Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media required but not yet completed. Target date for submitting to the *Federal Register* being re-evaluated in light of furlough delays. Notice of intent to sue over delay was submitted by Center for Biological Diversity during furlough.

Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA

Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle 12-month finding – FWS has reached an agreement with the American Stewards of Liberty, the Independent Petroleum Association of America and Osage Producers Association (Plaintiffs) to publish a 12-month finding for the American burying beetle no later than April 30, 2019. The American burying beetle is currently listed as endangered and is known to have occurred in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. (See related DSL CCA/A entry in Recovery section below.)

Wright's marsh thistle listing and critical habitat – FWS anticipates publishing in late October a proposal to list as threatened the Wright's marsh thistle and designate 159 acres of critical habitat in southern New Mexico. Wright's marsh thistle is a wetland thistle that occurs in small wet meadows, alkaline seeps and cienegas, widely dispersed through five counties. The eight occupied areas are being proposed for critical habitat designation. Outreach planning is underway.

Other Items of Note

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts (CPA) has applied to the Fish and Wildlife Service (Service) for an enhancement of survival (EOS) permit pursuant to the Endangered Species Act (ESA). The permit application includes a draft candidate conservation agreement with assurances (CCAA) for the dune sagebrush lizard (DSL) in west Texas and covers Andrews, Gaines, Winkler, Ward, Ector and Crane counties in Texas. The CCAA, and associated permit, would authorize incidental take resulting from activities covered by the CCAA (e.g., oil and gas, sand mining, renewable energy, agriculture and ranching activities) as well as incidental take resulting from actions taken to avoid, minimize, and offset disturbance of DSL habitat that result from the covered activities. If approved the EOS and CCAA would be in effect for 30 years. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*.

The Draft Environmental Impact Statement on the Lower Colorado River Authority Transmission Services Company's (LCRA TSC) Habitat Conservation Plan (HCP)- The FWS will be requesting a briefing with the DOI NEPA Review team to seek clearance to publish the Notice of Availability in the Federal Register. The HCP covers operation, maintenance, and construction of new transmission lines for a period of 30 years. It covers an area of 241 counties in Texas and supports an incidental take permit for 22 federally listed species and one non-listed species, should it be listed. If approved, it will provide regulatory certainty for the covered activities that may take these species, streamline LCRA TSC's activities in the covered area, and provide conservation for the species commensurate with the impacts of the take. We are seeking approval from the DOI NEPA Review Team in time to publish on April 12, 2019. Outreach, including issuing a news release to media and notification of congressionals and partners, is planned to occur at time of publication in the *Federal Register*.

Georgetown and Salado Salamanders litigation - On December 4, 2018, the Center for Biological Diversity filed a Notice of Intent to sue the U.S. Fish and Wildlife Service for failing to designate critical habitat in central Texas for the Georgetown and Salado salamanders.

Peppered chub Species Status Assessment (SSA) – The FWS is finalizing a SSA report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The draft SSA was reviewed by interested partners and sent to several peer reviewers; however, we did not receive any peer reviewer comments. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, requiring Regional Director signature by September 28. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Release of the announcement of the plan has been repeatedly delayed pending more thorough reviews of the communications package (now complete). R2 seeks to announce in February.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service

is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

Ocelot 5-year Review - The Ocelot is a medium-sized spotted cat found from southern Texas and southern Arizona through Central and South America into northern Argentina and Uruguay. It was listed as an endangered species in 1972. In July 2016, a final revised recovery plan for ocelot was completed. That plan included involvement from partners in Arizona, Texas and Mexico. The recovery plan informed the development of a 5-year review for the ocelot that was completed in July 2018. The 5-year review recommends no status change for the ocelot. The 5-yr review will be shared on the Southwest Region's Ecological Services webpage.

National Wildlife Refuge Actions

[NEW] Anahuac National Wildlife Refuge (TX) was hard hit by Hurricane Harvey in August of 2017. The Refuge recently received relief funding for recovery projects and is currently resurfacing a popular boardwalk to repair damages incurred from submerging during the storm. The resurfacing project will last approximately one month and will ensure that the 0.14 mile Boardwalk Trail allows for easy access for all visitors, including accessible access.

[NEW] Developing the Next Generation of Hunters

Thanks to a partnership between the Furr High School-Institute for Innovative Thinking (Furr HS), Texas Youth Hunt Program (TYHP), Murphy Farms, and the Service's Houston Community Partnerships and Engagement program (HCP&E), 10 students will spend the weekend of March 29 hunting feral hogs on private lands. Hunt Masters/volunteers will mentor/guide each young hunter to ensure a safe and successful hunt. The goal of the partnership is to introduce the next generation of hunters to a diversity of experiences and opportunities. Prior to this private lands hunt, nine Furr HS students spent a weekend in December hunting white-tailed deer on Aransas National Wildlife Refuge.The result of this partnership is that the students, most of whom have no hunting experience or even held a firearm, will have successfully completed Hunter Ed Safety and participated in a public or private lands hunt -- or both. The program ensures young hunters receive the full experience, including target practice, firearm safety drills, field dressing, wildlife identification, hunter ethics, camping and leave no trace. Furr HS has a 98% minority enrollment with 93% of the student body on free or reduced lunch.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

A short video documenting captive spawning of threatened Apache trout has gone viral on Facebook, reaching nearly 500,000 views. The video shows conservation workers from Alchesay Williams Creek National Fish Hatchery, Arizona Fish and Wildlife Conservation Office and White Mountain Apache Tribe collecting and fertilizing Apache trout eggs, as well as collecting ovarian fluid for health assessment by staff at the Southwestern Native Aquatic Resources and Recovery Center.

Migratory Birds

Issued a 30-year eagle incidental take permit to Osage Wind, LLC Dec 20th, and the final EA/FONSI should be posted to the website in the next couple of weeks. Currently waiting on 508 compliance and a potential furlough.

Science Applications

Nothing significant to report.

Wildlife and Sport Fish Restoration

Nothing significant to report.

Native American Programs

[NEW] The New Mexico Ecological Services Office will have a Tribal ESA Workgroup meeting Apr 17 in Albuquerque.

Arizona Ecological Services Office will hold its annual Arizona Inter-tribal coordination meeting April 2-3.

Week Ahead Schedule of Meetings, Hearings, and Travel
Washita National Wildlife Refuge in Oklahoma is gearing up for its annual Youth Turkey Hunt April 12-14, 2019. (Full details on **page 6**.)

Immediate Announcements and Actions (within the next 14 days)

[NEW] Bi-National Jaguar recovery plan announcement slated for April 11, 2019. (Full details on **page 5**.)

15-60 Day Look Ahead
[NEW] **Lower Colorado** River Authority Transmission Services Company's (LCRA TSC) Habitat Conservation Plan - We are seeking approval from the DOI NEPA Review Team in time to publish on April 26, 2019. (Full details on **page 4**.)

[NEW] The Independent Petroleum Association of America and Osage Producers Association (Plaintiffs) to publish a 12-month finding for the American burying beetle no later than April 30, 2019. [Full details on pages 2-3.]

Upcoming Workshops & Meetings

Nothing significant to report.

Endangered Species Act Recovery Actions

[UPDATE] Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is **early summer** 2019. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

Lesser Prairie Chicken
Lesser Prairie-Chicken litigation - On February 14, 2019, the Center for Biological Diversity, Defenders of Wildlife and Wild Earth Guardians, sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to make a 12-month finding for the lesser prairie chicken.

Lesser prairie-chicken SSA – Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others.

American Burying Beetle
American Burying Beetle 12-month finding – FWS has reached an agreement with the American Stewards of Liberty, the Independent Petroleum Association of America and Osage Producers Association (Plaintiffs) to publish a 12-month finding for the American burying beetle no later than April 30, 2019. The American burying beetle is currently listed as endangered and is known to have occurred in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

Two Sky Island Plants (**Batram's stonecrop** and **beardless cinchweed**) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media required but not yet completed. Target date for submitting to the *Federal Register* being re-evaluated in light of furlough delays. Notice of intent to sue over delay was submitted by Center for Biological Diversity during furlough.

Dunes Sagebrush Lizard Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. (See related DSL CCA/A entry in Recovery section below.)

Other Items of Note

Dunes Sagebrush Lizard Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts (CPA) has applied to the Fish and Wildlife Service (Service) for an enhancement of survival (EOS) permit pursuant to the Endangered Species Act (ESA). The permit application includes a draft candidate conservation agreement with assurances (CCAA) for the dune sagebrush lizard (DSL) in west Texas and covers Andrews, Gaines,

Winkler, Ward, Ector and Crane counties in Texas. The CCAA, and associated permit, would authorize incidental take resulting from activities covered by the CCAA (e.g., oil and gas, sand mining, renewable energy, agriculture and ranching activities) as well as incidental take resulting from actions taken to avoid, minimize, and offset disturbance of DSL habitat that result from the covered activities. If approved the EOS and CCAA would be in effect for 30 years. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*.

Lower Colorado River Authority Transmission Services Company's (LCRA TSC) **Habitat Conservation Plan** (HCP)- The FWS will be requesting a briefing with the DOI NEPA Review team to seek clearance to publish the Notice of Availability in the Federal Register. The HCP covers operation, maintenance, and construction of new transmission lines for a period of 30 years. It covers an area of 241 counties in **Texas** and supports an incidental take permit for 22 federally listed species and one non-listed species, should it be listed. If approved, it will provide regulatory certainty for the covered activities that may take these species, streamline LCRA TSC's activities in the covered area, and provide conservation for the species commensurate with the impacts of the take. We are seeking approval from the DOI NEPA Review Team in time to publish on April 26, 2019. Outreach, including issuing a news release to media and notification of congressionals and partners, is planned to occur at time of publication in the *Federal Register*.

Georgetown and Salado Salamanders litigation - On December 4, 2018, the Center for Biological Diversity filed a Notice of Intent to sue the U.S. Fish and Wildlife Service for failing to designate critical habitat in central Texas for the Georgetown and Salado salamanders.

Peppered chub Species Status Assessment (SSA) – The FWS is finalizing a SSA report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The draft SSA was reviewed by interested partners and sent to several peer reviewers; however, we did not receive any peer reviewer comments. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during

Commented [BAH3R2]:

the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

The U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team have completed the final recovery plan for the jaguar, which was signed by the Regional Director in Summer 2018. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Release of the announcement of the plan has been repeatedly delayed pending more thorough reviews of the communications package (now complete). Announcement is slated for April 11, 2019.

Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The Texas hornshell was listed as endangered on February 9, 2018. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical

habitat designation. A full communications package has been drafted including a news release and FAQs.

National Wildlife Refuge Actions

[NEW] Washita National Wildlife Refuge in Oklahoma is gearing up for its annual Youth Turkey Hunt April 12-14, 2019. The hunt is conducted in partnership with the Oklahoma Department of Wildlife Conservation and is administered through the state's Controlled Hunt Program. To provide a quality experience for the young hunters and an optimal chance of harvesting a turkey, only 5 tags are issued and each hunter must be accompanied by an adult.

Anahuac National Wildlife Refuge (TX) was hard hit by Hurricane Harvey in August of 2017. The Refuge recently received relief funding for recovery projects and is currently resurfacing a popular boardwalk to repair damages incurred from submerging during the storm. The resurfacing project will last approximately one month and will ensure that the 0.14 mile Boardwalk Trail allows for easy access for all visitors, including accessible access.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

On April 17, the FWS New Mexico Ecological Services Office will have a Tribal ESA Workgroup meeting in Albuquerque.

Endangered Species Act Recovery Actions

Approximately June 20th: Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is early Summer 2019. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

Dunes Sagebrush Lizard

[UPDATE] Anticipated the week of April 29: Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. (See related DSL CCA/A entry in Recovery section below.)

Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts (CPA) has applied to the Fish and Wildlife Service (Service) for an enhancement of survival (EOS) permit pursuant to the Endangered Species Act (ESA). The permit application includes a draft candidate conservation agreement with assurances (CCAA) for the dune sagebrush lizard (DSL) in west Texas and covers Andrews, Gaines, Winkler, Ward, Ector and Crane counties in Texas. The CCAA, and associated permit, would authorize incidental take resulting from activities covered by the CCAA (e.g., oil and gas, sand mining, renewable energy, agriculture and ranching activities) as well as incidental take resulting from actions taken to avoid, minimize, and offset disturbance of DSL habitat that result from the covered activities. If approved the EOS and CCAA would be in effect for 30 years. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*.

Lesser Prairie Chicken

Lesser Prairie-Chicken litigation - On February 14, 2019, the Center for Biological Diversity, Defenders of Wildlife and Wild Earth Guardians, sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to make a 12-month finding for the lesser prairie-chicken.

Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies. The SSA Report provides the best available science to inform future Endangered Species Act decisions and conservation actions related to the LPC. FWS continues work to strengthen relationships and increase coordination with partners by regularly reaching out on a one-on-one basis, coordinating and hosting several regularly scheduled calls, and working with WAFWA, the states and others

Commented [3]: +aislinn_maestas@fws.gov _Assigned to Aislinn Maestas_

Commented [4]: need some dates for this stuff

American Burying Beetle

No later than April 30: American Burying Beetle 12-month finding – FWS has reached an agreement with the American Stewards of Liberty, the Independent Petroleum Association of America and Osage Producers Association (Plaintiffs) to send to the *Federal Register* a 12-month finding for the American burying beetle no later than April 30, 2019. The American burying beetle is currently listed as endangered and is known to have occurred in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

American Burying Beetle litigation - On September 4, 2018, the Center for Biological Diversity sued the Department of the Interior and the U.S. Fish and Wildlife Service for failing to release documents related to the 12-month finding for the American burying beetle.

[No date on this entry] Two Sky Island Plants (**Batram's stonecrop** and **beardless cinchweed**) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass

species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch (National Audubon Society). A regional news release to all interested parties and the media required but not yet completed. Target date for submitting to the *Federal Register* being re-evaluated in light of furlough delays. Notice of intent to sue over delay was submitted by Center for Biological Diversity during furlough.

Other Items of Note

Lower Colorado River Authority Transmission Services Company's (LCRA TSC) **Habitat Conservation Plan** (HCP)-

On or around April 26, FWS plans to publish in the Federal Register a notice of availability for the Lower Colorado River Authority Transmission Services Company's (LCRA TSC) habitat conservation plan (HCP). The HCP covers operation, maintenance, and construction of new transmission lines for a period of 30 years. It covers an area of 241 counties in Texas and supports an incidental take permit for 22 federally listed species and one non-listed species, should it be listed. If approved, it will provide regulatory certainty for the covered activities that may take these species, streamline LCRA TSC's activities in the covered area, and provide conservation for the species commensurate with the impacts of the take. FWS will request a briefing with the DOI NEPA Review Team to seek clearance in time to publish on April 26, 2019. Outreach, including issuing a news release to media and notification of congressionals and partners, is planned to occur at time of publication in the Federal Register.

Peppered chub Species Status Assessment (SSA)

Publishing anticipated Jun 20: The FWS is finalizing a SSA report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The draft SSA was reviewed by interested partners and sent to several peer reviewers; however, we did not receive any peer reviewer comments. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

Central Texas mussels Species Status Assessment (SSA) report – FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following four freshwater mussel species in central Texas- false spike, Texas fatmucket, Texas fawnsfoot and Texas pimpleback. The SSA was reviewed by peer

reviewers and agency partners (including Texas Parks and Wildlife and the Comptroller of Public Accounts). The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy for two species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback. The SSA will inform future Endangered Species Act decisions and conservation actions related to the four Central Texas mussels.

Draft submitted August 21: Leander Independent School District (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The revised draft HCP is being reviewed. If approved by the FWS, a draft Environmental Assessment to analyse the effects of issuing an ITP will be published for public review and comment. A decision on issuance of the ITP will be made after the public comment period closes. The ITP would provide the applicant with compliance under the Endangered Species Act for activities including the construction, use and maintenance activities associated with a proposed secondary access road. Significant Congressional interest, as well as strong opposition from other parties.

The jaguar recovery plan was slated for April 11, 2019. In the Summer of 2018 the U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team completed the final recovery plan for the jaguar, which was signed by the Regional Director. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Release of the announcement of the plan has been repeatedly delayed pending more thorough reviews of the communications package (now complete). Announcement is slated for April 11, 2019.

The Texas hornshell was listed as endangered on February 9, 2018. Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles

of the proposed critical habitat designation. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

National Wildlife Refuge Actions

Washita National Wildlife Refuge Youth Turkey Hunt April 12-14, 2019. The hunt is conducted in partnership with the Oklahoma Department of Wildlife Conservation and is administered through the state's Controlled Hunt Program. To provide a quality experience for the young hunters and an optimal chance of harvesting a turkey, only 5 tags are issued and each hunter must be accompanied by an adult.

Anahuac National Wildlife Refuge (TX) was hard hit by Hurricane Harvey in August of 2017. The Refuge recently received relief funding for recovery projects and is currently resurfacing a popular boardwalk to repair damages incurred from submerging during the storm. The resurfacing project will last approximately one month and will ensure that the 0.14 mile Boardwalk Trail allows for easy access for all visitors, including accessible access.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Fish and Aquatic Conservation

Nothing significant to report.

Migratory Birds

On Dec 29th, FWS issued a 30-year eagle incidental take permit to Osage Wind LLC, and the final EA/FONSI should be posted to the website in the next couple of weeks. Currently waiting on 508 compliance and a potential furlough.

Week Ahead Schedule of Meetings, Hearings, and Travel

Nothing significant to report

Immediate Announcements and Actions (within the next 14 days)

On or around April 26, FWS plans to publish in the Federal Register a notice of availability for the Lower Colorado River Authority Transmission Services Company's (LCRA TSC) habitat conservation plan (HCP). (More details under Other Items of Note).

No later than April 30: The Independent Petroleum Association of America and Osage Producers Association (Plaintiffs) to publish a 12-month finding for the American burying beetle no later than April 30, 2019. [Details under ESA Actions]

Anticipated the week of April 29: Dune sagebrush lizard listing determination. (More details under ESA Actions)

15-60 Day Look Ahead

Nothing significant to report.

Upcoming Workshops & Meetings

Nothing significant to report.

Endangered Species Act Recovery Actions

Approximately June 20th: Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is early Summer 2019. No controversy anticipated. Communications package is prepared.

Endangered Species Act Listing Actions

[UPDATE] Anticipated the week of April 29: Petition to List as Threatened or Endangered - The FWS received a petition on June 1, 2018, from Defenders of Wildlife and the Center for Biological Diversity to list the dunes sagebrush lizard (DSL) as a threatened or endangered species and designate critical habitat. The Service continues to review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. We must make initial findings on petitions within 90 days after receiving the petition, to the maximum extent practicable. FWS currently has a significant backlog of petition findings, and limited resources to complete these findings and other listing functions. The Service will review the petition to determine whether or not it provides substantial information warranting a more in-depth 12-month status review. (See related DSL CCA/A entry in Recovery section below.)

[UPDATE] - (LISD) Draft Habitat Conservation Plan and Incidental Take Permit – On August 21, 2018, LISD submitted a revised draft habitat conservation plan (HCP) in support of their application for an incidental take permit (ITP) on the proposed construction of a secondary access road at the joint Vandegrift High School and Four Points Middle School campus in northwest Travis County, Texas. The FWS will be sending a letter to LISD informing them that at this time we cannot process their application because they do not have access to or own the land on which they want to construct the access road. Congressional interest in this issue.
On or around April 26, FWS plans to publish in the Federal Register a notice of availability for the Lower Colorado River Authority Transmission Services Company's (LCRA TSC) habitat conservation plan (HCP). The HCP covers operation, maintenance, and construction of new transmission lines for a period of 30 years. It covers an area of 241 counties in Texas and supports an incidental take permit for 22 federally listed species and one non-listed species, should it be listed. If approved, it will provide regulatory certainty for the covered activities that may take these species, streamline LCRA TSC's activities in the covered area, and provide conservation for the species commensurate with the impacts of the take. FWS will request a briefing with the DOI NEPA Review Team to seek clearance in time to publish on April 26, 2019. Outreach, including issuing a news release to media and notification of congressionals and partners, is planned to occur at time of publication in the Federal Register.

Texas Candidate Conservation Agreement with Assurances - The Texas Comptroller of Public Accounts (CPA) has applied to the Fish and Wildlife Service (Service) for an enhancement of

survival (EOS) permit pursuant to the Endangered Species Act (ESA). The permit application includes a draft candidate conservation agreement with assurances (CCAA) for the dune sagebrush lizard (DSL) in west Texas and covers Andrews, Gaines, Winkler, Ward, Ector and Crane counties in Texas. The CCAA, and associated permit, would authorize incidental take resulting from activities covered by the CCAA (e.g., oil and gas, sand mining, renewable energy, agriculture and ranching activities) as well as incidental take resulting from actions taken to avoid, minimize, and offset disturbance of DSL habitat that result from the covered activities. If approved the EOS and CCAA would be in effect for 30 years. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned for the announcement in the *Federal Register*.

Lesser prairie-chicken SSA – FWS has competed the Species Status Assessment (SSA) Report for the lesser prairie-chicken (LPC). FWS began work on a Species Status Assessment in the spring of 2015, prior to the court ruling that vacated the listing of the LPC and the petition to relist the species. FWS had the SSA Report reviewed by the external working group (biologists from the 5 states, WAFWA, NRCS, and academics), independent peer reviewers, and the directors of the State Fish & Wildlife Agencies.

No later than April 30: American Burying Beetle 12-month finding – FWS has reached an agreement with the American Stewards of Liberty, the Independent Petroleum Association of America and Osage Producers Association (Plaintiffs) to send to the *Federal Register* a 12-month finding for the American burying beetle no later than April 30, 2019. The American burying beetle is currently listed as endangered and is known to have occurred in Arkansas, Kansas, Massachusetts, Nebraska, Ohio, Oklahoma, Rhode Island, South Dakota, and Texas. Outreach, including issuing a news release and FAQs to media, congressionals and partners as well as posting information on social media is planned to occur at time of publication in the *Federal Register*. Region 2 is lead, and coordinating with Regions 3, 4, 5, and 6.

Two Sky Island Plants (Batram's stonecrop and beardless cinchweed) –FWS will make a proposed listing determination for two Arizona/Mexico plants. Bartram's stonecrop is a plant native to southern Arizona and northern Mexico. Proposed critical habitat is determined to be not prudent for Bartram's stonecrop due to the threat of collection. FWS will make a proposed listing determination and proposed critical habitat designation for beardless cinchweed, a plant native to southern Arizona and northern Mexico. The proposed approximately 10,604 acres as critical habitat for beardless cinchweed designation includes approximately 7,713 ac (3,121 ha) of currently occupied habitat and 2,891 ac (1,170 ha) of unoccupied habitat. The unoccupied critical habitat is a portion of historical populations where non-native grass species are limited. These actions are not expected to be opposed and media coverage is expected to be neutral. Interested stakeholders include the U.S. Forest Service, National Park Service, Bureau of Land Management, Arizona Department of Agriculture, and Appleton-Whittell Research Ranch

(National Audubon Society). Notice of intent to sue over delay was submitted by Center for Biological Diversity during furlough. A news release is being prepared.

Other Items of Note

[UPDATE] Central Texas mussels Species Status Assessment (SSA) report – FWS expects to make a recommendation in fall, 2019, to propose one or more of the six central Texas mussel species as threatened or endangered with critical habitat, or withdraw from the candidate list. FWS has been working since spring 2017 with state and federal agencies, universities, and others to compile and analyze the best available data on the following six freshwater mussel species in central Texas- false spike, Texas fatmucket, Guadalupe fatmucket, Texas fawnsfoot, Texas pimpleback, and Guadalupe orb. Peer reviewers and agency partners (including Texas Parks and Wildlife, River Authorities, and the Comptroller of Public Accounts) reviewed the SSA. The Service received important suggestions from the partner reviewers during the initial review related to the taxonomy of the species. The suggestions are reflected in the most recent update of the draft SSA Report through taxonomic revisions for the Texas fatmucket and the Texas pimpleback, and inclusion of the Guadalupe fatmucket and Guadalupe orb. The SSA will inform future Endangered Species Act decisions and conservation actions related to the six Central Texas mussels.

Publishing anticipated Jun 20: The FWS is finalizing a SSA report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The draft SSA was reviewed by interested partners and sent to several peer reviewers; however, we did not receive any peer reviewer comments. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

The jaguar recovery plan was slated for April 11, 2019. In the Summer of 2018 the U.S. Fish and Wildlife Service and the binational Jaguar Recovery Team completed the final recovery plan for the jaguar, which was signed by the Regional Director. The plan sets goals for improving the species' status through its entire 19-country range and provides a framework for achieving recovery. The recovery plan focuses on the cat's population in northwestern Mexico and the southwestern United States – recommending site-specific conservation actions such that the population can most effectively rebound and contribute to the entire species' recovery. Recovery team and cooperating partners have been advised. Release of the announcement of the plan has been repeatedly delayed pending more thorough reviews of the communications package (now complete). Announcement is slated for April 11, 2019.

The Texas hornshell was listed as endangered on February 9, 2018. Texas Hornshell Proposed Critical Habitat – FWS is proposing to designate 463.6 river miles of critical habitat for the Texas hornshell, a freshwater mussel found in Texas and New Mexico. The proposed critical habitat for the Texas hornshell is located in five units in the Rio Grande (304.1 river miles), Black River (9.7 river miles), Delaware River (31.1 river miles), Pecos River (85.7 river miles), and Devils River (33 river miles). The units are located in Eddy County, New Mexico and in Culberson, Brewster, Terrell, Pecos, Val Verde, Kinney, Maverick and Webb Counties, Texas. The Service is considering excluding Unit 1 (Black and Delaware Rivers) due to the Candidate Conservation Agreement (CCA) and Candidate Conservation Agreement with Assurances (CCAAs) that are in place. In total, the Service is considering the exclusion of 40.8 river miles of the proposed critical habitat designation. The public will have 60 days to review and comment on the proposed rule, a draft economic analysis and draft environmental assessment of the proposed critical habitat designation. A full communications package has been drafted including a news release and FAQs.

National Wildlife Refuge Actions

Anahuac National Wildlife Refuge (TX) was hard hit by Hurricane Harvey in August of 2017. The Refuge recently received relief funding for recovery projects and is currently resurfacing a popular boardwalk to repair damages incurred from submerging during the storm. The resurfacing project will last approximately one month and will ensure that the 0.14 mile Boardwalk Trail allows for easy access for all visitors, including accessible access.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. The area is within the Mexican Wolf Experimental Population Area, as designated under section 10(j) of the ESA. In 2017, a Mexican wolf crossed the border into the U.S. in this area and then returned to Mexico.

Endangered Species Act Recovery Actions

Approximately June 20th: Notice of Availability of Draft Lesser Long-Nosed Bat Post-Delisting Monitoring Plan. FWS will announce the availability of a draft post-delisting monitoring plan (and comment period) for the LLNB. The target date for the post-delisting monitoring plan is early Summer 2019. No controversy anticipated. Communications package is prepared.

No later than April 30, 2019 - Based on additional information and recovery actions, FWS is proposing to downlist the American burying beetle from endangered to threatened after almost 30 years on the list of species protected under the Endangered Species Act. In addition, FWS is proposing a 4(d) rule that accommodates regional differences in the threats impacting the beetle. If approved, this special rule will provide certainty to landowners and industry while contributing towards the conservation of the species.

Other Items of Note

Publishing anticipated Jun 20: FWS is finalizing a Species Status Assessment report that will be used to support a 12-month finding for the peppered chub. A multi-state team that included input from the states and species experts developed the SSA to address a 2007 petition to list the species. The FWS will be contacting Federal partners to solicit information pertaining to the potential economic impacts of designating critical habitat for the species, should it be determined that listing is warranted. The 12-month finding is anticipated to be published in late spring of 2019.

National Wildlife Refuge Actions

[NEW] Applications are due May 1st. Anahuac National Wildlife Refuge (TX) is hosting a 2019 Youth Game Warden Camp in partnership with Texas Parks and Wildlife Game Wardens. The 3-day camp will introduce 16 selected students age 14-18 the duties of a conservation law enforcement officer including: waterfowl and fish identification and regulations, fishing and hunting compliance checks, deer decoy operations, K9 use in law enforcement, and special guest speakers. Applications are due May 1st, 2019 and youth from around the country are invited to apply. Thanks to a generous partnership with the Friends of Anahuac Refuge, scholarships are available to cover the cost of participation.

Border-Related Activities

Border Coordination: Pedestrian Fence – FWS is working with the U.S. Border Patrol on a Biological Assessment for fencing that starts near the Santa Teresa Port of Entry and then extends west for approximately 20 miles. > Good morning,
>
> We need to make some changes to our process to ensure that our External Affairs office is informed when we make a FOIA release that may be reported in the national news. Please read this entire email carefully.

EFFECTIVE IMMEDIATELY: If you receive any requests from national news outlets (New York Times, CNN, etc.) or requests on any topics that are highly controversial, **you must notify me 24 hours prior to the release**. I will confirm receipt, so if you have not heard back from me, do not make the release.

This applies to both interim releases and final releases, whether they are full releases, releases with redactions, or releases that will be withheld in full.

Here is a partial list of topics where External Affairs must be notified before release:

African Lion
Elephant
Red Wolf
Mexican Wolf
Grizzly Bear
SES moves
Border Wall
Izembek NWR
Arctic NWR
Malheur NWR
Pesticide Consultations
African WIldlife Consultative Forum

National Monuments - reminder that OS is coordinating these requests, so please let me know on the front end if you receive any new requests related to national monuments. We will still perform the search for these requests.

This list is not exhaustive, but is intended to give you an idea of the types of topics that will now require notification. I am also attaching a marked up spreadsheet of all current FWS Open requests - please review the highlighted requests for any that may apply to your office or region, because there are a few additional specific requests where External Affairs would like to be notified when a release will be made.

Process:

1. Email to FWS FOIA Officer - request letter, release letter, the documents as they will be released (if the volume is high, please provide a representative sample as an attachment to the email - not on the Google Drive)
2. FWS FOIA Officer will confirm receipt and inform External Affairs of the pending release, so they are aware of what is going out and can be prepared for any potential media inquiries we may receive.
3. FWS FOIA Officer will confirm to you that the release can be made.

If you have any questions about whether a particular topic would be of interest to External Affairs, please feel free to ask. We will be working closely with them for the first few months to ensure that we are providing them with information that is useful to them.

This change was requested at the AD level, so if you have any concerns, please let me know immediately so we can ensure that everyone has all the information they need to fully comply.

Thank you,

Carrie Hyde-Michaels
FWS FOIA Officer

To: Barbara Wainman <barbara_wainman@fws.gov>, Matthew Huggler <matthew_huggler@fws.gov>, Gavin Shire <gavin_shire@fws.gov>
Cc: Kenneth Taylor <kenneth_taylor@fws.gov>, Shelley Hartmann <shelley_hartmann@fws.gov>

The FOIA Office and Refuges are ready to make a second release of information relating to the International Wildlife Conservation Council (IWCC) to Property of the People and Born Free, the plaintiffs in two separate FOIA litigation cases.

We have also received requests for the same records from Animal Legal Defense Fund, American Bridge 21st Century, Democracy Forward Foundation, and Sierra Club.

Because we have received more than 3 requests for this same information, we are required by law to post the records online. They will be located here: https://www.fws.gov/irm/bpim/foiaiwcc.html We will inform all requesters that they can retrieve the information from our website.

Attached are the outgoing letters for the 2 litigation requests, the incoming requests for both requests, and a representative sample of the documents.

The full set of documents are located on the Google Drive: https://drive.google.com/drive/folders/11hbFMtGq3S03gKvqvyT8CHbjpXINWQ4c

Freedom of Information Act Request
Department of the Interior
Fish and Wildlife Service (FWS)
via email: fwhq_foia@fws.gov

REQUESTER INFORMATION

This request is submitted on behalf of my clients, Ryan Noah Shapiro and Property of the People.[1]

RECORDS SOUGHT

The records sought are:

1. Any and all records constituting, mentioning, or referring to the bylaws for the International Wildlife Conservation Council.
2. Any and all Financial Disclosure Statements for the International Wildlife Conservation Council.
3. Any and all records constituting, mentioning, or referring to guidelines and/or instructions that the International Wildlife Conservation Council members use to formulate decisions.
4. Any and all records created to establish/form the International Wildlife Conservation Council.

The timeframe for this request is January 20, 2017 onward.

ADDITIONAL BACKGROUND INFORMATION

The following information is intended to assist the FWS in their search. It is not intended to limit the scope of our request.

On November 8, 2017, Secretary of the Interior Ryan Zinke announced the creation of the International Wildlife Conservation Council. The Council is supposed to provide advice and recommendations to the Secretary of the Interior regarding conservation, wildlife law enforcement, and economic benefits that result from U.S. citizens traveling

[1] Property of the People is a 501(c)(3) charitable organization dedicated to governmental transparency in the service of democracy.

abroad to hunt. The International Wildlife Conservation Council (Committee number 2636), according to the DOI's website, is to advise the Secretary of the Interior on the benefits that international recreational hunting has on foreign wildlife and habitat conservation, anti-poaching and illegal wildlife trafficking programs, and other ways in which international hunting benefits human populations in these areas.[2]

FEE CATEGORY AND REQUEST FOR A FEE WAIVER

Request to be classified as an educational requester:

Requestor Ryan Noah Shapiro requests classification as an educational requestor for FOIA fee category purposes.
Shapiro is an ABD doctoral candidate at the Massachusetts Institute of Technology.
Shapiro is in the PhD program in History, Anthropology, and Science, Technology, & Society (HASTS) in MIT's Department of Science, Technology, & Society (STS).[3]
Shapiro is a former research affiliate at the Berkman Klein Center for Internet & Society at Harvard University.[4]
Shapiro is a historian of national security, the policing of dissent, and governmental transparency. The disclosures sought in the instant request are sought pursuant of this end.
Shapiro is President of Property of the People, a newly-founded governmental transparency research, analysis, and information dissemination organization.[5]
Among other things, Shapiro's work has exposed improper collusion between a major agricultural lobby and a U.S. government agency entity[6]; sparked a federal investigation of this improper collusion, resulting in the disgraced resignation of the president of the

[3] http://web.mit.edu/hasts/graduate/shapiro.html
[4] Shapiro is a former research affiliate at the Berkman Klein Center for Internet & Society at Harvard University for 2016-2017.
https://cyber.law.harvard.edu/newsroom/2016_2017_community
[5] Building upon Shapiro's extensive track record of national security, transparency, and state repression-oriented research, analysis, and information dissemination, Property of the People (PropOTP) is a 501(c)(3) charitable organization dedicated to governmental transparency in the service of democracy. PropOTP's motto, taken from Shapiro's commentary, is, "The records of government are the property of the people. It's time for us to reclaim them." PropOTP's most publicized efforts to date have been under the umbrella of the organization's Trump-oriented project, "Operation 45." PropOTP's Operation 45 is dedicated to ensuring transparency and accountability for the Trump/Pence administration. For more on PropOTP's Operation 45, see: http://www.salon.com/2016/11/27/foia-superhero-launches-campaign-to-make-donald-trumps-administration-transparent/; https://www.thenation.com/article/your-guide-to-the-sprawling-new-anti-trump-resistance-movement/; http://www.politico.com/story/2016/12/democrats-trump-resistance-conservative-playbook-232687; https://operationfortyfive.org.
[6] http://bigstory.ap.org/article/a0a7a3fb1f6449f992f2410c577d919b/apnewsbreak-egg-group-scrambled-over-eggless-mayo-maker; http://www.theguardian.com/us-news/2015/sep/02/usda-american-egg-board-hampton-creek-just-mayo

agency entity[7]; and sparked the introduction of bipartisan legislation to curb future similar abuses by government and industry.[8] Shapiro's work has also exposed the FBI's unprecedented utilization of classified remote-installation malware to circumvent animal rights activists encryption in 2003, as well as the DOJ's subsequent failure to inform Congress of such utilization as mandated by Congress.[9] Shapiro's work has also exposed the FBI's policy of instructing FBI agents to withhold surveillance technical details from prosecutors and defendants alike.[10] Shapiro's work has also exposed FBI consideration of federal terrorism charges against animal protectionists who expose horrific conditions on factory farms.[11] Shapiro's work has also exposed FBI targeting of Nelson Mandela and the anti-Apartheid movement as a Communist plot imperiling U.S. national security. This included but was not limited to FBI placement of a confidential informant within Nelson Mandela's inner circle in order to provide political information to the FBI on Mandela and his anti-apartheid associates while the FBI was tasked with protecting Mandela upon Mandela's post-prison tour of the United States in 1990.[12]

Shapiro's research and analysis on issues at the intersections of national security, the policing of dissent, and transparency, as well as pertaining to the Trump presidency and administration, are regularly featured in national and international media outlets. Media outlets that have covered Shapiro's work include but are not limited to:

The New York Times, The Washington Post, The Los Angeles Times, The Wall Street Journal, *USA Today*, *CNN, U.S. News & World Report, The Associated Press, Agence France-Presse, Politico, Business Insider, The International Business Times, The Atlantic, The Guardian, ABC News, CBS News, NPR, PBS, BBC World Service, The Nation, Mother Jones, Democracy Now!, The Hill, McClatchy DC*, *New Republic*, *National Journal*, *Columbia Journalism Review, Legal Times, PolicyMic, Government Executive, Inc., Wired, Fortune, Fox News, Fox Nation, The American Conservative, The Daily Caller, Breitbart News, Reason, New York Daily News, The Chicago Tribune, The Boston Globe, MSN News, Salon, Slate, The Daily Beast, Quartz, Vice News*, *Huffington Post, HuffPost Live, Yahoo News, Christian Science Monitor, Boston Business Journal, AOL News, The San Francisco Chronicle, The Houston Chronicle, The Minneapolis Star Tribune, The Independent, The Mirror, The Daily Mail, Black Entertainment Television* (*BET*), *The Boston Metro, The San Francisco Business Times, The Silicon Valley Business Journal, The Afro-American, Raw Story, The Chicago Defender, The NorthStar News & Analysis, The Atlanta Black Star, The Hollywood Reporter, NYC Today, The Mail & Guardian, Courthouse News, Japan Times, EatDrinkPolitics, Univsion, HispanTV, Al Jazeera America, Grist, Ecorazzi, Green Is the New Red, PC World, PC Mag, Computer World, SearchSecurity, IntelNews, Komando.com, VegNews, Truth-Out,*

FireDogLake, ShadowProof, Alternet, The Verge, Consumerist, Boing Boing, Techdirt, Tickle The Wire, The Public Record, and *the Freedom of the Press Foundation.*
Shapiro has presented invited scholarly and popular lectures on topics at the intersections of national security, the policing of dissent, and transparency at numerous leading institutions and venues. These include but are not limited to:
The Massachusetts Institute of Technology, the Kennedy School of Government at Harvard University, Harvard Law School, Yale Law School, Stanford University, the New York City Bar Association, the National Institutes of Health (NIH), the Max Planck Institute for the History of Science (Berlin, Germany), Université catholique de l'Ouest (Angers, France), the University of California, Santa Barbara, The College of William & Mary, Boston University, American University (Washington, DC), The Cooper Union for the Advancement of Science and Art (New York City), the National Press Club (Washington, DC), the conference of the National Lawyers Guild, the History of Science Society, the American Anthropological Association, the Society for the Social History of Medicine, the Conference on Policy History, the American Society for Environmental History, DEFCON, Boston University, University College Cork (Cork, Ireland), Suffolk University Law School, the City University of New York Law School, The Base community center in Brooklyn, NY, and Burning Books bookstore (Buffalo, NY).
Shapiro's research and analysis have also been featured in television and film documentaries. For one example among others, in February 2016, a documentary centrally featuring Shapiro's FOIA research and analysis aired on the cable channel Pivot. The documentary is titled "Activists or Terrorists" and was directed by award-winning filmmaker Brian Knappenberger and narrated by Academy Award nominated actress Maggie Gyllenhaal. This documentary constitutes episode five of Knappenberger's acclaimed documentary series "Truth and Power." *The New York Times* included the documentary episode "Activists or Terrorists" in its influential "What to Watch" list.[13] "Activists or Terrorists" is now available for viewing on iTunes and Amazon.com. Further, Shapiro is currently working with multiple additional television and film documentaries currently in productions that will feature my work.
Shapiro is a representative of several news outlets. Shapiro is a researcher, analyst, and reporter for GreenIsTheNewRed.com (GNR). Shapiro is a representative of Verso Books. Shapiro is a representative of Sparrow Media. Shapiro is a reporter/contributor for *The Public Record.* Shapiro is also President of Property of the People, a newly-founded governmental transparency research, analysis, and information dissemination organization.

Request for a Complete Waiver of Fees:

Requesters are willing to pay any reasonable expenses associated with this request, however, as the purpose of the requested disclosure is in full conformity with the statutory requirements for a waiver of fees, a full fee waiver should be granted.

The disclosure of responsive records is likely to contribute to an understanding of government operations and activities because the disclosable portions of the requested records will be meaningfully informative about those operations and activities. The vast

[13] http://www.nytimes.com/2016/02/19/arts/television/what-to-watch-friday.html

majority of disclosable information is not already in the public domain, in either a duplicative or a substantially identical form, and therefore the disclosure would add substantial new information to the public's understanding of the Committee's and FWS's operations.

The requesters firmly intend to analyze the requested records in order to facilitate significant expansion of public understanding of government operations. The audiences likely to be interested in the subject are broad, and include historians of modern American government**,** politics, culture, and national security; journalists reporting on American politics, government, national security, and society; civil liberties attorneys; advocacy and watchdog organizations, the U.S. congress, and the broader public.

***

Please do not hesitate to contact me if you have any questions concerning this request. Thank you. I appreciate your time and attention to this matter.

Gunita Singh

Dear Rachel Taschenberger,

The United States Fish and Wildlife Service (FWS) Headquarters FOIA Office received your FOIA request dated November 21, 2017. We have assigned your request FOIA number FWS-2018-00213; please refer to this number when inquiring about your request. The response to your request will be coordinated by our HQ's FOIA office.

If you have any questions or concerns; please contact Shaunta Nichols at 703-358-2372 or shaunta_nichols@fws.gov.

Respectfully,

United States Fish and Wildlife Service
Headquarters Freedom of Information Act Office

E-mail Address: rachel@bornfreeusa.org
Confirm E-mail Address : rachel@bornfreeusa.org
Your Organization: Born Free USA
Are you filing the request on behalf of another party? Yes
If so, who are you filing the request on behalf of? Born Free USA
Contact Information Certification:
Bureau/Office: Fish & Wildlife Service (FWS)
Relevant park, refuge, site or other location:
Request Description:
1) All documents (including but not limited to communications, notes, reports, etc.) referring or relating to the creation of the International Wildlife Conservation Council (“Council”), including the authority or basis for the creation of the Council. The relevant time period for this request is January 1, 2017 to date.

2) All documents (including but not limited to communications, notes, reports, etc.) referring or relating to the duties of the Council. The relevant time period for this request is January 1, 2017 to date.

3) All documents (including but not limited to communications, notes, reports, etc.) referring or relating to the selection criteria for, and selection and confirmation of, the members of the Council. The relevant time period for this request is January 1, 2017 to date.

4) All documents to, from, or on which Secretary of the Interior Ryan Zinke is copied/blind copied (including but not limited to communications, notes, reports, etc.) referring or relating to the creation of and selection criteria for the Council. The relevant time period for this request is January 1, 2017 to date.
Requester's Communication Preferences: Electronic communication via email
Document Disclosure Preferences: Electronic copies via email
Select the applicable reason why you are requesting expedited processing:
Justification for Expedited Processing:
Expedited Processing Certification:
Please select the appropriate statement: I am requesting a waiver or reduction of fees.
I agree to pay fees up to this particular amount:
To assist in determining my requester category to assess fees, you should know that I am: affiliated with a private corporation and am seeking information for use in the company's business
Affiliated Organization:
Check the boxes to the right to confirm that you meet the Department's fee waiver criteria: Disclosure of the information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the Government.
Please explain why your request for a waiver of fees or a reduction in fees is justified.:
Born Free USA requests a waiver of any and all applicable fees pursuant to 5 U.S.C. § 552(a)(4)(A)(iii). This provision provides that requested records shall be furnished without or at reduced charge if "disclosure of the information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government" and "is not primarily in" the "commercial interest" of the requester. The requested records would clarify the "operations or activities of the government," namely the U.S. Department of the Interior's policies and procedures with records involving the International Wildlife Conservation Council.

To date, the U.S. Department of the Interior has not disclosed to the public how it established the International Wildlife Conservation Council. These records would "contribute significantly" to the public's understanding of the U.S. Department of the Interior's operations.

Born Free USA's staff members have expertise in investigations and federal public interest litigation, and they will analyze the information provided and potentially share the resulting analysis with a reasonably broad public audience through Born Free USA's email list, reports, press releases, or by other means of outreach.

Born Free USA, a non-profit organization as defined under Section 501(c)(3) of the Internal Revenue Code, does not have a commercial interest in making this request. The requested information will be used solely to educate the general public regarding U.S. Department of the Interior's policy and procedures for establishing the International Wildlife Conservation Council.

Dear Ms. Taschenberger:

The United States Fish and Wildlife Service (FWS) Freedom of Information Act (FOIA) office received your FOIA request, dated November 21, 2018, and assigned it control number FWS-2018-00213. Please cite this number in any future communications with our office regarding your request. You requested the following:

> *1) All documents (including but not limited to communications, notes, reports, etc.) referring or relating to the creation of the International Wildlife Conservation Council ("Council"), including the authority or basis for the creation of the Council. The relevant time period for this request is January 1, 2017 to date.*
>
> *2) All documents (including but not limited to communications, notes, reports, etc.) referring or relating to the duties of the Council. The relevant time period for this request is January 1, 2017 to date.*
>
> *3) All documents (including but not limited to communications, notes, reports, etc.) referring or relating to the selection criteria for, and selection and confirmation of, the members of the Council. The relevant time period for this request is January 1, 2017 to date.*
>
> *4) All documents to, from, or on which Secretary of the Interior Ryan Zinke is copied/blind copied (including but not limited to communications, notes, reports, etc.) referring or relating to the creation of and selection criteria for the Council. The relevant time period for this request is January 1, 2017 to date.*

We are writing to provide the 2nd interim release to your request. We have previously responded to this request on May 15, 2018. We have enclosed one CD containing 46 files consisting of 621 pages, which are being released to you in part. Portions of these materials are being withheld under

the following FOIA Exemptions:

Exemption 6 allows an agency to withhold "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." 5 U.S.C. § 552(b)(6). We are withholding 594 pages in part under Exemption 6.

The phrase "similar files" covers any agency records containing information about a particular individual that can be identified as applying to that individual. To determine whether releasing records containing information about a particular individual would constitute a clearly unwarranted invasion of personal privacy, we are required to balance the privacy interest that would be affected by disclosure against any public interest in the information.

Under the FOIA, the only relevant public interest to consider under the exemption is the extent to which the information sought would shed light on an agency's performance of its statutory duties or otherwise let citizens 'know what their government is up to. The burden is on the requester to establish that disclosure would serve the public interest. When the privacy interest at stake and the public interest in disclosure have been determined, the two competing interests must be weighed against one another to determine which is the greater result of disclosure: the harm to personal privacy or the benefit to the public. The purposes for which the request for information is made do not impact this balancing test, as a release of information requested under the FOIA constitutes a release to the general public.

The information that has been withheld under Exemption 6 consists of personal information, for example, "email addresses, home addresses and phone numbers, and we have determined that the individuals to whom this information pertains have a substantial privacy interest in withholding it. Additionally, {you have not provided information that explains a relevant public interest under the FOIA in the disclosure of this personal information and} we have determined that the disclosure of this information would shed little or no light on the performance of the agency's statutory duties. Because the harm to personal privacy is greater than whatever public interest may be served by disclosure, release of the information would constitute a clearly unwarranted invasion of the privacy of these individuals and we are withholding it under Exemption 6.

Carrie Hyde-Michaels, FWS, FOIA Officer is responsible for this partial denial. Helen Speights, Attorney-Advisor in the Office of the Solicitor was consulted.

We are continuing to review additional records that are responsive to your request. We anticipate sending you the 3rd interim release of records on or about June 29, 2018. If you have any questions about our response to your request, you may contact Pam Mozina at (703) 358-2698 or by email at pamela_mozina@fws.gov.

Sincerely,

Carrie Hyde-Michaels

Subject:	Dinner

Greg Sheehan and Ben Cassidy will be attending the dinner with the group.

Few changes:

Dinner will now be at 6:15 p.m.
- We have arranged staffers to drive members from DOI to Lincoln and from Lincoln to Carmines.
- This way they can stay together and do not have to worry about transportation

Coffee on Friday
-Moved to 8:30 a.m.

Subject:	Re: Dinner

Got it.

I changed the March 15 reservation at Carmine's to 6:15pm. I'll get to the restaurant early to welcome/guide people as they come in.

I'll adjust the March 16 coffee with the DepSec to 8:30-9am.

Dinner will now be at 6:15 p.m.
- We have arranged staffers to drive members from DOI to Lincoln and from Lincoln to Carmines.
- This way they can stay together and do not have to worry about transportation

Coffee on Friday
-Moved to 8:30 a.m.

All,

Attached is a first cut at the International Conservation overview presentation for the Council meeting on Friday. There is a full script in addition to the slides. It is long, and I welcome input on how to cut it down. I'd also be grateful for any feedback on he specific content of the slides and script. I'd like to get his into relatively final form by Wednesday for any required clearances in the Department.

If you have suggested changes, please send them to me separate from the presentation if possible so hat I can maintain version control.

Greg, your overall thoughts would be appreciated on whether this is what you are looking for, whether we should de-emphasize any areas, etc.

OLE, please focus on the LE slides and the accuracy of the content and script.

Tim/Rose, please make I got the legal status and finding information on the species-specific slides.

Any feedback by COB tomorrow would be great.

Best,

craig

All,

Here is he second presentation, meant to cover the larger USG effort to combat wildlife trafficking. Again, I welcome any thoughts on changes, additions, etc to the slides or the script. COB tomorrow, please.

Best,

Craig

Subject:	Re: International Wildlife Conservation Council presentation

thank you Craig for pulling this presentation together - you did a great job. Here are my comments:

Slide #3 - its all about seeing wildlife in National Parks or Monuments aboard. Do we have any statistics to cite about how many US hunters travel aboard each year :to hunt in Africa or Asia? For the future, Might be useful to have such information, may be the Council can actually help to quantify such data.

Slide #4 - I'd change the ginseng photo to an animal
Slide 18 - where AIA's work is divided into three components - the international wildlife policy is never discussed in the presentation at all - focus was on financial assistance and permitting.

I like the specific permitting examples used in the presentation - they are clear & concise

slide #42 in the notes section discuss NDF for Appendix I and Appendix II , I'd stress the point that for Appendix II species, an NDF equates to the the sustainable use of the species in trade,
Slide #42 - the permitting slide - I'd add add as a bullet under CITES, make a non-detriment finding (not detrimental to the survival of the species), there is a bullet for legal acquisition but not for NDF

slide 47 - on southern white rhino - discussion is limited to trophies only but the Council members audience (some US game ranches have an interest) is it worth mentioning live white rhino imports as well and requirement of appropriate & acceptable destination?

Slide 54 - in notes is it worth making the point for application by application basis for enhancement findings for trophies, will also be applicable to NDFs as well? John Jackson knows we have used general advices in past to make NDFS so he may ask question.

hope this helps. Thanks for opportunity to review.

> Attached is a first cut at the International Conservation overview presenta ion for the Council meeting on Friday. There is a full script in addition to the slides. It is long, and I welcome input on how to cut it down. I'd also be grateful for any feedback on the specific content of the slides and script. I'd like to get this into relatively final form by Wednesday for any required clearances in the Department.

Subject: IWCC updated meeting schedule/agenda

Council Members:

Things have changed a bit to accommodate the Secretary's schedule (and may change further), but below is the current schedule for next week's reception/dinner and meeting. I will send out detailed building entry instructions/room directions early next week, but the important thing is to make sure you have a valid form of picture ID with you when you enter the building. I'm still collecting meeting materials from our presenters and will get those materials to you by early next week.

As always, please do not hesitate to call me with any questions.

Note for March 15th Reception with Sec. Zinke: Unfortunately the March 15th 4pm reception is for IWCC members only.
Note for March 15th Dinner: I've arranged for a table at a nearby restaurant, please RSVP to me as soon as possible. If you have a spouse with you, let me know and please feel free to bring them!

Thursday March 15th
4pm IWCC Member Reception with Secretary Zinke at the Main Interior Building (1849 C St. NW, Washington DC)
7pm IWCC Dinner at Carmine's Italian Restaurant (425 7th St NW, Washington, DC 20004)

Friday March 16th
Note: all meeting rooms in Main Interior Building 1849 C St. NW, Washington D.C.

Office of the Deputy Secretary
8-9am: IWCC member coffee/reception w/ Deputy Secretary

North Penthouse Room
9-10am: Administrative Session: Closed to public.
- Federal Advisory Committee Act Briefing - DOI Solicitor's Office
- Ethics Briefing - DOI Ethics Office

South Penthouse Room
10:15-10:30am Opening Remarks (FWS Deputy Director Greg Sheehan)
- Note: This starts the open/public part of the meeting

10:30-11am: Member Introductions
11am-12pm: FWS International Affairs Program Briefing (USFWS)
12-1pm: Lunch (Bison Bistro Cafe, Main Interior Building)
1-2pm: U.S. Task Force on Wildlife Trafficking Briefing (USFWS)
2-3pm: Public Comment
3-3:30pm: Discussion
3:30pm Adjourn

Subject: Re: IWCC updated meeting schedule/agenda

Thank you Joshua for sharing. Was it clear to them in the first email that they are responsible for the cost of their own dinner but that they should have a set dollar amount provided to them through a per diem based reimbursement? If some have spouses there they may be unclear as to who is picking up the tab.

Thanks
Greg

Josh,
One comment on the agenda. 1 hour for public comment but only 30 minutes for the committee to discuss items seems backwards. Will there be some selection of a chairman and vice chairman? If so, when?
Thanks,
SEC

Greg,

Following up on the voicemail I just left you, here is the agenda-related question from Chancellor. Gary Kania also emailed with questions about how chair selection will be accomplished.

Responses to the questions are not particularly challenging (i.e. 1. agenda was developed by FWS and DOI leadership; 2. IWCC members will vote on chair/vice-chair at the end of the meeting), but I wanted to check in with you first to ensure my answers are consistent with any previous comms you've had with members.

On Mar 9, 2018, at 5:19 PM, Winchell, Joshua <joshua_winchell@fws.gov> wrote:

Council Members:

Things have changed a bit to accommodate the Secretary's schedule (and may change further), but below is the current schedule for next week's reception/dinner and meeting. I will send out detailed building entry instructions/room directions early next week, but the important thing is to make sure you have a valid form of picture ID with you when you enter the building. I'm still collecting meeting materials from our presenters and will get those materials to you by early next week.

As always, please do not hesitate to call me with any questions.

Note for March 15th Reception with Sec. Zinke: Unfortunately the March 15th 4pm reception is for IWCC members only.
Note for March 15th Dinner: I've arranged for a table at a nearby restaurant, please RSVP to me as soon as possible. If you have a spouse with you, let me know and please feel free to bring them!

Thursday March 15th
4pm IWCC Member Reception with Secretary Zinke at the Main Interior Building (1849 C St. NW, Washington DC)
7pm IWCC Dinner at Carmine's Italian Restaurant (425 7th St NW, Washington, DC 20004)

Friday March 16th
Note: all meeting rooms in Main Interior Building 1849 C St. NW, Washington D.C.

Office of the Deputy Secretary
8-9am: IWCC member coffee/reception w/ Deputy Secretary

North Penthouse Room

9-10am: Administrative Session: Closed to public.

Subject:	Urgent request: WSJ reporter interested in attending IWCC meeting

Hi there,

Heidi Vogt here with the Wall Street Journal. I'm very eager to attend the IWCC public meeting on Friday. I am hoping there's a way to accommodate me as I really want to make sure I'm fully informed about this process for my coverage (I report on business and regulation for the Journal).

I've been talking to Joshua at FWS, along with Laury and Gavin, and I know there's a space issue, but I'm hoping there's a way to squeeze me in.

Thanks so much,

Heidi Vogt

Natalie,

RSVP period closed last night, we've maxed out South Penthouse capacity (46 members of the public RSVPed) so there's no

additional room for the public. This is the list of public attending:

Public Attending	
Boudreaux, Paul	Journal of Intl Wildlife Law and Policy
Dylewski, Kate	Animal Welfare Institute
Goergen, Joseph	Safari Club International Foundation
Greenwald, Noah	Center for Biological Diversity
Hahn, Deb	Association of Fish and Wildlife Agencies
Hofberg, Mark	International Fund for Animal Welfare
Kluck, Julie	Born Free USA
Kurose, Stephanie	Center for Biological Diversity
Lopes, Paulo	Center for Biological Diversity
Mathews, Rachel	PETA
Myers, Marshall	N. Marshall Meyers PLLC
Nowak, Katarzyna	The Safina Center
Olson, Steve	Association of Zoos and Aquiriums
Place, Jennifer	Pike Associates LLC
Rude, Amanda	Legal Atlas
Sala, Joseph	The ANN Group
Salamat, Lisa Ann	WildCat Legal Aid Foundation
Seminario, Alejandra	Defenders of Wildlife
Sheldon, Colin	Wildlife Conservation Society
Stratton, Carter	Animal Welfare Institute
Su, Jean	Center for Biological Diversity
Taylor, Katie	Defenders of Wildlife
Vitello, Frank	Zoological Association of America

Public Speaking	
Frostic, Anna	Humane Society Legislative Fund
Kalinina, Masha	Humane Society International
Kitchen, Bill	
LaFontaine, Peter	International Fund for Animal Welfare
Parsons, Rick	Safari Club International
Sedlacek, Keisha	Humane Society Legislative Fund
Seidman, Anna	Safari Club International

Fwd: New Request; Fwd: Freedom of Information Request: Joshua Winchell - Elephants & Lions

"Donahoe, Jeffery" <jeffery_donahoe@fws.gov>

From: "Donahoe, Jeffery" <jeffery_donahoe@fws.gov>
Sent: Tue Mar 13 2018 06:13:26 GMT-0600 (MDT)
To: Linda Walker <linda_d_walker@fws.gov>, "Winchell, Joshua" <joshua_winchell@fws.gov>
Subject: Fwd: New Request; Fwd: Freedom of Information Request: Joshua Winchell - Elephants & Lions

Hi Linda, this FOIA is asking for documents in the possession of Josh Winchell, so I've copied Josh on this email. Please do an appropriate search and provide me with the results by March 23rd. If it is not possible to produce the documents by that date, please let me know and provide a new recommended date for production. If you have any questions, please let me know. Thanks. Jeff

Dear Alexander Rony,

The United States Fish and Wildlife Service (FWS) Headquarters FOIA Office received your FOIA request dated March 8, 2018. We have forwarded your request to our National Wildlife Refuge System office for processing.

If you have any questions or concerns regarding this request; please contact Jeffery Donahoe (jeffery_donahoe@fws.gov) at 703-358-2401.

