PERMIT 1 CERTIFICATE N7 202596

CONDITIONS FOR PERMIT NO. 1s 202596

Page 1 of 1

PERMIT CONDITIONS FOR THE NATIONAL/ INTERNATIONAL IMPORT, EXPORT OR RE-EXPORT OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS

THEREOF; NON-CITES LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH

These conditions will be applicable to all National/ International Imports, Exports and Re-exports of CITES and Non-CITES species and any products thereof; live wild animals, live exotic animals, hunting trophies, wild animal products, protected plants and live fish by air, mail rail and road within the Gauteng Province of which the first port of entry into and/ or the last port of exit out of the Province of Gauteng/ South Africa will be OR Tambo International Airport.

Import permits are not valid unless the imported consignment is accompanied by a valid (original) export permit from the country/ province of origin (if required), which must be handed to the authorized Environmental Management Inspector on inspection.

THE FOLLOWING CONDITIONS ARE APPLICABLE TO:

- (A) ALL NATIONAL/ INTERNATIONAL IMPORTS, EXPORTS AND RE-EXPORTS OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH (INCLUDING AIR, MAIL, RAIL, ROAD)

THIS PERMIT:

- a) Shall not be transferable;
 - b) Shall be invalid until the signature of the holder/ Recipient thereof been appended thereto;
 - c) This permit is not valid unless it has been endorsed and released by an authorized Environmental Management Inspector/ official prior to the import, export or re-export taking place. In cases of importation of live animals, which are to be quarantined at OR Tambo International Airport's Quarantine Station the permit must be released prior to the animals leaving quarantine. Original import permits to be inserted into a sealed envelope and placed in the Environmental Management Inspector box that's provided at the quarantine station, no more than 14 working days after import;
 - d) Shall be subject to the provisions of any other law and or regulation;
 - e) Shall be valid for one consignment only;
 - f) This permit is subject to the compliance of Veterinary and Agricultural requirements; and to the compliance of IATA Live Animal Regulations.
2. The permit holder or his delegated agent must contact one of the authorized Environmental Management Inspector/ officials, per telephone and confirm per fax a minimum of 48 hours prior to the import, export or re-export taking place to book an inspection (the inspection booking must be requested a minimum of 48 hours prior to the intended inspection), applicable for shipments done over weekends and public holidays, with the following information:
- a) Name / Company Name of Importer / Exporter;
 - b) Name of Airline and Warehouse where intended inspection will take place;
 - c) Date and Time of Import / Export / Re-Export;
 - d) Date and Time of intended inspection (subject to approval);
 - e) Agents particulars (if applicable), Carrier Name, Flight Number, Flight Time and Waybill Number;
 - f) The applicable permit number/s and relevant expiry dates; and
 - g) Detailed packing list as per condition 7.
3. Inspections are by appointment only and early booking is necessary. An authorized Environmental Management Inspector/ official may be contacted at the following telephone numbers during office hours (07:00— +15:30): Office: +27 (11) 390-3687/ 231 Fax: +27 (11) 390-1720
4. All relevant documentation, including original permit's (CITES permits must include original and coloured copy), Packing List's, Waybill's and Bill of entry's (SAD/ DA 550) must be presented for inspection. A photo copy of all these documents must also be handed to the Environmental Management Inspector/ official on inspection. The original permit's, these conditions and packing list/s must accompany the consignment/s.
5. All transport containers must be numbered and the numbers must coincide with the numbers on the packing list/s. The country/ province of destination as shown on the containers must coincide with the country/ province of destination as on the permit. The details on the packing list's must coincide with the details on the permit's and Waybill/s.
6. Detailed packing list[s], that are signed and dated must accompany the consignment/s, with the following information:
- a) Details of Importer and Exporter (Names, addresses and contact numbers):
 - b) Waybill number/s and name of carrier, flight number, date and time;
 - c) Transport container number/s;
 - d) Scientific name of species (in full) with relevant transponder / tag / ring numbers: a detailed description of specimen / product and the origin thereof;
 - e) Common name of species (in full);
 - f) Number per species per container (actual number exported / imported); and
 - g) Applicable permit number's
7. If this permit is not used, the original permit (CITES permits must include coloured copy) must be returned to the issuing authority within 14 working days after expiry thereof. Import permits must be returned to the issuing authority within 14 working days after use. Export permits must be handed to a Management Authority of the importing country/ province within 14 working days after use.

8. The permit holder must make and retain photo copies of permit/s for audit inspections. Copies of import permits must be made and retained after endorsement for Re-export permit applications. When applying for a Re-export permit, a copy of the endorsed import permit must be submitted to the Permit office with the application.

9. Only A person authorized thereto by the Premier or Minister may make any alteration on the permit.

To: (b) (6)

Good morning.

I have been assigned your application to import a sport-hunted bontebok. Upon preliminary review of your application, we found that you did not include the date next to your signature on page 1, section D of the application. Please include the date and reply to this email with the scanned, completed page.

Please be aware that if the requested information is not received by this office within 45 days, your application will be abandoned and administratively closed. Once a file is closed, you will need to submit a new application and all required fees for the Service to consider your proposed activity.

--
Sincerely,

Luis Rivera

PERMIT CONDITIONS FOR THE NATIONAL/ INTERNATIONAL IMPORT, EXPORT OR RE-EXPORT OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; NON-CITES LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH

These conditions will be applicable to all National/ International Imports, Exports and Re-Exports of CITES and Non-CITES species and any products thereof; live wild animals, live exotic animals, hunting trophies, wild animal products, protected plants and live fish by air, mail, rail and road within the Gauteng Province of which the first port of entry into and/ or the last port of exit out of the Province of Gauteng/ South Africa will be OR Tambo International Airport.

Import permits are not valid unless the imported consignment is accompanied by a valid (original) export permit from the country/ province of origin (if required), which must be handed to the authorized Environmental Management Inspector on inspection.

THE FOLLOWING CONDITIONS ARE APPLICABLE TO:

- (A) ALL NATIONAL/ INTERNATIONAL IMPORTS, EXPORTS AND RE-EXPORTS OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH (INCLUDING AIR, MAIL, RAIL, ROAD)**

THIS PERMIT:

1.
 - a) Shall not be transferable;
 - b) Shall be invalid until the signature of the holder/ Recipient thereof been appended thereto;
 - c) This permit is not valid unless it has been endorsed and released by an authorized Environmental Management Inspector/ official prior to the import, export or re-export taking place. In cases of importation of live animals, which are to be quarantined at OR Tambo International Airport's Quarantine Station, the permit must be released prior to the animals leaving quarantine. Original import permits to be inserted into a sealed envelope and placed in the Environmental Management Inspector box that's provided at the quarantine station, no more than 14 working days after import;
 - d) Shall be subject to the provisions of any other law and or regulation;
 - e) Shall be valid for one consignment only;
 - f) This permit is subject to the compliance of Veterinary and Agricultural requirements; and to the compliance of IATA Live Animal Regulations.
2. The permit holder or his delegated agent must contact one of the authorized Environmental Management Inspector/ officials, per telephone and confirm per fax a minimum of 48 hours prior to the import, export or re-export taking place to book an inspection (the inspection booking must be requested a minimum of 48 hours prior to the intended inspection), applicable for shipments done over weekends and public holidays, with the following information:
 - a) Name / Company Name of Importer / Exporter;
 - b) Name of Airline and Warehouse where intended inspection will take place;
 - c) Date and Time of Import / Export / Re-Export;
 - d) Date and Time of intended inspection (subject to approval);
 - e) Agents particulars (if applicable), Carrier Name, Flight Number, Flight Time and Waybill Number;
 - f) The applicable permit number/s and relevant expiry dates; and
 - g) Detailed packing list as per condition 7.
3. Inspections are by appointment only and early booking is necessary. An authorized Environmental Management Inspector/ official may be contacted at the following telephone numbers during office hours (07:00 – 16:30):
 Office: +27 (11) 390-3687/ 2311
 Fax: +27 (11) 390-1720
4. All relevant documentation, including original permit/s (CITES permits must include original and coloured copy), Packing List/s, Waybill/s and Bill of entry/s (SAD/ DA 550) must be presented for inspection. A photo copy of all these documents must also be handed to the Environmental Management Inspector/ official on inspection. The original permit/s, these conditions and packing list/s must accompany the consignment/s.
5. All transport containers must be numbered and the numbers must coincide with the numbers on the packing list/s. The country/ province of destination as shown on the containers must coincide with the country/ province of destination as on the permit. The details on the packing list/s must coincide with the details on the permit/s and Waybill/s.
6. Detailed packing list/s, that are signed and dated must accompany the consignment/s, with the following information:
 - a) Details of Importer and Exporter (Names, addresses and contact numbers);
 - b) Waybill number/s and name of carrier, flight number, date and time;
 - c) Transport container number/s;
 - d) Scientific name of species (in full) with relevant transponder / tag / ring numbers; a detailed description of specimen / product and the origin thereof;
 - e) Common name of species (in full);
 - f) Number per species per container (actual number exported / imported); and
 - g) Applicable permit number/s
7. If this permit is not used, the original permit (CITES permits must include coloured copy) must be returned to the issuing authority within 14 working days after expiry thereof. Import permits must be returned to the issuing authority within 14 working days after use. Export permits must be handed to a Management Authority of the importing country/ province within 14 working days after use.
8. The permit holder must make and retain photo copies of permit/s for audit inspections. Copies of import permits must be made and retained after endorsement, for Re-export permit applications. When applying for a Re-export permit, a copy of the endorsed import permit must be submitted to the Permit office with the application.
9. Only A person authorized thereto by the Premier or Minister may make any alteration on the permit.
10. Failure to comply with any of the permit conditions renders the permit invalid and may result in criminal proceedings, cancellation of the permit/s and seizure of the consignment/s.
11. The holder of the permit and / or his/ her delegated agent will be held responsible for any legal costs; costs incurred for delays and / or storage fees due to irregularities and / or due to the consignment being withheld due to incorrect documentation, and / or incorrect consignment/s and / or failure to comply with permit conditions.
12. Permit holders or their delegated agents must inform the Environmental Management Inspector/ official if an inspection is cancelled, or if they are to be late for an inspection within a reasonable time before the inspection is due to take place.

PERMIT CONDITIONS FOR THE NATIONAL/ INTERNATIONAL IMPORT, EXPORT OR RE-EXPORT OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; NON-CITES LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH

These conditions will be applicable to all National/ International Imports, Exports and Re-Exports of CITES and Non-CITES species and any products thereof; live wild animals, live exotic animals, hunting trophies, wild animal products, protected plants and live fish by air, mail, rail and road within the Gauteng Province of which the first port of entry into and/ or the last port of exit out of the Province of Gauteng/ South Africa will be OR Tambo International Airport.

Import permits are not valid unless the imported consignment is accompanied by a valid (original) export permit from the country/ province of origin (if required), which must be handed to the authorized Environmental Management Inspector on inspection.

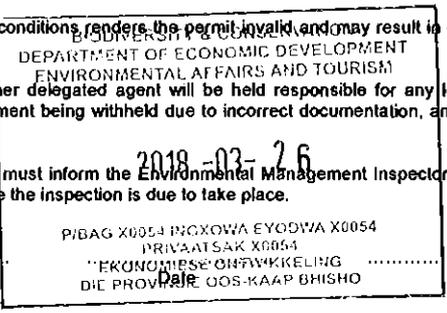

THE FOLLOWING CONDITIONS ARE APPLICABLE TO:

(A) ALL NATIONAL/ INTERNATIONAL IMPORTS, EXPORTS AND RE-EXPORTS OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH (INCLUDING AIR, MAIL, RAIL, ROAD)

THIS PERMIT:

1.
 - a) Shall not be transferable;
 - b) Shall be invalid until the signature of the holder/ Recipient thereof been appended thereto;
 - c) This permit is not valid unless it has been endorsed and released by an authorized Environmental Management Inspector/ official prior to the import, export or re-export taking place. In cases of importation of live animals, which are to be quarantined at OR Tambo International Airport's Quarantine Station, the permit must be released prior to the animals leaving quarantine. Original import permits to be inserted into a sealed envelope and placed in the Environmental Management Inspector box that's provided at the quarantine station, no more than 14 working days after import;
 - d) Shall be subject to the provisions of any other law and or regulation;
 - e) Shall be valid for one consignment only;
 - f) This permit is subject to the compliance of Veterinary and Agricultural requirements; and to the compliance of IATA Live Animal Regulations.
2. The permit holder or his delegated agent must contact one of the authorized Environmental Management Inspector/ officials, per telephone and confirm per fax a minimum of 48 hours prior to the import, export or re-export taking place to book an inspection (the inspection booking must be requested a minimum of 48 hours prior to the intended inspection), applicable for shipments done over weekends and public holidays, with the following information:
 - a) Name / Company Name of Importer / Exporter;
 - b) Name of Airline and Warehouse where intended inspection will take place;
 - c) Date and Time of Import / Export / Re-Export;
 - d) Date and Time of intended inspection (subject to approval);
 - e) Agents particulars (if applicable), Carrier Name, Flight Number, Flight Time and Waybill Number;
 - f) The applicable permit number/s and relevant expiry dates; and
 - g) Detailed packing list as per condition 7.
3. Inspections are by appointment only and early booking is necessary. An authorized Environmental Management Inspector/ official may be contacted at the following telephone numbers during office hours (07:00 – 16:30):
 Office: +27 (11) 390-3887/ 2311
 Fax: +27 (11) 390-1720
4. All relevant documentation, including original permit/s (CITES permits must include original and coloured copy), Packing List/s, Waybill/s and Bill of entry/s (SAD/ DA 550) must be presented for inspection. A photo copy of all these documents must also be handed to the Environmental Management Inspector/ official on inspection. The original permit/s, these conditions and packing list/s must accompany the consignment/s.
5. All transport containers must be numbered and the numbers must coincide with the numbers on the packing list/s. The country/ province of destination as shown on the containers must coincide with the country/ province of destination as on the permit. The details on the packing list/s must coincide with the details on the permit/s and Waybill/s.
6. Detailed packing list/s, that are signed and dated must accompany the consignment/s, with the following information:
 - a) Details of Importer and Exporter (Names, addresses and contact numbers);
 - b) Waybill number/s and name of carrier, flight number, date and time;
 - c) Transport container number/s;
 - d) Scientific name of species (in full) with relevant transponder / tag / ring numbers; a detailed description of specimen / product and the origin thereof;
 - e) Common name of species (in full);
 - f) Number per species per container (actual number exported / imported); and
 - g) Applicable permit number/s
7. If this permit is not used, the original permit (CITES permits must include coloured copy) must be returned to the Issuing authority within 14 working days after expiry thereof. Import permits must be returned to the issuing authority within 14 working days after use. Export permits must be handed to a Management Authority of the importing country/ province within 14 working days after use.
8. The permit holder must make and retain photo copies of permit/s for audit inspections. Copies of import permits must be made and retained after endorsement, for Re-export permit applications. When applying for a Re-export permit, a copy of the endorsed import permit must be submitted to the Permit office with the application.
9. Only A person authorized thereto by the Premier or Minister may make any alteration on the permit.
10. Failure to comply with any of the permit conditions, renders the permit invalid and may result in criminal proceedings, cancellation of the permit/s and seizure of the consignment/s.
11. The holder of the permit and / or his/ her delegated agent will be held responsible for any legal costs; costs incurred for delays and / or storage fees due to irregularities and / or due to the consignment being withheld due to incorrect documentation, and / or incorrect consignment/s and / or failure to comply with permit conditions.
12. Permit holders or their delegated agents must inform the Environmental Management Inspector/ official if an inspection is cancelled, or if they are to be late for an inspection within a reasonable time before the inspection is due to take place.

PERMIT CONDITIONS FOR THE NATIONAL/ INTERNATIONAL IMPORT, EXPORT OR RE-EXPORT OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; NON-CITES LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH

These conditions will be applicable to all National/ International Imports, Exports and Re-Exports of CITES and Non-CITES species and any products thereof; live wild animals, live exotic animals, hunting trophies, wild animal products, protected plants and live fish by air, mail, rail and road within the Gauteng Province of which the first port of entry into and/ or the last port of exit out of the Province of Gauteng/ South Africa will be OR Tambo International Airport.

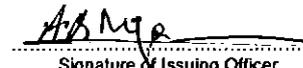

Import permits are not valid unless the imported consignment is accompanied by a valid original export permit from the country/ province of origin (if required), which must be handed to the authorized Environmental Management Inspector on inspection.

THE FOLLOWING CONDITIONS ARE APPLICABLE TO:

(A) **ALL NATIONAL/ INTERNATIONAL IMPORTS, EXPORTS AND RE-EXPORTS OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH (INCLUDING AIR, MAIL, RAIL, ROAD)**

THIS PERMIT:

1.
 - a) Shall not be transferable;
 - b) Shall be invalid until the signature of the holder/ Recipient thereof been appended thereto;
 - c) This permit is not valid unless it has been endorsed and released by an authorized Environmental Management Inspector/ official prior to the import, export or re-export taking place. In cases of importation of live animals, which are to be quarantined at OR Tambo International Airport's Quarantine Station, the permit must be released prior to the animals leaving quarantine. Original import permits to be inserted into a sealed envelope and placed in the Environmental Management Inspector box that's provided at the quarantine station, no more than 14 working days after import;
 - d) Shall be subject to the provisions of any other law and or regulation;
 - e) Shall be valid for one consignment only;
 - f) This permit is subject to the compliance of Veterinary and Agricultural requirements; and to the compliance of IATA Live Animal Regulations.
2. The permit holder or his delegated agent must contact one of the authorized Environmental Management Inspector/ officials, per telephone and confirm per fax a minimum of 48 hours prior to the import, export or re-export taking place to book an inspection (the inspection booking must be requested a minimum of 48 hours prior to the intended inspection), applicable for shipments done over weekends and public holidays, with the following information:
 - a) Name / Company Name of Importer / Exporter;
 - b) Name of Airline and Warehouse where intended inspection will take place;
 - c) Date and Time of Import / Export / Re-Export;
 - d) Date and Time of intended inspection (subject to approval);
 - e) Agents particulars (if applicable), Carrier Name, Flight Number, Flight Time and Waybill Number;
 - f) The applicable permit number/s and relevant expiry dates; and
 - g) Detailed packing list as per condition 7.
3. Inspections are by appointment only and early booking is necessary. An authorized Environmental Management Inspector/ official may be contacted at the following telephone numbers during office hours (07:00 – 15:30):
 Office: +27 (11) 390-3687/ 2311
 Fax: +27 (11) 390-1720
4. All relevant documentation, including original permit/s (CITES permits must include original and coloured copy), Packing List/s, Waybill/s and Bill of entry/s (SAD/ DA 550) must be presented for inspection. A photo copy of all these documents must also be handed to the Environmental Management Inspector/ official on inspection. The original permit/s, these conditions and packing list/s must accompany the consignment/s.
5. All transport containers must be numbered and the numbers must coincide with the numbers on the packing list/s. The country/ province of destination as shown on the containers must coincide with the country/ province of destination as on the permit. The details on the packing list/s must coincide with the details on the permit/s and Waybill/s.
6. Detailed packing list/s, that are signed and dated must accompany the consignment/s, with the following information:
 - a) Details of Importer and Exporter (Names, addresses and contact numbers);
 - b) Waybill number/s and name of carrier, flight number, date and time;
 - c) Transport container number/s;
 - d) Scientific name of species (in full) with relevant transponder / tag / ring numbers; a detailed description of specimen / product and the origin thereof;
 - e) Common name of species (in full);
 - f) Number per species per container (actual number exported / imported); and
 - g) Applicable permit number/s
7. If this permit is not used, the original permit (CITES permits must include coloured copy) must be returned to the issuing authority within 14 working days after expiry thereof. Import permits must be returned to the issuing authority within 14 working days after use. Export permits must be handed to a Management Authority of the importing country/ province within 14 working days after use.
8. The permit holder must make and retain photo copies of permit/s for audit inspections. Copies of import permits must be made and retained after endorsement, for Re-export permit applications. When applying for a Re-export permit, a copy of the endorsed import permit must be submitted to the Permit office with the application.
9. Only A person authorized thereto by the Premier or Minister may make any alteration on the permit.
10. Failure to comply with any of the permit conditions renders the permit invalid and may result in criminal proceedings, cancellation of the permit/s and seizure of the consignment/s.
11. The holder of the permit and / or his/her delegated agent will be held responsible for any legal costs; costs incurred for delays and / or storage fees due to irregularities and / or due to the consignment being withheld due to incorrect documentation, and / or incorrect consignment/s and / or failure to comply with permit conditions.
12. Permit holders or their delegated agents must inform the Environmental Management Inspector/ official if an inspection is cancelled, or if they are to be late for an inspection within a reasonable time before the inspection is due to take place.

**IMPORT OF SPORT-HUNTED TROPHIES OF BONTEBOK
TROPHIES FROM SOUTH AFRICA**

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
You may find instructions on how to make your application complete and help avoid unnecessary delays at the following link:

Section A: Complete if applying as an individual

1.a. Last Name DITTO		1.b. First Name Roger		1.c. Middle Name/Initial (b) (6)		1.d. Suffix	
2. Date of Birth (mm/dd/yyyy) (b) (6)		3. Telephone Number		3.a. Alternate Telephone Number		4. E-mail address	

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution			1.b. Doing business as (DBA)				
2. Tax identification no.			3. Description of business, agency, Tribe, or institution				
4.a. Principal officer Last name		4.b. Principal officer First Name		4.c. Principal officer Middle name/initial		4.d. Suffix	
5. Principal officer title			6. Primary contact name				
7.a. Business telephone number		7.b. Alternate telephone number		7.c. Business fax number		7.d. Business e-mail address	

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (b) (6)									
1.b. City SNOWHISH		1.c. State WA		1.d. Zip code/Postal code (b) (6)		1.e. County/Province (b) (6)		1.f. Country USA	
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)									
2.b. City		2.c. State		2.d. Zip code/Postal code		2.e. County/Province		2.f. Country	

Section D: All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount identified on page 2, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee - attach documentation of fee exempt status as outlined in instructions. [50 CFR 13.11(d)]	
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50 Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

11:10 AM (4 hours ago)

to me

Good morning sir:

My sincere apologies Mr. Rivera. Please find the updated page attached.

I also wanted to let you know that my CITES Export Permit from South Africa has been renewed because of the potential for it to expire before my import permit had been issued. Please see new permit attached as well.

And don't hesitate to let me know if there's anything else.

Roger Ditto

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least 90 days for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Same as Page 1

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

 No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:
- Scientific name (genus, species, and, if applicable, subspecies) and common name. *Loxodonta Africana*
 - Sex (if known). Male

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

- Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild: N/A
- Date wildlife is to be hunted: N/A
- Name of hunting outfitter, safari company, or professional hunter you will be hunting with: N/A

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

- Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
South Africa, Mapungubwe Game Reserve, Alldays, Vhembe District
- Date wildlife was hunted:
July 7, 2017

- c. Name of hunting outfitter, safari company, or professional hunter you hunted with:
Mr. E. Small (PH and Outfitter)
- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
Safari Cargo, South Africa

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). *See separate attached documents.*
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Mr. Pieter Erasmus
Business Name: Safari Cargo
Address: Holding 34, 5th Avenue, Bredell, 1623
City: Gauteng
State/Province:
Country, Postal Code: South Africa

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted?

Yes - see separate information attached.

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

License fee: R 5000 (\$400) was paid to the government, trophy fee: \$ 40,000, some of it was allocated to the community as per data and landowner used some.

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

Yes - see separate information attached.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

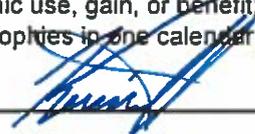

- 10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

- 11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature:  _____ Date: 5/8/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

- 12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Elephant Management Plan Annual Report for year 2016

Survey Data will be conducted every 2 years and the next survey is planned for June 2019 (Dr. Gerhard De Beer)

Area

Mapungubwe Game Reserve is 25000 ha big and open with Botswana on the Northern and western border.

It was opened up from ten fenced in properties to one big area open with Botswana to allow more area for the Tuli elephants.

Elephants have become resident since the year 2000 as we opened the fences to have more range for the plus minus 1400 elephants roaming the area. (See attached detail of air count)

Management Actions

Fences:

The condition of the Fences are deteriorating on our Northern boundary along Limpopo River and Eastern area bordering with Mapungubwe National Park due to elephant activity. The fence from middle Modena North up to Den Staat road have been repaired.

Along our Western Boundary with Breslau and Eendvogelpan, the electrical fences have been completed but we had to repair the Breslau fence once, and Eendvogelpan fence once during 2016 due to elephant activity.

Our Southern fence are in fairly good condition with elephant breaking threw but gets repaired.

The South Eastern Fence bordering Lauriston and Montique are constantly being broken, by elephants and neighbours keep feeding along fence to attract animals including elephants.

Degraded Area's:

On farms Parma and Montrow, a lot of erosion repair work has been done, as well as on Vergenoegd and Kruidfontein. The dam wall that broke on Vergenoegd washed away a lot of roads but was filled and repaired.

We have lost the dam walls at Vergenoegd, due to elephants working of the walls going over the walls to drink and bath in the water. This damage will still have to be assessed. The wall at Lelie dam showed deterioration and we do not think it will withstand this coming rainy season. This wall was repaired in 2014 to the extent of R2milj

Fire Management Plan:

Due to sparse ground cover and a very good road system, our fire risk is extremely low. We do have adequate fire-fighting equipment and personnel.

Water Provision:

We have three big dams that supply the main water to the animals and also the Limpopo River on our West and North. One of these dams were extensively damaged by elephants, and another is close to the point of the dam wall washing away. Another supply in the form of a borehole will supply water the animals during the drier period.

Game Management

Game Census Frequency:

Due to a lot of hunting, tourism and surveying activity we had during 2016 and a lot of helicopters were use, the game-count was on-going and reported daily when people were out for their activities. On 29 July 2016 till 5 August 2016 an official game count was conducted at the waterholes as well as with the use of 2 helicopters. This accounted for a total of 441 elephants on 1 Aug 2016. This show an increase in elephant numbers, the biggest increase due to more elephants moving in from Botswana on our Northern boundary. The increase in damage to trees and infrastructure are also more in these areas.

On 8 February 2016 a Nature Conservation Officer flew with helicopter on the property and elephants were recorded. These groups were monitored by helicopter from the 7th February till 9th February and was a total of 158 elephants at one-time on farms Somerville, Parma and Vergenoegd.

Professional hunters and guides are instructed to record sightings especially elephant.

Helicopter Pilots were also task with reporting sightings and was then recorded by Eugene Small.

Any sightings by guests and owner were also recorded.

A drone was acquired and this will be used to identify groups of elephant.

Desired Stocking Density:

The desired stocking density is reflected in our Management plan and is <1 elephant per sq km but at this stage it is 9,6 elephant per sq km (EMP) (Ex max 100 elephant EMP Pg 124 Section 4:12)

Current Stocking Density:

As per our census with reference to Section E 5.4 Page 137, we have 276 resident and ? migratory elephants. The Model stocking rate should be 100 Max. (Stocking Capacity Section 4:12 C Pg 124)

The damage to our infrastructure and environment are a sign of increased elephant activity.

Alterations to stocking density can be made after Habitat Condition Assessment this year if needed.

Some Herd numbers were in excess of 80 animals per herd. 121 on Modena , 118 on Vergenoegd.

We are identifying herds of elephant that were not previously identified on Mapungubwe Game Reserve. Noted was a herd of 121 on Modena, individuals that were identified by four cows with extremely long tusks, and 3 mature bulls with this specific herds. (We would like to collar one of these cows in 2017 to get more information of this specific herd)

In 2013 a herd of 236 stayed on Mapungubwe Game Reserve and was chased a few months later by helicopter back to Botswana. (Refer to Nature Conservation officials)

Game Management Action:

According to Scholes and Mennell 2008, elephant population increases 100% every 10 to 13 years.

From 2000 we saw a definite increase in the elephant population on Mapungubwe and since 2011 we started to do more research and monitoring threw School of Life Science of University of Kwa Zulu Natal (Annekke Bedetti) Refer to Elephant management Plan.

As the carrying capacity of Mapungubwe Game reserve allows for a total of 100 elephants, we see that the current population, resident and nomadic are far exceeding this.

An application will be submitted for 10 Cities elephant. We only hunted 3 in 2017 as the permit quota was issued late in 2016 and thus had only half a year to market and hunt these elephants.

We have collared an elephant cow which is part of one herd which consists of 87 individuals. (Attached data)

Also the selling of these animals to foreign hunters, which supply most of the income to run the farm, (90%) are very erratic due to uncertainty about Cities regulations to different countries as well as political uncertainty here and abroad.

We also have built and maintain an orphanage in the town of Alldays where we also feed 162 children, where income from elephant hunting is used.

We are in constant communications with School of Life Science of University of Kwa Zulu Natal which have been doing research on the total population of elephant in our area.

Elephant Management

Desired Total elephant Population Range:

As indicated by our Environmental Management Plan, the desired range is 100 individuals.

Desired Adult Sex Ratio Range:

Elephant Census Frequency:

Elephant census are done on an on-going process and for this all staff are motivated to report elephant activity. All tourist and guides are also asked to report any elephant activity and report and record elephant sightings.

Census Methods:

Any aircraft that are used for transport or game capture must report any elephant activity and numbers. This is then recorded.

A drone will be used to photograph groups and individuals as weather and time permits.

Method of elephant reduction

An application has been submitted for 10 Cities elephants.

We would suggest to have a set quota of 15 animals (Ref Management Plan) for 5 years as can be clearly seen that the deteriorating of Mapungubwe Game Reserve as a hole, is happening at an alarming rate and that current method is not slowing down destruction. According to the game count in July/ Aug 2016 the elephant numbers are increasing and if we can get an approved quota for 5 years, we will be better off in planning the hunts spread out over the whole year in advance. This will help with short term management in keeping Nomadic herds away, and will be a good indication on resident herd growth to see if our take-off need to be adjusted accordingly.

Rahmqvist

Foundation

**RAHMQVIST
FOUNDATION
CENTRE**

Rahmqvist Foundation Centre is a charity project initiated by Mr Leif Rahmqvist in the small rural town of Alldeys in South Africa.

RAHMQVIST FOUNDATION CENTRE

“All children are entitled to a good start in life with care and a safe shelter. I therefore founded Rahmqvist Foundation in order to build and run an orphanage, to give homeless and vulnerable children a safe place to grow up in.”

LEIF RAHMQVIST
Founder and Protector

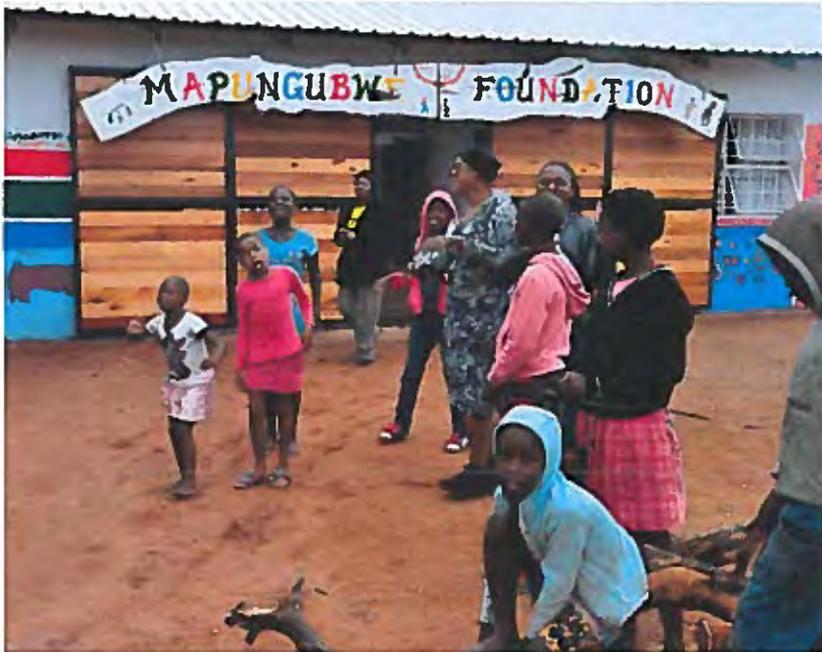

BACKGROUND

Close to my ranch in South Africa there is the town of Alldays. It is a small country town with lots of poverty, homelessness, unemployment and disease. There are many children having lost one or both their parents to AIDS and other diseases. The children are often living in very vulnerable situations, without any adult care. Their one meal a day they get by a Drop-In Centre run by local women. This is not the way children shall live! All children are entitled to a good start in life with shelter and proper care! I therefore founded Rahmqvist Foundation in order to build and run an orphanage to give children a place where they can be safe, get enough to eat, hygiene, health care, education, a bed of their own and not at least to play.

ORPHANAGE

To strengthen the orphanage organization we are establishing a partnership with Norsa Community Care.

SKILL SCHOOL

We are now taking the next step in the project through the start-up of Rahmqvist Foundation Skill School. The skill school will offer young people leaving school a professional training to be bricklayers, seamstresses, bakers, chefs, masseuses or hairdressers.

WANT TO HELP?

Rahmqvist Foundation Centre is a charity project. All funds raised go directly to the Centre and to the benefit of the children. We are extremely grateful for all contributions, large and small, from individuals, businesses, organizations, schools and others!

Elephant collared

One adult elephant cow, was darted and a collar fitted on 13 March 2015.

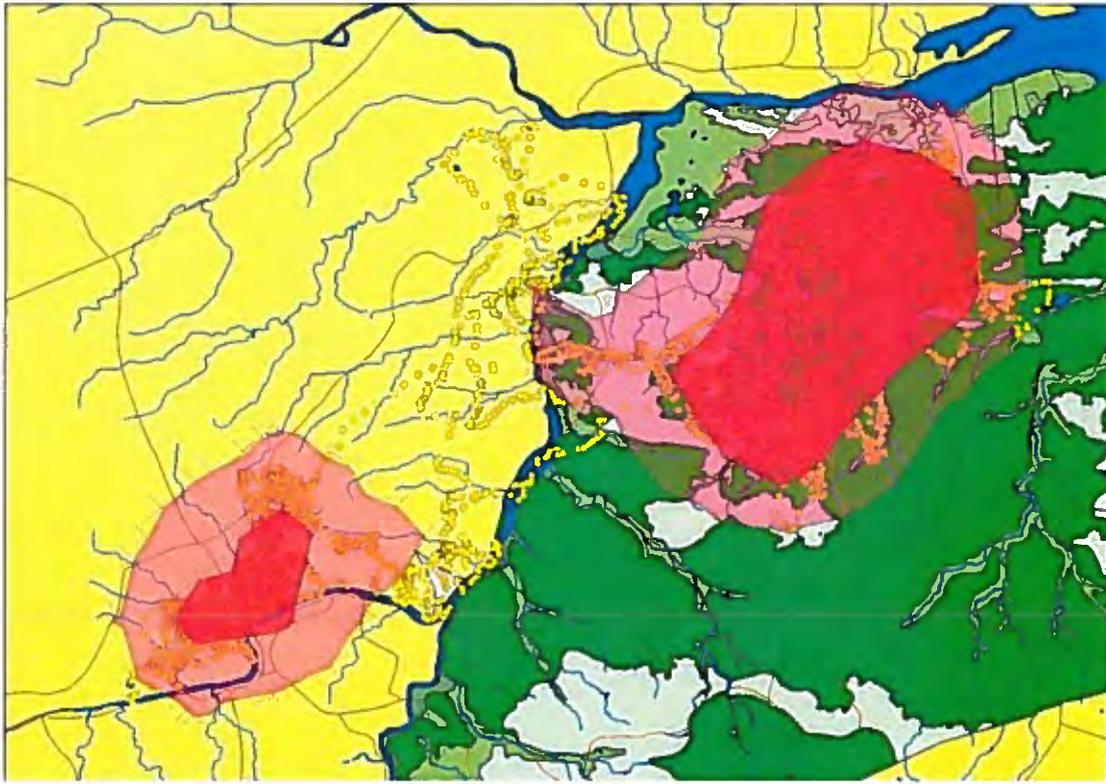

She was named Leila and is still part of one herd which consists of 89 animals.

With collar data it was established that this specific herd spend just over 11 months a year on Mapungubwe Game Reserve.

Leila: May to October 2016

Leila: May to January

ELEPHANT AERIAL CENSUS OF THE CENTRAL LIMPOPO RIVER VALLEY,
SOUTHERN AFRICA REPORT SUMMARY
SEPTEMBER 2012

Research Synopsis

In recent times, more and more questions have been asked on whether an increase in elephant numbers will lead to the ultimate destruction of an area.

Elephants are perceived to be a keystone species that determine the structure and composition of their habitats. This contention has in turn lead to claims that elephants at high numbers pose a threat to biodiversity in the conservation areas in which they occur. Little, however, is known on how elephant populations are limited and how co-existence between elephants and trees was achieved in the past. In order to understand elephant and tree dynamics a reliable understanding of what environmental and social factors influence elephant movements and the occupancy of different habitats is needed. This has led to the initiation of the Central Limpopo River Valley elephant research project in 1999 and is an ongoing program.

Since 2000, as part of the project six total aerial counts of the elephant population has been conducted to determine their range and numbers. In recent years the development of the Greater Mapungubwe Transfrontier Conservation Area, developing agriculture, mining, dam construction and increased human densities in the region, have influenced the range and the movements of elephants within the region.

Since 2005, increasing numbers of elephants have moved into Mapungubwe National Park and on several properties in South Africa where fence breakages between properties are reported on a near weekly basis. Extensive poaching and control hunting is also being reported and could influence population numbers and movements dramatically. Aerial surveys provide information on numbers, group structure and distribution that are important baseline data pertinent to basic ecological questions and conservation planning and management.

Methodology

This year's aerial survey of the area was undertaken on the 9th and 10th September 2012.

The methodology was similar to those of previous years. Three fixed wing airplanes (Cessna 206; two C182T) were used to count the study area simultaneously. A team consisting of a pilot, navigator and two observers on each side of the plane were used.

On day one the Northern Tuli Game Reserve (Botswana), the Tuli Block from the Motloutse River to Zanzibar and Sentinel Ranch, Nottingham Estate, River Ranch (Zimbabwe) were counted. On day two the Tuli Circle in Zimbabwe and Mapungubwe National Park, **Mapungubwe Private Reserve** and farms bordering the Limpopo River in South Africa were counted.

A herd of elephants seen from the airplane.

Results

During the 2012 count a total of 1291 elephants were counted.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name Lipworth	1.b. First Name Alexander	1.c. Middle Name/Initial (b) (6)	1.d. Suffix
1.a. Alternate Telephone Number (b) (6)		1.c. Address (b) (6)	

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room #; no P.O. Boxes) (b) (6)				
1.b. City Opalocka	1.c. State FL	1.d. Zip code/Postal code (b) (6)	1.e. County/Province	1.f. Country USA
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

<p>1. Attach the nonrefundable application processing fee in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].</p> <p>2. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50 Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.</p>	<p>Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)</p> <p align="right">Lipworth 05/07/2018</p>

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least 90 days for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Coppersmith Inc.
Attn: Jeremy Delacruz
434 Rozz place
South S.F., CA 94080

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

(b) (6)

Jeremy Delacruz 450-872-1225 jdelacruz@coppersmith.com

- 3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

N/A

- 4. For each trophy to be imported, provide:

- a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Loxodonta Africana

- b. Sex (if known).

N/A

- 5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Namibia, NYAE - NYAE Conservancy
Otjozondjupa Region
Nearest city: Tsumkwe

- b. Date wildlife is to be hunted:

September 15 - October 3 2018

- c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

S.M. Jacobs
SMJ Safaris
Farm A Andster # 915 PO Box 601
Grootfontein
Namibia

- 6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

N/A

- b. Date wildlife was hunted:

N/A.

- c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

NIA

- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

NIA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: S.M. Jacobs

Business Name: S.M. Safaris

Address: Farm Aandster # 915, P.O. Box 601

City: Grootfontein

State/Province:

Country, Postal Code: Namibia

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted?

