefings are being proposed. Additional outreach, including issuing a news bulletin, will occur at time of publication in the Federal Register. (R2 – Southwest Region)

UPDATED: San Antonio HCP, Texas – FWS anticipates publishing a Notice of Availability in in October for a draft Habitat Conservation Plan and Incidental Take Permit request from the San Antonio Water Systems for the incidental take of five federally-listed karst invertebrates (collectively the Covered Karst Invertebrates): Madla's Cave meshweaver; Robber Baron Cave meshweaver; Braken Bat Cave meshweaver; and two species of ground beetles with no common names (Rhadine infernalis and Rhadine exilis). The Covered Karst Invertebrates are associated with the construction of two water pipelines in Bexar County, Texas. Once issued, the permit would be in place for 15 years. Controversy anticipated being low. Minimal outreach, including issuing a news bulletin locally is planned at time of publication in the *Federal Register*. Congressional Offices will be notified via email, a news release will be issued as well as web postings. (R2 – Southwest Region)

REPEAT: On October 16 or 23, FWS anticipates The Outdoor Channel will be airing a program titled "Wild Ops," which will feature the USFWS Mexican wolf recovery team during their 2016 (Jan - Feb 2017) annual count and survey. PROGRAM SYNOPSIS: "On Wild Ops, a crack team of veterinarians, muggers and pilots attempt to capture, study and relocate wild animals. Utilizing helicopters, snowmobiles, ATVs, radio-collars, dart guns, ropes, nets, hobbles and mobile ER units, these wildlife wranglers chase a wide variety of wildlife: deer, moose, elk, wolves, pronghorn, and bighorn sheep, to name a few. Once captured, the Wild Ops team

administers necessary medicines and tracking devices to ensure the health of the individual animal and the entire species for generations to come. The host of the Wild Ops program is Dr. Peter "Ole" Alcumbrac. He's the Director of Wildlife Health Services, which specializes in immobilization and capture of native and exotic species. He provides clinical and consultation services for private and public collections." As a Consulting Veterinarian for the Arizona Game and Fish Department, The White Mountain Apache Tribe and the US Fish and Wildlife Service, Dr. Alcumbrac has been a key member of the Mexican Wolf Recovery Program, the Sonoran Pronghorn Antelope Recovery Team and Bighorn Sheep disease studies. Since 1992, Dr. Alcumbrac has owned and operated a mixed animal and exotic practice in Arizona with Staff of five veterinarians, providing treatment to more than 15,000 animals. He is a recipient of the Award of Excellence from the Arizona Game and Fish Commission. (R2 – Southwest Region)

REPEAT: Since November 2016, BLM motion activated cameras in southern Arizona's Dos Cabezas Mountains and Chiricahua Mountains area have captured four photo images of what is believed to be the same male jaguar. The Center for Biological Diversity obtained video of a jaguar in the Chiricahua area and issued a press announcement. The Arizona Game and Fish Department specialists have since determined that the video and still photos are indeed of the same animal by utilizing spot recognition. (FWS – Southwest Region)

REPEAT: Bone Cave Harvestman Species Status Assessment – FWS Austin Ecological Services Office completed a draft species status assessment for the Bone Cave harvestman. The assessment was sent out for external, independent scientific peer review in late September. Concurrently with peer review of the species status assessment, FWS will host representatives from the City of Austin, Texas Parks and Wildlife Department, Travis County, and Williamson County to detail the methodology used to analyze ecological conditions at sites occupied by the Bone Cave harvestman. Comments and information provided by the peer review and site analysis meeting will be incorporated into the species status assessment. The final species status assessment will inform a 5-year review to be completed for the Bone Cave harvestman in fiscal year 2018. (R2-Southwest Region)

REPEAT: FWS participating in the Texas Monarch Summit. Taking place November 1-2, this event will serve as a technical working meeting to develop quantitative goals for monarch conservation across the state. Participation is by invitation only. FWS participants include Katie Boyer (on the planning committee), Cyndee Watson (Texas PFW Program Coordinator), Chris Best (Texas State Botanist), and Leah Murray (SMARC Botanist). (R2 – Southwest Region)

REPEAT: Monarch Joint Venture annual meeting takes place November 7-9, in San Antonio, Texas on the UT-San Antonio campus. These meetings provide an opportunity for all Monarch Joint Venture partners to collaborate on the annual Monarch Conservation Implementation Plan which guides national and international priorities. (All FWS)

REPEAT: FWS will join the Southern Core States for the monarch meeting taking place in Oklahoma City November 29 and December 1. This is a ~12 person working meeting with representatives from the state fish and game agencies to develop similar quantitative goals for the entire southern core geography. Kelly Meyers and Katie Boyer are the FWS representatives attending this meeting. (All FWS)

REPEAT: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review this Fall. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in December 2017. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2-Southwest)

REPEAT: In October – FWS anticipates publishing a notice announcing the receipt of application and consideration of an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake. Outreach will consist of notifying stakeholders. (R2-Southwest Region)

National Wildlife Refuge Actions

UPDATED: Impact of Fever Ticks to Cattle Industry in South Texas – FWS continues to work with Texas Animal Health Commission (TAHC) and U.S. Department of Agriculture-Animal and Plant Health Inspection Service (USDA-APHIS) regarding fever tick treatment at the FWS Laguna Atascosa National Wildlife Refuge. Currently, FWS has made a decision to move forward with evaluating, through the NEPA process, the best mechanism for chemically treating white-tailed deer on Laguna Atascosa NWR. This will include mitigation measures to reduce impacts to non-target species, such as the Texas tortoise. The FWS is committed to continuing discussions and proactive actions in cooperation with the USDA-APHIS, the Texas Animal Health Commission, private ranchers and others to aid in the battle to combat the fever tick. The fever tick can be spread by cattle, deer, and nilgai, an exotic Asian antelope that was introduced by private landowners in South Texas for hunting. The FWS Laguna Atascosa NWR remains under temporary quarantine at this time. The FWS Laguna Atascosa NWR has invested significant time and resources to support USDA-APHIS/TAHC in fever tick control efforts including nilgai reductions, increased bag limits for white-tailed deer, and prescribed fire. Additionally, FWS, in consultation with the USDA-APHIS, issued a biological opinion (BO) in January 2016 for use of Ivermectin-laced corn on private lands. The BO discusses potential effects to ocelots, jaguarundis, and aplomado falcons from use of Ivermectin-laced corn in deer feeders to treat ticks on deer on private property. Local media interest remains high. High Congressional interest from Senator Cornyn (R TX), Rep. Conaway, Rep. Vela (D TX Dist. 34), and the House Agriculture Committee. Members have requested periodic updates. (Background previously reported in August 2016 and earlier.) (R2 – Southwest Region)

REPEAT: The FWS Havasu National Wildlife Refuge will close the public comment period for the draft Environmental Assessment on the proposed Sacramento Wash Right-of-way (ROW) improvement Project on October 15. The draft EA was opened for public review on September 15. The purpose of the proposed action is to consider issuance of a ROW permit to Mohave County, Arizona. The objective of the County's project is to restore Sacramento Wash to its historical drainage patterns to reduce the significant sediment transported and deposited on

Oatman Highway and at Sacramento Wash outfall in Topock Bay, within the FWS Havasu National Wildlife Refuge. The location of the proposed project is in Mohave County, Arizona, on lands administered by FWS and adjacent to Oatman Highway. Potential local controversy and of Congressional interest. (R2 – Southwest Region)

REPEAT: FWS celebrates the Sevilleta National Wildlife Refuge through a series of Ten Minute Talks on a variety of subjects, including reduction of prairie dogs, bats: nature's unsung heroes, and a turtle's tale: staying cool in a hot world. The informal talks will be held on the north patio on October 21. Tours of the Sevilleta Field Station, operated by the University of New Mexico in collaboration with FWS' Sevilleta National Wildlife Refuge, will take place immediately after the informal talks. Also taking place during the celebratory event are birding walks along the Rio Grande, hikes, exhibitions with live animals, and live music. This family-friendly, fun-filled day is open to the public and media. Most activities are free, however some events require early registration and may require a fee. (R2 – Southwest Region)

REPEAT: FWS is hosting the annual Rio Reforestation event on October 14, on the Lower Rio Grande Valley National Wildlife Refuge in Texas. This event is open to all individuals interested in restoring natural habitats, with special invitations being extended to teachers, students, parents, scouting organizations as well as the general public. FWS is seeking 1,000 volunteers to plant seedlings for 32 species of trees and shrubs on 17 acres of refuge land on the La Sal Del Rey tract. Visit on line for more information on the Rio Reforestation 2017 event.

REPEAT: National Wildlife Refuge System Improvement Act Celebrates 20 Years – FWS Southwest Region joins the celebration of the 20th anniversary of the National Wildlife Refuge System Improvement Act on October 12-13, 2017. Friends of the New Mexico's National Wildlife Refuges are gathering at Valle de Oro National Wildlife Refuge for the start of the two-day celebration. In the afternoon, the event moves to Sevilleta NWR. On Day 2, the festivities continue at Bosque del Apache NWR on October 13. Congressional representatives, other dignitaries, and FWS Refuge managers are invited to speak the morning of Day 1. Open to the media and the public. (R2 – Southwest Region)

REPEAT: FWS Southwest Region Celebrates Refuge Week. See table at end of document with a list of upcoming public events. (R2 – Southwest Region)

Border-Related Activities

REPEAT: A media conference regarding the proposed border wall is tentatively being planned by the local community on Saturday, October 21, 2017. The event is proposed to occur at or near the FWS Santa Ana National Wildlife Refuge (FWS is not a participant). If the event takes place, it is estimated that 50 to 65 individuals could be in attendance, including 18 Mayors from local towns of the Rio Grande Valley (the nearest City to the Refuge is Alamo, Texas). It is anticipated the local community will have signed resolutions against the proposed project. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require transporting water

from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade / replace pump and water delivery components to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Road Construction - On March 20, FWS was contacted by the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to coordinate an upcoming road construction project for a 5.9-mile portion of the Presumido Canyon Road through the Baboquivari Mountains, scheduled to begin in January 2018. The project will require water for the construction, and U.S. Customs and Border Protection (CBP) will perform maintenance of an FWS pump and water well in return for increased use of the FWS-owned well. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Communication Towers - On April 18, FWS and U.S. Customs and Border Protection (CBP) discussed advance planning for Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge would be affected, with the goal of upgrading technology and providing a more robust foundation – all within the original impact areas. Work is proposed to begin in January 2018 dependent upon completion of planning, engineering, and permitting. Follow-up conversations with FWS have occurred to determine the necessary special use permitting process. (R2 – Southwest Region)

Fish and Aquatic Conservation

REPEAT: FWS San Marcos Aquatic Resource Center will host a kids fishing day on October 21 in Texas.

Migratory Birds

Nothing significant to report.

Science Applications

Nothing significant to report

Wildlife and Sport Fish Restoration

Nothing significant to report

Tribal Consultation

REPEAT: Inter-Tribal ESA Training - FWS hosted the first of two Tribal Wildlife ESA training events to be offered in the Southwest Region in Arizona (October 3-5). The second ESA training event will occur in New Mexico (November 7-9). These Tribal training events include aspects of all FWS Divisions, including the Endangered Species Act, with a portion of the summit devoted to law enforcement training to assist Tribal Game Wardens and other Tribal agents. International Game Warden magazine, Spring 2017, published a story on the FWS law enforcement training for Native American conservation officers. (R2 – Southwest Region)

REPEAT: October 18 – FWS is tentatively proposing to co-host a Mussel 101 Congressional briefing for District staffers with the Texas Parks and Wildlife Department. Final date and location in Texas TBD. (R2 – Southwest Region)

REPEAT: The Inter Tribal Council of Arizona is planning a November meeting and is interested in discussing the revised Native American Policy and implementation in the Southwest Region. Date and location in Arizona TBD.

REPEAT: FWS grant supports the Tribal Alliance for Pollinators Inaugural Event in Sulphur, Oklahoma on September 28, 2017. The Learning Center at the Euchee Butterfly Farm, Monarch Watch, and the Chickasaw Nation will host the Inaugural Event of the Tribal Alliance for Pollinators (TAP). The TAP is envisioned as an innovative consortium whose goal is to provide technical support to Tribes in Oklahoma and throughout North America seeking to restore native plants to their Tribal lands. This new initiative will unite native peoples in promoting habitat restoration for monarchs, pollinators, and native grassland ecosystems, which will also benefit cultural traditions. The Inaugural Event will take place at the Chickasaw Nation's Cultural Center and will celebrate the success of Tribes already completing monarch habitat restoration projects through the Tribal Environmental Action for Monarchs as well as formally announce the creation of the TAP. FWS Southwest Region completed a grant agreement to assist in establishment and facilitation of the TAP and will present an award to the Chickasaw Nation at the event. (R2 – Southwest Region)

REPEAT: FWS and the Gila River Indian Community (GRIC) are hosting a workshop for tribes on pollinators and monarch butterflies at the GRIC's Huhugam Heritage Center, Chandler, Arizona (Southeast of Phoenix) on October 31 and November 1, 2017. On day two, there will be a hands-on planting of monarch and pollinator plants in a pollinator garden. (R2 – Southwest Region)

Upcoming public events in the Southwest			
National Wildlife Refuge Week Family fun day	October 10, 2017	Friends and Family Fun Day at Catfish Paradise Havasu NWR & partners	Details: https://www.billwilliamsriver-havasufriends.org/calendar.html
National Wildlife Refuge Week (Oct. 8-15)	October 14, 2017 (Saturday)	Balcones Canyonlands NWR, Texas	View Details

Subject: Re: Border Barrier briefing for Jason Larrabee
Date: Monday, October 16, 2017 1:51:33 PM

Roslyn — I'm out at an ARD meeting this week. Regardless, I would suggest that you schedule R2 and R8 to carry the discussion. I don't think that there's been any "barrier" proposed anywhere other than the southern border, and ES in HQ has had no meaningful involvement in the review or interactions with DHS on that matter. — GDF

FishBites Report

Three Hundred+ Join FWS to Celebrate Balcones 25th Anniversary

- **Topic:** FWS celebrates the 25th anniversary of the Balcones Canyonlands National Wildlife Refuge with a Family-Friendly Round-Up Event. Adults and children of all ages were invited to join in the celebration on October 14, 2017. And the invitation was accepted! More than 300 attended the event and experienced the wonder and beauty of the FWS Balcones Canyonlands National Wildlife Refuge. Many of these visitors participated in a number of outdoor activities including archery, fishing, hiking, as well as art activities. They were also treated to a birds of prey show, nature photography, and a live reptile display. There were also youth activities that gave school-age attendees a chance to be a junior firefighter and crime scene investigator. The Friends of Balcones group rewarded youth completing the "refuge passport" activities with a highly sought after snow cone. The theme of this celebratory event was focused on the FWS Big Six priority public uses on refuges. (R2 – Southwest Region)
- **Supportive Stakeholders:** Partners and supporters included the Friends of Balcones, FWS Inks Dam National Fish Hatchery, FWS San Marcos Aquatic Resource Office, FWS Austin Ecological Services Office, Lago Vista Boy Scouts, American Bird Conservancy, National Wild Turkey Federation, Travis Audubon, Balcones Canyonlands Preserve, Texas Master Naturalists, Lower Colorado River Authority, Balcones Canyonlands Preserve, Good Water Master Naturalists and others.
- **Impacted Location:** Forty-five minutes northwest of Austin, Texas

Bison Donated to Osage Nation in Oklahoma

- **Topic:** The FWS Southwest Region's National Wildlife Refuge System and the FWS Wildlife Health Office and worked with the Inter-Tribal Buffalo Council on an agreement to donate 25 percent of the Wichita Mountain Wildlife Refuge's surplus bison to the Osage Nation in Oklahoma. In order to manage the bison population on Refuge lands, FWS rounds up its herd annually to collect genetic information and electronically tag individual animals. During the round-up, FWS culls out surplus animals to be sold or donated. This year, 20 of the bison gathered were donated to the Osage Nation as seed stock for a Tribal bison herd. (R2 – Southwest Region)
- **Supportive Stakeholders:** Osage Nation, Oklahoma Department of Wildlife Conservation, Oklahoma Department of Agriculture, Food & Forestry Animal Industry Services, Livestock community participating in annual auctions of surplus bison
- **Impacted Location:** Oklahoma and other locations

FWS Gathers Important Data and More to Further Conservation of Aquatic Specie

- **Topic**: FWS gathers important data, conducts environmental education outreach and stocks waters to further aquatic species conservation and management in Oklahoma. A few examples occurring in September include, 150 alligator snapping turtles (from the 2012 and 2013 year classes) were stocked in the Neosho River in the northeast corner of Oklahoma. These turtles will be monitored by the Missouri State and Oklahoma State

universities' research departments to track growth and migration data. To learn more about the alligator snapping turtle culture and paddlefish, the Oklahoma Federal Executive Board toured the FWS Tishomingo National Fish Hatchery as part of their Leadership Development Training. Snapping turtle presentations were given to the Master Gardener Club in Ardmore, Oklahoma. This conservation activity earned participants a continuing education credit as a Master Gardener. FWS participates in the annual Oklahoma Department of Wildlife Conservation Expo, Oklahoma City. This year, the 3-day event attracted more than 50,000 visitors from all across the state, where all forms of outdoor activities and wildlife were on display. To engage native youth in fishing, FWS stocked 500 derby-sized channel catfish for the Seminole Nation's Children's Fishing Day. Each child received their own fishing pole to use during the derby and to keep. (R2 – Southwest Region)

- **Supportive Stakeholders:** Seminole Nation of Oklahoma, Oklahoma Universities, Oklahoma Department of Wildlife Conservation, the general public, local schools and others.
- **Impacted Location:** Oklahoma

Relict Leopard Frog - What was lost is...restored

- **Topic:** FWS Arizona Ecological Services Fish and Wildlife Biologist, Brian Wooldridge, monitors a population of relict leopard frogs, once believed to be absent from Arizona. Brian led an effort to establish this population in a canyon near Kingman six years ago. Since then, these frogs have successfully reproduced and wild-born individuals now inhabit the canyon. Brian humbly adds, "I would be remiss if I didn't acknowledge that this was the result of a HUGE group effort from the Relict Leopard Frog Conservation Team. I am but a small cog in the wheel and work with great people with this species!" (Image of Brian Wooldridge at relict leopard frog site courtesy of Dave Partridge/AGFD)
- **Supportive Stakeholders:** The conservation team includes Arizona Game and Fish Department, Nevada Department of Wildlife, University of Nevada, National Park Service Lake Mead National Recreation Area, Southern Nevada Water Authority, Bureau of Land Management and others
- **Impacted Location:** Arizona and Nevada

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
Treesource and NPR Mexican	Oct 27	Matt Blois, reporter for treesource.org, an on-line publication, contacted FWS regarding the effects of fire on the Mexican spotted owl and how fuels reduction treatments have affected its recovery. Follow up conversations planned to occur following the prescribed

Spotted Owl & wildfire		burn at Roundup and Gash Mountain in Coconino County this week. NPR (KNAU) was on site at the prescribed burn and conducted interviews with FWS and FS staff on the Mexican Spotted Owl and fire management in northern Arizona
Multiple Resiliency nature camp	Oct 16	Resiliency Nature Camp for Cancer Survivors held at Wichita Mountain Wildlife Refuge gained media interest. See Refuges below for details and one of the published stories at: http://www.swoknews.com/local/cancer-survivors-attend-camp-refuge
Multiple Mt Graham red squirrel decline due to fire	Oct 18-19	Radio and newspaper interviews were provided for two days following issuance of a joint news release regarding the status of the endangered squirrel following the Frye Fire in southeast Arizona which burned through much of the subspecies habitat this summer. Media included: KJZZ (NPR), Arizona Daily Star, NY Times, E&E News and others

Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel
Hurricane Impacts in Texas are posted on the FWS Southwest webpage at: https://www.fws.gov/southwest/hurricaneinfo/

Oct 21 - FWS San Marcos Aquatic Resource Center hosts a kids fishing day in Texas.

Oct 21 – FWS Sevilleta National Wildlife Refuge holds event featuring Ten Minute Talks on a variety of subjects and nature birding hikes. Details in Refuges below. (R2 – Southwest Region)

Oct 23 - FWS Southwest Regional Director planning to travel to Texas to meet with the Cooperative Alliance for Refuge Enhancement (CARE) Group and tour areas impacted by Hurricane Harvey on the gulf coast. See details under Refuges. (R2 – Southwest Region)

Oct 24 - FWS announces grants from the Bats for the Future Fund, which will be used to help defeat White-nose Syndrome. FWS is working with NFWF and Shell Oil Company on this media announcement in Houston, Texas. (HQ, R4, 5, lead, R2)

Oct 31 to Nov 1 – FWS and Gila River Indian Community co-host pollinator workshop for Tribal members. See Tribal consultation below for details. (R2 – Southwest Region)

Nov 1 – FWS is co-hosting a Mussel 101 Congressional briefing for District staffers with the Texas Parks and Wildlife Department and the Office of the Texas Comptroller. The event will be held at the Office of the Texas Comptroller in Austin, Texas. (R2 – Southwest Region)

Nov 1 & 2 – FWS participating in the Texas Monarch Summit. See details in ES Items of note.

Hot Topics - Week Ahead Announcements and Actions
See ESA actions below

Upcoming Workshops & Meetings
November and December – Meet and Greet meetings and introductory phone calls continue between incoming Regional Director and Members of the Congressional Delegation within the Southwest Region. (R2 – Southwest Region)

Nov 5 – FWS hosts Birding Festival at Las Vegas National Wildlife Refuge, New Mexico (R2 – Southwest Region)

Nov 7-9 – FWS hosts the second Tribal ESA training event in New Mexico. See Tribal Consultation below. (R2 – Southwest Region)

Nov 11 – FWS host Connecting People with Nature event at Hagerman National Wildlife Refuge in Texas. (R2 – Southwest Region)

Nov 14-15 – FWS Southwest Regional Director travels to Texas and provides opening remarks at Texas Freshwater Mussel Conservation and Stakeholder Summit in Austin, Texas (R2 – Southwest Region)

Endangered Species Act Recovery Actions
NEW: On October 10, 2017, Arizona Game and Fish biologists captured a 1.5 year-old male Mexican wolf (m1517) that had dispersed north of I-40 and onto Navajo Nation. (The operation was conducted in cooperation with and under permit from FWS, at the request of the Navajo Nation, and permission of New Mexico Department of Game and Fish and private land owners.) The wolf was released in northern Greenlee County on the same day it was capture. The wolf had dispersed alone from the Diamond Pack on Fort Apache Indian Reservation beginning September 31 and was tracked using a satellite (GPS) transmitter collar as it moved northward, largely through grasslands, west of U.S. Highway 191 in Arizona. On the evening of October 4, m1517 crossed I-40 on Navajo Nation high desert land near Chambers, Arizona. The wolf moved further northeast October 5-9, crossing the Arizona/New Mexico state line. Wolf m1571 had dispersed north of the Mexican Wolf Experimental Population Area (10(j) area), where it would be classified as fully endangered and was translocated under a FWS recovery permit. (R2 – Southwest Region)

UPDATED: In late November, FWS may publish a 12-month finding on the listing status of the southwestern willow flycatcher. Pacific Legal Foundation petitioned FWS to delist the flycatcher and in March 2016, we published a 90-day finding that the petition included substantial information, primarily regarding the subspecies' taxonomy. Upon robust consideration of the petition and the flycatchers' classification, the Southwest Region is completing a 12-month finding that delisting of the southwestern willow flycatcher is not warranted. Outreach is being planned – including a news release and Congressional notifications via email. Interest expected to be moderate. No controversy anticipated. (R2 – Southwest Region)

UPDATED: American Burying Beetle Species Status Assessment and 12-month finding – FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed prior to the issuance of a 12-month finding which is expected to occur this winter. In

June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

REPEAT: The Center for Biological Diversity filed a lawsuit (Federal District Court – Tucson) on September 25, regarding a biological opinion (BO) issued on the proposed Rosemont copper mine project in the Santa Rita Mountains, south of Tucson, Arizona, and potential impacts to jaguar (one had been extensively monitored on the project area) and other endangered and threatened species. (To learn more about the lawsuit, visit the Center for Biological Diversity's website) The document in question is the Final Reinitiated BO requested by the U.S. Forest Service (Action Agency) by submittal of the Supplemental Biological Assessment on May 25, 2015. The non-jeopardy BO provides information on the potential incidental take, and as applicable destruction or adverse modification of critical habitat, of the following species: the endangered desert pupfish, Gila chub, Gila topminnow, jaguar, ocelot, lesser long-nosed bat, southwestern willow flycatcher, Huachuca water umbel, and Pima pineapple cactus as well as the threatened western yellow-billed cuckoo, Chiricahua leopard frog and northern Mexican gartersnake. FWS completed its initial BO in Oct. 2013, and reinitiated consultation after receiving new hydrological modeling information, additional species listings, and confirmation of ocelot presence in the area. The reinitiated BO was completed on April 16, 2016, and later amended on April 28, 2016. The Amended BO issued by the FWS' website. (R2 - Southwest Region)

Endangered Species Act Listing Actions

UPDATED: FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed by the end of the calendar year. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. USGS, through its Open File Report (OFR), made available the population model it prepared for FWS. The population model represents one component of the SSA and will be considered alongside of all other available information. On August 25, the draft SSA report was sent to an external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) that FWS has been coordinating with throughout development of the SSA. On August 29, the draft report was sent out for external, independent scientific peer review through a third-party contractor. We have received comments from the working group and peer reviewers and FWS technical staff are currently working to review, organize, and respond to all comments. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the States, and others to plan a face-to-face coordination meeting. WAFWA recently finalized permanent conservation agreements with three private landowners to conserve 3,682 acres of lesser prairie-chicken habitat in the

shortgrass ecoregion of northwestern Kansas. The parcels are located near the 17,290-acre Smoky Valley Ranch, which is owned and managed by The Nature Conservancy. (R2 Southwest Region & R6 Mountain-Prairie Region)

Other Ecological Services Items of Note

NEW: Texas Freshwater Mussel Conservation and Stakeholder Summit in Austin, Texas, Nov 14-15 – The purpose of the summit is to create a forum for sharing information on current mussel science and conservation programs throughout the nation. The symposium will bring together scientists and other professionals with expertise in mussel science and in the design and implementation of mussel conservation programs along with other stakeholders and interested parties. FWS is currently evaluating the status of four species of freshwater mussels in Texas, and will evaluate the status of another seven species over the next five years. Hosted by FWS, in partnership with Texas Parks and Wildlife Department and the Texas Comptroller's Office, the summit will be held in Austin, Texas. FWS Southwest Regional Director will provide opening remarks. Guest speakers are from the following: Ecological Specialists, Inc., O'Fallon, Missouri, EnviroScience, Inc., Nashville, Tennessee, Miami University, Oxford, Ohio, Texas Parks and Wildlife Department, Texas State University, San Marcos, Texas, Alabama Biodiversity Center Director, Marion, Alabama, Iowa State University, Ames, Iowa, Austin Water Environmental & Regulatory Services, City of Austin, Texas, North Carolina State University, Raleigh, North Carolina, Texas A&M University, Dallas, Texas, Auburn University, Auburn, Alabama, San Antonio River Authority, San Antonio, Texas, Texas Commission on Environmental Quality, Austin, Texas, University of Oklahoma, Norman, Oklahoma, U.S. Geological Survey, Kearneysville, West Virginia, and the Natural Resources Conservation Service, Temple, Texas, as well as private landowners. (R2 – Southwest Region)

UPDATED – FWS is co-hosting with Texas Parks and Wildlife Department and the Texas Comptroller's office a Central Texas Mussel 101 Congressional briefing for District staffers. The briefing is scheduled for Wednesday, Nov. 1 at 1 p.m. at the Texas Comptroller's office in Austin, TX. (R2 – Southwest Region)

UPDATED: FWS, Coronado National Forest (CNF), Arizona Game and Fish Department, and the Phoenix Zoo conducted an annual census of the Mount Graham red squirrel (MGRS) and their winter-store food caches (called middens) Sept. 18-20. Results estimate only 35 sqirrels survived the now-extinguished Frye Fire that began earlier this summer. The MGRS occurs only on (is endemic to) Mt. Graham in the Pinaleño Mountains, CNF, in southeastern Arizona. The MGRS population was estimated to be only 252 animals in Fall 2016. The Frye Fire encompassed approximately 48,443 acres of the Pinaleño Mountains, and included an estimated 78% of the MGRS's occupied range within its perimeter, with another 18% within the 2004 Nuttall-Gibson Fire perimeter. Portions of the MGRS's habitat were destroyed by high-severity burn, although even in areas of low- to moderate-severity burn, some middens were partially or completely destroyed. The Forest Service is developing a Biological Assessment of their fire response efforts to conduct an emergency section 7 consultation. MGRS experts and partners are working together to determine the path forward. Significant resources will likely be required to move forward with the subspecies' conservation and recovery. A joint news release (USDA Forest Service, Arizona Game and Fish Department, Phoenix Zoo, and FWS) on the census

results was issued October 17. (Information submitted in previous reports.) (R2 – Southwest Region)

UPDATED: Bone Cave Harvestman Species Status Assessment – FWS Austin Ecological Services Office completed a draft species status assessment for the Bone Cave harvestman. The assessment was sent out for external, independent scientific peer review in late September, comments are due back to FWS by October 27, 2017. Concurrently with peer review of the species status assessment, FWS will host representatives from the City of Austin, Texas Parks and Wildlife Department, Travis County, and Williamson County to detail the methodology used to analyze ecological conditions at sites occupied by the Bone Cave harvestman. Comments and information provided by the peer review and site analysis meeting will be incorporated into the species status assessment. The final species status assessment will inform a 5-year review to be completed for the Bone Cave harvestman in fiscal year 2018. (R2-Southwest Region)

UPDATED: Texas Hornshell Candidate Conservation Agreement and two Candidate Conservation Agreement with Assurances – On October 9, FWS signed a Candidate Conservation Agreement (CCA), draft Candidate Conservation Agreements with Assurances (CCAAs), and environmental assessment for the Texas hornshell (proposed for listing) and other covered species (Rio Grande River cooter, gray redhorse, blue sucker and Pecos springsnail), and an enhancement of survival permit under the Endangered Species Act. (Application was submitted by the Center of Excellence and New Mexico State Land Office on July 6.) The covered area includes portions of Eddy County, New Mexico, and Culberson County, Texas. The CCA, CCAAs, and the associated section 10(a)(1)(A) enhancement of survival permits will have duration of 30 years. FWS's New Mexico Ecological Field Office has been working for several years with the applicants to develop the CCAAs on non-Federal lands; and the Bureau of Land Management to develop the CCA on Federal lands. (The proposed listing of the Texas hornshell may be controversial in both Texas and southern New Mexico. A six month extension on the final listing determination was published on August 10, 2017.) Substantial local stakeholder outreach has been conducted for CCA / CCAAs. A news release and FAQs will be shared with the states, partners, congressional staff and media. (A *Federal Register* notice is not published with the final CCA/As.) (R2-Southwest Region)

UPDATED: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review by the end of the year. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in December 2017. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2-Southwest)

REPEAT: Leander Independent School District (LISD) ITP – FWS will announce in the Federal Register a Notice of Intent to prepare a draft National Environmental Policy Act (NEPA) Environmental Assessment on the proposed construction of a secondary access road at the joint

Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. LISD submitted a draft habitat conservation plan and incidental take permit (ITP). The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties. A follow up meeting occurred on October 3. FWS is now working with landowners to arrange a site visit in the near future to the properties identified in the application. Local interest anticipated. It has significant Congressional interest, as well as strong opposition from other parties. In support, DOI received a Congressional Inquiry dated June 16 from Texas Representatives McCaul, Carter, Flores, Smith and Williams and a September 25, letter from Senators Cornyn and Cruz. Congressional briefings are being proposed. Additional outreach, including issuing a news bulletin, will occur at time of publication in the Federal Register. (R2 – Southwest Region)

REPEAT: On October 23, FWS anticipates The Outdoor Channel will be airing a program titled "Wild Ops," which will feature the USFWS Mexican wolf recovery team during their 2016 (Jan - Feb 2017) annual count and survey. PROGRAM SYNOPSIS: "On Wild Ops, a crack team of veterinarians, muggers and pilots attempt to capture, study and relocate wild animals. Utilizing helicopters, snowmobiles, ATVs, radio-collars, dart guns, ropes, nets, hobbles and mobile ER units, these wildlife wranglers chase a wide variety of wildlife: deer, moose, elk, wolves, pronghorn, and bighorn sheep, to name a few. Once captured, the Wild Ops team administers necessary medicines and tracking devices to ensure the health of the individual animal and the entire species for generations to come. The host of the Wild Ops program is Dr. Peter "Ole" Alcumbrac. He's the Director of Wildlife Health Services, which specializes in immobilization and capture of native and exotic species. He provides clinical and consultation services for private and public collections." As a Consulting Veterinarian for the Arizona Game and Fish Department, The White Mountain Apache Tribe and the US Fish and Wildlife Service, Dr. Alcumbrac has been a key member of the Mexican Wolf Recovery Program, the Sonoran Pronghorn Antelope Recovery Team and Bighorn Sheep disease studies. Since 1992, Dr. Alcumbrac has owned and operated a mixed animal and exotic practice in Arizona with Staff of five veterinarians, providing treatment to more than 15,000 animals. He is a recipient of the Award of Excellence from the Arizona Game and Fish Commission. (R2 – Southwest Region)

REPEAT: FWS participating in the Texas Monarch Summit. Taking place November 1-2, this event will serve as a technical working meeting to develop quantitative goals for monarch conservation across the state. Participation is by invitation only. FWS participants include Katie Boyer (on the planning committee), Cyndee Watson (Texas PFW Program Coordinator), Chris Best (Texas State Botanist), and Leah Murray (SMARC Botanist). (R2 – Southwest Region)

REPEAT: Monarch Joint Venture annual meeting takes place November 7-9, in San Antonio, Texas on the UT-San Antonio campus. These meetings provide an opportunity for all Monarch Joint Venture partners to collaborate on the annual Monarch Conservation Implementation Plan which guides national and international priorities. (All FWS)

REPEAT: FWS will join the Southern Core States for the monarch meeting taking place in Oklahoma City November 29 and December 1. This is a ~12 person working meeting with representatives from the state fish and game agencies to develop similar quantitative goals for the entire southern core geography. Kelly Meyers and Katie Boyer are the FWS representatives attending this meeting. (All FWS)

REPEAT: In October – FWS anticipates publishing a notice announcing the receipt of application and consideration of an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake. Outreach will consist of notifying stakeholders. (R2-Southwest Region)

National Wildlife Refuge Actions

NEW: FWS Southwest Regional Director planning to travel to Texas on October 23, to meet with members of the Cooperative Alliance for Refuge Enhancement (CARE) Group and tour areas impacted by Hurricane Harvey on the gulf coast. CARE is a national coalition of 22 wildlife, sporting, conservation, and scientific organizations. Working together, and with the support of more than 200 refuge Friends groups, CARE's mission is to provide education on the National Wildlife Refuge System. The group is comprised of Non-government organizations ranging from the Defenders of Wildlife to the National Rifle Association. Anticipated attendees on tour include, Greg Sheehan, FWS Acting Director, and Scott Johnson, Department of Transportation. (R2 – Southwest Region)

UPDATED: FWS hosts Second Resilience Nature Retreat for Cancer Survivors - To aid in the healing process of cancer survivors, the FWS Wichita Mountains Wildlife Refuge, in Oklahoma hosted the second annual Resilience Nature Retreat October 12-15. With a beautiful, peaceful setting in nature, the retreat provided a much needed healing support as participants continue their journey and growth process. The award-winning camp took place in October in recognition of National Cancer Awareness Month. Eleven women at different stages of their cancer journeys participated in the four-day retreat to face a series of outdoor challenges. During the retreat, they met new friends and enjoyed the healing power of nature. Adding to the outdoor experience, these tenacious fighters tried their hand at archery, rappelling and fishing. There were also times for quiet reflection as the participants wrote in journals about their experience, or picked up paint brushes to capture the beauty in front of them on canvas. Rhonda "Roe" Spinks, FWS Youth Coordinator, and a cancer survivor herself, helped organize the two events and was quoted as saying, "I know that's one of the things that helped me when I was getting back to trying to live in my new normal after cancer, was being out in nature and seeing the beautiful creation." Read more at: http://www.swoknews.com/local/cancer-survivors-attend-camp-refuge (R2 – Southwest Region)

UPDATED: Impact of Fever Ticks to Cattle Industry in South Texas – FWS continues to work with Texas Animal Health Commission (TAHC) and U.S. Department of Agriculture-Animal and Plant Health Inspection Service (USDA-APHIS) regarding fever tick treatment at the FWS Laguna Atascosa National Wildlife Refuge. Currently, FWS has made a decision to move forward with evaluating, through the NEPA process, the best mechanism for chemically treating white-tailed deer on Laguna Atascosa NWR. This will include mitigation measures to reduce impacts to non-target species, such as the Texas tortoise. The FWS is committed to continuing

discussions and proactive actions in cooperation with the USDA-APHIS, the Texas Animal Health Commission, private ranchers and others to aid in the battle to combat the fever tick. The fever tick can be spread by cattle, deer, and nilgai, an exotic Asian antelope that was introduced by private landowners in South Texas for hunting. The FWS Laguna Atascosa NWR remains under temporary quarantine at this time. The FWS Laguna Atascosa NWR has invested significant time and resources to support USDA-APHIS/TAHC in fever tick control efforts including nilgai reductions, increased bag limits for white-tailed deer, and prescribed fire. Additionally, FWS, in consultation with the USDA-APHIS, issued a biological opinion (BO) in January 2016 for use of Ivermectin-laced corn on private lands. The BO discusses potential effects to ocelots, jaguarundis, and aplomado falcons from use of Ivermectin-laced corn in deer feeders to treat ticks on deer on private property. Local media interest remains high. High Congressional interest from Senator Cornyn (R TX), Rep. Conaway, Rep. Vela (D TX Dist. 34), and the House Agriculture Committee. Members have requested periodic updates. Congressional updates planned (Background previously reported in August 2016 and earlier.) (R2 – Southwest Region)

REPEAT: FWS celebrates the Sevilleta National Wildlife Refuge through a series of Ten Minute Talks on a variety of subjects, including reduction of prairie dogs, bats: nature's unsung heroes, and a turtle's tale: staying cool in a hot world. The informal talks will be held on the north patio on October 21. Tours of the Sevilleta Field Station, operated by the University of New Mexico in collaboration with FWS' Sevilleta National Wildlife Refuge, will take place immediately after the informal talks. Also taking place during the celebratory event are birding walks along the Rio Grande, hikes, exhibitions with live animals, and live music. This family-friendly, fun-filled day is open to the public and media. Most activities are free, however some events require early registration and may require a fee. (R2 – Southwest Region)

REPEAT: FWS Southwest Region Celebrates Refuge Week. See table at end of document with a list of upcoming public events. (R2 – Southwest Region)

Border-Related Activities

UPDATED: **CANCELED** - Proposed media conference regarding the proposed border wall that was tentatively proposed to occur on October 21, by the local community has been canceled. The event was proposed to occur at or near the FWS Santa Ana National Wildlife Refuge (FWS is not a participant). If the event is rescheduled at a future date, it is estimated that 50 to 65 individuals could be in attendance, including 18 Mayors from local towns of the Rio Grande Valley (the nearest City to the Refuge is Alamo, Texas). (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require transporting water from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade / replace pump and water delivery components to facilitate optimum functionality during the

project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Road Construction - On March 20, FWS was contacted by the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to coordinate an upcoming road construction project for a 5.9-mile portion of the Presumido Canyon Road through the Baboquivari Mountains, scheduled to begin in January 2018. The project will require water for the construction, and U.S. Customs and Border Protection (CBP) will perform maintenance of an FWS pump and water well in return for increased use of the FWS-owned well. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Communication Towers - On April 18, FWS and U.S. Customs and Border Protection (CBP) discussed advance planning for Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge would be affected, with the goal of upgrading technology and providing a more robust foundation – all within the original impact areas. Work is proposed to begin in January 2018 dependent upon completion of planning, engineering, and permitting. Follow-up conversations with FWS have occurred to determine the necessary special use permitting process. (R2 – Southwest Region)

Fish and Aquatic Conservation

NEW: See FishBites feature on September efforts to gather data, conduct outreach and stock waters in Oklahoma. (R2 – Southwest Region)

REPEAT: FWS San Marcos Aquatic Resource Center will host a kids fishing day on October 21 in Texas. (R2 – Southwest Region)

Migratory Birds

Nothing significant to report.

Science Applications

Nothing significant to report

Wildlife and Sport Fish Restoration

Nothing significant to report

Tribal Consultation

NEW: The FWS Southwest Region's National Wildlife Refuge System and the FWS Wildlife Health Office and worked with the Inter-Tribal Buffalo Council on an agreement to donate 25 percent of the Wichita Mountain Wildlife Refuge's surplus bison to the Osage Nation in Oklahoma. In order to manage the bison population on Refuge lands, FWS rounds up its herd annually to collect genetic information and electronically tag individual animals. During the round up, FWS culls out surplus animals to be sold or donated. This year, 20 bison gathered were donated to the Osage Nation as seed stock for a Tribal bison herd. (R2 – Southwest Region)

UPDATED: October 18 – Consultation meeting was held with the White Mountain Apache Tribe's Tribal Council in Arizona to discuss Statement of Relations with incoming Regional Director. Discussions included existing Statement of Relations and updates on shared interests. (R2 – Southwest Region)

UPDATED: The Inter Tribal Council of Arizona is planning a December 1 meeting and is interested in discussing the revised Native American Policy and implementation in the Southwest Region. Location in Arizona TBD.

REPEAT: Inter-Tribal ESA Training - FWS hosted the first of two Tribal Wildlife ESA training events to be offered in the Southwest Region in Arizona (October 3-5). The second ESA training event will occur in New Mexico (November 7-9). These Tribal training events include aspects of all FWS Divisions, including the Endangered Species Act, with a portion of the summit devoted to law enforcement training to assist Tribal Game Wardens and other Tribal agents. International Game Warden magazine, Spring 2017, published a story on the FWS law enforcement training for Native American conservation officers. (R2 – Southwest Region)

REPEAT: FWS and the Gila River Indian Community (GRIC) are hosting a workshop for tribes on pollinators and monarch butterflies at the GRIC's Huhugam Heritage Center, Chandler, Arizona (Southeast of Phoenix) on October 31 and November 1, 2017. On day two, there will be a hands-on planting of monarch and pollinator plants in a pollinator garden. (R2 – Southwest Region)

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service
Through November 3, 2017

FishBites Report

Three Hundred+ Join FWS to Celebrate Balcones 25th Anniversary

- **Topic:** FWS celebrates the 25th anniversary of the Balcones Canyonlands National Wildlife Refuge with a Family-Friendly Round-Up Event. Adults and children of all ages were invited to join in the celebration on October 14, 2017. And the invitation was accepted! More than 300 attended the event and experienced the wonder and beauty of the FWS Balcones Canyonlands National Wildlife Refuge. Many of these visitors participated in a number of outdoor activities including archery, fishing, hiking, as well as art activities. They were also treated to a birds of prey show, nature photography, and a live reptile display. There were also youth activities that gave school-age attendees a chance to be a junior firefighter and crime scene investigator. The Friends of Balcones group rewarded youth completing the "refuge passport" activities with a highly sought after snow cone. The theme of this celebratory event was focused on the FWS Big Six priority public uses on refuges. (R2 – Southwest Region)
- **Supportive Stakeholders:** Partners and supporters included the Friends of Balcones, FWS Inks Dam National Fish Hatchery, FWS San Marcos Aquatic Resource Office, FWS Austin Ecological Services Office, Lago Vista Boy Scouts, American Bird Conservancy, National Wild Turkey Federation, Travis Audubon, Balcones Canyonlands Preserve, Texas Master Naturalists, Lower Colorado River Authority, Balcones Canyonlands Preserve, Good Water Master Naturalists and others.
- **Impacted Location:** Forty-five minutes northwest of Austin, Texas

Bison Donated to Osage Nation in Oklahoma

- **Topic:** The FWS Southwest Region's National Wildlife Refuge System and the FWS Wildlife Health Office and worked with the Inter-Tribal Buffalo Council on an agreement to donate 25 percent of the Wichita Mountain Wildlife Refuge's surplus bison to the Osage Nation in Oklahoma. In order to manage the bison population on Refuge lands, FWS rounds up its herd annually to collect genetic information and electronically tag individual animals. During the round-up, FWS culls out surplus animals to be sold or donated. This year, 20 of the bison gathered were donated to the Osage Nation as seed stock for a Tribal bison herd. (R2 – Southwest Region)
- **Supportive Stakeholders:** Osage Nation, Oklahoma Department of Wildlife Conservation, Oklahoma Department of Agriculture, Food & Forestry Animal Industry Services, Livestock community participating in annual auctions of surplus bison
- **Impacted Location:** Oklahoma and other locations

FWS Gathers Important Data and More to Further Conservation of Aquatic Specie

- **Topic**: FWS gathers important data, conducts environmental education outreach and stocks waters to further aquatic species conservation and management in Oklahoma. A few examples occurring in September include, 150 alligator snapping turtles (from the 2012 and 2013 year classes) were stocked in the Neosho River in the northeast corner of Oklahoma. These turtles will be monitored by the Missouri State and Oklahoma State

universities' research departments to track growth and migration data. To learn more about the alligator snapping turtle culture and paddlefish, the Oklahoma Federal Executive Board toured the FWS Tishomingo National Fish Hatchery as part of their Leadership Development Training. Snapping turtle presentations were given to the Master Gardener Club in Ardmore, Oklahoma. This conservation activity earned participants a continuing education credit as a Master Gardener. FWS participates in the annual Oklahoma Department of Wildlife Conservation Expo, Oklahoma City. This year, the 3-day event attracted more than 50,000 visitors from all across the state, where all forms of outdoor activities and wildlife were on display. To engage native youth in fishing, FWS stocked 500 derby-sized channel catfish for the Seminole Nation's Children's Fishing Day. Each child received their own fishing pole to use during the derby and to keep. (R2 – Southwest Region)

- **Supportive Stakeholders:** Seminole Nation of Oklahoma, Oklahoma Universities, Oklahoma Department of Wildlife Conservation, the general public, local schools and others.
- **Impacted Location:** Oklahoma

Relict Leopard Frog - What was lost is...restored

- **Topic:** FWS Arizona Ecological Services Fish and Wildlife Biologist, Brian Wooldridge, monitors a population of relict leopard frogs, once believed to be absent from Arizona. Brian led an effort to establish this population in a canyon near Kingman six years ago. Since then, these frogs have successfully reproduced and wild-born individuals now inhabit the canyon. Brian humbly adds, "I would be remiss if I didn't acknowledge that this was the result of a HUGE group effort from the Relict Leopard Frog Conservation Team. I am but a small cog in the wheel and work with great people with this species!" (Image of Brian Wooldridge at relict leopard frog site courtesy of Dave Partridge/AGFD)
- **Supportive Stakeholders:** The conservation team includes Arizona Game and Fish Department, Nevada Department of Wildlife, University of Nevada, National Park Service Lake Mead National Recreation Area, Southern Nevada Water Authority, Bureau of Land Management and others
- **Impacted Location:** Arizona and Nevada

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
Treesource and NPR Mexican	Oct 27	Matt Blois, reporter for treesource.org, an on-line publication, contacted FWS regarding the effects of fire on the Mexican spotted owl and how fuels reduction treatments have affected its recovery. Follow up conversations planned to occur following the prescribed

Spotted Owl & wildfire		burn at Roundup and Gash Mountain in Coconino County this week. NPR (KNAU) was on site at the prescribed burn and conducted interviews with FWS and FS staff on the Mexican Spotted Owl and fire management in northern Arizona
Multiple Resiliency nature camp	Oct 16	Resiliency Nature Camp for Cancer Survivors held at Wichita Mountain Wildlife Refuge gained media interest. See Refuges below for details and one of the published stories at: http://www.swoknews.com/local/cancer-survivors-attend-camp-refuge
Multiple Mt Graham red squirrel decline due to fire	Oct 18-19	Radio and newspaper interviews were provided for two days following issuance of a joint news release regarding the status of the endangered squirrel following the Frye Fire in southeast Arizona which burned through much of the subspecies habitat this summer. Media included: KJZZ (NPR), Arizona Daily Star, NY Times, E&E News and others

Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel
Hurricane Impacts in Texas are posted on the FWS Southwest webpage at: https://www.fws.gov/southwest/hurricaneinfo/

Oct 21 - FWS San Marcos Aquatic Resource Center hosts a kids fishing day in Texas.

Oct 21 – FWS Sevilleta National Wildlife Refuge holds event featuring Ten Minute Talks on a variety of subjects and nature birding hikes. Details in Refuges below. (R2 – Southwest Region)

Oct 23 - FWS Southwest Regional Director planning to travel to Texas to meet with the Cooperative Alliance for Refuge Enhancement (CARE) Group and tour areas impacted by Hurricane Harvey on the gulf coast. See details under Refuges. (R2 – Southwest Region)

Oct 24 - FWS announces grants from the Bats for the Future Fund, which will be used to help defeat White-nose Syndrome. FWS is working with NFWF and Shell Oil Company on this media announcement in Houston, Texas. (HQ, R4, 5, lead, R2)

Oct 31 to Nov 1 – FWS and Gila River Indian Community co-host pollinator workshop for Tribal members. See Tribal consultation below for details. (R2 – Southwest Region)

Nov 1 – FWS is co-hosting a Mussel 101 Congressional briefing for District staffers with the Texas Parks and Wildlife Department and the Office of the Texas Comptroller. The event will be held at the Office of the Texas Comptroller in Austin, Texas. (R2 – Southwest Region)

Nov 1 & 2 – FWS participating in the Texas Monarch Summit. See details in ES Items of note.

Hot Topics - Week Ahead Announcements and Actions
See ESA actions below

Upcoming Workshops & Meetings
November and December – Meet and Greet meetings and introductory phone calls continue between incoming Regional Director and Members of the Congressional Delegation within the Southwest Region. (R2 – Southwest Region)

Nov 5 – FWS hosts Birding Festival at Las Vegas National Wildlife Refuge, New Mexico (R2 – Southwest Region)

Nov 7-9 – FWS hosts the second Tribal ESA training event in New Mexico. See Tribal Consultation below. (R2 – Southwest Region)

Nov 11 – FWS host Connecting People with Nature event at Hagerman National Wildlife Refuge in Texas. (R2 – Southwest Region)

Nov 14-15 – FWS Southwest Regional Director travels to Texas and provides opening remarks at Texas Freshwater Mussel Conservation and Stakeholder Summit in Austin, Texas (R2 – Southwest Region)

Endangered Species Act Recovery Actions
NEW: On October 10, 2017, Arizona Game and Fish biologists captured a 1.5 year-old male Mexican wolf (m1517) that had dispersed north of I-40 and onto Navajo Nation. (The operation was conducted in cooperation with and under permit from FWS, at the request of the Navajo Nation, and permission of New Mexico Department of Game and Fish and private land owners.) The wolf was released in northern Greenlee County on the same day it was capture. The wolf had dispersed alone from the Diamond Pack on Fort Apache Indian Reservation beginning September 31 and was tracked using a satellite (GPS) transmitter collar as it moved northward, largely through grasslands, west of U.S. Highway 191 in Arizona. On the evening of October 4, m1517 crossed I-40 on Navajo Nation high desert land near Chambers, Arizona. The wolf moved further northeast October 5-9, crossing the Arizona/New Mexico state line. Wolf m1571 had dispersed north of the Mexican Wolf Experimental Population Area (10(j) area), where it would be classified as fully endangered and was translocated under a FWS recovery permit. (R2 – Southwest Region)

UPDATED: In late November, FWS may publish a 12-month finding on the listing status of the southwestern willow flycatcher. Pacific Legal Foundation petitioned FWS to delist the flycatcher and in March 2016, we published a 90-day finding that the petition included substantial information, primarily regarding the subspecies' taxonomy. Upon robust consideration of the petition and the flycatchers' classification, the Southwest Region is completing a 12-month finding that delisting of the southwestern willow flycatcher is not warranted. Outreach is being planned – including a news release and Congressional notifications via email. Interest expected to be moderate. No controversy anticipated. (R2 – Southwest Region)

UPDATED: American Burying Beetle Species Status Assessment and 12-month finding – FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed prior to the issuance of a 12-month finding which is expected to occur this winter. In

June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

REPEAT: The Center for Biological Diversity filed a lawsuit (Federal District Court – Tucson) on September 25, regarding a biological opinion (BO) issued on the proposed Rosemont copper mine project in the Santa Rita Mountains, south of Tucson, Arizona, and potential impacts to jaguar (one had been extensively monitored on the project area) and other endangered and threatened species. (To learn more about the lawsuit, visit the Center for Biological Diversity's website) The document in question is the Final Reinitiated BO requested by the U.S. Forest Service (Action Agency) by submittal of the Supplemental Biological Assessment on May 25, 2015. The non-jeopardy BO provides information on the potential incidental take, and as applicable destruction or adverse modification of critical habitat, of the following species: the endangered desert pupfish, Gila chub, Gila topminnow, jaguar, ocelot, lesser long-nosed bat, southwestern willow flycatcher, Huachuca water umbel, and Pima pineapple cactus as well as the threatened western yellow-billed cuckoo, Chiricahua leopard frog and northern Mexican gartersnake. FWS completed its initial BO in Oct. 2013, and reinitiated consultation after receiving new hydrological modeling information, additional species listings, and confirmation of ocelot presence in the area. The reinitiated BO was completed on April 16, 2016, and later amended on April 28, 2016. The Amended BO issued by the FWS' website. (R2 - Southwest Region)

Endangered Species Act Listing Actions

UPDATED: FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed by the end of the calendar year. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. USGS, through its Open File Report (OFR), made available the population model it prepared for FWS. The population model represents one component of the SSA and will be considered alongside of all other available information. On August 25, the draft SSA report was sent to an external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) that FWS has been coordinating with throughout development of the SSA. On August 29, the draft report was sent out for external, independent scientific peer review through a third-party contractor. We have received comments from the working group and peer reviewers and FWS technical staff are currently working to review, organize, and respond to all comments. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the States, and others to plan a face-to-face coordination meeting. WAFWA recently finalized permanent conservation agreements with three private landowners to conserve 3,682 acres of lesser prairie-chicken habitat in the

shortgrass ecoregion of northwestern Kansas. The parcels are located near the 17,290-acre Smoky Valley Ranch, which is owned and managed by The Nature Conservancy. (R2 Southwest Region & R6 Mountain-Prairie Region)

Other Ecological Services Items of Note

NEW: Texas Freshwater Mussel Conservation and Stakeholder Summit in Austin, Texas, Nov 14-15 – The purpose of the summit is to create a forum for sharing information on current mussel science and conservation programs throughout the nation. The symposium will bring together scientists and other professionals with expertise in mussel science and in the design and implementation of mussel conservation programs along with other stakeholders and interested parties. FWS is currently evaluating the status of four species of freshwater mussels in Texas, and will evaluate the status of another seven species over the next five years. Hosted by FWS, in partnership with Texas Parks and Wildlife Department and the Texas Comptroller's Office, the summit will be held in Austin, Texas. FWS Southwest Regional Director will provide opening remarks. Guest speakers are from the following: Ecological Specialists, Inc., O'Fallon, Missouri, EnviroScience, Inc., Nashville, Tennessee, Miami University, Oxford, Ohio, Texas Parks and Wildlife Department, Texas State University, San Marcos, Texas, Alabama Biodiversity Center Director, Marion, Alabama, Iowa State University, Ames, Iowa, Austin Water Environmental & Regulatory Services, City of Austin, Texas, North Carolina State University, Raleigh, North Carolina, Texas A&M University, Dallas, Texas, Auburn University, Auburn, Alabama, San Antonio River Authority, San Antonio, Texas, Texas Commission on Environmental Quality, Austin, Texas, University of Oklahoma, Norman, Oklahoma, U.S. Geological Survey, Kearneysville, West Virginia, and the Natural Resources Conservation Service, Temple, Texas, as well as private landowners. (R2 – Southwest Region)

UPDATED – FWS is co-hosting with Texas Parks and Wildlife Department and the Texas Comptroller's office a Central Texas Mussel 101 Congressional briefing for District staffers. The briefing is scheduled for Wednesday, Nov. 1 at 1 p.m. at the Texas Comptroller's office in Austin, TX. (R2 – Southwest Region)

UPDATED: FWS, Coronado National Forest (CNF), Arizona Game and Fish Department, and the Phoenix Zoo conducted an annual census of the Mount Graham red squirrel (MGRS) and their winter-store food caches (called middens) Sept. 18-20. Results estimate only 35 sqirrels survived the now-extinguished Frye Fire that began earlier this summer. The MGRS occurs only on (is endemic to) Mt. Graham in the Pinaleño Mountains, CNF, in southeastern Arizona. The MGRS population was estimated to be only 252 animals in Fall 2016. The Frye Fire encompassed approximately 48,443 acres of the Pinaleño Mountains, and included an estimated 78% of the MGRS's occupied range within its perimeter, with another 18% within the 2004 Nuttall-Gibson Fire perimeter. Portions of the MGRS's habitat were destroyed by high-severity burn, although even in areas of low- to moderate-severity burn, some middens were partially or completely destroyed. The Forest Service is developing a Biological Assessment of their fire response efforts to conduct an emergency section 7 consultation. MGRS experts and partners are working together to determine the path forward. Significant resources will likely be required to move forward with the subspecies' conservation and recovery. A joint news release (USDA Forest Service, Arizona Game and Fish Department, Phoenix Zoo, and FWS) on the census

results was issued October 17. (Information submitted in previous reports.) (R2 – Southwest Region)

UPDATED: Bone Cave Harvestman Species Status Assessment – FWS Austin Ecological Services Office completed a draft species status assessment for the Bone Cave harvestman. The assessment was sent out for external, independent scientific peer review in late September, comments are due back to FWS by October 27, 2017. Concurrently with peer review of the species status assessment, FWS will host representatives from the City of Austin, Texas Parks and Wildlife Department, Travis County, and Williamson County to detail the methodology used to analyze ecological conditions at sites occupied by the Bone Cave harvestman. Comments and information provided by the peer review and site analysis meeting will be incorporated into the species status assessment. The final species status assessment will inform a 5-year review to be completed for the Bone Cave harvestman in fiscal year 2018. (R2-Southwest Region)

UPDATED: Texas Hornshell Candidate Conservation Agreement and two Candidate Conservation Agreement with Assurances – On October 9, FWS signed a Candidate Conservation Agreement (CCA), draft Candidate Conservation Agreements with Assurances (CCAAs), and environmental assessment for the Texas hornshell (proposed for listing) and other covered species (Rio Grande River cooter, gray redhorse, blue sucker and Pecos springsnail), and an enhancement of survival permit under the Endangered Species Act. (Application was submitted by the Center of Excellence and New Mexico State Land Office on July 6.) The covered area includes portions of Eddy County, New Mexico, and Culberson County, Texas. The CCA, CCAAs, and the associated section 10(a)(1)(A) enhancement of survival permits will have duration of 30 years. FWS's New Mexico Ecological Field Office has been working for several years with the applicants to develop the CCAAs on non-Federal lands; and the Bureau of Land Management to develop the CCA on Federal lands. (The proposed listing of the Texas hornshell may be controversial in both Texas and southern New Mexico. A six month extension on the final listing determination was published on August 10, 2017.) Substantial local stakeholder outreach has been conducted for CCA / CCAAs. A news release and FAQs will be shared with the states, partners, congressional staff and media. (A *Federal Register* notice is not published with the final CCA/As.) (R2-Southwest Region)

UPDATED: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review by the end of the year. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in December 2017. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2-Southwest)

REPEAT: Leander Independent School District (LISD) ITP – FWS will announce in the Federal Register a Notice of Intent to prepare a draft National Environmental Policy Act (NEPA) Environmental Assessment on the proposed construction of a secondary access road at the joint

Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. LISD submitted a draft habitat conservation plan and incidental take permit (ITP). The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties. A follow up meeting occurred on October 3. FWS is now working with landowners to arrange a site visit in the near future to the properties identified in the application. Local interest anticipated. It has significant Congressional interest, as well as strong opposition from other parties. In support, DOI received a Congressional Inquiry dated June 16 from Texas Representatives McCaul, Carter, Flores, Smith and Williams and a September 25, letter from Senators Cornyn and Cruz. Congressional briefings are being proposed. Additional outreach, including issuing a news bulletin, will occur at time of publication in the Federal Register. (R2 – Southwest Region)

REPEAT: On October 23, FWS anticipates The Outdoor Channel will be airing a program titled "Wild Ops," which will feature the USFWS Mexican wolf recovery team during their 2016 (Jan - Feb 2017) annual count and survey. PROGRAM SYNOPSIS: "On Wild Ops, a crack team of veterinarians, muggers and pilots attempt to capture, study and relocate wild animals. Utilizing helicopters, snowmobiles, ATVs, radio-collars, dart guns, ropes, nets, hobbles and mobile ER units, these wildlife wranglers chase a wide variety of wildlife: deer, moose, elk, wolves, pronghorn, and bighorn sheep, to name a few. Once captured, the Wild Ops team administers necessary medicines and tracking devices to ensure the health of the individual animal and the entire species for generations to come. The host of the Wild Ops program is Dr. Peter "Ole" Alcumbrac. He's the Director of Wildlife Health Services, which specializes in immobilization and capture of native and exotic species. He provides clinical and consultation services for private and public collections." As a Consulting Veterinarian for the Arizona Game and Fish Department, The White Mountain Apache Tribe and the US Fish and Wildlife Service, Dr. Alcumbrac has been a key member of the Mexican Wolf Recovery Program, the Sonoran Pronghorn Antelope Recovery Team and Bighorn Sheep disease studies. Since 1992, Dr. Alcumbrac has owned and operated a mixed animal and exotic practice in Arizona with Staff of five veterinarians, providing treatment to more than 15,000 animals. He is a recipient of the Award of Excellence from the Arizona Game and Fish Commission. (R2 – Southwest Region)

REPEAT: FWS participating in the Texas Monarch Summit. Taking place November 1-2, this event will serve as a technical working meeting to develop quantitative goals for monarch conservation across the state. Participation is by invitation only. FWS participants include Katie Boyer (on the planning committee), Cyndee Watson (Texas PFW Program Coordinator), Chris Best (Texas State Botanist), and Leah Murray (SMARC Botanist). (R2 – Southwest Region)

REPEAT: Monarch Joint Venture annual meeting takes place November 7-9, in San Antonio, Texas on the UT-San Antonio campus. These meetings provide an opportunity for all Monarch Joint Venture partners to collaborate on the annual Monarch Conservation Implementation Plan which guides national and international priorities. (All FWS)

REPEAT: FWS will join the Southern Core States for the monarch meeting taking place in Oklahoma City November 29 and December 1. This is a ~12 person working meeting with representatives from the state fish and game agencies to develop similar quantitative goals for the entire southern core geography. Kelly Meyers and Katie Boyer are the FWS representatives attending this meeting. (All FWS)

REPEAT: In October – FWS anticipates publishing a notice announcing the receipt of application and consideration of an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake. Outreach will consist of notifying stakeholders. (R2-Southwest Region)

National Wildlife Refuge Actions

NEW: FWS Southwest Regional Director planning to travel to Texas on October 23, to meet with members of the Cooperative Alliance for Refuge Enhancement (CARE) Group and tour areas impacted by Hurricane Harvey on the gulf coast. CARE is a national coalition of 22 wildlife, sporting, conservation, and scientific organizations. Working together, and with the support of more than 200 refuge Friends groups, CARE's mission is to provide education on the National Wildlife Refuge System. The group is comprised of Non-government organizations ranging from the Defenders of Wildlife to the National Rifle Association. Anticipated attendees on tour include, Greg Sheehan, FWS Acting Director, and Scott Johnson, Department of Transportation. (R2 – Southwest Region)

UPDATED: FWS hosts Second Resilience Nature Retreat for Cancer Survivors - To aid in the healing process of cancer survivors, the FWS Wichita Mountains Wildlife Refuge, in Oklahoma hosted the second annual Resilience Nature Retreat October 12-15. With a beautiful, peaceful setting in nature, the retreat provided a much needed healing support as participants continue their journey and growth process. The award-winning camp took place in October in recognition of National Cancer Awareness Month. Eleven women at different stages of their cancer journeys participated in the four-day retreat to face a series of outdoor challenges. During the retreat, they met new friends and enjoyed the healing power of nature. Adding to the outdoor experience, these tenacious fighters tried their hand at archery, rappelling and fishing. There were also times for quiet reflection as the participants wrote in journals about their experience, or picked up paint brushes to capture the beauty in front of them on canvas. Rhonda "Roe" Spinks, FWS Youth Coordinator, and a cancer survivor herself, helped organize the two events and was quoted as saying, "I know that's one of the things that helped me when I was getting back to trying to live in my new normal after cancer, was being out in nature and seeing the beautiful creation." UPDATED: Impact of Fever Ticks to Cattle Industry in South Texas – FWS continues to work with Texas Animal Health Commission (TAHC) and U.S. Department of Agriculture-Animal and Plant Health Inspection Service (USDA-APHIS) regarding fever tick treatment at the FWS Laguna Atascosa National Wildlife Refuge. Currently, FWS has made a decision to move forward with evaluating, through the NEPA process, the best mechanism for chemically treating white-tailed deer on Laguna Atascosa NWR. This will include mitigation measures to reduce impacts to non-target species, such as the Texas tortoise. The FWS is committed to continuing

discussions and proactive actions in cooperation with the USDA-APHIS, the Texas Animal Health Commission, private ranchers and others to aid in the battle to combat the fever tick. The fever tick can be spread by cattle, deer, and nilgai, an exotic Asian antelope that was introduced by private landowners in South Texas for hunting. The FWS Laguna Atascosa NWR remains under temporary quarantine at this time. The FWS Laguna Atascosa NWR has invested significant time and resources to support USDA-APHIS/TAHC in fever tick control efforts including nilgai reductions, increased bag limits for white-tailed deer, and prescribed fire. Additionally, FWS, in consultation with the USDA-APHIS, issued a biological opinion (BO) in January 2016 for use of Ivermectin-laced corn on private lands. The BO discusses potential effects to ocelots, jaguarundis, and aplomado falcons from use of Ivermectin-laced corn in deer feeders to treat ticks on deer on private property. Local media interest remains high. High Congressional interest from Senator Cornyn (R TX), Rep. Conaway, Rep. Vela (D TX Dist. 34), and the House Agriculture Committee. Members have requested periodic updates. Congressional updates planned (Background previously reported in August 2016 and earlier.) (R2 – Southwest Region)

REPEAT: FWS celebrates the Sevilleta National Wildlife Refuge through a series of Ten Minute Talks on a variety of subjects, including reduction of prairie dogs, bats: nature's unsung heroes, and a turtle's tale: staying cool in a hot world. The informal talks will be held on the north patio on October 21. Tours of the Sevilleta Field Station, operated by the University of New Mexico in collaboration with FWS' Sevilleta National Wildlife Refuge, will take place immediately after the informal talks. Also taking place during the celebratory event are birding walks along the Rio Grande, hikes, exhibitions with live animals, and live music. This family-friendly, fun-filled day is open to the public and media. Most activities are free, however some events require early registration and may require a fee. (R2 – Southwest Region)

REPEAT: FWS Southwest Region Celebrates Refuge Week. See table at end of document with a list of upcoming public events. (R2 – Southwest Region)

Border-Related Activities

UPDATED: **CANCELED** - Proposed media conference regarding the proposed border wall that was tentatively proposed to occur on October 21, by the local community has been canceled. The event was proposed to occur at or near the FWS Santa Ana National Wildlife Refuge (FWS is not a participant). If the event is rescheduled at a future date, it is estimated that 50 to 65 individuals could be in attendance, including 18 Mayors from local towns of the Rio Grande Valley (the nearest City to the Refuge is Alamo, Texas). (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require transporting water from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade / replace pump and water delivery components to facilitate optimum functionality during the

project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Road Construction - On March 20, FWS was contacted by the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to coordinate an upcoming road construction project for a 5.9-mile portion of the Presumido Canyon Road through the Baboquivari Mountains, scheduled to begin in January 2018. The project will require water for the construction, and U.S. Customs and Border Protection (CBP) will perform maintenance of an FWS pump and water well in return for increased use of the FWS-owned well. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Communication Towers - On April 18, FWS and U.S. Customs and Border Protection (CBP) discussed advance planning for Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge would be affected, with the goal of upgrading technology and providing a more robust foundation – all within the original impact areas. Work is proposed to begin in January 2018 dependent upon completion of planning, engineering, and permitting. Follow-up conversations with FWS have occurred to determine the necessary special use permitting process. (R2 – Southwest Region)

Fish and Aquatic Conservation

NEW: See FishBites feature on September efforts to gather data, conduct outreach and stock waters in Oklahoma. (R2 – Southwest Region)

REPEAT: FWS San Marcos Aquatic Resource Center will host a kids fishing day on October 21 in Texas. (R2 – Southwest Region)

Tribal Consultation

NEW: The FWS Southwest Region's National Wildlife Refuge System and the FWS Wildlife Health Office and worked with the Inter-Tribal Buffalo Council on an agreement to donate 25 percent of the Wichita Mountain Wildlife Refuge's surplus bison to the Osage Nation in Oklahoma. In order to manage the bison population on Refuge lands, FWS rounds up its herd annually to collect genetic information and electronically tag individual animals. During the round up, FWS culls out surplus animals to be sold or donated. This year, 20 bison gathered were donated to the Osage Nation as seed stock for a Tribal bison herd. (R2 – Southwest Region)

UPDATED: October 18 – Consultation meeting was held with the White Mountain Apache Tribe's Tribal Council in Arizona to discuss Statement of Relations with incoming Regional Director. Discussions included existing Statement of Relations and updates on shared interests. (R2 – Southwest Region)

UPDATED: The Inter Tribal Council of Arizona is planning a December 1 meeting and is interested in discussing the revised Native American Policy and implementation in the Southwest Region. Location in Arizona TBD.

REPEAT: Inter-Tribal ESA Training - FWS hosted the first of two Tribal Wildlife ESA training events to be offered in the Southwest Region in Arizona (October 3-5). The second ESA training event will occur in New Mexico (November 7-9). These Tribal training events include aspects of all FWS Divisions, including the Endangered Species Act, with a portion of the summit devoted to law enforcement training to assist Tribal Game Wardens and other Tribal agents. International Game Warden magazine, Spring 2017, published a story on the FWS law enforcement training for Native American conservation officers. (R2 – Southwest Region)

REPEAT: FWS and the Gila River Indian Community (GRIC) are hosting a workshop for tribes on pollinators and monarch butterflies at the GRIC's Huhugam Heritage Center, Chandler, Arizona (Southeast of Phoenix) on October 31 and November 1, 2017. On day two, there will be a hands-on planting of monarch and pollinator plants in a pollinator garden. (R2 – Southwest Region)

Subject: Re: DTS Assignment--Notice of Violations of the Endangered Species Act in Relation to Border Wall Prototypes and Border Barrier Projects in California
To: "Gilbert, Parks" <parks_gilbert@fws.gov>

Hey Parks,

So this NOI appears to be an addendum to a complaint by the CA AG I summarized a while ago that covered pretty much every potential violation for the border wall except ESA.

A summary of that complaint:

- DHS violated NEPA and APA by failing to prepare an EIS for the effects of the wall's construction
- DHS violated CZMA, California Coastal Act, and California Coastal Management Program by failing to provide a consistency determination
- DHS's actions, along with the individual waivers of many federal statutes including NEPA, ESA, and MBTA, are not authorized by IIRIRA Section 102, as assessments to the wall's effectiveness were not conducted, and the statute only allows for the construction of new barriers, not replacing old ones
- DHS was required to include the areas used for the border wall, including the San Diego and Calexico areas, by IIRIRA's original deadline of Dec. 31, 2008
- Jurisdiction requirements of IIRIRA Section 102(c) violate Art. III of the Constitution and the Due Process Clause
- Several other separation of powers arguments, including violations of Art. I Sections 3 and 7
- DHS violated Tenth Amendment by infringing on CA's right to promulgate and enforce its own laws

Key facts from the NOI are:

- We are still not a party, only DHS/CBP are
- California alleges DHS/CBP violated ESA by failing to consult with FWS regarding impacts of various border wall projects in San Diego and Imperial Counties on endangered/threatened species, and by failing to make any environmental analyses publicly available
- California also alleges that take/Sec. 9 violations might result from these activities
- If DHS/CBP do not address the ESA issues in 60 days, the original complaint will be amended to include the ESA issues

Thanks,
-Joe

RE: **Notice of Violations of the Endangered Species Act in Relation to Border Wall Prototypes and Border Barrier Projects in California**

Dear Acting Secretary Duke, Secretary Zinke, Acting Commissioner McAleenan and Acting Director Kurth:

On behalf of the People of the State of California, by and through Xavier Becerra, Attorney General ("People"), a plaintiff in the lawsuit entitled *People of the State of California, CA Coastal Commission v. U.S. Department of Homeland Security, et al.* (Border Wall Litigation), United States District Court, Southern District of California, Case No. 17-cv-0125-GPC-WVG (Border Wall Litigation), this letter addresses ongoing and potential future violations of the federal Endangered Species Act ("ESA") (16 U.S.C. § 1531 et seq.).

Pursuant to Section 11(g) of the (ESA) (16 U.S.C. § 1540(g)), the People hereby provide notice that the Department of Homeland Security (DHS) and its component agency U.S. Customs and Border Protection (CBP), are in violation of Section 7(a)(2) of the ESA (16 U.S.C. § 11536(a)(2)) for their failure to formally consult, in a public manner, with the U.S. Fish and Wildlife Service ("FWS") regarding the impacts on threatened or endangered species of the construction of the following projects along the United States-Mexico border: (1) the ongoing

construction of border wall prototypes in the Otay Mesa area of San Diego County, California, approximately fifteen miles from the Pacific Ocean ; (2) the planned replacement of the primary fencing with a new border barrier in San Diego County generally in the 14-mile segment of the border area beginning at the Pacific Ocean and extending eastward; the planned replacement of the secondary fencing with a new border barrier in the same 14-mile segment of the border; and (4) the planned replacement of primary fencing along the border in Imperial County, California, starting near the Calexico West Land Port Entry and extending three miles to the west.

The prototype border wall construction activities are located within or in close proximity to vernal pool locations, as well as designated critical habitat for several threatened or endangered species, including the Quino checkerspot butterfly, San Diego fairy shrimp, Riverside fairy shrimp, California coastal gnatcatcher, and Otay tar plant.

The location of the proposed construction of a replacement border barrier for the primary fencing and a replacement border barrier for the secondary fencing in San Diego County, which is generally along the 14-mile segment of the border area beginning at the Pacific Ocean and extending eastward, is an area where numerous federally-listed endangered and threatened species potentially occur in close proximity to the border. Such endangered species include the following: least Bell's vireo, salt marsh bird's-beak, California Orcutt grass; Otay Mesa mint; San Diego button-celery; San Diego fairy shrimp; Riverside fairy shrimp; and Quino checkerspot butterfly. Relevant threatened species include the following: Otay tarplant; coastal California gnatcatcher; and spreading navarretia.

Other endangered or threatened species that potentially exist in somewhat close proximity to the replacement border barrier projects planned for San Diego County include the light-footed Ridgway's rail, California least tern and western snowy plover.

The Yuma Clapper Rail, an endangered species listed under the ESA, is an inhabitant of Imperial County. The potential for this species to occur in the area of the proposed border fencing near the Calexico West Land Port of Entry should be considered by DHS and CBP, in a public manner consistent with the ESA.

In addition to the lack of formal consultation with FWS regarding the projects discussed above, DHS and CBP apparently have failed to conduct any publicly-available environmental analyses for the prototype walls and fence replacement/new border barrier projects described in this letter. This lack of public environmental analyses by DHS and CBP, or the agencies' lack of public disclosure of such analyses and related consultation in a timely manner, undermines the specific requirements of the ESA. The recent inclusion of a CBP memorandum dated September 25, 2017, as an exhibit to a court pleading filed by DHS and CBP in a federal lawsuit in San Diego on October 6, 2017, is not legally sufficient.

Also, it is possible that DHS and CBP will be in further violation of Section 9(a)(1)(B) of the ESA (16 U.S.C. § 1538(a)(1)(b)) for the likely "take" of threatened or endangered species caused by these construction projects and related activities.

The violations of the ESA described in this letter are serious and unwarranted. If DHS and CBP fail to fully address these violations within 60 days, the complaint in the above-referenced civil case filed by the People and the California Coastal Commission on September 20, 2017, will be amended to address these and related violations.

Thank you for considering the information provided in this notice letter. If DHS or CBP would like to discuss this matter, please request your counsel in the above-referenced case to contact me or Supervising Deputy Attorney General Michael Cayaban at our office in San Diego. My office number is (619) 738-9341. Mr. Cayaban can be reached at (619) 738-9313.

Sincerely,

TIMOTHY R. PATTERSON

On Fri, Oct 20, 2017 at 4:13 PM, Gale, Michael <michael_gale@fws.gov> wrote:

+ Other meeting participants and staff

We are checking with FWP to see if there is an agenda for this meeting or more details on expectations. It's likely that the context is merely that's it's a high profile issue that Jason, who is new to the Department, would like to know more about.

I'm assuming that Refuges (Cynthia Martinez) would serve as the lead for this briefing and would work with the Regions and Programs involved (R2, R8, Refuges, ES) to coordinate briefing prep. We can circle back on Monday if there needs to be any adjustment to that approach.

We will need a briefing paper to provide to FWP, preferably by 12:00p.m. Wednesday, October 25.

For Roslyn and Thomas - please add (b)(6), (b)(7)(C) to the meeting invite for Thursday, October 26 at 3:30p.m. "Border Barrier Briefing."

cheers,

Michael

Michael-
Hope you are having a great Friday. Wanted to check in with you regarding next week's (10/26 at 1:30 mtn) call on Border Barrier with DAS Larrabee. Do you have an agenda? I want to make sure we are prepared from Region 2 if we are expected to make a presentation. Also, I would recommend we invite (b)(6), (b)(7)(C), Inter-agency Borderland Coordinator for the Department to participate in the call. Let me know what you think
Thanks
Amy

FishBites Report

Virtually Wild! Program Provides Nature Therapy to Brave Children Undergoing Treatment

- **Topic:** Ecotherapy (also known as nature therapy), is thought to have regenerative powers improving mood and easing anxiety, as well as aiding in the ability to cope with stress and depression according to WebMD, LLC. Through the Houston Urban Partnership, FWS is bringing nature's healing powers indoors to benefit several brave youth undergoing cancer treatments. Two *Virtually Wild!* events were developed specifically for the UT MD Anderson Cancer Center and the Texas Medical Center in Texas. Not only does this program provide healing benefits, it shares teachable moments including how we benefit from the species and the importance of protecting their habitats. As part of the program, a biologist from the Katy Prairie Conservancy will bring a live monarch, caterpillar and chrysalis. FWS and partners host these virtual experiences with the intent of introducing the youth to pollinators, and enabling them to experience an urban prairie (surrounded by high rises). The program meets TEKS requirements, and in addition to events hosted at the Treatment centers, it is shared with students throughout the Houston area. The partnership hosts one conservation-related program a month during the school year. Last year, more than 1,000 students enjoyed experiencing the *Virtually Wild!* Program. These virtual events are held on a refuge or on partner lands/facilities, including at the Houston Zoo, in Texas. In December, FWS will host another Virtually Wild program at FWS Attwater Prairie Chicken National Wildlife Refuge. The topic will be focused on the benefits of Rx Burns. Wildland firefighters will share with students the importance of fire as a land management tool that benefits threatened and endangered species, as well as discussing firefighting as a career opportunity. Check out some of the Houston Urban's videos to learn more about this virtual educational program on nature conservation at: https://www.facebook.com/pg/HoustonWild/videos/
- **Supportive Stakeholders:** Houston Urban Partnership – Audubon, NFWF, National Wildlife Refuge Association, The Trust for Public Lands, TTANDEM – Skills+Motion, Soul River Runs Deep, as well as Members of the Texas Delegation, City and State agency support, local schools, and cancer centers treating youth, many more
- **Impacted Location:** Texas

Sandhill Cranes – Arizona's and New Mexico's "snowbirds" – are making their way south

- **Topic:** Every year Sandhill Cranes travel thousands of miles as they make their way to Arizona and New Mexico. "Trumpeting" their arrival, the cranes begin to arrive in early October picking out sunny spots to settle in for the winter. The peak times to view the cranes are from mid-November though the end of December. The cranes will begin to leave again in early March. Experienced bird watchers know the best time to see the birds is the first hour after sunrise, as they leave the roost to feed for the morning. The cranes usually return later in the morning (before noon) where they remain for the rest of the day. The birds often fly out again to feed in the afternoon, creating quite an evening show as they return at dusk. In Arizona, the FWS Cibola NWR is currently seeing about 250 sandhill cranes. At this Refuge, FWS staff cut crops (corn) starting the day before

Thanksgiving and then every two weeks after that. This draws around 1,750 cranes and about 4,000 geese (Canada, snow, and blue) as well as 10,000 ducks of various species (mostly pintail. mallards, and wigeon). Visitors to the FWS Cibola NWR enjoy the spectacular view the visiting birds make as they take the "goose loop drive." In New Mexico, FWS hosts the Festival of the Cranes annually at the Bosque del Apache National Wildlife Refuge. If you are not able to visit a Refuge in Arizona or in New Mexico to see the cranes, view a live stream by the Arizona Game and Fish Department at: www.azgfd.gov/sandhillcranes. Learn more about the Festival of the Cranes event held on the FWS Bosque del Apache NWR November 14-19 at: http://www.friendsofthebosque.org/festival-of-the-cranes.aspx.

- **Supportive Stakeholders:** Local City and State agencies, bird watchers, outdoor recreationists, and many others (considered an ecotourism draw)
- **Impacted Location:** Arizona and New Mexico

"Conservation and education bloom in the Texas panhandle"

- **Topic:** Expanding on an existing educational program, Friends of the High Plains are planning to promote the importance of wildflowers through a demonstration garden project on FWS National Wildlife Refuges in Texas. Gardens are being planted at the FWS Muleshoe National Wildlife Refuge, in Bailey County, and FWS Buffalo Lake NWR, in Randall County. These gardens will be instrumental in building on the group's existing educational outreach around native flora and grasslands—which includes onsite wildflower workshops, field trips for regional students, and other refuge visitors. The wildflower demonstration gardens are expected to be fully established by fall 2018. To learn more, visit: http://www.enbridge.com/stories/2017/october/friends-of-the-high-plains-nwr-texas-wildflower-gardens
- **Supportive Stakeholders:** Partners Enbridge became the first corporate partner for the National Fish and Wildlife Foundation's National Wildlife Refuge Friends program
- **Impacted Location:** State

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
ABQ Journal Outdoor Wire Youth hunting	Oct 26	FWS pitched a hunting-related story to news media related to youth hunts– After a young girl loses her grandmother she writes an essay in her memory. In the essay, she discusses how hunting is a conservation tool, and how the experience draws her into nature. Six weeks later, she was chosen by the National Wild Turkey Foundation as the 2017 JAKES Essay Contest Winner, earning a spot in the annual Kansas Governor's One Shot Turkey Hunt. Read more on the whirlwind set of events that happened next and exciting end of this youth hunt at: http://www.theoutdoorwire.com/features/232137

PBS, KNME-TV, NM Urban Refuge, NM	Nov 1	PBS filmed on FWS Valle de Oro NWR Nov 1. The refuge will be featured in the PBS show "Our Land." Focus filming project: How the refuge was created (former dairy farm in the South Valley); What an urban refuge is and why it's cool that Abq has the first one in the Southwest; What do people do when they come here; What wildlife are here at different times of the year; significance of a protected bosque and river; and the future plans for the refuge (build a visitors center, habitat restoration which will be done by youth corps). Link to other "Our Land" programs: http://www.newmexicopbs.org/productions/newmexicoinfocus/our-land/
KNAU & Treesource Rx Burns and impacts to habitat	Nov 1	Morning Edition or All Things Considered aired a story about the prescribed burns that took place on the Coconino National Forest in Mexican Spotted Owl habitat. FWS biologists looked at owls in places treated with fire and not treated with fire. The Treesource also published a feature. Previously recorded interviews took place Oct. 16-20 https://cpa.ds.npr.org/knau/audio/2017/11/OWL-1101-web.mp3 https://treesource.org/news/biodiversity/mexican-spotted-owls-forests/#more-1558
San Antonio Express News Fever Tick South Texas	Nov 2	On Nov 1, U.S. Reps. Vicente Gonzalez and Jodey Arrington, of Texas, sent a letter to Secretary Zinke requesting help to combat the spread of cattle fever ticks on lands near the Texas-Mexico border. Letter generating renewed media interest. See Refuges for information on fever tick situation in south Texas.
American Way Magazine Jaguars in Arizona	Unknown	Writer is researching a story on Jaguars in Arizona: how they were first sited, how often, how the proposed border wall and canal that will cut through Nicaragua will affect them. Interview regarding natural history and recovery is being arranged. Border wall content will consist of providing DOI-approved statement and referral to CBP Office of Public Affairs
Arizona Daily Star (Tucson), *Arizona Highways* magazine, Arizona Republic Mount Graham Red Squirrel	Weekend edition, Thanksgiving week & in December	This is a follow-up piece on Senator John McCain's support/efforts to expand Mount Graham red squirrel captive breeding research program (following substantial population due to the Frye Fire). Arizona Highways is prepping an information and photo piece as well. Arizona Republic is preparing an expanded piece on the subject, including trips to The Phoenix Zoo cative research facility and a field ride-along with UofA squirrel monitoring crew. FWS has been interviewed.
Mohave Daily News (Arizona)	Nov 2	Bullhead City, Arizona, along the Colorado River is experiencing a large influx of immerging caddisflies. City leaders and property owners are vocally campaigning to

Caddisflies – intro of increased number of rainbow trout		increase the stocking of the recreational rainbow trout fishery to help consume the flies. These waters also support endangered bonytail chub and razorback suckers. They too consume caddisflies. Subject is locally contentious. (See entry below.)
Broken Bow news Youth Hunt on NWR	Nov 1	Coverage of the Oct 27-29 Cooperative Youth Hunt between the Oklahoma Department of Wildlife Conservation and the FWS Little River National Wildlife Refuge in Oklahoma. "Youth hunters harvest 8 deer"

Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel
Hurricane Impacts in Texas are posted on the FWS Southwest webpage at:
https://www.fws.gov/southwest/hurricaneinfo/

Nov 1&2 – FWS SW Regional Director Amy Lueders traveling to Arizona to meet with AZG&FD, local landowners and FWS staff in Arizona. (R2 – Southwest Region)

Nov 1 to 7 – FWS hosts International visitors from The Nature Conservancy of Mongolia. The group is interested in learning about conservation management strategies at Rio Mora National Wildlife Refuge. See Refuges. (R2 – Southwest Region)

Nov 2 – FWS SW Regional Director Amy Lueders meet and greet call with Rep Vela (D Texas 34) (R2 – Southwest Region)

Nov 4 – FWS setting up a booth at the White Mountain Apache Tribe's Wildlife Fair at the Hon-Dah Conference Center east of Pinetop, Arizona. (R2 – Southwest Region)

Nov 5 – FWS hosts Birding Festival at Las Vegas National Wildlife Refuge, New Mexico (R2 – Southwest Region)

Nov 6 – FWS joins Rogers State University and The Conservation Fund at a dedication ceremony for the RSU Scientific Field Research Station. See details in ES items of note. (R2 – Southwest Region)

Nov 6 – Trustees (including DOI) holding public meeting on draft Restoration Plan and EA for Chevron Mining Inc. Questa Mine in Northern New Mexico. See ES Items of Note. (R2 – Southwest Region)

Nov 7 to 9 – FWS participating in the Monarch Joint Venture annual meeting in San Antonio, Texas. See ES Items of Note. (R2 – Southwest Region)

Nov 7 to 9 – FWS hosts the second Tribal ESA training event in New Mexico. See Tribal Consultation below. (R2 – Southwest Region)

Nov 11 – FWS host Connecting People with Nature event at Hagerman National Wildlife Refuge in Texas. (R2 – Southwest Region)

Nov 13 – FWS closes solicitation for bids regarding the design of a visitor center at Valle de Oro National Wildlife Refuge. See Refuges. (R2 – Southwest Region)

Nov 13 to 18 – FWS participating in the Department of Interior's Inland Oil Spill Response Training Course. See details in ES Items of Note. (R2-Southwest Region)

Nov 14&15 – FWS Southwest Regional Director travels to Texas and provides opening remarks at Texas Freshwater Mussel Conservation and Stakeholder Summit in Austin, Texas (R2 – Southwest Region)

Nov 16 – FWS meeting with Leander School District in Texas. See ES Items of Note. (R2 – Southwest Region)

Hot Topics - Week Ahead Announcements and Actions
See ESA actions below

Upcoming Workshops & Meetings
November and December – Meet and Greet meetings and introductory phone calls continue between incoming Regional Director and Members of the Congressional Delegation within the Southwest Region. (R2 – Southwest Region)

Nov 29 – FWS and Forest Service meeting on November 29, in Cloudcroft, New Mexico with private allottee and DC staffer from Rep Pearce's Office. Discussions to include development of a framework to address long-term land management practices that will benefit the New Mexico Meadow jumping mouse while meeting the needs of the allottee. (R2 – Southwest Region)

Endangered Species Act Recovery Actions
UPDATED: As early as December 20, FWS will publish a 12-month finding on the listing status of the southwestern willow flycatcher. Pacific Legal Foundation petitioned FWS to delist the flycatcher and in March 2016, we published a 90-day finding that the petition included substantial information, primarily regarding the subspecies' taxonomy. Upon robust consideration of the petition and the flycatchers' classification, FWS is completing a 12-month finding that delisting of the southwestern willow flycatcher is not warranted. Outreach is being planned – including a news release and Congressional notifications via email. Interest expected to be moderate. No controversy anticipated. (R2 – Southwest Region)

REPEAT: American Burying Beetle Species Status Assessment and 12-month finding – FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed prior to the issuance of a 12-month finding which is expected to occur this winter (2018). In June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current

ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

Endangered Species Act Listing Actions

REPEAT: FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed by the end of the calendar year. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. USGS, through its Open File Report (OFR), made available the population model it prepared for FWS. The population model represents one component of the SSA and will be considered alongside of all other available information. On August 25, the draft SSA report was sent to an external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) that FWS has been coordinating with throughout development of the SSA. On August 29, the draft report was sent out for external, independent scientific peer review through a third-party contractor. FWS received comments from the working group and peer reviewers. FWS technical staff are currently working to review, organize, and respond to more than 400 comments. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the States, and others to plan a face-to-face coordination meeting. A follow up meeting between the Congressman and FWS Acting Director Greg Sheehan on Oct. 26. FWS responded to follow up questions related to the cost of administering existing Candidate Conservation Agreement with Assurances (CCAA)(R2 Southwest Region & R6 Mountain-Prairie Region)

Other Ecological Services Items of Note

NEW: The Department of the Interior, Office of Policy and Environmental Compliance is sponsoring the Inland Oil Spill Response Training Course in Albuquerque, New Mexico, November 13 – 18, 2017. The FWS Southwest Region will assist with presentations. The purpose of the training course is to prepare DOI agencies to plan and respond to inland oil spills. Participants include DOI, FWS, state and tribal. (R2 – Southwest Region)

UPDATED: Mussel 101 briefing –FWS co-hosted with Texas Parks and Wildlife Department and the Texas Comptroller's office, a Central Texas Mussel 101 Congressional briefing for District staffers. The briefing took place on November 1, at the Texas Comptroller's office in Austin, Texas. Staffers from Senators Cornyn and Cruz as well as Rep. Hurd's Office attended. After the briefing there were discussions about setting up a site visits this spring to one of the hatcheries working propagation or one of the streams/rivers where research is taking place. (R2 – Southwest Region)

UPDATED: Mexican Wolf Recovery Plan, First Revision – By the end of November, FWS plans to complete the final plan. The comment period for the draft revision of the Mexican Wolf Recovery Plan closed August 29, 2017. FWS received more than 101,009 comments (this number includes signed petitions). On August 23, the New Mexico State Game Commission (NMSGC) voted to support the recovery plan (6 to 1). The Arizona Game and Fish Department

and New Mexico Department of Game and Fish are seeking clarification on the role the States will play in recovery and release of wolves. FWS met with the Chairman of the New Mexico State Game Commission and the Director of New Mexico Department of Game and Fish on September 7, to discuss moving forward with Mexican wolf recovery, including releases of Mexican wolves in New Mexico. The State is considering rejoining as a partner agency in Mexican wolf recovery. The Chairman requested a presentation to the Commission on permits for importation and release of Mexican wolves on December 20, 2017. Due to the high level of visibility and controversy on Mexican wolf recovery in general, extensive outreach is on-going, including personal phone calls, email reminders and updated web postings. Wolf update briefings include the following: the FWS SW Regional Director had government-government consultation with the White Mountain Apache Tribe in Arizona on October 18. The Regional Director, ARD-ES, and Mexican Wolf Recovery Coordinator briefed the Department on the Mexican Wolf Recovery Plan on October 30. Additionally, the FWS SW Regional Director convened a conference call with the Mexican Wolf Tribal Working Group on October 30, to discuss the Mexican Wolf Recovery Plan and made calls to Chairmen and Governors of Tribes and Pueblos most affected by Mexican Wolf Recovery on October 31. Additional follow up briefings with Members are being planned in mid-November. FWS is under a Court settlement agreement to complete the final plan by the end of November 2017. (R2 – Southwest Region)

UPDATED: Leander Independent School District (LISD) ITP – FWS will announce in the Federal Register a Notice of Intent to prepare a draft National Environmental Policy Act (NEPA) Environmental Assessment on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. LISD submitted a draft habitat conservation plan and incidental take permit (ITP). The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties. A follow up meeting with the applicant occurred on October 3. FWS also met with the landowners on Oct. 26. FWS is in the process of working with landowners to arrange a site visit to the properties identified in the application with all interested parties in the near future. The next meeting with the applicant and FWS is planned to occur on Nov. 16. The applicant may invite Congressional staffers to the meeting. Local interest anticipated. It has significant Congressional interest, as well as strong opposition from other parties. In support, DOI received a Congressional Inquiry dated June 16 from Texas Representatives McCaul, Carter, Flores, Smith and Williams and a September 25, letter from Senators Cornyn and Cruz. Congressional briefings are being proposed. Additional outreach, including issuing a news bulletin, will occur at time of publication in the Federal Register. (R2 – Southwest Region)

UPDATED: In mid-November – FWS anticipates publishing a notice announcing the receipt of application and consideration of an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake. Outreach will consist of notifying stakeholders. (R2-Southwest Region)

UPDATED: Bone Cave Harvestman Species Status Assessment – FWS Austin Ecological Services Office completed a draft species status assessment for the Bone Cave harvestman. The

assessment was sent out for external, independent scientific peer review in late September, comments were due back to FWS on October 27, 2017. Concurrently with peer review of the species status assessment, FWS will host representatives from the City of Austin, Texas Parks and Wildlife Department, Travis County, and Williamson County to detail the methodology used to analyze ecological conditions at sites occupied by the Bone Cave harvestman. Comments and information provided by the peer review and site analysis meeting will be incorporated into the species status assessment. The final species status assessment will inform a 5-year review to be completed for the Bone Cave harvestman in fiscal year 2018. (R2-Southwest Region)

REPEAT: Dedication of Research Station at Rogers State University (Oklahoma) - FWS will join Rogers State University and The Conservation Fund for a dedication ceremony for the RSU Scientific Field Research Station on November 6. FWS and Rogers State University collaborated on the creation of the long-term scientific research station for the university. The Scientific Field Research Station mission is to collect and share the scientific knowledge needed to make significant contributions to our understanding of, and to protect the native upland/wetland woodlands of northeastern Oklahoma. The dedication ceremony will be held at the RSU Scientific Field Research Station. Media is invited. (R2 – Southwest Region)

REPEAT: The New Mexico Office of Natural Resources Trustee (ONRT), the Department of Agriculture (represented by the Forest Service), and the Department of the Interior (represented by FWS and Bureau of Land Management), (collectively, the "Trustees") finalized the Draft Restoration Plan and Environmental Assessment for the Chevron Mining Inc, Questa Mine in northern New Mexico. The Trustees will host a public meeting on November 6, to answer questions regarding the document. The Site is located five miles east of the town of Questa, adjacent to the Red River and also includes mine tailing ponds located approximately nine miles west of the mine. The Site is the location of a large groundwater contamination that will require treatment in perpetuity to mitigate human health risks. That treatment will use natural resource damages settlement funds ($4,000,000) for the restoration, rehabilitation, replacement, or acquisition of equivalent natural resources and services that were injured by the release of hazardous substances from the Site. (R2 Southwest Region)

REPEAT: FWS, Coronado National Forest (CNF), Arizona Game and Fish Department, and the Phoenix Zoo conducted an annual census of the Mount Graham red squirrel (MGRS) and their winter-store food caches (called middens) September 18-20. Results estimate only 35 squirrels survived the now-extinguished Frye Fire that began earlier this summer. The MGRS occurs only on (is endemic to) Mt. Graham in the Pinaleño Mountains, CNF, in southeastern Arizona. The MGRS population was estimated to be only 252 animals in Fall 2016. The Frye Fire encompassed approximately 48,443 acres of the Pinaleño Mountains, and included an estimated 78% of the MGRS's occupied range within its perimeter, with another 18% within the 2004 Nuttall-Gibson Fire perimeter. Portions of the MGRS's habitat were destroyed by high-severity burn, although even in areas of low- to moderate-severity burn, some middens were partially or completely destroyed. The Forest Service is developing a Biological Assessment of their fire response efforts to conduct an emergency section 7 consultation. MGRS experts and partners are working together to determine the path forward. Significant resources will likely be required to move forward with the subspecies' conservation and recovery. A joint news release (USDA Forest Service, Arizona Game and Fish Department, Phoenix Zoo, and FWS) on the census

results was issued Oct 17. Following extensive news coverage, Senator McCain's Office contacted FWS expressing interest in finding ways to support recovery of this species on Oct 22, and is expected to send a letter seeking options to expand the captive breeding program. (Information submitted in previous reports.) (R2 – Southwest Region)

REPEAT: Texas Freshwater Mussel Conservation and Stakeholder Summit in Austin, Texas, Nov 14-15 – The purpose of the summit is to create a forum for sharing information on current mussel science and conservation programs throughout the nation. The symposium will bring together scientists and other professionals with expertise in mussel science and in the design and implementation of mussel conservation programs along with other stakeholders and interested parties. FWS is currently evaluating the status of four species of freshwater mussels in Texas, and will evaluate the status of another seven species over the next five years. Hosted by FWS, in partnership with Texas Parks and Wildlife Department and the Texas Comptroller's Office, the summit will be held in Austin, Texas. FWS Southwest Regional Director will provide opening remarks. The following organizations will have guest speakers at the Summit: Ecological Specialists, Inc., O'Fallon, Missouri, EnviroScience, Inc., Nashville, Tennessee, Miami University, Oxford, Ohio, Texas Parks and Wildlife Department, Texas State University, San Marcos, Texas, Alabama Biodiversity Center Director, Marion, Alabama, Iowa State University, Ames, Iowa, Austin Water Environmental & Regulatory Services, City of Austin, Texas, North Carolina State University, Raleigh, North Carolina, Texas A&M University, Dallas, Texas, Auburn University, Auburn, Alabama, San Antonio River Authority, San Antonio, Texas, Texas Commission on Environmental Quality, Austin, Texas, University of Oklahoma, Norman, Oklahoma, U.S. Geological Survey, Kearneysville, West Virginia, and the Natural Resources Conservation Service, Temple, Texas, as well as private landowners. (R2 – Southwest Region)

REPEAT: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review by the end of the year. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in December 2017. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2-Southwest)

REPEAT: FWS participating in the Texas Monarch Summit. Taking place November 1-2, this event will serve as a technical working meeting to develop quantitative goals for monarch conservation across the state. Participation is by invitation only. FWS participants include Katie Boyer (on the planning committee), Cyndee Watson (Texas PFW Program Coordinator), Chris Best (Texas State Botanist), and Leah Murray (SMARC Botanist). (R2 – Southwest Region)

REPEAT: Monarch Joint Venture annual meeting takes place November 7-9, in San Antonio, Texas on the UT-San Antonio campus. These meetings provide an opportunity for all Monarch Joint Venture partners to collaborate on the annual Monarch Conservation Implementation Plan which guides national and international priorities. (All FWS)

REPEAT: FWS will join the Southern Core States for the monarch meeting taking place in Oklahoma City November 29 and December 1. This is a ~12 person working meeting with representatives from the state fish and game agencies to develop similar quantitative goals for the entire southern core geography. Kelly Meyers and Katie Boyer are the FWS representatives attending this meeting. (All FWS)

National Wildlife Refuge Actions

NEW: FWS McFaddin Beach and Dune Restoration Awarded $15.8 Million – Deepwater Horizon coastal habitat restoration efforts are accelerating in Jefferson County, Texas. The Texas Trustee Implementation Group in charge of Deepwater Horizon coastal restoration formally adopted its first plan for allocating Natural Resource Damages Act funds to restore natural resources injured by the 2010 oil spill. The plan contains a $15.8 million grant for the McFaddin Beach and Dune restoration along Jefferson County's Gulf of Mexico coast. The Texas TIG's Final 2017 Restoration Plan/Environmental Assessment evaluated more than 800 project ideas from the public, state and federal agencies, and stakeholders. From this range of restoration alternatives the Texas TIG selected 13 projects for implementation. The total estimated cost of all 13 projects is $45,761,000. Two phases of the Salt Bayou project are already completed with the Keith Lake Fish Pass underwater barrier and a beach berm located behind the McFaddin Beach all the way into Chambers County. A third phase involving construction of two fresh water siphons under the Gulf Intracoastal Waterway is in the preconstruction phase with nearly all needed funds identified. This year, the Texas General Land Office and FWS built over three miles of the McFaddin Beach and Dune system. The Texas TIG's new grant award is expected to help toward completing the entire 20 miles which is the vital last phase in the Salt Bayou Project. More information on the Texas TIG funding announcement is available at: http://www.gulfspillrestoration.noaa.gov/2017/10/texas-trustee-implementation-group-releases-first-restoration-plan (R2 – Southwest Region)

NEW: FWS Valle de Oro National Wildlife Refuge EA is complete – The final Environmental Assessment for the FWS Valle de Oro National Wildlife Refuge was released to the cooperating agencies and public on October 26. FWS is now in the process of seeking bids for the design build of visitor center for the urban refuge. Solicitation of bids closes November 13. More information can be found at:
https://www.fws.gov/refuge/Valle_de_Oro/Environmental_Assessment.html
(R2 – Southwest Region)

NEW: Virtually Wild! Program Provides Nature Therapy to Brave Children Undergoing Treatment – Through the Houston Urban Partnership, FWS is bringing the healing powers found in nature indoors. Two *Virtually Wild!* events are planned specially for brave youth undergoing treatment at the UT MD Anderson Cancer Center and the Texas Medical Center. FWS and partners will host virtual experiences to introduce the youth to pollinators, and enable them to experience an urban prairie (surrounded by high rises). Not only does this program provide healing benefits, it shares teachable moments on the importance of the species and their habitats. As part of the program, a biologist from the Katy Prairie Conservancy will bring a live monarch, caterpillar and chrysalis. The program is geared to meet TEKS requirements and in addition to the Treatment centers, it is shared with students throughout the Houston area. Last year, more

than 1,000 students enjoyed experiencing the *Virtually Wild!* Program. The partnership hosts one conservation-related program a month during the school year. Programs are held on a refuge or partner lands/facilities, such as the Houston Zoo. In December, FWS will host another Virtually Wild program at FWS Attwater Prairie Chicken National Wildlife Refuge. The topic will be fire. Wildland firefighters will share with students the importance of fire to managing prairie for endangered and protected species, as well as discussing firefighting as a career opportunity. The Houston Urban Partnership includes the Audubon, NFWF, National Wildlife Refuge Association, The Trust for Public Lands, TTANDEM – Skills+Motion, Soul River Runs Deep. Additional support from Members of the Texas Delegation, City and State agency support, local schools. Check out some of the Houston Urban's videos to learn more: https://www.facebook.com/pg/HoustonWild/videos/

NEW: The Nature Conservancy of Mongolia leadership is visiting the FWS Rio Mora National Wildlife Refuge and Conservation Area. FWS, The Nature Conservancy (U.S.) and the Denver Zoo will host International visitors from The Nature Conservancy of Mongolia at FWS Rio Mora NWR and Conservation Area in New Mexico, Nov 1 through 7. The purpose of the visit is to expose Mongolian decision makers to lands managed for conservation and to share management strategies used in the United States. This group comes from the eastern Mongolia steppes in Toson Hustai Nature Reserve. Learn more at the following websites:

- https://www.nature.org/ourinitiatives/regions/asiaandthepacific/mongolia/index.htm
- https://www.nature.org/ourinitiatives/regions/asiaandthepacific/mongolia/explore/lands/mongolias-amazing-grasslands.xml
- https://www.nature.org/ourinitiatives/regions/asiaandthepacific/mongolia/explore/steppe-ing-out.xml

(R2 – Southwest Region)

NEW: Every year Sandhill Cranes travel thousands of miles as they make their way to Arizona and New Mexico. "Trumpeting" their arrival, the cranes begin to arrive in early October picking out sunny spots to settle in for the winter. The peak times to view the cranes are from mid-November though the end of December. The cranes will begin to leave again in early March. Experienced bird watchers know the best time to see the birds is the first hour after sunrise, as they leave the roost to feed for the morning. The cranes usually return later in the morning (before noon) where they remain for the rest of the day. The birds often fly out again to feed in the afternoon, creating quite an evening show as they return at dusk. In Arizona, the FWS Cibola NWR is currently seeing about 250 sandhill cranes. At this Refuge, FWS staff cut crops (corn) starting the day before Thanksgiving and then every two weeks after that. This draws around 1,750 cranes and about 4,000 geese (Canada, snow, and blue) as well as 10,000 ducks of various species (mostly pintail. mallards, and wigeon). Visitors to the FWS Cibola NWR enjoy the spectacular view the visiting birds make as they take the "goose loop drive." In New Mexico, FWS hosts the Festival of the Cranes annually at the Bosque del Apache National Wildlife Refuge, November 14-19. Learn more about the 30th Annual Festival of the Cranes event at: http://www.friendsofthebosque.org/festival-of-the-cranes.aspx.

UPDATED: Impact of Fever Ticks to Cattle Industry in South Texas – FWS continues to work with Texas Animal Health Commission (TAHC) and U.S. Department of Agriculture-Animal and Plant Health Inspection Service (USDA-APHIS) regarding fever tick treatment at the FWS

Laguna Atascosa National Wildlife Refuge. Currently, FWS has made a decision to move forward with evaluating, through the NEPA process, the best mechanism for chemically treating white-tailed deer on Laguna Atascosa NWR. This will include mitigation measures to reduce impacts to non-target species, such as the Texas tortoise. The FWS is committed to continuing discussions and proactive actions in cooperation with the USDA-APHIS, the Texas Animal Health Commission, private ranchers and others to aid in the battle to combat the fever tick. The fever tick can be spread by cattle, deer, and nilgai, an exotic Asian antelope that was introduced by private landowners in South Texas for hunting. The FWS Laguna Atascosa NWR remains under temporary quarantine at this time. The FWS Laguna Atascosa NWR has invested significant time and resources to support USDA-APHIS/TAHC in fever tick control efforts including nilgai reductions, increased bag limits for white-tailed deer, and prescribed fire. Additionally, FWS, in consultation with the USDA-APHIS, issued a biological opinion (BO) in January 2016 for use of Ivermectin-laced corn on private lands. The BO discusses potential effects to ocelots, jaguarundis, and aplomado falcons from use of Ivermectin-laced corn in deer feeders to treat ticks on deer on private property. Local media interest remains high. High Congressional interest from Senator Cornyn (R TX), Rep. Conaway, Rep. Vela (D TX Dist. 34), and the House Agriculture Committee. Members have requested periodic updates. Congressional updates planned (Background previously reported in August 2016 and earlier.) Senator Cruz contacted FWS regarding the fever tick in October and was provided a briefing update. FWS SW Regional Director will participate in the call, along with FWS Acting Director Sheehan. On November 1, FWS learned that of another Congressional letter from Representatives Gonzalez (D Texas 15) and Arrington (R Texas 19) to the Department seeking assistance in combating the spread of fever ticks on FWS managed lands. This letter has renewed media interest. (R2 – Southwest Region)

REPEAT: FWS Southwest Region Celebrates Refuge Week. See table at end of document with a list of upcoming public events. (R2 – Southwest Region)

Border-Related Activities

REPEAT: Jan 2018 - Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require transporting water from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade / replace pump and water delivery components to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Road Construction - On March 20, FWS was contacted by the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to coordinate an upcoming road construction project for a 5.9-mile portion of the Presumido Canyon Road through the Baboquivari Mountains, scheduled to begin in January 2018. The project will require water for the construction, and U.S. Customs and Border

Protection (CBP) will perform maintenance of an FWS pump and water well in return for increased use of the FWS-owned well. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Communication Towers - On April 18, FWS and U.S. Customs and Border Protection (CBP) discussed advance planning for Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge would be affected, with the goal of upgrading technology and providing a more robust foundation – all within the original impact areas. Work is proposed to begin in January 2018 dependent upon completion of planning, engineering, and permitting. Follow-up conversations with FWS have occurred to determine the necessary special use permitting process. (R2 – Southwest Region)

Fish and Aquatic Conservation

UPDATED: The City of Bullhead, Arizona, along the Colorado River is experiencing a large influx of immerging caddisflies. City leaders and property owners are vocally campaigning to increase the stocking of the recreational rainbow trout fishery to help consume the flies. Following a three year closure of the Willow Beach National Fish Hatchery, this year's stocking has resumed. These waters also support endangered bonytail chub and razorback suckers. They too consume caddisflies. FWS is in discussions with local officials and coordinating with Arizona Game and Fish Department. The city is planning to hold a public meeting on this issue Nov 1. Subject is locally contentious and is gaining media interest. (R2 – Southwest Region)

UPDATED: FWS Willow Beach National Fish Hatchery, in partnership with Arizona Game and Fish Department, announced the beginning of the annual rainbow trout sportfish stocking season in the lower Colorado River immediately below Lake Mohave/Davis Dam in late October. Neighboring communities include Laughlin, Nevada and Bullhead City, Arizona. FWS will stock about 1, 750 trout every week from early October through March 2018. Stocking sites include Davis Camp, Community Park, and Rotary Park for October-December. From January 2018 through March 2018, stocking sites will be Davis Camp and Community Park. In addition to the annual stocking season below Davis Dam, FWS Willow Beach NFH continues to stock rainbow every week, year round, at Willow Beach Marina, Arizona. (R2 – Southwest Region)

Tribal Consultation

NEW: FWS Southwest Regional Director participated in government-government consultation with the White Mountain Apache Tribe on the Mexican wolf and several other species on October 18. On October 30, the FWS SW Regional Director convened a call with the Mexican Wolf Tribal Working Group to discuss Tribal perspectives on Mexican wolf recovery. The FWS SW Regional Director also contacted the Chairmen and Governors of Tribes and Pueblos most

affected by Mexican Wolf Recovery on October 31 to discuss concerns, process and communication needs. (R2 – Southwest Region)

REPEAT: FWS and the White Mountain Apache Tribe successfully transferred 100 wild Apache trout to a holding facility at the Williams Creek Hatchery. Recently those wild fish being held in captivity are starting to feed on a mixed diet of live feed and commercial fish feed. The intent of this endeavor is to improve the genetics of the East Fork Whiteriver Apache trout broodstock being held at FWS Williams Creek National Fish Hatchery. The last time wild fish were brought onto this station from the East Fork drainage was in 1983 and 1984, when the Apache trout broodstock program originated. (R2 – Southwest Region)

REPEAT: The Inter Tribal Council of Arizona is planning a December 1 meeting and is interested in discussing the revised Native American Policy and implementation in the Southwest Region. Location in Arizona TBD. (R2 – Southwest Region)

REPEAT: Inter-Tribal ESA Training - FWS hosted the first of two Tribal Wildlife ESA training events to be offered in the Southwest Region in Arizona (October 3-5). The second ESA training event will occur in New Mexico (November 7-9). These Tribal training events include aspects of all FWS Divisions, including the Endangered Species Act, with a portion of the summit devoted to law enforcement training to assist Tribal Game Wardens and other Tribal agents. International Game Warden magazine, Spring 2017, published a story on the FWS law enforcement training for Native American conservation officers. (R2 – Southwest Region)

UPDATED: FWS and the Gila River Indian Community (GRIC) hosted a workshop for tribes on pollinators and monarch butterflies at the GRIC's Huhugam Heritage Center, Chandler, Arizona (Southeast of Phoenix) on October 31 and November 1, 2017. On day two, there was a hands-on planting of monarch and pollinator plants in a pollinator garden. (R2 – Southwest Region)

Upcoming public events in the Southwest			
Birding Festival	November 05, 2017 (Sunday)	Las Vegas NWR, New Mexico	View Details
Connecting People with Nature	November 11, 2017 (Saturday)	Hagerman NWR, Texas	View Details
Birding Event - Festival of the Cranes	November 14-19, 2017	Bosque del Apache NWR, New Mexico	View Details

Date:	Thursday, November 9, 2017 6:12:36 AM
Attachments:	FWS R2 Weekly Report FishBites 24Nov2017.docx

Attached is the Southwest Region's contribution for the Department's Weekly Report.

Also in the attachment are suggestions for FishBites along with recent significant media contacts.

We are excited about a number of happenings and accomplishments highlighted in this week's report including the increased number of California Condors and a recent Urban Partnership recognition (LGRV Learning Landscapes) and much more.

Please let me know if you have any questions or need additional information.

Best,
Chris

U.S. Fish and Wildlife Service
Through November 24, 2017

FishBites Report

Condor Numbers on the Rise – Four More Birds Recently Released

- **Topic:** On November 3, four more young condors were released into the wild in northern Arizona (Vermilion Cliffs). This follows the public release of three condors on September 30. The three initial birds are doing well and have successfully integrated into the flock, perfecting the art of flight, feeding and roosting. These two recent releases bring the southwest population to 82 birds. (See Items of Note for details on first release.)
- **Supportive Stakeholders:** The Peregrine Fund, FWS, BLM, NPS and Arizona Game and Fish Department, Arizona Delegation (Senator McCain)
- **Impacted Location:** Northern Arizona and Southern Utah

FWS Salt Plains National Wildlife Refuge Home to Abundant Wildlife is Also Popular Hunting Site in Oklahoma

- **Topic:** Established in 1930, the 32,197-acre FWS Salt Plains National Wildlife Refuge is said to contain the largest saline flat in the central lowlands of North America. Found nowhere else for hundreds of miles around, the salt plains provide essential shelter, foraging, and breeding habitat attracting multitudes of migrating waterfowl, breeding birds, and big game such as bison and deer. In addition to the salt flats, the refuge's grasslands and woodlands produce an extremely productive environment where white-tailed deer and other wildlife thrive. Today, this unique assemblage of habitat is one of the most important colonial nesting bird areas in the State of Oklahoma. The abundance of wildlife found on the Refuge also makes it a popular place to hunt. Deer hunts at the FWS Salt Plains NWR remain one of the top 3-5 applied for hunts within Oklahoma, with more than 7,000 applicants last year. This Fall FWS is hosting five controlled hunts on the refuge for white-tailed deer. Twenty-three youth, accompanied by a mentor, will participate in the first November hunt. This will be followed by a primitive firearms (muzzleloader) hunt with 32 hunters and one non-ambulatory hunter. The next two November hunts are rifle, with 67 hunters and four non-ambulatory hunters signed up. The fifth hunt is an archery hunt in early December, with 28 hunters. Success across the board for all of the refuge hunts typically runs about 50 percent. All hunts are conducted in cooperation with the Oklahoma Department of Wildlife Conservation.
- **Supportive Stakeholders:** Oklahoma Department of Wildlife Conservation, Hunting Community, and others
- **Impacted Location:** Oklahoma

FWS Looking Across Programs for Ways to Expand Hunting Opportunities in Oklahoma

- **Topic:** FWS is in the process of looking at options to expand hunting on National Wildlife Refuge and other lands in Oklahoma. This includes completing consultations for threatened and endangered species to promote habitat management and hunting and fishing activities both within the agency and externally (formal). FWS' American burying beetle (ABB) conservation strategy for the establishment, management, and operations of mitigation lands (conservation banks) allows for hunting, fishing and other recreational

activities, provided these activities do not negatively impact habitat areas. Actions like prescribed burning enhance habitat for ABBs and other wildlife and can be addressed through consultations. With this consideration, FWS issued a programmatic Biological Opinion covering wildlife habitat management on Corps of Engineers managed lands and Wildlife Management Areas, enabling wildlife habitat improvements that enhance management for game species and hunting opportunities. FWS is also consulting on wetland restoration actions for the Grand River Dam Authority's Federal Energy Regulatory Commission licensed Pensacola Project. This mitigation is anticipated to restore and enhance 550 acres of wetland and riparian habitat that will be open for fishing and hunting in Oklahoma.

- **Supportive Stakeholders:** Oklahoma Department of Wildlife Conservation, Hunting Community, Corps of Engineers, Grand River Dam Authority, outdoor recreationists and others
- **Impacted Location:** Oklahoma – Refuges and other lands

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
Arizona Republic Desert Sun Border Wall	Nov 1	FWS not contacted for interview. Title of news coverage: "The government asked citizens which laws it should 'deviate from' for Trump's border wall" http://www.desertsun.com/story/news/politics/immigration/2017/11/01/government-asked-citizens-which-laws-should-deviate-from-trumps-border-wall/770499001/
High Country News Villages at Vigneto	Week of Nov. 13	Inquiry re: Villages at Vigneto ESA Consultation - Reporter (Elizabeth Shogren) contacted FWS to ask if a response to Army Corps of Engineers' determination that the substantial real-estate could proceed without a Clean Water Act permit and ESA consultation was completed. Interview scheduled. HCN submitted a FOIA request for FWS' response letter to ACE. (For summary, see following entry.)
Texas publications LRGV Urban Partnerships	Nov 8 Oct 27	FWS Urban Partner Lower Rio Grande Valley Learning Landscapes event named "Conservation Wrangler" by Texan by Nature – see event under Refuges. Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel

Nov 7 to 9 – FWS participating in the Monarch Joint Venture annual meeting in San Antonio, Texas. See ES Items of Note. (R2 – Southwest Region)

Nov 7 to 9 – FWS hosts the second Tribal ESA training event in New Mexico. See Tribal Consultation below. (R2 – Southwest Region)

Nov 8 – FWS hosts Urban Partnership recognition event for Lower Rio Grande Valley Learning Landscapes at the FWS South Texas National Wildlife Refuge Complex. Former First Lady Laura Bush keynote speaker. See Refuges for details. (R2 – Southwest Region)

Nov 8 – Senator James Lankford's (R Okla) District Staffer, Caleb Cochran, stopped by the FWS Little River National Wildlife River in Oklahoma on November 8. He was visiting the area and wanted to get information (acreage, maps, hunting opportunities, etc.) about the refuge. A future tour of the refuge is tentatively planned. (R2 – Southwest Region)

Nov 11 – FWS host Connecting People with Nature event at Hagerman National Wildlife Refuge in Texas. (R2 – Southwest Region)

Nov 13 – FWS closes solicitation for bids regarding the design of a visitor center at Valle de Oro National Wildlife Refuge. See Refuges. (R2 – Southwest Region)

Nov 13 – FWS Acting Director planning to meet with Texas Oil and Gas Industry regarding the Dunes Sagebrush Lizard Texas Conservation Plan (DTS BP034363)

Nov 13 to 18 – FWS participating in the Department of Interior's Inland Oil Spill Response Training Course. See details in ES Items of Note. (R2-Southwest Region)

Nov 14 &15 – FWS Southwest Regional Director travels to Texas and provides opening remarks at Texas Freshwater Mussel Conservation and Stakeholder Summit in Austin, Texas (R2 – Southwest Region)

Nov 16 – FWS meeting with Leander School District in Texas. See ES Items of Note. (R2 – Southwest Region)

Hot Topics - Week Ahead Announcements and Actions

See ESA actions below

Upcoming Workshops & Meetings

November and December – Meet and Greet meetings and introductory phone calls continue between incoming Regional Director and Members of the Congressional Delegation within the Southwest Region. (R2 – Southwest Region)

By end of Nov – Final Mexican Wolf Recovery Plan, First Revision will be available for public review. See ESA section for details. (R2 – Southwest Region)

Dec (Date TBD) – FWS and Forest Service meeting with private allottee and DC staffer from Rep Pearce's Office in Cloudcroft, New Mexico. See Items of Note for details. (R2 – Southwest Region)

Endangered Species Act Recovery Actions

REPEAT: As early as December 20, FWS will publish a 12-month finding on the listing status of the southwestern willow flycatcher. Pacific Legal Foundation petitioned FWS to delist the flycatcher and in March 2016, we published a 90-day finding that the petition included substantial information, primarily regarding the subspecies' taxonomy. Upon robust consideration of the petition and the flycatchers' classification, FWS is completing a 12-month finding that delisting of the southwestern willow flycatcher is not warranted. Outreach is being planned – including a news release and Congressional notifications via email. Interest expected to be moderate. No controversy anticipated. (R2 – Southwest Region)

REPEAT: American Burying Beetle Species Status Assessment and 12-month finding – FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed prior to the issuance of a 12-month finding which is expected to occur this winter (2018). In June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

Endangered Species Act Listing Actions

UPDATED: FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed by the end of the calendar year. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff are currently working to review, organize, and respond to more than 400 comments received from the external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the States, and others to plan a face-to-face coordination meeting. (R2 Southwest Region & R6 Mountain-Prairie Region)

Other Ecological Services Items of Note

NEW: Western Travis County Public Utility Agency Draft Habitat Conservation Plan – FWS anticipates publishing in the Federal Register a Notice of Availability for the Western Travis County Public Utility Agency's (WTCPUA) Habitat Conservation Plan (DHCP) and their application for an incidental take permit (ITP). WTCPUA is preparing to construct a 2.2 mile secondary water pipeline near its existing water transmission main for redundancy and parallel

capacity. Construction, operations and maintenance of the Raw Water Transmission Main could impact the federally listed endangered golden-cheeked warbler. If approved the term of the dHCP and ITP would be 30 years. A news bulletin will be prepared and shared with local congressionals, partners and media. (R2-Southwest Region)

UPDATED: The FWS and Forest Service meeting with private allottee and DC staffer from Rep Pearce's Office in Cloudcroft, New Mexico (Lincoln National Forest) has been postponed following a recent court decision. The proposed meeting is intended to continue discussions on the development of a framework to address long-term land management practices that will benefit the New Mexico Meadow jumping mouse while meeting the needs of the permittee and the mission of the Forest Service. The meeting is now tentatively proposed to occur in December after the Forest Service participates in a court-ordered conference call with the Sacramento Grazing Association on November 30. The final ruling may potentially influence future FS land management efforts in the Lincoln National Forest and implementation of a recently issued biological opinion. To learn more about the court case (Sacramento Grazing Association, Inc., et al., v The United States (Department of Agriculture - Forest Service)), visit: https://ecf.cofc.uscourts.gov/cgi-bin/show_public_doc?2004cv0786-204-0 (R2 – Southwest Region)

UPDATED: Increased Number of California Condors Soar in the Southwestern Skies – FWS, The Peregrine Fund and cooperating agencies released to the wild two California condors in Vermilion Cliffs National Monument in northern Arizona on September 30, 2017. (A third condor had self-released days earlier after its crate was chewed through by a suspected coyote.) All three birds are reported to be doing well and have successfully integrated into the flock, perfecting the art of flight, feeding and roosting. This was the 21st public release of condors to the wild and despite the fact that it occurs in a remote setting, the release continues to be very popular, with 450 people in attendance. Supporters, partners, and members of the public came from all over to view the impressive sight as the released condors spread their magnificent wings – with a span of 10 feet – and soar through the sky. A series of scopes were set up in key locations to aid in viewing opportunities. On November 3, four more young condors were released into the wild in northern Arizona (Vermilion Cliffs). These two recent releases bring the southwest population to 82 birds (Arizona and Utah). Supportive Stakeholders: Arizona Game and Fish Department, The Peregrine Fund and FWS, the Arizona Delegation (Senator McCain) and others. (R2 – Southwest Region)

UPDATED: Villages at Vigneto Development Endangered Species Act Consultation [Arizona] – FWS Arizona Ecological Services issued a concurrence with the Army Corps of Engineers' determination that the Clean Water Act mitigation parcel for the Villages at Vigneto Development is "not likely to adversely affect" three listed species. Army Corps of Engineers had initiated formal ESA section 7 consultation regarding a planned 12,200-acre, 28,000-home development near the San Pedro River in southern Arizona and a 141-acre off-site mitigation project on the river. The FWS and Corps disagreed on the scope of effects (which the Corps insisted includes only the fill of Waters of the U.S. (WOTUS) and limited indirect impacts at the development site; FWS believed the ESA regulations' require consultation on all areas to be directly and indirectly affected by the action, including interdependent and interrelated actions (including the development's water use)). The applicant (El Dorado Holdings, Inc.) and the

Corps subsequently submitted documentation demonstrating that the Villages at Vigneto can be feasibly developed without affecting WOTUS and that the development will occur even without a Clean Water Act permit. FWS has deferred to the Corps' determination and redirected its consultation to an informal concurrence of effects on the off-site mitigation parcel, WOTUS, and limited, indirectly affected areas. Six plaintiffs have filed still-pending litigation against the Corps on this project/issue. Local and regional media have covered the story and High Country News is investigating; additional national media interest is anticipated. (Updated from previous submission reported the week of September 15) (R2 – Southwest Region)

UPDATED: Dedication of Research Station at Rogers State University (Oklahoma) – On November 6, FWS joined Rogers State University and The Conservation Fund for a dedication ceremony for the RSU Scientific Field Research Station. FWS and Rogers State University collaborated on the creation of the long-term scientific research station for the university. The Scientific Field Research Station's mission is to collect and share the scientific knowledge needed to make significant contributions to our understanding of, and to protect the native upland/wetland woodlands of northeastern Oklahoma. The dedication ceremony was held at the RSU Scientific Field Research Station. Anita Barstow, FWS Biologist and an RSU alumnus, spoke on the positive conservation benefits achieved through partnerships with RSU and The Conservation Fund and others. Also attending the event were Cherokee Nation Councilor Keith Austin, Rogers County Commissioner Ron Burrows, alumni from RSU's environmental conservation program, and nearby landowners. Read more at: http://www.rsu.edu/rsu-partners-dedicate-scientific-research-station/ (R2 – Southwest Region)

UPDATED: The New Mexico Office of Natural Resources Trustee (ONRT), the Department of Agriculture (represented by the Forest Service), and the Department of the Interior (represented by FWS and Bureau of Land Management), (collectively, the "Trustees") finalized the Draft Restoration Plan and Environmental Assessment for the Chevron Mining Inc, Questa Mine in northern New Mexico. The Trustees are planning to hold a public meeting in late November, to answer questions regarding the document. The Site is located five miles east of the town of Questa, adjacent to the Red River and also includes mine tailing ponds located approximately nine miles west of the mine. The Site is the location of a large groundwater contamination that will require treatment in perpetuity to mitigate human health risks. That treatment will use natural resource damages settlement funds ($4,000,000) for the restoration, rehabilitation, replacement, or acquisition of equivalent natural resources and services that were injured by the release of hazardous substances from the Site. (R2 Southwest Region)

UPDATED: Texas Freshwater Mussel Conservation and Stakeholder Summit in Austin, Texas, Nov 14-15 – Hosted by FWS, in partnership with Texas Parks and Wildlife Department and the Texas Comptroller's Office, the Texas Freshwater Mussel Conservation and Stakeholder Summit will be held in Austin, Texas. The purpose of the summit is to create a forum for sharing information on current mussel science and conservation programs throughout the nation. The symposium will bring together scientists and other professionals with expertise in mussel science and in the design and implementation of mussel conservation programs along with other stakeholders and interested parties. FWS is currently evaluating the status of four species of freshwater mussels in Texas, and will evaluate the status of another seven species over the next five years. FWS Southwest Regional Director will provide opening remarks. The following

organizations will have guest speakers at the Summit: Ecological Specialists, Inc., O'Fallon, Missouri, EnviroScience, Inc., Nashville, Tennessee, Miami University, Oxford, Ohio, Texas Parks and Wildlife Department, Texas State University, San Marcos, Texas, Alabama Biodiversity Center Director, Marion, Alabama, Iowa State University, Ames, Iowa, Austin Water Environmental & Regulatory Services, City of Austin, Texas, North Carolina State University, Raleigh, North Carolina, Texas A&M University, Dallas, Texas, Auburn University, Auburn, Alabama, San Antonio River Authority, San Antonio, Texas, Texas Commission on Environmental Quality, Austin, Texas, University of Oklahoma, Norman, Oklahoma, U.S. Geological Survey, Kearneysville, West Virginia, and the Natural Resources Conservation Service, Temple, Texas, as well as private landowners. (R2 – Southwest Region)

UPDATED: In mid-November – FWS anticipates publishing a notice announcing the receipt of application and consideration of an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake. Outreach will consist of notifying stakeholders, including tribes. (R2-Southwest Region)

REPEAT: The Department of the Interior, Office of Policy and Environmental Compliance is sponsoring the Inland Oil Spill Response Training Course in Albuquerque, New Mexico, November 13 – 18, 2017. The FWS Southwest Region will assist with presentations. The purpose of the training course is to prepare DOI agencies to plan and respond to inland oil spills. Participants include DOI, FWS, state and tribal. (R2 – Southwest Region)

REPEAT: Mexican Wolf Recovery Plan, First Revision – By the end of November, FWS plans to complete the final plan. The comment period for the draft revision of the Mexican Wolf Recovery Plan closed August 29, 2017. FWS received more than 101,009 comments (this number includes signed petitions). On August 23, the New Mexico State Game Commission (NMSGC) voted to support the recovery plan (6 to 1). The Arizona Game and Fish Department and New Mexico Department of Game and Fish are seeking clarification on the role the States will play in recovery and release of wolves. FWS met with the Chairman of the New Mexico State Game Commission and the Director of New Mexico Department of Game and Fish on September 7, to discuss moving forward with Mexican wolf recovery, including releases of Mexican wolves in New Mexico. The State is considering rejoining as a partner agency in Mexican wolf recovery. The Chairman requested a presentation to the Commission on permits for importation and release of Mexican wolves on December 20, 2017. Due to the high level of visibility and controversy on Mexican wolf recovery in general, extensive outreach is on-going, including personal phone calls, email reminders and updated web postings. Wolf update briefings include the following: the FWS SW Regional Director had government-government consultation with the White Mountain Apache Tribe in Arizona on October 18. The Regional Director, ARD-ES, and Mexican Wolf Recovery Coordinator briefed the Department on the Mexican Wolf Recovery Plan on October 30. Additionally, the FWS SW Regional Director convened a conference call with the Mexican Wolf Tribal Working Group on October 30, to discuss the Mexican Wolf Recovery Plan and made calls to Chairmen and Governors of Tribes and Pueblos most affected by Mexican Wolf Recovery on October 31. Additional follow up briefings with Members are being planned in mid-November. FWS is under a Court settlement agreement to complete the final plan by the end of November 2017. (R2 – Southwest Region)

REPEAT: Leander Independent School District (LISD) ITP – FWS will announce in the Federal Register a Notice of Intent to prepare a draft National Environmental Policy Act (NEPA) Environmental Assessment on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. LISD submitted a draft habitat conservation plan and incidental take permit (ITP). The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties. A follow up meeting with the applicant occurred on October 3. FWS also met with the landowners on Oct. 26. FWS is in the process of working with landowners to arrange a site visit to the properties identified in the application with all interested parties in the near future. The next meeting with the applicant and FWS is planned to occur on Nov. 16. The applicant may invite Congressional staffers to the meeting. Local interest anticipated. It has significant Congressional interest, as well as strong opposition from other parties. In support, DOI received a Congressional Inquiry dated June 16 from Texas Representatives McCaul, Carter, Flores, Smith and Williams and a September 25, letter from Senators Cornyn and Cruz. Congressional briefings are being proposed. Additional outreach, including issuing a news bulletin, will occur at time of publication in the Federal Register. (R2 – Southwest Region)

REPEAT: Bone Cave Harvestman Species Status Assessment – FWS Austin Ecological Services Office completed a draft species status assessment for the Bone Cave harvestman. The assessment was sent out for external, independent scientific peer review in late September, comments were due back to FWS on October 27, 2017. Concurrently with peer review of the species status assessment, FWS will host representatives from the City of Austin, Texas Parks and Wildlife Department, Travis County, and Williamson County to detail the methodology used to analyze ecological conditions at sites occupied by the Bone Cave harvestman. Comments and information provided by the peer review and site analysis meeting will be incorporated into the species status assessment. The final species status assessment will inform a 5-year review to be completed for the Bone Cave harvestman in fiscal year 2018. (R2-Southwest Region)

REPEAT: FWS, Coronado National Forest (CNF), Arizona Game and Fish Department, and the Phoenix Zoo conducted an annual census of the Mount Graham red squirrel (MGRS) and their winter-store food caches (called middens) September 18-20. Results estimate only 35 squirrels survived the now-extinguished Frye Fire that began earlier this summer. The MGRS occurs only on (is endemic to) Mt. Graham in the Pinaleño Mountains, CNF, in southeastern Arizona. The MGRS population was estimated to be only 252 animals in Fall 2016. The Frye Fire encompassed approximately 48,443 acres of the Pinaleño Mountains, and included an estimated 78% of the MGRS's occupied range within its perimeter, with another 18% within the 2004 Nuttall-Gibson Fire perimeter. Portions of the MGRS's habitat were destroyed by high-severity burn, although even in areas of low- to moderate-severity burn, some middens were partially or completely destroyed. The Forest Service is developing a Biological Assessment of their fire response efforts to conduct an emergency section 7 consultation. MGRS experts and partners are working together to determine the path forward. Significant resources will likely be required to move forward with the subspecies' conservation and recovery. A joint news release (USDA Forest Service, Arizona Game and Fish Department, Phoenix Zoo, and FWS) on the census

results was issued Oct 17. Following extensive news coverage, Senator McCain's Office contacted FWS expressing interest in finding ways to support recovery of this species and has sent letters to FWS and AGFD seeking options to expand the captive breeding program. (Information submitted in previous reports.) (R2 – Southwest Region)

REPEAT: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review by the end of the year. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in December 2017. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2 – Southwest Region)

REPEAT: Monarch Joint Venture annual meeting takes place November 7-9, in San Antonio, Texas on the UT-San Antonio campus. These meetings provide an opportunity for all Monarch Joint Venture partners to collaborate on the annual Monarch Conservation Implementation Plan which guides national and international priorities. (All FWS)

REPEAT: FWS will join the Southern Core States for the monarch meeting taking place in Oklahoma City November 29 and December 1. This is a ~12 person working meeting with representatives from the state fish and game agencies to develop similar quantitative goals for the entire southern core geography. Kelly Meyers and Katie Boyer are the FWS representatives attending this meeting. (All FWS)

National Wildlife Refuge Actions

NEW: FWS Urban Partner named "Conservation Wrangler" on Nov 8. FWS hosts a Lower Rio Grande Valley Learning Landscapes event at the South Texas National Wildlife Refuge Complex to recognize one of FWS' Urban Refuge partner and the Lower Rio Grande Valley Learning Landscapes project (PSJA School District). The LRGV Learning Landscapes project is a collaborative effort to inspire a deep appreciation of the natural resources of the LRGV, and to incite cultural pride in the many natural wonders of the Lower Rio Grande Valley (LRGV) for local youth and members of the community. Texan by Nature, a new partner, announced the PSJA school district as a new "Conservation Wrangler" for its district-wide efforts to not only preserve the natural habitat of the Rio Grande Valley within its campuses and vision for using these areas as outdoor classrooms where students can learn the importance of maintaining the unique ecosystem of the region. LRGV Learning Landscapes is designed to provide hands-on learning experiences and creative instruction, and to restore habitat for native wildlife. Guests at the celebration include former First Lady Laura Bush, representing Texan by Nature and keynote speaker. Amy Lueders Regional Director and Cynthia Martinez are also participating. (R2 – Southwest Region)

NEW: Roadside Work May Impact Visitation – FWS Wichita Mountains Wildlife Refuge is now in the process of removing trees, brush and debris along Highway 49. This work is expected to

conclude on November 17. In order to reduce potential safety hazards associated with the roadside work, the Refuge will intermittently hold traffic and reduce traffic to one-lane flow between 9 a.m. and 4 p.m. daily. The work area is located between the Refuge's east entrance near Medicine Park and the intersection of Highways 115 and 49 near Holy City (Meers T Intersection). Expect intermittent traffic delays are anticipated until work is completed. However, the Refuge will suspend work on weekends and the November 10 Holiday to avoid traffic delays. Maps and additional information on road delays or closures will be available on the Refuge website at www.fws.gov/refuge/wichita_mountains (R2 – Southwest Region)

NEW: Fall Foliage Walks in Oklahoma – FWS Wichita Mountains Wildlife Refuge and the Association of Friends of the Wichitas are planning to host the "Fall Foliage Walks" November 11, 18 and 25. Interpreters take participants for a one mile walk through a forested canyon. Participants will enjoy the chance to view the autumn colors of red, yellow, orange and brown as leaves begin to change with the season. Reservations are required and are taken on a first-come, first-serve basis. Wheelchair access is available. Family event. Open to media. For details, contact the FWS Refuge Visitor Center at (580) 429-2197 (R2 – Southwest Region)

NEW: Stars over the Wichitas – FWS Wichita Mountains Wildlife Refuge invites family and friends to join in an evening with the *stars*. The refuge will be holding "Stars over the Wichitas" interpretive programs November 17 and 18. Guests to the Refuge will be able to study major constellations and other heavenly bodies. Star-gazing is enhanced at the Refuge because of its lack of major light pollution. An interpreter for the Friends of the Wichitas will discuss the history of astronomy, its practical uses and goals, and will help visitors identify images found in the night sky. Visitors may bring their own optics, or view the night skies through a 13" Dobsonian telescope. Reservations are accepted on a first-come, first-served basis. Binoculars and a lawn chair are recommended. The program will be canceled if it is raining or if the sky is overcast. Family-friendly event. Open to the public and the media. Reservations must be made by calling the FWS Refuge Visitor Center at: (580) 429-2197. (R2 – Southwest Region)

UPDATED: Every year Sandhill Cranes travel thousands of miles as they make their way to Arizona and New Mexico. "Trumpeting" their arrival, the cranes begin to arrive in early October picking out sunny spots to settle in for the winter. The peak times to view the cranes are from mid-November though the end of December. The cranes will begin to leave again in early March. Experienced bird watchers know the best time to see the birds is the first hour after sunrise, as they leave the roost to feed for the morning. The cranes usually return later in the morning (before noon) where they remain for the rest of the day. The birds often fly out again to feed in the afternoon, creating quite an evening show as they return at dusk. In Arizona, the FWS Cibola NWR is currently seeing about 250 sandhill cranes. At this Refuge, FWS staff cut crops (corn) starting the day before Thanksgiving and then every two weeks after that. This draws around 1,750 cranes and about 4,000 geese (Canada, snow, and blue) as well as 10,000 ducks of various species (mostly pintail. mallards, and wigeon). Visitors to the FWS Cibola NWR enjoy the spectacular view the visiting birds make as they take the "goose loop drive." In New Mexico, FWS hosts the Festival of the Cranes annually at the Bosque del Apache National Wildlife Refuge, November 14-19. On Nov2, the first fall waterfowl survey was conducted on FWS Bosque NWR, resulting in a count of 1,500 sandhills. Learn more about the 30th Annual Festival of the Cranes event at: http://www.friendsofthebosque.org/festival-of-the-cranes.aspx.