Respectfully,

United States Fish and Wildlife Service
Headquarters Freedom of Information Act Office

Falls Church, VA 22041
March 8, 2018
To Whom It May Concern:
I. Requested Records
This is a request under the Freedom of Information Act for emails between November 7, 2017 and March 7, 2018 mentioning "elephant" or "lion" that were sent to or from joshua_winchell@fws.gov or iwcc@fws.gov.
II. Record Delivery
I would prefer the request be filled electronically, by e-mail attachment if available or CD-ROM if not. In the event that there are fees, please inform me of the total charges in advance of fulfilling my request.
Please produce the records on a rolling basis; at no point should the search for – or deliberation concerning – certain records delay the production of others that the agency has already retrieved and elected to produce.
Should you decide to invoke a FOIA exemption with regard to any of the requested records, please include in your response letter sufficient information for an appeal, including:
1. Basic factual material about each withheld item, including the originator, date, length, general subject matter, and location of each item.
2. Explanations and justifications for denial, including the identification of the category within the governing statutory provision under which the document (or portion thereof) was withheld and a full explanation of how each exemption fits the withheld material.
If you determine that portions of a requested record are exempt from disclosure, please redact the exempt portions and provide the remainder of the record.
III. Request for a Fee Waiver
I respectfully request that you waive all fees in connection with this request as provided by 5 U.S.C. § 552(a)(4)(A)(iii). The Sierra Club

is a national environmental nonprofit with no commercial interest in obtaining the requested information. Our organization intends to analyze and disseminate the requested information free of charge so that the public can be better informed about safeguarding endangered species around the globe.
The subject matter of the requested records is likely to contribute significantly to public understanding of the operations and activities of the government by disclosing to what extent the International Wildlife Conservation Council ("Council") has influenced U.S. policies regarding hunting trophy imports of African elephants and lions (Joshua Winchell is the designated federal officer for the Council, and the alternate email address was set up to support the Council). This issue has received widespread attention in the media and from the president himself. Some members of the Council represent groups that have sought to loosen import restrictions.
The Sierra Club and its supporters have demonstrated interest and expertise in the subject area, as the organization has a well-established program to protect wild lands and wildlife. Our staff and volunteers regularly interact with U.S. Fish and Wildlife Service regarding endangered species, and hundreds of thousands of our supporters have written letters and submitted public comments on international endangered species protections, including on African elephants, African lions, and the Council itself.
IV. Media Requester Status
In addition to the public interest fee waiver, I ask to be properly categorized as a representative of the news media. The bulk of my professional duties at the Sierra Club entails planning and writing content about public policy, including composing mass communications to our followers, analyzing FOIA responses, and coordinating press outreach. Here are some examples that resulted from my work:
https://sierraclub.org/planet/2017/04/hiring-freeze-prevented-epa-filling-hundreds-jobs
https://www.washingtonpost.com/news/to-your-health/wp/2017/05/19/nearly-700-vacancies-at-cdc-because-of-trump-administration-hiring-freeze/
http://www.centerforfoodsafety.org/press-releases/4480/over-700000-people-tell-government-to-block-seed-mergers
The Sierra Club has the ability and intention to disseminate the information it receives through this request. The information may be shared through emails to an audience reaching into the millions, Facebook and Twitter posts reaching tens of thousands of followers, articles on our frequently-visited website, and analysis provided to the media.
Thank you in advance for your anticipated cooperation in this matter. I look forward to receiving your response to this request within 20 business days, as the statute requires.
Sincerely,
Alexander Rony
Sierra Club

Natalie,

Are you arranging someone to meet and escort IWCC members into the building and up to the DepSec office for the 4pm reception on March 15th?

Yes- we are finalizing the details, but someone will be escorting up the members.

Also, in the past how has it worked for dinner? Did they just give the hostess your name, or were you or someone there at the dinner site before they arrived?

Thanks!
Natalie

Phillip,

As I mentioned on the phone, I'm running a March 16th meeting in South Penthouse with approximately 60 participants. Lunch is scheduled for 12-pm and I will be directing people down to the Bison Bistro to eat.

So, I wanted to give you a heads up that there will be a lunch-time surge!

Todd Willens and Greg Sheehan are ex-officio members, plus one from State Dept. We will add an extra 8 chairs for others like external affairs/ state dept presenters/ etc. and others who may pop in and see how its going. These extra chairs can just be placed in the theater seating and labeled as DOI.

Thanks!
Natalie

room 1352 (or equivalent) available on March 16, 8:30-10:30am?

"Winchell, Joshua" <joshua_winchell@fws.gov>

From: "Winchell, Joshua" <joshua_winchell@fws.gov>

Subject: room 1352 (or equivalent) available on March 16, 8:30-10:30am?

Mariane,

I'm in need of smaller meeting room (informal, conference table for 20, no additional seating required) for March 16 from 8:30-10:30am. I used 1352 a few years back and I think it fits the bill good enough. No a/v support required, just a sit and talk room.

Is 1352 available? If not, what are other options (North Penthouse?). This is all in addition to the existing south penthouse reservation.

Thanks!

1352 is no longer a conference room. You can use room 1548 or the North Penthouse on 3/16. Oppose plans for US council promoting trophy hunting

Diego Gavilanes <dgavilanes@gmail.com>

From:	Diego Gavilanes <dgavilanes@gmail.com>
Sent:	Thu Mar 08 2018 11:40:27 GMT-0700 (MST)
To:	"joshua_winchell@fws.gov" <joshua_winchell@fws.gov>
Subject:	Oppose plans for US council promoting trophy hunting

Dear Mr. Winchell:

I write in opposition to the use of US taxpayer funds to establish a proposed *"International Wildlife Conservation Council"* to promote and advise the federal government on the "benefits" of trophy hunting.

The US is the world's largest trophy importer, yet it has failed to protect species against the escalating threats to their survival. Indeed, many have suffered staggering decline over the last century. Killing is not conservation.

A 2016 US House report identified negative impacts of trophy hunting in sub-Saharan Africa, finding *"many troubling examples of funds either being diverted from their purpose or not being dedicated to conservation in the first place," "no merit to claims that hunting deters poaching,"* and current permitting to be *"arbitrary, confusing, and not based on sound science."* Shockingly, US taxpayers cover *"92% of all permit fees," "subsidizing"* trophy hunting.

The claimed financial benefits of trophy hunting to local communities are largely exaggerated, and bear little actual connection to conservation, whereas eco-tourism generates substantial, ongoing economic benefit.

Trophy hunting provides avenues and cover for illicit trafficking; for example, lion bone trade is on the rise, as skeletons obtained via canned hunting operations have stirred market demand, with related spikes in poaching of both wild and captive lion populations.

Hunters comprise only 5% of the US population - down 1.5 million between 1996-2006 (when wildlife watching increased 13%) and another 2 million between 2011-2016 - and not all domestic hunters support international trophy hunting of threatened species. A 2016 USFWS survey (issued this year) found the "biggest increases in participation involved wildlife watching … [which] surged 20 percent to 86 million participants. Money spent on these activities also rose sharply from $59.1 billion to $75.9 billion." To provide the small, but powerful and well-funded trophy hunting lobby a front row seat to national policymaking under the guise of *"conservation"* will only attract further criticism and endanger wildlife.

I urge you to withdraw consideration of this council, and to instead focus upon scientifically supported and sustainable conservation practices, to save wild species before it's too late.

Thank you Josh!

On another note, I wanted to bring a small gift from home for secretary Zinke (chocolate covered huckleberries known to the valley that both he and I come from in Montana); first is that allowed? And if so, would it be an awkward or unusual thing to do?

~Olivia

Natalie,

Based on the change of schedule for the March 15 reception, I switched the IWCC member dinner to 7pm at Carmine's Italian Restaurant (425 7th St NW, Washington, DC 20004). It's a much more flexible set-up and the table can fit up to 20.

Was there a reason that we cannot break for lunch until 1 pm? People may be a little antsy. I am ok either way but just wondered. Maybe it revolved around getting appropriate speakers there.

Thanks
Greg

Greg,

Easy enough to have a 12-1pm lunch, we just shift the task force briefing after lunch. So the revised agenda would look like this ...

10:15-10:30am: Opening Remarks
10:30-11am: Member Introductions
11am-12pm: USFWS International Affairs Program Briefing
12-1pm: Lunch
1-2pm: U.S. Task Force on Wildlife Trafficking Briefing
2-3pm: Public Comment
3-3:30pm: Discussion
3:30pm: Adjourn

Joshua Winchell, Designated Federal Officer and Coordinator

Hey Josh, House Natural Resources minority staff want to know what our budget is for the IWCC. I assume maybe only a portion of your salary, but do you know if it's spelled out anywhere? Also let me know if you want me to kick this to someone else. Maybe Division of Budget? I've reported the inquiry to the Dept. Thanks! Roslyn,

There is no sponsor, everyone will pay for their own meal. I've arranged a buffet-style dinner at Old Ebbitt Grill and cost will be approximately $50 per person, I'll provide more details next week.

Subject:	International Wildlife Conservation Council Named: March News from Washington?

This council has been officially named:
https://www.fws.gov/iwcc/

It's not on the DOI website but it is on the FWS web site.

Do we want something in the March issue of News from Washington? I am trying to finalize the issue so we can distribute before March 14, Refuge System birthday.

thanks

Hello Team,

I think you all know the drill.

A friendly reminder to provide me with any relevant highlights for the Management Team Meeting by 8AM tomorrow morning.

I'm under my normal schedule this week, teleworking today and Wednesday and in the office Tuesday and Thursday, off on Friday. I'll be in touch if I need any acting actings.

Thank you and have a great week!

A friendly reminder to provide me with any relevant highlights for the Management Team Meeting by 8AM tomorrow morning.

I'm under my normal schedule this week, teleworking today and Wednesday and in the office Tuesday and Thursday, off on Friday. I'll be in touch if I need any acting actings.

Thank you and have a great week!

For the "Thank You" section:
A huge thanks to Beverly Robinson who has been working non-stop to get 15 new invitational travellers (members of the International Wildlife Conservation Council) into the Concur system and support their travel for the Council's March 16 inaugural meeting. This is not an easy process under the best of circumstances and Beverly is taking care of business under a very short deadline.

For the VS Branch Section:
Joshua Winchell is coordinating the inaugural meeting of the International Wildlife Conservation Council held at Main Interior on March 16. Public notice of the meeting published on March 1. Winchell is finalizing the meeting agenda and will be posting this and other meeting information on the Council's stopgap website (www.fws.gov/iwcc).

WILDLIFE

New Interior panel loaded with safari and hunting advocates

Michael Doyle, E&E News reporter
Published: Friday, March 2, 2018

The 16 members of a new pro-hunting International Wildlife Conservation Council will have their first meeting on March 16. Pamela King/E&E News

Stocked with representatives from the National Rifle Association, Safari Club International and other like-minded groups, the Interior Department's newest advisory committee is about to start trekking.

In their first all-day meeting, scheduled to be held March 16 at the Main Interior Building, the 16 members of the International Wildlife Conservation Council will start off with an unambiguous agenda.

"The Council provides advice and recommendations to the Secretary of the Interior regarding the benefits that result from United States citizens traveling to foreign nations to engage in hunting," the Fish and Wildlife Service **stated** in the *Federal Register* today.

Established last year by Interior Secretary Ryan Zinke, the council was explicitly designed through its membership criteria to have a pro-hunting perspective.

One member, for instance, was mandated to be a representative of the "firearms or ammunition manufacturing industry." Erica Rhoad, the NRA's director of hunting policy, was tapped for this seat.

Five members represent "wildlife habitat and conservation" organizations, according to the list posted on a Federal Advisory Committee Act **website**. Interior has not issued a press release announcing the members, who were notified of their selection in late December, though Zinke did promote the panel when he announced the idea Nov. 8, 2017.

"This council will provide important insight into the ways that American sportsmen and women benefit international conservation from boosting economies and creating hundreds of jobs to enhancing wildlife conservation," Zinke said at the time (***Greenwire***, Nov. 8, 2017).

These "wildlife habitat and conservation" representatives on the council include Safari Club International President Paul Babaz and John Jackson III, an attorney and past president of Safari Club International who is now president of a group called Conservation Force.

"There have been regional and national and international workshops on how to save the African lion," Jackson said on C-SPAN in a 2015 interview, "and in each case, hunting was found not to be the cause of the decline but the solution and a method of saving African lions."

Chris Hudson, who is a life member of both the NRA and the Dallas Safari Club, and Gary Kania, a former NRA and Nature Conservancy staffer who now serves as vice president for policy of the

Congressional Sportsmen's Foundation, were also appointed to the "wildlife habitat and conservation" seats.

Six seats are occupied by members identified as "U.S. hunters actively engaged in international and/or domestic hunting conservation." These include Texas resident Denise We ker, who last month was presented with the Safari Club International's Diana Award.

"Named for the huntress of Roman mythology, it recognizes the women of SCI who have excelled in international big game hunting," the organization's website explains, adding that "nominees will have shown exemplary ethics in the field ... and have personally given of their time and energies to enhance wildlife conservation and education."

Three members are identified with the "tourism, outfitting and/or guide industries." These include Kansas attorney Keith Mark, who also runs MacMillan River Adventures in Canada's Yukon Territory, which guides clients in hunting moose, black bears and other species.

"I have hunted all over the world, and I have seen the value of what hunting can do for a community," Mark said in an interview earlier this year.

One member represents the "archery and/or hunting sports industry." For this seat, Interior tapped prominent hunter Cameron Hanes.

The new panel will examine issues from "recommending removal of barriers to the importation" of legally hunted wildlife to reviewing the Endangered Species Act's foreign listed species and streamlining import permits, according to Interior. It will meet twice a year.

Some observers remain skeptical, including 38 House Democrats who wrote Zinke in January urging him to abandon what they dismissed as a "misguided idea."

"Trophy hunting is unethical, unpopular and of questionable conservation value in many cases," the lawmakers wrote in the letter led by Rep. Don Beyer (D-Va.) and Rep. Raúl Gr jalva (D-Ariz.). "Further, this council is a poor use of taxpayer dollars."

Subject: International Wildlife Conservation Council: application material

You are receiving this email because you have either nominated an individual, have yourself been nominated, or have made an inquiry about nominations to the International Wildlife Conservation Council, but I have yet to receive application materials. The nomination period ends this Friday, December 8 so please provide application materials (see below for a description) if you remain interested in supporting an application to the Council.

While here is no set format for an application package to the IWCC, at a minimum it should include a resume providing an adequate description of the nominee's qualifications, including information that would enable the U.S. Department of the Interior to make an informed decision regarding meeting the membership requirements of the IWCC and to permit us to contact he applicant. Here are the IWCC membership requirements and description of duties:

IWCC Membership

Members must be senior-level representatives of their organizations and/or have the ability to represent heir designated constituency.

- Wildlife and habitat conservation/ management organizations;
- U.S. hunters actively engaged in international and/or domestic hunting conservation;
- The firearms or ammunition manufacturing industry;
- Archery and/or hunting sports industry; and
- Tourism, outfitter, and/or guide industries related to interna ional hunting.

IWCC Duties

- Developing a plan for public engagement and education on the benefits of international hunting;
- reviewing and making recommendations for changes, when needed, on all Federal programs, and/or regulations, to ensure support of hunting as: (a) An enhancement to foreign wildlife conservation and survival, and (b) an effec ive tool to combat illegal trafficking and poaching;
- recommending strategies to benefit the U.S. Fish and Wildlife Service's permit office in receiving timely country data and information so as to remove barriers that impact consulting with range states;
- recommending removal of barriers to the importa ion into the United States of legally hunted wildlife;
- ongoing review of import suspension/bans and providing recommendations that seek to resume the legal trade of those items, where appropriate;
- reviewing seizure and forfeiture actions/practices, and providing recommendations for regulations that will lead to a reduction of unwarranted ac ions;
- reviewing the Endangered Species Act's foreign listed species and interaction with the Convention on International Trade in Endangered Species of Wild Flora and Fauna, with the goal of eliminating regulatory duplications;
- recommending methods for streamlining/expediting the process of import permits.

If you have any additional questions, please don't hesitate to contact me.

Hello Joshua,
I am attaching Keith Mark's resume to further support my recommendation of him for this position.

Please let me know if further materials are helpful or needed.

Sincerely,
Tim Lamar

Attachments:	Comments of WWF, WCS, AWF & IRF on Federal Register Notice Docket no. FW....pdf

Dear Mr. Winchell,

Thank you for the reminder which is most appreciated. Please note that the African Wildlife Foundation (AWF) submitted a comment on November 24th (see attached) jointly co-signed by other conservation NGOs. In our comment document, we express our interest to engage with the Department of Interior on conservation issues through the proposed Council. We, however, expressed our reservations about the terms of reference of the Council and the proposed balance of constituencies. We respectfully requested the Secretary of Interior to address our concerns upon which we can plan consider nominating a candidate to be on the Council.

May you kindly advise on the status of responses to the comments submitted and hopefully we can then make an informed decision regarding nominating a representative to be on the Council.

I look forward to your feedback.

Regards,

Jimmiel

Subject: International Wildlife Conservation Council: application material

You are receiving this email because you have either nominated an individual, have yourself been nominated, or have made an inquiry about nominations to the International Wildlife Conservation Council, but I have yet to receive application materials. The nomination period ends this Friday, December 8 so please provide application materials (see below for a description) if you remain interested in supporting an application to the Council.

While there is no set format for an application package to the IWCC, at a minimum it should include a resume providing an adequate description of the nominee's qualifications, including information that would enable the U S Department of the Interior to make an informed decision regarding meeting the membership requirements of the IWCC and to permit us to contact the applicant. Here are the IWCC membership requirements and description of duties:

IWCC Membership

Members must be senior-level representatives of their organizations and/or have the ability to represent their designated constituency

- Wildlife and habitat conservation/ management organizations;
- U S hunters actively engaged in international and/or domestic hunting conservation;
- The firearms or ammunition manufacturing industry;
- Archery and/or hunting sports industry; and
- Tourism, outfitter, and/or guide industries related to international hunting

IWCC Duties

- Developing a plan for public engagement and education on the benefits of international hunting;
- reviewing and making recommendations for changes, when needed, on all Federal programs, and/or regulations, to ensure support of hunting as: (a) An enhancement to foreign wildlife conservation and survival, and (b) an effective tool to combat illegal trafficking and poaching;
- recommending strategies to benefit the U S Fish and Wildlife Service's permit office in receiving timely country data and information so as to remove barriers that impact consulting with range states;
- recommending removal of barriers to the importation into the United States of legally hunted wildlife;
- ongoing review of import suspension/bans and providing recommendations that seek to resume the legal trade of those items, where appropriate;
- reviewing seizure and forfeiture actions/practices, and providing recommendations for regulations that will lead to a reduction of unwarranted actions;
- reviewing the Endangered Species Act's foreign listed species and interaction with the Convention on International Trade in Endangered Species of Wild Flora and Fauna, with the goal of eliminating regulatory duplications;

- recommending methods for streamlining/expediting the process of import permits

If you have any additional questions, please don't hesitate to contact me

Subject: Re: International Wildlife Conservation Council: application material

Dear Mr Winchell

Since my enquiry about nominating someone from South Africa, there has been a dramatic split in the Professional Hunters Association of South Africa (PHASA)
As a past president of PHASA, I along with almost all past presidents, founding members and respected outfitters, have resigned from the association. We simply could not reconcile ourselves with the changes to the PHASA constitution adopted at their AGM on 22nd November 2017.
Despite our strongest objections, the supporters of the captive bred lion industry in South Africa managed to pass a resolution enabling the abhorred practice to be a ligitimate form of hunting.
The resolution simply does away with reference to “ethical” and replaces it with “legal” in the PHASA constitution. It is not illegal to shoot captive bred lions in South Africa even though it is condemned by every respectable hunting and conservation association worldwide and even more so by the public. This action certainly plays into the hands of the animal rights groups who will again bring this practice under the spotlight to discredit all hunting, and to especially focus on international hunters coming to Africa.
On the 5th and 6th December, an influential group of hunting outfitters, including 6 past presidents, met in Johannesburg to constitute a new association. We have named the new association “Custodians of Professional Hunting and Conservation South Africa” (CPHC). This association already has the support of the other African PH associations, many sponsors, international hunting organisations, most of whom are cutting their ties and support of PHASA.
I was hoping to nominate the of the new association to the IWCC. However, due to the time constraints and the pressure to formulate the new constitution, the topic of the IWCC was not discussed formally. I was elected the chairman and cannot thus nominate myself. Unfortunately, the cut off date of Friday the 8th, is just to soon for the new association to put forward a nominee. However, as chairman, I would welcome any opportunity to involve myself or the CPHC in the proceedings of the IWCC as the outcomes will affect the future livelihoods of our members and their communities.

Kind regards
Stewart Dorrington
Chairman

Dear Mr Winchell

The 6 executive members of the newly formed "Custodians of Professional Hunting and Conservation South Africa" have requested me as chairman, to put my name forward for membership of the IWCC.
I apologise for unprofessional application but the last few days has been rather frenetic in setting up meetings, travelling, agreeing and adopting a constitution (currently being refined by our legal team), finding office space and staff etc. However, as mentioned the support has been tremendous but we still have a way to go before we are fully functional as an effective organisation.

Even in our infancy as an association, we have already been endorsed by every other African PH association, Wild Sheep Foundation, Sports Afield, members of the public and many others. We have also received messages of encouragement from various government and provincial offices.

If there is any realistic chance that my nomination will be considered, I can resubmit it with both endorsements and references from a variety of different interest groups.
I attach hereto a brief resume related to hunting and conservation.

Yours sincerely
Stewart Dorrington

You are receiving this email because you have either nominated an individual, have yourself been nominated, or have made an inquiry about nominations to the International Wildlife Conservation Council, but I have yet to receive application materials. The nomination period ends this Friday, December 8 so please provide application materials (see below for a description) if you remain interested in supporting an application to the Council.

While there is no set format for an application package to the IWCC, at a minimum it should include a resume providing an adequate description of the nominee's qualifications, including information that would enable the U.S. Department of the Interior to make an informed decision regarding meeting the membership requirements of the IWCC and to permit us to contact the applicant. Here are the IWCC membership requirements and description of duties:

IWCC Membership

Members must be senior-level representatives of their organizations and/or have the ability to represent their designated constituency.

- Wildlife and habitat conservation/ management organizations;
- U.S. hunters actively engaged in international and/or domestic hunting conservation;
- The firearms or ammunition manufacturing industry;
- Archery and/or hunting sports industry; and
- Tourism, outfitter, and/or guide industries related to international hunting.

IWCC Duties

- Developing a plan for public engagement and education on the benefits of international hunting;
- reviewing and making recommendations for changes, when needed, on all Federal programs, and/or regulations, to ensure support of hunting as: (a) An enhancement to foreign wildlife conservation and survival, and (b) an effective tool to combat illegal trafficking and poaching;
- recommending strategies to benefit the U.S. Fish and Wildlife Service's permit office in receiving timely country data and information so as to remove barriers that impact consulting with range states;
- recommending removal of barriers to the importation into the United States of legally hunted wildlife;
- ongoing review of import suspension/bans and providing recommendations that seek to resume the legal trade of those items, where appropriate;
- reviewing seizure and forfeiture actions/practices, and providing recommendations for regulations that will lead to a reduction of unwarranted actions;
- reviewing the Endangered Species Act's foreign listed species and interaction with the Convention on International Trade in Endangered Species of Wild Flora and Fauna, with the goal of eliminating regulatory duplications;
- recommending methods for streamlining/expediting the process of import permits.

Subject: International Wildlife Conservation Council: application material

You are receiving this email because you have either nominated an individual, have yourself been nominated, or have made an inquiry about nominations to the International Wildlife Conservation Council, but I have yet to receive application materials. The nomination period ends this Friday, December 8 so please provide application materials (see below for a descrip ion) if you remain interested in supporting an application to the Council.

While there is no set format for an application package to the IWCC, at a minimum it should include a resume providing an adequate description of the nominee's qualifications, including information that would enable the U.S. Department of the Interior to make an informed decision regarding meeting the membership requirements of the IWCC and to permit us to contact the applicant. Here are the IWCC membership requirements and description of duties:

IWCC Membership

Members must be senior-level representatives of their organizations and/or have the ability to represent their designated constituency.

- Wildlife and habitat conservation/ management organizations;
- U.S. hunters actively engaged in international and/or domestic hunting conservation;
- The firearms or ammunition manufacturing industry;
- Archery and/or hunting sports industry; and
- Tourism, outfitter, and/or guide industries related to international hunting.

IWCC Duties

- Developing a plan for public engagement and education on the benefits of international hunting;
- reviewing and making recommendations for changes, when needed, on all Federal programs, and/or regulations, to ensure support of hunting as: (a) An enhancement to foreign wildlife conservation and survival, and (b) an effective tool to combat illegal trafficking and poaching;
- recommending strategies to benefit the U.S. Fish and Wildlife Service's permit office in receiving timely country data and information so as to remove barriers that impact consulting with range states;
- recommending removal of barriers to the importation into the United States of legally hunted wildlife;
- ongoing review of import suspension/bans and providing recommendations that seek to resume the legal trade of those items, where appropriate;
- reviewing seizure and forfeiture actions/practices, and providing recommendations for regulations that will lead to a reduction of unwarranted actions;
- reviewing the Endangered Species Act's foreign listed species and interaction with the Convention on International Trade in Endangered Species of Wild Flora and Fauna, with the goal of eliminating regulatory duplications;
- recommending methods for streamlining/expediting the process of import permits.

If you have any additional questions, please don't hesitate to contact me.

Dear Mr Winchell

I am enquiring as to what the status now is of the IWCC? I presume, as I never heard back from you, that my application was unsuccessful.
Is it possible to disclose who the members are of the council? I know John Boretsky was nominated as was John Jackson of Conservation Force. The latter has let me know he has been elected onto the council. However, we wish to establish who the others are so we can provide relevant information to them that may benefit our communities and wildlife.
Our new association has made rapid headway in the new year receiving endorsements and financial from Dallas Safari Club and the Wildsheep Foundation. We are also now recognised by all outfitter and PH associations in southern and East Africa as the representative body for professional hunting in South Africa.
Our association “Custodians of Professional Hunting and Conservation-SA” is hoping to influence policy makers to make more informed decisions based on evidence. It appears that much of the USFWS laws affecting us negatively are not backed evidence on the ground. As professional hunters in the field, we are able to provide accurate and up to date observations of what is really transpiring.
Hope we can be of assistance in one way or another.

Kind regards
Stewart Dorrington

Mr. Dorrington,

If you wish to be considered for membership on the IWCC you may nominate yourself as an individual, without the need for formal/official support from any organization.

If you wish to do so, please submit such a nomination to me *no later* than December 8, 2017.

> Since my enquiry about nominating someone from South Africa, there has been a dramatic split in the Professional Hunters Association of South Africa (PHASA)
> As a past president of PHASA, I along with almost all past presidents, founding members and respected outfitters, have resigned from the association. We simply could not reconcile ourselves with the changes to the PHASA constitution adopted at their AGM on 22nd November 2017.
> Despite our strongest objections, the supporters of the captive bred lion industry in South Africa managed to pass a resolution enabling the abhorred practice to be a ligitimate form of hunting.
> The resolution simply does away with reference to "ethical" and replaces it with "legal" in the PHASA constitution. It is not illegal to shoot captive bred lions in South Africa even though it is condemned by every respectable hunting and conservation association worldwide and even more so by the public. This action certainly plays into the hands of the animal rights groups who will again bring this practice under the spotlight to discredit all hunting, and to especially focus on international hunters coming to Africa.
> On the 5th and 6th December, an influential group of hunting outfitters, including 6 past presidents, met in Johannesburg to constitute a new association. We have named the new association "Custodians of Professional Hunting and Conservation South Africa" (CPHC). This association already has the support of the other African PH associations, many sponsors, international hunting organisations, most of whom are cutting their ties and support of PHASA.

I was hoping to nominate the of the new association to the IWCC. However, due to the time constraints and the pressure to formulate the new constitution, the topic of the IWCC was not discussed formally. I was elected the chairman and cannot thus nominate myself.
Unfortunately, the cut off date of Friday the 8th, is just to soon for the new association to put forward a nominee. However, as chairman, I would welcome any opportunity to involve myself or the CPHC in the proceedings of the IWCC as the outcomes will affect the future livelihoods of our members and their communities.

Kind regards
Stewart Dorrington
Chairman

WILDLIFE

New Interior panel loaded with safari and hunting advocates

Michael Doyle, E&E News reporter
Published: Friday, March 2, 2018

The 16 members of a new pro-hunting International Wildlife Conservation Council will have their first meeting on March 16. Pamela King/E&E News

Stocked with representatives from the National Rifle Association, Safari Club International and other like-minded groups, the Interior Department's newest advisory committee is about to start trekking.

In their first all-day meeting, scheduled to be held March 16 at the Main Interior Building, the 16 members of the International Wildlife Conservation Council will start off with an unambiguous agenda.

"The Council provides advice and recommendations to the Secretary of the Interior regarding the benefits that result from United States citizens traveling to foreign nations to engage in hunting," the Fish and Wildlife Service **stated** in the *Federal Register* today.

Established last year by Interior Secretary Ryan Zinke, the council was explicitly designed through its membership criteria to have a pro-hunting perspective.

One member, for instance, was mandated to be a representative of the "firearms or ammunition manufacturing industry." Erica Rhoad, the NRA's director of hunting policy, was tapped for this seat.

Five members represent "wildlife habitat and conservation" organizations, according to the list posted on a Federal Advisory Committee Act **website**. Interior has not issued a press release announcing the members, who were notified of their selection in late December, though Zinke did promote the panel when he announced the idea Nov. 8, 2017.

"This council will provide important insight into the ways that American sportsmen and women benefit international conservation from boosting economies and creating hundreds of jobs to enhancing wildlife conservation," Zinke said at the time (***Greenwire***, Nov. 8, 2017).

These "wildlife habitat and conservation" representatives on the council include Safari Club International President Paul Babaz and John Jackson III, an attorney and past president of Safari Club International who is now president of a group called Conservation Force.

"There have been regional and national and international workshops on how to save the African lion," Jackson said on C-SPAN in a 2015 interview, "and in each case, hunting was found not to be the cause of the decline but the solution and a method of saving African lions."

Chris Hudson, who is a life member of both the NRA and the Dallas Safari Club, and Gary Kania, a former NRA and Nature Conservancy staffer who now serves as vice president for policy of the Congressional Sportsmen's Foundation, were also appointed to the "wildlife habitat and conservation" seats.

Six seats are occupied by members identified as "U.S. hunters actively engaged in international and/or domestic hunting conservation." These include Texas resident Denise Welker, who last month was presented with the Safari Club International's Diana Award.

"Named for the huntress of Roman mythology, it recognizes the women of SCI who have excelled in international big game hunting," the organization's website explains, adding that "nominees will have shown exemplary ethics in the field ... and have personally given of their time and energies to enhance wildlife conservation and education."

Three members are identified with the "tourism, outfitting and/or guide industries." These include Kansas attorney Keith Mark, who also runs MacMillan River Adventures in Canada's Yukon Territory, which guides clients in hunting moose, black bears and other species.

"I have hunted all over the world, and I have seen the value of what hunting can do for a community," Mark said in an interview earlier this year.

One member represents the "archery and/or hunting sports industry." For this seat, Interior tapped prominent hunter Cameron Hanes.

The new panel will examine issues from "recommending removal of barriers to the importation" of legally hunted wildlife to reviewing the Endangered Species Act's foreign listed species and streamlining import permits, according to Interior. It will meet twice a year.

Some observers remain skeptical, including 38 House Democrats who wrote Zinke in January urging him to abandon what they dismissed as a "misguided idea."

"Trophy hunting is unethical, unpopular and of questionable conservation value in many cases," the lawmakers wrote in the letter led by Rep. Don Beyer (D-Va.) and Rep. Raúl Grijalva (D-Ariz.). "Further, this council is a poor use of taxpayer dollars."

Subject:	Re: IWCC March 16 mtg agenda & building entry instructions
Attachments:	Recommendation from public-IWCC members.pdf

HelloJoshua,
I'm sorry I won't be able to attend the IWCC meeting tomorrow. **I hope you are able to provide me with a link to presentations, minutes, or video after the meeting.**

Attached, I have recommended 3 knowledgeable, in-country conservation experts you might ask to join the council or whom you might confer with. Briefly below:
1. **Dr. Phillip Muruth**i, chief scientist for African Wildlife Foundation - he works all across Africa, https://www.huffingtonpost.com/entry/the-extreme-life-of-a-conservation-scientist_us_5a0c36bfe4b06d8966cf33d8
2. **Dr Laurie Marker** - Director of Cheetah Conservation Fund - she has been in Namibia for 0ver 20 working with local farmers, endangered species, hunters, tourism, conservationists implementing very effective win-win systems. https://cheetah.org/about-us/staff/laurie-l-marker-dphil/
3. **Kai-Uwe Denker** with the Namibia Professional Hunting Association (NAPHA) - He is an award-winning situ tracker-ranger to guide foreign trophy hunters on their hunts. http://huntnamibia.com.na/2017/08/22/conservationist-beyond-doubt-kai-uwe-denker/

These in-country conservationists may provide insights when the council seeks to understand impacts past and future of trophy hunting within African nations. I did read the submitted public comments.
I noticed much focus on South Africa, also Zimbabwe, and Kenya, with one expert inTanzania. I would add that each country has very different regulatory structures not to mention differing hopes and economic issues. Low-population countries like Namibia and Botswana are working to defeat rural poverty and habitat losses. They also have a unique conservancy system - developed by emulating American ingenuity - and they are working hard to maintain their wildlife and habitats while building prosperity.
Thank you.

Subject: IWCC March 16 mtg agenda & building entry instructions

You are registered to attend the International Wildlife Conservation Council meeting on March 16th at the South Penthouse of the Main Interior Building (1849 C St. NW, Washington DC).

The meeting agenda and associated documents are posted here. All meeting-related documents will be posted to this website, so please check back there for the most up-to-date information.

I've included your name on Main Interior's visitor list for the meeting. When you enter the building please present a valid photo ID at the security desk, inform them you are attending the IWCC meeting in the South Penthouse and you will be given a visitor pass.

The South Penthouse is accessed via its own elevator: after receiving your Main Interior Building visitor pass enter the building, take an elevator up and exit on the 7th floor. Walk south along the main corridor and you will see the South Penthouse elevator on the right side (look for the sign).

Hi Josh,

I'm sure that you are inundated right now and I do apologize for adding to your inbox. I talked with Sara Walker earlier today and promised that I would try to get an answer regarding admission to tomorrow's meeting. Do folks have to be pre-registered? Or can you they just show up?

Thanks and best of luck tomorrow! Danielle

Hi Josh—

Is it still possible to RSVP for the IWCC meeting on Friday? Just as an observer.

And apologies if you received this message twice. I sent an email yesterday, but didn't see it in my "sent" items so wanted to make sure it got to you!

Thanks,
Sara

Josh, the last flight out of DCA to Great Falls, Montana is at 5 p.m. on that Friday. Can I make this?

Thanks so much,
Mike Ingram

Denise M. Organ

Subject: IWCC Meeting Information

Council Members,

I wanted to send a quick note once again congratulating you on your appointment to the International Wildlife Conservation Council and re-confirming two important dates:

- **Thursday March 15th starting at 5:30pm:** Reception at the Main Interior Building (1849 C St. NW, Washington, D.C.) for IWCC members and senior DOI leadership followed by a group dinner.
- **Friday March 16th 8am-4:30pm:** Inaugural Meeting of the IWCC at the Main Interior Building.

I am developing an agenda for the meeting and more detailed reception/dinner information. I will provide this information as soon as it is finalized but please call if you have any questions. **FYI** - Knowledge of the IWCC meeting will be made public tomorrow Thursday March 1, 2018, when a meeting notice will be posted in the Federal Register (the official journal of the federal government).

My colleague Beverly Robinson is in the process of contacting all members to get you into our travel system, which will allow us to arrange and pay for your air-travel and reimburse you for other IWCC meeting-related travel and lodging costs. If you have any travel-related questions, do not hesitate to contact Beverly at 703 358-2393 (or beverly_robinson@fws.gov). Please do not book your airline tickets until you've talked with Beverly!

I've attached the official charter of the IWCC, which provides a description of the Council and its duties. Below is the list of your fellow IWCC members and - as outlined in your appointment letter - the constituent group Secretary Zinke assigned you to represent:

- Paul Babaz Wildlife and habitat conservation/management organizations
- Bill Brewster U.S. hunters actively engaged in int'l and/or domestic hunting conservation
- Ivan Carter U.S. hunters actively engaged in int'l and/or domestic hunting conservation
- Steven Chancellor U.S. hunters actively engaged in int'l and/or domestic hunting conservation
- Jenifer Chatfield Wildlife and habitat conservation/management organizations
- Cameron Hanes Archery and/or hunting sports industry
- Peter Horn The firearms or ammunition manufacturing industry
- Chris Hudson Wildlife and habitat conservation/management organizations
- Mike Ingram U.S. hunters actively engaged in int'l and/or domestic hunting conservation
- John Jackson Wildlife and habitat conservation/management organizations
- Gary Kania Wildlife and habitat conservation/management organizations
- Terry Maple Tourism, outfitter, and/or guide industries related to international hunting
- Keith Mark Tourism, outfitter, and/or guide industries related to international hunting
- Olivia Opre U.S. hunters actively engaged in int'l and/or domestic hunting conservation
- Erica Rhoad The firearms or ammunition manufacturing industry
- Denise Welker U.S. hunters actively engaged in int'l and/or domestic hunting conservation

I look forward to meeting you all in a couple weeks.

Joshua,

I already booked my flight and hotel. If it is a problem I will just bear the costs. I know better next trip.

Thanks,

John

Thank you Joshua.

We have changed up the schedule a little. Also, we have approval to use the Secretary's rep fund for coffee and donuts, or some kind of food, in the morning for

"Coffee with Dep Sec" and a refill in afternoon during meeting.

Joshua, do you mind checking prices with downstairs to see what we could get? No more than $200 for the entire day.

We will set up a 6 ft table in Dep Sec's office with coffee and food.

Please note that we just want to do coffee from 8:30-9:00.

Todd Willens approved this schedule and Chief of Staff approved use of rep fund.

Thanks!

8:30- 9am: Coffee with Deputy Secretary- In his office/balcony
9-10am: Administrative Session *Note*: Closed session, no public.
9:30-9:45am: *Note*: Open up meeting room to public, get them seated.
9:45-10am: Opening Remarks (Sheehan)

- *Note*: This starts the open/public mtg

10-10:30am: Member Introductions
10:30-11:30: FWS International Affairs Program Briefing (FWS)
11:30-12:30pm: State Department/U.S. Task Force on Wildlife Trafficking Briefing (State Dept./DOJ/USAID/FWS)
12:30-2pm: Lunch
2-3pm: Public Comment
3-3:30pm: Council Discussion

- *Note*: topics could include selection of chair/vice-chair; timeframe/location of next full meeting.

> **Subject:** IWCC Meeting Information

Council Members,

I wanted to send a quick note once again congratulating you on your appointment to the International Wildlife Conservation Council and re-confirming two important dates:

- **Thursday March 15th starting at 5:30pm:** Reception at the Main Interior Building (1849 C St. NW, Washington, D.C.) for IWCC members and senior DOI leadership followed by a group dinner.
- **Friday March 16th 8am-4:30pm:** Inaugural Meeting of the IWCC at the Main Interior Building.

I am developing an agenda for the meeting and more detailed reception/dinner information. I will provide this information as soon as it is finalized but please call if you have any questions. **FYI** - Knowledge of the IWCC meeting will be made public tomorrow Thursday March 1, 2018, when a meeting notice will be posted in the Federal Register (the official journal of the federal government).

My colleague Beverly Robinson is in the process of contacting all members to get you into our travel system, which will allow us to arrange and pay for your air-travel and reimburse you for other IWCC meeting-related travel and lodging costs. If you have any travel-related questions, do not hesitate to contact Beverly at 703 358-2393 (or beverly_robinson@fws.gov). Please do not book your airline tickets until you've talked with Beverly!

I've attached the official charter of the IWCC, which provides a description of the Council and its duties. Below is the list of your fellow IWCC members and - as outlined in your appointment letter - the constituent group Secretary Zinke assigned you to represent:

- Paul Babaz Wildlife and habitat conservation/management organizations
- Bill Brewster U.S. hunters actively engaged in int'l and/or domestic hunting conservation
- Ivan Carter U.S. hunters actively engaged in int'l and/or domestic hunting conservation
- Steven Chancellor U.S. hunters actively engaged in int'l and/or domestic hunting conservation
- Jenifer Chatfield Wildlife and habitat conservation/management organizations
- Cameron Hanes Archery and/or hunting sports industry
- Peter Horn The firearms or ammunition manufacturing industry
- Chris Hudson Wildlife and habitat conservation/management organizations
- Mike Ingram U.S. hunters actively engaged in int'l and/or domestic hunting conservation
- John Jackson Wildlife and habitat conservation/management organizations
- Gary Kania Wildlife and habitat conservation/management organizations
- Terry Maple Tourism, outfitter, and/or guide industries related to international hunting
- Keith Mark Tourism, outfitter, and/or guide industries related to international hunting
- Olivia Opre U.S. hunters actively engaged in int'l and/or domestic hunting conservation
- Erica Rhoad The firearms or ammunition manufacturing industry
- Denise Welker U.S. hunters actively engaged in int'l and/or domestic hunting conservation

I look forward to meeting you all in a couple weeks.

Rowena, attached is my internal planning agenda for meetings on March 16 and the IWCC charter. As one of the State ex officio members of the IWCC, you are welcome to join the morning reception at the Deputy Secretary's office (please RSVP if you do wish to attend) and I encourage you to attend the administrative session (closed to public) from 9-10am. Your name is on the visitor list at Main Interior.

The IWCC meeting itself starts at 10:15am.

The full list of IWCC members and the constituent group the Secretary tasked them to represent, is here.

Hi Joshua,

The AWCP agenda went out today and I see you are on the agenda to speak about the “newly formed Hunting and Shooting Sports Conservation Council and the International Wildlife Conservation Council.” Has the Hunting Council been selected? Maybe missed the announcement. I know that the International Council is meeting tomorrow as its first meeting.

Thanks,
Susan

Hi Joshua,

Deputy Chief of Staff would like to attend the dinner tonight.

Also, we are now going to host the breakfast and coffee in the Secretary's office- not the Deputy Secretary's office. I don't think there is a need to send another email to the members, but just wanted you to know.

Thanks!

I've received a few questions about appropriate attire for the March 15th reception/dinner and the March 16th meeting.

I suggest business casual with comfortable shoes (for some walking) for the March 15th reception and special event. Business attire for the March 16 meeting.

Roslyn and Thomas,

I just spoke with Greg on the phone and he is aware of the change, but I also wanted to let you know of a change to the dinner plan tonight:

IWCC Dinner
6:15pm March 15
Carmine's DC (Italian Restaurant)
425 7th St NW, Washington, DC 20004

I'll be there in advance to welcome guests, the reservation is under my name.

Hello Joshua,

I hope that all is well with you.

I am writing to let you know that we have had a change in plans at State. Kaush Arha, USAID, Senior Advisor Environment, Economic Growth and Education, will represent the State Department on the Council. Kaush has an ongoing dialog with DOI on international hunting issues and has been a leader in the area for some time.

He is CC'd here. Please send him the information for the meeting on Friday.

Best, Melissa

Appropriation Hearing Q and A

"Brown, Andrew" <andrew_brown@fws.gov>

From: "Brown, Andrew" <andrew_brown@fws.gov>
Sent: Thu Mar 15 2018 07:05:20 GMT-0600 (MDT)
To: Joshua Winchell <joshua_winchell@fws.gov>
Subject: Appropriation Hearing Q and A

Hi Joshua,

Division of Budget is working to develop a set of questions and answers to prepare the Principal Deputy Director for hearings on the FY 2019 President's budget with Appropriations Subcommittees for Interior. The dates for these hearings have not yet been set.

One topic we anticipate a Congress members to ask about in a question is the International Wildlife Conservation Council. Can you please review this draft question and answer and provide any edits?

Thank you.

What are the goals of the International Wildlife Conservation Council? What is its status? Do you have any representation from the conservation community on the Council?

Response
The Council will advise the Secretary of the Interior on the benefits that international recreational hunting has on foreign wildlife and habitat conservation, anti-poaching and illegal wildlife trafficking programs, and other ways in which international hunting benefits human populations. This past November a call for nominations was announced in a Federal Register notice that asked for public input on nominations by December 8, 2017.The Council is holding its first meeting on March 16. Council membership is available on the Federal Advisory Committee Act website.

DOI In The News

Trump Cabinet Members Accused Of Living Large At Taxpayer Expense.

The Washington Post (3/14, Eilperin, Dennis) reports that President Trump, who last year "extolled the virtues of the men and women" in his Cabinet, now "finds himself presiding over a Cabinet in which a number of members stand accused of living large at taxpayer expense – often by aggressively embracing the trappings of their high government posts. At least a half-dozen current or former Trump Cabinet officials have been mired in federal investigations over everything from high-end travel and spending on items such as a soundproof phone booth to the role of family members weighing in on official business." The Post specifically cites controversies surrounding HUD Secretary Carson, EPA Administrator Pruitt, VA Secretary Shulkin, Interior Secretary Zinke, and ex-HHS Secretary Tom Price.

CNN (3/14, Liptak, Marsh) reports that Trump is "openly wondering what happened to the collection of officials he described only five months ago as the 'finest group of people ever assembled' as members of his Cabinet find themselves embroiled in ethics scandals or woefully at odds with the White House." Trump has "complained in recent days that his Cabinet has fallen well short of his expectations and wants to purge all the 'deadweight,' one official said."

Additional coverage was provided by the AP (3/14, Lemire).

A Watchdog Group Sues 16 Federal Agencies For Records Of Office Upgrade Expenses.

Pacific Standard (3/14, Wheeling) reports that "American Oversight, a liberal watchdog group, filed a lawsuit Wednesday against 16 federal agencies for failing to respond to Freedom of Information Act requests made in November." The group is "seeking records of "actual or projected expenses" related to office renovations or upgrades for senior officials at the Departments of Agriculture, Commerce, Defense, Education, Energy, Health and Human Services, Homeland Security, Interior, Justice, Labor, Transportation, Treasury, Veterans Affairs, and State, as well as the Office of Management and Budget and the General Services Administration."

Interior Leaders Talk Progress On Priorities After Year Under Trump.

The Alaska Journal of Commerce (3/14, Brehmer) reports that Deputy Interior Secretary Dave Bernhardt and Assistant Secretary Joe Balash visited Anchorage on March 8 "to report on the progress of Interior's work during the first year of the Trump

administration." Addressing the biweekly breakfast gathering of Alaska Support Industry Alliance members, Bernhardt said,"We had a very, very productive year if you compare our policy development to prior administrations." Balash commented, "Every day I get to work on something related to Alaska." Bernhardt "said Balash's work will likely continue to be Alaska-centric as the Bureau of Land Management should be publishing a Notice of Intent to initiate the environmental impact statement process for ANWR lease sales within several weeks."

US Plans To Complete ANWR Lease Review In 2019. Argus Media (3/14) reports that the Interior Department hopes to complete an environmental review of oil and gas drilling in the Arctic National Wildlife Refuge by early 2019 so that it can then begin holding lease sales for Alaska's coastal plain. Potential leasing in that area is likely to spark "years of litigation and protests," which could dampen industry interest in the lease sale. American Petroleum Institute chief economist Dean Foreman said that oil companies are likely to be interested in exploration in the area "with a view to augment their reserve base." Foreman said, "We can use modern technology to discover where the resource potential is in ways that have not been possible or permitted up to this point."

Interior Unprepared For Cyber Threats.

Federal Computer Week (3/14, Gunter) reports that the Interior Department is "vulnerable to the theft of sensitive data, unprepared to detect and deal with cyber threats and failing to keep users on its computer network from visiting – downloading materials from – illicit websites, according to a new watchdog report." According to the article, "during testing at a U.S. Geological Survey facility as part of a department-wide audit, Interior's inspector general, working with independent accounting firm KPMG, identified a 'workstation attempting to communicate with IP addresses of known malware command and control website in Russia.'" The machine, Interior later found, "had been compromised." Auditors also found that "inappropriate and risky network behavior occurred undetected...due to deficiencies and inconsistencies in Interior's Office of the CIO incident response program."

Oil Group To Lobby President After Stay At Trump Hotel.

Politico (3/14, Lefebvre) reports that the American Petroleum Institute is holding its annual board meeting at the Trump International Hotel in Washington, "before its executive committee goes to the White House to voice concerns about President Donald Trump's proposed steel tariffs, sources familiar with the meetings told POLITICO." API's meeting "could involve up to 200 people representing various oil and gas companies – including the top executives of major oil companies – paying to stay at Trump's hotel." Interior Secretary Ryan Zinke and Energy Secretary Rick Perry "are scheduled to attend the board meeting at the Trump Hotel on Wednesday night, two sources told POLITICO."

Zinke Criticized For Wild-West Mentality Over Oil And Gas.

UPI (3/14, Graeber) reports that critics of Interior Secretary Ryan Zinke, who has defended the strategy of energy dominance, say he is "out of step with the will of the people." Last month, Florida Petroleum Council Executive Director David Mica said that allowing offshore drilling in Florida could bring in new sources of revenue and enrich the state's economic diversity. However, Sen. Bill Nelson said during a hearing of the Senate Energy and Natural Resources Committee "that was something his constituents didn't want to hear."

Additional coverage of the hearing was provided by Natural Gas Intelligence (3/14, Passut) and Platts (3/14, Saville).

Interior Will Send $18M From Roan Drilling To Colorado.

The AP (3/14) reports that the Interior Department will "send $18 million from oil and gas development from Colorado's Roan Plateau back to the state," Interior Secretary Ryan Zinke announced Tuesday during a Senate committee hearing. According to the article, "the money is leftover from the cleanup of Anvil Points, a naval oil shale research

site northwest of Rifle." Pending state legislation "would send it to four northwestern Colorado counties – directly to Rio Blanco and Moffat counties and to federal mineral lease districts in Mesa and Garfield counties."

Big Tax Break For Coal In Arizona Stalls Out At The Legislature.

The Arizona Republic (3/14, Randazzo) reports Arizona lawmakers on Wednesday "debated but failed to pass a proposal to give about $12 million in annual tax breaks for coal sales...in an effort to save the Navajo Generating Station power plant, which is closing next year." According to the bill's sponsor, Rep. Mark Finchem "potential buyers are looking at the power plant, but are unlikely to step in and save it without the tax break." Peabody Energy is the owner of the Kayenta Mine on Navajo and Hopi land in northern Arizona, which sells coal to the facility. "If the plant closes, so will the mine." Finchem contends "that taxes on the coal are illegal, but the courts have not recognized that." Finchem's bill passed "the House but was held in the Senate Finance committee Wednesday."

Advocates Fight To Save Grant That Helps Preserve History Of World War II Internment.

NBC News (3/14, Kandil) reports that "a federal grant program aimed at preserving the history of World War II-era Japanese-American incarceration could be in danger under President Donald Trump's proposed 2019 budget." The budget proposal "declines to request funding for the Japanese American Confinement Sites (JACS) grant program, which has provided more than $21 million of funding for the research and preservation of World War II-era incarceration camps, collection centers, and Department of Justice prisons over nearly a decade." Heather Swift, Department of the Interior press secretary, said, "The proposed budget makes a historic investment in our National Parks infrastructure backlog. The budget prioritizes funding for core operations in the National Park System and addressing the $11.6 deferred maintenance backlog in parks across the nation through the Public Lands Infrastructure Fund. The budget request identifies savings in other programs, including some competitive grant programs." The nonprofit Japanese American Citizens League is "encouraging people to contact their representatives about the issue before Friday, the deadline for members of Congress to submit their requests for funding."

Poll: Montanans Split On Elected Officials, Dislike Zinke's Recommendations For Monuments.

The Missoulian (MT) (3/14, Szpaller) reports that "Montanans are divided over the job performance of statewide elected officials but generally disapprove of U.S. Department of the Interior recommendations to reduce the size of national monuments, according to results of a new poll announced Thursday by the University of Montana." According to UM's inaugural Big Sky Poll, "some 62 percent of Montanans polled disapproved of Interior Secretary Ryan Zinke's recommendations to decrease the size of national monuments," while "29 percent approved of the recommendations, and an estimated 9 percent declined to answer the question." The article says that "according to UM, the poll was conducted via telephone between Feb. 1 and Feb. 19 and has a margin of error of plus or minus 4 percentage points at the 95 percent confidence level."

Conservationists Launch Anti-Gianforte Campaign.

The AP (3/14, Volz) reports that "a conservation group is launching an ad campaign that repeatedly accuses U.S. Rep. Greg Gianforte of 'assaulting' and 'attacking' public lands since he's been in office, a veiled reference to the Montana Republican's attack of a reporter last year." League of Conservation Voters officials "said they are spending $244,000 on ads through April, the first significant outside group spending in Gianforte's nascent re-election campaign." The League of Conservation Voters officials insist "the ad campaign is not about Gianforte's re-election, but about bills pending in Congress."

Whistleblower Denounces Trump's Failure To Tackle Climate Change.

The Lewiston (ME) Sun Journal (3/14, Collins) reports that Joel Clement, "former director of the U.S. Office of Policy Analysis and the top climate-change policy official at the Department of Interior," spoke at Bates College on Wednesday evening. Clement claimed that Interior Secretary Ryan Zinke "could not just clean house of career bureaucrats whose jobs are protected by law," so "he wound up transferring executives in the hope of driving them to quit." But "rather than go quietly off to a new home in Tulsa, Clement got a lawyer, filed a whistleblower complaint and took to the pages of The Washington Post to denounce what he saw going on within the department." He resigned in October.

Bureau Of Indian Affairs

WATCH: Elouise Cobell Fights For Native Americans In '100 Years'.

The ColorLines (3/14, Rao) reports that PBS/World Channel on Tuesday night aired a documentary on "how banker Elouise Cobell fought the United States government for the billions of dollars it owed Indigenous landowners." The film "explores how Cobell, a member of the Blackfeet Nation and founder of the tribe-operated Blackfeet National Bank, discovered several financial abuses at the Bureau of Indian Affairs throughout the 1980s and '90s."

Bureau Of Land Management

BLM Oil/gas Leases Draw Concerns.

The Alamosa (CO) Valley Courier (3/14, Heide) reports that local residents are concerned about the impact of oil and gas leases near the Great Sand Dunes National Park & Preserve. The Bureau of Land Management "plans to offer about a dozen parcels for potential oil and gas sale leases in September and will be releasing an environmental assessment regarding the parcels next week, with the public allowed 15 days afterwards (until April 6) to comment on the environmental assessment." Anna Lee Vargas, director, Project Management and Community Outreach for Conejos Clean Water, said, "We are so conscious as community members of our land and our water, air quality, water quality. We just don't want anything to impact that."

Keller Receives NMCGA Award.

The Carlsbad (NM) Current-Argus (3/14) reports that "Ray Keller received the 2017 Ayudando Siempre Alli Award from the New Mexico Cattle Growers Association (NMCGA) at the Joint Stockmen's Convention recently held in Albuquerque." At the Bureau of Land Management's Carlsbad Field Office, Keller "spearheaded the Restore New Mexico program that put funds from the National Resource Conservation Service EQIP program together with private dollars to change the face of the landscape of southeastern New Mexico." According to the article, "through his efforts, over 3 million acres have been treated with programs ranging from invasive species control and noxious weed treatment." NMCGA President Tom Sidwell said, "We truly appreciate the work that Ray has put into improving landscapes in southeastern New Mexico."

Bureau Of Ocean Energy Management

Trump's OCS Drilling Plan Draws Cheers, Jeers From Coastal Elected Officials.

Natural Gas Intelligence (3/13, Passut) reports elected officials from coastal states "took disparate views over the Trump administration's proposal to open more than 90% of the U.S. Outer Continental Shelf (OCS) to oil and natural gas exploration, which garnered more than 630,000 public comments." Most of the comments "appeared to be in opposition to the draft proposed program (DPP) for the OCS Oil and Gas Leasing Program for 2019-2024, which the Department of Interior's (DOI) Bureau of Ocean Energy

Management unveiled earlier this year."

Offshore Drilling Meeting Battles Clock, Weather.

The Ellsworth (ME) American (3/13, Rappaport) reports that a recent Bureau of Ocean Energy Management (BOEM) recently held a meeting in Maine to discuss the Trump Administration's offshore drilling plan, but the meeting was held only one day before the close of the public comments period and took place hours before a winter storm. The article highlights opposition to the plan from Maine congressmen and local residents.

Could N.J. Offshore Drill Plan Be Dead? Local Congressmen Are Optimistic.

Philly (PA) (2/28, Kummer) reports that several New Jersey members of Congress "say they met Tuesday with Interior Secretary Ryan Zinke and they came away from the conversation believing drilling off the state's coast is unlikely." However, Zinke "has not officially removed New Jersey from the list of areas under consideration for offshore exploration and drilling for natural gas and oil. Florida has already been removed."

AG Healey Pledges To Fight Trump Offshore Drilling Plan Along Massachusetts Coast.

The Springfield (MA) Republican (3/13, Serreze) reports Attorney General Maura Healey on Monday "vowed to fight federal plans to open the Massachusetts coastline to offshore oil and gas drilling." Healey said, "Massachusetts does not want drilling off our coast and I will fight this proposal to defend our state and our residents. ... Of all the bad environmental ideas the Trump administration has proposed, this one may take the cake."

Commissioners Serenaded At Meeting About Offshore Drilling.

KXRO-AM Aberdeen, WA (3/13) reports that a group of people in Washington state "serenaded the Grays Harbor County Commissioners showing their opposition to offshore oil drilling but a resolution was still not brought to the floor." The group's effort was part of a bid to get the commissioners to pass a resolution against offshore drilling.

Bureau Of Reclamation

Klamath River Fish-kill Preventive Dam Releases Challenged By Farmers, Water Districts.

The Eureka (CA) Times Standard (3/14, Houston) reports that "local tribes' say critically important dam water releases meant to protect threatened salmon on the Klamath River from deadly parasitic disease outbreaks are being contested by irrigators and water districts in the Klamath Basin as they face drought conditions." According to the article, "basin ranchers, farmers and water districts argue in a federal court filing this month that the potential for fish disease outbreaks this year is low, but that the drought conditions the basin faces could cause significant economic impacts to their region." Bureau of Reclamation public affairs officer Erin Curtis "said the basin does not have enough water to provide for both irrigators and the dam releases without lowering water levels at Upper Klamath Lake."

Heller Introduces Bill To Reauthorize Colorado River Program.

The Las Vegas Review-Journal (3/14, Martin) reports that "legislation has been introduced in the Senate to reauthorize the Colorado River System Conservation Program critical to water supplies for Southern Nevada." Sen. Dean Heller "filed the bill to reauthorize for four years the conservation program, first passed by Congress in 2015 to conserve water and mitigate impacts of drought in the Colorado River Basin."

Fish And Wildlife Service

Ellen DeGeneres Calls On Trump To Reverse Elephant Trophy Decision: 'Don't Make Me Tweet About This'.

The Washington Examiner (3/14, Mayfield) reports that "talk show host Ellen DeGeneres is again calling on President Trump to reverse his administration's decision to allow elephant body parts into the U.S. as trophies." In a clip of her show shared on social media Wednesday, DeGeneres said, "Mr. President, I am begging you to change your mind and protect these majestic animals. Don't make me tweet about this." She added, "I don't wanna get into a battle of words or anything ... but I have a Twitter account, too, and mine is much bigger than yours."

Animal Rights Group Sues For Details On Interior's Pro-Hunting Group.

The Hill (3/14, Green) reports that "an animals rights group is suing the Interior Department after the agency failed to provide details on a new advisory group created to advocate for international hunting." The group Born Free USA "filed a suit against Interior's Fish and Wildlife Service on Wednesday, arguing that the agency failed to provide details they requested in a November Freedom of Information Act (FOIA) request about the agency's International Wildlife Conservation Council (IWCC)." The group's "initial November FOIA request asked for documents related to the duties of the IWCC, the circumstance for its creation and the criteria in which its members were selected." The organization "additionally requested in their FOIA that FWS provide them with 'the authority' that was used to create the group." The suit claim "that FWS failed to meet its deadline to provide the requested details."

Miami Federal Judge Rejects Bid To Stop Walmart In Rare Miami Forest.

The Miami Herald (3/14, Staletovich) reports that "a Miami federal judge has lifted a temporary stop to construction on a Walmart-anchored shopping center on rare pine rockland and hinted that environmentalists are unlikely to win their battle in court." It's unclear "when Palm Beach County developer Peter Cummings will resume work on the planned shopping center and apartments spread across nearly 140 acres near Zoo Miami." However, "environmentalists, armed with additional information released by the U.S. Fish and Wildlife Service since the case was argued, said they plan to keep fighting a project that could pave over one of the largest remaining tracts of pineland outside Everglades National Park."

Additional coverage was provided by the Miami New Times (3/14, Iannelli) and Law360 (3/14, Bolado).

Environmental Assessment Done For Clark County Wind Proposal.

The Mitchell (SD) Daily Republic (3/14, Mercer) reports that "the Crocker wind farm proposed in Clark County has 14 turbine sites that would be swapped for other ground because they are on federal grassland easements, according an environmental assessment from the U.S. Fish and Wildlife Service." The FWS "released a report Wednesday on the project. Geronimo Energy, the project developer, wants to build 120 wind towers on a variety of privately held properties, including the 14 federal easements." According to the report, "Geronimo Energy would voluntarily swap land with the federal government on a two-to-one basis after construction has finished."

Environmental Regulators Are Trying To Turn A Former Lead Mining Site Back Into A Forest.

KWMU-FM St. Louis (3/14, Chen) reports that the U.S. Fish and Wildlife Service and the Missouri Department of Natural Resources are "restoring a portion of Missouri's Old Lead Belt back into a forest." According to John Weber, an environmental contaminants specialist for the Fish and Wildlife Service, "the reforestation could improve local water quality, recreational opportunities and wildlife habitats." He said, "It's important for people who are recreating in the river, whether they are fishing or floating. It's important for downstream species of mussels. There's some species listed on the endangered species list that the U.S. Fish and Wildlife Service is concerned about."