NIA

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

NIA

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

NIA

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: Aspinorth Date: 05/07/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from [the list of designated ports](#). If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

E. IMPORT OF SPORT-HUNTED TROPHIES (*Appendix I of CITES and/or ESA*)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least 90 days for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Same as Page 1

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

[REDACTED]

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

 No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:
- Scientific name (genus, species, and, if applicable, subspecies) and common name. *Loxodonta Africana*
 - Sex (if known). Male

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

- Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild: N/A
- Date wildlife is to be hunted: N/A
- Name of hunting outfitter, safari company, or professional hunter you will be hunting with: N/A

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

- Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
South Africa, Mapungubwe Game Reserve, Alldays, Vhembe District
- Date wildlife was hunted:
July 7, 2017

- c. Name of hunting outfitter, safari company, or professional hunter you hunted with:
Mr. E. Small (PH and Outfitter)
- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
Safari Cargo, South Africa

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). *See separate attached documents.*
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Mr. Pieter Erasmus
Business Name: Safari Cargo

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted?

Yes - see separate information attached.

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

License fee: R 5000 (\$400) was paid to the government, trophy fee: \$ 40,000, some of it was allocated to the community as per data and landowner used some.

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

Yes - see separate information attached.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

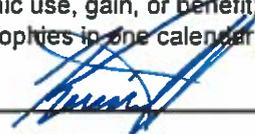

- 10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

- 11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature:  _____ Date: 5/8/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

- 12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Elephant Management Plan Annual Report for year 2016

Survey Data will be conducted every 2 years and the next survey is planned for June 2019 (Dr. Gerhard De Beer)

Area

Mapungubwe Game Reserve is 25000 ha big and open with Botswana on the Northern and western border.

It was opened up from ten fenced in properties to one big area open with Botswana to allow more area for the Tuli elephants.

Elephants have become resident since the year 2000 as we opened the fences to have more range for the plus minus 1400 elephants roaming the area. (See attached detail of air count)

Management Actions

Fences:

The condition of the Fences are deteriorating on our Northern boundary along Limpopo River and Eastern area bordering with Mapungubwe National Park due to elephant activity. The fence from middle Modena North up to Den Staat road have been repaired.

Along our Western Boundary with Breslau and Eendvogelpan, the electrical fences have been completed but we had to repair the Breslau fence once, and Eendvogelpan fence once during 2016 due to elephant activity.

Our Southern fence are in fairly good condition with elephant breaking threw but gets repaired.

The South Eastern Fence bordering Lauriston and Montique are constantly being broken, by elephants and neighbours keep feeding along fence to attract animals including elephants.

Degraded Area's:

On farms Parma and Montrow, a lot of erosion repair work has been done, as well as on Vergenoegd and Kruidfontein. The dam wall that broke on Vergenoegd washed away a lot of roads but was filled and repaired.

We have lost the dam walls at Vergenoegd, due to elephants working of the walls going over the walls to drink and bath in the water. This damage will still have to be assessed. The wall at Lelie dam showed deterioration and we do not think it will withstand this coming rainy season. This wall was repaired in 2014 to the extent of R2milj

Fire Management Plan:

Due to sparse ground cover and a very good road system, our fire risk is extremely low. We do have adequate fire-fighting equipment and personnel.

Water Provision:

We have three big dams that supply the main water to the animals and also the Limpopo River on our West and North. One of these dams were extensively damaged by elephants, and another is close to the point of the dam wall washing away. Another supply in the form of a borehole will supply water the animals during the drier period.

Game Management

Game Census Frequency:

Due to a lot of hunting, tourism and surveying activity we had during 2016 and a lot of helicopters were use, the game-count was on-going and reported daily when people were out for their activities. On 29 July 2016 till 5 August 2016 an official game count was conducted at the waterholes as well as with the use of 2 helicopters. This accounted for a total of 441 elephants on 1 Aug 2016. This show an increase in elephant numbers, the biggest increase due to more elephants moving in from Botswana on our Northern boundary. The increase in damage to trees and infrastructure are also more in these areas.

On 8 February 2016 a Nature Conservation Officer flew with helicopter on the property and elephants were recorded. These groups were monitored by helicopter from the 7th February till 9th February and was a total of 158 elephants at one-time on farms Somerville, Parma and Vergenoegd.

Professional hunters and guides are instructed to record sightings especially elephant.

Helicopter Pilots were also task with reporting sightings and was then recorded by Eugene Small.

Any sightings by guests and owner were also recorded.

A drone was acquired and this will be used to identify groups of elephant.

Desired Stocking Density:

The desired stocking density is reflected in our Management plan and is <1 elephant per sq km but at this stage it is 9,6 elephant per sq km (EMP) (Ex max 100 elephant EMP Pg 124 Section 4:12)

Current Stocking Density:

As per our census with reference to Section E 5.4 Page 137, we have 276 resident and ? migratory elephants. The Model stocking rate should be 100 Max. (Stocking Capacity Section 4:12 C Pg 124)

The damage to our infrastructure and environment are a sign of increased elephant activity.

Alterations to stocking density can be made after Habitat Condition Assessment this year if needed.

Some Herd numbers were in excess of 80 animals per herd. 121 on Modena , 118 on Vergenoegd.

We are identifying herds of elephant that were not previously identified on Mapungubwe Game Reserve. Noted was a herd of 121 on Modena, individuals that were identified by four cows with extremely long tusks, and 3 mature bulls with this specific herds. (We would like to collar one of these cows in 2017 to get more information of this specific herd)

In 2013 a herd of 236 stayed on Mapungubwe Game Reserve and was chased a few months later by helicopter back to Botswana. (Refer to Nature Conservation officials)

Game Management Action:

According to Scholes and Mennell 2008, elephant population increases 100% every 10 to 13 years.

From 2000 we saw a definite increase in the elephant population on Mapungubwe and since 2011 we started to do more research and monitoring through School of Life Science of University of Kwa Zulu Natal (Annekke Bedetti) Refer to Elephant management Plan.

As the carrying capacity of Mapungubwe Game reserve allows for a total of 100 elephants, we see that the current population, resident and nomadic are far exceeding this.

An application will be submitted for 10 Cities elephant. We only hunted 3 in 2017 as the permit quota was issued late in 2016 and thus had only half a year to market and hunt these elephants.

We have collared an elephant cow which is part of one herd which consists of 87 individuals. (Attached data)

Also the selling of these animals to foreign hunters, which supply most of the income to run the farm, (90%) are very erratic due to uncertainty about Cities regulations to different countries as well as political uncertainty here and abroad.

We also have built and maintain an orphanage in the town of Alldays where we also feed 162 children, where income from elephant hunting is used.

We are in constant communications with School of Life Science of University of Kwa Zulu Natal which have been doing research on the total population of elephant in our area.

Elephant Management

Desired Total elephant Population Range:

As indicated by our Environmental Management Plan, the desired range is 100 individuals.

Desired Adult Sex Ratio Range:

Elephant Census Frequency:

Elephant census are done on an on-going process and for this all staff are motivated to report elephant activity. All tourist and guides are also asked to report any elephant activity and report and record elephant sightings.

Census Methods:

Any aircraft that are used for transport or game capture must report any elephant activity and numbers. This is then recorded.

A drone will be used to photograph groups and individuals as weather and time permits.

Method of elephant reduction

An application has been submitted for 10 Cities elephants.

We would suggest to have a set quota of 15 animals (Ref Management Plan) for 5 years as can be clearly seen that the deteriorating of Mapungubwe Game Reserve as a hole, is happening at an alarming rate and that current method is not slowing down destruction. According to the game count in July/ Aug 2016 the elephant numbers are increasing and if we can get an approved quota for 5 years, we will be better off in planning the hunts spread out over the whole year in advance. This will help with short term management in keeping Nomadic herds away, and will be a good indication on resident herd growth to see if our take-off need to be adjusted accordingly.

Rahmqvist

Foundation

**RAHMQVIST
FOUNDATION
CENTRE**

Rahmqvist Foundation Centre is a charity project initiated by Mr Leif Rahmqvist in the small rural town of Alldeys in South Africa.

RAHMQVIST FOUNDATION CENTRE

“All children are entitled to a good start in life with care and a safe shelter. I therefore founded Rahmqvist Foundation in order to build and run an orphanage, to give homeless and vulnerable children a safe place to grow up in.”

LEIF RAHMQVIST
Founder and Protector

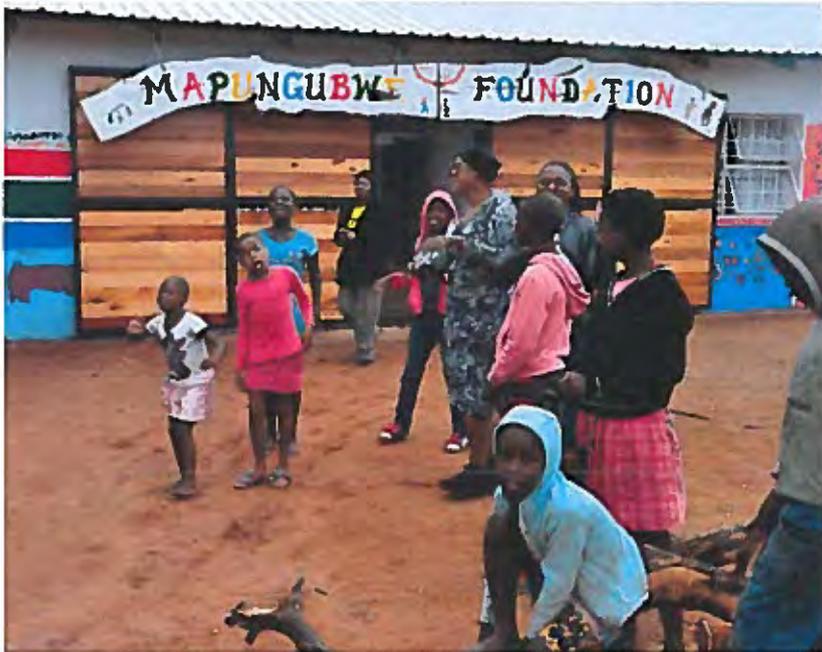

BACKGROUND

Close to my ranch in South Africa there is the town of Alldays. It is a small country town with lots of poverty, homelessness, unemployment and disease. There are many children having lost one or both their parents to AIDS and other diseases. The children are often living in very vulnerable situations, without any adult care. Their one meal a day they get by a Drop-In Centre run by local women. This is not the way children shall live! All children are entitled to a good start in life with shelter and proper care! I therefore founded Rahmqvist Foundation in order to build and run an orphanage to give children a place where they can be safe, get enough to eat, hygiene, health care, education, a bed of their own and not at least to play.

ORPHANAGE

To strengthen the orphanage organization we are establishing a partnership with Norsa Community Care.

SKILL SCHOOL

We are now taking the next step in the project through the start-up of Rahmqvist Foundation Skill School. The skill school will offer young people leaving school a professional training to be bricklayers, seamstresses, bakers, chefs, masseuses or hairdressers.

WANT TO HELP?

Rahmqvist Foundation Centre is a charity project. All funds raised go directly to the Centre and to the benefit of the children. We are extremely grateful for all contributions, large and small, from individuals, businesses, organizations, schools and others!

Elephant collared

One adult elephant cow, was darted and a collar fitted on 13 March 2015.

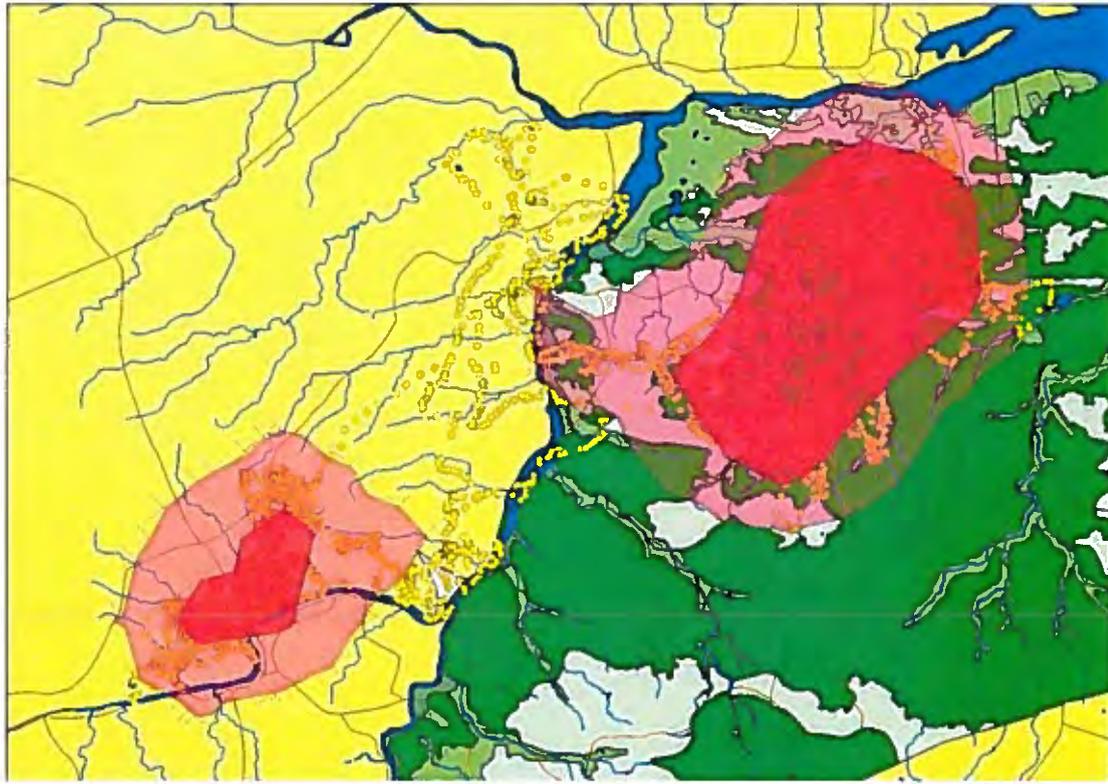

She was named Leila and is still part of one herd which consists of 89 animals.

With collar data it was established that this specific herd spend just over 11 months a year on Mapungubwe Game Reserve.

Leila: May to October 2016

Leila: May to January

ELEPHANT AERIAL CENSUS OF THE CENTRAL LIMPOPO RIVER VALLEY,
SOUTHERN AFRICA REPORT SUMMARY
SEPTEMBER 2012

Research Synopsis

In recent times, more and more questions have been asked on whether an increase in elephant numbers will lead to the ultimate destruction of an area.

Elephants are perceived to be a keystone species that determine the structure and composition of their habitats. This contention has in turn lead to claims that elephants at high numbers pose a threat to biodiversity in the conservation areas in which they occur. Little, however, is known on how elephant populations are limited and how co-existence between elephants and trees was achieved in the past. In order to understand elephant and tree dynamics a reliable understanding of what environmental and social factors influence elephant movements and the occupancy of different habitats is needed. This has led to the initiation of the Central Limpopo River Valley elephant research project in 1999 and is an ongoing program.

Since 2000, as part of the project six total aerial counts of the elephant population has been conducted to determine their range and numbers. In recent years the development of the Greater Mapungubwe Transfrontier Conservation Area, developing agriculture, mining, dam construction and increased human densities in the region, have influenced the range and the movements of elephants within the region.

Since 2005, increasing numbers of elephants have moved into Mapungubwe National Park and on several properties in South Africa where fence breakages between properties are reported on a near weekly basis. Extensive poaching and control hunting is also being reported and could influence population numbers and movements dramatically. Aerial surveys provide information on numbers, group structure and distribution that are important baseline data pertinent to basic ecological questions and conservation planning and management.

Methodology

This year's aerial survey of the area was undertaken on the 9th and 10th September 2012.

The methodology was similar to those of previous years. Three fixed wing airplanes (Cessna 206; two C182T) were used to count the study area simultaneously. A team consisting of a pilot, navigator and two observers on each side of the plane were used.

On day one the Northern Tuli Game Reserve (Botswana), the Tuli Block from the Motloutse River to Zanzibar and Sentinel Ranch, Nottingham Estate, River Ranch (Zimbabwe) were counted. On day two the Tuli Circle in Zimbabwe and Mapungubwe National Park, **Mapungubwe Private Reserve** and farms bordering the Limpopo River in South Africa were counted.

A herd of elephants seen from the airplane.

Results

During the 2012 count a total of 1291 elephants were counted.

Kind regards,

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted FLEPHANT &
LION trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Conservation Force
3240 S. I-10 Service Road W., Suite 200
Metairie, Louisiana 70001 USA

Type of Activity:
IMPORT OF SPORT-HUNTED TROPHIES
(Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual			
1.a. Last name Hirschfeld	1.b. First name Dennis	1.c. Middle name or initial (b) (6)	1.d. Suffix
2. Date of birth (mm/dd/yyyy) (b) (6)	3. Telephone number	3.a. Alternate telephone number	4. E-mail address

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution			
1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (dba)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/Initial	4.d. Suffix
5. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information					
1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (If Broker or Taxidermist is applying on behalf of a foreign national, provide Broker or Taxidermist's name and address in this block; U.S. hunters must provide their U.S. address) (b) (6)					
1.b. City San Angelo	1.c. State Texas	1.d. Zip code/Postal code: (b) (6)	1.e. County/Province	1.f. Country USA	
2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)					
2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country	

D. All applicants MUST complete	
1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – attach documentation of fee exempt status as outlined in instructions. (50 CFR 13.11(d))	
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50 , and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.	
 Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures)	04/25/2018 Date of signature (mm/dd/yyyy)

E. IMPORT OF SPORT-HUNTED TROPHIES (*Appendix I of CITES and/or ESA*)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form ([3-200-52](#)) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at [50 CFR 23.74](#) as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- (1) Is raw, processed, or manufactured;
- (2) Was legally obtained by the hunter through hunting for his or her personal use;
- (3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- (4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.
2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Conservation Force , 504-837-1233 , cf@conservationforce.org
3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

ELEPHANT *LOXODONTA AFRICANA*

b. Sex (if known). MALE

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Country -- Namibia , Region -- Zambezi East , Area -- Salambala (conservancy)

b. Date wildlife is to be hunted: September 17-Oct 2 , 2018

b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Madubula Safaris -- John Abraham

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

b. Date wildlife was hunted:

b. Name of hunting outfitter, safari company, or professional hunter you hunted with:

c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: JOHN ABRAHAM
Business Name: REISER TAXIDERMY
Address: BOX 11908 WINDHOEK, PLOT # 43 BRAKWATER
City: +264 61 264207
State/Province:
Country, Postal Code: REISER@IWAY.NA

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted?

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

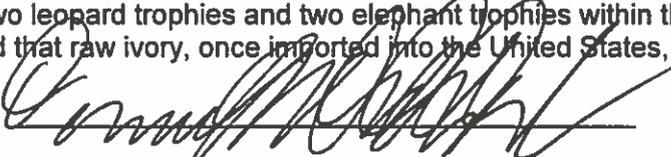

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that my client may only import two leopard trophies and two elephant trophies within the same calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

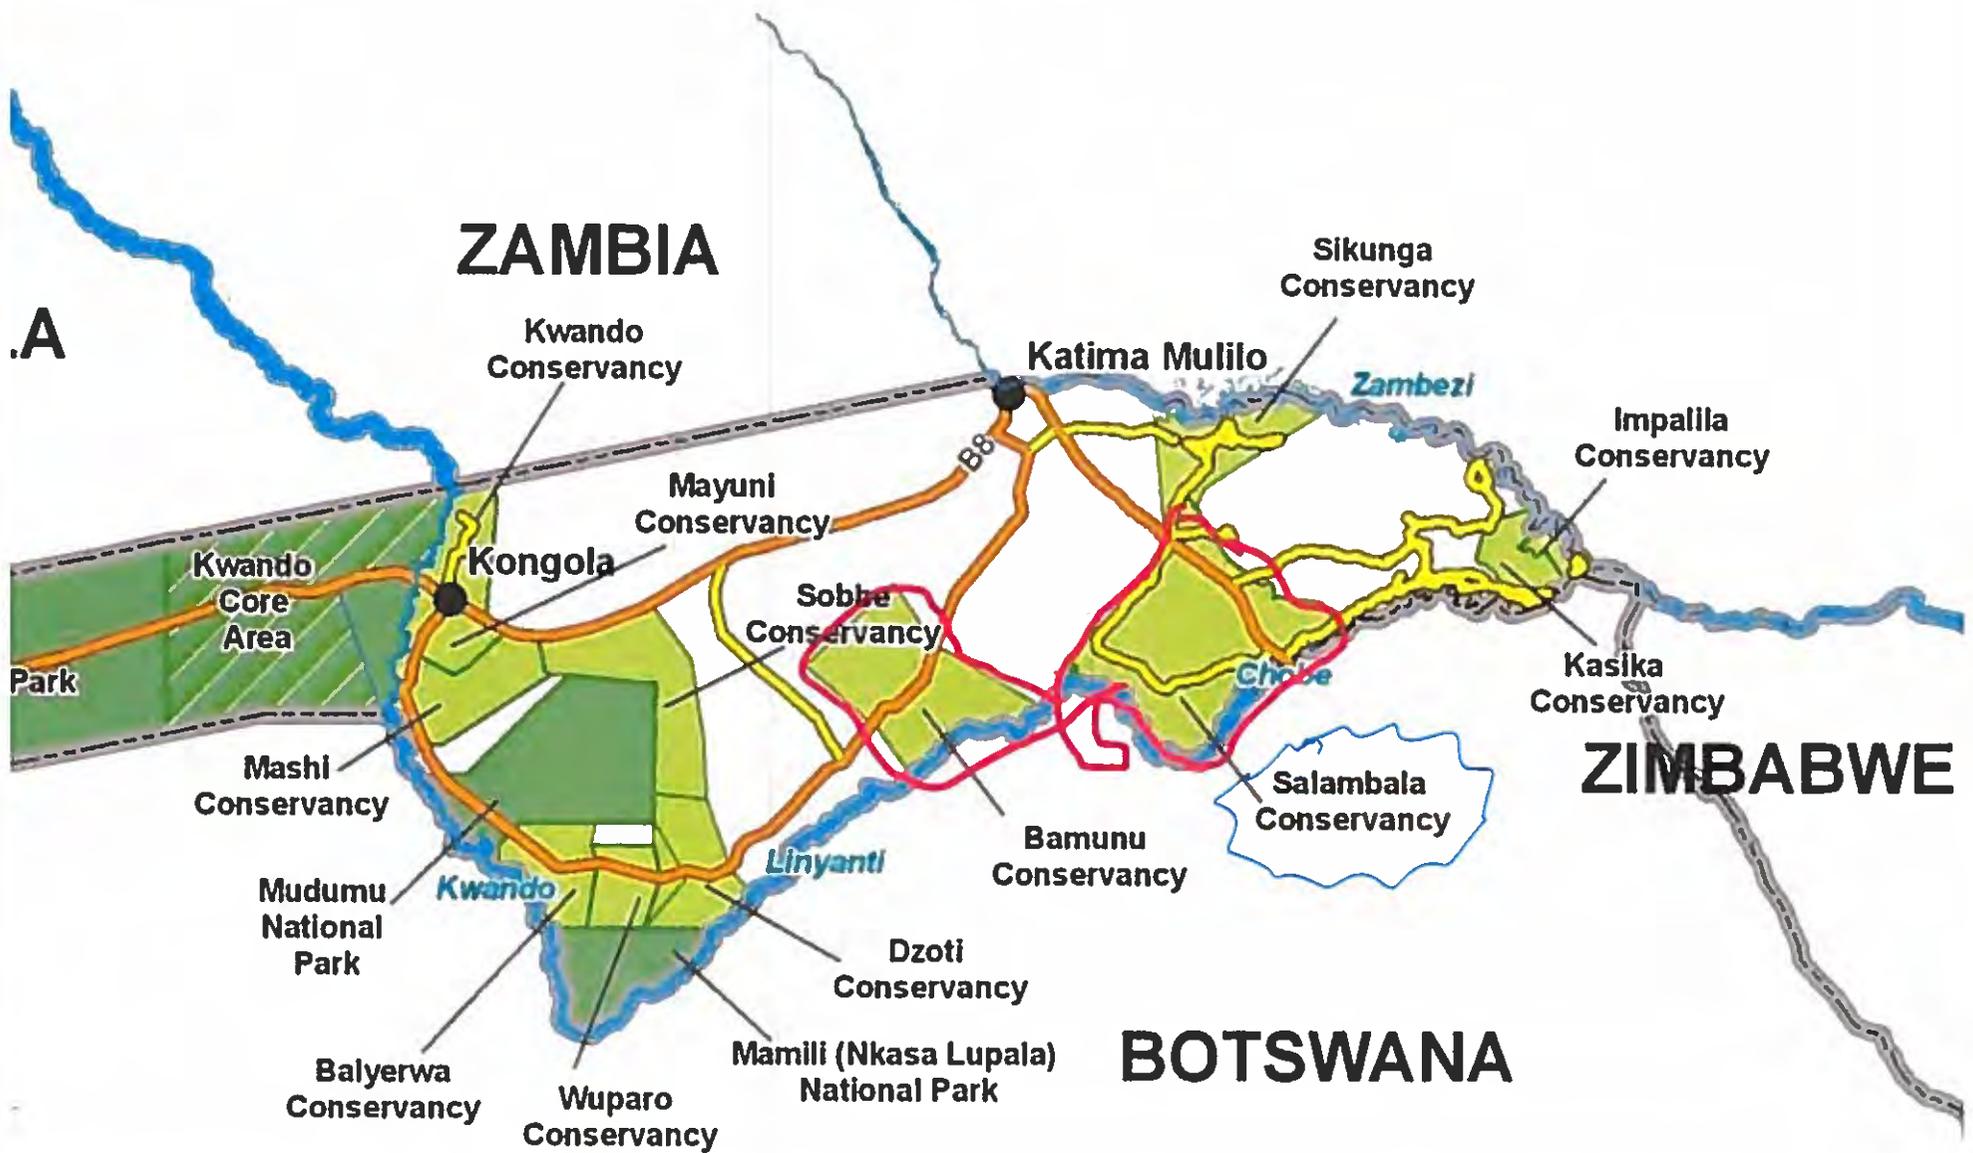

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that I may only import two leopard trophies and two elephant trophies within the same calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature:  _____ Date: 09/25/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Abstract: *Tourism and hunting both generate substantial revenues for communities and private operators in Africa, but few studies have quantitatively examined the trade-offs and synergies that may result from these two activities. We evaluated financial and in-kind benefit streams from tourism and hunting on 77 communal conservancies in Namibia from 1998 to 2013, where community-based wildlife conservation has been promoted as a land-use that complements traditional subsistence agriculture. We used data collected annually for all communal conservancies to characterize whether benefits were derived from hunting or tourism. We classified these benefits into 3 broad classes and examined how benefits flowed to stakeholders within communities under the status quo and under a simulated ban on hunting. Across all conservancies, total benefits from hunting and tourism increased at roughly the same rate, although conservancies typically started generating benefits from hunting within 3 years of formation as opposed to after 6 years for tourism. Disaggregation of data revealed that the main benefits from hunting were income for conservancy management and food in the form of meat for the community at large. The majority of tourism benefits were salaried jobs at lodges. A simulated ban on trophy hunting significantly reduced the number of conservancies that could cover their operating costs, whereas eliminating income from tourism did not have as severe an effect. Given that the benefits generated from hunting and tourism typically begin at different times in a conservancy's life-span (earlier vs. later, respectively) and flow to different segments of local communities, these 2 activities together may provide the greatest incentives for conservation on communal lands in Namibia. A singular focus on either hunting or tourism would reduce the value of wildlife as a competitive land-use option and have grave repercussions for the viability of community-based conservation efforts in Namibia, and possibly other parts of Africa.*

Resumen: *El turismo y la caza generan ingresos públicos sustanciales para las comunidades y los operadores privados en África, pero pocos estudios han examinado cuantitativamente las compensaciones y las sinergias que pueden resultar de estas dos actividades. Evaluamos las oleadas de beneficios financieros y de pago en especie provenientes del turismo y la caza en 77 zonas de conservación comunal en Namibia desde 1998 a 2013, donde la conservación de vida silvestre basada en la comunidad ha sido promovida como un uso de suelo que complementa la agricultura tradicional de subsistencia. Usamos datos colectados anualmente de todas las zonas comunales para caracterizar si los beneficios se derivaron de la caza o el turismo. Clasificamos estos beneficios en tres categorías generales y examinamos cómo los beneficios fluyeron hacia los accionistas dentro de las comunidades bajo el status quo y bajo una prohibición simulada de la caza. En todas las zonas de conservación comunal, los beneficios totales de la caza y el turismo incrementaron aproximadamente a la misma tasa, aunque en estas zonas se comenzaron a generar beneficios de la caza normalmente dentro de los 3 años de formación, en contraste con del turismo que se generaron después de 6 años. La desagregación de los datos reveló que los principales beneficios de la caza fueron los ingresos para*

el manejo de la conservación y la comida en forma de carne para la mayoría de la comunidad. La mayoría de los beneficios del turismo fueron trabajos a sueldo en hospedajes. Una prohibición simulada sobre la caza de trofeos redujo significativamente el número de zonas de conservación que podrían cubrir sus gastos de operación, mientras que la eliminación del ingreso por el turismo no tuvo un efecto severo. Dado que los beneficios generados por la caza y el turismo comienzan comúnmente a tiempos distintos en la duración total de la conservación (más temprano que más tarde, respectivamente) y fluyen a segmentos diferentes de las comunidades locales, estas dos actividades juntas pueden proporcionar incentivos más grandes para la conservación en las tierras comunales de Namibia. Un foco único sobre la caza o el turismo puede reducir el valor de la vida silvestre como opción de uso de suelo competitivo y tener repercusiones graves sobre la viabilidad de los esfuerzos de conservación basada en comunidades de Namibia, y posiblemente de otras partes de África.

Palabras Clave: accionistas, beneficios financieros, beneficios de pago en especie, conservación basada en la comunidad, prohibición de la caza, tierras comunales

Introduction

Current paradigms in conservation increasingly emphasize the utilitarian aspect of safeguarding biodiversity (Daily et al. 2009; Redford & Adams 2009; Guerry et al. 2015), as opposed to more traditional strategies such as protected areas and strict land-use zoning. Ecosystem service approaches and payments for environmental services (PES) schemes are based on the assumption that ensuring a supply of environmental benefits to people will result in the conservation of biodiversity and of natural areas (Tallis et al. 2009; Tallis & Polasky 2009). However, this increasing emphasis on a utilitarian approach to conservation has spawned much debate and criticism. Some contend this new conservation diverts efforts away from ensuring the persistence of biodiversity and puts too much focus on human needs and well-being (Soule 2013; Doak et al. 2014). Others argue that PES programs and partnerships with corporations are resulting in the commodification of nature and that market-based approaches are likely to favor the rich, powerful, and foreign at the expense of local communities and the poor (Sullivan 2006; Igoe et al. 2010).

Although approaches to natural resource management and biodiversity conservation in southern Africa have long been grounded in similar utilitarian perspectives (Child 2004; Carruthers 2008), few approaches to conservation are currently as controversial as the hunting of large and charismatic species as a means of generating benefits and incentives for conservation in this part of the world (Lindsey et al. 2006; Lindsey et al. 2007). Heightened concerns surrounding animal rights and the ethics of hunting, often inflamed by images on social media of trophy hunters posing with dead animals, have led to an increasingly vocal Western opposition to trophy hunting in Africa. This opposition is contributing to tangible policy changes, including the banning of trophy hunting in Botswana (Pabst 2013), restrictions on imports of trophies of certain species to countries such as the United States and Australia (Milman 2015), and the barring of trophies from being transported on some major com-

mercial airlines (Wieczner 2015). Ironically, this Western opposition to trophy hunting comes despite the fact that hunting benefits were one of the early motivations for conservation in North America (Geist et al. 2001), and even today proceeds from hunting licenses in the United States (via the Pittman-Robertson Act) and Canada continue to generate hundreds of millions of dollars every year for wildlife management and habitat protection (Arnett & Southwick 2015).

The impact that changes in hunting policies may have on the conservation of wildlife and on the incentives for African people to coexist with wildlife is not well understood (Buckley & Mossaz 2015). There has been little examination of how benefits from hunting compare with benefits from nonconsumptive nature-based tourism in terms of incentives for local people to conserve species and wildlife habitat, although others have suggested the two may be complementary, rather than substitutive, activities (Leader-Williams et al. 2001; Lindsey et al. 2006). A major limitation is that data on the variety of financial benefits that wildlife generate are typically not systematically collected, especially across different temporal and spatial scales. Yet understanding who benefits, and how, from wildlife as a land use is a critical prerequisite to designing effective policies and programs that support conservation as a sustainable alternative to other, less biodiversity friendly, land uses.

Despite the above knowledge gaps, it is clear that for wildlife to survive outside (and perhaps even inside) protected areas in Africa, people must have strong incentives to tolerate, or ideally embrace, wildlife as a land use (Roe et al. 2009; Dickman et al. 2011; Child et al. 2012). Given that strict protected areas comprise a small and unrepresentative fraction of the African continent, and that even within protected areas wildlife is declining (Western et al. 2009; Craigie et al. 2010), approaches that seek to capture multiple benefits from wildlife conservation on state, private, and communal lands in Africa are indispensable. This principle is especially important when considering the diverse relationships between local communities and wildlife. Communities living with wildlife

are not monolithic entities; rather, they are composed of different groups of people who will experience different costs and benefits from wildlife conservation (Agrawal & Gibson 1999; Roe et al. 2009). For example, wealthy cattle owners and poor subsistence farmers will have different perceptions of wildlife conservation given the particular costs and benefits they are likely to experience. Diversifying benefit streams from wildlife conservation so that the variety of stakeholders within local communities are incentivized to promote or at minimum tolerate living with wildlife will provide the greatest likelihood that conservation as a land use will ultimately prove more attractive than wildlife-unfriendly alternatives. Because communal lands comprise a large fraction of rural Africa (up to 500% more than state-managed forest reserves and national parks [Alden Wily 2011]), management of these lands will play a huge role in determining the success or failure of biodiversity conservation efforts across the continent.

We focused on how different types of benefits provided by wildlife vary over time, space, and community stakeholder groups in communal conservancies in Namibia. Namibia's Community-Based Natural Resource Management (CBNRM) program began in the mid-1990s, when progressive legislation for the devolution of conditional rights to natural resources allowed communities to register areas of customary landholding as "communal conservancies." Registering these conservancies (involving developing zoning and sustainable resource management plans and a constitution) allows local communities to manage and benefit from wildlife and other natural resources on their traditional lands. Prior to the legislation, natural resources were the sole property of the state. Although wildlife has been used by people for millennia in the region that is now Namibia, the last century was characterized by declines in various species, starting with the rinderpest outbreak at the end of the 19th century, followed by overhunting of big game species by colonial hunters, and more recently by a major drought combined with a poaching increase in the 1980s (Owen-Smith 2010). Namibia's CBNRM program is widely recognized as having contributed to a strong recovery of wildlife in large parts of the country, through the creation of social and economic incentives for the sustainable coexistence of wildlife and people on communal lands (Owen-Smith 2010; Naidoo et al. 2011b; NACSO 2013). Additionally, the principles used to incentivize communities to steward wildlife across very large spatial scales are already being adopted by numerous other countries in Africa and beyond (NACSO 2013). We examined how changes in benefits over time generated on communal conservancies in Namibia vary according to whether they were derived from tourism or hunting (the 2 most significant benefits derived from wildlife). We also assessed how these benefits flow to different stakeholders within local communities and how factors such as time of establishment

and changes in resource management policies affect such benefit flows on communal lands.

Methods

We used data from 77 communal conservancies registered by 2012 in Namibia to examine benefit flows associated with hunting and photographic tourism. The first four of these conservancies were established in 1998, and we used data through the 2013 calendar year for all of them. For both hunting and tourism, conservancies negotiate agreements with private operators. The agreements between conservancies and operators specify the portion of income the conservancy receives (typically 8–12% of total lodge revenue and from 30–75% of trophy price, depending on the species) and jobs to be offered to community members with the operation (from 20–50 for tourism lodges, depending on factors such as size and location, and 8–10 for hunting camps). In addition, community members hunt for subsistence and allow local sales of meat from wildlife through game cropping. Information on fees paid to conservancy management committees; salaries of community members employed in the tourism or hunting industry; and nonfinancial benefits (primarily meat from hunting, but also meals, training, human-wildlife conflict compensation, and other donations to the community at large) is compiled annually by every conservancy. Financial reporting of conservancies is supported by various nongovernmental organizations, is ground-truthed, and is double-checked against analogous reports from tourism and hunting operators.

We used these data and categorized each source of benefit as to whether it was derived from tourism or from hunting. The CBNRM program uses the price of buying alternative meat as the value of wild meat distributed from animals that were hunted (replacement-cost shadow price approach). In 2013, it was 18 Namibian dollars/kg of meat (NACSO 2013). This shadow price can vary and is adjusted from year to year to reflect supply and demand, but the same rate is applied across the country in order to maintain comparability of meat benefits generated in different regions. We used a consumer price index produced by the Bank of Namibia to standardize benefit figures from all years into constant 2013 Namibian dollars. We subsequently expressed all figures in 2013 U.S. dollars (U.S.\$) based on the average monthly exchange rate in 2013 of U.S.\$1 = N\$9.64.

We divided benefits into the 3 classes (described above) because each represented a different type of gain that is channeled to different parts of a conservancy and has different implications for the sustainability of the conservancy and for its livelihood value to members. Income (i.e., fees from lodge and hunting concessions) to management committees is used by conservancies to cover operational and management costs

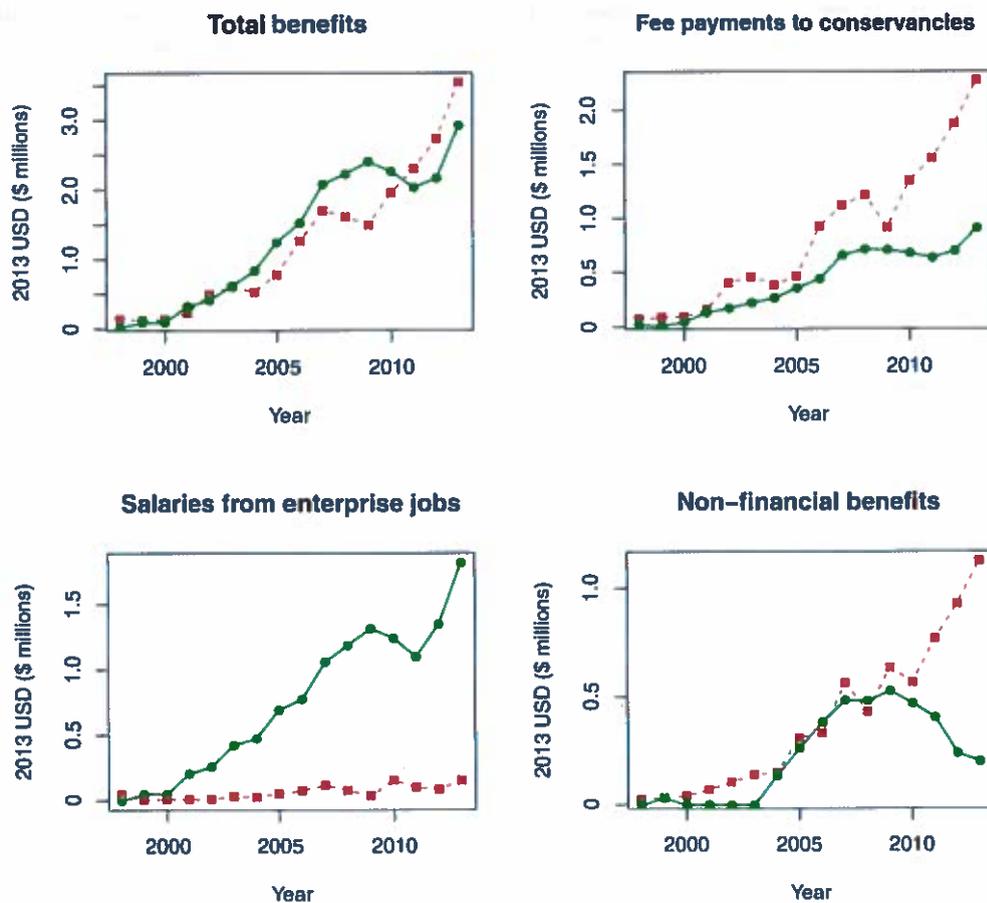

Figure 1. Benefits generated across all conservancies in Namibia's Community-Based Natural Resource Management program, 1998–2013, from hunting (squares) and tourism (circles): (a) total benefits, (b) fee payments to conservancies, (c) salaries from enterprise jobs, and (d) nonfinancial benefits.