REPEAT: FWS McFaddin Beach and Dune Restoration Awarded $15.8 Million – Deepwater Horizon coastal habitat restoration efforts are accelerating in Jefferson County, Texas. The Texas Trustee Implementation Group in charge of Deepwater Horizon coastal restoration formally adopted its first plan for allocating Natural Resource Damages Act funds to restore natural resources injured by the 2010 oil spill. The plan contains a $15.8 million grant for the McFaddin Beach and Dune restoration along Jefferson County's Gulf of Mexico coast. The Texas TIG's Final 2017 Restoration Plan/Environmental Assessment evaluated more than 800 project ideas from the public, state and federal agencies, and stakeholders. From this range of restoration alternatives the Texas TIG selected 13 projects for implementation. The total estimated cost of all 13 projects is $45,761,000. Two phases of the Salt Bayou project are already completed with the Keith Lake Fish Pass underwater barrier and a beach berm located behind the McFaddin Beach all the way into Chambers County. A third phase involving construction of two fresh water siphons under the Gulf Intracoastal Waterway is in the preconstruction phase with nearly all needed funds identified. This year, the Texas General Land Office and FWS built over three miles of the McFaddin Beach and Dune system. The Texas TIG's new grant award is expected to help toward completing the entire 20 miles which is the vital last phase in the Salt Bayou Project. More information on the Texas TIG funding announcement is available at: http://www.gulfspillrestoration.noaa.gov/2017/10/texas-trustee-implementation-group-releases-first-restoration-plan (R2 – Southwest Region)

REPEAT: FWS Valle de Oro National Wildlife Refuge EA is complete – The final Environmental Assessment for the FWS Valle de Oro National Wildlife Refuge was released to the cooperating agencies and public on October 26. FWS is now in the process of seeking bids for the design build of visitor center for the urban refuge. Solicitation of bids closes November 13. More information can be found at:
https://www.fws.gov/refuge/Valle_de_Oro/Environmental_Assessment.html
(R2 – Southwest Region)

REPEAT: Virtually Wild! Program Provides Nature Therapy to Brave Children Undergoing Treatment – Through the Houston Urban Partnership, FWS is bringing the healing powers found in nature indoors. Two *Virtually Wild!* events are planned specially for brave youth undergoing treatment at the UT MD Anderson Cancer Center and the Texas Medical Center. FWS and partners will host virtual experiences to introduce the youth to pollinators, and enable them to experience an urban prairie (surrounded by high rises). Not only does this program provide healing benefits, it shares teachable moments on the importance of the species and their habitats. As part of the program, a biologist from the Katy Prairie Conservancy will bring a live monarch, caterpillar and chrysalis. The program is geared to meet TEKS requirements and in addition to the Treatment centers, it is shared with students throughout the Houston area. Last year, more than 1,000 students enjoyed experiencing the *Virtually Wild!* Program. The partnership hosts one conservation-related program a month during the school year. Programs are held on a refuge or partner lands/facilities, such as the Houston Zoo. In December, FWS will host another Virtually Wild program at FWS Attwater Prairie Chicken National Wildlife Refuge. The topic will be fire. Wildland firefighters will share with students the importance of fire to managing prairie for endangered and protected species, as well as discussing firefighting as a career opportunity. The Houston Urban Partnership includes the Houston Parks and Recreation, Houston Wilderness,

The Student Conservation Association, Katy Prairie Conservancy and Furr High School. Additional partners include from NFWF, National Wildlife Refuge Association, Audubon, The Trust for Public Lands, TTANDEM – Skills+Motion, Soul River Runs Deep. Members of the Texas Delegation, City and State agency support, local schools also support this urban partnership. Check out some of the Houston Urban's videos to learn more: https://www.facebook.com/pg/HoustonWild/videos/

REPEAT: Impact of Fever Ticks to Cattle Industry in South Texas – FWS continues to work with Texas Animal Health Commission (TAHC) and U.S. Department of Agriculture-Animal and Plant Health Inspection Service (USDA-APHIS) regarding fever tick treatment at the FWS Laguna Atascosa National Wildlife Refuge. Currently, FWS has made a decision to move forward with evaluating, through the NEPA process, the best mechanism for chemically treating white-tailed deer on Laguna Atascosa NWR. This will include mitigation measures to reduce impacts to non-target species, such as the Texas tortoise. The FWS is committed to continuing discussions and proactive actions in cooperation with the USDA-APHIS, the Texas Animal Health Commission, private ranchers and others to aid in the battle to combat the fever tick. The fever tick can be spread by cattle, deer, and nilgai, an exotic Asian antelope that was introduced by private landowners in South Texas for hunting. The FWS Laguna Atascosa NWR remains under temporary quarantine at this time. The FWS Laguna Atascosa NWR has invested significant time and resources to support USDA-APHIS/TAHC in fever tick control efforts including nilgai reductions, increased bag limits for white-tailed deer, and prescribed fire. Additionally, FWS, in consultation with the USDA-APHIS, issued a biological opinion (BO) in January 2016 for use of Ivermectin-laced corn on private lands. The BO discusses potential effects to ocelots, jaguarundis, and aplomado falcons from use of Ivermectin-laced corn in deer feeders to treat ticks on deer on private property. Local media interest remains high. High Congressional interest from Senator Cornyn (R TX), Rep. Conaway, Rep. Vela (D TX Dist. 34), and the House Agriculture Committee. Members have requested periodic updates. Congressional updates planned (Background previously reported in August 2016 and earlier.) Senator Cruz contacted FWS regarding the fever tick in October and was provided a briefing update. FWS SW Regional Director will participate in the call, along with FWS Acting Director Sheehan. On November 1, FWS learned that of another Congressional letter from Representatives Gonzalez (D Texas 15) and Arrington (R Texas 19) to the Department seeking assistance in combating the spread of fever ticks on FWS managed lands. This letter has renewed media interest. (R2 – Southwest Region)

Border-Related Activities

REPEAT: Jan 2018 - Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require transporting water from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade / replace pump and water delivery components to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Road Construction - On March 20, FWS was contacted by the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to coordinate an upcoming road construction project for a 5.9-mile portion of the Presumido Canyon Road through the Baboquivari Mountains, scheduled to begin in January 2018. The project will require water for the construction, and U.S. Customs and Border Protection (CBP) will perform maintenance of an FWS pump and water well in return for increased use of the FWS-owned well. (R2 – Southwest Region)

REPEAT: Jan 2018 - Border Coordination: Communication Towers - On April 18, FWS and U.S. Customs and Border Protection (CBP) discussed advance planning for Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge would be affected, with the goal of upgrading technology and providing a more robust foundation – all within the original impact areas. Work is proposed to begin in January 2018 dependent upon completion of planning, engineering, and permitting. Follow-up conversations with FWS have occurred to determine the necessary special use permitting process. (R2 – Southwest Region)

Fish and Aquatic Conservation

UPDATED: The City of Bullhead, Arizona, along the Colorado River is experiencing a large influx of immerging caddisflies. City leaders and property owners are vocally campaigning to increase the stocking of the recreational rainbow trout fishery to help consume the flies. Following a three year closure of the Willow Beach National Fish Hatchery, this year's stocking has resumed. These waters also support endangered bonytail chub and razorback suckers. They too consume caddisflies. FWS is in discussions with local officials and coordinating with Arizona Game and Fish Department. The city held a public meeting on this issue Nov 1; 200 people, including local and county leaders attended. Subject is locally contentious and continues to hold media interest. (R2 – Southwest Region)

REPEAT: FWS Willow Beach National Fish Hatchery, in partnership with Arizona Game and Fish Department, announced the beginning of the annual rainbow trout sportfish stocking season in the lower Colorado River immediately below Lake Mohave/Davis Dam in late October. Neighboring communities include Laughlin, Nevada and Bullhead City, Arizona. FWS will stock about 1, 750 trout every week from early October through March 2018. Stocking sites include Davis Camp, Community Park, and Rotary Park for October-December. From January 2018 through March 2018, stocking sites will be Davis Camp and Community Park. In addition to the annual stocking season below Davis Dam, FWS Willow Beach NFH continues to stock rainbow every week, year round, at Willow Beach Marina, Arizona. (R2 – Southwest Region)

Migratory Birds

Nothing significant to report.

Science Applications

Nothing significant to report

Wildlife and Sport Fish Restoration

Nothing significant to report

Tribal Consultation

REPEAT: FWS and the White Mountain Apache Tribe successfully transferred 100 wild Apache trout to a holding facility at the Williams Creek Hatchery. Recently those wild fish being held in captivity are starting to feed on a mixed diet of live feed and commercial fish feed. The intent of this endeavor is to improve the genetics of the East Fork Whiteriver Apache trout broodstock being held at FWS Williams Creek National Fish Hatchery. The last time wild fish were brought onto this station from the East Fork drainage was in 1983 and 1984, when the Apache trout broodstock program originated. (R2 – Southwest Region)

REPEAT: The Inter Tribal Council of Arizona is planning a December 1 meeting and is interested in discussing the revised Native American Policy and implementation in the Southwest Region. Location in Arizona TBD. (R2 – Southwest Region)

REPEAT: Inter-Tribal ESA Training - FWS hosted the first of two Tribal Wildlife ESA training events to be offered in the Southwest Region in Arizona (October 3-5). The second ESA training event will occur in New Mexico (November 7-9). These Tribal training events include aspects of all FWS Divisions, including the Endangered Species Act, with a portion of the summit devoted to law enforcement training to assist Tribal Game Wardens and other Tribal agents. International Game Warden magazine, Spring 2017, published a story on the FWS law enforcement training for Native American conservation officers. (R2 – Southwest Region)

Upcoming public events in the Southwest			
Controlled Hunts – youth hunt with mentors	Nov 3-5	Salt Plains NWR, Okla	White-tailed deer in Oklahoma. The first hunt is for 23 youth (with a mentor) November 3-5.
Controlled Hunts – Primitive firearms	Nov 6-8	Salt Plains NWR, Okla	White-tailed deer in Oklahoma. Primitive firearms hunt (muzzleloader) will have 32 hunters and one non-ambulatory hunter.
Controlled Hunts – Rifle Hunt	Nov 13-15	Salt Plains NWR, Okla	White-tailed deer in Oklahoma. The two rifle hunts will have 67 hunters plus four non-ambulatory hunters.
Controlled Hunts – Rifle Hunt	Nov 27-29	Salt Plains NWR, Okla	White-tailed deer in Oklahoma. The two November rifle hunts will have 67 hunters plus four non-ambulatory hunters.
Youth Hunt	Dec 2&3	Buffalo Lake National Wildlife Refuge, Texas	FWS hosts first youth deer hunt on Buffalo Lake National Wildlife Refuge, Texas

Controlled Hunts – Archery Hunt	Dec 4-7	Salt Plains NWR, Okla	White-tailed deer in Oklahoma. The final hunt is an archery hunt held December 4-7 with 28 hunters.

Through December 14, 2017

FishBites Report

Snake Once Thought Lost, Has Been Found

- **Topic:** After a one hundred-year absence, the threatened northern Mexican gartersnake is making an appearance – or reappearance – in Arizona, along the Colorado River! The snake was rediscovered in its historical range in 2015 and seen again more recently. It may well-be the habitat improvements accomplished by the Lower Colorado River Multi-Species Conservation Program (LCR-MSCP) aided in the return of the snake. Beal Lake, Arizona, location of the discovery, is on the FWS Havasu National Wildlife Refuge along the Colorado River. The lake, managed by FWS, is a vital marsh habitat that contributes to the conservation goals of the LCR-MSCP – a river restoration partnership between agencies, water and electricity providers, conservation organizations and tribes. This long-term program created in 2005 is designed to minimize and mitigate potential impacts on 26 fish and wildlife species that may occur from water delivery and power generation along the lower Colorado River. The list of species includes six protected under the Endangered Species Act. (See Items of Note for more info.)
- **Supportive Stakeholders:** Partners, Arizona Tribes, Bureau of Reclamation, Arizona Game and Fish Department and other participants in the LCR-MSCP, including private industry
- **Impacted Location:** Arizona

Man Pays Price for Trafficking Box Turtles to Corpus Christi, Texas

- **Topic:** FWS law enforcement agents successfully conducted an investigation that led to the conviction of a 34-year-old Louisiana man for violating the Lacey Act. During a November 21 hearing, the court heard that in February 2017, Byron Paul Pitre sold and shipped three wild Louisiana box turtles (Terrapene Carolina) to an undercover agent in Corpus Christi, Texas. The sale and transportation of wild box turtles from Louisiana to Texas is illegal under Louisiana state law. In May 2017, agents executed a search warrant at Pitre's residence in Louisiana. At that time, he admitted to obtaining turtles that were unlawfully caught in the wild and selling them to individuals in Texas, Nevada and New Jersey. During the search, agents seized more than 230 box turtles, 119 map turtles, 45 leopard tortoises, 20 Sulcata tortoises and 88 tortoise eggs. Pitre pleaded guilty before Senior U.S. District Judge John D. Rainey. The court then ordered him to serve three years of probation and pay a $2,500 fine. "Our wildlife and environment are a precious natural resource that we need to protect," said Judge Rainey. Read the Department of Justice's news release for details at: https://www.justice.gov/usao-sdtx/pr/man-pays-price-trafficking-box-turtles-corpus-christi
- **Supportive Stakeholders:** Partners, State and Federal wildlife law enforcement agents, Department of Justice, environmental groups and others
- **Impacted Location:** States of Louisiana and Texas

Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel

Dec 1 – FWS Southwest Regional Director to present at Inter Tribal Council of Arizona meeting in Phoenix, Arizona. Council interested in hearing update on the FWS revised Native American Policy and proposed implementation in the Southwest Region.

Dec 1&2 – The Arizona Game and Fish Commission holding a meeting at the AZGFD headquarters at 5000 W. Carefree Highway in Phoenix, Arizona. Open to the public. Meeting can be viewed on a webcast at: https://livestream.com/azgameandfish. Field Supervisor, or Acting, for the FWS Arizona Ecological Services Office will attend the meeting.

Dec 4 – FWS invited to participate in stakeholder meeting hosted by Arizona Department of Environmental Quality to discuss potential state assumption of the Clean Water Act section 404 and its applicability in Arizona. The meeting will be held in Phoenix, Arizona. (R2 – Southwest Region)

Hot Topics - Week Ahead Announcements and Actions

See ESA actions below

Nov 29 – Final Mexican Wolf Recovery Plan, First Revision, published. Advance calls took place Nov. 28. See ESA section for details. (R2 – Southwest Region)

Dec. 2 – HBO news program indicated interest in participating in a Dec. 2 ride-along with a humanitarian search-and-rescue group called Armadillos (possibly an off-shoot of Eagles of the Desert). May occur on Wilderness within the FWS Cabeza Prieta National Wildlife Refuge or National Parks Organ Pipe Cactus National Monument. Seeking additional information. (R2 – Southwest Region)

Dec. 4 to 7 – FWS Partners for Fish and Wildlife Program and Coastal Program hosting an Agreements Training & FY18 Planning Meeting in Camp Victory, Cartwright, Oklahoma.

Dec 18 – Comment period closes for the Draft Restoration Plan and Environmental Assessment for the Chevron Mining Inc, Questa Mine in northern New Mexico. See Items of Note below for details (R2 – Southwest Region)

Dec. 19 – FWS Southwest Regional Director recognizes the Regional Monarch Team with the Southwest Regional Director's 2017 One-Service Award. A recognition ceremony will be held in Albuquerque, New Mexico. See ES Items of Note. (R2 – Southwest Region)

Upcoming Workshops & Meetings

December – Meet and Greet meetings and introductory phone calls continue between incoming Regional Director and Members of the Congressional Delegation within the Southwest Region. (R2 – Southwest Region)

Dec. 13 – FWS asked to attend meeting with Forest Service and private grazing allottee by Rep Pearce's Office (R NM 02). The meeting is anticipated to occur in mid-Dec in Cloudcroft, New Mexico. See Items of Note for more. (R2 – Southwest Region)

Endangered Species Act Recovery Actions

REPEAT: Gypsum wild-buckwheat – In January, 2018, FWS will withdraw its January 6, 2017, proposal to delist of the Gypsum wild-buckwheat (a threatened plant that occurs in New Mexico). The proposed rule to delist gypsum wild-buckwheat was predicated upon the Bureau of Land Management's (BLM) ability to incorporate specific land use restrictions for the plant into their revised Resource Management Plan (RMP), which would alleviate the threat of surface disturbance activities in occupied gypsum wild-buckwheat habitat. However, the RMP revision is not complete, and current land management practices are not sufficient to support removing the species from the Federal List of Endangered and Threatened Plants. Therefore, the gypsum wild-buckwheat still warrants protection as a threatened species under the Endangered Species Act. News bulletin under preparation. (R2 – Southwest Region)

REPEAT: California condor reintroduction program – A review of the 2012-2016 period of the California condor reintroduction program in northern Arizona and southern Utah is completed. This is the fourth 5-year review of the program. The review provides updates on the biological and field management aspects of the program, lead reduction efforts, and administration of the recovery effort. It provides recommendations to improve the program over the next five years and recommends continuing the reintroduction program, but continues to identify lead contamination as the major factor hindering condor recovery. Document posted and joint news release distributed. (R2 – Southwest Region)

REPEAT: Southwestern willow flycatcher – As early as December 20, FWS will publish a 12-month finding on the listing status of the southwestern willow flycatcher. Pacific Legal Foundation petitioned FWS to delist the flycatcher and in March 2016, we published a 90-day finding that the petition included substantial information, primarily regarding the subspecies' taxonomy. Upon robust consideration of the petition and the flycatchers' classification, FWS is completing a 12-month finding that delisting of the southwestern willow flycatcher is not warranted. Outreach is being planned – including a news release and Congressional notifications via email. Interest expected to be moderate. No controversy anticipated. (R2 – Southwest Region)

REPEAT: American Burying Beetle Species Status Assessment and 12-month finding – FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed prior to the issuance of a 12-month finding which is expected to occur this winter (2018). In June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

Endangered Species Act Listing Actions

NEW: Tobusch fishhook cactus downlisting notice – In the coming weeks, FWS will publish a final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved "fishhook" spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to down list the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened. Local interest is anticipated. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2 – Southwest Region)

NEW: Kuenzler hedgehog cactus – As early as January 2018, FWS will publish a final rule downlisting of the Kuenzler hedgehog cactus from endangered to threatened. This plant (in New Mexico) has shown significant recovery due primarily to identification of additional populations and collaborative conservation efforts with partners. Outreach will be planned. (R2 - Southwest Region)

REPEAT: Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed by the end of the calendar year. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff are currently working to review, organize, and respond to more than 400 comments received from the external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the States, and others to plan a face-to-face coordination meeting. (R2 Southwest Region & R6 Mountain-Prairie Region)

Other Ecological Services Items of Note

NEW: Lesser Prairie-Chicken Conservation Partners Forum – FWS is working to set up a meeting with representatives from the five range state fish and game agencies, the Western Association of Fish and Wildlife Agencies, and other partners to discuss coordination on lesser prairie-chicken issues. The meeting is currently planned to occur January 17-18, 2018, in Arcadia, Oklahoma. (R2-Southwest Region and R6-Mountain Prairie Region)

UPDATED: Mexican Wolf Recovery Plan, First Revision – On November 29, FWS published the final Mexican Wolf Recovery Plan, First Revision. The comment period for the draft revision of the Mexican Wolf Recovery Plan closed August 29, 2017. FWS received more than 101,000 comments (this number includes signed petitions). Due to the high level of visibility and controversy on Mexican wolf recovery in general, extensive outreach was conducted, including personal phone calls to State partners, Members of Congress and Tribal Leaders, in addition to numerous meetings and interactions with other interested parties. FWS was under a Court

settlement agreement to complete the final plan by the end of November 2017. On Wednesday, November 29, FWS received two Notices of Intent to sue from environmental groups – One on behalf of the Center for Biological Diversity, Defenders of Wildlife, and others and a second on behalf of the WildEarth Guardians and Western Watersheds project. See previous reports for additional background. (R2 – Southwest Region)

UPDATED: Lower Colorado River Multi-Species Habitat Conservation Plan – On November 28, FWS published a notice announcing the receipt of application and consideration of an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake. Outreach included notifying stakeholders and tribes. FWS issued a news release announcing the amendment (rediscovery of the snake) and it is gaining significant coverage. FWS, along with the Bureau of Reclamation, are seeking to add the northern Mexican gartersnake as a species covered under the LCR-MSCP and its ESA permit. The LCR-MSCP is a long-term program created in 2005 to minimize and mitigate impacts that water delivery and power generation along the lower Colorado River may have on 26 fish and wildlife species, including six species protected under the Endangered Species Act. LCR-MSCP is responsible for creating, replacing, and managing habitat for these species and operates under an ESA permit. However, in the early 2000s, when the LCR-MSCP was conceived, the largely aquatic, northern Mexican gartersnake was long-thought to have been extirpated from the lower Colorado River. In 2014, the subspecies was added to the list of threatened animals protected under the ESA. A public comment on the draft environmental assessment is now open through December 28, 2017. For more information, visit: https://www.fws.gov/southwest/es/arizona/ (R2 – Southwest Region)

UPDATED: FWS asked to attend meeting with U.S. Forest Service and private grazing allottee by Rep Pearce's Office (R NM 02). The meeting is proposed to occur on December 13, on the grazing allotment in Cloudcroft, New Mexico (Lincoln National Forest). The proposed meeting is intended to continue discussions on the development of a framework to address long-term land management practices that will benefit the New Mexico Meadow jumping mouse while meeting the needs of the permittee and the mission of the Forest Service. See previous report for more information. (R2 – Southwest Region)

UPDATED: The New Mexico Office of Natural Resources Trustee (ONRT), the Department of Agriculture (represented by the Forest Service), and the Department of the Interior (represented by FWS and the Bureau of Land Management) (collectively, the "Trustees"), finalized the Draft Restoration Plan and Environmental Assessment for the Chevron Mining Inc, Questa Mine in northern New Mexico. The Trustees hosted a public meeting on November 29, 2017, in Questa (Taos County), New Mexico. Twenty individuals attended the meeting. The majority of questions were related to water quality (EPA). The leaders of the Village of Questa were briefed in advance of the public meeting. The comment period for the draft EA will close December 18, 2017. The Site is located five miles east of the Village of Questa, adjacent to the Red River and also includes mine tailing ponds located approximately nine miles west of the mine. The Site is the location of a large groundwater contamination that will require treatment in perpetuity to mitigate human health risks. That treatment will use natural resource damages settlement funds ($4,000,000) for the restoration, rehabilitation, replacement, or acquisition of equivalent natural resources and services that were injured by the release of hazardous substances from the Site.

The final restoration plan is anticipated to be available in mid-February 2018. (R2 Southwest Region)

REPEAT: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review by the end of the year. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in early 2018. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2 – Southwest Region)

REPEAT: FWS Southwest Regional Director will recognize the Regional Monarch Team with the Southwest Regional Director's 2017 One-Service Award on December 19, 2016. A recognition ceremony will be held in Albuquerque, New Mexico. The FWS Monarch program is a great success because it embodies the "one service" approach to conservation. Through excellent cross program coordination, the monarch program in the Southwest Region continues to make significant strides in achieving conservation outcomes in four key areas: partnerships, habitat, science and people. See details in previous report. (R2 – Southwest Region)

REPEAT: Leander Independent School District (LISD) ITP – FWS will announce in the Federal Register a Notice of Intent to prepare a draft National Environmental Policy Act Environmental Assessment on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. LISD submitted a draft habitat conservation plan and incidental take permit (ITP). The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports. (R2 – Southwest Region)

REPEAT: Western Travis County Public Utility Agency Draft Habitat Conservation Plan – FWS anticipates publishing in the Federal Register in the next 45-60 days, a Notice of Availability for the Western Travis County Public Utility Agency's (WTCPUA) Habitat Conservation Plan (DHCP) and their application for an incidental take permit (ITP) in Texas. WTCPUA is preparing to construct a 2.2 mile secondary water pipeline near its existing water transmission main for redundancy and parallel capacity. Construction, operations and maintenance of the Raw Water Transmission Main could impact the federally listed endangered golden-cheeked warbler. If approved the term of the dHCP and ITP would be 30 years. A news bulletin will be prepared and shared with local congressionals, partners and media. (R2-Southwest Region)

REPEAT: Villages at Vigneto Development Endangered Species Act Consultation [Arizona] – FWS Arizona Ecological Services issued a concurrence with the Army Corps of Engineers'

determination that the Clean Water Act mitigation parcel for the Villages at Vigneto Development is "not likely to adversely affect" three listed species. Army Corps of Engineers had initiated formal ESA section 7 consultation regarding a planned 12,200-acre, 28,000-home development near the San Pedro River in southern Arizona and a 141-acre off-site mitigation project on the river. FWS has deferred to the Corps' determination and redirected its consultation to an informal concurrence of effects on the off-site mitigation parcel, WOTUS, and limited, indirectly affected areas. Six plaintiffs have filed still-pending litigation against the Corps on this project/issue. Media interest continues. More details in past reports. (R2 – Southwest Region)

REPEAT: FWS will join the Southern Core States for the monarch meeting taking place in Oklahoma City November 29 and December 1. This is a ~12 person working meeting with representatives from the state fish and game agencies to develop similar quantitative goals for the entire southern core geography. Kelly Meyers and Katie Boyer are the FWS representatives attending this meeting. (Agency-wide)

National Wildlife Refuge Actions

NEW: Urban Youth Gaining Outdoor Work Experience – FWS as part of an urban partnership, is bringing students from Furr High School in Houston, Texas to the FWS Trinity River National Wildlife Refuge to enable them to gain back country experience. On December 10, ten to 15 students will work alongside FWS to continue construction of a boardwalk with the Refuge during their camping/backpacking experience. The experience is meant to introduce students to careers in conservation and will emphasize land management issues, developing public use opportunities (including hunting, fishing and wildlife watching), team building and leadership skills. The desired outcome is that the students will take learned skills back to their school, which is adjacent to Houston Parks and Recreation's Herman Brown Park, a 900-acre park that the school uses as an outdoor classroom. The urban partnership plans to build on this experience on other FWS/TPWD led programs on hunting, fishing, and wildlife watching conducted in classroom and on the city park. (R2 – Southwest Region)

NEW: Renewed Congressional interest anticipated (Senators McCain and Flake and Rep Gosar) on access restrictions within the Kofa National Wildlife Refuge in Arizona. A private landowner with an in-holding (lands within the Refuge) has gated the Castle Dome/McPherson Pass Road where the main access road crosses his property. The private landowner has indicated intent to install locked gates on two additional roads. All three roads have been used for decades for refuge access. FWS is in the process of reviewing alternative routes outside of the in-holdings to accommodate hunters and other visitors to the Refuge. Congressional briefings are proposed to occur following meetings with the County and private landowner. (R2 – Southwest Region)

UPDATED: Impact of Fever Ticks to Cattle Industry in South Texas – FWS continues to work with Texas Animal Health Commission and U.S. Department of Agriculture-Animal and Plant Health Inspection Service (USDA-APHIS) regarding fever tick treatment at the FWS Laguna Atascosa National Wildlife Refuge. The FWS Laguna Atascosa NWR remains under quarantine at this time. Currently, FWS has made a decision to move forward with evaluating, through the NEPA process, the best mechanism for chemically treating white-tailed deer on the Lower Rio Grande Valley and Laguna Atascosa NWRs. This will include mitigation measures to reduce impacts to non-target species, such as the Texas tortoise. The FWS is committed to continuing

discussions and proactive actions in cooperation with the USDA-APHIS, the Texas Animal Health Commission, private ranchers and others to aid in the battle to combat the fever tick. Of media interest. Significant Congressional interest in efforts to combat fever tick. More details available in past reports. (R2 – Southwest Region)

REPEAT: FWS Southwest Leadership are in discussions with the Oklahoma Department of Wildlife Conservation regarding increased hunting opportunities on National Wildlife Refuges in Oklahoma. A follow up meeting is planned for January 2018.

Border-Related Activities

REPEAT: Jan 2018 – Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require transporting water from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade / replace pump and water delivery components to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

REPEAT: Jan 2018 – Border Coordination: Road Construction - On March 20, FWS was contacted by the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to coordinate an upcoming road construction project for a 5.9-mile portion of the Presumido Canyon Road through the Baboquivari Mountains, scheduled to begin in January 2018. The project will require water for the construction, and U.S. Customs and Border Protection (CBP) will perform maintenance of an FWS pump and water well in return for increased use of the FWS-owned well. (R2 – Southwest Region)

REPEAT: Jan 2018 – Border Coordination: Communication Towers - On April 18, FWS and U.S. Customs and Border Protection (CBP) discussed advance planning for Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge would be affected, with the goal of upgrading technology and providing a more robust foundation – all within the original impact areas. Work is proposed to begin in January 2018 dependent upon completion of planning, engineering, and permitting. Follow-up conversations with FWS have occurred to determine the necessary special use permitting process. (R2 – Southwest Region)

Fish and Aquatic Conservation

REPEAT: FWS Willow Beach National Fish Hatchery, in partnership with Arizona Game and Fish Department, announced the beginning of the annual rainbow trout sportfish stocking season in the lower Colorado River immediately below Lake Mohave/Davis Dam in late October. Neighboring communities include Laughlin, Nevada and Bullhead City, Arizona. FWS will stock about 1, 750 trout every week from early October through March 2018. Stocking sites include Davis Camp, Community Park, and Rotary Park for October-December. From January 2018 through March 2018, stocking sites will be Davis Camp and Community Park. In addition

to the annual stocking season below Davis Dam, FWS Willow Beach NFH continues to stock rainbow every week, year round, at Willow Beach Marina, Arizona. (R2 – Southwest Region)

Migratory Birds
Nothing significant to report.

Science Applications
Nothing significant to report

Wildlife and Sport Fish Restoration
Nothing significant to report

Tribal Consultation
REPEAT: The Inter Tribal Council of Arizona is planning a December 1 meeting and is interested in discussing the revised Native American Policy and implementation in the Southwest Region. FWS Southwest Regional Director attending and presenting at the meeting. The meeting will take place downtown Phoenix, Arizona. (R2 – Southwest Region)

NEW: FWS is in the process of consulting with Arizona Tribes regarding Sonoran Desert Tortoise Incidental Take Permit and Candidate Conservation Agreement with Assurances. See Items of Note above. (R2 – Southwest Region)

Upcoming public events in the Southwest			
Youth Hunt	Dec 2&3	Buffalo Lake National Wildlife Refuge, Texas	FWS hosts first youth deer hunt on Buffalo Lake National Wildlife Refuge, Texas
Controlled Hunts – Archery Hunt	Dec 4-7	Salt Plains NWR, Okla	White-tailed deer in Oklahoma. The final hunt is an archery hunt held December 4-7 with 28 hunters.
Elk Hunt	Dec 12-14, 2017	Wichita Mountains Wildlife Refuge, Oklahoma	The Oklahoma Dept of Wildlife Conservation (ODWC) and FWS Wichita Mountains Wildlife Refuge will conduct elk hunt on the Refuge. 100 permits were issued for this extremely popular hunt through a lottery system administered by ODWC.
Connecting People with Nature	Dec 09, 2017	Hagerman NWR, Texas	View Details
Other Special Event	Dec 21, 2017	Wichita Mountains Wildlife Refuge,	View Details

		Oklahoma	
Birding Festival	Dec 28, 2017	Trinity River NWR, Texas	View Details
Elk Hunt	Jan 9-11, 2018	Wichita Mountains Wildlife Refuge Oklahoma	The Oklahoma Dept of Wildlife Conservation (ODWC) and FWS Wichita Mountains Wildlife Refuge will conduct second elk hunt on the Refuge. 100 permits were issued for this extremely popular hunt through a lottery system administered by ODWC.
Birding Festival	April 14-15, 2018	Attwater Prairie Chicken NWR, Texas	View Details

FishBites Report

FWS Partners With YCC to Engage and Employ Youth

- **Topic:** Passing the torch to youth eager to spend time in the great outdoors will ensure continued conservation of natural resources. FWS is always searching for young men and women interested in rolling up their sleeves and feeling the Earth between their fingers. To reach the brightest and best, FWS is committed to working with the Youth Conservation Corps (YCC) program. FWS recognizes the importance of engaging these future leaders early and for a number of years has actively participated in developing a meaningful program designed to provide real work experience that will potentially prepare them for a future career in natural resources. This effort has sparked media interest and led to the coverage of a YCC crew working at two FWS National Wildlife Refuges in Oklahoma. Four Sequoyah County youth – Kristel Willard, Lindsey Rider and Jamie Pool of Sallisaw, and Robert Lamb of Vian, along with Trent Holt serving as adult team leader – were interviewed after they took on a number of projects on FWS Sequoyah and Ozark Plateau National Wildlife Refuges. The work projects included maintenance work on hiking trails and all public use areas, installing signs, painting fences as well as repair work on shelters for wetland water pumps. The crew also cleaned storm debris from roads to enable public access and installed a new deck. None of these projects were easy, as all of the participants gladly share, but completing them left the YCC crew with a feeling of accomplishment and pride. During the interview with a local reporter, each YCC participant shared their experience and talked about how they now have a much greater appreciation and understanding of natural resources. Read the coverage and the student interviews in the Vian Tenkiller News newspaper published in Sequoyah County, by Amie Remer.
- **Supportive Stakeholders:** Partners, YCC, local communities and others
- **Impacted Location:** Oklahoma and other locations

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
NatGeo Border wall / jaguar	Filming to occur in Jan 2018	National Geographic producer Dan Ruetenik is making arrangements for a piece on jaguar and The Wall. FWS declined on-camera interviews regarding the subject, however, background (recovery plan, research that's been conducted under the DHS funded grants, etc.) has been provided. Nat Geo plans to send a film crew out in 10 days or after the first of the year.
HBO Border related / search & rescue	Jan 2018	Producer of VICE News Tonight on HBO participated in a humanitarian search-and-rescue effort with group called Armadillos (possibly an off-shoot of Eagles of the Desert) Dec. 2 & 3. Occurred on Wilderness within the FWS Cabeza Prieta National Wildlife Refuge in Arizona. Twelve people participated in this event, including one reporter and a cameraman. Entrance in wilderness was by foot. FWS is not being interviewed or participating in this event. CBP and Pima County Sheriff's Office monitored activities. No incidents reported.

Multiple media Wolf rec plan	Dec & Jan	Mexican Wolf Recovery Plan First Revision continues to receive media interest. National Geographic, contacted FWS seeking interviews the week of Dec 4. On Dec. 8, Janess Vartanian, a Mexican wolf biologist, will be interviewed on-camera with independent film maker Josh Adler. During the interview, Vartanian will discuss her role. No discussion on the recovery plan or DOI/FWS policy. Published stories: AZ Central - Mexican gray wolf recovery plan criticized for doing too much, too little Mother Nature Network (blog) - The US just revealed its recovery plan for Mexican gray wolves Courthouse News Service - Hackles Are Up Over 'Sham' Wolf Recovery Plan White Mountain Independent - Mexican wolf recovery plan meets opposition Jackson Hole News&Guide - US adopts recovery plan for Mexican wolves Outdoornews - After decades, Mexican wolf recovery plan finally a reality Arizona Daily Star – http://tucson.com/news/local/good-news-for-mexican-wolf-us-thinks-so/article_ace86737-797f-5d98-8b63-6b6de47fd361 html Chron – Hearst Newspapers – http://www.chron.com/news/nation-world/nation/article/U-S-adopts-recovery-plan-for-Mexican-wolves-12400917.php Sierra Magazine - https://sierraclub.org/sierra/trump-administration-finalizes-flawed-mexican-wolf-recovery-plan Phoenix Business Journal - First jaguars, now **wolves**: Trump plans criticized (and their economic impact) Eastern Arizona Courier - Revisions completed on **Mexican Wolf** Recovery Plan

PBS Ch6 Tucson & KJZZ Mt Ghrm Red Squirrel	Dec 8 and later	On Dec 5 – Marit Alanen participated in interviews related to the Mount Graham Red Squirrel in the Coronado National Forest. Christopher Conover with the local public TV station in Tucson, Arizona is putting together a story on the supplemental feeding program being done for MGRS. Along with taping the interviews in the Forest, he filmed FWS and FS staff working together to fill the feeders. The show is expected to air at 6:30 pm on Dec 8 on PBS ch 6 in Tucson, and also be on the website. On Dec 6 – Alanen participated in an interview with Mark Brodie of The Show (KJZZ 91.5 FM) on the MGRS.
Multiple media Mexican Garter Snake	Dec	FWS issued a NR on the rediscovery of the threatened northern Mexican gartersnake in Arizona, along the Colorado River after a long absence. This announcement continues to generate media interest. AZ Rep, Mohave Valley News, NPR, and others.

Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel

Dec 4 to 7 – FWS Partners for Fish and Wildlife Program and Coastal Program hosted an Agreements Training & FY18 Planning Meeting in Camp Victory, Cartwright, Oklahoma. Significant Congressional interest. See Items of Note. (R2 – Southwest Region)

Dec 4 – FWS Southwest Regional Director attending FWS Directorate meeting in DC. (Agency-wide)

Dec 5 – Senator Lankford's (R Okla) District staffer Caleb Cochran participated in a courtesy visit to the Sequoyah National Wildlife Refuge in Oklahoma. See Refuges for details. (R2 – Southwest Region)

TBD: Tentatively planned to occur Dec 18 or 19 – FWS asked to attend meeting with Forest Service and private grazing allottee by Rep Pearce's Office (R NM 02). The meeting is anticipated to occur in mid- to late-Dec in Cloudcroft, New Mexico. Field Supervisor for FWS New Mexico ES Office participating in the meeting. See Items of Note for more. (R2 – Southwest Region)

TBD: Tentatively planned to occur in mid-December – FWS asked by Senator Cornyn's Office for an update on the Leander HCP application (See Items of Note). A conference call is being planned. (R2 – Southwest Region)

Hot Topics - Week Ahead Announcements and Actions

See ESA actions below

Dec 18 – Comment period closes for the Draft Restoration Plan and Environmental Assessment for the Chevron Mining Inc., Questa Mine in northern New Mexico. See Items of Note below for details (R2 – Southwest Region)

Dec 19 – FWS Southwest Regional Director recognizes the Regional Monarch Team with the Southwest Regional Director's 2017 One-Service Award. A recognition ceremony will be held in Albuquerque, New Mexico. See ES Items of Note. (R2 – Southwest Region)

Dec 20 – FWS anticipating publication of a 12-month finding on the listing status of the southwestern willow flycatcher. See ES Recovery Actions for details. (R2 – Southwest Region)

Upcoming Workshops & Meetings

Dec – Meet and Greet meetings and introductory phone calls continue between incoming Regional Director and Members of the Congressional Delegation within the Southwest Region. (R2 – Southwest Region)

Endangered Species Act Recovery Actions

NEW: Draft Recovery Plan for Four Aquatic Invertebrates – FWS will make available and seek comment on a draft recovery plan for four aquatic invertebrates found in desert grasslands in southeast New Mexico and southwest Texas in late January 2018. Noel's amphipod, Pecos assiminea, Koster's springsnail, and Roswell springsnail were listed as endangered in 2005. The primary threats to all four species are threats to the quantity and quality of water. Activities, such as oil and gas drilling, water withdrawls from the aquifer and contamination are the greatest threats. Most occupied sites are on FWS Bitter Lake National Wildlife Refuge in New Mexico and The Nature Conservancy holdings in Texas. (R2 – Southwest Region)

UPDATED: Kuenzler hedgehog cactus downlisting – FWS will finalize the downlisting of Kuenzler hedgehog cactus on January 31, 2018. When first listed, only one population of 200 plants was known. The discovery of additional populations, together with efforts to conserve the plant and its habitat, indicate the cactus is no longer at risk of extinction. Today, there are 3,300 individual cacti in 11 known populations within its southern New Mexico range. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild. (R2 – Southwest Region)

UPDATED: Southwestern willow flycatcher – As early as December 13, FWS will send to the Federal Register a 12-month finding on the listing status of the southwestern willow flycatcher. Pacific Legal Foundation petitioned FWS to delist the flycatcher and in March 2016, we published a 90-day finding that the petition included substantial information, primarily regarding the subspecies' taxonomy. Upon robust consideration of the petition and the flycatchers' classification, FWS is completing a 12-month finding that delisting of the southwestern willow flycatcher is not warranted. Outreach planned – including a news release and Congressional notifications via email. Interest expected to be moderate. No controversy anticipated. (R2 – Southwest Region)

REPEAT: Gypsum wild-buckwheat – In January, 2018, FWS will withdraw its January 6, 2017, proposal to delist of the Gypsum wild-buckwheat (a threatened plant that occurs in New Mexico). The proposed rule to delist gypsum wild-buckwheat was predicated upon the Bureau of Land Management's (BLM) ability to incorporate specific land use restrictions for the plant into their revised Resource Management Plan (RMP), which would alleviate the threat of surface disturbance activities in occupied gypsum wild-buckwheat habitat. However, the RMP revision is not complete, and current land management practices are not sufficient to support removing the species from the Federal List of Endangered and Threatened Plants. Therefore, the gypsum wild-buckwheat still warrants protection as a threatened species under the Endangered Species Act. News bulletin under preparation. (R2 – Southwest Region)

REPEAT: American Burying Beetle Species Status Assessment and 12-month finding – FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed prior to the issuance of a 12-month finding which is expected to occur in winter 2018. In June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range

reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

Endangered Species Act Listing Actions

NEW: Texas hornshell final listing determination – In mid-February, the FWS expects to publish a final rule listing the Texas hornshell as endangered. Historically, the Texas hornshell occurred in New Mexico, Texas and Mexico, however, the population has declined notably throughout its range and it currently occupies about 15% of its historical range in the U.S. A six month extension on the final listing determination was published on August 10, 2017. The Candidate Conservation Agreement and Candidate Conservation Agreement with Assurances covering the Texas hornshell and four other species in the northern portion of its range (primarily New Mexico) were signed in October 2017. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned at time of publication in the *Federal Register*. (R2 – Southwest Region)

UPDATED: Tobusch fishhook cactus downlisting notice –In mid-January, FWS will publish a final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved "fishhook" spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to down list the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened. Local interest is anticipated. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2 – Southwest Region)

REPEAT: Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed by the end of the calendar year. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff are currently working to review, organize, and respond to more than 400 comments received from the external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the States, and others to plan a face-to-face coordination meeting. (R2 Southwest Region & R6 Mountain-Prairie Region)

Other Ecological Services Items of Note

NEW: Mexican Wolf Initial Release and Translocation Proposal for 2018 – On December 26, FWS will close the public comment period on the Mexican wolf "Initial Release and Translocation Proposal for 2018." On December 4, FWS made the proposal available for public review and comment. This document was developed by the Mexican Wolf Interagency Field

Team (IFT) and outlines management options for initial release(s) and translocation(s) of Mexican wolves into the Mexican Wolf Experimental Population Area (MWEPA) in Arizona and New Mexico in 2018. The initial releases and translocations outlined in this document are consistent with: (1) the 2014 Final Environmental Impact Statement (EIS) for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (2) the 2015 Record of Decision for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (3) the 2015 Final Rule - Revisions to the Regulations for the Nonessential Experimental Population of the Mexican Wolf. From 1998-October of 2017, the IFT has conducted 31 initial release events (108 wolves) and 69 translocations events (121 wolves). Following completion of this comment period, FWS will submit permit applications along with the public comments to New Mexico Department of Game and Fish. The Proposal is currently available at: https://www.fws.gov/southwest/es/mexicanwolf/WRPOC.cfm (R2 – Southwest Region)

UPDATED: Mexican Wolf Recovery Plan, First Revision – On November 29, FWS published the final Mexican Wolf Recovery Plan, First Revision. The comment period for the draft revision of the Mexican Wolf Recovery Plan closed August 29, 2017. FWS received more than 101,000 comments (this number includes signed petitions). Due to the high level of visibility and controversy on Mexican wolf recovery in general, extensive outreach was conducted, including personal phone calls to State partners, Members of Congress and Tribal Leaders, in addition to numerous meetings and interactions with other interested parties. FWS was under a Court settlement agreement to complete the final plan by the end of November 2017. On Wednesday, November 29, FWS received two Notices of Intent to sue from environmental groups – One on behalf of the Center for Biological Diversity, Defenders of Wildlife, and others and a second on behalf of the WildEarth Guardians and Western Watersheds project. The First Revision continues to generate media interest (see media contacts above). See previous reports for additional background. (R2 – Southwest Region)

UPDATED: FWS joined the Southern Core States for the monarch meeting in Oklahoma City, Oklahoma, November 29 and December 1. This was a ~12 person working meeting with representatives from the state fish and game agencies to develop similar quantitative goals for the entire southern core geography. FWS was represented by Kelly Meyers and Katie Boyer. (Agency-wide)

UPDATED: Dec 4 to 7 – FWS Partners for Fish and Wildlife Program and Coastal Program hosting an Agreements Training & FY18 Planning Meeting in Camp Victory, Cartwright, Oklahoma. Several staffers from the Oklahoma Delegation plan to join the tour of private lands on Dec. 6 and learn more about the Partners Program (Senators Inhofe (R) and Lankford (R) and Rep Mullin (R 02) and Cole (R 04)) (R2 – Southwest Region)

REPEAT: Lesser Prairie-Chicken Conservation Partners Forum – FWS is working to set up a meeting with representatives from the five range state fish and game agencies, the Western Association of Fish and Wildlife Agencies, and other partners to discuss coordination on lesser prairie-chicken issues. The meeting is currently planned to occur January 17-18, 2018, in Arcadia, Oklahoma. (R2-Southwest Region and R6-Mountain Prairie Region)

REPEAT: Lower Colorado River Multi-Species Habitat Conservation Plan – On November 28, FWS published a notice announcing the receipt of application and consideration of an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake. Outreach included notifying stakeholders and tribes. FWS issued a news release announcing the amendment (rediscovery of the snake) and it is gaining significant coverage. FWS, along with the Bureau of Reclamation, are seeking to add the northern Mexican gartersnake as a species covered under the LCR-MSCP and its ESA permit. The LCR-MSCP is a long-term program created in 2005 to minimize and mitigate impacts that water delivery and power generation along the lower Colorado River may have on 26 fish and wildlife species, including six species protected under the Endangered Species Act. LCR-MSCP is responsible for creating, replacing, and managing habitat for these species and operates under an ESA permit. However, in the early 2000s, when the LCR-MSCP was conceived, the largely aquatic, northern Mexican gartersnake was long-thought to have been extirpated from the lower Colorado River. In 2014, the subspecies was added to the list of threatened animals protected under the ESA. A public comment on the draft environmental assessment is open through December 28, 2017. For more information, visit: https://www.fws.gov/southwest/es/arizona/ (R2 – Southwest Region)

UPDATED: FWS asked to attend meeting with U.S. Forest Service and private grazing allottee by Rep Pearce's Office (R NM 02). The meeting is now proposed to occur on December 18 or 19, on the grazing allotment in Cloudcroft, New Mexico (Lincoln National Forest). The proposed meeting is intended to continue discussions on the development of a framework to address long-term land management practices that will benefit the New Mexico Meadow jumping mouse while meeting the needs of the permittee and the mission of the Forest Service. See previous report for more information. (R2 – Southwest Region)

REPEAT: The New Mexico Office of Natural Resources Trustee (ONRT), the Department of Agriculture (represented by the Forest Service), and the Department of the Interior (represented by FWS and the Bureau of Land Management) (collectively, the "Trustees"), finalized the Draft Restoration Plan and Environmental Assessment for the Chevron Mining Inc, Questa Mine in northern New Mexico. The Trustees hosted a public meeting on November 29, 2017, in Questa (Taos County), New Mexico. Twenty individuals attended the meeting. The majority of questions were related to water quality (EPA). The leaders of the Village of Questa were briefed in advance of the public meeting. The comment period for the draft EA will close December 18, 2017. The Site is located five miles east of the Village of Questa, adjacent to the Red River and also includes mine tailing ponds located approximately nine miles west of the mine. The Site is the location of a large groundwater contamination that will require treatment in perpetuity to mitigate human health risks. That treatment will use natural resource damages settlement funds ($4,000,000) for the restoration, rehabilitation, replacement, or acquisition of equivalent natural resources and services that were injured by the release of hazardous substances from the Site. The final restoration plan is anticipated to be available in mid-February 2018. (R2 Southwest Region)

REPEAT: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public

review by the end of the year. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in early 2018. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2 – Southwest Region)

REPEAT: FWS Southwest Regional Director will recognize the Regional Monarch Team with the Southwest Regional Director's 2017 One-Service Award on December 19, 2016. A recognition ceremony will be held in Albuquerque, New Mexico. The FWS Monarch program is a great success because it embodies the "one service" approach to conservation. Through excellent cross program coordination, the monarch program in the Southwest Region continues to make significant strides in achieving conservation outcomes in four key areas: partnerships, habitat, science and people. See details in previous report. (R2 – Southwest Region)

REPEAT: Leander Independent School District (LISD) ITP – FWS will announce in the Federal Register a Notice of Intent to prepare a draft National Environmental Policy Act Environmental Assessment on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. LISD submitted a draft habitat conservation plan and incidental take permit (ITP). The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports. (R2 – Southwest Region)

REPEAT: Western Travis County Public Utility Agency Draft Habitat Conservation Plan – FWS anticipates publishing in the Federal Register in the next 45-60 days, a Notice of Availability for the Western Travis County Public Utility Agency's (WTCPUA) Habitat Conservation Plan (DHCP) and their application for an incidental take permit (ITP) in Texas. WTCPUA is preparing to construct a 2.2 mile secondary water pipeline near its existing water transmission main for redundancy and parallel capacity. Construction, operations and maintenance of the Raw Water Transmission Main could impact the federally listed endangered golden-cheeked warbler. If approved the term of the dHCP and ITP would be 30 years. A news bulletin will be prepared and shared with local congressionals, partners and media. (R2-Southwest Region)

National Wildlife Refuge Actions

NEW: FWS New Mexico National Wildlife Refuges Awarded Restoration Grant – FWS Bosque del Apache and Valle de Oro NWRs along with other federal and non-federal partners were recently awarded a $1 million North American Wetlands Conservation Act (NAWCA) grant for restoration and enhancement of nearly 1,100 acres in the Middle Rio Grande Valley in New Mexico. NAWCA grants increase bird populations and wetland habitat, while supporting local economies and American traditions such as hunting, fishing, wildlife observation, family

farming, and cattle ranching. In recognition of this grant, Ducks Unlimited is arranging for a field visit to the FWS Bosque del Apache NWR and has invited Senator Udall (D NM) and Rep Pearce (R NM 02) to attend. The field visit is tentatively set for January 15, 2018. (R2 – Southwest Region)

NEW: Congressional interest in Sequoyah National Wildlife Refuge in Oklahoma. Senator Lankford's (R Okla) District staffer Caleb Cochran visited the Sequoyah National Wildlife Refuge on December 5. Caleb was one of the three staffers that took an airboat tour at the Refuge last summer. One of the interests of the Senator's Office is the youth programs in place on the Refuge (see FishBites). FWS recently had four YCC students working on the Refuge. This YCC program gained positive news coverage locally. Darrin Unruh, Refuge Manager met with the staffer and shared more about the Refuge and the YCC program. (R2 – Southwest Region)

NEW: FWS Announces Access Changes to Meet Safely Needs and Accommodate Visitation to Popular Site - The FWS Wichita Mountains Wildlife Refuge in Oklahoma is implementing changes to the hours and operations for access to Mount Scott. The narrow and curvy 3- mile scenic road to the summit of Mt. Scott was completed by the WPA (Works Progress Association) and CCC (Civilian Conservation Corps) in 1938. The road twists and turns as it climbs roughly 1,000 feet to the mountain summit. Though it has been repaved several times, it remains a narrow two lane road with no shoulders. The area's popularity has grown exponentially since the road was constructed almost 80 years ago. More than 2.2 million visitors now visit the scenic Wichita Mountains Wildlife Refuge every year and the scenic Mount Scott remains one of the most popular destinations. The access route to the site not only receives heavy and increasing motorized vehicle traffic, it has become an increasingly popular place for pedestrians and bicyclists. In order to reduce safety hazards associated with pedestrian/bicyclist users and motor vehicles on the narrow two lane road, the following changes have been implemented: The Mount Scott road will be open only to foot-traffic (pedestrians/bicyclists) from 6a.m. to 9:30 a.m. daily. Group size is restricted to 8 persons or less. All visitors must remain on pavement until sunrise. From 9:30a.m. to sunset, the road will open for motorized traffic. Pedestrians and bicyclists will not be permitted to walk/bike the road after the road is open for motorized traffic. FWS anticipates the new changes will reduce risks of serious or possibly fatal incidents, but reducing potential conflicts involving pedestrians/bicyclists and motorized vehicles. Information about the change in hours can be found on the Refuge website at www.fws.gov/refuge/wichita_mountains or by contacting the Visitor Center at 580-429-2197.

UPDATED: FWS Little River National Wildlife Refuge (NWR) hosted two controlled deer hunts during the month of November. The hunts are coordinated with the Oklahoma Department of Wildlife Conservation, and the hunters selected for the hunts are drawn through the Oklahoma Department of Wildlife Conservation's Controlled Hunt Program. The refuge issues 30 permits for each of the hunts, and hunters are allowed to harvest either an antlered or antlerless deer. The deer harvested on these hunts are a bonus, and do not count toward a hunters combined season limit. The refuge had twenty-four (24) hunters participate in the November 3-5 hunt, and they harvested ten (10) deer (5 antlered and 5 antlerless) for a 42% harvest rate. The refuge had twenty-three (23) hunters participate in the November 10-12 hunt, and they harvested 12 deer (8

antlered and 4 antlerless) for a 52% harvest success rate. The hunters also harvested 8 feral hogs on the hunt. (R2 – Southwest Region)

UPDATED: Urban Youth Gaining Outdoor Work Experience – FWS as part of an urban partnership, is bringing students from Furr High School in Houston, Texas to the FWS Trinity River National Wildlife Refuge to enable them to gain back country experience. In January (date TBD), several Furr High School students (10 to 15 expected) will work alongside FWS to continue construction of a trail within the Refuge during their camping/backpacking experience. The experience is meant to introduce students to careers in conservation and will emphasize land management issues, developing public use opportunities (including hunting, fishing and wildlife watching), team building and leadership skills. The desired outcome is that the students will take learned skills back to their school, which is adjacent to Houston Parks and Recreation's Herman Brown Park, a 900-acre park that the school uses as an outdoor classroom. The urban partnership plans to build on this experience on other FWS/TPWD led programs on hunting, fishing, and wildlife watching conducted in classroom and on the city park. (R2 – Southwest Region)

REPEAT: Renewed Congressional interest anticipated (Senators McCain and Flake and Rep Gosar) on access restrictions within the Kofa National Wildlife Refuge in Arizona. A private landowner with an in-holding (lands within the Refuge) has gated the Castle Dome/McPherson Pass Road where the main access road crosses his property. The private landowner has indicated intent to install locked gates on two additional roads. All three roads have been used for decades for refuge access. FWS is in the process of reviewing alternative routes outside of the in-holdings to accommodate hunters and other visitors to the Refuge. Congressional briefings are proposed to occur following meetings with the County and private landowner. (R2 – Southwest Region)

REPEAT: Impact of Fever Ticks to Cattle Industry in South Texas – FWS continues to work with Texas Animal Health Commission and U.S. Department of Agriculture-Animal and Plant Health Inspection Service (USDA-APHIS) regarding fever tick treatment at the FWS Laguna Atascosa National Wildlife Refuge. The FWS Laguna Atascosa NWR remains under quarantine at this time. Currently, FWS has made a decision to move forward with evaluating, through the NEPA process, the best mechanism for chemically treating white-tailed deer on the Lower Rio Grande Valley and Laguna Atascosa NWRs. This will include mitigation measures to reduce impacts to non-target species, such as the Texas tortoise. The FWS is committed to continuing discussions and proactive actions in cooperation with the USDA-APHIS, the Texas Animal Health Commission, private ranchers and others to aid in the battle to combat the fever tick. Of media interest. Significant Congressional interest in efforts to combat fever tick. More details available in past reports. (R2 – Southwest Region)

REPEAT: FWS Southwest Leadership are in discussions with the Oklahoma Department of Wildlife Conservation regarding increased hunting opportunities on National Wildlife Refuges in Oklahoma. A follow up meeting is planned for January 2018.

Border-Related Activities

UPDATED: Feb 2018 – Border Coordination: Communication Towers - FWS and U.S. Customs and Border Protection (CBP) are continuing discussions and plans to advance Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge would be affected, with the goal of upgrading technology and providing a more robust foundation within the existing footprint. Design work is in progress. Construction activities are anticipated to begin in February 2018 dependent upon completion of planning, engineering, and permitting requirements. (R2 – Southwest Region)

REPEAT: Jan 2018 – Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require transporting water from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade / replace pump and water delivery components to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

REPEAT: Jan 2018 – Border Coordination: Road Construction - On March 20, FWS was contacted by the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to coordinate an upcoming road construction project for a 5.9-mile portion of the Presumido Canyon Road through the Baboquivari Mountains, scheduled to begin in January 2018. The project will require water for the construction, and U.S. Customs and Border Protection (CBP) will perform maintenance of an FWS pump and water well in return for increased use of the FWS-owned well. (R2 – Southwest Region)

Fish and Aquatic Conservation

REPEAT: FWS Willow Beach National Fish Hatchery, in partnership with Arizona Game and Fish Department, announced the beginning of the annual rainbow trout sportfish stocking season in the lower Colorado River immediately below Lake Mohave/Davis Dam in late October. Neighboring communities include Laughlin, Nevada and Bullhead City, Arizona. FWS will stock about 1, 750 trout every week from early October through March 2018. Stocking sites include Davis Camp, Community Park, and Rotary Park for October-December. From January 2018 through March 2018, stocking sites will be Davis Camp and Community Park. In addition to the annual stocking season below Davis Dam, FWS Willow Beach NFH continues to stock rainbow every week, year round, at Willow Beach Marina, Arizona. (R2 – Southwest Region)

Migratory Birds

Nothing significant to report.

Science Applications

Nothing significant to report

Wildlife and Sport Fish Restoration

Nothing significant to report

Tribal Consultation

UPDATED: FWS attended the Inter Tribal Council of Arizona's December 1, 2017 meeting. The Council requested FWS Southwest Regional Director Amy Lueders provide an update at the meeting. Topics of interest included the revised Native American Policy and implementation in the Southwest Region, Tribal Wildlife Grants, and the National Eagle Repository. The meeting took place in downtown Phoenix, Arizona and was well attended. Fourteen Tribes were represented by 26 Tribal Leaders at the Council meeting. During the open session,Yavapai-Apache Nation Chairwoman Jane Russell-Winiecki encouraged Lueders to return to Arizona soon to meet with individual tribes. Following the Council meeting, the Hopi Tribe requested a meeting with new Chairman Tim Nuvangyaoma. These meeting requests are being scheduled. (R2 – Southwest Region)

REPEAT: FWS is in the process of consulting with Arizona Tribes regarding Sonoran Desert Tortoise Incidental Take Permit and Candidate Conservation Agreement with Assurances. See Items of Note above. (R2 – Southwest Region)

Upcoming public events in the Southwest			
Controlled Hunts – Archery Hunt	Dec 4-7	Salt Plains NWR, Okla	White-tailed deer in Oklahoma. The final hunt is an archery hunt held December 4-7 with 28 hunters.
Elk Hunt	Dec 12-14, 2017	Wichita Mountains Wildlife Refuge, Oklahoma	The Oklahoma Dept of Wildlife Conservation (ODWC) and FWS Wichita Mountains Wildlife Refuge will conduct elk hunt on the Refuge. 100 permits were issued for this extremely popular hunt through a lottery system administered by ODWC.
Connecting People with Nature	Dec 09, 2017	Hagerman NWR, Texas	View Details
Other Special Event	Dec 21, 2017	Wichita Mountains Wildlife Refuge, Oklahoma	View Details
Birding Festival	Dec 28, 2017	Trinity River NWR, Texas	View Details
Elk Hunt	Jan 9-11, 2018	Wichita Mountains Wildlife Refuge Oklahoma	The Oklahoma Dept of Wildlife Conservation (ODWC) and FWS Wichita Mountains Wildlife Refuge will conduct second elk hunt on the Refuge. 100 permits were issued for this

			extremely popular hunt through a lottery system administered by ODWC.
Birding Festival	April 14-15, 2018	Attwater Prairie Chicken NWR, Texas	View Details

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
Cronkite News regarding return of Gila topminnow to Santa Cruz River.	Week of Jan 22	Journalist (Angel Mendoza) seeking interview with FWS fish biologist, primarily to understand from where and how Gila topminnow have returned to the Santa Cruz River in the Tucson area.
Southwest Fly Fishing Magazine	TBD	Professional writer Wayne Snyder seeks information on Gila trout, anticipating writing a feature story on fishing for the native Southwestern trout.
Airline travel mag Valle de Oro	Jan 2018	Alaska Airlines publishing a small mention of FWS Valle de Oro National Wildlife Refuge in their article about things to do and see in Albuquerque for the in-flight magazine in January 2018.
Fishing Tackle Retailer magazine Aquatic Invasive Species	January	Published. This trade publication of the marine and tackle industry commenced a monthly conservation column that will solely be contributed to by Ext Aff staff. http://fishingtackleretailer.com/common-carp-brussel-sprouts-fisheries/

Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel

Jan 16-18, LPC conservation partners meeting

Hot Topics - Week Ahead Announcements and Actions

See ESA actions below

Upcoming Workshops & Meetings

Jan.-Feb. – Meet and Greet meetings and introductory phone calls continue between incoming Regional Director and Members of the Congressional Delegation within the Southwest Region. A Meet and Greet with staff for Sen. Udall (NM) and Sen. Heinrich (NM) is scheduled for Feb. 2nd at the Regional Office. (R2 – Southwest Region)

Jan 11 - Ted Koch, Assistant Regional Director, Ecological Services the Southwest Regional Office met with the New Mexico Catron County Commissioner and the other Catron County Commissioners in a January 11, 2018, Executive Session meeting to explore avenues to improve communication and collaboration in reference to the Mexican wolf recovery program.

Jan 17/18 – FWS co-hosted, with the Western Association of Fish and Wildlife Agencies (WAFWA) and USDA's Natural Resources Conservation Service, a partner forum on Lesser Prairie-Chicken Conservation in Edmond, Oklahoma. FWS and WAFWA held a pre-meeting on January 16, 2018. These are invitation-only meetings.

Jan TBD – FWS asked to attend meeting with Forest Service and private grazing allottee by Rep Pearce's Office (R NM 02). The meeting will take place in Cloudcroft, New Mexico, and by conference call. Field Supervisor for FWS New Mexico ES Office participating in the meeting. See Items of Note for more. (R2 – Southwest Region)

Endangered Species Act Recovery Actions

UPDATED: Draft Recovery Plan for Four Aquatic Invertebrates – FWS will make available and seek comment on a draft recovery plan for four aquatic invertebrates found in desert grasslands in southeast New Mexico and southwest Texas in February 2018. Noel's amphipod, Pecos assiminea, Koster's springsnail, and Roswell springsnail were listed as endangered in 2005. The primary threats to all four species are threats to the quantity and quality of water. Activities, such as oil and gas drilling, water withdrawls from the aquifer and contamination are the greatest threats. Most occupied sites are on FWS Bitter Lake National Wildlife Refuge in New Mexico and The Nature Conservancy holdings in Texas. (R2 – Southwest Region)

REPEAT: Kuenzler hedgehog cactus downlisting – FWS will finalize the downlisting of Kuenzler hedgehog cactus on February 28, 2018. When first listed, only one population of 200 plants was known. The discovery of additional populations, together with efforts to conserve the plant and its habitat, indicate the cactus is no longer at risk of extinction. Today, there are 3,300 individual cacti in 11 known populations within its southern New Mexico range. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild. (R2 – Southwest Region)

REPEAT: Gypsum wild-buckwheat – In early 2018, FWS will withdraw its January 6, 2017, proposal to delist of the Gypsum wild-buckwheat (a threatened plant that occurs in New Mexico). The proposed rule to delist gypsum wild-buckwheat was predicated upon the Bureau of Land Management's (BLM) ability to incorporate specific land use restrictions for the plant into their revised Resource Management Plan (RMP), which would alleviate the threat of surface disturbance activities in occupied gypsum wild-buckwheat habitat. However, the RMP revision is not complete, and current land management practices are not sufficient to support removing the species from the Federal List of Endangered and Threatened Plants. Therefore, the gypsum

wild-buckwheat still warrants protection as a threatened species under the Endangered Species Act. News bulletin under preparation. (R2 – Southwest Region)

REPEAT: American Burying Beetle Species Status Assessment and 12-month finding – FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed prior to the issuance of a 12-month finding which is expected to occur in winter 2018. In June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

Jan 23 – Amy Lueders, Regional Director, Ted Koch, Assistant Regional Director, Ecological Services, and Sherry Barrett, Mexican Wolf Recovery Coordinator, Southwest Regional Office, will meet with the Chairman of the New Mexico State Game Commission and the Director of the New Mexico Department of Game and Fish to discuss recovery of the Mexican wolf in New Mexico and the status of Mexican wolf recovery in Mexico.

Endangered Species Act Listing Actions

UPDATED: Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff are currently working to review, organize, and respond to comments received from the external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the States, and others. (R2 Southwest Region & R6 Mountain-Prairie Region)

REPEAT: Texas hornshell final listing determination – In mid-February, the FWS expects to publish a final rule listing the Texas hornshell as endangered. The Texas hornshell naturally occurred in New Mexico, Texas and Mexico. The population has declined notably and currently occupies approximately 15 percent of its historical range. A six-month extension on the final listing determination was published on August 10, 2017. The Candidate Conservation Agreement and Candidate Conservation Agreement with Assurances covering the Texas hornshell and four other species in the northern portion of its range (primarily New Mexico) were signed in October 2017. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned at time of publication in the *Federal Register*. (R2 – Southwest Region)

UPDATED: Tobusch fishhook cactus downlisting notice – In late February, FWS will publish a

final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved "fishhook" spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to down list the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened. Local interest is anticipated. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the Federal Register. (R2 – Southwest Region)

Other Items of Note

NEW: American Electric Power (AEP) draft Habitat Conservation Plan – In late February FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning on holding public meetings during the 60-day public comment period. Controversy level is low. Outreach planned. (R2 Southwest Region and R4 Southeast Region)

REPEAT: FWS asked to attend a meeting with U.S. Forest Service and private grazing allottee by Rep Pearce's Office (R NM 02). The meeting is being rescheduled for January. Date TBD. Continuing discussions on the grazing allotment in Cloudcroft, New Mexico (Lincoln National Forest) on site and via conference call. The goal of the meeting is to continue discussions on the development of a framework to address long-term land management practices that will benefit the New Mexico Meadow jumping mouse while meeting the needs of the permittee and the mission of the Forest Service. See previous report for more information. (R2 – Southwest Region)

REPEAT: Leander Independent School District (LISD) ITP – FWS will announce in the *Federal Register* a Notice of Intent to prepare a draft National Environmental Policy Act Environmental Assessment on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. LISD submitted a draft habitat conservation plan and incidental take permit (ITP). The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. A conference call was held with Senator Cornyn's staff to discuss the issue on December 11. More details available in past reports. (R2 – Southwest Region)

REPEAT: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review in

February 2018. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in early 2018. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2 – Southwest Region)

REPEAT: Arizona Electric Power Cooperative Candidate Conservation Agreement with Assurances for Sonoran Desert Tortoise – FWS anticipates publishing in the *Federal Register* in the next 45-60 days, a Notice of Availability for the Arizona Electric Power Cooperative (AEPCO) Draft Candidate Conservation Agreement with Assurances (dCCAA) for Sonoran Desert Tortoise and their application for an enhancement of survival permit (ESP) in Arizona. AEPCO has developed a conservation agreement that would promote conservation for the unlisted Sonoran Desert tortoise within 2,152 acres of their right-of-way during normal operation and maintenance activities. If approved the term of the dCCAA and ESP would be 25 years. No formal news bulletin will be released. Outreach to local, State, and Federal agencies and partners. (R2-Southwest Region)

REPEAT: FWS and partners will conduct the annual wolf population survey and capture, weather conditions permitting from January 22, 2018 through February 2, 2018. The Mexican Wolf Recovery Program is a multi-agency cooperative effort between the FWS, Arizona Game and Fish Department, U.S. Forest Service, USDA-Animal and Plant Health Inspection Service, Wildlife Services and the White Mountain Apache Tribe, as well as in consultation with the New Mexico Department of Game and Fish. Survey flights will occur on the Fort Apache Indian Reservation, Apache and Gila National Forests in eastern Arizona and western New Mexico, and possibly on some areas immediately outside the forests. Not open to the public. Limited media opportunities may be arranged, when possible. (R2 – Southwest Region).

UPDATED: On January 12, 2018, FWS submitted permit applications to New Mexico Department of Game and Fish (NMDGF) to import and release up to 12 Mexican wolf pups in New Mexico, to import a female wolf from Arizona for artificial insemination at Sevilleta Wolf Management Facility, and to import up to 6 pups from Arizona to be held at Sevilleta or Ladder Ranch Wolf Management Facilities, if needed. The Mexican Wolf Initial Release and Translocation Proposal for 2018 was provided for public review and comment from December 4 to 29. FWS received just over 100 comments, which were transmitted to NMDGF, per their regulations, along with the permit applications. The initial releases and translocations outlined in this document are consistent with: (1) the 2014 Final Environmental Impact Statement (EIS) for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (*Canis lupus baileyi*), (2) the 2015 Record of Decision for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (*Canis lupus baileyi*), (3) the 2015 Final Rule - Revisions to the Regulations for the Nonessential Experimental Population of the Mexican Wolf, and the 2017 Mexican Wolf Recovery Plan, First Revision.

REPEAT: Mexican Wolf Recovery Plan, First Revision – On November 29, FWS published the final Mexican Wolf Recovery Plan, First Revision. The comment period for the draft revision of the Mexican Wolf Recovery Plan closed August 29, 2017. FWS received more than 101,000 comments (this number includes signed petitions). Due to the high level of visibility and controversy on Mexican wolf recovery in general, extensive outreach was conducted, including personal phone calls to State partners, Members of Congress and Tribal Leaders, in addition to numerous meetings and interactions with other interested parties. FWS was under a Court settlement agreement to complete the final plan by the end of November 2017. On Wednesday, November 29, FWS received two Notices of Intent to sue from environmental groups – One on behalf of the Center for Biological Diversity, Defenders of Wildlife, and others and a second on behalf of the WildEarth Guardians and Western Watersheds project. The First Revision continues to generate media interest. See previous reports for additional background. (R2 – Southwest Region)

UPDATED: Lesser Prairie-Chicken Conservation Partners Forum – FWS will be meeting with representatives from the five range state fish and game agencies, the Western Association of Fish and Wildlife Agencies, NRCS and other partners to discuss coordination on lesser prairie-chicken issues. The meeting is scheduled for January 17-18, 2018, in Edmond, Oklahoma. (R2-Southwest Region and R6-Mountain Prairie Region)

REPEAT: Western Travis County Public Utility Agency Draft Habitat Conservation Plan – FWS anticipates publishing in the *Federal Register* in the next 45-60 days, a Notice of Availability for the Western Travis County Public Utility Agency's (WTCPUA) Habitat Conservation Plan (DHCP) and their application for an incidental take permit (ITP) in Texas. WTCPUA is preparing to construct a 2.2 mile secondary water pipeline near its existing water transmission main for redundancy and parallel capacity. Construction, operations and maintenance of the Raw Water Transmission Main could impact the federally listed endangered golden-cheeked warbler. If approved the term of the dHCP and ITP would be 30 years. A news bulletin will be prepared and shared with local congressionals, partners and media. (R2-Southwest Region)

National Wildlife Refuge Actions

NEW: FWS Hosts Youth Archery Deer and Feral Hog Hunt in Texas – FWS Hagerman National Wildlife Refuge is hosting a youth archery deer and feral hog hunt January 19-21, 2018. The hunt will be operated by the Texas Youth Hunting Program (TYHP) in accordance with a Youth Hunt Agreement with FWS executed in 2015. The TYHP is a program of the Texas Wildlife Association in partnership with the Texas Parks and Wildlife Department. The goal is to provide safe, legal, and ethical opportunities for youth to hunt and learn about wildlife conservation and to promote youth hunter recruitment. This action aligns well with National Wildlife Refuge System priorities. Six TYHP hunters, selected by TPWD, will be participating in the archery hunt. The youth participants will be accompanied by TYHP staff and volunteer mentors. The group will be camping at a refuge DUA and hunting two units that were already open to this year's lottery draw hunts. There will be no public access to the primary hunt unit during the event. All other portions of the refuge will remain open as usual. (R2 – Southwest Region)

UPDATED: FWS Southwest Region is proactively reaching out to state agencies to discuss Secretarial Order 3356, and seek additional opportunities to support and expand hunting and fishing on Refuges in the Southwest. Currently the Oklahoma Department of Wildlife

Conservation (ODWC) has been the most responsive to outreach. On November 9, 2017, FWS leadership met with ODWC to discuss several potential hunting and fishing opportunities that could occur on Refuges in Oklahoma. A follow up meeting with ODWC is planned in January 2018. The FWS Southwest Region will continue to reach out to Texas, Arizona and New Mexico as well as Oklahoma to explore more opportunities. (R2 – Southwest Region)

REPEAT: Control Efforts Net Almost 1,000 Feral Hogs at FWS Hagerman National Wildlife Refuge – Hunting is one of the priority recreational uses on the FWS National Wildlife Refuge System and is compatible with the mission of the FWS Hagerman National Wildlife Refuge in Texas. The long-practiced tradition helps manage wildlife populations and supports the eradication of an invasive species causing havoc on Hagerman. Since 1996 the Refuge has experienced an explosion in feral hog density. Invasive hogs damage refuge infrastructures, destroy valuable wildlife habitats, and compete with native wildlife for food, water, and space. FWS began using controlled public hog hunts in 2013 to help manage the rapidly increasing hog numbers. This hunt, combined with aerial shooting operations, inter-agency cooperative night shooting, and intensive trapping, resulted in almost 1,000 hogs being removed from the Refuge this year. (R2 – Southwest Region)

REPEAT: Impact of Fever Ticks to Cattle Industry in South Texas – FWS continues to work with Texas Animal Health Commission and U.S. Department of Agriculture-Animal and Plant Health Inspection Service (USDA-APHIS) regarding fever tick treatment at the FWS Laguna Atascosa and Lower Rio Grande Valley National Wildlife Refuges. The FWS Laguna Atascosa NWR and portions of the FWS Lower Rio Grande Valley NWR remain under quarantine at this time. Currently, FWS has made a decision to move forward with evaluating, through the NEPA process, the chemically treating white-tailed deer and conducting an experimental cattle grazing program on the Lower Rio Grande Valley and Laguna Atascosa NWRs. The USDA and FWS determined that the best option for moving forward with the NEPA process is with USDA as the lead agency and FWS as a cooperating agency. The USDA anticipates making the draft Environmental Assessment available for public comment starting December 20 for 30 days. FWS is proposing a joint public notice between all entities (FWS, USDA, TAHC) be issued announcing public comment period. FWS is committed to continuing discussions and proactive actions in cooperation with the USDA-APHIS, the Texas Animal Health Commission, private ranchers and others to aid in the battle to combat the fever tick. Of media interest. Significant Congressional interest in efforts to combat fever tick. More details available in past reports. (R2 – Southwest Region)

UPDATED: FWS New Mexico National Wildlife Refuges Awarded Restoration Grant – FWS Bosque del Apache and Valle de Oro NWRs along with other federal and non-federal partners were recently awarded a 1 million North American Wetlands Conservation Act (NAWCA) grant for restoration and enhancement of nearly 1,100 acres in the Middle Rio Grande Valley in New Mexico. NAWCA grants increase bird populations and wetland habitat, while supporting local economies and American traditions such as hunting, fishing, wildlife observation, family farming, and cattle ranching. Funding for the project is currently on hold until a full budget is passed. A field visit planned for the week of January 15, 2018 hosted by Ducks Unlimited that included Senator Udall (D NM) and Rep Pearce (R NM 02) has been postponed. A re-schedule date has not yet been identified. (R2 – Southwest Region)

REPEAT: Urban Youth Gaining Outdoor Work Experience – FWS as part of an urban partnership, is bringing students from Furr High School in Houston, Texas to the FWS Trinity River National Wildlife Refuge to enable them to gain back country experience. In January 2018 (date TBD), several Furr High School students (10 to 15 expected) will work alongside FWS to continue construction of a trail within the Refuge during their camping/backpacking experience. The experience is meant to introduce students to careers in conservation and will emphasize land management issues, developing public use opportunities (including hunting, fishing and wildlife watching), team building and leadership skills. The desired outcome is that the students will take learned skills back to their school, which is adjacent to Houston Parks and Recreation's Herman Brown Park, a 900-acre park that the school uses as an outdoor classroom. The urban partnership plans to build on this experience on other FWS/TPWD led programs on hunting, fishing, and wildlife watching conducted in classroom and on the city park. (R2 – Southwest Region)

Border-Related Activities

NEW: Jan. 27 — National Wildlife Refuge staff has received notice of an independently organized rally to "Save Santa Ana National Wildlife Refuge" taking place Saturday, January 27 from 11 a.m. to 1:30 p.m. The Sierra Club is organizing the rally, which will take place in a field east of the refuge. Congressman Vela is expected to attend, and representatives from the 19 cities/counties that passed resolutions opposing the proposed border wall have been invited. The event coincides with a FWS-organized 75th anniversary event at the Santa Ana National Wildlife Refuge. The FWS event is being coordinated to have guest speakers, guided walks, interpretive exhibits and displays, games and activities, and refreshments. The FWS will have increased law enforcement as well as External Affairs support onsite to help as needed.

REPEAT: Jan 2018 – Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require transporting water from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade / replace pump and water delivery components to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

REPEAT: Jan 2018 – Border Coordination: Road Construction - On March 20, FWS was contacted by the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to coordinate an upcoming road construction project for a 5.9-mile portion of the Presumido Canyon Road through the Baboquivari Mountains, scheduled to begin in January 2018. The project will require water for the construction, and U.S. Customs and Border Protection (CBP) will perform maintenance of an FWS pump and water well in return for increased use of the FWS-owned well. (R2 – Southwest Region)

REPEAT: Feb 2018 – Border Coordination: Communication Towers - FWS and U.S. Customs and Border Protection (CBP) are continuing discussions and plans to advance Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge would be affected, with the goal of upgrading technology and providing a more robust foundation within the existing footprint. Design work is in progress. Construction activities are anticipated to begin in February 2018 dependent upon completion of planning, engineering, and permitting requirements. (R2 – Southwest Region)

Fish and Aquatic Conservation

REPEAT: FWS Willow Beach National Fish Hatchery, in partnership with Arizona Game and Fish Department, announced the beginning of the annual rainbow trout sportfish stocking season in the lower Colorado River immediately below Lake Mohave/Davis Dam in late October. Neighboring communities include Laughlin, Nevada and Bullhead City, Arizona. FWS will stock about 1, 750 trout every week from early October through March 2018. Stocking sites include Davis Camp, Community Park, and Rotary Park for October-December. From January 2018 through March 2018, stocking sites will be Davis Camp and Community Park. In addition to the annual stocking season below Davis Dam, FWS Willow Beach NFH continues to stock rainbow every week, year round, at Willow Beach Marina, Arizona. (R2 – Southwest Region)

Migratory Birds

Nothing significant to report.

Science Applications

Nothing significant to report

Wildlife and Sport Fish Restoration

Nothing significant to report

Tribal Consultation

REPEAT: FWS attended the Inter Tribal Council of Arizona's December 1, 2017 meeting. The Council requested FWS Southwest Regional Director Amy Lueders provide an update at the meeting. Topics of interest included the revised Native American Policy and implementation in the Southwest Region, Tribal Wildlife Grants, and the National Eagle Repository. The meeting took place in downtown Phoenix, Arizona and was well attended. Fourteen Tribes were represented by 26 Tribal Leaders at the Council meeting. During the open session,Yavapai-Apache Nation Chairwoman Jane Russell-Winiecki encouraged Lueders to return to Arizona soon to meet with individual tribes. Following the Council meeting, the Hopi Tribe requested a meeting with new Chairman Tim Nuvangyaoma. These meeting requests are being scheduled. (R2 – Southwest Region)

Through January 26, 2018

FishBites Report

Youth at Hagerman National Wildlife Refuge: Feral Hog--White-tailed Deer Combo Hunt
Topic: Hagerman NWR hosted a youth archery deer and feral hog hunt January 19-21, 2018. Refuge staff partnered with Texas Parks and Wildlife Department's (TPWD) *Texas Youth Hunting Program* to bring six youth hunters to the refuge. The youngsters were selected by lottery administered by TPWD. Mentors accompanied the youth for the weekend, camping and hunting on the refuge. While no animals were harvested, the hunt afforded an opportune time to impart lessons on wildlife biology and habitat management and how ethical hunting figures into conservation. Refuge staff and mentors expect these enthused young hunters to participate in future hunts.
Supportive Stakeholders: Texas Parks and Wildlife Department
Impacted Location: North Texas and southern Oklahoma

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
Arizona Daily Star (Tucson) Wildlife losses due to SE Arizona windfarm	Under reporter investigation. Publication date uncertain	Tony Davis (Ariz Daily Star) contacted FWS to follow up on results of 3-year-old SE Arizona windfarm (in advance of permit application for an additional facility). He is finding that a golden eagle and endangered lesser long-nosed bats have perished, reporting is delayed and wildlife permitting of the operation is incomplete. (There may be LE ramifications). Reporter investigation ongoing
Hatchery International Saving the Apache Trout	Feb 2018	This industry publication covers the work of conservation and commercial hatcheries worldwide. The story penned by Ext. Aff. staff communicates the work of Southwest Region field stations to recover threatened Apache trout in concert with Native Americans. hatcheryinternational.com
Southwest Fly Fishing Magazine	TBD	Professional writer Wayne Snyder seeks information on Gila trout, anticipating writing a feature story on fishing for the native Southwestern trout.

Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel
None

Hot Topics - Week Ahead Announcements and Actions
See ESA actions below

Upcoming Workshops & Meetings

Feb. – Meet and Greet meetings and introductory phone calls continue between incoming Regional Director and Members of the Congressional Delegation within the Southwest Region. A Meet and Greet with staff for Sen. Udall (NM) and Sen. Heinrich (NM) is scheduled for Feb. 2nd at the Regional Office. (R2 – Southwest Region)

Feb TBD – FWS asked to attend meeting with Forest Service and private grazing allottee by Rep Pearce's Office (R NM 02). The meeting will take place in Cloudcroft, New Mexico, and by conference call. Field Supervisor for FWS New Mexico ES Office participating in the meeting. See Items of Note for more. (R2 – Southwest Region)

Endangered Species Act Recovery Actions

UPDATE: On Jan 23, Amy Lueders, Regional Director, Ted Koch, Assistant Regional Director, Ecological Services, and Sherry Barrett, Mexican Wolf Recovery Coordinator, Southwest Regional Office, met with the Chairman of the New Mexico State Game Commission and the Director of the New Mexico Department of Game and Fish to discuss recovery of the Mexican wolf in New Mexico and the status of Mexican wolf recovery in Mexico. Discussions included updates on the MOA with the states for releases of Mexican wolves, permit applications, the Partnership MOU, the 2017 count and capture operations, status of recovery and funding for Mexico, and communication opportunities. (R2 – Southwest Region)

UPDATE: Gypsum wild-buckwheat – As early as spring 2018, FWS will withdraw its January 6, 2017, proposal to delist of the Gypsum wild-buckwheat (a threatened plant that occurs in New Mexico). The proposed rule to delist gypsum wild-buckwheat was predicated upon the Bureau of Land Management's (BLM) ability to incorporate specific land use restrictions for the plant into their revised Resource Management Plan (RMP), which would alleviate the threat of surface disturbance activities in occupied gypsum wild-buckwheat habitat. However, the RMP revision is not complete, and current land management practices are not sufficient to support removing the species from the Federal List of Endangered and Threatened Plants. Therefore, the gypsum wild-buckwheat still warrants protection as a threatened species under the Endangered Species Act. News bulletin under preparation. (R2 – Southwest Region)

REPEAT: Draft Recovery Plan for Four Aquatic Invertebrates – FWS will make available and seek comment on a draft recovery plan for four aquatic invertebrates found in desert grasslands in southeast New Mexico and southwest Texas in February 2018. Noel's amphipod, Pecos assiminea, Koster's springsnail, and Roswell springsnail were listed as endangered in 2005. The primary threats to all four species are threats to the quantity and quality of water. Activities, such as oil and gas drilling, water withdrawls from the aquifer and contamination are the greatest threats. Most occupied sites are on FWS Bitter Lake National Wildlife Refuge in New Mexico and The Nature Conservancy holdings in Texas. (R2 – Southwest Region)

REPEAT: Kuenzler hedgehog cactus downlisting – FWS will finalize the downlisting of Kuenzler hedgehog cactus as soon as February 28, 2018. When first listed, only one population of 200 plants was known. The discovery of additional populations, together with efforts to conserve the plant and its habitat, indicate the cactus is no longer at risk of extinction. Today, there are 3,300 individual cacti in 11 known populations within its southern New Mexico range.

Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild. (R2 – Southwest Region)

REPEAT: American Burying Beetle Species Status Assessment and 12-month finding – FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed prior to the issuance of a 12-month finding which is expected to occur in winter 2018. In June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

Endangered Species Act Listing Actions

UPDATED: Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff are currently working to review, organize, and respond to comments received from the external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the States, and others. (R2 Southwest Region & R6 Mountain-Prairie Region)

REPEAT: Texas hornshell final listing determination – In mid-February, the FWS expects to publish a final rule listing the Texas hornshell as endangered. The Texas hornshell naturally occurred in New Mexico, Texas and Mexico. The population has declined notably and currently occupies approximately 15 percent of its historical range. A six-month extension on the final listing determination was published on August 10, 2017. The Candidate Conservation Agreement and Candidate Conservation Agreement with Assurances covering the Texas hornshell and four other species in the northern portion of its range (primarily New Mexico) were signed in October 2017. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned at time of publication in the *Federal Register*. (R2 – Southwest Region)

UPDATED: Tobusch fishhook cactus downlisting notice – In late February, FWS will publish a final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved "fishhook" spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to down list the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened.

Local interest is anticipated. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the Federal Register. (R2 – Southwest Region)

Other Items of Note

NEW: Havasu National Wildlife Refuge in Arizona is partnering with the U.S. Department of Agriculture for a second year to eradicate feral swine on refuge lands. Feral swine are invasive and damage natural resources and property, impact agricultural lands, and pose a human health risk due to numerous diseases they carry including Salmonella, leptospirosis, and Escherichia coli (E. coli). Eradication efforts will be conducted by one helicopter using specially trained USDA-APHIS-WS personnel, following policy and procedures established to ensure safe, humane, and environmentally sound practices. Efforts will take place the first two weeks of February. (R2 – Southwest Region)

UPDATE: Lower Colorado River Multi-Species Habitat Conservation Plan – As early as February 13, FWS will sign a FONSI on an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake. The LCR-MSCP is a long-term program created in 2005 to minimize and mitigate impacts that water delivery and power generation along the lower Colorado River may have on 26 fish and wildlife species, including six species protected under the Endangered Species Act. LCR-MSCP is responsible for creating, replacing, and managing habitat for these species and operates under an ESA permit. However, in the early 2000s, when the LCR-MSCP was conceived, the largely aquatic, northern Mexican gartersnake was long-thought to have been extirpated from the lower Colorado River. In 2014, the subspecies was added to the list of threatened animals protected under the ESA. A public comment on the draft environmental assessment closed December 28, 2017. Outreach will include a news bulletin and notifying stakeholders and tribes. For more information, visit: https://www.fws.gov/southwest/es/arizona/ (R2 – Southwest Region)

UPDATE: Ted Koch, Assistant Regional Director, Ecological Services, met with the New Mexico's Catron County Commissioners on January 11, 2018, to explore avenues to improve communication and collaboration in reference to the Mexican wolf recovery program. The Commissioners signed an agreement to receive a radio receiver to monitor Mexican wolf locations in relation to humans and livestock, and they requested additional information on a 2016 OIG investigation. (R2 – Southwest Region)

UPDATE: Lesser Prairie-Chicken Conservation Partners Forum – FWS met with representatives from the five range state fish and game agencies, the Western Association of Fish and Wildlife Agencies, NRCS and other partners to discuss coordination on lesser prairie-chicken issues. The meetings were held on January 17-18, 2018, in Edmond, Oklahoma. (R2-Southwest Region and R6-Mountain Prairie Region)

UPDATE: On January 12, 2018, FWS submitted permit applications to New Mexico Department of Game and Fish (NMDGF) to import and release up to 12 Mexican wolf pups in New Mexico, to import a female wolf from Arizona for artificial insemination at Sevilleta Wolf Management Facility, and to import up to 6 pups from Arizona to be held at Sevilleta or Ladder Ranch Wolf

Management Facilities, if needed. The Mexican Wolf Initial Release and Translocation Proposal for 2018 was provided for public review and comment from December 4 to 29. FWS received just over 100 comments, which were transmitted to NMDGF, per their regulations, along with the permit applications. The initial releases and translocations outlined in this document are consistent with: (1) the 2014 Final Environmental Impact Statement (EIS) for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (2) the 2015 Record of Decision for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (3) the 2015 Final Rule - Revisions to the Regulations for the Nonessential Experimental Population of the Mexican Wolf, and the 2017 Mexican Wolf Recovery Plan, First Revision. NMDGF signed the permits on January 19, 2018. (R2 – Southwest Region)

REPEAT: American Electric Power (AEP) draft Habitat Conservation Plan – In late February FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning on holding public meetings during the 60-day public comment period. Controversy level is low. Outreach planned. (R2 Southwest Region and R4 Southeast Region)

UPDATE: FWS asked to attend a meeting with U.S. Forest Service and private grazing allottee by Rep Pearce's Office (R NM 02). The meeting is being rescheduled for Feburary, date TBD. Continuing discussions on the grazing allotment in Cloudcroft, New Mexico (Lincoln National Forest) on site and via conference call. The goal of the meeting is to continue discussions on the development of a framework to address long-term land management practices that will benefit the New Mexico Meadow jumping mouse while meeting the needs of the permittee and the mission of the Forest Service. See previous report for more information. (R2 – Southwest Region)

REPEAT: Leander Independent School District (LISD) ITP – FWS will announce in the *Federal Register* a Notice of Intent to prepare a draft National Environmental Policy Act Environmental Assessment on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. LISD submitted a draft habitat conservation plan and incidental take permit (ITP). The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. A conference call was held with Senator Cornyn's staff to discuss the issue on December 11. More details available in past reports. (R2 – Southwest Region)

REPEAT: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review in February 2018. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in early 2018. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2 – Southwest Region)

REPEAT: Arizona Electric Power Cooperative Candidate Conservation Agreement with Assurances for Sonoran Desert Tortoise – FWS anticipates publishing in the *Federal Register* in the next 45-60 days, a Notice of Availability for the Arizona Electric Power Cooperative (AEPCO) Draft Candidate Conservation Agreement with Assurances (dCCAA) for Sonoran Desert Tortoise and their application for an enhancement of survival permit (ESP) in Arizona. AEPCO has developed a conservation agreement that would promote conservation for the unlisted Sonoran Desert tortoise within 2,152 acres of their right-of-way during normal operation and maintenance activities. If approved the term of the dCCAA and ESP would be 25 years. No formal news bulletin will be released. Outreach to local, State, and Federal agencies and partners. (R2-Southwest Region)

REPEAT: FWS and partners will conduct the annual wolf population survey and capture, weather conditions permitting from January 24, 2018 through February 2, 2018. The Mexican Wolf Recovery Program is a multi-agency cooperative effort between the FWS, Arizona Game and Fish Department, U.S. Forest Service, USDA-Animal and Plant Health Inspection Service, Wildlife Services and the White Mountain Apache Tribe, as well as in consultation with the New Mexico Department of Game and Fish. Survey flights will occur on the Fort Apache Indian Reservation, Apache and Gila National Forests in eastern Arizona and western New Mexico, and possibly on some areas immediately outside the forests. Not open to the public. Limited media opportunities may be arranged, when possible. (R2 – Southwest Region).

REPEAT: Mexican Wolf Recovery Plan, First Revision – On November 29, FWS published the final Mexican Wolf Recovery Plan, First Revision. The comment period for the draft revision of the Mexican Wolf Recovery Plan closed August 29, 2017. FWS received more than 101,000 comments (this number includes signed petitions). Due to the high level of visibility and controversy on Mexican wolf recovery in general, extensive outreach was conducted, including personal phone calls to State partners, Members of Congress and Tribal Leaders, in addition to numerous meetings and interactions with other interested parties. FWS was under a Court settlement agreement to complete the final plan by the end of November 2017. On Wednesday, November 29, FWS received two Notices of Intent to sue from environmental groups – One on behalf of the Center for Biological Diversity, Defenders of Wildlife, and others and a second on behalf of the WildEarth Guardians and Western Watersheds project. The First Revision continues to generate media interest. See previous reports for additional background. (R2 – Southwest Region)

REPEAT: Western Travis County Public Utility Agency Draft Habitat Conservation Plan – FWS anticipates publishing in the *Federal Register* in the next 45-60 days, a Notice of Availability for the Western Travis County Public Utility Agency's (WTCPUA) Habitat Conservation Plan (DHCP) and their application for an incidental take permit (ITP) in Texas. WTCPUA is preparing to construct a 2.2 mile secondary water pipeline near its existing water transmission main for redundancy and parallel capacity. Construction, operations and maintenance of the Raw Water Transmission Main could impact the federally listed endangered golden-cheeked warbler. If approved the term of the dHCP and ITP would be 30 years. A news bulletin will be prepared and shared with local congressionals, partners and media. (R2-Southwest Region)

National Wildlife Refuge Actions

REPEAT: FWS Southwest Region is proactively reaching out to state agencies to discuss Secretarial Order 3356, and seek additional opportunities to support and expand hunting and fishing on Refuges in the Southwest. Currently the Oklahoma Department of Wildlife Conservation (ODWC) has been the most responsive to outreach. On November 9, 2017, FWS leadership met with ODWC to discuss several potential hunting and fishing opportunities that could occur on Refuges in Oklahoma. A follow up meeting with ODWC is planned in January 2018. The FWS Southwest Region will continue to reach out to Texas, Arizona and New Mexico as well as Oklahoma to explore more opportunities. (R2 – Southwest Region)

REPEAT: Impact of Cattle Fever Ticks to Cattle Industry in South Texas – FWS continues to work with Texas Animal Health Commission and U.S. Department of Agriculture-Animal and Plant Health Inspection Service (USDA-APHIS) regarding cattle fever tick treatment at the FWS Laguna Atascosa and Lower Rio Grande Valley National Wildlife Refuges. The FWS Laguna Atascosa NWR and portions of the FWS Lower Rio Grande Valley NWR remain under quarantine at this time. Currently, FWS has made a decision to move forward with evaluating, through the NEPA process, the chemically treating white-tailed deer and conducting an experimental cattle grazing program on the Lower Rio Grande Valley and Laguna Atascosa NWRs. The USDA and FWS determined that the best option for moving forward with the NEPA process is with USDA as the lead agency and FWS as a cooperating agency. The USDA anticipates making the draft Environmental Assessment available for public comment starting December 20 for 30 days. FWS is proposing a joint public notice between all entities (FWS, USDA, TAHC) be issued announcing public comment period. FWS is committed to continuing discussions and proactive actions in cooperation with the USDA-APHIS, the Texas Animal Health Commission, private ranchers and others to aid in the battle to combat the cattle fever tick. Of media interest. Significant Congressional interest in efforts to combat cattle fever tick. More details available in past reports. (R2 – Southwest Region)

REPEAT: FWS New Mexico National Wildlife Refuges Awarded Restoration Grant – FWS Bosque del Apache and Valle de Oro NWRs along with other federal and non-federal partners were recently awarded a 1 million North American Wetlands Conservation Act (NAWCA) grant for restoration and enhancement of nearly 1,100 acres in the Middle Rio Grande Valley in New Mexico. NAWCA grants increase bird populations and wetland habitat, while supporting local economies and American traditions such as hunting, fishing, wildlife observation, family farming, and cattle ranching. Funding for the project is currently on hold until a full budget is

passed. A field visit planned for the week of January 15, 2018 hosted by Ducks Unlimited that included Senator Udall (D NM) and Rep Pearce (R NM 02) has been postponed. A re-schedule date has not yet been identified. (R2 – Southwest Region)

REPEAT: Urban Youth Gaining Outdoor Work Experience – FWS as part of an urban partnership, is bringing students from Furr High School in Houston, Texas to the FWS Trinity River National Wildlife Refuge to enable them to gain back country experience. In January 2018 (date TBD), several Furr High School students (10 to 15 expected) will work alongside FWS to continue construction of a trail within the Refuge during their camping/backpacking experience. The experience is meant to introduce students to careers in conservation and will emphasize land management issues, developing public use opportunities (including hunting, fishing and wildlife watching), team building and leadership skills. The desired outcome is that the students will take learned skills back to their school, which is adjacent to Houston Parks and Recreation's Herman Brown Park, a 900-acre park that the school uses as an outdoor classroom. The urban partnership plans to build on this experience on other FWS/TPWD led programs on hunting, fishing, and wildlife watching conducted in classroom and on the city park. (R2 – Southwest Region)

Border-Related Activities

UPDATE: National Wildlife Refuge staff has received notice of an independently organized rally to "Save Santa Ana National Wildlife Refuge" taking place Saturday, January 27 from 11 a.m. to 2:00 p.m. The Sierra Club is organizing the rally, which will take place in a field east of the refuge. Congressman Vela is expected to attend, and representatives from the 19 cities/counties that passed resolutions opposing the proposed border wall have been invited. The event was to coincide with a FWS-organized 75th anniversary event at Santa Ana National Wildlife Refuge, however due to the government the anniversary event has been cancelled. FWS will have increased law enforcement as well as External Affairs support onsite to help as needed. (R2 – Southwest Region)

REPEAT: Jan 2018 – Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require transporting water from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade / replace pump and water delivery components to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

REPEAT: Jan 2018 – Border Coordination: Road Construction - On March 20, FWS was contacted by the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to coordinate an upcoming road construction project for a 5.9-mile portion of the Presumido Canyon Road through the Baboquivari Mountains, scheduled to begin in January 2018. The project will require water for the construction, and U.S. Customs and Border

Protection (CBP) will perform maintenance of an FWS pump and water well in return for increased use of the FWS-owned well. (R2 – Southwest Region)

REPEAT: Feb 2018 – Border Coordination: Communication Towers - FWS and U.S. Customs and Border Protection (CBP) are continuing discussions and plans to advance Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge would be affected, with the goal of upgrading technology and providing a more robust foundation within the existing footprint. Design work is in progress. Construction activities are anticipated to begin in February 2018 dependent upon completion of planning, engineering, and permitting requirements. (R2 – Southwest Region)

Fish and Aquatic Conservation

REPEAT: FWS Willow Beach National Fish Hatchery, in partnership with Arizona Game and Fish Department, announced the beginning of the annual rainbow trout sportfish stocking season in the lower Colorado River immediately below Lake Mohave/Davis Dam in late October. Neighboring communities include Laughlin, Nevada and Bullhead City, Arizona. FWS will stock about 1, 750 trout every week from early October through March 2018. Stocking sites include Davis Camp, Community Park, and Rotary Park for October-December. From January 2018 through March 2018, stocking sites will be Davis Camp and Community Park. In addition to the annual stocking season below Davis Dam, FWS Willow Beach NFH continues to stock rainbow every week, year round, at Willow Beach Marina, Arizona. (R2 – Southwest Region)

FishBites Report

Angler Access Improved at Hagerman National Wildlife Refuge at Lake Texoma
Topic: Newly constructed production pads for oil and gas development at Hagerman National Wildlife Refuge were mitigated by easing angler access to refuge waters at Lake Texoma. Hagerman's Sandy Day Use Area was improved by a mineral operator, replacing bollard and cable around a lot, leveling walkways and paving with coarse stone. Spoil, litter and discarded roots were hauled away by refuge volunteers. The small improvement can make a large difference for the 7,500 anglers and 2,500 birds that use the area. Anglers catch blue catfish, channel catfish, striped bass, white bass, and sunfishes while birders can check off bald eagle, peregrine falcon, herring gulls, white pelicans, red-tailed hawk, red-shouldered hawk, painted bunting, blue grosbeak, or summer tanager.
Supportive Stakeholders: Texas Parks and Wildlife Department
Impacted Location: North Texas and southern Oklahoma

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
Arizona Daily Star (Tucson) Range News (Willcox, AZ) Wildlife losses due to SE Arizona windfarm	Jan 27, 2018	Tony Davis (Ariz Daily Star) contacted FWS to follow up on results of 3-year-old southeast Arizona windfarm (in advance of permit application for an additional facility). A golden eagle and endangered lesser long-nosed bats have perished. Developers have only recently initiated efforts to reduce mortality and seek permitting. (There are law enforcement ramifications). http://tucson.com/news/local/willcox-area-wind-farm-under-investigation-for-bat-eagle-deaths/article_e82c4621-ecec-57c1-8b1c-7e59bf4770db html
Roosevelt's Game Preserve *Sporting Classics*	Feb 1, 2018	Consumer publication covering hunting and fishing and conservation: story covers elk hunting and conservation at Wichita Mtns Wildlife Refuge. http://sportingclassicsdaily.com/roosevelts-game-preserve/
Hatchery International Saving the Apache Trout	Feb 2018	This industry publication covers the work of conservation and commercial hatcheries worldwide. The story penned by Ext. Aff. staff communicates the work of Southwest Region field stations to recover threatened Apache trout in concert with Native Americans. hatcheryinternational.com

Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel
None

Hot Topics - Week Ahead Announcements and Actions
See ESA actions below

Upcoming Workshops & Meetings
Feb. – Meet and Greet meetings and introductory phone calls continue between incoming Regional Director and Members of the Congressional Delegation within the Southwest Region. A Meet and Greet with staff for Sen. Udall (NM) and Sen. Heinrich (NM) is scheduled for Feb. 2nd at the Regional Office. (R2 – Southwest Region)

Feb TBD – FWS asked to attend meeting with Forest Service and private grazing allottee by Rep Pearce's Office (R NM 02). The meeting will take place in Cloudcroft, New Mexico, and by conference call. Field Supervisor for FWS New Mexico ES Office participating in the meeting. See Items of Note for more. (R2 – Southwest Region)

Endangered Species Act Recovery Actions

NEW: Lesser Long-Nosed Bat Delisting and Notice of Availability of Draft Post-Delisting Monitoring – In two separate, but associated announcements, FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the delisting of the lesser long-nosed bat and the final delisting of the LLNB. Target date for submitting to the Federal Register is March 30, 2018. This action is not expected to be opposed. Stakeholders are the petitioners, Pacific Legal Foundation and the New Mexico Cattle Growers Association. Proactive conservation stakeholders include Pima County MSCP and hundreds of citizen scientists monitor bats each summer and fall when this migratory species returns to roosts in the U.S. A communications strategy and news release will be prepared (but hasn't been drafted yet). (R2 – Southwest Region)

UPDATED: Kuenzler hedgehog cactus downlisting – FWS will finalize the downlisting of Kuenzler hedgehog cactus as soon as February 28, 2018. When first listed, only two populations totaling 200 plants were known. Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known populations within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild. (R2 – Southwest Region)

REPEAT: On Jan 23, Amy Lueders, Regional Director, Ted Koch, Assistant Regional Director, Ecological Services, and Sherry Barrett, Mexican Wolf Recovery Coordinator, Southwest Regional Office, met with the Chairman of the New Mexico State Game Commission and the Director of the New Mexico Department of Game and Fish to discuss recovery of the Mexican wolf in New Mexico and the status of Mexican wolf recovery in Mexico. Discussions included updates on the MOA with the states for releases of Mexican wolves, permit applications, the

Partnership MOU, the 2017 count and capture operations, status of recovery and funding for Mexico, and communication opportunities. (R2 – Southwest Region)

REPEAT: Gypsum wild-buckwheat – As early as spring 2018, FWS will withdraw its January 6, 2017, proposal to delist of the Gypsum wild-buckwheat (a threatened plant that occurs in New Mexico). The proposed rule to delist gypsum wild-buckwheat was predicated upon the Bureau of Land Management's (BLM) ability to incorporate specific land use restrictions for the plant into their revised Resource Management Plan (RMP), which would alleviate the threat of surface disturbance activities in occupied gypsum wild-buckwheat habitat. However, the RMP revision is not complete, and current land management practices are not sufficient to support removing the species from the Federal List of Endangered and Threatened Plants. Therefore, the gypsum wild-buckwheat still warrants protection as a threatened species under the Endangered Species Act. News bulletin under preparation. (R2 – Southwest Region)

REPEAT: Draft Recovery Plan for Four Aquatic Invertebrates – FWS will make available and seek comment on a draft recovery plan for four aquatic invertebrates found in desert grasslands in southeast New Mexico and southwest Texas in February 2018. Noel's amphipod, Pecos assiminea, Koster's springsnail, and Roswell springsnail were listed as endangered in 2005. The primary threats to all four species are threats to the quantity and quality of water. Activities, such as oil and gas drilling, water withdrawls from the aquifer and contamination are the greatest threats. Most occupied sites are on FWS Bitter Lake National Wildlife Refuge in New Mexico and The Nature Conservancy holdings in Texas. (R2 – Southwest Region)

REPEAT: American Burying Beetle Species Status Assessment and 12-month finding – FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed prior to the issuance of a 12-month finding which is expected to occur in winter 2018. In June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

Endangered Species Act Listing Actions

REPEAT: Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff are currently working to review, organize, and respond to comments received from the external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the States, and others. (R2 Southwest Region & R6 Mountain-Prairie Region)

REPEAT: Texas hornshell final listing determination – In mid-February, the FWS expects to publish a final rule listing the Texas hornshell as endangered. The Texas hornshell naturally occurred in New Mexico, Texas and Mexico. The population has declined notably and currently occupies approximately 15 percent of its historical range. A six-month extension on the final listing determination was published on August 10, 2017. The Candidate Conservation Agreement and Candidate Conservation Agreement with Assurances covering the Texas hornshell and four other species in the northern portion of its range (primarily New Mexico) were signed in October 2017. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned at time of publication in the *Federal Register*. (R2 – Southwest Region)

REPEAT: Tobusch fishhook cactus downlisting notice – In late February, FWS will publish a final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved "fishhook" spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to down list the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened. Local interest is anticipated. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the Federal Register. (R2 – Southwest Region)

Other Items of Note

REPEAT: Havasu National Wildlife Refuge in Arizona is partnering with the U.S. Department of Agriculture for a second year to eradicate feral swine on refuge lands. Feral swine are invasive and damage natural resources and property, impact agricultural lands, and pose a human health risk due to numerous diseases they carry including Salmonella, leptospirosis, and Escherichia coli (E. coli). Eradication efforts will be conducted by one helicopter using specially trained USDA-APHIS-WS personnel, following policy and procedures established to ensure safe, humane, and environmentally sound practices. Efforts will take place the first two weeks of February. (R2 – Southwest Region)

REPEAT: Lower Colorado River Multi-Species Habitat Conservation Plan – As early as February 13, FWS will sign a FONSI on an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake. The LCR-MSCP is a long-term program created in 2005 to minimize and mitigate impacts that water delivery and power generation along the lower Colorado River may have on 26 fish and wildlife species, including six species protected under the Endangered Species Act. LCR-MSCP is responsible for creating, replacing, and managing habitat for these species and operates under an ESA permit. However, in the early 2000s, when the LCR-MSCP was conceived, the largely aquatic, northern Mexican gartersnake was long-thought to have been extirpated from the lower Colorado River. In 2014, the subspecies was added to the list of threatened animals protected under the ESA. A public comment on the draft environmental assessment closed December 28,

2017. Outreach will include a news bulletin and notifying stakeholders and tribes. For more information, visit: https://www.fws.gov/southwest/es/arizona/ (R2 – Southwest Region)

REPEAT: Ted Koch, Assistant Regional Director, Ecological Services, met with the New Mexico's Catron County Commissioners on January 11, 2018, to explore avenues to improve communication and collaboration in reference to the Mexican wolf recovery program. The Commissioners signed an agreement to receive a radio receiver to monitor Mexican wolf locations in relation to humans and livestock, and they requested additional information on a 2016 OIG investigation. (R2 – Southwest Region)

REPEAT: On January 12, 2018, FWS submitted permit applications to New Mexico Department of Game and Fish (NMDGF) to import and release up to 12 Mexican wolf pups in New Mexico, to import a female wolf from Arizona for artificial insemination at Sevilleta Wolf Management Facility, and to import up to 6 pups from Arizona to be held at Sevilleta or Ladder Ranch Wolf Management Facilities, if needed. The Mexican Wolf Initial Release and Translocation Proposal for 2018 was provided for public review and comment from December 4 to 29. FWS received just over 100 comments, which were transmitted to NMDGF, per their regulations, along with the permit applications. The initial releases and translocations outlined in this document are consistent with: (1) the 2014 Final Environmental Impact Statement (EIS) for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (2) the 2015 Record of Decision for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (3) the 2015 Final Rule - Revisions to the Regulations for the Nonessential Experimental Population of the Mexican Wolf, and the 2017 Mexican Wolf Recovery Plan, First Revision. NMDGF signed the permits on January 19, 2018. (R2 – Southwest Region)

REPEAT: American Electric Power (AEP) draft Habitat Conservation Plan – In late February FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning on holding public meetings during the 60-day public comment period. Controversy level is low. Outreach planned. (R2 Southwest Region and R4 Southeast Region)

REPEAT: FWS asked to attend a meeting with U.S. Forest Service and private grazing allottee by Rep Pearce's Office (R NM 02). The meeting is being rescheduled for Feburary, date TBD. Continuing discussions on the grazing allotment in Cloudcroft, New Mexico (Lincoln National Forest) on site and via conference call. The goal of the meeting is to continue discussions on the development of a framework to address long-term land management practices that will benefit the New Mexico Meadow jumping mouse while meeting the needs of the permittee and the mission of the Forest Service. See previous report for more information. (R2 – Southwest Region)

REPEAT: Leander Independent School District (LISD) ITP – FWS will announce in the *Federal Register* a Notice of Intent to prepare a draft National Environmental Policy Act Environmental Assessment on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. LISD submitted a draft habitat conservation plan and incidental take permit (ITP). The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. A conference call was held with Senator Cornyn's staff to discuss the issue on December 11. More details available in past reports. (R2 – Southwest Region)

REPEAT: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review in February 2018. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in early 2018. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2 – Southwest Region)

REPEAT: Arizona Electric Power Cooperative Candidate Conservation Agreement with Assurances for Sonoran Desert Tortoise – FWS anticipates publishing in the *Federal Register* in the next 45-60 days, a Notice of Availability for the Arizona Electric Power Cooperative (AEPCO) Draft Candidate Conservation Agreement with Assurances (dCCAA) for Sonoran Desert Tortoise and their application for an enhancement of survival permit (ESP) in Arizona. AEPCO has developed a conservation agreement that would promote conservation for the unlisted Sonoran Desert tortoise within 2,152 acres of their right-of-way during normal operation and maintenance activities. If approved the term of the dCCAA and ESP would be 25 years. No formal news bulletin will be released. Outreach to local, State, and Federal agencies and partners. (R2-Southwest Region)

REPEAT: FWS and partners will conduct the annual wolf population survey and capture, weather conditions permitting from January 24, 2018 through February 2, 2018. The Mexican Wolf Recovery Program is a multi-agency cooperative effort between the FWS, Arizona Game and Fish Department, U.S. Forest Service, USDA-Animal and Plant Health Inspection Service, Wildlife Services and the White Mountain Apache Tribe, as well as in consultation with the New Mexico Department of Game and Fish. Survey flights will occur on the Fort Apache Indian Reservation, Apache and Gila National Forests in eastern Arizona and western New Mexico, and possibly on some areas immediately outside the forests. Not open to the public. Limited media opportunities may be arranged, when possible. (R2 – Southwest Region).

REPEAT: Mexican Wolf Recovery Plan, First Revision – On November 29, FWS published the final Mexican Wolf Recovery Plan, First Revision. The comment period for the draft revision of the Mexican Wolf Recovery Plan closed August 29, 2017. FWS received more than 101,000 comments (this number includes signed petitions). Due to the high level of visibility and controversy on Mexican wolf recovery in general, extensive outreach was conducted, including personal phone calls to State partners, Members of Congress and Tribal Leaders, in addition to numerous meetings and interactions with other interested parties. FWS was under a Court settlement agreement to complete the final plan by the end of November 2017. On Wednesday, November 29, FWS received two Notices of Intent to sue from environmental groups – One on behalf of the Center for Biological Diversity, Defenders of Wildlife, and others and a second on behalf of the WildEarth Guardians and Western Watersheds project. The First Revision continues to generate media interest. See previous reports for additional background. (R2 – Southwest Region)

REPEAT: Western Travis County Public Utility Agency Draft Habitat Conservation Plan – FWS anticipates publishing in the *Federal Register* in the next 45-60 days, a Notice of Availability for the Western Travis County Public Utility Agency's (WTCPUA) Habitat Conservation Plan (DHCP) and their application for an incidental take permit (ITP) in Texas. WTCPUA is preparing to construct a 2.2 mile secondary water pipeline near its existing water transmission main for redundancy and parallel capacity. Construction, operations and maintenance of the Raw Water Transmission Main could impact the federally listed endangered golden-cheeked warbler. If approved the term of the dHCP and ITP would be 30 years. A news bulletin will be prepared and shared with local congressionals, partners and media. (R2-Southwest Region)

National Wildlife Refuge Actions

REPEAT: Hagerman NWR hosted a youth archery deer and feral hog hunt January 19-21, 2018. Refuge staff partnered with Texas Parks and Wildlife Department's (TPWD) Texas Youth Hunting Program to bring six youth hunters to the refuge. The youngsters were selected by lottery administered by TPWD. Mentors accompanied the youth for the weekend, camping and hunting on the refuge. While no animals were harvested, the hunt afforded an opportune time to impart lessons on wildlife biology and habitat management and how ethical hunting figures into conservation. Refuge staff and mentors expect these enthused young hunters to participate in future hunts. (R2 – Southwest Region)

REPEAT: FWS Southwest Region is proactively reaching out to state agencies to discuss Secretarial Order 3356, and seek additional opportunities to support and expand hunting and fishing on Refuges in the Southwest. Currently the Oklahoma Department of Wildlife Conservation (ODWC) has been the most responsive to outreach. On November 9, 2017, FWS leadership met with ODWC to discuss several potential hunting and fishing opportunities that could occur on Refuges in Oklahoma. A follow up meeting with ODWC is planned in January 2018. The FWS Southwest Region will continue to reach out to Texas, Arizona and New Mexico as well as Oklahoma to explore more opportunities. (R2 – Southwest Region)

REPEAT: Impact of Cattle Fever Ticks to Cattle Industry in South Texas – FWS continues to work with Texas Animal Health Commission and U.S. Department of Agriculture-Animal and Plant Health Inspection Service (USDA-APHIS) regarding cattle fever tick treatment at the FWS

Laguna Atascosa and Lower Rio Grande Valley National Wildlife Refuges. The FWS Laguna Atascosa NWR and portions of the FWS Lower Rio Grande Valley NWR remain under quarantine at this time. Currently, FWS has made a decision to move forward with evaluating, through the NEPA process, the chemically treating white-tailed deer and conducting an experimental cattle grazing program on the Lower Rio Grande Valley and Laguna Atascosa NWRs. The USDA and FWS determined that the best option for moving forward with the NEPA process is with USDA as the lead agency and FWS as a cooperating agency. The USDA anticipates making the draft Environmental Assessment available for public comment starting December 20 for 30 days. FWS is proposing a joint public notice between all entities (FWS, USDA, TAHC) be issued announcing public comment period. FWS is committed to continuing discussions and proactive actions in cooperation with the USDA-APHIS, the Texas Animal Health Commission, private ranchers and others to aid in the battle to combat the cattle fever tick. Of media interest. Significant Congressional interest in efforts to combat cattle fever tick. More details available in past reports. (R2 – Southwest Region)

REPEAT: FWS New Mexico National Wildlife Refuges Awarded Restoration Grant – FWS Bosque del Apache and Valle de Oro NWRs along with other federal and non-federal partners were recently awarded a 1 million North American Wetlands Conservation Act (NAWCA) grant for restoration and enhancement of nearly 1,100 acres in the Middle Rio Grande Valley in New Mexico. NAWCA grants increase bird populations and wetland habitat, while supporting local economies and American traditions such as hunting, fishing, wildlife observation, family farming, and cattle ranching. Funding for the project is currently on hold until a full budget is passed. A field visit planned for the week of January 15, 2018 hosted by Ducks Unlimited that included Senator Udall (D NM) and Rep Pearce (R NM 02) has been postponed. A re-schedule date has not yet been identified. (R2 – Southwest Region)

REPEAT: Urban Youth Gaining Outdoor Work Experience – FWS as part of an urban partnership, is bringing students from Furr High School in Houston, Texas to the FWS Trinity River National Wildlife Refuge to enable them to gain back country experience. In January 2018 (date TBD), several Furr High School students (10 to 15 expected) will work alongside FWS to continue construction of a trail within the Refuge during their camping/backpacking experience. The experience is meant to introduce students to careers in conservation and will emphasize land management issues, developing public use opportunities (including hunting, fishing and wildlife watching), team building and leadership skills. The desired outcome is that the students will take learned skills back to their school, which is adjacent to Houston Parks and Recreation's Herman Brown Park, a 900-acre park that the school uses as an outdoor classroom. The urban partnership plans to build on this experience on other FWS/TPWD led programs on hunting, fishing, and wildlife watching conducted in classroom and on the city park. (R2 – Southwest Region)

Border-Related Activities

REPEAT: National Wildlife Refuge staff has received notice of an independently organized rally to “Save Santa Ana National Wildlife Refuge” taking place Saturday, January 27 from 11 a.m. to 2:00 p.m. The Sierra Club is organizing the rally, which will take place in a field east of the refuge. Congressman Vela is expected to attend, and representatives from the 19 cities/counties

that passed resolutions opposing the proposed border wall have been invited. The event was to coincide with a FWS-organized 75th anniversary event at Santa Ana National Wildlife Refuge, however due to the government the anniversary event has been cancelled. FWS will have increased law enforcement as well as External Affairs support onsite to help as needed. (R2 – Southwest Region)

REPEAT: Jan 2018 – Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require transporting water from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade / replace pump and water delivery components to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

REPEAT: Jan 2018 – Border Coordination: Road Construction - On March 20, FWS was contacted by the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to coordinate an upcoming road construction project for a 5.9-mile portion of the Presumido Canyon Road through the Baboquivari Mountains, scheduled to begin in January 2018. The project will require water for the construction, and U.S. Customs and Border Protection (CBP) will perform maintenance of an FWS pump and water well in return for increased use of the FWS-owned well. (R2 – Southwest Region)

REPEAT: Feb 2018 – Border Coordination: Communication Towers - FWS and U.S. Customs and Border Protection (CBP) are continuing discussions and plans to advance Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge would be affected, with the goal of upgrading technology and providing a more robust foundation within the existing footprint. Design work is in progress. Construction activities are anticipated to begin in February 2018 dependent upon completion of planning, engineering, and permitting requirements. (R2 – Southwest Region)

Fish and Aquatic Conservation

REPEAT: FWS Willow Beach National Fish Hatchery, in partnership with Arizona Game and Fish Department, announced the beginning of the annual rainbow trout sportfish stocking season in the lower Colorado River immediately below Lake Mohave/Davis Dam in late October. Neighboring communities include Laughlin, Nevada and Bullhead City, Arizona. FWS will stock about 1, 750 trout every week from early October through March 2018. Stocking sites include Davis Camp, Community Park, and Rotary Park for October-December. From January 2018 through March 2018, stocking sites will be Davis Camp and Community Park. In addition to the annual stocking season below Davis Dam, FWS Willow Beach NFH continues to stock rainbow every week, year round, at Willow Beach Marina, Arizona. (R2 – Southwest Region)

U.S. Fish and Wildlife Service
Through February 9, 2018

FishBites Report

More Trout for an Urban Refuge Valle del Oro National Wildlife Refuge
Topic: Trout live in pretty places and you can now count Valle del Oro National Wildlife Refuge among them. The urban refuge located on the periphery of Albuquerque, NM, is one more place for New Mexicans to catch trout. The Mexico Department of Game and Fish now stocks 50 rainbow trout per week in the cold waters flowing through the edge of the refuge. Trout fishing only adds to the visitor experience at the Southwest's first urban national wildlife refuge.
Supportive Stakeholders: New Mexico Department of Game and Fish
Impacted Location: Northern and central New Mexico

Hands-on Erosion Control Service Project
Topic: On January 15, 2018, two dozen volunteers braved bracing temperatures for a service learning project at Rio Mora National Wildlife Refuge. The volunteers comprised mostly of students, professors and family members affiliated with United World College in Montezuma, NM. Student there they are completing a two-year International Baccalaureate program. Volunteers from India, China, Israel, Peru, Malaysia, Hawaii and Minnesota worked alongside Denver Zoo staff to learn the importance of ecological restoration by building small rock-dams in gullies in the pinon-juniper woods to stave erosion.
Supportive Stakeholders: United World College
Impacted Location: Northeast New Mexico

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
Mexican wolf		Jan. 30 - Three reporters from Arizona State University's Cronkite News attended the annual Mexican wolf in Alpine, AZ. The reporters interviewed members of the Interagency Field Team and took photos and video of a captured wolf as it was being processed and released back into the wild.
Mexican wolf		Feb. 1 - Emery Cowan, reporter with the Arizona Daily Sun, emailed with questions on Mexican wolves nuisance removals, percentage of wolves counted each year from 1998-2012 that were captive-reared or conditioned vs completely wild-raised, and asked if there is a record of any Mexican wolves attacking or killing a human.

Mexican wolf		Feb. 6 - Ese Olumhense, reporter with the Chicago Tribune, requested information about the USFWS partnership with the Brookfield Zoo and the Endangered Wolf Center near St. Louis, MO.
Arizona Daily Star (Tucson) Range News (Willcox, AZ) Wildlife losses due to SE Arizona windfarm	Jan 27, 2018	Tony Davis (Ariz Daily Star) contacted FWS to follow up on results of 3-year-old southeast Arizona windfarm (in advance of permit application for an additional facility). A golden eagle and endangered lesser long-nosed bats have perished. Developers have only recently initiated efforts to reduce mortality and seek permitting. (There are law enforcement ramifications). http://tucson.com/news/local/willcox-area-wind-farm-under-investigation-for-bat-eagle-deaths/article_e82c4621-ecec-57c1-8b1c-7e59bf4770db html
Roosevelt's Game Preserve *Sporting Classics*	Feb 5, 2018	Consumer publication covering hunting and fishing and conservation: story covers elk hunting and conservation at Wichita Mtns Wildlife Refuge. http://sportingclassicsdaily.com/roosevelts-game-preserve/
Hatchery International Saving the Apache Trout	Feb 2018	https://www.hatcheryinternational.com/restocking/saving-the-apache-trout-3004 This industry publication covers the work of conservation and commercial hatcheries worldwide. The story penned by Ext. Aff. staff communicates the work of Southwest Region field stations to recover threatened Apache trout in concert with Native Americans.

Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel
None

Hot Topics - Week Ahead Announcements and Actions
See ESA actions below

Upcoming Workshops & Meetings
Feb. – Meet and Greet meetings and introductory phone calls continue between incoming Regional Director and Members of the Congressional Delegation within the Southwest Region. A Meet and Greet with staff for Sen. Udall (NM) and Sen. Heinrich (NM) is scheduled for Feb. 2nd at the Regional Office. (R2 – Southwest Region)

Feb TBD – FWS asked to attend meeting with Forest Service and private grazing allottee by Rep Pearce's Office (R NM 02). The meeting will take place in Cloudcroft, New Mexico, and by conference call. Field Supervisor for FWS New Mexico ES Office participating in the meeting. See Items of Note for more. (R2 – Southwest Region)

Endangered Species Act Recovery Actions

REPEAT: Lesser Long-Nosed Bat Delisting and Notice of Availability of Draft Post-Delisting Monitoring – In two separate, but associated announcements, FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the delisting of the lesser long-nosed bat and the final delisting of the LLNB. Target date for submitting to the Federal

Register is March 30, 2018. This action is not expected to be opposed. Stakeholders are the petitioners, Pacific Legal Foundation and the New Mexico Cattle Growers Association. Proactive conservation stakeholders include Pima County MSCP and hundreds of citizen scientists monitor bats each summer and fall when this migratory species returns to roosts in the U.S. A communications strategy and news release will be prepared (but hasn't been drafted yet). (R2 – Southwest Region)

REPEAT: Kuenzler hedgehog cactus downlisting – FWS will finalize the downlisting of Kuenzler hedgehog cactus as soon as February 28, 2018. When first listed, only two populations totaling 200 plants were known. Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known populations within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild. (R2 – Southwest Region)

REPEAT: Gypsum wild-buckwheat – As early as spring 2018, FWS will withdraw its January 6, 2017, proposal to delist of the Gypsum wild-buckwheat (a threatened plant that occurs in New Mexico). The proposed rule to delist gypsum wild-buckwheat was predicated upon the Bureau of Land Management's (BLM) ability to incorporate specific land use restrictions for the plant into their revised Resource Management Plan (RMP), which would alleviate the threat of surface disturbance activities in occupied gypsum wild-buckwheat habitat. However, the RMP revision is not complete, and current land management practices are not sufficient to support removing the species from the Federal List of Endangered and Threatened Plants. Therefore, the gypsum wild-buckwheat still warrants protection as a threatened species under the Endangered Species Act. News bulletin under preparation. (R2 – Southwest Region)

REPEAT: Draft Recovery Plan for Four Aquatic Invertebrates – FWS will make available and seek comment on a draft recovery plan for four aquatic invertebrates found in desert grasslands in southeast New Mexico and southwest Texas in February 2018. Noel's amphipod, Pecos assiminea, Koster's springsnail, and Roswell springsnail were listed as endangered in 2005. The primary threats to all four species are threats to the quantity and quality of water. Activities, such as oil and gas drilling, water withdrawls from the aquifer and contamination are the greatest threats. Most occupied sites are on FWS Bitter Lake National Wildlife Refuge in New Mexico and The Nature Conservancy holdings in Texas. (R2 – Southwest Region)

REPEAT: American Burying Beetle Species Status Assessment and 12-month finding – FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed prior to the issuance of a 12-month finding which is expected to occur in winter 2018. In June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

Endangered Species Act Listing Actions

REPEAT: Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff are currently working to review, organize, and respond to comments received from the external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the States, and others. (R2 Southwest Region & R6 Mountain-Prairie Region)

REPEAT: Texas hornshell final listing determination – In mid-February, the FWS expects to publish a final rule listing the Texas hornshell as endangered. The Texas hornshell naturally occurred in New Mexico, Texas and Mexico. The population has declined notably and currently occupies approximately 15 percent of its historical range. A six-month extension on the final listing determination was published on August 10, 2017. The Candidate Conservation Agreement and Candidate Conservation Agreement with Assurances covering the Texas hornshell and four other species in the northern portion of its range (primarily New Mexico) were signed in October 2017. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned at time of publication in the *Federal Register*. (R2 – Southwest Region)

REPEAT: Tobusch fishhook cactus downlisting notice – In late February, FWS will publish a final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved "fishhook" spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to down list the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened. Local interest is anticipated. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the Federal Register. (R2 – Southwest Region)

Other Items of Note

UPDATE: FWS and partners completed the annual Mexican wolf population survey and capture, from January 24, 2018 through February 3, 2018. The Mexican Wolf Recovery Program is a multi-agency cooperative effort between the FWS, Arizona Game and Fish Department, U.S. Forest Service, USDA- Wildlife Services, and the White Mountain Apache Tribe, as well as in consultation with the New Mexico Department of Game and Fish and counties. Survey flights occurred on the Fort Apache Indian Reservation, Apache, Coconino, Cibola, and Gila National Forests in eastern Arizona and western New Mexico, and some areas immediately outside the

forests. Some media attended the operations. The final count will be available in the next couple of weeks. (R2 – Southwest Region).