3rd Lawsuit Filed Over Colorado's Predator Reduction Studies.

The AP (3/14) reports that "activist groups have filed a third lawsuit in connection to Colorado Parks and Wildlife research projects that aim to determine whether reducing predators could help mule deer numbers." The lawsuit "filed last week targets the research's primary funding source – the U.S. Fish and Wildlife Service – which authorized more than $3.4 million in funding."

Moapa Dace Population Holds Steady In Latest Count Of Endangered Fish.

The Las Vegas Review-Journal (3/14, Brean) reports that results for the latest count for Clark County's most endangered fish is "mixed." According to the article, "while researchers were relieved to see the Moapa dace population holding steady at 1,138 adult fish, they would prefer some real improvement for a species that's been under federal protection for just over 50 years." Michael Schwemm, senior fish biologist for the U.S. Fish and Wildlife Service in Southern Nevada, said, "We're not in a crisis mode where the species is declining. But we're not happy with the status quo. We want to see things improve."

National Park Service

Historic Black Church With W.E.B. Du Bois Ties Gets Grant.

The AP (3/14) reports that "preservationists for a 130-year-old black church with ties to civil rights pioneer W.E.B. Du Bois have received federal grant money to turn it into a community center." The Upper Housatonic Valley National Heritage Area was awarded $389,000 from the National Park Service African American Civil Rights Grants Program "Tuesday to restore the Clinton AME Zion Church in Great Barrington, near the New York and Connecticut borders."

$500K Grand Will Restore Historic Building At Fort Huachuca.

The AP (3/15) reports that "Arizona State Parks and Trails has received $500,000 in grant funding from the National Park Service to restore the Mountain View Officers' Club at Fort Huachuca." The State Historic Preservation Office, a division of Arizona State Parks and Trails, has "been involved in a long-standing effort to preserve and protect the World War II-era black officers' club, which is one of two such documented buildings in the U.S. Army."

100,000-plus Comments Received On Proposed Fee Hike.

The Greene County (VA) Record (3/14, Brooks) reports that the National Park Service is "poring over comments received on proposed peak-season fee increases." According to the article, "109,111 comments were received, with 1,004 specifically mentioning Shenandoah National Park." The article says that "a glance at the first 100 shows a close split of 59 against the proposal, 37 for it and four offering other suggestions such as charging non-U.S. residents a higher fee."

Advisory Panel Slams Fee Hikes. The Mount Desert (ME) Islander (3/14, Broom) reports that "members of the Acadia Advisory Commission voted unanimously on Monday to formally oppose the higher park entrance fees that have been proposed for Acadia during its peak visitation season, June through October." Acadia Advisory Commission member Matt Horton "said at Monday's meeting that he has heard from many people who feel the proposed increases are excessive." The NPS said the fee increases were necessary to generate "badly needed revenue for improvements to the aging infrastructure of the national parks."

Fix To Keep Worm Diggers In National Park Gets House OK.

The AP (3/14, Whittle) reports that the U.S. House of Representatives "unanimously signed off on a bill late Tuesday designed to allow" commerical harvesters of "marketable species to continuing plying their trade" near Acadia National Park. In recent years, the

harvesters have claimed "they've faced enforcement from National Park Service personnel who have told them it's prohibited." A similar bill has been proposed in the Senate by Sen. Angus King, "but has yet to make it to a committee vote."

Additional coverage was provided by the Mount Desert (ME) Islander (3/15).

Comment Wanted For Potential Design For DC War Memorial.

The AP (3/15) reports that the National Desert Storm War Memorial Association, "in cooperation with the National Park Service, is looking for public comments on the potential design of a memorial that the US Congress authorized the establishment of on federal land in Washington, D.C." The National Park Service "said in a statement that the purpose of the National Desert Storm and Desert Shield Memorial is to commemorate and honor members of the Armed Forces who served on active duty in support of Operation Desert Storm or Operation Desert Shield." The comment period closes on April 13.

Virginia Man Still Claims Ownership Of Vanished NC Island.

The Charlotte (NC) Observer (3/14, Price) reports that "North Carolina's Shelly Island may have vanished below ocean waters – possibly forever – but that's not discouraging the Virginia man who filed a deed for ownership of the mysterious landmass." Ken Barlow "says his mile-long island is still there...but its no longer a separate island. It has merged – at least in part – with nearby Cape Point, he says." The National Park Service has "never conceded Barlow owned the 27-acre island." Although "the island vanished before the dispute reached the courts," Barlow is "undeterred." He said, "I will NEVER relinquish what I own to the National Park Service. I will defend that property with the necessary force to repel invaders, such as the NPS.... Dare County Records of Deeds says I own this property. End of story."

Waterline Breaks Lead To Restrictions At Grand Canyon Park.

The AP (3/14) reports that "due to a series of breaks in the Transcanyon Waterline, Grand Canyon National Park has implemented water conservation measures." According to officials, "the park will remain in conservation mode until staff repairs the break and water in storage tanks reaches sustainable levels."

Reconstruction Of Beartooth Highway Continues With Grant.

The Cody (WY) Enterprise (3/14) reports the Department of Transportation recently awarded the Wyoming Department of Transportation a $16.6 million Transportation Investment Generating Economic Recovery grant to reconstruct the final 1.6-mile segment of Beartooth Highway. The Beartooth Steering Committee includes the WDOT, Montana Department of Transportation, Federal Highway Administration, Yellowstone National Park, US Forest Service, Wyoming and Montana congressional staff, and other organizations.

Additional coverage was provided by the Billings (MT) Gazette (3/14).

Truck Crash Results In Hazmat Spill In Death Valley National Park.

KTNV-TV Las Vegas (3/14) reports that "a crash resulted in a hazardous materials situation at Death Valley National Park earlier this week." According to the article, "around 2:15 p.m. on Monday, March 12, a truck driver heading eastbound on California Highway 190 lost control of his vehicle near Emigrant Campground." The vehicle "careened into the desert, landed on its side, and caught on fire."

Insular And International Affairs

Close Up Program Gets $900,000.

The Saipan (MNP) Tribune (3/15) reports that Interior Assistant Secretary Insular and International Affairs Doug Domenech has "authorized a payment of $900,000 for fiscal

year 2018 funding of the Close Up Insular Area Program." According to the article, "this year's program will bring approximately 190 high school-aged students from American Samoa, Guam, the Northern Mariana Islands, and the U.S. Virgin Islands, as well as the freely associated states of Micronesia, Marshall Islands, and Palau, to Washington, D.C. for civic education programs alongside their peers from the 50 states." Domenech said, "The goal of this program is to highlight models of American democratic institutions and to foster in youth the interest, knowledge, and skills needed to effectively participate in a democracy. Bringing the students from the islands allows them to have critical exchange and sharing experiences with students from the States."

US Geological Survey

Scientists Record Volcanic Thunder For The First Time.

Discover Magazine (3/14, Scharping) reports that researchers from the U.S. Geological Survey "say they have finally captured a recording" of volcanic thunder, "during the 2017 eruption of Bogoslof in Alaska." The findings were published Tuesday in Geophysical Research Letters.

Additional coverage was provided by Newsweek (3/14, Bartels).

Mountain Yellow-legged Frog Not Forgotten.

The Idyllwild (CA) Town Crier (3/14, Crumrine) reports that "efforts to save the endangered Mountain yellow-legged frog in the San Jacinto Mountains have been limited in the five years since the 2013 Mountain Fire." The article notes that "most of the efforts on the frogs' behalf have focused on the San Gabriel Mountains." However, Adam Backlin, a U.S. Geological Survey biologist, "said that will be changing with the help of the Henry Doorly Zoo in Omaha, Nebraska." Backlin said, "The herpetologist there has been working with similar frogs in the desert southwest for 20 years. He has been very successful with captive husbandry."

Opinion Pieces

Parks Should Be Affordable For All.

In an editorial, the Wheeling (WV) Intelligencer (3/14) argues that national parks were "never intended to be a money-making proposition, and should not be converted into one." The paper acknowledges that "fees are a good idea to help maintain parks" but opposes a proposal to increase fees at national parks to the extent that they become unaffordable for some.

Panhandle At Risk For BP-Style Blowout: Guestview.

In a piece for the Pensacola (FL) News Journal (3/11, Graham, Beinecke), Bob Graham and Frances Beinecke argue that the Trump Administration is ushering in a "dangerous and foolhardy combination" of "expanding the reach of oil and gas drilling while rolling back common-sense safeguards drawn from the lessons of the Deepwater Horizon disaster." The authors claim "Congress continues to operate in a state of denial" as this "is putting Florida's Panhandle at increased risk for the next BP-style blowout."

BLM Plan Is On The Right Track For Public Lands.

In an op-ed for the Missoulian (MT) (3/14, Herzer), John Herzer, owner of Blackfoot River Outfitters in Missoula and Flint Creek Outdoors in Philipsburg, writes that he gave the Bureau of Land Management "low marks" 25 years ago, but "over the years that agency has taken on a more active role in managing those parcels with an eye to the future and conservation." Although he doesn't "agree with all their decisions," Herzer believes "they are on a much better path." Herzer lauds the BLM office "for trying new ways to involve the public in resource management planning, as well as new tools for managing public lands."

Top National News

Trump Touts Tax Reform Law, Says He Is Ready To Launch "Phase Two."

The President's visit to St. Louis yesterday generated largely favorable local coverage, which focused on his defense of his tax reform law and his apparent preview of an additional push for more tax cuts. National media, on the other hand, covered the story sparingly, with the major network newscasts skipping it altogether.

KPLR-TV St. Louis (3/14, 7:02 p.m. CDT) reported that the President "called St. Louis, quote, 'a great place, a place that was really good to me,' unquote." Trump "visited the Boeing plant in North St. Louis County," and "held a roundtable meeting" with "representatives from ten companies across the state, all of which have said that the Trump tax plan has had a positive impact on their businesses." KPLR added that Trump "told the Missouri business leaders he is ready to being 'phase two' of his tax reform plan, a plan he says that will provide tremendous incentives for workers."

KMOV-TV St. Louis (3/14, 5:02 p.m. CDT) also reported "eighteen people, including the President, sat around the horseshoe table sharing how tax cuts impacted their own lives." KOMU-TV Columbia, MO (3/14, 6:04 p.m. CDT) reported that the businesses "say...Trump's tax reform allowed them to increase wages and announce bonuses," and KTVI-TV St. Louis (3/14, 6:32 p.m. CDT) that "many of the companies represented...gave their employees bonuses ranging from $200 to $1,000 each." Trump was shown saying, "We are now going for a phase two. We are actually going for a phase two, which...in addition to the middle class, will help companies, and it's going to be something, I think, very special."

The Washington Times (3/14, Boyer, Miller) reports Trump "said House Ways and Means Committee Chairman Kevin Brady, Texas Republican, and members of the Senate are involved in the effort." Trump "hasn't specified what a second round of tax cuts would entail, and it's not clear whether congressional Republican leaders are ready for another such battle." However, "Rep. Roger Williams, Texas Republican and a member of the House Financial Services Committee, said Wednesday that he'd like to cut capital gains taxes, and to make permanent the individual tax cuts approved last December."

Typical of the tenor of national reporting was the Los Angeles Times (3/14, Bierman), which headlined its story "Trump Returns From A Brief Trip To Greater Tumult Of His Own Making In Washington" and devotes most of the piece to casting a decidedly unfavorable light on the "chaos" surrounding the Administration. The Times reports in its final paragraphs that "as Trump bragged about a humming economy during the event at Boeing in Missouri, Democrats nationwide were seeing signs of the potential to capitalize on the new energy of young people and suburban women." Yet "in St. Louis," the President "met an enthusiastic crowd of supporters at the airport and shouts of 'Keep it up!'"

The New York Times (3/14, Baker, Tankersley) similarly reports that "amid all the turmoil and uncertainty, with his White House seemingly fraying, his legislative agenda stalled and his electoral base in danger," Trump "these days finds one area of comfort: talking about his tax cuts. He finds it so reassuring, in fact, that he is increasingly talking

about doing it all over again."

The AP (3/14) also describes Trump as "trying to turn attention back to tax cuts and away from the staffing turmoil in his administration," and notes he "promised Wednesday that more relief was on the way." The AP adds, "It's unclear what Trump was talking about," and "the White House did not immediately respond to a request for more details," but "Brady...told Fox Business Network he was indeed working on something with the president and 'we think even more can be done.'" Politico (3/14, Faler) runs a similar story under the headline "Trump And Brady Say More Tax Cuts Coming."

The Kansas City (MO) Business Journal (3/14, Kirn) reports that "Trump, seated in front of an F-15 fighter jet, heard from an array of Missouri business leaders, who praised the tax cuts, passed in December, often with personal stories." The Springfield (MO) News-Leader (3/14) notes "College of the Ozarks President Jerry C. Davis attended" the roundtable, invited by the White House "after C of O gave a $204 bonus to employees in January as a result of savings from the recent US tax code revision." The News-Leader adds that "a new poll says that President Trump's approval rating is on the rise after a surge in the US economy and shifting tax reform numbers." The St. Louis Post-Dispatch (3/14) editorializes that the tax law is "is contributing to a wave of good economic news for the nation," but "doesn't seem to be doing much for workers' wages" despite "full employment."

The St. Louis Post-Dispatch (3/14, Bott) reports that "before the roundtable meeting, Trump was given a tour of Boeing's facility with company officials, former Republican Lt. Gov. Peter Kinder and Mehan." The Post-Dispatch adds that "as he toured part of the Boeing facility and examined an F/A-18 Super Hornet," Trump said, "Great planes, incredible." The "production line," in fact, "has gotten a boost from the administration's request for more Super Hornets in fiscal 2019 on top of the 24 Congress has written into this year's budget." Bloomberg News (3/14, Johnsson, Capaccio, Epstein) reports also the President also urged Boeing "give the government a 'good price' for its fighter jets, lest he take his business elsewhere." Said Trump, "Otherwise, we're going to buy them from somebody else" in the US.

On its website, ABC News (3/14, Mallin) reports "some economists have pointed out that Boeing could be one of many US companies particularly vulnerable in the event of a trade war, because it top exporter sells 80 percent of its commercial planes abroad." However, "the company is also one of many that announced hundreds of millions in bonuses for workers following passage of the GOP tax plan."

Kudlow Also Discusses "Phase Two." Bloomberg News (3/14, Olorunnipa) reports that in an interview with CNBC, Larry Kudlow said that "tax cuts for individuals should be made permanent under 'phase two' of an overhaul." Said Kudlow, "Individuals deserve a permanent break." Kudlow, however, "said he didn't expect a phase two to cut the corporate rate further." Bloomberg adds Trump "has previously referenced a so-called phase two of tax cuts – sometimes in a joking manner," but "earlier this week, he said he was 'serious' about asking House Ways and Means Chairman Kevin Brady to get it done."

Kudlow also said on CNBC's Closing Bell (3/14), "Many of the people who are critical of me or the President's tax cuts are the very people who are being helped the most. For example, my friends in the union movement – teachers union, government workers – they hate this stuff. You know what? Lower tax rates and faster economic growth and the better profits is the only hope they have of ever seeing their pension. So, don't tell me it doesn't help everybody, because it does."

Trump Raises Funds For McCaskill Opponent As McConnell Criticizes Her Vote Against Tax Reform. The Kansas City (MO) Star (3/14, Lowry) notes that when Trump "landed...in St. Louis for his third visit to Missouri in less than a year, the man who welcomed the president to the state twice before was noticeably absent." Missouri Gov. Eric Greitens, "who faces a criminal trial in May, did not greet Trump at the airport as he did for Trump's previous visits to Springfield and St. Charles." Trump "instead was welcomed by Attorney General Josh Hawley, the state's top law enforcement official and the Republican front-runner to challenge US Sen. Claire McCaskill in the fall." KOMU-TV

Columbia, MO (3/14, 6:04 p.m. CDT) reported that Trump "went to a private fundraising campaign...Hawley" yesterday.

The St. Louis Post-Dispatch (3/14, Raasch) reports that "hours before" Trump's arrival ion Missouri, "Senate Republican Leader Mitch McConnell took to the Senate floor to criticize...McCaskill for voting against tax cuts that Trump signed into law late last year." McCaskill "pushed back, saying she was for tax cuts but not for the GOP plan that passed that she said was skewed toward wealthier Americans."

Koch Brothers-Backed Group Launches New Ads Which Hit Donnelly, McCaskill On Tax Vote. Meanwhile, Roll Call (3/14, Pathé) reported that Americans for Prosperity, a Koch brothers-backed group, "is rolling out another $4 million ad campaign targeting" McCaskill and Sen. Joe Donnelly for opposing the tax-reform bill. The spots mark "the second phase of a $20 million digital and TV campaign and comes a month after AFP launched the first $4 million initiative, also against Donnelly and McCaskill. Each ad features a woman explaining how the GOP tax plan benefits them." The AP (3/14) reports the spots airing in Missouri "criticize McCaskill over her comment that the tax overhaul will only mean 'scraps' for" her state's residents.

Trump Picks Kudlow As Cohn Replacement.

Eamon Javers reported yesterday on CNBC's Halftime Report (3/14), "According to a source familiar with the deliberations, the President has asked Larry Kudlow to serve as the next National Economic Council director succeeding Gary Cohn." Added Javers, "The President, I am told, offered Larry Kudlow the job" Tuesday and Kudlow "accepted" it. Javers later said on CNBC's Closing Bell (3/14), "Kudlow says he will disagree with the President when he feels that it is important to do so, but ultimately, the President makes the decisions here. This is the White House after all, and Kudlow says he will execute on decisions even if he does not agree with them as National Economic Counsel Director." ABC World News Tonight (3/14, story 4, 0:20, Muir) briefly noted the story last night, indicating Kudlow "served as an informal adviser during the...campaign."

USA Today (3/14, Jackson, Korte, King) reports White House Press Secretary Sarah Sanders "confirmed the move after it was first reported by Kudlow's network." The Hill (3/14, Easley) quotes Sanders as saying, "Larry Kudlow was offered, and accepted, the position of assistant to the president for economic policy and director of the National Economic Council. ... We will work to have an orderly transition and will keep everyone posted on the timing of him officially assuming the role."

Kudlow spoke to several news outlets later Wednesday. Kudlow told Reuters (3/14, Mason, Brice), "The president offered me the position last evening and I accepted." Kudlow made similar comments to the Wall Street Journal (3/14, Timiraos) and New York Times (3/14, Haberman, Kelly, Tankersley). Kudlow said on CNBC's Closing Bell (3/14) that he was going to Washington Wednesday night, adding, "We've, got all kinds of things to do. [Trump] sounded great. Look, the economy is starting to boom, the tax cuts are working, the deregulation is working. We're going to get on the infrastructure. Yeah, we're getting on to trade also."

To the New York Times (3/14, Haberman, Kelly, Tankersley), "the decision to pick Mr. Kudlow, a longtime cheerleader of the president, is the latest move by Mr. Trump to surround himself with loyalists in high administrative posts." The Washington Post (3/14, Costa, Dawsey) similarly casts Trump as "looking to longtime loyalists who encourage his extemporaneous and combative style, following months of frustration with aides and Cabinet officials who often sought to temper him." The Los Angeles Times (3/14, Finnegan) describes Kudlow as "someone who connects with the president personally and politically." Kudlow "shares with Trump a hard-charging personality and a fondness for being a media figure, and both have hosted television programs." Kudlow "has also been an informal Trump advisor over the past year."

Steve Forbes endorses Kudlow's selection in a USA Today (3/14) op-ed, in which he writes, "When we see the initials GOP, we think of the Republican nickname – Grand Old Party. With Larry Kudlow's appointment as the new director of the National Economic Council, those initials might soon become an acronym for Growth, Opportunity, and

Prosperity. ... The president chose wisely here." In an editorial, the Wall Street Journal (3/14) also hails Trump's selection of Kudlow, and urges him to focus on spurring economic growth and to oppose protectionist policies. To that end, the Journal tells him to rely on Gary Cohn's staff, as well as on Kevin Hassett and Mick Mulvaney.

Kudlow Defends Trump On Trade. The New York Times (3/14, Haberman, Kelly, Tankersley) reports that "in an interview on Wednesday afternoon," Kudlow, "who has publicly criticized the president's recently announced tariff plans, said Mr. Trump had a more nuanced view on trade than many people thought." Said Kudlow, "He regards himself as a free trader. ... He does not like to create obstacles, like tariffs. But he also has to protect the US."

The Washington Examiner (3/14, Morrongiello) reports that "a fierce defender of free trade, Kudlow came out against the steel and aluminum tariffs Trump unveiled last week and will likely defend multilateral trade agreements against the president's protectionist instincts."

Kudlow: China Needs A Comeuppance On Trade. Kudlow was asked on CNBC's Closing Bell (3/14) about reports that President Trump's tariffs on China could reach $60 billion. Kudlow said, "I'm a little unsure about these numbers. I'm not privy to the numbers .I did talk to Bob Lighthizer at some length today. ... I can't comment on that. I will say this, China is not played by the rules for a long time. I've talked about that, intellectual property rights, corporate technologies, other barriers, trans-shipments to get around things, so China needs a comeuppance on trade."

Kudlow In Recent Podcast: Leaving NAFTA Would Be A "Calamitously Bad Decision." Politico (3/14, White) says that at the White House, Kudlow will "likely have to push to protect the North American Free Trade Agreement in the White House." In "a recent podcast interview," Kudlow said "withdrawing from the agreement would be a 'calamitously bad decision.'"

White House: US "Stands In Solidarity" With UK On Russia Accusations.

All three networks reported that the White House and Ambassador Haley, in separate statements Wednesday, said the US stands with the UK as British Prime Minister Theresa May announced retaliatory measures against Russia for poisoning a former Russian spy.

The CBS Evening News (3/14, story 8, 0:40, Glor) reported, "Britain expelled 23 Russian diplomats today after the poisoning of" former Russian spy Sergei Skripal and his daughter, who remain in critical condition after exposure to a nerve agent developed by the Soviet Union. The White House "expressed solidarity with Britain." At an emergency UN Security Council meeting, Ambassador Haley "pointed the finger at Russia."

NBC Nightly News (3/14, story 6, 1:55, Holt) reported that the White House "said it agrees with the UK assessment that Russia is to blame," while Haley "condemned the actions" and "issu[ed] a stern warning." Haley said at the emergency Council meeting: "The United States stands in absolute solidarity with Great Britain." She added, "If we don't take immediate concrete measures to address this now, Salisbury will not be the last place we see chemical weapons used. They could be used here in New York."

USA Today (3/14, Hjelmgaard, Stanglin) says Haley "sharply blamed" Moscow for the attack and warned "we will act" if chemical weapon use continues, calling the crisis a "defining moment." The Washington Examiner (3/14, Gehrke) says she also "compared the Skripal attack to North Korea's use of a nerve agent to assassinate the half-brother of dictator Kim Jong-un."

ABC World News Tonight (3/14, story 5, 2:30, Muir) reported that senior US intelligence officials say "there is no daylight between US and British assessments" on the fact Russia is responsible, and on Wednesday night, "a strong statement from the White House, saying the United States stands in solidarity with its closest ally, the United Kingdom, and is working together with our allies and partners to ensure that this kind of abhorrent attack does not happen again."

Fox News' Special Report (3/14) quoted White House Press Secretary Sarah Sanders as adding: "This latest action by Russia fits into a pattern of behavior in which Russia disregards the international rules-based order, undermines the sovereignty of

countries worldwide, and attempts to subvert democratic institutions and processes." CNN's Situation Room (3/14) also reported on the "very strong" statement from Sanders.

The New York Times (3/14, Baker) says Britain's "tough response in holding Russia responsible" has "increased the pressure on President Trump" to join its ally in taking action, "even as he has been reluctant to retaliate for Moscow's intervention in the 2016 election in the United States." While Trump expressed solidarity with May during a phone call, he has "avoided saying so personally in public, much as he has generally avoided condemning Russia for its election meddling."

A second New York Times (3/14, Schwirtz) story says Wednesday's emergency session, called by Britain "to formally accuse Russia of trying to murder a former Russian spy and his daughter," was "unusual. Permanent members of the council do not normally accuse one another of what under certain circumstances could be construed as acts of war."

The Washington Post (3/14, Booth, Bodner) reports May ordered "the immediate expulsion of 23 Russian diplomats believed to be involved in espionage, in the first reprisals against Moscow for a chemical attack on a former double agent." ABC World News Tonight (3/14, story 5, 2:30, Muir) said the move "echo[es] President Obama's kicking out 35 Russian diplomats from the US in retaliation for Russian meddling in the 2016 election." May also announced Britain will "take unspecified clandestine measures," and she added that the royal family will boycott the World Cup soccer tournament in Russia this summer.

May made the announcement in what the New York Times (3/14, Pérez-Peña, Castle) calls "language reminiscent of the Cold War," and "suddenly" became "the most forceful Western leader in denouncing the government of President Vladimir V. Putin, which she portrayed this week as a malevolent and lawless force."

The AP (3/14, Lawless, Kirka) reports the Russian Embassy in London said the expulsion of diplomats was "totally unacceptable, unjustified and shortsighted," but Amy Kellogg reported on Fox News' Special Report (3/14) that the Kremlin hasn't taken any action in response. Kellogg added that "we expect to hear more...from the Kremlin in the coming days." The New York Times (3/14, Higgins) writes, "Do not expect any apologies or even a serious discussion from Moscow."

A Washington Post (3/14) editorial says "an adequate international response to Mr. Putin would push back against his ventures on all fronts: Syria, where the United Nations has found Russia complicit in war crimes; Ukraine, where Russian-backed forces continue to seek military advantage; cyberspace, where Russian hackers and bots remain ubiquitous. In the absence of such action, Mr. Putin's ambitions, and his audacity, will only escalate further."

Mo Elleithee, executive director of Georgetown University's Institute of Politics and Public Service, said on Fox News' Special Report (3/14), "I thought it was a strong speech by Ambassador Haley. I thought her trying to hold the Security Council accountable in its efforts to hold Russia accountable was a smart move. Apply her words to her boss, to President Trump, who does not have very much credibility right now in holding Russia accountable. Yes, we need a diplomatic effort. We need to engage the United Nations and the Security Council. But it all rings hollow is the President of the United states continues his flirtation with Vladimir Putin and continues to let him off the hook."

New Zealand To Investigate Decade-Old Poisoning Claim By Former Russian Spy. The New York Times (3/14, Graham-Mclay) reports that police in New Zealand said Thursday that they were investigating "a claim that a man who said he once worked for Russian intelligence was poisoned in Auckland more than a decade ago." Boris Karpichkov, who said he worked for the K.G.B. "before becoming a double agent and later claiming asylum in Britain, spent 15 months in New Zealand in 2006 and 2007." Karpichkov told "Good Morning Britain" this week that he "had powder thrown in his face by someone 'dressed as a common beggar' on a busy street in Auckland." He then "became ill, losing his hair and more than 65 pounds."

Putin Campaigns In Crimea Ahead Of Sunday's Presidential Election. The CBS Evening News (3/14, story 9, 2:00, Glor) reported that President Vladimir Putin "made no mention of the growing rift with Britain" as campaigned "in Crimea, the province he took illegally from Ukraine," ahead of Russia's presidential election Sunday. His "message today was proudly nationalistic. Crimea, he said, has returned home to Russia." While the US and "most countries called the seizure illegal and slapped on sanctions," Putin on Wednesday "visited the bridge Russia is building to physically link its mainland to Crimea, a mega-project that's wildly popular with Russians who support the land grab. But it's also a message to the West: Putin never backs down."

The Washington Post (3/14, Troianovski) similarly reports that on "the same day that the Russian president was the focus of international outrage over the chemical attack on a spy in Britain, Putin came to the site of another event that drew Western furor: Crimea."

Media Analyses: Lamb's Showing Signals Possible Democratic Wave In November.

Ex-federal prosecutor Conor Lamb, a Democrat, appears to have defeated GOP state Rep. Rick Saccone in the PA18 special election. With most ballots counted, Lamb leads by 627 votes – though Saccone may seek a recount. Regardless, media outlets frame Lamb's showing in a district President Trump carried by 20 points in 2016 as further evidence that the GOP faces strong headwinds in its efforts to retain the party's House majority in the 2018 midterm elections.

On NBC Nightly News (3/14, story 4, 2:10), Lester Holt referred "to an election upset that could portend a Democratic wave coming this November. NBC News has declared Conor Lamb the apparent winner in a special congressional election in Pennsylvania in a district that President Trump won big in 2016." NBC's Kasie Hunt added that Lamb scored "a stunning upset" in a contest that dealt Trump "an embarrassing loss." Hunt said, "There are more than 100 Republicans in Congress whose districts are more competitive than Pennsylvania's 18th. A huge warning sign."

The New York Times (3/14, Burns, Martin) asserts that Lamb "scored a razor-thin but extraordinary upset" win "after a few thousand absentee ballots cemented a Democratic victory in the heart of...Trump's Rust Belt base." The Times adds that "Lamb's 627-vote lead Wednesday afternoon appeared insurmountable, given that the four counties in" the PA18 "have about 500 provisional, military and other absentee ballots left to count, election officials said."

While the NBC News and the New York Times declared Lamb as the winner, the AP (3/15, Barrow, Levy, Peoples) reports that the Democrat leads by "627 votes out of more than 224,000 cast, according to unofficial results. The four counties in the Pittsburgh-area district reported they had about 375 uncounted provisional, military and overseas ballots. They have seven days to count the provisional ballots, and the deadline to receive military and overseas ballots is next Tuesday. With the margin so close, supporters of either candidate can ask for a recount."

Politico (3/14, Schneider) reported that the contest "appears headed to a recount, with Republicans preparing behind the scenes to cry foul." Republicans are "considering challenging the accuracy of voting machines in the district, in addition to confusion over the state's changing congressional map later this year, according to two sources familiar with the process." Pennsylvania "law does not require an automatic recount in congressional races." However, "Saccone and his allies can request a recount after all the counties have completed their tallying of provisional and overseas military ballots."

The Washington Times (3/14, Miller) reports that the White House on Wednesday sought "to put a happy face on a likely Democratic win in a Pennsylvania special election where...Trump went all-in for the GOP candidate." White House Deputy Press Secretary Raj Shah is quoted as saying, "The president's engagement in the race turned what was a deficit for the Republican candidate to what is essentially a tie. Also the Democrat in the race really embraced the president's policies and his vision whereas he didn't really embrace [House Minority Leader] Nancy Pelosi, the Democratic leader." In a similar report on Shah's remarks, The Hill (3/14, Easley) said the White House argued Lamb

"won by embracing President Trump's policies."

However, on ABC World News Tonight (3/14, story 3, 2:00, Muir), Tom Llamas reported that "regardless of the final outcome, Democrats say their success" in the PA18 "is proof momentum is in their favor heading into the midterms." The AP (3/14, Mascaro) reports, "The message to Republicans from the Pennsylvania special election was simple: Almost no one is safe." The AP adds that Trump "won more than 100 districts nationwide by narrower margins than" his 20-point win in the PA18 in 2016, "arguably making them comparably competitive now."

DNC Chairman Tom Perez said on Fox News' Special Report (3/14), "You look around right now, there are 118 districts that are actually more competitive than the district that was won yesterday. ... So, if I am a Republican, I am very worried right now, because Democrats are fired up. We are fielding good candidates. That's a big lesson from this. We are organizing everywhere and we are talking about the issues that people care the most about."

The Philadelphia Inquirer (3/14, Tamari) reports, "Running in deep red rural and suburban territory outside Pittsburgh, Saccone pledged his loyalty to...Trump, had help from two of Trump's famous rallies, and saw the GOP spend millions of dollars on his behalf, much of it centering on the president's signature tax bill. But none of that seemed to work." In an analysis, the AP (3/14, Peoples) says "there are 106...House districts Trump won by less than 20 points, suggesting that scores more Republican-held seats could be in play this fall. Democrats need to flip 24 seats to claim the House majority — just 23 if Lamb wins. Both numbers increasingly look reachable. For GOP strategists, or those members considering retirement, it may be time to hit the panic button."

Writing in "The Fix" on the website of the Washington Post (3/14, Phillips), Amber Phillips said "the fact that Democrats were competitive in such a Republican-leaning district makes the 24 seats they need to net in November look much more feasible." Writing for The Atlantic (3/11), Ronald Brownstein said that the results marked the first time since Trump's election that Democrats regained "ground with the white working-class voters at the core of the president's coalition." Brownstein added that "Lamb's apparent win testified to how much energy opposition to Trump has ignited among Democrats everywhere."

The Hill (3/14, Wilson) reported that "the results illustrate the challenge Republicans face even in a district...Trump won by more than 20 percentage points just 16 months ago: Voters who were motivated to show up for Trump are far less motivated to show up for other members of his party, even when Trump himself implores them to vote." Writing for the Washington Post (3/14), Dan Balz says that PA18 contest "isn't the first data point to show Republicans that they're in trouble, but if there was any complacency among elected officials, that's certainly gone now." Of the election results, Balz adds, "The message was clear. In this election cycle, Trump is a great motivator for Democrats, who still feel the sting of the 2016 election and are eager to vote in opposition to the president."

The Washington Times (3/14, Boyer) reports, "The midterm election year is off to an ugly start for...Trump." The Times adds, "Mid-term elections typically go against the party holding the White House, as Mr. Trump has been warning his base. But the special election in southwestern Pennsylvania took place in 'Trump country,' a district the GOP should have held." Of the PA18 results, Sen. Jeff Flake (R-AZ) said on CNN's The Lead (3/14), "I think it is a big lesson. It's a lesson that you can only drill down on the base so far. We've got to broaden our appeal and that's why I've been worried about where the Republican party is going. We can't win statewide elections like this. We can't win in purple districts like. This should be a big wake-up call for Republicans."

Reuters (3/14, Morgan) reports that in the wake of Tuesday's results, "Republicans sounded the alarm." Reuters says House Speaker Paul Ryan "called the election a 'wakeup call' in a meeting with Republican House members and pushed them to raise more campaign funds. He also urged them to do more to highlight tax cuts approved by the Republican-dominated Congress and signed by Trump."

The Hill (3/14, Zanona, Wong) reported that House Republicans "are fretting over

the results of" the contest, "worried that the tight race in the heart of Trump country might be a harbinger of a Democratic wave in the midterm elections later this year. There's a '50-50' chance that Democrats can flip the House, senior Rep. Tom Cole (R-Okla.) told CNN," for example.

The Washington Examiner (3/14, Caralle) reported that retiring Rep. Charlie Dent (R-PA), during a Wednesday appearance on CNN, said, "I think most Republicans realize we're running into a very serious headwind – hurricane-force wind." And referring tom the PA18 contest, Dent added that "if you're a Republican member in a pretty safe seat like this one was, that's where I'd be nervous because those members are not used to running in these types of competitive situations."

Politico (3/14, Bade, Isenstadt) reported that on Wednesday, "GOP leaders warned lawmakers that the outcome in the pro-Trump district could spell disaster in the midterms if they don't respond forcefully, but many lawmakers dismissed the race as an anomaly and seemed to be in denial." In an online article, CNN (3/14, Killough, Serfaty, Bradner) reported that Ryan, speaking with reporters, described the contest "as a race between 'two conservatives,'" defining Lamb "as a 'pro-life, pro-gun, anti-Nancy Pelosi conservative' and not[ing] that there wasn't a Democratic primary that would have pulled Lamb to the left." Ryan "said he doubts this will become a trend in Republican-leaning districts because there wasn't a primary."

In an online article, ABC News (3/14, Parkinson) reported that some House Republicans discounted "Lamb's strong performance as an aberration and not a bellwether heading into this fall's congressional midterms." For example, Rep. Mike Kelly (R-PA) told ABC News, "I think Mr. Lamb was brilliant. He ran as a Republican. So, it worked for him. He certainly didn't run as a Democrat." Roll Call (3/14, Bowman) reported, "Republicans downplayed Tuesday's special election," though "it's another reminder of the tough midterm election cycle ahead, they said."

USA Today (3/14, Jackson) reports that Democrats viewed "the vote as a sign that an anti-Trump backlash could carry them to a congressional majority in the elections in November." And though "Republicans downplayed the" results, "political analysts said things look good for Democrats as they try to wrest House and Senate majorities from the Republicans and Trump."

The New York Times (3/14, Baker, Shear) reports that as Trump "hobnobbed on Tuesday night with wealthy donors in the exclusive enclave of Beverly Park, the voters in the suburbs south of Pittsburgh were in revolt, giving" Lamb "a narrow victory. ... Just as they did outside Birmingham and Montgomery, Ala., in December, and Richmond, Va., and Washington in November, energized and angry suburban voters" swamped "the Trump stalwarts in the more rural parts of" the PA18, "sending a clear message to Republicans around the country."

In an online article, CNN (3/14, Levy) reports that in the wake of the PA18 contest "and Alabama's special Senate election in December, national Democrats feel confident they have found a way to succeed by working behind the scenes with campaigns and focusing their efforts early on defining Republican candidates on issues that matter locally." CNN added, "The new Democratic approach is informed in part by lessons learned during last year's special congressional elections." Referring to the 2016 GA6 special election, "a Democratic operative" told CNN. "Everyone learned their lesson from Jon Ossoff. We realized that nationalizing a race like that obviously didn't work and ultimately we lost."

In his New York Times (3/14, Bruni) column, Frank Bruni says "Lamb's showing – win, lose or draw – is remarkable. ... Clearly, the opposition to Trump is energized and organized. Just as clearly, Trump's style of governing – bereft of truth, lavish with chaos, crude and divisive – has diminished his standing and given his rivals an enormous window of opportunity."

In an editorial, the Washington Post (3/14, Board) says the PA18 results "are just the latest sign that Republicans' toxic embrace of...Trump is hurting not only the country but also their party." The Post adds that "Saccone chose to associate closely with the president, claiming that he was 'Trump before Trump was Trump.' Suburban voters punished him."

In his Wall Street Journal (3/14) column, Karl Rove says that the PA18 results show that GOP candidates should craft their own messages and not simply run as versions of Trump. Rove adds that if GOP candidates are to be successful this fall, they need to raise adequate amounts of money, microtarget Republican voters who often sit out midterm elections, recruit, train, and motivate scores of volunteers to help turn out the vote.

Media Analyses: Lamb Was A Perfect Fit For PA18. In a profile of Lamb, the New York Times (3/14, Tackett, Martin) says, "A former Marine who favored gun rights, he was culturally conservative enough to appeal to rural voters. He was pro labor and pro tariff in an area that still has thousands of steelworkers union members. As a federal prosecutor, he cracked down on drug dealers but also offered empathy about the tragedy of opioid addiction. And his Ivy League polish and earnest manner played well with college-educated suburban voters. And now, with his" win, Lamb "has offered a template that will be studied in congressional races where Democratic candidates need to win over voters who supported...Trump."

In an analysis, USA Today (3/14, Shesgreen) reports that "Tuesday's results show that the right kind of Democrat can win over both the suburban and working-class voters who favored Republicans in previous elections." USA Today adds that "Democrats had an ideal candidate in Lamb, an ex-Marine and former prosecutor who fit with the conservative blue-collar mold of the Pennsylvania district."

Writing for Politico Magazine (3/14), Bill Scher said "the way Lamb won does little to help Democrats adjudicate the raging debate on the left over how should they run in November: as proud left-wing populists or relative moderates willing to reach across the aisle." In that debate, Lamb "didn't pick a side," taking "some positions from out of each camp's bucket, all while brandishing his assault rifle."

Writing for TIME (3/14), Philip Elliott said that "the bigger fight in 2018 is unlikely to be a carbon copy of what narrowly happened in" the PA18 "for a number of reasons," including that "Democrats avoided a messy primary fight in picking Lamb, a Marine veteran who secured the nomination by winning over 319 Democrats' backing in a high school gym filled with 554 activists back in November. In other scenarios, an energized activist base on the Left – populated by newcomers to the process who demand ideological purity – may have prevented Lamb from winning the nomination had there been a real contest."

Writing for the Washington Examiner (3/14, Jashinsky), Emily Jashinsky said that "Lamb is the type of conservative Democrat progressives want purged from the party. To replicate his success, Democrats will need to nominate candidates whose ideological orientations fit the districts in which they're running." Jashinsky added, "With much of their base fixated on demanding ideological purity, nominating more Conor Lambs won't come easily for Democrats. To actually retake the House, they may need to retake their own party."

McClatchy (3/13, Glueck, Roarty) reported that "Democratic officials reject the notion that the type of candidate with Lamb's background and campaign will be an outlier this year, pointing to a handful of candidates similar in profile to Lamb who are also running in deep-red seats. 'From a practical perspective, if we lose this district by one percent or win this district by one percent, it doesn't make one bit of a difference,' said Ethan Todras-Whitehill, executive director of Swing Left, a progressive group trying to help Democrats win the House in 2018. 'Both of those things are huge sign of a wave.'"

In his Washington Post (3/14, Dionne) column, E.J. Dionne Jr. says, "The main path for a Democratic takeover of the House runs through Republican-held districts where Hillary Clinton defeated or lost only narrowly to Trump in 2016. But Lamb demonstrated that more moderate Democrats could harvest anti-Trump votes without waging an anti-Trump campaign." Dionne adds that "Lamb's breakthrough should petrify Republicans. The staunchest anti-Trump voters are clearly prepared to vote for Democratic candidates no matter their ideology."

Politico (3/14, Nelson) reported that Lamb "said Wednesday that his claimed victory in" the contest "came, at least in part, thanks to supporters of...Trump who voted for him." Appearing on CNN, Lamb said, "I was at a lot of polling places yesterday with cars parked outside of them that had president Trump's bumper sticker on them. So he's a

popular person here. But I think that what happens when you campaign in real life as much as possible is that those divisions go away. Everyone gave me a fair shake and I know that there are people that voted for the president who also voted for me. And, you know, I thank them for hearing me out." The Washington Times (3/14, Persons) also highlights Lamb's remarks about Trump supporters.

Lamb was asked on MSNBC's Morning Joe (3/14) if the PA18 race holds any lessons for the midterms. Lamb said, "I wouldn't presume to give lessons to people outside the district. I think every district is pretty different. Hard work really pays off. ... I think in this environment...campaigning in real life, in small rooms, door-to-door, person-to-person, it works and I learned a lot doing it. I think it helped our campaign an awful lot and I would advise anybody no matter where they are to do that."

More Democrats May Follow Lamb's Lead In Disavowing Pelosi. Politico (3/14, Schneider, Caygle) reported that Lamb "weathered $10 million in attack ads cartoonishly calling" him "a member of Nancy Pelosi's liberal 'flock.' Now other Democratic hopefuls are looking to adopt Lamb's strategy – he repeatedly and bluntly disavowed" Pelosi – "in their own competitive races. It raises the prospect of a slate of Democratic hopefuls running against" Pelosi "as they try to neutralize one of the GOP's go-to attacks – a pillar of Republicans' plan to keep the House majority in November." Rep. Filemon Vela (D-TX), "a vocal critic of current leadership," told Politico, "If we're going to take the majority, it's going to be because we win districts like that. Running against Nancy Pelosi is going to help you a lot more than running with her."

The Washington Times (3/14, McLaughlin) reports, "Democrats claimed victory Wednesday in the close" PA18 contest, "but one loser could be emerging" in the aftermath: "Pelosi, who is becoming a liability to Democrats on both sides of the party's ideological spectrum." Appearing Wednesday on MSNBC, Lamb "pledged not to support Mrs. Pelosi as the House Democratic leader. 'We need to sweep some new people in there,' he said."

In her Washington Post (3/14, Rampell) column, Catherine Rampell says that Lamb's disavowing of Pelosi "echoed the positions of other Democrats already in Congress – disproportionately younger politicians, and from areas much bluer than" the PA18 – "who have also called for a new face for their party." Rampell adds that "Democrats running in other districts may make not choose to jump on the anti-Pelosi train in the coming midterms. But you could also imagine Lamb's strategy emboldening some of them...to pledge not to support her. Which means even if that 'blue wave' strikes in November, it still might wash away the current House minority leader."

WSJournal: GOP's Tariffs, Pelosi-Related Attacks Failed To Boost Saccone. In an editorial, the Wall Street Journal (3/14) says that the election results show Republicans need a better strategy this fall than supporting tariffs and using House Minority Leader Nancy Pelosi as a cudgel to hammer Democratic candidates. The Journal says that Lamb supported the new Trump-imposed tariffs on steel and aluminum tariffs and other Democratic candidates are likely to do so this fall. The Journal adds that the GOP sought to link Lamb to Pelosi, but the candidate neutralized that line of attack by saying he wouldn't support Pelosi as Democratic leader.

High School Students Stage Walkout Across Nation In Support Of Gun Control.

All three major networks led their newscasts last nights with reports on the high school students walkout in support of gun control measures. ABC World News Tonight (3/14, lead story, 3:30, Muir) referred to "powerful images playing out across this country," with "tens of thousands of students staging a massive coordinated protest against gun violence, one month after the shooting rampage killed 17 people at Stoneman Douglas High School in Parkland, FL."

NBC Nightly News (3/14, lead story, 3:00, Gutierrez) said "across the country, the loudest lesson was outside the classroom," because "a generation" is "sitting silent no more," and the CBS Evening News (3/14, lead story, 2:45, Diaz) spoke of "a sea of students" that "streamed out of the school behind a national movement," and added that "while the walkout was under way, the NRA tweeted, 'Let's work together and secure our

schools and stop school violence. We protect our banks, our sports stadiums and our government buildings better than we protect our schools.' The NRA wants Congress to push through legislation increases school safety."

Reuters (3/14) reports that "with some students dressed in orange, the color adopted by the gun control movement, the walkouts began at 10 a.m. local time in each time zone and were scheduled to last 17 minutes. Many rallies went longer." Reuters adds that "the duration was a tribute to 17 students and staff killed at Marjory Stoneman Douglas High School."

The Washington Post (3/14, Heim, Lang, Svrluga) says "supporters say the walkouts and demonstrations represent a realization of power and influence by young people raised on social media who have come of age in an era of never-ending wars, highly publicized mass shootings and virulent national politics." The AP (3/14, Binkley) says the "wave of protests" could be "the largest of its kind in American history," and the Wall Street Journal (3/14, Campo-Flores) runs a similar assessment.

The Washington Post (3/14) editorializes about the "extraordinary nationwide demonstration for safer schools and stronger gun control," and hails the "'Enough is Enough'...posters of a movement that has made clear it won't go away until something real is done to combat gun violence."

South Carolina Governor Calls Student Walkouts Protesting Gun Violence "Shameful."

The Hill (3/14, Gstalter) reported that Gov. Henry McMaster on Wednesday "blasted the national student walkout as a 'shameful' attempt by left-wing groups to push their own political agenda. 'It appears that these school children, innocent school children, are being used as a tool by [this] left-wing group to further their own agenda,' McMaster told South Carolina public television network ETV." McMaster added that the walkout is "a political statement by a left-wing group and it's shameful." The Hill added, "High school students in cities across the country including Washington, D.C., marched out of their classrooms for 17 minutes on Wednesday to protest gun violence a month after 17 students and faculty were killed at Marjory Stoneman Douglas High School in Parkland, Fla." McMaster is seeking a full four-year term this fall.

Cabinet Members Make Case For "Transformative" Infrastructure Projects.

The Washington Post (3/14, Laris) reports that in a joint appearance before the Senate Commerce Committee, Labor Secretary Acosta, Transportation Secretary Chao, Agriculture Secretary Perdue, Energy Secretary Perry, and Commerce Secretary Ross made the case for spending "$20 billion on a range of risky but potentially 'transformative' infrastructure projects, such as satellite networks to provide rural broadband, new launchpads for private rockets, and 'augmented reality' technologies to visualize and manage urban traffic congestion." But after the hearing, Sen. John Thune said, "Unless someone's willing to bite the bullet and come up with a new funding source, there are limitations to what we will be able to do."

In 61-31 Vote, Senate Passes "Sweeping Rollback" Of Dodd-Frank.

The Washington Post (3/14, Werner, Merle) reports that the Senate, in a 67-31 vote Wednesday, approved "the most significant loosening of financial regulations since the economic crisis a decade ago." The measure "would free more than two dozen banks from the toughest regulatory scrutiny put in place after the 2008 global financial crisis." While President Trump promised to do a "big number" on the Dodd-Frank law, "the new measure leaves key aspects of the earlier law in place." However, the measure "amounts to a sweeping rollback of banking rules aimed at protecting taxpayers from another financial crisis and future bailouts."

The New York Times (3/14, Rappeport) says that despite the "rare showing of bipartisanship" in the Senate, the bill "faces an uncertain fate going forward, as House Republicans are expected to push for a much more expansive rollback of the 2010 Dodd-Frank Act." Senate Democrats who supported the bill that passed Wednesday "have insisted that major changes along the lines of what the House passed last year will sink the effort." However, the Wall Street Journal (3/14, Ackerman) is more optimistic, saying

the measure has a good chance of passage.

Politico (3/14, Guida) says that while the President and other supporters of the legislation "say they want to rescue the nation's lenders from a crush of regulations," but "the industry looks more like it's booming." Over the last three years, banks "have hauled in record profits" and they "will be among the biggest winners under the new tax-reform law." More over "their loans are growing by 4 to 5 percent a year," and "even community banks, which the bill's backers say they're most concerned about, are making money."

Editorial Wrap-Up

New York Times.

"Trump Was Right To Block Merger." In an editorial, the New York Times (3/14) praises President Trump's decision to block Broadcom's takeover of Qualcomm "given the series of mergers that has left the semiconductor industry already dominated by a few large companies." Although some experts fear that the move "could further rattle the global economy and international norms" following Trump's proposed steel and aluminum tariffs, blocking the deal will help slow a "concentration of power...in the semiconductor business," making it important for both protecting competition as well as national security.

Washington Post.

"Britain Is Punishing Putin. America Should Join In." A Washington Post (3/14) editorial says "an adequate international response to [Russian President Vladimir] Putin would push back against his ventures on all fronts: Syria, where the United Nations has found Russia complicit in war crimes; Ukraine, where Russian-backed forces continue to seek military advantage; cyberspace, where Russian hackers and bots remain ubiquitous. In the absence of such action, Mr. Putin's ambitions, and his audacity, will only escalate further."

"What The Pennsylvania Election Should Teach Both Parties." In an editorial, the Washington Post (3/14, Board) says the PA18 results "are just the latest sign that Republicans' toxic embrace of...Trump is hurting not only the country but also their party." The Post adds that "Saccone chose to associate closely with the president, claiming that he was 'Trump before Trump was Trump.' Suburban voters punished him."

"Students Walking Out Of School Taught The Nation A Lesson." The Washington Post (3/14) editorializes about the "extraordinary nationwide demonstration for safer schools and stronger gun control," and hails the "'Enough is Enough'...posters of a movement that has made clear it won't go away until something real is done to combat gun violence."

Wall Street Journal.

"Kudlow Into The Breach." In an editorial, the Wall Street Journal (3/14) also hails President Trump's selection of Larry Kudlow to head the White House National Economic Council, and urges him to focus on spurring economic growth and to oppose protectionist policies. To that end, the Journal tells him to rely on Gary Cohn's staff, as well as on Kevin Hassett and Mick Mulvaney.

"Trump's Pennsylvania Downdraft." In an editorial, the Wall Street Journal (3/14) says that the election results show Republicans need a better strategy this fall than supporting tariffs and using House Minority Leader Nancy Pelosi as a cudgel to hammer Democratic candidates. The Journal says that Lamb supported the new Trump-imposed tariffs on steel and aluminum tariffs and other Democratic candidates are likely to do so this fall. The Journal adds that the GOP sought to link Lamb to Pelosi, but the candidate neutralized that line of attack by saying he wouldn't support Pelosi as Democratic leader.

"A Cancer Scare Defeat In California." In an editorial, the Wall Street Journal (3/14) praises the preliminary injunction issued two weeks ago by a federal judge in California against mandatory cancer warnings on certain food products. The judge ruled in favor of

farm groups and businesses who sued after the state required warnings about the chemical glyphosate, and the Journal agrees with the agencies that have found this chemical is unlikely to pose a cancer risk. The Journal also agrees with the judge that the state can't compel businesses to issue "misleading" warnings, arguing that this will harm businesses and California citizens.

Last Laughs

Late Night Political Humor.

Jimmy Kimmel: "Melania is back and planning to meet with representatives from Twitter, Facebook, Google, and others to lead the fight against online bullying. Apparently, the word 'irony' doesn't translate from Slovenian. But all she has to do to fight cyber-bullying is take a hammer to her husband's thumbs and phone. Melania Trump holding a summit to stop cyber-bullying is like Camille Cosby calling a meeting with Benadryl."

Stephen Colbert: "One journalist has heard that [Stormy] Daniels suggests Trump likes it when women aren't nice to him, treat him in, perhaps, denigrating ways. Well, I knew Trump was a bad President, but I didn't know that Trump was 'a bad President.'"

Stephen Colbert: "In addition to Rex Tillerson, Gary Cohn, and Hope Hicks, we also learned that Trump's personal assistant was just fired, although he was actually escorted from the White House on Monday. I assume he wanted to beat the rush. ... Apparently, [John] McEntee was fired because he is currently under investigation by the Department of Homeland Security for serious financial crimes. And that's Jared Kushner's job. ... So Trump is now without a personal assistant, but he's already had one qualified applicant apply for the job: Tex Rillerson."

James Corden: "President Trump was in San Diego yesterday giving a speech to assembled members of the Marine Corps, and at one point the President said he wants to create a new branch of the military that would patrol outer space. And get this, he wants to call it the 'Space Force.' I'm not joking. 'Space force.' It sounds like what my grandma calls Star Wars. ... But the President didn't stop there. In the same speech, Trump claimed that the United States would be going to Mars, quote, 'very soon.' Damn, that space force works fast. ... I give him credit for not following that up with saying the Martians are going to pay for it."

James Corden: "While the President was in San Diego, he examined some prototypes of his proposed border wall with Mexico. And Trump remarked that the wall must be a tough obstacle because people trying to cross the border are, quote, 'like professional mountain climbers.' ... Trump basically thinks everyone trying to get into America illegally is some sort of Mexican Batman. But look, I'm no big idea man like Donald Trump. I'm not, okay? But obviously, obviously, if you build the wall high enough, the 'Space Force' can just take it from there."

Trevor Noah: "Ever since the shooting in Parkland, Florida, young people have been leading the charge for sensible gun reform. And today, on the one-month anniversary of that shooting, they kicked things up a notch with a nationwide school walkout. That's right, for once, the students evacuated on their own terms."

Jimmy Fallon: "[In a speech yesterday], Trump talked about going to Mars. Listen to what he said about it." **President Donald Trump**: "Very soon, we're going to Mars. You wouldn't have been going to Mars if my opponent won, that I can tell you. You wouldn't even be thinking about it." **Fallon**: "And the Martians were like, 'Okay, we need to build a wall. Have Uranus pay for it.'"

Jimmy Fallon: "Trump looked at prototypes for his border wall to decide what it should be made of. So far, he's narrowed it down to three materials. First there's concrete. Then

there's metal. And his personal favorite, fired White House staffers."

Jimmy Fallon: "I heard that Trump wants to fire his Secretary of Veterans Affairs. Trump said he might do the job himself since he's a veteran of several affairs."

Seth Meyers: "After Democratic candidate Conor Lamb declared victory last night in Pennsylvania's special election, a 'Fox And Friends' host suggested that Lamb won because of his attractive looks. Because if there's one thing that Congress is full of, it's stone-cold hotties."

Seth Meyers: "President Trump was in California this week to view prototypes of his proposed border wall and said parts of the wall would have see-through capability. Said his architect, 'In that case, it's done?'"

Seth Meyers: "First Lady Melania Trump will host tech industry leaders at the White House next week to discuss her campaign against cyber-bullying where she's expected to say, 'You guys talk to him!'"

Jordan Klepper: "A special congressional election last night in District 18 which Trump won by 20 points may have turned blue and elected Democrat Conor Lamb. I know, I am upset as well because districts are like body parts. When they turn blue, something has gone terribly wrong. Now until a recount confirms my truth, it looks like Democrat Conor Lamb has flipped the district. How? By using a devious tactic focusing on, and I hope I am saying this right, local issues."

Jordan Klepper: [Referring to Trump's CIA Director pick Gina Haspel] "There is an old saying that behind every great woman in the Trump Administration, there are three men who were hired for her job first but committed treason or perjury or fraud or domestic abuse or general ineptitude, and then after a long period of public outcry, they were gently asked to submit their resignations in a cloud of shame, but when that cloud settled, who was left standing there? A woman."

Samantha Bee: "We said hello to a new Democratic Representative from Pennsylvania, Conor Lamb, who squeaked out a victory by less than a thousand votes. Two years ago, Trump won this area by more than 20 points. ... I'm enjoying this new radical Democratic strategy called 'trying.' Really makes you wonder, what if we keep trying?"

Council Members,

I apologize for not being more responsive to your questions, but I've been wrapped up coordinating some significant public and media interest (more on that, below!) for this Friday's meeting.

IWCC Chair Selection
Principal Deputy Director Greg Sheehan will be serving as chair this first meeting. Selection of an IWCC chair and vice-chair could be tackled during the discussion session at the end of the day (please see revised agenda, attached). Per the IWCC charter: "The Council shall elect the Chairperson and Vice-Chairperson by affirmative vote of a majority of its members. The Chairperson and Vice-Chairperson will serve a term of 1 year, renewable for 1 additional year. The Chairperson or Vice-Chairperson may be replaced before his or her term ends by affirmative vote of a majority of the Council's members."

Public/Press
The IWCC meeting from 10:15am-3:30pm is open to the public and media/press representatives *will* be in attendance, everything is on the record. I anticipate approximately 50

members of the public in attendance.

Per the IWCC charter: "The Council shall elect the Chairperson and Vice-Chairperson by affirmative vote of a majority of its members. The Chairperson and Vice-Chairperson will serve a term of 1 year, renewable for 1 additional year. The Chairperson or Vice-Chairperson may be replaced before his or her term ends by affirmative vote of a majority of the Council's members."

Public/Press
The IWCC meeting from 10:15am-3:30pm is open to the public and media/press representatives *will* be in attendance, everything is on the record. I anticipate approximately 50 members of the public in attendance.

Peter,

Please take the following guidance with a grain of salt, I'm color-blind and fashion-backward: I will be wearing a navy blue (I think!) suit and tie for the March 16th meeting. Business-casual for the March 15th reception is a good choice.

Council Members,

I apologize for not being more responsive to your questions, but I've been wrapped up coordinating some significant public and media interest (more on that, below!) for this Friday's meeting.

IWCC Chair Selection
Principal Deputy Director Greg Sheehan will be serving as chair this first meeting. Selection of an IWCC chair and vice-chair could be tackled during the discussion session at the end of the day (please see revised agenda, attached). Per the IWCC charter: "The Council shall elect the Chairperson and Vice-Chairperson by affirmative vote of a majority of its members. The Chairperson and Vice-Chairperson will serve a term of 1 year, renewable for 1 additional year. The Chairperson or Vice-Chairperson may be replaced before his or her term ends by affirmative vote of a majority of the Council's members."

Mr. Winchell, please know that I have not been able to connect with Ms Johnson so I made my own travel arrangements and will not ask for reimbursement.

On another note, have been in Brussels meeting with the EU's Intergroup on Hunting and Conservation, followed by a meeting in Budapest, Hungary for a meeting with the Deputy Prime Minister in regards to the world hunting exposition that will held in 2021. If we have time, I'd like to speak with Principal Deputy Director offline about these meetings and anyone else he feels should be included.

Subject:	[EXTERNAL] FW: IWCC Follow-up

Joshua,

I am writing a follow-up on the questions I submitted to you almost two weeks ago (see e-mail below). In addition, Mr. Ivan Carter requested of you on March 26, 2018 lists of the members of each of the sub-committees formed at the inaugural meeting of the IWCC. Please advise when you believe we might expect this information. Thank you very much.

Very truly yours,
/s/
Chris Hudson
Chairman
IWCC Policy Sub-committee

Subject: IWCC Follow-up

Joshua,

You will recall at last week's inaugural IWCC meeting I asked a series of questions to which the answers were incomplete. Accordingly, in furtherance of my responsibilities as chairman of the Policy Sub-committee of the IWCC I am writing to request answers from the appropriate personnel at the USFWS to the following questions:

1. Please identify each country that the USFWS has determined has lost 90% of its elephant population in the last ten years.

2. Please identify how many, if any, sport-hunted trophy elephant import permits were issued by the USFWS in the last ten years for elephants killed in each country identified in answer to question number one above.

Thank you for your kind assistance in this matter.

Very truly yours,
/s/
Chris Hudson
Chairman
IWCC Policy Sub-committee

Hey Josh,

The letter I forwarded from Carper & Duckworth has been routed to Craig. Because it touches on both IWCC and trophies, we'd like to talk about how to pull it together. Are you free this afternoon to chat quickly?