(including paying the salaries of community game guards and other conservancy staff members, vehicle fuel costs and maintenance, and office upkeep expenses) and is also distributed as cash and funds for development projects within the community. Individual conservancy members who are salaried employees at tourism lodges or hunting camps clearly benefit financially from conservation, and this linkage should result in strong incentives for promoting wildlife as a land use in their households and among their families and social networks within the community. Conservancy members also benefit individually from the consumption of wild meat that is distributed throughout the community from hunted animals. This benefit, although nonfinancial, is typically viewed as a strong and very direct link between the value of having wildlife on communal lands and the members' livelihoods and well-being (NACSO 2013). To quantify the magnitude of these financial flows from hunting and tourism to stakeholders within communities, we used a subset of conservancy data from 2011 to 2013, during which time detailed financial accounting statements were used to track incoming conservancy revenue.

To simulate how a trophy hunting ban would affect the viability of communal conservancies in Namibia, we used detailed financial statements that were available for a subset of 50 conservancies in 2013 (all but two of the 52 conservancies that generated some level of benefits in 2013) and tabulated the operating costs each conservancy accrued. We then simulated the effects of a ban by removing all cash income that conservancies earned from trophy hunting in 2013 (assuming this cash income could not be substituted by increases in tourism) and calculated the difference in the proportion of conservancies that were able to cover their operating costs based on conservancy income under the status quo versus under a trophy-hunting ban. For comparison's sake, we removed all conservancy income from tourism and assessed how this changed financial viability of conservancies. We also used data on harvested animals and nationally averaged trophy prices to estimate the contribution of individual wildlife species to trophy hunting income.

Finally, for each conservancy we split total benefits over time into 2 series, one for hunting and one for tourism (Supporting Information). We characterized

these financial time series by calculating 4 metrics per conservancy: temporal trend (slope from a linear regression of benefits on year); volatility (root mean square error from the linear regression); end point (magnitude of benefits in 2013); and lag time between year conservancy registered and year the first benefits were generated.

We used *t* tests on these metrics to assess whether temporal flows of benefits to conservancies were significantly different between hunting and tourism.

Results

Of the 77 conservancies established by 2012, 25 reported not generating any benefits from either hunting or tourism. Considering all conservancies in Namibia's CB-NRM program, aggregate benefits increased over time (Fig. 1). Total benefits from tourism and hunting were similar in the early years of the program, but tourism benefits exceeded those from hunting from 2003 to 2010, whereas from 2011 to 2013 the benefits from hunting were greater than tourism benefits (Fig. 1a). Although fee payments to conservancies and nonfinancial benefits (primarily meat) from hunting accumulated at higher levels than those from tourism (Figs. 1b and d), total salaries from tourism enterprise jobs increased 10 times faster than salaries from hunting jobs (Fig. 1c). Nonfinancial benefits from tourism dropped sharply from 2011–2013 relative to continued increasing nonfinancial benefits from hunting (Fig. 1d), a result that may have coincided with the worldwide economic downturn in 2008 and fewer available resources for tourism companies to make additional contributions to conservancies.

Conservancies were formed in roughly 4 cohorts that coincided with (1) initial heavy donor investment (1998–2001, 15 conservancies), (2) a period of declining donor investment (2003–2005, 29 conservancies), (3) an upturn in investment peaking in 2009 (2006–2009, 15 conservancies), and (4) a further increased-investment phase (2011–2013, including 18 conservancies registered by the end of 2012). The earliest conservancies, in cohort 1, had similar levels of total benefits for the first 6 years after registration, after which benefits from both hunting and tourism continued to increase but at a faster rate for tourism (Fig. 2a). Conservancies in cohort 2 (Fig. 2b) had roughly similar rates of growth in total benefits from tourism and hunting, whereas cohorts 3 (Fig. 2c) and 4 (Fig. 2d) earned virtually no benefits from tourism and had either moderate (cohort 3) or low (cohort 4) benefits from hunting.

Disaggregating the national-level data revealed that pathways for generating benefits over time varied substantially among conservancies (Supporting Information). Of the 52 conservancies that derived some level of benefits from wildlife, 28 derived all or almost all of their total benefits from hunting, 6 derived all or almost

all benefits from tourism, and 18 had substantial levels of benefits from both hunting and tourism.

Although there was a tendency for the total benefits from tourism to be higher than those from hunting, there were no significant differences for any of the conservancy time series metrics (Table 1). The only exception to this was the lag time between conservation formation and the beginning of benefits generation. After their formation, conservancies derived benefits from hunting approximately twice as quickly as they derived benefits from tourism (Table 1). On average, conservancies started generating benefits from hunting about 3 years after their formation, whereas it took 6 years, on average, after conservancy formation to start generating benefits from tourism.

In addition to temporal and spatial differentiation, there were differences in how benefits from tourism and trophy hunting flowed to the different constituencies contained within communal conservancies (Fig. 3). Based on detailed financial accounting data from 2011–2013, 58.3% of the financial benefits from tourism were in the form of jobs to conservancy members at joint-venture lodges, whereas 30.3% of the benefits were lodge contractual fees used for conservancy management and 11.5% were nonfinancial benefits to the community at large less.

In contrast, the majority (64.3%) of the benefits from hunting were in the form of cash for the operation of the conservancy, and a substantial fraction went to the community at large in the form of meat from hunted animals (32.0%, or approximately 1.4 million kg over the 3 years). Conservancies used income from trophy hunting and tourism in a variety of ways that benefited the entire community (Fig. 3), most importantly for the salaries of conservancy employees and for other conservancy operating costs, but also for compensation for wildlife conflict, payments to traditional authority structures, direct cash dividends, community-level projects, and infrastructure development. Our data suggest that operational costs, conservancy employee salaries, and the various benefits to the community at large were mostly derived from hunting because hunting operators paid fees from 2011–2013 of \$5.41 million (72% of the total), whereas tourism operators paid \$2.13 million (28%).

Currently, many conservancies cover their operating costs with income derived from trophy hunting and from tourism that is directed to conservancy management. Simulation of a trophy hunting ban showed a reduction in the number of conservancies with incomes greater than operating costs in 2013, from 74% (37 of 50) under the status quo to 16% (8 of 50) when conservancy income from hunting was eliminated. If this reduction were to occur throughout the country, it would cover nearly 50,000 km² (Fig. 4). When conservancy income from tourism was removed, the effect was again negative but

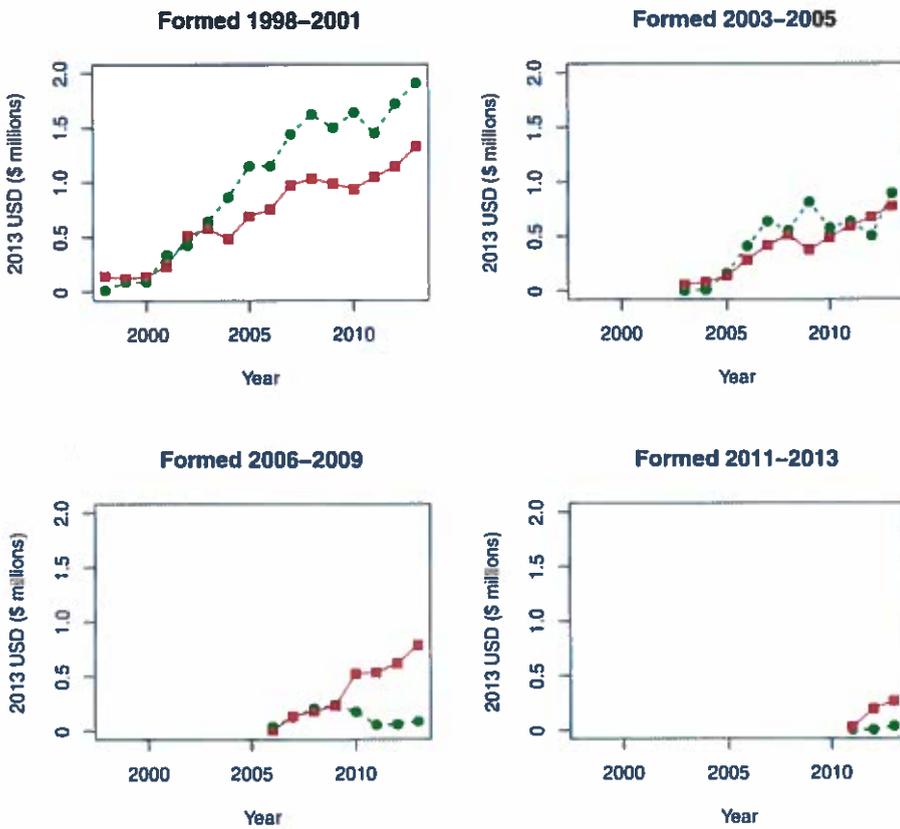

Figure 2. Total benefits from 1998-2013 for hunting (squares) and tourism (circles) across conservancies formed in 4 periods: (a) 1998-2001 (n = 15), (b) 2003-2005 (n = 29), (c) 2006-2009 (n = 15), and (d) 2011-2013 (n = 18).

Table 1. Statistical differences among time series of different metrics of total benefits (in U.S. 2013 dollars) generated from trophy hunting versus tourism on communal conservancies (n = 52) in Namibia.*

Variable	Hunting	Tourism	t	P
Benefits in 2013 (U.S.\$ 2013)	41,453	56,255	-0.91	0.36
Trend (linear regression) of annual change (U.S.\$ 2013)	2458	3954	-1.39	0.17
Volatility (root mean square error) of change over time (U.S.\$ 2013)	79,192	82,501	-0.16	0.83
Average annual gain (U.S.\$ 2013)	8723	11,175	-0.93	0.36
Maximum annual gain (U.S.\$ 2013)	47,420	68,694	-1.19	0.23
Lag (years) between conservancy formation and first benefits	2.81	5.71	-3.29	0.001
Number of conservancies specializing in hunting or tourism	28	6	—	—

* Excluding conservancies that had not generated any benefits from either hunting or tourism.

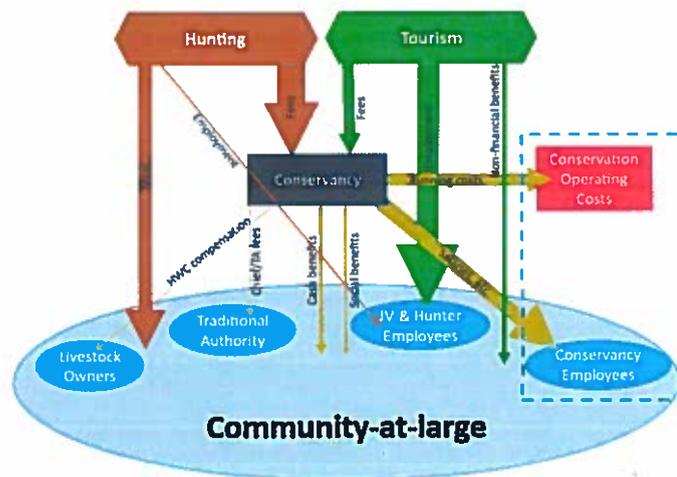

Figure 3. The flow of benefits to various sectors of a stylized local community in Namibia (widths of arrows proportional to dollar values of flows to conservancies from 2011 to 2013; brown, hunting benefit; green, tourism benefit; olive green, flows with a mix of hunting and tourism benefits; dashed rectangle, reinvestment of income into conservation activities; JV, joint venture tourism; HWC, human wildlife conflict; TA, traditional authority). Specific stakeholders (blue ovals) and the overall community at large receive the benefit flows indicated by the arrows ending in those ovals. Income to the conservancy committee (black rectangle) comes from both sectors and is redistributed as indicated, including to cover conservation operating costs (red square).

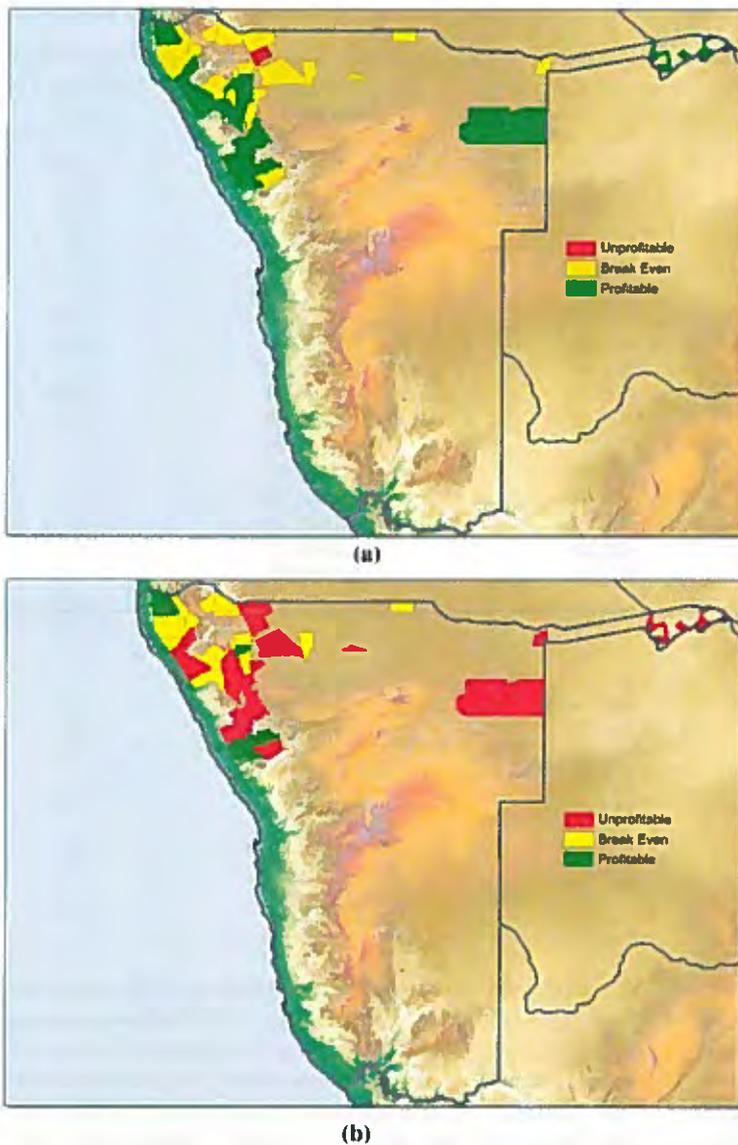

Figure 4. Revenues minus operating costs for 50 communal conservancies for which detailed management cost data were available in 2013 under (a) the status quo and (b) a simulated trophy hunting ban. Break-even conservancies indicate those for which revenues and operating costs are within \$5000 of one another.

less marked; 59% of conservancies remained able to cover their operating costs.

Finally, of the 303 animals harvested by trophy hunters in 2013, individuals from 2 of the Big-5 (buffalo [*Syncerus caffer*], elephant [*Loxodonta africana*], lion [*Panthera leo*], leopard [*Panthera pardus*], rhinoceros [*Diceros bicornis* and *Ceratotherium simum*]) species hunted in Africa, buffalo and elephant, accounted for 78.3% of hunting revenue; over 55% was attributable just to elephants (Table 2).

Discussion

Despite the importance of both tourism and hunting to conservation, and the debate surrounding their implementation, we are the first study to use detailed quantitative data across multiple jurisdictions and over a lengthy

time span to directly compare the financial performance of these two activities. Our data from 77 Namibian conservancies from 1998 to 2013 showed that trophy hunting and tourism reached similar aggregate levels but began to generate benefits at different times (earlier vs. later in a conservancy's life-span) and flowed to different beneficiaries (community management committees and the community at large vs. individual employees). Previous work in Namibia has demonstrated that benefits from hunting and tourism are also spatially differentiated; conservancies are more likely to generate benefits from hunting in areas with diverse wildlife and Big-5 species, whereas the presence of black rhinoceros (*Diceros bicornis*) and broader environmental conditions (distance to tourist routes, topographical diversity, and rainfall) are correlated with higher benefits from tourism (Naidoo et al. 2011b). In addition, the first conservancies established were typically those with the highest potential to

generate benefits from wildlife, and, as with our cohort results, older conservancies generate higher levels of aggregate benefits than younger ones (Naidoo et al. 2011a; Humavindu & Stage 2015).

We found that tourism and hunting both made substantial and separate contributions to the economic welfare of rural communal residents; the former was weighted toward employment and wages and the latter toward governance structures and management costs. A focus on either one or the other would lead to substantial reductions in overall benefit generation and incentives for wildlife conservation throughout Namibia. For much of Africa and other parts of the world, Westerners tend to view tourism as the dominant wildlife-based development paradigm for delivering a sustainable flow of benefits to local communities living with wildlife or near protected areas (Kiss 2004; Hawkins & Mann 2007). Similar to the results of studies of private landholders (Lindsey et al. 2013b) and national economies (Barnes et al. 2002; Lindsey et al. 2007), our results showed it is important to recognize that the direct benefits of hunting are roughly similar in magnitude to those of tourism for communal conservancies in Namibia.

Beyond this aggregate overall similarity between the benefits of hunting and tourism, there are important dif-

ferences in scale and sequencing between the two activities. For the typical conservancy, benefits from hunting are generated quickly, within a few years of formation. In these early years of a conservancy, income from trophy hunting is critical for the management of the area, and the meat from hunted animals makes tangible the economic benefits that wildlife conservation can deliver to conservancy members. Benefits from tourism take twice as long to develop, due to the time needed for the recovery of wildlife populations, and the investments in both physical (i.e., lodges and other infrastructure) and human capital required to host high-end tourism in communal areas. Few conservancies (12%) specialized in tourism; most conservancies generating benefits from tourism also generated benefits from hunting. In contrast, over half (54%) of the conservancies generating benefits in Namibia did so from hunting alone, because hunting can be sustained in areas with relatively low densities or visibilities of wildlife, and in landscapes that are unappealing or inaccessible for photographic tourism (Lindsey et al. 2006). Because these conditions characterize much of the African protected- (in the widest sense) area estate, it follows that preventing or discouraging trophy hunting would remove possible incentives for conservation across a large swathe of the continent

where nature-based tourism is not viable (e.g., Blom 2004).

Benefits from trophy hunting and tourism also accrue to different stakeholders within communal conservancies. Benefits from tourism were mainly in the form of employment income to conservancy members who are hired to work at lodges built on conservancy land. Although these employees normally come from among a group of conservancy members nominated by the conservancy, ultimately staff are hired based on their knowledge, communication skills, and potential. Jobs of any kind are extremely rare in remote rural areas and thus highly sought after; therefore, tourism is viewed very favorably by local residents who are employed in the industry (Suich 2010; Silva & Motzer 2015). In contrast, agreements between communities and hunting operators provide significantly higher levels of income for conservancy management, as well as greater nonfinancial benefits (largely from meat) distributed directly to the community at large.

The income to management committees is essential; without it, most communal conservancies in Namibia would be unable to cover their operating costs (which three-quarters of the 50 conservancies we assessed were doing). Conservancies unable to cover their operating costs will likely cease to pursue conservation as a viable land use because without conservancy income, game guards cannot be paid, management and monitoring plans cannot be developed and instituted, the sense of local ownership over natural resources dissipates, and wildlife becomes much more vulnerable to declines from poaching and overharvest. This link between income from hunting and the conditions and incentives that permit wildlife to persist as an economically viable land use is critical but often unrecognized. Our data also show that almost 80% of hunting benefits are delivered by two species (elephant and buffalo); elephants alone generate over 50% of all hunting benefits from an increasing population base (7500 individuals in 1995 to over 20,000 in 2012 [Craig 1999; Ministry of Environment and Tourism 2012]). Therefore, even a targeted hunting ban on elephants or an import ban such as those that currently prevent the import of elephant trophies from Tanzania and Zimbabwe into the United States is likely to have a very negative impact on Namibia's CBNRM program by severely undermining conservancy governance structures and incentives for conservation. Anecdotal accounts of the impact of Botswana's 2014 hunting ban suggests that similar negative consequences (an increase in poaching for meat and trade and increased collaboration of local communities with international poaching gangs) may be occurring there (Somerville 2015).

Although we found there were impressive financial gains from trophy hunting, the sustainability (both ecological and economic) of these operations on communal lands in Namibia is rightly of major concern. As such, it is regulated via annual estimates of species' popula-

tions and harvest quotas derived in agreement with local communities and the Ministry of Environment and Tourism (NACSO 2013). Although data from the various conservancy landscapes within the country indicate populations in these areas have generally increased since the advent of Namibia's CBNRM program (Naidoo et al. 2011b), evidence on possible negative impacts of trophy hunting on wildlife populations in other parts of Africa (Packer et al. 2010; Lindsey et al. 2013a) means that trophy hunting must be carefully monitored in Namibia to ensure the same does not happen. There have been no assessments on how trophy size or quality in particular species may be changing over time, a concern that has been raised for trophy hunting in Africa (Crosmarty et al. 2013) and that may result in undesirable genetic changes within hunted populations (Coltman et al. 2003). It is therefore critical that data on the size and quality of trophy exports be analyzed for Namibia's CBNRM program to inform monitoring, evaluation, and management of the trophy-hunting industry. High-profile, apparently illegal hunts such as of lions on the borders of national parks in Zimbabwe, and ethically dubious practices, such as canned hunting of captive animals, also illustrate that the industry itself must play a greater role in addressing issues that throw the sector into dispute. Finally, growing human populations and a tremendous increase in elephant poaching for the international ivory market may eventually result in reduced quotas of elephants and therefore threaten the financial benefits communal conservancies have generated through trophy hunting.

The sustainability of photographic nature-based tourism in Africa and beyond has also come under scrutiny (Buckley 2004; Newsome et al. 2012). In Namibia relevant issues for ecological sustainability include impacts of intense wildlife viewing on animal behavior, localized environmental implications of the development of tourism infrastructure (lodges, campsites, roads, disposal facilities, etc.) in sensitive arid environments, and climate-change impacts from the carbon emissions of increasing numbers of international visitors. As with trophy hunting, there are few studies, particularly for the first two considerations, that have evaluated the sustainability of tourism initiatives on communal conservancies in Namibia. Furthermore, from a socioeconomic point of view nature-based tourism on communal lands in Namibia has been criticized as having power imbalances or elite capture issues that render communities unable to secure significant shares of the benefits (Hoole 2010; Lapeyre 2011), even though residents of conservancies with high benefit levels are themselves strongly supportive of tourism (Silva & Motzer 2015). Finally, to assess more fully the overall costs and benefits of wildlife conservation on communal lands in Namibia, there is a need for greater investigation of both human-wildlife conflict costs and who bears them, as well as the opportunity

costs of pursuing wildlife conservation as a land use versus alternative uses.

Despite these caveats, our results show that hunting and tourism generated similar aggregate levels of benefits for local communities in Namibia. Because these benefits occur at different times, in different places, and reach different sections of local communities, each are essential to the successful functioning of community-based natural resource management in Namibia. As with other contexts (Sandbrook & Adams 2012), recognizing that benefits from conservation to local communities take various pathways has important implications for conservation and the development of effective incentives. Further investigation is therefore desperately needed to examine the relative impacts of hunting and tourism in many other areas of conservation importance in sub-Saharan Africa.

GENERAL STATISTICS

Country Area	825,418 km ²
Range Area	164,069 km ² (20%)
Protected Range	18 %
Information Quality Index (IQI)	0.43
CITES Appendix	II
Listing Year	1997

CURRENT ISSUES

Namibia's elephants occur across the northern region of the country, mostly in national parks and community areas. Their range encompasses a wide variety of habitats, from the extremely arid north-west Kunene Region to the well-watered Zambezi (formerly Caprivi) Region, where the elephants form part of the KAZA transfrontier population. Although poaching has increased in the Zambezi Region in the past ten years, it is not seen as a significant threat in Elosha National Park or for populations in Khaudum National Park and Kunene Region.

Elephant hunting takes place in Namibia, and the revenue generated provides significant income to community conservancies (Naidoo et al., 2006). From 2007 to 2015, Namibia declared an annual export quota of elephant hunting trophies of 180, defined as tusks from 90 animals (CITES, n.d.-a).

Namibia's elephant management plan was published in 2007 (Ministry of Environment and Tourism, 2007).

In 2008, Namibia undertook an approved one-off sale of 7,503 kg of ivory to Japan and China, at a price of USD \$1,147,369 (Wijnstekers, 2011).

NUMBERS AND DISTRIBUTION

The estimated number of elephants in areas surveyed in the last ten years in Namibia is $22,754 \pm 4,305$ at the time of the last survey for each area. There may be an additional 90 elephants in areas not systematically surveyed. These guesses likely represent a minimum number, and actual numbers could be higher than those reported. Together, this estimate and guess apply to $84,283 \text{ km}^2$, which is 52% of the estimated known and possible elephant range. There remains an additional 48% of the estimated range for which no elephant population estimates are available.

The elephant population of Namibia has continued to increase although, with wide confidence limits in aerial surveys and elephants moving across international borders, it is not possible to be precise about how great the increase in the national population has been.

There are four main populations, the transfrontier population (with Zambia, Angola, Botswana and Zimbabwe) in the Zambezi Region, in Khaudum National Park in the north-east, the Etosha National Park population, and the Kunene population in the north-west which includes the "desert" elephants.

There has been an increasing trend in elephant numbers in the Zambezi Region since surveys started in the 1980s. This is likely to have been a result of both natural growth and movement from neighbouring countries. **Aerial sample counts** were carried out in 2007, 2011, 2013, 2014, and 2015, giving estimates of 8,380, $10,847 \pm 3,580$, $9,165 \pm 2,016$, $14,097 \pm 2,678$ and $13,116 \pm 3,413$ (Chase, 2007; Craig & Gibson, 2013b, 2014; Craig, 2011b; Gibson & Craig, 2015a). The previous estimate in the AESR 2007 was $8,725 \pm 2,206$ (Kolberg, 2004). There was also a total count carried out in 2007 (Chase, 2007) and a sample count in 2008 (Kolberg, 2008). However the latter was carried out with an inexperienced crew and the results were thought to be a considerable underestimate (Kolberg, 2008).

The elephant population of Khaudum NP and the neighbouring community conservancies of Nyae Nyae and N#u Jaqna have been established since the 1980s, with the provision of artificial water and movements across the border from Botswana. Three **aerial sample counts** were carried out in 2011, 2013 and 2015 giving estimates of $4,731 \pm 1,940$, $3,638 \pm 1,164$, and $6,413 \pm 2,566$ (Craig & Gibson, 2013a; Gibson & Craig, 2015b; MET, 2012). The 2015 figure replaces an estimate of $3,758 \pm 2,289$ for Khaudum, 61 ± 115 for N#u Jaqna (Kolberg, 2004) and 967 ± 481 for Nyae Nyae (Stander, 2004). None of these are significant differences.

There is a limited movement of elephants between Angola and the Kavango region to the north-west of Khaudum (Terblanche, 2016).

There is a small elephant population in the Mangetti area between Khaudum and Etosha. The AESR 2007 indicated that they occupy the Mangetti Game Reserve, whereas their range is actually concentrated around the Mangetti Cattle Ranch to the west, and also probably extends into the Ukwuqali communal area to the north. Ninety individuals were observed in Mangetti in 2015 (Lindeque, pers. comm., 2016). This **informed guess** replaces one of 20 from 2005 (Ministry of Environment and Tourism, 2005).

Etosha National Park in northern Namibia has an increasingly isolated elephant population, since the perimeter fencing has been upgraded in recent years. There has been a gradual increase in elephant numbers, moderated by deaths from anthrax and poaching. Aerial sample counts were carried out in 2011 and 2012, giving estimates of $3,378 \pm 1,756$ and 2,810 (confidence limits not available) (Kolberg, 2012; MET, 2012). The most recent **aerial sample count** from 2015 gave an estimate of $2,911 \pm 637$ (Kilian, 2015) and replaces an estimate of $2,057 \pm 598$ from 2004 (Kilian & Kolberg, 2004).

It is technically very difficult to count the widely scattered elephant population in the Kunene Region, which includes the 'desert elephants' in the dry, western extremity of the range and there has been controversy about the numbers in this area. A combined sample block count and **aerial total count** was carried out by helicopter in 2011, giving an estimate of 314 ± 154 (MET, 2012). This replaces an estimate of 210 ± 157 from a 2005 survey (Ministry of Environment and Tourism, 2005). It should be noted that the count did not include the extreme northern part of the range around Opuwo, nor the farms to the south of Etosha. There has been some range expansion to both the south and north, with elephants now being resident in the Ugab river basin and about ten elephants resident in the northern Etanga area (Owen-Smith, pers. comm., 2014). The area of **known range** has been changed, and the Etanga group is shown as a point record on the map. The Kunene population appears to have been increasing in numbers and range, despite evidence that the 'desert elephant' sub-population in the Houanib and Houarusib dry riverbeds reduced from 42 to 31 between 2002 and 2015 (Ramey & Brown, 2015).

There are occasional sightings of elephants in livestock ranching areas to the south of their normal range in the area north and east of Windhoek. These are shown as point records on the range map (Hartman, 2014; The Namibian, 2014).

RANGE OF INFORMED GUESS

KEY TO REASONS FOR CHANGE

DA: Different Area; DD: Data Degraded; DT: Different Technique; NA: New Analysis; NG: New Guess; NP: New population; PL: Population Lost; RS: Repeat Survey (RS denotes a repeat survey that is not statistically comparable for reasons such as different season);
 – No Change

PFS

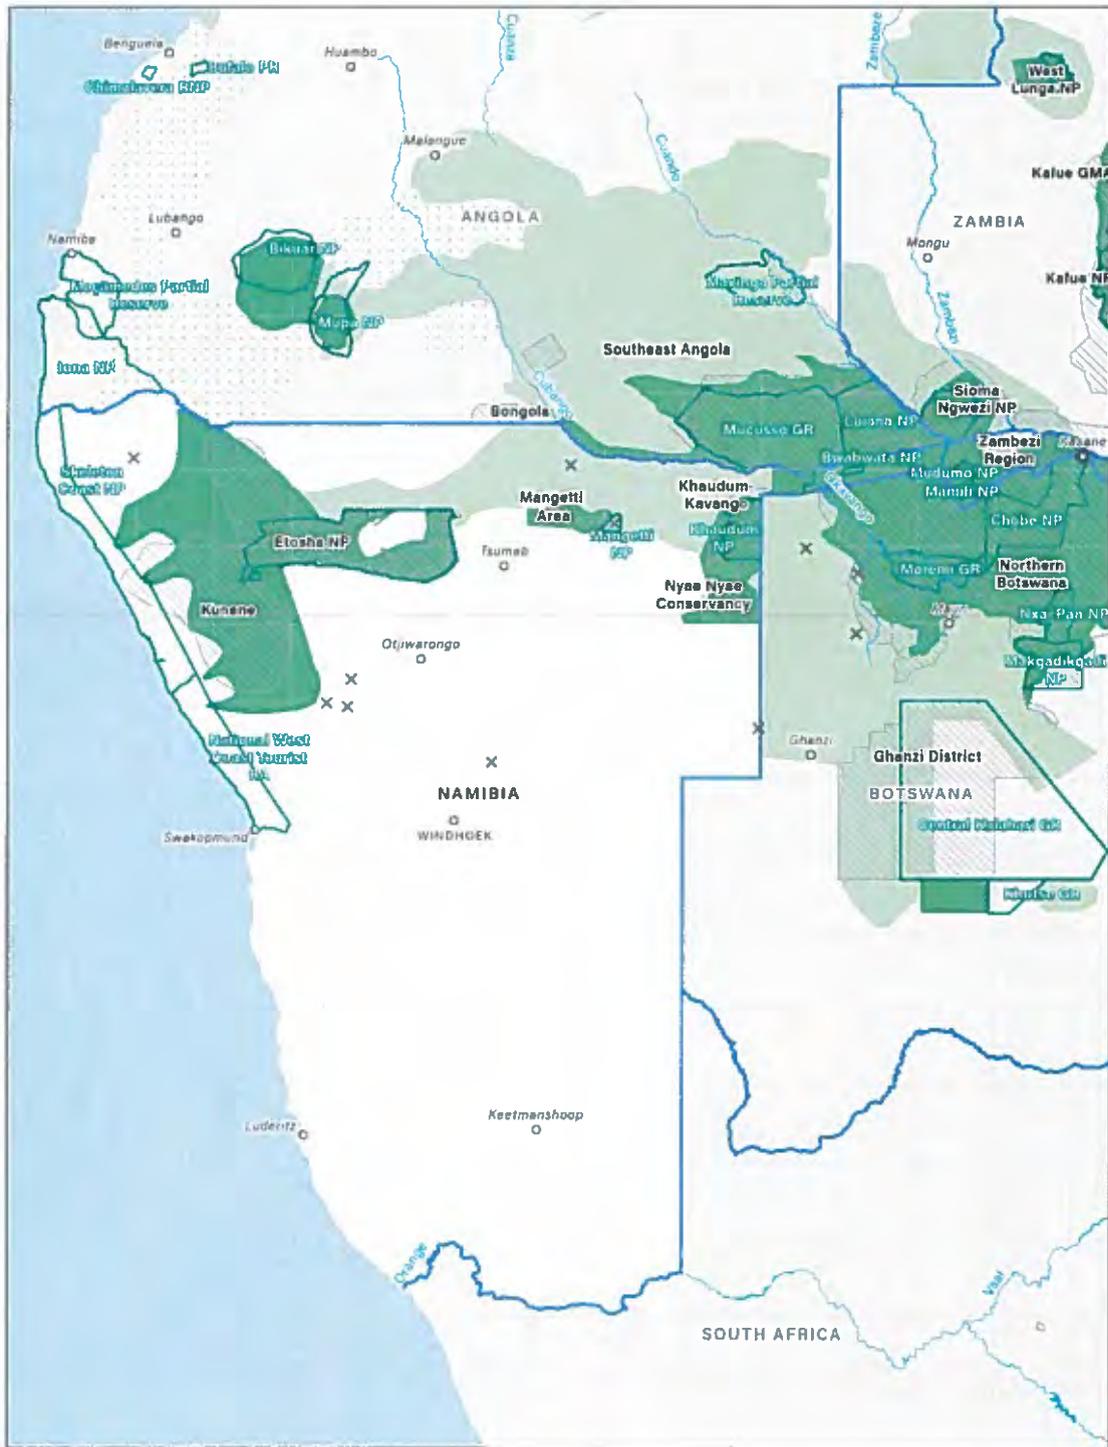

Priority for Future Surveys (PFS) is ranked from 1 to 5 (highest to lowest). Based on the precision of estimates and the proportion of national range accounted for by the site in question, PFS is a measure of the importance and urgency for future population surveys. All areas of unassessed range have a priority of 1. See Introduction for details on how the PFS is derived.

KEY TO SURVEY REPORT

AS: Aerial Sample Count; AT: Aerial Total Count; DC: Dung Count; GD: Genetic Dung Count; GS: Ground Sample Count; GT: Ground Total Count; IG: Informed Guess; IR: Individual Registration; OG: Other Guess. Survey Reliability is keyed A-E (best to worst).

Salambala Conservancy

Named after the lovers Sala and Bala whose illicit relationship resulted in them being banished to the forest

Quick facts

Registered:	June 1998
Region:	Zambezi
Area:	930 km ²
Approximate population:	8,553
Geographical features:	Average annual rainfall of 600 mm. Mopane woodland dominates the northern area, while floodplain grasslands cover the southern section.
Particular features:

maximising wildlife returns by minimising threats...

Conservancy status summary

Returns from natural resources in 2016

the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N\$ 3,437,130

Two of the most significant returns for the conservancy:
✓ cash income to the conservancy to cover running costs and invest in developments
✓ Employment to conservancy residents

Conservancy income N\$ 2,006,450

Employment	Private Sector	52 staff	N\$ 1,302,080
	Conservancy	37 staff	N\$ 1,071,460

Cost of natural resource conflicts in 2016

estimates are based on average national values

Estimated human wildlife conflict cost	N\$ 49,970
Estimated poached high value species loss	N\$ 0
Total conflict cost estimate	N\$ 49,970

Natural resource cost–return ratio in 2016

the chart shows the approximate ratio of returns to costs

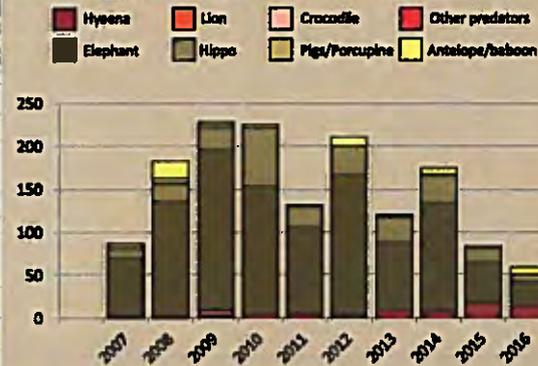

Management performance in 2016

Category	Performance
1 Adequate staffing	
2 Adequate expenditure	
3 Audit attendance	
4 NR management plan	
5 Zonation	
6 Leadership	
7 Display of material	
8 Event Book modules	
9 Event Book quality	
10 Compliance

17 Benefits produced	
18 Resource trends	
19 Resource targets	

Human wildlife conflict

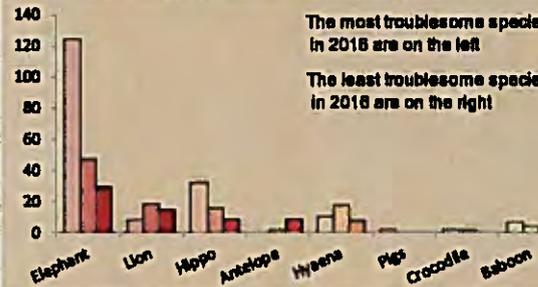

Human wildlife conflict trend

the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

Most troublesome problem animals 2014-2016

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

Type of damage by problem animals 2014-2016

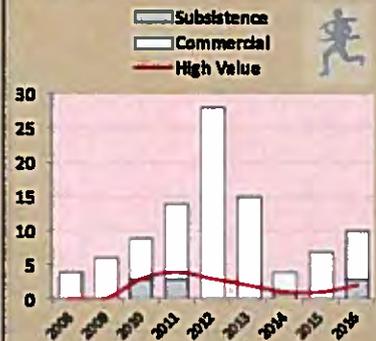

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

Poaching

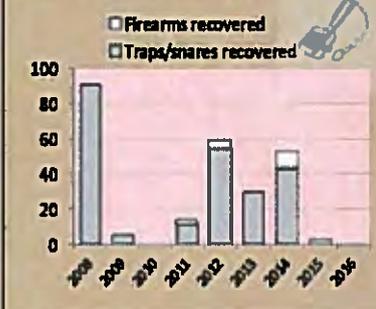

Number of incidents per year

Commercial poaching is a serious threat to conservancy benefits. The chart shows the number of incidents per category

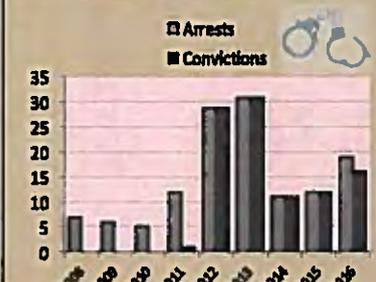

Traps and firearms recovered

number of incidents per category

Arrests and convictions

number of incidents per category

Wildlife removals – quota use and value

Species	Quota 2016			Animals actually used in 2016					Potential Trophy Value N\$	Potential Other use Value N\$	
	Total	Trophy	Other Use	Trophy	Ovn Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal			Total Use
Baboon	2	2		1					1	500	
Buffalo	4	3	1	2	1				3	70,000	5,500
Crocodile	2	2		2					2	25,500

Blue Wildebeest*	11	3	8	2	7				9	3,800	29,800
B. Zebra	40	10	30	8					8	3,500	3,500

Not all data or species are shown on this report; use your Event Book for more information

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Species	Animals Seen	Estimate	Wildlife Status		
			Count Trend	National Guideline	Desired Number
B. Zebra	338	350	Yellow	Yellow	
Dulker	2	280	Yellow	Dark Orange	
Elephant	57	7	Yellow	Light Green	
Giraffe	12	?	Dark Green	Red	
Impala	173	?	Light Green	Yellow	
Kudu	28	240	Light Green	Red	
Roan			Red		
Sable			Red		
Steenbok			Yellow	Yellow	
Warthog	37	1000	Yellow	Yellow	

Wildlife Status

Count trend – gives the species status in the conservancy based on game count trend data.