REPEAT: Havasu National Wildlife Refuge in Arizona is partnering with the U.S. Department of Agriculture for a second year to eradicate feral swine on refuge lands. Feral swine are invasive and damage natural resources and property, impact agricultural lands, and pose a human health risk due to numerous diseases they carry including Salmonella, leptospirosis, and Escherichia coli (E. coli). Eradication efforts will be conducted by one helicopter using specially trained USDA-APHIS-WS personnel, following policy and procedures established to ensure safe, humane, and environmentally sound practices. Efforts will take place the first two weeks of February. (R2 – Southwest Region)

REPEAT: Lower Colorado River Multi-Species Habitat Conservation Plan – As early as February 13, FWS will sign a FONSI on an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake. The LCR-MSCP is a long-term program created in 2005 to minimize and mitigate impacts that water delivery and power generation along the lower Colorado River may have on 26 fish and wildlife species, including six species protected under the Endangered Species Act. LCR-MSCP is responsible for creating, replacing, and managing habitat for these species and operates under an ESA permit. However, in the early 2000s, when the LCR-MSCP was conceived, the largely aquatic, northern Mexican gartersnake was long-thought to have been extirpated from the lower Colorado River. In 2014, the subspecies was added to the list of threatened animals protected under the ESA. A public comment on the draft environmental assessment closed December 28, 2017. Outreach will include a news bulletin and notifying stakeholders and tribes. For more information, visit: https://www.fws.gov/southwest/es/arizona/ (R2 – Southwest Region)

REPEAT: On January 12, 2018, FWS submitted permit applications to New Mexico Department of Game and Fish (NMDGF) to import and release up to 12 Mexican wolf pups in New Mexico, to import a female wolf from Arizona for artificial insemination at Sevilleta Wolf Management Facility, and to import up to 6 pups from Arizona to be held at Sevilleta or Ladder Ranch Wolf Management Facilities, if needed. The Mexican Wolf Initial Release and Translocation Proposal for 2018 was provided for public review and comment from December 4 to 29. FWS received just over 100 comments, which were transmitted to NMDGF, per their regulations, along with the permit applications. The initial releases and translocations outlined in this document are consistent with: (1) the 2014 Final Environmental Impact Statement (EIS) for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (2) the 2015 Record of Decision for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (3) the 2015 Final Rule - Revisions to the Regulations for the Nonessential Experimental Population of the Mexican Wolf, and the 2017 Mexican Wolf Recovery Plan, First Revision. NMDGF signed the permits on January 19, 2018. (R2 – Southwest Region)

REPEAT: American Electric Power (AEP) draft Habitat Conservation Plan – In late February FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation

Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning on holding public meetings during the 60-day public comment period. Controversy level is low. Outreach planned. (R2 Southwest Region and R4 Southeast Region)

REPEAT: FWS asked to attend a meeting with U.S. Forest Service and private grazing allottee by Rep Pearce's Office (R NM 02). The meeting is being rescheduled for Feburary, date TBD. Continuing discussions on the grazing allotment in Cloudcroft, New Mexico (Lincoln National Forest) on site and via conference call. The goal of the meeting is to continue discussions on the development of a framework to address long-term land management practices that will benefit the New Mexico Meadow jumping mouse while meeting the needs of the permittee and the mission of the Forest Service. See previous report for more information. (R2 – Southwest Region)

REPEAT: Leander Independent School District (LISD) ITP – FWS will announce in the *Federal Register* a Notice of Intent to prepare a draft National Environmental Policy Act Environmental Assessment on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. LISD submitted a draft habitat conservation plan and incidental take permit (ITP). The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. A conference call was held with Senator Cornyn's staff to discuss the issue on December 11. More details available in past reports. (R2 – Southwest Region)

REPEAT: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review in February 2018. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in early 2018. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2 – Southwest Region)

REPEAT: Arizona Electric Power Cooperative Candidate Conservation Agreement with Assurances for Sonoran Desert Tortoise – FWS anticipates publishing in the *Federal Register* in the next 45-60 days, a Notice of Availability for the Arizona Electric Power Cooperative (AEPCO) Draft Candidate Conservation Agreement with Assurances (dCCAA) for Sonoran Desert Tortoise and their application for an enhancement of survival permit (ESP) in Arizona. AEPCO has developed a conservation agreement that would promote conservation for the

unlisted Sonoran Desert tortoise within 2,152 acres of their right-of-way during normal operation and maintenance activities. If approved the term of the dCCAA and ESP would be 25 years. No formal news bulletin will be released. Outreach to local, State, and Federal agencies and partners. (R2-Southwest Region)

REPEAT: Mexican Wolf Recovery Plan, First Revision – On November 29, FWS published the final Mexican Wolf Recovery Plan, First Revision. The comment period for the draft revision of the Mexican Wolf Recovery Plan closed August 29, 2017. FWS received more than 101,000 comments (this number includes signed petitions). Due to the high level of visibility and controversy on Mexican wolf recovery in general, extensive outreach was conducted, including personal phone calls to State partners, Members of Congress and Tribal Leaders, in addition to numerous meetings and interactions with other interested parties. FWS was under a Court settlement agreement to complete the final plan by the end of November 2017. On November 29, FWS received two Notices of Intent to sue from environmental group, both of which filed complaints on the recovery plan on January 30th – One on behalf of the Center for Biological Diversity, Defenders of Wildlife, and others, and a second on behalf of the WildEarth Guardians and Western Watersheds project. The recovery plan continues to generate media interest. See previous reports for additional background. (R2 – Southwest Region)

REPEAT: Western Travis County Public Utility Agency Draft Habitat Conservation Plan – FWS anticipates publishing in the *Federal Register* in the next 45-60 days, a Notice of Availability for the Western Travis County Public Utility Agency's (WTCPUA) Habitat Conservation Plan (DHCP) and their application for an incidental take permit (ITP) in Texas. WTCPUA is preparing to construct a 2.2 mile secondary water pipeline near its existing water transmission main for redundancy and parallel capacity. Construction, operations and maintenance of the Raw Water Transmission Main could impact the federally listed endangered golden-cheeked warbler. If approved the term of the dHCP and ITP would be 30 years. A news bulletin will be prepared and shared with local congressionals, partners and media. (R2-Southwest Region)

National Wildlife Refuge Actions

UPDATE : FWS Southwest Region is proactively reaching out to state agencies to discuss Secretarial Order 3356, and seek additional opportunities to support and expand hunting and fishing on Refuges in the Southwest. Currently the Oklahoma Department of Wildlife Conservation (ODWC) has been the most responsive. On January 31, 2018, FWS leadership met with ODWC to discuss several potential hunting and fishing opportunities that could occur on Refuges in Oklahoma. Meeting participants identified additional hunting and fishing, educational and youth opportunities on every refuge in Oklahoma. Additionally, ODWC committed to providing additional staff support to help implement and sustain the identified activities. The FWS Southwest Region will continue to reach out to Texas, Arizona and New Mexico as well as Oklahoma to explore more opportunities. (R2 – Southwest Region)

REPEAT: Newly constructed production pads for oil and gas development at Hagerman National Wildlife Refuge were mitigated by easing angler access to refuge waters at Lake Texoma. Hagerman's Sandy Day Use Area was improved by a mineral operator, replacing bollard and cable around a lot, leveling walkways and paving with coarse stone. Spoil, litter and discarded roots were hauled away by refuge volunteers. The small improvement can make a large

difference for the 7,500 anglers and 2,500 birds that use the area. Anglers catch blue catfish, channel catfish, striped bass, white bass, and sunfishes while birders can check off bald eagle, peregrine falcon, herring gulls, white pelicans, red-tailed hawk, red-shouldered hawk, painted bunting, blue grosbeak, or summer tanager. (R2 – Southwest Region)

REPEAT: Impact of Cattle Fever Ticks to Cattle Industry in South Texas – FWS continues to work with Texas Animal Health Commission and U.S. Department of Agriculture-Animal and Plant Health Inspection Service (USDA-APHIS) regarding cattle fever tick treatment at the FWS Laguna Atascosa and Lower Rio Grande Valley National Wildlife Refuges. The FWS Laguna Atascosa NWR and portions of the FWS Lower Rio Grande Valley NWR remain under quarantine at this time. Currently, FWS has made a decision to move forward with evaluating, through the NEPA process, the chemically treating white-tailed deer and conducting an experimental cattle grazing program on the Lower Rio Grande Valley and Laguna Atascosa NWRs. The USDA and FWS determined that the best option for moving forward with the NEPA process is with USDA as the lead agency and FWS as a cooperating agency. The USDA anticipates making the draft Environmental Assessment available for public comment starting December 20 for 30 days. FWS is proposing a joint public notice between all entities (FWS, USDA, TAHC) be issued announcing public comment period. FWS is committed to continuing discussions and proactive actions in cooperation with the USDA-APHIS, the Texas Animal Health Commission, private ranchers and others to aid in the battle to combat the cattle fever tick. Of media interest. Significant Congressional interest in efforts to combat cattle fever tick. More details available in past reports. (R2 – Southwest Region)

REPEAT: FWS New Mexico National Wildlife Refuges Awarded Restoration Grant – FWS Bosque del Apache and Valle de Oro NWRs along with other federal and non-federal partners were recently awarded a 1 million North American Wetlands Conservation Act (NAWCA) grant for restoration and enhancement of nearly 1,100 acres in the Middle Rio Grande Valley in New Mexico. NAWCA grants increase bird populations and wetland habitat, while supporting local economies and American traditions such as hunting, fishing, wildlife observation, family farming, and cattle ranching. Funding for the project is currently on hold until a full budget is passed. A field visit planned for the week of January 15, 2018 hosted by Ducks Unlimited that included Senator Udall (D NM) and Rep Pearce (R NM 02) has been postponed. A re-schedule date has not yet been identified. (R2 – Southwest Region)

REPEAT: Urban Youth Gaining Outdoor Work Experience – FWS as part of an urban partnership, is bringing students from Furr High School in Houston, Texas to the FWS Trinity River National Wildlife Refuge to enable them to gain back country experience. In January 2018 (date TBD), several Furr High School students (10 to 15 expected) will work alongside FWS to continue construction of a trail within the Refuge during their camping/backpacking experience. The experience is meant to introduce students to careers in conservation and will emphasize land management issues, developing public use opportunities (including hunting, fishing and wildlife watching), team building and leadership skills. The desired outcome is that the students will take learned skills back to their school, which is adjacent to Houston Parks and Recreation's Herman Brown Park, a 900-acre park that the school uses as an outdoor classroom. The urban partnership plans to build on this experience on other FWS/TPWD led programs on

hunting, fishing, and wildlife watching conducted in classroom and on the city park. (R2 – Southwest Region)

Border-Related Activities

UPDATE: Feb 2018 – Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled for March - June 2018. Part of the project will require the use of a portion of the refuge's water right to support this national security project. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met. (R2 – Southwest Region).

UPDATE: Feb 2018 – Border Coordination: Communication Towers - Work in in progress following effective coordination between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge are being replaced, with the goal of upgrading technology and providing a more robust foundation within the existing footprint. Construction activities began in late 2017 and are continuing on schedule. (R2 – Southwest Region).

REPEAT: National Wildlife Refuge staff has received notice of an independently organized rally to "Save Santa Ana National Wildlife Refuge" taking place Saturday, January 27 from 11 a.m. to 2:00 p.m. The Sierra Club is organizing the rally, which will take place in a field east of the refuge. Congressman Vela is expected to attend, and representatives from the 19 cities/counties that passed resolutions opposing the proposed border wall have been invited. The event was to coincide with a FWS-organized 75th anniversary event at Santa Ana National Wildlife Refuge, however due to the government the anniversary event has been cancelled. FWS will have increased law enforcement as well as External Affairs support onsite to help as needed. (R2 – Southwest Region)

REPEAT: Jan 2018 – Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require transporting water from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade / replace pump and water delivery components to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

Fish and Aquatic Conservation

REPEAT: FWS Willow Beach National Fish Hatchery, in partnership with Arizona Game and Fish Department, announced the beginning of the annual rainbow trout sportfish stocking season in the lower Colorado River immediately below Lake Mohave/Davis Dam in late October. Neighboring communities include Laughlin, Nevada and Bullhead City, Arizona. FWS will stock about 1, 750 trout every week from early October through March 2018. Stocking sites include Davis Camp, Community Park, and Rotary Park for October-December. From January 2018 through March 2018, stocking sites will be Davis Camp and Community Park. In addition to the annual stocking season below Davis Dam, FWS Willow Beach NFH continues to stock rainbow every week, year round, at Willow Beach Marina, Arizona. (R2 – Southwest Region)

Through February 16, 2018

FishBites Report

A "First" in threatened Gila Trout Conservation - Expands Angling Opportunity
Topic: On February 12, 2018, Mora National Fish Hatchery transferred 1,384 Gila trout, 8.4 inches long in average size, to the Arizona Game and Fish Dept.'s Sterling Springs Hatchery. The trout are surplus to what are needed for recovery purposes and come from the Whiskey Creek lineage, one of five such lineages native to upper Gila River watershed. Our state partners intend to rear these sport fish for another five months to a catchable size of 11+ inches. This transfer marks the first time Gila trout have been sent to another hatchery from the Mora facility, and builds on the 65,000 eyed Gila trout eggs sent Sterling Springs Hatchery in April of 2017.
Supportive Stakeholders: **Arizona Game and Fish Dept.**
Impacted Location: **Arizona, New Mexico**

Title/Issue	Anticipated Publication Date	Current Status
Carlsbad Current Argus	Feb 14, 2018	http://www.currentargus.com/story/news/local/2018/02/14/texas-hornshell-listing-impact-new-mexico-land-rights/335552002/
Daily Oklahoman Elk Roam Wichita Mts	Feb 11, 2018	OKC newspaper Sunday feature on Oklahoma elk conservation http://newsok.com/teddys-game-preserve/article/5582871
Whooping cranes; E&E Greenwire	Feb 8, 2018	Published: Article on tracking whooping crane
Various: Courthouse News Albuquerque Journal Fox News (NY) Carlsbad Current-Argus Texas hornshell listing	Feb 7-14	Texas hornshell (mussel) listed under ESA. Interviews conducted with PIOs and SMEs regarding effects of listing, interest parties enrolling in candidate conservation agreements and speculation on potential effects of listing on water accesses and oil and gas development. Species is NM last remaining mussel species.
Lesser Prairie-Chicken	End of March 2018	Feb. 13 – Conducted a follow up conversation with Emily Sohn, tidepoolsinc.com regarding the lesser prairie-chicken.
Hatchery International Saving the Apache Trout	Feb 2018	https://www.hatcheryinternational.com/restocking/saving-the-apache-trout-3004 This industry publication covers the work of conservation and commercial hatcheries worldwide. The story penned by Ext. Aff. staff communicates the work of Southwest Region field stations to recover threatened Apache trout in concert with Native Americans.

Weekly Report

Week Ahead Schedule of Meetings, Hearings, and Travel
None

Hot Topics - Week Ahead Announcements and Actions
See ESA actions below

Upcoming Workshops & Meetings
Feb. – Meet and Greet meetings and introductory phone calls continue between incoming Regional Director and Members of the Congressional Delegation within the Southwest Region. (R2 – Southwest Region)

Feb 16– FWS asked to attend meeting with Forest Service and private grazing allottee by Rep Pearce's Office (R NM 02). The meeting will take place in Cloudcroft, New Mexico, and by conference call. Field Supervisor for FWS New Mexico ES Office participating in the meeting via phone. See Items of Note for more. (R2 – Southwest Region)

Endangered Species Act Recovery Actions

UPDATED: Lesser Long-Nosed Bat Delisting and Notice of Availability of Draft Post-Delisting Monitoring – In two separate, but associated announcements, FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the delisting of the lesser long-nosed bat and the final delisting of the LLNB. Target date for submitting to the *Federal Register* is March 30, 2018 and delisting is anticipated will follow by a month. This action is not expected to be opposed. Stakeholders are the petitioners, Pacific Legal Foundation and the New Mexico Cattle Growers Association. Proactive conservation stakeholders include Pima County MSCP and hundreds of citizen scientists monitor bats each summer and fall when this migratory species returns to roosts in the U.S. A communications strategy and news release will be prepared (but hasn't been drafted yet). (R2 – Southwest Region)

UPDATED: Kuenzler hedgehog cactus downlisting – FWS will finalize the downlisting of Kuenzler hedgehog cactus in late March 2018. When first listed, only two populations totaling 200 plants were known. Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known populations within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild. (R2 – Southwest Region)

REPEAT: Draft Recovery Plan for Four Aquatic Invertebrates – FWS will make available and seek comment on a draft recovery plan for four aquatic invertebrates found in desert grasslands in southeast New Mexico and southwest Texas in February 2018. Noel's amphipod, Pecos assiminea, Koster's springsnail, and Roswell springsnail were listed as endangered in 2005. The

primary threats to all four species are threats to the quantity and quality of water. Activities, such as oil and gas drilling, water withdrawals from the aquifer and contamination are the greatest threats. Most occupied sites are on FWS Bitter Lake National Wildlife Refuge in New Mexico and The Nature Conservancy holdings in Texas. (R2 – Southwest Region)

UPDATED: American Burying Beetle Species Status Assessment and 12-month finding – FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed prior to the issuance of a 12-month finding which is expected to occur in 2018. In June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

Endangered Species Act Listing Actions

UPDATED: Tobusch fishhook cactus downlisting notice – In March, FWS will publish a final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved "fishhook" spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to down list the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened. Local interest is anticipated. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the Federal Register. (R2 – Southwest Region)

REPEAT: Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff are currently working to review, organize, and respond to comments received from the external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the States, and others. (R2 Southwest Region & R6 Mountain-Prairie Region)

Other Items of Note

NEW: Black-capped vireo Delisting Determination – FWS anticipates publishing a final delisting determination for the Black-capped vireo in late March 2018. In 2007, the Service

completed a five-year review of the black-capped vireo which recommended the species be downlisted to threatened. In 2012, we received a petition to downlist the black-capped vireo based on our 2007 recommendation. The Service used the Species Status Assessment framework to evaluate species viability and address the petition. Our analysis of the best available science indicates the primary known threats to the black-capped vireo, of habitat loss and brown-headed cowbird parasitism, have been reduced or adequately managed and that many populations are stable or growing. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the Federal Register. In addition, an event to celebrate the delisting is being planned. (R2 – Southwest Region)

UPDATE: FWS and partners completed the annual Mexican wolf population survey and capture, from January 24, 2018 through February 3, 2018. The count documented a minimum of 114 Mexican wolves in the U.S., an increase of one wolf over what was documented in 2017. The Mexican Wolf Recovery Program is a multi-agency cooperative effort between the FWS, Arizona Game and Fish Department, U.S. Forest Service, USDA-Wildlife Services, and the White Mountain Apache Tribe, as well as in consultation with the New Mexico Department of Game and Fish and counties. Survey flights occurred on the Fort Apache Indian Reservation, Apache, Coconino, Cibola, and Gila National Forests in eastern Arizona and western New Mexico, and some areas immediately outside the forests. Some media attended the operations. The final count will be available in the next couple of weeks. (R2 – Southwest Region).

UPDATED: Lower Colorado River Multi-Species Habitat Conservation Plan – As early as February 28, FWS will sign a FONSI on an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake. The LCR-MSCP is a long-term program created in 2005 to minimize and mitigate impacts that water delivery and power generation along the lower Colorado River may have on 26 fish and wildlife species, including six species protected under the Endangered Species Act. LCR-MSCP is responsible for creating, replacing, and managing habitat for these species and operates under an ESA permit. However, in the early 2000s, when the LCR-MSCP was conceived, the largely aquatic, northern Mexican gartersnake was long-thought to have been extirpated from the lower Colorado River. In 2014, the subspecies was added to the list of threatened animals protected under the ESA. A public comment on the draft environmental assessment closed December 28, 2017. Outreach will include a FWS news bulletin and notifying stakeholders and tribes. For more information, visit: https://www.fws.gov/southwest/es/arizona/ (R2 – Southwest Region)

UPDATED: American Electric Power (AEP) draft Habitat Conservation Plan – In early 2018 FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning on holding public meetings during the 60-day public comment period. Controversy level is low. Outreach planned. (R2 Southwest Region and R4 Southeast Region)

UPDATED: The USFS and Rep. Pearce's Office (R-NM) asked the FWS participate in an upcoming meeting between the USFS and the Sacramento Grazing Association. The purpose of the meeting is to set the Annual Operating Instructions for the 2018 grazing season on the Sacramento Allotment. FWS has been asked to be available to answer questions regarding the presence of federally listed species and designated habitats on the allotment. (R2 - Southwest Region).

UPDATED: Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. A conference call was held with Senator Cornyn's staff to discuss the issue on December 11. More details available in past reports. (R2 – Southwest Region)

UPDATED**:** Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participant under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time. (R2-Southwest Region)

REPEAT: On January 12, 2018, FWS submitted permit applications to New Mexico Department of Game and Fish (NMDGF) to import and release up to 12 Mexican wolf pups in New Mexico, to import a female wolf from Arizona for artificial insemination at Sevilleta Wolf Management Facility, and to import up to 6 pups from Arizona to be held at Sevilleta or Ladder Ranch Wolf Management Facilities, if needed. The Mexican Wolf Initial Release and Translocation Proposal for 2018 was provided for public review and comment from December 4 to 29. FWS received just over 100 comments, which were transmitted to NMDGF, per their regulations, along with the permit applications. The initial releases and translocations outlined in this document are consistent with: (1) the 2014 Final Environmental Impact Statement (EIS) for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (2) the 2015 Record of Decision for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (3) the 2015 Final Rule - Revisions to the Regulations for the Nonessential

Experimental Population of the Mexican Wolf, and the 2017 Mexican Wolf Recovery Plan, First Revision. NMDGF signed the permits on January 19, 2018. (R2 – Southwest Region)

REPEAT: Havasu National Wildlife Refuge in Arizona is partnering with the U.S. Department of Agriculture for a second year to eradicate feral swine on refuge lands. Feral swine are invasive and damage natural resources and property, impact agricultural lands, and pose a human health risk due to numerous diseases they carry including Salmonella, leptospirosis, and Escherichia coli (E. coli). Eradication efforts will be conducted by one helicopter using specially trained USDA-APHIS-WS personnel, following policy and procedures established to ensure safe, humane, and environmentally sound practices. Efforts will take place the first two weeks of February. (R2 – Southwest Region)

REPEAT: Arizona Electric Power Cooperative Candidate Conservation Agreement with Assurances for Sonoran Desert Tortoise – FWS anticipates publishing in the *Federal Register* in the next 45-60 days, a Notice of Availability for the Arizona Electric Power Cooperative (AEPCO) Draft Candidate Conservation Agreement with Assurances (dCCAA) for Sonoran Desert Tortoise and their application for an enhancement of survival permit (ESP) in Arizona. AEPCO has developed a conservation agreement that would promote conservation for the unlisted Sonoran Desert tortoise within 2,152 acres of their right-of-way during normal operation and maintenance activities. If approved the term of the dCCAA and ESP would be 25 years. No formal news bulletin will be released. Outreach to local, State, and Federal agencies and partners. (R2-Southwest Region)

REPEAT: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review in February 2018. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in early 2018. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2 – Southwest Region)

REPEAT: Mexican Wolf Recovery Plan, First Revision – On November 29, FWS published the final Mexican Wolf Recovery Plan, First Revision. The comment period for the draft revision of the Mexican Wolf Recovery Plan closed August 29, 2017. FWS received more than 101,000 comments (this number includes signed petitions). Due to the high level of visibility and controversy on Mexican wolf recovery in general, extensive outreach was conducted, including personal phone calls to State partners, Members of Congress and Tribal Leaders, in addition to numerous meetings and interactions with other interested parties. FWS was under a Court settlement agreement to complete the final plan by the end of November 2017. On November 29, FWS received two Notices of Intent to sue from environmental group, both of which filed complaints on the recovery plan on January 30th – One on behalf of the Center for Biological Diversity, Defenders of Wildlife, and others, and a second on behalf of the WildEarth Guardians

and Western Watersheds project. The recovery plan continues to generate media interest. See previous reports for additional background. (R2 – Southwest Region)

REPEAT: Western Travis County Public Utility Agency Draft Habitat Conservation Plan – FWS anticipates publishing in the *Federal Register* in the next 45-60 days, a Notice of Availability for the Western Travis County Public Utility Agency's (WTCPUA) Habitat Conservation Plan (DHCP) and their application for an incidental take permit (ITP) in Texas. WTCPUA is preparing to construct a 2.2 mile secondary water pipeline near its existing water transmission main for redundancy and parallel capacity. Construction, operations and maintenance of the Raw Water Transmission Main could impact the federally listed endangered golden-cheeked warbler. If approved the term of the dHCP and ITP would be 30 years. A news bulletin will be prepared and shared with local congressionals, partners and media. (R2-Southwest Region)

National Wildlife Refuge Actions

UPDATE: FWS Southwest Region is proactively reaching out to state agencies to discuss Secretarial Order 3356, and seek additional opportunities to support and expand hunting and fishing on Refuges in the Southwest. Currently the Oklahoma Department of Wildlife Conservation (ODWC) has been the most responsive. On January 31, 2018, FWS leadership met with ODWC to discuss several potential hunting and fishing opportunities that could occur on Refuges in Oklahoma. Meeting participants identified additional hunting and fishing, educational and youth opportunities on every refuge in Oklahoma. Additionally, ODWC committed to providing additional staff support to help implement and sustain the identified activities. The FWS Southwest Region will continue to reach out to Texas, Arizona and New Mexico as well as Oklahoma to explore more opportunities. (R2 – Southwest Region)

UPDATE: Impact of Cattle Fever Ticks to Cattle Industry in South Texas – After a 30 day public comment period, FWS has signed a Finding of No Significant Impact (FONSI) to allow U.S. Department of Agriculture (USDA) additional fever tick eradication methods on refuge lands. Through a Special Use Permit, USDA will be approved to treat white-tailed deer with ivermectin-treated corn and conduct experimental cattle grazing on Laguna Atascosa NWR and Lower Rio Grande Valley NWR lands that fall within established quarantine areas. These management activities would be carefully administered through a Special Use Permit from the FWS to USDA. Permitting USDA to conduct these fever tick management activities is consistent with invasive species control efforts, Cattle Fever Tick Eradication Program goals, and its adaptive management strategy to eradicate fever ticks within a quarantine area. The FWS will continue to be fully engaged and is committed to cattle fever tick eradication in Texas. Congressional notifications were made on February 12, 2018. More details available in past reports. (R2 – Southwest Region)

UPDATE: Projects are on hold pending confirmation of NAWCA funding. FWS New Mexico National Wildlife Refuges Awarded Restoration Grant – FWS Bosque del Apache and Valle de Oro NWRs along with other federal and non-federal partners were recently awarded a $1 million North American Wetlands Conservation Act (NAWCA) grant for restoration and enhancement of nearly 1,100 acres in the Middle Rio Grande Valley in New Mexico. NAWCA grants increase bird populations and wetland habitat, while supporting local economies and American traditions

such as hunting, fishing, wildlife observation, family farming, and cattle ranching. Funding for the project is currently on hold until a full budget is passed. A field visit planned for the week of January 15, 2018 hosted by Ducks Unlimited that included Senator Udall (D NM) and Rep Pearce (R NM 02) has been postponed. A re-schedule date has not yet been identified. (R2 – Southwest Region)

REPEAT: Urban Youth Gaining Outdoor Work Experience – FWS as part of an urban partnership, is bringing students from Furr High School in Houston, Texas to the FWS Trinity River National Wildlife Refuge to enable them to gain back country experience. In January 2018 (date TBD), several Furr High School students (10 to 15 expected) will work alongside FWS to continue construction of a trail within the Refuge during their camping/backpacking experience. The experience is meant to introduce students to careers in conservation and will emphasize land management issues, developing public use opportunities (including hunting, fishing and wildlife watching), team building and leadership skills. The desired outcome is that the students will take learned skills back to their school, which is adjacent to Houston Parks and Recreation's Herman Brown Park, a 900-acre park that the school uses as an outdoor classroom. The urban partnership plans to build on this experience on other FWS/TPWD led programs on hunting, fishing, and wildlife watching conducted in classroom and on the city park. (R2 – Southwest Region)

REPEAT: Newly constructed production pads for oil and gas development at Hagerman National Wildlife Refuge were mitigated by easing angler access to refuge waters at Lake Texoma. Hagerman's Sandy Day Use Area was improved by a mineral operator, replacing bollard and cable around a lot, leveling walkways and paving with coarse stone. Spoil, litter and discarded roots were hauled away by refuge volunteers. The small improvement can make a large difference for the 7,500 anglers and 2,500 birds that use the area. Anglers catch blue catfish, channel catfish, striped bass, white bass, and sunfishes while birders can check off bald eagle, peregrine falcon, herring gulls, white pelicans, red-tailed hawk, red-shouldered hawk, painted bunting, blue grosbeak, or summer tanager. (R2 – Southwest Region)

Border-Related Activities

NEW: February 2018 – Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designed under section 10(j) of the ESA. In 2017 a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico. (R2 – Southwest Region).

UPDATE: Feb 2018 – Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled for March - June 2018. Part of the project will require the use of a portion of the refuge's water right to support this national security project. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum

functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met. (R2 – Southwest Region).

UPDATE: Feb 2018 – Border Coordination: Communication Towers - Work in in progress following effective coordination between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge are being replaced, with the goal of upgrading technology and providing a more robust foundation within the existing footprint. Construction activities began in late 2017 and are continuing on schedule. (R2 – Southwest Region).

REPEAT: Jan 2018 – Border Coordination: Suppling water to USACE – FWS is currently in discussions with the U.S. Customs and Border Protection (CBP) regarding access to water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled to begin in January 2018. Part of the project will require transporting water from the refuge to the Sasabe Forward Operating Base (FOB) to sustain approximately 60 U.S. Army Corps of Engineers (USACE) members, who will reside at the FOB throughout the construction phase of the project. CBP plans to inspect the FWS-owned well and upgrade / replace pump and water delivery components to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP national security mission and FWS objectives are met. (R2 – Southwest Region)

Fish and Aquatic Conservation

REPEAT: FWS Willow Beach National Fish Hatchery, in partnership with Arizona Game and Fish Department, announced the beginning of the annual rainbow trout sportfish stocking season in the lower Colorado River immediately below Lake Mohave/Davis Dam in late October. Neighboring communities include Laughlin, Nevada and Bullhead City, Arizona. FWS will stock about 1, 750 trout every week from early October through March 2018. Stocking sites include Davis Camp, Community Park, and Rotary Park for October-December. From January 2018 through March 2018, stocking sites will be Davis Camp and Community Park. In addition to the annual stocking season below Davis Dam, FWS Willow Beach NFH continues to stock rainbow every week, year round, at Willow Beach Marina, Arizona. (R2 – Southwest Region)

Through February 23, 2018

FishBites Report

Apache trout spawn a success. Eyed-egg count portends more fishing opportunity for Arizona anglers.
Topic: Apache trout, a threatened species, affords unique angling opportunities in the mountains of eastern Arizona. The recent egg take at Alchesay Williams Creek National Fish Hatchery Complex lends confidence to fishery managers that waters on the Ft. Apache Indian Reservation and neighboring Apache National Forest will continue to be destination fisheries.
Supportive Stakeholders: White Mountain Apache Tribe, Arizona Game and Fish Department
Impacted Location: Arizona, New Mexico

Gila trout released in to Sapillo Creek – more fish for anglers.
Mora National Fish Hatchery released more than 1,780 Gila trout, a threatened species, into select waters in the Gila National Forest on February 21, 2018. The trout ranged up to nine inches long and were surplus to what are needed for recovery actions. Anglers may keep up to five trout per day.
Supportive Stakeholders: New Mexico Dept of Game and Fish; Gila National Forest
Impacted Location: Arizona, New Mexico

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
Austin American Statesman	TBD	Jeremy Schwartz a reporter with the Austin American Statesman contacted R2 asking to interview some of our ocelot researchers regarding translocation efforts and genetic diversity.

Hot Topics - Week Ahead Announcements and Actions
See ESA actions below

Upcoming Workshops & Meetings
Feb. – Meet and Greet meetings and introductory phone calls continue between incoming Regional Director and Members of the Congressional Delegation within the Southwest Region. (R2 – Southwest Region)

Endangered Species Act Recovery Actions

REPEAT: Lesser Long-Nosed Bat Delisting and Notice of Availability of Draft Post-Delisting Monitoring – In two separate, but associated announcements, FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the delisting of the lesser long-nosed bat and the final delisting of the LLNB. Target date for submitting to the *Federal Register* is March 30, 2018 and delisting is anticipated will follow by a month. This action is not expected to be opposed. Stakeholders are the petitioners, Pacific Legal Foundation and the New Mexico Cattle Growers Association. Proactive conservation stakeholders include Pima County MSCP and hundreds of citizen scientists monitor bats each summer and fall when this migratory species returns to roosts in the U.S. A communications strategy and news release will be prepared (but hasn't been drafted yet). (R2 – Southwest Region)

REPEAT: Kuenzler hedgehog cactus downlisting – FWS will finalize the downlisting of Kuenzler hedgehog cactus in late March 2018. When first listed, only two populations totaling 200 plants were known. Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known populations within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild. (R2 – Southwest Region)

REPEAT: Draft Recovery Plan for Four Aquatic Invertebrates – FWS will make available and seek comment on a draft recovery plan for four aquatic invertebrates found in desert grasslands in southeast New Mexico and southwest Texas in March 2018. Noel's amphipod, Pecos assiminea, Koster's springsnail, and Roswell springsnail were listed as endangered in 2005. The primary threats to all four species are threats to the quantity and quality of water. Activities, such as oil and gas drilling, water withdrawals from the aquifer and contamination are the greatest threats. Most occupied sites are on FWS Bitter Lake National Wildlife Refuge in New Mexico and The Nature Conservancy holdings in Texas. (R2 – Southwest Region)

REPEAT: American Burying Beetle Species Status Assessment and 12-month finding – FWS anticipates a Species Status Assessment (SSA) for the American Burying Beetle (ABB) will be completed prior to the issuance of a 12-month finding which is expected to occur in 2018. In June 2015, FWS initiated the SSA to support future conservation decisions and recovery planning for the ABB under the Endangered Species Act. FWS is using the SSA to evaluate all available information related to the current and potential threats to the species. The SSA was peer reviewed. State fish and game agencies and affected Tribes within the current ABB range reviewed the document following review of the formal peer review process. On February 22, 2017, the American Stewards of Liberty and the Independent Petroleum Association of America filed a Notice of Intent based on FWS' failure to make a 12-month finding on the petition to delist the ABB. (R2, R3, R4, R5 & R6)

<u>Endangered Species Act Listing Actions</u>

REPEAT: Tobusch fishhook cactus downlisting notice – In March, FWS will publish a final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved "fishhook" spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to

down list the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened. Local interest is anticipated. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the Federal Register. (R2 – Southwest Region)

REPEAT: Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff are currently working to review, organize, and respond to comments received from the external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the States, and others. (R2 Southwest Region & R6 Mountain-Prairie Region)

Other Items of Note

UPDATED: The USFS and Rep. Pearce's Office (R-NM) asked the FWS to participate in the Feb. 16th meeting between the USFS and the Sacramento Grazing Association. The purpose of the meeting was to set the Annual Operating Instructions for the 2018 grazing season on the Sacramento Allotment. FWS was available to answer questions regarding the presence of federally listed species and designated habitats on the allotment. (R2 - Southwest Region).

REPEAT: Black-capped vireo Delisting Determination – FWS anticipates publishing a final delisting determination for the Black-capped vireo in late March 2018. In 2007, the Service completed a five-year review of the black-capped vireo which recommended the species be downlisted to threatened. In 2012, we received a petition to downlist the black-capped vireo based on our 2007 recommendation. The Service used the Species Status Assessment framework to evaluate species viability and address the petition. Our analysis of the best available science indicates the primary known threats to the black-capped vireo, of habitat loss and brown-headed cowbird parasitism, have been reduced or adequately managed and that many populations are stable or growing. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the Federal Register. In addition, an event to celebrate the delisting is being planned. (R2 – Southwest Region)

REPEAT: FWS and partners completed the annual Mexican wolf population survey and capture, from January 24, 2018 through February 3, 2018. The count documented a minimum of 114 Mexican wolves in 2017 in the U.S., an increase of one wolf over what was documented for 2016. The Mexican Wolf Recovery Program is a multi-agency cooperative effort between the FWS, Arizona Game and Fish Department, U.S. Forest Service, USDA-Wildlife Services, and

the White Mountain Apache Tribe, as well as in consultation with the New Mexico Department of Game and Fish and counties. Survey flights occurred on the Fort Apache Indian Reservation, Apache, Coconino, Cibola, and Gila National Forests in eastern Arizona and western New Mexico, and some areas immediately outside the forests. Some media attended the operations. The final count will be available in the next couple of weeks. (R2 – Southwest Region).

REPEAT: Lower Colorado River Multi-Species Habitat Conservation Plan – As early as February 28, FWS will sign a FONSI on an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake. The LCR-MSCP is a long-term program created in 2005 to minimize and mitigate impacts that water delivery and power generation along the lower Colorado River may have on 26 fish and wildlife species, including six species protected under the Endangered Species Act. LCR-MSCP is responsible for creating, replacing, and managing habitat for these species and operates under an ESA permit. However, in the early 2000s, when the LCR-MSCP was conceived, the largely aquatic, northern Mexican gartersnake was long-thought to have been extirpated from the lower Colorado River. In 2014, the subspecies was added to the list of threatened animals protected under the ESA. A public comment on the draft environmental assessment closed December 28, 2017. Outreach will include a FWS news bulletin and notifying stakeholders and tribes. For more information, visit: https://www.fws.gov/southwest/es/arizona/ (R2 – Southwest Region)

REPEAT: American Electric Power (AEP) draft Habitat Conservation Plan – In early 2018 FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning on holding public meetings during the 60-day public comment period. Controversy level is low. Outreach planned. (R2 Southwest Region and R4 Southeast Region)

REPEAT: Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. A conference call was held with Senator Cornyn's staff to discuss the issue on December 11. More details available in past reports. (R2 – Southwest Region)

REPEAT**:** Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of

implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participant under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time. (R2-Southwest Region)

REPEAT: On January 12, 2018, FWS submitted permit applications to New Mexico Department of Game and Fish (NMDGF) to import and release up to 12 Mexican wolf pups in New Mexico, to import a female wolf from Arizona for artificial insemination at Sevilleta Wolf Management Facility, and to import up to 6 pups from Arizona to be held at Sevilleta or Ladder Ranch Wolf Management Facilities, if needed. The Mexican Wolf Initial Release and Translocation Proposal for 2018 was provided for public review and comment from December 4 to 29. FWS received just over 100 comments, which were transmitted to NMDGF, per their regulations, along with the permit applications. The initial releases and translocations outlined in this document are consistent with: (1) the 2014 Final Environmental Impact Statement (EIS) for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (2) the 2015 Record of Decision for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (3) the 2015 Final Rule - Revisions to the Regulations for the Nonessential Experimental Population of the Mexican Wolf, and the 2017 Mexican Wolf Recovery Plan, First Revision. NMDGF signed the permits on January 19, 2018. (R2 – Southwest Region)

REPEAT: Arizona Electric Power Cooperative Candidate Conservation Agreement with Assurances for Sonoran Desert Tortoise – FWS anticipates publishing in the *Federal Register* in the next 45-60 days, a Notice of Availability for the Arizona Electric Power Cooperative (AEPCO) Draft Candidate Conservation Agreement with Assurances (dCCAA) for Sonoran Desert Tortoise and their application for an enhancement of survival permit (ESP) in Arizona. AEPCO has developed a conservation agreement that would promote conservation for the unlisted Sonoran Desert tortoise within 2,152 acres of their right-of-way during normal operation and maintenance activities. If approved the term of the dCCAA and ESP would be 25 years. No formal news bulletin will be released. Outreach to local, State, and Federal agencies and partners. (R2-Southwest Region)

REPEAT: Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review at the beginning of March 2018. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in early 2018. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*. (R2 – Southwest Region)

REPEAT: Western Travis County Public Utility Agency Draft Habitat Conservation Plan – FWS anticipates publishing in the *Federal Register* in the next 45-60 days, a Notice of Availability for

the Western Travis County Public Utility Agency's (WTCPUA) Habitat Conservation Plan (DHCP) and their application for an incidental take permit (ITP) in Texas. WTCPUA is preparing to construct a 2.2 mile secondary water pipeline near its existing water transmission main for redundancy and parallel capacity. Construction, operations and maintenance of the Raw Water Transmission Main could impact the federally listed endangered golden-cheeked warbler. If approved the term of the dHCP and ITP would be 30 years. A news bulletin will be prepared and shared with local congressionals, partners and media. (R2-Southwest Region)

National Wildlife Refuge Actions

NEW: Army Corps of Engineers (ACE) is seeking to draw-down Lake Alamo (in western Arizona) in order to conduct a dam safety inspection and maintenance. A resulting flushing flow from the reservoir into the Bill Williams River may adversely benefit the downstream river riparian area and is scheduled for as early as March. The event was fully put forward and developed by ACE and does not take place on refuge land however the release would impact the Bill Williams River National Wildlife Refuge. The FWS does have a representative on the Bill Williams River Corridor Steering Committee, a non-decisional body focused on interagency communication; however, the Service does not have authority over the release. Reservoir angler and recreational community, and downstream ATV groups have registered concern/opposition to the flows. Congressman Paul Gosar (AZ-4) and county elected officials have weighed in on the project, including flushing flows. (R2 – Southwest Region)

REPEAT: FWS Southwest Region is proactively reaching out to state agencies to discuss Secretarial Order 3356, and seek additional opportunities to support and expand hunting and fishing on Refuges in the Southwest. Currently the Oklahoma Department of Wildlife Conservation (ODWC) has been the most responsive. On January 31, 2018, FWS leadership met with ODWC to discuss several potential hunting and fishing opportunities that could occur on Refuges in Oklahoma. Meeting participants identified additional hunting and fishing, educational and youth opportunities on every refuge in Oklahoma. Additionally, ODWC committed to providing additional staff support to help implement and sustain the identified activities. The FWS Southwest Region will continue to reach out to Texas, Arizona and New Mexico as well as Oklahoma to explore more opportunities. (R2 – Southwest Region)

REPEAT: Impact of Cattle Fever Ticks to Cattle Industry in South Texas – After a 30 day public comment period, FWS has signed a Finding of No Significant Impact (FONSI) to allow U.S. Department of Agriculture (USDA) additional fever tick eradication methods on refuge lands. Through a Special Use Permit, USDA will be approved to treat white-tailed deer with ivermectin-treated corn and conduct experimental cattle grazing on Laguna Atascosa NWR and Lower Rio Grande Valley NWR lands that fall within established quarantine areas. These management activities would be carefully administered through a Special Use Permit from the FWS to USDA. Permitting USDA to conduct these fever tick management activities is consistent with invasive species control efforts, Cattle Fever Tick Eradication Program goals, and its adaptive management strategy to eradicate fever ticks within a quarantine area. The FWS will continue to be fully engaged and is committed to cattle fever tick eradication in Texas. Congressional notifications were made on February 12, 2018. More details available in past reports. (R2 – Southwest Region)

REPEAT: Projects are on hold pending confirmation of NAWCA funding. FWS New Mexico National Wildlife Refuges Awarded Restoration Grant – FWS Bosque del Apache and Valle de Oro NWRs along with other federal and non-federal partners were recently awarded a $1 million North American Wetlands Conservation Act (NAWCA) grant for restoration and enhancement of nearly 1,100 acres in the Middle Rio Grande Valley in New Mexico. NAWCA grants increase bird populations and wetland habitat, while supporting local economies and American traditions such as hunting, fishing, wildlife observation, family farming, and cattle ranching. Funding for the project is currently on hold until a full budget is passed. A field visit planned for the week of January 15, 2018 hosted by Ducks Unlimited that included Senator Udall (D NM) and Rep Pearce (R NM 02) has been postponed. A re-schedule date has not yet been identified. (R2 – Southwest Region)

REPEAT: Urban Youth Gaining Outdoor Work Experience – FWS as part of an urban partnership, is bringing students from Furr High School in Houston, Texas to the FWS Trinity River National Wildlife Refuge to enable them to gain back country experience. In January 2018 (date TBD), several Furr High School students (10 to 15 expected) will work alongside FWS to continue construction of a trail within the Refuge during their camping/backpacking experience. The experience is meant to introduce students to careers in conservation and will emphasize land management issues, developing public use opportunities (including hunting, fishing and wildlife watching), team building and leadership skills. The desired outcome is that the students will take learned skills back to their school, which is adjacent to Houston Parks and Recreation's Herman Brown Park, a 900-acre park that the school uses as an outdoor classroom. The urban partnership plans to build on this experience on other FWS/TPWD led programs on hunting, fishing, and wildlife watching conducted in classroom and on the city park. (R2 – Southwest Region)

REPEAT: Newly constructed production pads for oil and gas development at Hagerman National Wildlife Refuge were mitigated by easing angler access to refuge waters at Lake Texoma. Hagerman’s Sandy Day Use Area was improved by a mineral operator, replacing bollard and cable around a lot, leveling walkways and paving with coarse stone. Spoil, litter and discarded roots were hauled away by refuge volunteers. The small improvement can make a large difference for the 7,500 anglers and 2,500 birds that use the area. Anglers catch blue catfish, channel catfish, striped bass, white bass, and sunfishes while birders can check off bald eagle, peregrine falcon, herring gulls, white pelicans, red-tailed hawk, red-shouldered hawk, painted bunting, blue grosbeak, or summer tanager. (R2 – Southwest Region)

REPEAT: Havasu National Wildlife Refuge in Arizona is partnering with the U.S. Department of Agriculture for a second year to eradicate feral swine on refuge lands. Feral swine are invasive and damage natural resources and property, impact agricultural lands, and pose a human health risk due to numerous diseases they carry including Salmonella, leptospirosis, and Escherichia coli (E. coli). Eradication efforts will be conducted by one helicopter using specially trained USDA-APHIS-WS personnel, following policy and procedures established to ensure safe, humane, and environmentally sound practices. Efforts will take place the first two weeks of February. (R2 – Southwest Region)

Border-Related Activities

UPDATED: Feb 2018 – Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled for March - June 2018. Part of the project will require the use of a portion of the refuge's water right to support this national security project. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met. (R2 – Southwest Region).

REPEAT: February 2018 – Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designed under section 10(j) of the ESA. In 2017 a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico. (R2 – Southwest Region).

REPEAT: Feb 2018 – Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled for March - June 2018. Part of the project will require the use of a portion of the refuge's water right to support this national security project. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met. (R2 – Southwest Region).

REPEAT: Feb 2018 – Border Coordination: Communication Towers - Work in in progress following effective coordination between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge are being replaced, with the goal of upgrading technology and providing a more robust foundation within the existing footprint. Construction activities began in late 2017 and are continuing on schedule. (R2 – Southwest Region).

Fish and Aquatic Conservation

REPEAT: FWS Willow Beach National Fish Hatchery, in partnership with Arizona Game and Fish Department, announced the beginning of the annual rainbow trout sportfish stocking season in the lower Colorado River immediately below Lake Mohave/Davis Dam in late October. Neighboring communities include Laughlin, Nevada and Bullhead City, Arizona. FWS will stock about 1, 750 trout every week from early October through March 2018. Stocking sites include Davis Camp, Community Park, and Rotary Park for October-December. From January 2018 through March 2018, stocking sites will be Davis Camp and Community Park. In addition to the annual stocking season below Davis Dam, FWS Willow Beach NFH continues to stock rainbow every week, year round, at Willow Beach Marina, Arizona. (R2 – Southwest Region)

REPEAT: A “First” in threatened Gila Trout Conservation - Expands Angling Opportunity. On February 12, 2018, Mora National Fish Hatchery transferred 1,384 Gila trout, 8.4 inches long in average size, to the Arizona Game and Fish Dept.'s Sterling Springs Hatchery. The trout are surplus to what are needed for recovery purposes and come from the Whiskey Creek lineage, one of five such lineages native to upper Gila River watershed. Our state partners intend to rear these sport fish for another five months to a catchable size of 11+ inches. This transfer marked the first time Gila trout have been sent to another hatchery from the Mora facility, and builds on the 65,000 eyed Gila trout eggs sent Sterling Springs Hatchery in April of 2017.

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
Austin American Statesman	TBD	Jeremy Schwartz a reporter with the Austin American Statesman contacted R2 asking to interview some of our ocelot researchers regarding translocation efforts and genetic diversity.
KOLD News (TV, Tucson) *Jaguar*	TBD	Reporter is following up on an anonymous news tip reporting partial details of the finding of a dismembered jaguar head along the U.S. Mexico border. We cannot confirm that the information is accurate, but we are looking into the information for accuracy and we are providing no further comment.
InfoGraphic – Bats and White Nose Syndrome	TBD	Geoff Giller, a reporter with Infographic, contacted R2 requesting an interview/field visit to report on bats impacted by white-nose syndrome. The reporter has also spoken with the FWS WNS contacts in R5.
Victoria Advocate	Week of Feb. 26	Jessica Priest, a reporter with the Victoria Advocate, contacted R2 regarding information for mussel species that are being considered for listing under the ESA.

Week Ahead Schedule of Meetings, Hearings, and Travel

Immediate Announcements and Actions (within the next 14 days)

Kuenzler hedgehog cactus downlisting – FWS will finalize the downlisting of Kuenzler hedgehog cactus in late March 2018. When first listed, only 200 plants from only two locations were known. Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known population clusters within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild. (R2 – Southwest Region)

15-60 Day Look Ahead
Include known announcements and other deliverables on the horizon.

[*UPDATE*]: Black-capped vireo Delisting Determination – FWS anticipates publishing a final delisting determination for the Black-capped vireo in late March 2018. In 2007, the Service completed a five-year review of the black-capped vireo which recommended the species be downlisted to threatened. In 2012, we received a petition to downlist the black-capped vireo based on our 2007 recommendation. The Service used the Species Status Assessment framework to evaluate species viability and address the petition. Our analysis of the best available science indicates the primary known threats to the black-capped vireo, of habitat loss and brown-headed cowbird parasitism, have been reduced or adequately managed and that many populations are stable or growing. A Communications Plan has been shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. A news release and FAQs have been drafted. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the Federal Register. In addition, an event to celebrate the delisting is being planned for Friday, April 13 at Balcones Canyonlands National Wildlife Refuge near Marble Falls, Texas.

Upcoming Workshops & Meetings

Endangered Species Act Recovery Actions

Lesser Long-Nosed Bat Delisting and Notice of Availability of Draft Post-Delisting Monitoring – In two separate, but associated announcements, FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the delisting of the lesser long-nosed bat and the final delisting of the LLNB. Target date for submitting to the *Federal Register* is March 30, 2018 and delisting is anticipated to follow by a month. This action is not expected to be opposed. Stakeholders are the petitioners, Pacific Legal Foundation and the New Mexico Cattle Growers Association. Proactive conservation stakeholders include Pima County MSCP and hundreds of citizen scientists monitor bats each summer and fall when this migratory species returns to roosts in the U.S. A communications strategy and news release is being prepared.

Draft Recovery Plan for Four Aquatic Invertebrates – FWS will make available and seek comment on a draft recovery plan for four aquatic invertebrates found in desert grasslands in southeast New Mexico and southwest Texas in March 2018. Noel's amphipod, Pecos assiminea, Koster's springsnail, and Roswell springsnail were listed as endangered in 2005. The primary threats to all four species are threats to the quantity and quality of water. Activities, such as oil and gas drilling, water withdrawals from the aquifer and contamination are the greatest threats. Most occupied sites are on FWS Bitter Lake National Wildlife Refuge in New Mexico and The Nature Conservancy holdings in Texas.

Endangered Species Act Listing Actions

[*UPDATE*] - Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began

work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the States, and others.

Tobusch fishhook cactus downlisting notice – In March, FWS will publish a final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved "fishhook" spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to down list the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened. Local interest is anticipated. A Communications Plan has been shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. A news release has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

Other Items of Note

[*UPDATE*] Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review at the beginning of March 2018. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in early 2018. A Communications Plan has been shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. A news release has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

[*UPDATE*] FWS and partners completed the annual Mexican wolf population survey and capture, from January 24, 2018 through February 3, 2018. The count documented a minimum of 114 Mexican wolves in 2017 in the U.S., an increase of one wolf over what was documented for 2016. The Mexican Wolf Recovery Program is a multi-agency cooperative effort between the FWS, Arizona Game and Fish Department, U.S. Forest Service, USDA-Wildlife Services, and the White Mountain Apache Tribe, as well as in consultation with the New Mexico Department of Game and Fish and counties. Survey flights occurred on the Fort Apache Indian Reservation, Apache, Coconino, Cibola, and Gila National Forests in eastern Arizona and western New

Mexico, and some areas immediately outside the forests. Some media attended the operations. The final count was distributed to the media and partner agencies on February 21, 2018.

[*UPDATE*] On January 12, 2018, FWS submitted permit applications to New Mexico Department of Game and Fish (NMDGF) to import and release up to 12 Mexican wolf pups in New Mexico, to import a female wolf from Arizona for artificial insemination at Sevilleta Wolf Management Facility, and to import up to 6 pups from Arizona to be held at Sevilleta or Ladder Ranch Wolf Management Facilities, if needed. The Mexican Wolf Initial Release and Translocation Proposal for 2018 was provided for public review and comment from December 4 to 29. FWS received just over 100 comments, which were transmitted to NMDGF, per their regulations, along with the permit applications. The initial releases and translocations outlined in this document are consistent with: (1) the 2014 Final Environmental Impact Statement (EIS) for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (2) the 2015 Record of Decision for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (3) the 2015 Final Rule - Revisions to the Regulations for the Nonessential Experimental Population of the Mexican Wolf, and the 2017 Mexican Wolf Recovery Plan, First Revision. New Mexico Department of Game and Fish provided FWS with the permits for importation and release on February 22, 2018.

Lower Colorado River Multi-Species Habitat Conservation Plan – As early as February 28, FWS will sign a FONSI on an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake. The LCR-MSCP is a long-term program created in 2005 to minimize and mitigate impacts that water delivery and power generation along the lower Colorado River may have on 26 fish and wildlife species, including six species protected under the Endangered Species Act. LCR-MSCP is responsible for creating, replacing, and managing habitat for these species and operates under an ESA permit. However, in the early 2000s, when the LCR-MSCP was conceived, the largely aquatic, northern Mexican gartersnake was long-thought to have been extirpated from the lower Colorado River. In 2014, the subspecies was added to the list of threatened animals protected under the ESA. A public comment on the draft environmental assessment closed December 28, 2017. Outreach will include a FWS news bulletin and notifying stakeholders and tribes. For more information, visit: https://www.fws.gov/southwest/es/arizona/

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. A conference call was held with Senator Cornyn's staff to discuss the issue on December 11. More details available in past reports.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participant under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Arizona Electric Power Cooperative Candidate Conservation Agreement with Assurances for Sonoran Desert Tortoise – FWS anticipates publishing in the *Federal Register* in the next 45-60 days, a Notice of Availability for the Arizona Electric Power Cooperative (AEPCO) Draft Candidate Conservation Agreement with Assurances (dCCAA) for Sonoran Desert Tortoise and their application for an enhancement of survival permit (ESP) in Arizona. AEPCO has developed a conservation agreement that would promote conservation for the unlisted Sonoran Desert tortoise within 2,152 acres of their right-of-way during normal operation and maintenance activities. If approved the term of the dCCAA and ESP would be 25 years. No formal news bulletin will be released. Outreach to local, State, and Federal agencies and partners.

National Wildlife Refuge Actions

[*UPDATE*]: Army Corps of Engineers (ACE) is seeking to draw-down Lake Alamo (in western Arizona) in order to conduct a dam safety inspection and maintenance. A resulting flushing flow from the reservoir into the Bill Williams River may benefit the downstream river riparian area and is scheduled for as early as March. The event was fully put forward and developed by ACE and does not take place on refuge land however the release would impact the Bill Williams River National Wildlife Refuge. (ACE has completed section 7 consultation on the proposed activity.) The FWS does have a representative on the Bill Williams River Corridor Steering Committee, a non-decisional body focused on interagency communication; however, the Service does not have authority over the release. Reservoir angler and recreational community, and downstream ATV groups have registered concern/opposition to the flows and the Arizona Game and Fish Commission passed a resolution opposing draw-down of Alamo Reservoir. Congressman Paul Gosar (AZ-4) and county elected officials have weighed in on the project, including flushing flows.

FWS Southwest Region is proactively reaching out to state agencies to discuss Secretarial Order 3356, and seek additional opportunities to support and expand hunting and fishing on Refuges in the Southwest. Currently the Oklahoma Department of Wildlife Conservation (ODWC) has been the most responsive. On January 31, 2018, FWS leadership met with ODWC to discuss several potential hunting and fishing opportunities that could occur on Refuges in Oklahoma. Meeting participants identified additional hunting and fishing, educational and youth opportunities on every refuge in Oklahoma. Additionally, ODWC committed to providing additional staff support to help implement and sustain the identified activities. The FWS Southwest Region will continue to reach out to Texas, Arizona and New Mexico as well as Oklahoma to explore more opportunities.

Impact of Cattle Fever Ticks to Cattle Industry in South Texas – After a 30 day public comment period, FWS has signed a Finding of No Significant Impact (FONSI) to allow U.S. Department of Agriculture (USDA) additional fever tick eradication methods on refuge lands. Through a Special Use Permit, USDA will be approved to treat white-tailed deer with ivermectin-treated corn and conduct experimental cattle grazing on Laguna Atascosa NWR and Lower Rio Grande Valley NWR lands that fall within established quarantine areas. These management activities would be carefully administered through a Special Use Permit from the FWS to USDA. Permitting USDA to conduct these fever tick management activities is consistent with invasive species control efforts, Cattle Fever Tick Eradication Program goals, and its adaptive management strategy to eradicate fever ticks within a quarantine area. The FWS will continue to be fully engaged and is committed to cattle fever tick eradication in Texas. Congressional notifications were made on February 12, 2018. More details available in past reports.

Projects are on hold pending confirmation of NAWCA funding. FWS New Mexico National Wildlife Refuges Awarded Restoration Grant – FWS Bosque del Apache and Valle de Oro NWRs along with other federal and non-federal partners were recently awarded a $1 million North American Wetlands Conservation Act (NAWCA) grant for restoration and enhancement of nearly 1,100 acres in the Middle Rio Grande Valley in New Mexico. NAWCA grants increase bird populations and wetland habitat, while supporting local economies and American traditions such as hunting, fishing, wildlife observation, family farming, and cattle ranching. Funding for the project is currently on hold until a full budget is passed. A field visit planned for the week of January 15, 2018 hosted by Ducks Unlimited that included Senator Udall (D NM) and Rep Pearce (R NM 02) has been postponed. A re-schedule date has not yet been identified.

Urban Youth Gaining Outdoor Work Experience – FWS as part of an urban partnership, is bringing students from Furr High School in Houston, Texas to the FWS Trinity River National Wildlife Refuge to enable them to gain back country experience. In January 2018 (date TBD), several Furr High School students (10 to 15 expected) will work alongside FWS to continue construction of a trail within the Refuge during their camping/backpacking experience. The experience is meant to introduce students to careers in conservation and will emphasize land management issues, developing public use opportunities (including hunting, fishing and wildlife watching), team building and leadership skills. The desired outcome is that the students will take learned skills back to their school, which is adjacent to Houston Parks and Recreation's Herman Brown Park, a 900-acre park that the school uses as an outdoor classroom. The urban partnership plans to build on this experience on other FWS/TPWD led programs on hunting, fishing, and wildlife watching conducted in classroom and on the city park.

Newly constructed production pads for oil and gas development at Hagerman National Wildlife Refuge were mitigated by easing angler access to refuge waters at Lake Texoma. Hagerman's Sandy Day Use Area was improved by a mineral operator, replacing bollard and cable around a lot, leveling walkways and paving with coarse stone. Spoil, litter and discarded roots were hauled away by refuge volunteers. The small improvement can make a large difference for the 7,500 anglers and 2,500 birds that use the area. Anglers catch blue catfish, channel catfish, striped bass, white bass, and sunfishes while birders can check off bald eagle, peregrine falcon,

herring gulls, white pelicans, red-tailed hawk, red-shouldered hawk, painted bunting, blue grosbeak, or summer tanager.

Havasu National Wildlife Refuge in Arizona is partnering with the U.S. Department of Agriculture for a second year to eradicate feral swine on refuge lands. Feral swine are invasive and damage natural resources and property, impact agricultural lands, and pose a human health risk due to numerous diseases they carry including Salmonella, leptospirosis, and Escherichia coli (E. coli). Eradication efforts will be conducted by one helicopter using specially trained USDA-APHIS-WS personnel, following policy and procedures established to ensure safe, humane, and environmentally sound practices. Efforts will take place the first two weeks of February.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled for March - June 2018. Part of the project will require the use of a portion of the refuge's water right to support this national security project. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designed under section 10(j) of the ESA. In 2017 a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled for March - June 2018. Part of the project will require the use of a portion of the refuge's water right to support this national security project. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work in in progress following effective coordination between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge are being replaced, with the goal of upgrading technology and providing a more robust foundation within the existing footprint. Construction activities began in late 2017 and are continuing on schedule.

Fish and Aquatic Conservation
FWS Willow Beach National Fish Hatchery, in partnership with Arizona Game and Fish Department, announced the beginning of the annual rainbow trout sportfish stocking season in the lower Colorado River immediately below Lake Mohave/Davis Dam in late October. Neighboring communities include Laughlin, Nevada and Bullhead City, Arizona. FWS will stock about 1, 750 trout every week from early October through March 2018. Stocking sites include Davis Camp, Community Park, and Rotary Park for October-December. From January 2018 through March 2018, stocking sites will be Davis Camp and Community Park. In addition to the annual stocking season below Davis Dam, FWS Willow Beach NFH continues to stock rainbow every week, year round, at Willow Beach Marina, Arizona. (R2 – Southwest Region)

WEEKLY REPORT
DEPARTMENT OF THE INTERIOR
MARCH 4 - MARCH 10, 2018

ASSISTANT SECRETARY FOR FISH AND WILDLIFE AND PARKS

Week Ahead Schedule of Meetings, Hearings, and Travel

ASFWP Principal Deputy Assistant Secretary Jason Larrabee will be in the office. Deputy Assistant Secretary Aurelia Skipwith will be in the office.

On March 6 -7, FWS Principal Deputy Director Greg Sheehan will be attending the National Fish and Wildlife Foundation board meeting in Washington, D.C.

On March 5, NPS Deputy Director Dan Smith will attend the Wildland Fire Leadership Council at the Department of the Interior in Washington, DC. On March 6, he will speak at The Friends Alliance biannual meeting with more than 100 friends groups in Washington, DC.

Immediate Announcements and Actions (within the next 14 days)

[NEW] Between March 1 - 6, three national park units are working with USGS, DOI, and the NPS Office of Aviation Services to survey white-tailed deer populations using an unmanned aircraft system (UAS). Transects will be flown over Chesapeake & Ohio Canal and Harpers Ferry National Historical Parks and Monocacy National Battlefield. The survey work, which is being led by USGS, may require brief closures to ensure visitor safety. All required approvals have been received from the FAA, DOI, and NPS. The NPS is not planning any public announcements about this work. (2/28/2018).

Between March 1 - 15, Rocky Mountain National Park (CO) plans to issue a Finding of No Significant Impact for the Crater Trail to the public. Rocky Mountain National Park prepared the Crater Trail Environmental Assessment (EA) to examine alternative actions and environmental impacts associated with the long-term management and use of the one-mile long trail. The NPS selected the alternative to close the trail. The EA was made available for public review and comment for 41 days, ending Nov. 22, 2017. Thirty-four correspondences were received. No comments warranted development of an additional alternative or reconsideration of alternatives that were considered but dismissed. (02/21/2018).

Between March 2 - 5, approximately 200 military veterans will use Santa Monica Mountains National Recreation Area as a basecamp for training to become wildland firefighters. This is the second year that the program, a partnership between the DOI and L.A.-based nonprofit Team Rubicon, has taken place at the park. A portion of the group will also visit Channel Islands National Park. Local media coverage is expected and will be handled by the Park. (02/21/2018)

By March 5, DOI plans to send to the Federal Register the Notice of Availability of the Florida Trustee Implementation Group (TIG) Deepwater Horizon Oil Spill Final Phase V.2 Restoration

Plan and Supplemental Environmental Assessment. This second phase of the Early Restoration Plan addresses the lost recreation opportunities caused by the oil spill. The Florida TIG selected the option to acquire and enhance a 6.6 acre coastal parcel for the Salinas Park addition, for $3.1M. For the acquired land, The TIG plans to construct a trail extension, three trailheads near the adjacent road, bike facilities, and an elevated boardwalk with observation platforms. The enhancements on the existing property will fund a crosswalk for public safety, an enhanced playground and a pickleball court. The final plan reflects revisions to the draft plan resulting from continued project development and the review of over 100 public comments. (02/21/2018)

On March 5, the annual Isle Royale National Park Winter Study surveys of wolves and moose on Isle Royale will come to completion for this season. The study is conducted by Michigan Technological University (MTU) and the National Park Service (NPS). MTU will release this year's survey results in mid- to late-March, which will garner much media interest. Currently, the survey has shown that two wolves remain on the Island. Moose population trends are expected to show an increase. (02/21/2018).

[UPDATE] By March 5, the Blue Ridge Parkway, along with staff from the Appalachian National Scenic Trail staff, are preparing an administrative record and document review regarding the NPS issuance of construction and right-of-way permits for the Atlantic Coast Pipeline in response a lawsuit filed by the Southern Environmental Law Center (SELC) on behalf of the Sierra Club and the Virginia Wilderness Committee. SELC has filed a petition for NPS to stay its decision to issue these permits, and the DOI Solicitor's Office will be preparing a response.The pipeline will traverse the Blue Ridge Parkway and the Appalachian National Scenic Trail. The Blue Ridge Parkway permits were finalized in December 2017. No start date for construction has been set by the applicant. The Blue Ridge Parkway and Appalachian National Scenic Trail are managing routine implementation of the signed inter-agency Programmatic Agreement under Section 106 of the National Historic Preservation Act and implementation of the NPS construction permit. Response to legal action is being coordinated through the DOI Office of the Solicitor and Department of Justice. The NPS Washington Office has the lead for any media inquires, which have been minimal to-date. (Updated 02/28/18).

[NEW] On or after March 5, Sequoia and Kings Canyon National Parks will open a 30-day public comment period on a proposed project that would increase overnight front country stock facilities to accommodate equestrian access to park trails and wilderness. The project would convert two existing administrative corrals to visitor stock use facilities, expand the parking areas to allow for truck and trailer parking and turnaround space, divide the existing corral space to accommodate 1 to 2 stock groups, and provide 1 to 2 campsites for short-term use. The campsites would be included in the NPS reservation system and would be open to visitors with stock. The project will be funded through a grant from Southern California Edison. (02/28/2018).

[UPDATE] On or about March 5 or later, pending approval by the Department, FWS plans to send to the *Federal Register* a proposed listing determination and proposed critical habitat designation for the Island marble butterfly, found in Washington. The proposed critical habitat designation includes approximately 812 acres. This action is not expected to be opposed, and media coverage is expected to be neutral. Interested stakeholders include the Xerces Society (the petitioner), federal partners including National Park Service and Bureau of Land Management,

and state partners including Washington Department of Fish and Wildlife and Washington Department of Natural Resources, San Juan County Land Bank, the San Juan Preservation Trust, and local landowners. A communications plan has been shared with DOI Comms. A regional news release to tribes, state and local officials, and stakeholders, congressionals and media is planned. (Updated 02/28/18)

[UPDATE] On or around March 5 or later, FWS plans to send to the *Federal Register* a notice of availability of a draft post-delisting monitoring plan for the black-capped vireo. While this action is not controversial in itself, stakeholders who oppose the delisting of the species may use this notice to express their concerns about the delisting. Stakeholders include the petitioners, Pacific Legal Foundation, Jim Chilton, New Mexico Cattle Growers' Association, New Mexico Farm & Livestock Bureau, New Mexico Federal Lands Council, and Texas Farm Bureau, and the Office of Travis Co. Judge and Big Bend National Park. Planned outreach will include notifications to local stakeholders, a regional news release and social media posts. (Updated 02/28/18)

On March 6 (tentative), FWS will join Brookfield Renewable, the Maine Department of Marine Resources, National Marine Fisheries Service and The Nature Conservancy in announcing a proposed feasibility study to enhance migratory fish passage on the Kennebec River. The Kennebec River is second only to the Penobscot River as Maine's most productive system for sea-run fish, including Atlantic salmon, alewife, shad and striped bass. The one-year study will explore the costs and benefits of a suite of alternatives to restore sea-run fish to the river (including nature-like fishways, fish ladders, bypass channels and dam removal) while seeking to maintain current levels of low carbon energy generation. To allow time for the study, Brookfield is requesting an extension on fish passage requirements from the Federal Energy Regulatory Commission to further enhance fish passage beyond what is achievable through current regulatory processes. The request will include letters of support from state and federal agency partners. The governor of Maine also supports the study. Partners are planning coordinated outreach through a joint news release and congressional notifications. (Updated 02/21/18)

On March 6, Fort Pulaski National Monument will celebrate the completion of the new Cockspur Island Bridge with a ribbon-cutting ceremony. This bridge provides the only access to the park and the Coast Guard station, and at times, its condition has limited visitor access to the park. The new bridge will provide more consistent and safe access. This event is expected to receive Congressional and local media interest which will be handled by the park. (02/14/2018).

[NEW] From March 6 – April 7, Prince William Forest Park will open a 30-day comment period for an EA that will develop comprehensive guidance related to multi-use trails and visitor experience within the park. The new plan will seek to balance long term management and resource protection. On March 20, a public scoping meeting will be held.

[UPDATE] Around March 6 or later, Mexico's Commission for Natural Protection Areas will announce the eastern monarch butterfly overwintering population numbers. FWS is in communication with the Mexican government for this anticipated announcement, and FWS is planning a national news release. (Updated 02/28/18)

[NEW] By March 7, the NPS anticipates it will publish a final rule to allow bicycle use on a 2-mile segment of the East Shore Trail located within Rocky Mountain National Park. A portion of this 2-mile segment will require trail construction to accommodate bicycles and is therefore considered a new trail. NPS regulations require promulgation of a special regulation to designate new trails for bicycle use off park roads and outside developed areas. (02/28/2018).

[NEW] By March 7, the NPS anticipates it will publish a proposed rule to allow bicycle use on two proposed multi-use trails located within Pea Ridge National Military Park. One trail will be approximately 0.55 miles in length and the other will be approximately 1.17 miles in length. Both trails will require trail construction activities to accommodate bicycles and are therefore considered new trails that will be opened to bicycles. NPS regulations require promulgation of a special regulation to designate new trails for bicycle use off park roads and outside developed areas. (02/28/2018).

Through March 7, the Environmental Assessment (EA) for the Lincoln Memorial's new underground visitor space will be released for comment. The EA identifies three alternatives – no action; improve existing; and optimized (incorporating all of the proposed improvements), which is the preferred alternative - and analyzes potential impacts resulting from the project, which is funded in part by a donation from philanthropist David Rubenstein. The NPS will accept comment on the draft EA through the NPS Planning, Environment and Public Comment website, and by holding a consulting party meeting on February 21. (Prior to 02/14/2018).

On or after March 7, Minidoka National Historic Site will hold a pre-construction meeting to officially kick-off the construction phase of the visitor contact station. The park is considering holding a small ground-breaking ceremony in May, and inviting partner organizations and local press to celebrate this momentous occasion. Construction is being funded through recreational fee dollars. (02/14/2018).

[NEW] Between March 7 - 9, a World Bank sponsored high level delegation from Indonesia studying large scale water management will visit south Florida. The delegation plans to visit the Office of Everglades Restoration Initiatives on March 7 and Everglades National Park on March 8. (02/28/18).

On March 8, a status hearing by Federal District Court is scheduled regarding the R.S. 2477 bellwether process to help resolve some of the legal questions related to the R.S. 2477 right-of-way claims lawsuits filed in 2010 by the State of Utah and Utah counties. Kane County (UT) is taking the lead and on Jan. 19, 2018, submitted a list of 17 roads to be used in the bellwether process. Three of the roads are located within Glen Canyon National Recreation Area. This process is important as it could be the basis for determining administrative rights on many roads in Glen Canyon and other NPS units in Utah. (02/14/2018).

[NEW] Between March 8 - 16, three national wildlife refuges in the Northeast Region will issue environmental assessments on proposed expansions or openings for hunting during the 2018-2019 season. Umbagog NWR in Maine and New Hampshire plans to open an additional 16,457 acres of land to hunting of various species, as well as add turkey to the species approved for hunting on refuge lands. Edwin B. Forsythe NWR in New Jersey intends to open an additional

4,299 acres of lands to deer hunting, as well as add spring turkey hunting and squirrel hunting to 10,705 acres. John Heinz NWR at Tinicum – near downtown Philadelphia, Pennsylvania – aims to start deer archery hunts for specialized groups such as disabled hunters, active military, veterans and youth (up to age 34). Each refuge will issue a news release to solicit public comment. States have already been engaged and will be notified of publication. (02/28/18)

On or around March 8, FWS plans to send to the *Federal Register* a proposal to downlist the Hawaiian goose (nēnē) from endangered to threatened. FWS will also propose to establish special regulations for the conservation of the species under section 4(d) of the ESA to allow for flexibility in managing lands. Landowners of resort, golf course, agricultural, residential and recreational properties are likely to support the reclassification and associated 4(d) rule while conservation groups may be opposed. Interested stakeholders include the State of Hawaii, federal agencies, conservation and bird groups, various private landowners, and the public. Outreach includes a regional news release, social media, emails and phone calls to congressional offices and stakeholders. (Updated 01/31/18)

On or around March 8, FWS plans to send to the *Federal Register* a final determination to withdraw the proposal to list the San Fernando Valley spineflower, a plant found in California. This action is not expected to be strongly opposed; however, the Santa Clarita Organization for Planning and the Environment, a local environmental organization, has filed litigation regarding a development project in the range of the species and will likely oppose the withdrawal of the proposed rule. Other interested stakeholders include Newhall Land Company, City of Calabasas, Santa Monica Mountains Conservancy, WildEarth Guardians, California Department of Fish and Wildlife, and local landowners. Media coverage is expected to be neutral. Planned outreach includes a regional news release to all interested parties and the media. FWS is required by settlement agreement to publish in the *Federal Register* by March 15; therefore, FWS plans to submit it by March 8. (01/17/18)

On or around March 9, FWS plans to send to the *Federal Register* a minor map correction in the final rule designating critical habitat for two butterflies: the Poweshiek skipperling and Dakota skipper. One map incorrectly labeled Poweshiek skipperling critical habitat as Dakota skipper critical habitat in Minnesota. FWS does not expect any opposition to this. No outreach is planned for this simple correction notice. (Updated 01/24/18)

As early as March 9, FWS will issue a Biological Opinion (BO) to the Army Corps of Engineers for the Lake Okeechobee Regulation Schedule (LORS) in Florida. This consultation has involved no changes to the actual water level schedule or to lake operations. The only notable change is a new method for calculating the take of endangered snail kites. Consequently, this recent consultation has not been controversial. No outreach is planned but will be prepared to respond if asked. (02/14/18)

March 9 is the NPS deadline for public comment on The Revised Feasibility and Suitability Study for Additional Routes of the Oregon, Mormon Pioneer, California, and Pony Express National Historic Trails (4 Trails Study). Congress directed the Secretary of the Interior (and in turn, the NPS) to study routes for possible addition to the existing Oregon, California, Mormon Pioneer, and Pony Express national historic trails (NHTs). After evaluation of the National

Trails System Act and NHT criteria, the NPS study team found that some of the study routes (7,425 miles of the initial 17,043 miles of study routes in 13 states) are nationally significant and may be eligible for designation as part of the National Trails System. (02/21/2018)

[UPDATE] By March 9, the NPS anticipates announcing 51 African American Civil Rights Grant awards, totaling almost $13 million. Grants will be used to fund planning, education, research, pre-development, and physical preservation projects focusing on the struggle for African American equality in the 20th Century. Eligible applicants include States, Federally recognized Tribes, local governments, and nonprofits. The grants are anticipated to receive press coverage and legislative attention upon announcement; the NPS is coordinating with DOI on the outreach. (Updated 02/28/18).

[UPDATE] By March 9, the NPS anticipates announcement of a grant funding opportunity on grants.gov for the Historically Black Colleges and Universities grants which fund the preservation of National Register listed properties on HBCU campuses. $4 million in FY 2017 funding is available to eligible HBCU applicants. There is interest in the program with weekly inquiries. The press release is being coordinated with ASFWP and DOI Communications. (Updated 02/28/18).

[UPDATE] By March 9, the American Battlefield Protection Program will issue an apportionment memo for nine Battlefield Land Acquisition Grants awarded to States and funded through the Land and Water Conservation Fund. The apportionment is approximately $4.3 million and goes toward the protection of over 500 acres at two threatened Revolutionary War battlefields, five Civil War battlefields, and one Civil War/Revolutionary War battlefield: Brandywine, Pennsylvania; Camden, South Carolina; Chattanooga, Tennessee; Appomattox Court House, Virginia; New Market Heights, Virginia; Morton's Ford, Virginia; Franklin, Tennessee; Yorktown, Virginia. The press release is being coordinated with ASFWP and DOI Communications. (Updated 02/28/2018).

[UPDATE] By March 9, the NPS anticipates announcement of a grant funding opportunity on Grants.gov. Tribal Heritage grants assist Indian Tribes, Alaskan Natives, and Native Hawaiian Organizations in protecting and promoting their unique cultural heritage and traditions. At least $500,000 is made available annually from the HPF. There is interest in the program with weekly inquiries. The press release is being coordinated with ASFWP and DOI Communications. (Updated 02/28/18).

[UPDATE] By March 9, the NPS will prepare and apportionment of FY 2018 HPF grants to States and Tribes for the percentage of the year covered by the continuing resolutions running through March 23, 2018. By March 5, a Notice of Funding Opportunity will be posted to Grants.gov. The HPF provides non-discretionary operational grants to historic preservation offices in States and Tribes. Several States have contacted the NPS and the National Conference of State Historic Preservation Officers with concerns that the awards may be delayed due to the Departmental review process (Updated 2/28/18).

On March 14, the Bridalveil Fall Rehabilitation Project EA public comment period will close. Yosemite National Park will augment visitor services at the popular location by improving trails,

viewing platforms, and accessibility, constructing new restrooms, and addressing deferred maintenance issues. The project will be completed in partnership with The Yosemite Conservancy, the park's philanthropic partner, and construction is anticipated to start in the Fall of 2018. (Updated 02/14/2018).

[UPDATE] By March 15, (pending Departmental approval of Notice of Availability (NOA), Death Valley National Park anticipates a NOA will be published in the Federal Register for the Draft Management Plan and Draft Environmental Impact Statement for Saline Valley Warm Springs (plan/DEIS). The NOA will initiate a 60-day public comment period during which public meetings will be held in the vicinity of the park. The plan/DEIS is intended to provide a framework for natural and cultural resource management, administration and operations, and managing visitor use. (Updated 2/28/18).

[UPDATE] By March 15, Death Valley National Park anticipates releasing the final Bonnie Clare Road Reconstruction Environmental Assessment and FONSI. Reconstruction work is scheduled to start in August 2018 and be completed by May 2019. This will allow reopening of the northeast entrance to the park and restore public access to Scotty's Castle after massive damage from flooding in October 2015. (Updated 2/28/18).

[UPDATE] By March 15, the Blue Ridge Parkway anticipates initial clearing of 1.5 acres (123 trees) within the boundary of the Blue Ridge Parkway in advance of construction for the Mountain Valley Pipeline, which will traverse the Blue Ridge Parkway and the Appalachian National Scenic Trail. Tree clearing will occur along the wooded edges of existing pastoral landscape, widening an existing non-wooded vista. The Blue Ridge Parkway construction and right-of-way permits for the Mountain Valley Pipeline were finalized in December 2017. No start date for full construction has been set by the applicant. The Blue Ridge Parkway and Appalachian National Scenic Trail are managing routine implementation of the signed inter-agency Programmatic Agreement under Section 106 of the National Historic Preservation Act and implementation of the NPS construction permit. The NPS Washington Office has the lead for any media inquires, which have been minimal to date. (Updated 2/28/18).

By March 15, the California Department of General Services will issue a Final Environmental Impact Report and Environmental Assessment (EIR/EA) for relocation of the Red Mountain emergency communications tower currently located on Forest Service lands. Rodgers Peak, within the boundary of Redwood National Park, has been evaluated as a potential replacement site. The EIR/EA found significant unavoidable adverse impacts from the proposed project on the National Register-eligible Lyons Ranch Historic District. The California Office of Emergency Management (CalOES) has identified alternative tower locations outside the park that reduce or eliminate the impact upon park resources. In the event that CalOES selects Rodger Peak as a site, the park cannot issue a FONSI for the right-of-way (ROW) that would be required to access the park site given the unavoidable impacts to park resources. The NPS submitted comments on the Draft EIR/EA in January. (02/14/2018).

By March 15, (embargoed until public announcement) Channel Islands National Park will initiate the process to transfer human remains that have been undergoing Native American Graves Protection and Repatriation Act (NAGPRA) review to the Santa Ynez Band of Chumash

Mission Indians (a federally recognized tribe) under 43 C.F.R. §10.7 (Disposition of unclaimed human remains, funerary objects, sacred objects, or objects of cultural patrimony). The park is required to submit a list of the items to the Manager, National NAGPRA Program, and publish a notice of proposed transfer in a newspaper of general circulation. (Prior to 02/14/2018).

[UPDATE] By March 15, the NPS expects to release the final plan/EIS to address the presence of wolves at Isle Royale National Park. The publication of the U.S. Environmental Protection Agency notice of availability of this final plan/EIS in the Federal Register will initiate a 30-day wait period before the Midwest Region Regional Director can sign the Record of Decision. Publication of the document is contingent on the release of the NPS Notice of Availability, which is currently in the surnaming process. (Updated 02/28/18).

[UPDATE] By March 15, the Federal Tax Incentives for Rehabilitating Historic Buildings Annual Report for FY 2017 is planned to be issued. The HTC was retained as part of the tax reform legislation signed by the President into law on December 22, 2017. The eight-page annual report summarizes statistics about the program to include the total number of projects reviewed by state, rehabilitation cost, new use, etc., and also includes photos and short descriptions of some representative projects. (Updated 02/28/18).

[UPDATE] Between March 15-30, Death Valley National Park anticipates releasing the final Scotty's Castle Flood Rehabilitation Environmental Assessment and FONSI. This document analyzes repair work planned for historic structures, the cultural landscape, utilities, parking, and walkways to recover from damage from a flash flood in October 2015. The historic district is scheduled to reopen to the public in 2020. (1/24/2018, updated 2/28/18).

[UPDATE] Between March 15-30, Death Valley National Park and Mojave National Preserve will begin efforts to relocate up to 2,500 feral burros from each park. Peaceful Valley Donkey Rescue (a nonprofit partner) will fund and carry out the roundups, test burros for disease, relocate them to holding facilities, and domesticate the animals for adoption. This is anticipated to generate public interest and has already triggered a FOIA request, which are both being handled by the Park, with appropriate regional and national support. (Updated 02/28/18).

[UPDATE] Between March 15-30 (pending Departmental approval), Olympic National Park anticipates issuing a news release announcing that a Notice of Availability NOA is to be published in the Federal Register for its Mountain Goat Management Plan/Final EIS. (Update 2/28/2018).

[UPDATE] On or around March 15, the NPS plans to release, pending agency concurrence, a Request for Proposal for a new interim, three-year temporary concessions contract for Hite at Glen Canyon National Recreation Area in order to avoid interruption of visitor services. The interim contract is needed to address increased land-based recreational use and will help inform and allow time for the development of a typical 10-year concessions contract. (Updated 02/28/18).

Between March 15 - April 15, Manassas National Battlefield Park plans to conduct its first-ever prescribed burn as part of efforts to control vegetation, enhance grassland habitats, and restore

the historic landscape. A Fire Management Plan and an accompanying Environmental Assessment were completed in 2015. If weather conditions are favorable, the burn will encompass approximately 60 acres over the course of one day. (02/21/2018).

Around March 15, Golden Gate National Recreation Area is expected to release a Request for Qualifications for a competitive business opportunity to establish a waterfront community center at the Fort Baker Historic Boat Shop and Marina as an affordable recreational and gathering place. The purpose of the RFQ is to identify both private- and public-sector entities interested in operating the facility, which is currently operated by the U.S. Air Force as a military recreation facility open to the public. NPS is seeking a long-term lease that will enable an offeror to make necessary investments in historic rehabilitation of deteriorating facilities, and the provision of public services and programs at the site. The park has kept the USAF informed throughout the lead up to this announcement, and they have express interest in participating in the RFQ process. (Updated 02/21/2018).

[NEW] On March 15, Charles Young Buffalo Soldiers National Monument and partners will host an annual celebration of Colonel Young's birthday as well as recognize the 5 year anniversary of the monument's designation. The event will be hosted at the National Afro-American Museum and Cultural Center in Wilberforce, Ohio. (2/28/18).

[UPDATE] By March 16, Mesa Verde National Park (MEVE) will release the Livestock Removal Plan/Environmental Assessment (EA) for a 30-day public comment period. The EA calls for the removal of approximately 80 horses and 20 cattle that are presently inside the park. MEVE does not have the legal authority to allow livestock use within the park. Livestock use is also inconsistent with park's mission to preserve the Ancestral Pueblo culture. There has been significant public, and moderate media interest. Mesa Verde National Park is working with and consulting animal advocacy groups on how to humanely remove livestock from the park and identify potential homes for captured, unclaimed livestock. Initial public scoping began in 2015, and resulted in more than 9,000 comments, most of which were form letters. The park also engaged the Bureau of Land Management on the EA. (Updated 2/28/18).

[NEW] Between March 16-May 11, Katmai National Park and Preserve and Alagnak Wild River will be hosting public listening sessions and collecting comments related to the Katmai National Park and Preserve and the Alagnak Wild River Wilderness and Backcountry Management Plan. During the public comment period, four open house events will be held in Kodiak, Anchorage, Homer, and Naknek, Alaska to inform the public on the planning process and solicit public feedback. Public input on key planning issues and initial management considerations will help the park as it develops a proposed action and preliminary alternatives eventually incorporated in the draft wilderness and backcountry management plan. (2/28/17).

[UPDATE] In March, FWS plans to publish a final rule on revisions to the 2018 Federal Migratory Bird Hunting and Conservation Stamp contest regulations. For the 2018 Federal Duck Contest and 2019-2020 Federal Duck Stamp, contest entries must include one or more visual elements that reflect the theme "Celebrating our waterfowl hunting heritage." The final changes for 2018 stamp design must depict appropriate hunting-themed elements, such as hunters, hunting dogs, duck blinds, etc. as along with one of the five eligible waterfowl species. The bird

must be in the foreground, portrayed live, and clearly the focus of attention. This will provide visual recognition to the contributions waterfowl hunters make to habitat conservation. Planned outreach includes a news release with congressional and stakeholder notifications. (Updated 02/28/18)

[UPDATE] In March, pending approval by the Department, FWS will award nearly $19 million in grants to coastal states to conserve and restore coastal wetlands and their fish and wildlife habitat. Each year, the Service supports coastal wetland conservation through the National Coastal Wetlands Conservation Grant Program and the Sport Fish Restoration and Boating Trust Fund. The grant funds are derived from excise taxes on fishing tackle and motorboat and small engine fuels. The grants will support 22 projects in 13 coastal states to protect, restore or enhance more than 30,000 acres of coastal wetlands and adjacent upland habitats, including 287 miles of shoreline. Over $21 million in additional matching funds will be provided by partner contributions from state and local governments, private landowners and conservation groups. Conservation of this habitat will help recover coastal-dependent federal trust species, enhance flood protection and water quality, provide economic benefits to coastal communities and increase recreational opportunities for hunters and anglers. The grant recipients (states) have not yet been informed that they will be receiving funds. Planned outreach includes congressional and stakeholder notifications and a news release. (Updated 02/28/18)

[UPDATE] In March, pending approval by the Department, FWS plans to send to the *Federal Register* a notice announcing the availability of comprehensively revised boundaries for the first batch of Coastal Barrier Resources System (CBRS) units included in the Hurricane Sandy Remapping Project. CBRS was created by the Coastal Barrier Resources Act in 1982 to conserve relatively undeveloped, highly vulnerable coastal barriers along the Atlantic and Gulf of Mexico coasts. The proposed revisions will affect 112 existing and 36 proposed new units in Delaware, Massachusetts, New Hampshire, and New Jersey. The notice will announce a 120-day public comment period and also advise of upcoming public meetings to be held via webcast. Landowners, state and local officials (and their representatives in Congress) will likely support the removal of areas from the CBRS and similarly oppose the addition of new areas into the CBRS. Properties in a CBRS unit are ineligible for federally subsidized flood insurance. Taxpayer groups, recreational interest groups and conservation groups will likely support the additions to the CBRS. This action is a step in the remapping process for CBRS units. It is separate from the three CBRS bills that were the subject of the February 27 hearing in the House Natural Resources Committee. The three bills would adopt recommended maps FWS prepared following the full process that these Sandy maps are currently undergoing. Outreach will include a national news release and FAQs, as well as stakeholder and congressional outreach. (Updated 02/28/18)

15-60 Day Look-Ahead

Around March 15 or later, FWS will announce for public comment a draft environmental assessment (EA) that will evaluate alternatives to protect seabirds from predation by invasive house mice at Midway Atoll National Wildlife Refuge and Battle of Midway National Memorial, located in Papahānaumokuākea Marine National Monument. More than 3 million birds from 29

species nest on Midway's three islands, including the world's largest Laysan albatross colony. All of them are potentially vulnerable to mouse predation. The mice have been documented eating seabirds while they are nesting, resulting in injury and death. Due to their extreme dedication to raising their young, the birds will not leave the nest if attacked. Outreach is planned to include local public notifications through the web and social media, when the draft EA is published, and notifications to members of Congress in Hawaii, with targeted stakeholder outreach. (Updated 02/21/18)

On or around March 15, FWS plans to release for public comment a Draft Recovery Plan for the Southern California Distinct Population Segment of the mountain yellow-legged frog. The recovery plan is designed to help southern populations of this species in three recovery units through a set of recovery strategies with associated objectives and measurable criteria. The recovery units include San Bernardino Mountains, San Gabriel Mountains, and San Jacinto Mountains. The draft plan includes input from partners including the San Diego and Los Angeles zoos, California Department of Fish and Wildlife, U.S. Geological Survey, and the U.S. Forest Service. This is not controversial. Planned outreach includes congressional and stakeholder notifications and a regional press release to media. (Updated 02/21/18)

On March 19-20, Rainbow Bridge National Monument will host the 2018 Rainbow Ridge Native American Consultation Committee meeting to discuss a variety of issues related to the protection and management of Rainbow Bridge, a significant cultural site for many tribes. The Committee was formed 20 years ago and the affiliated tribes include the Pueblo of Zuni, Navajo Nation, San Juan Southern Paiute Tribe, Hopi Tribe, Kaibab Paiute Tribe, and Ute Mountain Ute Tribe. This annual consultation meeting brings together the park and the tribes for collaborative discussions on ways to engage tribes in the management of the Rainbow Bridge with discussion topics such as trail improvements, interpretive messaging, and cultural property designation. (Prior to 02/14/2018).

On March 20-21, (embargoed until public announcement) Manhattan Project National Historical Park will conduct an internal workshop with its Department of Energy partners in Lakewood, Colorado, to develop a Visitor Access Plan. Many of the facilities listed in the park's enabling legislation are currently inaccessible to the public. This plan will analyze the feasibility of visitor access to these facilities over the next 15 years. (Prior to 02/14/2018).

On March 20, Mary Josie Blanchard and other Federal representatives of the Deepwater Horizon Natural Resources Damage Assessment Trustee Council will be meeting with GAO to discuss issues raised on how the Federal government manages the settlement funds from Deepwater Horizon and how these funds have been designated or used for restoration. Mary Josie, as the Federal Co-Chair of the Deepwater Horizon Natural Resources Damage Assessment Trustee Council, is coordinating with the other Federal agencies on the Trustee Council—USDA, Commerce and EPA. (02/21/2018)

On March 21, the NPS, the Federal Aviation Administration, and seven commercial air tour operators will sign the Glen Canyon National Recreation Area and Rainbow Bridge National Monument Commercial Air Tour Management Agreement. This agreement, among many things, will manage air tours over the park, ensure protection of resources and visitor use and

enjoyment without compromising aviation safety, and successfully decrease/limit the number of commercial air tours over Rainbow Bridge and other sensitive areas in the parks. The signing ceremony will be held following the Rainbow Bridge Native American Consultation Committee to facilitate interaction between air tour operators and affiliated tribes and to recognize the significant input tribes made to the agreement. (Prior to 02/14/2018).

[UPDATE] No later than March 21, pending DOI approval of the *Federal Register* Notice of Availability, Capitol Reef National Park will release the Livestock Grazing and Trailing Management Plan/Draft Environmental Impact Statement (DEIS) for a 45-day public comment period. The Draft EIS analyzes the impacts of livestock grazing and trailing on park resources and is intended to guide future adaptive management decisions. On Nov. 7, 2017, Capitol Reef National Park hosted a cooperating agency meeting and released the Cooperating Agency Review Draft EIS. The park has since worked with cooperating agencies to address their comments and finalize the Draft EIS for public review. The timeline for the release of the Draft EIS is linked to the intention of successfully issuing new permits in October 2018, if the final EIS Record of Decision is completed by then. (updated 2/28/18).

[NEW] (Embargoed until public release) On March 21, the NPS plans to release a prospectus for a new concession contract at Sequoia and Kings Canyon National Parks to provide pack station, guided trail rides, and other associated services at the Cedar Grove Pack Station and Grant Grove Stables. (2/28/2018).

[UPDATE] On March 21, FWS Principal Deputy Director Greg Sheehan and Midwest Regional Director Tom Melius will be attending a Memorandum of Understanding (MOU) signing event with Monsanto at the National Press Club in Washington, DC. Representatives from Monsanto and the Climate Corporation will be in attendance. FWS Midwest Region has been exploring the possibility of a partnership with Monsanto, and its subsidiaries, to use modern agriculture data tools to help landowners voluntarily manage their land to enhance pollinator habitat while maximizing production in their fields. Monsanto and FWS developed an MOU to outline how we will work together to: 1) provide accurate and useful information to farmers; 2) analyze data to determine the outcomes of conservation actions and make it easy for landowners to have access to conservation programs should they choose to participate; and 3) to explore the possibilities to use these tools for other cooperative conservation efforts across the country. Midwest Region is working closely with HQ on this open press event and a communications plan, which will include active national outreach. (Updated 02/28/18)

On or around March 22, FWS plans to send to the *Federal Register* 90-day findings on petitions to delist or downlist the Cape mountain zebra, and delist the Preble's meadow jumping mouse. For substantial 90-day findings, this is the first step in a longer process and tends not to get significant media attention; however, this action might be the first time stakeholders become aware that FWS is assessing the status of a species. All stakeholders will have ample opportunity to provide input into the eventual 12-month findings. FWS anticipates local media coverage and interest from livestock and home building industries in Wyoming and Colorado regarding the finding on the petition to delist the Preble's meadow jumping mouse. A national news bulletin and congressional notifications are planned. (Updated 02/14/18)

[UPDATE] On or around March 29, FWS plans to send to the *Federal Register* an amendment to the current listing of the southern Selkirk Mountains population of woodland caribou (endangered) to include the entire Southern Mountain Caribou population as a distinct population segment (DPS). The revised DPS (17 subpopulations; 15 extant, two extirpated) includes the currently listed southern Selkirk Mountains population of woodland caribou, which is a transboundary population between British Columbia, Canada, and northern Idaho and northeastern Washington. The critical habitat designation will remain unchanged. Non-governmental organizations including the International Fund for Wildlife, Kettle Range Conservation Group, Selkirk Conservation Alliance, Kootenai Environmental Alliance, Center for Biological Diversity, Idaho Conservation League and the State of Idaho may be opposed to the DPS listing. The Pacific Legal Foundation (representing Bonner County) is likely to challenge the determination. FWS received a notice of intent to sue from the Pacific Legal Foundation on behalf of Bonner County in June 2017 because FWS has not met the statutory deadline for finalizing this rule (a proposed rule was published in 2014). Planned outreach includes a regional news release, social media, emails and phone calls to congressional offices and stakeholders. A communication plan, news release, and FAQs have been sent to FWS HQ. (Updated 02/28/18)

On or around March 29, FWS plans to send to the *Federal Register* a final determination on the proposal to downlist to threatened from endangered the Kuenzler hedgehog cactus. When first listed, only one population of 200 plants was known. The discovery of additional populations, together with efforts to conserve the plant and its habitat, indicate the cactus is no longer at risk of extinction. Today, there are 3,300 individual cacti in 11 known populations within its southern New Mexico range. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild. This downlisting is not expected to be controversial. Planned outreach includes a regional news release, phone calls to stakeholders, and web postings.(Updated 02/21/18)

On or around March 29, FWS plans to send to the *Federal Register* a final determination on the proposal to list the yellow lance as threatened. The yellow lance is a freshwater mussel that occurs in North Carolina and Virginia. The final listing will likely be opposed by the City of Raleigh due to a proposed reservoir project on the Little River. FWS has been working with the city on this potential project for over nine years, and there are already other listed species in that location. Other stakeholders include the Lower Neuse Basin Association, Neuse River Compliance Association, Tar Pamlico Basin Association, North Carolina Water Quality Association, and the Center for Biological Diversity (petitioner). Planned outreach includes a regional news release and notification to stakeholders. The statutory deadline for publication of the final determination in the *Federal Register* is April 5; therefore, FWS plans to submit it by March 29. (02/07/18)

On or around March 30, FWS plans to send to the *Federal Register* a notice announcing the availability of a draft post-delisting monitoring plan for the delisting of the lesser long-nosed bat. This action is not expected to be opposed. Stakeholders are the petitioners, Pacific Legal Foundation, and the New Mexico Cattle Growers Association. Planned outreach includes a regional news release and notifications to stakeholders. (Updated 02/21/18)

[UPDATE] On or around March 30, FWS plans to send to the *Federal Register* a final determination on the proposal to delist the lesser long-nosed bat. This action is not expected to be controversial. Stakeholders are the petitioners, Pacific Legal Foundation, and the New Mexico Cattle Growers Association. This action is a Secretarial priority. Planned outreach includes a regional news release and notifications to stakeholders. (Updated 02/28/18)

On or around March 30, FWS plans to send to the *Federal Register* a rule removing the textual descriptions of the critical habitat boundaries from certain wildlife entries that have maps sufficient to stand as the official delineation of the critical habitat designation. This rule does not increase, decrease, or in any other way change the critical habitat designations from which we are removing the textual descriptions of boundaries. This action will save taxpayer resources. FWS is taking this action in accordance with the May 1, 2012, revision of the regulations related to publishing textual descriptions of critical habitat boundaries. No outreach is planned. (Updated 02/21/18)

On or around March 30, FWS plans to send to the *Federal Register* a proposed delisting determination on the Kirtland's warbler located in 31 states and the District of Columbia. The Michigan Governor's Office has expressed some interest in partnering with FWS on an announcement. Other planned outreach includes a regional news release, emails to stakeholders, social media and web postings. Stakeholders include Michigan Department of Natural Resources, U.S. Forest Service and Huron Pines, along with other conservation groups working as part of the Kirtland's Warbler Alliance. There is not expected to be controversy associated with the proposal, as partners have been transitioning from recovery to conservation management for more than a year. There is expected to be a moderate level of interest among birders and conservation groups, as the species is sought after by bird watchers. (01/31/18)

On or around March 30, FWS plans to send to the *Federal Register* a final determination on the proposal to reclassify the Tobusch fishhook cactus from endangered to threatened. This plant species has shown significant recovery due in part to collaborative conservation efforts with partners. Supporters of this action include the Texas Parks and Wildlife Department, the Texas Department of Transportation, the Lady Bird Johnson Wildflower Center, and The Nature Conservancy. FWS has gained positive coverage on downlisting proposals, and anticipates more interest when this final determination is announced. Planned outreach includes a regional news release with stakeholder and congressional contact, and social media postings. (Updated 01/31/18)

On or around March 30, FWS plans to send to the *Federal Register* a notice as a follow-up to the *Federal Register* notice published on December 7, 2017 asking for public comments on the impact of the recent D.C. Circuit Court of Appeals ruling, Humane Society of the United States, et al. v. Zinke, et al., 865 F.3d 585 (D.C. Cir. 2017) on the final rule designating the Greater Yellowstone Ecosystem (GYE) population of grizzly bears as a distinct population segment and removing the population from the List of Endangered and Threatened Wildlife. Interested stakeholder groups include the Interagency Grizzly Bear Committee (including federal, tribal, state and local government entities), agricultural producers, hunting groups and environmental groups. Plaintiffs in the current litigation over the delisting of the GYE grizzly bear population

may strongly oppose this action. Planned outreach includes individual congressional, state and tribal notifications, and a regional news release. (02/07/18)

[UPDATE] On or around March 30, FWS plans to send to the *Federal Register* a final determination on the proposal to delist the black-capped vireo. Stakeholders include the petitioners, Pacific Legal Foundation, New Mexico Cattle Growers' Association, New Mexico Farm & Livestock Bureau, New Mexico Federal Lands Council, Texas Farm Bureau, Department of the Army, The Nature Conservancy, Oklahoma Department of Wildlife Conservation, and Texas Parks and Wildlife Department. Planned outreach will include notifications to local stakeholders, a regional news release and social media posts. An event to celebrate the delisting is being planned. This action is a Secretarial priority. (Updated 02/28/18)

[UPDATE] On or around March 30, FWS plans to send to the *Federal Register* a final determination on the proposal to list the Louisiana pinesnake as threatened. The pinesnake occurs in Louisiana and Texas. The Louisiana pinesnake listing is controversial due to concerns about the potential impacts on forestry activities, which is why FWS is simultaneously proposing a 4(d) rule that will allow routine forest management activities to proceed without need for permitting. Stakeholders include the timber industry, U.S. Forest Service, U.S. Department of the Army – Fort Polk and the Joint Readiness Training Center, the State of Louisiana, USDA's Natural Resources Conservation Service, Louisiana Department of Wildlife and Fisheries, Texas Parks and Wildlife Department, Texas A&M Forest Service, Center for Biological Diversity, WildEarth Guardians, and members of Congress in Louisiana and Texas. Planned outreach includes a regional news release and notification to stakeholders and members of Congress. FWS is required by settlement agreement to publish the final determination in the *Federal Register* by April 6; therefore, FWS plans to submit both rules by March 30. (Updated 02/28/18)

By March 30, the final report on the Lake Clark National Park and Preserve Traditional Use Study for the Chulitna River-Sixmile Lake area will be available. The study area encompassed the Chulitna and Sixmile drainages, including the Tazimina River and the upper Newhalen River, as well as all NPS lands within that region. The Study sought to identify geographical locations with unique cultural significance to the Interior Dena'ina people who live there. These places are associated with historical events and people, with ceremonial traditions, and with traditional and modern subsistence practices. The Traditional Use Study was conducted in collaboration with the Nondalton Tribal Council. (02/21/2018).

By March 31, Mojave National Preserve expects to begin the public comment period on a Management Plan for Developed Water Sources and Environmental Assessment (PDWS/EA). The plan will provide a comprehensive strategy and water management techniques to ensure the preservation of wildlife, historic, wilderness, and recreation values in the management of developed and undeveloped water resources in the park (wildlife guzzlers and developed springs). The process is being closely watched by local hunting and conservation groups concerned about how the park will manage wildlife guzzlers, which are viewed by some as necessary for maintaining a healthy bighorn sheep population. (Prior to 02/14/2018).

By March 31, the NPS will provide comments to the Delaware River Basin Commission (DRBC), which recently proposed regulations addressing natural gas development, which

includes a ban on high-volume hydraulic fracturing in the Basin. The NPS has filed comments on the various iterations of proposed regulations over the last eight years; a multi-disciplinary team is preparing a comment memo to be filed to the Federal representative and the U.S. Army Corps of Engineers. The memo will be routed for NPS and ASFWP leadership review prior to submission. (Prior to 02/14/2018).

By March 31, the Lockkeepers House on the National Mall will undergo the next restoration phase of Masonry Work. The structure has been wrapped in an insulating material to maintain the minimum 40-degree temperature required for work. It will remain wrapped for approximately two months. For more info:
https://www.nps.gov/nama/learn/news/lockkeeperhousemove.htm
(Prior to 02/14/2018).

By March 31, Cuyahoga Valley National Park, in Ohio, is implementing the third year of its four-year White-Tailed Deer Management Plan. Management activities will be conducted in partnership with the U.S. Department of Agriculture sharpshooters on weekday evenings from dusk till midnight. Park closures will be in effect during the time and in the areas where management activities are taking place. The park has notified immediate neighbors and municipalities and a hotline has been established for the public. (Prior to 02/14/2018).

By March 31, the NPS will conduct annual deer management actions at Catoctin Mountain Park, Antietam National Battlefield, Monocacy National Battlefield, and Rock Creek Park. This will be Catoctin's ninth season of deer management operations, Rock Creek Park's fifth season, and the second season for Antietam and Monocacy National Battlefields. Park staff conducted deer population density surveys in October and November 2017 to determine the number of animals to remove, as determined through their deer management plans. Sharpshooters from the U.S. Department of Agriculture's Animal and Plant Health Inspection Service will remove deer from closed park areas during the daytime in some parks and from park roads after dusk in all parks. Venison will be donated to local food banks. (Prior to 02/14/2018).

By March 31, pending approval of the Notice of Availability, the NPS plans to release the Great Sand Dunes Ungulate Management Plan and Draft Environmental Impact Statement (DEIS) for a 45-day public comment period. The plan and DEIS were developed with input from Colorado Division of Parks and Wildlife and the U.S. Fish and Wildlife Service as formal cooperating agencies. The DEIS addresses two key issues: the need for active elk management and the future of bison management at the park. Interested parties include affiliated tribes; Colorado Department of Natural Resources; local Habitat Partnership Program committees; Senator Bennet's, Gardner's, and Congressman Tipton's offices; The Nature Conservancy; and the Congressional Sportsmen's Foundation. The DEIS was shared with formal cooperators on Sept. 1, 2017. The stakeholders generally express support for the plan. (02/14/2018).

By March 31, (embargoed until public announcement) Cape Hatteras National Seashore plans to issue a Request for Proposals (RFP) to lease Oregon Inlet Marina. The marina is operated under a concession contract, which has been extended on an annual basis since 2000. A lease has been determined to be the appropriate method for managing the property in order to provide for facility maintenance and continued public use of this locally-important and internationally-

known charter fishing marina. The RFP is expected to garner attention from multiple interested parties, including the current operator, the local media, and elected officials. (Prior to 02/14/2018).

[UPDATE] By March 31, DOI clearance is projected for publication in the Federal Register for the EIS related to the construction by the U.S. Army Corps of Engineers (COE) of a buried seawall/armored levee across NPS lands within Gateway National Recreation Area (NY, NJ). On February 22, the Northeast Deputy Regional Director (acting for the Regional Director) signed the Federal Register Notice for Gateway National Recreation Area's Environmental Impact Statement related to the construction by the U.S. Army Corps of Engineers of a buried seawall/armored levee across National Park Service lands within Gateway National Recreation Area, NY. The seawall will run along the shoreline from Fort Wadsworth to Great Kills Park on Staten Island. The Notice has been submitted to the National Park Service Washington Office and Department of Interior for clearance to publish in the Federal Register. (Updated 2/28/2018).

[NEW] In March (exact date and details are still being developed), the National Marine Fisheries Service plans a media event to coincide with the release of approximately 200,000 endangered juvenile winter-run Chinook into Battle Creek, California. The release and reintroduction of the fish into Battle Creek will be made using excess fish available from FWS's Livingston Stone NFH winter-run captive broodstock program. FWS and other agencies involved in the Battle Creek Restoration Program are expected to participate in the media event. (02/28/18)

In March, FWS plans to send to the *Federal Register* a notice of issuance for letters of authorizations issued in 2015, 2016 and 2017 under regulations authorizing the non-lethal, unintentional take of marine mammals in the Chukchi and Beaufort seas. This is an administrative action and is noncontroversial. No news release will be issued. (Updated 01/31/18)

By April 1, the Tennessee Valley Authority (TVA) is seeking approval for a right-of-way permit from Natchez Trace Parkway to begin construction of an aerial 161-kV transmission line across the Parkway at milepost 159.1 as part of a 43-mile upgrade of electrical service. The NPS and the State Historical Preservation Office determined the transmission line will adversely affect the cultural landscape and scenic vista of the Parkway, under section 106 of the National Historic Preservation Act. TVA proposed to transfer funds to the NPS to cover the cost to underground non-TVA transmission lines crossing the Parkway to mitigate the adverse effect. The Parkway is drafting two general agreements to manage the funds, which will undergo complete DOI legal review of mitigation framework and agreements. (Prior to 02/14/2018).

Through April 1, President's Park is conducting its annual site inspection and restoration of the Ellipse following the National Christmas Tree Lighting events and programs. A portion of the Northwest Quadrant and the entire Northeast Quadrant of the Ellipse is closed through April 1. The Record of Determination was signed on January 31. (Prior to 02/14/2018).

[UPDATE] On or before April 3, FWS plans to announce it is seeking public review and comment on a draft environmental assessment (EA) describing the potential effects of issuing a proposed incidental take permit (ITP) for construction and development activities in Thurston

County, Washington. The project development site is 127 acres, and the conservation site is 64 acres. Species covered in the HCP include the threatened Olympia subspecies of the Mazama pocket gopher and the threatened Oregon spotted frog. UPC, LLC developed a draft Habitat Conservation Plan (HCP) and applied for a 15-year ITP. This is not controversial. This HCP is a single-site developer and independent from the HCP that FWS briefed ASFWP about on November 17. This applicant would like to move forward with development in advance of the completion of the Thurston County HCP. Targeted outreach to local and state officials and stakeholders is planned. (Updated 02/28/18)

On or around April 5, FWS plans to send to the *Federal Register* a final determination on the proposal to list five Sri Lankan tarantula species as endangered. The species are in decline due to ongoing habitat loss, degradation, and the cumulative effects of this and other threat factors. This action is not expected to be controversial. Planned outreach will include web updates. (02/07/18)

[NEW] On April 10, Death Valley National Park will host a Dantes View reopening celebration. The project addresses deferred maintenance issues, safety issues, and accessibility standards.The project cost more than $620,000 and was funded by donations from the Fund For People in Parks and Death Valley Natural History Association, matched by funds from the park's Recreation Fee program. The Congressional delegation is invited to participate. (2/28/2018).

[UPDATE] On April 10, FWS will join the New York Historical Society for a reception that celebrates a new exhibit honoring the centennial of the Migratory Bird Treaty Act. The exhibit is open from April 6 - July 15 and focuses on three themes: history of the act, the connection between the act and the women's suffrage movement, and profiles and Audubon watercolors of 13 bird species that are currently protected under the act. FWS has partnered with the society to provide technical advice and loan historical items for the exhibit. FWS regional leadership will attend the reception and the agency will coordinate with HQ and the Society on media pitches, social media outreach and storytelling. (Updated 02/28/18)

By April 13, responses to a prospectus seeking proposals for marina services at James Creek Marina in Washington, D.C., for the next 10 years, will be due. These services include wet slip rentals, fuel service, marine sanitation, parking lot operations, and retail and vending sales. Accepting contract offers is the next step in the process. (Prior to 02/14/2018).

[UPDATE] Between April 1 and 15, FWS plans to send to the *Federal Register* a final rule removing regulations setting forth the provisions for two depredation orders for double-crested cormorants. FWS had used these standing orders to allow for lethal control of cormorants where they impact aquaculture and public resources; however, on May 25, 2016, the District Court for the District of Columbia ordered that both the Aquaculture Depredation Order and the Public Resources Depredation Order be vacated until FWS performs a new and legally adequate environmental assessment (EA) or environmental impact statement for national cormorant management orders in compliance with the requirements of the National Environmental Policy Act (NEPA). This final rule administratively implements the court's decision. While the depredation orders no longer exist, on November 15, 2017, FWS provided some measure of relief to aquaculture facilities. It issued a final EA under NEPA, which allows aquaculture facility managers and property owners across 37 central and eastern states and the District of

Columbia to apply for individual permits for lethal take of cormorants where they are impacting resources. This latest action is not controversial. If-asked talking points will be planned for outreach. (Updated 02/28/18)

[UPDATE] Between April 15-30, Death Valley National Park and the Ridgecrest BLM office anticipate opening a public comment period on the Keystone Mine Plan of Operations Amendment and accompanying Environmental Assessment. The mine is on BLM land near the park's western border, but the mining plan includes the use of water rights within the park. (updated 2/28/18).

Awareness

On February 13, a Petition for Review of Agency Action was filed in U.S. District Court in Denver related to the issuance of a nest disturbance permit under the Bald and Golden Eagle Protection Act (BGEPA). The Plaintiff (Front Range Nesting Bald Eagle Studies) is challenging that the Defendants' (FWS and DOI) application of a categorical exclusion under the National Environmental Policy Act (NEPA) for issuance of the permit, claiming that it violates NEPA, BGEPA, and the Administrative Procedures Act (APA). The permit under challenge was issued to Garrett Construction Company LLC on February 6 for potential nest disturbance in 2018 and 2019 during construction of an apartment complex. (02/21/18)

As part of the Biological Opinion for the Everglades Restoration Transition Plan (ERTP) issued by FWS, on February 16, the Acting Regional Director for the FWS Southeast Region and the Director of Programs for the U.S. Army Corps of Engineers' (Corps) South Atlantic Division met with the Principals to ensure both the FWS and Corps are aligned in meeting the milestones of the ERTP. The ERTP is the plan that guides water movement across most of the Everglades landscape. (02/21/18)

FWS will complete a modified pre-assessment screen (PAS) for the Stauffer National Priority List Sites (Stauffer Cold Creek [Syngenta], Stauffer LeMoyne [Akzo-Nobel]) Natural Resource Damage Assessment (NRDA) in Mobile County, Alabama, by the end of February. The previous PAS was signed in March 2017. The only change in the modified PAS is the inclusion of an additional potentially responsible party, Akzo-Nobel Chemical. Akzo-Nobel and Syngenta have shared responsibility for contamination – primarily in the form of mercury released from industrial processes – of the 650-acre Cold Creek Swamp, which is adjacent to the sites of interest. The PAS will evaluate natural resource injuries resulting from the mercury releases in the Cold Creek Swamp and will determine if site-related mercury contamination has impacted natural resources in adjacent habitat. Akzo-Nobel is aware of the forthcoming NRDA and has expressed an interest in working cooperatively with the trustees during the assessment phase of the NRDA. (02/21/18)

[NEW] Army Corps of Engineers (ACE) is seeking to draw-down Lake Alamo (in western Arizona) in order to conduct a dam safety inspection and maintenance. A resulting flushing flow from the reservoir into the Bill Williams River may inadvertently benefit the downstream riparian area and is scheduled for as early as March. The event was fully put forward and developed by ACE and does not take place on refuge land; however, the release would impact Bill Williams River NWR. FWS does have a representative on the Bill Williams River Corridor

Steering Committee, a non-decisional body focused on interagency communication; however, FWS does not have authority over the release. Reservoir angler and recreational community, and downstream ATV groups have registered concern/opposition to the flows. Representative Paul Gosar (R-AZ) and county elected officials have weighed in on the project, including flushing flows. (02/28/18)

[NEW] On March 15, a defendant accused of illegally mooring his vessel in Aquatic Park Cove at San Francisco Maritime National Historical Park will have his 2nd court appearance in federal court. The park is working with the U.S. Park Police, U.S. Coast Guard, San Francisco Police Department, and the U.S. Attorney's Office for the Northern District of California to prosecute the owner and remove vessel that has been moored for more than 120 days. During his initial appearance on February 23, the defendant pleaded not guilty. The park has fielded inquiries from San Francisco city agencies, environmental groups, and local Congressional offices. The area is highly trafficked and media interest is possible, and will be handled by the Park. (2/28/2018).

[NEW] During the first week of March, Leopoldo Miranda, FWS Southeast Assistant Regional Director of Ecological Services, will sign an after-the-fact biological opinion on the emergency consultation for the Deepwater Horizon Oil Spill Response. The document outlines impacts from the response and highlights extensive collaboration that took place between FWS, the U.S. Coast Guard, and other state and federal agencies to minimize those impacts. In situations where emergency response, public health and human safety are critical, FWS typically delays consultation and the development of a biological opinion until the emergency response actions are complete. This will not be controversial. No outreach is planned. (02/28/18)

[NEW] By April 30, the Government Accountability Office will visit parks in Pacific West Region, Midwest Region, and National Capital Region related to a request made by Senator Claire McCaskill, Ranking Member of the Senate Committee on Homeland Security and Governmental Affairs, and Senator Thomas Carper, to review the ISO 55000 series and its potential applicability to the Federal government's asset management of buildings and facilities. The ISO 55000 series (e.g., ISO 55000, ISO 55001, and ISO 55002) is an internationally-established framework for asset management systems, developed to help organizations better meet their objectives while realizing the greatest return from their assets They began their review by interviewing headquarters staff in January 2018. (02/28/18).

From April 1-30, PBS will air nationally a 6-part docu-series that premiered in February in South Florida exploring "the various issues confronting South Florida's river of grass from sea-level rise and pollution to algae outbreaks. The series will also highlight the ongoing problems of invasive species, such as the pythons that have invaded the wetlands." While filmed, in part, in Everglades National Park, no staff were interviewed or involved in filming. (02/21/2018).

Through August 31, a contractor is soil-testing at Fort Totten, managed by Rock Creek Park, in an area used by Washington Metropolitan Area Transit Authority (WMATA) in the late 1980s. NPS staff learned the fill dirt WMATA used for post-site restoration came from the U.S. Army's Spring Valley Superfund site, a former proving ground for chemical weapons. While most of the fill was removed, contaminated soil may remain on adjacent slopes. Testing will be visible to the

public. Testing will be paid for by WMATA ($150,000) and NPS ($80,000). The testing will determine the presence of contamination and its potential risk. Samples were taken on February 5, and have been sent to a lab for analysis. (02/14/2018).

[NEW] Since 2012, Ash Meadows NWR, one of four refuges in the Desert Complex in Southwest Nevada, has been subject to litigation by Victor Fuentes, pastor of Ministerio Solida Church Camp. Mr. Fuentes owns a 40-acre private inholding within the boundary of the refuge. In recent months there has been increasing activity on social media focusing on the Church Camp as a possible location for a gathering to oppose the federal government. Activity is being monitored by law enforcement. (02/28/18)

The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participant under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to FWS for approval. FWS will work with the Comptroller's Office on this revision at the appropriate time. (02/21/18)

Leander Independent School District in Texas has submitted a draft habitat conservation plan (HCP) and incidental take permit (ITP) on the proposed construction of a secondary access road in northwest Travis County. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. There is significant congressional interest, as well as strong opposition from other parties. Planned outreach when information is published includes issuing a news bulletin. A conference call was held with Senator Cornyn's (R-TX) staff to discuss the issue on December 11. (02/21/18)

FWS is working with the U.S. Border Patrol on a Biological Assessment for a border wall that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designed under section 10(j) of the ESA. In 2017 a Mexican wolf crossed the border into the United States in this area and then returned to Mexico. (02/21/18)

FWS is working to help clarify and improve Master falconer access to golden eagles. Several existing regulatory means by which falconers can legally acquire golden eagles have been identified, and FWS is developing steps to ensure that if golden eagles become available through these means, the pool of eagle falconers across the U.S. can gain access to up to six eagles per year, which is compatible with the preservation of eagles and does not affect eagle allocations to tribes. Flyway Councils and tribes are being informed. If-asked talking points will be planned for outreach. (02/14/18)

Through March 9, 2018

FishBites Report

None

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
Austin American Statesman	TBD	Jeremy Schwartz a reporter with the Austin American Statesman contacted R2 asking to interview some of our ocelot researchers regarding translocation efforts and genetic diversity.
InfoGraphic – Bats and White Nose Syndrome	TBD	Geoff Giller, a reporter with Infographic, contacted R2 requesting an interview/field visit to report on bats impacted by white-nose syndrome. The reporter has also spoken with the FWS WNS contacts in R5. Will visit OK March 21-22 to observe survey work.
Victoria Advocate	Week of March 5th	Jessica Priest, a reporter with the Victoria Advocate, contacted R2 regarding information for mussel species that are being considered for listing under the ESA.
Texas Observer	TBD	Naveena Sadasivam, a reporter for the Texas Observer, is following up on the listing of the Texas hornshell and implications for other mussel species in Texas that might be considered for ESA protection.

Week Ahead Schedule of Meetings, Hearings, and Travel

Immediate Announcements and Actions (within the next 14 days)

Kuenzler hedgehog cactus downlisting – FWS will finalize the downlisting of Kuenzler hedgehog cactus in late March 2018. When first listed, only 200 plants from only two locations were known. Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known population clusters within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild.

15-60 Day Look Ahead

Include known announcements and other deliverables on the horizon.

[*NEW*]: Earth Day Celebration - FWS will participate in the 2018 Earth Day event April 20-22. Earth Day Texas is an annual outdoor festival seeking to elevate environmental awareness. The family-friendly event is free to the public. Held at Fair Park, Dallas, Texas, the event is expected to draw over 100,000 visitors. Open to media.

[*NEW*] March 2018 is the 20th anniversary of the FWS's first release of Mexican wolves into the wild following their extirpation in the 1970s. Several environmental groups are planning events around Arizona and New Mexico, including films, op-eds, and panel discussions about the path Mexican wolves have taken to get from zero animals in the wild to the 2017 population count of 114.

Black-capped vireo Delisting Determination – FWS anticipates publishing a final delisting determination for the Black-capped vireo in late March 2018. In 2007, the Service completed a five-year review of the black-capped vireo which recommended the species be downlisted to threatened. In 2012, we received a petition to downlist the black-capped vireo based on our 2007 recommendation. The Service used the Species Status Assessment framework to evaluate species viability and address the petition. Our analysis of the best available science indicates the primary known threats to the black-capped vireo, of habitat loss and brown-headed cowbird parasitism, have been reduced or adequately managed and that many populations are stable or growing. A Communications Plan has been shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. A news release and FAQs have been drafted. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the Federal Register. In addition, an event to celebrate the delisting is being planned for Friday, April 13 at Balcones Canyonlands National Wildlife Refuge near Marble Falls, Texas.

Upcoming Workshops & Meetings

Endangered Species Act Recovery Actions

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan and a final rule Delisting the bat – In two separate, but associated announcements, FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the delisting of the lesser long-nosed bat and the final delisting of the LLNB. Target date for submitting to the *Federal Register* is March 30, 2018 and delisting is anticipated to follow by a month. This action is not expected to be opposed. Stakeholders are the petitioners, Pacific Legal Foundation and the New Mexico Cattle Growers Association. Proactive conservation stakeholders include Pima County MSCP and hundreds of citizen scientists monitor bats each summer and fall when this migratory species returns to roosts in the U.S. A communications strategy and news release is being prepared.

Draft Recovery Plan for Four Aquatic Invertebrates – FWS will make available and seek comment on a draft recovery plan for four aquatic invertebrates found in desert grasslands in southeast New Mexico and southwest Texas in March 2018. Noel's amphipod, Pecos assiminea,

Koster's springsnail, and Roswell springsnail were listed as endangered in 2005. The primary threats to all four species are threats to the quantity and quality of water. Activities, such as oil and gas drilling, water withdrawals from the aquifer and contamination are the greatest threats. Most occupied sites are on FWS Bitter Lake National Wildlife Refuge in New Mexico and The Nature Conservancy holdings in Texas.

Endangered Species Act Listing Actions

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the States, and others.

Tobusch fishhook cactus downlisting notice – In March, FWS will publish a final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved "fishhook" spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to down list the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened. Local interest is anticipated. A Communications Plan has been shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. A news release has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

Other Items of Note

[*NEW*] Lesser-Prairie Chicken Surveys - On March 16 the state natural resources agencies in New Mexico, Colorado, Oklahoma, Texas and Kansas will begin aerial surveys for the lesser prairie-chicken. The surveys, which have been conducted annually since 2012, will run through mid-May and will assist in assessing long term population trend for the lesser prairie-chicken. The results of the surveys will be available this summer.

[*UPDATE*] Lower Colorado River Multi-Species Habitat Conservation Plan – On March 5, FWS signed a FONSI on an amendment to the Lower Colorado River Multi-Species Habitat Conservation Plan and permit to add the recently listed Mexican gartersnake. Similarly, Bureau of Reclamation signed a FONSI for the implementation of the amended LCR-MSCP. The LCR-MSCP is a long-term program created in 2005 to minimize and mitigate impacts that water

delivery and power generation along the lower Colorado River may have on 26 fish and wildlife species, including six species protected under the Endangered Species Act. LCR-MSCP is responsible for creating, replacing, and managing habitat for these species and operates under an ESA permit. However, in the early 2000s, when the LCR-MSCP was conceived, the largely aquatic, northern Mexican gartersnake was long-thought to have been extirpated from the lower Colorado River. In 2014, the subspecies was added to the list of threatened animals protected under the ESA. A public comment on the draft environmental assessment closed December 28, 2017. A FWS news bulletin and notification to stakeholders and tribes are being distributed presently. For more information, visit: https://www.fws.gov/southwest/es/arizona/

Black-capped vireo draft Post-delisting Monitoring Plan – FWS anticipates publishing a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review at the beginning of March 2018. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in early 2018. A Communications Plan has been shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. A news release has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

FWS and partners completed the annual Mexican wolf population survey and capture, from January 24, 2018 through February 3, 2018. The count documented a minimum of 114 Mexican wolves in 2017 in the U.S., an increase of one wolf over what was documented for 2016. The Mexican Wolf Recovery Program is a multi-agency cooperative effort between the FWS, Arizona Game and Fish Department, U.S. Forest Service, USDA-Wildlife Services, and the White Mountain Apache Tribe, as well as in consultation with the New Mexico Department of Game and Fish and counties. Survey flights occurred on the Fort Apache Indian Reservation, Apache, Coconino, Cibola, and Gila National Forests in eastern Arizona and western New Mexico, and some areas immediately outside the forests. Some media attended the operations. The final count was distributed to the media and partner agencies on February 21, 2018.

On January 12, 2018, FWS submitted permit applications to New Mexico Department of Game and Fish (NMDGF) to import and release up to 12 Mexican wolf pups in New Mexico, to import a female wolf from Arizona for artificial insemination at Sevilleta Wolf Management Facility, and to import up to 6 pups from Arizona to be held at Sevilleta or Ladder Ranch Wolf Management Facilities, if needed. The Mexican Wolf Initial Release and Translocation Proposal for 2018 was provided for public review and comment from December 4 to 29. FWS received just over 100 comments, which were transmitted to NMDGF, per their regulations, along with the permit applications. The initial releases and translocations outlined in this document are consistent with: (1) the 2014 Final Environmental Impact Statement (EIS) for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (2) the 2015 Record of Decision for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus

baileyi), (3) the 2015 Final Rule - Revisions to the Regulations for the Nonessential Experimental Population of the Mexican Wolf, and the 2017 Mexican Wolf Recovery Plan, First Revision. New Mexico Department of Game and Fish provided FWS with the permits for importation and release on February 22, 2018.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. A conference call was held with Senator Cornyn's staff to discuss the issue on December 11. More details available in past reports.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participant under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Arizona Electric Power Cooperative Candidate Conservation Agreement with Assurances for Sonoran Desert Tortoise – FWS anticipates publishing in the *Federal Register* in the next 45-60 days, a Notice of Availability for the Arizona Electric Power Cooperative (AEPCO) Draft Candidate Conservation Agreement with Assurances (dCCAA) for Sonoran Desert Tortoise and their application for an enhancement of survival permit (ESP) in Arizona. AEPCO has developed a conservation agreement that would promote conservation for the unlisted Sonoran Desert tortoise within 2,152 acres of their right-of-way during normal operation and maintenance activities. If approved the term of the dCCAA and ESP would be 25 years. No formal news bulletin will be released. Outreach to local, State, and Federal agencies and partners.

National Wildlife Refuge Actions

[*UPDATE*]: Army Corps of Engineers (ACE) is seeking to draw-down Lake Alamo (in western Arizona) in order to conduct a dam safety inspection and maintenance. A resulting flushing flow from the reservoir into the Bill Williams River may benefit the downstream river riparian area and is scheduled for as early as March. The event was fully put forward and developed by ACE and does not take place on refuge land however the release would impact the Bill Williams River National Wildlife Refuge. (ACE has completed section 7 consultation on the proposed activity.) The FWS does have a representative on the Bill Williams River Corridor Steering Committee, a

non-decisional body focused on interagency communication; however, the Service does not have authority over the release. Reservoir angler and recreational community, and downstream ATV groups have registered concern/opposition to the draw-down and flows. The Arizona Game and Fish Commission passed a resolution opposing draw-down of Alamo Reservoir and may file for an order restraining ACE. Congressman Paul Gosar (AZ-4) and county elected officials have weighed in on the project, including flushing flows.

FWS Southwest Region is proactively reaching out to state agencies to discuss Secretarial Order 3356, and seek additional opportunities to support and expand hunting and fishing on Refuges in the Southwest. Currently the Oklahoma Department of Wildlife Conservation (ODWC) has been the most responsive. On January 31, 2018, FWS leadership met with ODWC to discuss several potential hunting and fishing opportunities that could occur on Refuges in Oklahoma. Meeting participants identified additional hunting and fishing, educational and youth opportunities on every refuge in Oklahoma. Additionally, ODWC committed to providing additional staff support to help implement and sustain the identified activities. The FWS Southwest Region will continue to reach out to Texas, Arizona and New Mexico as well as Oklahoma to explore more opportunities.

Urban Youth Gaining Outdoor Work Experience – FWS as part of an urban partnership, is bringing students from Furr High School in Houston, Texas to the FWS Trinity River National Wildlife Refuge to enable them to gain back country experience. In January 2018 (date TBD), several Furr High School students (10 to 15 expected) will work alongside FWS to continue construction of a trail within the Refuge during their camping/backpacking experience. The experience is meant to introduce students to careers in conservation and will emphasize land management issues, developing public use opportunities (including hunting, fishing and wildlife watching), team building and leadership skills. The desired outcome is that the students will take learned skills back to their school, which is adjacent to Houston Parks and Recreation's Herman Brown Park, a 900-acre park that the school uses as an outdoor classroom. The urban partnership plans to build on this experience on other FWS/TPWD led programs on hunting, fishing, and wildlife watching conducted in classroom and on the city park.

Newly constructed production pads for oil and gas development at Hagerman National Wildlife Refuge were mitigated by easing angler access to refuge waters at Lake Texoma. Hagerman's Sandy Day Use Area was improved by a mineral operator, replacing bollard and cable around a lot, leveling walkways and paving with coarse stone. Spoil, litter and discarded roots were hauled away by refuge volunteers. The small improvement can make a large difference for the 7,500 anglers and 2,500 birds that use the area. Anglers catch blue catfish, channel catfish, striped bass, white bass, and sunfishes while birders can check off bald eagle, peregrine falcon, herring gulls, white pelicans, red-tailed hawk, red-shouldered hawk, painted bunting, blue grosbeak, or summer tanager.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project

scheduled for March - June 2018. Part of the project will require the use of a portion of the refuge's water right to support this national security project. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designed under section 10(j) of the ESA. In 2017 a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Border Coordination: Communication Towers - Work in in progress following effective coordination between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge are being replaced, with the goal of upgrading technology and providing a more robust foundation within the existing footprint. Construction activities began in late 2017 and are continuing on schedule.

Fish and Aquatic Conservation

[*NEW*] FWS Alchesay and Williams Creek National Fish Hatchery Complex in partnership with White Mountain Apache Game and Fish, and Arizona Fish and Wildlife Conservation Office, started stocking Apache trout and rainbow trout on the Fort Apache Indian Reservation. FWS initiated stocking on March 5, 2018. Within the first three days, hatchery personnel stocked about 2,990 Apache trout in Reservation streams. Frequent stocking will continue every week leading up to Easter weekend with the intent to stock out 3,000 to 4,000 Apache trout each week. In addition, up to 8,000 rainbow trout will be stocked into the Reservation lakes. The lack of snow in the White Mountains necessitates this large early release of fish. With reduced snowfall over the winter, hatchery water sources are expected to dwindle as spring turns to summer. Hatchery personnel expect to stock out up to 24,000 fish for anglers within the next four weeks. With reduced runoff expected, fewer trout will be stocked during mid-summer months.

FWS Willow Beach National Fish Hatchery, in partnership with Arizona Game and Fish Department, announced the beginning of the annual rainbow trout sportfish stocking season in the lower Colorado River immediately below Lake Mohave/Davis Dam in late October. Neighboring communities include Laughlin, Nevada and Bullhead City, Arizona. FWS will stock about 1, 750 trout every week from early October through March 2018. Stocking sites include Davis Camp, Community Park, and Rotary Park for October-December. From January 2018 through March 2018, stocking sites will be Davis Camp and Community Park. In addition to the annual stocking season below Davis Dam, FWS Willow Beach NFH continues to stock rainbow every week, year round, at Willow Beach Marina, Arizona.

Through March 16, 2018

FishBites Report

The 20,000-Hour Volunteer
Volunteer Jim Montgomery likes counting cranes. He has 26 years of continuous weekly crane counts at Bitter Lake National Wildlife Refuge, NM. Refuge manager Floyd Truetken says that Montgomery doesn't claim all his time and likely exceeds 20,000 of volunteer time. Montgomery holds a PhD in zoology taught biology at nearby New Mexico Military Institute. His crane counts started in 1988. He also participates in biweekly waterbird counts and monitors nesting terns for hatchlings. Montgomery was an original board member when the Friends of Bitter Lake Refuge organized in 2000 and Montgomery was founding board member.
Supportive stakeholders: Friends of Bitter Lake Refuge
Impacted location: Roswell, NM

Let the Arrows Fly!
Deep Fork National Wildlife Refuge, OK, has a 12-year history with archery instruction, dating back to our very first Okmulgee County Archery Days in March 2006. Now, the refuge staff, Friends Group, Oklahoma Department of Wildlife Conservation and volunteers have established a monthly Archery Extravaganza! Program intended to encourage people to try their hand at shooting a bow. In months to come the program will focus not only on basic archery techniques, but also incorporate fun games as well as both bow hunting and bow fishing. Archery is a popular activity in Oklahoma and the hope is this program will help encourage the next generation of bow hunters and bow anglers.
Supportive stakeholders: Friends of Deep Fork National Wildlife Refuge, Oklahoman Department of Wildlife Conservation
Impacted location: Okmulgee County, OK

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
Austin American Statesman	TBD	Jeremy Schwartz a reporter with the Austin American Statesman contacted R2 asking to interview some of our ocelot researchers regarding translocation efforts and genetic diversity.
InfoGraphic – Bats and White Nose Syndrome	TBD	Geoff Giller, a reporter with Infographic, contacted R2 requesting an interview/field visit to report on bats impacted by white-nose syndrome. The reporter has also spoken with the FWS WNS contacts in R5. Will visit OK March 21-22 to observe survey work.