Good morning, Mr. Winchell. Thank you for contacting us about our transcription services. We would be pleased to transcribe the Council meeting recording, which we understand is about 5 hours long. We will have the transcript ready for email delivery within 10-12 business days after we receive the recording. The total cost will be $1,500.

As I mentioned, we accept government purchase cards. If you'd like to proceed, I can email you instructions about sending the audio to us. If you have any questions or require any additional information, please do not hesitate to contact us. We look forward to hearing from you.

Best regards,

Matthew

> Good morning, Mr. Winchell. Thank you for contacting us about our transcription services. We would be pleased to transcribe the Council meeting recording, which we understand is about 5 hours long. We will have the transcript ready for email delivery within 10-12 business days after we receive the recording. The total cost will be $1,500.
>
> As I mentioned, we accept government purchase cards. If you'd like to proceed, I can email you instructions about sending the audio to us. If you have any questions or require any additional information, please do not hesitate to contact us. We look forward to hearing from you.

To:	Margaret A Triebsch <margaret_triebsch@ios.doi.gov>
Subject:	Question about upcoming IWCC mtg planning

Margaret,

I just got the go ahead from Natalie to schedule the next IWCC mtg in June or early July and I had a couple logistical questions for you. Can you give me a ring at your earliest convenience?

Thx

Greg's availability:

Fri, Jun 1
Available all day

Mon, Jun 4
Might be available all day, if he wants to miss the 10a.m. - 11a.m. weekly AD meeting. He probably could miss it.

Wed, Jun 6
Available all day

Thomas

Can you put a soft hold for Greg on Fri June 1, Tues June 5 and Wed June 6? I will work quickly to nail down one of those days for the IWCC mtg.

Thanks, Joshua

Hi all,
Josh Winchell and I just had call during which we pondered the helpfulness of having a short, regular meeting maybe every other week to discuss happenings related to these two councils. Any interest? Thoughts? Availability Mondays-Wednesdays? Doesn't have to be lengthy, just an opportunity to get updates. Thanks.

Yes please :) Also looping in Taylor for the HSSCC.

Monday & Tuesday afternoons, or anytime on Wednesdays would work for me.

I'm interested too. I don't really have a direct line to happenings with these Councils, so not sure I'll have much to contribute. But, I certainly want to know more.

Mondays (except 2-3) by phone
Tuesdays after 11
Wednesdays 11-3

Thanks!

Hey Josh,

(b) (6) .

Just checking in to see if you want to report out on the Council Mtg or has too much time passed at this point?

Kathy Korte wanted to report out from LE point of view last Tuesday but she was waiting for Linda or I to provide our report but we didn't have anything.

If you're in tomorrow, I would love to hear some first hand accounts anyway.

Subject:	Re: Mgmt Team Update

Phil,

I'm at the North American wildlife conference all this week, but when I get back in the office I'll be happy to talk about how the IWCC meeting went. In the meantime, here's short summary for the mgmt team mtg notes document.

Thank You
Thanks to Kathy Korte, Rich Johnston, and Zach Arnold for providing additional security for the IWCC meeting at Main Interior on March 16th. And an extra special thanks to Kathy for the help she provided to an IWCC member subsequent to the meeting.

Branch of Visitor Services
IWCC - Joshua Winchell coordinated the inaugural meeting of the IWCC on March 16th. Greg Sheehan chaired the meeting and Craig Hoover and David Hubbard of International Affairs and the Office of Law Enforcement (respectively) provided detailed presentations on international wildlife conservation and hunting issues. At the end of the meeting the Council elected member Bill Brewster as its chair and Jenifer Chatfield as the vice chair.
HSSCC - Winchell submitted more than 100 applications received for the Hunting and Shooting Sports

Conservation Council - a new federal advisory group that is tasked, in part, to evaluate implementation of S.O. 3347 and 3356 - to DOI for consideration. It is likely that DOI will be appointing members of the HSSCC within the next few weeks and potentially request to schedule the group's inaugural meeting soon after. Winchell is currently working with Jeff Donahoe to respond to multiple FOIA requests regarding IWCC and HSSCC.

TO: All IWCC Members From: Bill K Brewster, Chairman I just received everyones emails and phone numbers yesterday and have asked Joshua to please share with all members. Thanks for your involvement in our first meeting of the IWCC. Also thank you for your trust in electing me as your Chairman. Our Council was formed by Secretary Zinke and we need to try very hard to justify his confidence in our ability to work together and create a plan that will make everyone aware that hunting and wildlife conservation are both necessary for either to be successful. There are many challenges for Wildlife on all continents with poaching and illegal trafficking of Wildlife increasing in many countries and most of their governments being financially incapable of responding. The money that is paid by hunters is absolutely critical to the survival of many species. Also the salaries paid to trackers, skinners, cooks, other household personnel , drivers, gun bearers, and game scouts in many remote areas are also essential to the survival of their entire families. Our group is fortunate to have a variety of backgrounds among our members. This fosters knowing of many different approaches to solving problems. Our team has each been successful in their careers and I believe each of you can be very helpful in developing a meaningful plan of action. Our main commonality of interest is the love we have for Wildlife and the understanding we have of Conservation. We also understand the difficulties of dealing with some of the Wildlife species in remote arras where we have been. I am very hopeful we can develop a plan to help educate the public on the benefits of international hunting for Wildlife Conservation and survival. I also believe we can be a strong player in helping to stop illegal trafficking and poaching. Both of these plus the loss of habitat are the main Wildlife danger in many countries today. Please direct all IWCC related press requests to DFO, Joshua Winchell. Once again we look forward to working with you to fulfill the mission of our council.

Joshua,

You will recall at last week's inaugural IWCC meeting I asked a series of questions to which the answers were incomplete. Accordingly, in furtherance of my responsibilities as chairman of the Policy Sub-committee of the IWCC I am writing to request answers from the appropriate personnel at the USFWS to the following questions:

1. Please identify each country that the USFWS has determined has lost 90% of its elephant population in the last ten years.

2. Please identify how many, if any, sport-hunted trophy elephant import permits were issued by the USFWS in the last ten years for elephants killed in each country identified in answer to question number one above.

Thank you for your kind assistance in this matter.

Very truly yours,
/s/
Chris Hudson
Chairman
IWCC Policy Sub-committee

Joshua,

It was my pleasure to meet you last week and thank you for your efforts in organizing a successful inaugural meeting of the IWCC.

On Tuesday this week I was asked to participate in an interview for NPR about the IWCC. I spoke with Laura Rigas about it.

Below is the link to the NPR radio interview from yesterday.

Trump Administration Lifts Trophy-Hunting Ban For Some Elephants And Lions
http://www.wbur.org/onpoint/2018/03/21/trump-trophy-ban-eased

Separately, I was hoping you could provide some guidance with respect to the following questions:

1. Can a FACA sub-committee chair convene a sub-committee meeting? What is the procedure?
2. If so, what are the limitations on the number and place of those meetings?
3. Is the answer to number 2 above different if not all the expenses for the sub-committee meeting are going to be reimbursed by the DOI?
4. In pursuit of facts and opinions relating to policy, can the Policy sub-committee chair invite correspondence, opinions, and answers to interrogatory style questions from members of the public including relevant scientists and NGOs?
5. What procedure governs the Policy sub-committee chair's ability to invite members of the public to speak to the sub-committee or the IWCC committee as a whole?

Thank you in advance for your consideration of these requests.

Sincerely,
/s/
Chris Hudson

Subject: IWCC&HSSCC Security/Threats Summary

Linda,

I mentioned on our call yesterday the protests and security presence during the IWCC meeting. Based on my experience coordinating the IWCC meeting and speaking with members, I will be elevating security planning/awareness for IWCC (and the HSSCC, looking forward) related activities well beyond what I did for WHHCC.

Summary of IWCC Meeting Security Issues
Based on media coverage as well as the quality and quantity of public comment I received on the IWCC establishment, I was well aware of the protest potential for the IWCC's first meeting. In my conversations with Greg and DOI leadership, they also anticipated the same.

SIR - Threat to IWCC member - Florida

"Korte, Katherine" <katherine_korte@fws.gov>

From:	"Korte, Katherine" <katherine_korte@fws.gov>
Sent:	Wed Mar 21 2018 14:51:05 GMT-0600 (MDT)
To:	undisclosed-recipients:;
BCC:	joshua_winchell@fws.gov
Subject:	SIR - Threat to IWCC member - Florida

An International Wildlife Conservation Counsel member received a threatening phone call at their place of residence on Friday, March 16, 2018. The context of the message implied that the caller knew where the IWCC member lived and because of her support of trophy hunters, she, along with other members should be "in jail."

The Pasco County Sheriff's Department responded and took a report along with a copy of the recording. Because the member lives in a secluded area, on a dirt road, the Sheriff's Department has increased patrols in her area of residence. She will notify the Pasco County Sheriff's Department and this office if she receives any more threats.

Contact me for additional questions.

Linda,

Well, the inaugural IWCC is behind us and I don't think it could have gone much better all things considered! I'm sure you're catching up on all sorts of things but I thought I'd give you a quick summary of the meeting here and I'll get on your calendar for a more detailed debrief.

IWCC Meeting Summary
The IWCC had a good administrative session with the DOI solicitor office (Heindl and Hintz) to go over FACA law, rules, regulations, and ethics considerations. It was a lot of new information for members to absorb, but a more than a few members were clearly engaged and had good questions.

Joshua,

I would like to send this email and attachments about Tanzania to the IWCC members. What is the protocol for that and other related that may follow? We discussed the negative Tanzania developments and conversion of wildlife lands at the first IWCC meeting. Should I mail to everyone, the Chairman, send it through you for distribution, file it as a comment or what? Thanks. Just want to get the protocol right.

Thanks,

John

Subject:	Thanks for your help

Hello all,

I just wanted to thank you all for they help that you or your staff did in helping to make the first meeting of the International Wildlife Conservation Council go so well on Friday. This was a meeting with lots of media and public interest and I think it came off very well. In particular,

Joshua, thank you for organizing and helping conduct,

Craig and David, thank you for the excellent presentations and fielding questions from the council members,

Rich, that you for having Zach and other refuge officers in the meetings and hallways to keep an eye on things,

Gavin, thank you for managing a barrage of media who seemed to be everywhere.

And others that I may not have mentioned above for your contributions. We needed a good day and I believe this went off as well as we could have hoped for,

Thanks again,
Greg

Subject: list of IWCC applicants not on council

Dear Mr. Winchell,

Is it possible to obtain a list of persons who applied for membership on the council but were not selected?

Thank you, and regards,

Kate Nowak

R2 is ready to release records to MuckRock in response to a request for:

"…all emails, including attachments, exchanged between Amy Lueders or Joy Nicholopoulos and any Department of Interior employees with emails ending in @ios.doi.gov. Please constrain the search between January 20th, 2017 and the processing date of this request."

Attached, please find the incoming request, draft response letter, and four sample documents. All of the records proposed for release are available on the Google Drive sorted by category
here: https://drive.google.com/drive/folders/1u7Mrwpx_Z4xWpkCuUlGgX8Vk1OzgWxsn?usp=sharing

This will also go through the political awareness review for named individuals.

Mr. Charlie Spatz
MuckRock News
DEPT MR 54027
411A Highland Avenue
Somerville, Massachusetts 02144-2516

Dear Mr. Spatz:

This responds to your Freedom of Information Act (FOIA) request dated May 17, 2018, in which you initially sought the following:

> "…all emails, including attachments, exchanged between Amy Lueders or Joy Nicholopoulos and any Department of Interior employees with emails ending in "@ios.doi.gov". Please constrain the search between January 20th, 2017 and the processing date of this request."

Your request was assigned tracking number FWS-2018-00218. On May 30, 2018, we acknowledged your request and sought clarification of your fee category. Thank you for discussing your request with our FOIA coordinator on June 6, 2018. Per that conversation and follow-up email exchanges, you agreed to limit the scope of your request to the Regional Director's emails and clarified your fee category as "other".

Your request was forwarded to the Regional Director's Office for processing. Staff located a total of 140 responsive emails and 35 attachments (consisting of 585 pages total). From these documents, we have redacted 14 pages pursuant to FOIA Exemption 5, 6, and/or 7 as described below. The remaining records are provided to you in their entirety.

Exemption 5 (Commercial Information Privilege)

We have redacted conference call-in numbers and passcodes from nine documents, pursuant to Exemption 5, confidential commercial information privilege. When the Government enters the marketplace as an ordinary commercial buyer or seller, the Government's information is protected under the commercial information privilege if it is sensitive information not otherwise available, and disclosure would significantly harm the Government's monetary functions or commercial interests. The theory behind the privilege is that the Government may be placed at a competitive disadvantage or the consummation of a contract may be endangered if confidential information generated by the Government is disclosed.

The information withheld under this privilege consists of active conference call telephone numbers and access codes and or active web links, which could be used to conduct conference calls by parties outside the Government or used to call in to monitor internal Government conversations. We are withholding it because disclosure to the public would chill communications between Federal employees and harm the Government's ability to exchange information. Because releasing this information would significantly harm the Government's financial interest by publicizing sensitive information, the Service is withholding it in accordance with FOIA Exemption 5.

Exemption 6

We have redacted personal contact information from four documents pursuant to Exemption 6. Under this exemption, agencies may withhold information or records on individuals contained in "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy" (5 U.S.C. §552(b)(6)).

The phrase "similar files" covers any agency records containing information about a particular individual that can be identified as applying to that individual. To determine whether releasing records containing information about a particular individual would constitute a clearly unwarranted invasion of personal privacy, we are required to balance the privacy interest that would be affected by disclosure against any public interest in the information.

Under the FOIA, the only relevant public interest to consider under the exemption is the extent to which the information sought would shed light on an agency's performance of its statutory duties or otherwise let citizens 'know what their government is up to'. The burden is on the requester to establish that disclosure would serve the public interest. When the privacy interest at stake and the public interest in disclosure have been determined, the two competing interests must be weighed against one another to determine which is the greater result of disclosure: the harm to personal privacy or the benefit to the public. The purposes for which the request for information is made do not impact this balancing test, as a release of information requested under the FOIA constitutes a release to the general public.

We have determined that the individuals to whom this information pertains have a substantial privacy interest. Additionally, you have not provided information that explains a relevant public

interest under the FOIA in the disclosure of this personal information and we have determined that the disclosure of this information would shed little or no light on the performance of the agency's statutory duties. Because the harm to personal privacy is greater than whatever public interest may be served by disclosure, release of the information would constitute a clearly unwarranted invasion of the privacy of these individuals and we are withholding it under Exemption 6.

Exemption 7

Exemption 7 protects from disclosure "records or information compiled for law enforcement purposes" if the records fall within one or more of six specific bases for withholding set forth in subparts (a) through (f). (5 U.S.C. § 552(b)(7)(a)-(f)). We are redacting a portion of one email under Exemption 7 because it is protected under the following subpart (7)(E).

We have redacted a portion of one email outlining the number of law enforcement officers located at specific border refuges pursuant to FOIA Exemption 7(E). This exemption protects law enforcement records if their release would disclose techniques and procedures for law enforcement investigation or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if the disclosure could reasonably be expected to risk circumvention of the law.

This response to your request was made in consultation with Justin Tade, Attorney-Advisor, Office of the Solicitor, and U.S. Department of the Interior. You may appeal this response to the Department's FOIA/Privacy Act Appeals Officer. If you choose to appeal, the FOIA/Privacy Act Appeals Officer must receive your FOIA appeal no later than 90 workdays from this letter's date. Appeals arriving or delivered after 5 p.m. Eastern Time, Monday through Friday, will be deemed received on the next workday. Your appeal must be made in writing. You may submit your appeal and accompanying materials to the FOIA/Privacy Act Appeals Officer by mail, courier service, fax, or email. All communications concerning your appeal should be clearly marked with the words: "Freedom of Information Appeal."

You must include an explanation of why you believe the Service's response is in error. You must also include with your appeal copies of all correspondence between you and the Service concerning your FOIA request, including your original FOIA request and Service's response. Failure to include with your appeal all correspondence between you and the Service will result in the Department's rejecting your appeal, unless the FOIA/Privacy Act Appeals Officer determines (in the FOIA/Privacy Act Appeals Officer's sole discretion) that good cause exists to accept the defective appeal. Please include your name and daytime telephone number (or the name and telephone number of an appropriate contact), email address and fax number (if available) in case the FOIA/Privacy Act Appeals Officer needs additional appeal information or clarification. You may contact the Appeals Officer in any of the following ways:

Department of the Interior/ Office of the Solicitor
1849 C Street, N.W., MS-6556 MIB
Washington, D.C. 20240
Telephone: 202-208-5339, Fax: 202-208-6677

Email: FOIA.Appeals@sol.doi.gov

Also, please note the 2007 FOIA amendments created the Office of Government Information Services (OGIS) to offer mediation services to resolve disputes between FOIA requesters and Federal agencies as a non-exclusive litigation alternative. Using OGIS services does not affect your right to pursue litigation and does not affect appeal filing timing with the Department's FOIA/ Privacy Act Appeals Officer. You may contact OGIS in any of the following ways:

Office of Government Information Services
National Archives and Records Administration
8601 Adelphi Road – OGIS
College Park, MD 20740-6001
E-mail: ogis@nara.gov, Web: https://ogis.archives.gov
Telephone: 202-741-5770, Fax: 202-741-5769, Toll-free: 1-877-684-6448

You also may seek dispute resolution services from our FOIA Public Liaison, Carrie Hyde-Michaels, at 703-358-2521, or via email at carrie_hyde-michaels@fws.gov.

For your information, Congress excluded three discrete law enforcement and national security records categories from FOIA requirements. See 5 U.S.C. § 552(c) (2006 & Supp. IV (2010)). This response is limited to those records that are subject to FOIA requirements. This is a standard notification we give all our requesters and should not be taken as an indication that excluded records do, or do not, exist.

This completes the Southwest Region's response. The fees incurred in responding to your request have been waived in accordance with 43 C.F.R. §2.45. If you have any questions or concerns regarding this request, please contact Government Information Specialist, Lisa Krabbe at 575-425-0033 or via email at lisa_krabbe@fws.gov.

Sincerely,

Regional Director

To Whom It May Concern:

Pursuant to the Freedom of Information Act, I hereby request the following records:

Please provide all emails, including attachments, exchanged between Amy Lueders or Joy Nicholopoulos and any Department of Interior employees with emails ending in "@ios.doi.gov".

Please constrain the search between January 20th, 2017 and the processing date of this request.

The requested documents will be made available to the general public, and this request is not being made for commercial purposes.

In the event that there are fees, I would be grateful if you would inform me of the total charges in advance of fulfilling my request. I would prefer the request filled electronically, by e-mail attachment if available or CD-ROM if not.

Thank you in advance for your anticipated cooperation in this matter. I look forward to receiving your response to this request within 20 business days, as the statute requires.

Sincerely,

Charlie Spatz

October 31, 2017

Mr. Paul C. Schmidt
Department of Homeland Security
U.S. Customs and Border Protection
Office of Acquisition
1901 South Bell Street, Suite 600, MS 1043
Arlington, Virginia 20598

Dear Mr. Schmidt:

Thank you for your correspondence dated October 24, 2017, received in our office on October 24, 2017. This letter documents our review of the U.S. Customs and Border Protection (CBP) Office of Acquisition's proposed Block 1 Tower Replacement Project in the Tucson Border Patrol Station Area of Operation. This project involves the construction of nine IFT sensor towers to replace existing SBInet towers in the general area of the Buenos Aires National Wildlife Refuge (BANWR) and east of the BANWR in Pima County, Arizona. In addition, the BANWR refuge manager and the Coronado National Forest Supervisor have both determined that new special use permits will be issued to authorize this action to construct replacement towers on lands they administer. The special use permit has been issued for the BANWR, but this consultation includes the issuance of the permit by the Coronado National Forest as an element of the proposed action for which CBP is acting as the lead agency for this consultation.

You are requesting informal consultation on the potential effects of this proposed action pursuant to section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1531-1544) (ESA), as amended. You have requested our concurrence with your determination that the proposed project may affect, but is not likely to adversely affect the endangered Pima pineapple cactus (*Coryphanta scheeri* var. *robustispina*), the threatened Chiricahua leopard frog (*Rana chiricahuaensis*) and designated critical habitat, the threatened northern Mexican gartersnake (*Thamnophis eques megalops*), the threatened yellow-billed cuckoo (*Coccyzus americanus*), and the endangered jaguar (*Panthera onca*) and designated critical habitat. We concur with your determinations and provide our rationale below. Critical habitat has been proposed for the northern Mexican gartersnake and the yellow-billed cuckoo and proposed critical habitat for both

species occurs in the area of the proposed action. You have determined that the proposed action will not adversely modify proposed critical habitat for either species and we will not address proposed critical habitat in this consultation.

You also determined the propose action would have no effect on the Kearney's Blue-Star (*Amsonia kearneyana*), the southwestern willow flycatcher (*Empidonax traillii eximus*), the masked bobwhite quail (*Colinus virginianus ssp. ridgwayi*), the lesser long-nosed bat (*Leptoncyteris curasoae yerbabuenae*), and the ocelot (*Leopardus pardalis*). The ESA does not require the U.S. Fish and Wildlife Service to concur with "no effect" determinations. These species will not be addressed in this consultation. However, we strongly recommend that CBP include their justification for these "no effect" determinations in their administrative record.

DESCRIPTION OF THE PROPOSED ACTION

The nine Block 1 sensor towers proposed for replacement in this project are identified as:

1) TCA-TUS-032 M4 occurring on lands owned by Pima County;
2) TCA-TUS-035 Guijas occurring on lands managed by BANWR;
3) TCA-TUS-036 Black Mesa occurring on lands managed by the Coronado NF;
4) TCA-TUS-041 County Line occurring on lands managed by the State of AZ;
5) TCA-TUS-085 Rose occurring on lands managed by BANWR;
6) TCA-TUS-287 De La Osa occurring on lands managed by BANWR;
7) TCA-TUS-290 Spears Property occurring on lands managed by CBP;
8) TCA-TUS-298 Blackberry Hill occurring on lands managed by the Coronado NF; and
9) TCA-TUS-299 Garcia Ranch occurring on lands managed by BANWR (see Figure 1 of the Biological Assessment).

At each of these towers, the entire tower structure and supporting equipment will be replaced. A lattice replacement tower, of similar height and design to the existing tower, with a poured concrete foundation will be constructed within the existing, permanently disturbed tower footprint (typically 50 feet by 50 feet). After construction is completed on the new tower, the above-ground portion of the existing towers will be removed. In order to enable construction of the new tower, the current fence and all support facilities (generator, propane tank, building, and solar panels) will be relocated within the original temporary disturbance footprint. The original 100 foot by 100-foot temporary disturbance footprint will be flagged and no disturbance outside of this area will be allowed. After the existing tower is removed, the grounding system will be rebuilt if and as required. At each of these towers, the existing communication equipment and power generation equipment (solar panels and propane generator) will be replaced. The solar panels will provide the primary power source for operation of the tower. When the IFT system becomes operational, the generator is only anticipated to run for a period of 20 minutes once every seven days, or during infrequent weather events when there is no sunshine for several days. The sound level as measured from the generator is anticipated to be approximately 68 dBA at 28 feet. During construction, the operating time of the generator will increase when the solar panels are removed at the five towers which are not connected to grid power (TCA-35, TCA-36, TCA-41, TCA-85, and TCA-298).

The actual construction activities at each sensor tower are expected last 40 to 60 days, not all consecutively, over the 12- to 18-month duration of the project. During these construction activities, up to an estimated 12 trips by cement trucks for foundation installation, 12 trips by flatbed trucks for delivery of materials, 3 trips for the crane truck and several hundred pick-up truck trips for workers will be required to construct each tower. Construction at towers in the Tucson Border Patrol Station AOR is planned to begin in fall 2017.

The temporary disturbance area will be restored after construction is completed as directed by the land manager. The construction schedule for work at each specific tower has not yet been developed. There will be no night time construction during the period from April 1 to October 1, and nighttime construction during the balance of the construction period is unlikely. There will be no night time operational lighting at the towers.

The Buenos Aires National Wildlife Refuge Manager and the Coronado National Forest Supervisor have both determined that new special use permits will be issued to authorize this action to construct replacement towers on lands they administer. The special use permit for this project has been issued by the Buenos Aires National Wildlife Refuge Manager. This consultation includes issuance of the permit by the Coronado National Forest Supervisor as an element of the proposed action.

CBP has included a number of conservation measures in their proposed action to avoid and minimize adverse effects to U.S. Fish and Wildlife Service trust resources. These include, but are not limited to, the following:

General

1. The government environmental Subject Matter Expert and environmental contract monitor will determine which threatened and endangered species could occur in the vicinity of project activities.

2. To protect individuals of listed species within the project area, suspend work in the immediate vicinity of the individual until it moves out of harm's way on its own, or enlist a qualified specialist (individuals or agency personnel with a permit to handle the species) to relocate the animal to a nearby safe location in accordance with accepted species-handling protocols.

3. CBP will develop (in conjunction with land managers) and implement a training program focusing on Trust Resources for contractor personnel. Training will be provided to all personnel associated with the project before the project begins and before any new personnel begin work on the project. Information presented in the training program will include occurrence of sensitive species in the project area, their general ecology, and sensitivity to human activities; legal protection afforded the species and the penalties for violation of state or Federal laws; implementation of included conservation actions/best management practices; and reporting requirements. Also included in this training program will be color photos of the listed species and maps of federally listed species' habitats. Following the training program, the photos and maps will be posted in the contractor and resident engineer's office, where they will remain through the duration of the project.

4. Check visible space underneath all vehicles and heavy equipment for listed species and other wildlife prior to moving vehicles and equipment at the beginning of each workday and after vehicles have idled for more than 15 minutes.

5. Groundwater or surface water from a treated municipal source will be used when within one-mile habitat for aquatic species.

6. No use of herbicides will be permitted.

7. Contractor shall not drive roads which have become impassable by heavy rains until such roads are repaired.

Migratory Bird BMPs

1. A survey for migratory birds will also be conducted prior to all activities to be implemented during the nesting period in areas where migratory birds might be nesting (February 1 through September 1). If construction is proposed in areas identified by USFWS as suitable breeding habitat for yellow-billed cuckoo, surveys will be conducted using the Halterman et al. (2016) protocol. If an active nest of any migratory bird is found in the Action Area, a buffer zone of 300 feet will be established around the nest and no activities will occur within that zone until nestlings have fledged and abandoned the nest. Confirmation that all young have fledged should be made by qualified personnel.

2. If project activity is scheduled during the migratory bird-nesting season, take steps to prevent migratory birds from establishing nests in the action area. These steps could include covering equipment and structures. Birds can be flushed to prevent them from nesting on the site.

3. If project activities could result in the take (e.g. removal of nest, eggs, and/or fledglings) of a migratory bird; then coordination with the USFWS and/ or the Arizona Game and Fish Department will be required and applicable permits would be obtained prior to project activities.

Species Specific BMPs

<u>Pima Pineapple Cactus</u>

1. No ground disturbance will occur outside the previously disturbed footprint in suitable habitat without further consultation with the USFWS.

2. Within or adjacent to Pima pineapple cactus suitable habitat, to minimize fugitive dust generation, monitor dust during construction, and conduct abatement of fugitive dust when there is a visible plume of dust extending more than 30 feet from the dust source. Abatement would include reducing travel speeds and/or applying dust suppressants, such as water.

<u>Chiricahua Leopard Frog</u>

1. To avoid running over Chiricahua leopard frogs on Highway 286 and Highway 289, construction vehicles will not cross washes when water is flowing along the following portions of these roads: (1) Highway 286 from its junction with Highway 289(Arivaca-Sasabe Road) south for 8.5 miles and (2) Highway 289 from its junction with Highway 286 continuing east for 2.4 miles to the far side of Puertocito Wash.

2. To avoid running over Chiricahua leopard frogs on Tres Boleros and Tres Bellotas Roads, construction vehicles will not travel along designated portions of these roads between July 1st and October 1st, or during rainfall events that occur outside of this time period: Tres Boleros Road within one mile overland distance of Garcia Tank, and Tres Bellotas Road beginning north of TCA-TUS-036 and continuing in a northeast direction to its intersection with Arivaca-Sasabe Road.

3. During the monsoon season, a qualified biologist will monitor the frog-proof fence at tower TCA-TUS-032 and relocate any frogs along this fence to avoid impacts to the species.

4. A site-specific storm water pollution prevention plan (SWPPP) and a spill protection plan will be prepared and regulatory approval sought, as required by regulations. This plan will include, but is not limited to, placing straw bale type sediment traps at the inlet of ponds or stock tanks and upstream of drainages known to be occupied by the species or within critical habitat of the species.

5. To prevent the spread of amphibian diseases among drainages via water or mud on vehicles and equipment, all work within Chiricahua leopard frog Action Area shall conform to amphibian disease prevention protocols as described in the Recovery Plan for the Chiricahua leopard frog (USFWS 2007). Equipment would either be disinfected on-site between uses at different sites or rinsed to remove all dirt and mud and then completely airdried before moving to another site. This measure will not be required for travel along paved routes or portions of Ruby Road that are in the action area, as these routes are heavily traveled by the public and cleaning/sterilization of project vehicles will do little to prevent movement of disease via vehicular travel.

6. Any use or storage of chemicals or fuels will be kept 0.3 miles away from the Chiricahua leopard frog Action Area.

7. Individual animals found in the project area in danger of being harmed will be relocated by a CBP biologist to a nearby safe location in accordance with accepted species handling protocols in Federal and state permits. No animals will be moved to aquatic habitat without prior coordination with the USFWS species lead.

<u>Northern Mexican Gartersnake</u>

1. Within proposed critical habitat for this species, an environmental monitor will be on site during all project activities.

2. Individual animals found in the project area in danger of being harmed will be relocated by a CBP biologist to a nearby safe location in accordance with accepted species handling protocols in Federal and state permits.

Yellow-billed Cuckoo

CBP will avoid all construction traffic and activity at the tower sites and access roads which USFWS has identified as the most likely locations for occupancy by yellow-billed cuckoo.

1. CBP will avoid all construction activity at the following towers and associated access roads from June 1 to September 30: TCA-TUS-35, TCA-TUS-290, and TCA-TUS-287.

2. CBP will avoid all construction activity at TCA-TUS-299 from July 1 to September 30.

3. CBP will conduct cuckoo protocol surveys (Halterman et al. 2016) in drainages bordered by trees within 0.25 miles of tower TCA-TUS-299 from June 1 to June 30. If any cuckoos are located within 0.25 miles of this tower, CBP will engage the USFWS in development of measures necessary to minimize and avoid impacts to the species in these locations.

4. CBP will avoid using Tres Bellotas Road along Fresnal Wash between TCA-TUS-298 and TCA-TUS-036 from June 1 to September 30 to avoid disturbance to cuckoos in suitable habitat.

As part of the proposed action for this project, CBP is working in coordination with the USFWS to develop an interagency agreement with USFWS to provide funding to support high priority activities for conservation and recovery of the Chiricahua leopard frog, yellow-billed cuckoo and northern Mexican gartersnake which may be found in the vicinity of the Action Area of this project.

CONCLUSION

Pima Pineapple Cactus

Environmental Baseline

The Pima pineapple cactus is a low-growing hemispherical cactus that may be found as single or multi-stemmed plants. Adults measure 4-18 inches tall and 3-7 inches in diameter. The spines are stout and arranged in clusters with one central hooked spine and 6-15 radial straight spines. Spines are originally straw colored, but become black with age. Flowers are yellow and the fruit is a green ellipsoid (US Fish and Wildlife Service 2017). The Pima pineapple cactus was listed as endangered without critical habitat throughout the species range on September 23, 1993 (58 FR 49875). This cactus species grows in the transition zone between the semi-desert grasslands and Sonora desert scrub on alluvial bajadas (lower slopes of mountains characterized by loose alluvial sediments and poor soil development) and slopes of less than 10 percent grade at elevations between 2,300 and 4,200 feet above sea level. The U.S. range of the Pima pineapple cactus is bordered by the Baboquivari Mountains to the west, and the Santa Rita Mountains to the east, and extends from the U.S./Mexico border north to the vicinity of Tucson. Individual plants are often widely scattered in low density across the suitable habitat (US Fish and Wildlife Service 2016c). The proposed action includes some areas of occupied Pima pineapple cactus habitat.

Effects of the Proposed Action

Because the proposed action is to replace existing SBInet towers, CBP conducted a previous consultation with the USFWS covering the original construction of the SBInet towers. This consultation was completed in 2008. Known occurrences of Pima pineapple cacti are based on results from the 2008 preconstruction surveys, disturbance at tower sites and temporary impact areas during initial tower construction in 2008 and 2009, and additional surveys in 2017. There are six towers in this project located in suitable Pima pineapple cactus habitat (TUS-035, TUS-041, TUS- 085, TUS-290, TUS-298 and TUS-299). There are no cacti at these tower sites within the fenced enclosure. Pima pineapple cactus located outside of the fenced enclosure, and within the 100 foot by 100-foot temporary impact area could be damaged or destroyed by construction activities during the project. However, during preconstruction surveys for the Tucson West project in 2008, a protocol survey for Pima pineapple cactus only identified the species within the potential construction disturbance footprint at the TUS-290 tower site. Informal surveys for Pima pineapple cactus performed at these six tower sites on May 25, 2017 located no Pima pineapple cactus.

Because the construction of the replacement towers will occur within the existing footprint of the original towers, no Pima pineapple cacti or habitat is expected to result from the proposed action. In addition, CBP has determined that the occurrence of Pima pineapple cacti within the temporary disturbance areas of the original construction that have germinated subsequent to the original construction is extremely unlikely. Impacts to individual plants outside of the temporary impact zone could result from fugitive dust. Because construction and travel will be within existing footprints of the original construction and because of the proposed conservation measures included in the proposed action, it is expected that dust effects will be minimal.

Conclusion

The Service concurs with your determination that the proposed action may affect, but is not likely to adversely affect the Pima pineapple cactus, based upon the following:

- Because the proposed action will occur within areas disturbed by the original tower construction in 2008 and which continue to be disturbed, there is a very low likelihood that Pima pineapple cacti will be affected by the proposed action. Therefore, effects due to trampling or crushing are discountable.
- Effects on Pima pineapple cacti from fugitive dust would be minimized through the use of BMPs. The numbers of individuals that could be impacted is very small. Therefore, such effects will be insignificant.
- During Section 7 consultation on the Tucson West tower project (Consultation #22410-2008-F-0373), CBP agreed to mitigate for all Pima pineapple cactus habitat loss at towers within suitable habitat through purchase of conservation credits at a USFWS-approved conservation bank. In April 2017, CBP delivered a report to USFWS quantifying the impacts to Pima pineapple cactus during tower construction; and in May 2017, USFWS concurred with the analysis of impacts to Pima pineapple cactus as presented in that report. The construction footprint for the Block 1 Replacement Project at towers within the Pima pineapple cactus range is identical to the construction footprint for the initial tower construction. Therefore, any potential impacts to this species arising from this project have

already been fully mitigated.

Chiricahua Leopard Frog and Critical Habitat

Environmental Baseline

The Chiricahua leopard frog is a leopard frog with a distinctive color pattern of small, raised, cream-colored spots on the thigh against a dark background with relatively rough skin on the back and sides, dorsolateral folds that are interrupted and deflected medially, and often green on the head and back. A distinctive call (a snore of 1 to 2 seconds duration) also separates this species from other leopard frogs (US Fish and Wildlife Service 2017).

The Chiricahua leopard frog was listed as threatened on June 13, 2002 (67 FR 40790). The listing was revised and critical habitat was designated for the species in Arizona and New Mexico on March 20, 2012 (77 FR 16324). The 2012 listing re-states the threats to the Chiricahua leopard frog and its habitat throughout its range that were outlined in the 2007 recovery plan for the species: mining, including mining-related contaminants; other contaminants; dams; diversions; stream channelization; groundwater pumping; woodcutting; urban and agricultural development; road construction; grazing by livestock and elk; climate change; and altered fire regimes (USFWS 2007, 2012). Although these threats are widespread and varied, a threats assessment that was accomplished as part of the recovery plan showed chytridiomycosis and predation by nonnative species as consistently more important threats than these habitat-based factors (USFWS 2007, 2012). The Recovery Plan for the species identifies 8 recovery units in Arizona, New Mexico, and Mexico. Each recovery unit has one or more management areas (MAs) within it where the USFWS believes the potential for successful recovery actions is greatest (USFWS 2007).

The range of the Chiricahua leopard frog includes central and southeastern Arizona; west-central and southwestern New Mexico; and in Mexico, northeastern Sonora, the Sierra Madre Occidental of northwestern and west-central Chihuahua, and possibly as far south as northern Durango (USFWS 2007, 2012).Within its geographical range, the Chiricahua leopard frog historically inhabited a variety of aquatic habitats including montane and river valley cienegas, springs, pools, tanks, lakes, reservoirs, streams, and rivers. It is a habitat generalist that historically, but is now limited to the comparatively few aquatic systems that support few or no non-native predators (e.g. American bullfrogs, fishes, and crayfishes) including livestock tanks and some streams. The species also requires permanent or semi-permanent pools for breeding, water characterized by low levels of contaminants and moderate pH, and may be excluded or exhibit periodic die-offs where a pathogenic chytridiomycete fungus is present.

The project area falls within Recovery Unit 1 for the Chiricahua leopard frog, and includes portions of two of the three MAs identified in the recovery plan for this recovery unit: the Buenos Aires Central Tanks MA and Pajarito Wilderness MA. There are also other occupied sites within project area that fall within Recovery Unit 1 but are east of the Buenos Aires Central Tanks MA and north of the Pajarito Wilderness MA.

The Buenos Aires Central Tanks MA continues to support one of the strongest metapopulations known within the range of the species due to the removal of bullfrogs from Buenos Aires National Wildlife

Refuge (BANWR) (USFWS 2011, C. Crawford, pers. comm. 2017). The number of breeding sites in this metapopulation has ranged from 4 to 8 annually since 2011, although the number of breeding sites on BANWR itself has decreased during this time period (C. Crawford, pers. comm. 2017). Chango Tank is one of the seven sites in the MA where breeding was detected in 2016. Garcia Tank at the southern U.S. end of the MA is considered an isolated population and not part of a metapopulation (USFWS 2012). Breeding has not been verified at Garcia Tank since the mid-2000s but frogs were last seen at this site in 2015 (C. Crawford, pers. comm. 2017). There are also 17 lentic sites on BANWR that do not hold water year round but have had records of Chiricahua leopard frogs during the monsoon season when they hold water (C. Crawford, pers. comm. 2017).

The Pajarito Wilderness MA includes two metapopulations of Chiricahua leopard frogs, one of which is in the project vicinity. Bullfrog eradication efforts have occurred and continue to be monitored throughout this MA. The number of breeding sites in the Bonita, Upper Turner, and Mojonera metapopulation in the MA has ranged from 2 to 3 annually since 2011 (C. Crawford, pers. comm. 2017). In 2016 and 2017, Chiricahua leopard frogs were discovered in 4 lentic sites at the northern end of the MA and an additional 3 lentic sites to the north of the MA that likely dispersed from known breeding sites of this metapopulation or from the Buenos Aires Central Tanks metapopulation described in the previous paragraph (C. Crawford, pers. comm. 2017).

Chiricahua leopard frogs routinely disperse during the monsoon season, and are known to move up to one mile overland, 3 miles along intermittent stream channels, and 5 miles along perennial streams from breeding sites they occupy (USFWS 2012). Recent studies of Chiricahua leopard frogs revealed that these frogs will move further than previously thought based on the 1-3-5 rule described above. For instance, Hinderer et al. (2017) found that radio-telemetered adult frogs moved an average of 97 m a day and up to 1,658 m in a day with a maximum total movement of a frog measured at 9,888 m over 36 days. Such movements are likely aided by permanent or ephemeral waters that serve as stepping stones within the landscape.

The primary constituent elements of the physical or biological features essential to the conservation of the Chiricahua leopard frog included in designated critical habitat for the species (US Fish and Wildlife Service 2012) are:

(i) Aquatic breeding habitat and immediately adjacent uplands exhibiting the following characteristics:

(A) Standing bodies of fresh water (with salinities less than 5 parts per thousand, pH greater than or equal to 5.6, and pollutants absent or minimally present), including natural and manmade (e.g., stock) ponds, slow-moving streams or pools within streams, off-channel pools, and other ephemeral or permanent water bodies that typically hold water or rarely dry for more than a month. During periods of drought, or less than average rainfall, these breeding sites may not hold water long enough for individuals to complete metamorphosis, but they would still be considered essential breeding habitat in non-drought years.

(B) Emergent and or submerged vegetation, root masses, undercut banks, fractured rock substrates, or some combination thereof, but emergent vegetation does not completely cover the surface of water bodies.

(C) Nonnative predators (e.g., crayfish (Orconectes virilis), bullfrogs (Lithobates catesbeianus), nonnative predatory fish) absent or occurring at levels that do not preclude presence of the Chiricahua leopard frog.

(D) Absence of chytridiomycosis, or if present, then environmental, physiological, and genetic conditions are such that allow persistence of Chiricahua leopard frogs.

(E) Upland habitats that provide opportunities for foraging and basking that are immediately adjacent to or surrounding breeding aquatic and riparian habitat.

(ii) Dispersal and nonbreeding habitat, consisting of areas with ephemeral (present for only a short time), intermittent, or perennial water that are generally not suitable for breeding, and associated upland or riparian habitat that provides corridors (overland movement or along wetted drainages) for frogs among breeding sites in a metapopulation with the following characteristics:

(A) Are not more than 1.0 mile (1.6 kilometers) overland, 3.0 miles (4.8 kilometers) along ephemeral or intermittent drainages, 5.0 miles (8.0 kilometers) along perennial drainages, or some combination thereof not to exceed 5.0 miles (8.0 kilometers).

(B) In overland and non-wetted corridors, provide some vegetation cover or structural features (e.g., boulders, rocks, organic debris such as downed trees or logs, small mammal burrows, or leaf litter) for shelter, forage, and protection from predators; in wetted corridors, provide some ephemeral, intermittent, or perennial aquatic habitat.

(C) Are free of barriers that block movement by Chiricahua leopard frogs, including, but not limited to: urban, industrial, or agricultural development; reservoirs that are 50 acres (20 hectares) or more in size and contain predatory nonnative fish, bullfrogs, or crayfish; highways that do not include frog fencing and culverts; and walls, major dams, or other structures that physically block movement.

Two critical habitat units within Recovery Unit 1 are located in the project vicinity (see Figure 3). These critical habitat units are: Garcia Tank and Buenos Aires National Wildlife Refuge Central Tanks. Together, these two units comprise 1,721 acres or 16 percent of the designated critical habitat. The Garcia Tank critical habitat unit is within the action area. The portions the Buenos Aires National Wildlife Refuge Central Tanks critical habitat unit within the action area include Chango Tank (PCE1) and Las Moras Wash (PCE2).

Chiricahua leopard frogs are found in other sites within the project area outside of critical habitat. CBP has included a number of conservation measures and BMPs to address potential effects to Chiricahua leopard frogs and designated critical habitat in all areas of the proposed action.

Effects of the Proposed Action

The most likely direct impact to Chiricahua leopard frog would be injury or death from construction vehicle traffic along access roads and at tower sites during the monsoon season (July 1 to October 1) when juvenile and adult Chiricahua leopard frogs move out of perennial lentic sites to adjacent terrestrial habitat or disperse to other perennial or intermittent sites. Two of the nine tower sites and four roads

which will be used for access to tower sites during tower construction activities are located within one mile overland from known occupied sites or they cross intermittent drainages within three miles of occupied sites that are likely used for dispersal by Chiricahua leopard frogs (Cat Crawford, USFWS, personal communication, September 25, 2017). The two tower sites are Tower TCA-TUS-032 and TCA-TUS-299 and the four roads are: (1) Highway 286 from the intersection with Highway 289(Arivaca-Sasabe Road) and south for a distance of 8.5 miles, (2) Highway 289 from the junction with Highway 286 and east for a distance of 2.4 miles to the far side of Puertocito Wash, (3)Tres Boleros Road within one mile overland distance of Garcia Tank, and (4) Tres Bellotas Road beginning north of TCA-TUS-036 and continuing in a northeast direction to its intersection with Arivaca Road. CBP will implement conservation measures or BMPS as outlined in the proposed action above, that will effectively address the potential effect of injury or death from construction vehicle traffic.

Transmission of disease vectors and invasive non-native aquatic species can occur if vehicles cross infected or infested streams or other waters and water or mud remains on the vehicle. If these vehicles subsequently cross or enter uninfected or non-infested waters, the disease or invasive species may be introduced to the new area. Because chytridomycosis is known to occur in Chiricahua leopard frog populations in Recovery Unit 1, necessary precautions will be taken to minimize the likelihood of spreading the disease such as avoiding contact with wetted areas. However, if vehicles or other equipment use will occur in wetted areas (including ponds, impoundments, or ephemeral or permanent streams) that equipment will be a) cleaned of mud and debris and then sprayed with a 10% bleach, 70% ethanol, or 1% quaternary ammonium solution, or b) allowed to dry completely, before moving to another wetted area (see Appendix G of the Chiricahua Leopard Frog Recovery Plan for protocols) (USFWS 2007). Treatments as just described, will not be required for travel along paved routes or portions of Ruby Road that are in the action area, as these routes are heavily traveled by the public and cleaning/sterilization of project vehicles will do little to prevent movement of disease via vehicular travel.

There are two Chiricahua leopard frog critical habitat units within the action area. Chango Tank, Garcia Tank are designated critical habitat for the species and contain PCE1. Las Moras Wash downstream of Chango Tank is also included in critical habitat and contains PCE2. Las Moras Wash is a paved low water crossing on Highway 286. Chango Tank is less than 400 feet overland from Highway 286 and Garcia Tank is less than 1,600 feet from Tres Boleros Road.

Conclusion

We concur with your determination that the proposed action is not likely to adversely affect the Chiricahua leopard frog, nor designated critical habitat for the following reasons:

- CBP will implement conservation measures and BMPs as described above. These measures will reduce potential effects to the Chiricahua leopard frog to insignificant or discountable levels.
- Both Garcia Tank and Chango Tank are located upstream and uphill from project activities. For this reason, there is no pathway by which Block 1 Replacement Project construction activities could directly impact these tanks, and the project would not result in effects that would diminish the value of primary constituent elements within either of the critical habitat units. There are also

no potential effects from the proposed action to PCE 2 in Las Moras Wash where it crosses Highway 286.

Jaguar and Critical Habitat

Environmental Baseline

The jaguar is a large, heavy-bodied, big-headed cat. Yellowish to tawny, spotted with black rosettes or rings in horizontal rows along the back and sides; most rings are tan inside, with 1 or 2 black spots. Legs, head, and tail have smaller, solid spots, usually giving way to incomplete bands near the end of the tail (US Fish and Wildlife Service 2017).

The jaguar was listed as endangered throughout the species range in March 28, 1972 as a foreign species (37 CFR 6476). On July 27, 1997, the jaguar was listed as an endangered species in the United States (62 FR 39147). On March 5, 2014, the USFWS published a final rule to designate critical habitat for the jaguar in southeast Arizona and southwest New Mexico (79 FR 12571). The critical habitat totals approximately 764,207 acres in six units in Pima, Santa Cruz, and Cochise Counties, Arizona, and Hidalgo County, New Mexico.

Jaguars are known from a variety of vegetation communities in North and South America. Range-wide, jaguars are mostly found in tropical and subtropical zones. In the southwestern United States, the more open, dry habitat has been suggested as being marginal in terms of water, cover, and prey densities, although historically there was a presumably larger and naturally breeding population. Jaguar populations in northwestern Mexico and the southwestern United States occur in arid areas, especially thornscrub, mesquite grassland, Madrean oak woodland, and pineoak woodland communities. Based on 25 historical (from 1902 to 2001) reliable and spatially accurate jaguar sighting records in Arizona, the majority of jaguars were observed in scrub grasslands (56%) and
Madrean evergreen forests (20%), all were within 6.2 miles of a water source, and most occurred in moderately rugged to extremely rugged terrain. Additionally, river valleys and other drainage features likely "provide travel corridors for jaguars, along with higher prey densities, cooler air, and denser vegetation than surrounding habitats". In the United States–Mexico borderlands, peccaries (javelina [*Tayassu tajacu*]) and deer (white-tailed [*Odocoileus virginianus*] and mule [*O. hemionus*]) are presumably dietary mainstays; range-wide, the list of prey taken by jaguars includes more than 85 species, including numerous species of turtles, birds, fish, and livestock. Other potential prey species in the southwestern United States include white nosed coatis (*Nasua nasua*), skunk (*Mephitis* spp., *Spilogale gracilis*), raccoon (*Procyon lotor*), and jackrabbit (*Lepus* spp.) (USGS 2016).

The southwestern United States lies at the extreme northern limit of the jaguar's range. An estimated that 21% to 30% of Arizona (23,940–34,200 square miles) is potentially suitable jaguar habitat; however, the species currently occurs on an occasional basis in only a small portion of this area (USGS 2016).

The primary constituent elements of jaguar critical habitat are expansive open spaces in the southwestern United States of at least 38.6 square miles in size that:

1. Provide connectivity to Mexico;
2. Contain adequate levels of native prey species;
3. Include surface water sources available within 12.4 miles of each other;
4. Contain 1% to 50% canopy cover within Madrean evergreen woodland or semidesert grassland vegetation communities;
5. Are characterized by rugged terrain;
6. Are characterized by minimal to no human population density, no major roads, or no stable night time lighting over any 0.4-square-mile area; and
7. Are below 6,562 feet amsl in elevation.

With regard to jaguar critical habitat in the project area, the project is bounded on the west by the Baboquivari Critical Habitat Unit, and on the east by the Atascosa Critical Habitat Unit. There are two towers, TUS-085 and TUS-287, located within approximately 0.5 miles of the Baboquivari Critical Habitat Unit. There are also two towers, TUS-036 and TUS-041, located within approximately 0.5 miles of the Atascosa Critical Habitat Unit. In addition, approximately 4.4 miles of Tres Bellotas Road, which will be used by construction traffic, is located within the Atascosa Critical Habitat Unit. CBP is not constructing any additional roads with the Block 1 Replacement Project.

On December 20, 2016, USFWS released a draft recovery plan for the species. This $605 million recovery plan characterizes jaguar habitat within the US as secondary habitat which is not anticipated to support breeding jaguars. The recovery plan contains a discussion of the value of secondary habitat, in terms of species conservation.

Effects of the Proposed Action

Potential direct impacts on jaguar include the risk of direct injury and mortality from construction vehicles accessing towers, and changes in behavior resulting from noise and other disturbances associated with human presence during tower construction activities. Occurrences of jaguar in the project vicinity are extremely rare. Jaguars have not been located in the project vicinity in a number of years, but a male jaguar recently occupied the Santa Rita Mountains (approximately 25 miles to the northeast of the project area) for an extended period of time. In addition, new jaguars, both males, have been documented within the last year in the Huachuca and Chiricahua mountains. While these new detections are many miles east of the project area, they do provide evidence that habitat connectivity for movement of jaguars into the United States still occurs and that jaguars can occur in any areas of suitable habitat in Arizona, even if they have not been documented there previously. However, due to the rarity of jaguar in the project vicinity, the risk of injury or mortality arising from construction vehicles is unlikely.

Project activities would occur in previously disturbed areas, and would result in no degradation, modification, or habitat fragmentation of undisturbed areas where jaguars potentially occur. The presence of construction crews and equipment, and their associated noise, could cause jaguars to move away from an area or otherwise modify their behavior. Because construction activities would be short term in nature, any displacement or other associated adverse effects would be temporary and minor. As described above, jaguars currently occur at such low densities that the potential for individual jaguars to encounter project activities is extremely unlikely to occur.

There are no Block 1 project towers located within jaguar critical habitat. Construction traffic will use approximately 4.4 miles of existing Tres Bellotas Road to access tower sites. However, because Tres Bellotas and other roads proposed for use during this project are all existing roadways, there is a reduced likelihood that the proposed action will adversely affect the PCEs of jaguar critical habitat.

Conclusion

We have analyzed the effects of the proposed action and concur with the determination that the proposed action may affect, but is not likely to adversely affect jaguars or jaguar critical habitat for the following reasons:

- While jaguars are known to currently occupy areas of southern Arizona, there are no recent records of jaguars in the project vicinity. It is very unlikely that jaguars will be killed or injured by construction traffic associated with the proposed action. Therefore, these effects are discountable.
- All project activities will use existing roadways and stay within the previously disturbed footprint of the tower sites. Therefore, effects to jaguar habitat, including jaguar critical habitat will be insignificant.

Northern Mexican Gartersnake

Environmental Baseline

The northern Mexican gartersnake may occur with other native gartersnake species and can be difficult for people without herpetological expertise to identify. With a maximum known length of 44 inches, it ranges in background color from olive to olive-brown to olive-gray with three stripes that run the length of the body. The middle dorsal stripe is yellow and darkens toward the tail. The pale yellow to light-tan lateral stripes distinguish the Mexican gartersnake from other sympatric (co-occurring) gartersnake species because a portion of the lateral stripe is found on the fourth scale row, while it is confined to lower scale rows for other species. Throughout its range wide distribution, the northern Mexican gartersnake occurs at elevations from 130 to 8,497 feet (Rossman et al.1996, p. 172). The northern Mexican gartersnake is considered a riparian obligate (restricted to riparian areas when not engaged in dispersal behavior) (US Fish and Wildlife Service 2017).

On July 8, 2014, the USFWS issued a final rule listing the northern Mexican gartersnake as threatened throughout the species range (79 FR 38677). On July 10, 2013, critical habitat was proposed for 421,423 acres in Arizona and New Mexico (78 FR 41549).

The northern Mexican gartersnake generally occurs at elevations ranging from 3,000 to 5,000 feet within Arizona and New Mexico. Important components of northern Mexican gartersnake habitat include a stable supply of native prey, and dense vegetation when co-occurring with harmful non-native species. The northern Mexican gartersnake occurs chiefly in the following general habitat types: 1) source-area wetlands (e.g., cienegas), or stock tanks (small earthen impoundment); 2) large river riparian woodlands and forests; and 3) streamside gallery forests (as defined by well-developed broadleaf deciduous riparian

forests with limited, if any, herbaceous ground cover or dense grass) (US Fish and Wildlife Service 2017).

This species occurs in central, western, and southeastern Arizona and extreme southwestern New Mexico. Within Arizona, the most-viable populations occur in the middle and upper Verde River drainage (including Bubbling Ponds State Fish Hatchery along Oak Creek), lower Tonto Creek, the Bill Williams watershed, and within the San Rafael Valley.
Since 1970, there have only been two records of the species in the Action Area vicinity, the most recent being in 2001. However, surveys for northern Mexican gartersnakes have not occurred in this area since approximately the year 2000. The status of the population within the Action Area vicinity remains largely undetermined at this time (Jeff Servoss, USFWS, personal communication, September 29, 2017). If the species persists in the Action Area, it most likely occurs at a very low density and is most-closely associated with the Arivaca Cienega, in the location of a 2001 record.

The primary constituent elements of critical habitat for this species (US Fish and Wildlife Service 2013b) consist of the following:

1. Aquatic or riparian habitat that includes:

   a. Perennial or spatially intermittent streams of low to moderate gradient that possess appropriate amounts of in- channel pools, off-channel pools, or backwater habitat, and that possess a natural, unregulated flow regime that allows for periodic flooding or, if flows are modified or regulated, a flow regime that allows for adequate river functions, such as flows capable of processing sediment loads; or

   b. Lentic wetlands such as livestock tanks, springs, and cienegas; and

   c. Shoreline habitat with adequate organic and inorganic structural complexity to allow for thermoregulation, gestation, shelter, protection from predators, and foraging opportunities (e.g., boulders, rocks, organic debris such as downed trees or logs, debris jams, small mammal burrows, or leaf litter); and

   d. Aquatic habitat with characteristics that support a native amphibian prey base, such as salinities less than 5 parts per thousand, pH greater than or equal to 5.6, and pollutants absent or minimally present at levels that do not affect survival of any age class of the northern Mexican gartersnake or the maintenance of prey populations.

2. Adequate terrestrial space (600 feet [183 meters] lateral extent to either side of bankfull stage) adjacent to designated stream systems with sufficient structural characteristics to support life history functions such as gestation, immigration, emigration, and brumation (extended inactivity).

3. A prey base consisting of viable populations of native amphibian and native fish species.

4. An absence of nonnative fish species of the families Centrarchidae and Ictaluridae, bullfrogs, and/or

crayfish, or occurrence of these nonnative species at low enough levels such that recruitment of northern Mexican gartersnakes and maintenance of viable native fish or soft-rayed, nonnative fish populations (prey) is still occurring.

The only proposed critical habitat unit in the Action Area vicinity is Buenos Aires National Wildlife Refuge (see Figure 4). The entire 117,335-acre refuge has been proposed as critical habitat for the species (US Fish and Wildlife Service 2013b). There are 5 towers located within this critical habitat unit.

Effects of the Proposed Action

Northern Mexican gartersnakes are generally active from March through October in southern Arizona, although they may be active any day of the year when the daily low temperature is above freezing. The species may be active in upland areas (typically within about 600 feet of ephemeral or perennial water sources), but up to one mile or more from a given water body or in and along drainages and depressions during the monsoon season (Jeff Servoss, US Fish and Wildlife Service, personal communication, September 29, 2017). The Block 1 Replacement Project does not involve any actions within 600 feet of perennial water sources. Therefore, any potential direct effects to the species are likely confined to dispersal periods. The most likely direct effect to the species during dispersal periods would be injury or death from construction vehicle traffic along access roads and at tower sites.

The primary constituent elements for northern Mexican gartersnake critical habitat include: aquatic habitat, adequate terrestrial space adjacent to the aquatic habitat to support critical life history functions, an adequate prey base and an absence of invasive species. The Block 1 Replacement Project construction activities are located at least 0.25 miles from any of these primary constituent elements. The construction activities are confined to existing roads and previously disturbed sites. For these reasons, the Block 1 project is unlikely to have any significant effects on primary constituent elements for northern Mexican gartersnake proposed critical habitat.

Conclusion

We have analyzed the effects of the proposed action and concur with your determination that the proposed action may affect, but is not likely to adversely affect, the threatened northern Mexican gartersnake for the following reasons:

- The northern Mexican gartersnake occurs in the action area in very low densities. Potential effects to the gartersnake from road fatalities are discountable.
- CBP will implement conservation measures and BMPs as outlined above. This will reduce other potential effects to an insignificant level.

Yellow-Billed Cuckoo

Environmental Baseline

Yellow-billed cuckoos (or cuckoos) are fairly large, long, and slim birds. The mostly yellow bill is almost

as long as the head, thick and slightly down-curved. Wings appear pointed and swept back in flight. Yellow-billed cuckoos are warm brown above and clean whitish below. Their blackish face mask is accompanied by a yellow eye ring. In flight, the outer part of the wings flash rufous. From below, the tail has wide white bands and narrower black ones.

A western Distinct Population Segment (DPS) of the yellow-billed cuckoo was designated as threatened on October 3, 2014 (USFWS 2013c, 2014c; 78 FR 61622, 79 FR 59992). On August 15, 2014 (79 FR 48547) USFWS proposed 546,335 acres of critical habitat in Arizona, California, Colorado, Idaho, New Mexico, Nevada, Texas, Utah and Wyoming (USFWS 2014b; 79 FR 48548). Following publication of the draft proposed critical habitat rule, cuckoos have been found in previously unknown locations and habitats in Arizona. The largest remaining breeding areas are in southern and central California, Arizona, along the Rio Grande in New Mexico, and in northwestern Mexico (USFWS 2014c; 79 FR 59992).
In Arizona, the species was a common resident in the (chiefly lower) Sonoran zones of southern, central, and western Arizona (Phillips et al. 1964). The yellow-billed cuckoo now nests primarily in the central and southern parts of the state, as well as at revegetation sites along the lower Colorado River (Corman and Magill 2000, McFarland and Horst 2015, 2017; USFWS 2013c, 2014b, 2014c, McNeil et al. 2013).