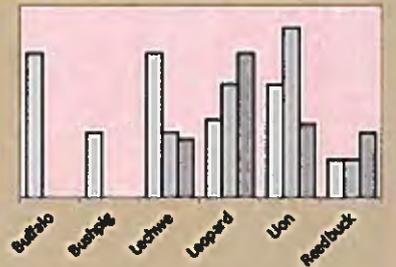

National guideline – gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) – there should be less;
light green (common) – the desired number is reached;
yellow (uncommon) – there should be more;
light orange (rare) – there should be more than double;
dark orange (very rare) – there should be more than triple;
red (extinct) – the species needs to be reintroduced.

Locally rare species

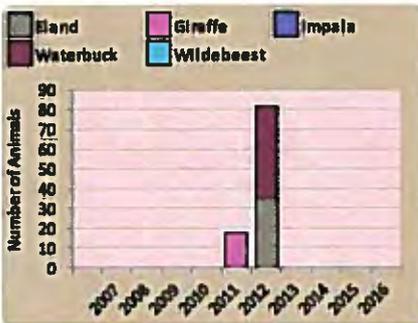

Sightings Indicator □ 2014 □ 2015 □ 2016

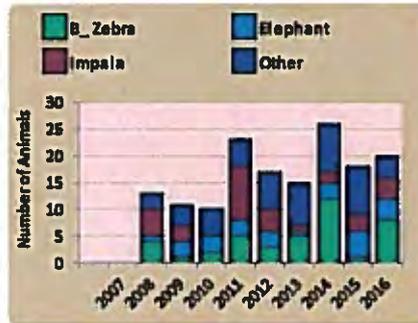

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

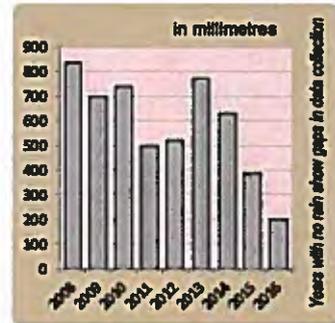

Wildlife introductions

Wildlife mortalities

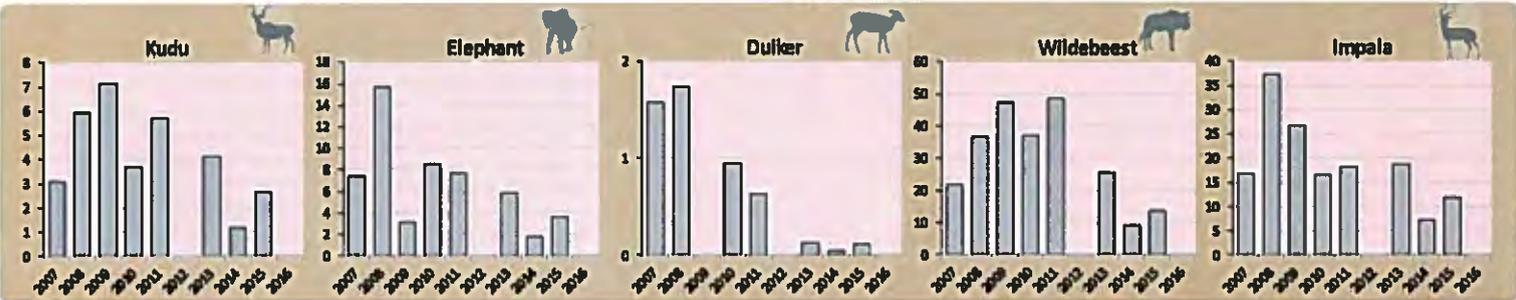

Annual rainfall

Fixed route patrols

charts show the number of sightings of each species per fixed route foot patrol each year

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Type of Activity

Import of Sport-hunted Trophies of Southern African Leopard and Namibian Southern White Rhinoceros

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. You may find instructions on how to make your application complete and help avoid unnecessary delays at the following link: .

Section A: Complete if applying as an individual

1.a. Last Name Palmer		1.b. First Name Jeffery		1.c. Middle Name/Initial (b) (6)	1.d. Suffix
2. Date of Birth (mm/dd/yyyy) (b) (6)	3. Telephone Number		3.a. Alternate Telephone Number	4. E-mail address	

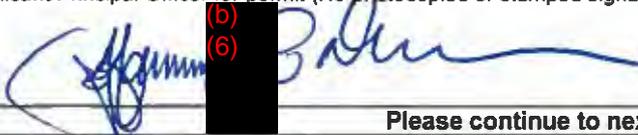

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)			
2. Tax identification no.		3. Description of business, agency, Tribe, or institution			
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial		4.d. Suffix	
5. Principal officer title		6. Primary contact name			
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address		

Section C: All applicants complete address information

1 a. Physical address (Street address Apartment #, Suite #, or Room #; no P O Boxes) (b) (6)					
1 b. City Mapleton	1 c. State UT	1 d. Zip code/Postal code (b) (6)	1 e. County/Province	1 f. Country USA	
2 a. Mailing address (include if different than physical address include name of contact person if applicable)					
2 b. City	2 c. State	2 d. Zip code/Postal code	2 e. County/Province	2 f. Country	

Section D: All applicants MUST complete

1. Attach check or money order payable to the U S FISH AND WILDLIFE SERVICE in the amount identified on page 2, nonrefundable processing fee Federal Tribal, State and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – <i>attach documentation of fee exempt status as outlined in instructions. [50 CFR 13.11(d)]</i>
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in <i>Title 50 Part 13 of the Code of Federal Regulations</i> and the other <i>applicable parts in subchapter B of Chapter I of Title 50</i> , and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.
Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)  (b) (6) 05/03/2018

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit to the address on page one.**

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form ([3-200-52](#)) and return your original permit with that form.

Note 3: *Sport-hunted trophy* is defined at [50 CFR 23.74](#) as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 4: Certain hunting trophies, including leopard and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

- **Complete all questions on the application.**
- **Mark questions that are not applicable with "N/A".**
- **If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.**
- **If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.**

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

N/A

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Jeffery Palmer

(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):
- a. Leopard (*Panthera pardus*) Quantity: 1 (Limited to the import of two per calendar year). If you wish to import a leopard taken in northern or western Africa, please use form 3-200-20.
- b. Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia
Quantity: _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use Form 3-200-20).

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, Please enter the following information:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

N/A

- b. Date wildlife is to be hunted: N/A

- c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

N/A

6. IF THE ANIMAL HAS ALREADY BEEN TAKEN, please enter the following:

- d. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Namibia: Goreis #122

- e. Date wildlife is to be hunted:

1st Sept to 15th Sept 2016
(leopard harvested 6th Sept 2016)

f. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:
Okuwira! Hunting Safaris
Owner and PH on hunt: Gideon Cloete

g. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
Mr. Gideon Cloete
Okuwira Hunting Safaris
P.O. Box 1102
9000 Otjiwarongo, NAMIBIA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you.

a. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Gideon Cloete
Business Name:
Address: PO Box 1102
Address:
City: Otjiwarongo
State/Province:
Country, Postal Code: Namibia

CERTIFICATION STATEMENT (original signature must be provided for either 9 or 10 below)

9. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

10. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature:  Date: 5/3/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

11. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from [the list of designated ports](#). If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

PERMIT CONDITIONS

TROPHY HUNTING OF CHEETHAS, LEOPARDS & LIONS

1. A trophy hunter, trophy hunting guide and trophy hunting operator must read and acknowledge and sign the predator trophy hunting permit conditions before the hunt commences.
2. A predator trophy hunting permit must be obtained before the hunt for a predator commences and must be in the physical possession of the trophy hunting guide while the predator is being hunted.
3. The trophy hunting operator concerned must give notice of the predator hunt to the regional office of the Ministry seven days before the hunt commences.
4. A predator trophy hunting permit is
 - a) issued to a trophy hunter;
 - b) non-transferable; and
 - c) valid for a period specified in the permit.
5. Predators may only be hunted for trophies under the following conditions -
 - a) only free roaming, self-sustaining and adult predators may be hunted as trophies with a minimum skull measurement of 27cm for a cheetah, 32cm for a leopard and 52cm for a lion;
 - b) a female leopard may not be hunted as trophy;
 - c) a predator may not be shot in any form of confinement or in a trap or in an area which is smaller than 1000ha;
 - d) a predator may be baited, but a live animal may not be used as bait;

- e) a predator may not be shot within a range of 1km of any other predator kept in captivity in any form;
- f) a predator may be stalked, tracked or ambushed, but dogs or horses may not be used to hunt it;
- g) predator trophy hunting may not take place during the period between 30 minutes after sunset in any day and 30 minutes before sunrise the following day and artificial light is prohibited;
- h) a predator may not be shot from a moving vehicle or chased in any way with an aircraft;
- i) a predator may not be hunted unless it belongs to a wild and sustainable population (It exists as a naturally interacting member of a wild and sustainable population in an area large enough for it to breed, forage and hunt freely and where there is a natural state of balance between forage, predator and prey);
- j) a predator bred in captivity may not be trophy hunted;
- k) a predator to be hunted may not be drugged in any form;
- l) a canned hunting (any restriction of an animal's natural movement for the purpose of trophy hunting) in any form is illegal; and
- m) a predator may only be hunted in areas as specified on the predator trophy hunting permit;
- n) once the predator has been killed, the following must occur –
 - (i) the following photos must be taken immediately after the hunt, at the location where the predator was killed –
 - (aa) the predator lying on its right showing the feet;
 - (bb) the predator lying on its left showing the feet;
 - (cc) a close-up photo from the front showing the face of the predator, clearly depicting facial features: nose, eyes, and mouth, and a visible leopard hunting quota tag number, in case of a leopard;
 - (dd) a close-up photo of the trophy hunter and trophy hunting guide posing with predator, with all four

legs of the predator stretched out for clear visibility of genital feature such as scrotum and visible leopard hunting quota tag number;

- (ii) the trophy hunter and trophy hunting guide must sign all the photos on the reverse side of the photos;
- o) the recording sheet of the predator trophy hunting permit in Schedule G has to be filled in, in permanent ink, immediately after the hunt;
- p) the trophy hunter and trophy hunting guide must sign on the reverse side of the predator trophy hunting permit with the following statement:

"We hereby individually and collectively declare that the predator recorded and photographed was hunted, shot and killed by us in full accordance with all the predator trophy hunting permit conditions."
- q) a telephonic report must be given to the staff member responsible for the predator trophy hunting permit register in the Permit Office in Windhoek within 72 hours of the predator being killed, and full details of the predator trophy hunting permit must be provided;
- r) an unsuccessful predator hunt has to be reported to the Permit Office in Windhoek within 72 hours after the trophy hunting permit has expired;
- s) no application for subsequent predator trophy hunting permit from a trophy hunting operator may be processed if the Permit Office has not received the report on the previous permit issued to his or her client (trophy hunter);
- t) the original predator trophy hunting permit with full details as described in paragraph (u) must be handed in to the Taxidermist or shipping agent with the trophy; and

u) an application for an export permit to export a predator trophy must be handed in at the Permit Office in Windhoek and must be accompanied by –

- (i) a copy of the passport of the trophy hunter and of a page thereof with an immigration stamp indicating the date of entry;
- (ii) the original predator trophy hunting permit;
- (iii) the leopard trophy hunting quota tag, in case of a leopard;
- (iv) the recording sheet; and
- (v) the original photos printed on photo paper (glossy paper) referred to in paragraph (n): and
- (vi) export permit may not be issued if the conditions in paragraph (u) have not been met.

6. Condition regarding skin and skull of the hunted predator

- (a) scrotum of the hunted predator must be left attached to the skin to confirm the sex of the animal.
- (b) skin found without an obvious scrotum attached will be treated as female and will not be allowed to be exported.
- (c) skin of the hunted predator must be brought to MET office (CITES Office) for tagging and inspection before the export permit can be issued.
- (d) skull of the hunted predator must be brought to MET office (CITES Office) for SCI measurements before the export permit can be issued

7. *Leopard trophy hunting quota tag is not transferable.*

Any contravention or non compliance with any regulation or permit condition is dealt with in accordance with the Nature Conservation Ordinance, 1975 (Ordinance No. 4 of 1975), especially sections 84(5), 86, 87, 88 and 89.

I hereby acknowledge that I have read and understand the predator trophy hunting permit conditions:

HUNT START DATE: 02-09-2016 HUNT FINISH DATE: 06-09-2016

1. WAS THE HUNT SUCCESSFUL? YES NO

IF NO, WHY NOT?

2. HUNTING METHOD (tick appropriate box): i) BAIT AND BLIND ii) ON FOOT

3. PRE-BAITING: YES NO

4. NUMBER OF BAIT SITES USED DURING HUNT (including pre-baiting if applicable): 2

5. NUMBER OF BAIT SITES FED ON BY PREDATOR (including pre-baiting if applicable): 1

6. TOTAL NUMBER OF BAIT NIGHTS (including pre-baiting if applicable):
The total number of nights that all bait sites were open (if 6 bait sites were open for 1 night = 6 bait nights) 8

7. TOTAL NUMBER OF BAITS USED (including pre-baiting if applicable):
The total number of times that bait sites were 'freshened' with new bait 12

8.

SEX & AGE OF PREDATOR FEEDING ON BAITS DURING HUNT:	NUMBER:	EVIDENCE (SIGHTING, TRACKS, TRAIL CAMERA):
Adult male	1	TRACKS
Adult female	1	TRACKS TRAIL CAMERA
Subadult male		
Subadult female	1	TRACKS TRAIL CAMERA
Juvenile	1	TRACKS TRAIL CAMERA
Unknown		

9. NUMBER OF PREDATOR SEEN MORE THAN 1 KM AWAY FROM BAITS: 2 MALES
1 FEMALE

IF TROPHY WAS TAKEN:

10. DATE TROPHY TAKEN: 05-09-2016 11. GPS LOCATION (n decimal degrees): 20°12' S 15°46'25" E

12. CONDITION OF PREDATOR (tick all appropriate boxes):

- i) HEALTHY ii) UNHEALTHY iii) FULL STOMACH iv) MEDIUM STOMACH
 v) EMPTY STOMACH

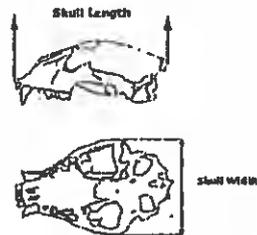

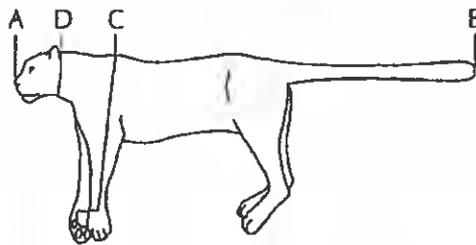

MEASUREMENTS:

13. BODY LENGTH (CM): 220 cm 14. SHOULDER HEIGHT (CM): 62 cm
 15. NECK CIRCUMFERENCE (CM): 55 cm 16. SKULL LENGTH (MM): 24.5 cm
 17. SKULL WIDTH (MM): 15 cm 18. WEIGHT (KG): 69

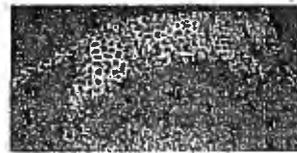

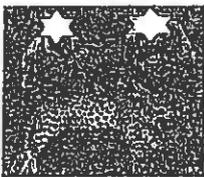

MEASUREMENTS & PHOTOGRAPHS

Measurements to be taken:

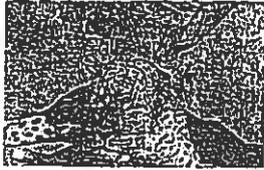

11. Body length (cm, tip of nose to tip of tail; Measurement A-B)
12. Shoulder height (cm, tip of scapula to back of plantar pad; Measurement C)
13. Neck circumference (cm, immediately behind the ear; Measurement D)
14. Skull length (mm, greatest length of skull, measured as a straight line between pegs)
15. Skull width (mm, greatest width of skull, measured across zygomatic arches)

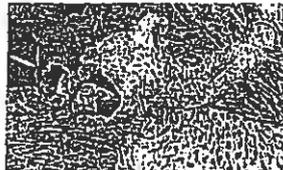

Photographs required before the trophy is skinned:

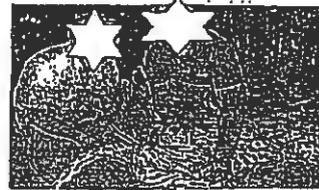

1. Side view showing the entire body with the hunter positioned directly behind for scale, and visible predator hunting quota tag number.
2. The predator lying on its right showing the feet and visible predator hunting quota tag number.
3. The predator lying on its left showing the feet and visible predator hunting quota tag number.

4. Close up of the nose clearly showing the nose, eyes, and mount and a visible predator hunting quota tag number.

5. Frontal view of the teeth showing coloration and wear on the canines and incisors and visible predator hunting quota tag number..

6. Hindquarters clearly showing the scrotum and visible predator hunting quota tag number.

Photographs required from the cleaned skull:

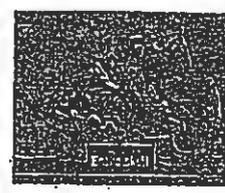

7. Lower jaw showing all the teeth and chipping of the enamel ridge on the back of the canines.

8. Upper jaw showing all the teeth and chipping of the enamel ridge on the back of the canines.

9: Side view of the lower jaw (either side) showing the canine and wear on the cusps of molars and premolars.

10. Wide shot of all the teeth showing wear, broken teeth, and teeth coloration.

RE: Leopard photos taken in twilight – Client Jeff Palmer Permit nr 166354 Tag nr: NAPP128/2502016

I, Gideon Cloete, owner of Okuwira! Hunting Safaris do hereby want to explain why my leopard photos with client Jeff Palmer was taken in the evening.

The leopard was hunted in September 2016, by client J. ■ Palmer, permit nr 166354 on tag NAPP128/2502016.

Mr Palmer booked a leopard hunt in mid June 2016 for 14 days with Okuwira! Hunting Safaris and in this time we had no luck in getting a leopard. Mr Palmer rebooked the tag in September 2016.

We had 2 males on bait, but weather conditions made it difficult for us to keep the leopards on baits and to shoot a leopard in legal shooting hour.

Mr Palmer had to leave for USA in the middle of the hunt due to personal reasons. On our way to the airport on the 5th of September a farmer contacted us, where we had baits out and hunted and said that his cattle guard contacted him and said that a leopard caught one of his new born calves. I quickly discussed it with Mr Palmer and we had to decide on whether to go wait for the leopard, otherwise the farmer would kill the leopard with a trap or poison.

We decided to go have a look at where the leopard caught the calf and could see that the leopard was a male. The leopard caught the new born calf and dragged it into heavy thick

Okuwira! Hunting Safaris

P.O Box 1102 Otjiwarongo
Namibia

cover. I told Mr Palmer we should go get our blind and accessories to set up and then wait for the leopard.

It took us an hour to get the blind and accessories and return to where the calf was caught. In the meantime the leopard returned and dragged the calf further away from where we originally found it.

As the road was far from the place we had to setup, we only took what we needed for the setup. My thoughts were that the leopard would return soon, because it returned just after we found the calf the first time. We were set up by 14h30.

When the sun started to go down, I told Mr Palmer that I don't hope that we disturbed the leopard, because leopards on commercial farmlands are very sensitive due to farmers killing them on sight with poison or snares making the leopards clever and hard to hunt. Due to this fact the leopards get totally nocturnal and difficult to hunt.

I know it was just after sun set that I told Mr Palmer that we only have plus minus 20 minutes of legal shooting light left when I saw the movement through my opening in the blind. I could see the leopard returned.

Mr Palmer made a quick shot on the leopard and I could see the leopard was shot but ran into thicker cover to the back.

As a Professional Hunter of profession my rule is always to wait 20-30 minutes after the shot was fired before doing a follow up. By that time it was dark and I radioed my trackers to come, but due to the thick bush conditions the vehicle couldn't come close.

When the trackers arrived with better lighting, we could see a heavy blood trail. After a slow search we finally found the leopard dead.

I took all the necessary photos to give the true print of the leopard for my permit and tag and by that time it was dark.

I could not leave the leopard until sunrise due to other predators in the area like hyena and jackal. They would have destroyed the skin.

Due to safety reasons for the trackers, myself and Mr Palmer, I waited at least 20-30 minutes before I did the follow up on the leopard.

Okuwira! Hunting Safaris

Gideon Cloete
Professional Hunter
okuwirasafaris@gmail.com
081 285 7104
P.O.Box 1102 Otjilwarongo
Namibia

Due to these facts as mentioned and the commercial farmers killing leopards on sight, poisoning them or getting leopards in snares it makes leopard hunting more difficult for hunters, because it causes the leopard to become very sensitive and extremely nocturnal.

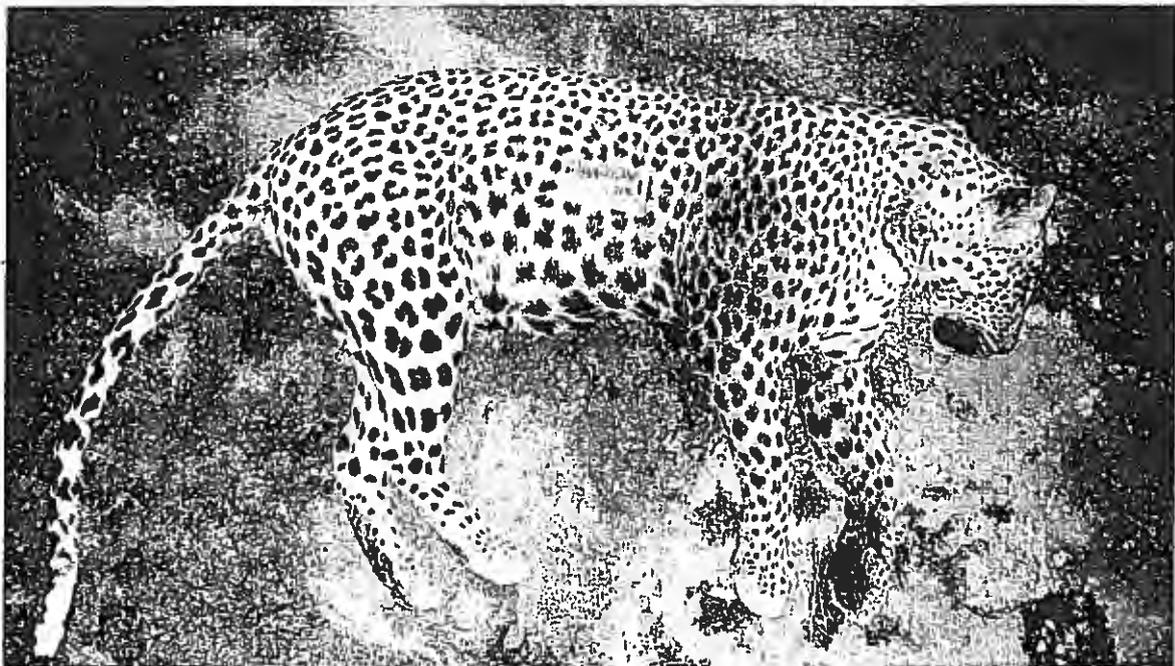

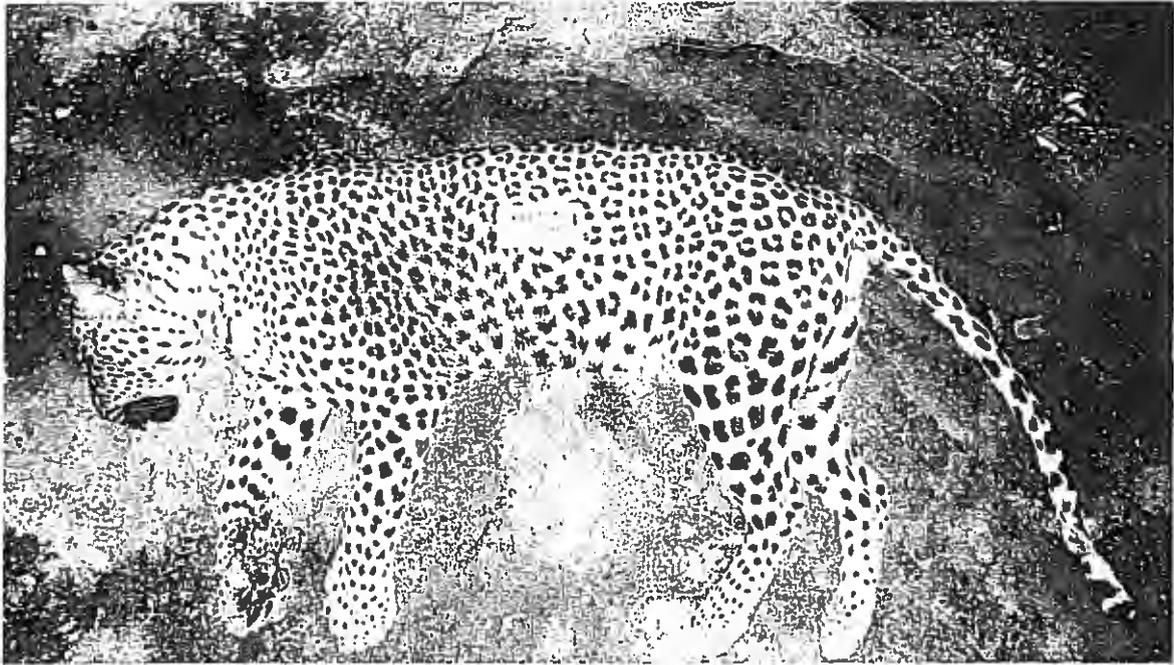

We as outfitters can only hope to get a leopard for a client available to shoot in legal shooting hours.

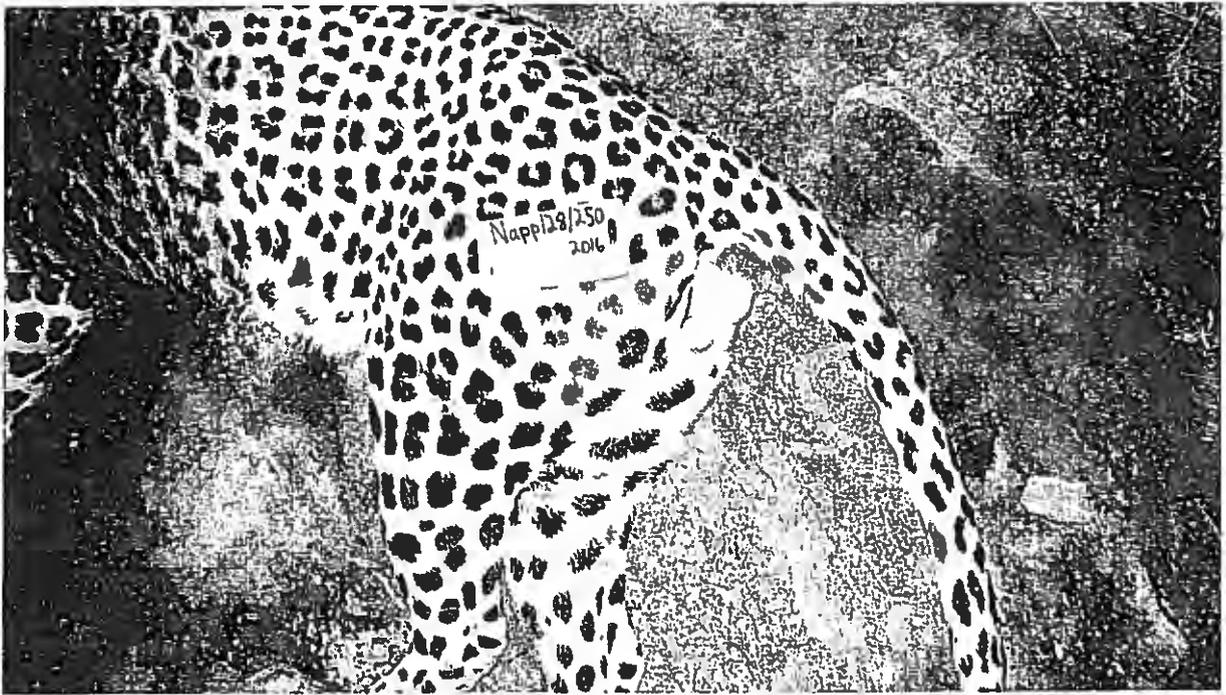

With this explanation I confirm that we shot and killed a leopard in full accordance with the predator trophy hunting conditions.

For any further information, please don't hesitate to contact me.

Yours sincerely

 05/09/2016
Gideon Cloete

IMPORT OF SPORT-HUNTED TROPHIES
(Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual			
1.a. Last name Schumacher	1.b. First name Randolph	1.c. Middle name or initial (b) (6)	1.d. Suffix
2. Date of birth (mm/dd/yyyy) (b) (6)	3. Social Security No (b) (6)	4. Occupation	
5.a. Telephone number (b) (6)	6.b. Alternate telephone number	6.c. Fax number	6.d. E-mail address (b) (6)

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution			
1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (dba)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
5. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information				
1.a. Physical address (Street address, Apartment #, Suite #, or Room #, no P.O. Boxes) (b) (6)				
1.b. City Colorado Springs	1.c. State CO	1.d. Zip code/Postal code: (b) (6)	1.e. County/Province	1.f. Country USA
2.a. Mailing Address (include if different than physical address, include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

D. All applicants MUST complete	
1.	Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – attach documentation of fee exempt status as outlined in instructions. (50 CFR 13.11(d))
2.	Do you currently have or have you ever had any Federal Fish and Wildlife permits? Yes <input type="checkbox"/> If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: _____ No <input checked="" type="checkbox"/>
3.	Certification: I hereby certify (b) (6) and am familiar with the regulations contained in Title 50, Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief and that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001. Signature (in blue ink) of applicant responsible for permit (No photocopied or stamped signatures) _____ Date of signature (mm/dd/yyyy) 04/26/2018

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but are unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 2: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 3: USFWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Note 4: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-5 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. For each trophy to be imported, provide:
 - a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
Loxodonta africana, African Elephant
 - b. Sex (if known).
Male
2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
 - a. Country and PLACE (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:
 - b. Date wildlife is to be hunted:
 - c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks).
3. **IF THE ANIMAL IS DEAD**, please enter the following:
 - a. Country and PLACE (area, region, GIS coordinates, ranch AND nearest city) where wildlife was removed from the wild (provide a map if possible):
Namibia, Mashi Conservancy Closest City: Katima Mulilo
 - b. Date wildlife was hunted:
October 1st 2017

- c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks).

Tusks, skin, feet, ears

- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export documents]:

Omujeve Safaris, Ongombo West Section 2, Number 56, Windhoek Namibia

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will also appear on your Namibian export permit and must match the U.S. import permit].

Name: Gideon Cloete
Business Name: Omujeve Safaris
Address: Ongombo West Section 2,
Address: Number 56
City: Winhoek
State/Province:
Country, Postal Code: Namibia

5. Please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., population status or trend data; how the funds from license/trophy fees will be spent; what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. If you are a broker or taxidermist applying on behalf of a foreign national, provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or (b) (6)**). I understand that I may only import two leopard trophies in one calendar year (if applicable). In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature:  _____ Date: 4/26/2018

Be aware that there may be additional permit or approval requirements by your local or state government, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist you, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).
9. Name and address where you wish permit mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):
10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.
- If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.
11. Who should we contact if we have questions about the application? (Include name, phone number, and email):
Randy Schumacher, (b) (6)
12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?
- Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

† BARON BERTRAND DES CLERS, PH.D.
† JAMES G. TEER, PH.D.

Re: Applications for Permits to Import Sport-Hunted Elephant Trophies

Dear Chief Cogliano:

Enclosed please find two applications for permits to import sport-hunted trophies.

- The first applicant is hunting an elephant in the Salambala conservancy in Namibia. The funds from this hunt will be used to support conservancy operations and ensure the land remains beneficial habitat for Namibia's growing elephant population. The meat will be distributed to the conservancy's over 8,500 residents. Please consider the enclosed information and information in the DMA's files regarding the benefits of elephant hunting in Namibia, including information previously submitted by Conservation Force and Namibia's Ministry of Environment and Tourism, in making a positive enhancement finding for this applicant.
- The second applicant is hunting an elephant in the Divindu concession in Namibia. Again, the funds from this hunt are used to benefit Namibia's communities and the meat will be distributed. These incentives have sustained positive elephant population growth and reduced poaching and human-elephant conflict in Namibia. Please consider the information in the DMA's files and the information here and that will be submitted by this operator, as well as information received from Conservation Force and Namibian authorities, in making a positive enhancement finding for this applicant.

Please do not hesitate to contact us if you have questions about these applicants or need further information.

Sincerely,

Regina Lennox

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted AFRICAN ELEPHANT trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Conservation Force
3240 S. I-10 Service Road W., Suite 200
Metairie, Louisiana 70001 USA

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least 90 days for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- (1) Is raw, processed, or manufactured;
- (2) Was legally obtained by the hunter through hunting for his or her personal use;
- (3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- (4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

NA

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Donald Robillard (b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No X Yes _____

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

NA

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Lexodonta Africana (African Elephant)

b. Sex (if known). Male

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Rep of Namibia: Kavango East, Beabwata West; S18 09 162 E021 42 495; Divundu

b. Date wildlife is to be hunted: June 8 to June 30, 2018

b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Hunt Africa Namibia CC; Jacobus Hugo Pinaar

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

NA

b. Date wildlife was hunted: NA

b. Name of hunting outfitter, safari company, or professional hunter you hunted with:

NA

c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

NA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

PERMITS WILL BE ISSUED
PRIOR TO HUNT. NOT YET
ISSUED AT DATE OF APPLICATION.

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:

Business Name:

Address:

Jacobus Hugo Pinaar, Hunt Africa Namibia CC

City:

State/Province:

PO BOX 1100, GOBABIS, OMAHEKE, NAMIBIA

Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.
- a. Do you have any information regarding the population status or trend data on the species hunted?

Population of elephant in this area (October 2017) more than 2000 and increasing.

COUNTRY POPULATION APPROX. 26,000.

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

Hunting Daily Fees US\$43,757. Trophy Fee US\$70478. 40% of trophy fees go to the Namibia government-Game Products Trust Fund (repairs, maintenance, salaries of rangers in areas where elephants roam. 40% to the community. The community uses the money to pay game rangers and for support of the KWE people.

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

Safari company has agents that are paid for anti-poaching information. The Professional Hunter, Jacobus Pinaar, is a trustee on the HUAP Trust (Hunters United Against Poaching). HUAP Trust has raised over N\$4million to fight elephant poaching.

NOTE: INFORMATION FOR QUESTIONS PROVIDED BY HUNT AFRICA NAMIBIA CC.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that my client may only import two leopard trophies and two elephant trophies within the same calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that I may only import two leopard trophies and two elephant trophies within the same calendar year. In addition, I understand that raw ivory, once imported into the U.S. States, cannot be re-exported.

Applicant's signature: *Daniel [REDACTED] [REDACTED]* Date: 04/23/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual			
1.a. Last name McGinnis	1.b. First name Michael	1.c. Middle name or initial (b) (6)	1.d. Suffix
2. Date of birth (mm/dd/yyyy) (b) (6)	3. Social Security No. (b) (6)	4. Occupation (b) (6)	5. Arrived in U.S. as (see instructions)
6.a. Telephone number (b) (6)	6.b. Alternate telephone number	6.c. Fax number	6.d. E-mail address

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution			
1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (dba)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
5. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information			
1.a. Physical address (Street address; Apartment #, Suite #, or Room #, no P.O. Boxes) (b) (6)			
1.b. City Lynchurst	1.c. State VA	1.d. Zip code/Postal code (b) (6)	1.e. County/Province
1.f. Country USA			
2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)			
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province
2.f. Country			

D. All applicants MUST complete	
1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee - attach documentation of fee exempt status as outlined in instructions. (50 CFR 13.11(d))	
2. Do you currently have or have you ever had any Federal Fish and Wildlife permits? Yes <input type="checkbox"/> If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: _____ No <input checked="" type="checkbox"/>	
3. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.	
Signature (in blue ink) of applicant/person responsible for permit (No photocopied or stamped signatures)	Date 3/28/18 Time (mm/dd/yyyy)

Please continue to next page

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

- Note 1:** If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but are unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.
- Note 2:** Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.
- Note 3:** USFWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.
- Note 4:** Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting, please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-5 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. For each trophy to be imported, provide:
 - a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
Panthera leo, African lion, Felidae family
 - b. Sex (if known).
male
2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
 - a. Country and PLACE (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:
N/A
 - b. Date wildlife is to be hunted: *N/A*
 - c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks).
N/A see #3
3. **IF THE ANIMAL IS DEAD**, please enter the following:
 - a. Country and PLACE (area, region, GIS coordinates, ranch AND nearest city) where wildlife was removed from the wild (provide a map if possible):
ZIMBABWE, MASHONLAND WEST, RIFA SAFARI AREA, HURUNWE
 - b. Date wildlife was hunted: *CHIRUNDU (S1611932E029)*
20 MAY 2017

- c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks).

SKIN (LIFE SIZE MOUNT WITH CLAWS); SKULL

- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export documents]:

TROPHY CONSULTANTS INTERNATIONAL (T.C.I.)

4 JOSIAH CHINAMANO ROAD, BELMONT, BULAWAYO, ZIMBABWE

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will also appear on your Namibian export permit and must match the U.S. import permit].

Name: TROPHY CONSULTANTS INTERNATIONAL

Business Name:

Address: 4 JOSIAH CHINAMANO ROAD

Address: BELMONT

City: BULAWAYO

State/Province:

Country, Postal Code: ZIMBABWE

5. Please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., population status or trend data; how the funds from license/trophy fees will be spent; what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

See US Dept of Interior document # 00-11-2017,

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

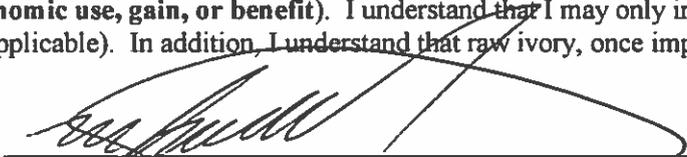

6. If you are a broker or taxidermist applying on behalf of a foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year (if applicable). In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature:  Date: 3/28/18

Be aware that there may be additional permitting or approval requirements by your local or state government, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist you, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish permit mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Michael McGinnis
(b) (6)

(b) (6)

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

Memorandum

To: The File

From: Chief, Branch of Permits 

Subject: Enhancement Finding for Lions Taken as Sport-hunted Trophies in Zimbabwe during 2016, 2017 and 2018

After evaluating the available information from the Government of Zimbabwe, other information available to the U.S. Fish and Wildlife Service (Service), and comments received from interested parties, the Service has determined that permits for the importation of sport-hunted trophies of wild lions (*Panthera leo melanochaita*), which are threatened under the Endangered Species Act (ESA), taken in Zimbabwe during the 2016, 2017, and 2018 calendar years meet the enhancement criteria under the Service's regulations at 50 CFR 17.32. Therefore, applications received for import of such specimens will be considered to have met this requirement. In accordance with the 4(d) rule for *P. l. melanochaita*, 50 CFR 17.40(r), the Service will review each application for import of such specimens on a case-by-case basis and each application will also need to meet all other applicable permitting requirements before it may be authorized. The Service will reassess the situation in Zimbabwe towards the end of the 2018 season to determine if hunts conducted in 2019 and beyond continue to meet the enhancement criteria under 50 CFR 17.32.