Victoria Advocate	Week of March 12th	Jessica Priest, a reporter with the Victoria Advocate, contacted R2 regarding information for mussel species that are being considered for listing under the ESA.
Texas Observer	March 14, 2018	Naveena Sadasivam, a reporter for the Texas Observer, is following up on the listing of the Texas hornshell and implications for other mussel species in Texas that might be considered for ESA protection.
Arizona Daily Sun (Flagstaff) Golden eagle management	3/16/18	Golden eagle conservation efforts being conducted at Babbitt Ranches in northern Arizona. Initial contact and general response provided by Brenda Smith (Assist Field Supervisor). Reporter also referred to SME and AESO PL for background.
Arizona Daily Star (Tucson) Villages at Vigneto real-estate development	Unknown	Army Corps of Engineers is permitting large development along San Pedro River. Earlier, now resolved conflict with FWS, is subject of journalists' research. [Subject has been included in previous weekly reports.] In December, reporter submitted FOIA request regarding Villages at Vigneto development in southern Arizona, including records of "conflict" between FWS and ACE. Reporter still hasn't received records. States she may prepare story on FOIA responsiveness.
KRQE Albuquerque TV News 13 Urban hawks	3/14	TV reporter had video footage of hawks (and neighborhood fans) in an Albuquerque urban park. Journalist sought background and natural history information and information on hawks as urban wildlife.

Week Ahead Schedule of Meetings, Hearings, and Travel

Immediate Announcements and Actions (within the next 14 days)

Kuenzler hedgehog cactus downlisting – FWS will finalize the downlisting of Kuenzler hedgehog cactus in late March 2018. When first listed, only 200 plants from only two locations were known. Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known population clusters within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild.

15-60 Day Look Ahead

[*NEW*] Black-capped vireo event – On Friday, April 13th, FWS will be hosting an event at Balcones Canyonlands National Wildlife Refuge to celebrate the recovery of the black-capped

vireo. Representatives from Texas Parks and Wildlife Department, Oklahoma Department of Wildlife Conservation, Fort Hood (TX), Fort Sill (OK), USDA's NRCS, the Texas Comptroller's office, Congressional offices and other partners are invited. Media will be invited.

Earth Day Celebration - FWS will participate in the 2018 Earth Day event April 20-22. Earth Day Texas is an annual outdoor festival seeking to elevate environmental awareness. The family-friendly event is free to the public. Held at Fair Park, Dallas, Texas, the event is expected to draw over 100,000 visitors. Open to media.

March 2018 is the 20th anniversary of the FWS's first release of Mexican wolves into the wild following their extirpation in the 1970s. Several environmental groups are planning events around Arizona and New Mexico, including films, op-eds, and panel discussions about the path Mexican wolves have taken to get from zero animals in the wild to the 2017 population count of 114.

Black-capped vireo Delisting Determination – FWS anticipates publishing a final delisting determination for the Black-capped vireo in late March 2018. In 2007, the Service completed a five-year review of the black-capped vireo which recommended the species be downlisted to threatened. In 2012, we received a petition to downlist the black-capped vireo based on our 2007 recommendation. The Service used the Species Status Assessment framework to evaluate species viability and address the petition. Our analysis of the best available science indicates the primary known threats to the black-capped vireo, of habitat loss and brown-headed cowbird parasitism, have been reduced or adequately managed and that many populations are stable or growing. A Communications Plan has been shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. A news release and FAQs have been drafted. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the Federal Register. In addition, an event to celebrate the delisting is being planned for Friday, April 13 at Balcones Canyonlands National Wildlife Refuge near Marble Falls, Texas.

Upcoming Workshops & Meetings

Endangered Species Act Recovery Actions

[*UPDATE*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan and a final rule Delisting the bat – In two separate, but associated announcements, FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the delisting of the lesser long-nosed bat and the final delisting of the LLNB. Target date for submitting to the *Federal Register* is March 30, 2018 and delisting is anticipated to follow by a month. This action is not expected to be opposed. Stakeholders are the petitioners, Pacific Legal Foundation and the New Mexico Cattle Growers Association. Proactive conservation stakeholders include Pima County MSCP and hundreds of citizen scientists monitor bats each summer and fall when this migratory species returns to roosts in the U.S. A communications package is prepared.

Draft Recovery Plan for Four Aquatic Invertebrates – FWS will make available and seek comment on a draft recovery plan for four aquatic invertebrates found in desert grasslands in southeast New Mexico and southwest Texas in March 2018. Noel's amphipod, Pecos assiminea, Koster's springsnail, and Roswell springsnail were listed as endangered in 2005. The primary threats to all four species are threats to the quantity and quality of water. Activities, such as oil and gas drilling, water withdrawals from the aquifer and contamination are the greatest threats. Most occupied sites are on FWS Bitter Lake National Wildlife Refuge in New Mexico and The Nature Conservancy holdings in Texas.

Endangered Species Act Listing Actions

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external Working Group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the lesser prairie-chicken. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the States, and others.

Tobusch fishhook cactus downlisting notice – In March, FWS will publish a final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved "fishhook" spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to down list the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened. Local interest is anticipated. A Communications Plan has been shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. A news release has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

Other Items of Note

[*UPDATE*] Black-capped vireo draft Post-delisting Monitoring Plan – On March 14, 2018, FWS published a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination will likely occur in early 2018. A Communications Plan has been shared with FWS HQ External

Affairs that includes congressional offices, local and state officials and stakeholders. A news release has been drafted. Outreach, including issuing a news release and posting information on the regional and field websites was completed.

Lesser-Prairie Chicken Surveys - On March 16 the state natural resources agencies in New Mexico, Colorado, Oklahoma, Texas and Kansas will begin aerial surveys for the lesser prairie-chicken. The surveys, which have been conducted annually since 2012, will run through mid-May and will assist in assessing long term population trend for the lesser prairie-chicken. The results of the surveys will be available this summer.

FWS and partners completed the annual Mexican wolf population survey and capture, from January 24, 2018 through February 3, 2018. The count documented a minimum of 114 Mexican wolves in 2017 in the U.S., an increase of one wolf over what was documented for 2016. The Mexican Wolf Recovery Program is a multi-agency cooperative effort between the FWS, Arizona Game and Fish Department, U.S. Forest Service, USDA-Wildlife Services, and the White Mountain Apache Tribe, as well as in consultation with the New Mexico Department of Game and Fish and counties. Survey flights occurred on the Fort Apache Indian Reservation, Apache, Coconino, Cibola, and Gila National Forests in eastern Arizona and western New Mexico, and some areas immediately outside the forests. Some media attended the operations. The final count was distributed to the media and partner agencies on February 21, 2018.

On January 12, 2018, FWS submitted permit applications to New Mexico Department of Game and Fish (NMDGF) to import and release up to 12 Mexican wolf pups in New Mexico, to import a female wolf from Arizona for artificial insemination at Sevilleta Wolf Management Facility, and to import up to 6 pups from Arizona to be held at Sevilleta or Ladder Ranch Wolf Management Facilities, if needed. The Mexican Wolf Initial Release and Translocation Proposal for 2018 was provided for public review and comment from December 4 to 29. FWS received just over 100 comments, which were transmitted to NMDGF, per their regulations, along with the permit applications. The initial releases and translocations outlined in this document are consistent with: (1) the 2014 Final Environmental Impact Statement (EIS) for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (2) the 2015 Record of Decision for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (3) the 2015 Final Rule - Revisions to the Regulations for the Nonessential Experimental Population of the Mexican Wolf, and the 2017 Mexican Wolf Recovery Plan, First Revision. New Mexico Department of Game and Fish provided FWS with the permits for importation and release on February 22, 2018.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives.

Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. A conference call was held with Senator Cornyn's staff to discuss the issue on December 11. More details available in past reports.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participant under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Arizona Electric Power Cooperative Candidate Conservation Agreement with Assurances for Sonoran Desert Tortoise – FWS anticipates publishing in the *Federal Register* in the next 45-60 days, a Notice of Availability for the Arizona Electric Power Cooperative (AEPCO) Draft Candidate Conservation Agreement with Assurances (dCCAA) for Sonoran Desert Tortoise and their application for an enhancement of survival permit (ESP) in Arizona. AEPCO has developed a conservation agreement that would promote conservation for the unlisted Sonoran Desert tortoise within 2,152 acres of their right-of-way during normal operation and maintenance activities. If approved the term of the dCCAA and ESP would be 25 years. No formal news bulletin will be released. Outreach to local, State, and Federal agencies and partners.

National Wildlife Refuge Actions

[*UPDATE*]: Army Corps of Engineers (ACE) is seeking to draw-down Lake Alamo (in western Arizona) in order to conduct a dam safety inspection and maintenance. A resulting flushing flow from the reservoir into the Bill Williams River may benefit the downstream river riparian area and is scheduled for as early as March. The event was fully put forward and developed by ACE and does not take place on refuge land however the release would impact the Bill Williams River National Wildlife Refuge. (ACE has completed section 7 consultation on the proposed activity.) The FWS does have a representative on the Bill Williams River Corridor Steering Committee, a non-decisional body focused on interagency communication; however, the Service does not have authority over the release. Reservoir angler and recreational community, and downstream ATV groups have registered concern/opposition to the draw-down and flows. The Arizona Game and Fish Commission passed a resolution opposing draw-down of Alamo Reservoir and filed for a temporary restraining order, which was denied in Federal Court on March 9. Congressman Paul Gosar (AZ-4) and county elected officials have weighed in on the project, including flushing flows.

FWS Southwest Region is proactively reaching out to state agencies to discuss Secretarial Order 3356, and seek additional opportunities to support and expand hunting and fishing on Refuges in the Southwest. Currently the Oklahoma Department of Wildlife Conservation (ODWC) has been the most responsive. On January 31, 2018, FWS leadership met with ODWC to discuss several potential hunting and fishing opportunities that could occur on Refuges in Oklahoma. Meeting

participants identified additional hunting and fishing, educational and youth opportunities on every refuge in Oklahoma. Additionally, ODWC committed to providing additional staff support to help implement and sustain the identified activities. The FWS Southwest Region will continue to reach out to Texas, Arizona and New Mexico as well as Oklahoma to explore more opportunities.

Urban Youth Gaining Outdoor Work Experience – FWS as part of an urban partnership, is bringing students from Furr High School in Houston, Texas to the FWS Trinity River National Wildlife Refuge to enable them to gain back country experience. In January 2018 (date TBD), several Furr High School students (10 to 15 expected) will work alongside FWS to continue construction of a trail within the Refuge during their camping/backpacking experience. The experience is meant to introduce students to careers in conservation and will emphasize land management issues, developing public use opportunities (including hunting, fishing and wildlife watching), team building and leadership skills. The desired outcome is that the students will take learned skills back to their school, which is adjacent to Houston Parks and Recreation's Herman Brown Park, a 900-acre park that the school uses as an outdoor classroom. The urban partnership plans to build on this experience on other FWS/TPWD led programs on hunting, fishing, and wildlife watching conducted in classroom and on the city park.

Newly constructed production pads for oil and gas development at Hagerman National Wildlife Refuge were mitigated by easing angler access to refuge waters at Lake Texoma. Hagerman's Sandy Day Use Area was improved by a mineral operator, replacing bollard and cable around a lot, leveling walkways and paving with coarse stone. Spoil, litter and discarded roots were hauled away by refuge volunteers. The small improvement can make a large difference for the 7,500 anglers and 2,500 birds that use the area. Anglers catch blue catfish, channel catfish, striped bass, white bass, and sunfishes while birders can check off bald eagle, peregrine falcon, herring gulls, white pelicans, red-tailed hawk, red-shouldered hawk, painted bunting, blue grosbeak, or summer tanager.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from a FWS-owned well on the Buenos Aires National Wildlife Refuge for a Baboquivari Road Repair Project scheduled for March - June 2018. Part of the project will require the use of a portion of the refuge's water right to support this national security project. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designed under section 10(j) of the ESA. In 2017 a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Border Coordination: Communication Towers - Work in in progress following effective coordination between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aries National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge are being replaced, with the goal of upgrading technology and providing a more robust foundation within the existing footprint. Construction activities began in late 2017 and are continuing on schedule.

Fish and Aquatic Conservation

FWS Alchesay and Williams Creek National Fish Hatchery Complex in partnership with White Mountain Apache Game and Fish, and Arizona Fish and Wildlife Conservation Office, started stocking Apache trout and rainbow trout on the Fort Apache Indian Reservation. FWS initiated stocking on March 5, 2018. Within the first three days, hatchery personnel stocked about 2,990 Apache trout in Reservation streams. Frequent stocking will continue every week leading up to Easter weekend with the intent to stock out 3,000 to 4,000 Apache trout each week. In addition, up to 8,000 rainbow trout will be stocked into the Reservation lakes. The lack of snow in the White Mountains necessitates this large early release of fish. With reduced snowfall over the winter, hatchery water sources are expected to dwindle as spring turns to summer. Hatchery personnel expect to stock out up to 24,000 fish for anglers within the next four weeks. With reduced runoff expected, fewer trout will be stocked during mid-summer months.

FWS Willow Beach National Fish Hatchery, in partnership with Arizona Game and Fish Department, announced the beginning of the annual rainbow trout sportfish stocking season in the lower Colorado River immediately below Lake Mohave/Davis Dam in late October. Neighboring communities include Laughlin, Nevada and Bullhead City, Arizona. FWS will stock about 1, 750 trout every week from early October through March 2018. Stocking sites include Davis Camp, Community Park, and Rotary Park for October-December. From January 2018 through March 2018, stocking sites will be Davis Camp and Community Park. In addition to the annual stocking season below Davis Dam, FWS Willow Beach NFH continues to stock rainbow every week, year round, at Willow Beach Marina, Arizona.

Subject: Notice of ESA violations in relation to New Mexico border wall construction

Dear Secretary Nielsen, Deputy Director Kurth, and Acting Commissioner McAleenan:

On behalf of the Center for Biological Diversity, Southwest Environmental Center, Defenders of Wildlife, and the Animal Legal Defense Fund, we hereby provide notice in the attached letter that the Department of Homeland Security and the U.S. Customs and Border Protection are in violation of Section 7(a)(2) of the Endangered Species Act for their failure to consult with U.S. Fish and Wildlife Service in order to ensure that the proposed border wall fencing replacement construction in New Mexico does not jeopardize the continued existence of impacted threatened or endangered species, or result in the destruction or adverse modification of their critical habitat, and is further in violation of Section 9(a)(1)(B) of the Act for the likely "take" of threatened or endangered species caused by construction and related activities undertaken as part of the New Mexico border wall replacement project.

We have also sent a copy of the attached notice letter via certified mail.

Thank you for your attention to the allegations contained in the attached letter. Please contact me at the telephone number below should you wish to discuss this notice letter in further detail.

Best regards,
Jean Su

Re: Notice of Violations of the Endangered Species Act in Relation to Border Wall Fencing Replacement in New Mexico

Dear Secretaries Nielsen and Zinke, Deputy Director Kurth, and Acting Commissioner McAleenan:

On behalf of the Center for Biological Diversity, Southwest Environmental Center, Defenders of Wildlife, and the Animal Legal Defense Fund (collectively, "Environmental Groups"), we hereby provide notice, pursuant to Section 11(g)[1] of the Endangered Species Act ("ESA")[2] that the Department of Homeland Security ("DHS") and its component agency U.S. Customs and Border Protection ("CBP") are in violation of Section 7(a)(2) of the ESA[3] for their failure to consult with U.S. Fish and Wildlife Service ("FWS") in order to ensure that the proposed border wall fencing replacement construction in New Mexico—specifically, the replacement of approximately 20 miles of primarily existing vehicle fencing in New Mexico (the "New Mexico border wall replacement project")—does not jeopardize the continued existence of impacted threatened or endangered species, or result in the destruction or adverse modification of their critical habitat, and is further in violation of Section 9(a)(1)(B) of the ESA for the likely "take" of threatened or endangered species caused by construction and related activities undertaken as part of the New Mexico border wall replacement project.

Environmental Groups are environmental conservation organizations dedicated to protecting native wildlife species and their habitats. The Center for Biological Diversity ("the Center") is a non-profit, public interest environmental organization headquartered in Tucson, Arizona, with numerous offices across the United States, including New Mexico and Washington, D.C., dedicated to the protection of native species and their habitats through science, policy, and environmental law. The Center

[1] 16 U.S.C. § 1540(g)
[2] 16 U.S.C. § 1531 *et seq*.
[3] 16 U.S.C. § 1536(a)(2)

has more than 1.3 million members and on-line activists. The Southwest Environmental Center ("SEC") is a non-profit, member-supported, grassroots conservation organization based in Las Cruces, New Mexico. SEC is dedicated to protecting and restoring native wildlife and their habitats in the Southwestern borderlands, through advocacy, education and on-the-ground projects. Defenders of Wildlife ("Defenders") is a nonprofit organization with hundreds of thousands of members across the nation, including nearly 3,500 members in New Mexico. Defenders' mission is to preserve wildlife and emphasize appreciation and protection for all species in their ecological role through advocacy, litigation, and other efforts. Finally, the Animal Legal Defense Fund ("ALDF") is a nonprofit 501(c)(3) organization with more than 200,000 members and supporters, approximately 1,100 of whom live in New Mexico, and nearly 200 of whom live in El Paso County, Texas, near the New Mexico border wall replacement project. ALDF represents its members' interests by working to protect the lives of animals, including wildlife, through the legal system. ALDF is headquartered on Cotati, California, with regional offices in Los Angeles and Portland, Oregon.

Collectively, Environmental Groups have long advocated for better incorporation of environmental considerations into DHS border security planning and decision-making. Our ESA advocacy has resulted in the protection of numerous threatened and endangered species within the borderlands region and the designation of hundreds of thousands of acres of their critical habitat.

The threshold for triggering an agency's duties under the ESA is low; if an agency takes an action that may have environmental impacts or that "may affect" a listed species or critical habitat, then ESA section 7 consultation is required.[4] DHS and CBP, however, have provided no evidence to the public or to the Center that it has initiated or completed the required environmental analyses under either of these laws with respect to the New Mexico border wall replacement project.

I. LEGAL BACKGROUND

A. The Endangered Species Act

The ESA is "the most comprehensive legislation for the preservation of endangered species ever enacted by any nation."[5] Its fundamental purposes are "to provide a means whereby the ecosystems upon which endangered species and threatened species depend may be conserved [and] to provide a program for the conservation of such endangered species and threatened species . . . ."[6] To achieve these objectives, the ESA directs the FWS to determine which species of plants and animals are "threatened" and "endangered" and place them on the endangered species list.[7] An "endangered" or "threatened" species is one "in danger of extinction throughout all or a significant portion of its range," or "likely to become endangered in the near future throughout all or a significant portion of its range," respectively.[8]

[4] 50 C.F.R. § 402.14(a).
[5] *TVA v. Hill*, 437 U.S. 180 (1978).
[6] 16 U.S.C. § 1531(b).
[7] *Id.* § 1533.
[8] *Id.* § 1532(6), (20).

Once a species is listed, the ESA provides a variety of procedural and substantive protections to ensure not only the species' continued survival, but its ultimate recovery. One central protection, Section 7(a)(2), mandates that all federal agencies avoid actions that: (1) jeopardize listed species; or (2) destroy or adversely modify designated critical habitat.[9] Federal agency actions include those projects or programs "authorized, funded, or carried out by such agency."[10] To comply with these Section 7(a)(2) safeguards, the federal agency taking action and FWS take part in a cooperative analysis of potential impacts to listed species and their designated critical habitat known as a consultation process.

First, the agency must obtain "a list of any listed or proposed species or designated or proposed critical habitat that may be present in the action area" from FWS.[11] If a species or critical habitat may be present, the agency must prepare a biological assessment to determine whether the proposed action "may affect" or "is not likely to adversely affect" any listed species or critical habitat.[12]

Federal agencies must initiate formal consultation with FWS when their actions "may affect" a listed species or designated critical habitat.[13] The standard for consultation is low: "[a]ny possible effect, whether beneficial, benign, adverse, or of an undetermined character, triggers the formal consultation requirement."[14]Effects that must be considered as part of this inquiry include "direct and indirect effects of an action on the species or critical habitat, together with the effects of other activities that are interrelated or interdependent with that action, that will be added to the environmental baseline."[15] Indirect effects are "those that are caused by the proposed action and are later in time, but still are reasonably certain to occur."[16]

Through the formal consultation process, FWS prepares a "biological opinion" as to whether the action jeopardizes the species or destroys or adversely modifies critical habitat and, if so, suggests "reasonable and prudent alternatives."[17] During the consultation process, both agencies must "use the best scientific and commercial data available."[18]

In addition to duties under Section 7(a)(2) of the ESA, federal agencies are required under Section 7(a)(1) to "utilize their authority for the conservation [i.e. recovery] of endangered species and

[18] *Id*. § 1536(a)(2); 50 CFR § 402.14(d).

threatened species."[19] As stated by the Ninth Circuit, agencies have an "affirmative obligation[] to conserve under section 7(a)(1)."[20]

Finally, Section 9 of the ESA prohibits the "taking" of any endangered species.[21] The ESA defines the term "take" broadly to include "harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct."[22] "Take" includes indirect as well as direct harm and need not be purposeful.[23] The ESA provides a limited exception to the prohibition on take under Section 9 for taking that is in compliance with an incidental take statement ("ITS").[24] Any take of a listed species that is not in compliance with an ITS violates Section 9.[25]

II. FACTUAL BACKGROUND

A. The New Mexico Border Wall Replacement Project

On January 25, 2017, President Donald J. Trump issued an Executive Order No. 13767 on "Border Security and Immigration Enforcement Improvements" ("the Border Security E.O."), directing DHS to construct a "secure, contiguous, and impassable physical barrier" along the entirety of the nearly 2,000 mile long U.S.-Mexico border, in order "to prevent illegal immigration, drug and human trafficking, and acts of terrorism." The Border Security E.O. defines "wall" to mean "a contiguous, physical wall or other similarly secure, contiguous, and impassable physical barrier." (Sec. 3(e)).

On January 22, 2018, DHS Secretary Kirstjen Nielsen published a waiver determination in the Federal Register directing DHS to take "immediate action to replace existing vehicle barrier and pedestrian fencing with bollard wall" within a specific project area in New Mexico state, described as follows: "an approximately twenty mile segment of the border that starts at the Santa Teresa Land Port of Entry and extends westward" to Border Monument 10 in DHS's El Paso Sector. Determination Pursuant to Section 102 of Illegal Immigration Reform and Immigrant Responsibility Act of 1996 ("IIRIRA"), As Amended, 83 Fed. Reg. 3,012 (January 22, 2018) ("January 2018 Waiver"). For purposes of this letter, the proposed vehicle replacement fencing construction in New Mexico will be called the "New Mexico border wall replacement project." The January 2018 Waiver purports to waive the application of the ESA, NEPA, as well as 23 additional federal statutes, to the New Mexico border wall replacement project, pursuant to section 102(c) of IIRIRA, Pub. L. 104-208, Div. C, 110 Stat. 3009-546, codified at 8 U.S.C. § 1103 note.

---

B. Potential Impacts on Threatened and Endangered Species

The New Mexico border wall replacement project may impact several endangered and threatened species, as well as designated critical habitat, listed pursuant to the ESA. The New Mexico border wall replacement project is located in the Chihuahuan desert, which is considered to be one of the most biologically diverse and sensitive deserts in the world due to the abundance and endemism of species present. The proposed project area is within or in close proximity to populations of several endangered, threatened, and candidate species under the ESA, including the Yellow-billed Cuckoo, Southwestern willow flycatcher, Least tern, Mexican spotted owl, and Sneed pincushion cactus.[26] Additionally, the Northern Aplomado falcon and Mexican gray wolf in New Mexico are each federally designated as experimental non-essential populations under section 10(j) of the ESA.

Species may be impacted in numerous ways. To provide a few examples, the construction of replacement fencing for the currently existing vehicle barriers will likely affect the species whose populations reside or whose critical habitats are located near and at the site of construction. In addition, though certain imperiled species may not be affected directly by the construction of the wall itself, they may be negatively impacted by associated infrastructure, such as roads, structures, and traffic associated with enforcement and building the wall.

Further, the proposed bollard-style wall will likely impede the migration of species between New Mexico and Mexico. As Secretary Nielsen alleges that the proposed replacement wall will serve to "deter and prevent illegal crossings," the bollard-style wall typically consists of tall vertical posts that are spaced closely together, in contrast to the currently existing vehicle barriers which consist of low vertical posts placed several feet apart. The bollard-style wall increases the barriers' impermeability, serving to obstruct the natural migration of species. The agencies must consult with the FWS over these and other adverse impacts of the project on listed species.

Moreover, the Mexico border wall replacement project may also impact endangered and threatened species in adjacent areas to the proposed project site. Specifically, the project may result in the indirect effect of moving whatever existing traffic and crossings occurring in the proposed project area to adjacent areas that currently have less border construction and patrolling.[27] Increased traffic in more remote areas may necessarily affect the endangered or imperiled species and critical habitats in such adjacent areas.

[26] These species have been identified utilizing a database maintained by the U.S. Fish and Wildlife Service identifying protected species by county and the New Mexico listed species database identifying both ESA-listed species and New Mexico State-listed species maintained by the New Mexico Department of Fish and Game.
[27] See. e.g., U.S. Government Accountability Office, "Agencies need to better coordinate their strategies and operations on Federal Lands" (Jan. 4, 2004), https://www.gao.gov/products/GAO-04-590 ("Rising illegal activity on these federal lands results from the Border Patrol's strategy to deter illegal entry by concentrating resources in populated areas--thus shifting illegal traffic to more remote federal lands, where Border Patrol has placed fewer resources.")

III. DHS AND CBP VIOLATIONS OF THE ENDANGERED SPECIES ACT

Consultation under ESA Section 7 is required whenever a discretionary agency action "may affect" any listed species or its critical habitat.[28] ESA implementing regulations define "action" as "all activities or programs of any kind authorized, funded, or carried out . . . by Federal agencies."[29] As detailed in this letter, the San Diego border wall replacement project will potentially directly, indirectly, and cumulatively impact several threatened and endangered species. Despite this fact, DHS and CBP have apparently failed to initiate or complete ESA section 7 (a)(2) consultation with FWS in order to ensure that the border wall replacement project does not jeopardize the continued existence of any listed species or adversely modify or destroy the designated critical habitat for any of those species. In addition, DHS and CBP have failed to take any affirmative action to conserve the threatened and endangered species that may be impacted by the project. Accordingly, DHS and CBP are also violating Section 7 (a)(1) of the ESA.

Finally, by failing to conduct surveys or other investigations into endangered or threatened species presence or otherwise taking measures to protect these species from harm, DHS and CBP are engaged in the unlawful take of listed species, in violation of section 9 of the ESA.

IV. CONCLUSION

Thank you for your attention to the allegations contained in this notice letter. Should DHS and CBP fail to remedy the ESA violations of law within 60 days, Environmental Groups intend to pursue this matter in federal District Court. Please contact Jean Su at (202) 849-8399 should you wish to discuss this notice letter in further detail.

Sincerely,

Attachments:	18 03 21 NOI Letter re NM Border Wall from CBD DOW SEC ALDF.pdf

---

All, here is an NOI from CBD, Defenders, ALDF, and Southwest Environmental Center challenging DHS's waiver of the ESA regarding their replacement of 10 miles of border fencing in NM. We received it today; FWS is not a party. The NOI alleges that CBP and DHS should have consulted with us and did not, that they violated Section 7(a)(1) by not conserving species that may be affected by the project, and that they are engaging in take by undertaking the projects without surveying/investigating/taking measures to prevent harm to listed species. The area is apparently habitat for several listed birds, a listed cactus, and Mexican wolf.

Thank you,

Parks

Dear Secretary Nielsen, Deputy Director Kurth, and Acting Commissioner McAleenan:

On behalf of the Center for Biological Diversity, Southwest Environmental Center, Defenders of Wildlife, and the Animal Legal Defense Fund, we hereby provide notice in the attached letter that the Department of Homeland Security and the U.S. Customs and Border Protection are in violation of Section 7(a)(2) of the Endangered Species Act for their failure to consult with U.S. Fish and Wildlife Service in order to ensure that the proposed border wall fencing replacement construction in New Mexico does not jeopardize the continued existence of impacted threatened or endangered species, or result in the destruction or adverse modification of their critical habitat, and is further in violation of Section 9(a)(1)(B) of the Act for the likely “take” of threatened or endangered species caused by construction and related activities undertaken as part of the New Mexico border wall replacement project.

We have also sent a copy of the attached notice letter via certified mail.

Thank you for your attention to the allegations contained in the attached letter. Please contact me at the telephone number below should you wish to discuss this notice letter in further detail.

Best regards,

Jean Su

Re: Notice of Violations of the Endangered Species Act in Relation to Border Wall Fencing Replacement in New Mexico

Dear Secretaries Nielsen and Zinke, Deputy Director Kurth, and Acting Commissioner McAleenan:

On behalf of the Center for Biological Diversity, Southwest Environmental Center, Defenders of Wildlife, and the Animal Legal Defense Fund (collectively, "Environmental Groups"), we hereby provide notice, pursuant to Section 11(g)[1] of the Endangered Species Act ("ESA")[2] that the Department of Homeland Security ("DHS") and its component agency U.S. Customs and Border Protection ("CBP") are in violation of Section 7(a)(2) of the ESA[3] for their failure to consult with U.S. Fish and Wildlife Service ("FWS") in order to ensure that the proposed border wall fencing replacement construction in New Mexico—specifically, the replacement of approximately 20 miles of primarily existing vehicle fencing in New Mexico (the "New Mexico border wall replacement project")—does not jeopardize the continued existence of impacted threatened or endangered species, or result in the destruction or adverse modification of their critical habitat, and is further in violation of Section 9(a)(1)(B) of the ESA for the likely "take" of threatened or endangered species caused by construction and related activities undertaken as part of the New Mexico border wall replacement project.

Environmental Groups are environmental conservation organizations dedicated to protecting native wildlife species and their habitats. The Center for Biological Diversity ("the Center") is a non-profit, public interest environmental organization headquartered in Tucson, Arizona, with numerous offices across the United States, including New Mexico and Washington, D.C., dedicated to the protection of native species and their habitats through science, policy, and environmental law. The Center

[1] 16 U.S.C. § 1540(g)
[2] 16 U.S.C. § 1531 *et seq*.
[3] 16 U.S.C. § 1536(a)(2)

has more than 1.3 million members and on-line activists. The Southwest Environmental Center ("SEC") is a non-profit, member-supported, grassroots conservation organization based in Las Cruces, New Mexico. SEC is dedicated to protecting and restoring native wildlife and their habitats in the Southwestern borderlands, through advocacy, education and on-the-ground projects. Defenders of Wildlife ("Defenders") is a nonprofit organization with hundreds of thousands of members across the nation, including nearly 3,500 members in New Mexico. Defenders' mission is to preserve wildlife and emphasize appreciation and protection for all species in their ecological role through advocacy, litigation, and other efforts. Finally, the Animal Legal Defense Fund ("ALDF") is a nonprofit 501(c)(3) organization with more than 200,000 members and supporters, approximately 1,100 of whom live in New Mexico, and nearly 200 of whom live in El Paso County, Texas, near the New Mexico border wall replacement project. ALDF represents its members' interests by working to protect the lives of animals, including wildlife, through the legal system. ALDF is headquartered on Cotati, California, with regional offices in Los Angeles and Portland, Oregon.

Collectively, Environmental Groups have long advocated for better incorporation of environmental considerations into DHS border security planning and decision-making. Our ESA advocacy has resulted in the protection of numerous threatened and endangered species within the borderlands region and the designation of hundreds of thousands of acres of their critical habitat.

The threshold for triggering an agency's duties under the ESA is low; if an agency takes an action that may have environmental impacts or that "may affect" a listed species or critical habitat, then ESA section 7 consultation is required.[4] DHS and CBP, however, have provided no evidence to the public or to the Center that it has initiated or completed the required environmental analyses under either of these laws with respect to the New Mexico border wall replacement project.

I. LEGAL BACKGROUND

A. The Endangered Species Act

The ESA is "the most comprehensive legislation for the preservation of endangered species ever enacted by any nation."[5] Its fundamental purposes are "to provide a means whereby the ecosystems upon which endangered species and threatened species depend may be conserved [and] to provide a program for the conservation of such endangered species and threatened species . . . ."[6] To achieve these objectives, the ESA directs the FWS to determine which species of plants and animals are "threatened" and "endangered" and place them on the endangered species list.[7] An "endangered" or "threatened" species is one "in danger of extinction throughout all or a significant portion of its range," or "likely to become endangered in the near future throughout all or a significant portion of its range," respectively.[8]

[4] 50 C.F.R. § 402.14(a).
[5] *TVA v. Hill*, 437 U.S. 180 (1978).
[6] 16 U.S.C. § 1531(b).
[7] *Id.* § 1533.
[8] *Id.* § 1532(6), (20).

Once a species is listed, the ESA provides a variety of procedural and substantive protections to ensure not only the species' continued survival, but its ultimate recovery. One central protection, Section 7(a)(2), mandates that all federal agencies avoid actions that: (1) jeopardize listed species; or (2) destroy or adversely modify designated critical habitat.[9] Federal agency actions include those projects or programs "authorized, funded, or carried out by such agency."[10] To comply with these Section 7(a)(2) safeguards, the federal agency taking action and FWS take part in a cooperative analysis of potential impacts to listed species and their designated critical habitat known as a consultation process.

First, the agency must obtain "a list of any listed or proposed species or designated or proposed critical habitat that may be present in the action area" from FWS.[11] If a species or critical habitat may be present, the agency must prepare a biological assessment to determine whether the proposed action "may affect" or "is not likely to adversely affect" any listed species or critical habitat.[12]

Federal agencies must initiate formal consultation with FWS when their actions "may affect" a listed species or designated critical habitat.[13] The standard for consultation is low: "[a]ny possible effect, whether beneficial, benign, adverse, or of an undetermined character, triggers the formal consultation requirement."[14]Effects that must be considered as part of this inquiry include "direct and indirect effects of an action on the species or critical habitat, together with the effects of other activities that are interrelated or interdependent with that action, that will be added to the environmental baseline."[15] Indirect effects are "those that are caused by the proposed action and are later in time, but still are reasonably certain to occur."[16]

Through the formal consultation process, FWS prepares a "biological opinion" as to whether the action jeopardizes the species or destroys or adversely modifies critical habitat and, if so, suggests "reasonable and prudent alternatives."[17] During the consultation process, both agencies must "use the best scientific and commercial data available."[18]

In addition to duties under Section 7(a)(2) of the ESA, federal agencies are required under Section 7(a)(1) to "utilize their authority for the conservation [i.e. recovery] of endangered species and

B. Potential Impacts on Threatened and Endangered Species

The New Mexico border wall replacement project may impact several endangered and threatened species, as well as designated critical habitat, listed pursuant to the ESA. The New Mexico border wall replacement project is located in the Chihuahuan desert, which is considered to be one of the most biologically diverse and sensitive deserts in the world due to the abundance and endemism of species present. The proposed project area is within or in close proximity to populations of several endangered, threatened, and candidate species under the ESA, including the Yellow-billed Cuckoo, Southwestern willow flycatcher, Least tern, Mexican spotted owl, and Sneed pincushion cactus.[26] Additionally, the Northern Aplomado falcon and Mexican gray wolf in New Mexico are each federally designated as experimental non-essential populations under section 10(j) of the ESA.

Species may be impacted in numerous ways. To provide a few examples, the construction of replacement fencing for the currently existing vehicle barriers will likely affect the species whose populations reside or whose critical habitats are located near and at the site of construction. In addition, though certain imperiled species may not be affected directly by the construction of the wall itself, they may be negatively impacted by associated infrastructure, such as roads, structures, and traffic associated with enforcement and building the wall.

Further, the proposed bollard-style wall will likely impede the migration of species between New Mexico and Mexico. As Secretary Nielsen alleges that the proposed replacement wall will serve to "deter and prevent illegal crossings," the bollard-style wall typically consists of tall vertical posts that are spaced closely together, in contrast to the currently existing vehicle barriers which consist of low vertical posts placed several feet apart. The bollard-style wall increases the barriers' impermeability, serving to obstruct the natural migration of species. The agencies must consult with the FWS over these and other adverse impacts of the project on listed species.

Moreover, the Mexico border wall replacement project may also impact endangered and threatened species in adjacent areas to the proposed project site. Specifically, the project may result in the indirect effect of moving whatever existing traffic and crossings occurring in the proposed project area to adjacent areas that currently have less border construction and patrolling.[27] Increased traffic in more remote areas may necessarily affect the endangered or imperiled species and critical habitats in such adjacent areas.

[26] These species have been identified utilizing a database maintained by the U.S. Fish and Wildlife Service identifying protected species by county and the New Mexico listed species database identifying both ESA-listed species and New Mexico State-listed species maintained by the New Mexico Department of Fish and Game.
[27] See. e.g., U.S. Government Accountability Office, "Agencies need to better coordinate their strategies and operations on Federal Lands" (Jan. 4, 2004), https://www.gao.gov/products/GAO-04-590 ("Rising illegal activity on these federal lands results from the Border Patrol's strategy to deter illegal entry by concentrating resources in populated areas--thus shifting illegal traffic to more remote federal lands, where Border Patrol has placed fewer resources.")

III. DHS AND CBP VIOLATIONS OF THE ENDANGERED SPECIES ACT

Consultation under ESA Section 7 is required whenever a discretionary agency action "may affect" any listed species or its critical habitat.[28] ESA implementing regulations define "action" as "all activities or programs of any kind authorized, funded, or carried out . . . by Federal agencies."[29] As detailed in this letter, the San Diego border wall replacement project will potentially directly, indirectly, and cumulatively impact several threatened and endangered species. Despite this fact, DHS and CBP have apparently failed to initiate or complete ESA section 7 (a)(2) consultation with FWS in order to ensure that the border wall replacement project does not jeopardize the continued existence of any listed species or adversely modify or destroy the designated critical habitat for any of those species. In addition, DHS and CBP have failed to take any affirmative action to conserve the threatened and endangered species that may be impacted by the project. Accordingly, DHS and CBP are also violating Section 7 (a)(1) of the ESA.

Finally, by failing to conduct surveys or other investigations into endangered or threatened species presence or otherwise taking measures to protect these species from harm, DHS and CBP are engaged in the unlawful take of listed species, in violation of section 9 of the ESA.

IV. CONCLUSION

Thank you for your attention to the allegations contained in this notice letter. Should DHS and CBP fail to remedy the ESA violations of law within 60 days, Environmental Groups intend to pursue this matter in federal District Court. Please contact Jean Su at (202) 849-8399 should you wish to discuss this notice letter in further detail.

Sincerely,

Jean Su, Associate Conservation Director and Staff Attorney

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
Austin American Statesman	TBD	Jeremy Schwartz a reporter with the Austin American Statesman contacted R2 asking to interview some of our ocelot researchers regarding translocation efforts and genetic diversity.
InfoGraphic – Bats and White Nose Syndrome	TBD	Geoff Giller, a reporter with Infographic, contacted R2 requesting an interview/field visit to report on bats impacted by white-nose syndrome. The reporter has also spoken with the FWS WNS contacts in R5. Will visit OK March 21-22 to observe survey work.
Texas Observer	TBD	Naveena Sadasivam, a reporter for the Texas Observer, is following up on the listing of the Texas hornshell and implications for other mussel species in Texas that might be considered for ESA protection.
The Arizona Republic, The Wildlife Professional (TWS) Northern Mexican Gartersnake Conservation	TBD Week of March 26	Amending the Lower Colorado River Multispecies Conservation Plan to conserve the threatened northern Mexican gartersnake has been finalized. The threatened snake was rediscovered at Havasu National Wildlife Refuge, following a 100-year absence.
Arizona Daily Sun (Flagstaff) Golden eagle management	3/18/18	Golden eagle conservation efforts being conducted at Babbitt Ranches in northern Arizona. Initial contact and general response provided by Brenda Smith (Assist. Field Supervisor). Reporter also referred to SME (Greg Beatty) for background. http://azdailysun.com/news/local/scientists-tap-roadkill-to-boost-babbitt-ranches-golden-eagle-populations/article_5ebac7d2-1085-53ff-9d4b-ec65f8ae6da2.html

Week Ahead Schedule of Meetings, Hearings, and Travel

Immediate Announcements and Actions (within the next 14 days)

Kuenzler hedgehog cactus downlisting – FWS will finalize the downlisting of Kuenzler hedgehog cactus in late March 2018. When first listed, only 200 plants from two locations were known. Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known population clusters within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild.

15-60 Day Look Ahead

Black-capped vireo event – On Friday, April 13th, FWS will be hosting an event at Balcones Canyonlands National Wildlife Refuge to celebrate the recovery of the black-capped vireo. Representatives from Texas Parks and Wildlife Department, Oklahoma Department of Wildlife Conservation, Fort Hood (TX), Fort Sill (OK), USDA's NRCS, the Texas Comptroller's office, Congressional offices and other partners are invited. Media will be invited.

Earth Day Celebration - FWS will participate in the 2018 Earth Day event April 20-22. Earth Day Texas is an annual outdoor festival seeking to elevate environmental awareness. The family-friendly event is free to the public. Held at Fair Park, Dallas, Texas, the event is expected to draw over 100,000 visitors. Open to media.

March 29, 2018 is the 20th anniversary of the FWS's first release of Mexican wolves into the wild following their extirpation in the wild in the 1970s. Several environmental groups are planning events around Arizona and New Mexico, including films, op-eds, and panel discussions about the path Mexican wolves have taken to get from zero animals in the wild to the 2017 population count of 114. The Service will send a news release to media and stakeholders and post a video.

Black-capped vireo Delisting Determination – FWS anticipates publishing a final delisting determination for the black-capped vireo in late March 2018. In 2007, the Service completed a five-year review of the black-capped vireo which recommended the species be downlisted to threatened. In 2012, we received a petition to downlist the black-capped vireo based on our 2007 recommendation. The Service used the Species Status Assessment framework to evaluate species viability and address the petition. Our analysis of the best available science indicates the primary known threats to the black-capped vireo, of habitat loss and brown-headed cowbird parasitism, have been reduced or adequately managed and that many populations are stable or growing. A communications plan has been shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. In addition, an event to celebrate the delisting is being planned for Friday, April 13 at Balcones Canyonlands National Wildlife Refuge near Marble Falls, Texas.

<u>Upcoming Workshops & Meetings</u>

Endangered Species Act Recovery Actions

[*UPDATE*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan and a final rule Delisting the bat – In two separate, but associated announcements, FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the delisting of the lesser long-nosed bat and the final delisting of the LLNB. Target date for submitting to the *Federal Register* is March 30, 2018 and delisting is anticipated to follow by a month. This action is not expected to be opposed. Stakeholders are the petitioners, Pacific Legal Foundation and the New Mexico Cattle Growers Association. Proactive conservation stakeholders include Pima County MSCP and hundreds of citizen scientists monitor bats each summer and fall when this migratory species returns to roosts in the U.S. A communications plan has been prepared, with a news release to local media and stakeholders planned.

[*UPDATE*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan and a final rule Delisting the bat – In two separate, but associated announcements, FWS will announce the final delisting of the lesser long-nosed bat, and then the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. Target date for submitting delisting to the *Federal Register* is March 30, 2018. The target date for the post-delisting monitoring plan is unknown. This action is not expected to be opposed. Stakeholders are the petitioners, Pacific Legal Foundation and the New Mexico Cattle Growers Association. Proactive conservation stakeholders include Pima County MSCP and hundreds of citizen scientists monitor bats each summer and fall when this migratory species returns to roosts in the U.S. Communications packages are prepared.

Draft Recovery Plan for Four Aquatic Invertebrates – FWS will make available and seek comment on a draft recovery plan for four aquatic invertebrates found in desert grasslands in southeast New Mexico and southwest Texas in March 2018. Noel's amphipod, Pecos assiminea, Koster's springsnail, and Roswell springsnail were listed as endangered in 2005. The primary threats to all four species are threats to the quantity and quality of water. Activities, such as oil and gas drilling, water withdrawals from the aquifer and contamination are the greatest threats. Most occupied sites are on FWS Bitter Lake National Wildlife Refuge in New Mexico and The Nature Conservancy holdings in Texas.

Endangered Species Act Listing Actions

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Tobusch fishhook cactus downlisting notice – In March, FWS will publish a final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved "fishhook" spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to downlist the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened. Local interest is anticipated. A communications plan has been shared with FWS HQ External Affairs that includes outreach to congressional offices, local and state officials and stakeholders, a news release to media and posting information on social media is planned at time of publication in the *Federal Register*.

Other Items of Note

[NEW]: American Electric Power (AEP) draft Habitat Conservation Plan NOA– In May/June FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning to hold public meetings during the 60-day public comment period. A news bulletin has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

[NEW] A video commemorating the 20th anniversary of the first releases of Mexican wolves into the wild will be distributed on March 29, 2018. The video will look back at the past 20 years of the program. The video will be posted to the FWS Southwest Region website.

[UPDATE] Arizona Electric Power Cooperative Candidate Conservation Agreement with Assurances for Sonoran Desert Tortoise – FWS published in the *Federal Register,* on March 20, a Notice of Availability for the Arizona Electric Power Cooperative (AEPCO) Draft Candidate Conservation Agreement with Assurances (dCCAA) for Sonoran Desert Tortoise and their application for an enhancement of survival permit (ESP) in Arizona. AEPCO has developed a conservation agreement that would promote conservation for the unlisted Sonoran Desert tortoise within 2,152 acres of their right-of-way during normal operation and maintenance activities. If approved the term of the dCCAA and ESP would be 25 years. No formal news bulletin will be released. Outreach to local, State, and Federal agencies and partners.

[*UPDATE*] Black-capped vireo draft Post-delisting Monitoring Plan – On March 14, 2018, FWS published a draft post-delisting monitoring plan (PDMP) for the black-capped vireo for public review. The draft PDMP has been developed in coordination with partners and will guide how the species population is monitored for a minimum of five years if it is delisted. The plan will describe monitoring methods, reporting procedures and agency responsibilities. Multiple monitoring strategies will be used in order to assure that population trends and habitat status will be captured at various time periods and scales, respectively. The final delisting determination

will likely occur in early 2018. A Communications Plan has been shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. A news release has been drafted. Outreach, including issuing a news release and posting information on the regional and field websites was completed.

Lesser-Prairie Chicken Surveys - On March 16 the state natural resources agencies in New Mexico, Colorado, Oklahoma, Texas and Kansas will begin aerial surveys for the lesser prairie-chicken. The surveys, which have been conducted annually since 2012, will run through mid-May and will assist in assessing long term population trend for the lesser prairie-chicken. The results of the surveys will be available this summer.

FWS and partners completed the annual Mexican wolf population survey and capture, from January 24, 2018 through February 3, 2018. The count documented a minimum of 114 Mexican wolves in 2017 in the U.S., an increase of one wolf over what was documented for 2016. The Mexican Wolf Recovery Program is a multi-agency cooperative effort between the FWS, Arizona Game and Fish Department, U.S. Forest Service, USDA-Wildlife Services, and the White Mountain Apache Tribe, as well as in consultation with the New Mexico Department of Game and Fish and counties. Survey flights occurred on the Fort Apache Indian Reservation, Apache, Coconino, Cibola, and Gila National Forests in eastern Arizona and western New Mexico, and some areas immediately outside the forests. Some media attended the operations. The final count was distributed to the media and partner agencies on February 21, 2018.

On January 12, 2018, FWS submitted permit applications to New Mexico Department of Game and Fish (NMDGF) to import and release up to 12 Mexican wolf pups in New Mexico, to import a female wolf from Arizona for artificial insemination at Sevilleta Wolf Management Facility, and to import up to 6 pups from Arizona to be held at Sevilleta or Ladder Ranch Wolf Management Facilities, if needed. The Mexican Wolf Initial Release and Translocation Proposal for 2018 was provided for public review and comment from December 4 to 29. FWS received just over 100 comments, which were transmitted to NMDGF, per their regulations, along with the permit applications. The initial releases and translocations outlined in this document are consistent with: (1) the 2014 Final Environmental Impact Statement (EIS) for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (2) the 2015 Record of Decision for the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf (Canis lupus baileyi), (3) the 2015 Final Rule - Revisions to the Regulations for the Nonessential Experimental Population of the Mexican Wolf, and the 2017 Mexican Wolf Recovery Plan, First Revision. New Mexico Department of Game and Fish provided FWS with the permits for importation and release on February 22, 2018.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and

other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. A conference call was held with Senator Cornyn's staff to discuss the issue on December 11. More details available in past reports.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participant under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

National Wildlife Refuge Actions

[*UPDATE*]: Army Corps of Engineers (ACE) is seeking to draw-down Lake Alamo (in western Arizona) in order to conduct a dam safety inspection and maintenance. A resulting flushing flow from the reservoir into the Bill Williams River may benefit the downstream river riparian area and is scheduled for as early as March. The event was fully put forward and developed by ACE and does not take place on refuge land however the release would impact the Bill Williams River National Wildlife Refuge. (ACE has completed section 7 consultation on the proposed activity.) The FWS does have a representative on the Bill Williams River Corridor Steering Committee, a non-decisional body focused on interagency communication; however, the Service does not have authority over the release. Reservoir angler and recreational community, and downstream ATV groups have registered concern/opposition to the draw-down and flows. The Arizona Game and Fish Commission passed a resolution opposing draw-down of Alamo Reservoir and filed for a temporary restraining order, which was denied in Federal Court on March 9. Release of water began March 12, peaking at 5000 cfs on March 14 and will continue to be released in decreasing volumes through April 1. Congressman Paul Gosar (AZ-4) and county elected officials have weighed in on the project, including flushing flows.

FWS Southwest Region is proactively reaching out to state agencies to discuss Secretarial Order 3356, and seek additional opportunities to support and expand hunting and fishing on Refuges in the Southwest. Currently the Oklahoma Department of Wildlife Conservation (ODWC) has been the most responsive. On January 31, 2018, FWS leadership met with ODWC to discuss several potential hunting and fishing opportunities that could occur on Refuges in Oklahoma. Meeting participants identified additional hunting and fishing, educational and youth opportunities on every refuge in Oklahoma. Additionally, ODWC committed to providing additional staff support to help implement and sustain the identified activities. The FWS Southwest Region will continue to reach out to Texas, Arizona and New Mexico as well as Oklahoma to explore more opportunities.

Urban Youth Gaining Outdoor Work Experience – FWS as part of an urban partnership, is bringing students from Furr High School in Houston, Texas to the FWS Trinity River National Wildlife Refuge to enable them to gain back country experience. In January 2018 (date TBD), several Furr High School students (10 to 15 expected) will work alongside FWS to continue construction of a trail within the Refuge during their camping/backpacking experience. The experience is meant to introduce students to careers in conservation and will emphasize land management issues, developing public use opportunities (including hunting, fishing and wildlife watching), team building and leadership skills. The desired outcome is that the students will take learned skills back to their school, which is adjacent to Houston Parks and Recreation's Herman Brown Park, a 900-acre park that the school uses as an outdoor classroom. The urban partnership plans to build on this experience on other FWS/TPWD led programs on hunting, fishing and wildlife watching conducted in classroom and on the city park.

Newly constructed production pads for oil and gas development at Hagerman National Wildlife Refuge were mitigated by easing angler access to refuge waters at Lake Texoma. Hagerman's Sandy Day Use Area was improved by a mineral operator, replacing bollard and cable around a lot, leveling walkways and paving with coarse stone. Spoil, litter and discarded roots were hauled away by refuge volunteers. The small improvement can make a large difference for the 7,500 anglers and 2,500 birds that use the area. Anglers catch blue catfish, channel catfish, striped bass, white bass, and sunfishes while birders can check off bald eagle, peregrine falcon, herring gulls, white pelicans, red-tailed hawk, red-shouldered hawk, painted bunting, blue grosbeak, or summer tanager.

Border-Related Activities

[UPDATE] Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from a FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

[UPDATE] Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental

Population Area, as designed under section 10(j) of the ESA. In 2017 a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

FWS Alchesay and Williams Creek National Fish Hatchery Complex in partnership with White Mountain Apache Game and Fish, and Arizona Fish and Wildlife Conservation Office, started stocking Apache trout and rainbow trout on the Fort Apache Indian Reservation. FWS initiated stocking on March 5, 2018. Within the first three days, hatchery personnel stocked about 2,990 Apache trout in Reservation streams. Frequent stocking will continue every week leading up to Easter weekend with the intent to stock out 3,000 to 4,000 Apache trout each week. In addition, up to 8,000 rainbow trout will be stocked into the Reservation lakes. The lack of snow in the White Mountains necessitates this large early release of fish. With reduced snowfall over the winter, hatchery water sources are expected to dwindle as spring turns to summer. Hatchery personnel expect to stock out up to 24,000 fish for anglers within the next four weeks. With reduced runoff expected, fewer trout will be stocked during mid-summer months.

FWS Willow Beach National Fish Hatchery, in partnership with Arizona Game and Fish Department, announced the beginning of the annual rainbow trout sportfish stocking season in the lower Colorado River immediately below Lake Mohave/Davis Dam in late October. Neighboring communities include Laughlin, Nevada and Bullhead City, Arizona. FWS will stock about 1, 750 trout every week from early October through March 2018. Stocking sites include Davis Camp, Community Park, and Rotary Park for October-December. From January 2018 through March 2018, stocking sites will be Davis Camp and Community Park. In addition to the annual stocking season below Davis Dam, FWS Willow Beach NFH continues to stock rainbow every week, year round, at Willow Beach Marina, Arizona.

Migratory Birds

Nothing significant to report.

Science Applications

Nothing significant to report

Wildlife and Sport Fish Restoration

Nothing significant to report

Tribal Consultation

FWS Southwest Region will conduct the 2018 Arizona Inter-Tribal Coordination meeting April 4-5 in Prescott, Arizona.

FWS Southwest Regional Director Amy Lueders and Yavapai-Apache Nation Chairwoman Tanya Lewis will meet in Camp Verde, Arizona on April 3 to discuss shared conservation concerns.

Upcoming public events in the Southwest

Birding Festival	April 14-15, 2018	Attwater Prairie Chicken National Wildlife Refuge, Texas	View Details
Monarch Migration Celebration	April 21-22	San Bernard National Wildlife Refuge, Texas	Sponsored by Friends group
Arizona Envirothon	April 20-21, 2018	Mingus Mountain, Arizona	FWS's Arizona Ecological Services is an event sponsor/participants
Birding Festival	April 27-29, 2018	Balcones Canyonlands National Wildlife Refuge, Texas

Havasu Today's News	TBD	Mexican Garter Snake is included in conservation measures, what does that mean for the readers of the newspaper?

Week Ahead Schedule of Meetings, Hearings, and Travel

Immediate Announcements and Actions (within the next 14 days)

Kuenzler hedgehog cactus downlisting – FWS will finalize the downlisting of Kuenzler hedgehog cactus in April 2018. When first listed, only 200 plants from two locations were known. Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known population clusters within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild.

15-60 Day Look Ahead

[NEW] In April or May, the FWS will release less than 14-day old captive-born Mexican wolf pups into established wild Mexican wolf dens on federal land in Arizona and New Mexico. Select reporters will be invited to attend. FWS will send a news release summarizing these cross-fostering efforts to media and stakeholders at the end of May or early June.

[*UPDATE*] Black-capped vireo Delisting Determination – FWS anticipates sending to the *Federal Register* the final delisting determination for the black-capped vireo in late March 2018. In 2007, the Service completed a five-year review of the black-capped vireo which recommended the species be downlisted to threatened. In 2012, we received a petition to downlist the black-capped vireo based on our 2007 recommendation. The Service used the Species Status Assessment framework to evaluate species viability and address the petition. Our analysis of the best available science indicates the primary known threats to the black-capped vireo, of habitat loss and brown-headed cowbird parasitism, have been reduced or adequately managed and that many populations are stable or growing. A communications plan has been shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. In addition, an event to celebrate the delisting is being planned for Friday, April 13 at Balcones Canyonlands National Wildlife Refuge near Marble Falls, Texas.

Black-capped vireo event – On Friday, April 13th, FWS will host an event at Balcones Canyonlands National Wildlife Refuge to celebrate the recovery of the black-capped vireo. Representatives from Texas Parks and Wildlife Department, Oklahoma Department of Wildlife Conservation, Fort Hood (TX), Fort Sill (OK), USDA's NRCS, the Texas Comptroller's office, Congressional offices and other partners are invited. Media will be invited.

Earth Day Celebration - FWS will participate in the 2018 Earth Day event April 20-22. Earth Day Texas is an annual outdoor festival seeking to elevate environmental awareness. The family-friendly event is free to the public. Held at Fair Park, Dallas, Texas, the event is expected to draw over 100,000 visitors. Open to media.

Upcoming Workshops & Meetings

Endangered Species Act Recovery Actions

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan and a final rule Delisting the bat – In two separate, but associated announcements, FWS will announce the final delisting of the lesser long-nosed bat, and then the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. Target date for submitting delisting to the *Federal Register* is March 30, 2018. The target date for the post-delisting monitoring plan is unknown. This action is not expected to be opposed. Stakeholders are the petitioners, Pacific Legal Foundation and the New Mexico Cattle Growers Association. Proactive conservation stakeholders include Pima County MSCP and hundreds of citizen scientists monitor bats each summer and fall when this migratory species returns to roosts in the U.S. Communications packages are prepared.

Draft Recovery Plan for Four Aquatic Invertebrates – FWS will make available and seek comment on a draft recovery plan for four aquatic invertebrates found in desert grasslands in southeast New Mexico and southwest Texas in March 2018. Noel's amphipod, Pecos assiminea, Koster's springsnail, and Roswell springsnail were listed as endangered in 2005. The primary threats to all four species are threats to the quantity and quality of water. Activities, such as oil and gas drilling, water withdrawals from the aquifer and contamination are the greatest threats. Most occupied sites are on FWS Bitter Lake National Wildlife Refuge in New Mexico and The Nature Conservancy holdings in Texas.

Endangered Species Act Listing Actions

[UPDATE] Tobusch fishhook cactus downlisting notice – In April, FWS will publish a final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved "fishhook" spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to downlist the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened. Local interest is anticipated. A communications plan has been shared with FWS HQ External Affairs that includes outreach to congressional offices, local and state officials and stakeholders, a news release to media and posting information on social media is planned at time of publication in the *Federal Register*.

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

American Electric Power (AEP) draft Habitat Conservation Plan NOA– In May/June FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning to hold public meetings during the 60-day public comment period. A news bulletin has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participant under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

National Wildlife Refuge Actions

FWS Southwest Region is proactively reaching out to state agencies to discuss Secretarial Order 3356, and seek additional opportunities to support and expand hunting and fishing on Refuges in the Southwest. Currently the Oklahoma Department of Wildlife Conservation (ODWC) has been the most responsive. On January 31, 2018, FWS leadership met with ODWC to discuss several potential hunting and fishing opportunities that could occur on Refuges in Oklahoma. Meeting participants identified additional hunting and fishing, educational and youth opportunities on every refuge in Oklahoma. Additionally, ODWC committed to providing additional staff support to help implement and sustain the identified activities. The FWS Southwest Region will continue to reach out to Texas, Arizona and New Mexico as well as Oklahoma to explore more opportunities.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from a FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designed under section 10(j) of the ESA. In 2017 a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

FWS Willow Beach National Fish Hatchery, in partnership with Arizona Game and Fish Department, announced the beginning of the annual rainbow trout sportfish stocking season in the lower Colorado River immediately below Lake Mohave/Davis Dam in late October. Neighboring communities include Laughlin, Nevada and Bullhead City, Arizona. FWS will stock about 1, 750 trout every week from early October through March 2018. Stocking sites include Davis Camp, Community Park, and Rotary Park for October-December. From January 2018 through March 2018, stocking sites will be Davis Camp and Community Park. In addition to the annual stocking season below Davis Dam, FWS Willow Beach NFH continues to stock rainbow every week, year round, at Willow Beach Marina, Arizona.

Tribal Consultation
[NEW] The annual Arizona Inter Tribal - Fish and Wildlife Service coordination meeting will take place April 4 and 5, 2018, in Prescott, Arizona. This meeting is a venue for all FWS programs in Arizona to inform tribes of proposed and ongoing activities that may affect or otherwise be of interest to tribes; a forum for tribal feedback and discussion; and an opportunity for the Service and tribes to collaborate on conservation. The meeting is being coordinated by Arizona ES and the Yavapai-Prescott Indian Tribe

FWS Southwest Region will conduct the 2018 Arizona Inter-Tribal Coordination meeting April 4-5 in Prescott, Arizona.

FWS Southwest Regional Director Amy Lueders and Yavapai-Apache Nation Chairwoman Tanya Lewis will meet in Camp Verde, Arizona on April 3 to discuss shared conservation concerns.

Media Contact Report

Title/Issue	Anticipated Publication Date	Current Status
Austin Chronicle	April 5	Lindsey Mader, a reporter for the Austin Chronicle contacted R2 asking for information on the proposed delisting of the black-capped vireo and the April 13th event at the Balcones Canyonlands NWR. https://www.austinchronicle.com/news/2018-04-06/feds-move-closer-to-removing-vireo-from-endangered-species-list/
Austin American Statesman	TBD	Jeremy Schwartz a reporter with the Austin American Statesman contacted R2 asking to interview some of our ocelot researchers regarding translocation efforts and genetic diversity.
InfoGraphic – Bats and White Nose Syndrome	TBD	Geoff Giller, a reporter with Infographic, contacted R2 requesting an interview/field visit to report on bats impacted by white-nose syndrome. The reporter has also spoken with the FWS WNS contacts in R5. Will visit OK March 21-22 to observe survey work.
AZ Republic	TBD	Question on Mexican Wolf Recovery
Havasu Today's News	TBD	Mexican Garter Snake is included in conservation measures, what does that mean for the readers of the newspaper?
Desert Exposure	April 2018	Private lands conservation w Partners for Wildlife: imperiled Chihuahua chub and Chiricahua leopard frog
High Country News	TBD	Artists working with the Sonoran Institute and Pima County on some arts engagement around the flowing/restored Santa Cruz River in Arizona. Artist-civic partnership brings awareness to the

		fact that the water is flowing. The Gila topminnow as the focus of their work and iconography.
KJZZ (NPR-Phoenix)	April 11, 2018	Status update for Mount Graham red squirrels. Population dropped from 250 animals to 35 as result of Frye Fire. Cooperators have initiated a number of immediate/urgent response actions. Recorded SME (Marit Alanen) interview.

Week Ahead Schedule of Meetings, Hearings, and Travel

Immediate Announcements and Actions (within the next 14 days)

Kuenzler hedgehog cactus downlisting – FWS will finalize the downlisting of Kuenzler hedgehog cactus in April 2018. When first listed, only 200 plants from two locations were known. Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known population clusters within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild.

15-60 Day Look Ahead

In April or May, the FWS will release less than 14-day old captive-born Mexican wolf pups into established wild Mexican wolf dens on federal land in Arizona and New Mexico. Select reporters will be invited to attend. FWS will send a news release summarizing these cross-fostering efforts to media and stakeholders at the end of May or early June.

[*UPDATE*] Black-capped vireo Delisting Determination – FWS sent the final delisting determination for the black-capped vireo to the Federal Register, the final rule will publish on Monday, April 16th. In 2007, the Service completed a five-year review of the black-capped vireo which recommended the species be downlisted to threatened. In 2012, we received a petition to downlist the black-capped vireo based on our 2007 recommendation. The Service used the Species Status Assessment framework to evaluate species viability and address the petition. Our analysis of the best available science indicates the primary known threats to the black-capped vireo, of habitat loss and brown-headed cowbird parasitism, have been reduced or adequately managed and that many populations are stable or growing. A communications plan has been shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. In addition, an event to celebrate the delisting is being planned for Friday, April 13 at Balcones Canyonlands National Wildlife Refuge near Marble Falls, Texas.

Black-capped vireo event – On Friday, April 13th, FWS will host an event at Balcones Canyonlands National Wildlife Refuge to celebrate the recovery of the black-capped vireo. Representatives from Texas Parks and Wildlife Department, Oklahoma Department of Wildlife Conservation, Fort Sill (OK), Fort Hood (TX), USDA's NRCS, the Texas Comptroller's office, Congressional offices and other partners are invited. Media will be invited.

Earth Day Celebration - FWS will participate in the 2018 Earth Day event April 20-22. Earth Day Texas is an annual outdoor festival seeking to elevate environmental awareness. The family-friendly event is free to the public. Held at Fair Park, Dallas, Texas, the event is expected to draw over 100,000 visitors. Open to media.

Upcoming Workshops & Meetings

April 8 –April 19, 2018, the XXIII Meeting of the Canada/Mexico/U.S. Trilateral Committee for Wildlife and Ecosystem Conservation and Management will be held at the National Conservation Training Center, Shepherdstown, West Virginia.

Endangered Species Act Recovery Actions

[NEW] Range-wide lesser prairie-chicken (LPC) Conservation Plan Annual Report. On March 31, 2018, the FWS received the Western Association of Fish and Wildlife Agencies (WAFWA) fourth annual report on implementation of the Lesser Prairie-Chicken Range-wide Conservation Plan in the near future. FWS will be providing a technical review of the report. FWS greatly appreciates the States' leadership in the conservation of the lesser prairie-chicken and implementation of the RWP. FWS remains committed to working collaboratively with WAFWA on implementing the plan, which is a key component in ongoing efforts to conserve the lesser prairie-chicken.

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan and a final rule Delisting the bat – In two separate, but associated announcements, FWS will announce the final delisting of the lesser long-nosed bat, and then the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. Target date for submitting delisting to the *Federal Register* is March 30, 2018. The target date for the post-delisting monitoring plan is unknown. This action is not expected to be opposed. Stakeholders are the petitioners, Pacific Legal Foundation and the New Mexico Cattle Growers Association. Proactive conservation stakeholders include Pima County MSCP and hundreds of citizen scientists that monitor bats each summer and fall when this migratory species returns to roosts in the U.S. Communications packages are prepared.

[*UPDATE*] Draft Recovery Plan for Four Aquatic Invertebrates – FWS published a Notice of Availability of the draft recovery plan on April 2, 2018. The draft recovery plan for four aquatic invertebrates found in desert grasslands in southeast New Mexico and southwest Texas in March 2018 is available for public review and comment. Noel's amphipod, Pecos assiminea, Koster's springsnail, and Roswell springsnail were listed as endangered in 2005. The primary threats to all four species are threats to the quantity and quality of water. Activities, such as oil and gas drilling, water withdrawals from the aquifer and contamination are the greatest threats. Most

occupied sites are on FWS Bitter Lake National Wildlife Refuge in New Mexico and The Nature Conservancy holdings in Texas.

Endangered Species Act Listing Actions

[*UPDATE*] Tobusch fishhook cactus downlisting notice – In May, FWS will publish a final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved "fishhook" spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to downlist the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened. Local interest is anticipated. A communications plan has been shared with FWS HQ External Affairs that includes outreach to congressional offices, local and state officials and stakeholders, a news release to media and posting information on social media is planned at time of publication in the *Federal Register*.

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

American Electric Power (AEP) draft Habitat Conservation Plan NOA– In May/June FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning to hold public meetings during the 60-day public comment period. A news bulletin has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

[*UPDATE*] Federal Register Notice of Intent to analysis the approval of a Safe Harbor Agreement published on April 3, 2018. The Applicant is Freeport-McMoRan and the

Agreement will cover spikedace, loach minnow and Gila chub in Eagle Creek in Arizona. We anticipate drafting an Environmental Assessment, but this Agreement is in association with the construction on private lands of a fish barrier to promote recovery of the fish species in the Agreement. At this NOI stage, outreach is focused on the local area and is being conducted in coordination with Bureau of Reclamation and the applicant.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participant under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

The Outdoor Wire published a story about imperiled species conservation on private land performed under the auspices of Partners of for Fish and Wildlife Program, involving the FWS Fish and Aquatic Conservation and Wildlife and Sport Fish Restoration in concert with the New Mexico Department of Game and Fish. Map Reading in the Mimbres Valley

[NEW] Black-footed ferret nonessential experimental population expansion in Arizona – As early as June, FWS in partnership with Arizona Game and Fish Department, will propose expanding the black-footed ferret 10(j) designation to include all current and historical ferret habitat in Arizona. The 1996 Arizona 10(j) area was limited to the Aubrey Valley Experimental Population Area (AVEPA); successful reintroductions and subsequent population expansions has resulted in ferrets venturing outside of the AVEPA (as fully protected status). FWS consultation with affected tribes has been initiated. FWS will coordinate with AGFD to best approach and inform Arizona grassland residents and industry (livestock) groups. Communication planning will be conducted.

[*UPDATE*] Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

National Wildlife Refuge Actions

Nothing significant to report

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from a FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

[UPDATE] Mora National Fish Hatchery delivered 47,500 Gila trout eyed-eggs to the Arizona Game and Fish Department's Canyon Creek Hatchery and more coming soon. These eggs are surplus to what are needed for recovery purposes and are part of fulfilling a request for 100,000 eggs. About a year from now these eggs will turn into 12-inch trout that lucky anglers can fish for in select Arizona creeks. The eggs passed rigorous health testing performed by the Southwestern Fish Health Center based at the Southwestern Native Aquatic Resources and Recovery Center in Dexter, NM.

Hi all,

Attached is a draft response to this question. Thanks to Brad, Marilyn, Rod, and Ken for their input. Is anything missing? Not clear? Anything else? Ken is working on the map.

Rod, I didn't include the part about the levee that runs through the refuge potentially being owned by the International Border Wall Commission since our map didn't show that and our SAMMS records said we owned it. But if there's additional information we can point to that corrects our records, then we can add that part back in.

Thanks,

Laura

Thanks for the update.

Please work with Cynthia's team to prepare a BP on this issue so we can provide a thorough response back up the line through Greg so he has the comprehensive background. There will probably be a meeting with the political leadership team and the SOL team. On a tight deadline.

- State the request
- Analyze and address the question "does the FWS have the ability to use some of its FY 18 construction appropriations account funding to build resource protection structures along the US Mexican border?" ie what is our construction appropriations language, does this give us any flexibility for this purpose, are there any other laws, regs, or policies that allow this use of the account or forbid this use of the account?
- List all the NWR holdings along the border in Texas and include a map (to respond to the particular statement about a two mile stretch in Texas)
- Include the language from the Homeland Security Bill: "SEC 230. (c) None of the funds provided in this or any other Act shall be obligated for construction of a border barrier in the Santa Ana National Wildlife Refuge."

Hi Mike,

I asked Hillary and unfortunately we need to provide a response to Greg Sheehan today. He's meeting with the Deputy Secretary tomorrow. Is there anyone else who can pull together the map?

Also, we need your help with determining ownership of the levee that runs through Santa Ana. Our infrastructure database (SAMMS) says that the Service owns the levee, but our law enforcement folks believe that the International Border Wall Commission actually had jurisdiction. Do you know who has jurisdiction there? Do they have an easement?

Sorry for such the short turn around. Thank you for your help.

Laura

Brad,

I just spoke with Chris Nolan on this request. Please see the below short-notice request for a Briefing Paper on the Service's flexibility to construct resource protection structures along the Texas border. Would your group take the lead on this. I have included Noah (resource protection structure aspect) and Janet (holdings and map aspect).

I will try to find any language in Service authorizations regarding the topic.

All,

The question has been posed as to the authority and the ability of FWS to use some of its FY 18 construction appropriations account funding to build resource protection structures along the US Mexican border. Apparently there is a 2 mile stretch of land in Texas that is in question.

Jean, can you please schedule a meeting on this topic with POB, FW&P, FWS, and (b)(6), (b)(7)(C)

Thanks,
Scott

Hi all,

Attached is a draft response to this question. Thanks to Brad, Marilyn, Rod, and Ken for their input. Is anything missing? Not clear? Anything else? Ken is working on the map.

Rod, I didn't include the part about the levee that runs through the refuge potentially being owned by the International Border Wall Commission since our map didn't show that and our SAMMS records said we owned it. But if there's additional information we can point to that corrects our records, then we can add that part back in.

Thanks,

Laura

DRAFT

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service

Through April 20, 2018

FishBites Report

TITLE	***BLACK-CAPPED VIREO DELISTING ANNOUNCEMENT***
Topic	*After 30 years of being listed as endangered on the Endangered Species list, the black-capped vireo has been delisted thanks to partner driven efforts.*
***Supportive stakeholders**:*	*Texas Parks and Wildlife Department, Oklahoma Department of Wildlife Conservation, USDA's Natural Resources Conservation Service, the U.S. Army (Fort Hood-TX and Fort Sill-OK), The Nature Conservancy and the Office of the Texas Comptroller*
***Impacted location**:*	*Texas and Oklahoma*
TITLE	***LESSER LONG-NOSED BAT RECOVERY AND DELISTING***
Topic	Bi-national, partner-driven conservation and education since 1988 have culminated in the recovery and delisting of the endangered migratory, lesser long-nosed bat.
Supportive stakeholders:	Arizona and New Mexico state wildlife agencies, Bureau of Land Management, National Park Service, U.S. Forest Service, DoD (Luke AFB and Ft. Huachuca), Institute of Ecology, University of Mexico, tequila industry, National Phenology Network, Tohono O'odham Nation, U.S. Geological Survey, U.S. Customs and Border Protection and Bat Conservation International.
Impacted location:	Southern Arizona and New Mexico and Mexico

TITLE ***MILITARY VETERAN TURKEY HUNT***

Topic *Balcones Canyonlands NWR hosted 2 military veterans and their teenaged children on a hunt for Rio Grande turkeys. Two of the participants were successful, and the other two took their newfound knowledge and experience to a hunt on private land the following week to bag a gobbler each.*

Supportive stakeholders: *National Wild Turkey Federation, Candlelight Ranch, Friends of Balcones, Fallen Outdoors*

Impacted Location: *Texas*

Title/Issue	**Anticipated Publication Date**	**Current Status**
The Guardian	TBD	Region 2 was contacted by Mr. Jimmy Tobias regarding the listing of the Texas Hornshell. Mr. Tobias was looking for information regarding the process that led to the listing of the Texas hornshell including the six month extension.
Austin American Statesman	TBD	Jeremy Schwartz a reporter with the Austin American Statesman contacted R2 asking to interview some of our ocelot researchers regarding translocation efforts and genetic diversity.
InfoGraphic – Bats and White Nose Syndrome	TBD	Geoff Giller, a reporter with Infographic, contacted R2 requesting an interview/field visit to report on bats impacted by white-nose syndrome. The reporter has also spoken with the FWS WNS contacts in R5. Will visit OK March 21-22 to observe survey work.
AZ Republic	April 16, 2018	Question on Mexican Wolf Recovery
KJZZ (NPR-Phoenix)	April 11, 2018	Status update for Mount Graham red squirrels. Population dropped from 250 animals to 35 as result of Frye Fire. Cooperators have initiated a number of immediate/urgent response actions. Recorded SME (Marit Alanen) interview.

Associated Press *National Geographic* *Tucson KOLD ch 13* *Albq ch 9* *KNAU Flagstaff NPR*	April 17, 2018	Pitched story and media inquiries regarding delisting of the lesser long-nosed bat. (Link to stories: *Associated Press*, *National Geographic*, *Tucson ch 13*, *KNAU Flagstaff NPR*)

Week Ahead Schedule of Meetings, Hearings, and Travel

Immediate Announcements and Actions (within the next 14 days)

Kuenzler hedgehog cactus downlisting – FWS will finalize the downlisting of Kuenzler hedgehog cactus in April 2018. When first listed, only 200 plants from two locations were known. Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known population clusters within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild.

15-60 Day Look Ahead

In April or May, the FWS will release less than 14-day old captive-born Mexican wolf pups into established wild Mexican wolf dens on federal land in Arizona and New Mexico. Select reporters will be invited to attend. FWS will send a news release summarizing these cross-fostering efforts to media and stakeholders at the end of May or early June.

[*UPDATE*] Black-capped vireo Delisting Determination – The final delisting determination for the black-capped vireo published in the *Federal Register* on Monday, April 16th. In 2007, the Service completed a five-year review of the black-capped vireo which recommended the species be downlisted to threatened. In 2012, we received a petition to downlist the black-capped vireo based on our 2007 recommendation. The Service used the Species Status Assessment framework to evaluate species viability and address the petition. Our analysis of the best available science indicates the primary known threats to the black-capped vireo, of habitat loss and brown-headed cowbird parasitism, have been reduced or adequately managed and that many populations are stable or growing. A communications plan has been shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media occurred on Friday, April 13th and Monday, April 16th. In addition,

an event to celebrate the delisting was held on Friday, April 13 at Balcones Canyonlands National Wildlife Refuge near Marble Falls, Texas.

[*UPDATE*] Black-capped vireo event – On Friday, April 13th, the FWS hosted an event at Balcones Canyonlands National Wildlife Refuge to celebrate the recovery of the black-capped vireo. The event, attended by approximately 50 people, included representatives from Texas Parks and Wildlife Department, Fort Hood (TX), The Nature Conservancy, American Bird Conservancy, Balcones Canyonlands NWR Friends groups and others. After the ceremony, many of the guests participated in a tour of an area being managed and restored for black-capped vireos and golden-cheeked warblers.

Earth Day Celebration - FWS will participate in the 2018 Earth Day event April 20-22. Earth Day Texas is an annual outdoor festival seeking to elevate environmental awareness. The family-friendly event is free to the public. Held at Fair Park, Dallas, Texas, the event is expected to draw over 100,000 visitors. Open to media.

Upcoming Workshops & Meetings

April 8 –April 19, 2018, the XXIII Meeting of the Canada/Mexico/U.S. Trilateral Committee for Wildlife and Ecosystem Conservation and Management will be held at the National Conservation Training Center, Shepherdstown, West Virginia.

Endangered Species Act Recovery Actions

Range-wide lesser prairie-chicken (LPC) Conservation Plan Annual Report. On March 31, 2018, the FWS received the Western Association of Fish and Wildlife Agencies (WAFWA) fourth annual report on implementation of the Lesser Prairie-Chicken Range-wide Conservation Plan in the near future. FWS will be providing a technical review of the report. FWS greatly appreciates the States' leadership in the conservation of the lesser prairie-chicken and implementation of the RWP. FWS remains committed to working collaboratively with WAFWA on implementing the plan, which is a key component in ongoing efforts to conserve the lesser prairie-chicken.

[*UPDATE*] On April 17, FWS announced the final delisting of the lesser long-nosed bat. Three decades of bi-national partnerships are credited with this success. Stakeholders are the petitioners, Pacific Legal Foundation and the New Mexico Cattle Growers Association. Proactive conservation stakeholders include Pima County MSCP and hundreds of citizen scientists that monitor bats each summer and fall when this migratory species returns to roosts in the U.S. Communications was implemented and much newspaper, TV, magazine, and social media coverage has resulted.

[*UPDATE* Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is unknown, but anticipated as early as May. No controversy anticipated. Communications package is prepared.

Draft Recovery Plan for Four Aquatic Invertebrates – FWS published a Notice of Availability of the draft recovery plan on April 2, 2018. The draft recovery plan for four aquatic invertebrates found in desert grasslands in southeast New Mexico and southwest Texas in March 2018 is available for public review and comment. Noel's amphipod, Pecos assiminea, Koster's springsnail, and Roswell springsnail were listed as endangered in 2005. The primary threats to all four species are threats to the quantity and quality of water. Activities, such as oil and gas drilling, water withdrawals from the aquifer and contamination are the greatest threats. Most occupied sites are on FWS Bitter Lake National Wildlife Refuge in New Mexico and The Nature Conservancy holdings in Texas.

Endangered Species Act Listing Actions

Tobusch fishhook cactus downlisting notice – In May, FWS will publish a final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved "fishhook" spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to downlist the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened. Local interest is anticipated. A communications plan has been shared with FWS HQ External Affairs that includes outreach to congressional offices, local and state officials and stakeholders, a news release to media and posting information on social media is planned at time of publication in the *Federal Register*.

[*New*] Sonoyta mud turtle critical habitat – As early as June, FWS Southwest Region anticipates sending to the Federal Register a proposal to designate critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

[NEW] The Wildlife Management Institute's Outdoor Bulletin published a story about imperiled species conservation on private land performed under the auspices of Partners of for Fish and Wildlife Program, involving the FWS Fish and Aquatic Conservation and Wildlife and Sport Fish Restoration in concert with the New Mexico Department of Game and Fish. The Outdoor Bulletin

American Electric Power (AEP) draft Habitat Conservation Plan NOA– In May/June FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning to hold public meetings during the 60-day public comment period. A news bulletin has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

Federal Register Notice of Intent to analysis the approval of a Safe Harbor Agreement was published on April 3, 2018. The Applicant is Freeport-McMoRan and the Agreement will cover spikedace, loach minnow and Gila chub in Eagle Creek in Arizona. We anticipate drafting an Environmental Assessment, but this Agreement is in association with the construction on private lands of a fish barrier to promote recovery of the fish species in the Agreement. At this NOI stage, outreach is focused on the local area and is being conducted in coordination with Bureau of Reclamation and the applicant.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participant under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Black-footed ferret nonessential experimental population expansion in Arizona – As early as June, FWS in partnership with Arizona Game and Fish Department, will propose expanding the black-footed ferret 10(j) designation to include all current and historical ferret habitat in Arizona. The 1996 Arizona 10(j) area was limited to the Aubrey Valley Experimental Population Area (AVEPA); successful reintroductions and subsequent population expansions has resulted in ferrets venturing outside of the AVEPA (as fully protected status). FWS consultation with affected tribes has been initiated. FWS will coordinate with AGFD to best approach and inform Arizona grassland residents and industry (livestock) groups. Communication planning will be conducted.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

National Wildlife Refuge Actions

Nothing significant to report

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from a FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

[UPDATE] Mora National Fish Hatchery delivered 47,500 Gila trout eyed-eggs to the Arizona Game and Fish Department's Canyon Creek Hatchery and more coming soon. These eggs are surplus to what are needed for recovery purposes and are part of fulfilling a request for 100,000 eggs. About a year from now these eggs will turn into 12-inch trout that lucky anglers can fish for in select Arizona creeks. The eggs passed rigorous health testing performed by the Southwestern Fish Health Center based at the Southwestern Native Aquatic Resources and Recovery Center in Dexter, NM.

Sorry if I was confusing. I intended them to be 2 separate papers, or at least to separate the argument clearly. The Santa Ana provision is all that is needed to say we cant do anything there. The other arguments apply to places other than Santa Ana - if for example they want to build a wall at Lower Rio Grande. I'm not sure that is clear in this version.

Subject: Flexibility in FWS construction account

All,

The question has been posed as to the authority and the ability of FWS to use some of its FY 18 construction appropriations account funding to build resource protection structures along the US Mexican border. Apparently there is a 2 mile stretch of land in Texas that is in question.

Jean, can you please schedule a meeting on this topic with POB, FW&P, FWS, and (b)(6), (b)(7)(C) ?

Thanks,
Scott

FishBites Report

Another "First" for Threatened Gila Trout

Mora National Fish Hatchery and New Mexico Fish and Wildlife Conservation Office staff, working in partnership with the New Mexico Department of Game and Fish and U.S. Forest Service plowed new ground in Gila trout conservation. On April 18-19, a team of biologists planted 20,750 eyed Gila trout eggs into Sacaton and Little Dry creeks on the southwest flank of the Gila National Forest. The eggs were spawned at the hatchery. The streams within the native range of the trout were devoid of fish, making an ideal situation to plant eggs in gravely pools in redds built by the biologists. This method of planting Gila trout has never been tried. If successful, it may prove to be an efficient way of spreading the range of the rare trout perhaps further facilitating an eventual de-listing. The species went on a 50-year hiatus, closed to angling, until it was downlisted to threatened in 2006. The coppery-yellow trout offers unique angling opportunities.
New Mexico Department of Game and Fish; U.S. Forest Service.
New Mexico, Arizona.

Hagerman National Wildlife Refuge Turkey Hunters Successful

The annual spring gobbler hunt was held at Hagerman National Wildlife Refuge, April 20-22. By the numbers: 135 hunters applied, 25 permits were issued by random draw in January, and 22 hunters participated, 14 of whom harvested a gobbler. The hunt, now in its fifth year, is open to all ages and coincides with the season set by Texas Parks and Wildlife Department. All six hunt units on the refuge are open for hunting and hunters may select their preference.

Title/Issue	Anticipated Publication Date	Current Status
The Guardian	April 21, 2018	Region 2 was contacted by Mr. Jimmy Tobias regarding the listing of the Texas Hornshell. Mr. Tobias was looking for information regarding the process that led to the listing of the Texas hornshell including the six month extension.

Austin American Statesman	TBD	Jeremy Schwartz a reporter with the Austin American Statesman contacted R2 asking to interview some of our ocelot researchers regarding translocation efforts and genetic diversity.
InfoGraphic – Bats and White Nose Syndrome	TBD	Geoff Giller, a reporter with Infographic, contacted R2 requesting an interview/field visit to report on bats impacted by white-nose syndrome. The reporter has also spoken with the FWS WNS contacts in R5. Will visit OK March 21-22 to observe survey work.
Washington Post	April 22 (Earth Day)	Reporter featured recovery and desliting of the lesser long-nosed bat for Post's Earth Day feature. Interviewed FWS SME Scott Richardson.
Arizona *Prescott Courier* *Vail Voice* *West Valley View News* *Prescott eNews*	Wek of April 23	Coverage of the FWS-assisted Arizona Envirothon. High school environmental; education program and competition, featuring range management and black-footed ferrets and golden eagles.
Arizona Daily Star (Tucson)	TBD (April)	.Conservationists' concerns regarding Pima County Flood Control District sediment removal project in the Santa Cruz River. FWS contacting reporter to explain that the proposed project is covered under the Pima County MSCP.
Fishing Tackle Retailer	May 2018	Story covers WSFR-funded research that's revealing smallmouth bass habitat and behavior. http://fishingtackleretailer.com/radios-reveal-wandering-habits-smallmouth-bass/

Havasu News Herald	April 23	Asked about FWS involvement in boat inspections in and around Lake Havasu City, AZ. Reporter was informed FWS is not involved in boat inspections. Recommended he contact AZ Game & Fish.
New York Times	May 2018	Investigating early seasonal and drought drying of the Rio Grande. Reporter seeks to observe Rio Grande silvery minnow salvage as part of his story. R2 arranging for possible trip with reporter (Henry Fountain).

Week Ahead Schedule of Meetings, Hearings, and Travel

Immediate Announcements and Actions (within the next 14 days)

Kuenzler hedgehog cactus downlisting – FWS will finalize the downlisting of Kuenzler hedgehog cactus as early as April 2018. When first listed, only 200 plants from two locations were known. Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known population clusters within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild.

15-60 Day Look Ahead

In April or May, the FWS will release less than 14-day old captive-born Mexican wolf pups into established wild Mexican wolf dens on federal land in Arizona and New Mexico. Select reporters will be invited to attend. FWS will send a news release summarizing these cross-fostering efforts to media and stakeholders at the end of May or early June.

Upcoming Workshops & Meetings

Endangered Species Act Recovery Actions

[NEW] On April 18, 2018, four 10-day old Mexican wolf pups were removed from a captive litter at the Endangered Wolf Center in Eureka, Missouri and flown to Arizona. Two were inserted into a wild wolf pack's den in Arizona, and two were inserted into a wild den in New Mexico. The Interagency Field Team will monitor the recipient packs through the summer to determine the success of these cross-fostering actions.

[UPDATE] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is unknown, but anticipated as early as May. No controversy anticipated. Communications package is prepared.

Range-wide lesser prairie-chicken (LPC) Conservation Plan Annual Report. On March 31, 2018, the FWS received the Western Association of Fish and Wildlife Agencies (WAFWA) fourth annual report on implementation of the Lesser Prairie-Chicken Range-wide Conservation Plan in the near future. FWS will be providing a technical review of the report. FWS greatly appreciates the States' leadership in the conservation of the lesser prairie-chicken and implementation of the RWP. FWS remains committed to working collaboratively with WAFWA on implementing the plan, which is a key component in ongoing efforts to conserve the lesser prairie-chicken.

Draft Recovery Plan for Four Aquatic Invertebrates – FWS published a Notice of Availability of the draft recovery plan on April 2, 2018. The draft recovery plan for four aquatic invertebrates found in desert grasslands in southeast New Mexico and southwest Texas in March 2018 is available for public review and comment. Noel's amphipod, Pecos assiminea, Koster's springsnail, and Roswell springsnail were listed as endangered in 2005. The primary threats to all four species are threats to the quantity and quality of water. Activities, such as oil and gas drilling, water withdrawals from the aquifer and contamination are the greatest threats. Most occupied sites are on FWS Bitter Lake National Wildlife Refuge in New Mexico and The Nature Conservancy holdings in Texas.

Endangered Species Act Listing Actions

[*NEW*] - American Burying Beetle 12 month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska , Ohio, Oklahoma, Rhode Island, South Dakota , and Texas. This finding will likely be of interest to a

number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Tobusch fishhook cactus downlisting notice – In May, FWS will publish a final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved "fishhook" spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to downlist the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened. Local interest is anticipated. A communications plan has been shared with FWS HQ External Affairs that includes outreach to congressional offices, local and state officials and stakeholders, a news release to media and posting information on social media is planned at time of publication in the *Federal Register*.

[*New*] Sonoyta mud turtle critical habitat – As early as June, FWS Southwest Region anticipates sending to the Federal Register a proposal to designate critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

[NEW]: Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. Additionally, we are seeking comments on whether we should consider excluding Units 4 and 5 (both Rio Grande units) due to national security concerns. In total, the Service is considering the exclusion of 315 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in the Summer 2018. The public will have 45 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

[NEW] Central Texas mussels draft Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. FWS has completed a draft SSA report and provided it to peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts) for their expert review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

American Electric Power (AEP) draft Habitat Conservation Plan NOA– In May/June FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning to hold public meetings during the 60-day public comment period. A news bulletin has been drafted. Outreach,

including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

Federal Register Notice of Intent to analysis the approval of a Safe Harbor Agreement was published on April 3, 2018. The Applicant is Freeport-McMoRan and the Agreement will cover spikedace, loach minnow and Gila chub in Eagle Creek in Arizona. We anticipate drafting an Environmental Assessment, but this Agreement is in association with the construction on private lands of a fish barrier to promote recovery of the fish species in the Agreement. At this NOI stage, outreach is focused on the local area and is being conducted in coordination with Bureau of Reclamation and the applicant.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participant under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Black-footed ferret nonessential experimental population expansion in Arizona – As early as June, FWS in partnership with Arizona Game and Fish Department, will propose expanding the black-footed ferret 10(j) designation to include all current and historical ferret habitat in Arizona. The 1996 Arizona 10(j) area was limited to the Aubrey Valley Experimental Population Area (AVEPA); successful reintroductions and subsequent population expansions has resulted in ferrets venturing outside of the AVEPA (as fully protected status). FWS consultation with affected tribes has been initiated. FWS will coordinate with AGFD to best approach and inform Arizona grassland residents and industry (livestock) groups. Communication planning will be conducted.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional

interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

National Wildlife Refuge Actions

Nothing significant to report

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from a FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

Mora National Fish Hatchery delivered 47,500 Gila trout eyed-eggs to the Arizona Game and Fish Department's Canyon Creek Hatchery and more coming soon. These eggs are surplus to what are needed for recovery purposes and are part of fulfilling a request for 100,000 eggs.

About a year from now these eggs will turn into 12-inch trout that lucky anglers can fish for in select Arizona creeks. The eggs passed rigorous health testing performed by the Southwestern Fish Health Center based at the Southwestern Native Aquatic Resources and Recovery Center in Dexter, NM.

Migratory Birds

Tribal Consultation

The annual Tribal Fish, Wildlife and ESA Conservation Meeting will take place May 2, 2018, in Albuquerque, New Mexico. This meeting is a venue for the FWS in New Mexico to inform tribes of proposed and ongoing activities that may affect or otherwise be of interest to tribes; a forum for tribal feedback and discussion; and an opportunity for tribes, FWS, Bureau of Indian Affairs and other federal agencies to collaborate on conservation. The meeting is being sponsored by New Mexico ES and the BIA.

Upcoming public events in the Southwest			
Birding Festival	April 27-29, 2018	Balcones Canyonlands National Wildlife Refuge, Texas	
Natural Resource Journey	May 1-5	Wichita Mountains Wildlife Refuge	More than 700 fourth-grade school children are expected to participate in a week-long outdoor classroom.

"The mission of the U.S. Fish and Wildlife Service is, working with others, to conserve, protect, and enhance fish, wildlife and plants and their habitats for the continuing benefit of the American people"

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service

Through May 4, 2018

FishBites Report

TITLE	**VIRTUALLY WILD TEXAS REACHES STUDENTS STATEWIDE**
Topic	Students from 29 classrooms across the state of Texas participated in the Virtually Wild! Texas program on monarchs. The virtual program was conducted on the UT MD Anderson Cancer Center pocket prairie in the Texas Medical Center. Highlights included the life cycle and habitat needs of monarchs, as well as efforts by many communities to provide habitat for the species.
Supportive Stakeholders	Houston Community Partnerships and Engagement program, The Nature Conservancy, Katy Prairie Conservancy, Houston Wilderness, Monarch Gateway and Region 4 Education Service Center.
Impacted location	Houston

TITLE	**HOUSTON EDUCATORS LEARN ABOUT CAREERS IN CONSERVATION**
Topic	Fourteen Houston-area educators participated in the second of three ‘Externship’ tours provided by the Houston Community Partnerships and Engagement program and Furr High School. The educators toured the Anahuac National Wildlife Refuge and learned about the refuge, as well as options for students interested in a career in natural resources. The pilot program was established to introduce educators to conservation issues and future employment options for their students.

Supportive Stakeholders	Furr High School, Anahuac National Wildlife Refuge, Houston Community Partnerships and Engagement program.
Impacted location	Texas
TITLE	**ENDANGERED FISH USED FOR MOSQUITO CONTROL**
Topic	Last year, Pima County (Arizona), USFWS and Arizona Game and Fish Department began to distribute endangered Gila topminnow in stagnant swimming pools and fountains as a non-chemical remedy to mosquito outbreaks and disease (Zika, etc.) transmission. (This is permitted under a statewide Safe Harbor Agreement.) Cooperators presented the program at the 2018 AZ Vector Control Conference. The Pinal County Manager said it was a completely positive project, where the county uses fish for vector control, while helping out listed fish. Four additional counties and tribes are interested in participating. **Supportive stakeholders**: USFWS, Arizona Game and Fish Department, Pima, Pinal and Maricopa counties, Ak Chin Indian Community, Salt River Pima-Maricopa Indian Community, Gila River Indian Community and Maricopa County Vector Control
Impacted location	Southern Arizona

Title/Issue	**Anticipated Publication Date**	**Current Status**
Four Point News	Week of April 30th	Leslee Bassman, a reporter with Fourpoint News contacted R2 asking questions about the incidental take permit and draft Habitat Conservation Plan for the road being planned by the Leander ISD.

The Texas Observer	May 2nd or 3rd	Naveena Sadasivam a reporter with the Texas Observer contacted R2 asking questions regarding the Species Status Assessment for the four central Texas mussels currently under review.
InfoGraphic – Bats and White Nose Syndrome	TBD	Geoff Giller, a reporter with Infographic, contacted R2 requesting an interview/field visit to report on bats impacted by white-nose syndrome. The reporter has also spoken with the FWS WNS contacts in R5. Will visit OK March 21-22 to observe survey work.
Earth Island Journal	May 1, 2018	Developments in the Mexican wolf recovery program.
Sierra (Sierra Club Magazine)	May 4	Reporter featuring recovery and delisting of the lesser long-nosed bat. Seeking a fresh quote from FWS SME Scott Richardson.
Fishing Tackle Retailer	May 2018	Story covers WSFR-funded research that's revealing smallmouth bass habitat and behavior. http://fishingtackleretailer.com/radios-reveal-wandering-habits-smallmouth-bass/
New York Times	May 2018	Investigating early seasonal and drought drying of the Rio Grande. Reporter seeks to observe Rio Grande silvery minnow salvage as part of his story. R2 arranging for possible trip with reporter (Henry Fountain).
White Mountain Independent	May 2018	Reporter seeks information on Apache trout, Alchesay-Williams Creek NFH and Arizona Fish and Wildlife Conservation Office for feature on angling in White Mtns for seasonal glossy.

Week Ahead Schedule of Meetings, Hearings, and Travel
Nothing significant to report.

Immediate Announcements and Actions (within the next 14 days)

Kuenzler hedgehog cactus downlisting – FWS expects to finalize the downlisting of Kuenzler hedgehog cactus in early May 2018. When first listed, only 200 plants from two locations were known. Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known population clusters within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild.

15-60 Day Look Ahead
Nothing significant to report.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

[NEW] On April 18, 2018, four 10-day old Mexican wolf pups were removed from a captive litter at the Endangered Wolf Center in Eureka, Missouri and flown to Arizona. Two were inserted into a wild wolf pack's den in Arizona, and two were inserted into a wild den in New Mexico. The Interagency Field Team will monitor the recipient packs through the summer to determine the success of these cross-fostering actions.

[UPDATE] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is unknown, but anticipated as early as May. No controversy anticipated. Communications package is prepared.

Range-wide lesser prairie-chicken (LPC) Conservation Plan Annual Report. On March 31, 2018, the FWS received the Western Association of Fish and Wildlife Agencies (WAFWA) fourth annual report on implementation of the Lesser Prairie-Chicken Range-wide Conservation Plan in the near future. FWS will be providing a technical review of the report. FWS greatly appreciates the States' leadership in the conservation of the lesser prairie-chicken and

implementation of the RWP. FWS remains committed to working collaboratively with WAFWA on implementing the plan, which is a key component in ongoing efforts to conserve the lesser prairie-chicken.

Endangered Species Act Listing Actions

American Burying Beetle 12 month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska , Ohio, Oklahoma, Rhode Island, South Dakota , and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Tobusch fishhook cactus downlisting notice – In May, FWS will publish a final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved “fishhook” spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to downlist the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened. Local interest is anticipated. A communications plan has been shared with FWS HQ External Affairs that includes outreach to congressional offices, local and state officials and stakeholders, a news release to media and posting information on social media is planned at time of publication in the *Federal Register*.

Sonoyta mud turtle critical habitat – As early as June, FWS Southwest Region anticipates sending to the Federal Register a proposal to designate critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands.

The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. Additionally, we are seeking comments on whether we should consider excluding Units 4 and 5 (both Rio Grande units) due to national security concerns. In total, the Service is considering the exclusion of 315 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in the Summer 2018. The public will have 45 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Central Texas mussels draft Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. FWS has completed a draft SSA report and provided it to peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts) for their expert review. The goal of the SSA is

to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

American Electric Power (AEP) draft Habitat Conservation Plan NOA– In May/June FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning to hold public meetings during the 60-day public comment period. A news bulletin has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participants under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Black-footed ferret nonessential experimental population expansion in Arizona – This summer FWS, in cooperation with Arizona Game and Fish Department, will propose expanding the black-footed ferret 10(j) designation to include all current and historical ferret habitat in Arizona. The 1996 Arizona 10(j) area was limited to the Aubrey Valley Experimental Population Area (AVEPA); successful reintroductions and subsequent population expansions have resulted in ferrets venturing outside of the AVEPA (as fully protected status). FWS consultation with affected tribes has been initiated. FWS will coordinate with AGFD to best approach and inform Arizona grassland residents and industry (livestock) groups. Communication planning will be conducted.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives.

We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

National Wildlife Refuge Actions

[NEW]: Ryan Hunt, Senate Interior Appropriations Committee Member, visited Valle de Oro National Wildlife Refuge in Albuquerque, New Mexico on Monday, April 30. Ryan received an update on a variety of Refuge topics and issues including habitat restoration, site plans, partnerships, Visitor Center & Main Office building construction plans, recreation opportunities, access, and community engagement. Ryan toured the Refuge to see firsthand how it has evolved over the past three years and viewed on the ground restoration work.

[NEW]: Olivia Ferriter, DOI Deputy Assistant Secretary Budget, Finance, Performance & Acquisition, visited Bosque del Apache National Wildlife Refuge in central New Mexico on May 1. Olivia toured the Refuge getting an on the ground look at habitat management, water issues, public access, and Refuge programs. Some Regional level issues were discussed including the Region's Heavy Equipment Districts, which efficiently share equipment and resources among area national wildlife refuges in an effort to increase utilization of equipment, reduce fleet sizes, reduce costs, and improve training for equipment operators.

[NEW] Bill Williams River National Wildlife Refuge worked with numerous partners to improve wildlife habitat on the Refuge. Taking advantage of an Army Corps of Engineers water release from a local reservoir into the Bill Williams River, the Refuge and its partners planted more than 3,400 cottonwood seedlings and seeds along the river and its floodplain. The Bureau of Reclamation provided the seedlings. Refuge staff, U.S. Geological Survey staff, and members of the Refuge Friends Group volunteered to plant all the seedlings. The trees stabilize stream banks and slow natural flood events which reduces soil erosion. They provide cover and nesting habitat for many species of birds including endangered southwestern willow flycatchers and western yellow-billed cuckoos. As the trees mature they will provide shading which in turn improves habitat for fish species.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from an FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road

Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

Mora National Fish Hatchery delivered 47,500 Gila trout eyed-eggs to the Arizona Game and Fish Department's Canyon Creek Hatchery and more coming soon. These eggs are surplus to what is needed for recovery purposes and are part of fulfilling a request for 100,000 eggs. About a year from now these eggs will turn into 12-inch trout that lucky anglers can fish for in select Arizona creeks. The eggs passed rigorous health testing performed by the Southwestern Fish Health Center based at the Southwestern Native Aquatic Resources and Recovery Center in Dexter, NM.

Tribal Consultation

The annual Tribal Fish, Wildlife, and ESA Conservation Meeting will take place May 2, 2018, in Albuquerque, New Mexico. This meeting is a venue for the FWS in New Mexico to inform tribes of proposed and ongoing activities that may affect or otherwise be of interest to tribes; a forum for tribal feedback and discussion; and an opportunity for tribes, FWS, Bureau of Indian Affairs and other federal agencies to collaborate on conservation. The meeting is being sponsored by New Mexico ES and the BIA.

U.S. Fish and Wildlife Service

Through May 11, 2018

FishBites Report

TITLE	**FIRST CATCH FAMILY FISH CAMP**
Topic	The event was held at Adolph Thomae Jr. County Park which lies within Laguna Atascosa National Wildlife Refuge. Thirty youth, eighteen adults, and seven Texas Parks & Wildlife Department (TPWD) Angler Education instructors, and two TPWD Statewide Certified Volunteers worked together to make the camp a success on Saturday, April 21. Participants received the New TPWD Rules and Regulations Guide, Basic Guide for the Beginning Angler, a Texas Freshwater Fish Identification Pocket Guide, a laminated Fresh & Saltwater Fish ID card, a Red Drum Jr. Angler pin, a certificate, lots of information about fishing and boat safety, fishing and boat safety, and how to stop the spread of invasive species. But best of all, they learned how to fish. Congratulations to the new anglers!
Supportive Stakeholders	U.S. Fish and Wildlife Service, Texas Parks & Wildlife Department, Cameron County, Cameron County Parks and Recreation,
Impacted location	South Texas

Title/Issue	Anticipated Publication Date	Current Status
Illegal Wildlife Trade	TBD	Reporter for The Monitor in Texas is looking to do a series of reports on the illegal wildlife trade and any impacts in south Texas
Associated Press (Phx Bur)	May 7, 2018	Sought comment no CBD's notice of intent to sue on "not warranted" listing determination for the roundtail chub. FWS does not comment on intended or active litigation. Did provide context of our listing determination under background.
60 Minutes *Zoo breeding program (Wolf)*	Sunday, June 13th	60 minutes is preparing to air a segment on breeding programs in zoos. Filming and interviews were completed in June 2017. The Mexican wolf recovery program was featured during one interview as a good example of how zoos help recovery of species. The film crew captured video of pups born in captivity that were later part of a cross-fostering effort. FWS was contacted for background information and R2 supplied producers with photos and video of Mexican wolves.
InfoGraphic – Bats and White Nose Syndrome	TBD	Geoff Giller, a reporter with Infographic, contacted R2 requesting an interview/field visit to report on bats impacted by white-nose syndrome. The reporter has also spoken with the FWS WNS contacts in R5. Will visit OK March 21-22 to observe survey work.

Fishing Tackle Retailer	May 2018	Story covers WSFR-funded research that's revealing smallmouth bass habitat and behavior. http://fishingtackleretailer.com/radios-reveal-wandering-habits-smallmouth-bass/
New York Times	May 2018	Investigating early seasonal and drought drying of the Rio Grande. Reporter seeks to observe Rio Grande silvery minnow salvage as part of his story. R2 arranging for possible trip with reporter (Henry Fountain).
White Mountain Independent	May 2018	Reporter seeks information on Apache trout, Alchesay-Williams Creek NFH and Arizona Fish and Wildlife Conservation Office for feature on angling in White Mtns for seasonal glossy.
DOI LE Officers to assist with Border Security	Unknown	Reporter from KRGV TV inquired about DOI and FWS LE being sent to border. Referred him to DOI Press email as directed by FWS HQ

Week Ahead Schedule of Meetings, Hearings, and Travel

Nothing significant to report.

Immediate Announcements and Actions (within the next 14 days)

Tobusch fishhook cactus downlisting notice – On May 15th, FWS will publish a final downlisting notice for the Tobusch fishhook cactus, a small cactus, with curved "fishhook" spines, that is endemic to the Edwards Plateau of Texas. FWS received a petition in 2013 to downlist the Tobusch fishhook cactus based on the findings of our 2010 5-year review. A substantial 90-day finding on the petitions was published on September 9, 2013. In November 2015, one of the petitioners filed a complaint on the lack of a 12-month finding and on December 29, 2016, FWS published a proposal to downlist the species from endangered to threatened. Local interest is anticipated. A communications plan has been shared with FWS HQ External Affairs that includes outreach to congressional offices, local and state officials and stakeholders, a news release to media and posting information on social media is planned at time of publication in the *Federal Register*.

15-60 Day Look Ahead
Nothing significant to report.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

[NEW] On April 18, 2018, four 10-day old Mexican wolf pups were removed from a captive litter at the Endangered Wolf Center in Eureka, Missouri and flown to Arizona. Two were inserted into a wild wolf pack's den in Arizona, and two were inserted into a wild den in New Mexico. The Interagency Field Team will monitor the recipient packs through the summer to determine the success of these cross-fostering actions. Additional cross fostering actions may take place in May. News Release is scheduled once all actions are completed.

[UPDATE] Kuenzler hedgehog cactus downlisting – On May 10, FWS announced the expects to finalize the downlisting of Kuenzler hedgehog cactus in early May 2018. When first listed, only 200 plants from two locations were known. Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known population clusters within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild.

[UPDATE] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is unknown, but anticipated in May. No controversy anticipated. Communications package is prepared.

Range-wide lesser prairie-chicken (LPC) Conservation Plan Annual Report. On March 31, 2018, the FWS received the Western Association of Fish and Wildlife Agencies (WAFWA) fourth annual report on implementation of the Lesser Prairie-Chicken Range-wide Conservation Plan in the near future. FWS will be providing a technical review of the report. FWS greatly appreciates the States' leadership in the conservation of the lesser prairie-chicken and implementation of the RWP. FWS remains committed to working collaboratively with WAFWA on implementing the plan, which is a key component in ongoing efforts to conserve the lesser prairie-chicken.

Endangered Species Act Listing Actions

[*NEW*] - Dunes Sagebrush Lizard Petition to List and Designate Critical Habitat - On May 8, 2018, FWS received a petition from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a rigorous status review.

American Burying Beetle 12 month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Sonoyta mud turtle critical habitat – As early as June, FWS Southwest Region anticipates sending to the Federal Register a proposal to designate critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions

and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. Additionally, we are seeking comments on whether we should consider excluding Units 4 and 5 (both Rio Grande units) due to national security concerns. In total, the Service is considering the exclusion of 315 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in the Summer 2018. The public will have 45 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Central Texas mussels draft Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. FWS has completed a draft SSA report and provided it to peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts) for their expert review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

American Electric Power (AEP) draft Habitat Conservation Plan NOA– In May/June FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning to hold public meetings during the 60-day public comment period. A news bulletin has been drafted. Outreach,

including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participants under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Black-footed ferret nonessential experimental population expansion in Arizona – This summer FWS, in cooperation with Arizona Game and Fish Department, will propose expanding the black-footed ferret 10(j) designation to include all current and historical ferret habitat in Arizona. The 1996 Arizona 10(j) area was limited to the Aubrey Valley Experimental Population Area (AVEPA); successful reintroductions and subsequent population expansions have resulted in ferrets venturing outside of the AVEPA (as fully protected status). FWS consultation with affected tribes has been initiated. FWS will coordinate with AGFD to best approach and inform Arizona grassland residents and industry (livestock) groups. Communication planning underway.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

National Wildlife Refuge Actions

[NEW] The Service is proposing to continue and expand public hunting opportunities on Sevilleta National Wildlife Refuge in central New Mexico, by adding a new hunt unit and adding new species that can be hunted. Unit A and Unit B would continue to be open to hunting

mourning dove, white-winged dove, geese, ducks and coots, while a new unit, the Rio Puerco Unit, would be opened to hunting mourning dove, white-winged dove and Gambel's quail. In addition, all three units would be open to hunting Eurasian collared-dove. Unit A is 129 acres in size, with approximately 70 acres of open water; Unit B is 163 acres, with 50 acres of open water. The proposed new unit is 590 acres in size and is adjacent to the Rio Puerco. The newly revised Sevilleta NWR Hunt Plan, Environmental Assessment (EA), and Compatibility Determination (CD) are available for public comment until June 1, 2018.

Ryan Hunt, Senate Interior Appropriations Committee Member, visited Valle de Oro National Wildlife Refuge in Albuquerque, New Mexico on Monday, April 30. Ryan received an update on a variety of Refuge topics and issues including habitat restoration, site plans, partnerships, Visitor Center & Main Office building construction plans, recreation opportunities, access, and community engagement. Ryan toured the Refuge to see firsthand how it has evolved over the past three years and viewed on the ground restoration work.

Olivia Ferriter, DOI Deputy Assistant Secretary Budget, Finance, Performance & Acquisition, visited Bosque del Apache National Wildlife Refuge in central New Mexico on May 1. Olivia toured the Refuge getting an on the ground look at habitat management, water issues, public access, and Refuge programs. Some Regional level issues were discussed including the Region's Heavy Equipment Districts, which efficiently share equipment and resources among area national wildlife refuges in an effort to increase utilization of equipment, reduce fleet sizes, reduce costs, and improve training for equipment operators.

Bill Williams River National Wildlife Refuge worked with numerous partners to improve wildlife habitat on the Refuge. Taking advantage of an Army Corps of Engineers water release from a local reservoir into the Bill Williams River, the Refuge and its partners planted more than 3,400 cottonwood seedlings and seeds along the river and its floodplain. The Bureau of Reclamation provided the seedlings. Refuge staff, U.S. Geological Survey staff, and members of the Refuge Friends Group volunteered to plant all the seedlings. The trees stabilize stream banks and slow natural flood events which reduces soil erosion. They provide cover and nesting habitat for many species of birds including endangered southwestern willow flycatchers and western yellow-billed cuckoos. As the trees mature they will provide shading which in turn improves habitat for fish species.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from an FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a

portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

Mora National Fish Hatchery delivered 47,500 Gila trout eyed-eggs to the Arizona Game and Fish Department's Canyon Creek Hatchery and more coming soon. These eggs are surplus to what is needed for recovery purposes and are part of fulfilling a request for 100,000 eggs. About a year from now these eggs will turn into 12-inch trout that lucky anglers can fish for in select Arizona creeks. The eggs passed rigorous health testing performed by the Southwestern Fish Health Center based at the Southwestern Native Aquatic Resources and Recovery Center in Dexter, NM.

Nothing significant to report.

Wildlife and Sport Fish Restoration

Nothing significant to report.

Tribal Consultation

The annual Tribal Fish, Wildlife, and ESA Conservation Meeting took place May 2, 2018, in Albuquerque, New Mexico. This meeting is a venue for the FWS in New Mexico to inform tribes of proposed and ongoing activities that may affect or otherwise be of interest to tribes; a forum for tribal feedback and discussion; and an opportunity for tribes, FWS, Bureau of Indian Affairs and other federal agencies to collaborate on conservation. The meeting is being sponsored by New Mexico ES and the BIA.

Upcoming public events in the Southwest			
Virtually Wild Texas	16 May	Brazoria National Wildlife Refuge	950 second to fifth grade students from across Texas are registered for a virtual tour of the refuge and engage with a hognose snake and a 5' alligator, and learn how they have evolved to adapt to their environments
Connecting People with Nature	12 May	Hagerman National Wildlife Refuge Visitor Center	Master Naturalist Jack Chiles will lead the Early Bird walk for May, weather permitting. Meet at the Visitor Center. Bring binoculars or borrow ours. Return in time for the Second Saturday program.

"The mission of the U.S. Fish and Wildlife Service is, working with others, to conserve, protect, and enhance fish, wildlife and plants and their habitats for the continuing benefit of the American people"

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service

Through May 18, 2018

FishBites Report

TITLE	Guided Bird Walks
Topic	Balcones Canyonlands National Wildlife Refuge in Texas is hosting guided bird walks during the month of May to encourage people to visit the Refuge and to learn how to enjoy the art of bird watching. The walks are geared for all skill level of bird watchers and families and take place during the peak of songbird migration through Texas. The Refuge supplies gear including binoculars and field guides so all participants need to do to participate is show up. The walks are led by a volunteer who is skilled birder that is interested is sharing his passion for the Refuge and wildlife with others.
Supportive Stakeholders	U.S Fish and Wildlife Service, local communities, local birding clubs, outdoor enthusiasts.
Impacted location	Austin, Texas area.
TITLE	Native Fish in the Classroom - Gila trout
Topic	The U.S. Fish and Wildlife Service's New Mexico Fish and Wildlife Conservation Office in partnership with San Lorenzo and Harrison Schmidt elementary schools released Gila trout into Lake Roberts on May 17, 2018. The elementary students raised and cared for the trout from the egg-stage in their classrooms. The children shared poems crafted about the learning experience. The children visited learning stations where they were taught about water quality and other aquatic life in the Gila and other conservation matters. Mora National Fish Hatchery delivered 223 retired brood stock Gila trout to Lake Roberts as well. The students helped release those fish, some as long as 22 inches. These trout

	were stocked ahead of the 7th Annual Aldo Leopold Kids Fishing Derby, slated for June 2.
Supportive Stakeholders	Silver City Schools, New Mexico Department of Game and Fish, Gila National Forest
Impacted location	Southwest New Mexico

Title/Issue	**Anticipated Publication Date**	**Current Status**
Silver City Daily Press	TBD	Christine Steele is looking to do a story on Gila trout -- Native Fish in the Classroom and propagation at Mora National Fish Hatchery.
Illegal Wildlife Trade	TBD	Update: Reporter was forwarded to Lead FWS PAO on illegal wildlife trade. Reporter for The Monitor in Texas is looking to do a series of reports on the illegal wildlife trade and any impacts in south Texas
Downlisting of the Tobusch fishhook cactus	May 16	Becky Fogel from the Texas Standard Newscast is doing a story on the conservation efforts for the Tobusch fishhook cactus and the final downlisting of the species.
Mexican wolves surviving in Mexico	May 13	Reporter Alex Devoid from the Arizona Republic writes about the challenges of recovering Mexican wolves in Mexico.

InfoGraphic – Bats and White Nose Syndrome	TBD	Geoff Giller, a reporter with Infographic, contacted R2 requesting an interview/field visit to report on bats impacted by white-nose syndrome. The reporter has also spoken with the FWS WNS contacts in R5. Will visit OK March 21-22 to observe survey work.
Fishing Tackle Retailer	May 2018	Story covers WSFR-funded research that's revealing smallmouth bass habitat and behavior. http://fishingtackleretailer.com/radios-reveal-wandering-habits-smallmouth-bass/
New York Times	May 2018	Investigating early seasonal and drought drying of the Rio Grande. Reporter seeks to observe Rio Grande silvery minnow salvage as part of his story. R2 arranging for possible trip with reporter (Henry Fountain).
White Mountain Independent	May 2018	Reporter seeks information on Apache trout, Alchesay-Williams Creek NFH and Arizona Fish and Wildlife Conservation Office for feature on angling in White Mtns for seasonal glossy.
DOI LE Officers to assist with Border Security	Unknown	Reporter from KRGV TV inquired about DOI and FWS LE being sent to border. Referred him to DOI Press email as directed by FWS HQ
Bloomberg Law for American Association of State Highway and Transportation Officials (AASHTO)	TBD	Reporter interviewed Texas Field Supervisor (Austin) and Botanist for a newsletter or online case-study publicizing how Texas Department of Transportation contributed to the recovery (downlisting) of the Tobusch fishhook cactus (and other plants).

The Arizona Republic	TBD	Army Corps of Engineers and the U.S. Fish and Wildlife Service section 7 consultation regarding large southern Arizona development - Villages at Vigneto.

Week Ahead Schedule of Meetings, Hearings, and Travel
Nothing significant to report.

Immediate Announcements and Actions (within the next 14 days)

[NEW] As early as May 21, The New Mexico Office of Natural Resources Trustee (ONRT), the Department of Agriculture (represented by the Forest Service), and the Department of the Interior (represented by FWS and the Bureau of Land Management) (collectively, the "Trustees"), will announce a final Restoration Plan and Environmental Assessment for the Chevron Mining Inc, Questa Mine in northern New Mexico. The Site is located five miles east of the Village of Questa, adjacent to the Red River and also includes mine tailing ponds located approximately nine miles west of the mine. The Site is the location of a large groundwater contamination that will require treatment in perpetuity to mitigate human health risks. That treatment will use natural resource damages settlement funds ($4,000,000) for the restoration, rehabilitation, replacement, or acquisition of equivalent natural resources and services that were injured by the release of hazardous substances from the Site. (R2 Southwest Region)

15-60 Day Look Ahead
Nothing significant to report.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

UPDATE On May 21, 2018, four Mexican wolf pups were removed from a captive litter at the Endangered Wolf Center in Eureka, Missouri and flown to New Mexico. All four pups were inserted into 2 different wild wolf pack dens in New Mexico. The Interagency Field Team will monitor the recipient packs through the summer to determine the success of these cross-fostering actions. News release is scheduled for the week of May 21st.

Kuenzler hedgehog cactus downlisting – On May 10, FWS announced the downlisting of Kuenzler hedgehog cactus. When first listed, only 200 plants from two locations were known.

Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known population clusters within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild.

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is unknown, but anticipated in May. No controversy anticipated. Communications package is prepared.

Range-wide lesser prairie-chicken (LPC) Conservation Plan Annual Report. On March 31, 2018, the FWS received the Western Association of Fish and Wildlife Agencies (WAFWA) fourth annual report on implementation of the Lesser Prairie-Chicken Range-wide Conservation Plan in the near future. FWS will be providing a technical review of the report. FWS greatly appreciates the States' leadership in the conservation of the lesser prairie-chicken and implementation of the RWP. FWS remains committed to working collaboratively with WAFWA on implementing the plan, which is a key component in ongoing efforts to conserve the lesser prairie-chicken.

Endangered Species Act Listing Actions

Dunes Sagebrush Lizard Petition to List and Designate Critical Habitat - On May 8, 2018, FWS received a petition from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a rigorous status review.

American Burying Beetle 12 month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including

issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Sonoyta mud turtle critical habitat – As early as June, FWS Southwest Region anticipates sending to the Federal Register a proposal to designate critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

[NEW] - Western Travis County Public Utility Agency Draft Habitat Conservation Plan – FWS will publish on May 21 in the *Federal Register*, a Notice of Availability for the Western Travis County Public Utility Agency's (WTCPUA) Habitat Conservation Plan (HCP) and their application for an incidental take permit (ITP) in Texas. WTCPUA is preparing to construct a 2.2 mile secondary water pipeline near its existing water transmission main for redundancy and parallel capacity. Construction, operations and maintenance of the Raw Water Transmission Main could impact the federally listed endangered golden-cheeked warbler. If approved the term of the HCP and ITP would be 30 years. A news bulletin will be shared with local congressionals, partners and media.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River

(9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. Additionally, we are seeking comments on whether we should consider excluding Units 4 and 5 (both Rio Grande units) due to national security concerns. In total, the Service is considering the exclusion of 315 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in the Summer 2018. The public will have 45 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Central Texas mussels draft Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. FWS has completed a draft SSA report and provided it to peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts) for their expert review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

American Electric Power (AEP) draft Habitat Conservation Plan NOA– In May/June FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning to hold public meetings during the 60-day public comment period. A news bulletin has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participants under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Black-footed ferret nonessential experimental population expansion in Arizona – This summer FWS, in cooperation with Arizona Game and Fish Department, will propose expanding the black-footed ferret 10(j) designation to include all current and historical ferret habitat in Arizona. The 1996 Arizona 10(j) area was limited to the Aubrey Valley Experimental Population Area (AVEPA); successful reintroductions and subsequent population expansions have resulted in ferrets venturing outside of the AVEPA (as fully protected status). FWS consultation with affected tribes has been initiated. FWS will coordinate with AGFD to best approach and inform Arizona grassland residents and industry (livestock) groups. Communication planning underway.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

National Wildlife Refuge Actions

The Service is proposing to continue and expand public hunting opportunities on Sevilleta National Wildlife Refuge in central New Mexico, by adding a new hunt unit and adding new species that can be hunted. Unit A and Unit B would continue to be open to hunting mourning dove, white-winged dove, geese, ducks and coots, while a new unit, the Rio Puerco Unit, would be opened to hunting mourning dove, white-winged dove and Gambel's quail. In addition, all three units would be open to hunting Eurasian collared-dove. Unit A is 129 acres in size, with approximately 70 acres of open water; Unit B is 163 acres, with 50 acres of open water. The proposed new unit is 590 acres in size and is adjacent to the Rio Puerco. The newly revised Sevilleta NWR Hunt Plan, Environmental Assessment (EA), and Compatibility Determination (CD) are available for public comment until June 1, 2018.

Ryan Hunt, Senate Interior Appropriations Committee Member, visited Valle de Oro National Wildlife Refuge in Albuquerque, New Mexico on Monday, April 30. Ryan received an update

on a variety of Refuge topics and issues including habitat restoration, site plans, partnerships, Visitor Center & Main Office building construction plans, recreation opportunities, access, and community engagement. Ryan toured the Refuge to see firsthand how it has evolved over the past three years and viewed on the ground restoration work.

Olivia Ferriter, DOI Deputy Assistant Secretary Budget, Finance, Performance & Acquisition, visited Bosque del Apache National Wildlife Refuge in central New Mexico on May 1. Olivia toured the Refuge getting an on the ground look at habitat management, water issues, public access, and Refuge programs. Some Regional level issues were discussed including the Region's Heavy Equipment Districts, which efficiently share equipment and resources among area national wildlife refuges in an effort to increase utilization of equipment, reduce fleet sizes, reduce costs, and improve training for equipment operators.

Bill Williams River National Wildlife Refuge worked with numerous partners to improve wildlife habitat on the Refuge. Taking advantage of an Army Corps of Engineers water release from a local reservoir into the Bill Williams River, the Refuge and its partners planted more than 3,400 cottonwood seedlings and seeds along the river and its floodplain. The Bureau of Reclamation provided the seedlings. Refuge staff, U.S. Geological Survey staff, and members of the Refuge Friends Group volunteered to plant all the seedlings. The trees stabilize stream banks and slow natural flood events which reduces soil erosion. They provide cover and nesting habitat for many species of birds including endangered southwestern willow flycatchers and western yellow-billed cuckoos. As the trees mature they will provide shading which in turn improves habitat for fish species.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from an FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers

on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

"The mission of the U.S. Fish and Wildlife Service is, working with others, to conserve, protect, and enhance fish, wildlife and plants and their habitats for the continuing benefit of the American people"

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service

Through May 25, 2018

FishBites Report

TITLE:	Fishing with Veterans
Topic	Wichita Mountains Wildlife Refuge hosted seventeen veterans from the Norman Veterans Center, Norman, OK on May 15, 2018. The majority of these veterans fought in the Korean and Vietnam wars. Many shared stories of their sacrifices while serving our country. They enjoyed their tour of the refuge, wildlife viewing and learning about medicinal & edible plants.
Supportive Stakeholders	Norman Veterans Center, Norman OK
Impacted location	Lawton, OK area.

TITLE:	Fishing with La Sill Optimist Club
Topic	Wichita Mountains Wildlife Refuge hosted the years second La Sill Optimist Fishing event of the season on May 12, 2018. The youth fishing event was held at the Lake Elmer Thomas fishing pier. Forty-three youth, ranging in age from 2 to 14 years, participated in the four hour event. Stiff winds limited the success of the anglers, but most of the participants were lucky enough to hook between 2 and 3 sunfish each. One participant even snagged a catfish weighing over 2 pounds, which stole the show. A great time was had by all while introducing new youth to fishing.
Supportive Stakeholders	U.S Fish and Wildlife Service, Friends of the Wichitas, La Sill Optimist Club
Impacted location	Lawton, OK area.

TITLE:	Fishing with Theta Chi Sigma
Topic	On May 19th, Wichita Mountains Wildlife Refuge partnered with the Phi Beta Sigma Fraternity to sponsor a day of fishing and interpretation for the Sigma Beta Club. The Phi Beta Sigma Fraternity has been an influential organization in the African American Community whose members have distinguished themselves in the areas of civil rights, the sciences, the arts and culture. In addition to its founding principles of Brotherhood, Scholarship and Service, Sigma established Sigma Beta Clubs (its youth affiliate arm) in the early 1950 through its Alumni chapters levels focused on issues that impact African American youth and communities. Building on a MOU between the Phi Beta Sigma Fraternity and the U.S. Fish and Wildlife Service, the Wichita Mountains and the local Sigma Chapter were able to introduce Sigma members to wildlife conservation and management issues, outdoor recreation and career opportunities with the Fish and Wildlife Service. Sigma members were also given an opportunity to take part in a Special Use Area fishing outing. The majority of the group had never fished before and the members that had fished before said "I have never experienced anything like this before, this place is amazing." A total of 15 Sigma members experiences the Refuge and were able to connect with the outdoors and the Refuge.
Supportive Stakeholders	U.S Fish and Wildlife Service, Friends of the Wichitas, Phi Beta Sigma Fraternity.
Impacted location	Lawton, OK area.
TITLE:	Career Day for Middle School Students
Topic	Wichita Mountains Wildlife Refuge Law Enforcement and Visitor Services staff participated in Career Day at Central Middle School in Lawton, OK on May 21, 2018. More than 200 eighth-grade students spent their school day learning about possible career opportunities, educational requirements and gathering helpful tips

	on how to land their dream job. Students gained insight from professionals in a wide array of career fields, including Armed Forces, Broadcasting, Accounting, Emergency Medical Technician, Corrections, Banking, Nursing, Oil and Gas Consulting, Biologist and Federal Wildlife Officer.
Supportive Stakeholders	Lawton Public School District
Impacted location	Lawton, OK area
TITLE:	Free Family Fishing Day Event
Topic	Trinity River National Wildlife Refuge near Houston, Texas along with the Friends of Trinity River Refuge will be hosting their annual "Free Family Fishing Day" on Saturday, June 2, 2018 from 9:00am - 11:00am at the Champion Lake Public Use Area on the Refuge. It is the one day in the state of Texas that anyone can fish or crab without a license on public waters. The Refuge will have fishing poles and bait available free of charge for those who need it along with experienced anglers who can assist the public with baiting hooks and casting techniques. The event is free and open to the public. All ages are invited and encouraged to attend.
Supportive Stakeholders	U.S. Fish and Wildlife Service, Friends of Trinity River Refuge, Texas Parks & Wildlife Department, angling community, community of Liberty, Texas, other local communities.
Impacted location	Liberty, Texas and regional Houston, Texas area
TITLE	Native Fish in the Classroom - Gila trout
Topic	The U.S. Fish and Wildlife Service's New Mexico Fish and Wildlife Conservation Office in partnership with San Lorenzo and Harrison Schmidt elementary schools released of Gila trout into Lake Roberts on May 17, 2018. The elementary students raised and cared for the trout from the egg-stage in their classrooms. The children shared poems crafted about the learning experience. The children visited learning stations where they were taught about

	water quality and other aquatic life in the Gila and other conservation matters. Mora National Fish Hatchery delivered 223 retired brood stock Gila trout to Lake Roberts as well. The students helped release those fish, some as long as 22 inches. These trout were stocked ahead of the 7th Annual Aldo Leopold Kids Fishing Derby, slated for June 2.
Supportive Stakeholders	Silver City Schools, New Mexico Department of Game and Fish, Gila National Forest
Impacted location	Southwest New Mexico

Media Activity

Title/Issue	**Anticipated Publication Date**	**Current Status**
Silver City Daily Press	TBD	Christine Steele is looking to do a story on Gila trout -- Native Fish in the Classroom and propagation at Mora National Fish Hatchery.
Illegal Wildlife Trade	TBD	Update: Reporter was forwarded to Lead FWS PAO on illegal wildlife trade. Reporter for The Monitor in Texas is looking to do a series of reports on the illegal wildlife trade and any impacts in south Texas
Downlisting of the Tobusch fishhook cactus	May 16	Becky Fogel from the Texas Standard Newscast is doing a story on the conservation efforts for the Tobusch fishhook cactus and the final downlisting of the species.

Mexican Wolves Cross Foster in New Mexico	May 20	Albuquerque Journal Reporter Maddy Hayden travels to the Gila National Forest to witness USFWS Mexican wolf recovery team conduct a cross foster event. https://www.abqjournal.com/1174454/bundles-of-hope.html
InfoGraphic – Bats and White Nose Syndrome	TBD	Geoff Giller, a reporter with Infographic, contacted R2 requesting an interview/field visit to report on bats impacted by white-nose syndrome. The reporter has also spoken with the FWS WNS contacts in R5. Will visit OK March 21-22 to observe survey work.
Fishing Tackle Retailer	May 2018	Story covers WSFR-funded research that's revealing smallmouth bass habitat and behavior. http://fishingtackleretailer.com/radios-reveal-wandering-habits-smallmouth-bass/
New York Times	May 2018	Investigating early seasonal and drought drying of the Rio Grande. Reporter seeks to observe Rio Grande silvery minnow salvage as part of his story. R2 arranging for possible trip with reporter (Henry Fountain).
White Mountain Independent	May 2018	Reporter seeks information on Apache trout, Alchesay-Williams Creek NFH and Arizona Fish and Wildlife Conservation Office for feature on angling in White Mtns for seasonal glossy.
Bloomberg Law for American Association of State Highway and Transportation Officials (AASHTO)	May 21	Reporter interviewed Texas Field Supervisor (Austin) and Botanist for a newsletter or online case-study publicizing how Texas Department of Transportation contributed to the recovery (downlisting) of the Tobusch fishhook cactus (and other plants).

The Arizona Republic	TBD	Army Corps of Engineers and the U.S. Fish and Wildlife Service section 7 consultation regarding large southern Arizona development - Villages at Vigneto.

Week Ahead Schedule of Meetings, Hearings, and Travel
Nothing significant to report.

Immediate Announcements and Actions (within the next 14 days)

[NEW] As early as May 21, The New Mexico Office of Natural Resources Trustee (ONRT), the Department of Agriculture (represented by the Forest Service), and the Department of the Interior (represented by FWS and the Bureau of Land Management) (collectively, the "Trustees"), will announce a final Restoration Plan and Environmental Assessment for the Chevron Mining Inc, Questa Mine in northern New Mexico. The Site is located five miles east of the Village of Questa, adjacent to the Red River and also includes mine tailing ponds located approximately nine miles west of the mine. The Site is the location of a large groundwater contamination that will require treatment in perpetuity to mitigate human health risks. That treatment will use natural resource damages settlement funds ($4,000,000) for the restoration, rehabilitation, replacement, or acquisition of equivalent natural resources and services that were injured by the release of hazardous substances from the Site. (R2 Southwest Region)

15-60 Day Look Ahead
Nothing significant to report.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

UPDATE On May 14, 2018, four Mexican wolf pups were removed from a captive litter at the Endangered Wolf Center in Eureka, Missouri and flown to New Mexico. All four pups were inserted into 2 different wild wolf pack's den in New Mexico., The Interagency Field Team will monitor the recipient packs through the summer to determine the success of these cross-fostering actions. News release is scheduled for the week of May 21st.

Kuenzler hedgehog cactus downlisting – On May 10, FWS announced the expects to finalize the downlisting of Kuenzler hedgehog cactus in early May 2018. When first listed, only 200 plants

from two locations were known. Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known population clusters within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild.

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is unknown, but anticipated in May. No controversy anticipated. Communications package is prepared.

Range-wide lesser prairie-chicken (LPC) Conservation Plan Annual Report. On March 31, 2018, the FWS received the Western Association of Fish and Wildlife Agencies (WAFWA) fourth annual report on implementation of the Lesser Prairie-Chicken Range-wide Conservation Plan in the near future. FWS will be providing a technical review of the report. FWS greatly appreciates the States' leadership in the conservation of the lesser prairie-chicken and implementation of the RWP. FWS remains committed to working collaboratively with WAFWA on implementing the plan, which is a key component in ongoing efforts to conserve the lesser prairie-chicken.

Endangered Species Act Listing Actions

Dunes Sagebrush Lizard Petition to List and Designate Critical Habitat - On May 8, 2018, FWS received a petition from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a rigorous status review.

American Burying Beetle 12 month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that

includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Sonoyta mud turtle critical habitat – As early as June, FWS Southwest Region anticipates sending to the Federal Register a proposal to designate critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. Additionally, we are seeking comments on whether we should consider excluding Units 4 and 5 (both Rio Grande units) due to national security concerns. In total, the Service is considering the exclusion of 315 river miles of the proposed critical habitat designation.

Publication of the proposed critical habitat is anticipated to occur in the Summer 2018. The public will have 45 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Central Texas mussels draft Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. FWS has completed a draft SSA report and provided it to peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts) for their expert review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

American Electric Power (AEP) draft Habitat Conservation Plan NOA– In May/June FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning to hold public meetings during the 60-day public comment period. A news bulletin has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participants under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Black-footed ferret nonessential experimental population expansion in Arizona – This summer FWS, in cooperation with Arizona Game and Fish Department, will propose expanding the black-footed ferret 10(j) designation to include all current and historical ferret habitat in Arizona. The 1996 Arizona 10(j) area was limited to the Aubrey Valley Experimental Population Area (AVEPA); successful reintroductions and subsequent population expansions have resulted in ferrets venturing outside of the AVEPA (as fully protected status). FWS consultation with affected tribes has been initiated. FWS will coordinate with AGFD to best approach and inform

Arizona grassland residents and industry (livestock) groups. Communication planning underway.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

National Wildlife Refuge Actions

[NEW] FWS Southwest Region is proactively reaching out to state agencies to discuss Secretarial Orders 3347 and 3356, and seek additional opportunities to support and expand hunting and fishing on Refuges in the Southwest. During the week of May 7th, FWS leadership spoke to both Arizona Game and Fish Department and New Mexico Department of Game and Fish to discuss the hunt and fish assessments effort currently underway to better align with State regulations including species, season dates, method of take and bag limits. Both State agencies offered to provide the FWS Southwest Region with a list of potential opportunities as we continue to collaborate moving forward. The FWS Southwest Region has now met with all State agencies within the Southwest Region and will continue to collaborate on providing additional opportunities to recruit, retain and reactivate hunting and fishing on refuges.