The western yellow-billed cuckoo breeds in riparian (hydro- and xero- riparian) woodlands, and in Madrean evergreen woodland drainages and mesquite woodlands of arid areas. Habitat conditions are typically cooler and more humid than in the surrounding environment (USFWS 2014b,c). The vegetation making up the breeding habitat of the western yellow-billed cuckoo varies across the species' range and includes native and nonnative -riparian and upland nonriparian species including cottonwood (*Populus* spp.), willow (*Salix* spp.), mesquite (*Prosopis* spp.), box elder (*Acer negundo*), sycamore (*Platanus* spp.), ash (*Fraxinus* ssp.), walnut (*Juglans* spp.), alder (*Alnus* spp.), hackberry (*Celtis spp.*), soapberry (*Sapindus saponaria*), oak (*Quercus* spp.), acacia (*Acacia* spp.), desert willow (*Chilopsis linearis*), elderberry (*Sambuccus mexicanus*), juniper (*Juniperus* spp.), pine (*Pinus* spp.), Russian olive (*Elaeagnus angustifolia*), and tamarisk (*Tamarix* spp.) (Gaines 1974, pp. 7–9; Gaines and Laymon 1984, pp. 59–66; Laymon and Halterman 1989, pp. 274–275; Laymon 1980; Corman and Magill 2000; Dettling and Howell 2011, p. 28; MacFarland and Horst 2015).

In most of the DPS, the western yellow-billed cuckoo primarily breeds in large riparian woodlands dominated by willow and cottonwood along low-gradient rivers and streams, and in open riverine valleys that provide wide floodplain conditions (USFWS 2014a,b). In the Southwest, however, cuckoos can also breed in higher gradient drainages, and narrower and drier reaches of riparian habitat (Corman and Magill 2000;WestLand Resources; Inc. 2013a, 2013b, 2013c, 2015a, 2015b, 2015c; Arizona Game and Fish Department 2016; MacFarland and Horst 2015, 2017; Tucson Audubon 2015; Cornell Lab of Ornithology 2017). Large expanses of gallery riparian woodland habitat supports greater densities of cuckoos than less dense reaches of scattered riparian trees or more xero-riparian woodlands. However, these less dense reaches of scattered riparian trees and more xero-riparian woodlands are also important to yellow-billed cuckoos as nesting substrate, foraging habitat, and as a buffer between more hydric sites and the adjacent, xeric uplands (USFWS 2014b, 2014c; Griffin 2015; Groschupf 2015; McFarland and Horst 2015, 2017). To distinguish between the western yellow-billed cuckoo breeding habitat in riparian areas throughout the range and breeding habitat found in more arid areas of the Southwest, we use the terms "Rangewide" and "Southwestern" breeding habitat, respectively. We describe both the Rangewide and Southwestern breeding habitat below:

Southwestern breeding habitat

Southwestern breeding habitat is located in the Southwestern United States (particularly in Arizona) and is comprised of riparian woodlands, mesquite woodlands, or Madrean evergreen woodlands with a variable overstory canopy and understory component within drainages at least 200 ac (81 ha) in size. In addition to cottonwood, willow, and mesquite, occupied riparian habitat in Arizona may also contain a greater proportion of xero-riparian species than in the rest of the DPS. Oak, hackberry, sycamore, walnut, ash, acacia, tamarisk, and juniper are among the most common xero-riparian species in Southwestern breeding habitat (Corman and Magill 2000, Corman and Wise-Gervais 2005, USFWS unpubl. data). Tamarisk may be a component of breeding habitat, but there is usually a native riparian tree component within the occupied habitat (Gaines and Laymon 1984, Johnson et al. 2008, McNeil et al. 2013, Sechrist et al. 2013, Carstensen et al. 2015). Habitat patches in the arid Southwest contain a greater proportion of xero-riparian and nonriparian tree species than elsewhere in the DPS. Habitat patches are often interspersed with large openings and include narrow stands of trees, small groves of trees, or sparsely scattered trees. As such, the canopy closure is variable, and where trees are sparsely scattered, canopy closure may be dense only at the nest tree. Southwestern breeding habitat types are as follows:

- Riparian woodland is more water-limited, contains a greater proportion of xero-riparian species, and is often narrower, patchier, and sparser than where water is more abundant. This more arid riparian woodland occurs in perennial and intermittent drainages and floodplains throughout the Southwest.
- Mesquite-dominated woodland habitat occurs in floodplains, adjacent terraces, and adjacent uplands in perennial, intermittent, and ephemeral drainages throughout the Southwest.

- Madrean evergreen woodland (usually oak-dominated) habitat occurs in intermittent and ephemeral drainages and adjacent hillsides in the foothills and mountains of southeastern Arizona, up to 7000 ft in elevation. The amount of oak varies and may be interspersed with mesquite and other species in Madrean evergreen woodland.

In addition to the dense nesting grove or tree, often referred to as the core area, western yellow-billed cuckoos need adequate foraging areas near the nest. Foraging areas can be less dense or patchy with lower levels of canopy cover and may be a mix of shrubs, ground cover, and scattered trees (Sechrist et al. 2009, 2013; Carstensen et al. 2015; Griffin 2015; USFWS, unpubl. data). Cuckoos often forage in open areas, woodlands, orchards, and adjacent streams (Hughes 1999), which include stands of smaller mesquite trees and even tamarisk (Rosenberg et al. 1991). In Arizona, adjacent habitat is usually more arid than occupied nesting habitat. This adjacent habitat can be used for foraging where large insects are produced.

Proposed Critical Habitat. There is one unit of proposed yellow-billed cuckoo critical habitat within the Action Area. This critical habitat unit is AZ-23, the Arivaca Wash/San Luis Wash Unit. This 5,765-acre

proposed critical habitat unit is made up of two washes that join to form a 17-mi long continuous segment that is comprised of 9 mi of Arivaca Wash and 8 mi of San Luis Wash. Approximately 1,014 ac, or 18 percent, of proposed unit AZ–23 are privately owned; 89 ac, or 2 percent, are in State ownership and managed by the Arizona State Lands Department; and 4,662 ac, or 81 percent, are in Federal ownership located on the Buenos Aires NWR managed by the U.S. Fish and Wildlife Service. This unit represents about one percent of the 546,335 acres of critical habitat which has been proposed for this species (US Fish and Wildlife Service 2014c).

Towers TCA-TUS-035 and TCA-TUS-290. Within the Arivaca Wash/San Luis Wash proposed critical habitat unit, numerous western yellow-billed cuckoo detections, including pairs, from previous years have been documented by Corman and Magill (2000, pp. 42, 43, 47), Griffin (2015, p. 22), and Cornell Lab of Ornithology (2017, eBird data).
Towers TCA-TUS-035 and TCA-TUS-290 are near occupied cuckoo habitat. Towers TCA-TUS-035 and TCA-TUS-290 are within approximately 0.75 miles from the eastern border of the proposed Arivaca Wash/San Luis Wash Critical Habitat Unit. Tower TCA-TUS-035 is also immediately adjacent to an unnamed drainage bordered by large dense mesquite. This ephemeral drainage flows into Arivaca Wash and may be suitable cuckoo breeding habitat. Habitat surrounding TCA-TUS-290 consists of short stature mesquite and ocotillo. Cuckoos may be foraging in the habitat adjacent to these towers. Within the proposed Arivaca Wash/San Luis Wash Critical Habitat Unit, nine western yellow-billed cuckoo use areas at three sites were identified in the 4.1 km (2.5 mi) surveyed in 2015, including eight pairs (Griffin 2015, p. 22). Breeding was confirmed at all three sites in 2015; Arivaca Cienega, Arivaca Creek–Honnas Pond, and Arivaca Creek (Griffin 2015, p. 19, 22).

Griffin (2015, p. 19) detected most western yellow-billed cuckoos in cottonwood and willow riparian forest and woodland vegetation, but sometimes with ash, hackberry, mesquite and a dense shrub understory. Despite the fact that the riparian vegetation changes from more mesic communities upstream to more xeric communities downstream, western yellow-billed cuckoos likely breed along the entire length of Arivaca Creek. Use areas seemed to include more upland woodland of mesquite than riparian forest vegetation. The three western yellow- billed cuckoo use areas within the Arivaca Cienega site differed in vegetative composition and structure (Griffin 2015, p. 23) and included: (1) a large, low-statured mesquite woodland or “bosque” that included open areas of native grassland and cienega marsh, and a patch of mature cottonwood-willow forest; (2) patches of mature Goodding’s willow, velvet ash, and hackberry-mesquite; and (3) a large patch of cottonwood-willow riparian forest with minor upland woodland components of mesquite, hackberry, and open areas. Other sites within the unit (Arivaca Creek–Honnas Pond, Arivaca Creek) had similar habitat and western yellow-billed cuckoo use.

Tower TCA-TUS-41. Cuckoos have been found during the breeding season along Arivaca Lake and tributaries, with suitable breeding habitat within 0.5 miles of TCA-TUS-41. Sparsely scattered mesquite surround this tower on an elevated site next to a paved and well-used road. The nearest cuckoo detections reported were approximately 0.7, 0.9, and 1.3 miles respectively from TCA-TUS-41 (Cornell Lab of Ornithology 2017). Tucson Audubon detected seven occupied territories with repeated detections, including three pairs, where they surveyed the tributaries and lake in 2015 (MacFarland and Horst 2015, pp. 17–18). The seven territories documented is an underestimate, as only a small portion of suitable habitat was surveyed. Western yellow-billed cuckoos were detected at the lake on every visit during 2015 and habitat surrounding the lake and side canyons is considered highly suitable 2015. Additional records

exist from previous years (Cornell Lab of Ornithology 2017). Habitat is composed of riparian and Madrean evergreen woodland. The overstory vegetation is composed of primarily mesquite, with willow, cottonwood, ash, hackberry, and oak (MacFarland and Horst 2015, p.121).

Cuckoo Detections along Tres Boleros Road and Tres Bellotas Road. Cuckoos have been detected from tower TCA-TUS-287 to TCA-TUS-299 and from TCA-TUS 298 on Tres Boleros Road and on Tres Bellotas Road to TCA-TUS-036 during the breeding season (Cornell Lab of Ornithology 2017). Four detections records exist along Fresnal Wash along the Tres Boleros Road (Cornell Lab of Ornithology 2017). Although the drainages that cross the Tres Boleros and Tres Bellotas Road have not been surveyed, they contain suitable cuckoo habitat.

Tower TCA-TUS-287. Foraging habitat consisting primarily of mesquite appears to be suitable surrounding tower TCA-TUS-287, only 0.2 mile from La Osa Wash. La Osa Wash contains large riparian trees, but no surveys have been conducted.

Tower TCA-TUS-299. This tower is near suitable breeding and foraging habitat. Washes with large riparian trees are within 0.25 miles of this tower. Large mesquite, wolfberry, and hackberry trees occupy these washes.

Towers TCA-TUS-298 and TCA-TUS-036. Tres Bellotas Road meanders within and adjacent to Fresnal Wash, with suitable cuckoo habitat and flowing water inthe drainage. Large ash, willow, mesquite, hackberry, wolfberry, acacia, and walnut trees border the drainage between towers TCA-TUS-0298 and TCA-TUS-036. On October 23, 2017 water was flowing in the wash in reaches where the wash becomes the road and where the wash crosses the road. A manmade pond surrounded by riparian trees within 0.25 miles of tower TCA-TUS-036 may also support breeding cuckoos. Towers TCA-TUS-298 and TCA-TUS-036 are far enough away from suitable breeding habitat in Fresnal Wash that construction is not likely to adversely affect cuckoos at these tower sites, as long as construction traffic avoids the Tres Bellotas Road between these towers from June 1 to September 30. Both of these towers are on elevated sites surrounded by sparse mesquite and oak trees; this habitat may be used as foraging habitat but construction activities are not likely to adversely affect cuckoos. Fresnal Wash has not been surveyed between these two towers and is not visited very often by birders due to its remote location and proximity to the border. However, some cuckoo information does exist for this area. Cuckoo were detected on August 26, 2000 and July 8, 2001 during the breeding season (Cornell Lab of Ornithology 2017). Based on past detections, presence of water, and suitable riparian habitat, Fresnal Wash is considered to be occupied cuckoo breeding habitat.

Western yellow-billed cuckoos have been detected incidentally by birders and refuge staff in suitable breeding habitat in mesquite woodland and Madrean evergreen woodland, sometimes far from mesic drainages, in other parts of the refuge (Griffin 2015, pp. 25, 28; Cornell Lab of Ornithology 2017 (eBird data)).

Effects of the Proposed Action

Yellow-billed cuckoo are reported within Buenos Aires National Wildlife Refuge and the adjacent Coronado National Forest, with recent breeding behavior and nests confirmed (Corman and Magill 2000;

Griffin 2015; MacFarland and Horst 2015, 2017; Cornell Lab of Ornithology 2017). In recent years, cuckoos have been located near the following towers or associated roads: TCA-TUS-035, TCA-TUS-036, TCA-TUS-041, TCA-TUS 290, TCA-TUS 298, and TCA-TUS 299 during the breeding season from June 1 to September 30. In addition, suitable habitat exists near tower TCA-TUS 287.

It is possible that cuckoos could be exposed to noise from Block 1 Replacement Project construction activities. Noise will be generated by both vehicles accessing tower sites and by construction activities at tower sites. Available research indicates that medium and heavy trucks, such as cranes and cement trucks, will generate noise levels in the range of 80 to 85 dBA at speeds less than 35 miles per hour on tower access routes (Minister of Public Works and Government Services, Canada 2001).

As stated in the Section 2.0 of the biological assessment, an estimated 25 to 30 trips by medium to heavy trucks will be required to each tower site. Trips by these medium to heavy trucks will be scattered over the 40 to 60-day construction window at each tower site. The balance of trips along the access roads will be via pick-up truck, which has a noise footprint similar to a majority of the vehicles currently operating in the project vicinity. Cuckoos along these access routes could be exposed to elevated noise levels associated with these medium to heavy trucks for a duration of 30 seconds to 1 minute during each trip to a tower. Therefore, the total exposure of any cuckoos to elevated noise levels along access roads during construction at a tower is estimated to be 30 to 60 minutes. At the tower sites, the medium to heavy vehicles would be in operation for durations ranging from an hour, in the case of delivery of a load of concrete, to several days in the case of tower foundation excavation. Noise levels from operation of these medium to heavy vehicles would be similar to noise levels along access routes. Federal Highway Administration (2006) estimates noise generated by cement trucks at 79 dBA at a distance of 50 feet, and 81 dBA for cranes and excavators at a distance of 50 feet. Operation of these vehicles at tower sites would be scattered over the construction duration. Any cuckoos in the immediate vicinity of towers could be subject to up to several days of elevated noise levels during tower construction. Industrial Noise Control (2017) indicates that 70 decibels is used as a general base of comparison. This level is considered the baseline of normal, everyday activity such as a passenger car driving by or TV/radio music or a vacuum cleaner. Eighty decibels is two times as loud as 70 decibels and 90 decibels is four times as loud as 70 decibels.

The noise generated during the life of the project could result in short term noise exposure to cuckoos along the access roads or in the immediate vicinity of towers. The most commonly recorded response of birds to noise or other human disturbance is flushing. However, researchers have also reported no flushing response from Mexican spotted owls and bald eagles exposed to noise levels twice as loud (92 dBA) as noise levels predicted from the proposed action (Delaney et al. 1999 and Brown et al.1999). Significantly, even when flushing has occurred, researchers have reported no change in either reproductive success or number of young fledged in birds exposed to short term noise events (Delaney et al. 1999 and Delaney et al. 2002). Other authors have reported that exposure to short term noise events does not lead to chronic physiological stress in birds (Bisson et al. 2009 and Tempel 2003). In another study, researchers reported that infrequent and unpredictable vehicle operations in the immediate vicinity of nests was not correlated with the number of young fledged (Hayden et al. 2002).

Towers TCA-TUS-035 and TCA-TUS-290. These two towers are located near proposed yellow-billed cuckoo critical habitat and approximately 2 miles of roads partially located within the proposed yellow-

billed cuckoo critical habitat unit AZ31. Both towers are on elevated locations outside the riparian corridor. Tower TCA-TUS-035 is immediately adjacent to a drainage bordered by large dense mesquite and breeding cuckoos may be affected by construction activity during the breeding season. Construction activity during the breeding season (June 1 through September 30) will be avoided at tower TCA-TUS-035. Tower TCA-TUS-290 is on a hill on the opposite side of a well-used paved road from Aravaipa Creek. This tower is elevated and far enough away from breeding habitat so that construction activity at the tower will likely not adversely affect breeding and foraging cuckoos. However, the access road starts near occupied habitat along Aravaipa Creek and the hundreds of vehicle trips may cause disturbance to breeding and foraging cuckoos.
Tower TCA-TUS-41. Although the nearest cuckoo detections reported were approximately 0.7, 0.9, and 1.3 miles respectively from TCA-TUS-41 (Cornell Lab of Ornithology 2017), this tower is on an elevated site along a paved road that already receives some traffic and construction is not likely to adversely affect cuckoos.

Tower TCA-TUS-287. This tower is only 0.2 mile from La Osa Wash, which contains large riparian trees that may be breeding habitat. Construction activity may adversely affect breeding and foraging cuckoos. Construction activity during the breeding season (June 1 through September 30) will be avoided at this tower.

Tower TCA-TUS-299. This tower is near suitable breeding and foraging habitat and construction activities may advserely affect breeding cuckoos. Construction activities will be avoided during part of the breeding season (July 1 through September 30) and protocol surveys will be conducted from June 1 through June 30 at this tower.

Towers TCA-TUS-298 and TCA-TUS-036. These towers are far enough away from suitable breeding habitat in Fresnal Wash that construction is not likely to affect cuckoos at these tower sites, but the Tres Bellotas Road between these towers is in and adjacent to suitable cuckoo habitat. The hundreds of additional vehicles traveling between these two towers during the breeding season would create additional noise and visual disturbance that would likely adversely affect cuckoos using habitat along the Tres Bellotas Road and in Fresnal Wash. CBP will avoid using Tres Bellotas Road along Fresnal Wash between TCA-TUS-298 and TCA-TUS-036 from June 1 to September 30 to avoid disturbance to cuckoos in suitable habitat.

Conclusion

We have analyzed the effects of the proposed action and concur with your determination that the proposed action may affect, but is not likely to adversely affect, the western yellow-billed cuckoo for the following reasons:

- The tower sites where construction of replacement towers will generally occur are in areas of raised topography and not within drainages where western yellow-billed cuckoos typically breed. In addition, although cuckoo upland foraging habitat is adjacent to some tower sites, the tower site footprints do not contain upland foraging habitat. In addition, as discussed above, CBP has proposed conservation measures and best management practices to avoid or reduce disturbance

effects to cuckoos in suitable breeding habitat and adjacent foraging habitat within 0.25 miles of the tower sites. Therefore, effects to yellow billed cuckoos from disturbance associated with tower construction will be insignificant.

- A number of roadways proposed for use during this project do occur along drainages or in other areas that support suitable western yellow-billed cuckoo habitat. CBP has proposed conservation measures and BMPs to avoid and minimize disturbance of cuckoos in these areas. Therefore, these effects will be insignificant.

Thank you for your continued coordination related to this consultation. No further section 7 consultation is required for this project at this time. Should project plans change, or if additional information on the distribution or abundance of listed species or critical habitat becomes available, this determination may need to be reconsidered. Additionally, we encourage you to coordinate the review of this project with the Arizona Fish and Game Department and the appropriate land management agencies and private landowners.

For further information please contact Scott Richardson (520) 670-6150(x242). Please refer to the consultation number, 02EAAZ00-2018-I-0091 in future correspondence concerning this project.

Sincerely,

Steven L. Spangle

Good morning Scott:

We at CBP Office of Acquisition ENV are ready to answer and clarify any information in the Block 1 Replacement Project Tucson Station Area of Responsibility (TUS-1) Section 7 Consultation BA sent to FWS 10/10/2017.

As we all recognize the time crunch coming at the end of October, CBP staff is ready to get on the phone with you and your staff anytime to clarify and answer questions on information in the Final BA.

Thank you again for the effort and agency cooperation shown by you and your staff. Again please call me if you need anything to assist in your review and concurrence by the end of the month.

Hi (b)(6), (b)(7)(C)

Wanted to update you on where we are with this consultation. I am still waiting to get a response from a couple of staff members on the final BA. I have a few comments and questions as I looked it over. Cat should be forwarding you her comments today. I should be forwarding any remaining comments by Friday. If you all can respond or give us the thumbs up on the information and comments we provide you, we will start working on this next week. if everyone is on the same page by early next week, I think we can have this wrapped up by Monday, the 30th. There are a number of projects ahead of this, but the most pressing of these should be wrapped up this week or early next week, giving us time to work on this.

> I just wanted to let you know that while we have not received additional comments from Cat on the CLF we have instituted BMPs for the frog that should provide safeguards for the species during the Block 1 Replacement Project that was discussed in our meetings with your staff September 26 and 27, 2017.

Based on our meetings and discussed in CBP's October 10, 2017 Block 1 Replacement Project BA for the Tucson Station AoR we have proposed the following BMPs for the CLF:

"Towers TUS-032 and TUS-300 are located approximately 0.5 miles north of Chango Tank. Available information indicates that although Chango Tank does not contain a resident population of frogs, because it is not a perennial water source, it may be seasonally occupied by the species. In order to prevent any frogs at Chango Tank from moving into the construction areas around towers TUS-032 and TUS-300, a frog-proof fence will be installed to prevent access into this tower construction area. This fence will be installed prior to construction and removed after construction activities are complete. During construction at this tower site, a biological monitor will be present to ensure the fence remains effectively in place, and to relocate any frogs from the fence perimeter, if required.

Garcia Tank is located approximately 0.25 miles north of Tres Boleros Road Between towers TUS-298 and TUS-299. Available information indicates that successful reproduction has occurred at this tank in the past. During the monsoon season, frogs could move down the drainage and cross Tres Boleros Road.

In addition, USFWS reports that frogs also occupy perennial waters outside of critical habitat extending along Tres Boleros Road from Garcia Tank and along Tres Bellotas Road all the way to its intersection with paved Ruby Road. In order to ensure there is no impact of Block 1 construction traffic on any frogs along Tres Boleros Road, there will be no construction traffic on the section of Tres Boleros and Tres Bellotas Roads extending from TUS-298 northeast to Ruby Road during the monsoon season from July 1 to October 1."

Because of the tight time frame CBP has for initiating the Block 1 Replacement Project in Tucson AoR beginning November 1, 2017 if FWS has additional information on the CLF that CBP needs to consider please contact me as soon as possible.

Thanks again for your consideration and assistance with this critical border security project.

Thanks for the follow-up call and email. Playing catch-up after having been out of the office for over a week, so not sure yet when we will jump into this. I will at least have us take a look at what you have provided and make sure we have what we need to get started and let you know sooner rather than later if we still need anything. Just based on current workload issues, I am thinking we will need the full 30 days that statute allows us, but we will shoot for sooner. I will let you know in more detail early next week what things look like on our end.

Thanks (b)(6), (b)(7)(C),

Scott

>
> 1. Comment/Response matrix: to help you with what changes were made in out BA submittal this week attached in the responses to FWS comments on the Draft BA. This way you do not have to shift through other files to determine the CBP response and changes resulting in the Final BA.
>
> 2. Technology Difference in SBInet and current IFT:
> As explained in the biological assessment, the primary reason for this project is to reduce operational costs and increase tower capacity. CBP estimates that annual operation costs could be reduced by as much as 80-90% when the IFT technology is deployed. A number of the sensor towers are nearing capacity, and CBP wants the flexibility to deploy additional technology to defeat evolving border security threats.
>
> The technology on these towers is constantly evolving. For example, the IFT provides a constant 360 degree radar vs the current sweep radar in SBInet. The cameras in IFT will be upgraded to HD. The HD cameras will add pixels which will improve image quality. That said, because cameras and radar operate on line-of-sight, there will be no change in area or range of coverage by IFT technology. For this reason, CBP does not anticipate IFT deployment will lead to any measurable change in border patrol operations.
>
> Scott, as stated in the BA cover letter CBP appreciates a priority review of

the BA. All avoidance measures discussed with staff in our face to face meetings 9/26 and 27 and in subsequent follow-up emails have been incorporated.
Please contact me if we need to discuss.

Hello,

Attached are the notes from the AD Staff Meeting for Monday, September 18, 2017.

The following item was added after the meeting from the Chief of Staff:

The Department has developed a rack card that lists the Secretary's priorities, which are:

1. Create a conservation stewardship legacy, second only to Teddy Roosevelt
2. Sustainably develop our energy & natural resources
3. Restore trust & be a good neighbor
4. Ensure Tribal sovereignty means something
5. Increase revenues to support DOI and national interests
6. Protect our people and the border
7. Strike a regulatory balance
8. Modernize our infrastructure
9. Reorganize DOI for the next 100 years
10. Achieving our goals, leading our team forward

cheers,

Michael

AD Meeting Notes
09.18.17

Introductions: Benjamin Tuggle, Assistant Director for Science Applications, is in town to meet with staff and Greg Sheehan. John Klavitter on an ALDP detail is here representing WSFR. Paul Rauch is in a Departmental meeting on grants with Greg Sheehan. Steve Delahanty is acting Deputy Assistant Director for Science Applications as part of the ALDP program. Deb Rocque is the Deputy Regional Director for the Northeast Region, who is hear opening up the Project Leaders meeting. Eleanora Babij, Branch Chief in International Affairs, is acting for Gloria.

Director's Office

The ADs have received the new DOI Strategic Plan, which requires surname from the ADs affected. Gary Frazer is working on the Agency Priority Goals related to ESA.

The Secretary's Top 10 Priorities list is being incorporated into a new format. Feedback from DOI involved implementation of ESA. Assignment is due Wednesday.

Secretarial Order 3355 on Hunting and Fishing has been released, which has a list of tasks for FWS.

On the new Secretarial Order on NEPA, there's a team working on the FWS vision for EA streamlining.

Migratory Birds

Last week, the 2017 Duck Stamp Contest was hosted in Wisconsin at Stevens Point. Bob Hopman was the prize with a picture of a mallard.

Jerome's son did good in football.

International Affairs

This morning, there was an interagency meeting for Ramsar (i.e., wetlands of international importance).

Refuge System

Working on OMB briefs. We need to firm up Greg's schedule in the morning for the walk-about in Refuges and the Region 5 Project Leader meeting.

External Affairs

Banner on the FWS.gov home page is themed around hunting. We will be working with the Regions to solicit stories. There's an event today on the Hill for an estuary expo. There's a follow up meeting with Senator McConnell's staff that has been scheduled.

Fisheries & Aquatic Conservation

Two OMB briefings this week, and a meeting FWP on the Atlantic Menhaden catch issue.

Office of Law Enforcement

Also have OMB briefings and a meeting with contractors related to the Wildlife Inspector staffing model.

IRTM and BPHC

Nothing to report on the IT front. There is a meeting this afternoon regarding E-Perform. Charisa will follow up with Ken on the need for follow-up meetings. There are 260 outstanding IT trainings, but likely a DOI Learn issue.

WSFR

Paul Rauch is attending a Departmental meeting about grants management today, where new guidance for FY18 grants management will be discussed.

WSFR has provided feedback to an exercise from DOI to incorporate Secretarial priorities into grants.

Ecological Services

They are working with the Solicitor's Office on a declaration related court ordered deadlines. Gary gave an update on wolf recovery issues.

Science Applications

There's a meeting this afternoon with Greg Sheehan, and an OMB briefing later this week on the Science Applications program. There's a discussion with USGS later this week on joint science activities.

Business and Management Operations

Closing out end of fiscal year issues. Also meeting with the Directorates for the 1616 reductions. There is a proposal where DOI would ask a safety review of supplemental hazards, but there's likely a price tag associated with it.

Chief of Staff

Reminder: there is a Directorate VTC on Tuesday at at 2:00p.m.

International travel has to be approved by FWP.

An in-person Directorate meeting is planned for the week after Thanksgiving at Headquarters.

The Department has developed a rack card that lists the Secretary's priorities, which are:

1. Create a conservation stewardship legacy, second only to Teddy Roosevelt
2. Sustainably develop our energy & natural resources
3. Restore trust & be a good neighbor
4. Ensure Tribal sovereignty means something
5. Increase revenues to support DOI and national interests
6. Protect our people and the border
7. Strike a regulatory balance
8. Modernize our infrastructure
9. Reorganize DOI for the next 100 years
10. Achieving our goals, leading our team forward

All,

I've been asked by FWS DRLE HQ to be a co-project leader for Border Strategic Plan the other co-project leader, Gary Krauss, will be traveling to the Tucson area the 1st week of April for an orientation of FWS border tracts in the Tucson AOR. We are looking at the 3,4, and 5th to visit San Bernardino/Leslie Canyon, Buenos Aires, and Cabeza Prieta NWR's in no particular order.

Part of the project is to look at communication gaps, intelligence gaps, inter-agency agreements, local agreements, working relationships with outside agencies etc...

I am hoping that, if your schedule permits, that you would be available to meet with us to discuss these issues.

The project will be focused solely on law enforcement and not environmental impacts and concerns.

To Whom It May Concern:

Pursuant to the Freedom of Information Act, I hereby request the following records:

Please provide all emails, including attachments, exchanged between Amy Lueders or Joy Nicholopoulos and any Department of Interior employees with emails ending in "@ios.doi.gov".

Please constrain the search between January 20th, 2017 and the processing date of this request.

The requested documents will be made available to the general public, and this request is not being made for commercial purposes.

In the event that there are fees, I would be grateful if you would inform me of the total charges in advance of fulfilling my request. I would prefer the request filled electronically, by e-mail attachment if available or CD-ROM if not.

Thank you in advance for your anticipated cooperation in this matter. I look forward to receiving your response to this request within 20 business days, as the statute requires.

Sincerely,

Charlie Spatz

From: Interior, Secretary
To: doi_all_employees@doi.gov
Subject: 9/11
Date: Monday, September 11, 2017 8:35:49 AM

Dear Team:

Most everyone remembers where they were on 9/11. I was in Coronado, California, as a BUD/S Instructor, training future Navy SEALs. As the news showed pictures of the horror and devastation, it became clear to me that the world as we all knew it would change. I immediately knew those young men I was training would have very different careers in the SEALs than I had.

That day, terrorists flew two planes into the World Trade Center in New York City and another into the Pentagon in Washington, DC. Their collective actions killed almost 3,000 people.

A fourth flight, Flight 93 from New York to San Francisco, crashed into a field near Shanksville, Pennsylvania. Instead of letting the terrorists reach their destination, likely our Nation's Capital, the crew and passengers fought back. In the direst of circumstances, they summoned
the courage to rush the cockpit and change the course of history. Today, I am with Vice President Mike Pence to attend a remembrance ceremony for those 40 heroes from Flight 93 and all the victims of 9/11.

One of those heroes from Flight 93 was a U.S. Fish and Wildlife Service (FWS) employee, Richard Guadagno. After the crash, it was impossible to recover almost anything that was on the plane. A month later, however, investigators were searching the crash site, and there it was—Mr. Guadagno's FWS badge, fully intact and resting in a nearby tree. Yesterday, I saw his badge on display at the Memorial's Visitor Center.

It reminded me of the service and sacrifice made by thousands of Department of the Interior employees to this day. From first responders to Hurricanes Harvey and Irma, to firefighters across the West and everyone in between, let me say that your bravery and dedication is awe-inspiring. The whole Nation is grateful for your lifesaving work. Unfortunately, our job is not over. We will continue to be asked to serve the citizens of our great Nation as we recover from Hurricanes Harvey and Irma, fight wildfires across the West, and prepare for more hurricanes on the way.

When tragedy strikes, Americans mourn as one people, under one flag. An attack on one of us is an attack on us all. Today, we come together to grieve with those who lost loved ones that fateful day, and to pledge never to forget September 11, 2001. Let our constant vigilance in the face of our enemies serve as a testament to the unshakable resolve of our great Nation.

Secretary Ryan K. Zinke

Subject: 2018 National Police Week: Honoring Interior"s Law Enforcement Officers
Date: Tuesday, May 8, 2018 12:32:12 PM
Attachments: DOI email header.png

Quality law enforcement is the backbone of a Nation of laws. Our great law enforcement officers deserve our deepest appreciation. In 1962, May 15 was designated as Peace Officers Memorial Day and that entire week as National Police Week—a time to recognize all law enforcement officers. This year National Police Week will be May 13-19. The week is an opportunity to honor our Nation's law enforcement officers and express our gratitude for their service.

Since the Department of the Interior's (Department) founding in 1849, we have lost 139 law enforcement officers in the line of duty. While we were fortunate to have not experienced the loss of any of our officers this past year, we stand in solidarity with our Tribal counterparts of the Navajo Nation and the Yakama Nation, who memorialized Officer Houston Largo and Game Warden Nelson Onepennee this year on the Indian Country Law Enforcement Memorial in Artesia, New Mexico. It is important that we do not forget their names, lives, families, or ultimate sacrifice.

Please join me in honoring our Department's brave officers during our annual Law Enforcement Officer Memorial Ceremony. The event is:

- Monday, May 14, 2018 at 11 a.m.
- Sidney R. Yates Auditorium, Main Interior Building
- For those unable to attend, watch the event at http://www.doi.gov/live

Everywhere I travel on lands managed by the Department, I am impressed by the breadth of the activities carried out by our law enforcement officers. Our far-reaching and unique mission means our law enforcement officers must possess a wide range of knowledge and skills that often extend far beyond typical law enforcement duties. As police officers, rangers, wildlife refuge officers, and special agents, they may frequently work alone, patrolling vast lands. They may be called on to render emergency medical care, investigate complex resource crimes, perform harrowing technical rescues, and engage in proactive community policing. They work alongside their Federal, State, local, and Tribal counterparts, who collectively support efforts to protect our lands and to keep our communities safe.

I am honored to recognize the Department's thousands of permanent and seasonal law enforcement officers, who tirelessly protect our treasured lands and keep the public safe. Their commitment to the mission and to the American people is deeply appreciated.

To all of our law enforcement officers, thank you for the difficult and courageous work you do every day.

Sincerely,
Secretary Zinke

Subject:	Accountability in the Work Place
Date:	Monday, May 14, 2018 2:13:06 PM

PLEASE FORWARD TO ALL MANAGERS AND SUPERVISORS IN YOUR REGION/PROGRAM.

Memorandum

May 14, 2018

To: All Managers and Supervisors, U.S. Fish and Wildlife Service

From: Senior Advisor to the Secretary, Exercising the Authority of the Assistant Secretary for Fish and Wildlife and Parks

/s/ Susan Combs

Subject: Accountability in the Work Place

The Department administered a work environment survey in 2017. Unfortunately, the results of the survey of FWS employees showed that many employees reported experiencing harassment in the workplace. The survey results also indicated that many employees did not trust management to address incidents of workplace harassment. This is unacceptable. We owe our employees a safe and civil place to work. Effectively leading and managing people is key to the health of any organization and FWS cannot create effective change without your leadership. I wanted to take this opportunity to communicate my expectations of you as leaders, managers, supervisors and change agents.

Accountability in an organization is essential. Accountability ensures that employees answer to their supervisors for their actions and that supervisors behave responsibly as well. I expect you to hold your employees accountable for both poor performance and misconduct. When you observe, or are notified of, allegations of misconduct, you must act promptly to investigate those allegations in a neutral, thorough and fair manner that is consistent with agency policies and guidance. When misconduct is supported by the facts, you must appropriately discipline the wrong-doer. You also must keep your upper-level managers apprised of your actions. A manager or supervisor performing at the "Fully Successful" level does not allow friendships with subordinate staff to influence decision-making when holding employees accountable for misconduct. Employees notice when issues are ignored which, in

turn, breeds mistrust in the workforce. We must gain the respect and trust of our employees by taking decisive, yet appropriate, action.

With respect to performance, you must ensure that the standards of performance are aligned with the Service's mission and goals. When performance deficiencies are observed, you must not delay in taking appropriate action. I expect you to utilize the resources of the Office of Human Resources and the Office of the Solicitor when taking disciplinary and performance-based actions to ensure that policy and regulations are followed and your actions are defensible.

An effective manager and supervisor is aware of the day-to-day activities of the organizational unit that they supervise, so that they can observe first-hand if any employee's performance or conduct is not what one should expect of a government employee. I expect you to conduct town hall-style meetings with your staff on a regular basis to take the pulse of your office or unit. We can only fix problems if we know about them. As a manager or supervisor, you are responsible for ensuring that your office or unit has a healthy climate and culture.

Leading people also means providing clear guidance and boundaries to your employees. An effective manager will have transparent office policies and procedures that are applied fairly and equitably to all employees. I expect you to develop and communicate clearly and often the processes and procedures that govern the activities of your respective offices.

By policy, managers and supervisors must comply with merit system principles, anti-harassment, anti-discrimination and equal employment opportunity obligations, and effectively manage ethics, conduct and performance issues. You are required to understand your obligations as managers and supervisors in each of these critical areas. You should immediately familiarize yourself with the Department's new harassing conduct policy, Personnel Bulletin 18-01, and ensure you comply with the requirements and guidance contained in those documents. If you determine that there are knowledge gaps in your office or unit on these topics, I expect you to arrange training for yourself and your employees so that you and your staff have a clear understanding of your obligations. You will be held accountable for any failure to promptly and appropriately address any performance and conduct deficiencies of your subordinates. Needless to say, it is unacceptable to retaliate against those who pursue their rights under anti-discrimination and anti-harassment policies, or who report supervisor misconduct and, substantiated retaliation will result in disciplinary action.

I am confident that all of you will rise to the challenge and make FWS a better workplace for everyone. Please encourage your employees to complete the Federal Employee Viewpoint Survey so that we can see how we are doing. Should you have any questions about my expectations, feel free to contact me to discuss your questions or concerns. I appreciate all that you do for FWS and the American people.

Bcc: doi_all_employees@doi.gov
Subject: Don"t forget to take the Federal Employee Viewpoint Survey
Date: Wednesday, May 30, 2018 10:33:36 AM
Attachments: DOI email header.png

Interior Team,

One of my highest priorities is ensuring that you are empowered in your positions to best serve the American people. To achieve this mission, I strongly encourage you to complete the 2018 Federal Employee Viewpoint Survey (FEVS) so Department leadership can ensure that we are meeting your needs.

The FEVS data informs the Government-wide Best Places to Work rankings. In 2017, among large Agencies, the Department of the Interior was ranked ninth. I want the Department to be number one!

The Office of Personnel Management administers the survey, which began May 2, 2018, and concludes June 15, 2018. All career permanent employees who were on board as of October 31, 2017, are eligible to participate in the survey. You should have received an email invitation to take the confidential survey.

Please take the time to provide your feedback. We are listening to your voices. By completing the survey, all of us can come together to make the Department the best place to work in the Federal Government. The results from the survey will be available this fall.

Thank you for your dedication and passion in carrying out the Department's vital missions. I appreciate all that you do.

Sincerely,
Secretary Zinke

Subject: Follow-up to meeting with AZ Secretary of Agriculture and NV Director of Agriculture
Date: Tuesday, February 13, 2018 10:10:15 AM

Hello Amy,
Hope all is well and life is good! So glad to have a great contact at FWS!!

Secretary Mark Killian (AZ) and Director Witte (NV) were in DC recently and met with me and my Director of Intergov & External Todd Wynn. He wants to set up a meeting to address the following:

Director Witte from New Mexico and I would like to set up a time to schedule a wolf meeting in either Apache County or Catron County with your boss in the next few months. We would like to have this be a private meeting with the ranchers and citizens that have been impacted by the Mexican Wolf program.

Leatta McLaughlin of his office exploring dates in late March and early April for the meeting in Apache County. They would also like to engage the FS along with FWS & BLM.

Could you please give me a call (202) 821-9410 at your earliest convenience to discuss?

Thanks much!!
Cynthia

Hello,

Attached are the notes from the AD Staff Meeting for Monday, September 18, 2017.

The following item was added after the meeting from the Chief of Staff:

The Department has developed a rack card that lists the Secretary's priorities, which are:

1. Create a conservation stewardship legacy, second only to Teddy Roosevelt
2. Sustainably develop our energy & natural resources
3. Restore trust & be a good neighbor
4. Ensure Tribal sovereignty means something
5. Increase revenues to support DOI and national interests
6. Protect our people and the border
7. Strike a regulatory balance
8. Modernize our infrastructure
9. Reorganize DOI for the next 100 years
10. Achieving our goals, leading our team forward

cheers,

Michael

AD Meeting Notes
09.18.17

Introductions: Benjamin Tuggle, Assistant Director for Science Applications, is in town to meet with staff and Greg Sheehan. John Klavitter on an ALDP detail is here representing WSFR. Paul Rauch is in a Departmental meeting on grants with Greg Sheehan. Steve Delahanty is acting Deputy Assistant Director for Science Applications as part of the ALDP program. Deb Rocque is the Deputy Regional Director for the Northeast Region, who is hear opening up the Project Leaders meeting. Eleanora Babij, Branch Chief in International Affairs, is acting for Gloria.

Director's Office

The ADs have received the new DOI Strategic Plan, which requires surname from the ADs affected. Gary Frazer is working on the Agency Priority Goals related to ESA.

The Secretary's Top 10 Priorities list is being incorporated into a new format. Feedback from DOI involved implementation of ESA. Assignment is due Wednesday.

Secretarial Order 3355 on Hunting and Fishing has been released, which has a list of tasks for FWS.

On the new Secretarial Order on NEPA, there's a team working on the FWS vision for EA streamlining.

Migratory Birds

Last week, the 2017 Duck Stamp Contest was hosted in Wisconsin at Stevens Point. Bob Hopman was the prize with a picture of a mallard.

Jerome's son did good in football.

International Affairs

This morning, there was an interagency meeting for Ramsar (i.e., wetlands of international importance).

Refuge System

Working on OMB briefs. We need to firm up Greg's schedule in the morning for the walk-about in Refuges and the Region 5 Project Leader meeting.

External Affairs

Banner on the FWS.gov home page is themed around hunting. We will be working with the Regions to solicit stories. There's an event today on the Hill for an estuary expo. There's a follow up meeting with Senator McConnell's staff that has been scheduled.

Fisheries & Aquatic Conservation

Two OMB briefings this week, and a meeting FWP on the Atlantic Menhaden catch issue.

Office of Law Enforcement

Also have OMB briefings and a meeting with contractors related to the Wildlife Inspector staffing model.

IRTM and BPHC

Nothing to report on the IT front. There is a meeting this afternoon regarding E-Perform. Charisa will follow up with Ken on the need for follow-up meetings. There are 260 outstanding IT trainings, but likely a DOI Learn issue.

WSFR

Paul Rauch is attending a Departmental meeting about grants management today, where new guidance for FY18 grants management will be discussed.

WSFR has provided feedback to an exercise from DOI to incorporate Secretarial priorities into grants.

Ecological Services

They are working with the Solicitor's Office on a declaration related court ordered deadlines. Gary gave an update on wolf recovery issues.

Science Applications

There's a meeting this afternoon with Greg Sheehan, and an OMB briefing later this week on the Science Applications program. There's a discussion with USGS later this week on joint science activities.

Business and Management Operations

Closing out end of fiscal year issues. Also meeting with the Directorates for the 1616 reductions. There is a proposal where DOI would ask a safety review of supplemental hazards, but there's likely a price tag associated with it.

Chief of Staff

Reminder: there is a Directorate VTC on Tuesday at at 2:00p.m.

International travel has to be approved by FWP.

An in-person Directorate meeting is planned for the week after Thanksgiving at Headquarters.

The Department has developed a rack card that lists the Secretary's priorities, which are:

1. Create a conservation stewardship legacy, second only to Teddy Roosevelt
2. Sustainably develop our energy & natural resources
3. Restore trust & be a good neighbor
4. Ensure Tribal sovereignty means something
5. Increase revenues to support DOI and national interests
6. Protect our people and the border
7. Strike a regulatory balance
8. Modernize our infrastructure
9. Reorganize DOI for the next 100 years
10. Achieving our goals, leading our team forward

> **Subject:** calculation of acreage under Texas Conservation Plan for the dunes sagebrush lizard
>
> Mr. Sheehan,
>
> We spoke a few months ago about the dunes sagebrush lizard (DSL) and its history of

attempted regulation under the Endangered Species Act. As we discussed, I serve as the General Counsel at the Texas Public Policy Foundation (TPPF). TPPF is a non-profit, non-partisan research institute based in Austin, Texas. The Foundation's mission is to promote and defend liberty, personal responsibility, and free enterprise in Texas and the nation by educating and affecting policymakers and the Texas public policy debate with academically sound research and outreach. One of our research centers focuses on energy and environmental regulatory policymaking, including the Endangered Species Act (ESA). In 2012, TPPF was active as an advocate for limited government, Tenth Amendment principles in support of the creation of the Texas Conservation Plan (TCP) in lieu of ESA listing of the DSL.

As you are aware, considerable attention has been focused recently on both the DSL and TCP due to the growth of the frac-sand mining industry in the Permian Basin area. Part of the recent public discussion has involved debate over the amount of acreage currently and potentially impacted and the correct methodology to calculate impacted acreage under the Texas Conservation Plan. As you undoubtedly know, the TCP is the agreed upon document supported by USFWS, the participants, and the Texas Comptroller and has been subsequently twice upheld by the D.C. Circuit Court (September 30, 2014) and the U.S. Court of Appeals for the D.C. Circuit (March 1, 2016).

In its July 2017, Report, Bio-West reported 2,378 acres of surface disturbances occurring in DSL habitat by oil and gas development (attached, p. 11-12). Bio-West is the TCP administrator contracted by the Texas Comptroller, the permit holder for the TCP. As reported by Texas State University, this calculation appears based upon extension of the New Mexico lizard habitat model. http://www.txstate.edu/news/news_releases/news_archive/2017/February-2017/SagebrushLizard022117.html. However, the TCP does not follow the New Mexico DSL habitat model approach. Instead as set forth in the TCP section 12.2 (page 76), the TCP calculates impacted acreage under the “Tiered Buffer Approach.” “Because of the scientific uncertainty and lack of research specifically related to what buffer distances would benefit the DSL, the stakeholders determined that a tiered buffer coupled with tiered mitigation would maximize mitigation in a practical and flexible approach.” (TCP Section 12.2, p. 76). The TCP Tiered Buffer Approach accounts for decreasing indirect effects on the DSL with increasing distance from DLS habitat. If the impact is outside of DSL habitat but within 200 meters of habitat, the acreage of impact is multiplied by the appropriate equivalence factor. Under the TCP, these impacts are quantified during an on-site Impact Assessment on a case-by-case basis (*see* TCP, Appendix F). However, page 3 of Bio-West’s July Report references utilization of a 200 meter buffer of the Habitat Management Units that treat all area within the buffer as impacted. This is the New Mexico model, not the Tiered Buffer Approach. Based on our calculations, accounting for the TCP Tiered Buffer Approach, instead of the New Mexico model, would reduce Bio-West’s estimate in its July 2017, Report of surface disturbances caused by oil and gas from 2,378 acres to 1,775 acres. Our concern is that Bio-West’s use of the improper metric will result in faulty data relied upon as true, which may undermine future defense of the TCP. I would appreciate USFWS’ opinion on whether Bio-West’s July 2017, Report applies the correct standard for calculating impacted acreage under the TCP.

On a related issue, the Texas Comptroller's office in June 2017, published a presentation on *Recent Developments in the Texas Conservation Plan*. In describing the potential impact of frac-sand mining operations, the Texas Comptroller's office published the following chart (attached) that approximates impacted area apparently as the total acreage utilized over the lifetime of the mining operation and excludes any reclaimed area. These totals have been reported as allegedly showing that sand mining operations would exceed the acreage allowed under the TCP. However, the actual impacted area will only grow over the next years and decades if the projections are correct (also depending upon application of the correct model). I would also appreciate USFWS's opinion on: in the event frac-sand mining operations are admitted under the TCP, is impacted acreage calculated under the TCP based upon actual disturbed area on an annual basis or based upon the total acreage controlled by a sand mining operation?

As you can see, the correct application of the TCP assessment of impacted DSL habitat will significantly influence the correct calculation of utilized and available acreage available under the TCP. The Foundation desires to see the TCP correctly administered. To the extent that any ambiguities exist, it may be proper for USFWS to address the proper interpretation and methodology under the TCP. I appreciate your consideration and would welcome the opportunity to discuss further if you have any questions.

Sincerely,

Rob Henneke

Susan Combs, Senior Advisor to the Secretary of the Interior Exercising the Authority of the Assistant Secretary for Fish and Wildlife and Parks and lead for DOI Reorganization, will hold all-employee listening sessions in CO, NM, and WY to discuss the proposed DOI reorganization. Here are the dates, times, and locations for each session.

Denver, CO: **Monday April 30, 2018, 9:00 am**

Interior Business Center Campus, Building 7401, Durango/Telluride Room, 7401 W Mansfield Ave, Lakewood, CO 80235

Albuquerque, NM: Tuesday May 1, 2018, 11:30 am

Southwestern Indian Polytechnic Institute (SIPI) Auditorium, 9169 Coors Boulevard NW, Albuquerque, NM 87120

Cheyenne, WY: Thursday May 3, 2018, 12:30 pm

BLM Wyoming State Office, 5353 Yellowstone Road, Cheyenne, WY 82009

You are encouraged to attend a session near you to hear about the Department of the Interior's proposed reorganization and ask questions. Information about DOI's reorganization effort can be found online at: https://www.doi.gov/employees/reorg.

Noreen and Matt -- There will be more to come on this, but I just want to alert you to this event that will be likely occurring in Lakewood (at the IBC facility) for all employees to share info/feedback to Susan on Monday April 30th. She may have an SES meeting as well on Monday or a different day that week.

Also, she needs someone to drive her to Cheyenne on Thursday for another meeting she is having there with BLM and other DOI bureaus. Would we have someone who could do that and possibly able to bend her ear during that ride?

Amy/Anne -- For Abq, that session is tentatively planned for Tuesday and BIA is hosting it.

Joy is working on some of the logistics and I will share them as we hear more.

Thanks,
Janine

To: Brian Steed <bsteed@blm.gov>, Joy Nicholopoulos <joy_nicholopoulos@fws.gov>, Tasha Robbins <tasha_robbins@ios.doi.gov>

Dear Mr. Steed:

I have been asked to serve as the Senior Advisor to the Secretary, Exercising the Authority of the Assistant Secretary for Fish and Wildlife and Parks. I am still serving as the lead for the Department of the Interior (DOI) reorganization. In that role, I am planning a listening session tour of the west the first week of May where I will meet with DOI employees in

Denver/Lakewood, CO; Albuquerque, NM; and Cheyenne, WY, to discuss reorganization.

I am requesting your assistance to host a meeting in Cheyenne, Wyoming on Thursday, May 3 for DOI employees in the area. I request that each listening session for employees begin at 1pm-3:30pm local time and last approximately 2 ½ hours. At these meetings, I will present information on the reorganization for about 20 minutes, and then begin a Q&A session with employees for no more than an hour. I ask that you make available 2 employees to take notes of all of the questions asked at the meeting. I will post those questions and answers on the DOI Reorganization web page after I conclude the May listening tour. Please note that I will remain at the meeting locations to informally interact with DOI employees for 30 minutes – 1 hour after the formal Q&A session.

If you have questions or need additional information about the listening sessions, please contact Joy Nicholopoulos (Joy_Nicholopoulos@fws.gov). Please respond to this e-mail message and copy Tasha Robbins (Tasha_Robbins @ios.doi.gov) to provide me with a local point of contact (the person who will be assisting with the logistics for the local listening session) by close of business April 23, 2018.

Thank you in advance,

Susan

Subject: Happy 159th birthday Theodore Roosevelt
Date: Friday, October 27, 2017 8:50:50 AM

Mail from the U.S. Department of the Interior

In Happy birthday, President Theodore Roosevelt! In the 159 years since Roosevelt was born, his name has become symbolic of our deep commitment to our public lands and a belief in the American conservation ethic.

Often called a "force of nature," his legendary courage and powerful conservation legacy continue to influence lawmakers and provide an example for all nations. His felt passionately about the outdoors and advocated for our national treasures to be managed "for the benefit and enjoyment of the people." As Roosevelt once said, “It is not what we have that will make us a great nation; it is the way in which we use it.”

Join Secretary Zinke and all of Interior as we celebrate the life of a great man who enshrined an appreciation of our nation’s greatest treasures: our public lands.

Thanks for watching!

Subject: Inspector General Semi-Annual Report
Date: Wednesday, May 30, 2018 1:27:21 PM
Attachments: DOI email header.png

Interior Team,

Last December, I explained that one of the responsibilities of the Office of Inspector General (OIG) is to summarize its work every 6 months in a report to Congress. Here is the link to the most recent Semi-Annual Report to Congress issued by the OIG: https://www.doioig.gov/reports/april-2018-semiannual-report-congress

The report linked here presents the work conducted by the OIG in the past 6 months, as well as statistical information about the breadth and results of that work. If, after reading this report, you have comments to share with the OIG, please do so at communications@doioig.gov.

As I mentioned in my first message to employees after arriving at the Department, the Principles of Ethical Conduct of Government Employees includes an obligation to disclose waste, fraud, abuse, and corruption to appropriate authorities, which includes the Office of the Inspector General. Therefore, if you have concerns about fraud, waste, abuse, or mismanagement in Department and its programs and operations, you may report those through the OIG Hotline at https://www.doioig.gov/complaints/complaint-hotline.

Thank you,
Deputy Secretary David Bernhardt

THE DEPUTY SECRETARY OF THE INTERIOR
WASHINGTON

DEC 04 2017

Memorandum

To: All Senior Executives

From: Deputy Secretary

Subject: Senior Executive Service Management

One of my responsibilities as Deputy Secretary is to serve as Chair of the Executive Resources Board (ERB). As I have examined our processes, consulted with the Office of Personnel Management (OPM), and requested that the Secretary reconstitute the membership of the ERB to adopt best practices, I thought it would be useful to share my understanding of the role the Senior Executive Service (SES) plays in leading the Department.

As many of you no doubt know, the SES was established by Title IV of the Civil Service Reform Act (CSRA) of 1978 (P.L. 95-454, October 13, 1978). In CSRA, Congress stated that

> a Senior Executive Service should be established to provide the flexibility needed by agencies to recruit and retain the highly competent and qualified executives needed to provide more effective management of agencies and their functions, and the more expeditious administration of the public business.

The purpose of the SES is "to ensure that the executive management of the Government of the United States is responsive to the needs, policies, and goals of the Nation and otherwise is of the highest quality."

Specifically, CSRA explained that the SES shall be administered so as to:

> "(1) provide for a compensation system, including salaries, benefits, and incentives, and for other conditions of employment, designed to attract and retain highly competent senior executives;
> "(2) ensure that compensation, retention, and tenure are contingent on executive success which is measured on the basis of individual and organizational performance (including such factors as improvements in efficiency, productivity, quality of work or service, cost efficiency, and timeliness of performance and success in meeting equal employment opportunity goals);
> "(3) assure that senior executives are accountable and responsible for the effectiveness and productivity of employees under them;
> "(4) recognize exceptional accomplishment;
> "(5) enable the head of an agency to reassign senior executives to best accomplish the agency's mission;

"(6) provide for severance pay, early retirement, and placement assistance for senior executives who are removed from the Senior Executive Service for nondisciplinary reasons;
"(7) protect senior executives from arbitrary or capricious actions;
"(8) provide for program continuity and policy advocacy in the management of public programs;
"(9) maintain a merit personnel system free of prohibited personnel practices;
"(10) ensure accountability for honest, economical, and efficient Government;
"(11) ensure compliance with all applicable civil service laws, rules, and regulations, including those related to equal employment opportunity, political activity, and conflicts of interest;
"(12) provide for the initial and continuing systematic development of highly competent senior executives;
"(13) provide for an executive system which is guided by the public interest and free from improper political interference; and
"(14) appoint career executives to fill Senior Executive Service positions to the extent practicable, consistent with the effective and efficient implementation of agency policies and responsibilities.

(Civil Service Reform Act of 1978, Pub. L. No. 95-454, § 402, 92 Stat. 111 (1978)). I have attached the CSRA to this memo for your own review.

These are the principles Congress gave the Secretary to manage SES employees within the Department, and they are the factors that will serve as the basis for the decisions made by the ERB during my tenure as Chair.

As I have spent time visiting with experts within OPM, it is clear that talent management and succession planning are crucial to the development of an effective SES corps. Managing talent within the SES ranks ensures an agency has a qualified pool of executives who have the leadership and managerial expertise to occupy any number of different executive positions based on the needs of the organization. Developing the best leadership talent is essential, not just to support agency strategic planning, but to contribute to a thriving, sustained performance culture in the Federal workforce.

The rotation of the SES corps through a variety of leadership positions has been recognized as an effective method of strengthening leadership and executive skills. Indeed, the Obama Administration issued Executive Order (EO) 13714 on December 25, 2015, on "Strengthening the Senior Executive Service." The EO required agencies to develop plans to increase the number of SES members who are rotated to different assignments "to improve talent development, mission delivery, and collaboration." The EO acknowledged the Federal Government's interest in "cultivating generalist executives with broad and diverse experiences who can lead a variety of organizations." The EO established an annual Government-wide goal, beginning in Fiscal Year 2017, of rotating at least 15 percent of SES members to different departments, agencies, subcomponents, functional areas, sectors, and non-Federal partners. In its 2016 guidance to implementing the SES rotations requirement, OPM identified executive reassignment and transfers as two options for implementing SES rotations.

I have been informed that during the Obama Administration, there were 140 SES reassignments at the Department, albeit with very modest mobility of the SES across bureaus. From my perspective, the lack of mobility can contribute to a siloed, bureau-centric approach to management. Although a long length of service in one position can be a management strength as it allows for the development of technical expertise and continuity, it can also inhibit the transfer of fresh management concepts among bureaus and offices.

It is my view that potentially greater cross-bureau collaboration and innovation can be achieved by bringing new leadership perspectives to our operations by rotating SES members from bureaus to headquarters, from headquarters to the field, and across different functional areas and disciplines. Going forward, I will seek to strike a balance between leadership continuity and achieving fresh perspective by reassigning SES employees across bureaus and offices.

I also intend to focus on strengthening executive accountability to ensure the growth and health of our organization. I was recently informed that 98 percent of our SES members within the Department received either an outstanding (Level 5 rating) or exceeds fully successful (Level 4 rating) performance rating for the prior year's rating. Each of you should be proud of your membership in the SES and your accomplishments as executives.

I look forward to working with each of you. Thank you for your service.

From: Secretary, Deputy
Bcc: doi_all_employees@doi.gov
Subject: Month Two Message
Date: Friday, September 22, 2017 1:33:31 PM
Attachments: DOI email header.png

To: All Department of the Interior Employees

From: David L. Bernhardt, Deputy Secretary

Subject: Month Two Message

A little over a month ago, I wrote to all of you on my first day as Deputy Secretary. Shortly thereafter we established an electronic "ideas" box, and the comments, ideas, and suggestions came rolling in. I want to thank you for your willingness to be thoughtful and candid with your input. Some of the ideas have already served to trigger action.

Many of your comments have educated me on particular issues that I might not have fully appreciated without them. For example, I was a couple steps behind the Secretary in recognizing that it is time for the uniforms to be updated. Your comments have reinforced the very real need of doing so. In addition, I am working to find a realistic means to raise the purchase card limits. I am undeterred, but I expect that we will need to rely on help from Congress. Consequently, that will require more steps to accomplish than I initially hoped.

In my first message to you, I reiterated the basic principle that public service is a public trust and to remind everyone of the basic premise of our Federal service and to confirm my expectation that employees abide by it.

After my first month as Deputy Secretary, and after reading certain comments I am troubled that there is not a universal sense in the Department of the Interior (Department) that those few employees who have failed to uphold these standards are appropriately being held accountable. Please be assured, that I am committed to ensuring that leaders at all levels of the Department are, themselves, ensuring that legally sound, measured, and decisive action is being taken. I want this message to be clear: it is the duty of managers to promptly and effectively take the necessary steps to resolve such issues when they arise.

I also want to convey that we can only take action when we are aware of misconduct. Such awareness often ultimately depends on an employee's willingness to come forward. Despite the official duty articulated in the principles of ethical conduct that "[e]mployees shall disclose waste, fraud, abuse, and corruption to appropriate authorities," many might find it difficult to report misconduct because of a belief that nothing will be done or perhaps due to a fear of retaliation.

Therefore, it is important for you to know that reports of misconduct are taken seriously and that action is taken in a timely manner when appropriate. To that end, I will share the results of two Inspector General investigations that began with a report of employee misconduct and

which resulted in accountability. In one case, the allegations concerned former Bureau of Land Management Office of Law Enforcement Supervisory Agent Dan Love's misuse of his position for personal gain, securing privileges for both himself and family members, and misuse of Government equipment for personal purposes. The Department recently removed Mr. Love from Federal service. In the other, the allegations involved reports that former National Park Service Chief Ranger at Canaveral National Seashore, Edwin Correa, made unwanted sexual advances and inappropriate comments towards subordinates. The Department removed Mr. Correa as well.

I share these examples because you need to know that your leadership is listening. We will hold people accountable when we are informed that they have failed in their duties and obligations.