Governance of the Lion in the United States:

On October 29, 2014, the Service published in the Federal Register a finding that listing the African lion subspecies (*Panthera leo leo*) as a threatened species under the ESA was warranted and proposed a rule under section 4(d) of the ESA to provide conservation measures for the African lion. 79 Fed. Reg. 64472. On December 23, 2015, after fully considering the comments from the public and the peer reviewers on the proposed rule, the Service published in the Federal Register the final rule in which the taxonomic classification of the Asiatic lion (previously classified as *P. l. persica* and listed as an endangered species under the ESA) was changed to *P. l. leo* (Asia and western, central and northern Africa) and listed as an endangered species, and the *P. l. melanochaita* (southern and eastern Africa) subspecies was listed as a threatened species with a rule under section 4(d) of the ESA, which is set forth at 50 CFR 17.40(r) (USFWS 2015; 80 Fed. Reg. 79999). The effective date of this listing is January 22, 2016. Therefore, as of January 22, 2016, the lion

subspecies *Panthera leo melanochaita*, whose range includes Zimbabwe, is listed as threatened under the ESA and is regulated under an ESA section 4(d) special rule [50 CFR 17.40(r)].

Section 9 of the ESA and our implementing regulations at 50 CFR 17.21 and 50 CFR 17.31 set forth a series of general prohibitions that apply to all endangered and threatened wildlife, respectively, except where a 4(d) rule applies to threatened wildlife, in which case the 4(d) rule contains all the applicable prohibitions and exceptions. Under the 4(d) rule for *P. l. melanochaita*, all of the prohibitions under 50 CFR 17.31 apply to *P. l. melanochaita* specimens. These prohibitions, at 50 CFR 17.21 and 17.31, in part, make it illegal for any person subject to the jurisdiction of the United States to “take” (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or to attempt any of these) within the United States or upon the high seas; import or export; deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever, in the course of commercial activity; or sell or offer for sale in interstate or foreign commerce any lion specimens. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken in violation of the ESA. Permits may be issued to carry out otherwise prohibited activities involving endangered and threatened wildlife species under certain circumstances. Regulations governing permits for endangered species, such as *P. l. leo*, are codified at 50 CFR 17.22. Regulations governing permits for threatened species, such as *P. l. melanochaita*, are codified at 50 CFR 17.32.

In sum, under paragraph 50 CFR 17.40(r)(1), all the prohibitions and exceptions under 50 CFR 17.31 and 50 CFR 17.32 apply to *P. l. melanochaita*. Accordingly, the Service may authorize the import of a sport-hunted lion trophy from Zimbabwe, but only if it first makes a finding that permitting the import of a trophy would enhance the survival of the species in the wild.

As we explained when finalizing the 4(d) rule for *P. l. melanochaita*, any person wishing to conduct an otherwise prohibited activity, including all imports of *P. l. melanochaita* specimens, must first obtain a permit under 50 CFR 17.32. As with all permit applications submitted under 50 CFR 17.32, the individual requesting authorization to import a sport-hunted trophy of *P. l. melanochaita* bears the burden of providing information in their application showing that the activity meets the requirements for issuance criteria under 50 CFR 17.32. In some cases, such as for import of sport-hunted trophies, it is not always possible for the applicant to provide all of the necessary information needed by the Service to make a positive determination under the ESA to authorize the activity. In such cases, the Service may consult with the range country and other interested parties to the extent practicable to obtain necessary information. The Service has the discretion to make the required findings on sport-hunted trophy imports of *P. l. melanochaita* on a countrywide basis, although individual import permits will be evaluated and issued or denied for each application. While the Service may make enhancement findings for sport-hunted trophy imports of *P. l. melanochaita* on a countrywide basis, the Service encourages the submission of information from individual applicants. We rely on the information available to the Service and may rely on information from sources other than the applicant when making a permitting decision.

General considerations:

As we also explained when finalizing the 4(d) rule, our threatened species permitting regulations at 50 CFR 17.32 provide issuance criteria for threatened species permits (50 CFR 17.32(a)(2)), but do not specify what would constitute the enhancement of propagation or survival with regard to authorizing the import of parts or products of *P. l. melanochaita*, including sport-hunted trophies.

Therefore, when making a determination of whether an otherwise prohibited activity enhances the propagation or survival of *P. l. melanochaita*, the Service examines the overall conservation and management of the subspecies in the country where the specimen originated and whether that management of the subspecies addresses the threats to the subspecies (*i.e.*, that it is based on sound scientific principles and that the management program is actively addressing the current and longer term threats to the subspecies). In that review, we evaluate whether the import contributes to the overall conservation of the species by considering whether the biological, social, and economic aspects of a program from which the specimen was obtained provide a net benefit to the subspecies and its ecosystem.

The Service will evaluate any application received that involves *P. l. melanochaita* in the context of enhancement of propagation or survival permitting in accordance with our threatened species permitting regulations at 50 CFR 17.32 and issuance criteria for threatened species permits (50 CFR 17.32(a)(2)). These include, in addition to the general permitting criteria in 50 CFR 13.21(b):

- (i) Whether the purpose for which the permit is required is adequate to justify removing from the wild or otherwise changing the status of the wildlife sought to be covered by the permit;
- (ii) The probable direct and indirect effect that issuing the permit would have on the wild populations of the wildlife sought to be covered by the permit;
- (iii) Whether the permit, if issued, would in any way, directly or indirectly, conflict with any known program intended to enhance the survival probabilities of the population from which the wildlife sought to be covered by the permit was or would be removed;
- (iv) Whether the purpose for which the permit is required would be likely to reduce the threat of extinction facing the species of wildlife sought to be covered by the permit;
- (v) The opinions or views of scientists or other persons or organizations having expertise concerning the wildlife or other matters germane to the application; and
- (vi) Whether the expertise, facilities, or other resources available to the applicant appear adequate to successfully accomplish the objectives stated in the application.

In addition to these factors, particularly in relation to sport hunting, we find the *IUCN Species Survival Commission (SSC) Guiding Principles on Trophy Hunting as a Tool for Creating Conservation Incentives, Ver. 1.0* (IUCN SSC 2012), to provide useful principles, which, considered in conjunction with our threatened species issuance criteria, will aid the Service when making an enhancement finding for importation of sport-hunted trophies of *P. l. melanochaita*. This document sets out guidance from experts in the field on the use of trophy hunting as a tool for “creating incentives for the conservation of species and their habitats and for the equitable sharing of the benefits of use of natural resources” (IUCN SSC 2012, p. 2) and recognizes that recreational hunting, particularly trophy hunting, can contribute to biodiversity conservation and more specifically, the conservation of the hunted species.

The SSC document lays out five guiding principles that, considered in conjunction with our threatened species issuance criteria, will aid the Service when making an enhancement finding for importation of sport-hunted trophies of *P. l. melanochaita*:

(a) Biological sustainability: The hunting program cannot contribute to the long-term decline of the hunted species. It should not alter natural selection and ecological function of the hunted species or any other species that share the habitat. The program should not inadvertently facilitate poaching or illegal trade in wildlife by acting as a cover for such illegal activities. The hunting program should also not manipulate the ecosystem or its component elements in a way that alters the native biodiversity.

(b) Net Conservation Benefit: The biologically sustainable hunting program should be based on laws, regulations, and scientifically based quotas, established with local input, that are transparent and periodically reviewed. The program should produce income, employment, and other benefits to create incentives for reducing the pressure on the target species. The program should create benefits for local residents to co-exist with the target species and other species. It is also imperative that the program is part of a legally recognized governance system that supports conservation.

(c) Socio-Economic-Cultural Benefit: A well-managed hunting program can serve as a conservation tool when it respects the local cultural values and practices. It should be accepted by most members of the community, involving and benefiting local residents in an equitable manner. The program should also adopt business practices that promote long-term economic sustainability.

(d) Adaptive Management: Planning, Monitoring, and Reporting: Hunting can enhance the species when it is based on appropriate resource assessments and monitoring (e.g., population counts, trend data), upon which specific science-based quotas and hunting programs can be established. Resource assessments should be objective, well documented, and use the best science available. Adaptive management of quotas and programs based on the results of resource assessments and monitoring is essential. The program should monitor hunting activities to ensure that quotas and sex/age restrictions of harvested animals are met. The program should also generate reliable documentation of its biological sustainability and conservation benefits.

(e) Accountable and Effective Governance: A biologically sustainable trophy-hunting program should be subject to a governance structure that clearly allocates management responsibilities. The program should account for revenues in a transparent manner and distribute net revenues to conservation and community beneficiaries according to properly agreed decisions. All necessary steps to eliminate corruption should be taken and to ensure compliance with all relevant national and international requirements and regulations by relevant bodies such as administrators, regulators and hunters.

This approach to enhancement findings for the importation of sport-hunted trophies of *P. l. melanochaita* is consistent with the purpose and intent of the Endangered Species Act. As such, before the Service will authorize the importation of a sport-hunted trophy, we must determine that the trophy-hunting program is managed to ensure the long-term survival of the species. As part of this evaluation, we recognize that in many parts of the world, wildlife exists outside of protected areas and must share the same habitat and compete with humans living in these areas for space and resources. As identified in the *IUCN SSC Guiding Principle on Trophy Hunting as a Tool for Creating Conservation Incentives*, if communities that share these resources with wildlife do not

perceive any benefits from the presence of wildlife, they may be less willing to tolerate the wildlife. However, under certain circumstances, trophy hunting can address this problem by making wildlife more valuable to the local communities and encourage community support for managing and conserving the hunted species, as well as other species.

When evaluating whether the importation of a trophy of *P. l. melanochaita* would be authorized pursuant to 50 CFR 17.32, in accordance with our threatened species issuance criteria, we will examine how a country's management program for lions addresses the three main threats that have led to the decline of the subspecies: habitat loss, loss of prey base, and human-lion conflict. When examining a management program and whether trophies taken as part of that program meet the issuance criteria, we study a number of factors. Some of the factors we consider include whether the program is based on sound scientific information and identifies mechanisms that would arrest the loss of habitat or increase available habitat (*i.e.*, by establishing protected areas and ensuring adequate protection from human encroachment). We consider whether the management program actively addresses the loss of the lion's prey base by addressing poaching or unsustainable offtake within the country. A component of a management plan from which trophy imports would meet the issuance criteria would be whether there are government incentives in place that encourage habitat protection by private landowners and communities and incentives to local communities to reduce the incursion of livestock into protected areas or to actively manage livestock to reduce conflicts with lions. We examine if the hunting component of the management program supports all of these efforts by looking at whether hunting concessions/tracts are managed to ensure the long-term survival of the lion, its prey base, and habitat. Hunting, if properly conducted and well managed, can generate significant economic benefits that may contribute to the conservation of lions. In looking at whether we are able to authorize the import of a trophy under the issuance criteria of 50 CFR 17.32, we will examine if the trophy hunting provides financial assistance to the wildlife department to carry out elements of the management program and if there is a compensation scheme or other incentives to benefit local communities that may be impacted by lion predation. We will also consider how a U.S. hunter's participation in the hunting program contributes to the overall management of lions within a country.

Management programs for *P. l. melanochaita* are expected to address, but are not limited to, evaluating population levels and trends; the biological needs of the species; quotas; management practices; legal protection; local community involvement; and use of hunting fees for conservation. In evaluating these factors, we will work closely with the range countries and interested parties to obtain the information. By allowing entry into the United States of *P. l. melanochaita* trophies from range countries that have science-based management programs, we anticipate that other range countries would be encouraged to adopt and financially support the sustainable management of lions that benefits both the species and local communities. In addition to addressing the biological needs of the subspecies, a scientifically based management program would provide economic incentives for local communities to protect and expand *P. l. melanochaita* habitat.

Basis for Finding for Lions in Zimbabwe:

On February 1, 2016, the Service sent a letter to the Parks and Wildlife Management Authority in Zimbabwe (ZPWMA) with a list of questions related to management plans, population status, conservation, management, hunting policies, and regulations of Zimbabwe's lion populations. Additionally, in the letter the Service referenced the *IUCN Species Survival Commission (SSC)*

Guiding Principles on Trophy Hunting as a Tool for Creating Conservation Incentives, Ver. 1.0 (IUCN SSC 2012), as it provides useful principles which, when considered in conjunction with the Service's permit issuance criteria, would aid when making the required enhancement finding for permitting importation of sport-hunted lion trophies.

On February 16, 2016, the Service sent a second request to ZPWMA for specific documents related to the conservation status of lions in Zimbabwe. ZPWMA responded to the Service's request on February 17, 2016, with a copy of *Conservation Status of African Lion in Zimbabwe*, and subsequently, on November 29, 2016, provided a copy of *Enhancement and Non-detriment Finding for Lion (Panthera leo) in Zimbabwe*. The Service has also been corresponding with ZPWMA regarding African elephant management for several years. In this correspondence, ZPWMA, as well as other sources, have provided the Service with documents and information that are relevant to our evaluation of lions in Zimbabwe. These documents, along with the Service's own final rule on the lion listing under the Act, as well as other relevant information from reliable sources and contained in comments received from interested parties, were the basis of this finding.

Governance of Lions in Zimbabwe: The legal framework for Zimbabwe's regulatory mechanism is informed by the Wildlife Policy (1992), which is intended to maintain a protected area network for the conservation of the nation's wild resources and biological diversity. The Wildlife Policy (1992) provides for the Government of Zimbabwe to maintain a network of protected areas known as the Parks and Wild Life Estate, comprised of the country's National Parks, safari areas, botanical gardens, and sanctuary and recreational areas, for the conservation of the nation's wild resources and biological diversity (CITES 2016; ZPWMA 2016). It is intended to create economic activity to enhance rural development and encourages the conservation of wild animals and their habitats outside the protected areas.

ZPWMA was established by the Parks and Wildlife Act of 1996 (Chapter 20:14) [as amended by Act Number 19 of 2001] which came into operation on June 1, 2002, through Statutory Instrument 144C of 2002. The Act provides for the establishment of a Parks and Wildlife Board; establishment of national parks, botanical reserves, botanical gardens, sanctuaries, safari areas and recreational parks; and the preservation, conservation, propagation or control of wildlife, fish, and plants of Zimbabwe and the protection of her natural landscape and scenery. The Parks and Wild Life Act includes sections on virtually every aspect of ZPWMA, including requirements for annual financial audits and reporting to the central government. The Parks and Wild Life Act also provides for substantial penalties for the unlawful possession of or trading in protected wildlife species. In addition, the General Laws Amendment Act (No. 5) of 2010 provides for mandatory imprisonment for poaching.

The Parks and Wildlife Act, Chapter 20:14, devolved authority to manage and benefit from wildlife on communal and private lands to the landholders. In 1982, the legal provisions of this Act were extended to Rural District Councils (RDCs), on behalf of rural communities in communal lands whose areas contain viable populations of wildlife. Communal areas in Zimbabwe are administered by RDCs, which have become a mechanism for implementation of the government's policy of conservation by utilization of natural resources. It enables local communities to manage and benefit from wildlife resources through the Communal Areas Management Programme for Indigenous Resources (CAMPFIRE) established in 1989. CAMPFIRE was developed to encourage reduction in human-wildlife conflicts through conservation-based community development and to provide an economic incentive to improve community tolerance of wildlife, including lions. At the time, the

CAMPFIRE program was the model for community-based conservation efforts in several other African countries and was identified as an innovative program. Under a community-based conservation program, like CAMPFIRE, rural communities should benefit from revenue generated by sport hunting.

As Zimbabwe's premiere wildlife agency, the main functions of the ZPWMA are to control, manage and maintain Zimbabwe's wildlife resources and perform the service function with the primary role of protecting and conserving Zimbabwe's natural heritage for the present and future generations on behalf of the State. It also provides the cornerstone of Zimbabwe's tourism industry (ZPWMA 2015). The rationale behind the establishment of the ZPWMA was to allow for a self-funding mechanism, and thereby reduce its dependence on the national treasury. In January 1996, the Government of Zimbabwe approved the establishment of the Parks and Wild Life Conservation Fund that provides for financing wildlife operations directly from revenues generated through wildlife-related activities. The funding for ZPWMA is therefore coming from revenue generated through sport hunting conducted on state and private lands, concession leases, National Park visitor fees, and other wildlife-related fees. While there have been requests by ZPWMA for funding from the central treasury in the past, to our knowledge, no other significant government funding has been provided, and only limited outside funding from NGOs or other governments appears to be available.

A major component of ZPWMA's mandate is law enforcement. ZPWMA had 2,146 rangers at its establishment in 2002 (ZPWMA 2016); however, by the end 2015, there were 1,448 rangers in post (67% of 2002 level). Of the 1,448 rangers in post, 1,004 are deployable for anti-poaching operations (ZPWMA 2016). Hunting operators are obligated through their concession lease agreements to assist with anti-poaching efforts (ZPWMA 2016). Reportedly, USD590,000 was spent on anti-poaching efforts by Buby Valley Conservancy (BVC) alone during 2015 (K. Leatham, pers. comm., as cited in du Preez et al. 2016), and USD546,000 is spent annually on anti-poaching by Save Valley Conservancy (SVC) (Lindsey et al. 2012); these expenses are mainly covered by sport-hunting revenue (du Preez et al. 2016). If anyone is found in possession of poached specimens, they must pay a fine of USD5,000 or face a mandatory jail sentence. If convicted of lion poaching, courts could require the payment of a compensation fee of USD20,000 (ZPWMA 2014). Poaching mainly occurs along the boundaries of the protected areas where lions are incidentally snared as non-target prey. Between 2013 and 2015, 21 lions were killed illegally, with six animals killed through snaring in the area adjacent to Hwange National Park in 2015; poverty stands as the major driver of illegal hunting (ZPWMA 2016).

Zimbabwe is a member of the Southern African Development Community (SADC). Under the SADC Treaty, Article 5(g) establishes objectives to, among other aspects, promote the sustainable use of wildlife, harmonization of legal instruments governing wildlife use and conservation, promote the conservation of shared wildlife resources through the establishment of trans-frontier conservation areas (TFCA), and facilitate community-based natural resources management practices. To implement the SADC Treaty, member states are required to establish management programs for the conservation and sustainable use of wildlife. According to the ZPWMA *Enhancement and Non-Detrimental Findings for Panthera leo in Zimbabwe*, Zimbabwe has two established TFCAs, the Great Limpopo Trans-frontier Park (GLTP), which includes Gonarezhou National Park, and the Limpopo/Shashe TFCA. Additionally, there are other TFCAs that are in various stages of development, including Lower Zambezi-Mana Pools, Zimbabwe-Mozambique-Zambia (ZiMoZa), Chimanimani, and the Kavango-Zambezi (KAZA) trans-frontier conservation

area (TFCA) initiative, which links 52 million hectares of conservation areas between itself, Botswana, Zambia, Namibia, and Angola (ZPMWA 2016; Masterson 2016). Through TFCAs, wildlife management entities are linking many of the major protected areas by removing boundary fences along national borders that separate many reserves in addition to creating or improving corridors to link good-quality habitat for wildlife (Newmark 2008). The principle of ecological and migratory connectivity lies at the heart of the TFCA initiative linking large protected areas across international boundaries and providing space for wildlife populations.

In addition to Zimbabwe's domestic laws, it is also a Party to CITES. The lion is listed in Appendix II of the Convention. As an Appendix-II species, certain criteria must be met before such species can be exported, including a finding from the exporting country's CITES Scientific Authority that the proposed activity will not be detrimental to the survival of the species in the wild. In their reply to our inquiry, Zimbabwe provided a copy of their CITES non-detriment finding for lions. Their finding applied to all lion exports from Zimbabwe.

Current Lion Status in Zimbabwe: When the Service listed the lion in southern and eastern Africa as threatened under the ESA, three primary threats to the species throughout its range were identified: loss of habitat, loss of prey base, and human-lion conflict. While human population growth clearly has an impact due to loss of available habitat for lions, increasing human population has a direct impact on prey base. Prey availability affects the reproduction, recruitment, and foraging behavior of lions and, as a result, strongly influences lion movements, abundance, and population viability (Winterbach et al. 2012, as cited in USFWS 2015). Lion densities are directly dependent on prey biomass (Hayward et al. 2007). Outside of protected areas, the lion's prey base is much reduced (du Preez et al. 2016); inadequate management and law enforcement has led to poaching of the lion's prey base in Africa for bushmeat, which has been critically depleted (USFWS 2015). Population trends across eastern and southern Africa show that most prey species have declined in recent years, and for Zimbabwe droughts have been a critical factor (ZPWMA 2016). A reduced prey base results in a relatively greater chance of lions encountering livestock (du Preez et al. 2016). While actual losses of livestock to predators may be relatively low, the perceived financial cost to farmers can be high, and lions are persecuted intensely in livestock areas as a consequence. Their scavenging behavior makes them particularly vulnerable to the practice of lacing prey carcasses with poison to eliminate predators (CITES 2016). Co-existence of lions and people is promoted through giving value to lions, through tourism and hunting in CAMPFIRE areas (ZPWMA 2014). The threat to lions from habitat loss is especially present in Sebungwe and the South East Low Veld where the fragmented nature of the protected areas is compounded by increasing human and livestock populations surrounding these areas (ZPWMA 2016).

According to the Service's CoP17 *Consideration of Proposals for Amendment of Appendices I and II*, international trade in lion products is emerging as an additional threat; however, the relative extent to which this threat has contributed to lion population declines is difficult to evaluate accurately (CITES 2016). According to ZPWMA (2016), the illegal local and international trade in lions and their products poses an insignificant risk to the species in Zimbabwe, as there are no records of people found in possession of illegally acquired lion specimens in Zimbabwe. It is not clear what the level of legal trade, if any, occurs within Zimbabwe.

The bulk of Zimbabwe's wildlife occurs within the Parks Estate which includes 11 national parks, 16 safari areas, 16 recreational parks, 6 sanctuaries, 12 botanical reserves and 3 botanical gardens, all spread across the country (Parks and Wildlife Act 2001 Chapter 20:14). Wildlife populations

also occur on the state Forest Areas, Communal CAMPFIRE areas and private conservancies dedicated to wildlife-based land use. According to ZPWMA (ZPWMA 2016), there are approximately 319,317 km² of land where some form of wildlife based land use is practiced in Zimbabwe. Lions occur permanently in 45% of this available range (c. 145,000km²), with the majority occurring in national parks (96% of the all national parks) and safari areas (92% of all safari areas). Lions also occur permanently in 47% of the State forest areas and 66% of privately owned conservancies. The CAMPFIRE areas comprise approximately 247,000km² and lions occur in 36% of these areas. Lion are transient in CAMPFIRE, conservancy and resettled areas adjacent to the major protected areas, and move across the border into Zambia, Mozambique, South Africa, and Botswana.

Zimbabwe's main lion range includes the Hwange-Matetsi Ecosystem, Mid Zambezi Valley, Sebungwe, and South East Lowveld. The lion population estimates in Zimbabwe are determined primarily through carnivore spoor surveys, systematic lion collaring, and call-up surveys. According to ZPWMA's *Conservation Status of the African lion (Panthera leo) in Zimbabwe* July 2014 report, starting in 2015, lion spoor surveys will be done at two-year intervals in all wildlife areas, and lion call-up surveys will be done every three years in all major lion areas (ZPWMA 2014). The Service has not received confirmation that these surveys have been conducted since 2015.

ZPWMA (ZPWMA 2016) has estimated that the minimum number of lions that occur on approximately 51,642km² of land where reliable survey data are available is approximately 1,900 (range 1,800 – 2,000). The western portion of the country, consisting primarily of Hwange National Park and the surrounding safari areas, forest areas, communal areas and private conservancies, supports approximately 737 lions (or 38% of the overall population). The southern portion of the country, dominated by the two major conservancies (Save and Buby) and Gonarezhou National Park supports approximately 896 lions (48%). These numbers are supported by several studies. Groom et al. 2014 used call-up surveys to obtain direct estimates of the lion population within Gonarezhou National Park and compared actual lion densities with potential density estimates. In this study, while lions were only seen at five percent of calling stations, this equated to a population estimate of 33 lions, which is consistent with spoor survey results conducted in June 2010 (Groom et al. 2014). A 2015 spoor count survey of Gonarezhou National Park revealed an estimated 125 lions within the park (ZPWMA 2016). From 2007 to present, annual track index surveys at the SVC have been conducted using a standardized methodology (Groom and Watermeyer 2015, as cited in du Preez et al. 2016). Prey availability models suggest that the carrying capacity for this lion population is approximately 271 lions (Hayward et al. 2007). In 2015, the estimated population was 284 lions (du Preez et al. 2016). The Rifa Safari Area was surveyed using camera trapping and spoor counts in 2015, which supported an estimated population of 68 lions. The central and northern portions of the country reportedly support an estimated population of 284 lions (15%). The 12-year (2000-2011) average lion density per 100km² is 2.8 in Hwange National Park, 6.0 for South Eastern Lowveld in the SVC, 9.0 in Malilangwe, and 0.8 in Gonarezhou National Park (ZPWMA Annual Report 2013, as cited in ZPWMA 2014).

To manage any population to ensure an appropriate population level and determine whether sport hunting is having a positive effect, it is vital to have sufficient data on population numbers and population trends on which to base management decisions. According to Riggio et al. 2013 (pg.32), and Bjorklund in Riggio et al 2013 (p.32), the minimum number estimated to constitute a viable population is 500 individuals. Hwange National Park, with an estimated population of 559, is the

only area within Zimbabwe that has a viable population as laid out by Riggio et al. 2013. However, the two regions that make up the largest percentage of the country's lion population (Western 38% and Southern 48%) have regional populations of 737 and 896, respectively. The areas within the Central and Northern regions of Zimbabwe, albeit smaller, encompass parks that are part of Transfrontier Conservation Areas, such as the Mana Pools region.

Lion Management in Zimbabwe: In response to discussions surrounding a possible up-listing of lion to Appendix I under CITES at the 13th Meeting of the Conference of the Parties (CoP13), and subsequent workshops involving lion range states, IUCN, ZPWMA, and other key stakeholders held a workshop to develop the *Conservation Strategy and Action Plan for the Lion (Panthera leo) in Zimbabwe* which was published by ZPWMA in 2006. The plan responds to regional and international standards set by Treaties such as CITES and the Convention on Biological Diversity (CBD), among others. The plan states, "it will guide the conservation and management of this top predator" which "addresses the needs of th[e] country." The Service is not aware of any additional or updated iterations of the plan since 2006; however, in their 2016 response, *Enhancement and Non-Detrimental Findings for Panthera leo in Zimbabwe*, ZPWMA provides updates on the each of the outputs and respective targets established under the 2006 *Conservation Strategy and Action Plan for the Lion (Panthera leo) in Zimbabwe* (ZPWMA 2016).

The 2006 plan identifies a vision that "...lions should be conserved and managed sustainably for their aesthetic, cultural, and ecological values, and the socio-economic development of Zimbabwe." The plan lays out three broad targets to achieve this objective:

- Ensure the persistence of key lion populations and other important populations including those of doubtful viability.
- Human and livestock loss reduced.
- Optimize wildlife conservation-related net benefits to local communities.

All three targets are stepped down to seven specific outputs with their own targets and activities to meet such targets. Although the plan does not identify a time period, some activities do, of which a period of 5 years is the most common. In response to inquiries from the Service, ZPWMA provided a summary of the progress made to implement the 2006 strategy.

While all three of the broad targets appear to serve a valuable role in lion management in Zimbabwe, three of the specific outputs are most relevant to determining if the implementation of the strategy enhances the propagation or survival of the species, as required by the ESA for the issuance of import permits. The first output, "lion populations, their habitats and wild prey effectively conserved and managed in collaboration with local stakeholders" has been broken down into a number of targets: establish a baseline survey and monitoring program; maintain and strengthen capacity for lion conservation, management, monitoring and research; identify and implement best management standards and practices for the hunting program; develop and implement co-management frameworks; and expand the geographic distribution range of lions. According to ZPWMA (2016), baseline surveys have been completed for the Parks Estate using monitoring protocols for key variables (populations, habitats, prey), and selected surveys have been undertaken in areas outside National Parks. Active carnivore research programs conducted by NGOs and research institutions, such as WildCRU, are taking place in various parts of the country; in addition, personnel have been trained in data collection and capture, management, lion aging and analysis. Adaptive age-based criteria for male trophy animals are in place and functioning. The

quota for a certain year is determined by a point system based off the hunts from the previous season. Therefore, ZPWMA is actively working toward meeting the target areas for this output.

The second output, “human-lion related conflicts minimized and, where possible, eliminated” has also been broken down into a number of targets: develop and establish databases on lion-human conflicts; Identify and implement methods to reduce and mitigate livestock losses and lion attacks on humans; and train and properly staff problem animal control (PAC) units to conduct rapid response and precisely target problem animals. According to information from ZPWMA (2016), approaches to mitigate livestock losses and lion attacks on humans are in the process of being tested and implemented in Hwange and methods to mitigate lion attacks on livestock are being implemented as appropriate at selected sites (e.g. Tsholotshe). Data on PAC reports for lion-related problems have been collated, and PAC units at ZPWMA field station and/or RDC levels have been partially established. In Matusadona, Hwange, and Gonarezhou regions, specific awareness and education packages on lion conservation and management have been developed and implemented. The information submitted in the ZPWMA update suggests that they have met one target, and are in the process of implementing the remaining two.

The third output, “(t)he costs and benefits of long-term lion management equitably distributed,” is a socio-economic output to establish agreement and implementation of area-specific lion management plans with identified stakeholders in each wildlife region, and implement a transparent mechanism to equitably distribute lion-related income to identified stakeholders.” The specific targets for this output are: complete an inventory of stakeholders directly affected by lion conservation, deliver appropriate training and capacity building to prioritized stakeholders, agree to and implement collaboratively developed area-specific lion management plans with identified stakeholder groups in each wildlife region within 5 years, and implement transparent mechanisms to equitably distribute lion-related/generated income to identified stakeholders (groups and/or communities). Current information from ZPWMA shows that they have identified key stakeholders and assessed the financial impacts of lion conservation and the magnitude of socio-economic impacts on each stakeholder group. Limited training has been undertaken for representative stakeholders in Hwange, Matusadona, and Gonarezhou. ZPWMA has also implemented an adaptive management program across four wildlife regions and are in the progress of developing and implementing area-specific lion management plans with identified stakeholder groups. According to ZPWMA, a Management Plan for Hwange has been approved. However, the Service does not have a copy of this plan. With these updates, ZPWMA has made progress toward this output’s targets.

The strategy also identifies roles and responsibilities for a number of players in Zimbabwe’s lion conservation efforts. According to the strategy, there is a national lion coordinator that is to coordinate all national activities on lion conservation, research, and management including census surveys, setting up monitoring needs and coordinating data on human-lion conflicts. The strategy goes on to identify roles for the field stations, wardens, ecologists and utilization units, which are responsible for ensuring compliance with hunting regulations and maintaining safari-hunting databases. In addition, the strategy identifies roles for CAMPFIRE, safari operators, and professional hunters to facilitate training and ensure compliance with hunting regulations.

The Conservation Strategy and Action Plan for the Lion in Zimbabwe (ZPWMA 2006) borrows language from the *IUCN SSC Conservation Strategy (2006)*. It iterates areas in need of improvement regarding lion conservation in Zimbabwe, including standardized lion census methods and surveys, further mitigating human-lion conflicts, and maximizing benefits for rural

communities that live with lions. ZPWMA (2006) notes their intention to review and put in place criteria for age-based identification of male trophy animals, but do not mention if they will be reviewing possible combination strategies. As part of the 2006 lion conservation strategy for eastern and southern Africa, six objectives were established to secure and restore sustainable lion populations, which were housed under the following categories: management, mitigation, socio-economics, policy and land-use, politics, and trade. The strategy was intended to be implemented within 10 years (Macdonald 2016), and Zimbabwe gave an update on progress regarding these objectives in their *Enhancement and Non-Detrimental Findings for Panthera leo in Zimbabwe* (ZPWMA 2016) that also addressed outputs and targets laid out in their 2006 action plan.

Additionally, to mitigate human-lion conflict, the “Long Shields Guardian Programme” was initiated whereby communities are notified of movements of collared lions into their areas via cell phone, and then have the opportunity to take appropriate action, such as moving cattle. In 2013 alone, 1,850 warnings were passed to the “Long Shields.” These actions may reduce the incidents of lions marauding livestock; however, retaliatory killing of lions still occur. Further, as is policy under The Parks and Wildlife Act of 2001, any lions that attack humans or livestock will be lethally eliminated (ZPWMA 2016). Between 2007 and 2013 a total of 1,113 conflict incidents were recorded in the Hwange area in which 915 head of stock were lost to lions.

Hunting and Utilization: Lions are infamously infanticidal (Schaller 1972, as cited in du Preez et al. 2016), which is often used as an argument against sport-hunting of the species (e.g. Packer et al. 2011), where it is feared that the removal of dominant males causes cub mortality that eventually results in lowered population recruitment and survival (Packer et al. 2009). Infanticide, however, may be less of an issue in terms of sport-hunting if age-appropriate males, past their prime and no longer territorial or with dependent cubs, are harvested (Whitman et al. 2004).

The minimum number of lions that occur in approximately 51,642km² of land in Zimbabwe, where reliable survey data are available, is estimated to be 1,917 (range 1,800 – 2,000), the majority of which occur in western and southern Zimbabwe. When taking this population estimate into consideration, trophy hunting harvests average 2.7% of adult male lions annually. This percentage has decreased since the establishment of age restrictions on lion hunting (ZPWMA 2016).

Trophy hunting of wildlife is permitted in safari areas, of which there are 16 in Zimbabwe (ZPWMA 2014). According to the Forest Act, Chapter 19:05, there are 24 gazetted indigenous forest areas in Zimbabwe; within these forest areas, lions may be hunted in the following forests: Fuller, Kazuma, Pandamasuwe, Ngamo, Sikumi, Gwayi, Sijarira, and Gwampa (ZPWMA 2014). In 2013, an adaptive quota management system for lion hunting based on the ages of lions hunted was agreed to in Harare, Zimbabwe, during a meeting hosted by ZPWMA and an independent non-governmental conservation organization (du Preez et al. 2016). After reviewing aging techniques, attendees at the July 2013 meeting in Harare, Zimbabwe, were confident that hunters could be expected to categorize lions as being below or above five years of age. In determining quotas for the following years, operators would be rewarded with increased quotas if they hunted animals of six years or older, would not be penalized if they hunted animals five years of age, but would have quotas cut if they hunted animals younger than five years old or if they failed to complete hunt returns (ZPWMA and Panthera 2014). In 2013, only 28% of lions hunted were five years old or older. In 2015, that figure rose to 77.3% (ZPWMA 2016). According to Hunter et al. (2013), an adaptive quota management system utilizing age-based criteria would not only aid in the prevention of over-harvesting lions, but would also prevent excessively conservative quotas. Further,

according to Miller et al. (2016), results indicate that age-based hunting is feasible for sustainably managing threatened and economically significant species such as the lion, but must be guided by rigorous training, strict monitoring of compliance and error, and conservative quotas. No single trait can be relied upon exclusively to precisely age lions. Rather, multiple traits must be examined in combination to cross-validate an individual's age and, according to Whitman et al. (2004), restricting hunting to individuals that are at least six years old is desirable from a biological perspective due to the reduced risk of the loss of pride males and infanticide of cubs associated with the harvest of such individuals (Whitman et al. 2004).

During 2013, operators were requested to submit hunt returns and photos as a trial run to get the adaptive quota system up and running. In 2014, operators were requested to do the same but were informed that the age of the lions hunted in 2014 would determine their lion quotas in 2015 (du Preez et al. 2016). In 2015, there was a marked increase in the age of lions hunted in Zimbabwe as a whole. The majority of lions hunted were on the cusp of 5-6 years of age but were not older than six years. National hunting offtakes for lions in Zimbabwe from 2013 to 2015 were 29, 42, and 47 respectively (Masterson 2016). It appears these do not include illegal forms of hunting offtake.

Previously, Zimbabwe set quotas for the hunting of female lions. Between 1998 and 2004, Zimbabwe maintained a mean quota of $0.3 \pm 0.1/100 \text{ km}^2$ for female lions; during the same period, actual offtake was lower at $0.08 \pm 0.1/100 \text{ km}^2$, or a mean of 30.6 percent of the quota actually harvested (Loveridge et al. 2007). However, females are the most productive portion of a population; if they are removed from a pride, there is inherent risk that dependent cubs will die and the overall breeding success of the pride will be reduced. Zimbabwe discontinued issuing quotas for female lions in 2011 (USFWS 2015). In 2011, Zimbabwe's quota was set at 101 lions; in 2014, it was reduced to 50 male lions following the implementation of age restrictions (Henschel 2015, pers. comm., as cited in USFWS 2015).

In setting adaptive lion quotas, Zimbabwe uses scientific information including spoor surveys, camera traps, and ranger-based sighting. In CAMPFIRE areas, incidences of human-lion conflict are also taken into consideration where survey information is not readily available, when determining quotas for those areas (ZPWMA 2014). The quota setting process involves all stakeholders, including the ZPWMA, landowners, safari operators, and CAMPFIRE managers and their representatives. During the annual quota-setting workshop, presentations are made by the proponents who then make proposals for quotas. Where it is felt that not enough information has been presented, however, a precautionary quota will still be issued (ZPWMA 2014). The Service is not aware of how precautionary quotas are treated after they are issued, or if there is a protocol for obtaining necessary information when a precautionary quota is put in place.

ZPWMA (2016) mentions seven concessions that are leased on five-year terms, and how these concessionaires pay a five-year "right to lease" fee, annual rental, fixed quota fee (payable if animals are shot or not) and a supplementary quota fee that allows additional animals to be bought as needed. It is unclear to what extent Zimbabwe still utilizes fixed quotas, as du Preez et al. claims fixed quotas are no longer being used by Zimbabwe, but a fixed quota fee is mentioned in ZPWMA (2016). It is also unclear how many animals concessionaires are able to "buy as needed," and how such requests may be accommodated without going over the national quota (ZPWMA 2016).

Between 1999 and 2004, data were collected in and around Hwange National Park that suggested that hunting surrounding the park was having a negative impact on the lion population. Therefore,

sport hunting of lions was suspended in the area surrounding the park between 2005 and 2009. Following the lifting of the moratorium, and by implementing stricter monitoring and hunting guidelines through the Hwange Lion Research Project, the overall Hwange lion population has continued to show a positive trend, and is now estimated at over 550 animals (ZPWMA 2015).

CAMPFIRE is the program through which the Zimbabwean Government has developed the management of wildlife resources to communal farmers. As of July 2014, there are at least 58 Rural Districts that have been granted the Appropriate Authority status to manage wildlife resources in their areas; however, according to *Enhancement and Non-Detrimental Findings for Panthera leo in Zimbabwe* (ZPWMA 2016), only 16 are actively engaged in some form of wildlife-based land use (ZPWMA 2016). Lions are found in communal areas that are adjacent to major protected areas, and lion hunting is allowed in CAMPFIRE districts (ZPWMA 2014). According to EcoWeb (2015), all income generated by trophy hunting in CAMPFIRE areas was distributed to communities (52%, when they are typically prescribed 55%), rural district councils (RDCs) (44%, when they are typically prescribed 41%), and the CAMPFIRE association (4%). Communities, rather than dividing income by households, typically invest in projects that benefit the communities as a whole, such as schools, clinics, and grinding mills. Councils use funding for patrols, monitoring of hunts, problem animal control, water, and fire management, while the CAMPFIRE association uses their funding to cover administrative costs and representation of the program (EcoWeb 2015).