[NEW] The Friends of Valle de Oro National Wildlife Refuge have been awarded The Wildlife Society's Group Achievement Award. The Award recognizes outstanding wildlife achievements. The Friends Group support for Valle de Oro NWR covers a multitude of areas including fostering a community conservation ethic by promoting environmental and cultural awareness, public educational programs, recreational opportunities and improved access, and on the ground habitat restoration. The Group was instrumental in helping to establish Valle de Oro NWR and most recently involved in assisting the Refuge in creating the first wetland habitat on the Refuge.

The Service is proposing to continue and expand public hunting opportunities on Sevilleta National Wildlife Refuge in central New Mexico, by adding a new hunt unit and adding new species that can be hunted. Unit A and Unit B would continue to be open to hunting mourning dove, white-winged dove, geese, ducks and coots, while a new unit, the Rio Puerco Unit, would be opened to hunting mourning dove, white-winged dove and Gambel's quail. In addition, all three units would be open to hunting Eurasian collared-dove. Unit A is 129 acres in size, with approximately 70 acres of open water; Unit B is 163 acres, with 50 acres of open water. The proposed new unit is 590 acres in size and is adjacent to the Rio Puerco. The newly revised Sevilleta NWR Hunt Plan, Environmental Assessment (EA), and Compatibility Determination (CD) are available for public comment until June 1, 2018.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from an FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

"The mission of the U.S. Fish and Wildlife Service is, working with others, to conserve, protect, and enhance fish, wildlife and plants and their habitats for the continuing benefit of the American people"

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service

Through 1 June, 2018

FishBites Report

TITLE:	U.S. Veterans Tour Wildlife Refuge
Topic	Wichita Mountains Wildlife Refuge in Oklahoma hosted seventeen veterans from the Norman Veterans Center, Norman, OK on May 15, 2018. The group enjoyed a guided tour of the Refuge, viewed a diversity of wildlife, and learned about medicinal and edible plants. The majority of these veterans fought in the Korean and Vietnam wars and many shared stories of their sacrifices while serving our country.
Supportive Stakeholders	Norman Veterans Center, U.S. Fish and Wildlife Service
Impacted location	Lawton, OK area

TITLE:	Article Publication: The Art of the Hunt - A Daughter's Experience
Topic	Bosque del Apache National Wildlife Refuge in New Mexico offers a spring staff guided/mentored Youth Turkey Hunt. Article highlights the experience of a 16 year old young woman on her spring turkey hunt including working with her staff mentor, engaging in hunting, harvesting a bird, and finally her preparation of providing a family meal with her fresh yield. Article published in Sporting Classics Daily with a circulation of 92,000.
Supportive Stakeholders	U.S. Fish and Wildlife Service, youth in New Mexico, National Wild Turkey Federation, local communities.
Impacted location	Socorro and San Antonio, New Mexico

TITLE:	Free Family Fishing Day Event
Topic	Trinity River National Wildlife Refuge near Houston, Texas along with the Friends of Trinity River Refuge will be hosting their annual "Free Family Fishing Day" on Saturday, June 2, 2018 from 9:00am - 11:00am at the Champion Lake Public Use Area on the Refuge. It is the one day in the state of Texas that anyone can fish or crab without a license on public waters. The Refuge will have fishing poles and bait available free of charge for those who need it along with experienced anglers who can assist the public with baiting hooks and casting techniques. The event is free and open to the public. All ages are invited and encouraged to attend.
Supportive Stakeholders	U.S. Fish and Wildlife Service, Friends of Trinity River Refuge, Texas Parks & Wildlife Department, angling community, community of Liberty, Texas, other local communities.
Impacted location	Liberty, Texas and regional Houston, Texas area

Title/Issue	Anticipated Publication Date	Current Status
Silver City Daily Press	TBD	Christine Steele is looking to do a story on Gila trout -- Native Fish in the Classroom and propagation at Mora National Fish Hatchery.
InfoGraphic – Bats and White Nose Syndrome	TBD	Geoff Giller, a reporter with Infographic, contacted R2 requesting an interview/field visit to report on bats impacted by white-nose syndrome. The reporter has also spoken with the FWS WNS contacts in R5. Will visit OK March 21-22 to observe survey work.
Fishing Tackle Retailer	May 2018	Story covers WSFR-funded research that's revealing smallmouth bass habitat and behavior. http://fishingtackleretailer.com/radios-reveal-wandering-habits-smallmouth-bass/
New York Times	May 2018	Investigating early seasonal and drought drying of the Rio Grande. Reporter seeks to observe Rio Grande silvery minnow salvage as part of his story. R2 arranging for possible trip with reporter (Henry Fountain).
White Mountain Independent	May 2018	Reporter seeks information on Apache trout, Alchesay-Williams Creek NFH and Arizona Fish and Wildlife Conservation Office for feature on angling in White Mtns for seasonal glossy.
The Arizona Republic	TBD	Army Corps of Engineers and the U.S. Fish and Wildlife Service section 7 consultation regarding large southern Arizona development - Villages at Vigneto.

Week Ahead Schedule of Meetings, Hearings, and Travel
Nothing significant to report.

Immediate Announcements and Actions (within the next 14 days)

[NEW] As early as May 21, The New Mexico Office of Natural Resources Trustee (ONRT), the Department of Agriculture (represented by the Forest Service), and the Department of the Interior (represented by FWS and the Bureau of Land Management) (collectively, the "Trustees"), will announce a final Restoration Plan and Environmental Assessment for the Chevron Mining Inc, Questa Mine in northern New Mexico. The Site is located five miles east of the Village of Questa, adjacent to the Red River and also includes mine tailing ponds located approximately nine miles west of the mine. The Site is the location of a large groundwater contamination that will require treatment in perpetuity to mitigate human health risks. That treatment will use natural resource damages settlement funds ($4,000,000) for the restoration, rehabilitation, replacement, or acquisition of equivalent natural resources and services that were injured by the release of hazardous substances from the Site. (R2 Southwest Region)

15-60 Day Look Ahead
Nothing significant to report.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

UPDATE On May 14, 2018, four Mexican wolf pups were removed from a captive litter at the Endangered Wolf Center in Eureka, Missouri and flown to New Mexico. All four pups were inserted into 2 different wild wolf pack's den in New Mexico., The Interagency Field Team will monitor the recipient packs through the summer to determine the success of these cross-fostering actions. News release is scheduled for the week of May 21st.

Kuenzler hedgehog cactus downlisting – On May 10, FWS announced the expects to finalize the downlisting of Kuenzler hedgehog cactus in early May 2018. When first listed, only 200 plants from two locations were known. Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known population clusters within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild.

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is unknown, but anticipated in May. No controversy anticipated. Communications package is prepared.

Range-wide lesser prairie-chicken (LPC) Conservation Plan Annual Report. On March 31, 2018, the FWS received the Western Association of Fish and Wildlife Agencies (WAFWA) fourth annual report on implementation of the Lesser Prairie-Chicken Range-wide Conservation Plan in the near future. FWS will be providing a technical review of the report. FWS greatly appreciates the States' leadership in the conservation of the lesser prairie-chicken and implementation of the RWP. FWS remains committed to working collaboratively with WAFWA on implementing the plan, which is a key component in ongoing efforts to conserve the lesser prairie-chicken.

Endangered Species Act Listing Actions

Dunes Sagebrush Lizard Petition to List and Designate Critical Habitat - On May 8, 2018, FWS received a petition from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a rigorous status review.

UPDATE - American Burying Beetle 12 month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act later this summer.. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Sonoyta mud turtle critical habitat – As early as June, FWS Southwest Region anticipates sending to the Federal Register a proposal to designate critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. Additionally, we are seeking comments on whether we should consider excluding Units 4 and 5 (both Rio Grande units) due to national security concerns. In total, the Service is considering the exclusion of 345 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in the Summer 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Central Texas mussels draft Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. FWS has completed a draft SSA report and provided it to peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts) for their expert review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

American Electric Power (AEP) draft Habitat Conservation Plan NOA– In May/June FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning to hold public meetings during the 60-day public comment period. A news bulletin has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participants under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Black-footed ferret nonessential experimental population expansion in Arizona – This summer FWS, in cooperation with Arizona Game and Fish Department, will propose expanding the black-footed ferret 10(j) designation to include all current and historical ferret habitat in Arizona. The 1996 Arizona 10(j) area was limited to the Aubrey Valley Experimental Population Area (AVEPA); successful reintroductions and subsequent population expansions have resulted in ferrets venturing outside of the AVEPA (as fully protected status). FWS consultation with affected tribes has been initiated. FWS will coordinate with AGFD to best approach and inform Arizona grassland residents and industry (livestock) groups. Communication planning underway.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at

the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

National Wildlife Refuge Actions

[NEW] Public access to Laguna Atascosa National Wildlife Refuge in south Texas is being significantly improved by the Texas Department of Transportation (TXDOT). FM 106, the only vehicle access road to the Refuge Visitor Center & Main Office, previously owned and managed by Cameron County, is now being completely reconstructed and widened by TXDOT. The road had been in disrepair for years with extensive potholes and washouts making the approximately 15-mile drive to the Refuge (from the nearest town) on the verge of hazardous. Work on the road will continue through the summer months with the final segment scheduled for completion by this September. The new road also includes several wildlife underpasses beneath the roadway. Once completed, these underpasses will allow wildlife to roam and travel without the dangers of crossing or being on the road itself. This should be especially helpful to endangered ocelots that are often hit and killed on Texas roadways.

FWS Southwest Region is proactively reaching out to state agencies to discuss Secretarial Orders 3347 and 3356, and seek additional opportunities to support and expand hunting and fishing on Refuges in the Southwest. During the week of May 7th, FWS leadership spoke to both Arizona Game and Fish Department and New Mexico Department of Game and Fish to discuss the hunt and fish assessments effort currently underway to better align with State regulations including species, season dates, method of take and bag limits. Both State agencies offered to provide the FWS Southwest Region with a list of potential opportunities as we continue to collaborate moving forward. The FWS Southwest Region has now met with all State agencies within the Southwest Region and will continue to collaborate on providing additional opportunities to recruit, retain and reactivate hunting and fishing on refuges.

The Service is proposing to continue and expand public hunting opportunities on Sevilleta National Wildlife Refuge in central New Mexico, by adding a new hunt unit and adding new species that can be hunted. Unit A and Unit B would continue to be open to hunting mourning dove, white-winged dove, geese, ducks and coots, while a new unit, the Rio Puerco Unit, would

be opened to hunting mourning dove, white-winged dove and Gambel's quail. In addition, all three units would be open to hunting Eurasian collared-dove. Unit A is 129 acres in size, with approximately 70 acres of open water; Unit B is 163 acres, with 50 acres of open water. The proposed new unit is 590 acres in size and is adjacent to the Rio Puerco. The newly revised Sevilleta NWR Hunt Plan, Environmental Assessment (EA), and Compatibility Determination (CD) are available for public comment until June 1, 2018.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from an FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

FishBites Report

TITLE	7th Annual Youth Fishing Derby
Topic:	Muleshoe National Wildlife Refuge and Tishomingo National Fish Hatchery assisted at the 7th Annual Youth Fishing Derby in Muleshoe, Texas on June 2, 2018. 100 youth anglers from the age of 2 to 17 participated in the three hour Derby. The Refuge and the Hatchery worked together to provide a number of fish of varying length to make sure the young anglers had a memorable experience. Texas Junior Anglers provided fishing gear and bait to youth who did have their own equipment. Numerous prizes were given out including tackle boxes and poles as well as an overall prize of a new bicycle.
Supportive Stakeholders	U.S. Fish and Wildlife Service (Muleshoe National Wildlife Refuge, Tishomingo National Fish Hatchery), City of Muleshoe, Texas Parks & Wildlife Department, National Wild Turkey Federation, Texas Junior Anglers, Texas Game Warden Association
Impacted Location	Muleshoe, Texas and surrounding area
TITLE	Outdoor Skills for Youth
Topic	Each summer, Santa Ana National Wildlife Refuge in south Texas partners with the Boys & Girls Club in Alamo, Texas to provide local youth with recreational activities that exposes them to a variety of outdoor skills. Most youth have never participated in or been exposed to these outdoor activities. Refuge Rangers lead programs and activities in archery and backyard fishing. The six week course has proven to be successful time and time again in building confidence and self-esteem. Participants also learn core values of friendship, discipline, sportsmanship, and success. The

	summer of 2018 will mark the third year using the archery and backyard fishing program to engage local youth. To date over the Program has serviced over 300 young people.
Supportive Stakeholders	U.S. Fish and Wildlife Service (Santa Ana National Wildlife Refuge), Boys & Girls Club of Alamo, TX
Impacted Area	Alamo, Texas and surrounding communities
TITLE	Article Publication: The Art of the Hunt - A Daughter's Experience
Topic	Bosque del Apache National Wildlife Refuge in New Mexico offers a spring staff guided/mentored Youth Turkey Hunt. Article highlights the experience of a 16 year old young woman on her spring turkey hunt including working with her staff mentor, engaging in hunting, harvesting a bird, and finally her preparation of providing a family meal with her fresh yield. Article published in Sporting Classics Daily with a circulation of 92,000.
Supportive Stakeholders	U.S. Fish and Wildlife Service, youth in New Mexico, National Wild Turkey Federation, local communities.
Impacted location	Socorro and San Antonio, New Mexico

Title/Issue	**Anticipated Publication Date**	**Current Status**
Silver City Daily Press	TBD	Christine Steele is looking to do a story on Gila trout -- Native Fish in the Classroom and propagation at Mora National Fish Hatchery.

The Arizona Republic	Summer 2018	Reporter working on a long-form series (summer) on Arizona ponderosa pine forest health. Requested list of ESA-protected species that rely on ponderosa forest habitat.
The Cactus Wrendition (Maricopa Audubon Magazine)	Summer 2018 edition	Status update on bald eagles that nest in the Sonoran desert
InfoGraphic – Bats and White Nose Syndrome	TBD	Geoff Giller, a reporter with Infographic, contacted R2 requesting an interview/field visit to report on bats impacted by white-nose syndrome. The reporter has also spoken with the FWS WNS contacts in R5. Will visit OK March 21-22 to observe survey work.
Fishing Tackle Retailer	May 2018	Story covers WSFR-funded research that's revealing smallmouth bass habitat and behavior. HYPERLINK "http://fishingtackleretailer.com/radios-reveal-wandering-habits-smallmouth-bass/" http://fishingtackleretailer.com/radios-reveal-wandering-habits-smallmouth-bass/

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

UPDATE On May 14, 2018, four Mexican wolf pups were removed from a captive litter at the Endangered Wolf Center in Eureka, Missouri and flown to New Mexico. All four pups were inserted into 2 different wild wolf pack's den in New Mexico., The Interagency Field Team will monitor the recipient packs through the summer to determine the success of these cross-fostering actions. News release is scheduled for the week of May 21st.

Kuenzler hedgehog cactus downlisting – On May 10, FWS announced the expects to finalize the downlisting of Kuenzler hedgehog cactus in early May 2018. When first listed, only 200 plants from two locations were known. Increased survey efforts identified additional plants and populations, indicating the cactus is no longer at risk of extinction. Today, 4,300 known individual cacti live in 11 known population clusters within its southern New Mexico range. Range and population modeling indicate a potential of 11,000 to 22,000 plants. Additionally, the permitting of captive propagation and sale of the plant has relieved much of the threat from collection of the species in the wild.

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is unknown, but anticipated in May. No controversy anticipated. Communications package is prepared.

Range-wide lesser prairie-chicken (LPC) Conservation Plan Annual Report. On March 31, 2018, the FWS received the Western Association of Fish and Wildlife Agencies (WAFWA) fourth annual report on implementation of the Lesser Prairie-Chicken Range-wide Conservation Plan in the near future. FWS will be providing a technical review of the report. FWS greatly appreciates the States' leadership in the conservation of the lesser prairie-chicken and implementation of the RWP. FWS remains committed to working collaboratively with WAFWA on implementing the plan, which is a key component in ongoing efforts to conserve the lesser prairie-chicken.

Endangered Species Act Listing Actions

Dunes Sagebrush Lizard Petition to List and Designate Critical Habitat - On May 8, 2018, FWS received a petition from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a rigorous status review.

American Burying Beetle 12 month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act later this summer. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and

may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Sonoyta mud turtle critical habitat – As early as June, FWS Southwest Region anticipates sending to the Federal Register a proposal to designate critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

[NEW] - Barton Springs Edward Aquifer Conservation District's (BSEACD) - FWS will announce the approval of the Barton Springs Edward Aquifer Conservation District's (BSEACD) incidental take permit (ITP) and the Habitat Conservation Plan (HCP) for the Barton Springs salamander and the Austin blind salamander, both federally protected species. The BSEACD Habitat Conservation Plan includes measures they will undertake to minimize and mitigate the impacts of pumping withdrawals within the Barton Springs segment of the Edwards Aquifer in Travis and Hays Counties, Texas on the two species. The ITP and HCP will be in effect for 20 years. A communications plan and news release have been drafted. Outreach,

including issuing a news release to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. Additionally, we are seeking comments on whether we should consider excluding Units 4 and 5 (both Rio Grande units) due to national security concerns. In total, the Service is considering the exclusion of 345 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in the Summer 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Central Texas mussels draft Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. FWS has completed a draft SSA report and provided it to peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts) for their expert review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

[UPDATE]American Electric Power (AEP) draft Habitat Conservation Plan NOA– In June/July FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning to hold public meetings during the 60-day public comment period. A news bulletin has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participants under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Black-footed ferret nonessential experimental population expansion in Arizona – This summer FWS, in cooperation with Arizona Game and Fish Department, will propose expanding the black-footed ferret 10(j) designation to include all current and historical ferret habitat in Arizona. The 1996 Arizona 10(j) area was limited to the Aubrey Valley Experimental Population Area (AVEPA); successful reintroductions and subsequent population expansions have resulted in ferrets venturing outside of the AVEPA (as fully protected status). FWS consultation with affected tribes has been initiated. FWS will coordinate with AGFD to best approach and inform Arizona grassland residents and industry (livestock) groups. Communication planning underway.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

National Wildlife Refuge Actions

Public access to Laguna Atascosa National Wildlife Refuge in south Texas is being significantly improved by the Texas Department of Transportation (TXDOT). FM 106, the only vehicle access road to the Refuge Visitor Center & Main Office, previously owned and managed by Cameron County, is now being completely reconstructed and widened by TXDOT. The road had been in disrepair for years with extensive potholes and washouts making the approximately 15-mile drive to the Refuge (from the nearest town) on the verge of hazardous. Work on the

road will continue through the summer months with the final segment scheduled for completion by this September. The new road also includes several wildlife underpasses beneath the roadway. Once completed, these underpasses will allow wildlife to roam and travel without the dangers of crossing or being on the road itself. This should be especially helpful to endangered ocelots that are often hit and killed on Texas roadways.

FWS Southwest Region is proactively reaching out to state agencies to discuss Secretarial Orders 3347 and 3356, and seek additional opportunities to support and expand hunting and fishing on Refuges in the Southwest. During the week of May 7th, FWS leadership spoke to both Arizona Game and Fish Department and New Mexico Department of Game and Fish to discuss the hunt and fish assessments effort currently underway to better align with State regulations including species, season dates, method of take and bag limits. Both State agencies offered to provide the FWS Southwest Region with a list of potential opportunities as we continue to collaborate moving forward. The FWS Southwest Region has now met with all State agencies within the Southwest Region and will continue to collaborate on providing additional opportunities to recruit, retain and reactivate hunting and fishing on refuges.

The Service is proposing to continue and expand public hunting opportunities on Sevilleta National Wildlife Refuge in central New Mexico, by adding a new hunt unit and adding new species that can be hunted. Unit A and Unit B would continue to be open to hunting mourning dove, white-winged dove, geese, ducks and coots, while a new unit, the Rio Puerco Unit, would be opened to hunting mourning dove, white-winged dove and Gambel's quail. In addition, all three units would be open to hunting Eurasian collared-dove. Unit A is 129 acres in size, with approximately 70 acres of open water; Unit B is 163 acres, with 50 acres of open water. The proposed new unit is 590 acres in size and is adjacent to the Rio Puerco. The newly revised Sevilleta NWR Hunt Plan, Environmental Assessment (EA), and Compatibility Determination (CD) are available for public comment until June 1, 2018.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from an FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

DRAFT

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service

Through 15 June, 2018

FishBites Report

TITLE: Camp WOW (Working on the Wichitas)

Topic: June 3-15 the Wichita Mountains NWR hosted this camp. Over a two weeks, two groups of young adults with special needs spent time working on the Refuge. They gained work experience and developed an appreciation for the Refuge System. This was the 3rd year for the Wichita Mountains NWR and Oklahoma Department of Rehabilitation Services to offer this extraordinary experience.

Supportive Stakeholders: U.S. Fish & Wildlife Service (Wichita Mountains Wildlife Refuge), Oklahoma Department of Rehabilitation Services

Impacted Location: Wichita Mountains Wildlife Refuge, Lawton, OK and surrounding area

TITLE: 6th Annual Invasive "Plant Pull" Event

Topic: Wichita Mountains Wildlife Refuge hosted the 6th annual "Plant Pull" event to combat invasive species. 30 members of the public along with refuge staff and Friends of the Wichita's participated. Teams were spread across the refuge and removed over 6,000 invasive plants. Participants were treated with a hot dog lunch for all the assistance, courtesy of Friends of the Wichita's. Local ABC news affiliate, KSWO, interviewed Scott Johnson (Project Coordinator) for the local evening news to highlight the event.

Supportive Stakeholders: U.S. Fish & Wildlife Service (Wichita Mountains Wildlife Refuge), Friends of the Wichita's

Impacted Location: Wichita Mountains Wildlife Refuge, Lawton, OK and surrounding area

TITLE: 7th Annual Youth Fishing Derby

Topic: Muleshoe National Wildlife Refuge and Tishomingo National Fish Hatchery assisted at the 7th Annual Youth Fishing Derby in Muleshoe, Texas on June 2, 2018. 100 youth anglers from the age of 2 to 17 participated in the three hour Derby. The Refuge and the Hatchery worked together to provide a number of fish of varying length to make sure the young anglers had a memorable experience. Texas Junior Anglers provided fishing gear and bait to youth who did have their own equipment. Numerous prizes were given out including tackle boxes and poles as well as an overall prize of a new bicycle.

Supportive Stakeholders: U.S. Fish and Wildlife Service (Muleshoe National Wildlife Refuge, Tishomingo National Fish Hatchery), City of Muleshoe, Texas Parks & Wildlife Department, National Wild Turkey Federation, Texas Junior Anglers, Texas Game Warden Association

Impacted Location: Muleshoe, Texas and surrounding area

TITLE: Outdoor Skills for Youth

Topic: Each summer, Santa Ana National Wildlife Refuge in south Texas partners with the Boys & Girls Club in Alamo, Texas to provide local youth with recreational activities that exposes them to a variety of outdoor skills. Most youth have never participated in or been exposed to these outdoor activities. Refuge Rangers lead programs and activities in archery and backyard fishing. The six week course has proven to be successful time and time again in building confidence and self-esteem. Participants also learn core values of friendship, discipline, sportsmanship, and success. The summer of 2018 will mark the third year using the archery and

	backyard fishing program to engage local youth. To date over the Program has serviced over 300 young people.
Supportive Stakeholders	U.S. Fish and Wildlife Service (Santa Ana National Wildlife Refuge), Boys & Girls Club of Alamo, TX
Impacted Area	Alamo, Texas and surrounding communities
TITLE:	Article Publication: The Art of the Hunt - A Daughter's Experience
Topic:	Bosque del Apache National Wildlife Refuge in New Mexico offers a spring staff guided/mentored Youth Turkey Hunt. Article highlights the experience of a 16 year old young woman on her spring turkey hunt including working with her staff mentor, engaging in hunting, harvesting a bird, and finally her preparation of providing a family meal with her fresh yield. Article published in Sporting Classics Daily with a circulation of 92,000.
Supportive Stakeholders:	U.S. Fish and Wildlife Service, youth in New Mexico, National Wild Turkey Federation, local communities.
Impacted location:	Socorro and San Antonio, New Mexico

Title/Issue	**Anticipated Publication Date**	**Current Status**
Silver City Daily Press	TBD	Christine Steele is looking to do a story on Gila trout -- Native Fish in the Classroom and propagation at Mora National Fish Hatchery.

InfoGraphic – Bats and White Nose Syndrome	TBD	Geoff Giller, a reporter with Infographic, contacted R2 requesting an interview/field visit to report on bats impacted by white-nose syndrome. The reporter has also spoken with the FWS WNS contacts in R5. Will visit OK March 21-22 to observe survey work.
Fishing Tackle Retailer	May 2018	Story covers WSFR-funded research that's revealing smallmouth bass habitat and behavior. http://fishingtackleretailer.com/radios-reveal-wandering-habits-smallmouth-bass/
The Arizona Republic	Summer 2018	Reporter working on a long-form series (summer) on Arizona ponderosa pine forest health. Requested list of ESA-protected species that rely on ponderosa forest habitat.
The Cactus Wrendition (Maricopa Audubon Magazine)	Summer 2018 edition	Status update on bald eagles that nest in the Sonoran desert
High Country News	June 10, 2018	Mexican spotted owl affecting Arizona mining ops (Hermosa Mine)
White Mountain Independent	May 2018	Reporter seeks information on Apache trout, Alchesay-Williams Creek NFH and Arizona Fish and Wildlife Conservation Office for feature on angling in White Mtns for seasonal glossy.
Oklahoma Living Magazine	TBD	Mary Logan-Wolf, a freelance reporter, is working on an educational piece on transmission lines and birds. She was interested in how we work with the local coops to prevent/minimize bird collisions

		with transmission lines in OK.
High Plains Public Radio	TBD	Ben Kuebrich, contacted the Service regarding the status of the lesser prairie-chicken and what changes might occur if the species is listed.

Week Ahead Schedule of Meetings, Hearings, and Travel
Nothing significant to report.

Immediate Announcements and Actions (within the next 14 days)

[NEW] As early as May 21, The New Mexico Office of Natural Resources Trustee (ONRT), the Department of Agriculture (represented by the Forest Service), and the Department of the Interior (represented by FWS and the Bureau of Land Management) (collectively, the "Trustees"), will announce a final Restoration Plan and Environmental Assessment for the Chevron Mining Inc, Questa Mine in northern New Mexico. The Site is located five miles east of the Village of Questa, adjacent to the Red River and also includes mine tailing ponds located approximately nine miles west of the mine. The Site is the location of a large groundwater contamination that will require treatment in perpetuity to mitigate human health risks. That treatment will use natural resource damages settlement funds ($4,000,000) for the restoration, rehabilitation, replacement, or acquisition of equivalent natural resources and services that were injured by the release of hazardous substances from the Site. (R2 Southwest Region)

15-60 Day Look Ahead
Nothing significant to report.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

UPDATE On May 14, 2018, four Mexican wolf pups were removed from a captive litter at the Endangered Wolf Center in Eureka, Missouri and flown to New Mexico. All four pups were inserted into 2 different wild wolf pack's den in New Mexico., The Interagency Field Team will monitor the recipient packs through the summer to determine the success of these cross-fostering actions. News release is scheduled for the week of May 21st.

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is unknown, but anticipated in May. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[UPDATE] Dunes Sagebrush Lizard Petition to List and Designate Critical Habitat - The FWS received a petition from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a rigorous status review.

American Burying Beetle 12 month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act later this summer. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Sonoyta mud turtle critical habitat – As early as June, FWS Southwest Region anticipates sending to the Federal Register a proposal to designate critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the

U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

[NEW] Lesser-Prairie Chicken Surveys - On March 16 the state natural resources agencies in New Mexico, Colorado, Oklahoma, Texas and Kansas began aerial surveys for the lesser prairie-chicken. The surveys, which have been conducted annually since 2012, ran through mid-May and will assist in assessing long term population trend for the lesser prairie-chicken. We expect to receive official survey results later this summer.

Barton Springs Edward Aquifer Conservation District's (BSEACD) - FWS will announce the approval of the Barton Springs Edward Aquifer Conservation District's (BSEACD) incidental take permit (ITP) and the Habitat Conservation Plan (HCP) for the Barton Springs salamander and the Austin blind salamander, both federally protected species. The BSEACD Habitat Conservation Plan includes measures they will undertake to minimize and mitigate the impacts of pumping withdrawals within the Barton Springs segment of the Edwards Aquifer in Travis and Hays Counties, Texas on the two species. The ITP and HCP will be in effect for 20 years. A communications plan and news release have been drafted. Outreach, including issuing a news release to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat

for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. Additionally, we are seeking comments on whether we should consider excluding Units 4 and 5 (both Rio Grande units) due to national security concerns. In total, the Service is considering the exclusion of 345 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in the Summer 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Central Texas mussels draft Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. FWS has completed a draft SSA report and provided it to peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts) for their expert review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

American Electric Power (AEP) draft Habitat Conservation Plan NOA– In June/July FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning to hold public meetings during the 60-day public comment period. A news bulletin has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participants under the TCP. The draft revision of the

Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Black-footed ferret nonessential experimental population expansion in Arizona – This summer FWS, in cooperation with Arizona Game and Fish Department, will propose expanding the black-footed ferret 10(j) designation to include all current and historical ferret habitat in Arizona. The 1996 Arizona 10(j) area was limited to the Aubrey Valley Experimental Population Area (AVEPA); successful reintroductions and subsequent population expansions have resulted in ferrets venturing outside of the AVEPA (as fully protected status). FWS consultation with affected tribes has been initiated. FWS will coordinate with AGFD to best approach and inform Arizona grassland residents and industry (livestock) groups. Communication planning underway.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

National Wildlife Refuge Actions

Public access to Laguna Atascosa National Wildlife Refuge in south Texas is being significantly improved by the Texas Department of Transportation (TXDOT). FM 106, the only vehicle access road to the Refuge Visitor Center & Main Office, previously owned and managed by Cameron County, is now being completely reconstructed and widened by TXDOT. The road had been in disrepair for years with extensive potholes and washouts making the approximately 15-mile drive to the Refuge (from the nearest town) on the verge of hazardous. Work on the road will continue through the summer months with the final segment scheduled for completion by this September. The new road also includes several wildlife underpasses beneath the roadway. Once completed, these underpasses will allow wildlife to roam and travel without the dangers of crossing or being on the road itself. This should be especially helpful to endangered ocelots that are often hit and killed on Texas roadways.

FWS Southwest Region is proactively reaching out to state agencies to discuss Secretarial Orders 3347 and 3356, and seek additional opportunities to support and expand hunting and fishing on Refuges in the Southwest. During the week of May 7th, FWS leadership spoke to both Arizona Game and Fish Department and New Mexico Department of Game and Fish to discuss the hunt and fish assessments effort currently underway to better align with State regulations including species, season dates, method of take and bag limits. Both State agencies offered to provide the FWS Southwest Region with a list of potential opportunities as we continue to collaborate moving forward. The FWS Southwest Region has now met with all State agencies within the Southwest Region and will continue to collaborate on providing additional opportunities to recruit, retain and reactivate hunting and fishing on refuges.

The Service is proposing to continue and expand public hunting opportunities on Sevilleta National Wildlife Refuge in central New Mexico, by adding a new hunt unit and adding new species that can be hunted. Unit A and Unit B would continue to be open to hunting mourning dove, white-winged dove, geese, ducks and coots, while a new unit, the Rio Puerco Unit, would be opened to hunting mourning dove, white-winged dove and Gambel's quail. In addition, all three units would be open to hunting Eurasian collared-dove. Unit A is 129 acres in size, with approximately 70 acres of open water; Unit B is 163 acres, with 50 acres of open water. The proposed new unit is 590 acres in size and is adjacent to the Rio Puerco. The newly revised Sevilleta NWR Hunt Plan, Environmental Assessment (EA), and Compatibility Determination (CD) are available for public comment until June 1, 2018.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from an FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and

improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

DRAFT

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service

Through 22 June, 2018

FishBites Report

TITLE: Communicating Native Trout Conservation

Topic: Partners for Fish and Wildlife and Turner Enterprises' Vermejo Park Ranch teamed up to conserve an aboriginal population of Rio Grande cutthroat trout in northern New Mexico. A dozen collective stream miles have been rested from ungulate grazing and browsing, allowing streamside vegetation--and trout habitat--to take its first steps at restoration. The matter was communicated in this magazine of the marine and tackle manufacturing industry https://fishingtackleretailer.com/rio-grande-cutthroat-trout-benefit-from-private-lands/

Supportive Stakeholders: Turner Enterprises, New Mexico Dept of Game and Fish

Impacted Location: New Mexico, Colorado

Title/Issue	Anticipated Publication Date	Current Status
Santa Fe New Mexican	N/A	Story on Mexican wolf - history and background on wolf that was killed by a rancher who was convicted of killing an endangered species. https://www.hcn.org/articles/birds-an-owl-sighting-prompts-a-second-look-at-mining-operations

Albuquerque Journal	June 21	Survival of Mexican Wolf Cross Fostered Pups https://www.abqjournal.com/1187406/cross fostered-wolf-pups-may-emerge-from-dens-soon.html
Silver City Daily Press	TBD	Christine Steele is looking to do a story on Gila trout -- Native Fish in the Classroom and propagation at Mora National Fish Hatchery.
InfoGraphic – Bats and White Nose Syndrome	TBD	Geoff Giller, a reporter with Infographic, contacted R2 requesting an interview/field visit to report on bats impacted by white-nose syndrome. The reporter has also spoken with the FWS WNS contacts in R5. Will visit OK March 21-22 to observe survey work.
Texas Tribune	Next week	Kiah Collier had questions about listing of the dunes sagebrush lizard. Answered questions.
The Arizona Republic	Summer 2018	Reporter working on a long-form series (summer) on Arizona ponderosa pine forest health. Requested list of ESA-protected species that rely on ponderosa forest habitat.
The Cactus Wrendition (Maricopa Audubon Magazine)	Summer 2018 edition	Status update on bald eagles that nest in the Sonoran desert

Oklahoma Living Magazine	TBD	Mary Logan-Wolf, a freelance reporter, is working on an educational piece on transmission lines and birds. She was interested in how we work with the local coops to prevent/minimize bird collisions with transmission lines in OK.
High Plains Public Radio	TBD	Ben Kuebrich, contacted the Service regarding the status of the lesser prairie-chicken and what changes might occur if the species is listed.

Week Ahead Schedule of Meetings, Hearings, and Travel

Nothing significant to report.

Immediate Announcements and Actions (within the next 14 days)

As early as May 21, The New Mexico Office of Natural Resources Trustee (ONRT), the Department of Agriculture (represented by the Forest Service), and the Department of the Interior (represented by FWS and the Bureau of Land Management) (collectively, the "Trustees"), will announce a final Restoration Plan and Environmental Assessment for the Chevron Mining Inc, Questa Mine in northern New Mexico. The Site is located five miles east of the Village of Questa, adjacent to the Red River and also includes mine tailing ponds located approximately nine miles west of the mine. The Site is the location of a large groundwater contamination that will require treatment in perpetuity to mitigate human health risks. That treatment will use natural resource damages settlement funds ($4,000,000) for the restoration, rehabilitation, replacement, or acquisition of equivalent natural resources and services that were injured by the release of hazardous substances from the Site. (R2 Southwest Region)

15-60 Day Look Ahead

Upcoming Workshops & Meetings

Nothing significant to report.

Endangered Species Act Recovery Actions

On May 14, 2018, four Mexican wolf pups were removed from a captive litter at the Endangered Wolf Center in Eureka, Missouri and flown to New Mexico. All four pups were inserted into 2 different wild wolf pack's den in New Mexico., The Interagency Field Team will monitor the recipient packs through the summer to determine the success of these cross-fostering actions. News release is scheduled for the week of May 21st.

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is unknown, but anticipated in May. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

Dunes Sagebrush Lizard Petition to List and Designate Critical Habitat - The FWS received a petition from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a rigorous status review.

American Burying Beetle 12 month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act later this summer. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Sonoyta mud turtle critical habitat – As early as June, FWS Southwest Region anticipates sending to the Federal Register a proposal to designate critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands.

The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

Lesser-Prairie Chicken Surveys - On March 16 the state natural resources agencies in New Mexico, Colorado, Oklahoma, Texas and Kansas began aerial surveys for the lesser prairie-chicken. The surveys, which have been conducted annually since 2012, ran through mid-May and will assist in assessing long term population trend for the lesser prairie-chicken. We expect to receive official survey results later this summer.

Barton Springs Edward Aquifer Conservation District's (BSEACD) - FWS will announce the approval of the Barton Springs Edward Aquifer Conservation District's (BSEACD) incidental take permit (ITP) and the Habitat Conservation Plan (HCP) for the Barton Springs salamander and the Austin blind salamander, both federally protected species. The BSEACD Habitat Conservation Plan includes measures they will undertake to minimize and mitigate the impacts of pumping withdrawals within the Barton Springs segment of the Edwards Aquifer in Travis and Hays Counties, Texas on the two species. The ITP and HCP will be in effect for 20 years. A communications plan and news release have been drafted. Outreach, including issuing a news release to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils

River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. Additionally, we are seeking comments on whether we should consider excluding Units 4 and 5 (both Rio Grande units) due to national security concerns. In total, the Service is considering the exclusion of 345 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in the Summer 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Central Texas mussels draft Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. FWS has completed a draft SSA report and provided it to peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts) for their expert review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

American Electric Power (AEP) draft Habitat Conservation Plan NOA– In June/July FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning to hold public meetings during the 60-day public comment period. A news bulletin has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participants under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Black-footed ferret nonessential experimental population expansion in Arizona – This summer FWS, in cooperation with Arizona Game and Fish Department, will propose expanding the black-footed ferret 10(j) designation to include all current and historical ferret habitat in Arizona. The 1996 Arizona 10(j) area was limited to the Aubrey Valley Experimental Population Area (AVEPA); successful reintroductions and subsequent population expansions have resulted in ferrets venturing outside of the AVEPA (as fully protected status). FWS consultation with affected tribes has been initiated. FWS will coordinate with AGFD to best approach and inform Arizona grassland residents and industry (livestock) groups. Communication planning underway.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

National Wildlife Refuge Actions

Public access to Laguna Atascosa National Wildlife Refuge in south Texas is being significantly improved by the Texas Department of Transportation (TXDOT). FM 106, the only vehicle access road to the Refuge Visitor Center & Main Office, previously owned and managed by Cameron County, is now being completely reconstructed and widened by TXDOT. The road had been in disrepair for years with extensive potholes and washouts making the approximately 15-mile drive to the Refuge (from the nearest town) on the verge of hazardous. Work on the road will continue through the summer months with the final segment scheduled for completion by this September. The new road also includes several wildlife underpasses beneath the roadway. Once completed, these underpasses will allow wildlife to roam and travel without the dangers of crossing or being on the road itself. This should be especially helpful to endangered ocelots that are often hit and killed on Texas roadways.

FWS Southwest Region is proactively reaching out to state agencies to discuss Secretarial Orders 3347 and 3356, and seek additional opportunities to support and expand hunting and fishing on

Refuges in the Southwest. During the week of May 7th, FWS leadership spoke to both Arizona Game and Fish Department and New Mexico Department of Game and Fish to discuss the hunt and fish assessments effort currently underway to better align with State regulations including species, season dates, method of take and bag limits. Both State agencies offered to provide the FWS Southwest Region with a list of potential opportunities as we continue to collaborate moving forward. The FWS Southwest Region has now met with all State agencies within the Southwest Region and will continue to collaborate on providing additional opportunities to recruit, retain and reactivate hunting and fishing on refuges.

The Service is proposing to continue and expand public hunting opportunities on Sevilleta National Wildlife Refuge in central New Mexico, by adding a new hunt unit and adding new species that can be hunted. Unit A and Unit B would continue to be open to hunting mourning dove, white-winged dove, geese, ducks and coots, while a new unit, the Rio Puerco Unit, would be opened to hunting mourning dove, white-winged dove and Gambel's quail. In addition, all three units would be open to hunting Eurasian collared-dove. Unit A is 129 acres in size, with approximately 70 acres of open water; Unit B is 163 acres, with 50 acres of open water. The proposed new unit is 590 acres in size and is adjacent to the Rio Puerco. The newly revised Sevilleta NWR Hunt Plan, Environmental Assessment (EA), and Compatibility Determination (CD) are available for public comment until June 1, 2018.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from an FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Good Morning All,

Thank you for the feedback and request for clarifica on. Understandably, there were a few separate email responses to yesterday's email and for consistent messaging I'll combine informa on requested into one email. The process for targe ng fuels management treatments through a Southern Border Fuels Management Ini a ve is in development, but the feedback I received from the Bureaus while in Boise the other week was helpful for cra. ing a path forward. The following I hope would be beneficial for understanding the "why" we're focused on this effort, project criteria considera□ons, approval process, and funding opportuni□es for moving forward.

Background:
The founda□on for the Southern Border Fuels Management Ini□a□ve derived from the DOI Secretarial priori□es. DOI is implemen□ng the strategic plan framework to protect U.S. ci□zens and employees by suppor□ng Department of Homeland Security (DHS) efforts in securing the southern con□nental border. Through a strategically-focused management strategy founded upon the 2006 Memorandum of Understanding "Coopera□ve Na□onal Security and Counterterrorism Efforts on Federal Lands along the United States' Borders," between DOI, DHS, and the U.S. Department of Agriculture (please see a□ached), DOI is planning to reduce vegeta□on abundance along the southern border to increase the visibility of illegal ac□vity and reduce the threat of wildfires that impact life and property while improving ecosystem func□ons. Aligning DOI Bureaus to focus on this ini□a□ve will increase efficiency in mission

delivery and help advance the goals of the existing MOU. Fostering these partnerships will produce on-the-ground results and facilitate a balanced stewardship and use of our public lands.

The 2006 MOU was put in place to promote resiliency of Federal lands and provide for national security in concert with protecting cultural and natural resources within these landscapes. In carrying out the provisions of the MOU DOI agreed to provide access to CBP to conduct work on Federal lands in coordination with DOI law enforcement, where appropriate, to protect the border and the security of the U.S. Targeted fuels management in critical areas along the border and where CBP maintains operational facilities will benefit the missions of both DOI and DHS-CBP, and potentially other partners who agree to participate in this effort including Tribes, states and other Federal agencies.

The focus on border protection is being firmly addressed by DHS, U.S. Custom and Border Patrol (CBP), among others. However, the effectiveness of highly sensitive and expensive surveillance equipment used by CBP to identify and track illegal activity cannot be fully achieved where fuel loading along the border is unnatural or overgrown. Additionally, fuel loading puts CBP and other law enforcement agents at risk from a lack of visibility when working on public lands. DOI can effectively address these issues through targeted fuels management treatments on public lands using standardized methods of prescribed fire, mechanical, and/or chemical treatments across landscapes. Targeted fuels management on public lands where CBP plays an operational role will support the 2006 MOU and CBP's mission by improving the effectiveness of electronic surveillance equipment and increasing law enforcement officer safety. This will have the concurrent benefits of reducing wildfire threats and restoring wildlife habitat.

Project Criteria:
The processes are evolving, but for FY18 shovel ready Southern Border projects and for FY19 planning, please use the following criteria when developing a project description to assess whether a proposed project would meet the initiative's intent:

- project objectives / scope of work
- location
- distance from border (there isn't a set distance at this point, but needs to make sense)
- timing and duration of project
- project cost
- if multi-year project then provide a cost/year
- acres of treatment
- resource benefit(s)
- use of UAS is highly encouraged
- partners involved
- partners leveraging
- benefits to CBP efforts identified

Review Process:
FY18 shovel ready projects will be submitted to the OWF Fuels Lead Position with a copy to Craig Leff and Thao Tran for review and approval. At this time, plan for FY19 review and approval to occur at the Bureau level. For the rest of FY18, approved projects will receive a money transfer over to the Bureau in a timely manner to take advantage of the limited work window. OWF will need develop a tracking mechanism for these allocations within FBMS. The Bureau Fuels Program Lead should be the POC for Southern Border Fuels Management Initiative projects unless delegated to a local contact who is conducting the work.

Current Funding:
The current funding for this initiative is at $4 million. Money that hasn't been allocated in FY18 will carry over into FY19. There is an opportunity to acquire a funding stream for fuels work along the southern border moving forward and completed projects highlighting the support of the Secretary's priority will help support this possibility.

NOTE: Please address questions to Craig and Thao during the gap between when my detail concludes Friday (29 June) and when Kim returns in mid-July.

Thanks again for the clarification requests and I hope that this helps with the process. Again, it is a work in progress so please remain flexible, thank you.

--

Best Regards,

Ed

Ed Christopher, RF

Memorandum of Understanding
Among
U. S. Department of Homeland Security
and
U. S. Department of the Interior
and
U. S. Department of Agriculture
Regarding
Cooperative National Security and Counterterrorism Efforts on Federal Lands along the United States' Borders

I. Purpose and Scope

A. This Memorandum of Understanding (MOU) is made and entered into by the Department of Homeland Security (DHS), including and on behalf of its constituent bureau U.S. Customs and Border Protection (CBP) and the CBP Office of Border Patrol (CBP-BP); the Department of the Interior (DOI), including and on behalf of its constituent bureaus, the National Park Service (NPS), U.S. Fish and Wildlife Service (FWS), Bureau of Indian Affairs (BIA), Bureau of Land Management (BLM), and the Bureau of Reclamation (BOR); and the Department of Agriculture (USDA), including and on behalf of its constituent agency the U.S. Forest Service (USFS). Throughout this MOU, these three Departments, including their constituent agencies, may be referred to as "the Parties." Any reference to a bureau, agency, or constituent component of a Party shall not be deemed to exclude application to any appropriate bureau or constituent component of that Party. DHS recognizes that the BIA enters into this agreement only on its own behalf and not on behalf of any Indian tribe.

B. The geographic and jurisdictional scope of this MOU is nationwide. The Parties recognize the national security and counterterrorism significance of preventing illegal entry into the United States by cross-border violators (CBVs), including but not limited to the following: drug and human smugglers and smuggling organizations, foreign nationals, and terrorists and terrorist organizations. The Parties further recognize that damage to DOI and USDA-managed lands and natural and cultural resources is often a significant consequence of such illegal entry. The Parties are committed to preventing illegal entry into the United States, protecting Federal lands and natural and cultural resources, and - where possible - preventing adverse impacts associated with illegal entry by CBVs.

C. This MOU is intended to provide consistent goals, principles, and guidance related to border security, such as law enforcement operations; tactical infrastructure installation; utilization of roads; minimization and/or prevention of significant impact on or impairment of natural and cultural resources; implementation of the Wilderness Act, Endangered Species Act, and other related environmental law, regulation, and policy across land management agencies; and provide for coordination and sharing information

on threat assessments and other risks, plans for infrastructure and technology improvements on Federal lands, and operational and law enforcement staffing changes. This MOU provides guidance in the development of individual agreements, where appropriate, between CBP and land management agencies to further the provisions contained herein.

D. This MOU is entered into pursuant to the governing statutory authorities of each of the Parties.

E. The Parties acknowledge that CBP operation and construction within the sixty-foot "Roosevelt Reservation" of May 27, 1907 (along the US-Mexico border) and the sixty-foot "Taft Reservation" of May 3, 1912 (along the US-Canada border) is consistent with the purpose of those reservations and that any CBP activity (including, but not limited to, operations and construction) within the sixty-foot reservations is outside the oversight or control of Federal land managers.

F. This MOU supersedes any conflicting provision of any prior MOU or Memorandum of Agreement between the Parties or their subordinate bureaus or components.

II. Background

A. DHS, through its constituent bureaus (including CBP and its CBP-BP), is statutorily mandated to control and guard the Nation's borders and boundaries, including the entirety of the northern and southern land and water borders of the United States.

B. DOI and USDA, through their constituent bureaus, are statutorily charged as managers of Federal lands throughout the United States, including DOI and USDA lands in the vicinity of international borders that are administered as wilderness areas, conservation areas, national forests, wildlife refuges, units/irrigation projects of the Bureau of Reclamation, and/or units of the national park system. Tribal governments have primary management roles over tribal lands; however, the United States, through the BIA, may also have a stewardship or law enforcement responsibility over these lands. Many of these Federal and tribal lands contain natural and cultural resources that are being degraded by activities related to illegal cross-border movements.

C. The volume of CBVs can and has, in certain areas, overwhelmed the law enforcement and administrative resources of Federal land managers. In order to more effectively protect national security, respond to terrorist threats, safeguard human life, and stop the degradation of the natural and cultural resources on those lands, DOI and USDA land managers will work cooperatively with CBP to benefit from the enforcement presence, terrorist and CBV interdiction, and rescue operations of CBP.

III. Common Findings and Affirmation of the Parties

A. The Parties to this MOU recognize that CBP-BP access to Federal lands can facilitate rescue of CBVs on Federal lands, protect those lands from environmental damage, have a role in protecting the wilderness and cultural values and wildlife resources of these lands, and is necessary for the security of the United States. Accordingly, the Parties understand that CBP-BP, consistent with applicable Federal laws and regulations, may access public lands and waterways, including access for purposes of tracking, surveillance, interdiction, establishment of observation points, and installation of remote detection systems.

B. The Parties recognize that DOI and USDA have responsibility for enforcing Federal laws relating to land management, resource protection, and other such functions on Federal lands under their jurisdiction.

IV. Responsibilities and Terms of Agreement

A. The Parties Agree to the Following Common Goals, Policies, and Principles:

1. The Parties enter into this MOU in a cooperative spirit with the goals of securing the borders of the United States, addressing emergencies involving human health and safety, and preventing or minimizing environmental damage arising from CBV illegal entry on public lands;

2. The Parties will strive to both resolve conflicts at and delegate resolution authority to the lowest field operational level possible while applying the principles of this MOU in such manner as will be consistent with the spirit and intent of this MOU;

3. The Parties will develop and consistently utilize an efficient communication protocol respecting the chain of command for each of the Parties that will result in the consistent application of the goals, policies, and principles articulated in this MOU, and provide a mechanism that will, if necessary, facilitate the resolution of any conflicts among the Parties. If resolution of conflict does not occur at the local level, then the issue will be elevated first to the regional/sector office; if not resolved at the regional/sector level, then the issue will be elevated to the headquarters level for resolution;

4. The Parties will cooperate with each other to complete, in an expedited manner, all compliance that is required by applicable Federal laws not otherwise waived in furtherance of this MOU. If such activities are authorized by a local agreement as described in sub-article IV.B below, then the DOI, USDA, and CBP will complete the required compliance before executing the agreement;

5. The Parties will cooperate with each other to identify methods, routes, and locations for CBP-BP operations that will minimize impacts to natural, cultural, and wilderness resources resulting from CBP-BP operations while facilitating needed CBP-BP access;

6. The Parties will, as necessary, plan and conduct joint local law enforcement operations consistent with all Parties' legal authorities;

7. The Parties will establish a framework by which threat assessments and other intelligence information may be exchanged, including intelligence training to be conducted by all parties so that the intelligence requirements of each may be identified and facilitated;

8. The Parties will establish forums and meet as needed at the local, regional, and national levels to facilitate working relationships and communication between all Parties;

9. The Parties will develop and share joint operational strategies at the local, regional, and national levels, including joint requests for infrastructure and other shared areas of responsibility;

10. The Parties will share the cost of environmental and cultural awareness training unless otherwise agreed; and

11. The Parties will, as appropriate, enter into specific reimbursable agreements pursuant to the Economy Act, 31 U.S.C. §1535 when one party is to furnish materials or perform work or provide a service on behalf of another party.

B. Responsibilities and Terms Specific to DOI and USDA. The DOI and the USDA hereby recognize that, pursuant to applicable law, CBP-BP is authorized to access the Federal lands under DOI and USDA administrative jurisdiction, including areas designated by Congress as wilderness, recommended as wilderness, and/or wilderness study areas, and will do so in accordance with the following conditions and existing authorities:

1. CBP-BP agents on foot or on horseback may patrol, or pursue, or apprehend suspected CBVs off-road at any time on any Federal lands administered by the Parties;

2. CBP-BP may operate motor vehicles on existing public and administrative roads and/or trails and in areas previously designated by the land management agency for off-road vehicle use at any time, provided that such use is consistent with presently authorized public or administrative use. At CBP-BP's request, the DOI and the USDA will provide CBP-BP with keys, combinations, or other means necessary to

access secured administrative roads/trails. CBP-BP may drag existing public and administrative roads that are unpaved for the purpose of cutting sign, subject to compliance with conditions that are mutually agreed upon by the local Federal land manager and the CBP-BP Sector Chief. For purposes of this MOU, "existing public roads/trails" are those existing roads/trails, paved or unpaved, on which the land management agency allows members of the general public to operate motor vehicles, and "existing administrative roads/trails" are those existing roads/trails, paved or unpaved, on which the land management agency allows persons specially authorized by the agency, but not members of the general public, to operate motor vehicles;

3 CBP-BP may request, in writing, that the land management agency grant additional access to Federal lands (for example, to areas not previously designated by the land management agency for off-road use) administered by the DOI or the USDA for such purposes as routine patrols, non-emergency operational access, and establishment of temporary camps or other operational activities. The request will describe the specific lands and/or routes that the CBP-BP wishes to access and the specific means of access desired. After receiving a written request, the local Federal land manager will meet promptly with the CBP-BP Sector Chief to begin discussing the request and negotiating the terms and conditions of an agreement with the local land management agency that authorizes access to the extent permitted by the laws applicable to the particular Federal lands. In each agreement between CBP-BP and the local land management agency, the CBP-BP should be required to use the lowest impact mode of travel and operational setup reasonable and practicable to accomplish its mission. The CBP-BP should also be required to operate all motorized vehicles and temporary operational activities in such a manner as will minimize the adverse impacts on threatened or endangered species and on the resources and values of the particular Federal lands. However, at no time should officer safety be compromised when selecting the least impactful conveyance or operational activity. Recognizing the importance of this matter to the Nation's security, the CBP-BP Sector Chief and the local Federal land manager will devote to this endeavor the resources necessary to complete required compliance measures in order to execute the local agreement within ninety (90) days after the Federal land manager has received the written request for access. Nothing in this paragraph is intended to limit the exercise of applicable emergency authorities for access prior to the execution of the local agreement. The Secretaries of the Interior, Agriculture, and Homeland Security expect that, absent compelling justification, each local agreement will be executed within that time frame and provide the maximum amount of access requested by the CBP-BP and allowed by law;

4. Nothing in this MOU is intended to prevent CBP-BP agents from exercising existing exigent/emergency authorities to access lands, including authority to conduct motorized off-road pursuit of suspected CBVs at any time, including in areas designated or recommended as wilderness, or in wilderness study areas when, in their professional judgment based on articulated facts, there is a specific exigency/emergency involving human life, health, safety of persons within the area, or posing a threat to national security, and they conclude that such motorized off-road pursuit is reasonably expected to result in the apprehension of the suspected CBVs. Articulated facts include, but are not limited to, visual observation; information received from a remote sensor, video camera, scope, or other technological source; fresh "sign" or other physical indication; canine alert; or classified or unclassified intelligence. For each such motorized off-road pursuit, CBP-BP will use the least intrusive or damaging motorized vehicle readily available, without compromising agent or officer safety. In accordance with paragraph IV.C.4, as soon as practicable after each such motorized off-road pursuit, CBP-BP will provide the local Federal land manager with a brief report;

5. If motorized pursuits in wilderness areas, areas recommended for wilderness designation, wilderness study areas, or off-road in an area not designated for such use are causing significant impact on the resources, or if other significant issues warrant consultation, then the Federal land manager and the CBP-BP will immediately meet to resolve the issues subject to paragraphs IV.A.2 and IV.A.3 of this MOU;

6. CBP may request, in writing, that the land management agency authorize installation or construction of tactical infrastructure for detection of CBVs (including, but not limited to, observation points, remote video surveillance systems, motion sensors, vehicle barriers, fences, roads, and detection devices) on land under the local land management agency's administrative jurisdiction. In areas not designated as wilderness, the local Federal land manager will expeditiously authorize CBP to install such infrastructure subject to such terms and conditions that are mutually developed and articulated in the authorization issued by the land management agency. In areas designated or managed as wilderness, the local Federal land manager, in consultation with CBP, will promptly conduct a "minimum requirement," "minimum tool," or other appropriate analysis. If supported by such analysis, the local Federal land manager will expeditiously authorize CBP to install such infrastructure subject to such terms and conditions that are mutually developed and articulated in the authorization issued by the land management agency;

7. The DOI and USDA will provide CBP-BP agents with appropriate environmental and cultural awareness training formatted to meet CBP-BP operational constraints. The DOI and USDA will work with CBP-BP in the development and production of maps for use or reference by CBP-BP agents including, as appropriate, site-specific and resource-specific maps that will identify specific wildlife and environmentally or culturally sensitive areas;

8. The DOI and USDA will, as applicable, provide CBP-BP with all assessments and studies done by or on behalf of DOI or USDA on the effects of CBVs on Federal lands and native species to better analyze the value of preventative enforcement actions;

9. The DOI and USDA will assist CBP-BP in search and rescue operations on lands within the respective land managers' administration when requested;

10. The CBP-BP and land management agencies may cross-deputize or cross-designate their agents as law enforcement officers under each other agency's statutory authority. Such cross-deputation or cross-designation agreements entered into by the local land management agency and the field operations manager for the CBP-BP shall be pursuant to the policies and procedures of each agency; and

11. DOI and USDA will work at the field operations level with affected local CBP-BP stations to establish protocols for notifying CBP-BP agents when DOI or USDA law enforcement personnel are conducting law enforcement operations in an area where CBP-BP and DOI/USDA operations can or will overlap.

C. Responsibilities and Terms Specific to the CBP. DHS hereby agrees as follows:

1. Consistent with the Border Patrol Strategic Plan, CBP-BP will strive to interdict CBVs as close to the United States' international borders as is operationally practical, with the long-term goal of establishing operational control along the immediate borders;

2. If the CBP-BP drag any unpaved roads for the purpose of cutting sign under provision IV.B.2 above, then CBP-BP will maintain or repair such roads to the extent that they are damaged by CBP-BP's use or activities;

3. If CBP-BP agents pursue or apprehend suspected CBVs in wilderness areas or off-road in an area not designated for such use under

paragraph IV.B.5, then the CBP-BP will use the lowest impact mode of travel practicable to accomplish its mission and operate all motorized vehicles in such a manner as will minimize the adverse impacts on threatened or endangered species and on the resources and values of the particular Federal lands, provided officer safety is not compromised by the type of conveyance selected;

4. CBP-BP will notify the local Federal land manager of any motorized emergency pursuit, apprehension, or incursion in a wilderness area or off-road in an area not designated for such use as soon as is practicable. A verbal report is sufficient unless either CBP-BP or the land managing agency determines that significant impacts resulted, in which case a written report will be necessary;

5. If motorized pursuits in wilderness areas, areas recommended for wilderness designation, wilderness study areas, or off-road in an area not designated for such use are causing significant impact on the resources as determined by a land manager, or if other significant issues warrant consultation, then the CBP-BP and Federal land manager will immediately meet to resolve the issues subject to paragraphs IV.A.2 and IV.A.3 of this MOU;

6. CBP will consult with land managers to coordinate the placement and maintenance of tactical infrastructure, permanent and temporary video, seismic and other remote sensing sites in order to limit resource damage while maintaining operational efficiency;

7. CBP-BP will ensure that current and incoming CBP-BP agents attend environmental and cultural awareness training to be provided by the land management agencies;

8. CBP-BP will provide land management agencies with appropriate and relevant releasable statistics of monthly CBV apprehensions, search and rescue actions, casualties, vehicles seized, drug seizures and arrests, weapons seizures and arrests, and other significant statistics regarding occurrences on the lands managed by the land manager;

9. CBP-BP will consult with land managers in the development of CBP-BP's annual Operational-Requirements Based Budgeting Program to ensure affected land managers can provide input and are, in the early stages of planning, made aware what personnel, infrastructure, and technology the CBP-BP would like to deploy along the border within their area of operation; and

10. CBP-BP will work at the field operations manager level with affected local land management agencies to establish protocols for notifying

land management agency law enforcement officers when BP is conducting special operations or non-routine activities in a particular area.

V. Miscellaneous Provisions

A. Nothing in this MOU may be construed to obligate the agencies or the United States to any current or future expenditure of funds in advance of the availability of appropriations, nor does this MOU obligate the agencies or the United States to spend funds for any particular project or purpose, even if funds are available.

B. Nothing in this MOU will be construed as affecting the authority of the Parties in carrying out their statutory responsibilities.

C. This MOU may be modified or amended in writing upon consent of all Parties, and other affected Federal agencies may seek to become a Party to this MOU.

D. The Parties shall retain all applicable legal responsibility for their respective personnel working pursuant to this MOU with respect to, *inter alia*, pay, personnel benefits, injuries, accidents, losses, damages, and civil liability. This MOU is not intended to change in any way the individual employee status or the liability or responsibility of any Party under Federal law.

E. The Parties agree to participate in this MOU until its termination. Any Party wishing to terminate its participation in this MOU shall provide sixty (60) days written notice to all other Parties.

F. This document is an intra-governmental agreement among the Parties and does not create or confer any rights, privileges, or benefits upon any person, party, or entity. This MOU is not and shall not be construed as a rule or regulation.

In witness whereof, the Parties hereto have caused this Memorandum of Understanding to be executed and effective as of the date of the last signature below.

DRAFT

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service

Through 29 June, 2018

FishBites Report

TITLE: Radios Reveal Wandering Habits of Smallmouth Bass in Oklahoma

Topic: About the time that redbuds flash their pretty pinkish blooms on eastern Oklahoma's hillsides and gray streamside sycamores unfurl their fresh leaves the color akin to a wet lime, there's something curious going on. And it goes mostly sight unseen. Smallmouth bass are on the move with the singular purpose of procreation. Story link - http://www.thefishingwire.com/features/9c01e658-8d5f-401a-9a63-cc5f2e6e5a86

Supportive Stakeholders: Oklahoma Department of Wildlife Conservation, Oklahoma State University

Impacted Location: New Mexico, Colorado

TITLE: Rio Mora Highlights

Topic: The Northern New Mexico Complex was abuzz in May with visiting school groups from Denver. The Community College of Denver ran their third annual field ecology course at Rio Mora, May 12-26. As part of this class, six undergraduates assisted Chris Lohrengel with waterfowl surveys at Maxwell NWR, and studied the role of dung beetles in nutrient cycling of bison dung at Rio Mora NWR with the Denver Zoo. Rio Mora also hosted 16 undergraduates from Metropolitan State University for an applied field methods course, May 23-June 1, where students learned how to build erosion control rock structures.

Supportive Stakeholders: North New Mexico Complex, Community College of Denver, Metropolitan State University, Denver Zoo

Impacted Location: Northern New Mexico

Title/Issue	**Anticipated Publication Date**	**Current Status**
Santa Fe New Mexican	N/A	Story on Mexican wolf - history and background on wolf that was killed by a rancher who was convicted of killing an endangered species. https://www.hcn.org/articles/birds-an-owl-sighting-prompts-a-second-look-at-mining-operations
Albuquerque Journal	June 21	Survival of Mexican Wolf Cross Fostered Pups https://www.abqjournal.com/1187406/cross fostered-wolf-pups-may-emerge-from-dens-soon.html
Silver City Daily Press	TBD	Christine Steele is looking to do a story on Gila trout -- Native Fish in the Classroom and propagation at Mora National Fish Hatchery.
InfoGraphic – Bats and White Nose Syndrome	June 26	Geoff Giller, a reporter with Infographic, contacted R2 requesting an interview/field visit to report on bats impacted by white-nose syndrome. The reporter has also spoken with the FWS WNS contacts in R5. Visited OK March 21-22 to observe survey work. https://www.biographic.com/posts/sto/glimmers-in-the-dark

Texas Tribune	June 22, 2018	Kiah Collier had questions about listing of the dunes sagebrush lizard. Answered questions. https://www.texastribune.org/2018/06/22/texas-propose-new-plan-protect-threatened-lizard/
The Arizona Republic	Summer 2018	Reporter working on a long-form series (summer) on Arizona ponderosa pine forest health. Requested list of ESA-protected species that rely on ponderosa forest habitat.
The Cactus Wrendition (Maricopa Audubon Magazine)	Summer 2018 edition	Status update on bald eagles that nest in the Sonoran desert
Oklahoma Living Magazine	TBD	Mary Logan-Wolf, a freelance reporter, is working on an educational piece on transmission lines and birds. She was interested in how we work with the local coops to prevent/minimize bird collisions with transmission lines in OK.
High Plains Public Radio	TBD	Ben Kuebrich, contacted the Service regarding the status of the lesser prairie-chicken and what changes might occur if the species is listed.
Arizona Daily Star (Tucson)	June 22 Follow-up June 28	Sought confirmation that a photo of a jaguar pelt (taken in Mexico) is the same jaguar that had been monitored in the Huachuca Mountains in southern Arizona. [Story 1] [Story 2]

Cronkite News Service	June 28	Sought information on FWS 90-day finding on petition to delist the western yellow-billed cuckoo. [Published version]

Week Ahead Schedule of Meetings, Hearings, and Travel
Nothing significant to report.

Immediate Announcements and Actions (within the next 14 days)
Nothing significant to report.

15-60 Day Look Ahead
Nothing significant to report.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

On May 14, 2018, four Mexican wolf pups were removed from a captive litter at the Endangered Wolf Center in Eureka, Missouri and flown to New Mexico. All four pups were inserted into 2 different wild wolf pack's den in New Mexico., The Interagency Field Team will monitor the recipient packs through the summer to determine the success of these cross-fostering actions. News release is scheduled for the week of May 21st.

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is early August. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

Dunes Sagebrush Lizard Petition to List and Designate Critical Habitat - The FWS received a petition from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The

Service will review the petition to determine whether or not it provides substantial information warranting a rigorous status review.

American Burying Beetle 12 month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act later this summer. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Sonoyta mud turtle critical habitat – As early as August, FWS Southwest Region anticipates sending to the Federal Register a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

[UPDATE] Lesser-Prairie Chicken Surveys - On March 16 the state natural resources agencies in New Mexico, Colorado, Oklahoma, Texas and Kansas began aerial surveys for the lesser prairie-chicken. The surveys, which have been conducted annually since 2012, ran through mid-May and will assist in assessing long term population trend for the lesser prairie-chicken. We expect to receive survey results in July 2018. .

Barton Springs Edward Aquifer Conservation District's (BSEACD) - FWS will announce the approval of the Barton Springs Edward Aquifer Conservation District's (BSEACD) incidental take permit (ITP) and the Habitat Conservation Plan (HCP) for the Barton Springs salamander and the Austin blind salamander, both federally protected species. The BSEACD Habitat Conservation Plan includes measures they will undertake to minimize and mitigate the impacts of pumping withdrawals within the Barton Springs segment of the Edwards Aquifer in Travis and Hays Counties, Texas on the two species. The ITP and HCP will be in effect for 20 years. A communications plan and news release have been drafted. Outreach, including issuing a news release to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the Federal Register.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. Additionally, we are seeking comments on whether we should consider excluding Units 4 and 5 (both Rio Grande units) due to national security concerns. In total, the Service is considering the exclusion of 345 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in the Summer 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Central Texas mussels draft Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. FWS has completed a draft SSA report and provided it to peer reviewers and agency partners (including Texas Parks and

Wildlife and the Comptroller of Public Accounts) for their expert review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

American Electric Power (AEP) draft Habitat Conservation Plan NOA– In June/July FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning to hold public meetings during the 60-day public comment period. A news bulletin has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participants under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

National Wildlife Refuge Actions

Nothing significant to report.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from an FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

Nothing significant to report.

Migratory Birds

Nothing significant to report.

Science Applications

Nothing significant to report.

Wildlife and Sport Fish Restoration

Nothing significant to report.

Through 6 July, 2018

FishBites Report

TITLE: Nature's Good Neighbors story: Private Lands Conservation benefits rare sport fish.

Topic: Partners of Fish and Wildlife program has improved the lot of an uncommon trout, the Rio Grande cutthroat trout. The story covers the partnership between the FWS and landowner, Turner Enterprises, Inc. that together, the two endeavor to expand habitat for this fish that has the distinction of being the first trout documented in the New World. Story link

Supportive Stakeholders: Turner Enterprise, Inc., New Mexico Dept of Game and Fish

Impacted Location: New Mexico, Colorado

TITLE: Rio Mora Highlights

Topic: The Northern New Mexico Complex was abuzz in May with visiting school groups from Denver. The Community College of Denver ran their third annual field ecology course at Rio Mora, May 12-26. As part of this class, six undergraduates assisted Chris Lohrengel with waterfowl surveys at Maxwell NWR, and studied the role of dung beetles in nutrient cycling of bison dung at Rio Mora NWR with the Denver Zoo. Endangered Species Act Recovery Actions

On May 14, 2018, four Mexican wolf pups were removed from a captive litter at the Endangered Wolf Center in Eureka, Missouri and flown to New Mexico. All four pups were inserted into 2 different wild wolf pack's den in New Mexico., The Interagency Field Team will monitor the recipient packs through the summer to determine the success of these cross-fostering actions. News release is scheduled for the week of May 21st.

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is early August. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

Dunes Sagebrush Lizard Petition to List and Designate Critical Habitat - The FWS received a petition from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a rigorous status review.

American Burying Beetle 12-month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act later this summer. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Sonoyta mud turtle critical habitat – As early as August, FWS Southwest Region anticipates sending to the Federal Register a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the

LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

Lesser-Prairie Chicken Surveys - On March 16 the state natural resources agencies in New Mexico, Colorado, Oklahoma, Texas and Kansas began aerial surveys for the lesser prairie-chicken. The surveys, which have been conducted annually since 2012, ran through mid-May and will assist in assessing long term population trend for the lesser prairie-chicken. We expect to receive survey results in July 2018.

Barton Springs Edward Aquifer Conservation District's (BSEACD) - FWS will announce the approval of the Barton Springs Edward Aquifer Conservation District's (BSEACD) incidental take permit (ITP) and the Habitat Conservation Plan (HCP) for the Barton Springs salamander and the Austin blind salamander, both federally protected species. The BSEACD Habitat Conservation Plan includes measures they will undertake to minimize and mitigate the impacts of pumping withdrawals within the Barton Springs segment of the Edwards Aquifer in Travis and Hays Counties, Texas on the two species. The ITP and HCP will be in effect for 20 years. A communications plan and news release have been drafted. Outreach, including issuing a news release to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the Federal Register.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. Additionally, we are seeking comments on whether we should consider excluding Units 4 and 5 (both Rio Grande units) due to national security concerns. In total, the Service is

considering the exclusion of 345 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in the Summer 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Central Texas mussels draft Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. FWS has completed a draft SSA report and provided it to peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts) for their expert review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

[*UPDATE*] American Electric Power (AEP) draft Habitat Conservation Plan NOA– In July/August FWS anticipates sending a Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement to the *Federal Register* for publication. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. FWS is planning to hold public meetings during the 60-day public comment period. A news bulletin has been drafted. Outreach, including issuing a news release locally and posting information on social media is planned at time of publication in the *Federal Register*.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participants under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the

application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

[*NEW*] – Bone Cave Harvestman 5-year Review - The Bone Cave harvestman is a cave invertebrate found in Travis and Williamson counties, Texas and was listed as an endangered species in 1988. In April 2018, a species status assessment for the harvestman was completed. That assessment included involvement from Texas Parks and Wildlife Department, City of Austin, Travis County, and Williamson County. The species status assessment informed the development of a 5-year review for the Bone Cave harvestman that was completed in June 2018. The 5-year review recommends no status change for the Bone Cave harvestman. The plan will be shared on the Austin Ecological Services webpage later this summer.

National Wildlife Refuge Actions

[NEW] Hunting and fishing assessments for national wildlife refuges in the states of Oklahoma, Arizona, and New Mexico will all be completed by the end of July 2018. Region 2 Chief of Hunting and Fishing along with Refuge Supervisors, Refuge Managers, and staff assessed refuge regulations for alignment with State regulations and reviewed potential new or expanded opportunities to implement S.O. 3347 and S.O. 3356.

[NEW] Rocky Mountain Youth Corps in partnership with Valle de Oro National Wildlife Refuge (NM) is launching a video series to highlight the important work of the Urban Conservation Corps in Albuquerque, New Mexico. The series not only highlights the program itself, it tells the stories of Corps members and how the program is positively impacting their lives. "Rocky Mountain Youth Corps engages young people in the outdoors, inspiring them to use their strengths and potential to lead healthy, productive lives. We teach responsibility for self, community and environment through teamwork, service and experiential education". Valle de Oro NWR has hosts several crews at the Refuge each summer. Crews assist with projects on the Refuge as well as other public lands around central New Mexico and in the community of Albuquerque.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from an FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

FishBites Report

TITLE: Rio Mora Highlights

Topic: The Northern New Mexico Complex was abuzz in May with visiting school groups from Denver. The Community College of Denver ran their third annual field ecology course at Rio Mora, May 12-26. As part of this class, six undergraduates assisted Chris Lohrengel with waterfowl surveys at Maxwell NWR, and studied the role of dung beetles in nutrient cycling of bison dung at Rio Mora NWR with the Denver Zoo. Rio Mora also hosted 16 undergraduates from Metropolitan State University for an applied field methods course, May 23-June 1, where students learned how to build erosion control rock structures.

Supportive Stakeholders: North New Mexico Complex, Community College of Denver, Metropolitan State University, Denver Zoo

Impacted Location: Northern New Mexico

Title/Issue	**Anticipated Publication Date**	**Current Status**
WTTW-TV PBS Chicago "Chicago Tonight" program	July 9	R2 Mexican wolf biologist Maggie Dwire and Joan Daniels Tantillo, curator of mammals at the Brookfield Zoo in Chicago discussed the partnership between USFWS and the Brookfield zoo on Mexican wolf recovery and the cross fostering of Mexican wolves. https://chicagotonight.wttw.com/2018/07/09/brookfield-zoo-helps-bring-mexican-wolves-back-brink-extinction

The Arizona Republic	Late summer 2018	Reporter working on a long-form series (summer) on Arizona ponderosa pine forest health. Requested to participate in field work for ESA-protected species that rely on ponderosa forest habitat.
Oklahoma Living Magazine	TBD	Mary Logan-Wolf, a freelance reporter, is working on an educational piece on transmission lines and birds. She was interested in how we work with the local coops to prevent/minimize bird collisions with transmission lines in OK.
High Plains Public Radio	TBD	Ben Kuebrich, contacted the Service regarding the status of the lesser prairie-chicken and what changes might occur if the species is listed.
San Antonio Express	June 29, published on June 30	John Tedesco, contacted the Service regarding a development in San Antonio, Mansions at La Cantera, that may have been golden-cheeked warbler habitat - https://www.expressnews.com/news/local/article/City-says-developer-who-clear-cut-trees-was-13038725.php?utm_campaign=twitter-premium&utm_source=CMS%20Sharing%20Button&utm_medium=social
Cronkite News Service	July 10	Sought information on investigation into take of lesser long-nosed bats and eagles at southern Arizona wind turbine farm.
France Télévisions, Ch2	July 9	Covering the effects of Colorado River Basin drought. Specifically farmers in Casa Grande, Arizona and the drawn-down water and resulting fish kill in San Carlos Reservoir. San Carlos Reservoir is a

		holding facility for agriculture water in the Gila River.
Family Travel Forum	TBD	Story on travel destinations throughout the state of New Mexico, at the recommendation of the New Mexico Tourism Department the reporter stopped at Bosque del Apache National Wildlife Refuge to include general visitor information about the Refuge in the story.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions
[*UPDATE*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late August/September. No controversy anticipated. Communications package is prepared.

On May 14, 2018, four Mexican wolf pups were removed from a captive litter at the Endangered Wolf Center in Eureka, Missouri and flown to New Mexico. All four pups were inserted into 2 different wild wolf pack's den in New Mexico., The Interagency Field Team will monitor the recipient packs through the summer to determine the success of these cross-fostering actions. News release is scheduled for the week of May 21st.

Endangered Species Act Listing Actions

[*UPDATE*] - American Burying Beetle 12-month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act. l. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Dunes Sagebrush Lizard Petition to List and Designate Critical Habitat - The FWS received a petition from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a rigorous status review.

Sonoyta mud turtle critical habitat – As early as August, FWS Southwest Region anticipates sending to the Federal Register a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and

increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

[*NEW*] A Ceremonial signing of the American Burying Beetle (ABB) Programmatic Biological Opinion (PBO) - Amy Leuders, Southwest Regional Director and Bill John Baker, Principal Chief, Cherokee Nation will participate in a signing ceremony for the ABB Programmatic Biological Opinion at 10:00 a.m. On Wednesday, August 8th, at the Cherokee Nation in Tahlequah, Oklahoma. The Cherokee Nation has established an ABB conservation area which will be used for mitigation for activities covered by the PBO. Five federal agencies have activities covered in the PBO. The Programmatic BO will significantly streamline the ESA consultation process for the Cherokee Nation and federal agencies, allowing the Cherokee Nation to expedite projects and better serve Indian people. Media will be invited.

***[UPDATE*]** Lesser-Prairie Chicken Surveys - On July 10, the Western Association of Fish and Wildlife Agencies released the 2018 lesser prairie-chicken aerial survey results. The survey indicates an estimated breeding population of 38,637 birds this year, compared to 29,934 birds counted last year. The FWS will review the survey report. The state natural resources agencies in New Mexico, Colorado, Oklahoma, Texas and Kansas began aerial surveys in May for the lesser prairie-chicken.

[*UPDATE*] Barton Springs Edward Aquifer Conservation District's (BSEACD) - FWS anticipates announcing the approval of the Barton Springs Edward Aquifer Conservation District's (BSEACD) incidental take permit (ITP) and the Habitat Conservation Plan (HCP) for the Barton Springs salamander and the Austin blind salamander, both federally protected species on July 16. The BSEACD Habitat Conservation Plan includes measures they will undertake to minimize and mitigate the impacts of pumping withdrawals within the Barton Springs segment of the Edwards Aquifer in Travis and Hays Counties, Texas on the two species. The ITP and HCP will be in effect for 20 years. A communications plan and news release have been drafted. Outreach, including issuing a news release to media, congressionals and partners is planned to occur at time of publication in the Federal Register.

[*UPDATE*] American Electric Power (AEP) draft Habitat Conservation Plan NOA– On July 3 the Notice of Availability of AEP's Incidental Take Permit application, including a draft Habitat Conservation Plan and draft Environmental Impact Statement published in the the *Federal Register.*. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in

Oklahoma, Arkansas and Texas. FWS is planning to hold public meetings during the 60-day public comment period. A news bulletin has been drafted. Outreach, including issuing a news release locally occurred at time of publication in the *Federal Register*.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. Additionally, we are seeking comments on whether we should consider excluding Units 4 and 5 (both Rio Grande units) due to national security concerns. In total, the Service is considering the exclusion of 345 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in the Summer 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Central Texas mussels draft Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. FWS has completed a draft SSA report and provided it to peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts) for their expert review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participants under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at

the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

Bone Cave Harvestman 5-year Review - The Bone Cave harvestman is a cave invertebrate found in Travis and Williamson counties, Texas and was listed as an endangered species in 1988. In April 2018, a species status assessment for the harvestman was completed. That assessment included involvement from Texas Parks and Wildlife Department, City of Austin, Travis County, and Williamson County. The species status assessment informed the development of a 5-year review for the Bone Cave harvestman that was completed in June 2018. The 5-year review recommends no status change for the Bone Cave harvestman. The plan will be shared on the Austin Ecological Services webpage later this summer.

National Wildlife Refuge Actions

[NEW] On June 5, 2018 the U.S. Fish and Wildlife Service's Texas Fish and Wildlife Conservation Office and Laguna Atascosa National Wildlife Refuge along with our partners Texas Parks and Wildlife Department and the University of Texas Rio Grande Valley began fish monitoring on the Bahia Grande Management Unit of Laguna Atascosa NWR in south Texas. The monitoring will assess changes in fish and aquatic species populations before and after the Bahia Grande channel widening restoration project. The channel widening project is expected to increase tidal exchange and restore more natural salinity regimes along with enhancing natural hydrology to improve wetlands. The monitoring results will be used to create a fisheries management plan to increase public fishing opportunities on Laguna Atascosa National Wildlife Refuge. Monitoring will continue biannually prior to construction and three years post construction.

Hunting and fishing assessments for national wildlife refuges in the states of Oklahoma, Arizona, and New Mexico will all be completed by the end of July 2018. Region 2 Chief of Hunting and Fishing along with Refuge Supervisors, Refuge Managers, and staff assessed refuge regulations for alignment with State regulations and reviewed potential new or expanded opportunities to implement S.O. 3347 and S.O. 3356.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from an FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

FishBites Report

TITLE: Camp Rising Sun Archery with Teens with Autism

Topic: June 4-8th 2018 Teresa Skiba, Education Specialist at Valle de Oro NWR, taught adaptive archery, mapping/fort building, and comic book making at Camp Rising Sun for teens with Autism in the Manzano Mountains. Camp Rising Sun is a program of The Autism Programs of The Center for Development and Disability through the University of New Mexico's Center for Excellence in Developmental Disability Education, Research and Service. The program, established in 2006, strives to engage individuals in making healthy life choices, build community and to provide respite to families caring for a loved one with Autism Spectrum Disorder. Over the course of the week, Teresa taught adaptive archery to twenty-five campers with the goal to: build confidence, practice independence, foster friendships and develop problem solving skills. Many campers expressed gratitude and thanks for the opportunity to participate in archery in a safe and inclusive environment. Teresa loved seeing the progression in skill sets, especially when campers would hit the target for the first time and scream with excitement!

Supportive Stakeholders: University of New Mexico Center for Excellence in Developmental Disability.

Impacted Location: Camp Rising Sun Manzano Mountain Retreat Center.

TITLE: Santa Ana PSJA Partner Fishing Rodeo, June 2, 2018

Topic: Santa Ana NWR hosted its first ever fishing event. It was opened to our Partners in the Pharr, San Juan and Alamo School system and was offered to the teachers and their families. We had 50

	Participants who fished from 8:00 a.m.-Noon. The wetland was stocked with 600 catfish.
Supportive Stakeholders:	Santa Ana NWR and PSJA School System Partners
Impacted Location:	Lower Rio Grande Valley, McAllen TX area
TITLE:	Family Fun Day July 14th, 2018
Topic:	Santa Ana NWR hosted its first public fishing event from 9:00 a.m.-2:00 p.m. The event was offered to local families and about 35 folks came out and caught 20 fish which they got to take home. Fishing poles were available for use for families without rods and reels so that they could come out and learn to fish.
Supportive Stakeholders:	Santa Ana NWR and the local public.
Impacted Location:	Lower Rio Grande Valley, McAllen TX area
TITLE:	Outdoor Skills for Youth
Topic:	Each summer, Santa Ana National Wildlife Refuge in south Texas partners with the Boys & Girls Club in Alamo, Texas to provide local youth with recreational activities that exposes them to a variety of outdoor skills. Most youth have never participated in or been exposed to these outdoor activities. Refuge Rangers lead programs and activities in archery and backyard fishing. The six-week course has proven to be successful time and time again in building confidence and self-esteem. Participants also learn core values of friendship, discipline, sportsmanship, and success. The summer of 2018 will mark the third year using the archery and backyard fishing program to engage local youth. To date over the Program has serviced over 300 young people.
Supportive Stakeholders:	U.S. Fish and Wildlife Service (Santa Ana National Wildlife Refuge), Boys & Girls Club of Alamo, TX
Impacted Area:	Alamo, Texas and surrounding communities

Endangered Species Act Recovery Actions
[*UPDATE*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late August/September. No controversy anticipated. Communications package is prepared.

On May 14, 2018, four Mexican wolf pups were removed from a captive litter at the Endangered Wolf Center in Eureka, Missouri and flown to New Mexico. All four pups were inserted into 2 different wild wolf pack's den in New Mexico., The Interagency Field Team will monitor the recipient packs through the summer to determine the success of these cross-fostering actions. News release is scheduled for the week of May 21st.

Endangered Species Act Listing Actions

Dunes Sagebrush Lizard Petition to List and Designate Critical Habitat - The FWS received a petition from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a rigorous status review.

American Burying Beetle 12-month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act. l. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting

information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Sonoyta mud turtle critical habitat – As early as August, FWS Southwest Region anticipates sending to the Federal Register a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in early 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

[NEW] Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

[UPDATE] - Bone Cave Harvestman 5-year Review - The Bone Cave harvestman is a cave invertebrate found in Travis and Williamson counties, Texas and was listed as an endangered species in 1988. In April 2018, a species status assessment for the harvestman was completed. That assessment included involvement from Texas Parks and Wildlife Department, City of Austin, Travis County, and Williamson County. The species status assessment informed the development of a 5-year review for the Bone Cave harvestman that was completed in June 2018.

The 5-year review recommends no status change for the Bone Cave harvestman. The plan will be shared on the Austin Ecological Services webpage the week of July 16th.

A Ceremonial signing of the American Burying Beetle (ABB) Programmatic Biological Opinion (PBO) - Amy Leuders, Southwest Regional Director and Bill John Baker, Principal Chief, Cherokee Nation will participate in a signing ceremony for the ABB Programmatic Biological Opinion at 10:00 a.m. on Wednesday, August 8th, at the Cherokee Nation in Tahlequah, Oklahoma. The Cherokee Nation has established an ABB conservation area which will be used for mitigation for activities covered by the PBO. Five federal agencies have activities covered in the PBO. The Programmatic BO will significantly streamline the ESA consultation process for the Cherokee Nation and federal agencies, allowing the Cherokee Nation to expedite projects and better serve Indian people. Media will be invited.

Lesser-Prairie Chicken Surveys - On July 10, the Western Association of Fish and Wildlife Agencies released the 2018 lesser prairie-chicken aerial survey results. The survey indicates an estimated breeding population of 38,637 birds this year, compared to 29,934 birds counted last year. The FWS will review the survey report. The state natural resources agencies in New Mexico, Colorado, Oklahoma, Texas and Kansas began aerial surveys in May for the lesser prairie-chicken.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. Additionally, we are seeking comments on whether we should consider excluding Units 4 and 5 (both Rio Grande units) due to national security concerns. In total, the Service is considering the exclusion of 345 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in the Summer 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Central Texas mussels draft Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false

spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. FWS has completed a draft SSA report and provided it to peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts) for their expert review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participants under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

National Wildlife Refuge Actions

[NEW] On June 5, 2018 the U.S. Fish and Wildlife Service's Texas Fish and Wildlife Conservation Office and Laguna Atascosa National Wildlife Refuge along with our partners Texas Parks and Wildlife Department and the University of Texas Rio Grande Valley began fish monitoring on the Bahia Grande Management Unit of Laguna Atascosa NWR in south Texas. The monitoring will assess changes in fish and aquatic species populations before and after the Bahia Grande channel widening restoration project. The channel widening project is expected to increase tidal exchange and restore more natural salinity regimes along with enhancing natural hydrology to improve wetlands. The monitoring results will be used to create a fisheries management plan to increase public fishing opportunities on Laguna Atascosa National Wildlife

Refuge. Monitoring will continue biannually prior to construction and three years post construction.

Hunting and fishing assessments for national wildlife refuges in the states of Oklahoma, Arizona, and New Mexico will all be completed by the end of July 2018. Region 2 Chief of Hunting and Fishing along with Refuge Supervisors, Refuge Managers, and staff assessed refuge regulations for alignment with State regulations and reviewed potential new or expanded opportunities to implement S.O. 3347 and S.O. 3356.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from an FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

FishBites Report

TITLE: Trinity River Refuge Moth Night Out

Topic: The Sixth Annual Moth Night Out Event at Trinity River National Wildlife Refuge on July 21st was a great success. We only observed about 50 species of moths, about 15 species fewer than past years, but had over 35 moth "observers" in attendance. Many folks were first time visitors to the refuge including a half dozen children. Folks were also able to view and photograph dozens of other bugs including owl flies, beetles, hoppers, walking stick, praying mantis, and at least two species of cockroaches.

Supportive Stakeholders: Trinity River, National Moth Week campaign

Impacted Location: Houston, Texas area

Title/Issue	Anticipated Publication Date	Current Status
WTTW-TV PBS Chicago "Chicago Tonight" program	July 9	R2 Mexican wolf biologist Maggie Dwire and Joan Daniels Tantillo, curator of mammals at the Brookfield Zoo in Chicago discussed the partnership between USFWS and the Brookfield zoo on Mexican wolf recovery and the cross fostering of Mexican wolves. https://chicagotonight.wttw.com/2018/07/09/brookfield-zoo-helps-bring-mexican-wolves-back-brink-extinction

Immediate Announcements and Actions (within the next 14 days)
As early as July 31, the U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team will announce completion of the final recovery plan for the jaguar. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Communications in approval process. .

Endangered Species Act Recovery Actions

[*UPDATE*] As early as July 31, the U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team will announce completion of the final recovery plan for the jaguar. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Communications under review.

[*UPDATE*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late August/September. No controversy anticipated. Communications package is prepared.

On May 14, 2018, four Mexican wolf pups were removed from a captive litter at the Endangered Wolf Center in Eureka, Missouri and flown to New Mexico. All four pups were inserted into 2 different wild wolf pack's den in New Mexico., The Interagency Field Team will monitor the recipient packs through the summer to determine the success of these cross-fostering actions. News release is scheduled for the week of May 21st.

Endangered Species Act Listing Actions

Dunes Sagebrush Lizard Petition to List and Designate Critical Habitat - The FWS received a petition from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a rigorous status review.

American Burying Beetle 12-month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Sonoyta mud turtle critical habitat – As early as August, FWS Southwest Region anticipates sending to the Federal Register a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

[*UPDATE*] Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

A Ceremonial signing of the American Burying Beetle (ABB) Programmatic Biological Opinion (PBO) - Amy Leuders, Southwest Regional Director and Bill John Baker, Principal Chief, Cherokee Nation will participate in a signing ceremony for the ABB Programmatic Biological Opinion at 10:00 a.m. on Wednesday, August 8th, at the Cherokee Nation in Tahlequah, Oklahoma. The Cherokee Nation has established an ABB conservation area which will be used for mitigation for activities covered by the PBO. Five federal agencies have activities covered in the PBO. The Programmatic BO will significantly streamline the ESA consultation process for

the Cherokee Nation and federal agencies, allowing the Cherokee Nation to expedite projects and better serve Indian people. Media will be invited.

Lesser-Prairie Chicken Surveys - On July 10, the Western Association of Fish and Wildlife Agencies released the 2018 lesser prairie-chicken aerial survey results. The survey indicates an estimated breeding population of 38,637 birds this year, compared to 29,934 birds counted last year. The FWS will review the survey report. The state natural resources agencies in New Mexico, Colorado, Oklahoma, Texas and Kansas began aerial surveys in May for the lesser prairie-chicken.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. Additionally, we are seeking comments on whether we should consider excluding Units 4 and 5 (both Rio Grande units) due to national security concerns. In total, the Service is considering the exclusion of 345 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in the Summer 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Dunes Sagebrush Lizard Texas Conservation Plan Revision - The Texas Comptroller of Public Accounts has drafted a revision of the Texas Conservation Plan (TCP) for the dunes sagebrush lizard to address several issues with the current plan based upon the six years of implementation. The draft revision has been shared with participants in the existing plan and is being rolled out to industry, landowners and other potential participants under the TCP. The draft revision of the Texas Conservation Plan has not yet been submitted to the Service for approval. We are prepared to work with the Comptroller's Office on this revision at the appropriate time.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional

interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

National Wildlife Refuge Actions

On June 5, 2018 the U.S. Fish and Wildlife Service's Texas Fish and Wildlife Conservation Office and Laguna Atascosa National Wildlife Refuge along with our partners Texas Parks and Wildlife Department and the University of Texas Rio Grande Valley began fish monitoring on the Bahia Grande Management Unit of Laguna Atascosa NWR in south Texas. The monitoring will assess changes in fish and aquatic species populations before and after the Bahia Grande channel widening restoration project. The channel widening project is expected to increase tidal exchange and restore more natural salinity regimes along with enhancing natural hydrology to improve wetlands. The monitoring results will be used to create a fisheries management plan to increase public fishing opportunities on Laguna Atascosa National Wildlife Refuge. Monitoring will continue biannually prior to construction and three years post construction.

Hunting and fishing assessments for national wildlife refuges in the states of Oklahoma, Arizona, and New Mexico will all be completed by the end of July 2018. Region 2 Chief of Hunting and Fishing along with Refuge Supervisors, Refuge Managers, and staff assessed refuge regulations for alignment with State regulations and reviewed potential new or expanded opportunities to implement S.O. 3347 and S.O. 3356.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from an FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. Endangered Species Act Listing Actions

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review.

American Burying Beetle 12-month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register in September a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the

U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

[*UPDATE*] The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

[*NEW*] FWS-R2 will publish a Notice of Availability for the Amendment to the Rio Salado Safe Harbor Agreement and Enhancement of Survival Permit during the week of July 30. This amendment of the SHA at the confluence of the Salt, Gila and Agua Fria rivers, in Arizona, primarily addresses the now-listed western yellow-billed cuckoo and the applicant's alteration of the acreages of species habitat covered. No controversy is expected. No outreach planned.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was

completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

A Ceremonial signing of the American Burying Beetle (ABB) Programmatic Biological Opinion (PBO) - Amy Leuders, Southwest Regional Director and Bill John Baker, Principal Chief, Cherokee Nation will participate in a signing ceremony for the ABB Programmatic Biological Opinion at 10:00 a.m. on Wednesday, August 8th, at the Cherokee Nation in Tahlequah, Oklahoma. The Cherokee Nation has established an ABB conservation area which will be used for mitigation for activities covered by the PBO. Five federal agencies have activities covered in the PBO. The Programmatic BO will significantly streamline the ESA consultation process for the Cherokee Nation and federal agencies, allowing the Cherokee Nation to expedite projects and better serve Indian people. Media will be invited.

Lesser-Prairie Chicken Surveys - On July 10, the Western Association of Fish and Wildlife Agencies released the 2018 lesser prairie-chicken aerial survey results. The survey indicates an estimated breeding population of 38,637 birds this year, compared to 29,934 birds counted last year. The FWS will review the survey report. The state natural resources agencies in New Mexico, Colorado, Oklahoma, Texas and Kansas began aerial surveys in May for the lesser prairie-chicken.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. Additionally, we are seeking comments on whether we should consider excluding Units 4 and 5 (both Rio Grande units) due to national security concerns. In total, the Service is considering the exclusion of 345 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in the Summer 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike,

Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

National Wildlife Refuge Actions

On June 5, 2018 the U.S. Fish and Wildlife Service's Texas Fish and Wildlife Conservation Office and Laguna Atascosa National Wildlife Refuge along with our partners Texas Parks and Wildlife Department and the University of Texas Rio Grande Valley began fish monitoring on the Bahia Grande Management Unit of Laguna Atascosa NWR in south Texas. The monitoring will assess changes in fish and aquatic species populations before and after the Bahia Grande channel widening restoration project. The channel widening project is expected to increase tidal exchange and restore more natural salinity regimes along with enhancing natural hydrology to improve wetlands. The monitoring results will be used to create a fisheries management plan to increase public fishing opportunities on Laguna Atascosa National Wildlife Refuge. Monitoring will continue biannually prior to construction and three years post construction.

Hunting and fishing assessments for national wildlife refuges in the states of Oklahoma, Arizona, and New Mexico will all be completed by the end of July 2018. Region 2 Chief of Hunting and Fishing along with Refuge Supervisors, Refuge Managers, and staff assessed refuge regulations for alignment with State regulations and reviewed potential new or expanded opportunities to implement S.O. 3347 and S.O. 3356.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from an FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service

Through 10 August, 2018

FishBites Report

TITLE: Cherokee Nation, US Fish and Wildlife Service work to save endangered species

Topic: The Cherokee Nation, working alongside the U.S. Fish and Wildlife Service, is the first tribal nation to designate an area of land to protect an endangered species of beetle.
Principal Chief Bill John Baker signed an executive order designating a portion of the tribe's 800-acre park on Sallisaw Creek in Sequoyah County as an American Burying Beetle Conservation and Mitigation Area for the next 10 years.

The National Cherokee Nation Park is already a natural habitat for the beetle, and the plan will limit development and preserve habitat so the beetle population will continue to thrive. Chief Baker, Secretary of Natural Resources Sara Hill, U.S. Fish and Wildlife Service Southwest Regional Director Amy Lueders and other leaders gathered Wednesday in Tahlequah to celebrate the designation.

Supportive Stakeholders: The Cherokee Nation.

Impacted Locations: The Cherokee Nation and Sequoyah County, Oklahoma.

TITLE: Bass Pro Outdoor World Radio Show Interview

Topic: Wildlife Refuge Biologist Dan McDonald at Wichita Mountains Wildlife Refuge near Lawton, Oklahoma will be featured on the Bass Pro Outdoor World Radio Show on August 18, 2018. McDonald will highlight the Refuge which hosts nearly 2 million visitors annually. He will discuss wildlife management and in

particular will focus on elk hunting offered by the Refuge. The U.S. Fish and Wildlife Service has been working with the Oklahoma Department of Wildlife Conservation on expanding potential hunting opportunities on national wildlife refuges in the state. Mr. McDonald will also talk about potential hunts for deer and wild turkey in the coming years. The show airs at 10 a.m. and 5 p.m. ET on Sirius XM Channel 147.

Supportive Stakeholders: Oklahoma Dept. of Wildlife Conservation, U.S. Fish and Wildlife Service, the hunting community, Lawton, OK and surrounding communities.

Impacted Locations: Lawton, Oklahoma and surrounding area.

TITLE: Trinity River NWR Hunting Lottery

Topic: Trinity River NWR is accepting applications for a hunting lottery draw for public Big Game and Upland Game hunting opportunities on the Refuge. Applicants do not need to be present to be selected but are welcome to attend the drawing. The lottery is open from August 6 to September 1, 2018 with drawings taken place September 10. A total of 8,000 acres will be open to hunting for deer, feral swine, squirrel, and rabbit. Big Game hunting includes archery, general gun, and muzzleloader seasons. If selected, you will be allowed to bring one adult guest and a youth (ages 12-17) or two youth hunters at no additional cost.

Supportive Stakeholders: Texas Parks & Wildlife Department, U.S. Fish and Wildlife Service, hunting community, community of Liberty, TX and surrounding areas

Impacted Location: Liberty, Texas area

Endangered Species Act Recovery Actions

[NEW] Texas Coastal Bend Shortgrass Prairie Multi-Species Final Recovery Plan – The FWS expects to finalize the Texas Coastal Bend Shortgrass Prairie Multi-species Recovery Plan in the coming weeks. The plan focuses on the recovery of the slender rush-pea and the South Texas ambrosia, two endangered plants found in the Texas Coastal Bend area. Both species were listed due to the significant reduction and degradation of native shortgrass prairie by nonnative invasive grasses within the South Texas coastal area. The draft recovery plan was published in June 2017. The final recovery plan outlines restoration and management actions needed to restore and maintain the shortgrass prairie habitat and recover these two species. No controversy is expected. Outreach will include an email to key partners and congressional offices.

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for

the LLNB. The target date for the post-delisting monitoring plan is late August/September. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[*NEW*] Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review.

American Burying Beetle 12-month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register in September a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the

U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

[*NEW*] FWS-R2 will publish a Notice of Availability for the Amendment to the Rio Salado Safe Harbor Agreement and Enhancement of Survival Permit during the week of July 30. This amendment of the SHA at the confluence of the Salt, Gila and Agua Fria rivers, in Arizona, primarily addresses the now-listed western yellow-billed cuckoo and the applicant's alteration of the acreages of species habitat covered. No controversy is expected. No outreach planned.

[*UPDATE*] The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was

completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

A Ceremonial signing of the American Burying Beetle (ABB) Programmatic Biological Opinion (PBO) - Amy Leuders, Southwest Regional Director and Bill John Baker, Principal Chief, Cherokee Nation participated in a signing ceremony for the ABB Programmatic Biological Opinion on August 8th, at the Cherokee Nation in Tahlequah, Oklahoma. The Cherokee Nation has established an ABB conservation area which will be used for mitigation for activities covered by the PBO. Five federal agencies have activities covered in the PBO. The Programmatic BO will significantly streamline the ESA consultation process for the Cherokee Nation and federal agencies, allowing the Cherokee Nation to expedite projects and better serve Indian people. Media invited.

Lesser-Prairie Chicken Surveys - On July 10, the Western Association of Fish and Wildlife Agencies released the 2018 lesser prairie-chicken aerial survey results. The survey indicates an estimated breeding population of 38,637 birds this year, compared to 29,934 birds counted last year. The FWS will review the survey report. The state natural resources agencies in New Mexico, Colorado, Oklahoma, Texas and Kansas began aerial surveys in May for the lesser prairie-chicken.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. Additionally, we are seeking comments on whether we should consider excluding Units 4 and 5 (both Rio Grande units) due to national security concerns. In total, the Service is considering the exclusion of 345 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in the Summer 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer

reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

National Wildlife Refuge Actions

On June 5, 2018 the U.S. Fish and Wildlife Service's Texas Fish and Wildlife Conservation Office and Laguna Atascosa National Wildlife Refuge along with our partners Texas Parks and Wildlife Department and the University of Texas Rio Grande Valley began fish monitoring on the Bahia Grande Management Unit of Laguna Atascosa NWR in south Texas. The monitoring will assess changes in fish and aquatic species populations before and after the Bahia Grande channel widening restoration project. The channel widening project is expected to increase tidal exchange and restore more natural salinity regimes along with enhancing natural hydrology to improve wetlands. The monitoring results will be used to create a fisheries management plan to increase public fishing opportunities on Laguna Atascosa National Wildlife Refuge. Monitoring will continue biannually prior to construction and three years post construction.

Hunting and fishing assessments for national wildlife refuges in the states of Oklahoma, Arizona, and New Mexico will all be completed by the end of July 2018. Region 2 Chief of Hunting and Fishing along with Refuge Supervisors, Refuge Managers, and staff assessed refuge regulations for alignment with State regulations and reviewed potential new or expanded opportunities to implement S.O. 3347 and S.O. 3356.

Border-Related Activities

Border Coordination: Road Construction – FWS is working with the U.S. Border Patrol & Air and Marine Program Management Office (BPAM PMO) to provide water from an FWS-owned well on the Buenos Aires National Wildlife Refuge. Part of the project will require the use of a portion of the refuge's water right to support this national security project. The Baboquivari Road Construction and Repair Project began March 16 and will occur through June 2018. CBP will fund electricity use for pumping the water, and will have equipment in place to facilitate optimum functionality during the project's period of performance. This will ensure both the CBP mission and FWS landscape conservation mission are being met.

Border Coordination: Communication Towers - Work continues between FWS and U.S. Customs and Border Protection (CBP) for the Block-1 Replacement (B1R) of existing infrastructure with integrated fixed towers located on and adjacent to the Buenos Aires National Wildlife Refuge in Arizona. A total of two communication towers and four surveillance towers on the refuge have been upgraded with technology that will replace existing equipment and improve detection of illegal border activities. Now that the new construction is complete, CBP is testing and fine-tuning the new technology prior to removal of the existing towers, scheduled for 2018.

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Endangered Species Act Recovery Actions

[*NEW*] Black-capped vireo final Post-delisting Monitoring Plan – FWS anticipates signing the post-delisting monitoring plan (PDMP) for the black-capped vireo in late August or September. On March 13, 2018, FWS announced the availability of a draft post-delisting monitoring (PDMP) plan for the black-capped vireo (*Vireo atricapilla*), which was removed from the Federal List of Endangered and Threatened Wildlife on April 16, 2017. The draft PDMP was revised based on peer review and public comments. The final PDMP describes the methods we propose to monitor the status of the vireo and its habitat, in cooperation with the States of Texas and Oklahoma and other conservation partners, for the next 12-years. The final PDMP will be posted on the Service's website and announced through a News Release and social media post.

Texas Coastal Bend Shortgrass Prairie Multi-Species Final Recovery Plan – The FWS expects to finalize the Texas Coastal Bend Shortgrass Prairie Multi-species Recovery Plan in the coming weeks. The plan focuses on the recovery of the slender rush-pea and the South Texas ambrosia, two endangered plants found in the Texas Coastal Bend area. Both species were listed due to the significant reduction and degradation of native shortgrass prairie by nonnative invasive grasses within the South Texas coastal area. The draft recovery plan was published in June 2017. The final recovery plan outlines restoration and management actions needed to restore and maintain the shortgrass prairie habitat and recover these two species. No controversy is expected. Outreach will include an email to key partners and congressional offices.

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late August/September. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[*NEW*] Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review.

American Burying Beetle 12-month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register in September a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and

increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

[*NEW*] FWS-R2 will publish a Notice of Availability for the Amendment to the Rio Salado Safe Harbor Agreement and Enhancement of Survival Permit during the week of July 30. This amendment of the SHA at the confluence of the Salt, Gila and Agua Fria rivers, in Arizona, primarily addresses the now-listed western yellow-billed cuckoo and the applicant's alteration of the acreages of species habitat covered. No controversy is expected. No outreach planned.

[NEW] Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has drafted a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the current Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA was recently submitted to the FWS for review.

[Update] Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in Fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

[*UPDATE*] The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern

United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

Lesser-Prairie Chicken Surveys - On July 10, the Western Association of Fish and Wildlife Agencies released the 2018 lesser prairie-chicken aerial survey results. The survey indicates an estimated breeding population of 38,637 birds this year, compared to 29,934 birds counted last year. The FWS will review the survey report. The state natural resources agencies in New Mexico, Colorado, Oklahoma, Texas and Kansas began aerial surveys in May for the lesser prairie-chicken.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) ITP – LISD submitted a draft habitat conservation plan and incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The HCP and ITP, if issued by FWS, will provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. One of the species identified in the application is the endangered black-capped vireo. FWS continues to meet with the applicant and other vested parties on the draft HCP and to discuss proposed secondary access road alternatives. We met with LISD on April 4, 2018, and expect LISD to provide an updated draft Habitat Conservation Plan and incidental take permit in the coming weeks. Significant Congressional interest, as well as strong opposition from other parties. Planned outreach when NOI is published includes issuing a news bulletin. More details available in past reports.

National Wildlife Refuge Actions
Nothing significant to report.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

FishBites Report

TITLE: Valle de Oro National Wildlife Refuge supports fishing opportunities for local youth.

Topic: On Friday, June 29th, Valle de Oro NWR teamed up with the U.S. Forest Service's Rocky Mountain Research Station and Albuquerque Sign Language Academy (ASLA) to provide a day long fishing experience for youth crew participants. Crew members from an American Sign Language crew based out of ASLA as well as members of Valle de Oro NWR's Youth Conservation Crew (YCC) spent the day fishing at Sandia Lakes on the Pueblo of Sandia. The crew members ranged in age from 13 to 25 and many of them were first time anglers. At the end of the day, all participants were sent home with prizes of brand new, fully stocked, tackle boxes and/or new fishing poles, with the goal of sending these youths on their way with all of supplies they need to continue building their fishing skills.

Supportive Stakeholders: Albuquerque Sign Language Academy, U.S. Forest Service's Rocky Mountain Research Station, Pueblo of Sandia

Impacted Locations: Albuquerque, N.M. area

Title/Issue	**Anticipated Publication Date**	**Current Status**
David Sikes Corpus Christi (TX) Caller-Times	TBD	Contacted Aransas NWR about follow-up to Hurricane Harvey damage. Doing a "1 Year Later" story on recovery efforts along the Gulf Coast and is including the Refuge in the story.

Week Ahead Schedule of Meetings, Hearings, and Travel
Nothing significant to report.

Immediate Announcements and Actions (within the next 14 days)
Nothing significant to report.

15-60 Day Look Ahead
Nothing significant to report.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

Black-capped vireo final Post-Delisting Monitoring Plan – FWS anticipates signing the post-delisting monitoring plan (PDMP) for the black-capped vireo in late August or September. On March 13, 2018, FWS announced the availability of a draft post-delisting monitoring (PDMP) plan for the black-capped vireo (*Vireo atricapilla*), which was removed from the Federal List of Endangered and Threatened Wildlife on April 16, 2017. The draft PDMP was revised based on peer review and public comments. The final PDMP describes the methods we propose to monitor the status of the vireo and its habitat, in cooperation with the States of Texas and Oklahoma and other conservation partners, for the next 12-years. The final PDMP will be posted on the Service's website and announced through a News Release and social media post.

Texas Coastal Bend Shortgrass Prairie Multi-Species Final Recovery Plan – The FWS has finalized the Texas Coastal Bend Shortgrass Prairie Multi-Species Recovery Plan. The plan focuses on the recovery of the slender rush-pea and the South Texas ambrosia, two endangered plants found in the Texas Coastal Bend area. Both species were listed due to the significant reduction and degradation of native shortgrass prairie by nonnative invasive grasses within the South Texas coastal area. The draft recovery plan was published in June 2017. The final recovery plan outlines restoration and management actions needed to restore and maintain the shortgrass prairie habitat and recover these two species. No controversy is expected. Outreach will include an email to key partners and congressional offices.

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late August/September. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[*NEW*] Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review.

American Burying Beetle 12-month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register in September a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to

comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

[*NEW*] FWS-R2 will publish a Notice of Availability for the Amendment to the Rio Salado Safe Harbor Agreement and Enhancement of Survival Permit during the week of July 30. This amendment of the SHA at the confluence of the Salt, Gila and Agua Fria rivers, in Arizona, primarily addresses the now-listed western yellow-billed cuckoo and the applicant's alteration of the acreages of species habitat covered. No controversy is expected. No outreach planned.

[UPDATE] Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandergrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, an ITP will be issued that provides the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

[*UPDATE*] The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has drafted a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the current Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA

has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA was recently submitted to the FWS for review.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in Fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

Lesser-Prairie Chicken Surveys - On July 10, the Western Association of Fish and Wildlife Agencies released the 2018 lesser prairie-chicken aerial survey results. The survey indicates an estimated breeding population of 38,637 birds this year, compared to 29,934 birds counted last year. The FWS will review the survey report. The state natural resources agencies in New Mexico, Colorado, Oklahoma, Texas and Kansas began aerial surveys in May for the lesser prairie-chicken.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

National Wildlife Refuge Actions

Aransas National Wildlife Refuge and surrounding habitats along the Texas coast is the wintering home of the wild population of endangered whooping cranes. U.S. Fish and Wildlife Service biologists have completed analysis of aerial surveys of the Aransas-Wood Buffalo whooping crane population done last winter. A switch in aircraft the previous winter and a shift to surveying later in the winter when a larger proportion of the population had arrived helped improve accuracy of the counts. Preliminary data analysis indicated 505 whooping cranes, including 49 juveniles, in the primary survey area (approximately 153,950 acres) centered on Aransas National Wildlife Refuge near Austwell, Texas. An additional 21 birds were noted outside the primary survey area during the survey. This marks the 6th year in a row that the population has increased in size and the first time the population has topped the 500 mark.

On Thursday, August 30th, Congressman Markwayne Mullin (OK-2) will visit Tishomingo National Wildlife Refuge. Construction of a new office, visitor center and maintenance shop has started and Congressman Mullin is very interested in seeing the work thus far and receiving an update on the project. In 2015, the Tishomingo NWR experienced historic flood events which inundated approximately 85 percent of the refuge for several months. In order to prevent a recurrence in the future, the Service determined funding would be better served by identifying a new location on higher ground and constructing new facilities instead of rehabilitating the existing damaged structures. A public ceremony will also be held upon completion of the new facilities in 2019.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

FishBites Report

TITLE: Valle de Oro National Wildlife Refuge "Build Your Refuge Day"

Topic: The public is invited to attend the Build Your Refuge Day to be a proud part of community and the refuge. Attendees can assist in building the first walking/hiking trail on the refuge as well as offering ideas for future education a and interpretive programming. In addition there will be family friendly activities, refuge tours, music, food, and more.

Supportive Stakeholders: U.S. Fish and Wildlife Service, community partners, community of Albuquerque.

Impacted Location: Albuquerque, New Mexico

TITLE: New Conviction Under Continuing Investigation Led by U.S. Fish and Wildlife Service and FBI into Violations of the Indian Arts and Crafts Act

Topic: U.S. District Judge Judith C. Herrera of the District of New Mexico today sentenced Nael Ali, 54, of Albuquerque, N.M., for violating the Indian Arts and Craft Act (IACA) by fraudulently selling counterfeit Native American jewelry as Indian-Made. Judge Herrera sentenced Ali, who previously pled guilty to two felony IACA charges, to six months of imprisonment followed by a year of supervised release. Ali also was ordered to pay $9,048.78 in restitution. The charges against Ali and co-defendant Mohammad Manasra, 58, also of Albuquerque, were the result of an ongoing federal investigation led by the U.S. Fish and Wildlife Service (FWS) and FBI into an international scheme to violate the IACA. During a law enforcement operation in Oct. 2015, federal agents executed 15 search warrants in New Mexico and one in California.

Supportive Stakeholders: FBI, Homeland Security Investigations (HSI), the Indian Arts and Crafts Board, and the State of New Mexico Department of Game and Fish.

Impacted Location: Albuquerque, NM

TITLE: New stocking method for threatened Gila trout shows promise for expanding populations, angling opportunity and eventual recovery.

Commented [1]: New on 8 30.18

Topic: Two streams in the Gila National Forest, Sacaton and Little Dry creeks, were left fishless following a slurry of ash pouring off the mountains, post-forest fire. Mora National Fish Hatchery, New Mexico Fish and Wildlife Conservation Office, New Mexico Dept of Game and Fish and U.S. Forest Service biologists carried in Gila trout eyed-eggs from the hatchery in the spring. They built redds for the eggs to incubate. Follow-up qualitative sampling reveals those eggs have hatched and the formerly fishless waters now harbor future catchable Gila trout. Biologists plan to quantify the rate of recruitment into larger size classes of trout to determine the efficacy of this novel stocking method in those and in other native Gila trout streams. This may perhaps expedite recovery and lessen cost of distributing fish to remote waters.

Supportive stakeholders: Trout Unlimited, Backcountry Hunters and Anglers, New Mexico Department of Game and Fish, Gila National Forest

Impacted location: Southwest New Mexico

Title/Issue	**Anticipated Publication Date**	**Current Status**
David Sikes Corpus Christi (TX) Caller Times	August 21, 2018	Coverage of wild whooping crane population breaking 500 mark

Week Ahead Schedule of Meetings, Hearings, and Travel

FWS's National Tribal Liaisons meeting will be held September 11-13 at Santa Ana Pueblo in New Mexico. .

Immediate Announcements and Actions (within the next 14 days)
Nothing significant to report.

15-60 Day Look Ahead
The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. (See full entry in Recovery section below).

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

[*UPDATE*]Black-capped vireo final Post-delisting Monitoring Plan – FWS signed the post-delisting monitoring plan (PDMP) for the black-capped vireo in late August or September. On March 13, 2018, FWS announced the availability of a draft post-delisting monitoring (PDMP) plan for the black-capped vireo (*Vireo atricapilla*), which was removed from the Federal List of Endangered and Threatened Wildlife on April 16, 2017. The draft PDMP was revised based on peer review and public comments. The final PDMP describes the methods we propose to monitor the status of the vireo and its habitat, in cooperation with the States of Texas and Oklahoma and other conservation partners, for the next 12-years. The final PDMP will be posted on the Service's website and announced through a News Release and social media post.

Texas Coastal Bend Shortgrass Prairie Multi-Species Final Recovery Plan – The FWS has finalized the Texas Coastal Bend Shortgrass Prairie Multi-species Recovery Plan. The plan focuses on the recovery of the slender rush-pea and the South Texas ambrosia, two endangered plants found in the Texas Coastal Bend area. Both species were listed due to the significant reduction and degradation of native shortgrass prairie by nonnative invasive grasses within the South Texas coastal area. The draft recovery plan was published in June 2017. The final recovery plan outlines restoration and management actions needed to restore and maintain the shortgrass prairie habitat and recover these two species. No controversy is expected. Outreach will include an email to key partners and congressional offices.

[NEW] Southwest Regional Director has signed a final Recovery Plan for the Pima Pineapple Cactus. Recovery elements focus on conserving habitat in two recovery units in southern Arizona (Pima and Santa Cruz counties) and in Sonora Mexico. Primary threat is changed fire regime resulting from invasive Layman's lovegrass. Controversy low. Outreach will be primarily

correspondence and meetings with land managers, Pima County Multi-Species Management Plan, and livestock management stakeholders.

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late August/September. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

[*UPDATE*] Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. Include the DSL 90-day finding in an upcoming batched Federal Register notice. (See related DSL CCA/A entry in Recovery section below.)

American Burying Beetle 12-month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A

communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register in September a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, an ITP will be issued that provides the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

[*UPDATE*] The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has drafted a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the current Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA was recently submitted to the FWS for review.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in Fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

Lesser-Prairie Chicken Surveys - On July 10, the Western Association of Fish and Wildlife Agencies released the 2018 lesser prairie-chicken aerial survey results. The survey indicates an estimated breeding population of 38,637 birds this year, compared to 29,934 birds counted last year. The FWS will review the survey report. The state natural resources agencies in New Mexico, Colorado, Oklahoma, Texas and Kansas began aerial surveys in May for the lesser prairie-chicken.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

National Wildlife Refuge Actions

Aransas National Wildlife Refuge and surrounding habitats along the Texas coast is the wintering home of the wild population of endangered whooping cranes. U.S. Fish and Wildlife Service biologists have completed analysis of aerial surveys of the Aransas-Wood Buffalo whooping crane population done last winter. A switch in aircraft the previous winter and a shift to surveying later in the winter when a larger proportion of the population had arrived helped improve accuracy of the counts. Preliminary data analysis indicated 505 whooping cranes, including 49 juveniles, in the primary survey area (approximately 153,950 acres) centered on Aransas National Wildlife Refuge near Austwell, Texas. An additional 21 birds were noted outside the primary survey area during the survey. This marks the 6th year in a row that the population has increased in size and the first time the population has topped the 500 mark.

[UPDATE] On Thursday, August 30th, Congressman Markwayne Mullin (OK-2) visited Tishomingo National Wildlife Refuge. Construction of a new office, visitor center and maintenance shop has started and Congressman Mullin was interested in seeing the work thus far and receiving an update on the project. In 2015, the Tishomingo NWR experienced historic flood events which inundated approximately 85 percent of the refuge for several months. In order to prevent a recurrence in the future, the Service determined funding would be better served by identifying a new location on higher ground and constructing new facilities instead of rehabilitating the existing damaged structures. A public ceremony will be held when the new facilities are completed in 2019.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

U.S. Fish and Wildlife Service

Through 7 September, 2018

FishBites Report

TITLE:	Valle de Oro National Wildlife Refuge "Build Your Refuge Day"
Topic:	The public is invited to attend the Build Your Refuge Day to be a proud part of community and the refuge. Attendees can assist in building the first walking/hiking trail on the refuge as well as offering ideas for future education and interpretive programming. In addition, there will be family friendly activities, refuge tours, music, food, and more.
Supportive Stakeholders:	U.S. Fish and Wildlife Service, community partners, community of Albuquerque.
Impacted Location:	Albuquerque, New Mexico
TITLE:	New stocking method for threatened Gila trout shows promise for expanding populations, angling opportunity and eventual recovery.
Topic:	Two streams in the Gila National Forest, Sacaton and Little Dry creeks, were left fishless following a slurry of ash pouring off the mountains, post-forest fire. Mora National Fish Hatchery, New Mexico Fish and Wildlife Conservation Office, New Mexico Dept of Game and Fish and U.S. Forest Service biologists carried in Gila trout eyed-eggs from the hatchery in the spring. They built redds for the eggs to incubate. Follow-up qualitative sampling reveals those eggs have hatched and the formerly fishless waters now harbor future catchable Gila trout. Biologists plan to quantify the rate of recruitment into larger size classes of trout to determine the efficacy of this novel stocking method in those and in other native Gila trout streams. This may perhaps expedite recovery and lessen cost of distributing fish to remote waters.

Supportive stakeholders: Trout Unlimited, Backcountry Hunters and Anglers, New Mexico Department of Game and Fish, Gila National Forest

Impacted location: Southwest New Mexico

Title/Issue	Anticipated Publication Date	Current Status
Book author Larkin Powell	TBD	Seeks information on warbler and vireo and birding near Ft. Hood for book manuscript on birding in the Plains states.
Cronkite News Service (Arizona NPR)	September 7, 2018	Center for Biological Diversity's lawsuit against the U.S. Fish and Wildlife Service for not protecting the roundtail chub with the Endangered Species Act. No comment on litigation & provided previous products for background.

Week Ahead Schedule of Meetings, Hearings, and Travel

FWS's National Tribal Liaisons meeting will be held September 11-13 at Santa Ana Pueblo in New Mexico.

Immediate Announcements and Actions (within the next 14 days)

Nothing significant to report.

15-60 Day Look Ahead

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. (See full entry in Recovery section below).

Upcoming Workshops & Meetings

Nothing significant to report.

Endangered Species Act Recovery Actions

Black-capped vireo final Post-delisting Monitoring Plan – FWS signed the post-delisting monitoring plan (PDMP) for the black-capped vireo in September. On March 13, 2018, FWS announced the availability of a draft post-delisting monitoring (PDMP) plan for the black-capped vireo (*Vireo atricapilla*), which was removed from the Federal List of Endangered and Threatened Wildlife on April 16, 2017. The draft PDMP was revised based on peer review and public comments. The final PDMP describes the methods we propose to monitor the status of the vireo and its habitat, in cooperation with the States of Texas and Oklahoma and other conservation partners, for the next 12-years. The final PDMP will be posted on the Service's website and announced through a News Release and social media post.

Texas Coastal Bend Shortgrass Prairie Multi-Species Final Recovery Plan – The FWS has finalized the Texas Coastal Bend Shortgrass Prairie Multi-species Recovery Plan. The plan focuses on the recovery of the slender rush-pea and the South Texas ambrosia, two endangered plants found in the Texas Coastal Bend area. Both species were listed due to the significant reduction and degradation of native shortgrass prairie by nonnative invasive grasses within the South Texas coastal area. The draft recovery plan was published in June 2017. The final recovery plan outlines restoration and management actions needed to restore and maintain the shortgrass prairie habitat and recover these two species. No controversy is expected. Outreach will include an email to key partners and congressional offices.

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late August/September. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[NEW] American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. include the DSL 90-day finding in an upcoming batched *Federal Register* notice. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

American Burying Beetle 12-month finding – FWS will propose to reclassify the American burying beetle from an endangered species to a threatened species under the Endangered Species Act. Focused conservation efforts have improved the beetle's status, although it continues to face threats. We will also propose a rule under section 4(d) tailoring prohibitions to those most likely to harm the American burying beetle and its habitats. The American burying beetle currently occurs in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. This finding will likely be of interest to a number of parties and may be opposed by the petitioners, the Center for Biological Diversity and Center for American burying beetle conservation. Target date for submitting to the *Federal Register* is mid-June. A communications plan has been drafted and will be shared with FWS HQ External Affairs that includes congressional offices, local and state officials and stakeholders. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register in September a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and

increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

[UPDATE] Lesser-Prairie Chicken Surveys - On July 10, the Western Association of Fish and Wildlife Agencies released the 2018 lesser prairie-chicken aerial survey results.The survey indicates an estimated breeding population of 38,637 birds this year, compared to 29,934 birds counted last year. FWS expects to receive the final report by the end of September and will review it in more detail at that time. FWS expects to see the final report in September and will review it in more detail once we receive it.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, an ITP will be issued that provides the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has drafted a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the current Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA was recently submitted to the FWS for review.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in Fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

National Wildlife Refuge Actions

Aransas National Wildlife Refuge and surrounding habitats along the Texas coast is the wintering home of the wild population of endangered whooping cranes. U.S. Fish and Wildlife Service biologists have completed analysis of aerial surveys of the Aransas-Wood Buffalo whooping crane population done last winter. A switch in aircraft the previous winter and a shift to surveying later in the winter when a larger proportion of the population had arrived helped

improve accuracy of the counts. Preliminary data analysis indicated 505 whooping cranes, including 49 juveniles, in the primary survey area (approximately 153,950 acres) centered on Aransas National Wildlife Refuge near Austwell, Texas. An additional 21 birds were noted outside the primary survey area during the survey. This marks the 6th year in a row that the population has increased in size and the first time the population has topped the 500 mark.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Endangered Species Act Recovery Actions

Black-capped vireo final Post-delisting Monitoring Plan – FWS signed the post-delisting monitoring plan (PDMP) for the black-capped vireo in September. On March 13, 2018, FWS announced the availability of a draft post-delisting monitoring (PDMP) plan for the black-capped vireo (*Vireo atricapilla*), which was removed from the Federal List of Endangered and Threatened Wildlife on April 16, 2017. The draft PDMP was revised based on peer review and public comments. The final PDMP describes the methods we propose to monitor the status of the vireo and its habitat, in cooperation with the States of Texas and Oklahoma and other conservation partners, for the next 12-years. The final PDMP will be posted on the Service's website and announced through a News Release and social media post.

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late August/September. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. include the DSL 90-day finding in an upcoming batched *Federal Register* notice. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register in September a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

[UPDATE] Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, an Environmental Assessment to analyze the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

[UPDATE] Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has submitted a permit application and a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the current Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA is currently being reviewed by FWS staff for Biological sufficiency.

Lesser-Prairie Chicken Surveys - On July 10, the Western Association of Fish and Wildlife Agencies released the 2018 lesser prairie-chicken aerial survey results. The survey indicates an estimated breeding population of 38,637 birds this year, compared to 29,934 birds counted last year. FWS expects to receive the final report by the end of September and will review it in more detail at that time. FWS expects to see the final report in September and will review it in more detail once we receive it.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in Fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

National Wildlife Refuge Actions

Aransas National Wildlife Refuge and surrounding habitats along the Texas coast is the wintering home of the wild population of endangered whooping cranes. U.S. Fish and Wildlife Service biologists have completed analysis of aerial surveys of the Aransas-Wood Buffalo whooping crane population done last winter. A switch in aircraft the previous winter and a shift to surveying later in the winter when a larger proportion of the population had arrived helped

improve accuracy of the counts. Preliminary data analysis indicated 505 whooping cranes, including 49 juveniles, in the primary survey area (approximately 153,950 acres) centered on Aransas National Wildlife Refuge near Austwell, Texas. An additional 21 birds were noted outside the primary survey area during the survey. This marks the 6th year in a row that the population has increased in size and the first time the population has topped the 500 mark.

Buenos Aires National Wildlife Refuge, staff met with the Arizona Chapter of Safari Club International (AZSCI) on 9/2/18 to plan the creation of a group campsite to accommodate youth hunting camps. The site will also be used for specific ladies hunting camps, scouting activities and other permitted groups. Volunteers from AZSCI in conjunction with refuge maintenance staff will complete the site on 10/13/18. The first expected use will a youth deer hunt starting 11/22/18.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

FishBites Report

TITLE: **Dragonfly Festival at Bitter Lake NWR**

Topic: The 17th Annual Dragonfly Festival near Roswell, New Mexico, was a successful outreach event. Refuge staff and volunteers offered dragonfly, birding and wildlife tours, as well as a kids fishing pool, a photography workshop, live wildlife exhibits, arts and crafts, stargazing, and guest speakers.

Supportive stakeholders: Roswell Astronomy Club, Roswell Chamber of Commerce, Friends of Bitter Lake,

Impacted location: Roswell, New Mexico

Title/Issue	Anticipated Publication Date	Current Status
Book author Larkin Powell	TBD	Seeks information on warbler and vireo and birding near Ft. Hood for book manuscript on birding in the Plains states.
Cronkite News Service (Arizona NPR)	September 7, 2018	Center for Biological Diversity's lawsuit against the U.S. Fish and Wildlife Service for not protecting the roundtail chub with the Endangered Species Act. No comment on litigation & provided previous products for background.

Week Ahead Schedule of Meetings, Hearings, and Travel

FWS's National Tribal Liaisons meeting will be held September 11-13 at Santa Ana Pueblo in New Mexico.

Immediate Announcements and Actions (within the next 14 days)
Nothing significant to report.

15-60 Day Look Ahead
The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. (See full entry in Recovery section below).

The Barton Springs Edwards Aquifer Conservation District hosted a ceremony for the Final Barton Springs Edwards Aquifer Conservation District Habitat Conservation Plan on Thursday, September 20 in Austin, TX. Representatives from Region 2, including Amy Lueders, Southwest Regional Director attended.

Steve Harvey Fishing Event – On Saturday, October 27, 2018, the FWS Arlington Ecological Services Field Office will partner with the Steve Harvey Mentoring Program in Dallas to support a fishing day for inner city youth. The FWS has partnered with the Steve Harvey Foundation for a number of years. This year's youth fishing event will be held in coordination with Texas Parks and Wildlife Department at Cedar Hill State Park.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

Black-capped vireo final Post-delisting Monitoring Plan – FWS signed the post-delisting monitoring plan (PDMP) for the black-capped vireo in September. On March 13, 2018, FWS announced the availability of a draft post-delisting monitoring (PDMP) plan for the black-capped vireo (*Vireo atricapilla*), which was removed from the Federal List of Endangered and Threatened Wildlife on April 16, 2017. The draft PDMP was revised based on peer review and public comments. The final PDMP describes the methods we propose to monitor the status of the vireo and its habitat, in cooperation with the States of Texas and Oklahoma and other conservation partners, for the next 12-years. The final PDMP will be posted on the Service's website and announced through a News Release and social media post.

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late August/September. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. include the DSL 90-day finding in an upcoming batched *Federal Register* notice. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register in September a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the

Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

[NEW] American Electric Power (AEP) Habitat Conservation Plan NOA– The FWS anticipates publishing a Notice of Availability of AEP's Habitat Conservation Plan, final Environmental Impact Statement, and draft Record of Decision in the *Federal Register* in mid-October. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. We will not finalize the ROD or issue an Incidental Take Permit until at least 30 days after publication in the *Federal Register* of the notice of availability for the final EIS. A news bulletin has been drafted. Outreach, including issuing a news release locally is planned at time of publication in the *Federal Register*.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, an Environmental Assessment to analyze the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has submitted a permit application and a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the current Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA is currently being reviewed by FWS staff for Biological sufficiency.

Lesser-Prairie Chicken Surveys - On July 10, the Western Association of Fish and Wildlife Agencies released the 2018 lesser prairie-chicken aerial survey results. The survey indicates an estimated breeding population of 38,637 birds this year, compared to 29,934 birds counted last year. FWS expects to receive the final report by the end of September and will review it in more detail at that time. FWS expects to see the final report in September and will review it in more detail once we receive it.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in Fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

National Wildlife Refuge Actions

Aransas National Wildlife Refuge and surrounding habitats along the Texas coast is the wintering home of the wild population of endangered whooping cranes. U.S. Fish and Wildlife Service biologists have completed analysis of aerial surveys of the Aransas-Wood Buffalo whooping crane population done last winter. A switch in aircraft the previous winter and a shift to surveying later in the winter when a larger proportion of the population had arrived helped improve accuracy of the counts. Preliminary data analysis indicated 505 whooping cranes, including 49 juveniles, in the primary survey area (approximately 153,950 acres) centered on Aransas National Wildlife Refuge near Austwell, Texas. An additional 21 birds were noted outside the primary survey area during the survey. This marks the 6th year in a row that the population has increased in size and the first time the population has topped the 500 mark.

Buenos Aires National Wildlife Refuge, staff met with the Arizona Chapter of Safari Club International (AZSCI) on 9/2/18 to plan the creation of a group campsite to accommodate youth hunting camps. The site will also be used for specific ladies hunting camps, scouting activities and other permitted groups. Volunteers from AZSCI in conjunction with refuge maintenance staff will complete the site on 10/13/18. The first expected use will the a youth deer hunt starting 11/22/18.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

15-60 Day Look Ahead

Steve Harvey Fishing Event – On Saturday, October 27, 2018, the FWS Arlington Ecological Services Field Office will partner with the Steve Harvey Mentoring Program in Dallas to support a fishing day for inner city youth. The FWS has partnered with the Steve Harvey Foundation for a number of years. This year's youth fishing event will be held in coordination with Texas Parks and Wildlife Department at Cedar Hill State Park.

Upcoming Workshops & Meetings

Nothing significant to report.

Endangered Species Act Recovery Actions

[*UPDATE*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late October. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[*NEW*] Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media is planned. Target date for submitting to the *Federal Register* is mid-December 2018.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. include the DSL 90-day finding in an upcoming batched *Federal Register* notice. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register in September a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

American Electric Power (AEP) Habitat Conservation Plan NOA– The FWS anticipates publishing a Notice of Availability of AEP's Habitat Conservation Plan, final Environmental Impact Statement, and draft Record of Decision in the *Federal Register* in mid-October. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. We will not finalize the ROD or issue an Incidental Take Permit until at least 30 days after publication in the *Federal Register* of the notice of availability for the final EIS. A news bulletin has been drafted. Outreach, including issuing a news release locally is planned at time of publication in the *Federal Register*.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, an Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has submitted a permit application and a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the current Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA is currently being reviewed by FWS staff for Biological sufficiency.

Lesser-Prairie Chicken Surveys - On July 10, the Western Association of Fish and Wildlife Agencies released the 2018 lesser prairie-chicken aerial survey results. The survey indicates an estimated breeding population of 38,637 birds this year, compared to 29,934 birds counted last year. FWS expects to receive the final report by the end of September and will review it in more detail at that time. FWS expects to see the final report in September and will review it in more detail once we receive it.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in Fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of

Public Accounts). The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

National Wildlife Refuge Actions

Aransas National Wildlife Refuge and surrounding habitats along the Texas coast is the wintering home of the wild population of endangered whooping cranes. U.S. Fish and Wildlife Service biologists have completed analysis of aerial surveys of the Aransas-Wood Buffalo whooping crane population done last winter. A switch in aircraft the previous winter and a shift to surveying later in the winter when a larger proportion of the population had arrived helped improve accuracy of the counts. Preliminary data analysis indicated 505 whooping cranes, including 49 juveniles, in the primary survey area (approximately 153,950 acres) centered on Aransas National Wildlife Refuge near Austwell, Texas. An additional 21 birds were noted outside the primary survey area during the survey. This marks the 6th year in a row that the population has increased in size and the first time the population has topped the 500 mark.