Although the law in large part prevents dissemination of the details of actions taken, I am sharing these examples because you need to know that the Department has taken concrete disciplinary action in cases of serious misconduct, including those involving senior officials. This message is part of our commitment to be vigilant and tireless in its pursuit of an environment in which employees treat each other in a manner that is consistent with the law and in which there are consequences for failing to do so.

Finally, as it is vitally important for the health of the Department that employees disclose misconduct they witness or experience, the Department is committed to protecting those who step forward from retaliation. Therefore, I will also make this clear: the Department must be free from any retaliation or reprisal for reports of misconduct and I expect every leader to ensure this.

Moreover, it goes without saying that we must remember to treat each other, as well as members of the public, with dignity and fairness. Supervisors should recognize the contributions of deserving employees and have the courage to address the failings of those that fall short of meeting expectations.

I look forward to continuing to work with all of you to further improve the Department and fulfill its important missions. Please keep sending me "ideas;" I will continue to review them.

Sincerely,
Deputy Secretary David Bernhardt

Subject: New Anti-Harassment Policy
Date: Monday, April 23, 2018 1:32:25 PM
Attachments: DOI email header.png

Interior Team,

In December, I told you that, during my tenure as Secretary, we had begun taking a more aggressive stance against employees who engage in misconduct, including taking action against senior leaders for harassment or other inappropriate misconduct. I have made it clear to my management team that we have to take decisive action to hold employees accountable for misconduct. That decisive action includes removing employees when necessary. Since last December, agency management has been following my lead by aggressively tackling the harassment problem through discipline. My management team has also encouraged the Office of the Inspector General to open investigations into other claims that were brought to our attention. I want you to know that discrimination, harassment, and intimidation will find no quarter under my command.

Deputy Secretary David Bernhardt and I also directed that each Bureau develop an action plan to address its own specific harassment-related issues. Since that time, we have worked with Bureaus to achieve this goal and have finalized a new, comprehensive anti-harassment policy for the Department.

The policy enshrines our commitment to providing a work environment free from harassment by ensuring that appropriate officials are notified of, and can properly stop, harassing conduct. It also holds employees accountable at the earliest possible stage, before the conduct rises to the level of illegal harassment. The requirements laid out in the policy for both employee conduct and manager responsibilities take strong steps toward rooting out harassment at all levels of the Department.

Overall, my philosophy has been that “one-size-fits-all” ends up working for no one. Instead of a top-down approach, we solicited individual Bureau plans; we took this approach because we recognize that different Bureaus face different challenges. Employee feedback was critical in developing our final product.

To ensure that we effect real, lasting change, we will continue to monitor each Bureau’s efforts, so we can hold everyone, from senior leaders on down, accountable. This is a long-overdue culture change at Interior.

It is not enough to simply say that we want things to change. Past leaders have done that, only to watch as the problem persisted. By contrast, we have already taken a number of actions to back up our words on this topic. These include training nearly 100 employee relations and employment law practitioners on best practices for investigations of misconduct; issuing a guide on administrative investigations; and creating and updating an employee webpage with dedicated resources. You can visit that webpage at https://www.doi.gov/employees/anti-harassment/personnel-bulletin-18-01.

Management has a duty to act. If you report harassment, your voice will be heard. You should not

have to suffer silently—afraid of retaliation or isolation—when you are just trying to do your job.

How we implement our new policy will have a direct effect on the quality of our work environment here at the Department. That is why the Deputy Secretary and I are deeply committed to this effort. As I have said before, I want Interior to be the best possible place to work in the Government. Today is a major step toward making that vision a reality.

Thank you for your cooperation throughout this process,
Secretary Zinke

Memorandum

To: All Department of the Interior Employees

From: Deputy Secretary

Subject: Office of the Inspector General

As many of you know, the Office of Inspector General (OIG) was established in 1978 to create objective units –

> (1) to conduct and supervise audits and investigations relating to the programs and operations of the Department of the Interior and other agencies;
>
> (2) to provide leadership and coordination and recommend policies for activities designed
>
> > (A) to promote economy, efficiency, and effectiveness in the administration
> > of, and
> >
> > (B) to prevent and detect fraud and abuse in, such programs and operations; and
>
> (3) to provide a means for keeping the head of the establishment and the Congress fully and currently informed about problems and deficiencies relating to the administration of such programs and operations and the necessity for and progress of corrective action.

As one of its responsibilities, the OIG must summarize its work every 6 months in a report to Congress. Here is the link to the most recent Semi-Annual Report to Congress issued by the OIG: Semiannual Report to Congress.

Most Department of the Interior (Department) employees probably have little interaction with the OIG. Others may have read media coverage that refers to OIG reports, but may not be familiar with the extent of OIG's work.

The report linked here presents the most significant work conducted by the OIG in the past 6 months, as well as statistical information about the breadth and results of that work. If, after reading this report, you have comments to share with the OIG, please do so at communications@doioig.gov.

As I mentioned in my first message to employees after arriving at the Department, the

THE DEPUTY SECRETARY OF THE INTERIOR
WASHINGTON

DEC 17 2017

Memorandum

To: All Department of the Interior Employees

From: Deputy Secretary

Subject: Office of the Inspector General

As many of you know, the Office of Inspector General (OIG) was established in 1978 to create objective units –

(1) to conduct and supervise audits and investigations relating to the programs and operations of the Department of the Interior and other agencies;

(2) to provide leadership and coordination and recommend policies for activities designed

(A) to promote economy, efficiency, and effectiveness in the administration of, and

(B) to prevent and detect fraud and abuse in, such programs and operations; and

(3) to provide a means for keeping the head of the establishment and the Congress fully and currently informed about problems and deficiencies relating to the administration of such programs and operations and the necessity for and progress of corrective action.

As one of its responsibilities, the OIG must summarize its work every 6 months in a report to Congress. Here is the link to the most recent Semi-Annual Report to Congress issued by the OIG: Semiannual Report to Congress

https://www.doioig.gov/sites/doioig.gov/files/U.S.%20Department%20of%20the%20Interior%20Office%20of%20Inspector%20General%20October%202017%20Semiannual%20Report%20to%20Congress_1.pdf

Most Department of the Interior (Department) employees probably have little interaction with the OIG. Others may have read media coverage that refers to OIG reports, but may not be familiar with the extent of OIG's work.

The report linked here presents the most significant work conducted by the OIG in the past 6 months, as well as statistical information about the breadth and results of that work. If, after reading this report, you have comments to share with the OIG, please do so at communications@doioig.gov.

As I mentioned in my first message to employees after arriving at the Department, the Principles of Ethical Conduct of Government Employees includes an obligation to disclose waste, fraud, abuse, and corruption to appropriate authorities, which includes the Office of the Inspector General. Therefore, if you have concerns about fraud, waste, abuse, or mismanagement in Department and its programs and operations, you may report those through the OIG Hotline at https://www.doioig.gov/complaints/complaint-hotline.

Attachments:	2018 Draft Agenda 100 Year Summit.pdf

All,

Thank you for being so patient and understanding with our office regarding the planning and logistical aspects of next month's summit. Once again, if you are receiving this email the Secretary has officially invited you to attend the Planning for the Next 100 Years.

Your attendance at the summit is assumed and this invitation is not transferable. However, there may be situations where an individual cannot attend , for example, if an individual is retiring or has an unexpected emergency. In such a case their replacement or acting SES official is expected to attend in their place. Please forward the name, title and contact information of the acting employee.

Attached you will find a copy of the tentative agenda. Please note that as this is a draft copy, the details are subject to change. Each of you will receive a final summit agenda upon check-in at the summit. All additional documents and information relating to the agenda will also be included in the welcome packet.

Please note that the summit begins at 8:30AM on Wednesday, January 10th and concludes the following day, Thursday, January 11th at 11:30AM. Please ensure that all travel arrangements booked to meet the timeline above. Each summit attendee is responsible for the coordination of all necessary travel needs.

Please contact myself at the information below or Caroline Boulton at Caroline_Boulton@ios.doi.gov regarding any of the information listed above. The Secretary looks forward to seeing you all next month and hopes that each of you have a very Merry Christmas and a Happy New Year. See you next year!

Thank you,

Wesley Bullock

No worries! Hope you were in a delightful place having loads of fun!!!!

Wonderful to hear this is scheduled.! Looping in Dep. Asst. Secretary Aurelia Skipwith for awareness.

Also, we met with a number of NM County Commissioners this morning and the Mexican Gray Wolf issue came up again. I mentioned this meeting was in he works and they were very interested. Should I point them in your direction for fur her information?

Best,
Cynthia

Subject: FWS participation at Lake Mead site visit?
To: Scott Cameron <scott_cameron@ios.doi.gov>
Cc: Shawn Buckner <shawn_buckner@ios.doi.gov>

Hi Scott,

Karen Vargas, NV AIS Coordinator, inquired whether FWS will attend the Lake Mead meeting.

FWS handles the Quagga/Zebra Action Plan (QZAP) funding for NV's Lake Mead aquatic invasive species program. At least a majority of the funding and the rest is provided by NPS at Lake Mead. One of the issues that states and FWS raised is that FWS is helping to annually offset costs of the NPS program on Lake Mead, via the state of NV. Those QZAP dollars could be going to another priority in the West, if NPS was able to make additional investments in its program.

Stewart Jacks, Region 2 Assistant Regional Director, or Barak Shemai, Region 2, AIS Coordinator may be good to invite.

Would you like to reach out to Aurelia and Greg and see if they would like FWS-Region 2 representation at this meeting?

I previously emailed Aurelia about FWP participation, but wasn't explicit about FWS representation.

Hilary

Good morning Charisa and Randy,

Earth X is having an exhibition on April 20-22 in Dallas, TX. There will be senior level DOI officials participating at this event and an expected 100,000+ people, over 900 exhibitions, and 260 speakers throughout the weekend. Jason Funes, DOI's Intergovernmental and External Affairs, is coordinating DOI's participation and looking to have NPS and FWS represented at the Event with booths and displays.

Event: Earth X
Location: Fair Park in Dallas, Texas
Date: April 20-22
Space: Each exhibition space (NPS & FWS) for this event would be 10ft x 10ft.
https://earthx.org/about-us/

Could you please provide a point of contact within NPS & FWS that could help coordinate setting up booths at this event - by April 3rd? I greatly appreciate your assistance.

Subject: Secretary Zinke Honors Veterans
Date: Monday, November 13, 2017 11:58:13 AM

Mail from the U.S. Department of the Interior

This weekend, at battlefields, cemeteries and memorials across the country, Americans paid tribute to our nation's veterans. Secretary Zinke began the weekend with a visit to Manassas National Battlefield Park in Virginia on Friday, where he toured the battlefield and helped local Boy Scouts rebuild a historic fence.

Secretary Zinke posing with Boy Scouts at Manassas National Battlefield Park.

The Vietnam Veterans Memorial on the National Mall in Washington, D.C., is one of the most famous and moving memorials ever built to honor veterans. Early in the morning on Veterans Day, Vice President Pence, Second Lady Karen Pence, and Secretary Zinke joined volunteers and National Park Service staff to wash the Wall.

Vice President Pence, Secretary Zinke, and Second Lady Karen Pence cleaning the Vietnam Veterans Memorial.

Later, Secretary Zinke participated in events at Arlington National Cemetery and the World War II Memorial.

Secretary Zinke observes Vice President Pence and Veterans Affairs Secretary Shulkin

laying a wreath at the Tomb of the Unknown Soldier at Arlington National Cemetery.

Secretary Zinke lays a wreath at the World War II Memorial.

He also spoke at the Veterans Day event at the Vietnam Veterans Memorial, thanking fellow veterans for their service and sacrifice and recognizing a recent $40,000 donation by American Legion Riders from Butler County, Pennsylvania. Read the Secretary's Op-Ed in the Philadelphia Inquirer thanking the veterans who gave their time and money to maintain the Wall.

Secretary Zinke at the Vietnam Veterans Memorial on Veterans Day.

The last event of the emotional day was at the Korean War Veterans Memorial, where Secretary Zinke spoke about the lasting friendship between American and South Korean service members forged on the battlefields of what many refer to as the "forgotten war."

Secretary Zinke speaking at the Korean War Veterans Memorial.

Thanks for supporting our veterans.

Subject: Strengthening and Expanding the Department of the Interior's Ethics Program
Date: Monday, April 9, 2018 10:53:57 AM
Attachments: DOI email header.png

On my first day in office, I sent a message to all of you emphasizing my belief that each of us who chooses to work at the Department of the Interior does so because we believe in serving the American people, love the Department's mission, and want to make it better. Since that time, the correctness of my view has been demonstrated over and over by our employees' actions.

At the same time, since I arrived to serve as Chief Operating Officer of the Department, I have also seen far too many reports from the Office of Inspector General of specific instances where employees have made decisions that were unethical and in some cases illegal. As I said on my day of arrival, such conduct reflects on all who work at the Department, whether we like that this is the case or not.

In addition, we currently operate in a world where hyperbole and false allegations now can pass for fact in public discourse. Such comments denigrate even lawful and appropriate conduct that is mischaracterized outside of the Department as unlawful or unethical.

Therefore, when confronted with a moment that creates a questionable issue, we can—and should—remember the ethical principles I have previously shared with you AND consult with the appropriate ethics official. Contact information for Bureau ethics officials can be found at https://www.doi.gov/ethics/bem and for the Departmental Ethics Office at https://www.doi.gov/ethics/contact-information.

It is important to remember that, in terms of the Standards of Ethical Conduct for Employees of the Executive Branch, you are operating in safe harbor if: you communicate with your ethics official, you provide them with the totality of the circumstances you are aware of, and they provide you guidance that you follow. No one else in the Department can give you a safe harbor–not your supervisor, not a lawyer in the Office of the Solicitor, not me.

One way the Secretary and I can assist you in this effort to foster ethical conduct is to help ensure that we have more people in place to address questions and develop sound ethical practices throughout the Department. That is why I am extremely pleased to announce two major additions to the Departmental Ethics Office: Scott de la Vega and Heather Gottry.

Scott de la Vega will serve as both Director of the Departmental Ethics Office and Designated Agency Ethics Official. Heather Gottry will serve as a Deputy Director of

the Departmental Ethics Office. Both of these individuals bring decades of subject-matter expertise and real-world experience in establishing and implementing robust ethics programs fully compliant with all laws, rules, and regulations. Both Scott and Heather start on April 16.

Prior to joining the Department, Scott de la Vega served for several years in various senior legal positions at the White House, including as Ethics Counsel to the Vice President and in the Office of the White House Counsel as well as Managing Counsel for Operations in the Executive Office of the President. In these roles, he oversaw the ethics review and financial disclosure clearance process for all White House officials; directly counseled senior White House staff, Cabinet officials, and nominees seeking Senate confirmation; formulated Administration policy on ethics issues; and recruited the best ethics lawyers from across the Government while increasing diversity. In his White House role, he also worked directly with senior leadership across the Executive Branch, including the Office of Government Ethics and the Office of Special Counsel. Prior to the White House, Scott served in leadership positions at other Federal agencies, as Vice President and Senior Counsel at two Fortune 500 corporations, and as both a trial and appellate criminal litigator in the U.S. Army's Judge Advocate General's Corps.

Immediately prior to joining the Department, Heather Gottry held senior ethics roles at the
U.S. International Trade Commission and the U.S. Commodity Futures Trading Commission. From 2009 through 2012, she worked in the Office of White House Counsel as Associate Counsel to the President and as an ethics advisor. In her White House roles, she created highly regarded trainings for White House officials on a wide variety of ethics-related issues, including misuse of Government position, travel, gifts, entertainment, political activities, outside employment, and post-Government employment; successfully resolved difficult, complex, and novel ethics issues for Cabinet Secretaries; and developed innovative public-private partnerships that were also completely compliant with all applicable laws, rules, and regulations.

In addition, Ed McDonnell will continue to serve as a Deputy Director of the Departmental Ethics Office and as Alternate Designated Agency Ethics Official. The Executive Resources Board recently elevated this role to the rank of Senior Level, and I greatly appreciate Ed's willingness to continue advancing the highest ethical standards throughout the Department. I would also like to take this opportunity to thank Ed for serving honorably in an acting capacity as Designated Agency Ethics Official since the retirement of former Director and former Designated Agency Ethics Official Melinda Loftin.

From my perspective, each of these individuals embody the best and brightest in ethics. Hiring and promoting them to their respective new roles is part of our real commitment to make a meaningful contribution to incorporating the highest ethical standards into the Department's practices.

Let's never forget that public service is a public trust and that the 14 basic principles of ethical conduct bind us all. You can find these principles at the website of the Departmental Ethics Office: https://www.doi.gov/ethics/basic-obligations-of-public-service.

Thank you,
Deputy Secretary David Bernhardt

Good afternoon,

I wanted to officially share with you FWS's latest guidance on the application of the new M-Opinion on the Migratory Bird Treaty Act. By now I'm sure you all have seen this memo. If you have question please give me a holler. I probably won't know the answer, but do know people who do.

We are currently having discussions about holding a short meeting here in DC on this M-Opinion and answer questions for the land managing agencies. I will let you know if we get something set up. If you all would be interested let me know.

Thanks,

Bud

Subject:	Fwd: Guidance Memo on the M-Opinion regarding take under the Migratory Bird Treaty Act

Team,

Please alert your regional staff to keep the M-Opinion guidance close until we have had a chance to brief folks on the Hill. I am hopeful that meetings can be scheduled next week and we get the approval to start sharing externally.

Thank you for your anticipated understanding and cooperation.

Jerome

FYI - Just heard from Dana that both authorizing and appropriations staff are interested in having a briefing on the M-Opinion. No dates or times yet--just a heads-up.

Greg,

Charisa and I met with DOI Solicitors (Gary Lawkowski, Katie Mills, Richard Goeken, Peg Romanik) yesterday to discuss 3 major topics:

As you will see below, there were a couple of either eagle related items mentioned towards the end of the meeting. We set some deadlines for products and are working on having those now. It was a good meeting and we will continue to gather information to help inform the Deputy Secretary's staff regarding these topics.

If you have any questions, then please let me know.

Jerome

Greg,

We will reach out to Canada to see what type of pre-Trilateral discussion they would like to haveZ. As you may recall, there are plans to have the breakout at the Trilateral as Sue and you agreed to.

I will keep you posted.

Greg,

Attached you will find the Diplomatic Note from Canada which speaks to their understanding that our 2 countries had a similar view about incidental take. The second document is a what appears to be a draft since there is since no one can find the text on State Department letterhead.

We will follow-up with the State Department as they requested within the next 2 days to see if they have some guidance for us during the Trilateral meeting.

I will keep you posted.

Jerome

Hi Greg,

Attached is our M-opinion memo with both your edits and input from the SOL office. I've attached a .pdf of the SOL changes for your visibility.

We're standing by to move this forward as soon as we get your clearance.

Thanks,
Kashyap

Downey

Pursuant to prior discussions, I would appreciate assistance in scheduling a meeting for David Yarnold, the president and chief executive officer of the National Audubon Society, with Secretary Zinke. The purpose of the meeting would be to allow these two leaders to get to know each other and to discuss major policy issues where there is a nexus between current initiatives of the Department and central tenets of birding conservation as represented by the over one million members of Audubon. Yarnold comes to DC on a regular basis and it would be my hope the Office of the Secretary could accommodate such a meeting during one of the upcoming visits. Currently, Yarnold's schedule for DC includes the following dates and time slots:

February 14th: He arrives at 1pm on 14th at DCA. Free remainder of the day.

February 16th: 10:15 am to 1 pm. We have Hill meetings scheduled but could be flexible. Departs to NYC at 2pm

February 27th: 1 pm to 6 pm.

February 28th: Flexible during the day.

Your consideration and attention to this request is greatly appreciated.

Thanks,

Gregg

Might they also want to discuss Santa Ana and the border wall discussion? Lots of birding there that may be impacted depending on final decisions.

If so please add and otherwise I am fine as written.

Thanks

MigBird did touch base with the Audobon Society to coordinate anticipated topics and border wall effects didn't come up. We can of course come up with bullet TPs if that changes.

Subject:	HEADS UP: Secretary's Agenda for Wednesday

We were going to propose the following topics for discussion:

- Wind Energy
- Councils
- ESA regs
- LA pinesnake
- CSKT
- Wolves
- Grizzly

However, Jason has expressed an interest in restricting our agenda items to ONLY:

- Listings [*we can include Pinesnake here*]
- MBTA guidance on M-opinion for "intent"
- MBTA/BGEPA timeline *(anybody know what this means? I have a call in to Maureen to investigate)*
- Mitigation Policies

Kashyap will be requesting information in format from appropriate programs today, due tomorrow am.

Thanks!
Charisa

The topics have been chosen for the meeting. Next step is for each bureau to fill in the 5 sections under each topics.

If it is a repeating topic, I left the old info in place; it will need to be updated.

Please let me know if you have any questions.

Thanks.

There's been a lot of discussions about guidance or amends to regs for MBTA & BGEPA as they pertain to M-opinion changes for energy & industry. Those should be vetted and discussed regarding status and a timeline for recommendations. Adding Jerome since I know how much he loves to talk with me about this issue.... :)

Subject:	Energy Coordination Opportunites

Good Morning Michael!

I was wondering if you could give me any updates on the status of the beginning of the NEPA work for the leasing of the 1002 in Alaska. Based on all of the press it appears that he NOI is coming out soon and the FWS Directors office has not seen or hear anything. It would be good if I could update him on what the schedule looks like and we would like to see the package especially the outreach.

Also I heard Friday that you are having a ELT meeting Tuesday and Wednesday here in DC. If you see any topics that relate to FWS that would be good for me to help coordinate on I am available to sit in a listen. We would also be available to provide updates the impact to permitting from the M opinion on Migratory Birds and our proposed revisions to ESA.

Thanks,

Bud

Per your request Greg attached is a few draft TPs for the Directorate in preparation for the North American meeting. You wanted to discuss these at the Wednesday VTC call. I wanted you to see them before distributing so let me know any changes tomorrow and then I can share them out.

Barbara W. Wainman

Subject: Re:
To: "Wainman, Barbara" <barbara_wainman@fws.gov>
Cc: Chris Tollefson <chris_tollefson@fws.gov>

Attached is an updated version based on Barbara's feedback.

A few notes:

-- I added in the NEPA section but would still like ES (Gina) to review. I will see if she is around.
-- I am still waiting for comments on the grant stuff from WSFR.
-- I made a new sport-hunted trophy section; however I think Greg explicitly said he did not want

the Directorate talking about that issue (which is why I did not include it originally).
-- I did not accept Barbara's comment about ESA bills we've testified on. I don't think the state folks will care.
-- I do not think we should speak to the timing of the ANWR lease sale. I doubt Arctic will come up at all, much less to that specificity.

Barbara - Once we get a "final" draft to you later, how do you want to share it with Directorate members for feedback and/or discussion during the Wednesday VTC?

Thanks,

- Matt

Trip Report: SEAFWA State Director's spring mtg

"Oetker, Michael" <michael_oetker@fws.gov>

From:	"Oetker, Michael" <michael_oetker@fws.gov>
Sent:	Thu Mar 01 2018 10:43:50 GMT-0700 (MST)
To:	Greg Sheehan <[redacted]> Jim Kurth <jim_kurth@fws.gov>, Stephen Guertin <stephen_guertin@fws.gov>, Charisa Morris <Charisa_Morris@fws.gov>, Jerome Ford <jerome_ford@fws.gov>, "Johnson, Mike" <mike_j_johnson@fws.gov>, Cynthia Martinez <cynthia_martinez@fws.gov>, Shaun Sanchez <shaun_sanchez@fws.gov>
CC:	Laurel Barnhill <laurel_barnhill@fws.gov>, David Viker <david_viker@fws.gov>, Bill Uihlein <bill_uihlein@fws.gov>, Kevin Lowry <kevin_lowry@fws.gov>
Subject:	Trip Report: SEAFWA State Director's spring mtg

Last week, I attended and participated in the SEAFWA State Director's spring mtg, Ron Reagan and Virgil Moore also attended representing AFWA. I wanted to share five important points as they relate to some national issues and suspect that y'all might hear about them between now and the North American.

Mig Birds, Cormorants - There was a fairly lengthy discussion about cormorant control.

- Several State Directors expressed concern for the low level of take and are encouraged that we are willing to discuss the number through adaptive management.
- Texas expressed concern about businesses with recreational fish ponds (pay by the fish or lbs caught). They seem to be a hybrid between aquaculture and free swimming fish and not currently covered by the current permits.
- All or at least nearly all 15 states (plus Idaho and other NW States) expressed strong interest urging us to complete the NEPA so that we can issue permits for the free swimming fish portion.
- States generally supported an approach using the Flyway Councils for managing cormorant populations but expressed concern about not including the fisheries community.

Mig Birds, M-Opinion - A number of states asked about our future plans for policy implementation. I suspect this will be asked again at the N American.

Refuges, GMO - Ed Carter and Chuck Sykes inquired about asking the Director's Office to reconsider the decision on GMOs. They explained that their states are not meeting the duck energy days under the NAWMP.

Refuges, Hunting and Fishing - Overall, this was a very good discussion and lots of positive energy. Virgil brought up a nuanced point that I had not heard about before. He suggested that our

alignment efforts could be better spent on allowing the states to take over responsibility for issuing the H&F regulations for all Refuges. I am not sure if I captured that accurately but suspect he will bring it up at the N American.

Awareness - A recent letter from The Wildlife Society upset nearly every state at this meeting. I did not see a copy of the letter. SEAFWA leadership asked AFWA leadership to address this issue immediately with TWS leadership and will likely get significant attention at the N American.

There were many other SE region and state level discussions, all with a very positive tone.

Let me know if you have any questions.

It was a letter to Congress sent before a hearing on the introduced legislation, Recovering America's Wildlife Act. I understood that there was a statement that was critical of state management/capability and my impression of the discussion is that the letter may have set the effort back rather than help the cause.

Hi Maureen!

Please see our draft burden report, attached. While this is still awaiting clearance by our Front Office (we are a one man show today, and that one man is tied up until 4pm), we wanted you to have something in hand.

Let me know if you have any questions!
Charisa

Hi Maureen -

Attached (pdf) is our cleared version. It only had minor editorial changes from our draft. Sorry for the delay, we're only one deep today!
Kashyap

Team,

Attached is a briefing paper regarding the subject. Also included is a snapshot of what interim guidance may look like once we have received some clarifications from the solicitor's office. The final interim guidance will include additional things which will be essential for our ES Field Offices. We expect to have a draft of the final interim guidance ready for your review by Friday.

As a reminder, the Department is waiting for the Service to provide its position on whether a regulation is needed or required to solidify the implementation of the M-Opinion and an accompanying timeline. The draft timeline was provided earlier.

If you have further questions, then please let me know.

Hi Jerome / Mike,

Greg just had a discussion with DepSec regarding the tradeoffs of moving forward in light of the M-opinion with a regs change versus without a regs change.

Greg is asking for a RIN request to (at least initially) start a conversation within the building on the way ahead. He made it clear he doesn't necessarily see this RIN request going out of the building, but that could change.

Would you be able to draft a RIN request for any necessary changes needed in light of the M-opinion by COB 24 January?

Thanks,
Kashyap

Team,

I am sure that you have heard about the M-Opinion (https://www.doi.gov/solicitor/opinions) regarding the MBTA. All we have and know at the moment is what is included in the note from Greg Sheehan. I urge you to remain vigilant and direct all inquiries as Greg's note indicated. Please do not extend yourselves beyond the instructions within the note. If you have immediate questions, then please do not hesitate to give me a call. We will discuss further during our next Migratory Birds Leadership Team call.

I hope that you all are having a happy holiday season.

Jerome

Subject: Returning the Migratory Bird Treaty Act to Its Original Intent
To:

Today, the Department of the Interior Solicitor's Office issued a binding opinion that will change the way the U.S. Fish and Wildlife Service implements and enforces the Migratory Bird Treaty Act (MBTA).

The Department's new "M-Opinion" reverses an M-Opinion on the MBTA issued by the previous administration in January 2017. The new opinion returns our interpretation of the law's provisions to that of its creators nearly a century ago.

The Migratory Bird Treaty Act was enacted by Congress in 1918 to solve a very specific problem – the unregulated slaughter and commercial sale of dozens of species of migratory birds for their meat, eggs and feathers. As a result of the demand for feathers to be used in hats and other clothing, as well as a voracious demand for their meat and eggs by consumers, many species were on the brink of extinction. The MBTA was designed to halt this deliberate, commercialized slaughter.

However, beginning in the 1970s began more broadly interpreting the law's provisions to apply to any take of migratory birds – deliberate or otherwise. This had the effect of potentially criminalizing many day-to-day, otherwise legal activities that might inadvertently kill, injure or disturb any of more than 800 species of birds covered by the law, which could include cutting down a tree with a bird nest in it, or owning a house with windows that are struck by birds, or driving a car involved in a fatal collision with a bird.

Over the past four decades, the Service has relied on prosecutorial discretion to enforce the MBTA for this kind of incidental take. But, as a result, the law has been unevenly applied. Further, because t courts across the country have disagreed on whether the MBTA applies to incidental take we have had to create a patchwork of differing enforcement in various jurisdictions. As a result, industries have been forced to operate without regulatory predictability,

hampering their operations, financing and profitability.

The new M-Opinion returns the MBTA to its original intention– focusing enforcement on deliberate killing, injury and commercialization of migratory birds. It will enable us to focus our law enforcement efforts on criminals who poach, traffic and deliberately harm our native migratory bird heritage. Further, we will be able to concentrate on partnership-focused migratory bird conservation that will ensure sustainable populations of waterfowl and other migratory birds nationwide for generations to come.

We will begin working on regulations that implement this opinion in 2018. I also anticipate a Secretarial Order codifying the opinion to be released in the coming weeks. In the meantime if you get any media, congressional or other outside inquiries please refer them to Headquarters External Affairs.

Greg Sheehan

Assistant Director (AD) Meeting Notes

4.30.2018

Principal Deputy Director Sheehan

- Deputy Assistant Secretary Skipwith will be attending our Monday AD meetings.
- A Budget meeting with the Deputy Secretary is coming up next week.
- Federal Employee Viewpoint Survey starts this week. An all-employee e-mail will be released inviting employees to participate.

Deputy Director for Programs and Policy

- The Hurricane Supplemental was submitted.
- Emerging guidance for the FY2020 budget is coming out, current projections are forecasted to continue, we anticipate a 5% decrement off the FY19PB.
- Thank you to those who have submitted your draft SES performance commitments.

ES

- Meeting with the Deputy Secretary, Assistant Deputy Secretary & NOAA on ESA regulations went well.

NWRS

- The 2018 Hunt-Fish rule is in the Director's office and on track for July deadline. We need to track it closely in DTS.
- EA office has started conversations about the rollout.
- An implementation plan on Secretary Order 3366 is coming together and a recreation coordinator is being assigned.

SA

- There is a Science Awards meeting with DAS Skipwith which will also cover adaptive science and initiatives.

BPHC

- About 70 kids attended bring your kid to work day.
- The Senior Executive Association is working with OMB on tax rules related to PCS moves.
- There is a JAO listening session via WebEx for all budget & admin personnel nationwide; Alex Pitts from R8 is the moderator.

LE

- There was an Indian Arts and Crafts Board counterfeit jewelry case resulting in an arrest on Friday.
- There is a Border Patrol meeting this afternoon, we are sending LE people to the Border starting on May 13th for 30 day details.
    - We may need to look at other allocations to cover service TDY costs to support those details.

WFSR

- There is a meeting Friday regarding the AFWA meeting schedule.

BMO

- The acting AS/FWP is touring the prospective R8, and doing an executive session this morning about collaboration.
- Another session is planned for the June/July timeframe.
- The current focus is on the part of the re-org that does not require re-programming.

EA

- Talking points will be sent to the Directorate regarding the Federal Employee Viewpoint Survey.
- We're ready to roll-out our Anti-harassment plan that was approved by DOI

MB

- (b) (5) DPP [redacted] is finished and in routing. It should be ready for the Principal Deputy Director's review by the end of the week.
- (b) (5) DPP [redacted].
- A notice of intent from a couple of years ago on how to do incidental take is being rescinded to align with the new M-opinion.
    - Our implementation is going well, but industry may have questions.
    - A one-day or half-day workshop where we host other agencies and share implementation guidance may be the way ahead. The principal deputy director would like to be at that workshop.

DAS Skipwith

- DAS Skipwith will be visiting Biloxi, Mississippi in mid-May.

United States Department of the Interior
Washington, D.C. 20240
INFORMATION MEMORANDUM FOR THE DEPUTY SECRETARY

DATE: April 9, 2018
FROM: Principal Deputy Director, USFWS
SUBJECT: Revision of USFWS Nest Destruction and Relocation Policy under MBTA

I. INTRODUCTION

The revised Nest Destruction and Relocation policy clarifies options for nest destruction or relocation, in light of the recent Interior Solicitor's M-Opinion 37050. This revised policy replaces the Service's 2003 Nest Destruction Memorandum (MBPM-2) and extends the "Good Samaritan provision", found within the rehabilitation regulations (50 C.F.R. § 21.3(a)), to nest contents in imminent danger of destruction.

II. ISSUE BACKGROUND

The Migratory Bird Treaty Act (16 U.S.C. § 703; MBTA) prohibits the killing, possession, import, export, transport, sale, purchase, barter, or offer for sale, any migratory birds, or the parts, nests, or eggs of such birds, except as may be permitted under the terms of a valid permit. There is no prohibition on the destruction of inactive nests, as long as the nests are not possessed. Consistent with the December 22, 2017 Interior Solicitor's M-Opinion 37050, the incidental destruction of migratory bird eggs and chicks occurring as the result of an otherwise lawful activity, is not prohibited by the MBTA. As provided in the rehabilitation regulations the "Good Samaritan provision" allows any person that finds a sick, injured, or orphaned migratory bird, without a permit, to possess and immediately transport the bird to a permitted rehabilitator (50 C.F.R. § 21.31(a)). The revised nest destruction memo would extend this provision to eggs and chicks in imminent danger to be collected and transported without a permit.

III. ACTIONS TAKEN BY HALLWAY

Review and approve the nest memorandum revision and ensure alignment with the M-Opinion.

IV. ANALYSIS AND POSITIONS OF INTERESTED PARTIES

The draft revision of the Service's Nest Destruction and Relocation Policy underdoing internal review, and the Service is seeking review and approval from the Principal Deputy Director. Once the revised policy is approved and finalized, the Service will distribute it to its Regional and Field Offices and to affected stakeholders. It will replace the policy currently posted here: https://www.fws.gov/policy/m0208.pdf.

Update from Fish & Wildlife Service:
Review of the Department of the Interior Actions
That Potentially Burden Domestic Energy

i. Streamline Rights-of-way (ROW) for pipelines and electricity transmission.

FWS anticipates revising its right-of-way regulations (50 CFR 29.21) to streamline its process for granting rights-of-way for pipelines and electricity transmission in 2019.

ii. Review Incidental Take Regulations for oil and gas activities in the Southern Beaufort Sea and Chukchi Sea, under the Marine Mammal Protection Act (MMPA)

The Service has have not received an application for new Incidental Take Regulations for the Chukchi Sea. We assume the lack of an application means the industry is not planning activities in the near future that would have the potential to incidentally take marine mammals. We have, however, reminded industry of the time it takes to process an application and issue ITRs so that they consider that in their planning.

The Service is discussing with BLM whether there is a need for marine mammal incidental take coverage related to industry activities in the 1002 area, including the possible need for revision of the existing Southern Beaufort Sea ITRs to include the 1002 area or the need to issue new ITRs specific to the 1002 area.

iii. Modernize Guidance and regulations governing interagency consultation pursuant to Section 7(a)(2) of the Endangered Species Act

The Service and the National Marine Fisheries Service have drafted proposed revisions to our regulations governing consultation under Section 7(a)(2) and expect those revised regulations to be submitted to OMB within the next 30 days for interagency review and clearance.

iv. Build Upon the Efforts of the Western Governors' Association and Others to Improve the Application of the Endangered Species Act, Reduce Unnecessary Burdens on the Energy Industry, and Facilitate Conservation Stewardship

The Service has issued new policy requiring state participation in Species Status Assessments informing petition findings, listing determinations, recovery plans, 5 year reviews, and other ESA related decisions and has reflected that policy direction on state involvement into an agency priority goal in the Department's Strategic Plan.

v. Re-Evaluate Whether the MBTA Imposes Incidental Take Liability and Clarify Regulatory Authorities.

On December 22, 2017, the solicitor issued a new M-opinion (M-Opinion 37050) interpreting that the MBTA does not prohibit the incidental or accidental take of migratory birds. The Service is working with solicitors to develop policy guidance to implement this legal opinion.

vi. Evaluate the Merits of a General Permit for Incidental Take Under the Bald and Golden Eagle Protection Act

The Service's revised eagle incidental take regulations (81 FR 91494) were designed to achieve many of the perceived benefits of a general permit approach to eagle take authorization and to address industry concerns with the previous regulations. Key changes in the revised regulations include lengthening the maximum permit term from five to 30 years; broadening available options for compensatory mitigation; eliminating compensatory mitigation for bald eagle take permits in healthy populations; standardizing data collection; and analyzing the effects of the rule in a Programmatic Environmental Impact Statement that allows for tiering of individual permit decisions, reducing project-level analysis and associated processing time. The Service is currently developing implementation guidance to further streamline the permitting process. The Service has sought comments three separate times on how to develop a "low risk" approach to eagle take management. Upon review of these comments, no substantive approach has been proposed by stakeholders. The Service remains open to such an approach through policy or regulatory changes to reduce the burden on industry and Service staff in processing permits while complying with the Bald and Golden Eagle Protection Act.

U.S. Fish and Wildlife Service
83rd North American Wildlife and Natural Resource Conference
March 26-30, 2018

Hot Issue Talking Points

Hunting/Fishing/Access

- Implementing Secretarial Orders to expand access and support for hunting, angling and outdoor recreation.
- 12 FWS employees across the country working full time on hunting and fishing access issues, with the goal of opening another 250,000 acres by the end of this year.
- Hunting and Shooting Sports Conservation Council – will provide advice about how to integrate hunting and shooting sports considerations into our operations.
- International Wildlife Conservation Council – will provide expertise and advice on international conservation issues.
- Focusing on making information on hunting, fishing and outdoor recreation on public lands more accessible to the public.
- Expanding efforts to partner with the private sector – particularly the outdoor industry – to take advantage of their marketing expertise and reach.
- Also working with the private sector and states to pilot a network of eight Outdoor Skills Centers – focus on improving R3 efforts.
- The recent (February) Secretarial Order 3362 puts a priority on identifying key migration habitat for big-game species; and facilitating migration across federal, state and private lands.

Budget

- FY19 budget proposal Supports Secretarial and FWS priorities: creating jobs; providing access to hunting, fishing and other outdoor recreation; facilitating energy development; modernizing infrastructure; reducing regulatory burden; and, protecting our borders.
- Infrastructure –
    - FWS has a $1.4 billion maintenance backlog. Budget includes $135.5M for Refuge System maintenance and $19.3M for maintenance of hatcheries.
    - DOI's Public Lands Infrastructure Fund proposal would provide up to $18 billion to help pay for repairs and improvements in parks, wildlife refuges, and Indian schools. Funds will be generated via energy development on federal lands.
    - Investing in our infrastructure will benefit visitors and wildlife. It will also employ local contractors and workers, while increasing access and helping local economies benefit from growing visitation.
- Grant Programs –
    - State & Tribal Wildlife Grants down significantly to $31.3M (down approximately $30M).
    - North American Wetlands Conservation Fund down to $33.6M (down approximately $4M).
    - Partners for Fish and Wildlife program down significantly to $35.8M (down approximately $15M).
    - Coastal program down to $6.5M (down approximately $7M).

    - No funding requested for the Cooperative Endangered Species Conservation Fund (CESCF; Section 6 of the Endangered Species Act).
- Hurricane Damage –
    - 44 FWS properties were damaged by hurricanes in 2017.
    - $210.6M provided via supplemental funding for FWS-related recovery projects in the Gulf Coast and Caribbean; currently in the process of planning and identifying projects.

Grant Review Process
- On April 12, 2017, DOI instituted a grant review process for awards over $100,000.
- Effective June 13, 2017, the review was waived for mandatory PR/DJ awards. However, discretionary grant programs must still go through the review (BIG, CVA, MS, Coastal Wetlands, C-SWG).
- On December 28, 2017, DOI issued a memorandum with additional guidance on discretionary grants and cooperative agreements to ensure they better align with the Secretary's priorities.
- Many of these discretionary awards must now be reviewed by the Senior Advisor to the Assistant Secretary for Policy, Management and Budget.
- FWS continues to work with DOI to ensure timely review and award of all grants.

Reorganization
- DOI restructuring proposal focuses on establishing unified regional boundaries for DOI bureaus, and now reflects the concerns bureaus raised regarding splitting states into multiple regions.
- The new map more closely follows state lines, with some exceptions, while still adhering closely to original goal of organizing boundaries along watersheds and ecosystems.
- The FY19 budget proposes $5.9M to shift some headquarters resources to the field and support the Secretary's vision of migration to common regional boundaries to improve service and efficiency, and push resources closer to the field.
- FWS is currently in the process of identifying approximately 50 HQ employees that could move to a western location TBD.

Migratory Birds M-Opinion
- DOI M-Opinion released on December 22, 2017.
    - Concludes that the MBTA's prohibitions apply only to direct and affirmative purposeful actions, i.e. MBTA does not prohibit incidental take.
    - ESA and BGEPA protections still apply to certain migratory birds.
    - FWS currently developing new procedures to implement the Opinion.

ESA Reform
- FWS continues to look for ways to improve ESA for the public.
- AFWA has participated in discussions with FWS on ESA reform, including congressional briefings.
- WGA sent a letter to Secretary Zinke in November 2017 with recommendations for regulatory and administrative actions to improve ESA implementation.

- Last March, the National Governor's Association adopted a policy similar to the WGA.
- We anticipate continued oversight and legislative activity from the House and Senate regarding ESA implementation and modernization.
- Our appropriations subcommittees have directed that we prioritize ESA recovery funding on activities that are inherently mandatory under the ESA, such as recovery planning, 5-year reviews and rules to downlist or delist species when warranted.

Wolves

- Gray Wolves –
    - FWS is preparing a new rule to delist gray wolves range-wide except for the separately listed Mexican wolf subspecies. Targeting early 2019.
    - This Congress, several bills have been introduced to reinstate final rules delisting wolves in WY and the WGL, and shield both rules from future legal challenge. Similar language is included in various sportsmen's bills and recent House and Senate appropriations bills.
- Red Wolves –
    - FWS is evaluating alternatives for revising the nonessential experimental population for red wolves in NC.
    - The FY 2018 House Interior appropriations report directs the Service to determine whether the red wolf is a genetically valid species designation. The Senate Interior appropriations report encourages ending the red wolf program in FY 2018.
- Mexican Wolves –
    - FWS continues to work with partners to further Mexican gray wolf recovery.
    - The FY 2018 House Interior appropriations report directs FWS to determin whether the Mexican gray wolf is a genetically valid subspecies designation.

LCCs

- The President's FY 2019 budget eliminates funding for LCCs (as in FY 2018).
- The FY 2018 House Interior Appropriations bill suggested FWS focus on areas where LCC partnerships are strongest. The bill also underscored OIG recommendations that FWS issue formal guidance for the award process and store all project information in one database.
- FWS is currently working with Congress and the Department to determine the future of the program.

International Sport-Hunted Trophies

- FWS announced recently that it will now consider all trophy imports from African nations on a case-by-case basis.
- Appointed a new acting AD (Eric Alvarez) to implement changes to our international grants/permit programs.

NEPA

- Secretarial Order 3355 on streamlining National Environmental Policy Act reviews and implementation of EO 13807 was signed August 31, 2017.

- The purpose is to: 1) immediately implement certain improvements to NEPA reviews conducted by DOI; 2) begin assessment of additional such opportunities; and 3) begin implementation of EO13807, "Establishing Discipline and Accountability in the Environmental Review and Permitting Process for Infrastructure Projects."
- FWS issued a memo in December recommending actions to streamline the NEPA process in accordance with SO 3355, including development of additional guidance and training, as well as streamlining internal review processes.

Alaska Issues

- Arctic NWR –
    - The final tax package rescinded ANILCA's prohibition on development of the 1002 Area and requires two oil and gas lease sales, of not fewer than 400,000 acres each, on the coastal plain within 10 years. All receipts shall be split evenly between the State of Alaska and the U.S. Treasury.
    - The oil and gas program shall be managed similar to BLM's program in the National Petroleum Reserve in Alaska. Up to 2,000 acres may be authorized by the Secretary to be available for infrastructure for production and support facilities.
    - FWS will work with BLM and USGS regarding oil and gas activities in the 1002 Area.
    - Since passage of the tax bill, FWS is evaluating the CCP.
- Izembek NWR –
    - In January the Secretary signed an "Agreement for the Exchange of Lands" with the King Cove Corporation in Alaska.
    - The land exchange will be made pursuant to the Secretary's authority under ANILCA. No NEPA is required under this authority.
    - Every effort will be made to minimize adverse impacts to the refuge, including minimal acreage transfer to meet the purposes of the exchange.

U.S. Fish and Wildlife Service
83rd North American Wildlife and Natural Resource Conference
March 26-30, 2018
Hot Issue Talking Points

Hunting/Fishing/Access

- We are implementing several Secretarial Orders designed to expand access and support for hunting, angling and outdoor recreation.
- We have reassigned12 FWS employees across the country working full time on hunting and fishing access issues, with the goal of opening another 250,000 acres by the end of this year.
- New Hunting and Shooting Sports Conservation Council:
    - Will provide advice about integrating hunting/shooting sports considerations into our operations.
    - DOI announcing names soon.
- Also created the International Wildlife Conservation Council – will provide expertise and advice on international conservation issues. First meeting was on 3/16/2018.
- Focusing on making information on hunting, fishing and outdoor recreation on public lands more accessible to the public.
- Expanding efforts to partner with the private sector – particularly the outdoor industry – to take advantage of their marketing expertise and reach.
- Also working with the private sector and states to pilot a network of eight Outdoor Skills Centers – focus on improving R3 efforts.
    - We have staff assigned to R3 efforts in most FWS regions.
- We will also be working with state and federal partners to help implement the recent (February) Secretarial Order 3362 – emphasizes identifying key migration habitat for big-game species; and facilitating migration across federal, state and private lands.

Budget

- **FY19 budget proposal** – Supports Secretarial and FWS priorities:
    - Creating jobs;
    - providing access to hunting, fishing and other outdoor recreation;
    - facilitating energy development;
    - modernizing infrastructure;
    - reducing regulatory burden; and,
    - protecting our borders.

- **Infrastructure**
    - FWS has a $1.4 billion maintenance backlog. Budget includes $135.5M for Refuge System maintenance and $19.3M for maintenance of hatcheries.
    - DOI's Public Lands Infrastructure Fund proposal would provide up to $18 billion to help pay for repairs and improvements in parks, wildlife refuges, and Indian schools. Funds will be generated via energy development on federal lands.
    - Investing in our infrastructure will benefit visitors, wildlife and local communities. It will employ local contractors and workers, while increasing access and helping local economies benefit from growing visitation.

- Bipartisan legislation was introduced in early March to address NPS infrastructure needs. The Secretary supports adding refuges to the legislation in line with the FY 2019 budget request. Support for adding refuges was also included in congressional testimony.

- **Grant Programs –** While Congress has not yet considered the President's FY 2019 budget recommendation, the proposal has the following adjustments to meet our guidance and address our top priorities:
  - State & Tribal Wildlife Grants request is $31.3M.
  - North American Wetlands Conservation Fund request is $33.6M.
  - Partners for Fish and Wildlife program request is $35.8M.
  - Coastal program request is $6.5M.
  - No funding requested for the Cooperative Endangered Species Conservation Fund (CESCF; Section 6 of the Endangered Species Act).

- **Hurricane Damage**
  - 44 FWS properties were damaged by hurricanes in 2017
  - $210.6M provided via supplemental funding for FWS-related recovery projects in the Gulf Coast and Caribbean
  - We are currently in the process of planning and identifying projects, focusing on making infrastructure and habitat more resilient to future storms.

Status of PR/DJ Funding

- In FY 2018, over $797 million (2.2% increase over 2017) will be apportioned to State fish and wildlife agencies for the Wildlife Restoration and Hunter Education programs, and over $351 million (1% increase over 2017) will be apportioned to State fish and wildlife agencies for the Sport Fish Restoration (SFR), Recreational Boating Access, and the Aquatic Resources Education grants (over $1.1 billion).
- Wildlife Restoration annual apportionments doubled since 2012 from about $400 million to nearly $800 million; seems to be leveling off at around $800 million.
- SFR annual apportionments have been fairly flat over the past 9 years at around $350 million annually.
- Since 1937 over $20.2 billion has been apportioned to States for PR/DJ, with over $6.7 billion in matching funds.

Grant Review Process

- All discretionary Notices of Funding Opportunities must be reviewed by DOI prior to posting on Grants.gov to ensure alignment with new Departmental priorities for financial assistance.
- All discretionary awards must be reviewed prior to award by a highest level reviewer based on recipient type (i.e. nonprofit) and funding amount.
- FWS anticipates needing to submit ~3,000 discretionary financial assistance actions for review in FY18.
- The following WSFR programs are nondiscretionary and not subject to the review:
  - Sport Fish and Restoration;
  - Wildlife Restoration and Basic Hunter Education;
  - Enhanced Hunter Education and Safety; and,

- the apportionment funding under State Wildlife Grants (SWG competitive awards are subject to the pre-award review).
- FWS continues to work with DOI to ensure timely review of all discretionary Notice of Funding Opportunities and financial assistance awards.

Reorganization

- DOI restructuring proposal focuses on establishing unified regional boundaries for DOI bureaus, and now reflects the concerns bureaus raised regarding splitting states into multiple regions.
- The new map more closely follows state lines, with some exceptions, while still adhering closely to original goal of organizing boundaries along watersheds and ecosystems.
- The FY19 budget proposes $5.9M to shift some headquarters resources to the field and support the Secretary's vision of migration to common regional boundaries to improve service and efficiency, and push resources closer to the field.
- FWS is currently in the process of identifying approximately 50 HQ employees that could move to a western location TBD.

Migratory Birds M-Opinion

- DOI M-Opinion released on December 22, 2017 concluded that the MBTA's prohibitions apply only to direct and affirmative purposeful actions, i.e. MBTA does not prohibit incidental take.
- This legal interpretation returns enforcement of the MBTA to conform with the intent of its creators, and to the way the law was interpreted for decades by administrations of both parties.
- In response, we are working to refine how we administer the MBTA.
- We will continue to aggressively investigate, prosecute and convict those who deliberately kill or harm migratory birds, their nests and eggs.
- We will also continue to work in partnership with developers, industry and other landowners to help them implement voluntary conservation measures that reduce, and avoid impacts to migratory birds from their legal activities.
- ESA and BGEPA protections still apply to migratory birds covered under these laws.

ESA Reform

- FWS continues to look for ways to improve ESA for the public.
- AFWA has participated in discussions with FWS on ESA reform, including congressional briefings.
- WGA sent a letter to Secretary Zinke in November 2017 with recommendations for regulatory and administrative actions to improve ESA implementation.
- Last March, the National Governor's Association adopted a policy similar to the WGA.
- We anticipate revisions to sections 4, 6, 7, and 10 to be sent soon to the Federal Register.
- We anticipate continued oversight and legislative activity from the House and Senate regarding ESA implementation and modernization.
- Our appropriations subcommittees have directed that we prioritize ESA recovery funding on activities that are inherently mandatory under the ESA, such as recovery planning, 5-year reviews and rules to downlist or delist species when warranted.

Wolves

- **Gray Wolves**
  - FWS is preparing a new rule to delist gray wolves range-wide except for the separately listed Mexican wolf subspecies. Targeting late 2018.
  - This Congress, several bills have been introduced to reinstate final rules delisting wolves in WY and the WGL, and shield both rules from future legal challenge. Similar language is included in various sportsmen's bills and recent House and Senate appropriations bills.
- **Red Wolves**
  - FWS is evaluating alternatives for revising the nonessential experimental population for red wolves in NC.
  - The FY 2018 House Interior appropriations report directs the Service to determine whether the red wolf is a genetically valid species designation. The Senate Interior appropriations report encourages ending the red wolf program in FY 2018.
- **Mexican Wolves**
  - FWS continues to work with partners to further Mexican gray wolf recovery.
  - The FY 2018 House Interior appropriations report directs FWS to determine whether the Mexican gray wolf is a genetically valid subspecies designation.

Landscape Conservation Cooperatives

- The President's FY 2019 budget eliminates funding for LCCs (as in FY 2018).
- The FY 2018 House Interior Appropriations bill suggested FWS focus on areas where LCC partnerships are strongest. The bill also underscored OIG recommendations that FWS issue formal guidance for the award process and store all project information in one database.
- FWS is currently working with Congress and the Department to determine the future of the program.

International Sport-Hunted Trophies

- FWS announced recently that it will now consider all trophy imports from African nations on a case-by-case basis.
- Appointed a new acting AD (Eric Alvarez) to implement changes to our international grants/permit programs.

NEPA

- Secretarial Order 3355 on streamlining National Environmental Policy Act reviews and implementation of EO 13807 was signed August 31, 2017.
- The purpose is to: 1) immediately implement certain improvements to NEPA reviews conducted by DOI; 2) begin assessment of additional such opportunities; and 3) begin implementation of EO13807, "Establishing Discipline and Accountability in the Environmental Review and Permitting Process for Infrastructure Projects."
- In most cases, the SO requires that an EIS be no more than 150 pages and be completed within a year of publishing a NOI.
- FWS issued a memo in December recommending actions to streamline the NEPA process in accordance with SO 3355, including development of additional guidance and training, as well as streamlining internal review processes.

Cormorant Depredation

- In November 2017, a final NEPA EA was published that found No Significant Impact for the lethal take of up to 51,571 birds per year in 37 states and the District of Columbia.
- This EA allows FWS to issue individual permits for managing cormorants at aquaculture facilities, alleviating human health and safety concerns, protecting threatened and endangered species, and reducing damage to properties caused by this species.
- FWS is working with state fish and wildlife agencies to review the science and available data to better understand the impacts cormorants have on free-swimming fish populations and recreational and commercial fishing. This process is expected to take approximately one year.
- After evaluation of the relevant scientific data, FWS will initiate a NEPA review, which may result in which may include options for free swimming fish, depending on what the science says.

Black Vultures

- Like double-crested cormorants, black vultures are protected under the MBTA. Though they feed primarily on carrion, this species sometimes preys upon newborn or downed livestock.
- As with depredation by other protected species, FWS works with Wildlife Services to manage depredating black vultures through non-lethal approaches as well as through lethal take permits.

Ravens

- Ravens are also protected by the MBTA, and this species is also known to prey upon newborn and downed livestock, primarily in western states. Ravens are among wild predators of desert tortoise and sage grouse eggs and young.
- We have been have asked for increased lethal take through increased depredation permits, a depredation order, or a hunting season for ravens.
- A FWS team has been assembled to being working through it to develop a long-term management approach to raven depredation.

Alaska Issues

- **Arctic NWR**
  - The final tax package rescinded ANILCA's prohibition on development of the 1002 Area and requires two oil and gas lease sales, of not fewer than 400,000 acres each, on the coastal plain within 10 years. All receipts shall be split evenly between the State of Alaska and the U.S. Treasury.
  - The oil and gas program shall be managed similar to BLM's program in the National Petroleum Reserve in Alaska. Up to 2,000 acres may be authorized by the Secretary to be available for infrastructure for production and support facilities.
  - BLM has been tasked with developing an EIS for the oil and gas program on Arctic Refuge Coastal Plain. FWS is a cooperating agency, and is working closely with BLM staff.
  - Since passage of the tax bill, FWS is evaluating the CCP and determining what revisions may be necessary to bring it into alignment with the legislation, consistent with EIS process.

- **Izembek NWR**
  - In January, the Secretary signed an "Agreement for the Exchange of Lands" with the King Cove Corporation in Alaska.
  - The land exchange will be made pursuant to the Secretary's authority under ANILCA. No NEPA is required under this authority.
  - Every effort will be made to minimize adverse impacts to the refuge, including minimal acreage transfer to meet the purposes of the exchange.

Workforce Planning

- Regardless of how the 2018 and 2019 budgets end up, we will be hard pressed to meet all our mandates and obligations with available resources.
- Our buying power has eroded nearly $500 million from where it was sixteen years ago, as appropriations haven't kept pace with increases in fixed costs.
- We're currently engaged in a Workforce Planning Imitative designed to maximize our ability to provide resources to the field.
- As part of this restructuring effort, we've offered a voluntary early retirement option to all eligible employees, as well as Voluntary Early Separation Incentive Payments to employees in certain series and programs.
- These authorities will help us lower payroll costs and provide additional career advancement opportunities for lower-graded employees.
- Pending Congressional budget approval, in FY2019 we will realign our Budget and Administration (BA) operations nationwide under a single chain of command, known as Joint Administrative Operations (JAO).
- This reorganization is expected to save FWS significant funding, reduce duplication, enhance customer service, and result in increased efficiency.
- While this restructuring initiative is independent of the Secretary's vision for reorganizing the Interior Department, as an agency we plan to design our Joint Administrative Operations (JAO) in a manner that supports that vision.