As agreed upon at the 2013 lion management meeting in Harare, the CAMPFIRE areas in which lions occur are currently exempted from the age restrictions. This approach was adopted as a means of ensuring that impoverished communities obtain the opportunity to benefit from the presence of lions, recognizing the potential negative impacts the species has on the livelihoods of livestock farmers (ZPWMA 2016). According to ZPWMA's 2016 response, between 2010 and 2015, lions accounted for 2% of the total income generated from hunts conducted on CAMPFIRE lands and trophy fees accounted for 74% of the total funds generated for CAMPFIRE. Further, U.S. hunters accounted for 51% of the funds generated from hunting in CAMPFIRE areas during the same period. While hunting is allowed in CAMPFIRE areas, it is unclear if American sport hunters conduct lion hunts in these areas; if so, the Service is not aware if sport hunters are exempted from the age restriction in this case, and how this exemption in CAMPFIRE areas is taken into consideration when setting quotas for other portions of the country.

According to the Revised CAMPFIRE Revenue Sharing Guidelines, which were incorporated into the Constitution of the CAMPFIRE Association in 2007, at least 55% of generated revenue from hunting should be devolved to producer communities, no more than 26%, and 15% for management and overhead at RDC level, respectively, and 4% as a levy to the CAMPFIRE Association. According to an undated document (but presumably produced in late 2014, since it references data from 2014 but does not include any references to 2015 data) produced by CAMPFIRE (CAMPFIRE report undated) at least 10 RDCs comply with the Revenue Guidelines.

According to *The Role of Trophy Hunting of Elephant in Support of the Zimbabwe CAMPFIRE Program – December 2016*, a report the Service received on December 17, 2016, the Reserve Bank of Zimbabwe, in collaboration with relevant stakeholders, has established the Tourism Receipts Accounting System (TRAS) that required all outfitters to submit returns listing the revenue generated for hunting activities. This system has been in place for several years, but required manual analysis of the data to extract information on hunting revenue. In January 2015, to account

fully for earnings in the hunting sector, the Reserve Bank of Zimbabwe, in collaboration with relevant stakeholders, introduced the Tourism Receipts Accounting System (TRAS2) a web-based system (TRAS2) that links Safari Operators, ZPWMA Authority, Taxidermists, Shipping Agents, International Marketing Agents, and Reserve Bank. Under this system, all authorized hunts are registered, allowing for the capture of hunting data, such as the origin of clients, value of trophies and hunts, and area hunted, to monitor hunting quota utilization and track hunted trophies. According to the December 2016 report, the Exchange Control Division of the Reserve Bank of Zimbabwe and the ZPWMA are now able to:

1. Assess regional price differentials of similar hunts and the reasons thereof;
2. Present TRAS2 system updates and reports to the users, including international marketing agents;
3. Engage with international marketing agents of sport hunting;
4. Obtain relevant insights on governing of the hunting sector; and
5. Come up with an effective mechanism to fully account for export proceeds from the hunting sector.

The TRAS2 information was utilized in *Enhancement and Non-Detrimental Findings for Panthera leo in Zimbabwe* (ZPWMA 2016) to provide a breakdown of the source of hunting income, and the amount of funds generated by trophy fees by land category, among other insights, and has proven the TRAS2 system's ability to obtain relevant insights on governing of the hunting sector.

Evaluation:

As stated earlier, the Service will evaluate any application in accordance with our threatened species permitting regulations at 50 CFR 17.32 and issuance criteria for threatened species permits (50 CFR 17.32(a)(2)). In evaluating each of these criteria based on information available to the Service, we have been able to determine that sport-hunted lion trophies taken in 2016 and 2017 would qualify for the issuance of the required import permit.

17.32(a)(2)(i): Whether the purpose for which the permit is required is adequate to justify removing from the wild or otherwise changing the status of the wildlife sought to be covered by the permit:

Zimbabwe's lion hunting industry generated 9% of all sport hunting revenue in 2015; 51% was contributed by U.S. hunters during 2010-2015 country-wide, and 90% of the sport-hunting market in BVC and SVC during 2005-2015. Based on the information available to the Service, the participation of communities in CAMPFIRE has heralded a reversal in wildlife declines on private land. When the benefits of CAMPFIRE were extended to RDCs, it further aided in the equitable distribution of benefits from trophy hunting to local communities, which incentivizes them to conserve the African lion. In the case of SVC, without the hunting industry, these wildlife areas, which have become conservation havens in the threat of human encroachment across much of Zimbabwe, would not be economically viable, and therefore would not exist.

There was conflicting information presented to the Service on how many lions were included in the quota in 2015. du Preez et al. (2016) reports a national lion hunting quota of 85 with 39 hunted;

ZPWMA (2016) reports that the national lion hunting quota in 2015 was 82 lions, with 49 hunted. When evaluating the lower quota with higher utilization reported by ZPWMA (2016), and taking into consideration the land area of the Parks Estate alone, Zimbabwe did not exceed the best management practice of 0.5 lions/1,000 km²; the 2015 offtake would have accounted for 0.125 lions/1,000 km².

Zimbabwe also has taken into consideration other best management practices, including age-based criteria for an adaptive management strategy, and takes past performance of hunting organizations into consideration when determining future quotas.

Further, sport hunting was essential for the successful transition of SVC from cattle to wildlife (du Preez et al. 2016), in that it provided monetary benefits for the conservation of lions and local communities. BVC donates over 45 tons of meat from sport hunting to the local communities each year. This meat donation is worth over USD100,000 per year. BVC also supports several schools, clinics, and community projects in the three surrounding districts of Mwenezi, Maranda, and Jopempe. The local community sees a direct benefit from the wildlife in BVC, but is also empowered by job opportunities created both with these community projects, as well as on BVC (du Preez et al. 2016).

While Zimbabwe's hunting industry generated approximately 8 million in 2015, not all of this is connected to lion hunting or to U.S. hunters. However, lions are a key component of the hunting industry since they are part of the "Big 5" trophies and draw U.S. hunters to Zimbabwe. Based on the information available to the Service, the funds generated by hunting trophies contribute to the ZPWMA's ability to manage the country's lion populations as well as the success of CAMPFIRE. It appears that without the hunting industry, it would not be economically viable to maintain lions. Although U.S. hunter participation in lion hunts is not enough to make or break the industry, U.S. hunters have played a significant role in the industry in Zimbabwe, previously making up 51% of all hunting in Zimbabwe and 72% of lion hunts within the country. As such, the removal of their participation could have a long-term negative impact.

Further, through the *Strategy and Action Plan*, Zimbabwe has put into place mechanisms to adequately oversee the harvest of lions in Zimbabwe. With an annual harvest of approximately 85 lions, Zimbabwe is not exceeding the limits identified of 0.5 lions/1,000 sq. km. The objectives of the *Strategy and Action Plan* and the actions and monitoring activities that have been put into place to achieve these objectives should support the adaptive management approach that Zimbabwe has established for managing lions. The Service will continue to monitor the effectiveness of the *Strategy and Action Plan*, and revise our finding as appropriate.

Therefore, based on the information available to the Service, and provided that the reserve where the lion was taken was properly permitted and in compliance with national and local regulations, the purpose for which a permit being requested is adequate to justify removing lions from the wild or otherwise changing their status.

17.32(a)(2)(ii): The probable direct and indirect effect that issuing the permit would have on the wild populations of the wildlife sought to be covered by the permit:

The total area under wildlife-based land use and conservation in Zimbabwe amounts to 10.7 million hectares, and represents 27% of the total surface area of the country. Of this, 7.9 million

hectares, or 75% of all conservation land in the country, falls under safari hunting as the primary or only source of revenue. With the CAMPFIRE program, private landholders and RDCs are given the opportunity to benefit from the wildlife on their land, including lion, and incentivize them to conserve the species. Sport hunting of lions by U.S. hunters supports the programs in Zimbabwe that provide the opportunity for locals to see value in lions, which in turn conserve the species in the long-term.

A scientifically based quota is the number of a given species that can be removed from a specific population without damaging the biological integrity and sustainability of that population (WWF 1997). However, full implementation and enforcement of the age-based strategy could potentially cause the need for quotas to become irrelevant or eliminated (USFWS 2015). Age restrictions will naturally restrict offtake to a limited number of individuals that meet the age criteria (Loveridge et al. 2007, Whitman et al. 2004).

Based on the information provided to the Service, it is clear that Zimbabwe has made strides in their management of their lion populations. Although prior to 2011, Zimbabwe allowed the hunting of lionesses and males under 5 years old, they made significant changes to ensure their hunting program is sustainable. In 2011, Zimbabwe restricted the hunting of female lions. In 2013, they proposed an adaptive age-based quota-setting process. In 2015, the development TRAS2 allowed the country to assess regional price differentials of similar hunts and the reasons thereof; present TRAS2 system updates and reports to the users, including international marketing agents; engage with international marketing agents of sport hunting; obtain relevant insights on governing of the hunting sector; and come up with an effective mechanism to fully account for export proceeds from the hunting sector.

According to CITES trade data and Service records, from 2011 to 2016, there were 223 lion trophies imported to the U.S. from Zimbabwe. Best practice would be to import only male lions, as pointed out by Macdonald (2016), but Zimbabwe has already taken the initiative by placing a moratorium on lioness hunting. The fixed-quota concept, in which hunting quotas had to be paid for upfront before the hunting season begins, and results in poor quality trophies and young animals being hunted, has also been abandoned (du Preez et al. 2016). Zimbabwe appears to be transparent in their implementation of the age-based adaptive management strategy (USFWS 2015). The adaptive quota management system for lion hunting based on the ages of lions hunted has been accepted and embraced by all stakeholders. This adaptive quota management system has not only led to a reduced national lion hunting quota, but has also resulted in a significant increase in the age of harvested lions to a level that is considered to have a reduced ecological impact (du Preez et al. 2016).

Between 2005 and 2015, the U.S. market has represented over 90% for the sport-hunting market in both BVC and SVC. If this market was effectively lost due to an inability of prospective clients to import their trophies, it would become unviable to continue managing BVC as a wildlife area in its current form (du Preez et al. 2016). Across all CAMPFIRE districts, from 2010 to 2015, there was a total quota of 140 lions, with actual offtake equaling 45 animals. During this same period, U.S. sport hunters apparently accounted for 51% of Zimbabwe's sport hunting clients; trophy fees represented 74% of CAMPFIRE income, of which lions play a small role. In 2015, lion sport hunting generated USD753,000 in revenue, which accounted for about 9% of all sport hunting revenue in Zimbabwe that year (ZPWMA 2016).

Evaluating the information provided by the Zimbabwe government and other sources, it appears that the hunting program in Zimbabwe is addressing the three main threats that were identified by the Service when making the determination that the species was threatened with the possibility of extinction. The hunting areas are maintaining habitat for lions and ensuring that there is no further loss, provided that the hunting areas can remain economically viable. In order to maintain a viable population of lions, the parks, safari, and CAMPFIRE areas must maintain biodiversity and a sustainable prey base. Finally, Zimbabwe is actively working to reduce human-lion conflicts and the number of lions killed in retaliation for killing livestock. Therefore, the management of lions within Zimbabwe and the limited hunting of lions contributes to the on-going survival of the species in Zimbabwe.

Provided that the off-take of lions continues to be monitored and the actions identified in the Strategy and Action Plan continue to be implemented, the participation of U.S. hunters in lion hunts would provide an indirect benefit to wild populations by helping to support the reserves where lions are found. Therefore, based on the information available to the Service, the probable direct and indirect effect that issuing an import permit for a legally hunted lion would have on the species would be positive.

17.32(a)(2)(iii): Whether the permit, if issued, would in any way, directly or indirectly, conflict with any known program intended to enhance the survival probabilities of the population from which the wildlife sought to be covered by the permit was or would be removed:

As stated above, Zimbabwe is monitoring and controlling the harvest of lions through permitting under their regulations and through the Strategy and Action Plan. The issuance of import permits for lions legally hunted under these authorities would not conflict with any programs intended to enhance the survival probability of the species in Zimbabwe. If import permits for sport hunted lion trophies from Zimbabwe were to be issued, it would work in favor of, not against, the principal acts governing lion conservation in Zimbabwe. Furthermore, sport hunting opportunities for hunters in CAMPFIRE districts would help local communities realize the value in conserving the African lion.

Therefore, based on the information available to the Service, the issuance of import permits for legally hunted lions does not conflict with known conservation programs and rules.

17.32(a)(2)(iv): Whether the purpose for which the permit is required would be likely to reduce the threat of extinction facing the species of wildlife sought to be covered by the permit:

With limited, controlled off-take of lions in a manner that would maintain sustainability, the legal hunting activities that U.S. hunters would be involved in would contribute to reducing the threat of extinction of lions. This off-take must be monitored to ensure that it is sustainable and that, to the extent possible, normal lion behavior and ecology are not negatively impacted. It appears that the permitting activities under Zimbabwe's laws and CITES, as well as the implementation of the adaptive age-based lion quota, and a continuation of implementation of the outputs in the *Strategy and Action Plan* will ensure the long-term survival of lions. The utilization of hunters to manage the populations on the reserves is an important element of the success of lion management in Zimbabwe.

Therefore, based on the information available to the Service, the issuance of import permits for legally hunted lions does not conflict with known conservation programs and rules.

17.32(a)(2)(v): The opinions or views of scientists or other persons or organizations having expertise concerning the wildlife or other matters germane to the application:

From reviewing comments made during the listing process for lions, as well as information obtained through personal conversations and literature, there is general agreement that hunting, done properly and well managed, would not have an adverse effect on lion populations. Numerous researchers have stated that, while they may not support hunting in general, they see that benefits can be received through a scientifically based hunting program for lions.

Based on the information available to the Service, there is general support by scientists and other persons or organizations having expertise concerning lions that the legal harvest of lions, and the subsequent import of these trophies, would not have an adverse effect on the species, but would further efforts to conserve the species in the wild into the future.

17.32(a)(2)(vi): Whether the expertise, facilities, or other resources available to the applicant appear adequate to successfully accomplish the objectives stated in the application:

While, over the years, ZPWMA has failed to generate adequate revenue for its operations, U.S. sport hunters play a large role in the hunting industry of Zimbabwe. The Service anticipates that by granting the importation of sport-hunted lion trophies, there would be an increase in funds provided to Zimbabwe's conservation initiatives through this program by U.S. sport hunters. ZPWMA has also been forthcoming in involving relevant stakeholders as well as independent researchers and non-governmental organizations in determining best management practices.

Therefore, based on the information available to the Service, Zimbabwe has the proper expertise, facilities, and other resources to accomplish the objectives laid out in their *Strategy and Action Plan* to enhance the propagation and survival of the species, partly through the utilization of funds generated by U.S. hunters' participation in lion hunts throughout the country.

Conclusion

Given the current status of lions within Zimbabwe and the level of management and oversight provided to them, the Service is able to find that the harvest and import of sport-hunted trophies of lions within Zimbabwe meet the purposes of the ESA. As stated earlier, each application received by the Service for the import of a sport-hunted trophy lion from Zimbabwe will be evaluated on a case-by-case basis. The applicant must have hunted on a properly licensed hunting area within Zimbabwe. The Government of Zimbabwe must continue to implement the *Strategy and Action Plan* in the manner identified in the documents. The on-going adaptive management and limited off-take of lions is important to the survival of lions in Zimbabwe and the Service will reassess lion management within Zimbabwe and whether the importation of sport-hunted trophies enhance the survival of the species at the end of the 2018 hunting season or at which time substantive information becomes available to the Service in the interim.

Although the Service is able to make a finding that the management of lions within Zimbabwe meet the enhancement criteria under the ESA, there are certain documents and data the Service needs to evaluate in order to continue our current finding past the 2018 hunting season. The Service expects to be able to review data from the 2016, 2017, and 2018 hunting seasons to assess the lion populations and ensure that management efforts are enhancing the propagation and survival of the lion within Zimbabwe. Given that Zimbabwe's last management plan for lion was produced in 2006, the Service would like to see an updated plan established. Local management plans, such as the Management Plan for Hwange National Park will be sought. Although Zimbabwe has made progress on their 2006 *Strategy and Action Plan*, the Service will seek updates on further progress of the outputs or targets not yet accomplished. Lastly, the Service will also seek an update on the quota setting process. Specially, we will need further information on the establishment and implementation of precautionary quotas.

Therefore, with the information currently available to the Service, the Service is able to make a determination that the import of lions taken in Zimbabwe in 2016, 2017 and 2018 would meet the issuance criteria under 50 CFR 17.32. In accordance with the 4(d) rule for *P. l. melanochaita*, 50 CFR 17.40(r), the Service will review each application received for import of such specimens on a case-by-case basis and each application will also need to meet all other applicable permitting requirements before it may be authorized.

Enhancement Finding
Applicant: Michael (b) (6) McGinnis (b) (6) (PRT – 92335C)

Michael (b) (6) McGinnis (b) (6) submitted an application on May 22, 2018, for the importation of one male lion (*Panthera leo melanochaita*) taken from Mashonaland West, RiFa Safari Area, Hurungwe, Zimbabwe, for the purpose of enhancing the propagation and survival of the species in the wild. After evaluating the available information submitted with the application, information provided by the Government of Zimbabwe, other information available to the U.S. Fish & Wildlife Service (Service), and comments received from interested parties, the Service has determined that the importation of the sport-hunted trophy taken during May 20, 2017, from this population meets the enhancement criteria under 50 CFR 17.32.

Governance of the Lion in the United States:

On October 29, 2014, the Service published in the Federal Register a finding that listing the African lion subspecies (*Panthera leo leo*) as a threatened species under the Endangered Species Act (Act or ESA) was warranted and proposed a rule under Section 4(d) of the Act to provide conservation measures for the African lion. (79 Fed. Reg. 64472). On December 23, 2015, after fully considering the comments from the public and the peer reviewers on the proposed rule, the Service published in the Federal Register the final rule in which the taxonomic classification of the Asiatic lion (previously classified as *P. l. persica* and listed as an endangered species under the Act) was changed to *P. l. leo* (Asia and western, central and northern Africa) and listed as an endangered species, and the *P. l. melanochaita* (southern and eastern Africa) subspecies was listed as a threatened species with a rule under Section 4(d) of the Act, which is set forth at 50 CFR 17.40(r) (USFWS 2015; 80 Fed. Reg. 79999). The effective date of this listing is January 22, 2016. Therefore, as of January 22, 2016, the lion subspecies *Panthera leo melanochaita*, whose range includes Zimbabwe, is listed as threatened under the Act and is regulated under an ESA Section 4(d) special rule [50 CFR 17.40(r)].

Section 9 of the Act and our implementing regulations at 50 CFR 17.21 and 50 CFR 17.31 set forth a series of general prohibitions that apply to all endangered and threatened wildlife, respectively, except where a 4(d) rule applies to threatened wildlife, in which case the 4(d) rule contains all the applicable prohibitions and exceptions. Under the 4(d) rule for *P. l. melanochaita*, all of the prohibitions under 50 CFR 17.31 apply to *P. l. melanochaita* specimens. These prohibitions, at 50 CFR 17.21 and 17.31, in part, make it illegal for any person subject to the jurisdiction of the United States to “take” (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or to attempt any of these) within the United States or upon the high seas; import or export; deliver, receive,

carry, transport, or ship in interstate or foreign commerce, by any means whatsoever, in the course of commercial activity; or sell or offer for sale in interstate or foreign commerce any lion specimens. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken in violation of the Act. Permits may be issued to carry out otherwise prohibited activities involving endangered and threatened wildlife species under certain circumstances. Regulations governing permits for endangered species, such as *P. l. leo*, are codified at 50 CFR 17.22. Regulations governing permits for threatened species, such as *P. l. melanochaita*, are codified at 50 CFR 17.32.

In sum, under paragraph 50 CFR 17.40(r)(1), all the prohibitions and exceptions under 50 CFR 17.31 and 50 CFR 17.32 apply to *P. l. melanochaita*. Accordingly, the Service may authorize the import of a sport-hunted lion trophy from Zimbabwe, but only if it first makes a finding that permitting the import of a trophy would enhance the survival of the species in the wild.

As we explained when finalizing the 4(d) rule for *P. l. melanochaita*, any person wishing to conduct an otherwise prohibited activity, including all imports of *P. l. melanochaita* specimens, must first obtain a permit under 50 CFR 17.32. As with all permit applications submitted under 50 CFR 17.32, the individual requesting authorization to import a sport-hunted trophy of *P. l. melanochaita* bears the burden of providing information in their application showing that the activity meets the requirements for issuance criteria under 50 CFR 17.32. In some cases, such as for import of sport-hunted trophies, it is not always possible for the applicant to provide all of the necessary information needed by the Service to make a positive determination under the Act to authorize the activity. In such cases, the Service may consult with the range country and other interested parties to the extent practicable to obtain necessary information. The Service will make the required findings on sport-hunted trophy imports of *P. l. melanochaita* on an individual application basis, however information obtained for the country as a whole will continue to be considered as it contains information pertinent to the Service's evaluation. Any new information obtained or submitted to the Service will be evaluated and considered in all future findings for sport-hunted trophies of *P. l. melanochaita* taken in Zimbabwe.

General considerations:

As we also explained when finalizing the 4(d) rule, our threatened species permitting regulations at 50 CFR 17.32 provide issuance criteria for threatened species permits [50 CFR 17.32(a)(2)], but do not specify what would constitute the enhancement of propagation or survival with regard to authorizing the import of parts or products of *P. l. melanochaita*, including sport-hunted trophies. Therefore, when making a determination of whether an otherwise prohibited activity enhances the propagation or survival of *P. l. melanochaita*, the Service examines the overall conservation and management of the subspecies in the country where the specimen originated and whether that management of the subspecies addresses the threats to the subspecies (*i.e.*, that it is based on sound scientific principles and that the management program is actively addressing the current and longer term threats to the subspecies). In this review, we evaluate whether the import contributes to the overall conservation of the species by considering whether the biological, social, and economic aspects of a program from which the specimen was obtained provides a net benefit to the subspecies and its ecosystem.

The Service has evaluated Mr. McGinnis' application involving a *P. l. melanochaita* sport-hunted trophy taken in Zimbabwe, in the context of enhancement of propagation or survival in accordance

with our threatened species permitting regulations at [50 CFR 17.32](#) and issuance criteria for threatened species permits [[50 CFR 17.32\(a\)\(2\)](#)]. These include, in addition to the general permitting criteria in [50 CFR 13.21\(b\)](#):

- (i) Whether the purpose for which the permit is required is adequate to justify removing from the wild or otherwise changing the status of the wildlife sought to be covered by the permit;
- (ii) The probable direct and indirect effect that issuing the permit would have on the wild populations of the wildlife sought to be covered by the permit;
- (iii) Whether the permit, if issued, would in any way, directly or indirectly, conflict with any known program intended to enhance the survival probabilities of the population from which the wildlife sought to be covered by the permit was or would be removed;
- (iv) Whether the purpose for which the permit is required would be likely to reduce the threat of extinction facing the species of wildlife sought to be covered by the permit;
- (v) The opinions or views of scientists or other persons or organizations having expertise concerning the wildlife or other matters germane to the application; and
- (vi) Whether the expertise, facilities, or other resources available to the applicant appear adequate to successfully accomplish the objectives stated in the application.

In addition to these factors, particularly in relation to sport hunting, we find the *IUCN Species Survival Commission (SSC) Guiding Principles on Trophy Hunting as a Tool for Creating Conservation Incentives, Ver. 1.0* (IUCN SSC 2012), to provide useful principles, which, considered in conjunction with our threatened species issuance criteria, will aid the Service when making an enhancement finding for importation of sport-hunted trophies of *P. l. melanochaita*. This document sets out guidance from experts in the field on the use of trophy hunting as a tool for “creating incentives for the conservation of species and their habitats and for the equitable sharing of the benefits of use of natural resources” (IUCN SSC 2012, p. 2) and recognizes that recreational hunting, particularly trophy hunting, can contribute to biodiversity conservation and more specifically, the conservation of the hunted species.

The SSC document lays out five guiding principles that, considered in conjunction with our threatened species issuance criteria, will aid the Service when making an enhancement finding for importation of sport-hunted trophies of *P. l. melanochaita*:

- (a) *Biological sustainability*: The hunting program cannot contribute to the long-term decline of the hunted species. It should not alter natural selection and ecological function of the hunted species or any other species that share the habitat. The program should not inadvertently facilitate poaching or illegal trade in wildlife by acting as a cover for such illegal activities. The hunting program should also not manipulate the ecosystem or its component elements in a way that alters the native biodiversity.
- (b) *Net Conservation Benefit*: The biologically sustainable hunting program should be based on laws, regulations, and scientifically based quotas, established with local input, that are transparent and periodically reviewed. The program should produce income, employment, and

other benefits to create incentives for reducing the pressure on the target species. The program should create benefits for local residents to co-exist with the target species and other species. It is also imperative that the program is part of a legally recognized governance system that supports conservation.

(c) *Socio-Economic-Cultural Benefit*: A well-managed hunting program can serve as a conservation tool when it respects the local cultural values and practices. It should be accepted by most members of the community, involving and benefiting local residents in an equitable manner. The program should also adopt business practices that promote long-term economic sustainability.

(d) *Adaptive Management: Planning, Monitoring, and Reporting*: Hunting can enhance the species when it is based on appropriate resource assessments and monitoring (e.g., population counts, trend data), upon which specific science-based quotas and hunting programs can be established. Resource assessments should be objective, well documented, and use the best science available. Adaptive management of quotas and programs based on the results of resource assessments and monitoring is essential. The program should monitor hunting activities to ensure that quotas and sex/age restrictions of harvested animals are met. The program should also generate reliable documentation of its biological sustainability and conservation benefits.

(e) *Accountable and Effective Governance*: A biologically sustainable trophy-hunting program should be subject to a governance structure that clearly allocates management responsibilities. The program should account for revenues in a transparent manner and distribute net revenues to conservation and community beneficiaries according to properly agreed decisions. All necessary steps to eliminate corruption should be taken and to ensure compliance with all relevant national and international requirements and regulations by relevant bodies such as administrators, regulators and hunters.

This approach to enhancement findings for the importation of sport-hunted trophies of *P. l. melanochaita* is consistent with the purpose and intent of the Act. As such, before the Service will authorize the importation of a sport-hunted trophy, we must determine that the trophy-hunting program is managed to ensure the long-term survival of the species. As part of this evaluation, we recognize that in many parts of the world, wildlife exists outside of protected areas and must share the same habitat and compete with humans living in these areas for space and resources. As identified in the *IUCN SSC Guiding Principle on Trophy Hunting as a Tool for Creating Conservation Incentives*, if communities that share these resources with wildlife do not perceive any benefits from the presence of wildlife, they may be less willing to tolerate the wildlife. However, under certain circumstances, trophy hunting can address this problem by making wildlife more valuable to the local communities and encourage community support for managing and conserving the hunted species, as well as other species.

In evaluating whether the importation of Mr. McGinnis' trophy of *P. l. melanochaita* would be authorized pursuant to 50 CFR 17.32, in accordance with our threatened species issuance criteria, we examined how Zimbabwe's management program for lions addresses the three main threats that have led to the decline of the subspecies: habitat loss, loss of prey base, and human-lion conflict. When examining a management program and whether trophies taken as part of that program meet the issuance criteria, we study a number of factors. Some of the factors we consider

include whether the program is based on sound scientific information and identifies mechanisms that would arrest the loss of habitat or increase available habitat (*i.e.*, by establishing protected areas and ensuring adequate protection from human encroachment). We consider whether the management program actively addresses the loss of the lion's prey base by addressing poaching or unsustainable offtake within the country. A component of a management plan from which trophy imports would meet the issuance criteria would be whether there are government incentives in place that encourage habitat protection by private landowners and communities and incentives to local communities to reduce the incursion of livestock into protected areas or to actively manage livestock to reduce conflicts with lions. We examine if the hunting component of the management program supports all of these efforts by looking at whether hunting concessions/tracts are managed to ensure the long-term survival of the lion, its prey base, and habitat. Hunting, if properly conducted and well managed, can generate significant economic benefits that may contribute to the conservation of lions. In looking at whether we are able to authorize the import of a trophy under the issuance criteria of 50 CFR 17.32 (a)(2), we will examine if the trophy hunting provides financial assistance to the wildlife department to carry out elements of the management program and if there is a compensation scheme or other incentives to benefit local communities that may be impacted by lion predation. We will also consider how a U.S. hunter, in this case Mr. McGinnis' participation in the hunting program contributes to the overall management of lions within a country.

The management program in Zimbabwe for *P. l. melanochaita* is expected to address, but is not limited to, evaluating population levels and trends; the biological needs of the species; quotas; management practices; legal protection; local community involvement; and use of hunting fees for conservation. In evaluating these factors, we work closely with the range countries and interested parties to obtain the information. By allowing entry into the United States of *P. l. melanochaita* trophies from range countries that have science-based management programs, we anticipate that other range countries would be encouraged to adopt and financially support the sustainable management of lions that benefits both the species and local communities. In addition to addressing the biological needs of the subspecies, a scientifically based management program will provide economic incentives for local communities to protect and expand *P. l. melanochaita* habitat.

Basis for Finding:

On February 1, 2016, the Service sent a letter to the Parks and Wildlife Management Authority in Zimbabwe (ZPWMA) with a list of questions related to management plans, population status, conservation, management, hunting policies, and regulations of Zimbabwe's lion populations. Additionally, in the letter the Service referenced the *IUCN Species Survival Commission (SSC) Guiding Principles on Trophy Hunting as a Tool for Creating Conservation Incentives, Ver. 1.0* (IUCN SSC 2012), as it provides useful principles which, when considered in conjunction with the Service's permit issuance criteria, would aid when making the required enhancement finding for permitting importation of sport-hunted lion trophies.

On February 16, 2016, the Service sent a second request to ZPWMA for specific documents related to the conservation status of lions in Zimbabwe. ZPWMA responded to the Service's request on February 17, 2016, with a copy of *Conservation Status of African Lion in Zimbabwe*, and subsequently, on November 29, 2016, provided a copy of *Enhancement and Non-detriment Finding for Lion (Panthera leo) in Zimbabwe*. The Service has also been corresponding with ZPWMA

regarding African elephant management for several years. In this correspondence, ZPWMA, as well as other sources, have provided the Service with documents and information that are relevant to our evaluation of lions in Zimbabwe. These documents, along with the Service's own final rule on the lion listing under the Act, as well as other relevant information from reliable sources and contained in comments received from interested parties, were the basis of this finding.

Governance of Lions in Zimbabwe: The legal framework for Zimbabwe's regulatory mechanism is informed by the Wildlife Policy (1992), which is intended to maintain a protected area network for the conservation of the nation's wild resources and biological diversity. The Wildlife Policy (1992) provides for the Government of Zimbabwe to maintain a network of protected areas known as the Parks and Wild Life Estate, comprised of the country's National Parks, safari areas, botanical gardens, and sanctuary and recreational areas, for the conservation of the nation's wild resources and biological diversity (CITES 2016; ZPWMA 2016). It is intended to create economic activity to enhance rural development and encourages the conservation of wild animals and their habitats outside the protected areas.

ZPWMA was established by the Parks and Wildlife Act of 1996 (Chapter 20:14) [as amended by Act Number 19 of 2001] which came into operation on June 1, 2002, through Statutory Instrument 144C of 2002. The Act provides for the establishment of a Parks and Wildlife Board; establishment of national parks, botanical reserves, botanical gardens, sanctuaries, safari areas and recreational parks; and the preservation, conservation, propagation or control of wildlife, fish, and plants of Zimbabwe and the protection of her natural landscape and scenery. The Parks and Wild Life Act includes sections on virtually every aspect of ZPWMA, including requirements for annual financial audits and reporting to the central government. The Parks and Wild Life Act also provides for substantial penalties for the unlawful possession of or trading in protected wildlife species. In addition, the General Laws Amendment Act (No. 5) of 2010 provides for mandatory imprisonment for poaching.

The Parks and Wildlife Act, Chapter 20:14, devolved authority to manage and benefit from wildlife on communal and private lands to the landholders. In 1982, the legal provisions of this Act were extended to Rural District Councils (RDCs), on behalf of rural communities in communal lands whose areas contain viable populations of wildlife. Communal areas in Zimbabwe are administered by RDCs, which have become a mechanism for implementation of the government's policy of conservation by utilization of natural resources. It enables local communities to manage and benefit from wildlife resources through the Communal Areas Management Programme for Indigenous Resources (CAMPFIRE) established in 1989. CAMPFIRE was developed to encourage reduction in human-wildlife conflicts through conservation-based community development and to provide an economic incentive to improve community tolerance of wildlife, including lions. At the time, the CAMPFIRE program was the model for community-based conservation efforts in several other African countries and was identified as an innovative program. Under a community-based conservation program, like CAMPFIRE, rural communities should benefit from revenue generated by sport-hunting.

As Zimbabwe's premiere wildlife agency, the main functions of the ZPWMA are to control, manage and maintain Zimbabwe's wildlife resources and perform the service function with the primary role of protecting and conserving Zimbabwe's natural heritage for present and future generations on behalf of the State. It also provides the cornerstone of Zimbabwe's tourism industry (ZPWMA 2015). The rationale behind the establishment of the ZPWMA was to allow for a self-

funding mechanism, and thereby reduce its dependence on the national treasury. In January 1996, the Government of Zimbabwe approved the establishment of the Parks and Wild Life Conservation Fund that provides for financing wildlife operations directly from revenues generated through wildlife-related activities. The funding for ZPWMA is therefore coming from revenue generated through sport hunting conducted on state and private lands, concession leases, National Park visitor fees, and other wildlife-related fees. While there have been requests by ZPWMA for funding from the central treasury in the past, to our knowledge, no other significant government funding has been provided, and only limited outside funding from NGOs or other governments appears to be available.

A major component of ZPWMA mandate is law enforcement. ZPWMA had 2,146 rangers at its establishment in 2002 (ZPWMA 2016); however, by the end 2015, there were 1,448 rangers in post (67% of 2002 level). Of the 1,448 rangers in post, 1,004 are deployable for anti-poaching operations (ZPWMA 2016). Hunting operators are obligated through their concession lease agreements to assist with anti-poaching efforts (ZPWMA 2016). Reportedly, USD590,000 was spent on anti-poaching efforts by Buby Valley Conservancy (BVC) alone during 2015 (K. Leathem, pers. comm., as cited in Du Preez et al. 2016), and USD546,000 is spent annually on anti-poaching by Save Valley Conservancy (SVC) (Lindsey et al. 2012); these expenses are mainly covered by sport-hunting revenue (Du Preez et al. 2016). If anyone is found in possession of poached specimens, they must pay a fine of USD5,000 or face a mandatory jail sentence. If convicted of lion poaching, courts could require the payment of a compensation fee of USD20,000 (ZPWMA 2014). Poaching mainly occurs along the boundaries of the protected areas where lions are incidentally snared as non-target prey. Between 2013 and 2015, 21 lions were killed illegally, with six animals killed through snaring in the area adjacent to Hwange National Park in 2015; poverty stands as the major driver of illegal hunting (ZPWMA 2016).

Zimbabwe is a member of the Southern African Development Community (SADC). Under the SADC Treaty, Article 5(g) establishes objectives to, among other aspects, promote the sustainable use of wildlife, harmonization of legal instruments governing wildlife use and conservation, promote the conservation of shared wildlife resources through the establishment of trans-frontier conservation areas (TFCA), and facilitate community-based natural resources management practices. To implement the SADC Treaty, member states are required to establish management programs for the conservation and sustainable use of wildlife. According to the ZPWMA *Enhancement and Non-Detrimental Findings for Panthera leo in Zimbabwe*, Zimbabwe has two established TFCAs, the Great Limpopo Trans-frontier Park (GLTP), which includes Gonarezhou National Park, and the Limpopo/Shashe TFCA. Additionally, there are other TFCAs that are in various stages of development, including Lower Zambezi-Mana Pools, Zimbabwe-Mozambique-Zambia (ZiMoZa), Chimanimani, and the Kavango-Zambezi (KAZA) trans-frontier conservation area (TFCA) initiative, which links 52 million hectares of conservation areas between itself, Botswana, Zambia, Namibia, and Angola (ZPMWA 2016; Masterson 2016). Through TFCAs, wildlife management entities are linking many of the major protected areas by removing boundary fences along national borders that separate many reserves in addition to creating or improving corridors to link good-quality habitat for wildlife (Newmark 2008). The principle of ecological and migratory connectivity lies at the heart of the TFCA initiative linking large protected areas across international boundaries and providing space for wildlife populations.

In addition to Zimbabwe's domestic laws, it is also a Party to CITES. The lion is listed in Appendix II of the Convention. As an Appendix-II species, certain criteria must be met before such species

can be exported, including a finding from the exporting country's CITES Scientific Authority that the proposed activity will not be detrimental to the survival of the species in the wild. In their reply to our inquiry, Zimbabwe provided a copy of their CITES non-detriment finding for lions. Their finding applied to all lion exports from Zimbabwe.

Current Lion Status in Zimbabwe: When the Service listed the lion in southern and eastern Africa as threatened under the Act, three primary threats to the species throughout its range were identified: loss of habitat, loss of prey base, and human-lion conflict. While human population growth clearly has an impact due to loss of available habitat for lions, increasing human population has a direct impact on prey base. Prey availability affects the reproduction, recruitment, and foraging behavior of lions and, as a result, strongly influences lion movements, abundance, and population viability (Winterbach *et al.* 2012, as cited in USFWS 2015). Lion densities are directly dependent on prey biomass (Hayward *et al.* 2007). Outside of protected areas, the lion's prey base is much reduced (Du Preez *et al.* 2016); inadequate management and law enforcement has led to poaching of the lion's prey base in Africa for bushmeat, which has been critically depleted (USFWS 2015). Population trends across eastern and southern Africa show that most prey species have declined in recent years, and for Zimbabwe, droughts have been a critical factor (ZPWMA 2016). A reduced prey base results in a relatively greater chance of lions encountering livestock (Du Preez *et al.* 2016). While actual losses of livestock to predators may be relatively low, the perceived financial cost to farmers can be high, and lions are persecuted intensely in livestock areas as a consequence. Their scavenging behavior makes them particularly vulnerable to the practice of lacing prey carcasses with poison to eliminate predators (CITES 2016). Co-existence of lions and people is promoted through giving value to lions, through tourism and hunting in CAMPFIRE areas (ZPWMA 2014). The threat to lions from habitat loss is especially present in Sebungwe and the South East Low Veld where the fragmented nature of the protected areas is compounded by increasing human and livestock populations surrounding these areas (ZPWMA 2016).

According to the Service's CoP17 *Consideration of Proposals for Amendment of Appendices I and II*, international trade in lion products is emerging as an additional threat; however, the relative extent to which this threat has contributed to lion population declines is difficult to evaluate accurately (CITES 2016). According to ZPWMA (2016), the illegal local and international trade in lions and their products poses an insignificant risk to the species in Zimbabwe, as there are no records of people found in possession of illegally acquired lion specimens in Zimbabwe. It is not clear what the level of legal trade, if any, occurs within Zimbabwe.

The bulk of Zimbabwe's wildlife occurs within the Parks Estate which includes 11 national parks, 16 safari areas, 16 recreational parks, 6 sanctuaries, 12 botanical reserves and 3 botanical gardens, all spread across the country (Parks and Wildlife Act 2001 Chapter 20:14). Wildlife populations also occur on the state Forest Areas, Communal CAMPFIRE areas and private conservancies dedicated to wildlife-based land use. According to ZPWMA (ZPWMA 2016), there are approximately 319,317 km² of land where some form of wildlife based land use is practiced in Zimbabwe. Lions occur permanently in 45% of this available range (c. 145,000km²), with the majority occurring in national parks (96%) and safari areas (92%). Lions also occur permanently in 47% of the State forest areas and 66% of privately owned conservancies. The CAMPFIRE areas comprise approximately 247,000km² and lions occur in 36% of these areas. Lions are transient in CAMPFIRE, conservancy and resettled areas adjacent to the major protected areas, and move across the border into Zambia, Mozambique, South Africa, and Botswana.