Buenos Aires National Wildlife Refuge, staff met with the Arizona Chapter of Safari Club International (AZSCI) on 9/2/18 to plan the creation of a group campsite to accommodate youth hunting camps. The site will also be used for specific ladies hunting camps, scouting activities and other permitted groups. Volunteers from AZSCI in conjunction with refuge maintenance staff will complete the site on 10/13/18. The first expected use will the a youth deer hunt starting 11/22/18.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service
Region 2 Weekly Report

Through 5 October, 2018

Media Contacts

Title/Issue	Anticipated Publication Date	Current Status
Book author Peter Christie	TBD	Seeks to interview retired SAC Nick Chavez on illegal trade in exotic pets. Declined. Referred to Amy Jonach in HQ.
Book author Larkin Powell	TBD	Seeks information on warbler and vireo and birding near Ft. Hood for book manuscript on birding in the Plains states.
Arizona Republic	Monday 9/24	Annual California condor releases in Arizona on National Public Lands Day. Resulted in two articles -- one front page news featuring lead as a threat, another in the travel section.
Arizona Highways Magazine	Fall/winter 2018	Writer is researching ocelots in Arizona and Arizona's possible contribution to species recovery.
Fishing Tackle Retailer	published	Story and video on WSFR and native trout conservation in New Mexico. https://fishingtackleretailer.com/fishing-for-native-trout-leaves-a-special-longing/

Week Ahead Schedule of Meetings, Hearings, and Travel
Nothing significant to report.

Immediate Announcements and Actions (within the next 14 days)
Nothing significant to report.

15-60 Day Look Ahead

Steve Harvey Fishing Event – On Saturday, October 27, 2018, the FWS Arlington Ecological Services Field Office will partner with the Steve Harvey Mentoring Program in Dallas to support a fishing day for inner city youth. The FWS has partnered with the Steve Harvey Foundation for a number of years. This year's youth fishing event will be held in coordination with Texas Parks and Wildlife Department at Cedar Hill State Park.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

[*UPDATE*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late October No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[*NEW*] Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch

(National Audubon Society). A regional news release to all interested parties and the media is planned. Target date for submitting to the *Federal Register* is mid-December 2018.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. include the DSL 90-day finding in an upcoming batched *Federal Register* notice. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and *cienegas*, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register in September a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the

Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

AEP EIS BRIEFING - On October 5, from 11:45 a.m. -12:30 p.m. MT, Amy Lueders, FWS Southwest Regional Director and Larry Levesque, supervisory fish and wildlife biologist from the Oklahoma Ecological Services Field Office, will brief the DOI Internal Executive Review Team on the final environmental impact statement (EIS) and American Electric Power Habitat Conservation Plan.

[UPDATE] Lesser-Prairie Chicken Surveys - On July 10, the Western Association of Fish and Wildlife Agencies released the 2018 lesser prairie-chicken aerial survey results. The survey indicates an estimated breeding population of 38,637 birds this year, compared to 29,934 birds counted last year. FWS received the final report on October 1 and is reviewing the report.

American Electric Power (AEP) Habitat Conservation Plan NOA– The FWS anticipates publishing a Notice of Availability of AEP's Habitat Conservation Plan, final Environmental Impact Statement, and draft Record of Decision in the *Federal Register* in mid-October. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. We will not finalize the ROD or issue an Incidental Take Permit until at least 30 days after publication in the *Federal Register* of the notice of availability for the final EIS. A news bulletin has been drafted. Outreach, including issuing a news release locally is planned at time of publication in the *Federal Register*.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, an Environmental Assessment to analyze the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use

and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has submitted a permit application and a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the current Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA is currently being reviewed by FWS staff for Biological sufficiency.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in Fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for

ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

National Wildlife Refuge Actions

Aransas National Wildlife Refuge and surrounding habitats along the Texas coast is the wintering home of the wild population of endangered whooping cranes. U.S. Fish and Wildlife Service biologists have completed analysis of aerial surveys of the Aransas-Wood Buffalo whooping crane population done last winter. A switch in aircraft the previous winter and a shift to surveying later in the winter when a larger proportion of the population had arrived helped improve accuracy of the counts. Preliminary data analysis indicated 505 whooping cranes, including 49 juveniles, in the primary survey area (approximately 153,950 acres) centered on Aransas National Wildlife Refuge near Austwell, Texas. An additional 21 birds were noted outside the primary survey area during the survey. This marks the 6th year in a row that the population has increased in size and the first time the population has topped the 500 mark.

Buenos Aires National Wildlife Refuge, staff met with the Arizona Chapter of Safari Club International (AZSCI) on 9/2/18 to plan the creation of a group campsite to accommodate youth hunting camps. The site will also be used for specific ladies hunting camps, scouting activities and other permitted groups. Volunteers from AZSCI in conjunction with refuge maintenance staff will complete the site on 10/13/18. The first expected use will be a youth deer hunt starting 11/22/18.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental

Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation
Nothing significant to report.

Migratory Birds
Nothing significant to report.

Science Applications
Nothing significant to report.

Wildlife and Sport Fish Restoration
Nothing significant to report.

Native American Programs

FWS has a tribal consultation with the Tohono O'Odham Nation in Sells, Arizona, on October 5th regarding the proposed ESA regulations. Arizona Ecological Services, together with Headquarters callers, will represent FWS.

A regional news release to all interested parties and the media is planned. Target date for submitting to the *Federal Register* is mid-December 2018.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. include the DSL 90-day finding in an upcoming batched *Federal Register* notice. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register, (awaiting DOI approval), a proposal to designate 12 acres of critical habitat for the

Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Lesser prairie-chicken SSA – FWS anticipates the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC) will be completed in 2018. FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS technical staff have reviewed, organized, and responded to comments received from the external working group (biologists from the 5 states, WAFWA, NRCS, and academics) and peer reviewers. FWS has now provided the SSA Report to the Directors of the five State Fish & Wildlife Agencies for an Executive Review. The goal of the SSA is to have the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

Other Items of Note

AEP EIS BRIEFING - On October 5, from 11:45 a.m. -12:30 p.m. MT, Amy Lueders, FWS Southwest Regional Director and Larry Levesque, supervisory fish and wildlife biologist from the Oklahoma Ecological Services Field Office, will brief the DOI Internal Executive Review Team on the final environmental impact statement (EIS) and American Electric Power Habitat Conservation Plan.

Lesser-Prairie Chicken Surveys - On July 10, the Western Association of Fish and Wildlife Agencies released the 2018 lesser prairie-chicken aerial survey results.The survey indicates an estimated breeding population of 38,637 birds this year, compared to 29,934 birds counted last year. FWS received the final report on October 1 and is reviewing the report.

[UPDATE] American Electric Power (AEP) Habitat Conservation Plan NOA– The FWS anticipates publishing a Notice of Availability of AEP's Habitat Conservation Plan, final Environmental Impact Statement, and draft Record of Decision in the *Federal Register* on October 19.. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. We will not finalize the ROD or issue an Incidental Take Permit until at least 30 days after publication in the *Federal Register* of the

notice of availability for the final EIS. A news bulletin has been drafted. Outreach, including issuing a news release locally is planned at time of publication in the *Federal Register*.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, an Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has submitted a permit application and a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the current Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA is currently being reviewed by FWS staff for Biological sufficiency.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service

is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in Fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

National Wildlife Refuge Actions

On Saturday, October 13th, staff and volunteers of Anahuac National Wildlife Refuge in Texas will be joining over 20 partner groups in Houston to provide interactive, hands-on activities and community outreach for the 12th annual KBR Kids Day at Guadalupe Plaza Park in Houston, Texas. KBR Kids Day is one of Buffalo Bayou Partnership's signature events, with thousands of children and their families in attendance each year for free family fun. Activity stations will include numerous hands-on activities, a live birds of prey show, local entertainment and performers, a rock climbing wall, and so much more!

Buenos Aires National Wildlife Refuge, staff met with the Arizona Chapter of Safari Club International (AZSCI) on 9/2/18 to plan the creation of a group campsite to accommodate youth hunting camps. The site will also be used for specific ladies hunting camps, scouting activities and other permitted groups. Volunteers from AZSCI in conjunction with refuge maintenance staff will complete the site on 10/13/18. The first expected use will the a youth deer hunt starting 11/22/18.

Anahuac National Wildlife Refuge along the Gulf Coast of Texas will be hosting their annual Fall Fishing Day on Saturday October 27. Youth and their parents have an opportunity to fish and crab for free and participate in fishing related workshops and games including knot-tying, fish/crab cleaning, cast netting, and target casting. This event is a great opportunity to introduce fishing and crabbing to wide audience.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

15-60 Day Look Ahead

Steve Harvey Fishing Event – On Saturday, October 27, 2018, the FWS Arlington Ecological Services Field Office will collaborate with the Steve Harvey Mentoring Program in Dallas to support a fishing day for inner city youth. The FWS has partnered with the Steve Harvey Foundation for a number of years. This year's youth fishing event will be held in coordination with Texas Parks and Wildlife Department at Cedar Hill State Park.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

[*UPDATE*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late October. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[*NEW*] Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media is planned. Target date for submitting to the *Federal Register* is mid-December 2018.

[*UPDATE*] Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical

habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. include the DSL 90-day finding in an upcoming batched *Federal Register* notice. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register, (awaiting DOI approval), a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

<u>Other Items of Note</u>

[*UPDATE*] Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

[*UPDATE*] American Electric Power (AEP) Habitat Conservation Plan NOA– The FWS is published a Notice of Availability of the final Environmental Impact Statement for AEP's

Habitat Conservation Plan,in the *Federal Register* on October 19. American Electric Power developed a Habitat Conservation Plan to address impacts to the endangered American burying beetle that may result from the construction, operation and/or maintenance of electric transmission and distribution lines or other associated infrastructure in Oklahoma, Arkansas and Texas. We will not finalize the Record of Decision or issue an Incidental Take Permit until at least 30 days after publication in the *Federal Register* of the notice of availability for the final EIS. Outreach to Congressional, Tribal, and state contacts was conducted. A news bulletin was shared the day of publication in the *Federal Register* reading room..

Lesser-Prairie Chicken Surveys - On July 10, the Western Association of Fish and Wildlife Agencies released the 2018 lesser prairie-chicken aerial survey results. The survey indicates an estimated breeding population of 38,637 birds this year, compared to 29,934 birds counted last year. FWS received the final report on October 1 and is reviewing the report.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyze the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has submitted a permit application and a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the current Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA is currently being reviewed by FWS staff for biological sufficiency.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the

entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in Fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

National Wildlife Refuge Actions

[*NEW*] Staff at Lower Rio Grande Valley National Wildlife Refuge collaborated with American Forests and the Friends of the Wildlife Corridor for the annual Rio Reforestation project. The project works to restore important wildlife habitat in the Lower Rio Grande Valley in south Texas. Nearly 1,300 people participated in the event over four days including school groups from elementary to high school. The event not only provides forest reforestation to the area, it serves as a hands-on, real world learning experience for local youth in wildlife and habitat management.

[*NEW*] Extensive flooding at Balcones Canyonlands and Trinity River National Wildlife Refuges in Texas if affecting access to refuge lands and hunt areas. Roads and lands are flooded and currently are not passable. As soon as flooding recedes staff will be working diligently to repair any damage or unsafe conditions in efforts to salvage any open hunting seasons.

[*NEW*] On November 6-7, Aransas National Wildlife Refuge in south Texas will host 25 veterans from the San Antonio, TX area at the first annual "Casting with Patriots" event sponsored by the U.S. Fish and Wildlife Service, Salvation Army, Bass Pro Shops, and Cabela's. The veterans will learn about America's National Wildlife Refuges and their wildlife heritage. The focus of the event will be providing them opportunities for fishing both at the Refuge fishing pier and with locally guided boats. For their convenience, the Refuge is also offering the veterans to stay in the Youth Environmental Training Area.

[*NEW*] More than 300 people from local communities attended Refuge Celebration Day at Aransas National Wildlife Refuge on the gulf coast of Texas. The daylong event offered archery, BB gun target shooting stations, a fishing tank stocked with channel catfish from Inks Dam National Fish Hatchery, an arts and crafts tent with all kinds of nature-based activities, face painting, a smartphone scavenger hunt, and nature sketching. Refuge Fire Crews put together a Junior Wildland Firefighter activity area where kids could try on gear and shoot "flames" with a backpack and fire hose. A small live alligator may have stolen the show, as did several other live critters on display. Assisting the Refuge at the event were partners International Crane Foundation, FlatsWorthy, Inc. who did fly fishing demonstrations, Texas Parks and Wildlife, who brought a hands-on fish touch table and offered a casting game for kids. Rockport Kayak came to do kayaking demonstrations but the weather did not pan out, so they answered questions about kayaking and where to kayak on the refuge. Our local Mid-Coast Texas Master Naturalists borrowed pelts and skulls and had a fun and educational table. Refreshments were provided by the Tivoli Volunteer Fire Department and the Austwell-Tivoli senior class. The Friends of Aransas National Wildlife Refuge gave informal tours of the pollinator garden. The Refuge received great feedback from participants.

[*NEW*] The U.S. Fish and Wildlife Service's Coastal Program in the Southwest Region is working with Duck Unlimited and the state of Texas to address barriers to individuals with disabilities for access to hunting opportunities. The Service and its partners hope to provide accessible infrastructure such as hunting blinds, boardwalks, and parking for migratory bird hunting sites on national wildlife refuges and state wildlife management areas along the Gulf Coast of Texas. Partners are currently in initial meetings and planning stages. The Service will provide updates as the project moves forward.

Anahuac National Wildlife Refuge along the Gulf Coast of Texas will be hosting their annual Fall Fishing Day on Saturday October 27. Youth and their parents have an opportunity to fish

and crab for free and participate in fishing related workshops and games including knot-tying, fish/crab cleaning, cast netting, and target casting. This event is a great opportunity to introduce fishing and crabbing to wide audience.

Increasing Outdoor Opportunities along the Texas Coast

[*NEW*] Individuals with disabilities experience numerous challenges associated with participating in outdoor recreation opportunities. Texas has the second largest number of people with disabilities in the United States. The overall percentage of individuals with disabilities in Texas is 11.7 percent. Texas is also home to 1,496,724 veterans, and approximately 28% reported a disability. Ambulatory, hearing and cognitive were the three most frequently reported disabilities. Additionally, approximately 23 percent of Texas veterans (350,021 individuals) have a service connected disability rating. Many individuals with a disability express an interest in hunting and fishing and the state of Texas has encouraged them to enjoy the outdoors by reducing the fees for a hunting and fishing license. However, barriers exist when it comes to accessing public lands and the outdoors. To help address this need, the Region 2 Coastal Program has entered into a cooperative agreement with Ducks Unlimited to provide access and opportunities for migratory bird hunting to people who meet ADA standards and to ensure that National Wildlife Refuges or State Wildlife Management Areas on the Texas Coast will be able to support and provide those hunting opportunities. The goal of this cooperative effort between the Service and Ducks Unlimited is the establishment of migratory bird hunting sites with infrastructure, such as hunting blinds and boardwalks that accommodates disabled hunters.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service
Region 2 Weekly Report

Through 26 October, 2018

Media Contacts

Title/Issue	Anticipated Publication Date	Current Status
Book author Peter Christie	TBD	Seeks to interview retired SAC Nick Chavez on illegal trade in exotic pets. Declined. Referred to Amy Jonach in HQ.
Maddy Hayden, Albuquerque Journal - Fall Migration of cranes and waterfowl at Bosque del Apache NWR	TBD	Maddy spoke with Refuge Manager Kevin Cobble for an update on the fall migration and current numbers of cranes and snow geese.
Albuquerque Journal - Upcoming Visitor Center & Office at Valle de Oro NWR	Sunday Oct. 21	Paper is doing an article on the visitor center and office building to be built this spring and summer at the Refuge.
Book author Larkin Powell	TBD	Seeks information on warbler and vireo and birding near Ft. Hood for book manuscript on birding in the Plains states.

Arizona Highways Magazine	Fall/winter 2018	Writer is researching ocelots in Arizona and Arizona's possible contribution to species recovery.
Jimmy Tobias, freelance writer	TBD	Reporter contacted FWS inquiring about the lesser prairie-chicken and if the FWS had provided a species status recommendation to DOI.
Dean Russell Columbia Journalism School	TBD	Mexican wolf recovery and cross fostering
Sierra Magazine	TBD	Reporter contacted Valle de Oro NWR Refuge Manager for a story on the benefits of diversity of staff and programing

Week Ahead Schedule of Meetings, Hearings, and Travel

Nothing significant to report.

Immediate Announcements and Actions (within the next 14 days)

Nothing significant to report.

15-60 Day Look Ahead

[UPDATE] POSTPONED DATE TBD - Steve Harvey Fishing Event – On Saturday, October 27, 2018, the FWS Arlington Ecological Services Field Office will partner with the Steve Harvey Mentoring Program in Dallas to support a fishing day for inner city youth. The FWS has partnered with the Steve Harvey Foundation for a number of years. This year's youth fishing event will be held in coordination with Texas Parks and Wildlife Department at Cedar Hill State Park.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

[*UPDATE*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late October. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[*NEW*] Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media is planned. Target date for submitting to the *Federal Register* is mid-December 2018.

Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. include the DSL 90-day finding in an upcoming batched *Federal Register* notice. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register, (awaiting DOI approval), a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Other Items of Note

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during

the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has submitted a permit application and a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the current Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA is currently being reviewed by FWS staff for biological sufficiency.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils

River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in Fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

National Wildlife Refuge Actions

[NEW] Deep Fork National Wildlife Refuge in Oklahoma and the Friends of Deep Fork hosted its first Blue Goose Day at the Refuge on October 20th. The Refuge partnered with the Oklahoma Department of Wildlife Conservation, Okmulgee High School National Honor Society, staff from other nearby Refuges and ES Offices, and local businesses to provide a day of outdoor recreation including constructing take home blue bird boxes, fishing for bluegill and catfish, identifying animal tracks, and practicing their aim at 3-D targets on the archery range. The Friends Group provided lunch and materials for the bluebird boxes. The Refuge provided equipment free to use (bows, arrows, bait, fishing poles, etc.) and the Oklahoma Department of Wildlife Conservation stocked the refuge pond with bluegill and provided additional fishing poles so participants could engage in angling, some for the first time. Each child received a free t-shirt and cup for coming to the event. The event and all activities were free and open to everyone. With a focus on family activities, staff commented that a majority of the attendees had never been to the refuge before. Approximately 75 people attended.

[NEW] On Saturday October 20th, 2018, 20 volunteers with the Arizona Chapter of Safari Club International (AZSCI) volunteered their time and effort to prepare a group campsite on Buenos Aires NWR. The purpose of the group site is to support Big 6 activities. The creation of the site was to facilitate hosting the AZSCI and AZ Game and Fish Department (AZGFD) youth deer

hunt camp on the refuge. This will help to promote youth hunter recruitment and retention as well as improve our partnership with AZGFD.

Staff at Lower Rio Grande Valley National Wildlife Refuge collaborated with American Forests and the Friends of the Wildlife Corridor for the annual Rio Reforestation project. The project works to restore important wildlife habitat in the Lower Rio Grande Valley in south Texas. Nearly 1,300 people participated in the event over four days including school groups from elementary to high school. The event not only provides forest reforestation to the area, it serves as a hands-on, real world learning experience for local youth in wildlife and habitat management.

Extensive flooding at Balcones Canyonlands and Trinity River National Wildlife Refuges in Texas if affecting access to refuge lands and hunt areas. Roads and lands are flooded and currently are not passable. As soon as flooding recedes staff will be working diligently to repair any damage or unsafe conditions in efforts to salvage any open hunting seasons.

On November 6-7, Aransas National Wildlife Refuge in south Texas will host 25 veterans from the San Antonio, TX area at the first annual "Casting with Patriots" event sponsored by the U.S. Fish and Wildlife Service, Salvation Army, Bass Pro Shops, and Cabela's. The veterans will learn about America's National Wildlife Refuges and their wildlife heritage. The focus of the event will be providing them opportunities for fishing both at the Refuge fishing pier and with locally guided boats. For their convenience, the Refuge is also offering the veterans to stay in the Youth Environmental Training Area.

More than 300 people from local communities attended Refuge Celebration Day at Aransas National Wildlife Refuge on the gulf coast of Texas. The daylong event offered archery, BB gun target shooting stations, a fishing tank stocked with channel catfish from Inks Dam National Fish Hatchery, an arts and crafts tent with all kinds of nature-based activities, face painting, a smartphone scavenger hunt, and nature sketching. Refuge Fire Crews put together a Junior Wildland Firefighter activity area where kids could try on gear and shoot "flames" with a backpack and fire hose. A small live alligator may have stolen the show, as did several other live critters on display. Assisting the Refuge at the event were partners International Crane Foundation, FlatsWorthy, Inc. who did fly fishing demonstrations, Texas Parks and Wildlife, who brought a hands-on fish touch table and offered a casting game for kids. Rockport Kayak came to do kayaking demonstrations but the weather did not pan out, so they answered questions about kayaking and where to kayak on the refuge. Our local Mid-Coast Texas Master Naturalists borrowed pelts and skulls and had a fun and educational table. Refreshments were provided by the Tivoli Volunteer Fire Department and the Austwell-Tivoli senior class. The Friends of Aransas National Wildlife Refuge gave informal tours of the pollinator garden. The Refuge received great feedback from participants.

The U.S. Fish and Wildlife Service's Coastal Program in the Southwest Region is working with Duck Unlimited and the state of Texas to address barriers to individuals with disabilities for access to hunting opportunities. The Service and its partners hope to provide accessible infrastructure such as hunting blinds, boardwalks, and parking for migratory bird hunting sites on national wildlife refuges and state wildlife management areas along the Gulf Coast of Texas. Partners are currently in initial meetings and planning stages. The Service will provide updates as the project moves forward.

Anahuac National Wildlife Refuge along the Gulf Coast of Texas will be hosting their annual Fall Fishing Day on Saturday October 27. Youth and their parents have an opportunity to fish and crab for free and participate in fishing related workshops and games including knot-tying, fish/crab cleaning, cast netting, and target casting. This event is a great opportunity to introduce fishing and crabbing to wide audience.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Media Contacts

Title/Issue	Anticipated Publication Date	Current Status
The Arizona Republic	TBD	Producing article about Mt. Graham red squirrel population – namely the increase from 35 after the Fyre Fire to 67 in the most recent survey. Our expert Marit Alanen responded.
Cronkite News at Arizona PBS	TBD	Recorded TV interview regarding the Animal and Plant Health Inspection Service program that utilized the tamarisk leaf beetle for biological control of saltcedar in riparian areas and the effects it has had on the southwestern willow flycatcher. Flycatcher lead Greg Beatty is being interviewed.
Book author Peter Christie	TBD	Seeks to interview retired SAC Nick Chavez on illegal trade in exotic pets. Declined. Referred to Amy Jonach in HQ.
Maddy Hayden, Albuquerque Journal - Fall Migration of cranes and waterfowl at Bosque del Apache NWR	TBD	Maddy spoke with Refuge Manager Kevin Cobble for an update on the fall migration and current numbers of cranes and snow geese.

Albuquerque Journal - Upcoming Visitor Center & Office at Valle de Oro NWR	Sunday Oct. 21	Paper is doing an article on the visitor center and office building to be built this spring and summer at the Refuge.
Book author Larkin Powell	TBD	Seeks information on warbler and vireo and birding near Ft. Hood for book manuscript on birding in the Plains states.
Arizona Highways Magazine	Fall/winter 2018	Writer is researching ocelots in Arizona and Arizona's possible contribution to species recovery.
Jimmy Tobias, freelance writer	TBD	Reporter contacted FWS inquiring about the lesser prairie-chicken and if the FWS had provided a species status recommendation to DOI.
Dean Russell Columbia Journalism School	TBD	Mexican wolf recovery and cross fostering
Sierra Magazine	TBD	Reporter contacted Valle de Oro NWR Refuge Manager for a story on the benefits of diversity of staff and programing
Victoria Advocate	October 29, 2018	Reporter contacted FWS regarding our role in the review/approval of wind projects and their potential impact on wildlife. https://www.victoriaadvocate.com/counties/refugio/refugio-county-ranch-land-could-transform-into-wind-farm/article_1965eb80-d3f2-11e8-ad1e-2fce2c9e9941.html

Endangered Species Act Recovery Actions

[*UPDATE*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late October. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[*NEW*] Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media is planned. Target date for submitting to the *Federal Register* is mid-December 2018.

Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. include the DSL 90-day finding in an upcoming batched *Federal Register* notice. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register, (awaiting DOI approval), a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be

limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Other Items of Note

[NEW] Peppered chub Species Status Assessment (SSA) – The FWS is finalizing a SSA report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The draft SSA was reviewed by interested partners and sent to several peer reviewers; however, we did not receive any peer reviewer comments. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

[NEW] Austin, TX, Monarch Proclamation - On October 27, 2018, staff from the Austin, Texas, Ecological Services Field Office participated in the Austin Nature in the City Roots & Wings Festival at Zilker Botanical Gardens. The event is a community-wide appreciation celebration for Arbor Day and Monarch Appreciation Day. Field Office staff conducted outreach on monarch butterfly and pollinator conservation. Austin Mayor, Steve Adler, attended the event and made a monarch proclamation recognizing the City of Austin as a national leader in the monarch conservation movement and committing to become a Mayors' Monarch Pledge Champion City.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of

issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has submitted a permit application and a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the current Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA is currently being reviewed by FWS staff for biological sufficiency.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in Fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

National Wildlife Refuge Actions

[NEW] The Urban Wildlife Conservation Program in Houston, Texas is working with partners on a highly successful free virtual education program called Virtually Wild! Texas. The program engages children who are learning about nature virtually from a classroom, hospital room or medical facility. Recently, nearly 500 youth (ranging from 2nd to 5th grade) from 16 classes across Texas participated in the virtual nature program, including participants from a facility that serves sexually abused youth and their families.

[NEW] Tishomingo National Wildlife Refuge in Oklahoma hosted a two day Youth Only controlled white-tailed deer hunt. Hunters under the age of sixteen were selected in a random drawing by the Oklahoma Department of Wildlife Conservation for this special hunt. Seventeen young hunters and their adult advisors turned out for the event, undaunted by the extreme rains and high water levels currently experienced at the Refuge. Eight deer were harvested, 7 doe and 1 buck. The hunt is sponsored by the U.S. Fish & Wildlife Service in partnership with the Oklahoma Department of Wildlife Conservation and offers young people a safe and meaningful hunting opportunity.

[NEW] Deep Fork National Wildlife Refuge in Oklahoma and the Friends of Deep Fork hosted its first Blue Goose Day at the Refuge on October 20th. The Refuge partnered with the Oklahoma Department of Wildlife Conservation, Okmulgee High School National Honor Society, staff from other nearby Refuges and ES Offices, and local businesses to provide a day of outdoor recreation including constructing take home blue bird boxes, fishing for bluegill and catfish, identifying animal tracks, and practicing their aim at 3-D targets on the archery range. The Friends Group provided lunch and materials for the bluebird boxes. The Refuge provided equipment free to use (bows, arrows, bait, fishing poles, etc.) and the Oklahoma Department of Wildlife Conservation stocked the refuge pond with bluegill and provided additional fishing poles so participants could engage in angling, some for the first time. Each child received a free t-shirt and cup for coming to the event. The event and all activities were free and open to everyone. With a focus on family activities, staff commented that a majority of the attendees had never been to the refuge before. Approximately 75 people attended.

[NEW] On Saturday October 20th, 2018, 20 volunteers with the Arizona Chapter of Safari Club International (AZSCI) volunteered their time and effort to prepare a group campsite on Buenos Aires NWR. The purpose of the group site is to support Big 6 activities. The creation of the site was to facilitate hosting the AZSCI and AZ Game and Fish Department (AZGFD) youth deer hunt camp on the refuge. This will help to promote youth hunter recruitment and retention as well as improve our partnership with AZGFD.

Staff at Lower Rio Grande Valley National Wildlife Refuge collaborated with American Forests and the Friends of the Wildlife Corridor for the annual Rio Reforestation project. The project works to restore important wildlife habitat in the Lower Rio Grande Valley in south Texas. Nearly 1,300 people participated in the event over four days including school groups from elementary to high school. The event not only provides forest reforestation to the area, it serves as a hands-on, real world learning experience for local youth in wildlife and habitat management.

Extensive flooding at Balcones Canyonlands and Trinity River National Wildlife Refuges in Texas if affecting access to refuge lands and hunt areas. Roads and lands are flooded and currently are not passable. As soon as flooding recedes staff will be working diligently to repair any damage or unsafe conditions in efforts to salvage any open hunting seasons.

On November 6-7, Aransas National Wildlife Refuge in south Texas will host 25 veterans from the San Antonio, TX area at the first annual "Casting with Patriots" event sponsored by the U.S. Fish and Wildlife Service, Salvation Army, Bass Pro Shops, and Cabela's. The veterans will learn about America's National Wildlife Refuges and their wildlife heritage. The focus of the event will be providing them opportunities for fishing both at the Refuge fishing pier and with locally guided boats. For their convenience, the Refuge is also offering the veterans to stay in the Youth Environmental Training Area.

More than 300 people from local communities attended Refuge Celebration Day at Aransas National Wildlife Refuge on the gulf coast of Texas. The daylong event offered archery, BB gun target shooting stations, a fishing tank stocked with channel catfish from Inks Dam National Fish Hatchery, an arts and crafts tent with all kinds of nature-based activities, face painting, a smartphone scavenger hunt, and nature sketching. Refuge Fire Crews put together a Junior Wildland Firefighter activity area where kids could try on gear and shoot "flames" with a backpack and fire hose. A small live alligator may have stolen the show, as did several other live critters on display. Assisting the Refuge at the event were partners International Crane Foundation, FlatsWorthy, Inc. who did fly fishing demonstrations, Texas Parks and Wildlife, who brought a hands-on fish touch table and offered a casting game for kids. Rockport Kayak came to do kayaking demonstrations but the weather did not pan out, so they answered questions about kayaking and where to kayak on the refuge. Our local Mid-Coast Texas Master Naturalists

borrowed pelts and skulls and had a fun and educational table. Refreshments were provided by the Tivoli Volunteer Fire Department and the Austwell-Tivoli senior class. The Friends of Aransas National Wildlife Refuge gave informal tours of the pollinator garden. The Refuge received great feedback from participants.

The U.S. Fish and Wildlife Service's Coastal Program in the Southwest Region is working with Duck Unlimited and the state of Texas to address barriers to individuals with disabilities for access to hunting opportunities. The Service and its partners hope to provide accessible infrastructure such as hunting blinds, boardwalks, and parking for migratory bird hunting sites on national wildlife refuges and state wildlife management areas along the Gulf Coast of Texas. Partners are currently in initial meetings and planning stages. The Service will provide updates as the project moves forward.

Anahuac National Wildlife Refuge along the Gulf Coast of Texas will be hosting their annual Fall Fishing Day on Saturday October 27. Youth and their parents have an opportunity to fish and crab for free and participate in fishing related workshops and games including knot-tying, fish/crab cleaning, cast netting, and target casting. This event is a great opportunity to introduce fishing and crabbing to wide audience.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service
Region 2 Weekly Report

Through 9 November, 2018

Media Contacts

Title/Issue	Anticipated Publication Date	Current Status
The Arizona Republic	TBD	Producing article about Mt. Graham red squirrel population – namely the increase from 35 after the Fyre Fire to 67 in the most recent survey. Our expert Marit Alanen responded.
Cronkite News at Arizona PBS	TBD	Recorded TV interview regarding the Animal and Plant Health Inspection Service program that utilized the tamarisk leaf beetle for biological control of saltcedar in riparian areas and the effects it has had on the southwestern willow flycatcher. Flycatcher lead Greg Beatty is being interviewed.
Book author Peter Christie	TBD	Seeks to interview retired SAC Nick Chavez on illegal trade in exotic pets. Declined. Referred to Amy Jonach in HQ.
The Nation Magazine, John Washington	Mid November	Contacted Cabeza Prieta NWR regarding statistics on Rescue Beacons. Forwarded to U.S. Customs and Border Protection.

Book author Larkin Powell	TBD	Seeks information on warbler and vireo and birding near Ft. Hood for book manuscript on birding in the Plains states.
Arizona Highways Magazine	Fall/winter 2018	Writer is researching ocelots in Arizona and Arizona's possible contribution to species recovery.
Jimmy Tobias, freelance writer	TBD	Reporter contacted FWS inquiring about the lesser prairie-chicken and if the FWS had provided a species status recommendation to DOI.
Dean Russell Columbia Journalism School	TBD	Mexican wolf recovery and cross fostering
Sierra Magazine	TBD	Reporter contacted Valle de Oro NWR Refuge Manager for a story on the benefits of diversity of staff and programing

Endangered Species Act Recovery Actions

[*UPDATE*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late October. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[*NEW*] Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media is planned. Target date for submitting to the *Federal Register* is mid-December 2018.

Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register, (awaiting DOI approval), a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Other Items of Note

Peppered chub Species Status Assessment (SSA) – The FWS is finalizing a SSA report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The draft SSA was reviewed by interested partners and sent to several peer reviewers; however, we did not receive any peer reviewer comments. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike,

Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has submitted a permit application and a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the current Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA is currently being reviewed by FWS staff for biological sufficiency.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico.

The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in Fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

National Wildlife Refuge Actions

[*NEW*] The U.S. Fish and Wildlife Service, San Andres National Wildlife Refuge (NM), New Mexico Department of Game and Fish, and the White Sands Missile Range worked together to relocate 34 bighorn sheep to the Sacramento Mountains and Lincoln National Forest near Alamogordo, New Mexico. The animals were airlifted off of San Andres National Wildlife Refuge by helicopter to their new home to establish a new wild population. Once considered endangered in New Mexico, the sheep are now recovered due to the conservation efforts of FWS and its partners. When the new population is fully established and robust, FWS and the state are hoping to provide limited hunting opportunities which will also provide economic benefits to the local economy.

[*NEW*] Little River National Wildlife Refuge in Oklahoma completed construction of a concrete boat ramp to provide improved boat access to the Little River. The new concrete ramp was also extended an additional 190 feet to connect to the parking lot allowing for much easier access for unloading boats into the river. The boat ramp will provide year-round access for fishing, hunting, and other wildlife-dependent recreation.

The Urban Wildlife Conservation Program in Houston, Texas is working with partners on a highly successful free virtual education program called Virtually Wild! Texas. The program

engages children who are learning about nature virtually from a classroom, hospital room or medical facility. Recently, nearly 500 youth (ranging from 2nd to 5th grade) from 16 classes across Texas participated in the virtual nature program, including participants from a facility that serves sexually abused youth and their families.

Tishomingo National Wildlife Refuge in Oklahoma hosted a two day Youth Only controlled white-tailed deer hunt. Hunters under the age of sixteen were selected in a random drawing by the Oklahoma Department of Wildlife Conservation for this special hunt. Seventeen young hunters and their adult advisors turned out for the event, undaunted by the extreme rains and high water levels currently experienced at the Refuge. Eight deer were harvested, 7 doe and 1 buck. The hunt is sponsored by the U.S. Fish & Wildlife Service in partnership with the Oklahoma Department of Wildlife Conservation and offers young people a safe and meaningful hunting opportunity.

Deep Fork National Wildlife Refuge in Oklahoma and the Friends of Deep Fork hosted its first Blue Goose Day at the Refuge on October 20th. The Refuge partnered with the Oklahoma Department of Wildlife Conservation, Okmulgee High School National Honor Society, staff from other nearby Refuges and ES Offices, and local businesses to provide a day of outdoor recreation including constructing take home blue bird boxes, fishing for bluegill and catfish, identifying animal tracks, and practicing their aim at 3-D targets on the archery range. The Friends Group provided lunch and materials for the bluebird boxes. The Refuge provided equipment free to use (bows, arrows, bait, fishing poles, etc.) and the Oklahoma Department of Wildlife Conservation stocked the refuge pond with bluegill and provided additional fishing poles so participants could engage in angling, some for the first time. Each child received a free t-shirt and cup for coming to the event. The event and all activities were free and open to everyone. With a focus on family activities, staff commented that a majority of the attendees had never been to the refuge before. Approximately 75 people attended.

On Saturday October 20th, 2018, 20 volunteers with the Arizona Chapter of Safari Club International (AZSCI) volunteered their time and effort to prepare a group campsite on Buenos Aires NWR. The purpose of the group site is to support Big 6 activities. The creation of the site was to facilitate hosting the AZSCI and AZ Game and Fish Department (AZGFD) youth deer hunt camp on the refuge. This will help to promote youth hunter recruitment and retention as well as improve our partnership with AZGFD.

On November 6-7, Aransas National Wildlife Refuge in south Texas will host 25 veterans from the San Antonio, TX area at the first annual "Casting with Patriots" event sponsored by the U.S. Fish and Wildlife Service, Salvation Army, Bass Pro Shops, and Cabela's. The veterans will learn about America’s National Wildlife Refuges and their wildlife heritage. The focus of the event will be providing them opportunities for fishing both at the Refuge fishing pier and with

locally guided boats. For their convenience, the Refuge is also offering the veterans to stay in the Youth Environmental Training Area.

The U.S. Fish and Wildlife Service's Coastal Program in the Southwest Region is working with Duck Unlimited and the state of Texas to address barriers to individuals with disabilities for access to hunting opportunities. The Service and its partners hope to provide accessible infrastructure such as hunting blinds, boardwalks, and parking for migratory bird hunting sites on national wildlife refuges and state wildlife management areas along the Gulf Coast of Texas. Partners are currently in initial meetings and planning stages. The Service will provide updates as the project moves forward.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service
Region 2 Weekly Report

Through 16 November, 2018

Media Contacts

Title/Issue	Anticipated Publication Date	Current Status
The Arizona Republic	TBD	Producing article about Mt. Graham red squirrel population – namely the increase from 35 after the Fyre Fire to 67 in the most recent survey. Our expert Marit Alanen responded.
Cronkite News at Arizona PBS	TBD	Recorded TV interview regarding the Animal and Plant Health Inspection Service program that utilized the tamarisk leaf beetle for biological control of saltcedar in riparian areas and the effects it has had on the southwestern willow flycatcher. Flycatcher lead Greg Beatty is being interviewed.
Book author Peter Christie	TBD	Seeks to interview retired SAC Nick Chavez on illegal trade in exotic pets. Declined. Referred to Amy Jonach in HQ.
The Nation Magazine, John Washington	Mid November	Contacted Cabeza Prieta NWR regarding statistics on Rescue Beacons. Forwarded to U.S. Customs and Border Protection.

Book author Larkin Powell	TBD	Seeks information on warbler and vireo and birding near Ft. Hood for book manuscript on birding in the Plains states.
Arizona Highways Magazine	Fall/winter 2018	Writer is researching ocelots in Arizona and Arizona's possible contribution to species recovery.
Jimmy Tobias, freelance writer	TBD	Reporter contacted FWS inquiring about the lesser prairie-chicken and if the FWS had provided a species status recommendation to DOI.
Dean Russell Columbia Journalism School	TBD	Mexican wolf recovery and cross fostering
Sierra Magazine	TBD	Reporter contacted Valle de Oro NWR Refuge Manager for a story on the benefits of diversity of staff and programing
Texas Parks and Wildlife Magazine	TBD	Russell Roe contacted the Coastal ESFO regarding an upcoming story on wind farms and wildlife.

Nothing significant to report.

Endangered Species Act Recovery Actions

[*UPDATE*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late October. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[*NEW*] Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media is planned. Target date for submitting to the *Federal Register* is mid-December 2018.

Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register, (awaiting DOI approval), a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Other Items of Note

Peppered chub Species Status Assessment (SSA) – The FWS is finalizing a SSA report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The draft SSA was reviewed by interested partners and sent to several peer reviewers; however, we did not receive any peer reviewer comments. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical

habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has submitted a permit application and a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the current Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA is currently being reviewed by FWS staff for biological sufficiency.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional

Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in Fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

National Wildlife Refuge Actions

The U.S. Fish and Wildlife Service, San Andres National Wildlife Refuge (NM), New Mexico Department of Game and Fish, and the White Sands Missile Range worked together to relocate 34 bighorn sheep to the Sacramento Mountains and Lincoln National Forest near Alamogordo, New Mexico. The animals were airlifted off of San Andres National Wildlife Refuge by helicopter to their new home to establish a new wild population. Once considered endangered in New Mexico, the sheep are now recovered due to the conservation efforts of FWS and its partners. When the new population is fully established and robust, FWS and the state are hoping to provide limited hunting opportunities which will also provide economic benefits to the local economy.

Little River National Wildlife Refuge in Oklahoma completed construction of a concrete boat ramp to provide improved boat access to the Little River. The new concrete ramp was also extended an additional 190 feet to connect to the parking lot allowing for much easier access for unloading boats into the river. The boat ramp will provide year-round access for fishing, hunting, and other wildlife-dependent recreation.

On November 6-7, Aransas National Wildlife Refuge in south Texas will host 25 veterans from the San Antonio, TX area at the first annual "Casting with Patriots" event sponsored by the U.S. Fish and Wildlife Service, Salvation Army, Bass Pro Shops, and Cabela's. The veterans will learn about America's National Wildlife Refuges and their wildlife heritage. The focus of the event will be providing them opportunities for fishing both at the Refuge fishing pier and with locally guided boats. For their convenience, the Refuge is also offering the veterans to stay in the Youth Environmental Training Area.

The U.S. Fish and Wildlife Service's Coastal Program in the Southwest Region is working with Duck Unlimited and the state of Texas to address barriers to individuals with disabilities for access to hunting opportunities. The Service and its partners hope to provide accessible infrastructure such as hunting blinds, boardwalks, and parking for migratory bird hunting sites on national wildlife refuges and state wildlife management areas along the Gulf Coast of Texas. Partners are currently in initial meetings and planning stages. The Service will provide updates as the project moves forward.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Valerie,

So far as I can tell section 102(c) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 waives DHS's ESA and NEPA responsibilities for improving barriers near the border if the Attorney General determines it is necessary. This language was then amended by the REAL ID Act of 2005 to extend the authority to the Secretary of Homeland Security. I would recommend we have a solicitor weigh in but so far as I can tell if the Secretary of DHS determines ESA compliance (and the need to consult) should be waived for a border barrier project they can do so.

From IIRIRA:
"(c) WAIVER.—The provisions of the Endangered Species Act of 1973 and the National Environmental Policy Act of 1969 are waived to the extent the Attorney General determines necessary to ensure expeditious construction of the barriers and roads under this section."

From REAL ID Act:
" (c) WAIVER.— "(1) IN GENERAL.—Notwithstanding any other provision of law, the Secretary of Homeland Security shall have the authority to waive all legal requirements such Secretary, in such Secretary's sole discretion, determines necessary to ensure expeditious construction of the barriers and roads under this section. Any such decision by the Secretary shall be effective upon being published in the Federal Register."

> Hi John and Patrice,

See the email inquiry below. Does this provide an accurate answer?

The Department of Homeland Security passed a waiver in 2005 that exempts them from complying with a number of federal laws, including the Endangered Species Act, Clean Water Act, Migratory Bird Treaty Act, and others, when necessary for border protection. It is referred to as the REAL ID Act of 2005: https://www.dhs.gov/real-id

Just recently, DHS published their Determination re-stating this for Cameron County, Texas and it provides a detailed explanation of the authority they have and the laws exempted. https://www.federalregister.gov/documents/2018/10/10/2018-21930/determination-pursuant-to-section-102-of-the-illegal-immigration-reform-and-immigrant-responsibility

Due to the this wavier, DHS does not have to enter formal or informal consultation with the Fish and Wildlife Service on the border wall efforts and how it impacts native wildlife.

Thoughts?

Valerie

Endangered Species Act Recovery Actions

[*UPDATE PENDING*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late October. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[*NEW*] Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested

stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media is planned. Target date for submitting to the *Federal Register* is mid-December 2018.

Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle 12-month finding – FWS has reached an agreement with the American Stewards of Liberty, the Independent Petroleum Association of America and Osage Producers Association (Plaintiffs) to publish a 12-month finding for the American burying beetle no later than April 30, 2019. The American burying beetle is currently listed as endangered and is known to have occurred in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Sonoyta mud turtle critical habitat – FWS Southwest Region anticipates sending to the Federal Register, (awaiting DOI approval), a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach planning completed. Ranking 2. R2

Other Items of Note

Peppered chub Species Status Assessment (SSA) – The FWS is finalizing a SSA report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The draft SSA was reviewed by interested partners and sent to several peer reviewers; however, we did not receive any peer reviewer comments. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan

(HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has submitted a permit application and a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA is currently being reviewed by FWS staff for biological sufficiency.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in Fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft

economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

National Wildlife Refuge Actions

[NEW] Trinity River National Wildlife Refuge near Houston, Texas connected with their local community by participating in their annual holiday celebration and parade on November 27, 2018. The Refuge created a fun outreach float that was escorted by the National Wildlife Refuge System mascot, "Puddles, the Blue Goose". Nearly 2,000 people lined the parade route, viewing the float and engaging with Refuge staff and "Puddles". A big hit with the crowd, "Puddles" posed for photos at the end of the parade route. Adults, children, and even local law enforcement officers lined up for a photo!

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Media Contacts

Title/Issue	Anticipated Publication Date	Current Status
The Arizona Republic	TBD	Producing article about Mt. Graham red squirrel population – namely the increase from 35 after the Fyre Fire to 67 in the most recent survey. Our expert Marit Alanen responded.
Cronkite News at Arizona PBS	TBD	Recorded TV interview regarding the Animal and Plant Health Inspection Service program that utilized the tamarisk leaf beetle for biological control of saltcedar in riparian areas and the effects it has had on the southwestern willow flycatcher. Flycatcher lead Greg Beatty is being interviewed.
Book author Peter Christie	TBD	Seeks to interview retired SAC Nick Chavez on illegal trade in exotic pets. Declined. Referred to Amy Jonach in HQ.
The Nation Magazine, John Washington	Mid November	Contacted Cabeza Prieta NWR regarding statistics on Rescue Beacons. Forwarded to U.S. Customs and Border Protection.

Book author Larkin Powell	TBD	Seeks information on warbler and vireo and birding near Ft. Hood for book manuscript on birding in the Plains states.
Arizona Highways Magazine	Fall/winter 2018	Writer is researching ocelots in Arizona and Arizona's possible contribution to species recovery.
Jimmy Tobias, freelance writer	TBD	Reporter contacted FWS inquiring about the lesser prairie-chicken and if the FWS had provided a species status recommendation to DOI.
Dean Russell Columbia Journalism School	TBD	Mexican wolf recovery and cross fostering
Sierra Magazine	TBD	Reporter contacted Valle de Oro NWR Refuge Manager for a story on the benefits of diversity of staff and programing
Texas Parks and Wildlife Magazine	March 2019	Russell Roe contacted the Coastal ESFO regarding an upcoming story on wind farms and wildlife.
Denver Post	Nov 24	Feature story on razorback recovery, and recent finding of yearling fish in the San Juan River. https://www.denverpost.com/2018/11/24/razorback-suckers-fish-recovery-colorado/

Archery Wire	Nov 21	Business publication editorial offers heartfelt support of the Wildlife and Sport Fish Restoration Program, written around a R2 video. http://www.archerywire.com/features/008eb0c6-6bcd-4499-9529-30eddab08ec4
KUT Austin	December 4, 2018	Trey Shaar, reporter for KUT Austin, contacted the FWS regarding the CBD Notice of Intent on the salado and georgetown salamanders for failure to designate critical habitat.

Endangered Species Act Recovery Actions

[*UPDATE PENDING*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late October. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[*NEW*] Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing

determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media is planned. Target date for submitting to the *Federal Register* is mid-December 2018.

Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle 12-month finding – FWS has reached an agreement with the American Stewards of Liberty, the Independent Petroleum Association of America and Osage Producers Association (Plaintiffs) to publish a 12-month finding for the American burying beetle no later than April 30, 2019. The American burying beetle is currently listed as endangered and is known to have occurred in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial

information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Sonoyta mud turtle critical habitat – FWS Southwest Region published on December 6 in the the Federal Register , a proposal to designate 12 acres of critical habitat for the Sonoyta mud turtle. A draft economic analysis of the proposed critical habitat will also be made available. In the U.S., the Sonoyta mud turtle occurs only on Organ Pipe Cactus National Monument on the U.S./Arizona-Mexico border. As such, proposed critical habitat will be limited to NPS lands. 60-day comment period closes February 4. The Sonoyta mud turtle was listed as endangered on September 20, 2017. Outreach completed. Ranking 2. R2

Other Items of Note

[NEW] Georgetown and Salado Salamanders litigation - On December 4, 2018, the Center for Biological Diversity filed a Notice of Intent to sue the U.S. Fish and Wildlife Service for failing to designate critical habitat in central Texas for the Georgetown and Salado salamanders.

Peppered chub Species Status Assessment (SSA) – The FWS is finalizing a SSA report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The draft SSA was reviewed by interested partners and sent to several peer reviewers; however, we did not receive any peer reviewer comments. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike,

Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has submitted a permit application and a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA is currently being reviewed by FWS staff for biological sufficiency.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico.

The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

National Wildlife Refuge Actions

[NEW] Santa Ana National Wildlife Refuge in south Texas celebrated the 75th **anniversary** of the refuge on December 1 with a daylong celebration that was well attended by the public. The refuge provided a variety of hands on outdoor activities geared for families to enjoy nature and outdoor recreation.

[*NEW]* Little River National Wildlife Refuge (NWR) hosted a controlled deer hunt on November **2-4**, 2018. Hunters selected for the hunt were drawn through the Oklahoma Department of Wildlife Conservation's Controlled Hunt Program. The refuge issued 30 permits, and the hunters are allowed to harvest either a buck or doe during the 2 ½ day hunt. The refuge had twenty-three (23) hunters participate in the hunt and they harvested twelve (12) deer (10 antlered and 2 antlerless). The hunters also harvested 10 feral hogs on the hunt.

[*NEW]* Little River National Wildlife Refuge (NWR) hosted a controlled deer hunt on November **9-11**, 2018. Hunters selected for the hunt were drawn through the Oklahoma Department of Wildlife Conservation's Controlled Hunt Program. The refuge issued 30 permits, and the hunters

are allowed to harvest either a buck or doe during the 2 ½ day hunt. The refuge had twenty-four (24) hunters participate in the hunt and they harvested nine (9) deer (6 antlered and 3 antlerless).

Trinity River National Wildlife Refuge near Houston, Texas connected with their local community by participating in their annual holiday celebration and parade on November 27, 2018. The Refuge created a fun outreach float that was escorted by the National Wildlife Refuge System mascot, "Puddles, the Blue Goose". Nearly 2,000 people lined the parade route, viewing the float and engaging with Refuge staff and "Puddles". A big hit with the crowd, "Puddles" posed for photos at the end of the parade route. Adults, children, and even local law enforcement officers lined up for a photo!

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Endangered Species Act Recovery Actions

[*UPDATE PENDING*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is late October. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[*NEW*] Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media is planned. Target date for submitting to the *Federal Register* is mid-December 2018.

Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the

external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle 12-month finding – FWS has reached an agreement with the American Stewards of Liberty, the Independent Petroleum Association of America and Osage Producers Association (Plaintiffs) to publish a 12-month finding for the American burying beetle no later than April 30, 2019. The American burying beetle is currently listed as endangered and is known to have occurred in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Other Items of Note

[NEW] Proposed Oil & Gas Industry Conservation Plan (ICP) extension - The FWS is proposing an amendment to extend the ICP application timeframe by five years. A previous amendment extended the ICP sign-up period for 3 years (until May 20, 2019) and this amendment would extend the sign-up period for an additional 5 years (until May 20, 2024). The ICP has been an effective way to streamline oil and gas industry compliance with the ESA while protecting federally-listed species. The current ICP is only open for new applications through May 20, 2019, and incidental take authorized through the ICP is unlikely to approach the 32,234 acres allowed by that date. The change in timelines is the only proposed revision to the ICP, EA, and BO. There are no proposed changes to the federally listed species or area covered, and no increases in the total amount of incidental take provided through this ICP amendment. This proposed extension of the ICP is likely to be supported by the oil and gas industry because it streamlines the permitting process. The ICP has also supported habitat protection for the endangered American burying beetle and contributed towards recovery of the species. Outreach, including issuing a news release to media, congressionals and industry, as well as posting information on social media is planned to occur at time of publication in the *Federal Register*.

Georgetown and Salado Salamanders litigation - On December 4, 2018, the Center for Biological Diversity filed a Notice of Intent to sue the U.S. Fish and Wildlife Service for failing to designate critical habitat in central Texas for the Georgetown and Salado salamanders.

Peppered chub Species Status Assessment (SSA) – The FWS is finalizing a SSA report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The draft SSA was reviewed by interested partners and sent to several peer reviewers; however, we did not receive any peer reviewer comments. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has submitted a permit application and a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA is currently being reviewed by FWS staff for biological sufficiency.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Regional Director (R2) signature and announcement of the plan are pending a more thorough review of the communications package.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed

critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in Fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

National Wildlife Refuge Actions

[NEW] Aransas National Wildlife Refuge in Texas hosted a youth white-tailed deer hunt the weekend of November 30 - December 2, 2018, for nine students from Furr High School in Houston, Texas. The students had all been through a hunter safety course at their high school before visiting the refuge, but most of them had never been camping or held a firearm before sighting in their rifles at a shooting range on the way to the refuge. One young lady even said it was her first time to ever watch the sun rise and set on the land. Each student hunted with a guide (refuge staff, volunteer, or state game warden) and was accompanied by a mentor (parent/guardian or teacher), and three students successfully harvested their first deer. Not only did they harvest the deer themselves, but they also learned how to clean them and took the meat home with them. Our hope is that this is their first step to a lifetime enjoyment of national wildlife refuges and perpetuating the strong conservation tradition of hunters. The hunt was a partnership between Aransas NWR, Furr High School, Houston Community and Engagement Program (USFWS), and the Texas Youth Hunt Program (co-sponsored by Texas Parks and Wildlife and the Texas Wildlife Association).

[*NEW]* Little River National Wildlife Refuge (NWR) hosted a controlled deer hunt on November **2-4**, 2018. Hunters selected for the hunt were drawn through the Oklahoma Department of Wildlife Conservation's Controlled Hunt Program. The refuge issued 30 permits, and the hunters are allowed to harvest either a buck or doe during the 2 ½ day hunt. The refuge had twenty-three (23) hunters participate in the hunt and they harvested twelve (12) deer (10 antlered and 2 antlerless). The hunters also harvested 10 feral hogs on the hunt.

[NEW] Tishomingo National Wildlife Refuge in Oklahoma recently implemented a fishing line recycling program. Spearheaded by local student and volunteer Rio Bonham, the Refuge will place three monofilament recycling bins at frequently visited angling sites. The initial three recycling bins are part of a pilot program testing their effectiveness. If the bins are successful, they will continue to be implemented locally and across the state of Oklahoma.

[*NEW]* Little River National Wildlife Refuge (NWR) hosted a controlled deer hunt on November **9-11**, 2018. Hunters selected for the hunt were drawn through the Oklahoma Department of Wildlife Conservation's Controlled Hunt Program. The refuge issued 30 permits, and the hunters are allowed to harvest either a buck or doe during the 2 ½ day hunt. The refuge had twenty-four (24) hunters participate in the hunt and they harvested nine (9) deer (6 antlered and 3 antlerless).

[*NEW]* Wichita Mountains Wildlife Refuge (NWR) hosted a controlled deer hunt on November 13-16, 2018. Hunters selected for the hunt were drawn through the Oklahoma Department of Wildlife Conservation's Controlled Hunt Program. The refuge issued 70 permits total, with 30 buck and 40 doe permits. The refuge had forty-nine (49) hunters participate in the hunt and they harvested thirty-two (32) deer (19 antlered and 13 antlerless).

[NEW] Havasu National Wildlife Refuge in Arizona and the Arizona Game and Fish Department are once again collaborating to host the Pintail Slough Junior Waterfowl Camp January 4-6, 2019 on Havasu National Wildlife Refuge. The camp is open to youth of any experience level between the ages of 12 and 17. Each youth must be accompanied by an adult. The young hunters will learn to identify duck and geese species, will learn how to hunt waterfowl, and will be taught how to clean and prepare waterfowl for consumption. The waterfowl hunting blinds on Havasu National Wildlife Refuge offer an ideal location for these young hunters to hone their skills. The camp is limited to 18 participants via a random draw to ensure safety and quality of programming.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service
Region 2 Weekly Report

Through 1 February, 2019

Media Contacts

Title/Issue	Anticipated Publication Date	Current Status
Arizona PBS	February 2019	Contacted Randy Van Haverbeke (AZFWCO) for an on-site interview at Lees Ferry (Colorado River, Grand Canyon). Questions focused on water conservation and native and nonnative aquatic species, including the endangered Humpback Chub. Randy responded on December 17th, 2018 and was interviewed along with staff from USGS-Grand Canyon Monitoring and Research Center.
Cronkite News at Arizona PBS	Continuing	Recorded TV interview regarding the Animal and Plant Health Inspection Service program that utilized the tamarisk leaf beetle for biological control of saltcedar in riparian areas and the effects it has had on the southwestern willow flycatcher. Flycatcher lead Greg Beatty was interviewed. Print edition continues to circulate in newspapers, including the Arizona Republic.
Cronkite News at Arizona PBS	TBD	Reporter contacted Alchesay Williams Creek National Fish Hatchery to ascertain the work of all three national fish hatcheries in AZ.
Book author Peter Christie	TBD	Seeks to interview retired SAC Nick Chavez on illegal trade in exotic pets. Declined. Referred to Amy Jonach in HQ.

The Nation Magazine, John Washington	Mid November	Contacted Cabeza Prieta NWR regarding statistics on Rescue Beacons. Forwarded to U.S. Customs and Border Protection.
Book author Larkin Powell	TBD	Seeks information on warbler and vireo and birding near Ft. Hood for book manuscript on birding in the Plains states.
Arizona Highways Magazine (Kathy Montgomery)	Fall/winter 2018	Writer is researching ocelots in Arizona and Arizona's possible contribution to species recovery. (Updated information regarding fatality of an Arizona ocelot is being provided to reporter.)
KGUN-9 ABC (Tucson)	1/25/2019	TV news attributed to FWS a trail camera photo taken of a jaguar in the Chiricahua Mountains, Arizona. (FWS was furloughed during this time frame and neither captured nor posted the photo, nor was aware of the photo). University of Arizona citizen science program partner was source of the photo, which FWS is seeking to obtain. Animal is likely a previously identified male residing in Dos Cabazas Mountains area; spot identification confirmation not yet obtained.
Jimmy Tobias, freelance writer	TBD	Reporter contacted FWS inquiring about the lesser prairie-chicken and if the FWS had provided a species status recommendation to DOI.
Dean Russell Columbia Journalism School	TBD	Mexican wolf recovery and cross fostering

Sierra Magazine	TBD	Reporter contacted Valle de Oro NWR Refuge Manager for a story on the benefits of diversity of staff and programing
Morning Edition AZ station KJZZ	TBD	Reporter interviewed NMESFO Environmental Contaminant biologist on origins of mercury in the environment.
KUT Austin	December 4, 2018	Trey Shaar, reporter for KUT Austin, contacted the FWS regarding the CBD Notice of Intent on the salado and georgetown salamanders for failure to designate critical habitat.
New Mexico Wildlife magazine (New Mexico Dept of Game and Fish)	Winter 2018	Published stories from two USFWS employees. http://magazine.wildlife.state.nm.us/sunrise-14089/ http://magazine.wildlife.state.nm.us/outwitting-the-fish/
Tenkara Angler	Winter 2018-19	Published story on Gila trout conservation with attending video. Pg 70. https://issuu.com/troutrageous1/docs/tenkara_angler_winter_2018-19
Texas Wildlife (Texas Wildlife Assoc.)	Feb 2019	Published a feature story on importance of private lands conservation, penned by Regional Partners of Fish and Wildlife Coordinator.

Week Ahead Schedule of Meetings, Hearings, and Travel

Nothing significant to report.

Immediate Announcements and Actions (within the next 14 days)

Nothing significant to report.

15-60 Day Look Ahead
Nothing significant to report.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

[*UPDATE PENDING*] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is February 2019. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[*NEW*] Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media required but not yet completed. Target date for submitting to the *Federal Register* being reevaluated inlight of furlough delays. Notice of intent to sue over delay was submitted by Center for Biological Diversity during furlough.

Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions

and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle 12-month finding – FWS has reached an agreement with the American Stewards of Liberty, the Independent Petroleum Association of America and Osage Producers Association (Plaintiffs) to publish a 12-month finding for the American burying beetle no later than April 30, 2019. The American burying beetle is currently listed as endangered and is known to have occurred in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Other Items of Note

Proposed Oil & Gas Industry Conservation Plan (ICP) extension - The FWS is proposing an amendment to extend the ICP application timeframe by five years. A previous amendment extended the ICP sign-up period for 3 years (until May 20, 2019) and this amendment would extend the sign-up period for an additional 5 years (until May 20, 2024). The ICP has been an effective way to streamline oil and gas industry compliance with the ESA while protecting federally-listed species. The current ICP is only open for new applications through May 20, 2019, and incidental take authorized through the ICP is unlikely to approach the 32,234 acres allowed by that date. The change in timelines is the only proposed revision to the ICP, EA, and BO. There are no proposed changes to the federally listed species or area covered, and no increases in the total amount of incidental take provided through this ICP amendment. This proposed extension of the ICP is likely to be supported by the oil and gas industry because it streamlines the permitting process. The ICP has also supported habitat protection for the endangered American burying beetle and contributed towards recovery of the species. Outreach, including issuing a news release to media, congressionals and industry, as well as posting information on social media is planned to occur at time of publication in the *Federal Register*.

Georgetown and Salado Salamanders litigation - On December 4, 2018, the Center for Biological Diversity filed a Notice of Intent to sue the U.S. Fish and Wildlife Service for failing to designate critical habitat in central Texas for the Georgetown and Salado salamanders.

Peppered chub Species Status Assessment (SSA) – The FWS is finalizing a SSA report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The draft SSA was reviewed by interested partners and sent to several peer reviewers; however, we did not receive any peer reviewer comments. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan

(HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has submitted a permit application and a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA is currently being reviewed by FWS staff for biological sufficiency.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Release of the announcement of the plan has been repeatedly delayed pending more thorough reviews of the communications package (now complete). R2 seeks to announce in February.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. Publication of the proposed critical habitat is anticipated to occur in Fall 2018. The public will have 60 days to review and comment on the proposed rule, a draft

economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

National Wildlife Refuge Actions

[NEW] Aransas National Wildlife Refuge in Texas hosted a youth white-tailed deer hunt the weekend of November 30 - December 2, 2018, for nine students from Furr High School in Houston, Texas. The students had all been through a hunter safety course at their high school before visiting the refuge, but most of them had never been camping or held a firearm before sighting in their rifles at a shooting range on the way to the refuge. One young lady even said it was her first time to ever watch the sun rise and set on the land. Each student hunted with a guide (refuge staff, volunteer, or state game warden) and was accompanied by a mentor (parent/guardian or teacher), and three students successfully harvested their first deer. Not only did they harvest the deer themselves, but they also learned how to clean them and took the meat home with them. Our hope is that this is their first step to a lifetime enjoyment of national wildlife refuges and perpetuating the strong conservation tradition of hunters. The hunt was a partnership between Aransas NWR, Furr High School, Houston Community and Engagement Program (USFWS), and the Texas Youth Hunt Program (co-sponsored by Texas Parks and Wildlife and the Texas Wildlife Association).

[*NEW]* Little River National Wildlife Refuge (NWR) hosted a controlled deer hunt on November **2-4**, 2018. Hunters selected for the hunt were drawn through the Oklahoma Department of Wildlife Conservation's Controlled Hunt Program. The refuge issued 30 permits, and the hunters are allowed to harvest either a buck or doe during the 2 ½ day hunt. The refuge had twenty-three (23) hunters participate in the hunt and they harvested twelve (12) deer (10 antlered and 2 antlerless). The hunters also harvested 10 feral hogs on the hunt.

[NEW] Tishomingo National Wildlife Refuge in Oklahoma recently implemented a fishing line recycling program. Spearheaded by local student and volunteer Rio Bonham, the Refuge will place three monofilament recycling bins at frequently visited angling sites. The initial three

recycling bins are part of a pilot program testing their effectiveness. If the bins are successful, they will continue to be implemented locally and across the state of Oklahoma.

[*NEW]* Little River National Wildlife Refuge (NWR) hosted a controlled deer hunt on November **9-11**, 2018. Hunters selected for the hunt were drawn through the Oklahoma Department of Wildlife Conservation's Controlled Hunt Program. The refuge issued 30 permits, and the hunters are allowed to harvest either a buck or doe during the 2 ½ day hunt. The refuge had twenty-four (24) hunters participate in the hunt and they harvested nine (9) deer (6 antlered and 3 antlerless).

[*NEW]* Wichita Mountains Wildlife Refuge (NWR) hosted a controlled deer hunt on November 13-16, 2018. Hunters selected for the hunt were drawn through the Oklahoma Department of Wildlife Conservation's Controlled Hunt Program. The refuge issued 70 permits total, with 30 buck and 40 doe permits. The refuge had forty-nine (49) hunters participate in the hunt and they harvested thirty-two (32) deer (19 antlered and 13 antlerless).

[NEW] Havasu National Wildlife Refuge in Arizona and the Arizona Game and Fish Department are once again collaborating to host the Pintail Slough Junior Waterfowl Camp January 4-6, 2019 on Havasu National Wildlife Refuge. The camp is open to youth of any experience level between the ages of 12 and 17. Each youth must be accompanied by an adult. The young hunters will learn to identify duck and geese species, will learn how to hunt waterfowl, and will be taught how to clean and prepare waterfowl for consumption. The waterfowl hunting blinds on Havasu National Wildlife Refuge offer an ideal location for these young hunters to hone their skills. The camp is limited to 18 participants via a random draw to ensure safety and quality of programming.

[NEW] Buenos Aires National Wildlife Refuge received a much needed boost to the genetics of our pronghorn herd on January 24th. The Arizona Game and Fish Department captured 45 pronghorn from the Glassford Hill herd in Prescott Valley, AZ. The herd had become trapped by development in the area. Most of those pronghorn were translocated to the Bonita/Allen Flat area north of Willcox. Four of them ended up in the San Bernardino Valley not far from San Bernardino NWR and four of them ended up on The Buenos Aires NWR. The four we received have assimilated into the existing herd. Special thanks to our partners at the Arizona Game and Fish Department and the Arizona Antelope Foundation.

[New] Buenos Aires National Wildlife Refuge Staff, Friends, and volunteers participated in the annual “All the Way to the Border” highway 286 clean-up on Saturday January 26th. During the event 70 volunteers cleaned up 210 bags of trash from the 45 mile stretch of highway. This is an annual event put on by Rancho Sierra Vista de Sasabe and the Altar Valley Conservation Alliance and sponsored by the Arizona Department of Transportation (ADOT). The refuge has

participated each year. It is a great opportunity to work with our community and strengthen partnerships with our neighbors in the Altar Valley.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

A short video documenting captive spawning of threatened Apache trout has gone viral on Facebook, reaching nearly 500,000 views as of January 31. The video shows conservation workers from Alchesay Williams Creek National Fish Hatchery, Arizona Fish and Wildlife Conservation Office and White Mountain Apache Tribe collecting and fertilizing Apache trout eggs, as well as collecting ovarian fluid for health assessment by staff at the Southwestern Native Aquatic Resources and Recovery Center.

Migratory Birds

Issued a 30-year eagle incidental take permit to Osage Wind, LLC Dec 20th, and the final EA/FONSI should be posted to the website in the next couple of weeks. Currently waiting on 508 compliance and a potential furlough.

Science Applications

Nothing significant to report.

Wildlife and Sport Fish Restoration

Nothing significant to report.

Native American Programs

Arizona Ecological Services Office will hold its annual Arizona Inter-tribal coordination meeting ca. April 2-3.

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service
Region 2 Weekly Report

Through 8 February, 2019

Media Contacts

Title/Issue	Anticipated Publication Date	Current Status
CBS Sunday Morning	Feb 2019	Feature on restoration of American paddlefish in Caddo Lake on the Texas-Louisiana line involving Tishomingo National Fish Hatchery, Texas Fish and Wildlife Conservation Office and Texas Parks and Wildlife. https://www.cbsnews.com/news/nature-up-close-caddo-lake/
Winter Birding on Maxwell NWR/Huerfano World Journal/Sharon Niederman	February 2019	Submitted to editor by author (Niederman) 2/4.
Arizona PBS	February 2019	Contacted Randy Van Haverbeke (AZFWCO) for an on-site interview at Lees Ferry (Colorado River, Grand Canyon). Questions focused on water conservation and native and nonnative aquatic species, including the endangered Humpback Chub. Randy responded on December 17th, 2018 and was interviewed along with staff from USGS-Grand Canyon Monitoring and Research Center.
Cronkite News at Arizona PBS	Continuing	Recorded TV interview regarding the Animal and Plant Health Inspection Service program that utilized the tamarisk leaf beetle for biological control of saltcedar in riparian areas and the effects it has had on the southwestern willow flycatcher. Flycatcher lead Greg Beatty was interviewed. Print edition continues to

		circulate in newspapers, including the Arizona Republic.
Cronkite News at Arizona PBS	TBD	Reporter contacted Alchesay Williams Creek National Fish Hatchery to ascertain the work of all three national fish hatcheries in AZ.
Book author Peter Christie	TBD	Seeks to interview retired SAC Nick Chavez on illegal trade in exotic pets. Declined. Referred to Amy Jonach in HQ.
Book author Larkin Powell	TBD	Seeks information on warbler and vireo and birding near Ft. Hood for book manuscript on birding in the Plains states.
Arizona Highways Magazine (Kathy Montgomery)	Fall/winter 2018	Writer is researching ocelots in Arizona and Arizona's possible contribution to species recovery. (Updated information regarding fatality of an Arizona ocelot is being provided to reporter.)
KGUN-9 ABC (Tucson)	1/25/2019	TV news attributed to FWS a trail camera photo taken of a jaguar in the Chiricahua Mountains, Arizona. (FWS was furloughed during this time frame and neither captured nor posted the photo, nor was aware of the photo). University of Arizona citizen science program partner was source of the photo, which FWS is seeking to obtain. Animal is likely a previously identified male residing in Dos Cabazas Mountains area; spot identification confirmation not yet obtained.

Jimmy Tobias, freelance writer	TBD	Reporter contacted FWS inquiring about the lesser prairie-chicken and if the FWS had provided a species status recommendation to DOI.
Dean Russell Columbia Journalism School	TBD	Mexican wolf recovery and cross fostering
Morning Edition AZ station KJZZ	TBD	Reporter interviewed NMESFO Environmental Contaminant biologist on origins of mercury in the environment.
KUT Austin	December 4, 2018	Trey Shaar, reporter for KUT Austin, contacted the FWS regarding the CBD Notice of Intent on the salado and georgetown salamanders for failure to designate critical habitat.
New Mexico Wildlife magazine (New Mexico Dept of Game and Fish)	Winter 2018	Published stories from two USFWS employees. http://magazine.wildlife.state.nm.us/sunrise-14089/ http://magazine.wildlife.state.nm.us/outwitting-the-fish/
Tenkara Angler	Winter 2018-19	Published story on Gila trout conservation with attending video. Pg 70. https://issuu.com/troutrageous1/docs/tenkara_angler_winter_2018-19
Texas Wildlife (Texas Wildlife Assoc.)	Feb 2019	Published a feature story on importance of private lands conservation, penned by Regional Partners of Fish and Wildlife Coordinator.

Week Ahead Schedule of Meetings, Hearings, and Travel

Nothing significant to report.

Immediate Announcements and Actions (within the next 14 days)
Nothing significant to report.

15-60 Day Look Ahead
Nothing significant to report.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is February 2019. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[*NEW*] Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media required but not yet completed. Target date for submitting to the *Federal Register* being re-evaluated in light of furlough delays. Notice of intent to sue over delay was submitted by Center for Biological Diversity during furlough.

Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a

Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle 12-month finding – FWS has reached an agreement with the American Stewards of Liberty, the Independent Petroleum Association of America and Osage Producers Association (Plaintiffs) to publish a 12-month finding for the American burying beetle no later than April 30, 2019. The American burying beetle is currently listed as endangered and is known to have occurred in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Other Items of Note

Proposed Oil & Gas Industry Conservation Plan (ICP) extension - The FWS is proposing an amendment to extend the ICP application timeframe by five years. A previous amendment extended the ICP sign-up period for 3 years (until May 20, 2019) and this amendment would extend the sign-up period for an additional 5 years (until May 20, 2024). The ICP has been an effective way to streamline oil and gas industry compliance with the ESA while protecting federally-listed species. The current ICP is only open for new applications through May 20, 2019, and incidental take authorized through the ICP is unlikely to approach the 32,234 acres allowed by that date. The change in timelines is the only proposed revision to the ICP, EA, and BO. There are no proposed changes to the federally listed species or area covered, and no increases in the total amount of incidental take provided through this ICP amendment. This proposed extension of the ICP is likely to be supported by the oil and gas industry because it streamlines the permitting process. The ICP has also supported habitat protection for the endangered American burying beetle and contributed towards recovery of the species. Outreach, including issuing a news release to media, congressionals and industry, as well as posting information on social media is planned to occur at time of publication in the *Federal Register*.

Georgetown and Salado Salamanders litigation - On December 4, 2018, the Center for Biological Diversity filed a Notice of Intent to sue the U.S. Fish and Wildlife Service for failing to designate critical habitat in central Texas for the Georgetown and Salado salamanders.

Peppered chub Species Status Assessment (SSA) – The FWS is finalizing a SSA report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The draft SSA was reviewed by interested partners and sent to several peer reviewers; however, we did not receive any peer reviewer comments. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket

and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has submitted a permit application and a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA is currently being reviewed by FWS staff for biological sufficiency.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Release of the announcement of the plan has been repeatedly delayed pending more thorough reviews of the communications package (now complete). R2 seeks to announce in February.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service

is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

National Wildlife Refuge Actions

Havasu National Wildlife Refuge in Arizona and the Arizona Game and Fish Department are once again collaborating to host the Pintail Slough Junior Waterfowl Camp January 4-6, 2019 on Havasu National Wildlife Refuge. The camp is open to youth of any experience level between the ages of 12 and 17. Each youth must be accompanied by an adult. The young hunters will learn to identify duck and geese species, will learn how to hunt waterfowl, and will be taught how to clean and prepare waterfowl for consumption. The waterfowl hunting blinds on Havasu National Wildlife Refuge offer an ideal location for these young hunters to hone their skills. The camp is limited to 18 participants via a random draw to ensure safety and quality of programming.

Buenos Aires National Wildlife Refuge received a much needed boost to the genetics of our pronghorn herd on January 24th. The Arizona Game and Fish Department captured 45 pronghorn from the Glassford Hill herd in Prescott Valley, AZ. The herd had become trapped by development in the area. Most of those pronghorn were translocated to the Bonita/Allen Flat area north of Willcox. Four of them ended up in the San Bernardino Valley not far from San Bernardino NWR and four of them ended up on The Buenos Aires NWR. The four we received have assimilated into the existing herd. Special thanks to our partners at the Arizona Game and Fish Department and the Arizona Antelope Foundation.

Buenos Aires National Wildlife Refuge Staff, Friends, and volunteers participated in the annual "All the Way to the Border" highway 286 clean-up on Saturday January 26th. During the event

70 volunteers cleaned up 210 bags of trash from the 45 mile stretch of highway. This is an annual event put on by Rancho Sierra Vista de Sasabe and the Altar Valley Conservation Alliance and sponsored by the Arizona Department of Transportation (ADOT). The refuge has participated each year. It is a great opportunity to work with our community and strengthen partnerships with our neighbors in the Altar Valley.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

A short video documenting captive spawning of threatened Apache trout has gone viral on Facebook, reaching nearly 500,000 views. The video shows conservation workers from Alchesay Williams Creek National Fish Hatchery, Arizona Fish and Wildlife Conservation Office and White Mountain Apache Tribe collecting and fertilizing Apache trout eggs, as well as collecting ovarian fluid for health assessment by staff at the Southwestern Native Aquatic Resources and Recovery Center.

Migratory Birds

Issued a 30-year eagle incidental take permit to Osage Wind, LLC Dec 20th, and the final EA/FONSI should be posted to the website in the next couple of weeks. Currently waiting on 508 compliance and a potential furlough.

Science Applications

Nothing significant to report.

Wildlife and Sport Fish Restoration

Nothing significant to report.

Native American Programs

Arizona Ecological Services Office will hold its annual Arizona Inter-tribal coordination meeting ca. April 2-3.

Endangered Species Act Recovery Actions

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is February 2019. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These

actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media required but not yet completed. Target date for submitting to the *Federal Register* being re-evaluated in light of furlough delays. Notice of intent to sue over delay was submitted by Center for Biological Diversity during furlough.

Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle 12-month finding – FWS has reached an agreement with the American Stewards of Liberty, the Independent Petroleum Association of America and Osage Producers Association (Plaintiffs) to publish a 12-month finding for the American burying beetle no later than April 30, 2019. The American burying beetle is currently listed as endangered and is known to have occurred in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these

findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Other Items of Note

Proposed Oil & Gas Industry Conservation Plan (ICP) extension - The FWS is proposing an amendment to extend the ICP application timeframe by five years. A previous amendment extended the ICP sign-up period for 3 years (until May 20, 2019) and this amendment would extend the sign-up period for an additional 5 years (until May 20, 2024). The ICP has been an effective way to streamline oil and gas industry compliance with the ESA while protecting federally-listed species. The current ICP is only open for new applications through May 20, 2019, and incidental take authorized through the ICP is unlikely to approach the 32,234 acres allowed by that date. The change in timelines is the only proposed revision to the ICP, EA, and BO. There are no proposed changes to the federally listed species or area covered, and no increases in the total amount of incidental take provided through this ICP amendment. This proposed extension of the ICP is likely to be supported by the oil and gas industry because it streamlines the permitting process. The ICP has also supported habitat protection for the endangered American burying beetle and contributed towards recovery of the species. Outreach, including issuing a news release to media, congressionals and industry, as well as posting information on social media is planned to occur at time of publication in the *Federal Register*.

Georgetown and Salado Salamanders litigation - On December 4, 2018, the Center for Biological Diversity filed a Notice of Intent to sue the U.S. Fish and Wildlife Service for failing to designate critical habitat in central Texas for the Georgetown and Salado salamanders.

Peppered chub Species Status Assessment (SSA) – The FWS is finalizing a SSA report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The draft SSA was reviewed by interested partners and sent to several peer reviewers; however, we did not receive any peer reviewer comments. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical

habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts has submitted a permit application and a Candidate Conservation Agreement with Assurances (CCAA) for the dunes sagebrush lizard to address several issues with the Texas Conservation Plan (TCP) based upon the six years of implementation. The draft CCAA has been shared with participants in the existing plan, industry, landowners and other potential participants under the CCAA. The draft CCAA is currently being reviewed by FWS staff for biological sufficiency.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Release of

the announcement of the plan has been repeatedly delayed pending more thorough reviews of the communications package (now complete). R2 seeks to announce in February.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

National Wildlife Refuge Actions

[NEW] Laguna Atascosa National Wildlife Refuge (TX) is a main partner with the Gladys Porter Zoo in Brownsville, Texas in hosting the annual Ocelot Conservation Day community event, held this year on March 3, 2019. Taking place at the Zoo, the well-attended event offers hands-on family friendly activities, speakers, educational outreach booths, the Ocelot 5K Run, and live captive ambassador ocelots from the Texas Zoo. The day educates the public about the plight and recovery of the endangered Ocelot. Other partners include the Texas Zoo and Friends of Laguna Atascosa.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then

extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

A short video documenting captive spawning of threatened Apache trout has gone viral on Facebook, reaching nearly 500,000 views. The video shows conservation workers from Alchesay Williams Creek National Fish Hatchery, Arizona Fish and Wildlife Conservation Office and White Mountain Apache Tribe collecting and fertilizing Apache trout eggs, as well as collecting ovarian fluid for health assessment by staff at the Southwestern Native Aquatic Resources and Recovery Center.

Migratory Birds

Issued a 30-year eagle incidental take permit to Osage Wind, LLC Dec 20th, and the final EA/FONSI should be posted to the website in the next couple of weeks. Currently waiting on 508 compliance and a potential furlough.

Science Applications

Nothing significant to report.

Wildlife and Sport Fish Restoration

Nothing significant to report.

Native American Programs

Arizona Ecological Services Office will hold its annual Arizona Inter-tribal coordination meeting ca. April 2-3.

INFORMATION MEMORANDUM FOR THE DEPUTY ASSISTANT SECRETARY FOR FISH, WILDLIFE AND PARKS

DATE: February 19, 2019
FROM: Amy Lueders, Southwest Regional Director, U.S. Fish and Wildlife Service
SUBJECT: U.S. Fish and Wildlife Service Issues of Interest in Arizona

I. STATEMENT OF PURPOSE

Provide information on key U.S. Fish and Wildlife Service (FWS) issues of Congressional or other significant interest in the state of Arizona.

II. BACKGROUND

The State of Arizona is 113,998 square miles. The FWS has approximately 163 staff in the state that support the FWS mission through a number of programs. Arizona has nine National Wildlife Refuges that total 1.73 million acres and provide hunting and angling opportunities to visitors, as well as being actively engaged in recovering endangered species such as the Sonoran pronghorn. Arizona is home to the largest national wildlife refuge in the lower 48 states, Cabeza Prieta. The three National Fish Hatcheries spawn, raise and release imperiled desert fishes, as well as several trout species for angling, including the threatened Apache trout. The Arizona Ecological Services Field Office manages protection and recovery for 64 listed species in the state including the Mexican wolf, the lesser long-nosed bat, the Gila topminnow, the ocelot and the jaguar. Arizona is also home to the Navajo Nation Tribal Eagle aviary.

III. DISCUSSION

Mexican wolves

The Mexican gray wolf subspecies was listed as endangered under Endangered Species Act (ESA) in 1976; the subspecies-level listing was incorporated into a species-level listing of the gray wolf in 1978. The FWS established a nonessential experimental population (NEP) of the Mexican gray wolf in Arizona and New Mexico in 1998, with the first wolves released that year. In 2015, FWS separately listed the Mexican gray wolf subspecies as endangered and revised regulations for the NEP under ESA section 10(j). In 2017, FWS published a final revised recovery plan that was endorsed by the affected states. In January 2018, several environmental groups filed litigation against the final recovery plan. FWS and DOJ filed a motion to dismiss and are awaiting the judge's decision. The FWS continues to work with partners to further Mexican gray wolf recovery.

The 2017 annual population survey documents a minimum of 114 wolves in the wild. The 2018 survey results will be announced in March 2019. In 2018, there were 20 total wolf mortalities, which is most in a single year. In 2018, there were 99 total confirmed livestock depredations, which is 2.5 times above normal. We still consider this to be in normal levels, because we also had the highest number of collared wolves (~85), which helps us detect mortalities.

Arizona Water Settlement Act

The FWS is a Cooperating Agency with numerous federal, state, and local partners on the Arizona Water Settlement Act (AWSA), New Mexico Central Arizona Project Unit (NM Unit). Partners include Bureau of Reclamation, Forest Service, Bureau of Land Management, the New Mexico Interstate Stream Commission, the New Mexico Department of Game and Fish and the NM Unit. The AWSA allows New Mexico to divert an annual average of 14,000 acre-feet of water from the Gila and San Francisco basins (not to exceed 140,000 acre-feet over a 10-year period). Numerous ESA listed species occur in the project area. The AWSA includes provisions that allow funds to be expended on municipal water conservation and reclamation efforts. Currently, the Bureau of Reclamation is drafting an Environmental Impact Statement (EIS) and a Biological Assessment. The very complex analyses and documents are well underway but are behind schedule. The FWS is working closely with BOR on this project.

Drought Contingency Plan: Colorado River Basin

The Drought Contingency Plan (DCP) is a seven-basin state effort to adjust water allocations temporarily to combat impacts of the current drought. Water allocated in the lower basin is in danger of disruption should lake elevation in Lake Mead drop below 1,075 feet, resulting in a series of Shortage Criteria in which full water allocations will not be delivered. The state of Arizona is one of the first states to be most impacted by water withholding, and is overall a strong proponent of the DCP. It is predicted that Lake Mead elevations will dip below 1,071 by 2021 resulting in triggering Shortage Criteria. The FWS has long committed resources to coordinate with Federal, State and Tribal partners to address environmental ramifications of current river conditions or any DCP plan to provide ESA compliance where necessary. We are partners in the Glen Canyon Dam Adaptive Management Program and the Lower Colorado River Multi-Species Conservation Program (LCR MSCP); both of these provide environmental compliance for river operations and water allocations from Glen Canyon Dam to Mexico. ESA compliance by these programs are necessary to mitigate impacts to the four endangered Colorado River fishes, and at least five other listed terrestrial species that rely on the river corridor. The LCR MSCP is a large Section 7 and Section 10/HCP hybrid that provides ESA coverage for 57 Federal, State, and Tribal entities. This program addresses the needs of 27 species that either are listed under the ESA or are otherwise sensitive. At the request of LCR MSCP Steering Committee members, we are regularly meeting to discuss options for amending the existing program to cover additional compliance needs as a result of the DCP.

Border Barrier on Southern Arizona National Wildlife Refuges

Along Arizona's International Border with Mexico, National Wildlife Refuge (NWR) System lands have experienced significant habitat damage due to illegal border-related activities such as trail networks, litter, dumping, illegal roads and abandoned vehicles. In 2008, Customs and Border Protection (CBP) installed vehicle barriers or fencing in combination with monitoring and sensing technology which significantly reduced habitat damage and conflicts with the public. It is important to note that the barriers were developed to meet specific needs. The designs allow for limited movement of wildlife and do not restrict potential floodwaters at specific locations. Like other areas along the US/Mexican border, the combination of border barriers, surveillance towers, number of agents, and tactics used by CBP has been effective in reducing illegal activities occurring on Arizona's southern NWR's.

Cabeza Prieta National Wildlife Refuge: The 860,000-acre Cabeza Prieta NWR shares 56 miles of border with Mexico and exhibits both a 4-foot tall Normandy-style barrier and a 4-foot tall concrete bollard-style barrier. Both barriers are effective at prohibiting vehicles from crossing but allow wildlife passage. Prior to the border barrier installation, drug smugglers coming from Mexico created significant illegal roads, before abandoning the vehicles on refuge property. While not stopping foot traffic, the current border barriers have been very effective in stopping drug smuggling vehicles while still allowing for wildlife movement, including the endangered Sonoran pronghorn.

Buenos Aires National Wildlife Refuge: The 117,500-acre Buenos Aires NWR is located in south-central Arizona and shares about 5.26 miles of border with Mexico. A barbed wire barrier along the International Border separated the refuge from Mexico until 2007/2008, when Department of Homeland Security (DHS) contractors constructed a 15-foot tall iron and concrete bollard-style barrier along the south boundary of Buenos Aires NWR. While this style of barrier raised concern for migration patterns of large mammals such as jaguar, its installation has also created habitat benefits to the semi-desert grasslands. This DHS barrier allows for some water and wildlife movement, and provides the important tactical advantage of agents and surveillance towers being able to view potential opponents/threats through the barrier (rather than the view being obstructed by a solid barrier). The combination of towers, border barrier and CBP agents have significantly decreased the volume of discarded trash, allowed restoration of grassland conditions, and allowed safe public access into Buenos Aires NWR areas that were previously deemed dangerous and were therefore closed to public entry for over a decade.

San Bernardino National Wildlife Refuge: The 2,369-acre San Bernardino NWR is located in southeastern Arizona and shares about 2.65 miles of border with Mexico and utilizes a combination of vehicle barriers, surveillance towers, and CBP agents. San Bernardino NWR constructed a 4-foot tall iron and concrete bollard-style vehicle barrier along their south boundary in 2005 to prevent habitat-damaging vehicle incursions from Mexico. In 2008, DHS contractors constructed a 4-foot tall mix of iron Normandy-style barrier and iron and concrete bollard-style barrier along the U.S/Mexico border parallel to the existing NWR barrier. Both the San Bernardino NWR and DHS vehicle barriers allow water and wildlife movement.

Southern Arizona NWRs will continue to work with CBP on opportunities for border infrastructure that allows for international security as well as wildlife and habitat considerations.

No More Deaths – Humanitarian Aid on Cabeza Prieta National Wildlife Refuge

Cabeza Prieta NWR shares 56 miles of border with Mexico where illegal border crossings and drug smuggling are ongoing issues on USFWS lands. Humanitarian aid workers deposit supply caches for cross border violators along trails and within designated wilderness, often in conflict with USFWS regulations and CBP operations. To date, the refuge has permitted life-saving measures such as rescue beacons, 55-gallon water stations and blue flags at systems that provide water for wildlife. In July 2017, the access permit for Cabeza Prieta NWR, Barry M. Goldwater Range (DOD), and Sonoran Desert National Monument (BLM) was revised emphasizing current refuge regulation to remove all personal property. The USFWS issued nine citations to humanitarian aid workers in 2018 for driving in wilderness areas, abandonment of property, trespass and failing to obtain an access permit. All violators were involved in distributing supply caches in the wilderness area. The Assistant U.S. Attorney's Office is prosecuting these cases. In

January 2018, the first three defendants were found guilty on all counts. The remaining cases are pending trial.

Closure of Roads on Kofa National Wildlife Refuge

Mr. Allen Armstrong owns the Castle Dome and Hull Mine in-holdings within Kofa NWR. In 2017 he gated the Castle Dome Road that passes through his inholdings, preventing access to refuge lands via a route that had been available to the public for decades. His stated reasons for the closure were concerns about noise, dust, and traffic conflicts between refuge visitors and patrons to his Castle Dome Museum/Hull Mine. Mr. Armstrong has expressed no interest in providing an easement across his properties. The Castle Dome Road closure and potential closure of other roads significantly affect refuge staff and visitors. The FWS was able to come to an agreement with Mr. Armstrong that he will re-open the road until an alternative road is created. The FWS has initiated an Environmental Assessment (EA) for rerouting the Castle Dome Road with a goal of ensuring continued access for Refuge visitors and the least disruption to their traditional use. The FWS will continue efforts to maintain public access and anticipates completing the EA and moving forward with a proposed route in summer 2019.

Apache trout

FWS biologists are immersed in recovering threatened Apache trout in concert with the White Mountain Apache Tribe and Arizona Game and Fish Department and to providing many opportunities to angle for this rare yellow trout. The FWS's Arizona Fish and Wildlife Conservation Office staff seeks to expand Apache trout populations into waters where the fish naturally occurred in the past. Williams Creek National Fish Hatchery staff consults with geneticists at the Southwestern Native Fish and Aquatic Resources and Recovery Center in Dexter, New Mexico, to manage hatchery broodstock at the genetic level to maintain a robust captive stock. Apache trout is Arizona's state fish and lives naturally only in streams pouring off the White Mountains of eastern Arizona on the Ft. Apache Indian Reservation and Apache Sitgreaves National Forest. Angling for Apache trout generates excise taxes for the Wildlife and Sport Fish Restoration Program.

INFORMATION MEMORANDUM FOR THE DEPUTY ASSISTANT SECRETARY FOR FISH, WILDLIFE AND PARKS

DATE: February 19, 2019
FROM: Amy Lueders, Southwest Regional Director, U.S. Fish and Wildlife Service
SUBJECT: U.S. Fish and Wildlife Service Issues of Interest in New Mexico

I. STATEMENT OF PURPOSE

Provide information on key U.S. Fish and Wildlife Service (FWS) issues of Congressional or other significant interest in the state of New Mexico.

II. BACKGROUND

The State of New Mexico is 121,697 square miles. Albuquerque is home to the Southwest Regional Office. The FWS has approximately 343 staff in the state that support the FWS mission through a number of programs. New Mexico has nine National Wildlife Refuges that total 389,224 acres and provide hunting and angling opportunities. The Southwest Region's first urban refuge, Valle de Oro, is a 580-acre urban oasis on a former dairy farm. Sevilleta National Wildlife Refuge is the largest refuge in the state and home to the Sevilleta Wolf Management Facility. The Mora National Fish Hatchery has the only captive broodstock of threatened Gila trout. The New Mexico Ecological Services Field Office manages protection and recovery for 53 listed species in the State of New Mexico including the Mexican wolf, the New Mexico meadow jumping mouse, the Rio Grande silvery minnow, the lesser prairie-chicken and dunes sagebrush lizard. New Mexico is also home to the Pueblo of Zuni and Pueblo of Jemez Tribal Eagle aviaries.

III. DISCUSSION

Lesser Prairie-Chicken

In April 2014, FWS listed the lesser prairie-chicken (LPC) as threatened under the Endangered Species Act (ESA) with a special 4(d) rule providing ESA compliance for activities carried out under *The Lesser Prairie-Chicken Range-wide Conservation Plan* (RWP). In 2014, the Permian Basin Petroleum Association and four New Mexico counties filed a lawsuit challenging the listing rule. In 2015, a court vacated the rule; FWS did not appeal. Prior to the 2015 court ruling, FWS began work on a species status assessment (SSA) for the LPC to help inform future actions. The SSA included input from the five range states, the Western Association of Fish and Wildlife Agencies (WAFWA), and many other scientific experts. The SSA has undergone independent peer review and uses the best available information to characterize current science, threats, and conservation efforts. The results of the SSA are included within a draft SSA report that has not been publicly released. In 2016, FWS was again petitioned to list the LPC as endangered. FWS published a positive 90-day finding, but has not made a 12-month finding. On February 14, 2019, the petitioners (CBD, Defenders, and WEG) filed a notice of intent to sue FWS for failure to make a 12-month finding for the lesser prairie-chicken.

Mexican wolves

The Mexican gray wolf subspecies was listed as endangered under the Endangered Species Act in 1976; the subspecies-level listing was incorporated into a species-level listing of the gray wolf in 1978. The FWS established a nonessential experimental population (NEP) of the Mexican gray wolf in Arizona and New Mexico in 1998, with the first wolves released that year. In 2015, FWS separately listed the Mexican gray wolf subspecies as endangered and revised regulations for the NEP under ESA section 10(j). In 2017, FWS published a final revised recovery plan that was endorsed by the affected states. The FWS continues to work with partners to further Mexican gray wolf recovery.

The 2017 annual year-end population surveys documents a minimum of 114 wolves in the wild (2016 = 113, 2015 = 97). The 2018 survey results will be announced in March 2019. In 2018, there were a total of 99 confirmed livestock depredations, which is 2.5 times above normal (2017 = 28, 2016 = 50, 2015 = 49, 2014 = 30). In 2018, there were a total of 20 Mexican wolf mortalities, which is the highest in a single year. We still consider this to be in normal levels, because we also had the highest number of collared wolves (~85), which helps us detect mortalities.

Arizona Water Settlement Act

The FWS is a Cooperating Agency with numerous federal, state, and local partners on the Arizona Water Settlement Act (AWSA), New Mexico Central Arizona Project Unit (NM Unit). Partners include Bureau of Reclamation, Forest Service, Bureau of Land Management, the New Mexico Interstate Stream Commission, the New Mexico Department of Game and Fish and the NM Unit. The AWSA allows New Mexico to divert an annual average of 14,000 acre-feet of water from the Gila and San Francisco basins (not to exceed 140,000 acre-feet over a 10-year period). Numerous ESA listed species occur in the project area. The AWSA includes provisions that allow funds to be expended on municipal water conservation and reclamation efforts. Currently, the Bureau of Reclamation is drafting an Environmental Impact Statement (EIS) and a Biological Assessment. The very complex analyses and documents are well underway but are behind schedule. The FWS is working closely with BOR on this project.

Native American Eagle Aviary

In order to provide assistance to Federally Recognized Tribes within the United States, in accordance with 50 CFR 22, the ability to possess for religious use, live non-releasable eagles, the FWS Southwest Region, Migratory Bird Permit Office implemented the Native American Eagle Aviary Permit. Eagles housed in the aviaries are birds rescued from the wild because of sickness or injury and treated by wildlife rehabilitators, but the nature or severity of injuries prevent the birds from being returned to the wild. These eagles are then cared for, for the remainder of their lives at the aviary. Through the permitted aviary, Native Americans have an additional source of eagle feathers (through molting) for the cultural and religious needs. The Pueblo of Zuni, in 1990, was the first Tribe in the Nation to propose plans for a sanctuary to house non-releasable eagles for cultural and religious use. Currently the aviary houses 12 bald eagles and 15 golden eagles. The Pueblo of Jemez, located in the Jemez Reservation, was the second Tribe in New Mexico to receive an Eagle Aviary - Live permit. The Pueblo has two

satellite aviaries, each housing one golden eagle. Each satellite caretaker is a member of an Eagle Watching Society.

New Mexico Water Right on National Wildlife Refuges

Both the FWS and Bureau of Reclamation (Reclamation) have concerns that the New Mexico Office of the State Engineer's (NMOSE) administration of water rights used for environmental purposes is inaccurate and negatively impacts Federal interests. The Department of Interior's (DOI) Office of the Solicitor is coordinating an effort with the NMOSE to address DOI concerns regarding the State's administration of water rights that affect the following three National Wildlife Refuge System (NWRS) units:

Bitter Lake NWR: According to NMOSE, if this refuge changes the use of its water rights from agriculture to wetlands, this refuge may see a net reduction of 30% of its diversionary water rights. NMOSE has argued that wetland use is solely consumptive in nature. In fact, these wetlands consume about half as much water as required by a comparable agricultural operation.

Valle de Oro NWR: Similarly, NMOSE estimates that there will also be a 30% reduction to this refuge's water rights if water is used to manage wetlands and not for agriculture. Reclamation shares the refuge's concern as a co-owner of this refuge's water rights.

Bosque del Apache NWR: In NMOSE's files, this refuge's water right is defined as both an agricultural right and as a wetland flow-through right. This unresolved discrepancy has complicated efforts to defend the refuge's water rights. The DOI Solicitor's Office is engaged with both the FWS and Reclamation with these water right challenges and is coordinating this effort to resolve these issues with the NMOSE.

Gallinas River "inter se" phase of the State of New Mexico Pecos River General Stream Adjudication

The Gallinas River section of the Pecos River adjudication was initiated by the State of New Mexico in 1985 to make final determinations regarding the validity of water right claims in the Gallinas River basin, including water rights for the Las Vegas NWR. The adjudication has two broad phases: initial determination of water rights by the State Engineer and challenges or objections to those determinations in the "*inter se*" phase, which is now underway. Las Vegas NWR holds the largest water right in the basin but with a priority date of 1909, it is one of the most junior in the system. As part of the adjudication process, the Department of Justice (DOJ) and FWS will strive to ensure that water rights with more senior claims are adjudicated fairly so Las Vegas NWR receives water to which it is legally entitled. On average, Las Vegas NWR receives only about 25 percent of its entitled water. In March 2018, DOJ filed objections on behalf of the FWS to the State Engineer's findings on 41 (of approximately 2,000) claims associated with the Gallinas River. As part of the *inter se* process, which began in June of 2018, DOJ met with almost all water claimants to gather further evidence about their claimed water rights. The DOJ is now in the process of withdrawing or settling the majority of the FWS objections. Currently, DOJ expects it will only litigate the FWS objections to two or three remaining claims. The water rights holders impacted by the Gallinas adjudication may not fully understand the adjudication process and may have misconceptions about the FWS role. It is important to note the FWS is the only Federal agency in the adjudication and the only entity to have filed objections in the *inter se* phase.

Proposed Addition to Sevilleta National Wildlife Refuge

Mr. Gordon Herkenhoff owns Indian Hill Farms, adjacent to Sevilleta NWR. Approximately 600 acres are in cultivation and 650 acres support native upland habitat. Approximately 975 acres are east of I-25 and 275 acres lie west of I-25. The property includes a significant amount of pre-1907 water rights which are the most valuable and senior water rights recognized by the State of New Mexico and are rarely available for purchase. Addition of this property to Sevilleta NWR would advance wildlife habitat restoration of wetlands, uplands, and riparian corridors. It would also provide opportunities to expand recreational access. The FWS intends to utilize Migratory Bird Conservation Fund dollars to acquire the property as a phased, multi-year project, beginning in FY 2019.

Rio Mora National Wildlife Refuge

The Rio Mora National Wildlife Refuge and Conservation Area (CA), a 300,000-acre landscape conservation effort, is a partnership-driven initiative for the protection and enhancement (via acquisition of conservation easement or fee title interest or through technical assistance) of the 950,000-acre Mora River watershed in Mora, San Miguel and Colfax counties. Rio Mora NWR was established through initial donation of the 4,224-acre Wind River Ranch, which continues to support research, restoration, outreach, interpretation and environmental education in cooperation with the Denver Zoological Foundation (Denver Zoo), the Pueblo of Pojoaque, and New Mexico Highlands University. The $1.7 million startup funding provided by Thaw Charitable Trust to Denver Zoo was expended in 2017; the Denver Zoo is exploring grants and fund raising to continue their work on Rio Mora NWR and the FWS provides offices, equipment, fuel and housing to support the partnership. There is a Memorandum of Understanding between the FWS, Denver Zoo, the Pueblo of Pojoaque and New Mexico Highlands University. Additionally, the Biophilia Foundation's planned donation of the 3,300-acre Pritzlaff Ranch to the FWS is in the title-clearing phase. The ranch, which will become a unit of Rio Mora NWR and CA, is operated as a forest and watershed restoration and educational site for private citizens, public school and university students, local landowners, and environmental professionals.

Recovering Threatened Gila Trout

Mora National Fish Hatchery is a place of refuge for the rare Gila trout as well as where leading-edge science is employed for their betterment. The hatchery holds five genetically distinct lineages of Gila trout, native only to the uppermost reaches of the Gila River. Hatchery staff consults with geneticists at the Southwestern Native Fish and Aquatic Resources and Recovery Center in Dexter, New Mexico, to manage hatchery broodstock at the genetic level to maintain robust captive stocks. Hatchery staff work in concert with USFWS's New Mexico Fish and Wildlife Conservation Office, the New Mexico Department of Game and Fish and U.S. Forest Service to return Gila trout to streams occupied by the fish in the past. Expanding the trout's range is essential to eventual delisting and provides more fishing opportunities, which generates excise taxes for the Wildlife and Sport Fish Restoration Program.

INFORMATION MEMORANDUM FOR THE DEPUTY ASSISTANT SECRETARY FOR FISH, WILDLIFE AND PARKS

DATE: February 19, 2019
FROM: Amy Lueders, Southwest Regional Director, U.S. Fish and Wildlife Service
SUBJECT: U.S. Fish and Wildlife Service Issues of Interest in Arizona

I. STATEMENT OF PURPOSE

Provide information on key U.S. Fish and Wildlife Service (FWS) issues of Congressional or other significant interest in the state of Arizona.

II. BACKGROUND

The State of Arizona is 113,998 square miles. The FWS has approximately 163 staff in the state that support the FWS mission through a number of programs. Arizona has nine National Wildlife Refuges that total 1.73 million acres and provide hunting and angling opportunities to visitors, as well as being actively engaged in recovering endangered species such as the Sonoran pronghorn. Arizona is home to the largest national wildlife refuge in the lower 48 states, Cabeza Prieta. The three National Fish Hatcheries spawn, raise and release imperiled desert fishes, as well as several trout species for angling, including the threatened Apache trout. The Arizona Ecological Services Field Office manages protection and recovery for 64 listed species in the state including the Mexican wolf, the lesser long-nosed bat, the Gila topminnow, the ocelot and the jaguar. Arizona is also home to the Navajo Nation Tribal Eagle aviary.

III. DISCUSSION

Mexican wolves

The Mexican gray wolf subspecies was listed as endangered under Endangered Species Act (ESA) in 1976; the subspecies-level listing was incorporated into a species-level listing of the gray wolf in 1978. The FWS established a nonessential experimental population (NEP) of the Mexican gray wolf in Arizona and New Mexico in 1998, with the first wolves released that year. In 2015, FWS separately listed the Mexican gray wolf subspecies as endangered and revised regulations for the NEP under ESA section 10(j). In 2017, FWS published a final revised recovery plan that was endorsed by the affected states. In January 2018, several environmental groups filed litigation against the final recovery plan. FWS and DOJ filed a motion to dismiss and are awaiting the judge's decision. The FWS continues to work with partners to further Mexican gray wolf recovery.

The 2017 annual population survey documents a minimum of 114 wolves in the wild. The 2018 survey results will be announced in March 2019. In 2018, there were 20 total wolf mortalities, which is most in a single year. In 2018, there were 99 total confirmed livestock depredations, which is 2.5 times above normal. We still consider this to be in normal levels, because we also had the highest number of collared wolves (~85), which helps us detect mortalities.

Arizona Water Settlement Act

The FWS is a Cooperating Agency with numerous federal, state, and local partners on the Arizona Water Settlement Act (AWSA), New Mexico Central Arizona Project Unit (NM Unit). Partners include Bureau of Reclamation, Forest Service, Bureau of Land Management, the New Mexico Interstate Stream Commission, the New Mexico Department of Game and Fish and the NM Unit. The AWSA allows New Mexico to divert an annual average of 14,000 acre-feet of water from the Gila and San Francisco basins (not to exceed 140,000 acre-feet over a 10-year period). Numerous ESA listed species occur in the project area. The AWSA includes provisions that allow funds to be expended on municipal water conservation and reclamation efforts. Currently, the Bureau of Reclamation is drafting an Environmental Impact Statement (EIS) and a Biological Assessment. The very complex analyses and documents are well underway but are behind schedule. The FWS is working closely with BOR on this project.

Drought Contingency Plan: Colorado River Basin

The Drought Contingency Plan (DCP) is a seven-basin state effort to adjust water allocations temporarily to combat impacts of the current drought. Water allocated in the lower basin is in danger of disruption should lake elevation in Lake Mead drop below 1,075 feet, resulting in a series of Shortage Criteria in which full water allocations will not be delivered. The state of Arizona is one of the first states to be most impacted by water withholding, and is overall a strong proponent of the DCP. It is predicted that Lake Mead elevations will dip below 1,071 by 2021 resulting in triggering Shortage Criteria. The FWS has long committed resources to coordinate with Federal, State and Tribal partners to address environmental ramifications of current river conditions or any DCP plan to provide ESA compliance where necessary. We are partners in the Glen Canyon Dam Adaptive Management Program and the Lower Colorado River Multi-Species Conservation Program (LCR MSCP); both of these provide environmental compliance for river operations and water allocations from Glen Canyon Dam to Mexico. ESA compliance by these programs are necessary to mitigate impacts to the four endangered Colorado River fishes, and at least five other listed terrestrial species that rely on the river corridor. The LCR MSCP is a large Section 7 and Section 10/HCP hybrid that provides ESA coverage for 57 Federal, State, and Tribal entities. This program addresses the needs of 27 species that either are listed under the ESA or are otherwise sensitive. At the request of LCR MSCP Steering Committee members, we are regularly meeting to discuss options for amending the existing program to cover additional compliance needs as a result of the DCP.

Border Barrier on Southern Arizona National Wildlife Refuges

Along Arizona's International Border with Mexico, National Wildlife Refuge (NWR) System lands have experienced significant habitat damage due to illegal border-related activities such as trail networks, litter, dumping, illegal roads and abandoned vehicles. In 2008, Customs and Border Protection (CBP) installed vehicle barriers or fencing in combination with monitoring and sensing technology which significantly reduced habitat damage and conflicts with the public. It is important to note that the barriers were developed to meet specific needs. The designs allow for limited movement of wildlife and do not restrict potential floodwaters at specific locations. Like other areas along the US/Mexican border, the combination of border barriers, surveillance towers, number of agents, and tactics used by CBP has been effective in reducing illegal activities occurring on Arizona's southern NWR's.

Cabeza Prieta National Wildlife Refuge: The 860,000-acre Cabeza Prieta NWR shares 56 miles of border with Mexico and exhibits both a 4-foot tall Normandy-style barrier and a 4-foot tall concrete bollard-style barrier. Both barriers are effective at prohibiting vehicles from crossing but allow wildlife passage. Prior to the border barrier installation, drug smugglers coming from Mexico created significant illegal roads, before abandoning the vehicles on refuge property. While not stopping foot traffic, the current border barriers have been very effective in stopping drug smuggling vehicles while still allowing for wildlife movement, including the endangered Sonoran pronghorn.

Buenos Aires National Wildlife Refuge: The 117,500-acre Buenos Aires NWR is located in south-central Arizona and shares about 5.26 miles of border with Mexico. A barbed wire barrier along the International Border separated the refuge from Mexico until 2007/2008, when Department of Homeland Security (DHS) contractors constructed a 15-foot tall iron and concrete bollard-style barrier along the south boundary of Buenos Aires NWR. While this style of barrier raised concern for migration patterns of large mammals such as jaguar, its installation has also created habitat benefits to the semi-desert grasslands. This DHS barrier allows for some water and wildlife movement, and provides the important tactical advantage of agents and surveillance towers being able to view potential opponents/threats through the barrier (rather than the view being obstructed by a solid barrier). The combination of towers, border barrier and CBP agents have significantly decreased the volume of discarded trash, allowed restoration of grassland conditions, and allowed safe public access into Buenos Aires NWR areas that were previously deemed dangerous and were therefore closed to public entry for over a decade.

San Bernardino National Wildlife Refuge: The 2,369-acre San Bernardino NWR is located in southeastern Arizona and shares about 2.65 miles of border with Mexico and utilizes a combination of vehicle barriers, surveillance towers, and CBP agents. San Bernardino NWR constructed a 4-foot tall iron and concrete bollard-style vehicle barrier along their south boundary in 2005 to prevent habitat-damaging vehicle incursions from Mexico. In 2008, DHS contractors constructed a 4-foot tall mix of iron Normandy-style barrier and iron and concrete bollard-style barrier along the U.S/Mexico border parallel to the existing NWR barrier. Both the San Bernardino NWR and DHS vehicle barriers allow water and wildlife movement.

Southern Arizona NWRs will continue to work with CBP on opportunities for border infrastructure that allows for international security as well as wildlife and habitat considerations.

No More Deaths – Humanitarian Aid on Cabeza Prieta National Wildlife Refuge

Cabeza Prieta NWR shares 56 miles of border with Mexico where illegal border crossings and drug smuggling are ongoing issues on USFWS lands. Humanitarian aid workers deposit supply caches for cross border violators along trails and within designated wilderness, often in conflict with USFWS regulations and CBP operations. To date, the refuge has permitted life-saving measures such as rescue beacons, 55-gallon water stations and blue flags at systems that provide water for wildlife. In July 2017, the access permit for Cabeza Prieta NWR, Barry M. Goldwater Range (DOD), and Sonoran Desert National Monument (BLM) was revised emphasizing current refuge regulation to remove all personal property. The USFWS issued nine citations to humanitarian aid workers in 2018 for driving in wilderness areas, abandonment of property, trespass and failing to obtain an access permit. All violators were involved in distributing supply caches in the wilderness area. The Assistant U.S. Attorney's Office is prosecuting these cases. In

January 2018, the first three defendants were found guilty on all counts. The remaining cases are pending trial.

Closure of Roads on Kofa National Wildlife Refuge

Mr. Allen Armstrong owns the Castle Dome and Hull Mine in-holdings within Kofa NWR. In 2017 he gated the Castle Dome Road that passes through his inholdings, preventing access to refuge lands via a route that had been available to the public for decades. His stated reasons for the closure were concerns about noise, dust, and traffic conflicts between refuge visitors and patrons to his Castle Dome Museum/Hull Mine. Mr. Armstrong has expressed no interest in providing an easement across his properties. The Castle Dome Road closure and potential closure of other roads significantly affect refuge staff and visitors. The FWS was able to come to an agreement with Mr. Armstrong that he will re-open the road until an alternative road is created. The FWS has initiated an Environmental Assessment (EA) for rerouting the Castle Dome Road with a goal of ensuring continued access for Refuge visitors and the least disruption to their traditional use. The FWS will continue efforts to maintain public access and anticipates completing the EA and moving forward with a proposed route in summer 2019.

Apache trout

FWS biologists are immersed in recovering threatened Apache trout in concert with the White Mountain Apache Tribe and Arizona Game and Fish Department and to providing many opportunities to angle for this rare yellow trout. The FWS's Arizona Fish and Wildlife Conservation Office staff seeks to expand Apache trout populations into waters where the fish naturally occurred in the past. Williams Creek National Fish Hatchery staff consults with geneticists at the Southwestern Native Fish and Aquatic Resources and Recovery Center in Dexter, New Mexico, to manage hatchery broodstock at the genetic level to maintain a robust captive stock. Apache trout is Arizona's state fish and lives naturally only in streams pouring off the White Mountains of eastern Arizona on the Ft. Apache Indian Reservation and Apache Sitgreaves National Forest. Angling for Apache trout generates excise taxes for the Wildlife and Sport Fish Restoration Program.

INFORMATION MEMORANDUM FOR THE DEPUTY ASSISTANT SECRETARY FOR FISH, WILDLIFE AND PARKS

DATE: February 19, 2019
FROM: Amy Lueders, Southwest Regional Director, U.S. Fish and Wildlife Service
SUBJECT: U.S. Fish and Wildlife Service Issues of Interest in New Mexico

I. STATEMENT OF PURPOSE

Provide information on key U.S. Fish and Wildlife Service (FWS) issues of Congressional or other significant interest in the state of New Mexico.

II. BACKGROUND

The State of New Mexico is 121,697 square miles. Albuquerque is home to the Southwest Regional Office. The FWS has approximately 343 staff in the state that support the FWS mission through a number of programs. New Mexico has nine National Wildlife Refuges that total 389,224 acres and provide hunting and angling opportunities. The Southwest Region's first urban refuge, Valle de Oro, is a 580-acre urban oasis on a former dairy farm. Sevilleta National Wildlife Refuge is the largest refuge in the state and home to the Sevilleta Wolf Management Facility. The Mora National Fish Hatchery has the only captive broodstock of threatened Gila trout. The New Mexico Ecological Services Field Office manages protection and recovery for 53 listed species in the State of New Mexico including the Mexican wolf, the New Mexico meadow jumping mouse, the Rio Grande silvery minnow, the lesser prairie-chicken and dunes sagebrush lizard. New Mexico is also home to the Pueblo of Zuni and Pueblo of Jemez Tribal Eagle aviaries.

III. DISCUSSION

Lesser Prairie-Chicken

In April 2014, FWS listed the lesser prairie-chicken (LPC) as threatened under the Endangered Species Act (ESA) with a special 4(d) rule providing ESA compliance for activities carried out under *The Lesser Prairie-Chicken Range-wide Conservation Plan* (RWP). In 2014, the Permian Basin Petroleum Association and four New Mexico counties filed a lawsuit challenging the listing rule. In 2015, a court vacated the rule; FWS did not appeal. Prior to the 2015 court ruling, FWS began work on a species status assessment (SSA) for the LPC to help inform future actions. The SSA included input from the five range states, the Western Association of Fish and Wildlife Agencies (WAFWA), and many other scientific experts. The SSA has undergone independent peer review and uses the best available information to characterize current science, threats, and conservation efforts. The results of the SSA are included within a draft SSA report that has not been publicly released. In 2016, FWS was again petitioned to list the LPC as endangered. FWS published a positive 90-day finding, but has not made a 12-month finding. On February 14, 2019, the petitioners (CBD, Defenders, and WEG) filed a notice of intent to sue FWS for failure to make a 12-month finding for the lesser prairie-chicken.

Mexican wolves

The Mexican gray wolf subspecies was listed as endangered under the Endangered Species Act in 1976; the subspecies-level listing was incorporated into a species-level listing of the gray wolf in 1978. The FWS established a nonessential experimental population (NEP) of the Mexican gray wolf in Arizona and New Mexico in 1998, with the first wolves released that year. In 2015, FWS separately listed the Mexican gray wolf subspecies as endangered and revised regulations for the NEP under ESA section 10(j). In 2017, FWS published a final revised recovery plan that was endorsed by the affected states. The FWS continues to work with partners to further Mexican gray wolf recovery.

The 2017 annual year-end population surveys documents a minimum of 114 wolves in the wild (2016 = 113, 2015 = 97). The 2018 survey results will be announced in March 2019. In 2018, there were a total of 99 confirmed livestock depredations, which is 2.5 times above normal (2017 = 28, 2016 = 50, 2015 = 49, 2014 = 30). In 2018, there were a total of 20 Mexican wolf mortalities, which is the highest in a single year. We still consider this to be in normal levels, because we also had the highest number of collared wolves (~85), which helps us detect mortalities.

Arizona Water Settlement Act

The FWS is a Cooperating Agency with numerous federal, state, and local partners on the Arizona Water Settlement Act (AWSA), New Mexico Central Arizona Project Unit (NM Unit). Partners include Bureau of Reclamation, Forest Service, Bureau of Land Management, the New Mexico Interstate Stream Commission, the New Mexico Department of Game and Fish and the NM Unit. The AWSA allows New Mexico to divert an annual average of 14,000 acre-feet of water from the Gila and San Francisco basins (not to exceed 140,000 acre-feet over a 10-year period). Numerous ESA listed species occur in the project area. The AWSA includes provisions that allow funds to be expended on municipal water conservation and reclamation efforts. Currently, the Bureau of Reclamation is drafting an Environmental Impact Statement (EIS) and a Biological Assessment. The very complex analyses and documents are well underway but are behind schedule. The FWS is working closely with BOR on this project.

Native American Eagle Aviary

In order to provide assistance to Federally Recognized Tribes within the United States, in accordance with 50 CFR 22, the ability to possess for religious use, live non-releasable eagles, the FWS Southwest Region, Migratory Bird Permit Office implemented the Native American Eagle Aviary Permit. Eagles housed in the aviaries are birds rescued from the wild because of sickness or injury and treated by wildlife rehabilitators, but the nature or severity of injuries prevent the birds from being returned to the wild. These eagles are then cared for, for the remainder of their lives at the aviary. Through the permitted aviary, Native Americans have an additional source of eagle feathers (through molting) for the cultural and religious needs. The Pueblo of Zuni, in 1990, was the first Tribe in the Nation to propose plans for a sanctuary to house non-releasable eagles for cultural and religious use. Currently the aviary houses 12 bald eagles and 15 golden eagles. The Pueblo of Jemez, located in the Jemez Reservation, was the second Tribe in New Mexico to receive an Eagle Aviary - Live permit. The Pueblo has two

satellite aviaries, each housing one golden eagle. Each satellite caretaker is a member of an Eagle Watching Society.

New Mexico Water Right on National Wildlife Refuges

Both the FWS and Bureau of Reclamation (Reclamation) have concerns that the New Mexico Office of the State Engineer's (NMOSE) administration of water rights used for environmental purposes is inaccurate and negatively impacts Federal interests. The Department of Interior's (DOI) Office of the Solicitor is coordinating an effort with the NMOSE to address DOI concerns regarding the State's administration of water rights that affect the following three National Wildlife Refuge System (NWRS) units:

Bitter Lake NWR: According to NMOSE, if this refuge changes the use of its water rights from agriculture to wetlands, this refuge may see a net reduction of 30% of its diversionary water rights. NMOSE has argued that wetland use is solely consumptive in nature. In fact, these wetlands consume about half as much water as required by a comparable agricultural operation.

Valle de Oro NWR: Similarly, NMOSE estimates that there will also be a 30% reduction to this refuge's water rights if water is used to manage wetlands and not for agriculture. Reclamation shares the refuge's concern as a co-owner of this refuge's water rights.

Bosque del Apache NWR: In NMOSE's files, this refuge's water right is defined as both an agricultural right and as a wetland flow-through right. This unresolved discrepancy has complicated efforts to defend the refuge's water rights. The DOI Solicitor's Office is engaged with both the FWS and Reclamation with these water right challenges and is coordinating this effort to resolve these issues with the NMOSE.

Gallinas River "inter se" phase of the State of New Mexico Pecos River General Stream Adjudication

The Gallinas River section of the Pecos River adjudication was initiated by the State of New Mexico in 1985 to make final determinations regarding the validity of water right claims in the Gallinas River basin, including water rights for the Las Vegas NWR. The adjudication has two broad phases: initial determination of water rights by the State Engineer and challenges or objections to those determinations in the "*inter se*" phase, which is now underway. Las Vegas NWR holds the largest water right in the basin but with a priority date of 1909, it is one of the most junior in the system. As part of the adjudication process, the Department of Justice (DOJ) and FWS will strive to ensure that water rights with more senior claims are adjudicated fairly so Las Vegas NWR receives water to which it is legally entitled. On average, Las Vegas NWR receives only about 25 percent of its entitled water. In March 2018, DOJ filed objections on behalf of the FWS to the State Engineer's findings on 41 (of approximately 2,000) claims associated with the Gallinas River. As part of the *inter se* process, which began in June of 2018, DOJ met with almost all water claimants to gather further evidence about their claimed water rights. The DOJ is now in the process of withdrawing or settling the majority of the FWS objections. Currently, DOJ expects it will only litigate the FWS objections to two or three remaining claims. The water rights holders impacted by the Gallinas adjudication may not fully understand the adjudication process and may have misconceptions about the FWS role. It is important to note the FWS is the only Federal agency in the adjudication and the only entity to have filed objections in the *inter se* phase.

Proposed Addition to Sevilleta National Wildlife Refuge

Mr. Gordon Herkenhoff owns Indian Hill Farms, adjacent to Sevilleta NWR. Approximately 600 acres are in cultivation and 650 acres support native upland habitat. Approximately 975 acres are east of I-25 and 275 acres lie west of I-25. The property includes a significant amount of pre-1907 water rights which are the most valuable and senior water rights recognized by the State of New Mexico and are rarely available for purchase. Addition of this property to Sevilleta NWR would advance wildlife habitat restoration of wetlands, uplands, and riparian corridors. It would also provide opportunities to expand recreational access. The FWS intends to utilize Migratory Bird Conservation Fund dollars to acquire the property as a phased, multi-year project, beginning in FY 2019.

Rio Mora National Wildlife Refuge

The Rio Mora National Wildlife Refuge and Conservation Area (CA), a 300,000-acre landscape conservation effort, is a partnership-driven initiative for the protection and enhancement (via acquisition of conservation easement or fee title interest or through technical assistance) of the 950,000-acre Mora River watershed in Mora, San Miguel and Colfax counties. Rio Mora NWR was established through initial donation of the 4,224-acre Wind River Ranch, which continues to support research, restoration, outreach, interpretation and environmental education in cooperation with the Denver Zoological Foundation (Denver Zoo), the Pueblo of Pojoaque, and New Mexico Highlands University. The $1.7 million startup funding provided by Thaw Charitable Trust to Denver Zoo was expended in 2017; the Denver Zoo is exploring grants and fund raising to continue their work on Rio Mora NWR and the FWS provides offices, equipment, fuel and housing to support the partnership. There is a Memorandum of Understanding between the FWS, Denver Zoo, the Pueblo of Pojoaque and New Mexico Highlands University. Additionally, the Biophilia Foundation's planned donation of the 3,300-acre Pritzlaff Ranch to the FWS is in the title-clearing phase. The ranch, which will become a unit of Rio Mora NWR and CA, is operated as a forest and watershed restoration and educational site for private citizens, public school and university students, local landowners, and environmental professionals.

Recovering Threatened Gila Trout

Mora National Fish Hatchery is a place of refuge for the rare Gila trout as well as where leading-edge science is employed for their betterment. The hatchery holds five genetically distinct lineages of Gila trout, native only to the uppermost reaches of the Gila River. Hatchery staff consults with geneticists at the Southwestern Native Fish and Aquatic Resources and Recovery Center in Dexter, New Mexico, to manage hatchery broodstock at the genetic level to maintain robust captive stocks. Hatchery staff work in concert with USFWS's New Mexico Fish and Wildlife Conservation Office, the New Mexico Department of Game and Fish and U.S. Forest Service to return Gila trout to streams occupied by the fish in the past. Expanding the trout's range is essential to eventual delisting and provides more fishing opportunities, which generates excise taxes for the Wildlife and Sport Fish Restoration Program.

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service
Region 2 Weekly Report

Through 22 February, 2019

Media Contacts

Title/Issue	Anticipated Publication Date	Current Status
CBS Sunday Morning	Feb 2019	Feature on restoration of American paddlefish in Caddo Lake on the Texas-Louisiana line involving Tishomingo National Fish Hatchery, Texas Fish and Wildlife Conservation Office and Texas Parks and Wildlife. https://www.cbsnews.com/news/nature-up-close-caddo-lake/
Winter Birding on Maxwell NWR/Huerfano World Journal/Sharon Niederman	February 7, 2019	Submitted to editor by author (Niederman) 2/4.
Arizona PBS	February 2019	Contacted Randy Van Haverbeke (AZFWCO) for an on-site interview at Lees Ferry (Colorado River, Grand Canyon). Questions focused on water conservation and native and nonnative aquatic species, including the endangered Humpback Chub. Randy responded on December 17th, 2018 and was interviewed along with staff from USGS-Grand Canyon Monitoring and Research Center.

Cronkite News at Arizona PBS	Continuing	Recorded TV interview regarding the Animal and Plant Health Inspection Service program that utilized the tamarisk leaf beetle for biological control of saltcedar in riparian areas and the effects it has had on the southwestern willow flycatcher. Flycatcher lead Greg Beatty was interviewed. Print edition continues to circulate in newspapers, including the Arizona Republic.
Cronkite News at Arizona PBS	TBD	Reporter contacted Alchesay Williams Creek National Fish Hatchery to ascertain the work of all three national fish hatcheries in AZ.
Book author Peter Christie	TBD	Seeks to interview retired SAC Nick Chavez on illegal trade in exotic pets. Declined. Referred to Amy Jonach in HQ.
Book author Larkin Powell	TBD	Seeks information on warbler and vireo and birding near Ft. Hood for book manuscript on birding in the Plains states.
Arizona Highways Magazine (Kathy Montgomery)	Fall/winter 2018	Writer is researching ocelots in Arizona and Arizona's possible contribution to species recovery. (Updated information regarding fatality of an Arizona ocelot is being provided to reporter.)
KGUN-9 ABC (Tucson)	1/25/2019	TV news attributed to FWS a trail camera photo taken of a jaguar in the Chiricahua Mountains, Arizona. (FWS was furloughed during this time frame and neither captured nor posted the photo, nor was aware of the photo). University of Arizona citizen science program partner was source of the photo, which FWS is seeking to obtain.

		Animal is likely a previously identified male residing in Dos Cabazas Mountains area; spot identification confirmation not yet obtained.
Jimmy Tobias, freelance writer	TBD	Reporter contacted FWS inquiring about the lesser prairie-chicken and if the FWS had provided a species status recommendation to DOI.
Dean Russell Columbia Journalism School	TBD	Mexican wolf recovery and cross fostering
Morning Edition AZ station KJZZ	TBD	Reporter interviewed NMESFO Environmental Contaminant biologist on origins of mercury in the environment.
KUT Austin	December 4, 2018	Trey Shaar, reporter for KUT Austin, contacted the FWS regarding the CBD Notice of Intent on the salado and georgetown salamanders for failure to designate critical habitat.
New Mexico Wildlife magazine (New Mexico Dept of Game and Fish)	Winter 2018	Published stories from two USFWS employees. http://magazine.wildlife.state.nm.us/sunrise-14089/ http://magazine.wildlife.state.nm.us/outwitting-the-fish/
Tenkara Angler	Winter 2018-19	Published story on Gila trout conservation with attending video. Pg 70. https://issuu.com/troutrageous1/docs/tenkara_angler_winter_2018-19

Texas Wildlife (Texas Wildlife Assoc.)	Feb 2019	Published a feature story on importance of private lands conservation, penned by Regional Partners of Fish and Wildlife Coordinator.
Big Blend Magazines/ NationalParkTraveling.com	Feb 2019	Big Blend Video and Big Blend Radio interview with Wildlife Refuge Specialist Joshua Smith about plants and wildflowers on the Buenos Aires NWR. https://nationalparktraveling.com/listing/wildflower-wonderland-in-buenos-aires-nwr/

Environmental Impact Statements - EIS Briefings
Nothing to report

Week Ahead Schedule of Meetings, Hearings, and Travel
Nothing significant to report.

Immediate Announcements and Actions (within the next 14 days)
Nothing significant to report.

15-60 Day Look Ahead
Nothing significant to report.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is February 2019. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[NEW] - Lesser Prairie-Chicken litigation - On February 14, 2019, the Center for Biological Diversity, Defenders of Wildlife and Wild Earth Guardians, sued the Department of the Interior

and the U.S. Fish and Wildlife Service for failing to make a 12-month finding for the lesser prairie-chicken.

Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media required but not yet completed. Target date for submitting to the *Federal Register* being re-evaluated in light of furlough delays. Notice of intent to sue over delay was submitted by Center for Biological Diversity during furlough.

Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle 12-month finding – FWS has reached an agreement with the American Stewards of Liberty, the Independent Petroleum Association of America and Osage Producers Association (Plaintiffs) to publish a 12-month finding for the American burying beetle no later than April 30, 2019. The American burying beetle is currently listed as endangered and is known to have occurred in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Other Items of Note

[UPDATE] Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts (CPA) has applied to the Fish and Wildlife Service (Service) for an enhancement of survival (EOS) permit pursuant to the Endangered Species Act (ESA). The permit application includes a draft candidate conservation agreement with assurances (CCAA) for the dune sagebrush lizard (DSL) in west Texas and covers Andrews, Gaines, Winkler, Ward, Ector and Crane counties in Texas. The CCAA, and associated permit, would authorize incidental take resulting from activities covered by the CCAA (e.g., oil and gas, sand mining, renewable energy, agriculture and ranching activities) as well as incidental take resulting from actions taken to avoid, minimize, and offset disturbance of DSL habitat that result from the covered activities. If approved the EOS and CCAA would be in effect for 30 years. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*.

Proposed Oil & Gas Industry Conservation Plan (ICP) extension - The FWS is proposing an amendment to extend the ICP application timeframe by five years. A previous amendment extended the ICP sign-up period for 3 years (until May 20, 2019) and this amendment would extend the sign-up period for an additional 5 years (until May 20, 2024). The ICP has been an effective way to streamline oil and gas industry compliance with the ESA while protecting federally-listed species. The current ICP is only open for new applications through May 20, 2019, and incidental take authorized through the ICP is unlikely to approach the 32,234 acres allowed by that date. The change in timelines is the only proposed revision to the ICP, EA, and BO. There are no proposed changes to the federally listed species or area covered, and no increases in the total amount of incidental take provided through this ICP amendment. This proposed extension of the ICP is likely to be supported by the oil and gas industry because it streamlines the permitting process. The ICP has also supported habitat protection for the endangered American burying beetle and contributed towards recovery of the species. Outreach, including issuing a news release to media, congressionals and industry, as well as posting information on social media is planned to occur at time of publication in the *Federal Register*.

Georgetown and Salado Salamanders litigation - On December 4, 2018, the Center for Biological Diversity filed a Notice of Intent to sue the U.S. Fish and Wildlife Service for failing to designate critical habitat in central Texas for the Georgetown and Salado salamanders.

Peppered chub Species Status Assessment (SSA) – The FWS is finalizing a SSA report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The draft SSA was reviewed by interested partners and sent to several peer reviewers; however, we did not receive any peer reviewer comments. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan

(HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Release of the announcement of the plan has been repeatedly delayed pending more thorough reviews of the communications package (now complete). R2 seeks to announce in February.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was

completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

National Wildlife Refuge Actions

[NEW] Buenos Aires National Wildlife Refuge (AZ) hosted the annual "Women's Javelina Hunt" sponsored by the Arizona Chapter of Safari Club International, The Arizona Game and Fish Department, Arizona Mule Deer Organization, and the Becoming an Outdoor Woman (BOW) initiative. The group used our newly established group campsite 2/14 -18/ 2019. The weather was less than ideal for javelina hunting but a couple participants managed to harvest animals.

Laguna Atascosa National Wildlife Refuge (TX) is a main partner with the Gladys Porter Zoo in Brownsville, Texas in hosting the annual Ocelot Conservation Day community event, held this year on March 3, 2019. Taking place at the Zoo, the well-attended event offers hands-on family friendly activities, speakers, educational outreach booths, the Ocelot 5K Run, and live captive ambassador ocelots from the Texas Zoo. The day educates the public about the plight and recovery of the endangered Ocelot. Other partners include the Texas Zoo and Friends of Laguna Atascosa.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

A short video documenting captive spawning of threatened Apache trout has gone viral on Facebook, reaching nearly 500,000 views. The video shows conservation workers from Alchesay Williams Creek National Fish Hatchery, Arizona Fish and Wildlife Conservation Office and White Mountain Apache Tribe collecting and fertilizing Apache trout eggs, as well as collecting ovarian fluid for health assessment by staff at the Southwestern Native Aquatic Resources and Recovery Center.

Migratory Birds

Issued a 30-year eagle incidental take permit to Osage Wind, LLC Dec 20th, and the final EA/FONSI should be posted to the website in the next couple of weeks. Currently waiting on 508 compliance and a potential furlough.

Science Applications

Nothing significant to report.

Wildlife and Sport Fish Restoration

Nothing significant to report.

Native American Programs

Arizona Ecological Services Office will hold its annual Arizona Inter-tribal coordination meeting ca. April 2-3.

WEEKLY REPORT
DEPARTMENT OF THE INTERIOR
MARCH 3-9, 2019

OFFICE OF THE SECRETARY

Week Ahead Schedule of Meetings, Hearings, and Travel

Acting Chief of Staff Todd Willens will be in the office.

Deputy Chief of Staff Katharine MacGregor will be on personal leave March 4 and 5 and in the office the rest of the week.

Director of Scheduling and Advance Samantha Hebert will be in the office.

Senior Advisor Scott Hommel will be in the office.

Senior Advisor Heather Swift will be in the office.

Special Assistant Matthew Dermody will be in the office.

OFFICE OF COMMUNICATIONS

Director John Bockmier will be in the office.

Deputy Director Russell Newell will be in the office.

OFFICE OF CONGRESSIONAL AND LEGISLATIVE AFFAIRS

Cole Rojewski, Director, will be in the office and in meetings on Capitol Hill

Aaron Thiele, Advisor, will be in the office and in meetings on Capitol Hill

Taylor Playforth, Advisor, will be in the office and in meetings on Capitol Hill.

Hearings

HOUSE NATURAL RESOURCES SUBCOMMITTEE ON ENERGY & MINERAL RESOURCES HEARING
March 6th, BOEM, Acting Director, Walter Cruickshank & BSEE, Chief, of Offshore Regulatory Programs Doug Morris will testify at a hearing titled "Examining the Policies and Priorities of the Bureau of Ocean Energy Management, the Bureau of Safety and Environmental Enforcement."