Meeting Dates: February 20 - 22, 2018

Meeting Location: Best Western Plus, Hacienda Hotel – Prado Conference Room / Harney St, San Diego, CA 92110

Invitees:

Regions
- Terry Rabot (R1)
- Anne Hammond (R2)
- Charles Wooley (R3)
- Bill Uihlein (R4)
- Deb Rocque (R5)
- Matt Hogan (R6)
- Karen Clark (R7)
- Jody Holzworth (R8)

Programs
- Shaun Sanchez (Chair / NWRS)
- Rebekah Giddings (BPHC)
- Kristin Young (BMO)
- Matt Huggler (EA)
- Gina Shultz (ES)
- John Schmerfeld (FAC)
- Carole Greeley (IA)
- Shelley Hartmann (IRTM)
- Mike Johnson (MB)
- Jim Willis (NCTC)
- Jim Hale (OLE)
- Seth Mott (SA)
- Bob Curry (WSFR)

Guests
- Brian Bloodsworth (JAO)
- Lin Phu (NWRS)
- Kevin Bumatay (R1)
- Leslie Hartsell (ES)
- Julie Henning (ES)

Logistics

- **Hotel:** Best Western Plus, Hacienda Hotel, Old Town * San Diego, 4041 Harney St, San Diego, CA 92110, Phone: (619) 298-4707
- **GSA Per Diem:** $167 max lodging (rate does not include 10.5% tax and 2% tourism fee) / $64 M&IE
- **Airport:** San Diego International Airport (SAN)

Agenda

TUESDAY, FEBRUARY 20th

Start Time	Topic	Discussion Lead(s)
8:30 am *30 min*	**Meeting Kick-off -** Opening remarks, introductions, and logistics.	Shaun Sanchez
9:00 am *60 min*	**Role of the Deputies Group:** Discuss roles of the Deputies Group in terms of purpose, enterprise approaches, authorities, and how/where the Deputies Group is heading into the future. This includes a discussion around communications in a changing time. *Desired outcome is a shared understanding for the Deputies Group of our role and action moving forward to clarify and implement that role moving forward.*	Shaun Sanchez
10:00 am *30 min*	**Break**	All
10:30 am *90 min*	**Role of the Deputies Group:** Continued	Shaun Sanchez

Start Time	Topic	Discussion Lead(s)
12:00 pm *60 min*	**Lunch**	All
1:00 pm *90 min*	**Secretarial Orders (S.O.) 3347, 3356** – Update on implementation of these S.O.s supporting hunting, fishing, and outdoor recreation (3347 and 3356). Includes a presentation "Mapping FWS Response Strategy and Progress Report" and a discussion (60 minutes) that addresses deliverables; working with state, tribal, and local partners; and reporting. *Desired outcome is to inform the Deputies Group about these two SOs including HQ engagement to date, progress on implementing the SOs, and to link Regional efforts to this work and discuss agency coordination.*	Shaun Sanchez / John Schmerfeld / Mike Johnson / Bob Curry / Lin Phu
2:30 pm *30 min*	**Break**	All
3:00 pm *120 min*	**Joint Administration Operations (JAO) Initiative** **First Half** • Define the project schedule and deliverables. • Discuss any outstanding issues with project scope. • Secure support for the proposed project governance model. **Second Half** • Define and collect input on the proposed change management strategy. • Collect strengths and weaknesses of current state administrative operations, as well as perceived opportunities and threats posed by the JAO transition. • Solicit needs/concerns related to customer service. • Collect feedback on the communications /outreach strategy; including how best to engage the regional leadership chiefs. *Desired outcome is to provide an update on JAO project management and engage the Deputies in a meaningful dialogue about their needs and expectations regarding this transformation initiative.*	Brian Bloodsworth / Kevin Bumatay
5:00 pm	**Adjourn**	All

WEDNESDAY, FEBRUARY 21st

Start Time	Topic	Discussion Lead
8:30 am *30 min*	**Reconvene** – Recap the previous day's discussion and revisit select topics, if necessary.	Shaun Sanchez

Start Time	Topic	Discussion Lead
9:00 am *45 min*	**Secretarial Order (S.O.) 3355** – Update on implementation of this S.O. regarding the National Environmental Policy Act (NEPA) (3355). *Desired outcome is to inform the Deputies Group about how the Department is implementing the S.O., USFWS commitments and status, and Regional / Field Office workload related to the S.O. Includes 15 minutes for questions and discussions.*	Gina Schultz
9:45 pm *15 min*	**Environmental Conservation Online System (ECOS)** – Update on the independent audit, current status, and vision for ECOS. *Desired outcome is a shared understanding for the Deputies Group on this topic.*	Gina Schultz
10:00 am *30 min*	**Break**	All
10:30 am *30 min*	**IT Efforts and Standardizations** – Provide a high-level overview of recent effort to standardize IT policies and approaches across the agency. *Desired outcome is a shared understanding for the Deputies Group on these IT efforts.*	Shelley Hartmann
11:00 am *60 min*	**Solicitor's Opinion on Migratory Bird Treaty Act (MBTA)** – Update the Deputies Group on plans to issue policy guidance in light of the recent M-opinion issued on the MBTA. *Desired outcome is a shared understanding for the Deputies Group of messaging and guidance to provide to staff, partners, and the general public on this issue.*	Mike Johnson / Jim Hale (OLE Deputy Acting)
12:00 pm *60 min*	**Lunch**	All

1:00 pm to 4:00pm	**Field Trip:** Visit with field staff of the San Diego National Wildlife Refuge Complex. Staff from the refuge will pick the group up at the hotel in two vans at 1:00p.m. and will return to the hotel at 4:30p.m. The tour will be focused on the Urban Refuge program and will include some walking along the beach and trail along the Bay.	All

THURSDAY, FEBRUARY 22nd

Start Time	Topic	Discussion Lead
8:30 am *15 min*	**Reconvene** – Recap the previous day's discussion and revisit select topics, if necessary.	Shaun Sanchez

Start Time	Topic	Discussion Lead
8:45 am *90 min*	**Workforce Planning -** Discuss impacts of retirement projections and difficulties managing for priority positions given budgetary constraints and hiring controls. Discuss potential impacts of the VERA and VSIP authorities for this year and how best to manage our workforce corporately as an agency. *Desired outcome is an opportunity for the Deputies Group to learn about current conditions of the agency workforce and develop strategies for managing workforce challenges.*	Shaun Sanchez, Deb Rocque, Rebekah Giddings
10:15 am *15 min*	**Break**	All
10:30 am *30 min*	**NOFO and DOI Grant Oversight** – Provide an update on the current status of publishing NOFOs and describe the financial review guidelines for FY18. *Desired outcome is to inform the Deputies Group about these processes, address questions, and identify issues or "road bumps" that have arisen since implementing the process.*	Bob Curry
11:00 am *60 min*	**Military Partnerships and Sikes Act** – Discuss coordination of Sikes Act activities in the agency and the potential of increased work and partnerships with the military. *Desired outcome is an opportunity for the Deputies Group to provide feedback on activities and plans for the agency's Sikes Act work.*	John Schmerfeld / Leslie Hartsell / Julie Henning
12:00 pm	**Adjourn**	All

Additional Topics (time permitting or will cover in future conference call)

15 min	**Travel Ceiling** – Open discussion on how Regions are handling restrictions on travel and if/when this will roll up into national accounting and/or policy. *Desired outcome is a shared understanding for the Deputies Group on this topic.*	Deb Rocque / Brian Bloodsworth

11:00 am *30 min*	**Reorganization Efforts at the National Conservation Training Center (NCTC)** – Update on recent changes in the organization of NCTC. *Desired outcome is a shared understanding for the Deputies Group on these changes and impacts to agency Programs and Regions.*	Jim Willis

INFORMATION MEMORANDUM FOR THE DIRECTOR

DATE: **February 12, 2018**

FROM: **Assistant Director for Migratory Birds**

SUBJECT: **Interim Guidance Regarding M-Opinion 37050**

I. STATEMENT OF PURPOSE

Since the publication of M-Opinion 37050, the U.S. Fish and Wildlife Service (Service) has received numerous questions regarding how to apply the Opinion to our actions under the Migratory Bird Treaty Act (MBTA) and migratory bird conservation in general. Guidance is needed to provide clarity to Service staff, other Federal Agencies, project proponents, and the general public.

II. BACKGROUND

Implementation of this M-Opinion will require changes to practices across the Service. The Migratory Bird Program is working with other Service programs and the Department to develop more comprehensive guidance to clarify how this opinion affects existing policies and procedures. More detailed guidance will be needed. In the meantime, the Migratory Bird Program, in consultation with Ecological Services, has developed interim guidance and talking points (attached) to provide an initial overview of how the Service plans to integrate the M-Opinion into day-to-day activities.

III. POSITIONS OF AFFECTED STAKEHOLDERS

Federal agencies, States and other stakeholders are seeking clarification on the M-Opinion and how it will impact the Service's implementation of the MBTA. A clear definition of what constitutes purposeful take and what activities are prohibited under the MBTA is needed.

IV. NEXT STEPS

- Coordinate with Office of the Solicitor to clarify the definition of purposeful take – including how "intent", "knowingly", "illegal actions" all relate to purposeful take and determine if existing migratory bird settlement agreements are affected.
- Coordinate with Office of Law Enforcement, Ecological Services, and Refuges on more comprehensive Service-wide guidance disseminated by the Principle Deputy Director.

V. RECOMMENDATION

If the desire is to codify the M-Opinion and associated definitions in order to provide implementation certainty and consistency, then a regulatory approach would be the **recommendation**.

ATTACHMENTS

Interim Guidance Pertaining to Implementing Migratory Bird Conservation Actions under the Migratory Bird Treaty Act.

The mission of the U.S. Fish and Wildlife Service (Service) is to work with others to conserve, protect, and enhance fish, wildlife, plants, and their habitats for the continuing benefit of the American people. Migratory bird conservation remains an integral part of our mission. The Service will work to integrate the M-Opinion 37050 into our day-to-day activities while continuing to deliver quality bird conservation across the United States. In the interim, we offer the following information to serve until further guidance is developed.

1. The incidental take of migratory birds (i.e., the unintentional take of birds as a result of an activity but not the purpose of the activity) is not an enforceable action under MBTA.
2. The Migratory Bird Program working with the Office of the Solicitor will develop additional guidance on the definition of "purposeful take" including how "intent", "knowingly", and "illegal actions" all relate to purposeful take. This guidance will address what actions are considered purposeful take and require authorization or a permit under the MBTA (50 CFR Part 21), and will be made available to all Service offices, partners and the general public.
3. The Endangered Species Act (16 U.S.C. 35 § 1531 et seq.) and the Bald and Golden Eagle Protection Act (16 U.S.C. § 668-668c), as well as some State laws and regulations are not affected by M-Opinion 37050.
4. Currently, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds* and all Memoranda of Understanding (MOUs) developed between Federal Agencies and the Service are still valid. These MOUs describe how the Service and the partnering agency will collaboratively and voluntarily address migratory bird issues when the agency missions and activities intersect. The MBTA, Executive Order, or the subsequent MOUs do not provide the Service the authority to compel another federal agency to require mitigation from a permittee to offset their project impacts to migratory birds or their habitats.
5. The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 et seq.) provides a process under which federal actions must evaluate impacts on the human environment [to include the natural and physical environment and the relationship of people with that environment (40 C.F.R. § 1508.14)] and provide transparency to the American public. Birds are part of the human environment, and should be included in any environmental review process as directed by NEPA.
6. The Service will continue work with any partner that is interested in voluntarily reducing impacts to migratory birds and their habitats. We will continue to develop best management practices (BMPs) to protect migratory birds and their habitats in partnership with any industry, federal, state, and tribal entity as interest dictates In the course of project review, the Service will continue to provide comments and recommendations regarding the conservation of migratory birds through our advisory role under other authorities, including NEPA and the Fish and Wildlife Coordination Act (16 U.S.C. 661-

667e) and through use of voluntary guidance such as the Land-Based Wind Energy Guidelines. The Service will ensure that our comments, recommendations, or requirements are not based on, nor imply, authority under the MBTA to regulate the incidental take of migratory birds. The Service will clearly communicate the relevant authorities under which we make our recommendations.

INFORMATION MEMORANDUM FOR THE DEPUTY DIRECTOR

DATE: 10 January 2018

FROM: Assistant Director for Migratory Birds

SUBJECT: Migratory Bird Treaty Act Regulation

I. STATEMENT OF PURPOSE

The Service proposes to develop a regulation providing clarity to actions that are prohibited under the Migratory Bird Treaty Act (MBTA). This regulation would define purposeful take of migratory birds in accordance with the definitions of prohibited actions as described in the MBTA. The regulation would also define unintentional take as acts that are not prohibited under the MBTA.

II. BACKGROUND

On 22 December 2017, the Department of Interior released a legal opinion (M-37050) on the incidental take of migratory birds under the MBTA. That opinion concluded that the MBTA's prohibition on pursuing, hunting, taking, capturing, killing, or attempting to do the same applies only to direct and affirmative purposeful actions that reduce migratory birds, their eggs, or their nests, by killing or capturing, to human control. The Service proposes to implement this opinion via a regulation to ensure there is clarity on what actions are and are not prohibited under the MBTA.

III. DISCUSSION

The Service proposes to move forward with the development of a regulation and the accompanying environmental review as required under the National Environmental Policy Act (NEPA). This regulation will define what actions are purposeful take and prohibited under the MBTA and those that are incidental to a lawful activity and thus not prohibited. Such a regulation would provide legal clarity for both the Service's Office of Law Enforcement and Industry; something that has been lacking under previous interpretations of the MBTA.

The promulgation of a regulation would necessitate compliance with NEPA, and a determination of what level of NEPA is required must be made (e.g., a Categorical Exclusion, Environmental Assessment, or Environmental Impact Statement). [redacted]

United States Department of the Interior
Washington, D.C. 20240
MEETING MEMORANDUM FOR THE SECRETARY

DATE: March 19, 2018
TIME: March 21, 2018 at 2:15pm
FROM: Greg Sheehan, Principal Deputy Director, U.S. Fish and Wildlife Service
SUBJECT: Secretary Meeting with David Yarnold, President & CEO, Audubod Society

---

I. STATEMENT OF PURPOSE

To inform issues that may be raised by the National Audubon Society during their upcoming visit with the Secretary.

II. PARTICIPANTS

Internal
Secretary Zinke
Principal Deputy Director Sheehan
Downey Magallanes

External
David Yarnold

III. BACKGROUND

- The National Audubon Society has over 500 chapters and 1 million members
- The National Audubon Society has 5 main bird conservation initiatives
  1. **Bird Conservation**: Audubon is a consistent advocate for core laws protecting birds such as the Migratory Bird Treaty Act, Neotropical Migratory Bird Conservation Act, and Endangered Species Act, and also for the high-value bird habitat within the National Wildlife Refuge System. Audubon is currently focused on passing the Agreement for the Conservation of Albatrosses and Petrels, which would address persistent threats to some of the world's most imperiled birds.
  2. **Ecosystem Restoration**: Audubon advocates for protection and restoration of ecosystems from the Everglades to the Mississippi River to the sagebrush steppe.
  3. **Conservation Funding**: Audubon advocates for conservation programs with the greatest benefit for bird conservation, including State Wildlife Grants, the Land and Water Conservation Fund, the North American Wetlands Conservation Act, and the Neotropical Migratory Bird Conservation Act.
  4. **Climate and Energy**: Audubon's new climate modeling shows that 314 North American bird species are threatened with extinction due to climate change. Audubon advocates for policies that reduce greenhouse gas emissions, climate adaptation strategies that protect birds, and energy siting policies and practices that allow renewable energy to be deployed with minimal impacts on birds and their habitats.
  5. **Alaska Conservation**: Audubon is the only national conservation group with both a significant presence in the state and also full time lobbying representation in Washington, and has lobbied to protect the Arctic National Wildlife Refuge from drilling for more than 25 years.

IV. DISCUSSION

- The National Audubon Society may be interested in discussing their conservation initiatives and how they line up with the Secretary's priorities
- Audubon has expressed an interest in finding ways to work together with the Department and the Fish and Wildlife Service for bird conservation
- Concerns that have been raised by Audubon recently include:
  1. Decreases in DOI budget and impacts to bird conservation programs
  2. Changes in bird conservation policy (related to the Department's M-Opinion)
  3. The importance of public lands for bird conservation and the use of public lands for energy development where they overlap with Important Bird Areas designated by Audubon

V. TALKING POINTS/REMARKS

- Wildlife watching was the most popular recreational activity on refuges, attracting a new all-time high of 35.6 million participants.
- In 2017, 13.9 million refuge visitors took wildlife and nature photos, an increase of 80 percent in participation in the last five years.
- There are more than 700 species of birds on National Wildlife Refuges.
- More than 200 refuges were created specifically to protect, manage and restore habitat for migratory birds.
- In 2014, five national wildlife refuges earned places on a USA Today "10 best" list for bird-watching. https://www.fws.gov/refuges/news/RefugesPollHighBirding.html
  #3 of 10: Bosque del Apache
  #5: Aransas NWR
  #6: Sanibel Island/Ding Darling NWR
  #9: Lower Rio Grande Valley of Texas/Laguna Atascosa NWR and Santa Ana NWR

- In addition, local Audubon chapters often work closely with local refuges to organize bird walks, birding and nature festival field trips, presentations, and photography trips, and Audubon members also volunteer at refuges.

United States Department of the Interior

FISH AND WILDLIFE SERVICE

Washington, D.C. 20240

In Reply Refer To:
FWS/AMB/067711

Memorandum

To: Service Directorate

From: Principal Deputy Director

Subject: Guidance on the recent M-Opinion affecting the Migratory Bird Treaty Act

To ensure consistency with the recently issued M Opinion, the Fish and Wildlife Service (FWS) is modifying some policies and practices within its programs. This memorandum provides guidance to clarify what constitutes prohibited take, what actions must be taken when conducting lawful intentional take (e.g., obtain a permit via 50 C.F.R. Part 21), and what changes to prior practice should be made in light of the M-Opinion.

The M-Opinion concludes that the take of birds resulting from an activity is not prohibited by the MBTA when the underlying purpose of that activity is not to take birds. We interpret the M-Opinion to mean that the MBTA's prohibitions on take apply when the *purpose* of an action is to take migratory birds, their eggs, or their nests. Conversely, the take of birds, eggs or nests occurring as the result of an activity, the purpose of which is not to take birds, eggs or nests, is not prohibited by the MBTA.

The mission of the Service is to work with others to conserve, protect, and enhance fish, wildlife, plants, and their habitats for the continuing benefit of the American people. Migratory bird conservation remains an integral part of our mission. Further:

1. The Endangered Species Act (16 U.S.C. 35 § 1531 et seq.; ESA) and Bald and Golden Eagle Protection Act (16 U.S.C. §§ 668-668c; Eagle Act), as well as some State laws and regulations are not affected by the M-Opinion.

2. The National Environmental Policy Act (NEPA, 42 U.S.C. § 4321 et seq.) provides a process under which federal agencies must evaluate the impacts of their actions on the human environment [including the natural and physical environment and relationship of people with that environment (40 C.F.R. § 1508.14)] and provide transparency to the American public. Birds are part of the human environment, and should be included in relevant environmental review processes as directed by NEPA.

The Service will continue to work with any partner that is interested in voluntarily reducing impacts to migratory birds and their habitats. We will continue to develop best management practices to protect migratory birds and their habitats in partnership with any industry, federal, state, and tribal entity as interest dictates, and in the course of project review, will continue to

provide recommendations through our advisory role under other authorities, including NEPA and the Fish and Wildlife Coordination Act (16 U.S.C. §§ 661-667e). The Service will clearly communicate relevant authorities under which we make our recommendations. The Service will ensure that our comments, recommendations, or requirements are not based on, nor imply, authority under the MBTA to regulate incidental take of migratory birds. Furthermore, the Service will not withhold a permit, request, or require mitigation based upon incidental take concerns under the MBTA. Attached is a set of questions and answers that serve to clarify the effect of the M-Opinion.

If you have additional questions, please contact the Migratory Bird Program, 202-208-1050.

FREQUENTLY ASKED QUESTIONS REGARDING IMPLEMENTATION OF THE M-OPINION

1. **Clarity on the distinction between *intent* to take a bird versus *knowing* a bird will be taken. Does the underlying legality of an activity that takes birds affect that distinction and does *reducing a bird to possession* have any bearing on the situation? The following examples are real situations the Service may face under the new M-Opinion:**

    a. **A State Department of Transportation wants to paint a bridge. Prior to painting the bridge, all Barn Swallow nests are pressure washed off the bridge, which would result in destruction of eggs and death of nestlings. Is the intentional removal of nests prior to painting the bridge intentional take and does it require a permit prior to the action?**

    Answer: Yes. The intentional removal of active barn swallow nests, killing eggs and nestlings, is an affirmative act that has the taking of active nests and contents as its purpose. Because this example stipulates that the removal of nests prior to painting was purposeful, a permit would be required to legally authorize this activity. If the intent was to simply paint the bridge and the nests were accidentally destroyed incidental to that process, that destruction would not violate the MBTA.

    b. **A homeowner knows that Chimney Swifts are nesting in their chimney. If the homeowner lights a fire and destroys the nests, is this considered intentional take or incidental take under the M-Opinion?**

    Answer: Possibly either, but more information is needed to determine whether the homeowner lit the fire to intentionally destroy swift nests or simply lit the fire to heat the house. The difference between this activity and the previous example is the subjective purpose of the activity. The intentional destruction of chimney swift nests by lighting a fire would constitute an intentional act, the purpose of which is to destroy nests. Whether lighting the fire violates the MBTA in that scenario would also depend on whether nests are active and contain eggs, young, or adult birds that could not escape quickly enough. A permit would be required to legally authorize this activity if the purpose is to destroy nests and they are active. A permit would not be needed if the homeowner lit the fire for the purpose of heating the house regardless of whether they were aware of swift nests in the chimney. Note that although knowledge of the presence of a nest or nests before lighting a fire would not be enough by itself to constitute a violation of the Act, it could be used as evidence to show the homeowner did in fact light the fire with the purpose of destroying the nests.

c. **Is removing a structure (e.g., dilapidated barn) with known nesting owls in the barn, which will die with the destruction of the barn, a violation of MBTA? How does knowledge or reasonable foreseeability that that an activity will kill birds affect whether that action violates the MBTA?**

Answer: This would not be a violation of the MBTA. Removing or destroying the structure would rarely if ever be an act that has killing owl nestlings as its purpose. Again, the purpose of the activity determines whether this is an MBTA violation. Unless the purpose of removing the structure was in fact to kill the owls, their deaths would be incidental to the activity of removing the barn. The landowner's knowledge, or whether it was reasonably foreseeable, that destroying the barn would kill the owls is not relevant. All that is relevant is that the landowner undertook an action that did not have the killing of barn owls as its purpose.

This same analysis would apply to other structures, such as bridges.

d. **A rancher shoots Black Vultures on his property without obtaining a depredation permit (50 C.F.R. § 21.41 – Depredation Permits). The rancher leaves the dead birds without subsequently collecting (possessing) them. Does the desire to, or failure to reduce a bird to possession affect whether that action violates the MBTA?**

Answer: Shooting Black Vultures without a permit violates the MBTA because it is an affirmative action that has killing birds as its purpose. The traditional definition of the term "take" includes reducing wildlife to human control, as noted in the M-Opinion. However, purposeful killing does not necessarily require any desire or affirmative action to gain possession of the birds. Shooting and killing migratory birds renders them subject to human control whether or not the shooter physically takes possession of the bodies. In fact, this issue was expressly addressed in footnote 132 of the M-Opinion: "We note that this language makes clear that the sort of 'human control' referred to by Justice Scalia includes the act of intentionally killing even in the absence of further intent to reduce the particular animal to human possession. Thus, intentional killing is itself a form of 'human control'." Note that shooting at and missing a black vulture would also be a violation (attempt), which obviously could not result in reducing the bird to possession.

2. **How does the legality of an activity affect the determination of whether it is an MBTA violation or not? For example, if an illegal activity kills birds, but that was not the intent of the activity (e.g., using a banned pesticide, or without following application labels in violation of Federal Insecticide Fungicide Rodenticide Act (FIFRA)) is this still considered an incidental taking that is not a violation of the MBTA?**

Answer: The legality of an activity does not affect the determination of whether it results in an MBTA violation. Thus, if the landowner in the example used the pesticide with specific intent to kill birds, it would violate the MBTA. However, if the landowner used a pesticide to purposely kill something other than migratory birds, it would not be a violation if birds die as

a result because the purpose of the act was not taking of birds. If the landowner used a pesticide with the general intent of killing wildlife, and the pesticide killed protected bird species, that could be a violation of the MBTA but liability would likely turn on the facts of the specific case. Note, applying a pesticide illegally in a way that ends up killing birds when they are not the intended target may not be an MBTA violation, but the fact that birds died may still provide additional evidence for prosecuting the FIFRA violation.

3. **How does the M-Opinion affect existing statutory amendments to the MBTA that specifically address incidental take, such as P.L. 107-314, Sec. 315 and subsequent regulation (50 C.F.R. § 21.15 – Authorization of take incidental to military readiness activities) or P.L. 114-94, Sec. 1439 (the FAST Act)?**

   Answer: The M-Opinion does not affect the military-readiness rule at 50 C.F.R. § 21.15, which was the result of Congress's direction to the Secretary of the Interior to prescribe regulations authorizing incidental take of migratory birds during military-readiness activities. Thus, the Secretary could only withdraw the rule if directed to do so through subsequent legislation. As the M-Opinion explains, "Congress was acting in a limited fashion to preempt a specific and immediate impediment to military-readiness activities." M-Opinion, p. 31. FWS and the Department of Defense (DOD) should continue to follow the requirements of the military-readiness rule. Nonetheless, incidental take of migratory birds by DOD does not violate the MBTA, regardless of whether DOD is complying with the terms of the military-readiness rule.

   The FAST Act authorizes take of nesting swallows that interfere with bridge construction in certain circumstances. In most circumstances, such take would be considered purposeful and thus prohibited by the MBTA. Accordingly, the M-Opinion should not affect authorization of the take of active swallow nests. To the extent the FAST Act was intended to authorize incidental take, the terms of that statute should still be complied with for the same reasons discussed above for the military-readiness rule legislation.

4. **What effect does the M-Opinion have on current settlement agreement negotiations to address incidental take of migratory birds or court-mandated permits resulting from past settlement agreements?**

   Answer: Current settlement agreement negotiations should not address incidental take of migratory birds for purposes of enforcing the MBTA, but may still include measures necessary to comply with other relevant statutes when appropriate (for example statutes implemented by the Natural Resource Damage Assessment and Restoration program (NRDAR, as explained below). The Department is currently reviewing the Service's position on current negotiations to address incidental take of bald and golden eagles under the Eagle Act. These species are also covered under the MBTA. The Service has brought seven enforcement actions against companies for incidental take of eagles since 2015, which included both MBTA and Eagle Act charges. Only one of these remains unresolved; the other six were resolved through settlement agreements. The Service will no longer pursue MBTA charges against projects that cause eagle deaths, but the M-Opinion does not affect the Service's ability to bring Eagle Act claims in these cases.

We are not aware of any court-authorized settlement agreements that mandate obtaining a permit to cover future incidental take of migratory birds under the MBTA. Since 2013, the Department of Justice has brought two prosecutions for take of eagles and species protected only by the MBTA. These prosecutions were resolved at the request of defendants based on MBTA violations only, although the conduct could also have been charged under the Eagle Act with regard to the eagle deaths. These plea agreements provided that companies must implement plans aimed at preventing bird deaths at eight commercial wind projects and apply for eagle permits to cover incidental take of eagles under the Eagle Act. The Service Chief of Law Enforcement's Directive applying to civil administrative enforcement of avian take at wind projects includes a limited option for settlements to resolve violations of the MBTA. However, that option is no longer operable after issuance of the M-Opinion. We are currently determining whether the M-Opinion will require the Service to revisit past settlement agreements that require ongoing implementation of best management practices to avoid or reduce incidental take of migratory birds by wind-energy facilities and other industrial activities.

5. **How does the M-Opinion affect the Natural Resources Damage Assessment program (i.e., specifically related to oil spills)?**

   Answer: The M-Opinion does not directly affect the NRDAR program because statutory authorities that provide the basis for the program do not include the MBTA. Pursuant to Comprehensive Environmental Response Compensation and Liability Act, Oil Pollution Act, and Clean Water Act, the Department is authorized to assess injury to natural resources caused by releases of hazardous substances and discharges of oil to compensate the public for lost natural resources and their services. The Department's assessment of natural resource injuries under the NRDAR program include any injury to migratory birds, which in many cases could otherwise be classified as incidental take.

   In practice, however, the M-Opinion will have an effect on future claims seeking fines or penalties for violations of the MBTA from companies responsible for oil spills and hazardous releases. In addition to pursuing damage claims under the NRDAR program, the Department has pursued MBTA claims against companies responsible for oil spills that incidentally killed or injured migratory birds. That avenue is no longer available.

6. **How does the M-Opinion affect consultations or habitat conservation plans under sections 7 and 10 of the ESA?**

   Answer: When processing Habitat Conservation Plans under Section 10 or consulting on Section 7 of the ESA, incidental take coverage should only include listed species listed under the ESA. As concluded in the M-Opinion, incidental take of migratory birds is not prohibited so no restrictions, minimization measures, or mitigation should be part of an incidental take permit or an incidental take statement for purposes of the MBTA (rather than the ESA). An applicant or federal government action agency can take voluntary measures related to migratory birds but it must be made clear that no such actions are required by the MBTA.

7. How does the M-Opinion affect technical assistance under the Avian and Bat Conservation Plans?

Answer: Technical assistance can still be given in development of Avian and Bat Conservation Plans. However, any suggestions or guidance related to migratory birds must be relayed as completely voluntary actions. Part of the technical assistance should include the statement that incidental take of migratory birds is not prohibited by the MBTA.

USFWS Accomplishments – CY 2018 (4/11/2018)

Create a conservation stewardship legacy second only to Teddy Roosevelt.

- FWS is implementing the several Secretarial Orders designed to expand access and information for hunting, angling and outdoor recreation, including Secretarial Order 3356 on hunting, fishing, and recreational shooting. Accomplishments include:
    - Reassigning 12 FWS employees across the country to work full time on hunting and fishing access issues and regulatory assessments with the goal of better aligning with state regulations and opening another 186,500 acres by this fall, and identifying more than 250,000 total new acres by the end of the calendar year.
    - Focusing on making information on hunting, fishing and outdoor recreation on public lands more accessible to the public, while supporting state's recruiting, retention, and reactivation efforts.
    - Planning to propose elimination of over 1,400 lines of unnecessary and overly restrictive hunting and fishing regulations, and simplify another 700 in the next 60 days.
    - Working with state and federal partners to help implement the recent (February) Secretarial Order 3362 – emphasizes identifying key migration habitat for big-game species; and facilitating migration across federal, state and private lands.

- Endangered Species Act
    - Final delisting: Eureka Valley evening-primrose https://www.doi.gov/blog/eureka-rare-wildflower-pulled-brink-extinction
    - Final downlisting: Eureka dune grass
    - Proposed delisting:
        - Monito gecko
        - Kirtland's Warbler https://www.doi.gov/blog/michigans-bird-fire-rises-ashes
        - Black-Capped Vireo
        - Foskett Speckled Dace
    - Proposed downlisting:
        - Humpback chub
        - Nene (Hawaiian Goose) http://usfwspacific.tumblr.com/post/172417973280/hawaiis-state-bird-is-on-the-road-to-recovery

- Final Rule revision to the Federal Migratory Bird Hunting and Conservation Stamp Regulations to more prominently feature the contribution of hunters to conservation https://www.fws.gov/news/ShowNews.cfm?ref=federal-duck-stamp-theme-will-celebrate-the-conservation-achievement-of--&_ID=36234

- Announced more than $1.1 billion in grants to state wildlife agencies from revenues generated by the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration (PRDJ) acts. https://www.doi.gov/pressreleases/secretary-zinke-announces-more-that-11-billion-sportsmen-conservation

- Hosted the first meeting of the Secretary's International Wildlife Conservation Commission (IWCC) on March 16, 2018.

- Hosted the meeting of the Sport Fishing and Boating Partnership Council Meeting with new guidance under the priorities of Secretary Zinke.

Restore trust and be a good neighbor.

- Under a new and far-reaching state-federal partnership, the health and well-being of the endangered red-cockaded woodpecker is tied to the U.S. Marine Corps mission at Camp Lejeune. An agreement between FWS, the military, the National Fish and Wildlife Foundation and the state of North Carolina allows Lejeune to expand training through prime woodpecker territory. In return, the so-called Recovery and Sustainment Program, or RASP, should boost the woodpecker population across eastern North Carolina. https://www.fws.gov/southeast/articles/marines-and-woodpeckers-share-the-high-ground/

- While proposing to list the Louisiana pine snake as a threatened species under the ESA, FWS also proposed a special rule under section 4(d) of the law that will allow protections to be tailored to those that provide the greatest benefit to the snake and limits the regulatory burden on the forestry community, allowing most traditional management practices to remain in place.

- Announced a $60 million cooperative agreement with the Recreational Boating and Fishing Foundation (RBFF) to help retain and recruit recreational anglers and boaters. https://www.doi.gov/pressreleases/secretary-zinke-announces-more-that-11-billion-sportsmen-conservation

- Announced $14 million in Boating Infrastructure Grants (BIG) which support water-related outdoor recreation and tourism by improving facilities for large transient recreational boats across the country. https://www.doi.gov/pressreleases/secretary-zinke-announces-more-that-11-billion-sportsmen-conservation

- Launched the *Nature's Good Neighbors campaign,* a series of stories showcasing public partners who are acting as conservationists across the country. www.fws.gov/natures-good-neighbors/

Strike a regulatory balance.

- Submitted to OMB proposed revisions to Sections 4 and 7 regulations of the ESA. These changes are part of the FWS' ongoing efforts to improve implementation of the ESA so that it is clear, consistent and flexible to the greatest extent possible, and encourages collaborative conservation from a broad range of partners.

- Reversed the previous administration's M-Opinion on the Migratory Bird Treaty Act and modified policies to ensure consistency with the new Opinion. The M-Opinion concludes

that the take of birds resulting from an activity is not prohibited by the MBTA when the underlying purpose of that activity is not to take birds.

- Secretarial Order 3355 on streamlining National Environmental Policy Act (NEPA) reviews and implementation of EO 13807 was signed August 31, 2017. FWS issued a memo in December recommending actions to streamline the NEPA process in accordance with SO 3355, including development of additional guidance and training, as well as streamlining internal review processes. FWS has stood up a team to implement the EO.

Modernize our infrastructure.

- The FY19 budget included a legislative proposal to establish a new Public Lands Infrastructure Fund to help pay for repairs and improvements in national parks, national wildlife refuges and BIE schools. FWS maintenance backlogs exceeding $1.4 billion will now be addressed by this administration after lacking appropriate consideration under the prior administration.

- Congress passed hurricane supplemental included $210 million for FWS to repair and restore hurricane damaged infrastructure following Hurricanes Harvey, Irma and Maria

Reorganize DOI for the next 100 years.

- FWS is realigning our Budget and Administration (BA) operations nationwide under a single chain of command, known as Joint Administrative Operations (JAO). This realignment will improve customer service and save American taxpayers $8 million annually beginning in FY 2018.

Achieve our goals and lead our team forward.

- FWS presented last year's Federal Employee Viewpoint Survey (FEVS) results to employees and developed internal strategy to increase response rate and highlight actions we are taking to increase scores. FWS was among the highest scoring in DOI and in upper tiers of US government.

- The FWS Anti-Harassment Action Plan was approved by the Department and in April we will begin present the plan to employees in mid-April with the launch of a new hotline and other tools to combat unacceptable harassment in the workplace.

USFWS Accomplishments – CY 2018 (4/11/2018)

Create a conservation stewardship legacy second only to Teddy Roosevelt.

- FWS is implementing the several Secretarial Orders designed to expand access and information for hunting, angling and outdoor recreation, including Secretarial Order 3356 on hunting, fishing, and recreational shooting. Accomplishments include:
    - Reassigning 12 FWS employees across the country to work full time on hunting and fishing access issues and regulatory assessments with the goal of better aligning with state regulations and opening another 200,000 acres by the end of this year.
    - Focusing on making information on hunting, fishing and outdoor recreation on public lands more accessible to the public, while supporting state's recruiting, retention, and reactivation efforts.
    - Reviewing refuge-specific hunting and sport fishing regulations in 50 CFR Part 32 for approximately 8,000 lines of regulations and provided recommendations to keep, modify or delete each regulation.
    - We are working with state and federal partners to help implement the recent (February) Secretarial Order 3362 – emphasizes identifying key migration habitat for big-game species; and facilitating migration across federal, state and private lands.

- Endangered Species Act
    - Final delisting: Eureka Valley evening-primrose https://www.doi.gov/blog/eureka-rare-wildflower-pulled-brink-extinction

c. RECOMMENDATION BY THE DEPUTY SECRETARY

d. ACTION ITEM FOR SECRETARY (if applicable)

IV. BALTIMORE-WASHINGTON PARKWAY

Interest from the State of Maryland and private companies for several different proposals to use the Baltimore-Washington Parkway to improve transportation along the Northeast Corridor.

a. ISSUE BACKGROUND

One proposal calls for transfer of the parkway to the State of Maryland for expanded lanes, including tolling capacity. Another proposal is for a maglev rail line primarily on private land, partially underground, along the parkway corridor. Another proposal is by The Boring Company to construct two parallel 14-ft wide tunnels below the parkway for a future transit system. That system would also require branch tunnels every mile for egress and ventilation. All of the proposals have substantial environmental and historical implications. Changes in legislation may be necessary for some of these proposals.

b. ACTIONS TAKEN BY HALLWAY

There has been no significant action on the transfer proposal. The NPS is a cooperating agency on a federal railroad EIS for the maglev proposal, a draft of which will not be released until early 2019. DOI and NPS are meeting bi-weekly and have met several times with The Boring Company. DOI/NPS have also met with DOT officials (Federal Highway Administration and Federal Railway Administration) and it was determined that DOT would be the lead agency for NEPA cooperation and that the NPS would be a cooperating agency on the Boring Company proposal.

c. RECOMMENDATION BY THE DEPUTY SECRETARY

Supports.

d. ACTION ITEM FOR SECRETARY (if applicable)

N/A

V. NPS PROPOSED REGULATION TIME, PLACE, MANNER

a. ISSUE BACKGROUND

b. ACTIONS TAKEN BY HALLWAY

c. RECOMMENDATION BY THE DEPUTY SECRETARY

d. ACTION ITEM FOR SECRETARY (if applicable)

VI. SUPERINTENDENT CAREER PATH

The NPS was asked to prepare a proposal to address a lack of clarity around superintendent career paths.

a. ISSUE BACKGROUND

Many employees across the NPS aspire to serve in a position of leadership in a park, program, or technical area. The ultimate goal for some is to become a superintendent of a park. When asking current superintendents about their career paths, an employee will receive a wide-array of answers, as the path to superintendency is as varied as the parks. The Secretary and Deputy Secretary have shared their interest in a more robust career development pathway for superintendent positions in the NPS. The NPS has developed a proposed plan and is seeking concurrence.

b. ACTIONS TAKEN BY HALLWAY

The NPS prepared a decision briefing memo outlining options for a plan to create a more robust career development pathway for superintendent positions. The memo is currently under review in the Deputy Secretary's office.

c. RECOMMENDATION BY THE DEPUTY SECRETARY

Awaiting response from the Deputy Secretary's office.

d. ACTION ITEM FOR SECRETARY (if applicable)

N/A

VII. ANTI-HARASSMENT EFFORTS

The NPS is taking a comprehensive and multi-pronged approach to prevent and respond to harassing conduct. Strategic interventions, based on the Work Environment Survey (WES) results, are summarize in the NPS action plan.

a. ISSUE BACKGROUND

Since November 2016, the Office of Inspector General has issued several reports related to sexual harassment and retaliation in the NPS. WES indicated that 38.7 percent of NPS employees experienced harassment or discrimination in the twelve months preceding the survey.

b. ACTIONS TAKEN BY HALLWAY

Major actions already taken by the NPS include creating the Ombuds office, launching the Women's Employee Resource Group, twice issuing the WES, widely sharing survey results with employees and stakeholders, and revising and strengthening Director's Order 16E: Anti-harassment Policy (DO). The NPS action plan for 2018 focuses on three major initiatives: listen and learn, support and develop, and monitor and improve. A top priority is to issue Reference Manual 16E which will provide step-by-step instructions to enforce the new DO and improve accountability. The NPS will also offer relevant trainings to empower and educate employees and supervisors and hire 10

Employee Relations staff to ensure all allegations of harassing conduct are addressed promptly, professionally, and consistently. A harassing conduct tracking system will also be developed so trends can be monitored and adjustments made as needed.

c. RECOMMENDATION BY THE DEPUTY SECRETARY

Awaiting response.

d. ACTION ITEM FOR SECRETARY (if applicable)

N/A

VIII. FEES

In October 2017, the NPS proposed peak season entrance fee increases at 17 highly visited parks to generate revenue for improvements to ageing infrastructure and other visitor services.

a. ISSUE BACKGROUND

FLREA authorizes the NPS to collect entrance fees to be used at the unit earned for services that directly impact visitors. The top fee collecting parks bring in 90% of the NPS fee revenue. NPS revenue in FY 2017 was $287 million. In October 2017, the NPS announced a proposal to implement seasonal pricing in 17 high-revenue, high-visitation parks.

b. ACTIONS TAKEN BY HALLWAY

The NPS is required by law to conduct civic engagement prior to raising fees. A 30-day public comment period was opened and later extended an additional 30 days due to public demand. The combined comment periods yielded 109,000 comments. The contractor's analysis of the comments is due to NPS by February 19, 2018. The NPS is preparing several alternatives to the seasonal fee proposal announced in October, should the Department decide to explore other options for implementation. The Acting Director has asked the NPS to provide analysis on four options. Analysis is complete on two of those options. We anticipate completing the last two shortly.

Update from Fish & Wildlife Service:
Review of the Department of the Interior Actions
That Potentially Burden Domestic Energy

i. Streamline Rights-of-way (ROW) for pipelines and electricity transmission.

FWS anticipates revising its right-of-way regulations (50 CFR 29.21) to streamline its process for granting rights-of-way for pipelines and electricity transmission in 2019.

ii. Review Incidental Take Regulations for oil and gas activities in the Southern Beaufort Sea and Chukchi Sea, under the Marine Mammal Protection Act (MMPA)

The Service has not received an application for new Incidental Take Regulations for the Chukchi Sea. We assume the lack of an application means the industry is not planning activities in the near future that would have the potential to incidentally take marine mammals. We have, however, reminded industry of the time it takes to process an application and issue ITRs so that they consider that in their planning.

The Service is discussing with BLM whether there is a need for marine mammal incidental take coverage related to industry activities in the 1002 area, including the possible need for revision of the existing Southern Beaufort Sea ITRs to include the 1002 area or the need to issue new ITRs specific to the 1002 area.

iii. Modernize Guidance and regulations governing interagency consultation pursuant to Section 7(a)(2) of the Endangered Species Act

The Service and the National Marine Fisheries Service have drafted proposed revisions to our regulations governing consultation under Section 7(a)(2) and expect those revised regulations to be submitted to OMB within the next 30 days for interagency review and clearance.

iv. Build Upon the Efforts of the Western Governors' Association and Others to Improve the Application of the Endangered Species Act, Reduce Unnecessary Burdens on the Energy Industry, and Facilitate Conservation Stewardship

The Service has issued new policy requiring state participation in Species Status Assessments informing petition findings, listing determinations, recovery plans, 5 year reviews, and other ESA related decisions and has reflected that policy direction on state involvement into an agency priority goal in the Department's Strategic Plan.

v. Re-Evaluate Whether the MBTA Imposes Incidental Take Liability and Clarify Regulatory Authorities.

On December 22, 2017, the solicitor issued a new M-opinion (M-Opinion 37050) interpreting that the MBTA does not prohibit the incidental or accidental take of migratory birds. The Service is working with solicitors to develop policy guidance to implement this legal opinion.

[redacted]

INFORMATION MEMORANDUM FOR THE DIRECTOR

DATE: **February 12, 2018**

FROM: **Assistant Director for Migratory Birds**

SUBJECT: **Interim Guidance Regarding M-Opinion 37050**

I. STATEMENT OF PURPOSE

Since the publication of M-Opinion 37050, the U.S. Fish and Wildlife Service (Service) has received numerous questions regarding how to apply the Opinion to our actions under the Migratory Bird Treaty Act (MBTA) and migratory bird conservation in general. Guidance is needed to provide clarity to Service staff, other Federal Agencies, project proponents, and the general public.

II. BACKGROUND

Implementation of this M-Opinion will require changes to practices across the Service. The Migratory Bird Program is working with other Service programs and the Department to develop more comprehensive guidance to clarify how this opinion affects existing policies and procedures. More detailed guidance will be needed. In the meantime, the Migratory Bird Program, in consultation with Ecological Services, has developed interim guidance and talking points (attached) to provide an initial overview of how the Service plans to integrate the M-Opinion into day-to-day activities.

III. POSITIONS OF AFFECTED STAKEHOLDERS

Federal agencies, States and other stakeholders are seeking clarification on the M-Opinion and how it will impact the Service's implementation of the MBTA. A clear definition of what constitutes purposeful take and what activities are prohibited under the MBTA is needed.

IV. NEXT STEPS

- Coordinate with Office of the Solicitor to clarify the definition of purposeful take – including how "intent", "knowingly", "illegal actions" all relate to purposeful take and determine if existing migratory bird settlement agreements are affected.
- Coordinate with Office of Law Enforcement, Ecological Services, and Refuges on more comprehensive Service-wide guidance disseminated by the Principle Deputy Director.

V. RECOMMENDATION

If the desire is to codify the M-Opinion and associated definitions in order to provide implementation certainty and consistency, then a regulatory approach would be the **recommendation**.

ATTACHMENTS

Interim Guidance Pertaining to Implementing Migratory Bird Conservation Actions under the Migratory Bird Treaty Act.

The mission of the U.S. Fish and Wildlife Service (Service) is to work with others to conserve, protect, and enhance fish, wildlife, plants, and their habitats for the continuing benefit of the American people. Migratory bird conservation remains an integral part of our mission. The Service will work to integrate the M-Opinion 37050 into our day-to-day activities while continuing to deliver quality bird conservation across the United States. In the interim, we offer the following information to serve until further guidance is developed.

1. The incidental take of migratory birds (i.e., the unintentional take of birds as a result of an activity but not the purpose of the activity) is not an enforceable action under MBTA.
2. The Migratory Bird Program working with the Office of the Solicitor will develop additional guidance on the definition of "purposeful take" including how "intent", "knowingly", and "illegal actions" all relate to purposeful take. This guidance will address what actions are considered purposeful take and require authorization or a permit under the MBTA (50 CFR Part 21), and will be made available to all Service offices, partners and the general public.
3. The Endangered Species Act (16 U.S.C. 35 § 1531 et seq.) and the Bald and Golden Eagle Protection Act (16 U.S.C. § 668-668c), as well as some State laws and regulations are not affected by M-Opinion 37050.
4. Currently, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds* and all Memoranda of Understanding (MOUs) developed between Federal Agencies and the Service are still valid. These MOUs describe how the Service and the partnering agency will collaboratively and voluntarily address migratory bird issues when the agency missions and activities intersect. The MBTA, Executive Order, or the subsequent MOUs do not provide the Service the authority to compel another federal agency to require mitigation from a permittee to offset their project impacts to migratory birds or their habitats.
5. The National Environmental Policy Act (NEPA, 42 U.S.C. 4321 et seq.) provides a process under which federal actions must evaluate impacts on the human environment [to include the natural and physical environment and the relationship of people with that environment (40 C.F.R. § 1508.14)] and provide transparency to the American public. Birds are part of the human environment, and should be included in any environmental review process as directed by NEPA.
6. The Service will continue work with any partner that is interested in voluntarily reducing impacts to migratory birds and their habitats. We will continue to develop best management practices (BMPs) to protect migratory birds and their habitats in partnership with any industry, federal, state, and tribal entity as interest dictates In the course of project review, the Service will continue to provide comments and recommendations regarding the conservation of migratory birds through our advisory role under other authorities, including NEPA and the Fish and Wildlife Coordination Act (16 U.S.C. 661-

667e) and through use of voluntary guidance such as the Land-Based Wind Energy Guidelines. The Service will ensure that our comments, recommendations, or requirements are not based on, nor imply, authority under the MBTA to regulate the incidental take of migratory birds. The Service will clearly communicate the relevant authorities under which we make our recommendations.

APR 11 2018

Memorandum

To: Service Directorate

From: Principal Deputy Director

Subject: Guidance on the recent M-Opinion affecting the Migratory Bird Treaty Act

To ensure consistency with the recently issued M Opinion, the U.S.Fish and Wildlife Service (FWS) is modifying some policies and practices within its programs. This memorandum provides guidance to clarify what constitutes prohibited take, what actions must be taken when conducting lawful intentional take (e.g., obtain a permit via 50 C.F.R. Part 21), and what changes to prior practice should be made in light of the M-Opinion.

The M-Opinion concludes that the take of birds resulting from an activity is not prohibited by the MBTA when the underlying purpose of that activity is not to take birds. We interpret the M-Opinion to mean that the MBTA's prohibitions on take apply when the *purpose* of an action is to take migratory birds, their eggs, or their nests. Conversely, the take of birds, eggs or nests occurring as the result of an activity, the purpose of which is not to take birds, eggs or nests, is not prohibited by the MBTA.

The mission of the Service is to work with others to conserve, protect, and enhance fish, wildlife, plants, and their habitats for the continuing benefit of the American people. Migratory bird conservation remains an integral part of our mission. Further:

1. The Endangered Species Act (16 U.S.C. 35 § 1531 et seq.; ESA) and Bald and Golden Eagle Protection Act (16 U.S.C. §§ 668-668c; Eagle Act), as well as some State laws and regulations are not affected by the M-Opinion.

2. The National Environmental Policy Act (NEPA, 42 U.S.C. § 4321 et seq.) provides a process under which federal agencies must evaluate the impacts of their actions on the human environment [including the natural and physical environment and relationship of people with that environment (40 C.F.R. § 1508.14)] and provide transparency to the American public. Birds are part of the human environment, and should be included in relevant environmental review processes as directed by NEPA.

The Service will continue to work with any partner that is interested in voluntarily reducing impacts to migratory birds and their habitats. We will continue to develop best management practices to protect migratory birds and their habitats in partnership with any industry, federal, state, and tribal entity as interest dictates, and in the course of project review, will continue to

provide recommendations through our advisory role under other authorities, including NEPA and the Fish and Wildlife Coordination Act (16 U.S.C. §§ 661-667e). The Service will clearly communicate relevant authorities under which we make our recommendations. The Service will ensure that our comments, recommendations, or requirements are not based on, nor imply, authority under the MBTA to regulate incidental take of migratory birds. Furthermore, the Service will not withhold a permit, request, or require mitigation based upon incidental take concerns under the MBTA. Attached is a set of questions and answers that serve to clarify the effect of the M-Opinion.

If you have additional questions, please contact the Migratory Bird Program, 202-208-1050.

ATTACHMENT

FREQUENTLY ASKED QUESTIONS REGARDING IMPLEMENTATION OF THE M-OPINION

1. **Clarity on the distinction between *intent* to take a bird versus *knowing* a bird will be taken. Does the underlying legality of an activity that takes birds affect that distinction and does *reducing a bird to possession* have any bearing on the situation? The following examples are real situations the Service may face under the new M-Opinion:**

    a. **A State Department of Transportation wants to paint a bridge. Prior to painting the bridge, all Barn Swallow nests are pressure washed off the bridge, which would result in destruction of eggs and death of nestlings. Is the intentional removal of nests prior to painting the bridge intentional take and does it require a permit prior to the action?**

    Answer: Yes. The intentional removal of active barn swallow nests, killing eggs and nestlings, is an affirmative act that has the taking of active nests and contents as its purpose. Because this example stipulates that the removal of nests prior to painting was purposeful, a permit would be required to legally authorize this activity. If the intent was to simply paint the bridge and the nests were accidentally destroyed incidental to that process, that destruction would not violate the MBTA.

    b. **A homeowner knows that Chimney Swifts are nesting in their chimney. If the homeowner lights a fire and destroys the nests, is this considered intentional take or incidental take under the M-Opinion?**

    Answer: Possibly either, but more information is needed to determine whether the homeowner lit the fire to intentionally destroy swift nests or simply lit the fire to heat the house. The difference between this activity and the previous example is the subjective purpose of the activity. The intentional destruction of chimney swift nests by lighting a fire would constitute an intentional act, the purpose of which is to destroy nests. Whether lighting the fire violates the MBTA in that scenario would also depend on whether nests are active and contain eggs, young, or adult birds that could not escape quickly enough. A permit would be required to legally authorize this activity if the purpose is to destroy nests and they are active. A permit would not be needed if the homeowner lit the fire for the purpose of heating the house regardless of whether they were aware of swift nests in the chimney. Note that although knowledge of the presence of a nest or nests before lighting a fire would not be enough by itself to constitute a violation of the Act, it could be used as evidence to show the homeowner did in fact light the fire with the purpose of destroying the nests.

c. **Is removing a structure (e.g., dilapidated barn) with known nesting owls in the barn, which will die with the destruction of the barn, a violation of MBTA? How does knowledge or reasonable foreseeability that that an activity will kill birds affect whether that action violates the MBTA?**

Answer: This would not be a violation of the MBTA. Removing or destroying the structure would rarely if ever be an act that has killing owl nestlings as its purpose. Again, the purpose of the activity determines whether this is an MBTA violation. Unless the purpose of removing the structure was in fact to kill the owls, their deaths would be incidental to the activity of removing the barn. The landowner's knowledge, or whether it was reasonably foreseeable, that destroying the barn would kill the owls is not relevant. All that is relevant is that the landowner undertook an action that did not have the killing of barn owls as its purpose.

This same analysis would apply to other structures, such as bridges.

d. **A rancher shoots Black Vultures on his property without obtaining a depredation permit (50 C.F.R. § 21.41 – Depredation Permits). The rancher leaves the dead birds without subsequently collecting (possessing) them. Does the desire to, or failure to reduce a bird to possession affect whether that action violates the MBTA?**

Answer: Shooting Black Vultures without a permit violates the MBTA because it is an affirmative action that has killing birds as its purpose. The traditional definition of the term "take" includes reducing wildlife to human control, as noted in the M-Opinion. However, purposeful killing does not necessarily require any desire or affirmative action to gain possession of the birds. Shooting and killing migratory birds renders them subject to human control whether or not the shooter physically takes possession of the bodies. In fact, this issue was expressly addressed in footnote 132 of the M-Opinion: "We note that this language makes clear that the sort of 'human control' referred to by Justice Scalia includes the act of intentionally killing even in the absence of further intent to reduce the particular animal to human possession. Thus, intentional killing is itself a form of 'human control'." Note that shooting at and missing a black vulture would also be a violation (attempt), which obviously could not result in reducing the bird to possession.

2. **How does the legality of an activity affect the determination of whether it is an MBTA violation or not? For example, if an illegal activity kills birds, but that was not the intent of the activity (e.g., using a banned pesticide, or without following application labels in violation of Federal Insecticide Fungicide Rodenticide Act (FIFRA)) is this still considered an incidental taking that is not a violation of the MBTA?**

Answer: The legality of an activity does not affect the determination of whether it results in an MBTA violation. Thus, if the landowner in the example used the pesticide with specific intent to kill birds, it would violate the MBTA. However, if the landowner used a pesticide to purposely kill something other than migratory birds, it would not be a violation if birds die as

a result because the purpose of the act was not taking of birds. If the landowner used a pesticide with the general intent of killing wildlife, and the pesticide killed protected bird species, that could be a violation of the MBTA but liability would likely turn on the facts of the specific case. Note, applying a pesticide illegally in a way that ends up killing birds when they are not the intended target may not be an MBTA violation, but the fact that birds died may still provide additional evidence for prosecuting the FIFRA violation.

3. **How does the M-Opinion affect existing statutory amendments to the MBTA that specifically address incidental take, such as P.L. 107-314, Sec. 315 and subsequent regulation (50 C.F.R. § 21.15 – Authorization of take incidental to military readiness activities) or P.L. 114-94, Sec. 1439 (the FAST Act)?**

   Answer: The M-Opinion does not affect the military-readiness rule at 50 C.F.R. § 21.15, which was the result of Congress's direction to the Secretary of the Interior to prescribe regulations authorizing incidental take of migratory birds during military-readiness activities. Thus, the Secretary could only withdraw the rule if directed to do so through subsequent legislation. As the M-Opinion explains, "Congress was acting in a limited fashion to preempt a specific and immediate impediment to military-readiness activities." M-Opinion, p. 31. FWS and the Department of Defense (DOD) should continue to follow the requirements of the military-readiness rule. Nonetheless, incidental take of migratory birds by DOD does not violate the MBTA, regardless of whether DOD is complying with the terms of the military-readiness rule.

   The FAST Act authorizes take of nesting swallows that interfere with bridge construction in certain circumstances. In most circumstances, such take would be considered purposeful and thus prohibited by the MBTA. Accordingly, the M-Opinion should not affect authorization of the take of active swallow nests. To the extent the FAST Act was intended to authorize incidental take, the terms of that statute should still be complied with for the same reasons discussed above for the military-readiness rule legislation.

4. **What effect does the M-Opinion have on current settlement agreement negotiations to address incidental take of migratory birds or court-mandated permits resulting from past settlement agreements?**

   Answer: Current settlement agreement negotiations should not address incidental take of migratory birds for purposes of enforcing the MBTA, but may still include measures necessary to comply with other relevant statutes when appropriate (for example statutes implemented by the Natural Resource Damage Assessment and Restoration program (NRDAR, as explained below). The Department is currently reviewing the Service's position on current negotiations to address incidental take of bald and golden eagles under the Eagle Act. These species are also covered under the MBTA. The Service has brought seven enforcement actions against companies for incidental take of eagles since 2015, which included both MBTA and Eagle Act charges. Only one of these remains unresolved; the other six were resolved through settlement agreements. The Service will no longer pursue MBTA charges against projects that cause eagle deaths, but the M-Opinion does not affect the Service's ability to bring Eagle Act claims in these cases.

We are not aware of any court-authorized settlement agreements that mandate obtaining a permit to cover future incidental take of migratory birds under the MBTA. Since 2013, the Department of Justice has brought two prosecutions for take of eagles and species protected only by the MBTA. These prosecutions were resolved at the request of defendants based on MBTA violations only, although the conduct could also have been charged under the Eagle Act with regard to the eagle deaths. These plea agreements provided that companies must implement plans aimed at preventing bird deaths at eight commercial wind projects and apply for eagle permits to cover incidental take of eagles under the Eagle Act. The Service Chief of Law Enforcement's Directive applying to civil administrative enforcement of avian take at wind projects includes a limited option for settlements to resolve violations of the MBTA. However, that option is no longer operable after issuance of the M-Opinion. We are currently determining whether the M-Opinion will require the Service to revisit past settlement agreements that require ongoing implementation of best management practices to avoid or reduce incidental take of migratory birds by wind-energy facilities and other industrial activities.

5. **How does the M-Opinion affect the Natural Resources Damage Assessment program (i.e., specifically related to oil spills)?**

Answer: The M-Opinion does not directly affect the NRDAR program because statutory authorities that provide the basis for the program do not include the MBTA. Pursuant to Comprehensive Environmental Response Compensation and Liability Act, Oil Pollution Act, and Clean Water Act, the Department is authorized to assess injury to natural resources caused by releases of hazardous substances and discharges of oil to compensate the public for lost natural resources and their services. The Department's assessment of natural resource injuries under the NRDAR program include any injury to migratory birds, which in many cases could otherwise be classified as incidental take.

In practice, however, the M-Opinion will have an effect on future claims seeking fines or penalties for violations of the MBTA from companies responsible for oil spills and hazardous releases. In addition to pursuing damage claims under the NRDAR program, the Department has pursued MBTA claims against companies responsible for oil spills that incidentally killed or injured migratory birds. That avenue is no longer available.

6. **How does the M-Opinion affect consultations or habitat conservation plans under sections 7 and 10 of the ESA?**

Answer: When processing Habitat Conservation Plans under Section 10 or consulting on Section 7 of the ESA, incidental take coverage should only include listed species listed under the ESA. As concluded in the M-Opinion, incidental take of migratory birds is not prohibited so no restrictions, minimization measures, or mitigation should be part of an incidental take permit or an incidental take statement for purposes of the MBTA (rather than the ESA). An applicant or federal government action agency can take voluntary measures related to migratory birds but it must be made clear that no such actions are required by the MBTA.

7. **How does the M-Opinion affect technical assistance under the Avian and Bat Conservation Plans?**

Answer: Technical assistance can still be given in development of Avian and Bat Conservation Plans. However, any suggestions or guidance related to migratory birds must be relayed as completely voluntary actions. Part of the technical assistance should include the statement that incidental take of migratory birds is not prohibited by the MBTA.

USFWS Accomplishments – CY 2018 (4/11/2018)

Create a conservation stewardship legacy second only to Teddy Roosevelt.

- FWS is implementing the several Secretarial Orders designed to expand access and information for hunting, angling and outdoor recreation, including Secretarial Order 3356 on hunting, fishing, and recreational shooting. Accomplishments include:
  - Reassigning 12 FWS employees across the country to work full time on hunting and fishing access issues and regulatory assessments with the goal of better aligning with state regulations and opening 186,500 acres by this fall, and identifying more than 250,000 total new acres by the end of the calendar year~~another 200,000 acres by the end of this year~~.
  - Focusing on making information on hunting, fishing and outdoor recreation on public lands more accessible to the public, while supporting state's recruiting, retention, and reactivation efforts
  - Planning to propose elimination of over 1,400 lines of unnecessary and overly restrictive hunting and fishing regulations, and simplify another 700 in the next 60 days.
  - ~~Reviewing refuge-specific hunting and sport fishing regulations in 50 CFR Part 32 for approximately 8,000 lines of regulations and provided recommendations to keep, modify or delete each regulation.~~
  - ~~We are~~ Wworking with state and federal partners to help implement the recent ~~(February)~~ Secretarial Order 3362 – emphasizes identifying key migration habitat for big-game species; and facilitating migration across federal, state and private lands.

- Endangered Species Act
  - Final delisting: Eureka Valley evening-primrose https://www.doi.gov/blog/eureka-rare-wildflower-pulled-brink-extinction
  - Final downlisting: Eureka dune grass
  - Proposed delisting:
    - Monito gecko
    - Kirtland's Warbler https://www.doi.gov/blog/michigans-bird-fire-rises-ashes
    - Black-Capped Vireo
    - Foskett Speckled Dace
  - Proposed downlising:
    - Humpback chub
    - Nene (Hawaiian Goose) http://usfwspacific.tumblr.com/post/172417973280/hawaiis-state-bird-is-on-the-road-to-recovery

- Final Rule to revise the Federal Migratory Bird Hunting and Conservation Stamp Regulations to more prominently feature the contribution of hunters to conservation https://www fws.gov/news/ShowNews.cfm?ref=federal-duck-stamp-theme-will-celebrate-the-conservation-achievement-of--&_ID=36234

- Announced more than $1.1 billion in grants to state wildlife agencies from revenues generated by the Pittman-Robertson Wildlife Restoration and Dingell-Johnson Sport Fish Restoration (PRDJ) acts. https://www.doi.gov/pressreleases/secretary-zinke-announces-more-that-11-billion-sportsmen-conservation

- Hosted the first meeting of the Secretary's International Wildlife Conservation Commission (IWCC) on March 16, 2018.

- Hosted the first meeting of the new Sport Fishing and Boating Partnership Council Meeting with new guidance under the priorities of Secretary Zinke.

Restore trust and be a good neighbor.