Zimbabwe's main lion range includes the Hwange-Matetsi Ecosystem, Mid Zambezi Valley, Sebungwe, and South East Lowveld. The lion population estimates in Zimbabwe are determined primarily through carnivore spoor surveys, systematic lion collaring, and call-up surveys. According to ZPWMA's *Conservation Status of the African lion (Panthera leo) in Zimbabwe* July 2014 report, starting in 2015, lion spoor surveys will be done at two-year intervals in all wildlife areas, and lion call-up surveys will be done every three years in all major lion areas (ZPWMA 2014). The Service has not received confirmation that these surveys have been conducted since 2015.

ZPWMA (ZPWMA 2016) has estimated that the minimum number of lions that occur on approximately 51,642km² of land where reliable survey data are available is approximately 1,900 (range 1,800 – 2,000). The western portion of the country, consisting primarily of Hwange National Park and the surrounding safari areas, forest areas, communal areas and private conservancies, supports approximately 737 lions (or 38% of the overall population). The southern portion of the country, dominated by the two major conservancies (Save and Bulyebe) and Gonarezhou National Park supports approximately 896 lions (48%). These numbers are supported by several studies. Groom et al. 2014, used call-up surveys to obtain direct estimates of the lion population within Gonarezhou National Park and compared actual lion densities with potential density estimates. In this study, while lions were only seen at five percent of calling stations, this equated to a population estimate of 33 lions, which is consistent with spoor survey results conducted in June 2010 (Groom et al. 2014). A 2015 spoor count survey of Gonarezhou National Park revealed an estimated 125 lions within the park (ZPWMA 2016). From 2007 to present, annual track index surveys at the SVC have been conducted using a standardized methodology (Groom and Watermeyer 2015, as cited in Du Preez et al. 2016). Prey availability models suggest that the carrying capacity for this lion population is approximately 271 lions (Hayward et al. 2007). In 2015, the estimated population was 284 lions (Du Preez et al. 2016). The Rifa Safari Area was surveyed using camera trapping and spoor counts in 2015, which supported an estimated population of 68 lions. The central and northern portions of the country reportedly support an estimated population of 284 lions (15%). The 12-year (2000-2011) average lion density per 100km² is 2.8 in Hwange National Park, 6.0 for South Eastern Lowveld in the SVC, 9.0 in Malilangwe, and 0.8 in Gonarezhou National Park (ZPWMA Annual Report 2013, as cited in ZPWMA 2014).

To manage any population to ensure an appropriate population level and determine whether sport hunting is having a positive effect, it is vital to have sufficient data on population numbers and population trends on which to base management decisions. According to Riggio et al. 2013 (p.32), and Bjorklund in Riggio et al 2013 (p.32), the minimum number estimated to constitute a viable population is 500 individuals. Hwange National Park, with an estimated population of 559, is the only area within Zimbabwe that has a viable population as laid out by Riggio et al. 2013. However, the two regions that make up the largest percentage of the country's lion population (Western 38% and Southern 48%) have regional populations of 737 and 896, respectively. The areas within the Central and Northern regions of Zimbabwe, albeit smaller, encompass parks that are part of Transfrontier Conservation Areas, such as the Mana Pools region.

Lion Management in Zimbabwe: In response to discussions surrounding a possible up-listing of lion to Appendix I under CITES at the 13th Meeting of the Conference of the Parties (CoP13), and subsequent workshops involving lion range states, IUCN, ZPWMA, and other key stakeholders held a workshop to develop the *Conservation Strategy and Action Plan for the Lion (Panthera leo) in Zimbabwe* which was published by ZPWMA in 2006. The plan responds to regional and

international standards set by Treaties such as CITES and the Convention on Biological Diversity (CBD), among others. The plan states, “it will guide the conservation and management of this top predator” which “addresses the needs of th[e] country.” The Service is not aware of any additional or updated iterations of the plan since 2006; however, in their 2016 response, *Enhancement and Non-Detrimental Findings for Panthera leo in Zimbabwe*, ZPWMA provides updates on each of the outputs and respective targets established under the 2006 *Conservation Strategy and Action Plan for the Lion (Panthera leo) in Zimbabwe* (ZPWMA 2016).

The 2006 plan identifies a vision that “...lions should be conserved and managed sustainably for their aesthetic, cultural, and ecological values, and the socio-economic development of Zimbabwe.” The plan lays out three broad targets to achieve this objective:

- Ensure the persistence of key lion populations and other important populations including those of doubtful viability.
- Human and livestock loss reduced.
- Optimize wildlife conservation-related net benefits to local communities.

All three targets are stepped down to seven specific outputs with their own targets and activities to meet such targets. Although the plan does not identify a time period, some activities do, of which a period of 5 years is the most common. In response to inquiries from the Service, ZPWMA provided a summary of the progress made to implement the 2006 strategy.

While all three of the broad targets appear to serve a valuable role in lion management in Zimbabwe, three of the specific outputs are most relevant to determining if the implementation of the strategy enhances the propagation or survival of the species, as required by the Act for the issuance of import permits. The first output, “lion populations, their habitats and wild prey effectively conserved and managed in collaboration with local stakeholders” has been broken down into a number of targets: establish a baseline survey and monitoring program; maintain and strengthen capacity for lion conservation, management, monitoring and research; identify and implement best management standards and practices for the hunting program; develop and implement co-management frameworks; and expand the geographic distribution range of lions. According to ZPWMA (2016), baseline surveys have been completed for the Parks Estate using monitoring protocols for key variables (populations, habitats, prey), and selected surveys have been undertaken in areas outside National Parks. Active carnivore research programs conducted by NGOs and research institutions, such as WildCRU, are taking place in various parts of the country; in addition, personnel have been trained in data collection and capture, management, lion aging and analysis. Adaptive age-based criteria for male trophy animals are in place and functioning. The quota for a certain year is determined by a point system based off the hunts from the previous season. Therefore, ZPWMA is actively working toward meeting the target areas for this output.

The second output, “human-lion related conflicts minimized and, where possible, eliminated” has also been broken down into a number of targets: develop and establish databases on lion-human conflicts; Identify and implement methods to reduce and mitigate livestock losses and lion attacks on humans; and train and properly staff problem animal control (PAC) units to conduct rapid response and precisely target problem animals. According to information from ZPWMA (2016), approaches to mitigate livestock losses and lion attacks on humans are in the process of being tested and implemented in Hwange, and methods to mitigate lion attacks on livestock are being

implemented as appropriate at selected sites (e.g. Tsholotshe). Data on PAC reports for lion-related problems have been collated, and PAC units at ZPWMA field station and/or RDC levels have been partially established. In Matusadona, Hwange, and Gonarezhou regions, specific awareness and education packages on lion conservation and management have been developed and implemented. The information submitted in the ZPWMA update suggests that they have met one target, and are in the process of implementing the remaining two.

The third output, “the costs and benefits of long-term lion management equitably distributed,” is a socio-economic output to establish agreement and implementation of area-specific lion management plans with identified stakeholders in each wildlife region, and implementing a transparent mechanism to equitably distribute lion-related income to identified stakeholders.” The specific targets for this output are: complete an inventory of stakeholders directly affected by lion conservation, deliver appropriate training and capacity building to prioritized stakeholders, agree to and implement collaboratively developed area-specific lion management plans with identified stakeholder groups in each wildlife region within 5 years, and implement transparent mechanisms to equitably distribute lion-related/generated income to identified stakeholders (groups and/or communities). Current information from ZPWMA shows that they have identified key stakeholders and assessed the financial impacts of lion conservation and the magnitude of socio-economic impacts on each stakeholder group. Limited training has been undertaken for representative stakeholders in Hwange, Matusadona, and Gonarezhou. ZPWMA has also implemented an adaptive management program across four wildlife regions and are in the progress of developing and implementing area-specific lion management plans with identified stakeholder groups. According to ZPWMA, a Management Plan for Hwange has been approved. However, the Service does not have a copy of this plan. With these updates, ZPWMA has made progress toward this output’s targets.

The strategy also identifies roles and responsibilities for a number of players in Zimbabwe’s lion conservation efforts. According to the strategy, there is a national lion coordinator that is to coordinate all national activities on lion conservation, research, and management, including census surveys, setting up monitoring needs and coordinating data on human-lion conflicts. The strategy goes on to identify roles for the field stations, wardens, ecologists and utilization units, which are responsible for ensuring compliance with hunting regulations and maintaining safari hunting databases. In addition, the strategy identifies roles for CAMPFIRE, safari operators, and professional hunters to facilitate training and ensure compliance with hunting regulations.

The Conservation Strategy and Action Plan for the Lion in Zimbabwe (ZPWMA 2006) borrows language from the *IUCN SSC Conservation Strategy* (2006). It iterates areas in need of improvement regarding lion conservation in Zimbabwe, including standardized lion census methods and surveys, further mitigating human-lion conflicts, and maximizing benefits for rural communities that live with lions. ZPWMA (2006) notes their intention to review and put in place criteria for age-based identification of male trophy animals, but do not mention if they will be reviewing possible combination strategies. As part of the 2006 lion conservation strategy for eastern and southern Africa, six objectives were established to secure and restore sustainable lion populations, which were housed under the following categories: management, mitigation, socio-economics, policy and land-use, politics, and trade. The strategy was intended to be implemented within 10 years (Macdonald 2016), and Zimbabwe gave an update on progress regarding these objectives in their *Enhancement and Non-Detrimental Findings for Panthera leo in Zimbabwe* (ZPWMA 2016) that also addressed outputs and targets laid out in their 2006 action plan.

Additionally, to mitigate human-lion conflict, the “Long Shields Guardian Programme” was initiated whereby communities are notified of movements of collared lions into their areas via cell phone, and then have the opportunity to take appropriate action, such as moving cattle. In 2013 alone, 1,850 warnings were passed to the “Long Shields.” These actions may reduce the incidents of lions marauding livestock; however, retaliatory killing of lions still occur. Further, as is policy under The Parks and Wildlife Act of 2001, any lions that attack humans or livestock will be lethally eliminated (ZPWMA 2016). Between 2007 and 2013 a total of 1,113 conflict incidents were recorded in the Hwange area in which 915 head of stock were lost to lions.

Hunting and Utilization: Lions are infamously infanticidal (Schaller 1972, as cited in Du Preez et al. 2016), which is often used as an argument against sport-hunting of the species (e.g. Packer et al. 2011), where it is feared that the removal of dominant males causes cub mortality that eventually results in lowered population recruitment and survival (Packer et al. 2009). Infanticide, however, may be less of an issue in terms of sport-hunting if age-appropriate males, past their prime and no longer territorial or with dependent cubs, are harvested (Whitman et al. 2004).

The minimum number of lions that occur in approximately 51,642km² of land in Zimbabwe, where reliable survey data are available, is estimated to be 1,917 (range 1,800 – 2,000), the majority of which occur in western and southern Zimbabwe. When taking this population estimate into consideration, trophy hunting harvests a yearly mean of 2.7% of adult male lions. This figure has decreased since the establishment of age restrictions on lion hunting (ZPWMA 2016).

Trophy hunting of wildlife is legally permitted in safari areas, of which there are 16 in Zimbabwe (ZPWMA 2014). According to the Forest Act, Chapter 19:05, there are 24 gazetted indigenous forest areas in Zimbabwe; within these forest areas, lions may be hunted in the following forests: Fuller, Kazuma, Pandamasuwe, Ngamo, Sikumi, Gwayi, Sijarira, and Gwampa (ZPWMA 2014). In 2013, an adaptive quota management system for lion hunting based on the ages of lions hunted was agreed to in Harare, Zimbabwe, during a meeting hosted by ZPWMA and an independent non-governmental conservation organization (Du Preez et al. 2016). After reviewing aging techniques, attendees at the July 2013 meeting in Harare, Zimbabwe were confident that hunters could be expected to categorize lions as being below or above five years of age. In determining quotas for the following years, operators would be rewarded with increased quotas if they hunted animals of six years or older, would not be penalized if they hunted animals five years of age, but would have quotas cut if they hunted animals younger than five years old or if they failed to complete hunt returns (ZPWMA and Panthera 2014). In 2013, only 28% of lions hunted were five years old or older. In 2015, that figure rose to 77.3% (ZPWMA 2016). According to Hunter et al. (2013), an adaptive quota management system utilizing age-based criteria would not only aid in the prevention of over-harvesting lions, but would also prevent excessively conservative quotas. Further, according to Miller et al. (2016), results indicate that age-based hunting is feasible for sustainably managing threatened and economically significant species such as the lion, but must be guided by rigorous training, strict monitoring of compliance and error, and conservative quotas. No single trait can be relied upon exclusively to precisely age lions. Rather, multiple traits must be examined in combination to cross-validate an individual's age and, according to Whitman et al. (2004), restricting hunting to individuals that are at least six years old is desirable from a biological perspective due to the reduced risk of the loss of pride males and infanticide of cubs associated with the harvest of such individuals (Whitman et al. 2004).

During 2013, operators were requested to submit hunt returns and photos as a trial run to get the adaptive quota system up and running. In 2014, operators were requested to do the same but were informed that the age of the lions hunted in 2014 would determine their lion quotas in 2015 (Du Preez et al. 2016). In 2015, there was a marked increase in the age of lions hunted in Zimbabwe as a whole. The majority of lions hunted were on the cusp of 5-6 years of age but were not older than six years. National hunting offtakes for lions in Zimbabwe from 2013 to 2015 were 29, 42, and 47 respectively (Masterson 2016). It appears these do not include illegal forms of hunting offtake.

Previously, Zimbabwe set quotas for the hunting of female lions. Between 1998 and 2004, Zimbabwe maintained a mean quota of $0.3 \pm 0.1/100 \text{ km}^2$ for female lions; during the same period, actual offtake was lower at $0.08 \pm 0.1/100 \text{ km}^2$, or a mean of 30.6 percent of the quota actually harvested (Loveridge *et al.* 2007). However, females are the most productive portion of a population; if they are removed from a pride, there is inherent risk that dependent cubs will die and the overall breeding success of the pride will be reduced. Zimbabwe discontinued issuing quotas for female lions in 2011 (USFWS 2015). In 2011, Zimbabwe's quota was set at 101 lions; in 2014, it was reduced to 50 male lions following the implementation of age restrictions (Henschel 2015, pers. comm., as cited in USFWS 2015).

In setting adaptive lion quotas, Zimbabwe uses scientific information including spoor surveys, camera traps, and ranger-based sighting. In CAMPFIRE areas, incidences of human-lion conflict are also taken into consideration where survey information is not readily available, when determining quotas for those areas (ZPWMA 2014). The quota setting process involves all stakeholders, including the ZPWMA, landowners, safari operators, and CAMPFIRE managers and their representatives. During the annual quota-setting workshop, presentations are made by the proponents who then make proposals for quotas. Where it is felt that not enough information has been presented, however, a precautionary quota will still be issued (ZPWMA 2014). The Service is not aware of how precautionary quotas are treated after they are issued, or if there is a protocol for obtaining necessary information when a precautionary quota is put in place.

ZPWMA (2016) mentions seven concessions that are leased on five year terms, and how these concessionaires pay a 5 year "right to lease" fee, annual rental, fixed quota fee (payable if animals are shot or not) and a supplementary quota fee that allows additional animals to be bought as needed. It is unclear to what extent Zimbabwe still utilizes fixed quotas, as Du Preez et al. claims fixed quotas are no longer being used by Zimbabwe, but a fixed quota fee is mentioned in ZPWMA (2016). It is also unclear how many animals concessionaires are able to "buy as needed," and how such requests may be accommodated without going over the national quota (ZPWMA 2016).

Between 1999 and 2004, data were collected in and around Hwange National Park that suggested that hunting surrounding the park was having a negative impact on the lion population. Therefore, sport hunting of lions was suspended in the area surrounding the park between 2005 and 2009. Following the lifting of the moratorium, and by implementing stricter monitoring and hunting guidelines through the Hwange Lion Research Project, the overall Hwange lion population has continued to show a positive trend, and is now estimated at over 550 animals (ZPWMA 2015).

CAMPFIRE is the program through which the Zimbabwean Government has developed the management of wildlife resources to communal farmers. As of July 2014, there are at least 58 Rural Districts that have been granted the Appropriate Authority status to manage wildlife resources in their areas; however, according to *Enhancement and Non-Detrimental Findings for Panthera leo*

in Zimbabwe ZPWMA 2016, only 16 are actively engaged in some form of wildlife based land use (ZPWMA 2016). Lions are found in communal areas that are adjacent to major protected areas, and lion hunting is allowed in CAMPFIRE districts (ZPWMA 2014). According to EcoWeb (2015), all income generated by trophy hunting in CAMPFIRE areas was distributed to communities (52%, when they are typically prescribed 55%), rural district councils (RDCs) (44%, when they are typically prescribed 41%), and the CAMPFIRE association (4%). Communities, rather than dividing income by households, typically invest in projects that benefit the communities as a whole, such as schools, clinics, and grinding mills. Councils use funding for patrols, monitoring of hunts, problem animal control, water, and fire management, while the CAMPFIRE association uses their funding to cover administrative costs and representation of the program (EcoWeb 2015). As was agreed upon at the 2013 lion management meeting in Harare, the CAMPFIRE areas in which lions occur are currently exempted from the age restrictions. This approach was adopted as a means of ensuring that impoverished communities obtain the opportunity to benefit from the presence of lions, recognizing the potential negative impacts the species has on the livelihoods of livestock farmers (ZPWMA 2016). According ZPWMA's 2016 response, between 2010 – 2015, lions accounted for 2% of the total income generated from hunts conducted on CAMPFIRE lands and trophy fees accounted for 74% of the total funds generated for CAMPFIRE. Further, U.S. hunters account for 51% of the funds generated from hunting in CAMPFIRE areas during the same period. While hunting is allowed in CAMPFIRE areas, it is unclear if American sport-hunters conduct lion hunts in these areas; if so, the Service is not aware if sport-hunters are exempted by the age restriction in this case, and how this exemption in CAMPFIRE areas is taken into consideration when setting quotas for other portions of the country.

According to the Revised CAMPFIRE Revenue Sharing Guidelines, which were incorporated into the Constitution of the CAMPFIRE Association in 2007, at least 55% of generated revenue from hunting should be devolved to producer communities, no more than 26%, and 15% for management and overhead at the RDC level, respectively, and 4% as a levy to the CAMPFIRE Association. According to an undated document (but presumably produced in late 2014, since it references data from 2014 but does not include any references to 2015 data) produced by CAMPFIRE (CAMPFIRE report undated) at least 10 RDCs comply with the Revenue Guidelines.

According to *The Role of Trophy Hunting of Elephant in Support of the Zimbabwe CAMPFIRE Program – December 2016*, a report the Service received on December 17, 2016, the Reserve Bank of Zimbabwe, in collaboration with relevant stakeholders, has established the Tourism Receipts Accounting System that required all outfitters to submit returns listing the revenue generated for hunting activities. This system has been in place for several years, but required manual analysis of the data to extract information on hunting revenue. In January 2015, to account fully for earnings in the hunting sector, the Reserve Bank of Zimbabwe, in collaboration with relevant stakeholders, introduced the Tourism Receipts Accounting System (TRAS2) a web-based system (TRAS2) that links Safari Operators, ZPWMA Authority, Taxidermists, Shipping Agents, International Marketing Agents, and Reserve Bank. Under this system, all authorized hunts are registered, allowing for the capture of hunting data, such as the origin of clients, value of trophies and hunts, and area hunted, to monitor hunting quota utilization and track hunted trophies. According to the December 2016 report, the Exchange Control Division of the Reserve Bank of Zimbabwe and the ZPWMA are now able to:

1. Assess regional price differentials of similar hunts and the reasons thereof;
2. Present TRAS2 system updates and reports to the users, including international marketing agents;
3. Engage with international marketing agents of sport hunting;

4. Obtain relevant insights on governing of the hunting sector; and
5. Come up with an effective mechanism to fully account for export proceeds from the hunting sector.

The TRAS2 information was utilized in *Enhancement and Non-Detrimental Findings for Panthera leo in Zimbabwe* (ZPWMA 2016) to provide a breakdown of the source of hunting income, and the amount of funds generated by trophy fees by land category, among other insights, and has proven the TRAS2 system's ability to obtain relevant insights on governing of the hunting sector.

Evaluation:

As stated earlier, the Service will evaluate any application in accordance with our threatened species permitting regulations at [50 CFR 17.32](#) and issuance criteria for threatened species permits [[50 CFR 17.32\(a\)\(2\)](#)]. In evaluating each of these criteria based on information available to the Service, we have been able to determine that this impact of a sport-hunted lion trophy animal would qualify for the issuance of the required import permit.

17.32(a)(2)(i): Whether the purpose for which the permit is required is adequate to justify removing from the wild or otherwise changing the status of the wildlife sought to be covered by the permit:

Zimbabwe's lion hunting industry generated 9% of all sport hunting revenue in 2015; 51% was contributed by U.S. hunters during 2010-2015 country-wide, and 90% of the sport hunting market in BVC and SVC from 2005-2015. Even though 9% may not seem like much, lions are a key component of the sport hunting industry, as they are part of the "Big 5" trophies and draw U.S. hunters to Zimbabwe. Based on the information available to the Service, the participation of communities in CAMPFIRE has heralded a reversal in wildlife declines on private land. When the benefits of CAMPFIRE were extended to RDCs, it further aided in the equitable distribution of benefits from trophy hunting to locals, which incentivizes them to conserve the African lion. As mentioned in the case of SVC, without the hunting industry, these wildlife areas, which have become conservation havens in the threat of human encroachment across much of Zimbabwe, would not be economically viable, and therefore would not exist.

There was conflicting information presented to the Service on how many lions were included in the quota in 2015. Du Preez et al. (2016) reports a national lion hunting quota of 85 with 39 hunted; ZPWMA (2016) reports the national lion hunting quota in 2015 was 82 lions, with 49 hunted. When evaluating the lower quota with higher utilization reported by ZPWMA (2016), and taking into consideration the land area of the Parks Estate alone, Zimbabwe did not exceed the best management practice of 0.5 lions/1,000 km²; the 2015 offtake would have accounted for 0.125 lions/1,000 km².

Zimbabwe also has taken into consideration other best management practices, including age-based criteria for an adaptive management strategy, and takes past performance of hunting organizations into consideration when determining future quotas.

Further, sport hunting was essential for the successful transition of the SVC from cattle to wildlife (Du Preez et al. 2016), in that it provided monetary benefits for the conservation of lions and local communities. The BVC donates over 45 tons of meat from sport hunting to the local communities

each year. This meat donation is worth over USD100,000 per year. BVC also supports several schools, clinics, and community projects in the three surrounding districts of Mwenezi, Maranda, and Jopempe. The local community sees a direct benefit from the wildlife in BVC, but is also empowered by job opportunities created both with these community projects, as well as on BVC (Du Preez et al. 2016).

While Zimbabwe's hunting industry generated approximately 8 million in 2015, not all of this is connected to lion hunting or to U.S. hunters. However, lions are a key component of the hunting industry since they are part of the "Big 5" trophies and draw U.S. hunters to Zimbabwe. Based on the information available to the Service, the funds generated by hunting trophies contribute to the ZPWMA's ability to manage the country's lion populations as well as the success of CAMPFIRE. It appears that without the hunting industry, it would not be economically viable to maintain lions. U.S. hunter participation in lion hunts, in and of itself, is not enough to make or break the industry. However, U.S. hunters have played a significant role in the industry in Zimbabwe, previously making up 51% of all hunting in Zimbabwe and 72% of lion hunts within the country. As such, the removal of their participation could have a long-term impact.

Further, the *Strategy and Action Plan* have put into place mechanisms to adequately oversee the harvest of lions in Zimbabwe. With an annual harvest of approximately 85 lions, Zimbabwe is not exceeding the limits identified of 0.5 lions/1,000 sq. km. The objectives of the *Strategy and Action Plan* and the actions and monitoring activities that have been put into place to achieve these objectives should support the adaptive management approach that Zimbabwe has established for managing lions. The Service will continue to monitor the effectiveness of the Strategy and Action Plan, for consideration in future findings.

Therefore, based on the information available to the Service and provided that the reserve where the lion was taken was properly permitted and in compliance with national and local regulations, the purpose for which a permit is being requested is adequate to justify removing the sport-hunted trophy lion from the wild or otherwise changing their status.

17.32(a)(2)(ii): The probable direct and indirect effect that issuing the permit would have on the wild populations of the wildlife sought to be covered by the permit:

The total area under wildlife-based land use and conservation in Zimbabwe amounts to 10.7 million hectares, and represents 27% of the total surface area of the country. Of this, 7.9 million hectares, or 75% of all conservation land in the country, falls under safari hunting as the primary or only source of revenue. With the CAMPFIRE program, private landholders and RDCs are given the opportunity to benefit from the wildlife on their land, including lion, and incentivize them to conserve the species. Sport hunting of lions by U.S. hunters supports the programs in Zimbabwe that provide the opportunity for locals to see value in lions, which in turn conserves the species in the long-term.

A scientifically based quota is the number of a given species that can be removed from a specific population without damaging the biological integrity and sustainability of that population (WWF 1997). However, full implementation and enforcement of the age-based strategy could potentially cause the need for quotas to become irrelevant or eliminated (USFWS 2015). Age restrictions will naturally restrict offtake to a limited number of individuals that meet the age criteria (Loveridge *et al.* 2007, Whitman *et al.* 2004).

Throughout the information provided to the Service, it is clear that Zimbabwe has made strides in their management of their lion populations. Although prior to 2011, Zimbabwe allowed the hunting of lionesses and males under 5 years old, they made significant changes to ensure their hunting program is sustainable. In 2011, Zimbabwe restricted the hunting of female lions. In 2013, they proposed an adaptive age-based setting for hunting quotas. In 2015, the development TRAS2 allowed the country to assess regional price differentials of similar hunts and the reasons thereof; present TRAS2 system updates and reports to the users, including international marketing agents; engage with international marketing agents of sport hunting; obtain relevant insights on governing of the hunting sector; and come up with an effective mechanism to fully account for export proceeds from the hunting sector. Further, Zimbabwe appears to be transparent in their management processes, including their quota setting.

According to CITES trade data and Service records, from 2011 to 2016, there were 223 lion trophies imported to the U.S. from Zimbabwe. Best practice would be to import only male lions, as pointed out by Macdonald (2016), but Zimbabwe has already taken the initiative by placing a moratorium on lioness hunting. The fixed-quota concept, in which hunting quotas had to be paid for upfront before the hunting season begins, and results in poor quality trophies and young animals being hunted, has also been abandoned (Du Preez et al. 2016). Zimbabwe appears to be transparent in their implementation of the age-based adaptive management strategy (USFWS 2015). The adaptive quota management system for lion hunting based on the ages of lions hunted has been accepted and embraced by all stakeholders. This adaptive quota management system has not only led to a reduced national lion hunting quota, but has also resulted in a significant increase in the age of harvested lions to a level that is considered to have a reduced ecological impact (Du Preez et al. 2016).

Between 2005 and 2015, the U.S. market has represented over 90% for the sport-hunting market in both the BVC and SVC. If this market was effectively lost due to an inability of prospective clients to import their trophies, it would become unviable to continue managing BVC as a wildlife area in its current form (Du Preez et al. 2016). Across all CAMPFIRE districts, from 2010 to 2015, there was a total quota of 140 lions, with actual offtake equaling 45 animals. During this same period, U.S. sport hunters apparently accounted for 51% of Zimbabwe's sport hunting clients; trophy fees represented 74% of CAMPFIRE income, of which lions play a small role. In 2015, lion sport hunting generated USD753,000 in revenue, which accounts for about 9% of all sport hunting revenue in Zimbabwe that year (ZPWMA 2016).

Evaluating the information provided by the Zimbabwe government and other sources, it appears that the hunting program in Zimbabwe is addressing the three main threats that were identified by the Service when making the determination that the species was threatened with the possibility of extinction. The hunting areas are maintaining habitat for lions and ensuring that there is no further loss, provided that the hunting areas can remain economically viable. In order to maintain a viable population of lions, the parks, safari, and CAMPFIRE areas must maintain biodiversity and a sustainable prey base. Finally, Zimbabwe is actively working to reduce human-lion conflicts and the number of lions killed in retaliation for killing livestock. Therefore, the management of lions within Zimbabwe and the limited hunting of lions contributes to the on-going survival of the species in Zimbabwe.

Provided that the off-take of lions continues to be monitored and the actions identified in the Strategy and Action Plan continues to be implemented, the participation of U.S. hunters in lion hunts would provide an indirect benefit to wild populations by helping to support the reserves where lions are found. Therefore, based on the information available to the Service, the probable direct and indirect effect that issuing an import permit for a legally hunted lion would have on the species would be positive.

17.32(a)(2)(iii): Whether the permit, if issued, would in any way, directly or indirectly, conflict with any known program intended to enhance the survival probabilities of the population from which the wildlife sought to be covered by the permit was or would be removed:

As stated above, Zimbabwe is monitoring and controlling the harvest of lions through permitting under their regulations and through the Strategy and Action Plan. The issuance of import permits for lions legally hunted under these authorities would not conflict with any programs intended to enhance the survival probability of the species in Zimbabwe. If import permits for sport hunted lion trophies from Zimbabwe were to be issued, it would work in favor of, not against, the principal acts governing lion conservation in Zimbabwe. Furthermore, sport hunting opportunities for hunters in CAMPFIRE districts would help local communities realize the value in conserving the African lion.

Therefore, based on the information available to the Service, the issuance of an import permit for a legally hunted lion does not conflict with known conservation programs and rules.

17.32(a)(2)(iv): Whether the purpose for which the permit is required would be likely to reduce the threat of extinction facing the species of wildlife sought to be covered by the permit:

With limited, controlled off-take of lions in a manner that would maintain sustainability, the legal hunting activities that U.S. hunters would be involved in would contribute to reducing the threat of extinction of lions. This off-take must be monitored to ensure that it is sustainable and that, to the extent possible, normal lion behavior and ecology are not negatively impacted. It appears that the permitting activities under Zimbabwe's laws and CITES, as well as the implementation of the adaptive age-based lion quota, and a continuation of implementation of the outputs in the *Strategy and Action Plan* will ensure the long-term survival of lions. The utilization of hunters to manage the populations on the reserves is an important element of the success of lion management in Zimbabwe.

Therefore, based on the information available to the Service, the issuance of an import permit for a legally hunted lion will likely reduced the threat of extinction facing lions in Zimbabwe.

17.32(a)(2)(v): The opinions or views of scientists or other persons or organizations having expertise concerning the wildlife or other matters germane to the application:

From reviewing comments made during the listing process for lions, as well as information obtained through personal conversations and literature, there is general agreement that hunting, done properly and well managed, would not have an adverse effect on lion populations. Numerous researchers have stated that, while they may not support hunting in general, they see that benefits can be received through a scientifically based hunting program for lions.

Based on the information available to the Service, there is general support by scientists and other persons or organizations having expertise concerning lions that the legal harvest of lions, and the subsequent import of this trophy, would not have an adverse effect on the species, but would further efforts to conserve the species in the wild into the future.

17.32(a)(2)(vi): Whether the expertise, facilities, or other resources available to the applicant appear adequate to successfully accomplish the objectives stated in the application:

While, over the years, ZPWMA has failed to generate adequate revenue for its operations, U.S. sport hunters play a large role in the hunting industry of Zimbabwe. The Service anticipates that by granting the importation of sport-hunted lion trophies, there would be an increase in funds provided to Zimbabwe's conservation initiatives through this program by U.S. sport hunters. ZPWMA has also been forthcoming in involving relevant stakeholders as well as independent researchers and non-governmental organizations in determining best management practices.

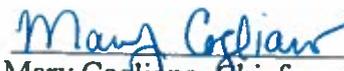

Therefore, based on the information available to the Service, Zimbabwe has the proper expertise, facilities, and other resources to accomplish the objectives laid out in their *Strategy and Action Plan* to enhance the propagation and survival of the species, partly through the utilization of funds generated by U.S. hunters' participation in lion hunts throughout the country.

Conclusion

Given the status of lions within Zimbabwe at the time Mr. McGinnis' conducted his hunt, and the level of management and oversight provided to lions at that time, the Service is able to find that the harvest and import of Mr. McGinnis' sport-hunted trophy taken in Zimbabwe on May 20, 2017, meets the purposes of the Act. As stated earlier, each application received by the Service for the import of a sport-hunted trophy lion from Zimbabwe will be evaluated on a case-by-case basis. The applicant must have hunted on a properly licensed hunting area within Zimbabwe. The Government of Zimbabwe must continue to implement the *Strategy and Action Plan* in the manner identified in the documents. The on-going adaptive management and limited off-take of lions is important to the survival of lions in Zimbabwe. Although the Service is able to make a finding that the import of this lion meets the enhancement criteria under the Act, the Service will continue to monitor the status and management of the lion in Zimbabwe. Noting that Zimbabwe's last management plan for lion was in 2006, the Service would like to see a current and updated plan that has been established as the national plan and disseminated across the country. The *Enhancement and Non-Detrimental Findings for Panthera leo in Zimbabwe* (2016), mentions a Management Plan for Hwange National Park; a copy of that and any other developed management plans will be considered in the future. Although Zimbabwe has made progress on their 2006 *Strategy and Action Plan*, the Service will need to be continually updated on further progress of the outputs or targets. Lastly, the Service will also need to review any updates to the quota setting process.

Therefore, with the information available to the Service at the time Mr. House conducted his hunt, and in accordance with the issuance criteria laid out above, the Service is able to make a determination that the import of this lion will enhance the propagation or survival of the species. Therefore, the Service is able to authorize the import of one male lion trophy taken in Zimbabwe, to Mr. Michael (b) (6) McGinnis, (b) (6) Lyndhurst, Virginia.

LYNDHURST, VA (b) (6)
U.S.A.

Authority: Statutes and Regulations: 50 CFR 17.40(r).

Location where authorized activity may be conducted:
IMPORT THROUGH ANY PORT LISTED IN 50 CFR 14.12

Reporting requirements: Not applicable

Authorizations and Conditions:

- A. Authorized to import the sport-hunted trophy of one male African lion (*Panthera leo melanochaita*), taken in Zimbabwe for the purpose of enhancement of the survival of the species.
- B. Specimen may not be sold or transferred for any financial remuneration.
- C. Trophy must have been taken during the 2017 hunting season.
- D. Trophy must be accompanied by a valid trophy permit or hunting license issued by the government of Zimbabwe for the 2017 season.
- E. Trophy must be accompanied by a valid Convention on International Trade in Endangered Species (CITES) Appendix II export permit, source code "W", issued by the Management Authority of Zimbabwe.
- F. General conditions set out in Subpart D of 50 CFR 13, and specific conditions contained in Federal regulations cited above, are hereby made a part of this permit. All activities authorized herein must be carried out in accord with and for the purposes described in the application submitted. Continued validity, or renewal of this permit is subject to complete and timely compliance with all applicable conditions, including the filing of all required information and reports.
- G. The validity of this permit is also conditioned upon strict observance of all applicable foreign, state, local, tribal, or other federal law.
- H. Valid for use by permittee named above.
- I. Acceptance of this permit serves as evidence that the permittee understands and agrees to abide by the "General Permit Conditions" (copy attached).

Type of Activity

**IMPORT OF SPORT-HUNTED TROPHIES OF BONTEBOK
TROPHIES FROM SOUTH AFRICA**

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. You may find instructions on how to make your application complete and help avoid unnecessary delays at the following link .

Section A: Complete if applying as an individual

1.a. Last Name Bennett		1.b. First Name Roger		1.c. Middle Name/Initial (b) (6)	1.d. Suffix
2. Date of Birth (mm/dd/yyyy) (b) (6)		3. Telephone Number (b) (6)		3.a. Alternate Telephone Number N/A	

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)			
2. Tax identification no.		3. Description of business, agency, Tribe, or institution			
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial		4.d. Suffix	
5. Principal officer title		6. Primary contact name			
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address		

Section C: All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room # no P.O. Boxes) (b) (6)				
State TN		1.d. Zip code/Postal code (b) (6)	1.e. County/Province	1.f. Country USA
2.a. Mailing address (include if different than physical address, include name of contact person if applicable) Molex Group LLC Attn: Allison Phillips 1114 US HWY 31 South, Suite D				
2.b. City Athens	2.c. State AL	2.d. Zip code/Postal code 35611	2.e. County/Province Limestone	2.f. Country USA

Section D: All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount identified on page 2, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – attach documentation of fee exempt status as outlined in instructions. [50 CFR 13.11(d)]	
2. Certification I hereby certify that I have read and am familiar with the regulations contained in Title 50 Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.	
Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)	
(b) (6)	05/15/2018
Please continue to next page	

IMPORT OF SPORT-HUNTED BONTEBOK TROPHIES from South Africa

Note 1: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit to the address on page one.

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form ([3-200-52](#)) and return your original permit with that form.

Note 3: The bontebok is listed as endangered under the Endangered Species Act. Applications for endangered species permits must be published in the Federal Register for a 30-day public comment period. Allow at least 90 days for the application to be processed.

Note 4: This application can only be used if you have hunted/will be hunting in South Africa. If you have or will be hunting in a different country, please use form [3-200-20](#)

Note 5: *Sport-hunted trophy* is defined at [50 CFR 23.74](#) as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.
2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?
Allison Phillips PH: 256-233-5905 EMAIL: aphillips@molexcompany.com
3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. How many Bontebok (*Damaliscus pygargus pygargus*) are you applying to import? Quantity: 1
- a. At the time of the application, the specimen(s) is:
- Alive Dead
- b. What is the approximate date of proposed take? 11/09/2016
- c. What is the date you took the animal? 11/10/2016
- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
5. ENTER the name and address of the landowner on whose property the bontebok was or will be taken:
- Owners name: Cedric Roberts
Farm Name: Viljoenshof
District: Lejweleputswa
Address: Box 203
City: Hoopstad, Boshof
State/Province: Free State of Province
Country, Postal Code: South Africa, 9479
- Please be aware that the bontebok is listed in Appendix II of CITES. As such, you must obtain a CITES export permit from South Africa. If you are not exporting the trophy from South Africa directly to the United States, you will need to obtain a CITES Re-export certificate from the re-exporting country.
6. Attach a signed statement from the landowner giving you permission to cull a bontebok from their captive herd.
7. If available, provide a copy of the landowner's Certification of Registration for the bontebok herd. (Note: this is not a copy of the export permit or certificate issued by a South African province.) In order to meet the criteria for a permit under the Endangered Species Act, the bontebok must be culled from a ranch that has been certified by the Government of South Africa under their bontebok program. If the ranch is not registered, we may be unable to issue an import permit.

- 8. Complete name and address of overseas person or business shipping the trophy to you (this name will appear on the face of the permit).

Name: Katharina Hecker
Business Name: Nico Van Rooyen Taxidermy
Address: A1 De Waal Street
Address:
City: Rosslyn, Pretoria
State/Province: Gauteng
Country, Postal Code: South Africa, 0200

CERTIFICATION STATEMENT (original signature must be provided for either 9 or 10 below)

- 9. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit).

Taxidermist/Broker's signature: _____ Date: _____

- 10. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit).