HOUSE NATURAL RESOURCES SUBCOMMITTEE ON ENERGY & MINERAL RESOURCES HEARING

March 12th, BLM, Deputy Director, Mike Nedd will testify at a hearing titled "Examining the Policies and Priorities of the Bureau of Land Management."

OFFICE OF INTERGOVERNMENTAL AND EXTERNAL AFFAIRS

Todd Wynn, Director, will be in the office all week.
Benjamin Cassidy, Senior Deputy Director, will be in the office all week.
Tim Williams, Deputy Director, will be in the office all week.
Jason Funes, Special Assistant, will be in the office all week.
Sarah Spaulding, Special Assistant will be in the office all week.

Immediate Announcements and Actions (within the next 14 days)

The OIEA team is planning for a number of meetings with groups of county commissioners while the National Association of Counties conference is in DC.

The OIEA team is working with external partners to ensure a successful event in Denver at the Boone and Crockett dinner.

OFFICE OF THE DEPUTY SECRETARY

Week Ahead Schedule of Meetings, Hearings, and Travel

Associate Deputy Secretary Jim Cason will be in the office.

Immediate Announcements and Actions

The Department will sign a Memorandum of Agreement with the Department of Defense expanding the role of the DoD liaison to include all issues between the two departments. The MOA will implement the Memorandum of Understanding signed in 2018. The package has cleared DOI surnaming and is awaiting concurrence from DoD.

OFFICE OF THE EXECUTIVE SECRETARIAT AND REGULATORY AFFAIRS
Week Ahead Schedule of Meetings, Hearings, and Travel

- Director Julie Lillie will be in the office
- The Department of the Interior's submission for the Spring 2019 update of the "Unified Agenda of Federal Regulatory and Deregulatory Actions" is due to the Office of Management and Budget by March 6, 2019. The Office of the Executive Secretariat and Regulatory Affairs is currently working with Bureau/Office regulatory contacts to compile information for the Department's Agenda submission.

Immediate Announcements and Actions (within the next 14 days)

- **DOI Priority Rules-**

○ U.S. Fish and Wildlife Service (FWS) Final Rule, "Endangered and Threatened Wildlife and Plants; Regulations for Prohibitions to Threatened Wildlife and Plants; Removal of Blanket Section 4(d) Rule" (RIN 1018-BC97)-The FWS is finalizing revisions to the regulations on prohibitions that apply to species that are listed as threatened species or downlisted from an endangered species to a threatened species. The final rule is with the Office of Management and Budget (OMB) for review pursuant to Executive Order (EO) 12866. DOI received interagency review comments on February 25, 2019.

○ FWS Final Rule, "Conservation of Endangered and Threatened Species; Revision of Regulations to Address Interagency Cooperation" (RIN 1018-BC87) - The FWS is finalizing revisions to its regulations for interagency cooperation pursuant to the Endangered Species Act. The final rule is with the OMB for review pursuant to EO 12866. Interagency comments were due February 13, 2019. A conference call is scheduled with OMB and DOJ staff for February 28, 2019.

○ FWS Final Rule, "Endangered and Threatened Species of Wildlife and Plants; Revision of the Regulations for Listing Species and Designating Critical Habitat" (RIN 1018-BC88) - The FWS is finalizing revisions to its regulations for listing endangered and threatened species and for designating critical habitat under the Endangered Species Act. The final rule is with the OMB for review pursuant to EO 12866. Interagency comments were due February 13, 2019. A conference call with OMB and DOJ was held on February 26, 2019. Interagency comments were also provided to DOI on February 26, 2019.

○ Bureau of Safety and Environmental Enforcement (BSEE) Final Rule, "Oil and Gas Sulfur Operations on the Outer Continental Shelf - Blowout Preventer Systems and Well Control Revisions" (RIN 1014-AA39) - The BSEE is finalizing revisions to the regulations for oil and gas drilling, workover, completion and decommissioning operations on the Outer Continental Shelf. The final rule is with the OMB for review pursuant to EO 12866. On February 8, 2019, OMB provided DOI/BSEE with an initial round of EO 12866 interagency comments. On February 26, 2019, BSEE submitted initial drafts of revised final rule documents, which include responses to the comments received from OMB, for Departmental review. The revised final rule documents and comment responses are currently under review. An EO 12866 "listening session" with the American Petroleum Institute and other organization was held for the rule on February 26, 2019.

○ The Department's proposed rule titled, "Freedom of Information Act Regulations," published on December 28th, 2018. The team plans to have the final rule ready for Departmental clearance by March 1. OMB has received a request from one agency to review the draft final rule under E.O. 12866. OMB is considering whether to formally request review of the rule. We are working with OMB to determine if a briefing would be sufficient.

- Interagency Reviews Under E.O. 12866

○ EPA's NPRM titled, "Aquatic Life Criteria for Aluminum in Oregon." Comments due to OMB on March 12, 2019.

○ EPA's NPRM titled, "Vehicle Test Procedure Adjustments for Tier 3 Certification Test Fuel." Comments due to OMB on March 11, 2019.

○ EPA's NPRM titled, "Reclassification of Major Sources as Areas Sources Under Section 112 of the Clean Air Act" Comments due to OMB on March 8, 2019.
○ DoD's Interim Rule titled, "Defense Federal Acquisition Regulation Supplement: Restriction on the Acquisition of Certain Magnets and Tungsten." Comments due to OMB on March 6, 2019.
○ NIST Draft Policy titled, "Protecting and Controlling Unclassified Information in Nonfederal Systems and Organizations." Comments due to OMB on March 6, 2019.
○ SBA's NPRM titled, "Women-Owned Small Business and Economically Disadvantaged Women-Owned Small Business – Certification." Comments due to OMB on March 1, 2019.

Committee Meetings:

Invasive Species Advisory Committee - Committee is scheduled to meet February 26-28, 2019 in Washington, DC

Women's Suffrage Centennial Commission - Commission is scheduled to meet February 27, 2019 in Washington, DC

International Wildlife Conservation Council - Council is scheduled to meet March 14-15, 2019 in Dallas, TX

Hunting and Shooting Sports Conservation Council - Council is scheduled to meet March 21, 2019 in Washington, DC

Correspondence:

The White House has requested a draft Presidential Proclamation for National Park Week. The draft is due to the White House on March 8th. OCO has been tasked with working on the draft.

FOIA:

Litigation Awareness Reviews

OFFICE OF THE SOLICITOR

Week Ahead Schedule of Meetings, Congressional Hearings, and Travel

Principal Deputy Solicitor Dan Jorjani is in the office.

Interagency Group on Insular Areas (IGIA)
We have been invited to attend the Senior Plenary Session of the IGIA, to be held at the Eisenhower Executive Office Building on February 25. This year's attendees will include Acting Secretary Bernhardt, Assistant Secretary Domenech, and the governors of American Samoa, Guam, the Northern Mariana Islands, and the U.S. Virgin Islands. Disaster recovery will be a major topic at the plenary session.

Litigation

Multiple Lawsuits Related to the Emergency Declaration on the Southern Border
The Department has been named in several lawsuits challenging President Trump's declaration of an emergency on the Mexican border (*Center for Biological Diversity et al. v. Trump et al.*, 1:19-cv-00408 (D.D.C.); *California et al. v. Trump et al.*, 3:19-cv-00872 (N.D. Cal.); *El Paso County, et al., v. Trump et. al.,* 3:19-cv-00066 (W.D. Tex.)). General Law is working with the Department of Justice to identify departmental equities and to get litigation holds in place.

Parker Drilling v. Newton (Sup. Ct.; Gov't is not a party)
The question in this case, on which the Supreme Court granted certiorari last month, is whether, under the Outer Continental Shelf Lands Act, state law is borrowed as the applicable federal law only when there is a gap in the coverage of federal law, as the Fifth Circuit has held, or whenever state law pertains to the subject matter of a lawsuit and is not preempted by inconsistent federal law, as the Ninth Circuit held below. In response to a request from the Office of the Solicitor General, the Department provided a recommendation that the United States submit an amicus brief in favor of Petitioner (as did the Coast Guard). While no decision has been made, if the U.S. were to support petitioner its brief would be due on February 27. DOJ sent draft briefs on February 23, and on February 25, for DOI review.

Tugaw Ranches v. DOI (D. Idaho)
On February 25, the court denied the United States' motion to dismiss, holding that the CRA's judicial review provision did not prohibit review of agency actions—as distinguished from those of the President or Congress. This decision may also have implications for the United States' motion to dismiss a similar lawsuit, *Kansas Natural Resource Coalition v. DOI*,6:18-cv-01114-EFM-GEB (D. Kan.). There, the FWS argues that the same provision of the CRA bars judicial review of the claim that the agency violated the Act when it failed to submit its 2003 Policy for Evaluation of Conservation Efforts When Making Listing Decisions (commonly known as the "PECE Policy") to Congress.

Weyerhaeuser v. USFWS
The recommendation on remand has been issued to DOJ, recommending that the United States seek remand of the existing rule with vacatur of the critical habitat unit at issue, without commitment for further action.

ESA Section 4 Deadline Lawsuits
We have 13 pending lawsuits regarding 19 species (5 of them are currently stayed). No new lawsuits were filed in the past week. Nor have we received new notices of intent to sue in the past week.

ESA Section 4 Merits Lawsuits
We have 19 pending lawsuits challenging the merits of petition findings (7 cases), final listing or delisting determinations (6 cases), final critical habitat designations (5 cases), and the species status assessment process (1 case). No new lawsuits were filed in the past week. Nor have we received new notices of intent to sue in the past week.

Continental Resources, Inc. v. North Dakota Board of University and School Lands (D.N.D.) - Lake Sakakawea Submerged Lands Interpleader Litigation
On December 31, 2018, the District Court denied the United States' motion to dismiss this litigation, and ordered the United States and North Dakota to plead their respective claims to submerged lands under Lake Sakakawea. The United States has until March 1, to file a protective notice of appeal.

Non-Litigation Matters

IP Matters
- Coordinating with DOI bureaus on the Inter-Agency Technology Transfer Working Group to review and revise the proposed 2019 NIST Return on Investment Green Paper as part of the Presidential Management Agenda.

Columbia River Treaty Negotiations with Canada
The United States and Canadian Governments will hold a negotiation session in Washington, D.C. on February 27-28 to discuss modernizing the terms of the Columbia River Treaty. The Department of the Interior, led by Tim Petty, is participating on the United States' negotiation team. The governments are expected to discuss flood risk management in the Columbia basin and sharing of benefits of hydropower generation.

Mountain Valley Pipeline
Mountain Valley Pipeline has requested voluntary suspension and reconsideration of its right-of-way permit to cross the Blue Ridge Parkway. The National Park Service will issue a letter suspending the permit this week in response to Mountain Valley Pipeline's request.

ASSISTANT SECRETARY FOR FISH AND WILDLIFE AND PARKS

Week Ahead Schedule of Meetings, Hearings, and Travel

From March 4-8, Principal Deputy Assistant Secretary Andrea Travnicek will be in the office.

From March 4-8, Deputy Assistant Secretary Aurelia Skipwith will be in the office.

From March 4-8, Deputy Assistant Secretary Ryan Hambleton will be in the office.

From March 4-8, NPS Acting Director Dan Smith will be in the office, departing at noon on Friday, March 8.

On March 4 and 8, FWS Principal Deputy Director, Margaret Everson will be in the office; from March 5-7, she will attend the North American Wildlife and Natural Resources Conference in Denver, Colorado.

Immediate Announcements and Actions For the Next Week

U.S. Fish and Wildlife Service

On February 28, FWS released a five-year status review with a Species Status Assessment for the endangered red-cockaded woodpecker. The review finds that recovery efforts have been successful and recommends downlisting from endangered to threatened. With the release of the five-year review, FWS will begin work on a proposed rule. This recommendation and the subsequent proposed rule are expected to be controversial. (02/27/2019)

On or around March 5, FWS will publish in the *Federal Register* a final rule amending the depredation and control orders to allow destruction of resident Canada goose nests and eggs at any time of year. In 2006, FWS implemented several actions intended to reduce, manage, and control resident Canada goose populations in the continental United States and to reduce related damages. Those actions included depredation and control orders that allow destruction of their nests and eggs by authorized personnel between March 1 and June 30. However, some resident Canada geese currently initiate nests in February, particularly in the southern United States, and it seems likely that in the future, nest initiation dates will begin earlier and hatching of eggs could end later. This change will give the states more flexibility to address specific, local damage problems caused by resident Canada geese. If-asked talking points will be available. Information will also be posted to the web. (Updated 02/27/2019)

On or around March 5, FWS will publish in the *Federal Register* a proposed rule to amend the agricultural depredation order to allow take of resident Canada geese at agricultural facilities between April 1 and August 31 in Atlantic Flyway states. In 2006, FWS implemented several actions intended to reduce, manage, and control resident Canada goose populations in the continental United States and to reduce related damages. Those actions included an agricultural depredation order that allows take of resident Canada geese at agricultural facilities by authorized personnel between May 1 and August 31. This time period, however, is too restrictive in portions of the Atlantic Flyway where specific crops are now being planted and depredated prior to May 1. This change only applies to Atlantic

Flyway states because the other flyway states opted not to request a similar change. If-asked talking points will be available. Information will also be posted to the web. (Updated 02/27/2019)

FWS and NOAA Fisheries (NMFS) sent the draft final revised regulations pertaining to interagency cooperation pursuant to section 7 of the Endangered Species Act (50 CFR 402) and the procedures for listing of species and designation of critical habitat pursuant to section 4 of the Act (50 CFR 424) to OMB for review on December 21, 2018. FWS previously submitted to OMB on November 26 a draft final withdrawal of the blanket 4(d) rule for newly listed threatened species (50 CFR 17) to recognize the difference between endangered and threatened species and align with NOAA Fisheries' current practice. The interagency review concluded on the 4(d) rule in December and on the section 7 and section 4 rules on February 13. On February 25, FWS received interagency review comments from OMB on the 4(d) rule and is still waiting for comments on the section 7 and section 4 rules. (Updated 02/27/2019)

In May 2018, SAExploration (SAE) submitted a permit application to the BLM Arctic District Office for 2019 and 2020 winter(s) seismic activity in the Coastal Plain. Due to Marine Mammal Protection Act (MMPA) stipulations for BLM permitting, SAE was required to work with FWS to publish a set of Incidental Take Regulations (ITRs) regarding potential disturbance of denning maternal bears. After several iterations of a project plan, SAE and FWS agreed on two options for a plan of operations written into an ITR package that was approved by the FWS and signed by ASFWP. FWS submitted the ITR package to the Office of the Federal Register (OFR) while the DOI was still funded and fully operational. However, due to OFR Regulations, the submission was treated as being received during the partial government shutdown and was not published. As a result of this delay, SAE must revise their plans. FWS has been in discussions with SAE regarding these revisions, and once those discussions are concluded FWS will determine the appropriate steps for proposing revised ITRs. (02/13/2019)

Hilcorp and Alaska LNG are all proposing multi-year activities in the Cook Inlet that have the potential to result in incidental take of sea otters. The USFWS and Hilcorp have worked together to develop a mutually agreeable timeline for the Cook Inlet incidental take regulation (ITR) and an estimated date of publication of the final ITR and issuance of the associated Letter of Authorization (LOA). The proposed ITR will be reviewed the beginning of March. Under this proposed schedule, a final ITR would publish on May 3 and a LOA would be issued that same day. Hilcorp indicated they have also spoken with the National Marine Fisheries Service (NMFS) and were told that the NMFS proposed ITR is currently undergoing solicitor review with the plan to submit it to the Federal Register in the near future. The NMFS indicated they were still optimistic that they could issue a LOA at the end of April or early May. (02/20/2019)

National Park Service

On March 3, thousands of visitors are expected along the Selma to Montgomery National Historic Trail as the 54th Anniversary Commemoration of Bloody Sunday, the Selma to

Montgomery March, and the Voting Rights Act of 1965, conclude in Selma, Alabama. Approximately 150 Congressional members and staffers have been invited to take part in the commemoration activities organized by the 54th Bridge Crossing Jubilee committee. (02/27/2019)

On or around March 4, the Alaska Region will issue a prospectus for 16 concession contracts for guided sport hunting in Wrangell-St. Elias National Preserve. The Alaska Region will also issue a prospectus for three guided overnight kayaking contracts and a separate prospectus for one guided day kayaking contract in Glacier Bay National Park and Preserve. (02/27/2019)

On March 4, Wilson's Creek National Battlefield (Missouri) will close on the acquisition of Tract No. 01-145 from the American Battlefield Trust. The 6.32-acre tract contains a 3,586 square foot single family residence, one barn, and a small well house. The park will remove the structures, restore the site to its natural setting, and protect the historic integrity of the Civil War battle. (02/20/2019)

On or around March 4, Pictured Rocks National Lakeshore expects to release a Finding of No Significant Impact for the Personal Watercraft Use Revised Environmental Assessment (EA). The EA provides analysis in support of a special regulation implemented in 2005 that allows limited personal watercraft use in the park. As a result of litigation, a U.S. District Court found the impact analysis to be insufficient. This Revised EA has been supplemented with new data and impact analyses to address the court's concerns. Personal Watercraft use will continue under current regulation between the western Lakeshore boundary near Sand Point and the eastern edge of Miners Beach. (02/20/2019)

On or around March 4, Grand Teton National Park will initiate a 30-day public comment period on its Telecommunication Infrastructure Plan and Environmental Assessment. The assessment considers a right-of-way permit application expanding telecommunications in developed areas of the park with fiber optic installation and the construction of nine wireless telecommunication sites. The preferred alternative proposes issuing a permit to the applicant with requirements protecting park resources. A public open house in Jackson, Wyoming, will be held during the comment period. (02/13/2019)

On March 5, the NPS will be presented with the YMCA Champion Award as part of National Advocacy Days on Capitol Hill. The YMCA will recognize the NPS for their partnership in delivering support to youth through the Y/NPS Summer Camp Program. Deputy Director Dan Smith will receive the award on behalf of the NPS. (02/27/2019)

On March 6, the National Capital Region will be releasing the final Long Range Transportation Plan to the public. The plan sets a performance based, 20-year vision for sustaining an interconnected transportation system that provides equitable and safe access to iconic visitor experiences while protecting park resources across the region and in the nation's capital. The Plan was prepared in coordination with state and local planning and transportation agencies. (Updated 02/27/2019)

On March 7, the extended comment period will close for the Kalaupapa National Historical Park General Management Plan/Environmental Assessment. The plan addresses resource management, visitor use and access, and an operational shift from co-management with the State of Hawaii to primary management by the NPS. (02/06/2019)

On March 7, 2019, the NPS will participate in an administrative hearing held by the Utah Division of Water Rights in Moab, Utah. At issue are seven applications to appropriate a total of 675 acre-feet/year of groundwater adjacent to Arches National Park. The State Engineer will not approve any application to appropriate water from the Arches National Park Groundwater Protection Zone as part of a negotiated settlement to protect the Park's streams, springs, and water supply. However, the complex hydrogeologic setting makes it difficult to ascertain whether the subject wells are constructed in a manner that will not cause water to be diverted from the aquifer comprising the Protection Zone. NPS staff and the Office of the Solicitors are preparing for the hearing. (02/27/2016)

On March 8, the contractor will issue a summary report of public comments on the Alaska Sport Hunting and Trapping proposed rule to the Alaska Regional Office. During the lapse in appropriations, no work was completed on the contract because it required direct involvement by government staff who were furloughed. (Updated 02/27/2019)

By March 8, Lassen Volcanic National Park expects to release the Wilderness and Backcountry Stewardship Plan and Environmental Assessment for public comment. The plan provides guidance for managing natural and cultural resources while providing opportunities for a primitive type of recreational experience in the park's designated wilderness and adjacent backcountry areas. (02/20/2019)

On March 9, Sequoia and Kings Canyon National Parks (SEKI) will conclude a 60-day comment period, that was extended due to the shutdown, accepting Requests for Expression of Interest for Land Exchanges at Wilsonia in the Grant Grove district of Kings Canyon National Park. This 108-acre unincorporated village is comprised of 211 buildings, 11 of which are owned by the NPS. The Wilsonia Historic District was listed on the National Register in 1996; a subsequent amendment in 2011 added the NPS buildings to the district as contributing structures. The exchange is part of the implementation of the 2014 Environmental Assessment/Finding of No Significant Impact Statement selected alternative which allows for the disposition of these structures, including the use of land exchanges for private vacant lands within SEKI. The structures were previously on the excess property list prior to the National Register listing of the district. (02/13/2019)

In March, the contract for repairs to the visitor loading ramp at the USS Arizona Memorial will be awarded. Despite the efforts of park staff and partners to implement an expedited plan for repair, the Memorial will not open in March 2019 as expected. Additional severe damage to the structure was discovered during the first phase of the project; it had not been identified in early surveys. The NPS and Navy are meeting regularly; they received and are reviewing an updated proposal from the contractor. There may be additional negotiations; once that is complete, the contract will be prepared for signature. While the repair process

continues, park staff and partners will offer supplemental visitor services and amenities to provide the best possible experience. (Updated 02/27/2019)

8-30 Day Outlook

U.S. Fish and Wildlife Service

NEW ITEMS

On March 12, the *Deepwater Horizon* Open Ocean Trustee Implementation Group will publish its final Restoration Plan I and Environmental Assessment: Birds and Sturgeon. Development of the $16 million plan was led by FWS and includes three projects affecting common loons, black terns, and Gulf sturgeon. The two avian projects will restore habitat outside of the Gulf of Mexico region because the migratory bird species affected depend on critical areas in Minnesota and North and South Dakota for breeding, nesting, resting, or foraging. A 30-day public comment period revealed many statements of support for the proposed projects and no significant issues. However, former U.S. Congressman Nolan (D-MN) and Congresswoman McCollum (D-MN) had requested that the restoration plan include funding for a proposed National Loon Center; it does not. (02/27/2019)

Around March 15, FWS will issue a permit in response to a request by Ocotillo Express LLC for a five-year programmatic take permit for golden eagles at its Ocotillo Wind Energy Facility in Imperial County, California. The approximately 315-megawatt project consists of 112 wind turbines within an area of approximately 12,500 acres located almost entirely on Bureau of Land Management lands. Ocotillo is requesting a permit to cover unintentional take of eagles from their ongoing activities. The company would be permitted to take a maximum of two golden eagles over a five-year-period. With their permit application, Ocotillo has submitted an eagle conservation plan that proposes proactive conservation measures to minimize impacts to golden eagles in the region to offset unavoidable harm. This is not controversial. If-asked talking points will be available. (02/27/2019)

Around March 15, FWS plans to make available a draft environmental assessment for public comment as the agency considers issuance of a permit to authorize take of golden eagles to the Solano Wind Project in Solano County, California. In collaboration with the FWS, the applicant, Sacramento municipal Utility District, developed an Eagle Conservation Plan that proposes measures to avoid, minimize, and compensate for the project's impacts to eagles. If-asked talking points will be available. (02/27/2019)

Around March 15, FWS and the binational Jaguar Recovery Team will announce completion of the final recovery plan for the jaguar. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions and borderland dispersal corridors such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Outreach

includes news release, social media, and emails to congressional offices and stakeholders. (02/20/2019)

By April 10, FWS will notify private landowners within the proposed conservation partnership area that the land protection planning process to establish Green River NWR in Henderson County, Kentucky, is starting. FWS was directed by Congress in FY 2018 and FY 2019 appropriations reports to establish the refuge. The FY 2019 language directs FWS to forgo the development of the preliminary Land Protection Strategy and go directly to the Land Protection Plan (LPP) in order to expedite the refuge's establishment. In close partnership with Kentucky and local elected officials, FWS is moving forward with the land protection planning process. Affected Indian tribes have already been notified of FWS's initiation of the planning process. FWS anticipates releasing the draft LPP and associated environmental assessment for public review and comment by early summer. (02/27/2019)

UPDATED ITEMS

A proposed change to the implementing regulations for the Migratory Bird Treaty Act (MBTA) has cleared DOI and was sent to OMB-OIRA where it is in "delayed status" until it receives a regulatory impact analysis (RIA) from DOI. On February 22, FWS completed a draft RIA, which is currently under review at the Department. Once the RIA is received by OMB-OIRA, it may initiate interagency review, typically taking up to 90 days. The rule: 1) defines the scope of the MBTA as it applies to conduct resulting in the injury or death of protected migratory birds and 2) reduces permitting burdens by modifying existing permit exceptions and proposing new ones. This proposed regulation will be consistent with the Department Solicitor's Opinion M–37050. (Updated 02/27/2019)

ONGOING ITEMS

On March 13 (tentative), FWS will hold a public meeting to discuss the items on the provisional agenda of the 18th regular meeting of the Conference of the Parties (CoP18) of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). FWS will announce the provisional agenda for CoP18, solicit public comments on the items on the provisional agenda, and announce a public meeting through the FWS webpage. FWS plans to publish the notice in the *Federal Register* as soon as the notice clears. (02/13/2019)

On March 13, FWS will join a coalition of partners at a Conservation Without Conflict summit at the Association of Fish and Wildlife Agencies headquarters in Washington, DC. The purpose of the summit is to put into use this collaborative approach to conservation that strives to keep working lands working while conserving at risk and listed species. The summit will be followed the next morning by a congressional event sponsored by the Congressional Sportsmen and Working Forests Caucuses and attended by many members of the coalition to discuss outcomes from the summit and build awareness for this collaboration. (02/20/2019)

On March 14-15, the International Wildlife Conservation Council will meet in Dallas, Texas. At the moment, the council's meeting agenda has not been determined, although FWS is of the understanding that the council seeks to acquire input from conservation organizations as to their views on trophy hunting. Regulations require that meeting notices publish in the *Federal Register* at least 15 days before the meeting. DOI is involved in an active lawsuit regarding the council, so there may be a heightened public interest in this council meeting. (02/13/2019)

On or around March 20, FWS plans to publish in the *Federal Register* the proposed 2019-20 hunting regulations for certain migratory game birds. FWS annually prescribes frameworks, or outer limits, for dates and times when hunting may occur and the number of birds that may be taken and possessed in hunting seasons. These frameworks are necessary to allow state selections of seasons and limits and to allow recreational harvest at levels compatible with population and habitat conditions. Planned outreach includes congressional and stakeholder notifications. (Updated 02/20/2019)

On March 21, FWS will host the meeting of the Hunting and Shooting Sports Conservation Council at the Department of Agriculture Whitten Building. The Council was established to provide advice and recommendations for implementing Secretarial Orders 3347 and 3356, as well as Executive Order 13443, and also making recommendations related to hunting and shooting sports that will expand opportunities, conservation efforts, and the economic benefits to the national and local economies. Meeting agenda items include updates on the implementation of outdoor recreation secretarial orders, updates on efforts to create or expand hunting and recreational shooting opportunities on federal lands, council subcommittee reports and discussion of possible recommendations, and a public comment period. (02/20/2019)

On or around March 22, FWS and the National Fish and Wildlife Foundation (NFWF) will announce the final allocations for the first round of Delaware River Basin Conservation Act grants, appropriated by Congress in FY 2018. More than $6.4 million in grant applications were received and the review committee of partners named in the act approved a final slate of $4.1 million with a non-federal match of $7.5 million. The grants will restore 626 acres of wetland habitat and 549 acres of floodplain; increase public access on 1,794 acres; create 32 new jobs; and leverage more than 3,000 volunteers in project delivery. NFWF conducted fiscal notifications to Congress on November 16, with a 30-day response time. (Updated 02/20/2019)

On or before March 30, FWS will publish in the *Federal Register* an interim final rule allowing migratory bird subsistence harvest regulations in Alaska for the 2019 season. These regulations are a continuation of the 2018 regulations and allow for the continuation of customary and traditional subsistence uses of migratory birds in Alaska and prescribe regional information on when and where the harvesting of birds may occur. These regulations were developed under a co-management process involving the Service, the Alaska Department of Fish and Game, and Alaska Native representatives. The rulemaking is necessary because the regulations governing the subsistence harvest of migratory birds in Alaska are subject to annual review. This rulemaking would establish region-specific

regulations that would go into effect on April 2, 2019. Planned outreach will include a release and notifications to Tribal and members of the Hill. (02/20/2019)

Endangered Species Act Actions through March 31:

Species	**Action**	**Current Status**	**Target Date to FR** (dates in **bold** are litigation deadlines)	**Outreach**
California condor in northern California and Oregon	Proposed designation of a nonessential experimental population	Pending Exec-Sec clearance	As soon as it clears	Regional release
Southern Selkirk Mountain woodland caribou	Final reclassification as distinct population segment, endangered	Pending Exec-Sec clearance	As soon as it clears	Regional release
Meltwater lednian stonefly, Western glacier stonefly	Final listing determination as threatened	Pending Exec-Sec clearance	As soon as it clears	Regional release
Arizona eryngo, Giraffe, Refugio manzanita, San Gabriel chestnut snail	90-day findings on ESA petitions	Pending FWS Director clearance	As soon as it clears (lawsuit filed on giraffe)	National release (controversy)

Franklin's bumble bee	Proposal to list as endangered	Pending FWP clearance	As soon as it clears	Regional release
Batch of 29 draft recovery plan revisions for 42 species (APG Batch 2)	Notice of availability of draft recovery plans	Pending FWS Director clearance	As soon as it clears	National and regional releases
Panama City crayfish	Six-month extension of the final listing determination	Pending FWS Director clearance	As soon as it clears	Regional release
Bi-State Population of greater sage-grouse	Comment period reopening on proposed listing	Pending FWS Director clearance	As soon as it clears	Regional release
Running buffalo clover	Proposed delisting	Pending FWS Director clearance	As soon as it clears	Regional release
Neuse River waterdog, Carolina madtom	Proposed listing of Neuse River waterdog as threatened and Carolina madtom as endangered, with proposed critical habitat	Pending FWS Director clearance	**March 1** (deadline litigation stayed until March 1)	Regional release

2016 Recovery Report to Congress	Transmittal of 2016 Biennial report	Pending FWS Director Clearance	March 7 (release to Congress; will not be published in the FR)	National release, Congressional notifications, and post the report online
Barrens topminnow	Final listing as endangered	Pending FWS Director clearance	March 11	Regional release
Batch of 29 draft recovery plans for 43 species (APG Batch 2.5)	Notice of availability of draft recovery plans	Pending FWS Director clearance	March 11	National and regional releases
34 NMFS Species	Adding 16 NMFS Species, Removing One NMFS Species, and Updating Entries for 17 NMFS Species on the List of Endangered and Threatened Wildlife	Pending FWS Director Clearance	March 25	N/A - NMFS completed outreach on these species during their rulemaking process.

Arkansas mudalia, ashy darter, Barrens darter, Chihuahua scurfpea, coldwater crayfish, Eleven Point River crayfish, Spring River crayfish, and red-crowned parrot	12-month findings on ESA petitions	Pending FWS Director clearance	**March 29** (March 31 is settlement agreement deadline for ashy and Barrens darters)	Regional releases
Eastern hellbender	12-month finding and proposed listing	Pending FWS Director Clearance	**March 29** (March 31 is settlement agreement deadline)	Multi-regional release
Gray wolf	Proposed delisting	Pending SOL surname	March 1	National release (controversy)

National Park Service

NEW ITEMS

On March 10, the NPS Youth Programs Division will host a small reception for the Boy Scouts of America *Report to the Nation* Delegation in the South Penthouse. The NPS Director is planning to attend. This delegation of scouts will present their annual report to President Trump later that week. A tour of the monuments on the Mall will follow the reception. (02/27/2019)

(**Close Hold**) During the week of March 11, Pinnacles National Park will announce the concessions contract award for campground, retail, and other services within the park. The new 10-year contract will offer similar services as the existing concessions contract. (02/27/2019)

March 15 is the due date for lottery applications to determine which teams and leagues will receive permits for the use of 22 athletic fields at National Mall and Memorial Parks. The park is handling all permitting for the first time this year, taking over the administration of the reservation and permitting system from D.C. Department of Parks and Recreation. The fee for permits is being raised from $7/season to $70/two-hour block of time, based on a comparability analysis of similar field rates in the D.C. area. The lottery opens March 1, with permits and the results of the lottery announced on April 8. The season begins April 15. (02/27/2019)

By March 18, the NPS plans to accept the donation of the Bauvais-Amoureux House, Tract 01-101, from the State of Missouri. The 0.12-acre tract is improved with a historic structure. This will be the first tract acquired at Ste. Genevieve National Historical Park. (02/27/2019)

On March 19 and 20, Camp Nelson National Monument (established October 2018) will host public and a stakeholder meetings to solicit comments on the future of the National Monument as part of efforts to develop a Foundation Document for the park. Public comment will also be sought via parkplanning nps.gov for 30 days beginning on March 1. (02/27/2019)

On or around March 20, Golden Gate National Recreation Area intends to release a Request for Qualifications (RFQ) for the lease and operation of an historic boat shop and marina at Fort Baker, near the Golden Gate Bridge. A site visit for potential RFQ respondents is scheduled for April 3, with RFQ responses due May 31. A public tabling session by RFQ respondents in Sausalito will follow on June 4. A short-list of RFQ respondents will be invited to respond to a more detailed Request for Proposals (RFP) in late 2019. The project lessee will be responsible for rehabilitation of the historic site to be used as a waterfront community center with food, beverage, and meeting space. (02/27/2019)

On February 26, the Eastern District Court of New York denied the request for a temporary restraining order at Fire Island National Seashore that was filed by the Animal Welfare Institute. The deer culling operation will resume. The Animal Welfare Institute is a party to a lawsuit against the park related to its plan to initiate a deer cull. On February 11, 2019, the park announced via press release plans to implement deer removal operations per its approved Deer Management Plan. On February 13, Seashore staff began pre-baiting, commonly conducted for two weeks prior to a cull. On February 19, the court granted the TRO, which required the park to stop pre-baiting activities. (02/27/2019)

ONGOING ITEMS

In March, it is anticipated that the revisions to the NPS proposed rulemaking, *Demonstrations and Special Events on the National Mall and Memorial Parks*, will be completed. On November 21, the Office of Management and Budget (OMB) determined that the rulemaking in its current form is significant under Executive Order 12866 due to its "novel legal or policy issues." As a result, the final rule will be reviewed by OMB for up to 90 days. The proposed rulemaking modifies how the NPS processes permit applications for demonstrations and special events. The rulemaking also identifies locations where activities

are allowed, not allowed, or allowed but subject to restrictions. During the 60-day public comment period, which closed on October 15, the NPS received 140,652 comments. (Updated 02/13/2019)

In March, it is anticipated that the NPS will officially launch the African American Civil Rights Network (AACRN). The AACRN was established by law in 2018 to recognize the importance of the African American civil rights movement and the sacrifices made by the people who fought against discrimination and segregation. The launch will include the publication of the AACRN website, a social media campaign to spread awareness of the network, and guidance and eligibility criteria for interested parties to submit nominations for inclusion in the AACRN. Partners, Congress Members, stakeholders, and media will be notified of the launch. (02/13/2019)

As soon as weather permits, Isle Royale National Park will implement phase two of the Wolf Relocation effort to the island. Between four and six wolves from Michipicoten Island in Ontario, Canada, will be captured by a company using net guns contracted by the Ministry of Natural Resources and Forestry for Ontario. The animals will be medically examined by NPS wildlife veterinarians on Michipicoten Island, then transported via helicopter to a remote section of the park where they will be then collared and released. This is the second operation as part of the three- to five- year plan to relocate 20 – 30 wolves to Isle Royale in order to restore predation to the ecosystem. (01/30/2019)

On or around March 11, Chesapeake and Ohio Canal National Historical Park (District of Columbia, Maryland, West Virginia) anticipates the NPS will sign a Finding of No Significant Impact for the Plan/Environmental Assessment (EA) to reconstruct and stabilize the historic stone wall and towpath from McMahon's Mill to Lock 42 within the park. The preferred alternative of the Plan/EA will reduce the impacts of high water events that deteriorate historic features of the towpath and degrade the park visitor experience. (02/13/2019)

On or around March 11, Missouri National Recreational River will release the Goat Island Management Plan and Environmental Assessment (EA) for public review. The plan/EA proposes new campgrounds, trails, and signage on Goat Island, a federally-owned island in the Missouri River near Yankton, South Dakota. The NPS has worked with the states of Nebraska and South Dakota to propose hunting opportunities on the island as well. The plan will be available for comment for 30 days. A public meeting to discuss the plan is scheduled for March 20. (02/20/2019)

On or about March 11, the annual report on the Historic Tax Credit Program for Fiscal Year 2018 will be issued. The four-page report summarizes basic statistical information about the program. The program provides a 20-percent federal tax credit to property owners who undertake a substantial rehabilitation of a historic building in a business or income-producing use. The NPS must certify that the building is historic, and therefore qualifies for the program, and that the rehabilitation preserves its historic character. In FY 2018, the NPS certified 1,013 completed projects, totaling $6.9 billion in private investment in historic rehabilitation. (02/20/2019)

On or after March 15, Great Smoky Mountains National Park anticipates releasing the Finding of No Significant Impact (FONSI) for the Environmental Assessment concerning the proposed agreement with the Eastern Band of Cherokee Indians for the gathering of sochan (Rudbeckia laciniata) for traditional purposes under the Plant Gathering Rule (36 CFR Part 2.6). The FONSI will be released pending approval by Southeast Region (SER) Director Bob Vogel and the SER Solicitor's Office. (02/20/2019)

On March 18, Prince William Forest Park will release the Comprehensive Trails Plan and Environmental Assessment (EA) for public comment. The plan/EA provides comprehensive guidance for enhancing the park's trails system and visitor experience in a manner that balances resource protection with recreation. (02/20/2019)

On March 18, Rock Creek Park will release the Nature Center Complex Development Concept Plan and Environmental Assessment (EA) for public review. The plan/EA establishes a vision and clear guidance for managing the park's Nature Center, public horse center, maintenance yard, and associated grounds. A public meeting is scheduled for April 3. (02/20/2019)

On March 20, National Mall and Memorial Parks will begin taking reservations on Recreation.gov for the spring season at the Parkway Drive Volleyball Courts near the Lincoln Memorial. The 2019 season will start earlier than in the past to provide increased access and opportunities for the public to play (beginning on April 15 instead of May 1). The park will coordinate public announcements with DOI. (02/20/2019)

ASSISTANT SECRETARY FOR INDIAN AFFAIRS

Week Ahead Schedule of Meetings, Hearings, and Travel

In the Office:

Assistant Secretary Tara Sweeney

Deputy Assistant Secretary Mark Cruz

Acting Bureau of Indian Affairs (BIA) Director Darryl LaCounte

BIE Director Tony Dearman

Chief of Staff Rich Myers

Out on Travel:

Principal Deputy Secretary for Indian Affairs John Tahsuda will conduct scheduled consultations in Alaska on the Department's authority to take land into trust and recognition of Alaska Tribes under the Alaska IRA during the

week of March 4, 2019.

On March 4, 2019 the AS-IA will participate in a roundtable discussion on AS-IA 2019 priorities at the United South and Eastern Tribes (USET) Sovereignty Protection Fund 2019 meeting in Arlington, VA.

8-30 Day Outlook

Assistant Secretary for Indian Affairs

NEW ITEMS

The Senate Committee on Indian Affairs (SCIA) hearing on GAO high-risk list findings will take place on March 13, 2019. The BIA Acting Director and the BIE Director are scheduled to testify. BIE and BIA are working with the GAO to close remaining open findings.

During the week March 4, Indian Affairs will publish an operational policy and a handbook on wildfire investigations in the Indian Affairs Manual.

The Redding Rancheria of California submitted an application to acquire land in trust for gaming in Shasta County, California, in order to relocate its existing Win River gaming facility. The Department and Tribe entered into a memorandum of agreement for the Tribe to close its existing casino prior to opening the new casino. The Office of Indian Gaming (OIG) will schedule a meeting to brief the AS-IA prior to scheduling a NEPA clearance briefing with the Deputy Secretary. Expected Deputy Secretary briefing date is in late March.

On January 28, 2019, the Confederate Tribes of Warm Springs of Oregon submitted an amendment to its compact. The amendment modifies the definition of "Video Lottery Terminal" (VLT) to permit the Tribe to offer electronic table games, but requires the Tribal Gaming Commission to develop and submit internal controls to the State prior to offering a new VLT for play. AS-IA must act on the amendment by March 13, 2019, (45 days following submission).

The Kiowa Tribe of Oklahoma submitted an amendment to its compact with the State of Oklahoma on January 28, 2019. The compact is identical to amendments already approved by the Department for other Tribes in Oklahoma and would authorize the Tribe to engage in certain additional class III gaming activities, apply existing revenue sharing agreements to the additional forms of class III gaming, and designate how the State will distribute revenue sharing funds. AS-IA must act on the amendment by March 13, 2019 (45 days following submission).

The Kiowa Tribe of Oklahoma seeks to acquire approximately 11 acres in trust within its former reservation in Oklahoma for gaming. On February 19, 2019, the Southern Plains Region submitted to OIG a draft Environmental Assessment for review and comment. The Department will make a determination on whether the property is eligible for gaming under

the Oklahoma Exception in Section 20 of IGRA and the Part 292 regulations, and if so, whether the Tribe's application satisfies the land into trust regulations of Part 151, including NEPA compliance.

Bureau of Indian Education

Southwestern Indian Polytechnic Institute received a new grant award from the American Indian College Fund for Spring 2019 student scholarships in the amount of $65,487.

ONGOING ITEMS

Assistant Secretary for Indian Affairs

The Indian Energy & Minerals Steering Committee Meeting (IESMC) is scheduled for May 1-2, 2019 in Lakewood, CO.

Bureau of Indian Education

March 12-14, the BIE Standards, Accountability, and Assessments negotiated rulemaking committee will be meeting in Phoenix, Arizona, to discuss a draft of revisions to regulations required under the Every Student Succeeds Act (ESSA).

Haskell Indian Nations University is cooperating with the City of Lawrence, Kansas effort to have the Haskell campus designated by the U.S. Park Service as a National Historic Site with a historical interpretive center built on the campus to tell the story of the off-reservation Indian Boarding Schools.

UPDATED ITEMS

Assistant Secretary for Indian Affairs

The AS-IA will give the keynote address at the "RES" Conference hosted by the National Center for American Indian Economic Development during the week of March 25, 2019. The Principal Deputy Assistant Secretary (PDAS) will also attend the "RES" Conference , where he will invite Tribes to consult on the establishment of Tribal Biomass Demonstration Projects, for which the recently enacted Indian Tribal Energy Development and Self-Determination Act Amendments of 2017 require the Department to establish criteria by April 17, 2019.

Bureau of Indian Affairs

The final BIA Division of Safety inspection of the Two Rivers/Hardin Detention Center in Montana is now scheduled for March 6 after being postponed due to bad weather. BIA signed a 10-year lease for the facility on February 5, 2019, but the inmate occupation date for the facility is dependent on the lessor making certain identified repairs to the BIA's satisfaction.

On July 16-17, 2019 the Indian Energy Service Center will host training in Billings, MT. The purpose of the training is to outline the roles and responsibilities among DOI Bureaus and Offices with the primary focus on the interdependent responsibilities and handoffs between agencies for fluid mineral development (oil and gas) on trust lands.

On May 13-17, 2019 the BIA will hold Dam Safety training in Durango, CO. The Safety of Dams staff are providing presentations.

Bureau of Indian Education

The modular classroom units at the Santa Rosa Ranch School on the Tohono O'odham Reservation in Arizona have been assembled and and utilities installation will begin on February 19, 2019. The project remains on schedule for students to return to classes in the new modular facilities on March 15, 2019.

ASSISTANT SECRETARY INSULAR AND INTERNATIONAL AFFAIRS

Week Ahead Schedule of Meetings, Hearings, and Travel for the upcoming week, March 3 - March 9

TRAVEL

AS-IIA Domenech will be in the office all week. (*Note: AS-IIA Domenech will be out on personal leave the week of March 25.)
OIA Director Pula will be out on personal leave in Texas Friday, March 8 and Monday March 11. Otherwise, he will be in the office.
INT Director Karen Senhadji will be in the office all week.
Sarah Jorgenson, Senior Advisor, will be in the office all week.
Oceans Program Coordinator Liza Johnson is out on maternity leave until March 29.

Immediate Announcements and Actions for the Next Week (March 3 - March 9)

902 Consultation Process: The formal 902 Consultation process has begun in response to CNMI Governor Torres' request to the President. His requests is in response to DHS' proposed rescission of the discretionary parole program for tourists from China and Russia to the CNMI. AS-IIA Domenech was designated by the President as the Special Representative to lead the 902 Consultation discussions. The first meeting was held on February 26, and Governor Torres proposed that the next meeting take place in CNMI in March.

Marine Monuments: The Council on Environmental Quality (CEQ) has organized a Sub-PCC with DOI and DOC (NOAA Fisheries) to discuss the Northeast Canyons and Seamounts Marine National Monument. The first meeting was held on February 26. We are waiting to hear if there will be additional meetings focused on the Marine Monuments in the Pacific.

Follow up to the 2019 Interagency Group on Insular Areas (IGIA): The IGIA was held on Monday, February 25, and was attended by the following officials: Congressional Delegates San Nicolas (Guam), Radewagen (American Samoa), and Plaskett (USVI) and Governors Torres (CNMI), Guerrero (Guam), and Bryan (USVI). Guest speakers from FEMA, NSC, and HHS provided presentations on issues of particular concern to the Territorial governors. White House Intergovernmental Affairs is scheduling a follow up meeting with us next week. Discussion from the meeting will be used to prioritize issues and to establish issue oriented workgroups from relevant federal agencies. In addition, workgroups will meet between March and August to develop policy recommendations that will be included in an annual report of the work of the IGIA that will be sent to the President in September.

UPDATE. American Samoa Letter on the PRIMNM: AS-IIA has been cleared by the White House to sign the response letter to the Governor of American Samoa, who sent a letter to the President requesting him to reopen the waters within the Pacific Remote Islands Marine National Monument (PRIMNM) to commercial fishing. OIA requested comments from CEQ, DOC, and OMB prior to submitting it to the White House for clearance. OMB sent comments, but CEQ and DOC did not.

Pacific Typhoons Update: TYPHOON YUTU UPDATE: OIA staff continue to work with FEMA and local officials on typhoon recovery in CNMI. The power recovery and restoration program on Saipan and Tinian is expected to be completed soon. Water restoration has been completed. On February 25, President Trump made additional disaster assistance available to CNMI by authorizing an increase in the level of Federal funding for relief and recovery assistance as a result of Yutu. TYPHOON WUTIP: As of February 25, Category 4 Super Typhoon Wutip (winds of approximately 154 mph) had passed through FSM's Yap State and was continuing to track northwestward in the Pacific Ocean. On February 21, Chuuk State Governor Johnson Elimo declared a state of emergency, noting extensive damage to private and public property. The next day, Yap State Governor Henry S. Falan declared a state of emergency. FSM President Peter Christian also signed an executive order declaring a national state of emergency on February 22, due to the damage caused to houses, tress, and infrastructure on a national scale. USAID and State have alerted us that FSM is likely to ask OIA for financial assistance.

Technical Assistance Program Award: Next week, OIA will award $881,150 to the Prior Service Trust Fund to fund Prior Service benefit payments for approximately 700 people in the CNMI, FSM, RMI, and Palau. This is a responsibility assumed by the Federal Government following the demise of the Trust Territory Government, plus administration expenses. The individuals who receive this funding are Micronesians with five or more years of service with the Naval Administration or Trust Territory of the Pacific Islands prior to 1968 in recognition of substantial services performed at very low wages without any rights to retirement, survivor, or disability benefits.

American Samoa Capital Improvement Program: Once full funding is available in OIA's accounts, the following previously awarded Capital Improvement Program grants will be awarded to American Samoa:

$364,000: American Samoa Community College, Maintenance, Upgrades, & Renovations
$500,000: Insular ABCs Initiative, Deferred Maintenance for Public Schools
$800,000: American Samoa Power Authority, Solid Waste Improvements (redirected funds)
$1,000,000: Manua Islands, Consolidate Public Schools Buildings
$1,000,000: American Samoa Power Authority, Electrical and Solid Waste Maintenance
$2,000,000: LBJ Tropical Medical Center, Labor, Delivery, and Operating Room Renovation

Guam Capital Improvement Program: Once full funding is available in OIA's accounts, the following CIP grants will be awarded to Guam:

$330,000: Department of Youth Affairs, Cottage Home
$1,000,000: Insular ABCs Initiative, Deferred Maintenance Program
$1,920,000: Department of Youth Affairs Maintenance & Emergency Generator Replacement
$3,077,000: Department of Public Health & Social Services

Identifying New Insular Grant Funding: OIA grant managers are working to free up funds for new awards by deobligating closed, completed, and inactive grants.

UPDATE. Insular Grants: Capital Improvement Program grant managers have now assessed performance and determined competitive criteria funding allocations for the 2020 budget.

A list of payments/draw-downs against previously awarded existing grant awards can be found below:

CAPITAL IMPROVEMENT PROGRAM
$8,640 - CNMI Commonwealth Utilities Corporation Water Systems Improvements
$39,090 - CNMI Public Schools System ABCs Deferred Maintenance
TECHNICAL ASSISTANCE PROGRAM
$1,477 - FSM Kosrae Auditor training program
$2,809 - CNMI Office of Public Auditor Training Program
$18,766 - American Samoa OIA Field Office
$77,601 - Protecting American Samoa's Forests

OIA Graduate School USA Activity in March: OIA will host the following training course under a previously awarded contract:

March 4-8, 2019: Five OIA Executive Leadership Development Program participants from the U.S. Virgin Islands will continue their program participation during the third session of the Executive Leadership Program. These participants will join over 100 U.S. government participants to focus on critical thinking, team and project planning, external awareness, and improving presentation skills.

8-30 Day Outlook (March 9-April 5)

NEW ITEMS

PR/USVI FEMA Recovery Update: The Department continues coordination efforts as part of the Federal Emergency Management Agency (FEMA) Recovery team supporting both Puerto Rico and the U.S. Virgin Islands, in natural and cultural resource recovery. FEMA Mission Assignments have been extended to the end of March and April, respectively, as the Department negotiates the scope of an Interagency Agreement for specific, longer-term support. As part of that support, the Department will continue to provide staff to coordinate actions among the federal agencies to enhance the capacity and expertise within the territorial governments.

Freely Associated States Meetings: OIA Director Nik Pula will chair mid-year meetings of the Joint Economic Management Committees on March 19, 2019 in Chuuk State (Federated States of Micronesia) and on March 21, 2019 in Majuro (Republic of the Marshall Islands). The mid-year meetings focus on updates, policy, audit review, and discussions on the effective use of Compact of Free Association financial assistance provided to both countries. Compact assistance is provided through a permanent appropriation from Fiscal Year 2004 through Fiscal Year 2023 whereafter U.S. financial assistance is currently scheduled to transition to trust funds for each nation that are currently in accumulation phases. During the same week, the Director will host quarterly meetings of the FSM and RMI Trust Fund Committees, both of which the Director also chairs. The most senior FSM and Marshall Islands leaders will attend these meetings. Work continues in preparation of these meetings to solidify the schedule and the information that will be reviewed during the meetings.

Conference on Illegal Fishing in the Pacific: On March 21-22, 2019, the Annenberg Foundation Trust at Sunnylands and the Pew Charitable Trusts will host a conference on illegal fishing in the Pacific. The event will convene national security officials and civil society experts with the objective of identifying challenges facing partner nations in the Pacific and to develop a portfolio of actions that the U.S. government can undertake to address illicit fishing and related development challenges. The event will take place in Washington, DC, and AS-IIA Domenech will attend.

Wetland Monitoring in Indonesia: DOI-ITAP will send two technical experts to install several rod surface elevation table (RSET) units in strategically identified locations throughout Sebangau National Park in Central Kalimantan, March 10-26. These RSET units will be used to measure the ecological health in the surrounding wetlands, and serve as a model for similar research activities throughout protected tropical forests in Indonesia. In addition to the installation, FWS Refuge Manager Chris Lowie will be assessing the progress made on Sebangau's park interpretations infrastructure and advising on next steps. This program is funded by USAID under the Strengthening Indonesia's Protected Areas program.

Cambodia Environmental Law and Regulation: DOI-ITAP has been requested by Cambodia's Ministry of Environment to train a group of recently designated legal focal points on enforcement and development of environmental regulations, March 18-21. This effort is taking place under the Smart Infrastructure for the Mekong program and follows up

on a previous legal capacity building assessment completed by staff from DOI's Office of the Solicitor and USEPA for the Ministry in May 2018, plus past assistance with development of a comprehensive environmental code currently going through the inter-ministerial review process. This work is funded by USAID.

UPDATED ITEMS

UPDATE. Guam War Claims: Rep. San Nicolas is expected to introduce a second bill to address the distribution issue associated with the Guam War Claims. This new bill will be referred to the House Natural Resources Committee for consideration. As previously reported, on February 11, Congressman Michael San Nicolas (Guam) introduced a legislative fix (H.R. 1141) to allow war claim funds to be distributed by the Department of the Treasury. It was referred to the Committee on Appropriations. The Appropriations Committee believes the issue should be addressed by the authorizing committee. The Department of the Treasury believes they lack the statutory authority to actually make the compensation payments under the 2016 Guam World War II Loyalty Recognition Act to victims and survivors of the Japanese occupation during World War II. OIA is working on a possible administrative fix.

UPDATE. Planning for Cooperation under the Free Trade Agreements with Jordan and Oman: At the request of and funded by the U.S. State Department, DOI-ITAP Senior Project Managers will travel to Amman, Jordan and Muscat, Oman from March 9-20 to meet with U.S. Embassy personnel and government counterparts to initiate cooperation between the U.S. and each country on issues related to CITES implementation and training wildlife inspectors and law enforcement officers.

ONGOING ITEMS

NO CHANGE. U.S. Government-Wide Comprehensive Report on Federal Grants to U.S. Insular Areas: OIA staff continues to work to finalize the database.

NO CHANGE. POTUS Meeting with FAS Presidents: It has been indicated that a formal invitation will be sent to the Presidents of the Republic of the Marshall Islands, the Federated States of Micronesia, and Palau to meet with the President for a date this spring (likely May). This first ever meeting is important in U.S. efforts to engage in the President's Indo-Pacific strategy.

NO CHANGE. POSTPONED: Winter Meeting of the Coral Reef Task Force (CRTF): The winter meeting of the Coral Reef Task Force (CRTF) has been postponed to the first week of April (April 1-5) as NOAA is the lead of the event and its staff was furloughed for the entirety of the shutdown. AS-IIA Domenech will co-chair the all-day business meeting on Thursday, April 4. It is expected that there will be coordination calls on this event over the next few weeks.

NO CHANGE. Oversight of Contractor Gas Work in South Africa: At the request of and funded by the Department of State Energy Resources Bureau, a DOI-ITAP contract team will travel to Cape Town, South Africa during the week of March 25th to lead a workshop on

drafting effective environmental and technical regulations for officials governing the natural gas sector in the Western Cape Province (WCG).

AWARENESS

Natural Resources Management Act Territorial Provisions: The Natural Resources Management Act (S. 47), which passed the Senate on February 12 and subsequently passed the House on February 26, contains the following items involving the U.S. territories:

Title III – Conservation Authorizations –Reauthorization of the Land and Water Conservation Fund. This would allow each territory to be treated as a State (instead of all territories being treated as one State), and therefore eligible to receive their own equal apportionment under the formula. For example, at the proposed FY19 level, this would be a minimum of $714,000 each.
Title VII – Wildlife Habitat and Conservation. This would require Federal agencies to plan and carry out activities on lands managed by their agencies to protect water and wildlife by controlling and managing invasive species. It requires them to develop strategic plans in coordination with eligible states, which include, Guam, American Samoa, CNMI, and USVI to achieve an annual net reduction in invasive species, by reducing either their populations or their areas of infestation.
Title IX – Miscellaneous. Under Section 9007 – American World War II Heritage Cities – this sections authorizes the Secretary of the Interior to designate one or more cities located in one of the States or territories as an "American World War II Heritage City. Not more than one city in each State or territory may be designated. No Federal funds are associated with these designations.

Update. FWS Employee in Hospital in Norway: Region 7 Polar Bear Program Leader Jim Wilder is no longer in the hospital, but has been transferred to another medical care facility in Tromso, Norway. He has been communicating back to his office, but it will still be some time before travel is deemed possible. He is the sole FWS traveler on this official travel. His wife was able to travel to Norway last weekend to be with him as an on-site caregiver.

Advice to State Department on Indigenous Issues: INT is coordinating DOI expert review of U.S. negotiating instructions drafted by State on international indigenous issues, including repatriation of tribal cultural heritage, to ensure that they are consistent with established domestic Indian law and policy. INT is also facilitating contact between State and AS-IA staff to enhance cooperation on international issues relevant to Indian Affairs, including upcoming meetings of the United Nations in New York.

Upcoming International Travel:

OIA Director Nik Pula: Chuuk State, FSM and Maduro, RMI. March 17 - 24.

Additional known international travel departing February 24- March 2:

3/3/19	Netherlands	Water use mapping exchange	Gabriel Senay	USGS
3/3/19	Slovenia	Sister park technical exchange	Sean Denniston	NPS

3/9/19	UK, Gabon	Wildlife meeting and field work	Matt Muir	FWS

ASSISTANT SECRETARY FOR LAND AND MINERALS MANAGEMENT

Week Ahead Schedule of Meetings, Hearings, and Travel

Assistant Secretary for Land and Minerals Management Joe Balash will be in the office.

Principal Deputy Assistant Secretary Casey Hammond will be on travel Tuesday-Thursday.

Deputy Assistant Secretary Gary Lawkowski will be in the office.

Exempt Federal Register Notices (First Week Notice)

Information Collection Renewal Notices:
Proposed Information Collection: Surveys and Focus Groups to Support Outcomes-Focused Management, 60 Day Notice and Request for Comment

Immediate Announcements and Actions for the Next Week

Bureau of Land Management

February 25 - March 7. BLM-WY. Wind River/Bighorn Basin District firefighters will perform a prescribed burn at Ocean Lake Wildlife Habitat Management Area near Riverton beginning in late February or early March, depending on weather. The burn is part of a cattail management plan, which will improve habitat quality for waterfowl and hunting opportunities for sportsmen. The burn is in cooperation with the Wyoming Game and Fish Department and the Bureau of Reclamation. (2/12/19)

February 26 - March 17. BLM-AK. In conjunction with Army improvements to training ranges, the BLM-AK Fire Service is conducting prescribed burns near Delta Junction in Fort Wainwright's Donnelly Training Area. Approximately 700 large piles of mechanically treated fuels will be burned. The Alaska Department of Environmental Conservation (ADEC) has issued a smoke permit. Burning will be coordinated with the National Weather Service, U.S. Army, and ADEC. (2/19/19)

March 4. BLM-AZ. The Phoenix District Manager plans to participate in a NEPA Review Team briefing on the Final Environmental Impact Statement related to development of the proposed Sonoran Valley Parkway Project by the City of Goodyear in Maricopa County, Arizona. (4/4/18)

March 4. BLM-CO. The Gunnison Field Office will start the review process for publishing a Notice of Realty Action in the Federal Register. The BLM is proposing a direct (non-competitive) sale of approximately 0.21 acre of public land in Saguache County, Colo. to Lucky 3, Inc. The sale will resolve an inadvertent, unauthorized occupancy on the public lands proposed for offer. The parcel is approximately 30 miles southeast of Gunnison. (2/26/19)

March 4. BLM-ID's Initial Action Notice for an Environmental Impact Statement to analyze a land exchange proposal from the Simplot Company in the Idaho Falls District was approved in December 2018. A Federal Register Notice of Intent is being prepared by the Pocatello Field Office and is anticipated to be in Washington Office review in early March. (12/7/18)

March 4. BLM-MT/DK. The North Dakota Field Office plans to sign the Slawson Decision Record/Finding of No Significant Impact for 23 APDs located on five well pads in Mountrail County, North Dakota within the exterior boundary of Fort Berthold Indian Reservation, and within a half mile of Lake Sakakawea. Four of the five locations are on privately owned (Fee) surface and overlay Fee minerals, with the horizontal portion of the well bore penetrating Federal minerals. One location is on Fee surface and overlays Federal minerals (traditional Split Estate). The main issue with the location is that the Three Affiliated Tribes (TAT) have a Tribal Resolution: (1) requiring an operator to obtain a variance from the TAT for all oil and gas development within a half mile of Lake Sakakawea, and (2) prohibiting locations within 1,000 feet of the Lake. The traditional Split Estate location is 1,000 feet from the Lake (in compliance with federal lease stipulations); the other four locations are less than 1,000 feet from the Lake. Despite a ruling by the Office of Hearing and Appeals which upheld BLM's decision, the TAT are expected to appeal. (2/12/19)

March 4. BLM-OR/WA plans to issue a Final EA, Decision Record, and FONSI on the Don J placer mining project Plan of Operations. The Vale District is reviewing public comments received on the plan, incorporating comments, and developing the Final EA, which identifies alternative actions for the project, which changed ownership last year. Located on the Burnt River near Bridgeport, Ore., the BLM-preferred alternative would allow the expansion of the operation to a maximum footprint of 20 acres over 15 years. (2/12/19)

March 4. BLM-UT. The St. George Field Office and BLM-UT State Office have been working with Utah Aspen Development, LLC, and Green Springs Aspen, LLC, on the purchase of two parcels of land totaling 165 acres. These parcels are in the Beaver Dam Wash National Conservation Area (NCA) and will be managed consistent with the objectives of the NCA management plan. The appraisals are complete and being reviewed by the Appraisal and Valuation Services Office. A preliminary title opinion has been requested from the Solicitor's Office. Following approval of the title, the BLM will accept the title transfer from the respective entities via Warranty Deeds in accordance with the approved escrow instructions. A final Certificate of Inspection and Possession will then be completed and the final title opinion obtained. (10/9/18)

March 4. BLM-WY. The Buffalo Field Office will complete a Resource Management Plan maintenance action to recognize that the three-mile historic cultural setting no longer contributes to the eligibility of the Pumpkin Buttes Traditional Cultural Property (TCP). The Wyoming State Historical Preservation Office has concurred with the BLM's recommendation. Due to this action, a controlled surface use stipulation for oil and gas leasing/development will no longer be applied to this area. The TCP is comprised of 1,735 acres of public lands managed by BLM and 3,689 acres of private surface in Campbell County, Wyoming. There are 4,568 acres of federal minerals underneath the TCP, out of the 5,424 total acres. (2/26/19)

March 4. BLM-WY. The Kemmerer Field Office will initiate a 30-day scoping period for its Environmental Assessment (EA) of the Southern Wyoming Range Mule Deer Habitat Management Plan: Kemmerer-Cokeville. The project, a cooperative effort between the BLM and the Wyoming Game and Fish Department, is intended to improve habitat quantity and quality within BLM-managed lands in the southern portion of the Wyoming Range mule deer herd through phased vegetation treatments. The scoping period will help the BLM identify issues for consideration in the EA. Two public meetings are scheduled to occur during the scoping period: Mar. 13 at the Kemmerer Field Office and Mar. 14 at the Cokeville Town Hall. (2/26/19)

March 4. BLM-WY. The Kemmerer Field Office will release an EA and FONSI for the proposed Big Dry Creek sodium lease sale, opening a 15-day comment period. The EA analyzes potential impacts of leasing 5,095 acres of sodium on three lease tracts in the BLM-managed Known Sodium Leasing Area in southwest Sweetwater County, Wyo. Imperial Natural Resources Trona Mining, Inc. proposed the sale, which would be conducted under a competitive bidding process. (2/19/19)

March 4-8. BLM-CO/ID/NV-CA/OR/UT/WY. Draft Records of Decision (RODs) and a Notice of Availability (NOA) package for the Greater Sage-Grouse plans will be uploaded to DTS for review and approval. Finalization of the RODs for signature on March 8 depends on resolution of protests received during the period that closed on Jan. 28 and responses to the Consistency Reviews by respective governors. (2/5/19)

By March 8. BLM-MT/DK. The Department of Veterans Affairs (VA) and the National Cemetery Administration seek acknowledgement from the Secretary of the Interior that will

establish the official date of administrative transfer and allow updating of the federal land records of 181.32 acres of BLM land near Sturgis, South Dakota, for cemetery purposes in accordance with the Black Hills National Cemetery Boundary Expansion Act. A letter is circulating for the Acting Interior Secretary's signature. (1/29/19) DTS 16960

By March 8. BLM-MT/DK is awaiting DOI approval of the publication in the Federal Register of the legal description of the Limestone Hills Training Area in Broadwater County, Mont. Subsequent to publication, an official map and legal description will be filed with the Senate and House Armed Services Committees, the Senate Committee on Energy and Natural Resources, and the House Committee on Natural Resources, and made available for public inspection. The filings will implement the final administrative actions related to the Limestone Hills Training Area. All public involvement, outreach, comment periods, and consultation occurred prior to withdrawal of the lands for military purposes on Dec. 26, 2013, as a result of enactment of the National Defense Authorization Act for FY 2014, along with a technical correction included in the National Defense Authorization Act for FY 2019. While the military withdrawal is already in effect, delayed publication of the legal description prolongs the official notations to the record. (10/5/18) DTS 2355

By March 8. BLM-MT/DK. Additional coordination with the Montana Department of Natural Resources and Conservation (DNRC) will be scheduled to address concerns regarding grazing permittee/bills related to the State of Montana In Lieu effort, which would convey the final selected lands totaling 5,816.63 acres to fulfill the long-standing entitlement made by Congress when Montana became a State in 1889. The package has been with DOI since Aug. 13, 2018. The State Land Board accepted the lands, contingent on publication of the notice and final classification, on Sep. 17, 2018. There has been little controversy associated with this effort. Delayed publication of the notice and final classification has generated inquiries and concern from grazing permittees to both the BLM as well as Montana DNRC. (11/23/18) DTS 2211

By March 8. BLM-MT/DK. The U.S. Department of State (DoS), as lead agency, expects to publish a Notice of Availability for a Draft Supplemental Environmental Impact Statement (SEIS) for the Keystone XL pipeline for public comment and review. The BLM, is a cooperating agency, and provided comments to the DoS on the internal Draft SEIS. The Draft SEIS considers the direct, indirect and cumulative impacts related to changes in the Project since 2014 and incorporates updated information and new studies, as well as the alignment shift of the route in Nebraska. (2/5/19)

March 8. The BLM plans to begin the Adoption Incentive Program, which aims to encourage new individuals/organizations to adopt an untrained wild horse or burro and motivate previous adopters to re-engage with the program by providing a financial incentive: $500 within 60 days of the adoption date and an additional $500 at time of title eligibility. The program aims to increase the number of animals adopted and reduce holding costs. (2/5/19)

March 8. BLM-CA. The Ridgecrest Field Office expects to release for public comment the Battery Minerals-Panamint Lithium Project Environmental Assessment (EA). The EA

evaluates a proposal to conduct exploratory drilling for lithium, which is on the DOI 2018 List of 35 Minerals Deemed Critical to U.S. National Security and the Economy. The area of interest is the outer rim of Panamint Dry Lake in Panamint Valley, Inyo County. The sites are within the Panamint Lake Area of Critical Environmental Concern and Basin and Range National Conservation Lands. (2/26/19)

March 8. BLM-ID. The preliminary environmental assessment (EA) for the Owyhee Land Exchange will be forwarded as part of the Land Exchange Decision Package to the Washington Office for review. The exchange between the BLM and the Idaho Department of Lands (IDL) was developed to acquire State inholdings in Idaho wilderness areas designated by the Omnibus Public Land Management Act of 2009 (Public Law 111-11). The exchange was subsequently selected as one of the America's Great Outdoors Projects, which provided initial funding for exchange processing. Appraisals of the Federal and State lands resulted in a significant reduction of State acreage for value equalization purposes. Based on the appraisals, BLM will convey 31,030 acres of Federal land to the IDL in exchange for 23,878 acres of State land. The BLM-ID State Director and the IDL Director signed a binding exchange agreement in September 2018 to hold the appraised values constant until the exchange is complete. Staff are working to complete State Historic Preservation Office consultation and finalize the EA by March 2019. (12/18/18)

March 8. BLM-MT/DK. Public scoping for American Colloid Company's resubmitted Plan of Operations (PO) begins. The American Colloid Company (ACC) has resubmitted a complete PO to mine bentonite in southern Carbon County, Mont. The PO contemplates disturbing up to 45.1 acres of BLM-managed land and is an extension of mining operations. All 45.1 acres of disturbance occur within a Priority Habitat Management Area for Greater Sage-grouse. The revised PO includes an updated mitigation plan that includes a process referred to as a "cast back" mining method. This method requires that the overburden is only handled once, thereby increasing efficiency and allows reclamation to occur much sooner than traditional mining methods. Media and public invited. Controversy undetermined. (2/26/19)

March 8. BLM-OR/WA. The Lakeview District plans to sign the Coyote Colvin Grazing Permit Renewal EA, allowing an Outcome Based Grazing Authorization. This EA involves six allotments, five of which are included in the Outcome Based Grazing program. The proposal is to expand the season of use and allow for more flexibility in pasture rotation. The number of AUMs (9,136) would remain the same. There is a cooperative relationship with the permittee and no controversy with NGOs at this time. (12/7/18)

March 8. BLM-WY. BLM plans to issue a ROD for Lost Creek uranium expansion project EIS. The 30-day EIS availability period will end on Feb. 28, after which BLM will finalize the ROD. The EIS analyzes Lost Creek ISR, LLC's proposal to expand its existing uranium mine in Sweetwater County, Wyo., continuing employment and expanding production at the mine. BLM briefed the DOI internal review team on Dec. 14. A Weekly Report item announcing the availability and future publication of the ROD first ran on Nov. 23. (2/5/19)

March 8. BLM-WY plans to brief the Review Team on the Notice of Availability for the Draft EIS for the proposed Moneta Divide oil and gas development project. Located near Lysite, Wyo., the proposed project could recover up to 18 trillion cubic feet of natural gas and 254 million barrels of oil over its estimated 65-year life and could support approximately 6,400 jobs during the 15-year development phase. The Draft EIS analyzes amendments to the Casper RMP, including potential impacts to approximately 1.2 million acres of Greater Sage-grouse Priority Habitat Management Areas. Once cleared by the Review Team, the Federal Register notice would publish soon after, beginning a 90-day public comment period. (2/5/19)

March 9-10. BLM-NV. The Mint 400 OHV race will take place in Southern Nevada. A closure will be put into effect for the Jean/Roach Dry Lakes Special Recreation Management Area that will be occupied by the race. This event is expected to attract approximately 450 participant vehicles per race (two races per day) and roughly 15,000 spectators over the course of two days. The 2019 Mint 400 will employ approximately 500 people through contracting with local vendors for security, parking, media, and sanitation. The event is also anticipated to bring approximately $22 million to the local Las Vegas economy through lodging, restaurants, and local business. A Federal Register Notice is currently being reviewed by the Washington Office. (1/31/19) DTS 2468

By March 10. BLM plans to issue an Instruction Memorandum (IM) to help field staff comply with Section 106 of the National Historic Preservation Act regarding oil and gas activities producing federal minerals on non-federal/private land. The IM supplements Permanent IM 2018-014 on directional drilling from well pads on non-federal locations, also known as fee-fee-fed wells. This guidance will help ensure that BLM activities are appropriately limited. Interest has been expressed by Rep. Liz Cheney's (R-WY) office, as well as the Petroleum Association of Wyoming. (2/12/19)

By March 10. BLM-CA. The Ridgecrest Field Office will submit a Departmental Review Team briefing request on the Draft Supplemental EIS (SEIS) and Notice of Availability Clearance for the Haiwee Geothermal Leasing Project. (2/26/19)

By March 10. The BLM is revising WO IM-No. 2018-066, *Guidance for the Sale of Excess Wild Horses and Burros*. This revision will outline policies and procedures concerning the sale of wild horses and burros and applies to all state, district and field offices. The revised policy includes information and direction defining the criteria of sale-eligible animals, steps in the sale process, and data base entry requirements. The revision will require that the selling of more than four animals receive BLM Resources and Planning Directorate approval. The current IM requires such approval for the sale of greater than 25 animals. (2/5/19)

Bureau of Ocean Energy Management

The Proposed Notice of Sale for Gulf Lease Sale 253 is scheduled to publish in Early March, and is with the Department for surnaming. (DTS#2403, 11/30/18)

BOEM executed a negotiated agreement for OCS sand between BOEM and Carteret County on February 21, which was delayed due to the lapse in appropriations. Project operations to renourish beaches along Bogue Banks are currently scheduled to begin in March. The Department may take the lead on the announcement. (DTS#2583, 2/4/19)

BOEM's response to a NOAA request for consultation on the Flower Garden Banks National Marine Sanctuary (FGBNMS) proposed expansion was due on January 6, 2019. Under Section 4 of Executive Order (EO) 13795, Implementing an America-First Offshore Energy Strategy, BOEM must respond within 60 days of a consultation request with a determination of the potential impact of the proposed expansion on the development of oil and gas, renewable energy, and marine mineral resource potential in the area of proposed expansion. Due to the lapse in appropriations, NOAA agreed to extend the deadline for BOEM's response, due to the lapse in appropriations. The hardcopy of the response is with ASLM for signature. (11/16/2018, DTS#2517)

BOEM is preparing the decision documents and Draft PEIS for the Proposed 2020-2025 National OCS Oil & Gas Leasing Program. The decision chapter of the OCSLA analysis is with SOL and BOEM's Acting Director for review. The briefing for the NEPA Review Team scheduled for February 14, will be rescheduled. Once rescheduled, the briefing will cover the Draft PEIS and the Notices of Intent for sales scheduled early in the Proposed Program. The analytical chapters for the OCLSA comment are with ASLM for review. (9/7/18)

In late February or early March, BOEM expects to publish the Final Rule adjusting for inflation the level of maximum civil monetary penalties contained in the BOEM regulations. BOEM is submitting this Final Rule pursuant to the provisions of the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (FCPIA of 2015) and Office of Management and Budget (OMB) guidance (OMB Memorandum M-18-03). The Final Rule is currently with the Department for review. (2/4/19, DTS#2484)

The South Carolina U.S. District Court injunction against BOEM concerning its work to finalize the Environmental Assessments (EAs) for the four pending Atlantic G&G permit applications, has been lifted, but plaintiffs have filed a request for a preliminary injunction with the Court. BOEM has resumed the process of finalizing the EAs for a potential decision on the seismic permits on or after March 1, 2019. This follows the National Marine Fisheries Service issuance of Incidental Harassment Authorizations for the permit applications on November 30. (11/30/18)

Office of Surface Mining Reclamation and Enforcement

Citizen's Complaint Filed: On January 11, 2019, the Trustees for Alaska filed a citizen complaint (with ten exhibits) alleging the surface coal mining operations of Usibelli Coal Mining, Inc. at Wishbone Hill, are being conducted without a valid permit in violation of the Alaska Surface Coal Mining Control and Reclamation Act. They also allege that the State of Alaska has failed to administer its program in compliance with federal requirements

regarding the company's failure to initiate mining operations within three years of the permit issuance, as required by Federal law and the State's regulatory program.

Arkansas Department of Environmental Quality (ADEQ) Reorganization: OSMRE sent ADEQ a letter on November 27, 2018, regarding the reorganization of the Mining Program. This was in response to structural changes being implemented at ADEQ. During the Government Shutdown OSMRE was informed by the ADEQ that House Bill 1215 has been introduced that would reduce direct reports to the Arkansas Governor from over 40 to just 15. This measure is expected to pass and will create a Department of Energy and Environment (DEE). The current ADEQ would become the Division of Environmental Quality within DEE. The ADEQ Mining Program is currently modifying an O&C rule package for the previous ADEQ reorganization and now proposes to add these new organizational changes before they submit it to OSMRE for review. It is expected that all changes will occur by July 1, 2019. OSMRE is working with the ADEQ Mining Program on these current and proposed program changes.

Montana Magistrate's Findings and Recommendation, Spring Creek Mine (MT): On February 11, 2019, the Magistrate Judge (Magistrate) for the U.S. District Court for the District of Montana Billings Division issued a recommendation deferring vacatur of OSMRE's 2016 Environmental Assessment (EA) and Finding of No Significant Impact prepared for the 2016 Spring Creek Mine mining plan decision. The Magistrate determined that the 2016 EA failed to (1) properly analyze the impacts of transporting coal, (2) properly analyze the non-greenhouse gas emissions during combustion, (3) justify its decision not to quantify the economic costs of GHG emission, and (4) follow its own internal guidelines when deciding not to prepare an Environmental Impact Statement (EIS). In its recommendation, the Magistrate is allowing OSMRE 240 days from the final order to correct the EA or seek leave from the court for a new deadline if OSMRE determines it needs to do an EIS. OSMRE has 14 days to object the Magistrate's recommendation before the District Court Judge issues her ruling. OSMRE expects the District Court Judge will concur with the Magistrate's recommendation and issue her ruling accordingly. OSMRE was granted an extension of time and is currently working with the Solicitor's Office to appeal the Magistrate's recommendation. (2/11/19)

River Hurricane Mine, Pike County, KY: On January 7, 2019, KYDNR issued two Notices of Non Compliance for Water Quality and another for Effluent Limits in the Grapevine Creek area (the non- permitted side of the mine). The abatement measures require the permittee to obtain permits with the Kentucky Division of Water (DOW) for the two identified areas. Also, KYDNR is in the process of determining if the off-site impacts (mineral deposits in the stream) that were observed at the site by OSMRE staff warrant an Imminent Harm Cessation Order due to environmental impacts. The permittee was notified of the site conditions, and attempted to make adjustments to their treatment system to address the problem. DOW issued violations to the company during their site visit on February 7, 2019. The OSMRE staff will continue to assist KYDNR staff in monitoring and assessing the site as the long-term plan of action to address the situation.

Justice Group of Companies: On February 12, 2019, a proposed referral package completed review by OSMRE (Acting Director, Field Office Directors, Financial Office, AVS Office, and the Regional Director), SOL DMR, and Deputy Solicitor EMR. The SOL is now moving to finalize the referral package; including updating the status of violations, penalties and fees due, and the package will be elevated to the Principal Deputy Solicitor for review and approval.

The Justice Companies' Kentucky Fuels' Bevins Branch Mine: On February 19, 2019, the Solicitor's Office filed a "Joint Status Report" and a "Request to Hold Case in Abeyance for 60 Days" with the Office of Hearings and Appeals to allow OSMRE and the Company time to complete a settlement agreement or give the Company time to finish all of the abatement measures required by the IHCO.

Scoping for King II Mine Dunn Ranch LBA and Mine Extension EA (CO): The BLM and OSMRE are co-lead agencies on preparation of the Environmental Assessment EA. This project has been identified as a BLM/OSMRE NEPA Coordination "Pilot Project" that will be used to support bureaus' respective leasing and federal mining plan decisions. The bureaus initiated a 30-day scoping period on Friday, February 8, 2019.

Notice of Availability for Publication of San Juan Mine Deep Lease Extension Final EIS (NM): A DOI Clearance Briefing scheduled for Friday, February 15, 2019 has been postponed. When DOI Clearance is obtained OSMRE will publish the announcement in the *Federal Register*. The Final EIS will inform OSMRE's recommendation to the Assistant Secretary for Land and Minerals Management's decision on whether to approve the federal mining plan.

Scoping for Caballo Mine West Lease Tract EA (WY): OSMRE is preparing an EA for the Caballo Mine West Lease Tract federal mining plan. OSMRE initiated a 30-day public scoping period on December 19, 2018 with the scoping period expected to close on January 18, 2019. The comment period closed on February 22, 2019.

Bureau of Safety and Environmental Enforcement

Well Control Rule (WCR) (AA39) - Revised Reg Text, Preamble, RIA and EA have been submitted to Exec Sec and Exec Sec has provided to DOI Deputy Chief of Staff for review. About the same time that was occurring, OMB hosted an E.O. 12866 listening session on February 26, 2019, by and between industry and the federal government to provide an opportunity for the federal government to listen to industry concerns and to clarify comments submitted regarding this rulemaking. During this listening session, industry reiterated its view that BSEE should permit operators to seek approval of alternative drilling margins at the APD (Application for Permit to Drill) or the DWOP (Deepwater Operational Plan) stage. The current regulations only provide for this information to be received by BSEE at the APD stage. It should be noted that industry did not suggest the criteria by which the decision to approve alternative drilling margins would be made would be different at the DWOP versus the APD stage, but rather that they are seeking to create a path for an option to submit the same information under the same

criteria at an earlier stage (the DWOP Conceptual Plan stage). Inasmuch as the criteria under which BSEE would make its decision would not be changed in the creating of this option, there is no impact to safety. Obviously, should conditions change between the DWOP and the APD stage, BSEE would need to retain the right to amend decisions made at the DWOP stage.

BSEE provided a memo on February 28 to the ASLM summarizing the details of the listening session and the consequences of incorporating these suggestions. BSEE awaits guidance as to the issues discussed in the memo referenced above and furthermore, awaits clearance by the DOI Deputy Chief of Staff on the changes submitted regarding Reg Text, Preamble, RIA and EA.

Risk Based Inspection – BSEE Office of Safety Management (OSM) has trained inspectors (December 19 and 20) for the upcoming Performance Based Risk Inspection (PBRI) on Well Operation Hazards, and the inspections are wrapping up this week and additional audits will begin on a select number of rigs. Additionally, OSM has concluded their evaluation on which deep-water facility (Marco Polo) will be subject to the next Facility Based Risk Inspection (FBRI) in late March 2019. The May FBRI inspection is currently being reviewed and OSM will have a facility scheduled in the near future.

8-30 Day Outlook

Bureau of Land Management

NEW ITEMS

Mid-March. BLM-NV. The Winnemucca District will hold two public scoping meetings for the Coeur Rochester and Packard Mine POA11 Project EIS. The meetings will be held in Lovelock and Winnemucca, Nev. during the 30-day scoping period announced in the Federal Register with the publication of the Notice of Intent. (2/26/19)

March 11 – 21 (to be confirmed). BLM-WY. The Rawlins Field Office will initiate a 14-day preliminary scoping period for proposed uranium mines at the historic Shirley Basin Project in Carbon County, Wyo. Pathfinder Mines Corp., the project proponent, submitted a Plan of Operations for the mines on Oct. 2, 2018. The plan includes recovery of uranium using in situ technology from three mines. The Shirley Basin Project is the location of a previous uranium mine that operated from the 1960's to the 1990's. Approximately 36.5 acres of BLM-administered lands would be affected by the in situ operations, of which 30.8 acres consist of areas disturbed by the previous conventional mining. The BLM has yet to determine the level of NEPA analysis necessary for the proposed project. This determination will be informed, in part, by the results of the preliminary scoping period. (2/26/19)

March 13. BLM-UT. The Salt Lake Field Office has received a Plan of Development to build a ski resort in Wasatch and Summit Counties near the existing Deer Valley Ski Resort. The Field Office is working with the proponent to refine the application. Once the application is complete, the appropriate level of NEPA will be determined and initiated. The

proponent (Axtell, doing business as Mayflower) owns over 4,000 acres of land adjacent to small BLM and State of Utah parcels and seeks to lease these parcels as part of the resort system. In addition to skiing, the resort would host a backcountry yurt system, backcountry ski access, and mountain biking and hiking trails. (2/26/19)

March 14. BLM-NV. An open house will be held to discuss route evaluations for the Charleston Travel Management Area in the Elko District. The Charleston TMA in northern Elko County is approximately 157,588 acres in size and has 389 miles of roads identified. A comment period on the evaluations, which is the second phase of travel management planning, opened Feb. 22 and will close Mar. 22. (2/26/19)

By March 15 (To be confirmed). BLM-CA. The U.S. Fish and Wildlife Service, in coordination with the BLM El Centro Field Office, anticipates issuing a Final Environmental Assessment and joint Decision Record for the Ocotillo Wind Energy Project on BLM-managed land in Imperial County. The EA analyzed an Eagle Take Permit application and an amendment to the right-of-way grant for the Ocotillo Wind Energy Facility, a 112-turbine project operated by Pattern Energy and authorized by the BLM in 2012. The BLM is a cooperating agency on the EA and the U.S. Fish and Wildlife Service is the lead federal agency for NEPA and Section 106 of the Historic Preservation Act. (2/26/19)

March 15. BLM-CO. The Gunnison Field Office will implement seasonal wildlife restrictions on motorized travel for Gunnison Sage-Grouse. This restriction will affect approximately 200,000 acres of BLM lands in the Gunnison basin. Motorized travel will be temporarily restricted on portions of 38 BLM and County roads. This sage grouse seasonal management effort is cooperative with the Forest Service and Gunnison County underway since 2010. Approximately 2,500 acres along the Signal Peak ridge will be closed to all uses from March 15 - May 15 to limit disturbance to Gunnison Sage-Grouse during the lekking season. The Signal Peak restrictions were developed with input from Colorado Parks and Wildlife, local wildlife advocates, and trail users. These management restrictions are new for 2019. (2/26/19)

March 26-27. BLM-AK. Anchorage Field Office staff will present project updates at the Western Interior Subsistence Regional Advisory Council meeting in Fairbanks. Updates will include the Bering Sea-Western Interior Resource Management Plan and the status of the Donlin Gold pipeline. (2/26/19)

March 27-28. BLM-NM. The Taos Field Office will hold a second round of public engagement meetings on the travel and transportation planning process for the Sombrillo Travel Management Area (TMA). The TMA is approximately 20 miles north of Santa Fe. The public scoping period closes Apr. 29. (2/26/19)

March 28. BLM-OR/WA. The Coos Bay District will issue decision records and sale notices for three upcoming timber sales: Sister Sweeden, Glide Path, and Slater 21. The District will offer the three sales at an oral auction on Apr. 26. Sister Sweeden includes 196 acres of commercial thinning in the late successional reserve land use allocation, and is expected to yield 4.9 million board feet. Glide Path is a regeneration harvest on 141 acres in

the harvest land base land use allocation, and is expected to yield 4.9 million board feet of timber. Slater 21 includes a combination of thinning and regeneration harvest on 61 acres in the harvest land base. It is expected to yield 1.1 million board feet of timber. The District analyzed the Sister Sweeden timber sale as part of the West Fork Smith Environmental Assessment. Both Glide Path and Slater 21 timber sales were analyzed in the Upper Rock Creek Environmental Assessment. These sales will contribute to the District's target of offering 30 million board feet of timber for sale in FY19. (2/26/19)

March 29 (to be confirmed). BLM-CA. The Ridgecrest Field Office plans to release for public comment the Crater Mine Exploration Environmental Assessment (EA). The EA evaluates a proposal to conduct exploratory drilling and bulk sampling to determine the extent of sulphur deposits. The area of interest is located within the Last Chance Canyon Range, Inyo County, which is within the Basin and Range National Conservation Lands and a BLM inholding surrounded by Death Valley National Park. This particular parcel is proposed to be transferred to Death Valley National Park under S. 47, the Natural Resources Management Act, which passed the Senate on Feb. 12. (2/26/19)

UPDATED ITEMS

By March 10. BLM-CA. The Bakersfield Field Office will submit a Departmental Review Team briefing request for the Plains Pipeline L.P. Replacement Project. The project proposes to replace an approximately 127-mile crude oil pipeline that traverses Santa Barbara, San Luis Obispo, and Kern counties. DOI has designated this as a Fast-41 project. BLM-CA is the lead federal agency for the project, which crosses approximately 13 miles of public lands in the Los Padres National Forest, Bitter Creek National Wildlife Refuge, and Carrizo Plain National Monument. Santa Barbara County is the lead agency for the portions that cross private and state lands. BLM is coordinating with federal, state, county and local agencies, as well as Native American Tribes. Rep. Salud Carbajal's (D-CA-24) office has expressed interest. The project is expected to be controversial. (12/10/18)

By March 10. BLM-CO. The Gunnison Field Office will publish in the Federal Register (pending Washington Office approval) a Notice of Realty Action to convey approximately 43acres of public land to the Town of Lake City under the Recreation and Public Purposes Act. The land is about one mile south of Lake City. The Lake City Ski Hill community ski area would continue to operate under the conveyance. (4/24/18) DTS 2329

By Mid-March. BLM-AK. The Eastern Interior Field Office will consult with the Tribal Governments of Chalkyitsik and the Gwichyaa Zhee Gwich'in (Fort Yukon). The Chalkyitsik meeting will be at the Fairbanks District Office; a second meeting will likely be held in Fort Yukon. The consultation will fulfill the Tribes' request, made during consultation in 2018, that the BLM afford them an opportunity to share their priorities for implementation of the Eastern Interior Resource Management Plan. (10/26/18)

Mid-March. BLM-ID. The Challis Field Office has been working with the Solicitor's Office and the BLM Energy, Minerals, and Realty Management Directorate toward signing the Decision Record and publishing the Notice of Decision on a land exchange in the

Mackay area (Big Lost Land Exchange). This work has been put on hold pending resolution of a conservation easement issue. The owner of the Big Lost Ranch is interested in acquiring some BLM lands which are adjacent to the ranch. The BLM land is situated between a county road, the ranch, Highway 93 and private land, which makes management difficult for both BLM and the ranch. The land that BLM would acquire is 20 acres in the Chilly Slough Wetland Conservation Project Area and approximately 475 acres in the Barton Flat area adjacent to other BLM-managed land. Approximately 208 acres of BLM-managed lands would be exchanged for 495 acres of private land. The private land was appraised at $19,000 more than the BLM land, however the ranch owners will be donating a portion of their land to equalize the values. No known controversies exist at this time. (7/27/18)

Mid-March. BLM-NV plans to publish a Notice of Availability in the Federal Register on the Draft Supplemental Environmental Impact Statement (SEIS) for the Mount Hope Mine Project about 23 miles northwest of Eureka, Nev. The Draft SEIS for the proposed molybdenum mine and related development is a response to the U.S. Court of Appeals for the Ninth Circuit's remand decision for further action on issues identified in its Dec. 28, 2016, decision. The BLM signed a Record of Decision, approved a mine plan of operations, and issued right-of-way grants in 2012. (2/19/19) DTS 2380

March 11. BLM-CO. The 30-day public scoping period closes for GCC Energy LLC's proposed King II Coal Mine Lease by Application (LBA). The proposed LBA includes approximately 3,200 acres north of the existing King II Coal Mine in the Tres Rios Field Office. The LBA would extend mine life for 5-7 years and use existing surface facilities and transportation routes. The Office of Surface Mining Reclamation and Enforcement is the joint lead on the EA. (10/26/18)

March 11. BLM MT/DK. The Butte Field Office plans to issue a Record of Decision for fuels treatment on 1,000 acres of BLM land within the Tenmile study area. The U.S. Fish and Wildlife Service has concurred with the Field Office's effects determination on the Tenmile–South Helena Project, which is a cooperative project between the Helena National Forest and the Butte Field Office. The project area includes all ownerships in 61,395 acres, of which 1,043 acres are administered by the Butte Field Office. The project is intended to maintain consistent quantity and quality of water within the Helena municipal watershed and improve conditions for public and firefighter safety across the landscape. (12/18/18)

March 14. BLM-CO. The Little Snake Field Office will host a public open house in Hayden to discuss management of more than 1,870 miles of inventoried routes across approximately 638,195 acres in Moffat and Routt counties in an area called Travel Management Area 3. The Field Office has been working on a multi-year, comprehensive look at the roads and trails it manages to address current and future needs. To make the effort more effective and manageable, the Field Office has been divided into three travel management areas. The Field Office wants to hear ideas and concerns from the public before it begins developing alternatives to be analyzed in an EA for Travel Management Area 3. A cooperating agency meeting will precede the public open house. The Field Office has emphasized public and cooperator involvement throughout its travel management processes for all three areas. (2/5/19)

March 15. BLM-NV. The Black Rock Field Office anticipates releasing the Burning Man Draft Environmental Impact Statement. The proposed action would increase the event population from 80,000 to 100,000. The alternatives developed from internal and public scoping are: 1) keeping the event population at 80,000; 2) shifting the event northward up the Black Rock playa due to flooding concerns; 3) lowering the permitted population to 50,000 participants; and 4) no event. BLM-NV plans to brief the Department on the Burning Man 10-Year Permit Renewal EIS March 8.(10/1/18)

March 15. BLM-NV. The news release on the Argenta Allotment environmental assessment will be distributed announcing the opening of a 30-day comment period. The EA is tied to the grazing permit renewal on the Argenta Allotment in the Battle Mountain District. (2/12/19)

ONGOING ITEMS

In March. BLM-MT/DK. The Lewistown Field Office anticipates publishing a NOA in the Federal Register for the Lewistown Draft RMP/EIS, pending Washington Office approval. (6/15/18) DTS 2231 / FRN at DTS 2233

In March. BLM-MT/DK. The Missoula Field Office anticipates publishing an NOA in the Federal Register of its Draft RMP/EIS, pending Washington Office approval. (6/15/18) DTS 2230 / FRN at DTS 2232

In March. BLM-NV. The Humboldt River Field Office will publish the Draft EIS for the Marigold Mine Mackay Optimization Project. Numerous groups have expressed concern with this project especially related to the potential impacts to surface and groundwater. (11/2/18)

By Mid-March. BLM-AK. The Jan. 31 signing ceremony for ASLM to sign a Public Land Order (PLO) to revoke seven PLOs issued in 1972 by DOI has been postponed. The Federal Register package will be published upon signing and approval. This order will affect 1,153,609 acres of BLM-managed land withdrawn near the Fortymile area of Alaska. The action will open those acres to surface entry, mining and mineral leasing, subject to valid existing rights. The PLOs were issued pursuant to Sec. 17(d)(1) of the Alaska Native Claims Settlement Act. The Eastern Interior Fortymile Resource Management Plan and Record of Decision, finalized in 2016, recommended partial revocation of these withdrawals. (1/30/19) DTS Lands 186

By Mid-March. BLM-AK is preparing a Federal Register notice to revoke Public Land Order (PLO) 5179 issued in 1972 by DOI. The package will be submitted to the Washington Office for review. This order will affect 243,653 acres of BLM-managed land withdrawn near the Bering Glacier area of Alaska. The action will open those acres to surface entry, mining and mineral leasing, subject to valid existing rights. The PLO was issued pursuant to Sec. 17(d)(1) of the Alaska Native Claims Settlement Act. The East Alaska Resource

Management Plan and Record of Decision, finalized in 2007, recommended partial revocation of these withdrawals. (1/30/19)

Mid-March. BLM-CO. The Army National Guard completed two Records of Decision (RODs) for the Craig National Guard Training Site Munitions Response Area and the Delta National Guard Complex to remediate munition sites on BLM-managed land in the Northwest and Southwest districts. Per DOI policy, review from BLM management and signature from the Assistant Secretary for Policy, Management and Budget are required to provide the Army National Guard access to BLM lands. BLM-CO is preparing packages for the RODs and surname process (2/12/19)

March 11. BLM-UT plans to publish a Notice of Exchange Proposal in the Federal Register for the Utah Test and Training Range Land Exchange. The FY17 National Defense Authorization Act directed a land exchange between the BLM and State of Utah's School and Institutional Trust Lands Administration. The Federal lands (95,737.13 acres) and State lands (83,609.38 acres) are located throughout western Utah in Box Elder, Tooele, Juab, Millard, and Beaver Counties. The purpose of the land exchange is to: 1) remove State ownership of lands where development would be incompatible with the critical national defense uses of the UTTR and Dugway Proving Ground; 2) consolidate land ownership for both the State of Utah and the United States; 3) place valuable conservation and recreation lands and mineral interests into public ownership, including lands within and contiguous to the Cedar Mountain Wilderness; and 4) place lands with a high development potential into State ownership for the benefit of Utah public schools. BLM-UT plans to issue a news release when the notice publishes. (2/19/19) DTS L183

Week of March 11. BLM-CO. The Gunnison Field Office plans to announce a 30-day scoping period for a proposed Travel Management Plan on BLM-administered lands near Silverton. The proposal will align with the Silverton Trails Master Plan, developed by the Town of Silverton and San Juan County. The BLM will consider proposals to construct new roads or trails and increase authorized uses on existing trails. (2/19/19)

March 13. BLM-AK. The comment period will close for the Draft EIS for the Coastal Plain Oil and Gas Leasing Program. BLM-AK held eight public meetings from Feb. 4-13 in various Alaskan communities and Washington, D.C. The comment period was extended to Mar. 13 at the request of several Alaskan communities and environmental organizations. (1/30/19)

March 15. BLM-AZ. The Gila District Manager plans to participate in a NEPA Review Team briefing on the Final SEIS / Proposed Plan Amendments for the Ray Land Exchange. This proposed land exchange has the potential to create hundreds of Arizona mining-related jobs as well as improve access to existing public lands for traditional uses such as hunting, fishing, and family recreation. The original Final EIS was deemed insufficient by the Ninth Circuit Court of Appeals as it failed to analyze the different environmental consequences of the proponent's likely mining operations, with or without the exchange and federal oversight. The BLM plans to release the Final SEIS / Proposed Plan Amendments in April 2019 and a Record of Decision in June 2019. (2/19/19)

March 18. BLM-AZ. The Hassayampa Field Office will announce a new lease of approximately 1,046 acres of public lands near Wickenburg, Ariz., to the Maricopa County Department of Parks and Recreation, under the Recreation and Public Purposes Act. An EA analyzing potential environmental impacts of the lease, which allows construction of recreation facilities, including picnic and campground facilities, restrooms, trails, a nature center, and an amphitheater, was signed Jan. 31, 2019. The lease will support the County's efforts to expand recreation access in the fastest growing county in the U.S. (1/30/19)

March 18. BLM-ID. The Shoshone Field Office anticipates publishing a Notice of Realty Action in the Federal Register identifying 13.78 acres of public land as suitable for conveyance to Lincoln County under the Recreation and Public Purposes (R&PP) Act. Lincoln County proposes to use the land for operating and maintaining a municipal solid waste transfer station. Conveyance of the public land for uses outlined in the R&PP Plan of Development will allow Lincoln County to continue utilizing the waste transfer station in its current location to accept only non-hazardous and household hazardous waste as permitted by Idaho Department of Environmental Quality. BLM-ID is preparing to submit a request to brief the BLM Director's office on this project. (8/28/18)

Late March. BLM-OR/WA. The Vale District is revising a Draft RMP Amendment and Draft EIS for the Southeastern Oregon planning. The Vale District will incorporate suggested changes and, following Oregon State Office review, will recommend publishing the Notice of Availability and Draft Environmental Impact Statement through ePlanning and release to the public for a 90-day comment period in early spring 2019. The Vale District is revising the schedule and incorporating the applicable changes. (2/12/19)

March 25. BLM-NV. The Ely District, Bristlecone Field Office begins a 15-day public comment period on a preliminary Environmental Assessment analyzing a Kinross Gold Corporation proposal to expand operations at the Bald Mountain Mine on private and public lands about 65 miles northwest of Ely, Nev. The comment period concludes April 9. (2/19/19)

March 29. BLM-ID. The Morley Nelson Snake River Birds of Prey National Conservation Area is preparing an EA for the Idaho Army National Guard's Master Plan No. 1, which would include improvements to three ranges; four ammo transfer and holding points; and 25 concrete tank turning pads. These projects are being analyzed in one EA. BLM is a co-lead on this project with the National Guard. The 30-day public comment period began Dec. 17. Due to the volume of comments, a final decision will be ready for release at the end of March. (7/20/18)

Oil and Gas Lease Sale Updates

BLM-CO. BLM-CO has scheduled its first two quarterly oil and gas lease sales in 2019, March 28 and June 28. **The March oil and gas lease sale will offer six parcels totaling 1,091 acres.** 45 days out – Post Sale Notice and begin 10-day protest period (Feb. 12, 2019) – 30-day public review and comment period on NEPA documents began Nov. 16, 2018 and

concluded Dec. 16, 2018; Two-week public scoping period began on Oct. 10, 2018 and ended on Oct. 16, 2018; Two days prior to sale – Send final sale parcel list to Energy Net for posting – March 26, 2019; One day prior to sale – Decision Record and Signed FONSI – March 27, 2019. **The June oil and gas lease sale will offer 12 parcels totaling 4,804 acres.** Two-week public scoping period began on Jan. 29, 2019 and closes on Feb. 12, 2019. Two-week public review and comment period on NEPA documents will begin on March 12, 2019 and closes on Mar. 26, 2019. 45 days out – Post sale notice and begin 10-day protest period (May 14, 2019 – May 23, 2019). Two days prior to sale – Send final sale parcel list to Energy Net for posting – June 26, 2019; One day prior to sale – Decision Record and Signed FONSI – June 27, 2019. September 2019 CO oil and gas lease sale – March 1, 2019 is the cut-off for accepting Expressions of Interest.

BLM-ES. BLM-ES has scheduled a quarterly oil and gas lease sale June 20, 2019. Thirty-one parcels totaling 3,338.355 acres will be offered. The Sale Notice will be posted June 3, 2019 (45 days out), initiating a 10-day protest period. A 30-day public review and comment period on NEPA documents began December 11, 2018, and ended February 1, 2019. Final NEPA document was posted to ePlanning, February 15, 2019. The Draft Sale Notice review will be conducted by District Office/SMAs/SO/SD, March 11-12, 2019. The Sale Notice will be posted to ePlanning, March 22, 2019. The Sale Notice protest period will end April 1, 2019.

BLM-MT. BLM-MT has scheduled their first two quarterly oil and gas lease sales in 2019, March 25-27 and July 30. **March 25-27, 2019 MT oil and gas lease sale - 305 parcels totaling 167,213 acres –** Public Notification of Competitive Oil and Gas Lease Sale will be posted on website and news release (TBD, NLT 45-days out). The 30-day public protest period (for the Greater Sage-Grouse areas) began Feb. 1, 2019 and ends Mar. 3, 2019. The 30-day public review and comment period of the environmental documents began on Nov. 21, 2018 and concluded Dec. 21, 2018. Send final sale parcel list to Energy Net for posting on Jan. 31, 2019; Decision Record and signed FONSI on March 19. **July 30, 2019 MT oil and gas lease sale - 35 parcels totaling 12,242 acres (3,611 BLM and 8,631 split estate) –** Public Notification of Competitive Oil and Gas Lease Sale (at least 45-days notice on June 11) will be posted on website and in a news release. The 15-day public review and comment period of the environmental documents begins Mar. 13 and concludes April 12, 2019. The 30-day public protest period begins June 12, 2019 and concludes July 12, 2019. Send final sale parcel list to Energy Net for posting on June 11, 2019; Decision Record and signed FONSI on July 25.

BLM-NM. BLM-NM has scheduled its first two quarterly oil and gas lease sales in 2019, March 28 and June 20. **March 28, 2019 NM oil and gas lease sale - 37 parcels totaling approximately 12,500 acres in NM & OK** – 45 days out - Public Notification of Competitive Oil and Gas Lease Sale - posted on website and press release; public scoping period - Began Oct. 5, 2018 and concluded Oct. 19, 2018; public protest period of the environmental documents - Began Feb. 11 and concludes Feb. 20, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting – Mar. 26, 2019; One day prior to sale – Decision Record and Signed FONSI – Mar. 27. **June 20, 2019 NM oil and gas lease sale - 56 parcels in NM, KS, & OK –** 45 days out - Public Notification of Competitive Oil

and Gas Lease Sale - posting on website and press release; public scoping period - Began Jan. 30 and concluded Feb. 10; public review and comment period of the environmental documents - Begins Mar. 11 and concludes Mar. 22, 2019; Two days prior to sale - Send final sale parcel list to Energy Net for posting - June 18, 2019**;** One day prior to sale – Decision Record and Signed FONSI – June 19.

BLM-NV. BLM-NV plans on conducting an oil and gas lease sale June 11, 2019. The sale will involve 172 parcels totaling 339,081 acres on the Battle Mountain (123 parcels, 264,076 acres) and Elko Districts (49 parcels, 75,005 acres). The sale notice will post April 12 and the protest due date is May 13. The NEPA comment period for the Battle Mountain District runs from Feb. 19 to March 20. The NEPA comment period for the Elko District runs from Feb. 16 to March 19. (2/19/19)

BLM-UT. BLM-UT has scheduled their first two quarterly oil and gas lease sales in 2019, March 25-26 and June 10. **March 25-26, 2019 UT oil and gas lease sale - 156 parcels totaling 217,000 acres –** Public Notification of Competitive Oil and Gas Lease Sale will be posted on website and news release (TBD, NLT 45-days out). The 30-day public protest period (for the Greater Sage-Grouse areas) begins Feb. 7, 2019 and ends Mar. 1, 2019. The 30-day public review and comment period of the environmental documents began on Nov. 15, 2018 and concluded Dec. 17, 2018. Send final sale parcel list to Energy Net for posting on Feb. 11, 2019; Decision Record and signed FONSI on May 24. **June 10, 2019 UT oil and gas lease sale - 8 parcels totaling 11,557.73 BLM acres; 12 parcels 27,000 Forest Service acres –** Public Notification of Competitive Oil and Gas Lease Sale (45-days notice on April 25) will be posted on website and in a news release. The 15-day public review and comment period of the environmental documents begins Feb. 15 and concludes Mar. 4, 2019. The 10-day public protest period (no Greater Sage-Grouse areas) begins Apr. 25, 2019 and concludes May 6, 2019. Send final sale parcel list to Energy Net for posting on Apr. 26, 2019; Decision Record and signed FONSI on Aug. 9.

BLM-WY. BLM-WY has scheduled the first two quarterly oil and gas lease sales in 2019, March 19-20 and June 17. **March 19-20, 2019 WY oil and gas lease sale - 140 parcels totaling 148,908 acres –** Public Notification of Competitive Oil and Gas Lease Sale (Nov. 13, 2018) - posted on website and press release; 30-day public protest period - Began Jan. 30 and concludes March 1; Two days prior to sale - Send final sale parcel list to Energy Net for posting – Mar. 17, 2019; One day prior to sale – Decision Record and Signed FONSI – Mar. 18, 2019. **June 2019 WY oil and gas lease sale – 160 parcels totaling 205,885 acres -** EA will be posted for public comment on Feb. 19.

Bureau of Ocean Energy Management

In March, BOEM expects to submit the Final Rule updating its air quality regulations related to oil, gas, and sulfur operations on the OCS to OMB for interagency review. This Final Rule significantly decreases the regulatory burden on industry compared to the Proposed Rule, while still meeting BOEM's statutory responsibilities under the OCSLA. A narrative describing the reduction to costs as compared to the proposed rule (Reduction to Costs

Narrative and the rule text are currently with the Department for review. (8/2/18, DTS #2280 (Rule), DTS #2454 (Reduction to Costs Narrative))

In March, BOEM expects to publish a Request for Competitive Interest for an area proposed to be used for a right-of-way (ROW) project called Atlantic Link. Clean Power Northeast Development, Inc. filed an application on May 31, 2017 (revised August 22, and September 26), for a ROW grant in support of a proposed project connecting onshore wind and hydro power in Canada to the Massachusetts market via a 350 mile HVDC submarine cable traversing the OCS. The notice is in surnaming with the Department. (DTS #1773)

In March, BOEM expects to publish a Request for Competitive Interest for an area proposed to be used for a right-of-way (ROW) project from Anbaric Development Partners (ADP). The application is for the New York and New Jersey Ocean Grid, an HVDC submarine system approximately 185NM (213 statute miles) in length with up to nine offshore AC to DC collector/converter platforms, which would collect and distribute power generated from existing offshore wind leases to up to six terrestrial landings at locations from Long Island, New York to Cardiff, New Jersey. The notice is in surnaming with the Department. (10/15/18, DTS #2208)

BOEM has revised the proposed rule on financial assurance and is modifying the associated Regulatory Impact Analysis. Currently, the estimated cost-savings of the rule are about $16 million annually. The revised documents have been in surnaming with SOL since February 8. (8/27/18, DTS #2343)

The Gulf of Mexico (GOM) Lease Sales Area Identification Decision Memo covering the proposed GOM oil and gas lease sales in the 2020-2025 National Program (excluding the area currently under the GOMESA moratorium) is currently in surnaming with SOL. The target date for publication is March 29. (2/22/19, DTS#2631)

OIA has begun formal preparations to hold the inaugural meeting of the Global Offshore Wind Regulators Forum (GOWRF) on April 8 in New York City. The meeting will coincide with the 2019 International Partnering Forum conference. This multilateral group will discuss priority topics associated with the responsible planning and oversight of offshore wind energy development, and involve participation from lead government regulators representing both experienced and emerging markets. The forum will present a unique opportunity for sharing lessons learned, discussing regulatory approaches and best practices, and exchanging scientific and environmental information. OIA finalized the list of invitees on February 21 and has started distributing formal invitations.

The negotiated agreement revisions for the Sandbridge Beach, VA lease are currently with SOL for surnaming. BOEM's Marine Minerals Program expects to execute the agreement by mid-March. (2/4/19, DTS#2630)

Bureau of Safety and Environmental Enforcement

Arctic Rule (AA01) –This is a joint BSEE BOEM rule and BSEE has been tasked as the lead agency by the ASLM for revisions to this rule. Although the scheduled tribal consultations were impacted by the drowning of a Native whaling captain and crewmember as well as the Alaskan earthquake, all have taken place. A meeting with the BSEE/ BOEM regulatory team took place on February 13 to discuss comments and path forward. A joint BSEE BOEM memo on the path forward has been drafted and was subject to ASLM/BSEE discussion on February 25. Additions were requested and a revised memo is scheduled to be delivered by the BSEE Director to the ASLM in a meeting scheduled for February 28 at 1pm.

London Convention
On March 18-22, the forty-second meeting of the Scientific Group under the London Convention is scheduled in Vancouver, Canada. The agenda includes a session for members to review the latest draft revised Specific Guidelines for Assessment of Platforms or Other Man-made Structures at Sea, with a view to its finalization and subsequent discussion and approval at the fall 2019 meeting of the governing bodies. The latest revision incorporates DOI's edits from late November 2018, plus suggested revisions submitted by other international members of the intersessional Correspondence Group. BSEE, BOEM, and SOL coordinated on the development of an initial draft U.S. position paper regarding this agenda item at the end of January. BSEE has since requested EPA's input and finalized and is routing through DTS to the ASLM.

Office of Surface Mining Reclamation and Enforcement

Notice of Intent to File Suit: On or about September 7, 2018, the Secretary and the Acting Director received a Notice of Intent to File Suit over an alleged failure to perform a mandatory duty under the Surface Mining Control and Reclamation Act from the WildEarth Guardians (WEG). WEG alleges that the agency failed to "promptly promulgate regulations to limit toxic blasting emissions at coal mines after granting a petition for rulemaking." SMCRA allows OSMRE 60 days to respond to the NOI before an action can be filed. The Solicitor's Office advised OSMRE on its options in response to the NOI. OSMRE sent a response letter to WEG on November 6, 2018, indicating that OSMRE would publish its decision in the *Federal Register* within 90 days, on or before February 4, 2019. On January 31, 2019, OSMRE notified WEG that an extension of time would be needed due to the 35 day government shutdown. OSMRE is working with the Solicitors Office to complete the *Federal Register* notice for publication as soon as possible.

Pollyanna #8 (OK): The FONSI was signed on February 11, 2019. The final MPDD was signed by the Regional Director on February 13, 2019. A hard copy and DTS copy were submitted for HQ routing on February 14, 2019. Currently with the Acting Director's office for approval and routing to ASLM. This approval includes shadow area only for 520 acres of federally owned coal (1.7 million tons recoverable). (11/27/18)

Narley No. 3 (AL): OSMRE Mid-Continent Region will begin scoping for the Best Coal Narley No. 3 Mine in mid-to-late February 2019. The MCR prepared A Notice of Intent to Prepare an Environmental Assessment and submitted it to headquarters for final approval on

February 14, 2019. The NOI was posted on the OSMRE Mid-Continent website on February 22, 2019. Public comments will be accepted through March 25, 2019. (1/30/19)

Notice of Adoption and Record of Decision for West Elk Mine (CO): OSMRE is proceeding with the adoption of the Forest Service's Supplemental Final Environmental Impact Statement (SFEIS) for Federal Coal Lease Modifications COC-1362 and COC-67232. The OSMRE Western Region briefed OSMRE Headquarters on February 13, 2019, and the DOI Clearance package requesting approval to publish was submitted on February 19, 2019. Clearance was granted on February 24, 2019. OSMRE will publish the Notice of Adoption and issuance of a Record of Decision in the *Federal Register* prior to making its recommendation on whether to approve the mining plan decision document.

Notice of Availability for Publication of San Juan Mine Deep Lease Extension Final EIS (NM): The DOI Clearance Briefing scheduled for Friday, February 15, 2019, has been re-scheduled to March 1, 2019. Following DOI Clearance, OSMRE will publish the announcement in the *Federal Register*. The Final EIS will inform OSMRE's recommendation to the Assistant Secretary for Land and Minerals Management's decision on whether to approve the federal mining plan.

ASSISTANT SECRETARY FOR POLICY, MANAGEMENT AND BUDGET

Week Ahead Schedule of Meetings, Hearings, and Travel for the upcoming week

Susan Combs, Senior Advisor to the Secretary, exercising the authority of the Assistant Secretary for Policy, Management and Budget, will be in the office.

Scott Cameron, Principal Deputy Assistant Secretary, will be in the office.

Immediate Actions and Announcements for the Next Week

Office of the Chief Information Officer

On March 4, OCIO is preparing to onboard the new Chief Information Officer, William Vajda. (02/27/12019)

Deputy Assistant Secretary - Human Capital and Diversity (DAS HCD)

The Office of Human Capital is preparing several personnel actions for the upcoming Executive Resources Board (ERB), and is finalizing FY19 SES performance management training to roll out for SES/SL/ST members and senior non-career leadership. (02/27/2019)

On March 4, the Office of Safety and Health (OSH) will conduct a site visit with NPS for the Grand Canyon uranium radiation exposure investigation. OSH staff will coordinate with the USGS uranium specialists, health physicists, NPS mine specialist, and a Federal Occupational Health contract health physicist to determine exposure risk. OSH is co-leading the exposure investigation component along with NPS Chief, Office of Risk Management. (02/27/2019)

Deputy Assistant Secretary - Budget, Finance, Grants and Acquisition (DAS BFGA)

On March 4, PMB is preparing to onboard the new DAS BFGA, Andrea Brandon. (02/27/12019)

Week of March 4, OMB is anticipated to wrap up their informal review of the Department's Proposed Financial Assistance Interior Regulation (FAIR). OMB is completing an informal review, which usually takes 3-5 days. Should the rule be requested for formal interagency review, OMB would take up to 90 days to complete the review. If no decision is received from OMB by mid-week, PMB leadership will reach out to OMB. (02/27/2019)

8-30 Day Outlook

Deputy Assistant Secretary – Public Safety, Resource Protection and Emergency Services (DAS PRE)

From March 20-21, Office of Law Enforcement and Security (OLES) Acting Director (b)(6), (b)(7)(C), (b)(6), (b)(7)(C), (b)(6), (b)(7)(C) will attend a joint Office of the Director of National Intelligence (ODNI)/FBI security conference at the Hoover Dam and FBI Phoenix Field office. The conference is hosted by the Bureau of Reclamation (BOR) and focuses on coordination of sharing classified and sensitive intelligence information across the Department's offices/bureaus. (02/27/2019)

Deputy Assistant Secretary - Budget, Finance, Grants and Acquisition (DAS BFGA)

March 11-29, all Bureaus' FY 2019 spend plan submissions are due to the Office of Budget. (02/27/2019)

Through the week of March 11**,** the Office of Budget will continue to coordinate with the Acting Chief of Staff and the Associate Deputy Secretary's Office for the Bureau/Office FY 2020 Budget Greenbook review. (02/27/2019)

The Office of Management and Budget will stagger the FY 2020 budget release of OMB materials:

- The week of March 11th, OMB will transmit the 2020 Budget (Main Budget Volume). This volume contains the Budget Message of the President, information on the President's priorities, and summary tables.
- The week of March 18th, the remaining OMB materials (the Appendix, Major Savings and Reforms, Analytical Perspectives, etc.) will be transmitted.

DOI will support the roll-out of the Main Budget Volume:

- On March 11th, the Department plans to release Interior's Budget in Brief.
- The week of March 18th, the Interior Congressional Budget Justifications (Bureau/Office Greenbooks) will be released.

The following FY 2020 Budget hearings are scheduled:

- March 26 - The House Interior Appropriations Subcommittee hearing

- March 27 - The House Natural Resources Committee hearing (02/27/2019)

GAO held an entrance conference with DOI's OCIO to discuss the "Department of Homeland Security's Binding Operational Directives (BOD)" (Job Code 103088) in response to requests from Chairman Thompson of the House Committee on Homeland Security and committee member Representatives Richmond and Langevin. The GAO will review the Department of Homeland Security's (DHS) process for developing and overseeing Federal agencies' implementation of BOD requirements and DHS's establishment of associated metrics. (02/27/2019)

The OIG will audit the Wildlife and Sport Fish Restoration Program for Wisconsin State fiscal years 2017 and 2018, starting July 1, 2016 through June 30, 2018. (02/27/2019)

ASSISTANT SECRETARY FOR WATER AND SCIENCE

Week Ahead Schedule of Meetings, Hearings, and Travel

On March 4, Assistant Secretary Tim Petty travels to Tempe, AZ to chair a meeting of the Glen Canyon Dam Adaptive Management Workgroup (AMWG) and associated meetings March 5-8.

On March 4, Principal Deputy Assistant Secretary Kiel Weaver travels to Tempe, AZ to attend a portion of the Glen Canyon Dam AMWG and associated meetings, and on March 6, travels to Bakersfield, CA to speak at the Kern County Water Summit on March 7-8.

On March 4 and 5, Reclamation Commissioner Brenda Burman is scheduled to be on travel in Albuquerque, New Mexico. On March 6-8, Commissioner Burman is scheduled to be in Washington, DC.

During the week of March 3, USGS Director Reilly will be in Reston, VA.

Immediate Announcements and Actions For the Next Week

U.S. Bureau of Reclamation

Between March 3 and March 4, Reclamation plans to publish a 30-day public notice regarding a proposed initiation of a public recreation compatibility review of the Horsetooth Sail and Saddle Club in Colorado, a private exclusive use on Horsetooth Reservoir, Colorado-Big Thompson Project. The results of the review will dictate further Reclamation action. (01/29/2019)

Between March 3 and March 15, Reclamation plans to announce the winners of the year-long sub-seasonal climate forecast rodeo prize competition. This forecasting prize competition had solvers submit forecasts of temperature and precipitation for one year, competing in real-time against other teams as well as forecasts from the National Oceanic and Atmospheric

Administration (NOAA). NOAA was a partner with Reclamation on this project. (12/03/2018)

Between March 3 and March 15, Reclamation plans to announce the winners of the Pathogens Monitoring prize competition. This stage of the competition sought technical proposals for how to rapidly, accurately, and cost-effectively detect viruses in water reuse treatment plants. Xylem, Inc provided financial support and The Water Research Foundation and the Environmental Protection Agency were collaborators. (01/28/2019)

Between March 3 and March 15, Reclamation plans to sign the Finding of No Significant Impact for the Schaake Property Habitat Improvement Project, Yakima River Basin Water Enhancement Project, Environmental Assessment. The Schaake property is located along the Yakima River near the town of Ellensburg in central Washington State. The Schaake property Habitat Improvement Project includes setting back the existing Schaake levee to restore channel-floodplain connectivity and re-connect two historic side channels to the Yakima River to provide rearing habitat for juvenile salmonids. (02/19/2019)

Between March 3 and March 15, Reclamation plans to sign the Finding of No Significant Impact for the Pasco Pump Lateral (PPL) 5.8 Wasteway Project. This project is located north of Pasco, Washington, within the Columbia Basin Project. It involves the installation of a new pipeline to route excess irrigation water from the PPL canal to a discharge point along the Columbia River to correct shortcomings in the existing drainage system. (01/28/2019)

On March 4, Reclamation plans to issue a news release inviting public review and comment on a Draft Environmental Assessment (EA) titled *Implementation of Klamath Project Operating Procedures 2019-2024*. A two-week comment period will begin on that date. This Draft EA will evaluate the proposed action for the recent Biological Assessment. The EA is part of the accelerated Endangered Species Action section 7 Klamath Reinitiation of Consultation process, which is expected to culminate in a coordinated Biological Opinions from the National Marine Fisheries Service and the U.S. Fish and Wildlife Service by April 1. The Klamath project is located in northern California and southern Oregon. Media interest is expected. (01/14/2019)

From March 4 through March 8, Reclamation staff plan to attend the 55th annual meeting of the Oregon Chapter of the American Fisheries Society in Bend, Oregon. The theme of this year's conference is "At the nexus of science and restoration: What do we know?" Media interest specific to Reclamation is not expected. (02/25/2019)

Between March 4 and March 9, Reclamation plans to provide the Biological Assessment on the Gray Lodge Wildlife Area Water Supply Infrastructure Improvement Project to the U.S. Fish and Wildlife Service and the California Department of Fish and Wildlife to initiate the consultation process under Section 7 of the Endangered Species Act. The project proposes to provide Gray Lodge with a supply of water adequate to support optimum wildlife habitat management (Level 4 supply), as mandated by the Central Valley Project Improvement Act. (01/25/2019)

Between March 4 and March 9, Reclamation plans to issue the Finding of No Significant Impact (FONSI) and the Environmental Assessment (EA) documents for the El Camino Irrigation District Pump 1 Conveyance Efficiency Upgrade Project. The EA and FONSI are for a WaterSMART grant to replace 2,020 feet of original concrete irrigation pipeline and install a direct flow meter to reduce seepage and improve water management capabilities, respectively. (01/25/2019)

On March 4, Mid-Pacific Regional Director Ernest Conant will attend a water issues meeting hosted by Congressman Jim Costa (D-16 California) in Los Banos, California. Similar meetings are scheduled a few times a year with the Congressman, federal and state agency directors and the water managers of local districts in the San Joaquin Valley, California. (02/25/2019)

On March 6, Reclamation plans to announce a new prize competition that seeks ideas to keep fish safe from water diversions and intakes. Reclamation is collaborating with the Department of Energy's Water Power Technologies Office, U.S. Geological Survey, NOAA Fisheries, U.S. Fish and Wildlife Service, U.S. Army Corps of Engineers, State of Washington Department of Fish and Wildlife, and Pacific Northwest National Laboratory on this prize competition. (02/19/2019)

On March 6-7, the Glen Canyon Dam Adaptive Management Work Group meeting is planned in Tempe, Arizona. Dr. Tim Petty will be attending. Planned discussion topics include Colorado River basin hydrology, water operations, aquatic species management, and others. The meeting is open to the public and media. (02/04/2019)

On March 7, Reclamation plans to participate in the Flaming Gorge Working Group meeting in Vernal, Utah. The purpose of the meeting is to inform the public and other interested parties of Reclamation's current and future operational plans regarding Flaming Gorge Dam, and to gather information from the public regarding specific resources associated with the reservoir and river corridor below it. The meeting will be open to members of the public and the media. (02/14/2019)

On March 7, Reclamation plans to post the Final Environmental Assessment for a Drought Resiliency Project in Ephraim City, Utah. Ephraim City applied for and received funding through Reclamation's WaterSMART program to drill a second well to improve water quality and increase water supply for the city. A press release will not be issued. (02/25/2019)

On March 7, Reclamation plans to issue a news release announcing it is initiating the WaterSMART Water Management Options Pilots. This is a new activity under the Basin Studies Program. Through these pilots, Reclamation plans to work with state and local partners to identify solutions to water management issues by building on completed Basin Studies. (02/25/2019)

Around March 8, Reclamation plans to issue a news release announcing a Final Finding of No Significant Impact and Environmental Assessment on the Aspen Canal Piping Project

located in Delta County, Colorado. The project will replace approximately 5.6 miles of open irrigation ditch with buried pipe. The purpose of the project is to prevent seepage and reduce salinity loading in the Colorado River Basin. (01/07/2019)

U.S. Geological Survey

San Francisco Bay - Landslides - The forecast atmospheric river (AR) storm arrived Monday February 25th evening with wind and some precipitation, but effects were mostly contained to the North Bay with reports of some landslides causing road closures in Marin County. USGS personnel have been monitoring hillslope soil moisture and saturation levels, and providing periodic updates to the Monterey Weather Forecast Office of the National Weather Service (NWS). Thus far, conditions conducive to widespread shallow landsliding in the San Francisco Bay region have not yet materialized, with the bulk of the forecast heavy rain falling north of San Francisco. As the storm moves further south into the greater San Francisco Bay region overnight, this situation may change. (2/25/2019)

On March 4, the USGS will issue a news release for an already published report summarizing the potential impact of a once-per-century magnetic superstorm on the power grid of the Northeastern United States. (2/27/2019)

On March 4, the USGS will conduct a telephone press briefing for a recently issued report about volcano hazards in California. Invited reporters are from California. (2/27/2019)

Commented [1]: If not too late...please delete this bullet. Actually took place this week.