- Under a new and far-reaching state-federal partnership, the health and well-being of the endangered red-cockaded woodpecker is tied to the U.S. Marine Corps mission at Camp Lejeune. An agreement between FWS, the military, the National Fish and Wildlife Foundation and the state of North Carolina allows Lejeune to expand training through prime woodpecker territory. In return, the so-called Recovery and Sustainment Program, or RASP, should boost the woodpecker population across eastern North Carolina. https://www fws.gov/southeast/articles/marines-and-woodpeckers-share-the-high-ground/

- While proposing to list the Louisiana pine snake as a threatened species under the ESA, FWS also proposed a special rule under section 4(d) of the law that will allow protections to be tailored to those that provide the greatest benefit to the snake and limits the regulatory burden on the forestry community, allowing most traditional management practices to remain in place.

- Announced a $60 million cooperative agreement with the Recreational Boating and Fishing Foundation (RBFF) to help retain and recruit recreational anglers and boaters. https://www.doi.gov/pressreleases/secretary-zinke-announces-more-that-11-billion-sportsmen-conservation

- Announced $14 million in Boating Infrastructure Grants (BIG) which support water-related outdoor recreation and tourism by improving facilities for large transient recreational boats across the country. https://www.doi.gov/pressreleases/secretary-zinke-announces-more-that-11-billion-sportsmen-conservation

- Launched the *Nature's Good Neighbors campaign,* a series of stories showcasing public partners who are acting as conservationists across the country. www.fws.gov/natures-good-neighbors/

Strike a regulatory balance.

- Submitted to OMB proposed revisions to Sections 4 and 7 regulations of the ESA. These changes are part of the FWS' ongoing efforts to improve implementation of the ESA so that

it is clear, consistent and flexible to the greatest extent possible, and encourages collaborative conservation from a broad range of partners.

- Reversed the previous administration's M-Opinion on the Migratory Bird Treaty Act and modified policies to ensure consistency with the new Opinion. The M-Opinion concludes that the take of birds resulting from an activity is not prohibited by the MBTA when the underlying purpose of that activity is not to take birds.

- Secretarial Order 3355 on streamlining National Environmental Policy Act (NEPA) reviews and implementation of EO 13807 was signed August 31, 2017. FWS issued a memo in December recommending actions to streamline the NEPA process in accordance with SO 3355, including development of additional guidance and training, as well as streamlining internal review processes. FWS has stood up a team to implement the EO.

Modernize our infrastructure.

- The FY19 budget included a legislative proposal to establish a new Public Lands Infrastructure Fund to help pay for repairs and improvements in national parks, national wildlife refuges and BIE schools. FWS maintenance backlogs exceeding $1.4 billion will now be addressed by this administration after lacking appropriate consideration under the prior administration.

- Congress passed hurricane supplemental included $210 million for FWS to repair and restore hurricane damaged infrastructure following Hurricanes Harvey, Irma and Maria

Reorganize DOI for the next 100 years.

- FWS is realigning our Budget and Administration ~~(BA)~~ operations nationwide under a single chain of command, known as Joint Administrative Operations (JAO). This realignment will improve customer service and ~~decrease costs~~save American taxpayers $8 million annually beginning in FY 2018.

Achieve our goals and lead our team forward.

- FWS presented last year's Federal Employee Viewpoint Survey (FEVS) results to employees and developed an internal strategy to increase response rate and highlight actions we are taking to increase scores. FWS was among the highest scoring in the Department and in the upper tier of the U.S. government

- The FWS Anti-Harassment Action Plan was approved by the Department, and in April we will begin presenting the plan to employees ~~in mid-April~~ with the launch of a new hotline and other tools to combat harassment in the workplace.

Re: Freedom of Information Act Request for Records Relating to Border Barrier Activities On and/or Impacting the Lower Rio Grande Valley National Wildlife Refuge

Dear Ms. Ruiz:

On behalf of Defenders of Wildlife (Defenders), I respectfully submit the following request pursuant to the Freedom of Information Act (FOIA), 5 U.S.C. § 552, and its implementing regulations, 43 C.F.R. §§ 2.1–2.34, seeking records generated, obtained or received by the U.S. Fish and Wildlife Service (Service) related to any activities regarding any existing, planned, or potential border wall, levee, fence, or other barrier (in aggregate, "border barrier activities") on and/or impacting the Lower Rio Grande Valley National Wildlife Refuge (LRGV NWR), as described in detail below.

On January 25, 2017, the President issued Executive Order 13,767 – Border Security and Immigration Enforcement Improvements. 82 Fed. Reg. 8,793 (2017). The policies presented in the Executive Order included "secur[ing] the southern border of the United States through the immediate construction of a physical wall on the southern border…" Exec. Order 13,767 § 2(a). In addition, the Order directed the Secretary of Homeland Security to, amongst other things, "take all appropriate steps to immediately plan, design, and construct a physical wall along the southern border… [and i]dentify and, to the extent permitted by law, allocate all sources of Federal funds for the planning, designing, and constructing of a physical wall along the southern border." *Id.* at § 4(a), (b). The Executive Order, moreover,

> permit[s] all officers and employees of the United States, as well as all State and local officers as authorized by the Secretary, to have access to all Federal lands as necessary and appropriate to implement this order; and … enable[s] those officers

> and employees of the United States … to perform such actions on Federal lands as the Secretary deems necessary and appropriate to implement this order.

Id. at § 12(a), (b). Additionally, the United States Congress is now moving forward with appropriating money for the Department of Homeland Security to construct 33 miles of new border barriers in the Lower Rio Grande Valley, including on or near the LRGV NWR. *See, e.g.* Eliza Barclay, *Congress is Quietly Letting Trump Bulldoze a Butterfly Refuge to Build a Border Wall*, Vox, https://www.vox.com/2018/3/28/17152644/trump-border-wall-texas-environment-refuge-butterflies (Mar. 29, 2018).

REQUESTED RECORDS

Defenders respectfully requests all records related to all border barrier activities on and/or impacting LRGV NWR. Examples of such records include, but are not limited to:

1. All records related to any impacts that any border barrier activities may have on LRGV NWR;

2. All records related to any communications within the Service about any border barrier activities on and/or impacting LRGV NWR;

3. All records related to any communications between the Service and any other federal bureau, department, or agency about any border barrier activities on and/or impacting LRGV NWR;

4. All records related to any communications between the Service and any unit of state, local, tribal, or foreign government about any border barrier activities on and/or impacting LRGV NWR;

5. All records related to any communications between the Service and any stakeholders or members of the public about any border barrier activities on and/or impacting LRGV NWR;

6. All records related to any communications between the Service and the Department of Homeland Security (DHS), Customs and Border Protection (CBP), or Army Corps of Engineers regarding LRGV NWR;

7. All records in the Service's possession related to any special use permit (SUP) or right-of-way issued to DHS and/or CBP and/or the Army Corps of Engineers for activities on and/or impacting LRGV NWR;

8. All records related to any compatibility determination, or other finding concerning compatibility, regarding border barrier activities on and/or impacting LRGV NWR, including but not limited to those made pursuant to the National Wildlife Refuge System Administration Act, 16 U.S.C. § 668dd-668ee, and its implementing regulations, 50 C.F.R. pts. 25-35;

9. All records related to any information or activities, including but not limited to analysis, documentation, decisions, and discussions, conducted pursuant to the National Environmental Policy Act (NEPA), 42 U.S.C. § 4321 *et seq.* for border barrier activities on and/or impacting LRGV NWR; and

10. All records related to any information or activities conducted pursuant to Section 7 of the Endangered Species Act (ESA), 16 U.S.C. § 1531 *et seq.*, for border barrier activities on and/or impacting LRGV NWR.

This request is not intended to exclude any other records that, although not specifically requested, are reasonably related to the subject matter of this request.

For purposes of this request, "records" is consistent with the meaning of the term under FOIA. This includes, but is not limited to, documents of any type, including both electronic and paper documents, electronic mail, writings (handwritten, typed, electronic or otherwise produced, reproduced or stored), correspondence, letters, memoranda, reports, consultations, papers, studies, notes, field notes, recordings, telephone conversation recordings, voice mails, telephone logs, messages, instant messages, G-chats, text messages, chats, telefaxes, data, databases, drawings, surveys, graphs, charts, photographs, videos, meeting notes or minutes, electronic and magnetic recordings of meetings, maps, Geographic Information System data, GPS, UTM, LiDAR, CDs, and any other compilations of data from which information can be obtained.

This request is being sent to Service headquarters with the understanding that it will be forwarded to any other agency offices where responsive records may be located.

WITHHELD DOCUMENTS

These records related to any border barrier activities on and/or impacting LRGV NWR are not subject to any FOIA exemption and must be disclosed. *See Pub. Citizen, Inc. v. Office of Mgmt. & Budget*, 598 F.3d 865, 875–76 (D.C. Cir. 2010).

In regard to the other requested records, under the FOIA Improvement Act of 2016, agencies are prohibited from denying requests for information pursuant to FOIA unless prohibited by law or the agency reasonably believes release of the information will harm an interest that is protected by a FOIA exemption. 5 U.S.C. § 552(a)(8)(A). Should you decide to invoke a FOIA exemption, please include in your response a description of which responsive documents are withheld with sufficient information for us to assess the basis for the exemption, including any interest(s) that would be harmed by their release. Please include a detailed index identifying:

1. Basic factual material about each withheld record, including the originator, date, length, general subject matter, and location of each item; and

2. Complete explanation and justification for withholding each record, including the specific exemption(s) under which the record (or portion thereof) is withheld and a full explanation of how each exemption applies to the withheld material. Such statements will be helpful in deciding whether to appeal an adverse determination and/or may help to avoid unnecessary litigation.

If you determine that portions of responsive records are exempt from disclosure, please segregate or redact the exempt portions and provide the non-exempt portions within the statutory time limit. 5 U.S.C. § 552(b).

FORMAT OF REQUESTED RECORDS

Defenders prefers receiving electronic copies of all responsive documents. Under FOIA, you are obligated to provide records in a readily accessible electronic format, if possible, and as requested here. *See, e.g.,* 5 U.S.C. § 552(a)(3)(B) ("In making any record available to a person under this paragraph, an agency shall provide the record in any form or format requested by the person if the record is readily reproducible by the agency in that form or format."). As used here, "readily reproducible" electronic documents should include text-searchable and OCR-formatted.

Additionally, please provide the records in .pdf file format, without any "portfolios" or "embedded files" Portfolios and embedded files are not readily accessible. Please do not provide the records in a single, or "batched," .pdf file. We also appreciate the inclusion of an index of responsive records.

RECORD DELIVERY

We appreciate your assistance in expeditiously responding to this request. As mandated under FOIA, we anticipate a response within 20 working days. 5 U.S.C. § 552(a)(6)(A)(i); 43 C.F.R. § 2.16(a). We respectfully urge you to post responses to this and parallel FOIA requests online in accordance with 5 U.S.C. § 552(a)(2)(D)(ii)(II). Defenders is pleased to receive records on a rolling basis if it facilitates the agency's response.

You may email or mail copies of the requested records to:

Lindsay Dubin
Defenders of Wildlife
1130 17th Street, N.W.
Washington, D.C. 20036
ldubin@defenders.org

If you find that this request is unclear, or if responsive records are voluminous, please call me at (202) 772-3234 to discuss the scope of this request.

REQUEST FOR FEE WAIVER

Pursuant to FOIA, 5 U.S.C. § 552(a)(4)(A)(iii), and the Department of the Interior's implementing regulations, 43 C.F.R. §§ 2.45–2.48, Defenders requests a waiver of all charges (*i.e.*, search, review, and duplication fees) incurred in connection with this request.

FOIA was designed to provide citizens a broad right to access government records. FOIA's basic purpose is to "open agency action to the light of public scrutiny," with a focus on the public's "right to be informed about what their government is up to." *U.S. Dep't of Justice v. Reporters Comm. for Freedom of Press*, 489 U.S. 749, 773-74 (1989) (internal quotation and citations omitted). To provide public access to this information, FOIA's fee waiver provision requires that "[d]ocuments shall be

furnished without any charge or at a [reduced] charge" if the request satisfies the standard. 5 U.S.C. § 552(a)(4)(A)(iii). FOIA's fee waiver requirement is "liberally construed in favor of waivers for noncommercial requesters." *McClellan Ecological Seepage Situation v. Carlucci*, 835 F.2d 1282, 1284 (9th Cir. 1987); *accord Forest Guardians v. U.S. Dep't of the Interior*, 416 F.3d 1173, 1177–78 (10th Cir. 2005); *Judicial Watch v. Rossotti*, 326 F.3d 1309, 1312 (D.C. Cir. 2003); *Community Legal Servs. v. U.S. Dep't of Hous. and Urban Dev.*, 405 F. Supp. 2d 553, 555 (E.D. Pa. 2005).

Congress specifically designed FOIA's 1986 fee waiver amendments to provide non-profit organizations such as Defenders access to government records without payment of fees. Indeed, the fee waiver provision was intended to "explicitly recognize[] the importance and the difficulty of access to governmental documents for such typically under-funded organizations and individuals," including nonprofit public interest groups. *Better Gov't Ass'n v. Dep't of State*, 780 F.2d 86, 94 (D.C. Cir. 1986). FOIA "should not be interpreted to allow federal agencies to set up roadblocks to prevent noncommercial entities from receiving a fee waiver." *W. Watersheds Project v. Brown*, 318 F. Supp. 2d 1036, 1039 (D. Idaho 2004).

Defenders Satisfies the Qualifications for a Fee Waiver

Under FOIA, a requester is entitled to a fee waiver when "disclosure of the information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the [federal] government and is not primarily in the commercial interest of the requester." 5 U.S.C. § 552(a)(4)(A)(iii); *see also* 43 C.F.R. § 2.45(a)(1). The Department of the Interior's (DOI) implementing regulations at 43 C.F.R. § 2.48 establish the same standard, setting forth four factors to consider in determining whether a request meets the FOIA requirement.

Consequently, the Service must consider the following factors to determine whether a request is in the public interest: (1) "[h]ow the requested records concern the operations or activities of the Federal government," (2) "[h]ow disclosure is likely to contribute to public understanding of those operations or activities," (3) "[h]ow disclosure is likely to significantly contribute to the understanding of a reasonably broad audience of persons interested in the subject," and (4) [h]ow the public's understanding of the subject in question will be enhanced to a significant extent by the disclosure." 43 C.F. R. § 2.48. As presented below, Defenders satisfies each of these four criteria.

Defenders therefore qualifies for a fee waiver. Disclosure of the requested records is in the public interest because it will contribute significantly to public understanding of the operations or activities of the government, particularly as they relate to border barrier activities on federal public lands and waters. In addition, release of the documents is not for commercial use. Founded in 1947, Defenders is a 501(c)(3) nonprofit conservation organization with 1.8 million members and supporters dedicated to the protection of all native animals and plants in their natural communities. Access to government records through FOIA requests is essential to Defenders' role of educating the general public about government activities related to wildlife conservation. We have no commercial interest in and will realize no commercial benefit from the release of the requested records.

Please note that the U.S. Fish and Wildlife Service, U.S. Forest Service, Bureau of Land Management and National Park Service have previously granted requests for fee waivers in their provision of documents to Defenders.

A. The Requested Records Concern Operations or Activities of the Federal Government

In accordance with 43 C.F. R. § 2.48(a)(1), the requested records concern the operations and activities of the federal government, namely an executive branch agency, the U.S. Fish and Wildlife Service. The requested records describe the agency's views and actions related to rules, policies, plans and other federal activities concerning border barrier activities on and/or impacting LRGV NWR. *See Judicial Watch*, 326 F.3d at 1313 ("[R]easonable specificity is all that FOIA requires with regard to this factor") (internal quotations omitted).

B. Disclosure of the Requested Records is Likely to Contribute to Public Understanding of Government Operations or Activities

In accordance with 43 C.F. R. § 2.48(a)(2), the requested records are meaningfully informative about government operations or activities, there is a logical connection between their contents and those operations or activities, and disclosure will contribute to an increased public understanding of the subject matter because Defenders has the expertise to analyze and publicize the information in a manner that is useful to a broad audience of persons interested in border barrier activities.

The information about government operations and activities contained in the requested records will meaningfully inform public understanding of the border barrier activities on and/or impacting LRGV NWR. It will also aid public understanding of department actions that affect wildlife that depend on this public land. This information is highly relevant to Defenders and our members because we are deeply concerned about these issues. Our review and analysis of responsive records will provide the public with critical information about current and future border barrier activities on and/or impacting LRGV NWR.

Once the information is made available, we will share it with our 1.8 million members, supporters, activists, partners and the general public in a manner that will contribute to their understanding of government activities. Defenders' record of active participation in oversight of governmental activities and decision-making, and our consistent contribution to the public's understanding of those activities is well established.

Defenders is a national non-profit organization focused on wildlife and habitat conservation and the safeguarding of biodiversity. We inform, educate and counsel the public regarding environmental issues, policies and laws relating to wildlife protection and public lands. We represent our members' interests in ensuring that imperiled species and their habitat receive the full protections due under federal law. We frequently communicate with our members, supporters, partner organizations, and the interested public on news and information relevant to border barrier activities and their impacts on species.

Defenders will rely on its own legal and scientific experts, as well as outside experts, to analyze the information contained in records produced in response to this FOIA request. We have used, and will continue to use, a full array of tools to ensure our members' interests are vindicated and the general public is informed through our synthesis of the information gleaned from the requested records.

Defenders will ensure that the information produced in response to this request, and our analysis thereof, is disseminated to a reasonably broad audience of persons interested in federal lands

management and wildlife conservation. In disseminating the information, Defenders will assure that it is made available for the benefit of the interested persons beyond our membership, such as members of other conservation advocacy organizations, the media, the academic community, and the general public.

Defenders has the ability to disseminate information obtained from the requested records in a number of ways to a broad audience. We actively communicate with our members, supporters and the general public through direct mail and email campaigns. We broadcast action alerts notifying the public of opportunities to comment on agency proposals; publish information on and frequently update our website (797,055+ visitors per month) and blog (21,000+ monthly readership) to educate the public on wildlife conservation issues; distribute a quarterly print magazine with a circulation of approximately 350,000; communicate with partner organizations both nationally and internationally; maintain an active online presence through Facebook (652,000+ followers), Twitter (109,000+ followers), and YouTube (6900+ subscribers); distribute press releases directly to media contacts and through our website and RSS feed; and educate lawmakers and advocates on conservation law at the federal, state and local level.

C. Disclosure of the Requested Records is Likely to Significantly Contribute to the Understanding of a Reasonably Broad Audience of Persons Interested in the Subject

In accordance with 43 C.F. R. § 2.48(a)(3), the requested information is new, not already publicly available, and its disclosure will increase the level of public understanding that existed prior to disclosure. Through Defenders analysis and dissemination, disclosure of the information contained in the requested records will contribute to the understanding of a broad audience of persons that are interested in border barrier activities, as stated above.

The requested records will enable Defenders to provide information to the public at large regarding the current agency views and activities related to rules, policies, plans and other department actions concerning border barrier activities on and/or impacting LRGV NWR. This information is essential to inform the public about potential changes to this national wildlife refuge. Indeed, the public does not currently have an ability to easily evaluate the requested records, which are new and not currently in the public domain. *See Cmty. Legal Servs. V. HUD,* 405 F.Supp.2d 553, 560 (D. Pa. 2005) (because requested records "clarify important facts" about agency policy, the request "would likely shed light on information that is new to the interested public.").

Disclosing the requested records to Defenders is not only "likely to contribute," but is certain to contribute, to public understanding of border barrier activities on and/or impacting federal public lands and waters and the potential impacts to imperiled species and their habitat. At present, the public has insufficient information about the border barrier activities on and/or impacting LRGV NWR. Defenders' dissemination of this information will therefore provide new insight to a broad audience of interested persons as to how any border barrier activities are or will impact wildlife and public lands, namely, on LRGV NWR. *See id.* at § 2.48(a)(3).

D. The Public's Understanding of the Subject in Question will be Significantly Enhanced by the Disclosure of Requested Records.

In accordance with 43 C.F.R. § 2.48(a)(4), the public's understanding of the subject of this FOIA request will be enhanced to a *significant extent* by disclosure of the requested records. FOIA's

legislative history makes clear that the 'significance' test is met where, as here, the information requested will support "public oversight of agency operations":

> A requester is likely to contribute significantly to the public understanding if the information disclosed is new; supports public oversight of agency operations; or otherwise confirms or clarifies data on past or present operations of the government.

132 Cong. Rec. H9464 (Reps. English and Kindness); *see also McClellan Ecological Seepage Situation*, 835 F.2d at 1284–86.

Disclosure of the requested records will significantly enhance the public's understanding of the agency's management of border barrier activities on and/or impacting LRGV NWR, as compared to the level of understanding that exists prior to disclosure. Disclosure will provide the public with information about activities that have garnered a staggering amount of public interest yet whose details have remained significantly shielded from public scrutiny. The requested records would contain new information that has not previously been disclosed, and disclosing them will support public oversight of agency operations regarding federal management of public lands, wildlife, and LRGV NWR, specifically.

The conservation of federal public lands and waters and the wildlife that depend on them are an ongoing concern for Defenders' members, supporters, partner organizations, and the interested public. The requested records are essential to Defenders' efforts to educate our members and the general public about conservation of imperiled species and their habitat. Our analysis of the records and broad dissemination of the synthesized information will support public participation in government, and help ensure that the public has an understanding of the impacts of border barrier activities on the LRGV NWR.

CONCLUSION

For all the foregoing reasons, Defenders of Wildlife satisfies the statutory and regulatory requirements for a fee waiver under FOIA and DOI's implementing regulations. We hope that you will immediately grant this request and tender responsive records.

However, if a fee waiver is denied, Defenders is willing to pay up to $100.00 in reasonable search time and/or duplication costs exceeding two hours and 100 pages, or equivalent volume. Please contact me to discuss any costs prior to fulfilling this FOIA request.

If you determine that this FOIA request will require longer than ten business days to process, please notify me of the request's individualized tracking number and how to obtain status updates via telephone, email or on the Internet. 5 U.S.C. § 552(a)(7). If you anticipate needing more than the 20 working days allotted under FOIA to fully process this request, please also notify me of the expected delay. I appreciate the opportunity to work with the Service to limit our request to expedite your response.

Thank you for your assistance.

Sincerely,

Lindsay Dubin

Washington, D.C. 20036-4604

Dear Ms. Dubin:

This responds to your Freedom of Information Act (FOIA) request dated August 9, 2018, in which you requested the following:

> "1. All records related to any impacts that any border barrier activities may have on LRGV NWR;
>
> 2. All records related to any communications within the Service about any border barrier activities on and/or impacting LRGV NWR;
>
> 3. All records related to any communications between the Service and any other federal bureau, department, or agency about any border barrier activities on and/or impacting LRGV NWR;
>
> 4. All records related to any communications between the Service and any unit of state, local, tribal, or foreign government about any border barrier activities on and/or impacting LRGV NWR;
>
> 5. All records related to any communications between the Service and any stakeholders or members of the public about any border barrier activities on and/or impacting LRGV NWR;
>
> 6. All records related to any communications between the Service and the Department of Homeland Security (DHS), Customs and Border Protection (CBP), or Army Corps of Engineers regarding LRGV NWR;

7. All records in the Service's possession related to any special use permit (SUP) or right-of-way issued to DHS and/or CBP and/or the Army Corps of Engineers for activities on and/or impacting LRGV NWR;

8. All records related to any compatibility determination, or other finding concerning compatibility, regarding border barrier activities on and/or impacting LRGV NWR, including but not limited to those made pursuant to the National Wildlife Refuge System Administration Act, 16 U.S.C. § 668dd-668ee, and its implementing regulations, 50 C.F.R. pts. 25-35;

9. All records related to any information or activities, including but not limited to analysis, documentation, decisions, and discussions, conducted pursuant to the National Environmental Policy Act (NEPA), 42 U.S.C. § 4321 *et seq*. for border barrier activities on and/or impacting LRGV NWR; and

10. All records related to any information or activities conducted pursuant to Section 7 of the Endangered Species Act (ESA), 16 U.S.C. § 1531 *et seq*., for border barrier activities on and/or impacting LRGV NWR."

Your request was assigned tracking number FWS-2018-01119 and forwarded to the Southwest Region National Wildlife Refuge System for processing. Staff located 134 records responsive to your request. From these records, we are withholding in part (via redaction) or in full, 50 records in accordance with FOIA exemptions (b)(5) and (b)(6), as described below. The redacted and full release documents are provided to you on the enclosed compact disc.

Exemption 5 allows an agency to withhold "inter-agency or intra-agency memorandums or letters which would not be available by law to a party… in litigation with the agency." (5 U.S.C. § 552(b)(5)). Exemption 5 therefore incorporates the privileges that protect materials from discovery in litigation, including the deliberative process, attorney work-product, attorney-client, and commercial information privileges.

We are withholding 10 documents in full in accordance with the attorney-client privilege of Exemption 5. The attorney-client privilege protects confidential communications between an attorney and his client relating to a legal matter for which the client has sought professional advice and is not limited to the context of litigation. Moreover, although it fundamentally applies to confidential facts divulged by a client to his/her attorney, this privilege also encompasses any opinions given by an attorney to his/her client based upon, and thus reflecting, those facts, as well as communications between attorneys that reflect confidential client-supplied information.

The information that has been withheld under the attorney-client privilege of Exemption 5 constitutes confidential communications between Federal attorneys and agency clients, related to legal matters for which the client sought professional legal assistance and services. It also encompasses opinions given by attorneys to their clients based on client-supplied facts. Additionally, the Federal employees who communicated with the attorneys regarding this information were clients of the attorneys at the time the information was generated and the

attorneys were acting in their capacities as lawyers at the time they communicated legal advice. Finally, the U.S. Fish and Wildlife Service (Service) has held this information confidential and has not waived the attorney-client privilege.

The deliberative process privilege protects the decision-making process of government agencies and encourages the frank exchange of ideas on legal or policy matters by ensuring agencies are not forced to operate in a fish bowl. A number of policy purposes have been attributed to the deliberative process privilege. Among the most important are to: (1) assure that subordinates will feel free to provide the decision maker with their uninhibited opinions and recommendations; (2) protect against premature disclosure of proposed policies; and (3) protect against confusing the issues and misleading the public.

The deliberative process privilege protects materials that are both predecisional and deliberative. The privilege covers records that reflect the give-and-take of the consultative process and may include recommendations, draft documents, proposals, suggestions, and other subjective documents which reflect the personal opinions of the writer rather than the policy of the agency.

Twenty-eight records have been withheld under the deliberative process privilege of Exemption 5 that are both predecisional and deliberative. They do not contain or represent formal or informal agency policies or decisions. They are the result of frank and open discussions among employees of the Department of the Interior. Their contents have been held confidential by all parties and public dissemination of these drafts would have a chilling effect on the agency's deliberative processes; expose the agency's decision-making process in such a way as to discourage candid discussion within the agency, and thereby undermine its ability to perform its mandated functions.

Pursuant to the Commercial Information Privilege of Exemption (b)(5), we redacted a portion of one document. The information withheld under this privilege consists of active conference call telephone numbers and access codes, which could be used to conduct conference calls by parties outside the government or used to call in to monitor internal government conversations. We are withholding it because disclosure to the public would chill communications between federal employees and harm the government's ability to exchange information. When the government enters the marketplace as an ordinary commercial buyer or seller, the government's information is protected under the commercial information privilege if it is sensitive information not otherwise available, and disclosure would significantly harm the government's monetary functions or commercial interests. The theory behind the privilege is that the government may be placed at a competitive disadvantage or the consummation of a contract may be endangered if confidential information generated by the government is disclosed.

Portions of 11 records have been redacted pursuant to Exemption (b)(6) of the FOIA. Under Exemption 6, agencies may withhold information or records on individuals contained in "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy" (5 U.S.C.§552(b)(6)). The withheld material includes personal contact information (e.g. personal cell and home phone numbers, and home addresses).

The phrase "similar files" covers any agency records containing information about a particular individual that can be identified as applying to that individual. To determine whether releasing records containing information about a particular individual would constitute a clearly unwarranted invasion of personal privacy, we are required to balance the privacy interest that would be affected by disclosure against any public interest in the information. Under the FOIA, the only relevant public interest to consider under the exemption is the extent to which the information sought would shed light on an agency's performance of its statutory duties or otherwise let citizens 'know what their government is up to.' (*See DOD v. FLRA, 510 U.S. 487, 497 (1994) (quoting Reporters Comm., 489 U.S. at 773*)). The burden is on the requester to establish that disclosure would serve the public interest. When the privacy interest at stake and the public interest in disclosure have been determined, the two competing interests must be weighed against one another to determine which is the greater result of disclosure: the harm to personal privacy or the benefit to the public. The purposes for which the request for information is made do not impact this balancing test, as a release of information requested under the FOIA constitutes a release to the general public.

The information that has been withheld under Exemption 6 consists of personal information, as described above, and we have determined that the individuals to whom this information pertains have a substantial privacy interest in withholding it. Additionally, we have determined that the disclosure of this information would shed little or no light on the performance of the agency's statutory duties. Because the harm to personal privacy is greater than whatever public interest may be served by disclosure, release of the information would constitute a clearly unwarranted invasion of the privacy of these individuals and we are withholding it under Exemption 6.

Lastly, in our compilation and review of responsive records, we identified records that originated from or substantially concern another federal agency. Twenty-five records are being referred to U.S. Customs and Border Protection (CBP) for a release determination. CBP will issue a response directly to you. You do not have to contact the agency at this time, but should you need to do so in the future, you may do so at:

FOIA Officer
U.S. Customs and Border Protection
90 K Street, NW
9th Floor, Mail Stop 1181
Washington, D.C. 20229

This response to your FOIA request was made in consultation with **XXXX**, Attorney-Advisor, Office of the Solicitor, Southwest Region, U.S. Department of the Interior (Department). You may appeal this response to the Department's FOIA/Privacy Act Appeals Officer. If you choose to appeal, the FOIA/Privacy Act Appeals Officer must receive your FOIA appeal no later than 90 workdays from the date of this letter. Appeals arriving or delivered after 5 p.m. Eastern Time, Monday through Friday, will be deemed received on the next workday.

Your appeal must be made in writing. You may submit your appeal and accompanying materials to the FOIA/Privacy Act Appeals Officer by mail, courier service, fax, or email. All communications concerning your appeal should be clearly marked with the words: "FREEDOM

OF INFORMATION APPEAL." You must include an explanation of why you believe the Service's response is in error. You must also include with your appeal copies of all correspondence between you and the Service concerning your FOIA request, including your original FOIA request and the Service's response. Failure to include with your appeal all correspondence between you and the Service will result in the Department's rejection of your appeal, unless the FOIA/Privacy Act Appeals Officer determines (in the FOIA/Privacy Act Appeals Officer's sole discretion) that good cause exists to accept the defective appeal.

Please include your name and daytime telephone number (or the name and telephone number of an appropriate contact), email address and fax number (if available) in case the FOIA/Privacy Act Appeals Officer needs additional information or clarification of your appeal.

DOI FOIA/Privacy Act Appeals Office
Department of the Interior, Office of the Solicitor
1849 C Street, N.W.
MS-6556 MIB
Washington, D.C. 20240
Telephone: 202-208-5339/Fax: 202-208-6677
Email: FOIA.Appeals@sol.doi.gov

Also, please note the 2007 FOIA amendments created the Office of Government Information Services (OGIS) to offer mediation services to resolve disputes between FOIA requesters and Federal agencies as a non-exclusive alternative to litigation. Using OGIS services does not affect your right to pursue litigation and does not affect the timing of filing an appeal with the Department's FOIA & Privacy Act Appeals Officer. You may contact OGIS in any of the following ways:

Office of Government Information Services
National Archives and Records Administration
8601 Adelphi Road - OGIS
College Park, MD 20740-6001
E-mail: ogis@nara.gov, Web: https://ogis.archives.gov
Telephone: 202-741-5770 / Fax: 202-741-5769 / Toll-free: 1-877-684-6448

You also may seek dispute resolution services from our FOIA Public Liaison, Carrie Hyde-Michaels at 703-358-2521 or via email at carrie hyde-michaels@fws.gov.

For your information, Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA. See 5 U.S.C. § 552(c) (2006 & Supp. IV (2010)). This response is limited to those records that are subject to the requirements of the FOIA. This is a standard notification that is given to all our requesters and should not be taken as an indication that excluded records do, or do not, exist.

This completes the Southwest Region's response. If you have any questions or concerns regarding this request, please contact Assistant Refuge Supervisor, Monica Kimbrough, at 505-

248-7419 or by email at monica_kimbrough@fws.gov or Government Information Specialist, David Tischer, at 505-248-6658 or by email at fw2foia@fws.gov.

Sincerely,

Region 2 FOIA Coordinator

Thank you, Aislinn.

Also, once we hear back with confirmation on the Oct. 21 Mayors media event at Santa Ana NWR, please let me know. Matt Trott submitted it to the Final Secretarial Report and heard back from the Department that there is interest in learning as much as possible about the event in advance. I have indicated while it is proposed to occur near or on the Refuge, our agency does not have an active role beyond awareness.

Rio Grande Valley
Proposed Border Wall
Talking Points
Updated September 29, 2017

USFWS Talking Points Regarding the Proposed Border Wall

On the record:

"The Department of the Interior (DOI) is one of several federal agencies that U.S. Customs and Border Protection (CBP) has engaged with to implement the President's Executive Order (EO) 13767 - Border Security and Immigration Enforcement Improvements. CBP has included DOI in initial discussions regarding the implementation of the EO in south Texas. For all border specific inquiries, please contact U.S. Customs and Border Protection's Office of Public Affairs at cbpmediarelations@cbp.dhs.gov.

The Service will continue to work with CBP on any proposed activities, through formal and informal processes, to minimize impacts to the region's national wildlife refuges and natural resources."

On background:

- From our informal conversations with CBP, we understand that construction of the wall is still in the ***planning*** stages. More information will be released (by DHS/CBP) as it becomes available. Please contact CBP for all border-related inquiries.
- We are aware that the Rio Grande Valley Border Patrol has been meeting with local stakeholders, governmental organizations (including FWS) and non-governmental organizations to provide available information regarding the proposed levee wall.
    - DOI and its constituent bureaus have been working very closely with DHS to facilitate planning associated with the replacement of existing infrastructure and construction of new border security infrastructure in an environmentally responsible manner.
- We have been notified of wall-related work being done in the Rio Grande Valley. The U.S. Army Corps of Engineers contract allows for geotechnical studies and the collection of soil samples in the Rio Grande Valley obtained within the limits of the permanent levee easements owned by the U.S. Section of the International Boundary and Water Commission. Taking aerial photos and markings for geotech borings is happening on the levee road and ramps. This area is within the IBWC managed lands and is not happening on land managed by the refuge.
- We have been coordinating with CBP to provide input on the replacement of existing infrastructure and construction of new border security infrastructure. In general, our areas

of interests are similar to those discussed during initial border wall/fence construction in 2008.

- At this time, we have yet to receive an explicit construction proposal from CBP. Once there such a proposal, CBP can request formal consultation with the Service under the National Environmental Policy Act (NEPA), Nation Wildlife Refuge System Improvement Act, Migratory Bird Treaty Act, and the Endangered Species Act (ESA).

Additional On-the-Record Talking Point Regarding the FOIA Process:

"It is the policy of the Service to make records available to the public to the greatest extent possible. In response to a recent FOIA request, the Service released a packet of information, which included documents and email discussions relating to the proposed border wall in south Texas."

Note: The following from CBP is for reference only

- FY 2017 Funded Activities
  - Planning for border wall system in RGV is underway (via reprogramming funds that were received on 2/15)
    - Approximately 28 miles of levee wall and enforcement zone and approximately 32 miles of border wall (bollard fence) and enforcement zone in the U.S. Border Patrol Rio Grande Valley (RGV) Sector
    - The 28 miles of levee wall and 32 miles of bollard wall in RGV are prioritized in the current Fiscal Year 2018 proposed budget
  - **Key points:**
    - Meetings to date have taken place include:
      - April 20th meeting with CBP and IBWC
      - April 26th meeting with CBP, USACE, DOI and Santa Ana Refuge
      - April 27th meeting with CBP, USACE, DOI and Santa Ana Refuge
      - July 6th meeting with CBP, USACE, DOI, and Santa Ana Refuge
      - Design concept meeting with CBP, USACE and Santa Ana Refuge
    - Purpose was to provide project background, project overview, and project coordination.
    - No landowner engagement will take place until funding is received - initial planning only & federal partner stakeholder scoping.
  - **Waivers**: Environmental Waiver is an option moving forward, but no decision will be made regarding Waiver until funding is received. This will be at the Secretary's discretion. **Note**: The Department of Homeland Security has issued a waiver to waive certain laws, regulations and other legal requirements to ensure the expeditious construction of barriers and roads in the vicinity of the international border near San Diego. (DOI statement on waiver available on request)
- Recent Media
  - Wall construction to begin November
    FACT: Currently, construction is not scheduled to begin until January 2018, pending receipt of funds
  - 35 Gate project authorized
    FACT: Project is funded and currently ongoing with real estate efforts underway.
  - Wall cutting through refuge
    FACT: The wall is set to follow the current levee structure and will serve a dual purpose border security and flood control by armoring the levee on the south side.
  - DHS can waive environmental regulations
    FACT: Environmental Waiver is an option moving forward, but no decision will be made regarding Waiver until funding is received. This will be at the Secretary's discretion.
  - Reported core samples being taken on USFWS Refuge property

FACT: The U.S. Army Corps of Engineers contract allows for geotechnical studies and the collection of soil samples in the Rio Grande Valley obtained within the limits of the permanent levee easements owned by the U.S. Section of the International Boundary and Water Commission.

- USACE/A-E Work: Taking aerial photos and markings for geotech borings was on the levee road and ramps. This area is within the IBWC managed lands. Access to the levee was via public roads.

In Reply Refer To:
FWS/R2/NWRS/Coastal TX/066633

OCT 13 2017

Mr. Paul Enriquez
Real Estate and Environmental Branch Chief
U.S. Customs and Border Protection
1300 Pennsylvania Avenue NW
Washington, DC 20229

Dear Mr. Enriquez:

Thank you for your letter dated August 25, 2017, regarding U.S. Customs and Border Protection's (CBP) proposed border infrastructure in South Texas which includes the installation of 35 gates in existing border fence gaps, 32 miles of bollard wall, and 28 miles of levee wall. The U.S. Fish and Wildlife Service (Service) reviewed your letter and is providing our initial concerns related to Federally listed species, other Federal trust resources, and Santa Ana and Lower Rio Grande Valley National Wildlife Refuges (NWR). Once there is a spatially explicit proposed action, assuming no waiver is issued by Department of Homeland Security, we can provide a formal response and coordination under applicable Federal laws, including the National Environmental Policy Act, National Wildlife Refuge System (Refuge System) Improvement Act, Migratory Bird Treaty Act, and Endangered Species Act.

Over the past several years, there has been a substantial increase in coordination between the Service, CBP, and the U.S. Border Patrol Rio Grande Valley Sector along the Texas border. The Service appreciates the excellent communication and information sharing that has occurred and looks forward to maintaining this relationship into the future.

The Refuge System lands in the Lower Rio Grande Valley are considered to be one of the most biodiverse in the continental United States. In general, our concerns are similar to those discussed during initial border wall/fence construction in 2008. The Service will continue to work with CBP on the proposed activities, with a focus on ensuring impacts to Santa Ana and Lower Rio Grande Valley NWRs are analyzed and minimized, to the extent possible.

Socio-economic & Visitor Impacts
The Service is specifically concerned with potential tourism and visitor impacts on the affected NWRs. Ongoing efforts by the Service, the state of Texas, private landowners, and non-profit organizations have helped create a wildlife corridor linking numerous isolated habitat fragments in the Lower Rio Grande Valley. These efforts have helped produce habitats that are harboring unique species of plants and animals, making the area a destination for ecotourists.

The economics of Lower Rio Grande Valley wildlife and habitat diversity are important to the international border region, as over 150,000 tourists contribute approximately $10.8 million annually to the regional economy. The Santa Ana NWR is the most accessible public land for residents of Hidalgo County and approximately 70 percent of visitors come from outside of the local area. Visitors participating in outdoor recreational activities economically benefit the local community.

Construction of the border wall, as proposed, will likely affect visitation and the quality of visitor experience to the affected NWRs. Construction of the border wall along the levee will separate the Santa Ana NWR visitor center and all administrative facilities (equipment storage, residences, parking lots, etc.) from the rest of the refuge (99 percent of refuge lands). The proposal could result in visitors entering and exiting Santa Ana NWR through a large gate, similar to going through a security checkpoint. This could result in a reduction in visitation due to a perceived unsafe and unwelcoming atmosphere, which in turn could impact local economies.

Enforcement Zones
Construction of a 150-foot enforcement zone will directly remove habitat used by threatened and/or endangered species and other wildlife in the area. The enforcement zone will also create barriers and restrict wildlife movement, especially for species such as ocelots, which require dense brush to travel through. The Service recommends minimizing this zone, as operations allow, especially in and near thick thornscrub and walking trails. We also recommend calculating the direct habitat loss of the 150-foot enforcement zone based on a vegetation and endangered species survey. The proposed cleared enforcement zone in Hidalgo County will directly remove approximately 170 acres of habitat from Lower Rio Grande Valley and Santa Ana NWRs reducing the ability to meet refuge purposes and impacting the visitor experience. The Service recommends leaving vegetated areas near entrances and exits to public use areas to mitigate the potential impacts to the visiting public and quality of their experience.

Lighting
Increased lighting at night, along the wall, will likely have negative impacts on ocelot, jaguarundi and other nocturnal species by making them more susceptible to predation. The Service recommends down shielding lights to focus away from thornscrub habitat and shining lights only within the enforcement zone. The Service recommends CBP continue to analyze the effects of lighting to nocturnal wildlife and work with the Service to minimize impacts.

All Weather Roads
The Service recommends the width of all roads created or maintained by CBP be measured and recorded using Geographic Information System (GPS) coordinates and integrated into the CBP

GPS database. The Service suggests maintenance actions not increase the width of the roadbed or the amount of disturbed area beyond the roadbed. The all-weather road within the enforcement zone is capable of high speed use, causing concern for public safety and increased wildlife mortality. The Service requests coordination to address speeding issues, especially near high visitor use areas.

The Service's comments in this letter are based upon general information we have been given to date. The Service may change these comments and opinions depending on more specific information regarding the border wall that we expect will be provided by CBP in the future. We appreciate the opportunity to provide informal comments and look forward to continued coordination on the proposed project. Please feel free to contact me at 505-248-6282 if I can be of further assistance.

Sincerely,

Regional Director

(b)(6), (b)(7)(C)

I was able to visit with both Rob and Ernesto this morning about your (the CBP contractor request) to access our two properties west of Roma for conducting geotechnical borings on refuge lands (in endangered species critical habitat). We also visited via conference call with our Refuge Supervisor in Albuquerque this morning who advised us that we cannot allow geotechnical borings on fee-owned refuge lands since this is a directly connected action to border wall (as we found in 2007 during first round of border wall/fence), which at this time, given our policy and procedures, we would likely not find compatible, even if CBP was to prepare an Environmental Impact Statement. We are aware of several NGO's prepared or preparing to sue the Service if we do not follow policy and procedure and insure the NEPA process is properly followed. Therefore, Rob Jess will be in touch with you regarding elevating your request to our leadership within the US Fish & Wildlife Service. We are aware you have spoken with (b)(6), (b)(7)(C), DOI about this issue and our leadership is in communication with him as well.

Regarding access to these sites, or any other sites, please be advised that all requests for access to any and all LRGV NWR sites requires a specific Special Use Permit for that particular request/activity. Only the Refuge Manager or Project Leader can make exceptions to this protocol. With respect to CBP, the only exception I am aware of to date is for routine access for RGV Sector agents to conduct normal operations on the refuge, no SUP has been required. For Special Ops, Military operations, etc. a SUP has been issued for those special

projects. With that, we have issued nearly a dozen SUP's for various activities to the RGV Sector. These include SUP's for boat ramps, aerostat deployment, RAID towers, tree trimming, Horse Patrol Unit, Santa Ana Storefront -CBP office, road repair, and probably several other issues/actions I'm forgetting.

We appreciate your patience and understanding as we our truly proud of the relationships that have been built with the RGV Sector of CBP and our agency personnel. We hope your project doesn't jeopardize all that investment. We understand the pressure you have to proceed with your project planning on refuge lands but we have strict orders to abide by policy and procedures unless instructed otherwise by our agency leadership. Please let me know if you have other requests/needs on refuge lands.

Sincerely,

--

Re: Freedom of Information Act Request

Dear Ms. Hyde-Michaels:

Citizens for Responsibility and Ethics in Washington ("CREW") makes this request for records pursuant to the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552, and U.S. Department of the Interior ("DOI") regulations.

Specifically, CREW requests the copies of all calendars and/or other records reflecting meetings, full schedules, and phone records, from January 2017 to the present, of:

(1) Former Acting Director and current Deputy Director of the U.S. Fish and Wildlife Service Jim Kurth;

(2) Deputy Director and current Principal Deputy Director of the U.S. Fish and Wildlife Service Greg Sheehan;

(3) Deputy Director Steve Guertin; and

(4) U.S. Fish and Wildlife Service Council Designated Federal Officer Joshua Winchell.

Please search for responsive records regardless of format, medium, or physical characteristics. We seek records of any kind, including paper records, electronic records, audiotapes, videotapes, photographs, data, and graphical material. Our request includes without limitation all correspondence, letters, emails, text messages, facsimiles, telephone messages, voice mail messages, and transcripts, notes, or minutes of any meetings, telephone conversations, or discussions. Our request also includes any attachments to emails and other records, as well as emails to which the subjects of this request were cc'ed or bcc'ed.

If it is your position any portion of the requested records is exempt from disclosure, CREW requests that you provide it with an index of those documents as required under *Vaughn v. Rosen*, 484 F.2d 820 (D.C. Cir. 1973). If some portions of the requested records are properly exempt from disclosure, please disclose any reasonably segregable non-exempt portions of the

requested records. *See* 5 U.S.C. § 552(b). If it is your position that a document contains non-exempt segments, but that those non-exempt segments are so dispersed throughout the document as to make segregation impossible, please state what portion of the document is non-exempt, and how the material is dispersed throughout the document. *See Mead Data Central v. U.S. Dep't of the Air Force*, 566 F.2d 242, 261 (D.C. Cir. 1977).

Fee Waiver Request

In accordance with 5 U.S.C. § 552(a)(4)(A) and DOI regulations, CREW requests a waiver of fees associated with processing this request for records. The subject of this request concerns the operations of the federal government, and the disclosures likely will contribute to a better understanding of relevant government procedures by CREW and the general public in a significant way. *See* 5 U.S.C. § 552(a)(4)(A)(iii). Moreover, the request primarily and fundamentally is for non-commercial purposes. *See, e.g.*, *McClellan Ecological v. Carlucci*, 835 F.2d 1282, 1285 (9th Cir. 1987).

On November 14, 2017, the United States Fish and Wildlife Service (U.S. FWS) abruptly announced that it would be allowing the remains of elephants legally hunted in Zimbabwe and Zambia to be imported into the United States, a reversal of the position taken by the previous administration.[1] Three days later, President Donald Trump announced that he would be putting the "big game trophy decision on hold," to review pertinent conservations facts.[2] On November 19 the President announced that he expects a decision on the ban "next week".[3] Because the U.S. FWS originally announced the reversal of this ban at a Safari Club International (hunting advocacy group) event in Tanzania, it can be reasonably expected that advocates of trophy hunting have had and will continue to have input on the decisions of the U.S. FWS concerning policy that affects their interests, especially considering the creation of an International Wildlife Conservation Council in 2018, staffed by alleged trophy hunters.[4]

The President's sons, Donald Trump, Jr. and Eric Trump, are known trophy hunters who have in the past hunted elephants, among other animals, in Zimbabwe – one of the countries affected by any policy decision of the U.S. FWS and the President regarding trophy hunting.[5] According to a Cable News Network source, members of the Trump family discussed a desire to change the U.S. FWS's rules on trophy hunting; Donald Trump, Jr. purportedly made this issue a priority "early on" in the Trump campaign.[6] It has also been reported that Donald Trump, Jr. is a

[2] *See* https://twitter.com/realDonaldTrump/status/931685146415255552

[3] *See* https://twitter.com/realDonaldTrump/status/932397369655808001

[4] Gibbs, *Safari Club*, Nov. 14, 2017. *Associated Press*, Trump wildlife board stuffed with trophy hunters, *USA Today*, March 15, 2018, *available* at https://www.usatoday.com/story/news/politics/2018/03/15/trump-wildlife-board-stuffed-trophy-hunters/430376002/

[5] John Del Signore, Photos: Donald Trump's Sons Awesome At Killing Elephants And Other Wildlife, *Gothamist*, March 13, 2012, *available at* http://gothamist.com/2012/03/13/photos_donald_trump_sons_awesome_at.php#photo-2.

[6] Miranda Green, Trump's elephant trophy reversal comes as a surprise to administration employees, interest groups, *CNN Politics*, Nov. 19, 2017, *available at* http://www.cnn.com/2017/11/18/politics/elephant-trophy-reversal-reactions/index.html.

member of the hunting and conservation organization the Boone and Crockett Club, and participated heavily in the search for an Interior Secretary during his father's presidential transition.[7] It has also been reported that Donald Trump, Jr. and Eric Trump maintain connections to members appointed to Secretary Ryan Zinke's International Wildlife Conservation Council.[8]

Because Donald Trump, Jr. and Eric Trump are private citizens, whose primary connection to the federal government is through their father, the public has a significant interest in learning whether and to what extent they influenced the U.S. FWS's decision making on this issue to advance their own personal interests. The requested records would also allow the public to understand how and why the U.S. FWS came to its sudden decision to reverse previous trophy hunting import bans. Because a previously submitted FOIA did not yield any results searching for direct communications with the Trump sons or their representatives, this FOIA has been submitted to cover previously un-sought records for the sake of transparency.

CREW is a non-profit corporation, organized under section 501(c)(3) of the Internal Revenue Code. CREW is committed to protecting the public's right to be aware of the activities of government officials, to ensuring the integrity of those officials, and to highlighting and working to reduce the influence of money on politics. CREW uses a combination of research, litigation, and advocacy to advance its mission. CREW intends to analyze the information responsive to this request and to share its analysis with the public through reports, press releases, or other means. In addition, CREW will disseminate any documents it acquires from this request to the public through its website, www.citizensforethics.org. The release of information obtained through this request is not in CREW's financial interest.

CREW further requests that it not be charged search or review fees for this request pursuant to 5 U.S.C. § 552(a)(4)(A)(ii)(II) because CREW qualifies as a member of the news media. *See Nat'l Sec. Archive v. U.S. Dep't of Defense*, 880 F.2d 1381, 1386 (D.C. Cir. 1989) (holding non-profit a "representative of the news media" and broadly interpreting the term to include "any person or organization which regularly publishes or disseminates information to the public").

CREW routinely and systematically disseminates information to the public in several ways. CREW's website receives tens of thousands of page views every month. The website includes blogposts that report on and analyze newsworthy developments regarding government ethics, corruption, and money in politics, as well as numerous reports CREW has published to educate the public about these issues. In addition, CREW posts all documents it receives under the FOIA its website, www.citizensforethics.org, and those documents have been visited hundreds of thousands of times.

---

[7] Tal Kopan, How Trump's son's passion for hunting is shaping search for Interior secretary, *CNN Politics*, Dec. 9, 2016, *available at* http://www.cnn.com/2016/12/09/politics/donald-trump-jr-siblings-hunting-interior-secretary/index.html.

[8] *Associated Press*, Trump wildlife board stuffed with tropby hunters, *USA Today*, March 15, 2018, *available at* https://www.usatoday.com/story/news/politics/2018/03/15/trump-wildlife-board-stuffed-trophy-hunters/430376002/

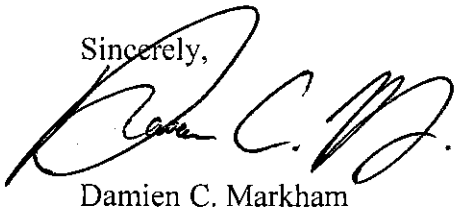
Under these circumstances, CREW satisfies fully the criteria for a fee waiver.

Conclusion

If you have any questions about this request or foresee any problems in fully releasing the requested records, please contact me at (202) 408-5565 or dmarkham@citizensforethics.org. Also, if CREW's request for a fee waiver is not granted in full, please contact our office immediately upon making such a determination.

Where possible, please produce records in electronic format. Please send the requested records to me either at dmarkham@citizensforethics.org or at Damien Markham, Citizens for Responsibility and Ethics in Washington, 455 Massachusetts Ave., N.W. , Washington, D.C. 20001. Thank you for your assistance in this matter.

Sincerely,



Damien C. Markham

IN REPLY REFER TO:
FWS-2018-00691

February 20, 2019

Damien Markham
Citizens for Responsibility and Ethics in Washington (CREW)
1101 K Street, N.W. Suite 201
Washington, D.C. 20005
dmarkhan@citizensforthics.org

Dear Mr. Markham:

This is a final response to your Freedom of Information Act (FOIA) request dated April 16, 2018 and assigned control number FWS-2018-00691. Please cite this number in any future communications with our office regarding your request.

You requested the following: "*All calendars and/or other records reflecting meetings, full schedules, and phone records, from January 2017 to the present, of:*

1. *Former Acting Director and current Deputy Director of the U.S. Fish and Wildlife Service Jim Kurth;*
2. *Deputy Director and current Principal Deputy Director of the U.S. Fish and Wildlife Service Greg Sheehan;*
3. *Deputy Director Steve Guertin; and*
4. *U.S. Fish and Wildlife Service Council Designated Federal Officer Joshua Winchell"*

We have enclosed three files in Adobe Acrobat Portable Document Format (PDF) consisting of 690 pages. Six hundred and ninety pages are withheld in part pursuant to FOIA Exemption 5 and FOIA Exemption 6. Forty-seven pages are withheld in part pursuant to FOIA Exemption 7 (c). The rest of the material is being released in its entirety.

Exemption 5

Exemption 5 allows an agency to withhold "inter-agency or intra-agency memorandums or letters which would not be available by law to a party... in litigation with the agency." 5 U.S.C. § 552(b)(5).Exemption 5 therefore incorporates the privileges that protect materials from discovery in litigation, including the deliberative process, attorney work-product, attorney-client, and commercial information privileges. We are withholding material in part under Exemption 5 because it qualifies to be withheld under the following privileges:

Commercial Information Privilege

When the government enters the marketplace as an ordinary commercial buyer or seller, the government's information is protected under the commercial information privilege if it is sensitive information not otherwise available, and disclosure would significantly harm the government's monetary functions or commercial interests. The theory behind the privilege is that the government may be placed at a competitive disadvantage or the consummation of a contract may be endangered if confidential information generated by the government is disclosed.

The information withheld under this privilege consists of active conference call telephone numbers and access codes, which could be used to conduct conference calls by parties outside the government or used to call in to monitor internal government conversations. We are withholding it because disclosure to the public would chill communications between federal employees and harm the government's ability to exchange information.

Exemption 6

Exemption 6 allows an agency to withhold "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." 5 U.S.C. § 552(b)(6). The phrase "similar files" covers any agency records containing information about a particular individual that can be identified as applying to that individual. To determine whether releasing records containing information about a particular individual would constitute a clearly unwarranted invasion of personal privacy, we are required to balance the privacy interest that would be affected by disclosure against any public interest in the information.

Under the FOIA, the only relevant public interest to consider under the exemption is the extent to which the information sought would shed light on an agency's performance of its statutory duties or otherwise let citizens 'know what their government is up to. The burden is on the requester to establish that disclosure would serve the public interest. When the privacy interest at stake and the public interest in disclosure have been determined, the two competing interests must be weighed against one another to determine which is the greater result of disclosure: the harm to personal privacy or the benefit to the public. The purposes for which the request for information is made do not impact this balancing test, as a release of information requested under the FOIA constitutes a release to the general public.

The information that has been withheld under Exemption 6 consists of personal information in the form of email addresses of members of the public, phone numbers, google hangouts links and names of law enforcement personnel and we have determined that the individuals to whom this information pertains have a substantial privacy interest in withholding it. Additionally, we have determined that the disclosure of this information would shed little or no light on the performance of the agency's statutory duties. Because the harm to personal privacy is greater than whatever public interest may be served by disclosure, release of the information would constitute a clearly unwarranted invasion of the privacy of these individuals and we are withholding it under Exemption 6.

Exemption 7

Exemption 7 protects from disclosure "records or information compiled for law enforcement purposes" if the records fall within one or more of six specific bases for withholding set forth in subparts (a) through (f). 5 U.S.C. § 552(b)(7)(a)-(f). We are withholding material in part under Exemption 7 because they are protected under the following subpart:

7(C)

Exemption 7(C) protects law enforcement records if their release could reasonably be expected to constitute an unwarranted invasion of personal privacy. It is regularly applied to withhold references to individuals in law enforcement files. For the materials that have been withheld under 7(C), we have determined that releasing them would constitute an unwarranted invasion of privacy because they identify individuals referenced in law enforcement records and the release of this information would not shed light on an agency's performance of its statutory duties.

We reasonably foresee that disclosure would harm an interest protected by one or more of the nine exemptions to the FOIA's general rule of disclosure.

The decision to withhold this information was made by Carrie Hyde-Michaels, FWS FOIA Officer, Division of Information Resources & Technology Management (IRTM). Larry Mellinger, Attorney-Advisor, in the Office of the Solicitor was consulted.

You may seek dispute resolution services from our FOIA Public Liaison, Carrie Hyde-Michaels by phone at 703-358-2291; by email at carrie_hyde-michaels@fws.gov; or by mail at U.S. Fish and Wildlife Service; Attention: Carrie Hyde-Michaels, FOIA Public Liaison; 5275 Leesburg Pike, Falls Church, VA 22041.

You may also seek dispute resolution services from the Office of Government Information Services (OGIS). The 2007 FOIA amendments created OGIS to offer mediation services to resolve disputes between FOIA requesters and Federal agencies as a non-exclusive alternative to litigation. Using OGIS services does not affect your right to pursue litigation. You may contact OGIS in any of the following ways:

Office of Government Information Services
National Archives and Records Administration
8601 Adelphi Road - OGIS
College Park, MD 20740-6001

E-mail: ogis@nara.gov
Web: https://ogis.archives.gov
Telephone: 202-741-5770
Fax: 202-741-5769
Toll-free: 1-877-684-6448

Please note that using OGIS services does not affect the timing of filing an appeal with the Department's FOIA & Privacy Act Appeals Officer.

You may also file an appeal with the Department's FOIA/Privacy Act Appeals Officer. If you choose to appeal, the FOIA/Privacy Act Appeals Officer must receive your FOIA appeal **no later than 90 workdays** from the date of this letter. Appeals arriving or delivered after 5 p.m. Eastern Time, Monday through Friday, will be deemed received on the next workday.

Your appeal must be made in writing. You may submit your appeal and accompanying materials to the FOIA/Privacy Act Appeals Officer by mail, courier service, fax, or email. All communications concerning your appeal should be clearly marked with the words: "FREEDOM OF INFORMATION APPEAL." You must include an explanation of why you believe the FWS's response is in error. You must also include with your appeal copies of all correspondence between

you and FWS concerning your FOIA request, including your original FOIA request and FWS's response. Failure to include with your appeal all correspondence between you and FWS will result in the Department's rejection of your appeal, unless the FOIA/Privacy Act Appeals Officer determines (in the FOIA/Privacy Act Appeals Officer's sole discretion) that good cause exists to accept the defective appeal.

Please include your name and daytime telephone number (or the name and telephone number of an appropriate contact), email address and fax number (if available) in case the FOIA/Privacy Act Appeals Officer needs additional information or clarification of your appeal.

DOI FOIA/Privacy Act Appeals Office Contact Information
Department of the Interior
Office of the Solicitor
1849 C Street, N.W.
MS-6556 MIB
Washington, DC 20240

Attn: FOIA/Privacy Act Appeals Office

Telephone: (202) 208-5339
Fax: (202) 208-6677
Email: FOIA.Appeals@sol.doi.gov

For more information on FOIA Administrative Appeals, you may review the Department's FOIA regulations at *43 C.F.R. Part 2, Subpart H.*

For your information, Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA. See 5 U.S.C. § 552(c) (2006 & Supp. IV 2010). This response is limited to those records that are subject to the requirements of the FOIA. This is a standard notification that is given to all our requesters and should not be taken as an indication that excluded records do, or do not, exist.

This letter completes our response to your request. If you have any questions, you may contact me by phone at 703-358-2291; by e-mail at fwhq_foia@fws.gov; or by mail at U.S. Fish and Wildlife Service Headquarters; Attention: Carrie Hyde-Michaels, FOIA Officer; 5275 Leesburg Pike; MS:IRTM; Falls Church, VA, 22041.

Sincerely,

Carrie Hyde-Michaels
U.S. Fish and Wildlife Service
FOIA Officer