On March 6, the House Natural Resources Subcommittee on Energy and Minerals will hold an oversight hearing "Examining the Policies and Priorities of the Bureau of Ocean Energy Management, the Bureau of Safety and Environmental Enforcement and the U.S. Geological Survey." The USGS along with BOEM and BSEE have been invited to testify. OCL informed USGS that they will not need testify even though it is shown on the upcoming hearing notifications . (2/11/2019)

On March 9, SWCASC university director Dr. Gregg Garfin will present at the Bisbee Science Cafe - The Changing Climate of Arizona and the Southwest U.S., hosted by the Bisbee Science Lab on the Fourth National Climate Assessment and relevant SWCASC research. SWCASC research is germane to many resource management activities in southeastern Arizona. Stakeholders for this event include resource managers (federal, state, local); urban planners, landowners, other researchers, tribes, and the general public. (2/8/19)

In March, NPR will release a recent interview with SWCASC university director, Dr. Gregg Garfin, about flood and drought in the southwestern U.S. Dr. Garfin is the lead author on the Southwest chapter of the Fourth National Climate Assessment and applied this expertise to explain how extreme precipitation and flooding are projected to increase, while droughts are also projected to become more frequent and severe in the southwestern U.S. (2/8/19)

In March, the USGS plans to announce a new USGS-authored paper titled "Investigation of recent decadal-scale cyclical fluctuations in salinity in the lower Colorado River". This study develops a conceptual model of the salinity cycles from time-series water quality,

streamflow, and precipitation data in both the lower and upper Colorado River Basins in order to provide Reclamation the ability to understand, anticipate, and manage future salinity cycles in the lower river. The paper has been accepted for publication in the *Journal of Environmental Management* and can be viewed online. A local news release is planned. (2/4/2019)

The USGS Water Resources Mission Area's Bob Holmes is representing USGS at regular Lower Ohio/Mississippi River flood coordination calls conducted by the US Army Corps of Engineers. When the Mississippi River at Cairo, IL rises above a stage of 48 feet, the USACE Standard Operating Procedure is to conduct coordination calls. The Tennessee Valley Authority (TVA) and the National Weather Service also participate on the coordination calls. The flows from the Ohio River, Upper Mississippi river, along with TVA flows from Kentucky and Barkley dams are all impacted. The coordination calls began on February 13th and will continue each Monday-Wednesday-Friday until mid-March. (2/15/19)

8-30 Day Outlook

The week of March 18th the 2020 Budget will be released. USGS will hold a stakeholders brief that week after the Department briefs the 2020 budget overview. (2/12/2019)

U.S. Bureau of Reclamation

NEW ITEMS

In March, Reclamation plans to issue a news release on the Title XVI Authorized Projects Funding Opportunity Announcement for Fiscal Year 2019. Through the Title XVI Water Reclamation and Reuse Program, Reclamation provides financial and technical assistance to local water agencies for the planning, design, and construction of water reclamation and reuse projects. (01/09/2019)

In early March, the Trinity River Restoration Program, Bureau of Reclamation, and Bureau of Land Management (federal co-lead agencies) plan to announce the Final Environmental Assessment and Finding of No Significant Impact for the Chapman Ranch Phase A Channel Rehabilitation Project. The purpose of the project is to increase salmon and steelhead habitat downstream of Lewiston Dam on the Trinity River in California. A news release is planned. (01/28/19)

On March 12-13, the Adaptive Management Program Annual Reporting meeting is planned in Phoenix, Arizona. The annual reporting meeting is held in accordance with the Long-Term Environmental and Management Plan Record of Decision and serves as a platform to discuss future experimental actions and previous research and monitoring. The meeting is open to the public and media. (02/04/2019)

On or around March 15, Reclamation plans to issue a Draft Environmental Assessment (EA) for public review regarding changes to recreational uses aimed at improving driver and

vehicle safety at a site along Lake Roosevelt, upstream of Grand Coulee Dam (Washington). A news release will be issued; media interest is expected. (02/19/2019)

On March 15, Reclamation plans to issue a Notice of Availability (NOA) for the Kachess Drought Relief Pumping Plant and Keechelus Reservoir-to-Kachess Reservoir Conveyance Final Environmental Impact Statement (FEIS). The FEIS will be filed with the Environmental Protection Agency and posted to Reclamation's website on March 6. A joint news release with the Washington State Department of Ecology is expected to be issued in conjunction with publication of the NOA. (02/04/2019)

On March 19, the Folsom Dam (California) Security and Law Enforcement Contract will be on the public agenda for the Sacramento County Board of Supervisors' meeting for approval to meet Reclamation's contract award date. Reclamation and the Sacramento County Sheriff's Department negotiated an agreement on January 24, 2019. Media attention is expected. (01/28/2019)

On March 20, Reclamation plans to attend the Lakehead Community Safety Meeting in Lakehead, California. Reclamation will provide a short update on the Shasta Dam and Reservoir Enlargement Project. Representatives from U.S. Forest Service, CalFire and the County will also provide updates on safety-related topics. Possible media interest. (02/25/2019)

Around March 22, Reclamation's Western Colorado Area Office plans to send out a news release announcing an award of a $1.65 million salinity grant to the Crawford Clipper Ditch Company, located in Crawford, Colorado. The grant will be used to replace approximately 34,204 feet of open earthen ditch and 1,525 feet of natural drainage ditch with buried pipeline. The purpose of the project is to prevent seepage and reduce salinity loading in the Colorado River Basin. (02/25/2019)

Around March 22, Reclamation plans to award a $6.5 million grant to the Utah Division of Wildlife Resources (UDWR) and a $5.6 million grant to the Larval Fish Laboratory at Colorado State University (CSU) to assist with the Upper Colorado River Endangered Fish Recovery Program. The grants will allow UDWR and CSU to continue assisting with implementation solutions to meet the water needs of growing western communities while also protecting endangered fish along the Colorado River basin. No press releases will be issued. (02/25/2019)

ONGOING ITEMS

On March 22, the Environmental Protection Agency plans to publish a notice in the *Federal Register* announcing Reclamation's release of the Draft Environmental Impact Statement (EIS) for the B.F. Sisk Dam (Safety of Dams) Corrective Action Project, in coordination with California's Department of Water Resources. A public comment period of 45 days will begin upon publication in the *Federal Register.* Two public meetings will be scheduled to gather comments. A news release announcing the Draft EIS will be issued; dates for the public meetings will be announced in a subsequent news release. (02/11/2019)

Upcoming USGS Publications

Title	Summary	Publication Outlet	Anticipated Publication Date
Can’t See the Random Forest for the Decision Trees: Selecting Predictive Models for Restoration Ecology	To assess the potential for applying machine learning in restoration ecology, USGS scientists evaluated the ability of eleven modeling frameworks to predict sagebrush seedling establishment following a wildfire and aerial seeding treatment. Given the high-resolution sampling and state of the art analytical techniques, the study's results highlight potential bounds to predictive accuracy in rehabilitation projects while showcasing the robust analytical power of machine learning approaches. Including these approaches in future rehabilitation projects may aid management strategies and refine monitoring approaches in an adaptive management strategy.	Restoration Ecology	week of Feb 25

Landscape and Organismal Factors Affecting Sagebrush-Seedling Transplant Survival After Megafire Restoration	In this study, USGS scientists evaluated survival of >3000 sagebrush seedlings outplanted on 12 patches totaling of 650 ha within a 113,000 ha burn area, and related the survival to species specific traits, and to landscape variables. The important traits and variables revealed in this study can inform monitoring of landscape-level treatments to help explain the success of outplantings and to strategically plan future restoration projects.	Restoration Ecology	week of Feb 25
To forage or flee: lessons from an elk migration near a protected area	The causes and consequences of shifting and variable elk migration patterns are still largely unknown, particularly for autumn migration. This study used five years of data from female elk which utilize a landscape managed by four federal agencies, the State of Wyoming, and private landowners, to identify the driving factors behind the initiation of fall migration in two groups of elk, one of which migrates to a protected area where hunting is prohibited.	Ecosphere	May
Local scale spatial patterns of freshwater mussels in the Upper Mississippi River	Native freshwater mussels, one of the most threatened faunal groups with high extinction risk, serve vital functions in freshwater systems and many species are economically important, making them key targets for conservation, restoration, and management. This study was designed to quantify where high quality mussel assemblages exist in the Upper Mississippi River so that future habitat and restoration projects can be designed to avoid or enhance native mussel assemblages.	Freshwater Science	May
The bee fauna of coastal Napatree Point and two inland sites in southern Rhode Island	Bees are important pollinators and essential to ecosystems, and there is evidence of pollinator declines. The bee faunas of coastal sites are relatively poorly known and the USGS surveys pollinator species so that their trends can be monitored. This study provides baseline survey information on bees at Napatree Point and the Great Swamp and Carter Preserves (all three are conservation areas in Rhode Island), and provides data useful for future monitoring of these bee faunas.	Northeastern Naturalist	April

Radiometric calibration of a non-imaging airborne spectrometer to measure the Greenland Ice Sheet surface	The research described in this paper outlines a method to deploy an airborne spectrometer to measure polar ice sheets to support Earth observation calibration/validation efforts and remote sensing algorithm development to retrieve visible to shortwave infrared (VSWIR) ice sheet surface optical properties. This research is significant because it will (1) support analysis of lidar penetration depth biases for NASA's ICESat-2 green laser altimeter using calibrated airborne VSWIR data products, and (2) provides the first assessment of Landsat 8 OLI's radiometric measurement performance over the Greenland Ice Sheet using airborne reference spectra	Atmospheric Measurement Techniques	2/22/2019
Widespread global peatland establishment and persistence over the last 130,000 years	This paper used records of peatlands buried by mineral sediments for the first-ever reconstruction of peat-forming wetlands for the past 130,000 years. Results showed that Northern peatlands expanded across high latitudes during warm periods and were buried during periods of glacial advance in northern latitudes. This is important as peat accumulation and burial represent a key long-term carbon storage mechanism in the earth system	Proceedings of the National Academy of the United States of America	2/25/2019
Mineral Commodity Summaries 2019	The 42nd annual Mineral Commodity Summaries identifies events, trends, and issues in the domestic and international minerals industries from 2018. The report is the most comprehensive source of mineral production data for the world. It includes statistics on 88 mineral commodities that are important to the U.S. economy and national security. The report identifies events, trends, and issues in the domestic and international minerals industries.	USGS	2/28/2019

Biases in the literature on direct wildlife mortality from energy development	This review paper compared the availability of mortality studies among energy sources, wildlife groups, and regions, and assessed comparability of mortality indicators measured. The authors suggest several areas of research to better measure and report direct mortality effects from energy sources. These findings are important as direct wildlife mortality from energy development receives substantial public and scientific attention, yet it was previously unclear whether rigorous comparisons of mortality among energy sources was possible.	Bioscience	3/4/2019
Louisiana Black Bear Post-delisting Monitoring Report	At the request of the USFWS, USGS will provide an annual post-delisting monitoring report for the Louisiana black bear. The report is intended to indicate whether tipping points have been reached which might trigger the re-listing of the species. The report provides an assessment of data collected at sites in Atchafalaya and Tensas River Basins, Louisiana from roughly 2002/2006 to 2017.	Cooperator publication for U.S. Fish and Wildlife Service	April
Measuring seedlings of a problem nonnative plant species in two sites at Petrified Forest National Park, Arizona to better understand how invasions start	Prickly Russian thistle (tumbleweed) is a nonnative plant species and being able to predict if and when it will pose a serious problem is valuable for land managers when determining management strategies. This study measured the emergence of prickly Russian thistle seedlings at Petrified Forest National Park, Arizona to better understand the factors that contribute to the success of this problematic nonnative plant species.	Invasive Plant Science and Management	April
Changes in Genetic Diversity and Differentiation in Red-cockaded Woodpeckers (Dryobates borealis) Over the Past Century	The endangered red-cockaded woodpecker has declined in the southeastern US due to loss of habitat and fire suppression. An earlier genetic study conducted during the 1990's found low genetic diversity. USGS and others examined temporal change in genetic diversity and structure using microsatellite and mitochondrial DNA to assess genetic variability before and after the population decline.	Ecology and Evolution	March

Book Chapter: Global status of trout and char: conservation challenges in the 21st century	Freshwater ecosystems are among the most threatened ecosystems in the world, and freshwater fishes may now be the most threatened group of vertebrates. As of 2017 only 54% of the total described species of trout and char have been assessed by the IUCN. Of the 67 species that have been assessed, an estimated 73% are threatened with global extinction. This book chapter is the first global assessment of status and conservation of freshwater trout and char.	American Fisheries Society Book	May
An assessment of plant species differences on cellulose oxygen isotopes from Kenai Peninsula, Alaska peatlands: implications for hydroclimatic reconstructions	This paper evaluated the cellulose oxygen isotopes from a broad range of peat-forming plants from the Kenai Peninsula to understand the relationship to modern peat water, precipitation, and to each other. Results of this study are important as peat cellulose oxygen isotopes are a valuable tool for reconstructing past hydroclimatic change.	Frontiers of Earth Science	TBD
Considerations for Globigerinoides ruber (white and pink) paleoceanography: comprehensive insights from a long-running sediment trap	This study shows that two chromotypes of the planktic foraminifer, Globigerinoides ruber, (pink and white) can be used interchangeably to reflect mean annual surface ocean conditions, that the established ratio of shell Mg/Ca increase per degree Celsius temperature increase is an overestimate, and that pH has an important influence on Mg/Ca-derived ocean temperature records in this species. This paper also synthesizes 10 years of paired measurements of oxygen isotopic composition of seawater and salinity to develop new linear relationships for the two parameters in the Gulf of Mexico.	Paleoceanography and Paleoclimatology	TBD

Hormones and pharmaceuticals in groundwater used as a source of drinking water across the United States	Hormones and pharmaceuticals were measured in groundwater used for drinking across the U.S. The vulnerability of groundwater to this type of contamination was concluded to be generally low, although vulnerability in areas of fractured rocks is higher than in other areas. Exposure to hormones and pharmaceuticals at the concentrations detected are unlikely to have adverse effects on human health, based on comparisons to human-health benchmarks.	Environmental Science and Technology	3/1/2019
Regional patterns of anthropogenic influences on streams and rivers in the conterminous U.S., from the early 1970s to 2012	This study summarized broad patterns of change in major influences on water quality that occurred across the U.S. since the early 1970s. A key finding related to urban influences was the growth of urban and low-density residential areas (exurban areas) coincident with an increase in U.S. population. There were several key findings related to agriculture influences, such as increases in crop production, fertilizer use, livestock concentration, and irrigation during 1974-2012.	Journal of Land Use Science	3/1/2019
Assessing the lead solubility potential of untreated groundwater, USA	This study developed a chemical equilibrium model to estimate the potential solubility of lead (LSP) in groundwater used for drinking and applied it to more than 8,300 groundwater sites in the U.S. The estimated LSP in untreated groundwater is highest in parts of the eastern and southeastern U.S. Groundwater with high LSP generally has low pH, and has low alkalinity and low phosphate concentrations that prevent formation of lead-bearing minerals that could remove lead from water.	Environmental Science and Technology	3/1/2019

The Earth Mapping Resources Initiative (Earth MRI): Mapping the Nation's Critical Mineral Resources	Overview of critical minerals mapping initiative (aka 3DEEP), a partnership between the USGS and the Association of American State Geologists. Describes the types of data to be collected (geologic mapping, geophysical surveys, and lidar topographic surveys). Combined, these data will improve the Nation's ability to assess areas with critical mineral potential as well as inform groundwater resource, geologic hazard, and energy resource issues	USGS Fact Sheet	2/25/2019
GIS and Data Tables for Focus Areas for Potential Domestic Nonfuel Sources of Rare Earth Elements	USGS data release representing Rare Earth Element focus areas for use in outlining areas of critical mineral potential. The product will be used as a guide to acquisition of new geologic maps, geophysical surveys, and lidar topographic data collections.	USGS Data Release	3/1/2019
Focus Areas for Data Acquisition for Potential Domestic Sources of Critical Minerals—Rare Earth Elements	Methods used in the companion Data Release "GIS and Data Tables for Focus Areas for Potential Domestic Nonfuel Sources of Rare Earth Elements". The report describes the most common mineral deposit types known to host rare earth element (REE) critical minerals as products and byproducts of mining. Ten mineral deposit types are described and prioritized for their potential of improving the Nation's supply of REEs if developed.	USGS Open-File Report	3/1/2019
Petroleum systems framework of significant new oil discoveries in a giant Cretaceous (Aptian–Cenomanian) clinothem in Arctic Alaska	This article provides the technical foundation of the recent USGS oil and gas resource assessment of the Nanushuk and Torok Formations, Alaska North Slope. These formations have yielded significant oil discoveries in recent years. The publication documents the regional distribution of the formations and discusses the potential for additional discoveries. (USGS Fact Sheet 2017-3088 describing the resource assessment was released in December 2017.)	Bulletin of the American Association of Petroleum Geologists	3/4/2019

Rare Earth Element Mineral Deposits in the United States	Review of the major types of mineral deposits that are known to contain rare earth element (REE) resources as products and byproducts. Provides a high-level description of the major minerals that contain the REEs and how they occur in nature. The report prioritizes the mineral deposit types most likely to contain sufficient REE content that if developed would significantly impact US domestic supplies. This prioritization will be used to emphasize the REE-bearing mineral deposit types that are the focus of the first phase of the critical minerals mapping initiative.	USGS Circular	3/29/2019
Arizona Hedgehog Cactus (Echinocereus triglochidiatus var arizonicus)—A Systematic Data Assessment in Support of Recovery	The Arizona hedgehog cactus is a federally listed cactus due to loss of habitat attributed to mining, mineral exploration and highway development. At the request of USFWS, USGS estimated survival and population growth rates and provided suggestions on how to improve the collection of Arizona hedgehog cactus monitoring data.	USGS Open-File-Report	March
Viability of razorback-flannelback sucker hybrids	Dams have segmented the Colorado River, altering habitat and isolating native fish populations such as the endangered Razorback Sucker which are uncommon and hybridization could increase due to limited mates. To understand the impacts of hybridization on recovery of Razorback Suckers, USGS and partners compared hatch success and larval survival of artificially spawned Razorback Sucker, Flannelmouth Sucker, and their hybrid to successfully spawn and rear all combinations.	Southwestern Naturalist	March
Seed bank community and soil texture relationship in a cold desert	USGS measured aboveground plant abundance and seed density of invasive cheatgrass and native species in three sites in Arches National Park that varied in soil texture, but were likely similar in climate. The study provided an improved understanding of what is in the seedbank to directly affect seeding efforts and predictions of what plant communities will return following disturbance, with implications for grazing and wildlife.	Journal of Arid Environments	February

Element Concentrations in Tree Swallows (Tachycineta bicolor) from the U.S. and Binational Great Lakes' Areas of Concern	USGS assessed nestling tree swallows to see if elemental concentrations were affecting the Beneficial Use Impairments of Great Lakes Areas of Concern. Mercury concentrations were at background levels at all sites; elevated, non-toxic cadmium concentrations were associated with industry; non-toxic lead concentrations were highest in industrialized areas; and elevated selenium concentrations associated with reduced avian reproduction were associated with pollution from a coal-fired power plant.	Archives of Environmental Contamination and Toxicology.	February
Rangeland live vegetation monitoring with satellite remote sensing: U.S. Geological Survey Administrative Report	USGS and partners developed a new satellite-based technology for high spatial and high frequency mapping of live vegetation in semi-arid and arid landscapes in Kenya's conservancies comprising the Northern Rangelands Trust (NRT). These technologies provide the needed mapping performance for management to protect iconic species such as elephants, rhinos, and cheetahs while supporting a pastoral population dependent on access to grazing areas for livestock.	USGS Open-File-Report	March
Lead in piscivorous raptors during breeding season in the Chesapeake Bay region of Maryland and Virginia, USA	USGS and others examined blood lead concentrations of osprey and bald eagles breeding at the largest estuary in the U.S., the Chesapeake Bay. Both of these species have increased in numbers since the ban on dichlorodiphenyltrichloroethane (DDT), this study aimed to see if adults or chicks could be negatively affected by another toxicant, lead, and attempts to determine sources of exposure by testing paint, sediment, and forage fish.	Environmental Toxicology and Chemistry	TBD

Diurnal habitat selection of migrating whooping cranes in the Great Plains	USGS assessed daytime habitat selection of endangered whooping cranes throughout the U.S. portion of their migration corridor. Whooping cranes selected wetland habitats and lowland grasslands over other landcover types evaluated, including croplands. Given recent droughts and the likelihood of future landscape changes, directing conservation efforts toward protecting and enhancing wetland habitats may prove critical for continued growth of the last remaining wild population of whooping cranes.	Avian Conservation and Ecology	February
Keeping the Crown of the Continent Connected: In Interagency US2 Connectivity Workshop Report	Existing data, research gaps, and a framework are identified to incorporate future research on wildlife migration corridors to support mitigation of fragmentation along US Highway 2 in Montana, a transportation corridor that has the potential to fragment one of the largest contiguous protected regions in the continental U.S. This report is a useful tool in managing and maintaining connectivity of terrestrial wildlife populations including grizzly bears, wolverine, lynx, elk, mule deer, and other species.	Cooperator Report - NPS	February
The past and future roles of competition and habitat in the range-wide occupancy dynamics of northern spotted owls	To assess how habitat loss and competition with barred owls have been implicated in the decline of threatened spotted owls, USGS assessed the relative importance of barred owl competition and habitat on the probability of spotted owls occupying sites within their range. In addition, they modeled the probability of spotted owls occupying habitat for the next 50 years based on a range of habitat conditions and barred owl removals. These results provide insights for strategies to increase spotted owl populations.	Ecological Applications	February

Wind erosion and dust from US drylands: a review of causes, consequences, and solutions in a changing world	Over 148 million acres in the U.S. (~64% managed by the federal government) have been identified as vulnerable to wind erosion, which removes topsoil, decreases soil fertility, damages crops and property, deposits soil on roadways, generates dust that can affect human health, and can indirectly affect regional water supplies by influencing mountain snowmelt. This study assessed the factors driving wind erosion and dust generation, the consequences, and potential strategies that could mitigate the effects.	Ecosphere	TBD
Early genetic outcomes of American black bear reintroductions in the Central Appalachians, USA	American black bears were extirpated from most of the Central Appalachians in the early 20th century and reintroductions were conducted during the 1990s. An assessment of the early genetic outcomes of bear reintroduction illustrates sustained isolation and small effective population size. Results may warrant continued genetic monitoring to determine if gene flow from neighboring populations is established.	Ursus	TBD
Using environmental DNA to extend the window of early detection for dreissenid mussels	In order to better assess if environmental DNA (eDNA) can extend the seasonal window for dreissenid mussel early detection beyond that of warmer seasons, USGS examined the applicability of eDNA tools when mussel abundance is low and reflective of a new introduction. This study adds to a growing body of research that demonstrates eDNA is a highly sensitive tool for dreissenid mussel surveillance in newly invaded waters and in seasons when the organisms are likely to be rare.	Management of Biological Invasions	February

Topographic drivers of flight altitude over large spatial and temporal scales	In order to better understand drivers of golden eagle flight patterns, researchers tracked the birds, listed as a fully protected species in California, within all five bird conservation regions in California. By analyzing nearly 200,000 flight locations and examining topographic features such as roughness and aspect in conjunction with temporal parameters, researchers developed a relatively simple predictive model to assist with conservation and management.	Auk	TBD
Landscape and organismal factors affecting sagebrush-seedling transplant survival after megafire restoration	To provide insight to guide future allocation of resources to maximize probability of post-fire sagebrush restoration success, USGS worked in close partnership with BLM to examine how biotic and abiotic factors contribute to differences in survival of sagebrush planted after the 2015 Soda Wildfire, Idaho. Survival of over 3,000 sagebrush seedlings spanning more than 1,000 acres were evaluated in relation to organismal traits and landscape factors.	Restoration Ecology	TBD
Assessing the Quality of America's Public Aeromagnetic Data	The United States is well covered by first-generation geophysical surveys, which provide a big picture of the distribution of subsurface rock types. However, many of the surveys flown are out of date and used dated technology. The article uses these historical data to prioritize regions for more detailed geophysical surveys to characterize potential critical mineral resources, and publishes those gaps in map form for the larger scientific community.	Eos	TBD

Modelling Riparian Restoration Impacts on the Hydrologic Cycle at the Babacomari Ranch, SE Arizona, USA	This paper describes coupling field experiments with surface and groundwater modelling to investigate the use of erosion control structures to augment shallow and deep aquifer recharge in SE Arizona rangelands. Findings demonstrate how erosion-control structures could impact all components of the annual water budget and provide support for potential watershed-wide gabion installation to increase total aquifer recharge. The Walton Family Foundation contributed to project funding and partners included the Babacomari Ranch, the Appleton-Whittell Research Ranch of the National Audubon Society, and the University of Arizona.	Journal of Water, Special Issue: Hydrologic Modelling for Water Resources and Basin Management	TBD

DRAFT

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service
Region 2 Weekly Report

Through 1 March, 2019

Media Contacts

Title/Issue	Anticipated Publication Date	Current Status
Hunting and Fishing at Hagerman National Wildlife Refuge / Luke Clayton	March 2019	Recorded radio show on hunting, fishing, and hunting rule changes at Hagerman National Wildlife Refuge. Scheduled to air on 18 commercial radio stations and public radio in north Texas. www.catfishradio.org www.ketr.org
Monarch migration and recovery efforts	Unknown	Dan Zak with the Washington Post spoke with FWS Biologist Rachel Williams on monarch work and recovery.
Recovery Plan Amendments	TBD	Abby Bora, Editor, Cedar Park/Leander Community Impact Newspaper is doing a story on the threatened and endangered species in the community and had some questions about the recovery plan amendments related to the Karst invertebrates.
CBS Sunday Morning	Feb 2019	Feature on restoration of American paddlefish in Caddo Lake on the Texas-Louisiana line involving Tishomingo National Fish Hatchery, Texas Fish and Wildlife Conservation Office and Texas Parks and Wildlife.

		https://www.cbsnews.com/news/nature-up-close-caddo-lake/
Winter Birding on Maxwell NWR/Huerfano World Journal/Sharon Niederman	February 7, 2019	Submitted to editor by author (Niederman) 2/4.
Arizona PBS	February 2019	Contacted Randy Van Haverbeke (AZFWCO) for an on-site interview at Lees Ferry (Colorado River, Grand Canyon). Questions focused on water conservation and native and nonnative aquatic species, including the endangered Humpback Chub. Randy responded on December 17th, 2018 and was interviewed along with staff from USGS-Grand Canyon Monitoring and Research Center.
Cronkite News at Arizona PBS	Continuing	Recorded TV interview regarding the Animal and Plant Health Inspection Service program that utilized the tamarisk leaf beetle for biological control of saltcedar in riparian areas and the effects it has had on the southwestern willow flycatcher. Flycatcher lead Greg Beatty was interviewed. Print edition continues to circulate in newspapers, including the Arizona Republic.
Cronkite News at Arizona PBS	TBD	Reporter contacted Alchesay Williams Creek National Fish Hatchery to ascertain the work of all three national fish hatcheries in AZ.

Book author Peter Christie	TBD	Seeks to interview retired SAC Nick Chavez on illegal trade in exotic pets. Declined. Referred to Amy Jonach in HQ.
Book author Larkin Powell	TBD	Seeks information on warbler and vireo and birding near Ft. Hood for book manuscript on birding in the Plains states.
Arizona Highways Magazine (Kathy Montgomery)	Fall/winter 2018	Writer is researching ocelots in Arizona and Arizona's possible contribution to species recovery. (Updated information regarding fatality of an Arizona ocelot is being provided to reporter.)
KGUN-9 ABC (Tucson)	1/25/2019	TV news attributed to FWS a trail camera photo taken of a jaguar in the Chiricahua Mountains, Arizona. (FWS was furloughed during this time frame and neither captured nor posted the photo, nor was aware of the photo). University of Arizona citizen science program partner was source of the photo, which FWS is seeking to obtain. Animal is likely a previously identified male residing in Dos Cabazas Mountains area; spot identification confirmation not yet obtained.
Jimmy Tobias, freelance writer	TBD	Reporter contacted FWS inquiring about the lesser prairie-chicken and if the FWS had provided a species status recommendation to DOI.
Dean Russell Columbia Journalism School	TBD	Mexican wolf recovery and cross fostering

Morning Edition AZ station KJZZ	TBD	Reporter interviewed NMESFO Environmental Contaminant biologist on origins of mercury in the environment.
KUT Austin	December 4, 2018	Trey Shaar, reporter for KUT Austin, contacted the FWS regarding the CBD Notice of Intent on the salado and georgetown salamanders for failure to designate critical habitat.
New Mexico Wildlife magazine (New Mexico Dept of Game and Fish)	Winter 2018	Published stories from two USFWS employees. http://magazine.wildlife.state.nm.us/sunrise-14089/ http://magazine.wildlife.state.nm.us/outwitting-the-fish/
Tenkara Angler	Winter 2018-19	Published story on Gila trout conservation with attending video. Pg 70. https://issuu.com/troutrageous1/docs/tenkara_angler_winter_2018-19
Texas Wildlife (Texas Wildlife Assoc.)	Feb 2019	Published a feature story on importance of private lands conservation, penned by Regional Partners of Fish and Wildlife Coordinator.
Big Blend Magazines/ NationalParkTraveling.com	Feb 2019	Big Blend Video and Big Blend Radio interview with Wildlife Refuge Specialist Joshua Smith about plants and wildflowers on the Buenos Aires NWR. https://nationalparktraveling.com/listing/wildflower-wonderland-in-buenos-aires-nwr/
Deer & Deer Hunting magazine	April 2019	Unforgettable youth deer hunt at Sequoyah National Wild Refuge

Environmental Impact Statements - EIS Briefings

Nothing to report

Week Ahead Schedule of Meetings, Hearings, and Travel
Nothing significant to report.

Immediate Announcements and Actions (within the next 14 days)
Nothing significant to report.

15-60 Day Look Ahead
Nothing significant to report.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is February 2019. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

Lesser Prairie-Chicken litigation - On February 14, 2019, the Center for Biological Diversity, Defenders of Wildlife and Wild Earth Guardians, sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to make a 12-month finding for the lesser prairie-chicken.

Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land

Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media required but not yet completed. Target date for submitting to the *Federal Register* being re-evaluated in light of furlough delays. Notice of intent to sue over delay was submitted by Center for Biological Diversity during furlough.

Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle 12-month finding – FWS has reached an agreement with the American Stewards of Liberty, the Independent Petroleum Association of America and Osage Producers Association (Plaintiffs) to publish a 12-month finding for the American burying beetle no later than April 30, 2019. The American burying beetle is currently listed as endangered and is known to have occurred in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or

not it provides substantial information warranting a more in-depth 12-month status review. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Other Items of Note

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts (CPA) has applied to the Fish and Wildlife Service (Service) for an enhancement of survival (EOS) permit pursuant to the Endangered Species Act (ESA). The permit application includes a draft candidate conservation agreement with assurances (CCAA) for the dune sagebrush lizard (DSL) in west Texas and covers Andrews, Gaines, Winkler, Ward, Ector and Crane counties in Texas. The CCAA, and associated permit, would authorize incidental take resulting from activities covered by the CCAA (e.g., oil and gas, sand mining, renewable energy, agriculture and ranching activities) as well as incidental take resulting from actions taken to avoid, minimize, and offset disturbance of DSL habitat that result from the covered activities. If approved the EOS and CCAA would be in effect for 30 years. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*.

[UPDATE] - Proposed Oil & Gas Industry Conservation Plan (ICP) extension - The FWS is proposing an amendment to extend the American burying beetle ICP application timeframe by five years. A previous amendment extended the ICP sign-up period for 3 years (until May 20, 2019) and this amendment would extend the sign-up period for an additional 5 years (until May 20, 2024). The ICP has been an effective way to streamline oil and gas industry compliance with the ESA while protecting federally-listed species. The current ICP is only open for new applications through May 20, 2019, and incidental take authorized through the ICP is unlikely to approach the 32,234 acres allowed by that date. The change in timelines is the only proposed revision to the ICP, EA, and BO. There are no proposed changes to the federally listed species or area covered, and no increases in the total amount of incidental take provided through this ICP amendment. This proposed extension of the ICP is likely to be supported by the oil and gas industry because it streamlines the permitting process. The ICP has also supported habitat protection for the endangered American burying beetle and contributed towards recovery of the

species. The Notice is expected to publish in early March. Outreach, including issuing a news release to media, congressionals and industry, as well as posting information on social media is planned to occur at time of publication in the *Federal Register*.

Georgetown and Salado Salamanders litigation - On December 4, 2018, the Center for Biological Diversity filed a Notice of Intent to sue the U.S. Fish and Wildlife Service for failing to designate critical habitat in central Texas for the Georgetown and Salado salamanders.

Peppered chub Species Status Assessment (SSA) – The FWS is finalizing a SSA report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The draft SSA was reviewed by interested partners and sent to several peer reviewers; however, we did not receive any peer reviewer comments. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The

plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Release of the announcement of the plan has been repeatedly delayed pending more thorough reviews of the communications package (now complete). R2 seeks to announce in February.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

National Wildlife Refuge Actions

[NEW] Buenos Aires National Wildlife Refuge (AZ) hosted the annual "Women's Javelina Hunt" sponsored by the Arizona Chapter of Safari Club International, The Arizona Game and Fish Department, Arizona Mule Deer Organization, and the Becoming an Outdoor Woman (BOW) initiative. The group used our newly established group campsite 2/14 -18/ 2019. The weather was less than ideal for javelina hunting but a couple participants managed to harvest animals.

Laguna Atascosa National Wildlife Refuge (TX) is a main partner with the Gladys Porter Zoo in Brownsville, Texas in hosting the annual Ocelot Conservation Day community event, held this year on March 3, 2019. Taking place at the Zoo, the well-attended event offers hands-on family friendly activities, speakers, educational outreach booths, the Ocelot 5K Run, and live captive ambassador ocelots from the Texas Zoo. The day educates the public about the plight and recovery of the endangered Ocelot. Other partners include the Texas Zoo and Friends of Laguna Atascosa.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

A short video documenting captive spawning of threatened Apache trout has gone viral on Facebook, reaching nearly 500,000 views. The video shows conservation workers from Alchesay Williams Creek National Fish Hatchery, Arizona Fish and Wildlife Conservation Office and White Mountain Apache Tribe collecting and fertilizing Apache trout eggs, as well as collecting ovarian fluid for health assessment by staff at the Southwestern Native Aquatic Resources and Recovery Center.

Migratory Birds

Issued a 30-year eagle incidental take permit to Osage Wind, LLC Dec 20th, and the final EA/FONSI should be posted to the website in the next couple of weeks. Currently waiting on 508 compliance and a potential furlough.

Science Applications

Nothing significant to report.

Wildlife and Sport Fish Restoration

Nothing significant to report.

Native American Programs

Arizona Ecological Services Office will hold its annual Arizona Inter-tribal coordination meeting ca. April 2-3.

DEPARTMENT OF THE INTERIOR
U.S. Fish and Wildlife Service
Region 2 Weekly Report

Through 8 March, 2019

Media Contacts

Title/Issue	Anticipated Publication Date	Current Status
Hunting and Fishing at Hagerman National Wildlife Refuge / Luke Clayton	March 2019	Recorded radio show on hunting, fishing, and hunting rule changes at Hagerman National Wildlife Refuge. Scheduled to air on 18 commercial radio stations and public radio in north Texas. www.catfishradio.org www.ketr.org
Hurricane Harvey Recovery activities	March 9, 2010	Jessica Priest, Reporter for Victoria Advocate in Texas is doing a story on Hurricane Recovery based on a FWS News Release
Monarch migration and recovery efforts	Unknown	Dan Zak with the Washington Post spoke with FWS Biologist Rachel Williams on monarch work and recovery.
Kemp's ridley sea turtle habitat conservation	March 7, 2019	Branden Gibbons with Rivard Report requests comment from FWS on conservation lands on Padre Island helping Kemp's ridley sea turtle. Comment provided.
Recovery Plan Amendments	TBD	Abby Bora, Editor, Cedar Park/Leander Community Impact Newspaper is doing a story on the threatened and endangered species in the community and had some questions about the recovery plan

		amendments related to the Karst invertebrates.
Cronkite News at Arizona PBS	Continuing	Recorded TV interview regarding the Animal and Plant Health Inspection Service program that utilized the tamarisk leaf beetle for biological control of saltcedar in riparian areas and the effects it has had on the southwestern willow flycatcher. Flycatcher lead Greg Beatty was interviewed. Print edition continues to circulate in newspapers, including the Arizona Republic.
Cronkite News at Arizona PBS	TBD	Reporter contacted Alchesay Williams Creek National Fish Hatchery to ascertain the work of all three national fish hatcheries in AZ.
Book author Peter Christie	TBD	Seeks to interview retired SAC Nick Chavez on illegal trade in exotic pets. Declined. Referred to Amy Jonach in HQ.
Book author Larkin Powell	TBD	Seeks information on warbler and vireo and birding near Ft. Hood for book manuscript on birding in the Plains states.
Jimmy Tobias, freelance writer	TBD	Reporter contacted FWS inquiring about the lesser prairie-chicken and if the FWS had provided a species status recommendation to DOI.

Dean Russell Columbia Journalism School	TBD	Mexican wolf recovery and cross fostering
Morning Edition AZ station KJZZ	TBD	Reporter interviewed NMESFO Environmental Contaminant biologist on origins of mercury in the environment.
Tenkara Angler	Winter 2018-19	Published story on Gila trout conservation with attending video. Pg 70. https://issuu.com/troutrageous1/docs/tenkara_angler_winter_2018-19
Deer & Deer Hunting magazine	April 2019	Unforgettable youth deer hunt at Sequoyah National Wild Refuge

Environmental Impact Statements - EIS Briefings
Nothing to report

Week Ahead Schedule of Meetings, Hearings, and Travel
Nothing significant to report.

Immediate Announcements and Actions (within the next 14 days)
Nothing significant to report.

15-60 Day Look Ahead
Nothing significant to report.

Upcoming Workshops & Meetings
Nothing significant to report.

Endangered Species Act Recovery Actions

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is February 2019. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

Lesser Prairie-Chicken litigation - On February 14, 2019, the Center for Biological Diversity, Defenders of Wildlife and Wild Earth Guardians, sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to make a 12-month finding for the lesser prairie-chicken.

Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media required but not yet completed. Target date for submitting to the *Federal Register* being re-evaluated in light of furlough delays. Notice of intent to sue over delay was submitted by Center for Biological Diversity during furlough.

Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle 12-month finding – FWS has reached an agreement with the American Stewards of Liberty, the Independent Petroleum Association of America and Osage Producers Association (Plaintiffs) to publish a 12-month finding for the American burying beetle no later than April 30, 2019. The American burying beetle is currently listed as endangered and is known to have occurred in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Other Items of Note

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts (CPA) has applied to the Fish and Wildlife Service (Service) for an enhancement of survival (EOS) permit pursuant to the Endangered Species Act (ESA). The permit application includes a draft candidate conservation agreement with assurances (CCAA) for the dune sagebrush lizard (DSL) in west Texas and covers Andrews, Gaines, Winkler, Ward,

Ector and Crane counties in Texas. The CCAA, and associated permit, would authorize incidental take resulting from activities covered by the CCAA (e.g., oil and gas, sand mining, renewable energy, agriculture and ranching activities) as well as incidental take resulting from actions taken to avoid, minimize, and offset disturbance of DSL habitat that result from the covered activities. If approved the EOS and CCAA would be in effect for 30 years. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*.

[UPDATE] - Proposed Oil & Gas Industry Conservation Plan (ICP) extension - The FWS is proposing an amendment to extend the American burying beetle ICP application timeframe by five years. A previous amendment extended the ICP sign-up period for 3 years (until May 20, 2019) and this amendment would extend the sign-up period for an additional 5 years (until May 20, 2024). The ICP has been an effective way to streamline oil and gas industry compliance with the ESA while protecting federally-listed species. The current ICP is only open for new applications through May 20, 2019, and incidental take authorized through the ICP is unlikely to approach the 32,234 acres allowed by that date. The change in timelines is the only proposed revision to the ICP, EA, and BO. There are no proposed changes to the federally listed species or area covered, and no increases in the total amount of incidental take provided through this ICP amendment. This proposed extension of the ICP is likely to be supported by the oil and gas industry because it streamlines the permitting process. The ICP has also supported habitat protection for the endangered American burying beetle and contributed towards recovery of the species. The Notice is expected to publish in early March. Outreach, including issuing a news release to media, congressionals and industry, as well as posting information on social media is planned to occur at time of publication in the *Federal Register*.

Georgetown and Salado Salamanders litigation - On December 4, 2018, the Center for Biological Diversity filed a Notice of Intent to sue the U.S. Fish and Wildlife Service for failing to designate critical habitat in central Texas for the Georgetown and Salado salamanders.

Peppered chub Species Status Assessment (SSA) – The FWS is finalizing a SSA report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The draft SSA was reviewed by interested partners and sent to several peer reviewers; however, we did not receive any peer reviewer comments. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike,

Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Release of the announcement of the plan has been repeatedly delayed pending more thorough reviews of the communications package (now complete). R2 seeks to announce in February.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed

critical habitat designation. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

National Wildlife Refuge Actions

[NEW] Anahuac National Wildlife Refuge (TX) coordinated with Sabine National Wildlife Refuge (LA) to increase wildlife observation opportunities on Anahuac NWR while promoting healthier habitat conditions. Using equipment loaned by Sabine NWR, Anahuac staff cleared 16 acres of dense vegetation within a popular auto tour loop and photography area. The staff were able to remove thick green stands of the invasive plant Phragmites, and remove the nuisance plant cattail. Clearing the vegetation increased photography opportunities and wildlife observation access, in addition to encouraging growth of more desirable wetland habitat.

[NEW] On Saturday, February 23, staff and volunteers of Anahuac National Wildlife Refuge (TX) joined outdoor recreation partners in providing hands-on activities and outreach for the 2019 Wildlife and Woodland Expo Spring Fling held by Texas A&M Forest Service in Conroe, Texas. The event was a huge success and drew an estimated 2,000 multicultural local visitors ranging from families, youth, to adults. Over 770 visitors stopped at the Anahuac National Wildlife Refuge booth. Anahuac staff and volunteers of the Friends of Anahuac National Wildlife Refuge encouraged families to participate in the Refuge’s local outdoor recreation opportunities, taught children and adults skills for wildlife observation, and shared wildlife tips regarding venomous and nonvenomous snake identification.

Buenos Aires National Wildlife Refuge (AZ) hosted the annual “Women’s Javelina Hunt” sponsored by the Arizona Chapter of Safari Club International, The Arizona Game and Fish Department, Arizona Mule Deer Organization, and the Becoming an Outdoor Woman (BOW)

initiative. The group used our newly established group campsite 2/14 -18/ 2019. The weather was less than ideal for javelina hunting but a couple participants managed to harvest animals.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

A short video documenting captive spawning of threatened Apache trout has gone viral on Facebook, reaching nearly 500,000 views. The video shows conservation workers from Alchesay Williams Creek National Fish Hatchery, Arizona Fish and Wildlife Conservation Office and White Mountain Apache Tribe collecting and fertilizing Apache trout eggs, as well as collecting ovarian fluid for health assessment by staff at the Southwestern Native Aquatic Resources and Recovery Center.

Migratory Birds

Issued a 30-year eagle incidental take permit to Osage Wind, LLC Dec 20, and the final EA/FONSI should be posted to the website in the next couple of weeks. Currently waiting on 508 compliance and a potential furlough.

Science Applications

Nothing significant to report.

Wildlife and Sport Fish Restoration

Nothing significant to report.

Native American Programs

Arizona Ecological Services Office will hold its annual Arizona Inter-tribal coordination meeting ca. April 2-3.

Endangered Species Act Recovery Actions

Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is February 2019. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

Lesser Prairie-Chicken litigation - On February 14, 2019, the Center for Biological Diversity, Defenders of Wildlife and Wild Earth Guardians, sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to make a 12-month finding for the lesser prairie-chicken.

Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media required but not yet completed. Target date for submitting to the *Federal Register* being re-evaluated in light of furlough delays. Notice of intent to sue over delay was submitted by Center for Biological Diversity during furlough.

Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle 12-month finding – FWS has reached an agreement with the American Stewards of Liberty, the Independent Petroleum Association of America and Osage Producers Association (Plaintiffs) to publish a 12-month finding for the American burying beetle no later than April 30, 2019. The American burying beetle is currently listed as endangered and is known to have occurred in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Other Items of Note

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts (CPA) has applied to the Fish and Wildlife Service (Service) for an enhancement of survival (EOS) permit pursuant to the Endangered Species Act (ESA). The permit application includes a draft candidate conservation agreement with assurances (CCAA) for the dune sagebrush lizard (DSL) in west Texas and covers Andrews, Gaines, Winkler, Ward, Ector and Crane counties in Texas. The CCAA, and associated permit, would authorize incidental take resulting from activities covered by the CCAA (e.g., oil and gas, sand mining, renewable energy, agriculture and ranching activities) as well as incidental take resulting from actions taken to avoid, minimize, and offset disturbance of DSL habitat that result from the covered activities. If approved the EOS and CCAA would be in effect for 30 years. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*.

[UPDATE] - Proposed Oil & Gas Industry Conservation Plan (ICP) extension - The FWS is proposing an amendment to extend the American burying beetle ICP application timeframe by five years. A previous amendment extended the ICP sign-up period for 3 years (until May 20, 2019) and this amendment would extend the sign-up period for an additional 5 years (until May 20, 2024). The ICP has been an effective way to streamline oil and gas industry compliance with the ESA while protecting federally-listed species. The current ICP is only open for new applications through May 20, 2019, and incidental take authorized through the ICP is unlikely to approach the 32,234 acres allowed by that date. The change in timelines is the only proposed revision to the ICP, EA, and BO. There are no proposed changes to the federally listed species or area covered, and no increases in the total amount of incidental take provided through this ICP amendment. This proposed extension of the ICP is likely to be supported by the oil and gas industry because it streamlines the permitting process. The ICP has also supported habitat protection for the endangered American burying beetle and contributed towards recovery of the species. The Notice published in the Federal Register on March 14, 2019. Outreach, including issuing a news release to media, congressionals and industry, as well as posting information on social media occurred at time of publication in the *Federal Register*.

Georgetown and Salado Salamanders litigation - On December 4, 2018, the Center for Biological Diversity filed a Notice of Intent to sue the U.S. Fish and Wildlife Service for failing to designate critical habitat in central Texas for the Georgetown and Salado salamanders.

Peppered chub Species Status Assessment (SSA) – The FWS is finalizing a SSA report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The draft SSA was reviewed by interested partners and sent to several peer reviewers; however, we did not receive any peer reviewer comments. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Release of the announcement of the plan has been repeatedly delayed pending more thorough reviews of the communications package (now complete). R2 seeks to announce in February.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for

ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

National Wildlife Refuge Actions

[NEW] Anahuac National Wildlife Refuge (TX) coordinated with Sabine National Wildlife Refuge (LA) to increase wildlife observation opportunities on Anahuac NWR while promoting healthier habitat conditions. Using equipment loaned by Sabine NWR, Anahuac staff cleared 16 acres of dense vegetation within a popular auto tour loop and photography area. The staff were able to remove thick green stands of the invasive plant Phragmites, and remove the nuisance plant cattail. Clearing the vegetation increased photography opportunities and wildlife observation access, in addition to encouraging growth of more desirable wetland habitat.

[NEW] On Saturday, February 23, staff and volunteers of Anahuac National Wildlife Refuge (TX) joined outdoor recreation partners in providing hands-on activities and outreach for the 2019 Wildlife and Woodland Expo Spring Fling held by Texas A&M Forest Service in Conroe, Texas. The event was a huge success and drew an estimated 2,000 multicultural local visitors ranging from families, youth, to adults. Over 770 visitors stopped at the Anahuac National Wildlife Refuge booth. Anahuac staff and volunteers of the Friends of Anahuac National Wildlife Refuge encouraged families to participate in the Refuge's local outdoor recreation opportunities, taught children and adults skills for wildlife observation, and shared wildlife tips regarding venomous and nonvenomous snake identification.

Buenos Aires National Wildlife Refuge (AZ) hosted the annual "Women's Javelina Hunt" sponsored by the Arizona Chapter of Safari Club International, The Arizona Game and Fish Department, Arizona Mule Deer Organization, and the Becoming an Outdoor Woman (BOW) initiative. The group used our newly established group campsite 2/14 -18/ 2019. The weather was less than ideal for javelina hunting but a couple participants managed to harvest animals.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental

Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

A short video documenting captive spawning of threatened Apache trout has gone viral on Facebook, reaching nearly 500,000 views. The video shows conservation workers from Alchesay Williams Creek National Fish Hatchery, Arizona Fish and Wildlife Conservation Office and White Mountain Apache Tribe collecting and fertilizing Apache trout eggs, as well as collecting ovarian fluid for health assessment by staff at the Southwestern Native Aquatic Resources and Recovery Center.

Migratory Birds

Issued a 30-year eagle incidental take permit to Osage Wind, LLC Dec 20th, and the final EA/FONSI should be posted to the website in the next couple of weeks. Currently waiting on 508 compliance and a potential furlough.

Science Applications

Nothing significant to report.

Wildlife and Sport Fish Restoration

Nothing significant to report.

Native American Programs

Arizona Ecological Services Office will hold its annual Arizona Inter-tribal coordination meeting ca. April 2-3.

Executive Summary

Conserving the Nature of America
The U.S. Fish and Wildlife Service

The U.S. Fish and Wildlife Service (Service) is the oldest Federal conservation agency, tracing its lineage back to 1871, and the only agency in the Federal government whose primary responsibility is management of fish and wildlife for the American public. The Service helps ensure a healthy environment for people by providing opportunities for Americans to enjoy the outdoors and our shared natural heritage.

The first predecessor of the Service was the U.S. Fish Commission, which was established on February 9, 1871 under the Department of Commerce, and renamed the Bureau of Fisheries on July 1, 1903. The second predecessor bureau was the Office of Economic Ornithology and Mammalogy established in 1885 under the Department of Agriculture. In 1896, it was renamed the Division of Biological Survey and in 1905 renamed again the Bureau of Biological Survey. The Biological Survey was responsible for the protection of all non-fish species in the U.S. In 1900, the Biological Survey pioneered the Federal role in wildlife law enforcement with the passage of the *Lacey Act*. In 1903, as a result of an executive order by President Theodore Roosevelt, the Biological Survey began to administer the Pelican Island Bird Reservation, the first unit of what has become the modern National Wildlife Refuge System.

Kids ice fishing day at Genoa National Fish Hatchery. Credit: USFWS

In 1939 the Bureau of Biological Survey and the Bureau of Fisheries were merged and transferred to the Department of the Interior. One year later, the merged Bureau officially became the U.S. Fish and Wildlife Service.

Although at least three departments governed the bureau and many name changes occurred, the Service's mission has remained remarkably consistent for the last 148 years. The Service mission is to work with others to conserve, protect, and enhance fish, wildlife, plants and their habitats for the continuing benefit of the American people. A wide range of Federal laws and executive orders provide the Service with principal trust responsibility to protect and conserve migratory birds, threatened and endangered species, certain marine mammals, and inter-jurisdictional fisheries. This mission clearly contemplates fostering access to wildlife refuges in order to educate and inspire the public.

The Service believes connecting Americans directly with the Nation's wildlife heritage is a priority. To accomplish this goal, the Service will continue to make the wildlife refuges more welcoming to new and diverse audiences, and offer new hunting and fishing programs which serve the dual purpose of conservation and recreation.

The 2016 *National Survey of Fishing, Hunting, and Wildlife-Associated Recreation*, indicated that 101.6 million Americans, 38 percent of the U.S. population 16 years old and older, enjoyed some form of fishing, hunting, or wildlife-associated recreation. The report also noted that outdoor recreation is a huge contributor to our Nation's economy, spurring annual expenditures estimated at $156.3 billion. This

spending creates thousands of jobs, supports countless local communities and their economies, and provides vital funding for conservation.

The Service's National Wildlife Refuge System plays an essential role in providing outdoor recreation opportunities to the American public and the associated economic benefits to local communities. In FY 2018, over 55 million visitors to National Wildlife Refuges hunted, fished, observed or photographed wildlife, or participated in environmental education or interpretation on a refuge. The most popular visitor activities were use of our trails, wildlife auto routes, and wildlife observation programs. These activities help National Wildlife Refuges serve as an economic engine for local communities, helping to annually support 37,000 jobs and $2.4 billion in visitor expenditures according to the Service's latest *Banking on Nature* report, published in 2013.

American sportsmen and sportswomen are the backbone of the North American Model of Wildlife Conservation that is admired around the globe. The 2020 budget sustains this commitment and also emphasizes the recovery of species, land health, and leveraged conservation partnerships. The budget invests in expanding access for sportsmen and sportswomen, supports the Administration's initiative to better protect habitat and research migration corridors for iconic North American big game species, and maintains support for important coastal and wetland restoration programs like the North American Wetlands Conservation Act.

Waterfowl hunting provides one important example of a traditional outdoor way of life. The Service provides opportunities for waterfowl hunting experiences across the Nation, and it ensures that this form of recreation can be practiced for years to come through sustainable harvests. Of the 567 wildlife refuges and 38 Wetland Conservation Districts, 377 are open to some type of hunting, and 312 are open to fishing. Over 2.4 million hunters and over 7.3 million recreational anglers visited these refuges last year.

A birding tour participant focuses in on a perched tree swallow. Credit: Larry Dean/USFWS

Of all the wildlife in the United States, birds attract the biggest following. According to the *2016 National Survey of Fishing, Hunting, and Wildlife-Associated Recreation*, there were 45 million birdwatchers 16 years of age and older in the United States. Wildlife refuges provide wonderful places to observe birds, especially during major bird festivals that coincide with spring or fall migrations.

The Service is also responsible for implementing some of our Nation's most important and foundational environmental laws, such as the *Endangered Species Act* (ESA), *Migratory Bird Treaty Act* (MBTA), *Marine Mammal Protection Act, Lacey Act*, and international agreements such as the *Convention on International Trade in Endangered Species* (CITES).

While the Service holds the responsibility for conserving trust resources across broad landscapes, its work is impossible without vital partnerships with States, Tribes, and others to conserve natural resources. One area of particular focus for the Service is its partnerships with landowners. The Service invests in keeping landowners on their land, and preserving working landscapes for the benefit of plants, wildlife, and agriculture, ranching, timber and other traditional land uses. In many cases, species will greatly benefit from appropriately managed private lands. The Service has several tools to help private landowners be good

stewards of their lands, and has worked with landowners across the west to preserve open spaces. We have provided funding for habitat restoration and species recovery projects, such as the Malpai Borderlands project in Arizona and New Mexico to encourage ranching and other traditional land uses that will sustain the nature of the west for future generations. The group's efforts on behalf of the jaguar, the leopard frog, the long-nosed bat, and the ridge-nosed rattlesnake, among others, have resulted in a more secure future for those species as well as for the landowners whose livelihoods help maintain habitats.

The Service's Organization

The Service has headquarters in Washington, D.C. and Falls Church, Virginia, with regional offices located across the country and over 700 field stations. These stations include 567 units of the NWRS; seven National Monuments; 80 Ecological Services Field Stations; 70 National Fish Hatcheries; one historical National Fish Hatchery (D.C. Booth in South Dakota); eight Fish Health Centers; seven Fish Technology Centers; 51 Fisheries Offices; and waterfowl production areas in 209 counties managed within 38 Wetland Management Districts and 50 Coordination Areas. The Service works with diverse partners to accomplish its conservation mission, including other Federal agencies, State and local governments, Tribes, international organizations, and private organizations and individuals.

The Director reports to the Department of the Interior's Assistant Secretary for Fish, Wildlife and Parks, and has direct line authority over headquarters and the Regional Directors. Headquarter-based Assistant Directors provide policy, program management, and administrative support to the Director. The Regional Directors guide policy and program implementation, supervising the field structures, and coordinating activities with partners.

In 2019, the Service consolidated administrative functions into a single organization. The new Joint Administrative Operations (JAO), led by the Assistant Director for Management and Administration, fulfills the Service's needs for administrative support, including human resources, contracting, finance, safety, and general services, at a reduced cost to the American taxpayer. In 2020, the Service proposes to restructure subactivities within General Operations to align with the JAO and deliver shared services to regional and field station managers.

Over many decades, the Department of the Interior experienced new bureaus becoming established on an ad hoc basis with their own unique regional organizations. This ultimately resulted in a complicated series of 49 regional boundaries among 8 bureaus. This complexity led to the situation where bureau regional leadership was often focused on different geographic areas, did not have adequate and shared understanding of the needs and perspectives of regional stakeholders, and opportunities to share administrative capacity across bureaus were difficult to recognize and implement. Further, members of the public were often frustrated by problems in inter-bureau decision making where uncoordinated timelines and processes could lead to unnecessarily long delays in reaching a decision. The Department's reorganization is focused on making improvements across each of these areas.

The 2020 budget request for the Service includes $5.7 million to support the reorganization of the Department of the Interior. After working closely with stakeholders across the country on options to consolidate Interior's 49 different regions into common regions, on August 22, 2018, the Department announced the designation of Interior's 12 new unified regions. As a result of Tribal consultation, BIA, BIE, and the Office of the Special Trustee for American Indians will not realign their regional field structures.

Establishing unified regions across bureaus is the cornerstone of the reforms designed to improve Interior's service delivery to the public. Within each unified region, bureaus will focus work on the same resources and constituents and improve coordination across the Department. For the public, fewer regions make it easier to do business with Interior, particularly when the public interacts with several bureaus or jurisdictions.

As part of the reorganization reforms, Interior will relocate some bureau headquarters functions out West where the preponderance of Interior's assets and acres are located. The Service is currently assessing what headquarters functions could be delivered more effectively out West and identifying staff and functions to

be moved. Interior will leverage the unified regional structure to improve and streamline business operations using shared services and best practices across the Department, focusing primarily on human resources, information technology, and acquisition services. Work is underway in 2019 to plan implementation, conduct analysis, and identify areas for collaboration within the new regions.

[1] -$31.008 million CESCF and -$5.324 million Land Acquisition

Overview

The 2020 President's Budget request for the Service totals $2.8 billion, including current appropriations of $1.3 billion. The Budget also includes $1.5 billion available under permanent appropriations, most of which will be provided directly to States for fish and wildlife restoration and conservation. The Service estimates staffing will equal 8,370 full time equivalents (FTE) in 2020.

The Service's priorities reflect those of the Acting Secretary of the Interior, and provide the foundation for the Service's budget request.

1. Create a conservation stewardship legacy by expanding access to DOI lands for hunting and fishing;
2. Sustainably develop our energy & natural resources;
3. Restore trust & be a good neighbor;
4. Ensure Tribal sovereignty means something;
5. Increase revenues to support DOI and national interests;
6. Protect our people and the border;
7. Strike a regulatory balance;
8. Modernize our infrastructure; and
9. Reorganize DOI for the next 100 years.

Create a Conservation Stewardship Legacy

The Service's National Wildlife Refuge System embodies the Department's commitment to conserving our lands and waters and our Nation's commitment to conserving fish and wildlife for all Americans and future generations. With 567 refuges in all U.S. States and Territories, the Refuge System provides lands and waters for thousands of species of wildlife and plants, sanctuary for hundreds of threatened and endangered species, and secure spawning areas for economically and recreationally important native fish. Refuges are home to over 700 migratory bird species, 220 mammal species, 250 reptile and amphibian species, and more than 1,000 fish species, and offers protection to over 380 threatened or endangered plants or animals.

Another program that supports this Department goal is the Ecological Services Recovery Program, which strives to recover endangered and threatened species. The Service plays a vital role in guiding the recovery planning process, and in facilitating, supporting, and monitoring the implementation of recovery actions by the Service and others. The Service focuses on the Endangered Species Act (ESA) mandates that are inherently Federal, including development of recovery plans. Recovery plans are developed collaboratively with interested partners. Recovery plans may address multiple species and identify specific recovery tasks, establish downlisting and delisting criteria, and provide timetables and cost estimates. The Service works with other DOI bureaus, Federal agencies, States and other stakeholders to ensure all recovery plans have objective and measurable recovery criteria and address 5-year status review recommendations on the national workplan over the next three years. With proposed 2020 Recovery funding, the Service anticipates proposing or finalizing 36 delisting or downlisting rules.

Reducing the Regulatory Burden

The Service delivers conservation for imperiled species through its administration of the ESA, which provides a suite of voluntary tools for private landowners to undertake conservation practices for the benefit of species. The Service is committed to strengthening delivery of conservation under the ESA by making it easier to work with the agency on proactive conservation efforts for at-risk and threatened and endangered species.

The Service is committed to providing timely review and recommendations to facilitate decisions on proposed infrastructure, energy, and other development projects that contribute to job creation and economic growth, while ensuring that impacts to fish, wildlife, and their habitats are avoided, minimized or otherwise appropriately mitigated. The Service administers a variety of environmental review processes under various authorities. To ensure that the agency's regulations and policies are clear, effective, and do not pose unnecessary regulatory burden upon the public, the Service is reviewing current ESA regulations.

Expanding Outdoor Recreation and Access

There are 567 refuges and 38 wetland management districts in the National Wildlife Refuge System. Of these, 377 are open to hunting and 312 are open to fishing. The 2020 budget request prioritizes activities that support conservation stewardship in alignment with Secretarial Order 3347, *Conservation Stewardship and Outdoor Recreation*, that calls for improving game and habitat management and increasing outdoor recreation opportunities, particularly for hunters, anglers, and other sportsmen and women. Such activities include opening acres of wildlife refuges to hunting and fishing opportunities while aligning regulations with the States to better increase access and strike a regulatory balance.

The Service will work with States, sportsmen and sportswomen partners, and industry to enhance access to hunting, fishing and recreation opportunities; reduce unnecessary regulatory barriers to access; reevaluate habitat management strategies to support healthy game populations; increase access on Service owned lands; ramp up programs that contribute to recruitment, retention, and reactivation of hunters and anglers and engage new audiences.

Protecting Our People and the Border

Border security is critically important to the national security of the U.S. As managers of Federal properties along the U.S.-Mexico border, the Service coordinates closely with Customs and Border Protection (CBP) on border security issues to assure their access and to address resource protection challenges related to border impacts. The Service also works with CBP on infrastructure projects in an effort to minimize impacts to fish and wildlife while meeting their national security mission. The Service will continue these efforts and respond to the Administration's policy and program milestones on the border.

Funding for Refuge Law Enforcement supports safe and secure refuges where more than 55 million people per year enjoy wildlife-dependent recreation. Refuge System officers will help ensure the safety and security of the visiting public, Service employees, government property, and wildlife and their habitats. This funding will enable Refuge Law Enforcement and the Service's Emergency Management personnel to receive the necessary training, equipment, and supplies to ensure safe public access to refuges along our borders for hunting, fishing, wildlife photography and observation, and other compatible wildlife-dependent recreation.

In addition, our International Wildlife Trade program protects our borders from invasive species and illegal trade of domestic and foreign wildlife and plants. With funding provided in this budget, the Service will modernize its permitting system, including moving toward fully electronic application submission and permit processing. We will also work with our State wildlife agency partners to ensure that trade in commercially valuable native species is legal and sustainable, such as by implementing recommendations of State and Tribal working groups regarding American ginseng management and trade.

Ensure Tribal sovereignty means something

While State fish and wildlife agencies are critically important partners in implementing the North American Model, arguably the strongest model of conservation in the world, the Department of the Interior has an equally important responsibility to follow through on its commitments to sovereign Indian Nations and territories. In addition to its consultation responsibilities, the Service works with Tribes on a variety of conservation efforts, from black-footed ferret recovery to fisheries management. The Service is committed to enhancing its relationships with Tribal partners and will take a series of actions to enhance government-to-government relationships with Tribes on conservation issues.

Department Wide Reorganization Plan

A priority of the Administration is to optimize operations of the Federal government through meaningful reorganization and increased administrative efficiency. This includes aligning our own transformation with larger efforts in the Department and government-wide. To build resilience and flexibility in our organization, the Service is working to transform its organization with the goal of streamlining operations with a focus on field operations and support. In 2019-2020 the Service will consolidate all administrative functions under a single Assistant Director for Management and Administration.

Modernizing Our Infrastructure

Interior and Agriculture manage an infrastructure asset portfolio with over $18 billion in deferred maintenance, which includes structures, trails, roads, utility systems, and Bureau of Indian Education (BIE) schools. To address these needs, the budget includes $6.5 billion over 5 years for a Public Lands Infrastructure Fund. The Fund will support infrastructure improvements through an allocation of 70 percent for national parks, 10 percent for national forests, 10 percent for wildlife refuges, five percent for BIE schools, and five percent for lands managed by the Bureau of Land Management. The Fund will be supported by the deposit of 50 percent of all federal energy development revenue that would otherwise be credited or deposited as miscellaneous receipts to the Treasury over the 2020–2024 period, subject to an annual limit of $1.3 billion. Interior and Agriculture would prioritize projects, monitor implementation, and

measure results. This investment will significantly improve many of America's most visible, visited, and treasured places.

The facilities that the Service maintains for the public, from wildlife refuges to fish hatcheries, are suffering from a massive backlog of deferred maintenance totaling $1.3 billion. The maintenance backlog includes $280 million for roads, bridges and trails; $311 million for water management and habitat structures; nearly $355 million in hatcheries, boat docks, fishing piers, recreational sites and other public use infrastructure; and nearly $355 million for visitor centers, offices, housing and historic structures. As crown jewels of our public lands, the Service will continue to focus appropriations on the infrastructure and public works of these important places to ensure the public has welcoming, safe, and reliable wildlife dependent recreational access on their public lands.

Public Lands Infrastructure Fund

Interior and Agriculture manage an infrastructure asset portfolio with over $18 billion in deferred maintenance, which includes structures, trails, roads, utility systems, and Bureau of Indian Education (BIE) schools. To address these needs, the budget includes $6.5 billion over 5 years for a Public Lands Infrastructure Fund. The Fund will support infrastructure improvements through an allocation of 70 percent for national parks, 10 percent for national forests, 10 percent for wildlife refuges, five percent for BIE schools, and five percent for lands managed by the Bureau of Land Management. The Fund will be supported by the deposit of 50 percent of all Federal energy development revenue that would otherwise be credited or deposited as miscellaneous receipts to the Treasury over the 2020–2024 period, subject to an annual limit of $1.3 billion. Interior and Agriculture would prioritize projects, monitor implementation, and measure results. This investment will significantly improve many of America's most visible, visited, and treasured places.

Government Reform

President Trump signed an Executive Order to modernize and reform the executive branch and Interior is leading the way, developing and executing a program that will streamline processes and better serve the American people. The absolute first step in building a better and more efficient executive branch though is fostering a culture of ethics and respect amongst colleagues.

Interior has launched several top management objectives to better achieve Departmental goals and lead the agency moving forward. From day one of this Administration, Interior's leadership has made the work environment a priority. There is zero tolerance for any type of workplace harassment at Interior. The Department is instilling a culture change through clear management accountability, swift personnel actions, reporting procedures for harassment conduct, improved training, and substantive action plans.

In the area of anti-harassment efforts, each bureau and office has made significant headway in putting a diverse set of measures in place to prevent and address unacceptable conduct. Interior has also launched an internal Workplace Culture Transformation Advisory Council to include leadership from across the Department to keep a focus on Interior's commitment to the workplace environment. The Council will look at common issues raised in the Federal Employee Viewpoint Survey, ways to improve employee engagement, and building career paths which cross bureau silos; all with the goal to transform Interior's workplace culture for our employees, so they can realize their individual potential and be their most productive selves for the American people.

Another management priority is creating a strong ethical culture to ensure Interior employees honor the public's trust to manage taxpayer funds responsibly and avoid conflicts of interest. The expectations for appropriate employee conduct have been made clear. The Department has set goals and expectations for qualified ethics officials within Interior sufficient to ensure our operations are conducted ethically and ensure all employees have access to prompt, accurate ethics advice.

Summary of Request

Ecological Services – The budget includes $240.0 million to conserve, protect, and enhance listed and at-risk fish, wildlife, plants, and their habitats. The budget proposes $107.5 million to support environmental reviews, consultation services, and permitting that enables economic development and the creation of American jobs. The budget prioritizes funding to promote the recovery of listed species and toward completing recovery actions and five-year species status reviews as required by the ESA. The budget proposes $11.1 million for the Listing activity to focus available resources on the recovery of listed species.

Habitat Conservation – The request for Habitat Conservation includes $54.4 million for the Partners for Fish and Wildlife program. The Coastal Program request is $13.4 million.

National Wildlife Refuge System – Funding for the operation and maintenance of the National Wildlife Refuge System is requested at $509.5 million. The request ensures access to high-quality opportunities for all Americans to enjoy wildlife-dependent recreation, including wildlife photography, hunting, and fishing and maintain habitat and facilities across the refuge system.

The request for the refuge system includes $239.4 million for wildlife and habitat management. The request includes an additional $5 million for invasive species early detection and rapid response on refuges and in coordination with partners. Invasive species are one of the most serious threats to native wildlife, fish, and plants in the Refuge System, and these threats are expected to grow. In fact, invasive species are the second greatest threat to biodiversity and Federally-listed threatened and endangered species, with habitat loss the first. Invasive species negatively affect native species through habitat modification, disruption of vital ecosystem functions, competition, predation, herbivory, transmission of pathogens, and by hybridizing with natives. Invasive species also impose a significant economic burden, damage infrastructure, and exacerbate wildfire.

The budget request includes $80.9 million for Visitor Services. The Refuge System offers a variety of wildlife-dependent recreation opportunities and continues welcoming more visitors each year. The priority for wildlife refuges in FY 2020 is increasing opportunities and access for hunters and anglers. With more than 100 wildlife refuges within 25 miles of most major cities, wildlife refuges offer excellent opportunities for more Americans to enjoy all kinds of wildlife-dependent recreation. The budget continues support for hunting, fishing, and wildlife watching that benefit local communities. The budget also contains an additional $1 million to support the urban refuges program, which reaches out to urban residents to encourage interest in wildlife-dependent recreation and conservation.

The request includes $146.0 million for refuge facility and equipment maintenance. The budget prioritizes maintenance of Service-owned facilities and infrastructure such as water control structures and maintenance of administrative facilities. Addressing health and human safety deficiencies at existing facilities is the highest priority for maintenance funding.

Migratory Bird Management – To support cooperation with States on migratory bird management, the budget includes $49.5 million for migratory bird management. In 2016, the most recent year in which the Service conducted the *National Survey of Fishing, Hunting, and Wildlife-Associated Recreation*, 2.4 million migratory bird hunters generated $2.3 billion in economic activity, much of it in rural America supporting jobs in the travel, hospitality, and outdoor recreation industries. The 2020 budget request includes $7.3 million for monitoring of waterfowl populations, which provides critical data for developing annual migratory bird hunting frameworks that States rely on to establish hunting seasons and maintain this economic activity.

Law Enforcement – The budget provides $77.2 million for the law enforcement program to investigate wildlife crimes and enforce wildlife laws. The Service continues to cooperate with the State Department, other Federal agencies, and foreign governments to disrupt transportation routes connected to the illegal wildlife trafficking supply chain. The Service will continue to cooperate with other nations to combat wildlife trafficking to halt the destruction of some of the world's most iconic species, such as elephants and rhinos, by stopping illicit trade; ensuring sustainable legal trade; reducing demand for illegal products; and providing technical assistance and grants to other nations to develop local enforcement capabilities.

International Affairs – The budget includes a total of $16.6 million for the Service's international program. The Service provides technical and financial assistance to partners to support innovative projects that address wildlife poaching and trafficking by strengthening enforcement, reducing demand for illegally traded wildlife, and expanding international cooperation and commitment to mitigate this threat.

Fish and Aquatic Conservation – The budget includes a total of $155.6 million for Fish and Aquatic Conservation. The request includes $56.4 million for operation of the National Fish Hatchery System. The Service will address top priorities such as recovery of federally-listed threatened or endangered species, restoration of imperiled species, and fulfillment of Tribal partnerships and trust responsibilities. The Service will cooperate with Federal agency partners to mitigate impacts of Federal water projects via reimbursable service agreements. Mitigation hatcheries provide sportfish that increase opportunities for recreational fishing and contribute to local economies. The budget includes $25.8 million for maintenance of infrastructure including pumps and raceways at fish hatcheries.

The budget proposes $73.4 million for Aquatic Habitat and Species Conservation, including $7.8 million for combating Asian carp and $14.0 million for fish passage improvements, including dam and culvert removal or replacement to open streams and rivers to native fish restoration. The budget maintains funding for management of subsistence fishing in Alaska and fishery monitoring, management, and restoration nationwide.

General Operations – The Service's General Operations budget totals $140.9 million. The Service is in its second year of consolidating administrative services, and changes are proposed to the funding structure to provide the new Management and Administration program a defined funding source. The request includes $7.0 million for the National Fish and Wildlife Foundation to support conservation projects, and $21.4 million for the operation and maintenance of the National Conservation Training Center.

Construction – The Service requests $15.7 million for construction in FY 2020.

Land Acquisition – The Service's request for the Land Acquisition account is $9.9 million. The FY2020 Budget focuses available funds on the protection and management of existing lands and assets. Acquiring new lands is a lower priority than funding ongoing operations and maintenance.

North American Wetlands Conservation Act Grants (NAWCA) – The Service is requesting $40.0 million for NAWCA grants, which provide funding for land acquisition by non-Federal partners for wetlands conservation.

Multinational Species Conservation Fund – The 2020 request for this international species grant account is $6 million.

Neotropical Migratory Bird Conservation Fund – The Service proposes $3.9 million for these North American bird conservation grants.

State Wildlife Grants – The request for this program is $31.3 million. These grants are provided to States for wildlife conservation.

The full report on the Service's contributions to Departmental performance goals will be published as part of the Annual Performance Plan and Report. It will be available in March, 2019 as a companion report to this document. The report provides the a trend of accomplishments for the last five years, includes targets for the next two years and the associated current year funding and supporting strategic actions.

Agency Priority Goals

Ensure Clear, Quantitative Criteria for Threatened and Endangered Species Recovery Plans Agency Priority Goal

Bureau Contribution

The ESA requires that the Service develop and implement recovery plans for the conservation and survival of endangered and threatened species found in the U.S., which incorporate objective, and measureable criteria for recovering listed species. Good, defensible criteria for recovering species is critical to inform priorities, engage partners in conservation activities and direct resources towards the most immediate needs.

Implementation Strategy

Recovery plans provide the Service, partners, stakeholders, and the public a road map and goals for achieving recovery of listed species. Clear criteria for delisting a species directs resources to activities and actions that will most benefit the listed species. This measure will report on the number of recovery plans that provide quantitative criteria for delisting a species under the ESA.

The data source for this measure is the Service's Threatened and Endangered Species System database (contained within the Service's Environmental Conservation Online System, ECOS). The database includes information on all listed species, including their recovery plans, and when the species final recovery plan was completed. Determining whether the criteria used in the plan is quantitative will be determined through a review of each plan and tracked in a separate file.

Performance Metrics

For published recovery plans, Ecological Services is the lead component within Service for reviewing these plans to confirm that each plan provides quantitative criteria. For recovery plans under development or not yet initiated, the Service will require quantitative criteria be developed as part of the drafting and finalizing of the recovery plan.

Strategic Objective Performance Summary

The Service contributes to meeting the Department's performance goals in three of the Department's six mission areas, as discussed below.

Departmental Mission Area: Conserving Our Land and Water

Bureau Contribution

The Service met or exceeded two of the four FY 2018 targets set for the Strategy: Provide stewardship of land, surface water, streams and shorelines performance metrics, contributing to the Department meeting its metrics for FY 2018 in this strategic objective.

The Service met or exceeded five of the seven FY 2018 targets set for the Strategy: Provide stewardship of wildlife, bird, fish, and plant species performance metrics, contributing to the Department's meeting or exceeding its metrics for FY 2018.

Funding in FY 2020 enables the Service to support the National Wildlife Refuge System, which administers a national network of lands and waters for the conservation, management, and where appropriate, restoration of the fish, wildlife, and plant resources and their habitats within the U.S. for the benefit of present and future generations of Americans. Wildlife refuges are home to more than 700 species of birds, 220 species of mammals, 250 reptile and amphibian species, and more than 1,000 species of fish. Wildlife refuges manage a full range of habitat types – wetlands; prairies; coastal and marine areas; temperate, tundra and boreal forests. Managing these habitats requires controlling or eradicating invasive species, using fire in a prescribed manner, assuring adequate water resources, and assessing external threats like development or contamination. The Service uses prescribed fire to reduce dangerously overgrown vegetation-known as hazardous fuels- to keep habitat in good condition. In FY 2018, the Refuge System conducted prescribed burns across more than 325,000 acres. These actions help reduce the risk of devastating wildfires that can threaten people, fish, wildlife and plants.

The Partners for Fish and Wildlife Program has grown into a large and diversified habitat restoration program assisting thousands of private landowners across the Nation and the Coastal Program provides incentives for voluntary protection of threatened, endangered and other species on private and public lands alike. The *North American Wetlands Conservation Act* provides matching grants to organizations and individuals who have developed partnerships to carry out wetlands conservation projects in the United States, Canada, and Mexico for the benefit of wetlands-associated migratory birds and other wildlife. The FY 2020 request will maintain the Service's support for work with partners on private, State, and other Federal lands to conserve and restore habitat for fish and wildlife and plant species.

As the principal Federal partner responsible for administering the ESA, the Service takes the lead in recovering and conserving our Nation's imperiled species by fostering partnerships, employing scientific excellence, and developing a workforce of conservation leaders. The FY 2020 request will provide funding for the Service to work in partnership with others, on two major goals, 1) conserve candidate species and species-at-risk so that listing under the ESA is not necessary; and 2) protect endangered and threatened

species, and pursue their recovery. These goals are achieved through the following activities: candidate conservation; consultations; grants; habitat conservation plans; international activities; listing and critical habitat; recovery; and working with Tribes.

The Service Fisheries Program works at the intersection of fisheries science and management, developing and using the latest techniques to conserve America's fisheries. Fisheries science is an integrative approach to understanding the biology, ecology, and economics of a fishery with the goal of sustainable management. The Service analyzes and approves new drugs and chemicals for aquatic species; monitors population levels and responses to environmental changes; maps habitat usage; identifies pathogens and diseases; breeds and grows fish; and evaluates population structure using genetics. The Service applies scientific data to focus conservation activities on high-priority species and habitats to protect and maintain stable populations and healthy habitats, and restore degraded habitats and depleted populations.

Funding in FY 2020 will allow the Service to maintain efforts to oversee its legal mandate and trust responsibility to maintain healthy migratory bird populations for the benefit of the American public. More than 25 laws, treaties, and conventions authorize the Service to conserve more than 1,000 species of migratory birds and their habitats. Primary among these mandates is the Migratory Bird Treaty Act (MBTA) of 1918, which establishes Federal responsibility for protecting and managing migratory birds. It also implements four international treaties affecting migratory birds common to the U.S., Canada, Mexico, Japan and the former Soviet Union. Management activities include establishing hunting seasons, bag limits, and other regulations and issuing permits to possess or use migratory birds. Other important laws that directly and significantly impact program activities include the Bald and Golden Eagle Protection Act, the North American Wetlands Conservation Act, and the Neotropical Migratory Bird Conservation Act, which promote habitat and bird conservation across North America and throughout the western hemisphere.

Implementation Strategy

The Service will continue its efforts improve land and water health and sustaining fish, wildlife and plant species in FY 2020. The response by species to changes in habitat (or other stressors on their health and sustainability) can take years before it can be measured and therefore, measures related to overall status of species tend to move slowly across the years. Also, especially on projects conducted with partners on private lands, results can vary widely from year to year based on the makeup of projects and the partnerships in effect in that time span. The Annual Performance and Plan and Report (APP&R) contains details on some of the variability of specific measures.)

More details on specific actions are included in other parts of this budget request and in the APP&R that accompanies the FY 2020 Budget request and are not repeated here in an effort to reduce redundancy.

Performance Metrics

The Service contributes to four DOI Strategic Plan measures in the Strategy: Provide stewardship of land, surface water, streams and shorelines; and seven DOI Strategic Plan measures in the Strategy: Provide stewardship of wildlife, bird, fish, and plant species.

The related performance measures (including data) are included in the APP&R that accompanies the FY 2020 Budget request and are not repeated here in an effort to reduce redundancy.

Departmental Mission Area: Expanding Outdoor Recreation and Access

Bureau Contribution

The Service met or exceeded both FY 2018 targets set for the Strategy: Promote hunting, fishing and other recreation on DOI lands and waters.

In response to Secretarial Orders (S.O.) 3347 and 3356, the Chief of the Refuge System has led an effort to assess the Service's hunting and sport fishing regulatory alignment to State regulations, and support Regional Directors' in identifying opportunities to increase access for hunters and anglers. A web-based tool called the Service's Hunt/Fish Opportunity Tool (SHOT) was developed, and a team of Regional Chiefs of Hunting and Fishing are assessing all Service lands and waters for regulatory alignment to State hunting and fishing regulations. As part of the 2018-2019 station-specific final rule, which published in the Code of Federal Regulations on September 10, 2018, 30 refuges opened or expanded opportunities for hunters and anglers on 251,000 acres of the Refuge System. As assessments are completed in 2019, this data will support further proposals to increase access for hunters and anglers for the 2019-2020 station-specific rule.

Implementation Strategy

The Service will continue its efforts in promoting hunting, fishing and other recreation on Service lands and waters in FY 2020. More details on specific actions are included in other parts of this budget request and in the APP&R that accompanies the FY 2020 Budget request and are not repeated here in an effort to reduce redundancy.

Performance Metrics

The Service contributes to two DOI Strategic Plan measure in this strategic objective. The related performance measures (including data) are included in the APP&R that accompanies the FY 2020 Budget request and are not repeated here in an effort to reduce redundancy.

Bureau Contribution

The Service met its FY 2018 target for the Strategy: Enhance the enjoyment and appreciation of our natural and cultural heritage by creating opportunities for play, enlightenment, and inspiration. A visitor survey, conducted at selected, representative Refuge System locations showed increased visitor satisfaction over previous years in all facets of their experience. This updated result helped the Department also meet its overall goal for visitor satisfaction.

The National Wildlife Refuge System Improvement Act of 1997 provides direction to the Refuge System to provide "…compatible wildlife-dependent recreational uses involving hunting, fishing, wildlife observation, wildlife photography, environmental education and interpretation as priority public uses of the Refuge System." In addition, many of the Service's fish hatcheries also provide opportunities for the public to visit and learn more about aquatic wildlife, fish, and fish hatcheries, as well as take advantage of recreational activities on hatchery grounds. The FY 2020 request will enable the Service to maintain opportunities for outdoor recreation at National Wildlife Refuges and National Fish Hatcheries at levels similar to FY 2018.

Implementation Strategy
The Service will continue its visitor service programs at similar levels in FY 2020, compared to FY 2018, and expects to maintain its current high level of visitor satisfaction (90%). More details on specific actions are included in other parts of this budget request and in the APP&R that accompanies the FY 2020 Budget request and are not repeated here in an effort to reduce redundancy.

Performance Metrics
The Service contributes to one DOI Strategic Plan measure in this strategic objective. The related performance measure (including data) is included in the APP&R that accompanies the FY 2020 Budget request and is not repeated here in an effort to reduce redundancy.

Departmental Mission Area: Modernizing Our Organization and Infrastructure for the Next 100 Years

The Service met or exceeded one of the three FY 2018 targets for the Strategy: Maintain critical DOI infrastructure and facilities to ensure effective operations and service delivery, contributing to the Department meeting its metrics for FY 2018 in this strategic objective.

Bureau Contribution
The Refuge System is the Service's primary organization responsible for identifying, protecting, and sharing historic structures and historic resources. The three primary goals are to (1) evaluate, through a systematic, open-minded study by archeologists, historians, and other specialists to locate resources and to discover or substantiate their significance; (2) provide considerable thought to the problem of simultaneously protecting resources and making them available to the public; and (3) implement essential and appropriate treatment programs and protective measures. The FY 2020 request will maintain efforts to protect these resources at levels similar to FY 2018.

Established in 1896, D.C. Booth Historic National Fish Hatchery and Archives, formerly Spearfish National Fish Hatchery, is one of the oldest operating hatcheries in the country. Still rearing trout for the Black Hills through a cooperative effort with the State, the hatchery is also a museum and archive that serves to protect and preserve our Nation's fishery records and artifacts for educational, research, and historic purposes. With over 155,000 visitors and 14,000 volunteer hours annually, the facility also strives to provide interpretive and educational programs for the public.

The National Conservation Training Center Museum and Archives houses films, photos, and documents chronicling the rich heritage of wildlife conservation. A museum and state-of-the-art research archive help the public, researchers and professional conservationists better understand the rich history of American wildlife conservation.

Implementation Strategy

The Service will continue its historic and heritage resource efforts at similar levels in FY 2020, compared to FY 2018. More details on specific actions are included in other parts of this budget request and in the APP&R that accompanies the FY 2020 Budget request and are not repeated here in an effort to reduce redundancy.

Performance Metrics

Service contributes to three DOI Strategic Plan measures in this strategic objective. The related performance measures (including data) are included in the APP&R that accompanies the FY 2020 Budget request and are not repeated here in an effort to reduce redundancy.

For more information about DOI performance measures, the full performance plan can be found at:

Resource Management

Resource Management

Appropriations Language

For necessary expenses of the United States Fish and Wildlife Service, as authorized by law, and for scientific and economic studies, general administration, and for the performance of other authorized functions related to such resources, $1,257,161,000 to remain available until September 30, 2021: Provided, That not to exceed $11,065,000 shall be used for implementing subsections (a), (b), (c), and (e) of section 4 of the Endangered Species Act of 1973 (16 U.S.C. 1533) (except for processing petitions, developing and issuing proposed and final regulations, and taking any other steps to implement actions described in subsection (c)(2)(A), (c)(2)(B)(i), or (c)(2)(B)(ii)).

Note.—A full-year 2019 appropriation for this account was not enacted at the time the budget was prepared; therefore, the budget assumes this account is operating under the Continuing Appropriations Act, 2019 (Division C of P.L. 115-245, as amended). The amounts included for 2019 reflect the annualized level provided by the Continuing Resolution.

Authorizing Statutes

African Elephant Conservation Act, (16 U.S.C. 4201-4245, 1538). Authorizes funding for approved projects for research, conservation, management or protection of African elephants. Authorizes prohibitions against the sale, importation, and exportation of ivory derived from African elephants.

Agricultural Credit Act, (P. L. 100-233). Section 616 authorizes the Secretary of Agriculture to transfer lands, interest therein, to Federal or State agencies for conservation purposes. The Fish and Wildlife Service assesses inventory lands to determine when such lands would be of benefit to the National Wildlife Refuge System and makes transfer recommendations.

Airborne Hunting Act, (16 U.S.C. 742 j-1). Section 13 of the Fish and Wildlife Act of 1956 prohibits taking or harassing wildlife from aircraft, except when protecting wildlife, livestock, and human health or safety as authorized by a Federal or State issued license or permit.

Alaska National Interest Lands Conservation Act, (16 U.S.C. 410hh-3233, 43 U.S.C 1602-1784). Provides for the designation and conservation of certain public lands in Alaska, including units of the National Wildlife Refuge System, and for the continuing subsistence needs of the Alaska Natives. Sec. 42(g) of this Act makes use of such Native lands subject to refuge regulations.

Alaska Native Claims Settlement Act, (43 U.S.C. 1601-1624). Provides various measures for settling the claims of Alaska Native peoples to land in Alaska, including authorization of selection and ownership of land within National Wildlife Refuges in Alaska by Native Corporations.

Anadromous Fish Conservation Act, (P. L. 89-304). Authorizes the Secretaries of the Interior and Commerce to enter into cooperative agreements with the States and other non-Federal interests for the conservation, development, and enhancement of anadromous fish, including those in the Great Lakes, and to contribute up to 50 percent of the costs of carrying out such agreements.

Antarctic Conservation Act, (16 U.S.C. 2401). Provides for the conservation and protection of the fauna and flora of Antarctica, and their ecosystems.

Archaeological Resources Protection Act, (16 U.S.C. 470aa-47011)**.** Provides for protection of archaeological resources and sites on public and Tribal lands and for increased cooperation between

government authorities, the professional archaeological community, and private collectors with collections obtained before October 31, 1979.

Arctic Tundra Habitat Emergency Conservation Act, (P.L.106-108). Requires the Secretary of the Interior to prepare, and as appropriate implement, a comprehensive, long-term plan for the management of mid-continent light geese and conservation of their habitat.

Asian Elephant Conservation Act, (16 U.S.C. 4261-4266, 1538). Provides for cooperative projects for the conservation and protection of Asian elephants.

Atlantic Striped Bass Conservation Act, (16 U. S.C. 5151-5158). The purpose of this Act is to support and encourage development, implementation, and enforcement of effective interstate action regarding the conservation and management of Atlantic striped bass. The Act recognizes the commercial and recreational importance of Atlantic striped bass and establishes a consistent management scheme for its conservation. The three partners which share management responsibility for Atlantic striped bass are the Atlantic States Marine Fisheries Commission, the National Marine Fisheries Service and the U.S. Fish and Wildlife Service. Every two years, the Services are required to produce an Atlantic Striped Bass Biennial Report to Congress on the status and health of Atlantic Coast Striped Bass Stocks.

Bald and Golden Eagle Protection Ac*t*, **(**16 U.S.C. 668-668d). This Act provides for the protection of Bald Eagles and Golden Eagles by prohibiting take, possession, sale, purchase, transport, export or import of such eagles or their parts or nests. Take, possession, and transport are permitted for certain authorized purposes.

Brown Tree Snake Eradication and Control Act, (P.L. 108-384). Through this Act, the U.S. Department of the Interior and the Department of Agriculture support a multi-agency and partner effort to eradicate brown tree snakes in Guam and to prevent introduction or establishment of this invasive species on other Pacific islands or the U.S. mainland.

Billy Frank Jr. Tell Your Story Act, (P.L. 114-101). Establishes the Medicine Creek Treaty National Memorial within the Billy Frank Jr. Nisqually National Wildlife Refuge. The Department of the Interior must: (1) establish the boundaries of the Medicine Creek Treaty National Memorial and to provide for its administration and interpretation by the U.S. Fish and Wildlife Service; and (2) coordinate with representatives of the Muckleshoot, Nisqually, Puyallup, and Squaxin Island Indian Tribes in providing for that interpretation.

Chehalis River Basin Fishery Resources Study and Restoration Act, (P. L. 101-452). Authorizes a joint Federal, State, and tribal study for the restoration of the fishery resources of the Chehalis River Basin, Washington.

Coastal Barrier Resources Act, as amended by the Coastal Barrier Improvement Act of 1990, (16 U.S.C. 3501 et seq.) Requires the Secretary (delegated to the Service) to maintain the maps of the Coastal Barrier Resources System, to review the system at least every five years for changes which have occurred as a result of natural forces, and to make minor and technical changes to the maps of the System reflecting those natural changes. It also requires the Secretary to submit a study to Congress on the need to include the west coast in the system, and to lead an interagency task force to provide recommendations to Congress for legislative action and Federal policies on developed and undeveloped coastal barriers.

Coastal Wetlands Planning, Protection, and Restoration Act, (16 U.S.C. 3951-3156). Provides a Federal grant program for the acquisition, restoration, management, and enhancement of coastal wetlands of States

adjacent to the Atlantic, Gulf of Mexico, the Great Lakes, and the Pacific, including Puerto Rico, the U.S. Virgin Islands, American Samoa, and the Pacific U.S. insular areas. Provides that the Service update and digitize wetlands maps in Texas and conduct an assessment of the status, condition, and trends of wetlands in that State. Provides permanent authorization to appropriate receipts, coastal wetlands conservation grants and North American Wetlands Conservation projects.

Coastal Zone Management Act, (16 U.S.C. 1451-1464). Establishes a voluntary national program within the Department of Commerce to encourage coastal States to develop and implement coastal zone management plans. Activities that affect coastal zones must be consistent with approved State programs. The Act also establishes a National Estuarine Research Reserve System (NERRS).

Colorado River Floodway Protection Act, (43 U.S.C 1600; 42 U.S.C. 4029). Establishes a Task Force to advise the Secretary of the Interior on the specific boundaries for and management for the area.

Colorado River Storage Project Act, (43 U.S.C. 620). Provides that facilities will be built and operated to mitigate losses of, and improve conditions for, fish and wildlife in connection with the Colorado River Storage.

Comprehensive Environmental Response, Compensation, and Liability Act, (42 U.S.C. 9601, et seq.). Provides that responsible parties, including Federal landowners, investigate and clean up releases of hazardous substances. Trustees for natural resources, which includes the Secretary of the Interior, may assess and recover damages for injury to natural resources from releases of hazardous substances and use the damages for restoration, replacement or acquisition of equivalent natural resources. Provides permanent authorization to appropriate receipts from responsible parties.

Coral Reef Conservation Act, (16 U.S.C. 6401 et seq.). Promotes wise management and sustainable use of coral reef ecosystems and develop sound scientific information on the condition of coral reef ecosystems and threats to them. Provides financial resources to local communities and nongovernmental organizations to assist in the preservation of coral reefs. It establishes a formal mechanism for collecting and allocating monetary donations from the private sector to be used for coral reef conservation projects.

Delaware River Basin Restoration Act, (P.L. 114-322). Establishes a Delaware River Basin restoration program and directs the Secretary to produce a basin-wide strategy that draws on existing conservation efforts, involves partners, and provides for the implementation of a shared set of science-based restoration and protection activities, including cost-effective projects with measurable results that maximize conservation outcomes with no net gain of Federal employees. Establishes a voluntary grant and technical assistance program. Sunsets on September 30, 2023. Enacted as part of the Water Resources Development Act of 2016.

Eliminate, Neutralize, and Disrupt Wildlife Trafficking Act of 2016, (P.L. 114-231). Sets forth a national policy on wildlife trafficking and several directions for the U.S. Secretary of State. Creates a Presidential Task Force on Wildlife Trafficking, the co-chairs of which include the Secretary of the Interior. Authorizes anti-poaching and anti-trafficking programs. Amends the Pelly Amendment to the Fisherman's Protection Act to require that Pelly certifications made to the President by the Secretaries of Commerce and the Interior be reported to Congress.

Emergency Wetlands Resources Act, (16 U.S.C. 3901). Provides for the collection of entrance fees, thirty percent of which may be used for refuge operations and maintenance, and for the Secretary of the Interior to establish and periodically review a national wetlands priority conservation plan for Federal and State wetlands acquisition, complete National Wetlands Inventory maps for the contiguous United States by

September 30, l998, to update the report on wetlands status and trends by September 30, 1990, and at 10-year intervals thereafter.

Endangered Species Act, (16 U.S.C. 1531-1544). Prohibits the import, export, or taking of fish and wildlife and plants that are listed as threatened or endangered species; provides for adding species to and removing them from the list of threatened and endangered species, and for preparing and implementing plans for their recovery; provides for interagency cooperation to avoid take of listed species and for issuing permits for otherwise prohibited activities; provides for cooperation with States, including authorization of financial assistance; and implements the provisions of the Convention on International Trade in Endangered Species of Wild Flora and Fauna (CITES).

Fallon-Paiute Shoshone Indian Water Settlement Act, (P.L. 101-618). Establishes the Lahontan Valley and Pyramid Lake Fish and Wildlife Fund. Funds are administered by the Service for use in restoring Lahontan Valley wetlands and recovering the endangered and threatened fish of Pyramid Lake. Section 206(a) authorizes the acquisition of water rights for restoring wetlands in Lahontan Valley. The Act stipulates that sufficient water rights be acquired to restore and sustain, on a long term average, approximately 25,000 acres of primary wetland habitat within Nevada's Lahontan Valley.

Federal Insecticide, Fungicide and Rodenticide Control Act, (7 U.S.C. 136-136y). Provides for the registration of pesticides to avoid unreasonable adverse effects to humans or the environment. Such registrations are considered Federal actions and are subject to consultations with the Service under the Endangered Species Act.

Federal Lands Recreation Enhancement Act (FLREA), **(**16 U.S.C. 6801-6814). Through this Act, Congress authorized Federal collection of fees for recreational use of public lands managed by the U.S. Fish and Wildlife Service, the Bureau of Reclamation, the National Park Service, the Bureau of Land Management and the Forest Service.

Federal Land Transaction Facilitation Act (FLTFA), (43 U.S.C. 2301-2306). Allows the sale of BLM lands identified for disposal, with sales proceeds used for land acquisition by the various land management agencies, including the U.S. Fish and Wildlife Service.

Federal Power Act, (161 S.C. 791a et seq.). Provides that each license for hydropower projects issued by the Federal Energy Regulatory Commission includes fish ways prescribed by the Secretary of the Interior or Commerce, and that conditions for the protection, mitigation and enhancement of fish and wildlife based on recommendations of the Service and other agencies.

Federal Water Pollution Control Act (Clean Water Act), (33 U.S.C. 1251-1387)**.** Section 404 (m) authorizes the Service to comment on permit applications submitted to the U.S. Army Corps of Engineers for the discharge of dredged or fill material into navigable waters of the United States. Section 208(i) authorizes the Service to provide technical assistance to States in developing management practices as part of its water pollution control programs and to continue with the National Wetlands Inventory. Section 320 authorizes the establishment of a State/Federal cooperative program to nominate estuaries of national significance and to develop and implement management plans to restore and maintain the biological and chemical integrity of estuarine waters.

Fish and Wildlife Act of 1956, (16 U.S.C. 742(a)-754). Establishes a comprehensive national fish and wildlife policy and authorizes the Secretary of the Interior to take steps required for the development, management, advancement, conservation, and protection of fisheries resources and wildlife resources through research, acquisition of refuge lands, development of existing facilities, and other means.

Fish and Wildlife Conservation Act, (16 U.S.C. 2901-2911). Directs the Secretary of the Interior to undertake research and conservation activities, in coordination with other Federal, State, international and private organizations, to fulfill responsibilities to conserve migratory nongame birds under existing authorities. The Secretary is required, for all species, subspecies, and migratory nongame birds, to monitor and assess population trends and status; to identify environmental change and human activities; and to identify species in need of additional conservation and identify conservation actions to ensure perpetuation of these species.

Fish and Wildlife Coordination Act, (16 U.S.C. 661-666(e)). Directs the Service to investigate and report on proposed Federal actions that affect any stream or other body of water and to provide recommendations to minimize impacts on fish and wildlife resources.

Fisheries Restoration and Irrigation Mitigation Act, (16 U.S.C. 777 note; P.L. 106-502)**.** Congress reauthorized the Fisheries and Irrigation Mitigation Act (FRIMA) as part of the Omnibus Public Land Management Act of 2009, P.L. 111-11. FRIMA was established in 2000 and has been an important tool for addressing fish screening and fish passage needs in the Pacific Northwest States.

Fishery Conservation and Management Act, (Magnuson-Stevens Act), (16 U.S.C. 1801-1882, 90 Stat. 331). Authorizes the conservation and management of the fishery resources found within the Exclusive Economic Zone of the United States, including anadromous species, through eight Regional Fishery Management Councils. Establishes the Service as a nonvoting member of the Councils.

Food Security Act, (16 U.S.C. 801-3945). Provides that the Secretary of Agriculture consult with the Secretary of the Interior on the identification of wetlands, determinations of exemptions, and issuance of regulations to carry out the provisions of this Act. Requires the Service to concur in wetland mitigation plans in association with minimal effect exemptions and to concur in conservation plans for lands proposed for inclusion in the Wetlands Reserve program. Establishes a program to protect and restore wetlands on Farmers Home Administration inventory property and provides for the Service to identify such wetlands.

Great Ape Conservation Act*,* (16 U.S.C. 6301 et seq.). Authorizes grants to foreign governments, the CITES secretariat, and non-governmental organizations for the conservation of great apes. The funds are to be a sub-account of the Multinational Species Conservation Fund.

Great Lakes Critical Programs Act, (P.L. 101-596). Authorization for Service activities is contained in title III, the "Lake Champlain Special Designation Act of 1990".

Great Lakes Fish and Wildlife Restoration Act, (P.L. 109-326). The 2006 reauthorization places new emphasis on terrestrial wildlife projects, whereas the previous Acts were primarily devoted to fisheries. The bill also reauthorizes the existing State and Tribal grant program and provides new authority for the Service to undertake regional restoration projects. In addition, it directs the Service to create and maintain a website to document actions taken as a result of the Act. Under authority of the Great Lakes Fish and Wildlife Restoration Act of 2006, the Great Lakes Fish and Wildlife Restoration Act Grant Program provides Federal grants on a competitive basis to States, Tribes and other interested entities to encourage cooperative conservation, restoration and management of fish and wildlife resources and their habitat in Great Lakes basin..

Great Lakes Fishery Act, (16 U.S.C. 931-939). Implements the Convention on Great Lakes Fisheries between the United States and Canada, and authorizes the Secretary of the Interior and the Service to undertake lamprey control and other measures related to the Convention.

Highlands Conservation Act, (P.L. 108-421). Authorizes the Secretary of the Interior to provide financial assistance to the States of Connecticut, New Jersey, New York, and Pennsylvania (Highland States) to preserve and protect high priority conservation land in the Highlands region, an area depicted on a National Forest Service map entitled "The Highlands Region" dated June 2004.

Junior Duck Stamp Conservation and Design Program Act, (16 U.S.C. 719 et seq.). Authorizes an annual Junior Duck Stamp competition and environmental education program for school children; provides for the licensing and marketing of winning designs, with proceeds used for awards and scholarships to participants. Public Law 109-166 reauthorizes the Junior Duck Stamp Conservation and Design Program Act of 1994.

Klamath River Basin Fishery Resources Restoration Act, (16 U.S.C.460ss et seq.). Requires the Secretary to develop and implement a restoration plan for the Klamath River Basin.

Lacey Act Amendments of 1981, (18 U.S.C. 42; 16 U.S.C. 3371-3378). Provides that the Secretary of the Interior designate injurious wildlife and ensure the humane treatment of wildlife shipped to the United States. Prohibits importation, exportation, transportation, sale, or purchase of fish and wildlife taken or possessed in violation of State, Federal, Indian Tribal, and foreign laws. Provides for enforcement of Federal wildlife laws, and Federal assistance to the States and foreign governments in the enforcement of non-Federal wildlife laws.

Marine Mammal Protection Act, (16 U.S.C. 1361-1407). Establishes a moratorium on taking and importing marine mammals, including parts and products. Defines the Federal responsibility for conservation of marine mammals, with management authority vested in the Department for the sea otter, walrus, polar bear, dugong, and manatee.

Marine Mammal Rescue Assistance Grants, (16 U.S.C. 1421f; 114 Stat. 2765. Title II of P.L. 106-555). Amends the Marine Mammal Protection Act to authorize grants to non-governmental organizations which participate in the rescue and rehabilitation of stranded marine mammals.

Marine Turtle Conservation Act, (16 U.S.C. 6601-6607). Establishes a Marine Turtle Conservation Fund in the Multinational Species Conservation Fund. The fund is a separate account to assist in the conservation of marine turtles, and the nesting habitats of marine turtles in foreign countries.

Migratory Bird Conservation Act, (16 U.S.C. 715-715d). Authorizes the Secretary of the Interior to conduct investigations and publish documents related to North American birds, and establishes a Migratory Bird Conservation Commission (MBCC) to approve areas recommended by the Secretary for acquisition. The MBCC also approves wetlands conservation projects recommended by the North American Wetlands Conservation Council under the North American Wetlands Conservation Act.

Migratory Bird Hunting and Conservation Stamp Act, (16 U.S.C. 718). This Act, commonly referred to as the Duck Stamp Act, requires waterfowl hunters, 16 years of age or older, to purchase and possess a valid Federal waterfowl hunting stamp prior to taking migratory waterfowl. The Secretary of the Interior is authorized to use $1 million from sales of migratory bird hunting and conservation stamps to promote additional sales of stamps.

Migratory Bird Treaty Act of 1918, (16 U.S.C. 703-712). Implements four international treaties that affect migratory birds common to the United States, Canada, Mexico, Japan, and the former Soviet Union. Establishes Federal responsibility for protection and management of migratory and non-game birds, including the establishment of season length, bag limits, and other hunting regulations, and the issuance of permits to band, possess or otherwise make use of migratory birds.

National Aquaculture Development Act, (16 U.S.C. 2801-2810). Establishes a coordinating group, the Joint Subcommittee on Aquaculture (JSA). The JSA has been responsible for developing the National Aquaculture Development Pan. The plan establishes a strategy for the development of an aquaculture industry in the United States.

National Environmental Policy Act of 1969**,** (NEPA), (42 U.S.C. 4321 et seq.)**.** Provides that the Service examine the environmental impacts, incorporate environmental information, and use public participation in the planning and implementation of all actions; integrate NEPA with other planning requirements; prepare NEPA documents to facilitate better environmental decision making; and review Federal agency environmental plans and documents when the Service has jurisdiction by law or special expertise with respect to any environmental impacts involved.

National Fish and Wildlife Foundation Establishment Act, (16 U.S.C. 3701-3709)**.** Establishes a federally-chartered, nonprofit corporation to encourage and administer donations to benefit Service programs and other activities to conserve fish, wildlife, and plant resources.

National Historic Preservation Act of 1966, (16 U.S.C. 470-470b, 470c-470n)**.** Directs Federal agencies to preserve, restore, and maintain historic cultural environments.

National Wildlife Refuge System Administration Act, (16 U.S.C. 668dd et seq.)**.** Provides authority, guidelines and directives for the Service to improve the National Wildlife Refuge System; administers a national network of lands and waters for the conservation, management, and restoration of fish, wildlife and plant resources and habitat; ensures the biological integrity, diversity, and environmental health of refuges is maintained; define compatible wildlife-dependent recreation as appropriate general public use of refuges; establishes hunting, fishing, wildlife observation and photography, and environmental education as priority uses; establish a formal process for determining compatible uses of refuges; and provide for public involvement in developing comprehensive conservation plans for refuges.

The National Wildlife Refuge System Improvement Act*,* (P.L. 105-57)**.** Spells out wildlife conservation as the fundamental mission of the refuge system; requires comprehensive conservation planning to guide management of the refuge system; directs the involvement of private citizens in land management decisions; and provides that compatible wildlife-dependent recreation is a legitimate and appropriate use that should receive priority in refuge planning and management.

The National Wildlife Refuge System Centennial Act, (P.L. 106-408)**.** Reinforces *National Wildlife Refuge System Improvement Act* provisions to raise public understanding and appreciation for the refuge system; calls on the Secretary of the Interior to establish a Centennial Commission to oversee special public outreach activities leading up to and during the Centennial year, leverage resources with public and private partners for outreach efforts, and plan and host a major conference in 2003; calls on the Service to develop a long-term plan to address the highest priority operations, maintenance, and construction needs of the National Wildlife Refuge System; and requires an annual report assessing the operations and maintenance backlogs and transition costs associated with newly acquired refuges lands.

National Wildlife Refuge Volunteer Improvement Act, (P.L. 111-357)**.** Authorizes cooperative agreements with nonprofit partner organizations, academic institutions, or State and local governments to construct, operate, maintain, or improve refuge facilities and services, and to promote volunteer, outreach, and education programs.

Neotropical Migratory Bird Conservation Act, (16 U.S.C. 6101 et. seq.). Authorizes grants for the conservation of neotropical migratory birds in the United States and Latin America and the Caribbean, with 75 percent of the amounts made available to be expended on projects outside the United States. The funds

are to be a sub-account of the Multinational Species Conservation Fund. Title III of P.L. 109-363, reauthorized appropriations for the Neotropical Migratory Bird Conservation Act.

New England Fishery Resources Restoration Act, (P.L. 101-593). Authorizes the Service to formulate, establish, and implement cooperative programs to restore and maintain nationally significant interjurisdictional fishery resources in New England river systems.

Nonindigenous Aquatic Nuisance Species Prevention and Control Act, as amended by the National Invasive species Act, (NISA, 16 U.S.C. 4701 et seq.). Authorizes the Service to develop and implement a program to prevent and control infestations of zebra mussels and other nonindigenous aquatic invasive species in waters of the United States.

North American Wetlands Conservation Act, (16 U.S.C. 4401). Authorizes grants to public-private partnerships in Canada, Mexico and the U.S. to protect, enhance, restore, and manage waterfowl, other migratory birds and other fish and wildlife, and the wetland ecosystems and other habitats upon which they depend, consistent with the North American Waterfowl Management Plan. There is a Standard and a Small Grants Program. Both are competitive grants programs which require that grant requests be matched by partner contributions at no less than a 1-to-1 ratio. Funds from U.S. Federal sources may contribute towards a project, but are not eligible as match. Public Law 109-322 reauthorized the North American Wetlands Conservation Act.

Nutria Eradication and Control Act, (P.L. 108-16). Provides for the States of Maryland and Louisiana to implement nutria eradication or control measures and restore marshland damaged by nutria.

Oil Pollution Act, (P.L. 101-380)**.** Provides that the Service consult with others on the development of a fish and wildlife response plan for the protection, rescue, and rehabilitation of, and the minimization of risk of damage to fish and wildlife resources and their habitat harmed or jeopardized by an oil discharge.

Partnerships for Wildlife Act, (16 U.S.C. 3741-3744). This Act establishes a Wildlife Conservation and Appreciation Fund to receive appropriated funds and donations from the National Fish and Wildlife Foundation and other private sources to assist the State fish and game agencies in carrying out their responsibilities for conservation of nongame species and authorizes grants to the States for programs and projects to conserve nongame species.

Partners for Fish and Wildlife Act, (16 U.S.C. 3771-3774). Provides for the restoration, enhancement, and management of fish and wildlife habitats on private land through the Partners for Fish and Wildlife Program, a program that works with private landowners to conduct cost-effective habitat projects for the benefit of fish and wildlife resources in the United States.

Pelly Amendment to the Fishermen's Protective Act, (22 U.S.C. 1978). Authorizes the President to embargo wildlife products, including fish, and limit other imports from nations whose nationals are determined by the Secretary of the Interior or Commerce to be engaging in trade or take that undermines the effectiveness of any international treaty or convention for the protection of endangered or threatened species to which the United States is a party.

Permanent Electronic Duck Stamp Act, (P.L. 113-239). Authorizes the Service to permanently allow any State to provide hunting and conservation stamps for migratory birds (referred to as Federal Duck Stamps) electronically. The electronic stamps would remain valid for 45 days to allow for the physical stamps to arrive in the mail.

Public Utility Regulatory Policies Act*,* (16 U.S.C. 2602-2645) and ***Energy Security Act of 1980****, (16* U.S.C. 792-828(c)). Authorizes the Service to investigate and report on effects of hydropower development on fish and wildlife during the licensing process of the Federal Energy Regulatory Commission.

Recreational Use of Fish and Wildlife Areas, (16 U.S.C. 460k-460k-4). Commonly known as the Refuge Recreation Act of 1962, authorizes the Secretary of the Interior to administer refuges, hatcheries, and other conservation areas for recreational use when such use does not interfere with the primary purpose for which these areas were established**.**

Refuge Recreation Act, (16 U.S.C. 460k-460k-4). Public Law 87-714, approved September 28, 1962 (76 Stat.653) as amended by Public Law 89-669, approved October 14, 1966, (80 Stat.930) and P.L. 92-534, approved October 23, 1972, (86 Stat. 1063). Authorizes the Secretary of the Interior to administer refuges, hatcheries and other conservation areas for recreational use, when such uses do not interfere with the areas primary purposes.

Resource Conservation Recovery Act, (42 U.S.C. 6901). Establishes standards for Federal agencies on the treatment, transportation, storage, and disposal of solid and hazardous wastes on Federal lands and facilities.

Rhinoceros and Tiger Conservation Act*,* (16. U.S.C. 5306(a), 1538). Authorizes grants to other nations and to the CITES Secretariat for programs directly or indirectly assisting in the conservation of rhinoceros and tigers. Prohibits the sale, importation, and exportation of products derived from any species of rhinoceros and tiger.

Salmon and Steelhead and Conservation and Enhancement Act of 1980, (16 U.S.C. 3301, 11-15, 21-25, 31-36, 41-45). Provides for management and enhancement planning to help prevent a further decline of salmon and steelhead stocks, and to assist in increasing the supply of these stocks within the Columbia River conservation area and the Washington conservation area.

Sikes Act, (16 U.S.C. 670a-670o). Authorizes the Secretary of the Interior to cooperate with the Department of Defense, Department of Energy, National Aeronautics and Space Administration, Bureau of Land Management, and State agencies in planning, developing, maintaining and rehabilitating Federal lands for the benefit of fish and wildlife resources and their habitat.

Strategic Response to Asian Carp Invasion Act, (P.L. 113-121). Requires the Director of the U.S. Fish and Wildlife Service, in coordination with the Army Corps of Engineers, the National Park Service, and the U.S. Geological Survey, to lead a multiagency effort to slow the spread of Asian Carp in the Upper Mississippi and Ohio River basins and tributaries by providing high-level technical assistance, coordination, best practices, and support to state and local government strategies, to slow, and eventually eliminate, the threat posed by such carp. Enacted in the Water Resources Reform and Development Act of 2014.

Surface Mining Control and Reclamation Act, (30 U.S.C. 1201 et seq.). Authorizes the Secretary of the Interior to regulate surface mining and reclamation at existing and future mining areas. The Service provides technical assistance for fish and wildlife aspects of the Department of the Interior's programs on active and abandoned mine lands.

Water Resources Development Act*,* (90 Stat. 2921). Authorizes the Lower Snake River Compensation Plan to mitigate fish and wildlife losses caused by power generation at four Corps of Engineers dams on the Lower Snake River in Washington.

Wild Bird Conservation Act, (16 U.S.C. 4901-4916). Requires that all trade in wild birds involving the United States is biologically sustainable and to the benefit of the species, and by limiting or prohibiting imports of exotic birds when not beneficial to the species.

Youth Conservation Corps Act, (16 USC 1701-1706) as amended by P.L. 93-408, September 3, 1974. Expands and makes permanent the Youth Conservation Corps, and for other purposes. The Youth Conservation Corps (YCC) program, started in 1971, is a summer employment program for young men and women (ages 15–18) from all segments of society who work, learn, and earn together by doing projects for the U.S. Fish and Wildlife Service's National Wildlife Refuge System lands and National Fish Hatcheries. The objectives of this program (as reflected in Public Law 93-408) authorize the Department of the Interior, Fish and Wildlife Service to operate the YCC Program.

Executive Orders

The Executive Orders listed are not an exhaustive list and are those most frequently referenced and used by the Service.

Floodplain Management, (Executive Order 11988)**.** Requires that federally-owned floodplains be protected through restricting future activities that would harm the floodplain resource or withhold such properties from lease or disposal to non-Federal public or private partners.

Migratory Birds, (Executive Order 13186). Directs Federal agencies taking actions that may have measurable negative impacts on migratory bird populations to enter into memoranda of understanding (MOU) with the Service to promote conservation of migratory bird populations and directs the Secretary of the Interior to establish a multi-agency Council for the Conservation of Migratory Birds.

Protection of Wetlands, (Executive Order 11990). Requires that federally-owned wetlands proposed for lease or conveyance to non-Federal public or private parties be protected through restricting any future uses that would degrade or harm the wetland resource in the conveyance or withhold such properties from lease or disposal.

Recreational Fisheries, (Executive Order 12962). Directs Federal agencies to improve the quantity, function, and sustainable productivity, and distribution of U.S. aquatic resources for increased resources for recreational fishing opportunities. The Service and the National Marine Fisheries Service are ordered to promote compatibility and to reduce conflicts between the administration of the *Endangered Species Act* and recreational fisheries. The Secretary of the Interior is directed to expand the role of the Sport Fishing and Boating Partnership council to monitor specific Federal activities affecting aquatic systems and the recreational fisheries they support.

Combating Wildlife Trafficking, (Executive Order 13648). Directs agencies to combat the illegal poaching and wildlife trade of protected species, both domestically and internationally. Wildlife trafficking not only endangers the survival of wildlife species, but also contributes to global instability and undermines security. The Secretary of the Interior will co-chair a Presidential Task Force on Wildlife Trafficking with the Secretary of State and Attorney General, or their designees.

Improving Performance of Federal Permitting and Review of Infrastructure Projects, (Executive Order 13604). Directs agencies to make the Federal permitting and review process of infrastructure projects efficient and effective to support economic growth while ensuring the health, safety, and security of the environment and communities. Agencies are to provide transparency, consistency, and predictability in the process for both project sponsors and affected communities.

Major Treaties and Conventions

The Service is party to numerous International Treaties and Conventions, all of which cannot be listed here due to space constraints. However, those listed below are more pertinent to the daily activities of Service programs.

Convention on International Trade in Endangered Flora and Fauna, (TIAS 8249). Parties who signed the Convention in March of 1973 agreed to restrict international trade in all species threatened with extinction (Appendix I species), all species which may be threatened with extinction unless trade is halted or restricted (Appendix II species), and all species which the parties identify as being subject to regulation for the purpose of preventing or restricting exploitation (Appendix III species). Many species listed under CITES are also listed under the *Endangered Species Act*. The Service is responsible for issuing all CITES permits in the United States.

Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere, (56 Stat. 1354). Signed in October of 1940, this Convention authorizes the contracting parties to establish national parks, national reserves, nature monuments, and strict wilderness reserves for the preservation of flora and fauna, especially migratory birds.

Convention on Wetlands of International Importance Especially as Waterfowl Habitat (Ramsar), (TIAS 11084). The Ramsar Convention, ratified by over 90 nations, promotes the sustainable management of important wetlands around the world, especially as habitat for waterfowl. The Service's objective with this initiative is to strengthen worldwide collaboration regarding conservation and management of wetlands habitats which sustain resources stared by or of importance to all countries of the globe.

U.S. Fish and Wildlife Service

Resource Management

Justification of Fixed Costs and Internal Realignments

(Dollars In Thousands)

Fixed Cost Changes and Projections	2019 Total or Change	2019 to 2020 Change
Change in Number of Paid Days This row reflects changes in pay associated with the change in the number of paid days between the CY and BY.	+2,772	+2,766
Pay Raise The 2020 request reflects a pay freeze for civilian employees.	+3,654	+0
Employer Share of Federal Employee Retirement System The change reflects the directed 2.3% increase in the employer contribution to the Federal Employee Retirement System.	+0	+1,705
Departmental Working Capital Fund The change reflects expected changes in the charges for centrally billed Department services and other services through the Working Capital Fund. These charges are detailed in the Budget Justification for Departmental Management.	+995	+453
Worker's Compensation Payments The amounts reflect projected changes in the costs of compensating injured employees who suffer accidental deaths while on duty. Costs will reimburse the Department of Labor, Federal Employees Compensation Fund, pursuant to 5 U.S.C. 8147(b) as amended by Public Law 94-273.	-832	-627
Unemployment Compensation Payments The amounts reflect projected changes in the costs of unemployment compensation claims to be paid to the Department of Labor, Federal Employees Compensation Account, in the Unemployment Trust Fund, pursuant to Public Law 96-499.	+0	+0
Rental Payments The amounts reflect changes in the costs payable to the General Services Administration (GSA) and others for office and non-office space as estimated by GSA, as well as the rental costs of other currently occupied space. These costs include building security; in the case of GSA space, these are paid to the Department of Homeland Security (DHS). Costs of mandatory office relocations, i.e. relocations in cases where due to external events there is no alternative but to vacate the currently occupied space, are also included.	-407	+3,158
Baseline Adjustments for O&M Increases In accordance with space maximization efforts across the Federal Government, this adjustment captures the associated increase to baseline operations and maintenance (O&M) requirements resulting from movement out of GSA or direct-leased (commercial) space and into Bureau-owned space. While the GSA portion of fixed costs will go down as a result of these moves, Bureaus often encounter an increase to baseline O&M costs not otherwise captured in fixed costs. This category of funding properly adjusts the baseline fixed cost amount to maintain steady-state funding for these requirements.	+50	+0

Internal Realignments and Non-Policy/Program Changes (Net-Zero)	BY (+/-)
National Wildlife Refuge System/Equiptment and Vehicle Management This internal transfer is proposed to properly align funds with management of facilities and equipment.	-4,000
National Wildlife Refuge System/Maintenance Support This internal transfer is proposed to properly align funds with management of facilities and equipment.	+4,000
General Operations/Centeral Office Operations The internal transfer is proposed to reorganize administrative functions, including human resources, contracting, finance, safety, budget and performance, and risk management.	-9,613
General Operations/Management and Administration The internal transfer is proposed to reorganize administrative functions, including human resources, contracting, finance, safety, budget and performance, and risk management.	+9,613

Program Mission

The Ecological Services (ES) Program contributes to the Acting Secretary's priority of creating a conservation stewardship legacy, sustainably developing our energy and natural resources, restoring trust with our neighbors and communities, supporting Tribal sovereignty, protecting our southern border, striking a regulatory balance between sustainable economic development and providing for conservation into the future.

ES Field Offices provide leadership in environmental response and restoration and assist communities in balancing economic growth and conservation through their work to conduct timely environmental reviews

of Federal permits and projects, conserve and recover species listed under the *Endangered Species Act* (ESA), and permit take of listed species.

Program Elements

The Ecological Services program is comprised of the following program elements:

- **Listing** – Uses the best scientific and commercial information available to identify foreign and domestic plant and animal species that are in danger of extinction or likely to become in danger of extinction within the foreseeable future and thus need protection under the ESA.
- **Planning and Consultation** – Provides integrated advanced project planning, environmental review, and permitting assistance to proactively address environmental concerns in support of economic growth, demand for new infrastructure, and community development.
- **Conservation and Restoration** – Delivers proactive species conservation efforts in partnership with States, Tribes, local governments, and landowners to prevent the need to list a species when possible; protects and restores habitat important to Federal trust species; and provides databases and mapping products that are essential tools for conservation and restoration of species and habitats by landowners, other Federal and State agencies, and the public.
- **Recovery** – Works with communities and stakeholders to recover endangered and threatened species, with the goal to minimize or reduce threats to a listed species and improve their status so the species can be secured and removed from Federal protection.

Applicable Laws, Acts, and Orders

Under various statutes and authorities, the Ecological Services Program is charged with providing technical solutions and compliance with a variety of conservation laws, most specifically the *Fish and Wildlife Coordination Act* (FWCA); ESA; *Marine Mammal Protection Act* (MMPA); *National Environmental Policy Act* (NEPA); *Emergency Wetlands Resources Act*; *Clean Water Act*; *Coastal Barrier Resources Act* (CBRA); *Oil Pollution Act* (OPA); *Federal Power Act, Comprehensive Environmental Response, Compensation, and Liability Act* (CERCLA); and multiple Executive Orders. Through these operating authorities, the Service identifies potential impacts and provides solutions that prevent species and their habitats from becoming more imperiled and support the Secretary's priority of Conserving Our Land and Water.

Program Overview

The purpose of the ESA is to conserve endangered and threatened species and the ecosystems on which they depend. Before a plant or animal species can receive the protection provided by the ESA, it must first be added to the Federal lists of threatened and endangered wildlife and plants. Placing a species on the List of Endangered and Threatened Wildlife (50 CFR 17.11) or the List of Endangered and Threatened Plants (50 CFR 17.12), and designating critical habitat as required under the ESA, focuses resources and efforts by the Service and its partners on recovering the species. Through the Listing subactivity, the Service uses the best scientific and commercial information available to identify species that are in danger of extinction or likely to become so within the foreseeable future and thus need protection under the ESA.

The Service works closely with States and Tribes during the listing process, which often includes the development of a species status assessment (SSA) that reflects the best available scientific and commercial information regarding life history, biology, and the factors affecting the viability of a species. The Service maintains a national listing workplan to encourage States, Tribes and the public to undertake conservation activities now for species on the workplan so that the species does not need the protection of the ESA.[1]

Justification of 2020 Program Changes

The 2020 budget request for Listing is $11,065,000 and 68 FTE.

Listing (-$7,877,000/-51 FTE)

The request will be used by the Service to implement the approved National Listing workplan. This plan funds 90-day and 12-month petition findings, and listing, 4(d), and critical habitat rules that are required by law. The funds will support staff working on findings and rules, public hearings, printing, and economic analyses associated with critical habitat designations.

2020 Program Activities and Performance

- Support implementation of the approved National Listing Workplan. This plan identifies and prioritizes 90-day and 12-month findings, listing rules, and critical habitat rules that are required by law. Listing determinations will be based on Species Status Assessments.
- Support staff work on rules, public hearings, printing, and economic analyses for critical habitat.
- The Service has developed performance metrics to track and hold itself accountable for providing States the opportunity to provide their valuable scientific input in the SSA development process.

Program Overview

A pronghorn seen in the Pinedale Anticline natural gas field in Wyoming. Credit: Theo Stein/USFWS

Planning and Consultation is the primary customer service component of the Ecological Services program. Service staff advance the Secretary's priorities of sustainably developing our Nation's energy and natural resources, coordinating with Tribes, protecting our people and our border, striking a regulatory balance, and modernizing our Nation's infrastructure. With this funding, the Service works collaboratively with industry, agencies, Tribes, and other stakeholders to balance conservation and development needs. Service biologists work with stakeholders at the planning stages of Federally-authorized, licensed, or funded projects—from highway expansions to energy development—to ensure that development has minimal impact on wildlife and habitats. By engaging in project development and planning processes early, the Service can save taxpayers and developers money by minimizing environmental impacts of development projects, reducing threats to species in a way that helps prevent the need to list them as endangered or threatened in the future, streamlining the permitting process so that benefits are realized sooner, and reducing paperwork.

Early coordination and involvement in the project siting and design process can minimize the impacts of a project on wildlife. Engaging through the NEPA process, Ecological Services works closely with the lead Federal agency to streamline the review process for their Federal infrastructure projects. Through authority for interagency consultation under Section 7 of the ESA, the Service collaborates with its partners to identify opportunities to reduce adverse impacts of development activities with a Federal nexus. If an agency action is likely to adversely affect a listed species or critical habitat, the Federal agency must initiate consultations with the Service. This requirement may affect private individuals when their action involves Federal authorization—including permits— or funding. Service biologists provide technical assistance that identifies and explains ways to modify or reduce adverse effects of proposed projects on listed species and issue incidental take authorization for listed species so that projects can proceed on schedule and in compliance with the ESA.

Environmental review functions constitute a significant workload for the Service, and we are continuously looking for ways to improve the efficiency, consistency, transparency, and effectiveness of environmental reviews for infrastructure and other development projects. The Service is enhancing our Information for Planning and Consultation (IPaC) decision support system for streamlining the environmental review process. This allows for rapid identification of potential projects that will not affect listed species and expedites completion of requirements involving ESA section 7 consultations, section 10 HCPs, and other environmental review processes. In addition, the Service is undertaking a process to update species range maps in a way that is transparent and repeatable. Through improved range maps for listed species, the Service will be able to focus environmental reviews to areas where the species is most likely to occur.

Using the Habitat Conservation Planning authority under Section 10 of the ESA, the Service provides technical assistance to non-Federal entities in the development of Habitat Conservation Plans (HCPs) and issues incidental take permits. The Service's incidental take permit program is a flexible process for addressing situations in which a property owner's otherwise lawful activities might result in incidental take of a listed species. Through HCPs, the Service facilitates private and other non-Federal land development with proactive species and conservation planning that strike a regulatory balance for development while addressing threats to species and fulfilling species recovery needs. The HCP program encourages applicants to explore different methods to achieve compliance with the ESA and choose an approach that best suits their needs.

The Service is implementing ways to streamline its review process in coordination with other Federal agencies and provide programmatic consultations where appropriate. The Service will continue to work closely with other Federal agencies in FY 2020 to advance infrastructure projects expeditiously while minimizing adverse impacts to fish, wildlife, and plants.

Justification of 2020 Program Changes

The 2020 budget request for Planning and Consultation is $107,516,000 and 671 FTE.

Planning and Consultation Activities (+$6,101,000/+45 FTE)
The request enables the Service to build field capacity for technical assistance to Federal agencies and project proponents and continue to streamline the consultation and project review process through the development of web-based tools, reducing the regulatory burden and time commitments on project proponents, industries and other Federal agencies. Funding will support new web-based applications through IPaC as well as maintain and increase the scope and capability of existing applications to meet increased demand. In addition, the Service will invest in refined range maps for listed species to reduce the areas of consideration for consultation to those areas where development activities are most likely to affect a listed species.

NEPA Streamlining (-$2,500,000/ -1 FTE)
In FY 2018, Congress provided $2,500,000 to streamline the permitting process and achieve compliance with permitting and other statues. This work will continue to be funded under general Planning and Consultation Activities, as it continues to be a priority for the Service.

Gulf Coast Restoration (-$3,002,000/-20 FTE)
Through this funding, the Service works closely with the States and local communities in the Gulf Coast to provide timely environmental reviews of projects funded as part of the restoration from the Deepwater Horizon oil spill. Within the requested funding the Service will provide technical assistance to those activities that are critically important to the health and vitality of our Nation's natural and economic resources.

2020 Program Activities and Performance

- Provide integrated advanced project planning, environmental review, and permitting assistance to address environmental concerns in support of energy production, infrastructure, and other development activities.
- Support development and population of data in our web-based application, Information for Planning and Consultation (IPaC), to help streamline the ESA consultation process, provide clarity and transparency, and increase predictability for Federal agencies and applicants.
- Collaborate with many internal and external partners by providing technical assistance in evaluating the impacts of proposed Federal activities on fish, wildlife, and plants.
- Focus our consultation and permitting efforts on Administration and Departmental priorities, particularly priority infrastructure and energy projects.

Summary of 2020 Program Changes for Conservation and Restoration

Request Component	($000)	FTE
• Sagebrush Steppe Ecosystem	-1,506	-10
• Environmental Response and Restoration	-1,785	-11
• Candidate Conservation	-2,918	-19
Program Changes	**-6,209**	**-40**

Program Overview

The Service supports collaborative species conservation efforts, works to protect and restore habitats that are important to Federal trust species, and provides mapping products and databases that are essential tools for conservation and restoration of species and habitats by other Federal and State agencies, Tribes, and the public.

Candidate Conservation

Identification of candidate species can assist environmental planning efforts by providing advance notice of potential listings, and by allowing landowners and resource managers to alleviate threats and thereby possibly remove the need to list species as endangered or threatened. Funding through this subactivity focuses on conducting species assessments and facilitating voluntary conservation efforts. The Service routinely publishes a Candidate Notice of Review (CNOR) which is an updated list of plant and animal species native to the United States regarded as candidates for or have been proposed for listing under the ESA. By reducing threats to species and their habitats before they become critically imperiled, future conservation efforts are likely to be less costly, more flexible, and more likely to result in successful conservation over time. Even if we subsequently list a candidate species, the early notice provided can result in more options for species management and recovery by prompting earlier candidate conservation measures to alleviate threats to the species.

Marine Mammals

Also funded under this subactivity is the Service's work to conserve marine mammals. While NOAA is responsible for porpoises, dolphins and whales under the MMPA, the Service oversees protections for walruses, manatees, otters, and polar bears. Marine mammals are a resource of great cultural, aesthetic, economic, and recreational significance. The MMPA provides protection by prohibiting (with certain exceptions): (1) "take" of marine mammals in U.S. waters and by U.S. citizens on the high seas and (2) the import, export, and sale of marine mammals and marine mammal parts, and products in the U.S. Under the MMPA, marine mammal populations, and the health and stability of marine ecosystems upon which they depend, are required to be maintained at, or returned to, healthy levels.

Sea Otters are protected under the Marine Mammal Protection Act. Photo Credit: Randall Davis

Meeting the Service's mandate for the conservation of marine mammal species requires communication and cooperation with other Federal agencies, State governments, Alaska Native Organizations, scientists from numerous institutions and organizations, industry groups, and nongovernmental organizations.

National Wetlands Inventory (NWI)
The Service is the principal Federal agency tasked with providing information to the public on the distribution as well as the status and trends of our Nation's wetlands. The National Wetlands Inventory (NWI) provides a publicly available online mapping resource that gives detailed information on the abundance, characteristic, and distribution of America's wetlands. The wetland data layer underlying the mapper provides the best available data to the Nation. The Service works extensively with other Federal and State partners to continually update the data. These maps expedite conservation and business decisions on, for instance, siting of development projects near a wetland. In FY 2020, the Service will be completing the collection of data for the sixth decadal report to Congress on the status and trends of the Nation's wetlands. As required by law, the next report will provide an assessment of the health, quality, and quantity of America's wetlands that informs policy and management decisions across the Federal Government.

Coastal Barrier Resources Act (CBRA)
In the early 1980s, Congress recognized that certain Federal actions and programs have historically subsidized and encouraged development on coastal barriers, resulting in the loss of natural resources; threats to human life, health, and property; and the expenditure of millions of tax dollars each year. To remove the Federal incentive to develop these areas, CBRA designated relatively undeveloped coastal barriers along the Atlantic and Gulf coasts as part of the John H. Chafee Coastal Barrier Resources System (CBRS), and made these areas ineligible for most new Federal expenditures and financial assistance. CBRA does not prohibit or restrict development conducted with non-Federal funds.

CBRA is a map-based law, and the Service continues to take significant steps to improve efficiencies and effectiveness of CBRA administration including: (1) the release of an online CBRS Mapper that makes CBRS boundary data more accessible to property owners, project proponents, and other stakeholders who need to know whether properties or project sites may be affected by the CBRA; (2) the release of an online validation tool for the public and other Federal agencies to make a self-determination as to whether individual properties are located "in" or "out" of the CBRS which is important for the issuance of flood insurance policies, real estate transactions and federal expenditures within the CBRS; (3) finish remapping 44 percent of the total units representing 16 percent of the total acreage between Virginia and New Hampshire; and (4) resolving property determinations requested by Congress and/or property owners that require extensive land research and imagery analysis.

Environmental Response and Restoration
Our coasts, rivers, estuaries, wetlands and other natural places are home to spectacular native wildlife and provide Americans with unrivaled places to fish, hunt, and get outdoors. They also play a critical role in our economy, generating revenues from tourism and recreational activities, while providing us with clean water and performing countless other important ecological functions. The Service's Environmental Response and Restoration Program protects and restores fish and wildlife, as well as habitats that have been injured by oil discharges, and the release of hazardous substances or emerging contaminants of concern. In order to be effective in responding to emergency spills, the Service must maintain a cadre of trained responders. Funding in this subactivity is critical to maintain the Occupational Safety and Health Administration's required training certificates or medical monitoring, to supply responders and Natural Resources Damage Assessment and Restoration (NRDAR) practitioners with the equipment and supplies to prevent exposure to spilled oil or environmental contaminants, and to conduct associated pre-assessment investigations. Trained responders will increase the Service's capacity to provide technical support and expertise to the U.S. Coast Guard and Environmental Protection Agency during spill events.

The Environmental Response and Restoration program within Ecological Services oversees the NRDAR activities nationwide. In order to achieve restoration, the Service must provide technical expertise to convert damage assessment awards to on-the-ground restoration. The Service uses this funding to provide support to ongoing cases and conduct early investigations that could potentially lead to restoration projects worth millions of dollars. For example, through ongoing cases in FY 2018, the Service, in coordination with co-trustees, put more than $120 million on the ground to restore fish and wildlife for the American people: enhancing or restoring nearly 2,000 acres, managing more than 40,000 acres, and protecting more than 7,000 acres. As a result, nearly 6,000 acres were made available for recreational use through the use of NRDAR funds. In FY 2017, the NRDAR program managed more than $13.5 million in funds recovered from responsible parties to implement restoration projects for the benefit of the American people. Based upon a recent report, the Service estimated that FY 2017 projects generated approximately $46 million for the economy and 480 year-long jobs.

Justification of 2020 Program Changes

The 2020 budget request for Conservation and Restoration is $26,441,000 and 160 FTE.

Sagebrush Steppe Ecosystem (-$1,506,000/-10 FTE)
With the requested funding, the Service will continue to work with Federal and State partners to implement important on the-ground conservation efforts for species within the sagebrush ecosystem.

Environmental Response and Restoration: (-$1,785,000/-11 FTE)
The Service will prioritize work in spill response and engagement with NRDAR trustees.

Candidate Conservation (-$2,918,000/-19 FTE)
Priority will be given to administering the Candidate Notice of Review (CNOR). The Service will rely on the States to assume the role in providing technical assistance for all CCAAs and CCAs. Guided by the national listing workplan, the States can leverage their expertise and relationships to provide landowners with technical assistance to achieve specific conservation goals for candidate and petitioned species and thus potentially eliminate the need to list a species.

2020 Program Activities and Performance

- Deliver proactive species conservation efforts in partnership with other Federal agencies, States, Tribes, local governments, and landowners to prevent the need to list a species when possible; protect and restore habitat important to Federal trust species; and provide databases and mapping products that are essential tools for conservation and restoration of species and habitats by landowners, other Federal and State agencies, and the public.

• State of the Birds	-3,000	-20
• Recovery Challenge	-5,000	-33
Program Changes	**+3,127**	**+22**

Program Overview

Preventing extinction and achieving recovery of listed species has always been, and will continue to be, one of the Service's highest priorities. It serves the Acting Secretary's objective of conserving our land and water by managing its fish and wildlife. The goal of Recovery is to minimize or remove the threats that led to the species' listing and to work toward reclassifying the species from endangered to threatened, and toward delisting the species altogether. This process requires technical leadership, monitoring, planning, and management together with close coordination with Service partners. The Service plays a vital role in guiding the recovery planning process, and in facilitating, supporting, and monitoring the implementation of recovery actions by the Service and others.

Recovery plans, non-regulatory blueprints for the work that needs to be done to achieve downlisting or delisting a species under the ESA, are required under the ESA. Recovery plans are developed collaboratively with interested partners. Recovery plans may address multiple species, identify specific recovery tasks, establish downlisting and delisting criteria, and provide timetables and cost estimates. There is a public review process for each draft recovery plan. The Service advances the Secretary's priorities of creating a conservation stewardship legacy and striking a regulatory balance by enhancing and increasing partnerships with agencies and organizations to implement highest priority recovery actions identified in recovery plans for endangered and threatened species under the trusteeship of the Service in the United States and its Territories, such that known threats to the species may be reduced or eliminated.

The ESA requires the Service to review the status of listed species once every five years to determine whether the current listing status, as endangered or threatened, is still appropriate. This assessment includes a notice to the public requesting information on the species under review. These documents are important tools to gather new information, assess threats to the species, and validate whether protection under the ESA is still necessary.

Service biologists support the implementation of the ESA via collaborative conservation actions that are advantageous, feasible, and practicable for all parties. Staff provides technical assistance to our partners to champion recovery projects on the ground. Recovery projects can range from habitat restoration to captive rearing and reintroduction to landowner agreements that will provide Safe Harbors to one or more listed

species for a set period of time. Safe Harbor Agreements provide assurances that non-Federal conservation actions (e.g., habitat restoration, reintroduction), will not result in additional regulation on the landowner.

Justification of 2020 Program Changes

The 2020 budget request for Recovery of Listed Species is $95,000,000 and 491 FTE.

Recovery Activities (+$15,520,000/+103 FTE)
The Service is focused on the ESA mandates that are inherently Federal, including development of recovery plans, five-year status reviews, and has prioritized rulemakings to downlist or delist species whose status has improved. In FY 2018, the Service developed a national workplan for downlisting and delisting rulemakings and submitted a total of 26 proposed or final rules to reclassify a species, exceeding the target of eight rules. In FY 2019, the Service anticipates proposing or finalizing 36 delisting and downlisting actions. At the requested FY 2020 funding level, the Service expects to propose or finalize 36 delisting or downlisting rules. The request will support the Service's capacity to work with other DOI bureaus, Federal agencies, States, and other stakeholders, to ensure recovery plans have objective and measurable recovery criteria and address five-year status review recommendations on the national workplan. The Service has established a process to revise recovery plans to ensure that each plan has quantitative criteria for what constitutes a recovered species, and is implementing a streamlined approach to recovery planning to facilitate timely development of plans for all newly listed species.

Wolf-Livestock Demonstration Program (-$1,000,000/-6 FTE)
The request does not continue this dedicated funding and focuses resources on recovery activities.

Delisting and Downlisting (-$1,393,000/-9 FTE)
The Service remains committed to prioritizing delisting and downlisting rulemakings through species recovery activities. The request will support implementation of the Service National Delisting and Downlisting Workplan in addressing five-year status review recommendations and substantive petitions to downlist and delist species over the next three years (FY 20-22).

White Nose Syndrome (-$2,000,000/-13 FTE)
The request does not continue this dedicated funding and focuses resources on recovery activities.

State of the Birds (-$3,000,000/-20 FTE)
The request does not continue this dedicated funding and focuses resources on recovery activities.

Recovery Challenge (-$5,000,000/-33 FTE)
The request does not continue this dedicated funding and focuses resources on recovery activities.

2020 Program Activities and Performance

- Support our work to complete the recovery responsibilities required of the Service by statute - preparing recovery plans for newly listed species within two and a half years of the final listing, working through recovery plan backlog, completing five-year reviews for approximately 20% of the species annually, acting on the recommendations to reclassify or delist species, and encourage collaborative partnerships with others for recovery implementation. At the requested FY 2020 funding level, the Service expects to finalize 36 delisting or downlisting rules.
- Ensure that all final recovery plans have quantitative criteria for what constitutes a recovered species and are completed in a timely manner.

Program Mission

Habitat Conservation, which includes the Partners for Fish and Wildlife (PFW) Program and the Coastal Program, provides technical and financial assistance to private landowners and other conservation partners to voluntarily protect, conserve, and restore their lands. By working together, the Service helps landowners keep their working lands in traditional uses and implement habitat improvement and conservation projects.

Program Elements

The PFW and Coastal Programs take a cooperative approach to deliver on-the-ground conservation in targeted geographic areas. Locally-based field biologists have an intimate knowledge of the natural resource concerns and conservation challenges in their communities. Field staff work with local communities, private landowners, and other stakeholders to leverage partners' resources and Federal dollars to support conservation strategies on public and private lands. These efforts help conserve America's traditional land uses for future generations, support robust fish and wildlife populations for recreational use by the American public, address conservation challenges such as invasive species and habitat fragmentation, and buffer important infrastructure from storm damages.

A large part of PFW work includes coordinating with the U.S. Department of Agriculture (USDA) to provide technical assistance in the development, implementation, and evaluation of Farm Bill conservation

programs and initiatives to meet shared conservation goals. This work includes delivery of fish and wildlife technical assistance associated with implementation of any new programs, rules, or policies resulting from the passage of the Farm Bill in FY 2019, as well as the continuation of effective partnerships with USDA that help sustain wildlife populations and agricultural production.

Activity: Habitat Conservation
Subactivity: Partners for Fish and Wildlife

Program Overview

The PFW Program is a voluntary, citizen, and community-based stewardship program for fish and wildlife conservation on private land. Through the PFW Program, the Service and private landowners work collaboratively to implement local conservation strategies. In turn, these restored areas provide valuable benefits to the surrounding communities by supporting tourism and recreation, protecting infrastructure from flood damage, and supporting America's agricultural production by conserving soil, controlling pests, and benefitting pollinators. Funds spent in support of restoration projects create jobs, generate tax revenues, and economic activity as wages and purchases flow through the economy. A Service report found that for every $1 the program contributed to a project, $15.70 was generated in economic returns.[1]

To promote pollinator habitat, the Service teamed up with Pheasants Forever and Quail Forever to promote shooting sports and plant seed at the same time through this innovative Pollinating Pigeon. When used for target shooting, native grass and flower seeds are delivered across fields, providing habitat and vegetation for wildlife such as monarchs, deer, and quail. Credit: USFWS

In FY 2018, the PFW Program worked with private landowners and partners to complete 2,439 project accomplishments across the Nation. In total, the PFW Program has restored approximately 6.4 million acres of habitat while leveraging program dollars at a ratio of 4:1 or greater. These acres, coupled with over 13,500 miles of enhanced stream habitat, provide valuable habitat for Federal trust species while allowing enjoyment by the American people and their families, for generations to come.

[1] https://www.fws.gov/home/pdfs/restoration-returns.pdf p. 7

Justification of 2020 Program Changes

The 2020 budget request for Partners for Fish and Wildlife is $54,417,000 and 238 FTE.

Partners for Fish and Wildlife Activities (+5,079,000/+5 FTE)
At the requested funding level, the Service will restore and enhance an estimated 34,497 wetland acres, 211,073 upland acres, 620 riparian miles, and 115 fish passage structures.

Washington Salmon Recovery/ Environmental Data Quality and Access (-$643,000/+0 FTE)
The Service is not requesting funding for this activity in order to address other priorities.

Chesapeake Bay Nutria Eradication (-$688,000/+0 FTE)
At the requested funding level, this program will control bio-monitoring and ensure eradication efforts have been successful.

Washington Regional Fisheries Enhancement Group (-$1,285,000/+0 FTE)
The Service is not requesting funding for this activity in order to address other priorities.

2020 Program Activities and Performance