Applicant's signature: Rogier [REDACTED] Remm Date: 05/15/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from [the list of designated ports](#). If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Subject to the following conditions

Standard Conditions

1. In the case of Black and Blue Wildebeest being kept together, they may not leave the farm alive.
2. The permit is invalid unless all requirements of any other legislation in respect of the act mentioned are complied with.
3. This permit is invalid if it is not signed by the permittee and is not transferable.
4. This permit is only valid in its original form.
5. If you intend to add any game species additional to those specified on this certificate, this Department must be notified in writing.
6. This certificate is only valid for game species as specified on this certificate.
7. A register of alterations in game numbers and marking systems must be kept by the owner on the table provided.
8. This Department must be informed if the fencing/camp as inspected by the investigating officer is altered in any way, or alterations are intended.
9. The certificate is issued subject to fencing specifications as indicated on the investigation report by the inspecting officer.
10. Black and Blue Wildebeest may not be kept in the same area

Type of Activity:
**Import of Sport-hunted Trophies of
Southern African Leopard, African Elephant, and
Namibian Southern White Rhinoceros**

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual			
1.a. Last name BRAIS	1.b. First name KEITH	1.c. Middle name or initial (b) (6)	1.d. Suffix
2. Date of birth (mm/dd/yyyy) (b) (6)	3. Occupation	4. Affiliation/ Doing business as (see instructions)	
5.a. Telephone number (b) (6)	5.b. Alternate telephone number (925) 417 5270	5.c. Fax number (925) 417 0170	5.d. E-mail address import@b.hunter-international.net

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution			
1.a. Name of business, agency, Tribe, or institution N/A		1.b. Doing business as (dba)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
5. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information					
1.a. Physical address (Street address, Apartment #, Suite #, or Room #, no P.O. Boxes) (b) (6)					
1.b. City Miami	1.c. State FL	1.d. Zip code/Postal code: (b) (6)	1.e. County/Province	1.f. Country USA	
2.a. Mailing Address (include if different than physical address, include name of contact person if applicable) -same-					
2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country	

D. All applicants MUST complete	
1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – attach documentation of fee exempt status as outlined in instructions. (50 CFR 13.11(d))	
2. Do you currently have or have you ever had any Federal Fish and Wildlife permits? Yes <input type="checkbox"/> If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: _____ No <input checked="" type="checkbox"/>	
3. Certification: I hereby certify that I have read and am familiar with the regulations contained in <i>Title 50, Part 13 of the Code of Federal Regulations</i> and the other applicable parts in subchapter B of Chapter 1 of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001. Signature of applicant/person responsible for permit (No photocopied or stamped signatures) <u>Atty. In Fact for Keith (b) (6) Brais</u> Date of signature (mm/dd/yyyy) <u>04/23/2018</u>

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- (1) Is raw, processed, or manufactured;
- (2) Was legally obtained by the hunter through hunting for his or her personal use;
- (3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- (4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: 1 (Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: _____ (Import is limited to two per hunter per calendar year)

Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

N/A

b. Date wildlife is to be hunted:

N/A

- c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

N/A

3. **IF THE ANIMAL IS DEAD**, please enter the following:

- a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild: *Block L9 of the Niassa Reserve, Northern Mozambique*
- b. Date wildlife was hunted: *June 19th, 2017*
- c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

Skull, Skin including claws

- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

*Life Form Taxidermy
No 7 Aluminium Road, P.O. Box 763, White River 1240, Mpumalanga, South Africa*

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business *Life Form Taxidermy*
Name: Address: *No 7 Aluminium Road*
Address: *P.O. Box 763*
City: *White River 1240*
State/Province: *Mpumalanga*
Country, Postal Code: *South Africa*

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national**, provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: *[Signature]* Atty. In Fact for Keith (b) (6) Brais Date: 04/23/2018

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: _____ **Date:** _____

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

ANY U.S FISH & WILDLIFE DESIGNATED PORT OF ENTRY.

9. Name and address where you wish the permit to be mailed, **if different from page 1** (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

HUNTER INT'L BROKERAGE SERVICES, INC.
5700 Stoneridge Mall Road, Suite 260
Pleasanton, CA 94588

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please **DO NOT** include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Vanessa Tabugan
Tel# (925) 417 5270 / E-mail: import@b.hunter-international.net

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

27th February 2018

U.S. Fish & Wildlife Services

Attention: FWS Wildlife Inspector

REF: Leopard hunted by Keith Brais in Mozambique

Dear Sir / Madam,

I am Jumbo Moore the Managing Director of Kambako Safaris. Mr Keith Brais successfully hunted a fully mature male leopard within Block A / L9 of the Niassa Reserve in Northern Mozambique in July 2017.

The size of the hunting concession is over 750,000 acres. In the past 5 years, we have been 100% successful on all our leopard hunts and we have never shot a female nor young male leopard. All my PH's use trail camera's to judge the possible cat before it is actively hunted. We have a minimum of 8 game scouts on the ground at any one time and annually we are spending in excess of \$70,000 on anti-poaching.

Block A / L9 does have communities living within it and we are actively trying to educate them about conservation.

Our community development program for the villagers include:

- Employment opportunities of in excess of 40 local people
- Training and passing on of skills to them in which include: law enforcement, animal tracking, skinning, camp running, carpentry, building, road construction and maintenance etc
- 20% of all our animal licence fees collected are deposited into the Community's bank account
- Regular distribution of meat from the game animals hunted to the community

The above points all assist in keeping the community busy and happy and away from poaching.

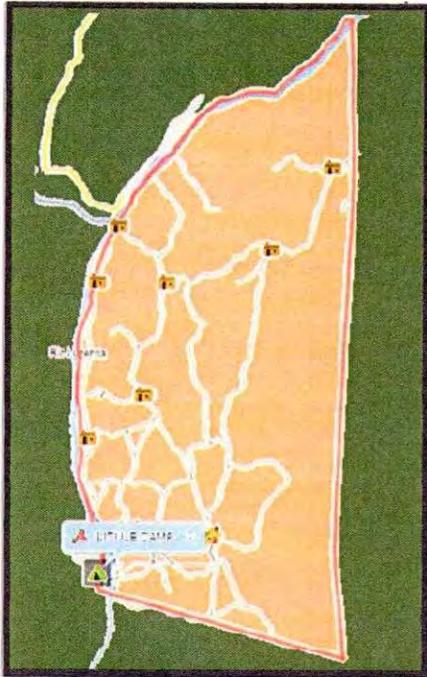

All our game populations (apart from Elephant) have dramatically increased over the past 5 years since we took over the running of Block A / L9. With the numbers of prey species increasing, our cat predator numbers have increased as well.

Kambako Safaris – Block A / L9 is a true example that controlled hunting does allow sustainable utilization of Wildlife to the benefit of the local communities.

Directors

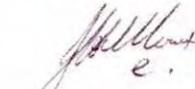

S. Bates, T. Dasher, J. McCollum, J. Moore, C. Williams

Below is a map of the concession area. The white lines are all roads that we have made in the last 5 years. The roads have allowed us to access new areas, have allowed our anti-poaching teams to patrol the concession better and have allowed us to hunt cats all over the concession and not just in small areas around the safari camp.

If you have any questions, please don't hesitate to contact me.

Yours sincerely,

Jumbo Moore
MANAGING DIRECTOR

CUSTOMS POWER OF ATTORNEY
and
Acknowledgment of Terms and Conditions of Service

Social Security number (b) (6)
Date of birth (b) (6)
Know all men by (b) (6) Keith BEAS
residing at (b) (6) MIAMI, FL (b) (6)
(Residential or physical address not accepted)

hereby constitutes and appoints: **HUNTER INTERNATIONAL BROKERAGE SERVICES, INC., its officers, authorized employees and duly appointed sub-agents** to act for and on its behalf as a true and lawful agent and attorney of the grantor named above for and in the name, place, and stead of said grantor from this date and in all Customs Districts, and in no other name to make, endorse, sign, declare, or swear to any entry, withdrawal, declaration, certificate, bill of lading, carnet or other document required by law or regulation in connection with the importation, transportation, or exportation of any merchandise shipped or consigned by or to said grantor, to perform any act or condition which may be required by law or regulation in connection with such merchandise to receive any merchandise deliverable to said grantor.

To make endorsements on bills of lading conferring authority to transfer title, make entry or collect drawback, and to make sign, declare, or swear to any statement, supplemental statement, schedule, supplemental schedule, certificate of delivery, certificate of manufacture, certificate of manufacture and delivery, abstract of manufacturing records, declaration of proprietor on drawback entry, declaration of exporter on drawback entry, or any other affidavit or document which may be required by law or regulation for drawback purposes, regardless of whether such bill of lading, sworn statement, schedule, certificate, abstract, declaration, or other affidavit or document is intended for filing in any customs district:

To sign, seal and deliver for and as the act of said grantor any bond required by law or regulation in connection with the entry or withdrawal of imported merchandise or merchandise exported with or without benefit of drawback, or in connection with the entry, clearance, lading, unloading or navigation of any vessel or other means of conveyance owned or operated by said grantor, and any and all bonds which may be voluntarily given and accepted under applicable laws and regulations, consignee's and owner's declarations provided for in section 485, Tariff Act of 1930, as amended, or affidavits in connection with the entry of merchandise;

To sign and swear to any document and to perform any act that may be necessary or required by law or regulation in connection with the entering, clearing, lading, unloading, or operation of any vessel or other means of conveyance owned or operated by said grantor;

To authorize other Customs Brokers to act as grantor's agent; to receive, endorse and collect checks issued for Customs duty refunds in grantor's name drawn on the Treasurer of the United States; if the grantor is a nonresident of the United States, to accept service of process on behalf of the grantor;

To waive the requirement of other Customs Brokers transmitting a copy of the customs entry CF7501 and the Customs Broker's bill of services directly to the undersigned grantor in accordance with CF 111.36(a) & (b). Such entry summary and bill will be transmitted through Hunter International Brokerage Services, Inc. It is also understood that the agreement between Hunter International Brokerage Services, Inc. and other Customs Brokers does not forbid or prevent the Customs Broker from having direct contact with the grantor in accordance with CFR 111.36(c)(3).

To generally to transact at the customs houses in any district any and all customs business, including making, signing, and filing of protests under section 514 of the Tariff Act of 1930, in which said grantor is or may be concerned or interested and which may properly be transacted or performed by an agent and attorney, giving to said agent and attorney full power and authority to do anything whatever requisite and necessary to be done in the premises as fully as said grantor could do if present and acting, hereby ratifying and confirming all that the said agent and attorney shall lawfully do by virtue of these presents the forgoing power of attorney to remain in full force until notice of revocation in writing is duly given to and received by a District Director of Customs.

The undersigned grantor of this power of attorney hereby agrees to **HUNTER INTERNATIONAL BROKERAGE SERVICES, INC.** Terms and Conditions of Service, which are attached hereto and incorporated herein by reference.

IN WITNESS WHEREOF, the said (Print full legal name) Keith BEAS
has caused these presents to be sealed and signed: (Signature) Keith BEAS
(Capacity) INDIVIDUAL (Date) 3-5-2018

Important note: If you are the importer of record, payment to the broker will not relieve you of liability for Customs charges (duties, taxes or other debts owed Customs) in the event the charges are not paid by the broker. Therefore, if you pay by check, Customs charges may be paid with a separate check payable to the "U.S. Customs Service" which shall be delivered to Customs by the broker. Importers who wish to utilize this procedure must contact our office in advance to arrange timely receipt of duty checks

(Mandatory requirement to validate this POA is to provide a CLEAR copy of your passport or driver's license or have this document notarized and mail to our office at Hunter Int'l., 5674 Stoneridge Drive, Ste 209, Pleasanton, CA 94588, tel (925) 417-5270, fax (925) 417-0170)

ATTN: US Fish & Wildlife Service

This application is being submitted for the reimport of Permit MA04153C-0.

Permit number MA04153C-0 had expired prior to the shipment arriving in the USA at JFK Airport. This was a mistake on the shippers part that I had no control over.

F.W.S.L.E. office at JFK Airport allowed the reexport of the Elephant base on circumstances of the shippers mistake.

I'm submitting ~~for~~ new permit to bring this Elephant back into the USA.

Thank You Mike Baber

Meehan, John

To: Meehan, John
Subject: Re: [EXTERNAL] Prt : MA04153C-0

[EXTERNAL]

Mr. Meehan:

Permit number MA04153C-0 is now considered dead and cannot be reissued. Please submit application form 3-200-20, reference MA04153C-0, and include the documentation that you received from law enforcement. Please explain what has happened in your cover letter so that the person processing the application fully understands the situation.

- All applications for elephants are currently under review. We recently posted a memo to our website (found here: <https://www.fws.gov/international/pdf/memo-withdrawal-of-certain-findings-ESA-listed-species-sport-hunted-trophies.pdf>) explaining that, in response to a recent court opinion, we have withdrawn all of our country-wide enhancement findings under the U.S. Endangered Species Act. This includes findings for African elephant, African lion and bontebok. Going forward, we will make enhancement findings on an application-by-application basis.

To do this, we will use much of the same information that we have used to make country-wide findings, as well as any additional information made available to us, for each application we receive. We are still consulting internally regarding this process and thus have not yet issued or denied any permits for these species since the court ruling.

Respectfully,

George D. Villavicencio

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least 90 days for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

MIKE BARBER

(b) (6)

Prescott Valley AZ (b) (6)

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

African Bush Elephant

b. Sex (if known). Male

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

Kwando Conservatory, Katima Mulilo Namibia

b. Date wildlife was hunted: October 6 2016

- c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Leopard Legend
Lwyk van Vuuren
Box 445 Gutz. Namibia

- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:

Business Name:

Address:

City:

State/Province:

Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted?
- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?
- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

This is the same Elephant that permit MA04153C-0
Info was supplied on.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

- 10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

- 11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: Michael (b) (6) Barber Date: 5/22/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

- 12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. TYPE OF PERMIT
 ELEPHANT IMPORT FROM NAMIBIA

10. LOCATION WHERE AUTHORIZED ACTIVITY MAY BE CONDUCTED
 IMPORT THROUGH ANY PORT LISTED IN 50 CFR 14.12

11. CONDITIONS AND AUTHORIZATIONS:

A. GENERAL CONDITIONS SET OUT IN SUBPART D OF 50 CFR 13, AND SPECIFIC CONDITIONS CONTAINED IN FEDERAL REGULATIONS CITED IN BLOCK #2 ABOVE, ARE HEREBY MADE A PART OF THIS PERMIT. ALL ACTIVITIES AUTHORIZED HEREIN MUST BE CARRIED OUT IN ACCORD WITH AND FOR THE PURPOSES DESCRIBED IN THE APPLICATION SUBMITTED. CONTINUED VALIDITY, OR RENEWAL, OF THIS PERMIT IS SUBJECT TO COMPLETE AND TIMELY COMPLIANCE WITH ALL APPLICABLE CONDITIONS, INCLUDING THE FILING OF ALL REQUIRED INFORMATION AND REPORTS.

B. THE VALIDITY OF THIS PERMIT IS ALSO CONDITIONED UPON STRICT OBSERVANCE OF ALL APPLICABLE FOREIGN, STATE, LOCAL, TRIBAL, OR OTHER FEDERAL LAW.

C. VALID FOR USE BY PERMITTEE NAMED ABOVE.

D. Acceptance of this permit serves as evidence that the permittee understands and agrees to abide by the "General Permit Conditions" (copy attached).

E. Authorized to import the sport-hunted trophy of one African elephant (*Loxodonta africana*), taken in Namibia for the purpose of enhancement of the survival of the species.

F. Specimen may not be sold or transferred for any financial remuneration.

G. U.S. Threatened Species: tusks must be marked as per [50 CFR 17.40(e)]. In accordance with the African Elephant Conservation Act, raw ivory, including sport-hunted trophies that are wholly or partially ivory, may not be re-exported from the U.S.

H. Trophy must have been taken during the 2016 hunting season.

I. Trophy must be accompanied by a valid Convention on International Trade in Endangered Species (CITES) Appendix I export permit issued by the Management Authority of Namibia.

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form ([3-200-52](#)) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at [50 CFR 23.74](#) as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Martin Turchin

(b) (6)

(b) (6)

- 3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

- 4. For each trophy to be imported, provide:

- a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
African Elephant
- b. Sex (if known). *Male*

- 5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

- b. Date wildlife is to be hunted:

- c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

- 6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

*Zimbabwe, Tsholotsho South, near Tsholotsho Town
Area 2, S19 23 644 E 026 53 452*

- b. Date wildlife was hunted:

May 2 2015

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Chapungu Safaris / Lodzi Hunters

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Matabeleland Taxidermist
16 Birmingham Rd
Belmont Bulawayo Zimbabwe

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Matabeleland Taxidermist
Business Name: 16 Birmingham Rd
Address:
City: Belmont
State/Province: Bulawayo
Country, Postal Code: Zimbabwe

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

I hunted with Lodzi Hunters. Attached is a description of their conservation efforts and community perpetuating which is significant. This was one of the reasons I elected to hunt with them

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

See A Above

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

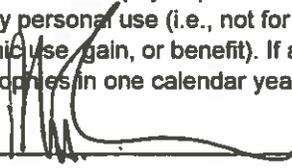

- 10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

- 11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature:  _____ Date: 5/20/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

- 12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from [the list of designated ports](#). If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Spotlight on Tsholotsho South CAMPFIRE Area in the aftermath of the 2013 Cyanide Poisoning of Elephant

Hwange National Park's eastern boundary, which stretches for over 220kms, is maintained with the co-operation of adjacent communities. CAMPFIRE Communities in Bullilima district from Point 222 at corner with Botswana, all the way northwards through Korodziba/Makona in Tsholotsho, connecting to the Ngamo Forest boundary, provide an important conservation buffer zone. Tsholotsho district was granted Appropriate Authority Status for the management of wildlife in 1991, and has 11 Wards that benefit from the CAMPFIRE Programme. 

Although human and wildlife conflict is high, local communities have voluntarily maintained the buffer area between the park boundary and the area of human settlement from which they benefit from the sustainable utilization of wildlife under CAMPFIRE.

Tsholotsho district has two safari hunting areas: Tsholotsho North (170 000ha) and Tsholotsho South (240 000ha). Lodzi Hunters operates in the south, comprising Wards 1, 7, 8, 10, and 21, where the conservation of wildlife has made significant impact on the lives of people. Below we explain how this is possible for an area that hit local and international news headlines just over three years ago following the cruel poisoning of over 100 Elephants.

What most media reports missed about this first major poisoning incident in Zimbabwe is that in fact, it was Lodzi Hunters anti-poaching scouts, after only 4 months in the area that uncovered the catastrophe of the Cyanide poisoning. In the initial 8 months of its contract (April to December 2013) Lodzi Hunters conducted 120% of the anti-poaching logistics in the South Eastern section of Hwange National Park, in addition to the Tsholotsho South CAMPFIRE area. This effort also catalyzed and galvanized other support efforts and donations to the Park from the private sector e.g. Land Rovers for ranger patrols.

Lodzi Hunters have maintained a 10 man anti-poaching team in the area to this day, which has removed over 1 000 wire snares since 2013, and works closely with Parks anti-poaching patrol teams.

No new snares have been found in the area in the past year, and this is testimony to the effectiveness of this anti-poaching effort.

Lodzi Hunters have maintained a 10 man anti-poaching team in the area to this day, which has removed over 1 000 wire snares since 2013, and works closely with Parks anti-poaching patrol teams. No new snares have been found in the area in the past year, and this is testimony to the effectiveness of this anti-poaching effort.

Plains game populations in the Tsholotsho South CAMPFIRE area are visibly recovering. There is now a pack of 10 Wild Dogs frequenting the area; these were never seen in this area since 1996. This is living proof that the plains game is on the increase, as Wild Dogs need prey to hunt.

Lodzi Hunters won the tender to hunt in Tsholotsho south in 2013. Communities have their own bank accounts and receive cash from the operator under a "CASH DIRECT TO THE COMMUNITY" system. This is done so the community sees what an Elephant is worth to them, the owners of that Elephant.

The current annual quota in the Tsholotsho South CAMPFIRE concession has a Trophy Elephant quota of 12 to 14 animals. On average, 13 Elephants are hunted, and the community gets 60% of the Income paid as Concession Fees and Trophy Fees. The remainder goes to Tsholotsho Rural District Council (36%) and CAMPFIRE Association (4%).

Tsholotsho district generates more from trophy Elephant sold to foreign hunting clients than any other CAMPFIRE area (i.e. includes hunting days, food and drinks, a Professional Hunter and 4x4 Vehicle and the trophy fee). Tsholotsho brings a huge amount of value to the Elephant as a trophy animal. The current trophy fee for a trophy Elephant bull is nearly USD 20 000.

However, district has also been affected by declining hunter arrivals due to negative perceptions about community benefits from wildlife, which animal welfare groups are using to petition key global markets for wildlife products, resulting in the imposition of bans on elephant and lion trophy imports, and even airline embargoes on trophies as means of banning hunting in general.

Tsholotsho South Hunting Concession Actual Income Distribution: 2013-2015

		2013	2014	2015
RDC		116,653.00	95,806.00	81,623.00

WARD 7	807	27,083.00	23,948.00	21,217.00
WARD 8	1741	28,019.00	23,948.00	12,612.00
WARD 10	718	28,019.00	29,974.00	20,834.00
WARD 21	439	28,019.00	23,948.00	21,374.00
Total beneficiaries and income to communities	4444	136,020.00	125,766.00	93,058.00

Lodzi Hunters are engaged in a massive, aggressive and beneficial community social responsibility programme. Over the past three and a half years, about half a million US dollars in direct cash has been spent on transport - for food (600 tons of maize), building supplies, river sand (500 tons), school children for sports and cultural events, and for the local community and the two local chiefs in general; water - drilling of boreholes and fixing and rehabilitating pumps and diesel engines, fixing and clearing out silted pans and broken dams; roads - construction of new and rehabilitating old roads; education - sponsoring school prize giving occasions, both for the event and actual prizes for pupils, sponsoring 16 pupils yearly school fees; food and drought relief - establishing grinding mills in the community, emergency livestock stock feed and baled grass to the local communities in the desperate drought month, water bowser delivery to areas where boreholes are temporarily out of action (sometimes 30 kilometers delivery distances); funeral assistance - assisting and paying for funeral costs of local community members; health - contributing to building of Rural Health Centers; and assisting with national events i.e. Independence Day, Heroes Day commemorations.

Further, 90% of elephant meat is delivered from the average of 13 trophy Elephant direct to the local community throughout the 5 Wards (i.e. 23 000 kilograms of protein).

Lodzi Hunters also assists Hwange National Park, especially the South Eastern side of the Park, Makona and Josivanini area, and the Zimbabwe Parks and Wildlife Management Authority (ZPWMA) in general with their operations i.e. anti poaching patrols and logistics, transport, re-building of base stations, fuel, aerial reconnaissance and surveys, vehicle repairs and maintenance, and assisting with cleaning out silted pans within the Park.

Wildlife funded CAMPFIRE community projects in Tsholotsho District

Ward	Projects
1	<ul style="list-style-type: none"> • Mono pump system for water provision. • Water engine parts for Nyanganyuni Line, Sihazela, Nintli, Nyadzi Line. • Borehole engine parts for four villages. • Solar pump water system at Gibixhegu and Gwabazabuya Line, in conjunction with safari operator. • Sihazela Primary School classroom block, in conjunction with safari operator.
2	<ul style="list-style-type: none"> • Toilets for headman's courtroom. • Engine belts for borehole repairs at Zamazama, Sizanani, Zwananani and Thandanani villages. • Borehole drilled at Kope Line. • Water pump for water provision.

	<ul style="list-style-type: none"> • Solar pump water system at Dlamini Clinic and Gombalume Primary School Line • Construction of Bhemba Clinic.
3	<ul style="list-style-type: none"> • Borehole drilled and cased at Nyelesi Village, Mtshwayeli and Ntulula. • Borehole at Mashula and Vulashaba Line. • Fifty chairs for Kapane Secondary School. • Classroom block at Mlevu and Mtshwayeli Primary Schools. • A new school under construction at Ntulula Village. • Re-roofed classroom block at Kapane.
4	<ul style="list-style-type: none"> • Classroom block at Dibutibu Primary School • A mini weather station was installed at Dibutibu Line, in conjunction with World Wide Fund for Nature (WWF). • Solar pump water system at Dibutibu Business Centre. • Ten sewing machines for Dibutibu Secondary School. • F14 staff cottage at Siphongweni Primary School. • Water storage tank and stand for Dibutibu dip tank.
5	<ul style="list-style-type: none"> • Building material for classroom block at Sipepa Primary School. • Classroom blocks at Mcetshwa, Jakalasi, and Gwaii Primary Schools. • Rehabilitation of ten blair toilets at Jakalasi Primary School. • Mpindo classroom block, in conjunction with safari operator.
6	<ul style="list-style-type: none"> • School furniture (chairs and desks) for Nkwizhu Primary School for 2 classroom blocks. • Boreholes drilled at Mahlosi, Manyenge, Nkwizhu, Jimila, Tshino Line. • Diesel generator was purchased for Tshino Primary School. • Rehabilitation of Mothers' Waiting Room at Jimila Clinic. • School furniture (50 senior chairs and 25 senior dual desks) for Jimila Secondary Schools. • Tuck shops at Tshino and Zabagwadi Line. • Teachers' cottage at Mahlaba Primary School. • Two classroom blocks at Nkwizhu Primary School.
7	<ul style="list-style-type: none"> • Lister engine and water tank at Pumula Village. • 7km piped water scheme at Gulalikalabill. • Diesel pump engine at Phelandaba Primary School, in conjunction with the safari operator. • Classroom block and teachers cottage re-roofed at Phelela and Mpilo Primary School. • Community Hall and general dealer store constructed at Patalika. • Barrier to ward off elephants away from crop fields was set up at Phelela Line, through GEF/World Bank funded HSBC project.
8	<ul style="list-style-type: none"> • Tshitatshawa Clinic, 99% complete. Staff cottages roofed. • Borehole installed at Tshitatshawa Clinic. • Fencing of Tshitatshawa Clinic. • Solar pump water system at Folosi Line. • Classroom block and tennis court at Mbiriya Primary School. • Borehole at Mbiriya Primary School.
9	<ul style="list-style-type: none"> • Building material for construction of the second wing at Jowa Clinic. • Chief Tategulu's court house. • 30 wheelbarrows, 30 shovels and 30 picks for rehabilitation of dams. • Classroom block constructed at Malindi in Ward 9.
10	<ul style="list-style-type: none"> • F14 staff cottage at Zibalongwe Primary School. • Rehabilitation of classroom block at Zibalongwe Primary School. • Three boreholes at Manganga village, Sikente Secondary School and Mtshina Line. • Maphane community hall. • Sikente Clinic completed.
21	<ul style="list-style-type: none"> • Five pump minder kits. • Six Lister water pump engines. • 5 000 litre water storage tank.

- Borehole at Tshibizina for clinic site.
- Chief Tategulu's court house.

Safari Operator Social contribution

Lodzi Hunters are engaged in a massive and beneficial community social responsibility programme. Over the past three and a half years, about half a million US dollars in direct cash has been spent on transport - for food (600 tons of maize), building supplies, river sand (500 tons), school children for sports and cultural events, and for the local community and the two local chiefs in general; water - drilling of boreholes and fixing and rehabilitating pumps and diesel engines, fixing and clearing out silted pans and broken dams; roads - construction of new and rehabilitating old roads; education - sponsoring school prize giving occasions, both for the event and actual prizes for pupils, sponsoring 16 pupils yearly school fees; food and drought relief - establishing grinding mills in the community, emergency livestock stock feed and baled grass to the local communities in the desperate drought month, water bowser delivery to areas where boreholes are temporarily out of action (sometimes 30 kilometers delivery distances); funeral assistance - assisting and paying for funeral costs of local community members; health - contributing to building of Rural Health Centers; and assisting with national events i.e. Independence Day, Heroes Day commemorations.

Further, 90% of elephant meat is delivered from the average of 13 trophy Elephant direct to the local community throughout the 5 Wards (i.e. 23 000 kilograms of protein). Lodzi Hunters also assists Hwange National Park, especially the South Eastern side of the Park, Makona and Josivanini area, and the Zimbabwe Parks and Wildlife Management Authority (ZPWMA) in general with their operations i.e. anti poaching patrols and logistics, transport, re-building of base stations, fuel, aerial reconnaissance and surveys, vehicle repairs and maintenance, and assisting with cleaning out silted pans within the Park.

No new cases of cyanide poisoning have been recorded in Tsholotsho District this year. Anti-poaching awareness campaigns are regularly conducted. Communities have prioritized the construction of sub-offices for anti-poaching and problem animal control to service hot spot areas around Phelandaba and Mtshwayeli.

The result:

No new cases of cyanide poisoning have been recorded in Tsholotsho District this year. Anti-poaching awareness campaigns are regularly conducted.

Communities have prioritized the construction of sub-offices for anti-poaching and problem animal control to service hot spot areas around Phelandaba and Mtshwayeli.

Please kindly donate and support this conservation effort.

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. You may find instructions on how to make your application complete and help avoid unnecessary delays at the following link: .

Section A: Complete if applying as an individual

1 a. Last Name PRAGER		1 b. First Name RICHARD		1 c. Middle Name/initial (b) (6)		1 d. Suffix N/A	
2. Date of Birth (mm/dd/yyyy) (b) (6)		3. Telephone Number (b) (6)		3 a. Alternate Telephone Number N/A		3 b. E-mail address (b) (6)	

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1 a. Name of business, agency, Tribe, or institution				1 b. Doing business as (DBA)			
2. Tax identification no.				3. Description of business, agency, Tribe, or institution			
4 a. Principal officer Last name		4 b. Principal officer First Name		4 c. Principal officer Middle name/initial		4 d. Suffix	
5. Principal officer title				6. Primary contact name			
7 a. Business telephone number		7 b. Alternate telephone number		7 c. Business fax number		7 d. Business e-mail address	

Section C: All applicants complete address information

1 a. Physical address (Street address, Apartment #, Suite #, or Room #; no P.O. Boxes) (b) (6)									
1 b. City GREENWICH		1 c. State CT		1 d. Zip code/Postal code (b) (6)		1 e. County/Province (b) (6)		1 f. Country USA	
2 a. Mailing address (include if different than physical address; include name of contact person if applicable) (b) (6)									
2 b. City GREENWICH		2 c. State CT		2 d. Zip code/Postal code (b) (6)		2 e. County/Province (b) (6)		2 f. Country USA	

Section D: All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount identified on page 2, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – attach documentation of fee exempt status as outlined in instructions. [50 CFR 13.11(d)]	
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50 Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

IMPORT OF SPORT-HUNTED BONTBOK TROPHIES from South Africa

Note 1: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit to the address on page one.

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form [\(3-200-52\)](#) and return your original permit with that form.

Note 3: The bontebok is listed as endangered under the Endangered Species Act. Applications for endangered species permits must be published in the Federal Register for a 30-day public comment period. Allow at least **90 days** for the application to be processed.

Note 4: This application can only be used if you have hunted/will be hunting in **South Africa**. If you have or will be hunting in a different country, please use form [3-200-20](#) ✓

Note 5: *Sport-hunted trophy* is defined at [50 CFR 23.74](#) as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
- The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

RICHARD PRAGER
(b) (6)

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

RICHARD PRAGER
(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

N/A

4. How many Bontebok (*Damaliscus pygargus pygargus*) are you applying to import? Quantity: 1 (ONE)

a. At the time of the application, the specimen(s) is:

Alive

Dead

b. What is the approximate date of proposed take? 9-15 AUG 2017

c. What is the date you took the animal? 11 AUG 2017

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

KAROO TAXIDERM
15 VAN DER BIJL STREET
GRAAFF-REINET 6280 SOUTH AFRICA | TIM VAN HEERDEN
MANAGER
+2749 892 6151

5. ENTER the name and address of the landowner on whose property the bontebok was or will be taken:

Owners name: JAN PICKARD
Farm Name: RATELFONTEIN
District:
Address: PO. BOX 84
City: RICHMOND
State/Province: NORTHERN CAPE
Country, Postal Code: SOUTH AFRICA 7090

Please be aware that the bontebok is listed in Appendix II of CITES. As such, you must obtain a CITES export permit from South Africa. If you are not exporting the trophy from South Africa directly to the United States, you will need to obtain a CITES Re-export certificate from the re-exporting country.

6. Attach a signed statement from the landowner giving you permission to cull a bontebok from their captive herd.

SEE ATTACHED

7. If available, provide a copy of the landowner's Certification of Registration for the bontebok herd. (Note: this is not a copy of the export permit or certificate issued by a South African province.) In order to meet the criteria for a permit under the Endangered Species Act, the bontebok must be culled from a ranch that has been certified by the Government of South Africa under their bontebok program. If the ranch is not registered, we may be unable to issue an import permit.

SEE ATTACHED

- 8. Complete name and address of overseas person or business shipping the trophy to you (this name will appear on the face of the permit).

Name: **TIM VAN HEERDEN**
 Business Name: **KAROO TAXIDERMY**
 Address: **15 VAN DER BIJL STREET**
 Address:
 City: **GRAAFF-REINET**
 State/Province: **SOUTH AFRICA**
 Country, Postal Code: **6280**

CERTIFICATION STATEMENT (original signature must be provided for either 9 or 10 below)

- 9. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit).

Taxidermist/Broker's signature: _____ Date: _____

- 10. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit).

Applicant's signature:  _____ Date: **5-11-2018**

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from [the list of designated ports](#). If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

GENERAL PERMIT CONDITIONS APPLICABLE

- 1) This permit is not transferable to any individual person or any other legal identity.
- 2) Any alterations to this permit shall immediately render it invalid.
- 3) This permit is deemed valid only:
 - a) in the original format as issued by the Director.
 - b) for the period as specified on the permit.
 - c) once the signature of the holder thereof has been endorsed thereon in ink.
- 4) The Director reserves the right to amend, withhold, withdraw or cancel any permit at any time.
- 5) This permit shall lapse / be deemed invalid when it is lost or destroyed and no copy thereof shall be issued.
- 6) This permit, unless otherwise stated, is valid only within the boundaries of the Northern Cape Province and then specifically only for the property as specified on the permit.
- 7) This permit does not grant the permit holder automatic access to any Protected area, National Park, Provincial Nature Reserve or privately owned land. Any other / further conditions or restrictions that the manager / landowner may stipulate at his / her discretion must also be adhered to.
- 8) The permit holder must at all times while performing any restricted activity have the permit and all relevant documentation in his / her possession.
- 9) Permits must be made available upon request of any authorized person. This person must also be allowed access onto the property at any reasonable time for any inspection needed and can remain on such property as long as it is needed to do the inspection.
- 10) If applicable, the permit holder must within 21 days after performing the restricted activity furnish the Director with a written return as prescribed, with feedback on the results of the activity conducted.
- 11) If applicable, the permit holder shall apply for the renewal of the permit to the Director, on the appropriate application form, at least 3 months prior to the expiry date thereof.
- 12) The holder of this permit shall return the original to The Director: Permit Administration, Private Bag X6102, Kimberley, 8300, within fourteen days from the date of expiry thereof.
- 13) No new permit applications will be processed prior to the return of the original permit, once it has been used or once it has expired.
- 14) This permit is subject to the provisions of any law in force, during the period of validity of the permit, in respect of the specific area to which the permit applies.
- 15) This permit is subject to any applicable norms and standards in existence at the time of issuance of this permit.
- 16) It is the permit holder's responsibility to obtain information on any other legislation or changes thereto and any specifications or permit requirement that may be needed or required from any other department / organization / institute, for any activity as authorized by this permit
- 17) It should be noted that any transgression, failure to render the required reports and or the return of the original permit, can jeopardize any future applications by the permit holder.
- 18) If the holder of this permit contravenes or fails to comply with any permit condition or requirement to which this permit is subject, he or she shall be guilty of an offence.

STANDARD PERMIT CONDITIONS APPLICABLE

HUNTING

1. The permit holder may not allow the use of:

a) a fire-arm having a barrel of a caliber of 6.5 mm (.256 of an inch) or less to hunt any eland, kudu, blue wildebeest, black wildebeest, gemsbok, red hartebeest, roan antelope, sable antelope, Burchell's zebra, Cape mountain zebra, Hartmann's mountain zebra, nyala, or water buck.

b) a fire-arm having a barrel caliber of less than 9.525 mm (.375 of an inch) to hunt any buffalo, elephant, lion, leopard, rhinoceros or hippopotamus

2. When a hunter kills any wild animal, he / she shall, before leaving the above-mentioned property (or if he / she does not leave it, after each days hunt) record in the space provided on the hunting license and / or written permission the particulars regarding the date, species, sex and number of each wild animal, or if it is impossible to distinguish the sex, the total number of each species of such wild animals which has been killed.

3. This permit can only be used and consider being valid after:

a) The landowner has provided written permission to the hunter for the hunt.

b) The landowner has provided written permission to the hunter / client to remove the carcass.

4. Unless authorized in the game farm conditions hereunder or by a special permit to use prohibited hunting methods and / or instruments, the permit holder may not hunt, capture or catch any wild animal

a) by means of fire;

b) by means of poison;

c) by means of aircraft;

d) during the night

e) with the aid of an artificial light, floodlight or spotlight;

f) by means of any trap

g) by means of any snare;

h) by means of a spear, kierrie, stick or any similar device;

i) by means of a blowpipe or similar device;

j) by means of an air gun;

k) by means of a fire-arm which discharges a rim-fire cartridge of a 5.6mm (.22 inch) caliber or smaller caliber;

l) by means of a fire-arm which discharges more than two shots without being manually reloaded;

m) by means of a shotgun, except for the hunting of birds;

n) by means of a bow-and-arrow, cross-bow or similar device discharging an arrow or dart;

o) by means of a set gun or any similar device;

p) by means of darting or any device which injects an intoxicating or a narcotic agent or poison into such animal;

q) which is kept in captivity, confined to a cage, in an enclosure or trapped against a fence where the animal does not have a fair chance of evading the hunter;

r) which is under the influence of any tranquilizing or narcotic immobilizing or similar agent;

s) by the use of a dog, except for the hunting, flashing, pointing or retrieving of birds, or for the purpose of following or searching for any such animal which has been wounded;

t) in the case of birds in or upon any aquatic systems, by the use of a boat for the purpose of chasing or killing such birds;

u) by means of setting a set trap within 10 meters from a common boundary;

v) by luring by means of a simulation or recording of the natural sound made by an animal or by means of bait or scent or any other induced luring method;

w) in an area smaller than the set standard of 400 hectares, as determined by the Director from time to time;

x) any other device of which the use would result in injuring or killing an animal in a way which is not humane;

y) by means of any other animal or bird of prey for the sport of falconry; or

z) by means of a firearm fitted with a silencer or similar noise-reduction device;

provided that in respect of the hunting of :-

i) rodents, excluding porcupines and springhare, the provisions of paragraphs (b), (d), (e), (f), (g), (m), (q) or

ii) any wild animal by a registered veterinary surgeon in the practice of his or her profession, the provisions of paragraph (p) and (q), or

iii) damage-causing animals as specified in Schedule 4, the provisions of paragraphs (d), (e), (f), (g), (p) (q) (r) and (v) shall not apply.

GAME FARM CONDITIONS

BYLAE 1 / ADDENDUM 1

- 1) Any restricted activity, instrument and methods as authorized by the "Game Farm Standing Permit" does not apply to any listed CITES 1 species and / or species listed as Endangered according to the Schedules of the Nature and Environmental Conservation Ordinance 19 of 1974.
- 2) Ordinance 19/1974 Section 36(a) – Rights of the landowner is hereby specified as follows:
 - a) In accordance with Section 33(1) en (2) of Ordinance 19/1974, a motor vehicle or aircraft may be used for the hunting or capturing of a wild animal for management purposes.
 - b) In accordance with the stipulations of Sections 29 of Ordinance 19/1974, the following prohibited hunting methods may be used namely:
 - i. Hunting, culling or capturing with the aid of artificial light.
 - ii. Hunt or capture during day and night.
 - iii. Hunt by means of fire-arm which discharges a rim-fire cartridge of a caliber less than five comma six millimeters (e.g. a .22 fire-arm) only with regard to steenbuck, duiker and protected game birds.
 - iv. Hunting / darting by means of any device which injects an intoxicating or a narcotic agent into such animal. This is only in as far as necessary for management purposes, disease control and the treatment or applying of medical procedures done by a registered veterinary surgeon in the practice of his/her profession. (Please note that any of the so called "Green hunts" are not permitted by this "Game Farm Standing Permit" and ordinary hunting permits must be applied for on an ad-hoc basis.

SPECIAL PERMIT CONDITIONS APPLICABLE

INTEGRATED PERMIT, STANDING PERMIT & REGISTRATION CERTIFICATE

- 1) This permit is an "Integrated Permit", as defined of Chapter 1 and issued in terms of Chapter 2, Regulation 4 of the National Environmental Management: Biodiversity Act, 2004 (Act 10 of 2004): Threatened or Protected Species Regulations, and;
- 2) This permit is a "Standing Permit", as defined of Chapter 1 and issued in terms of Chapter 2, Regulation 18 of the National Environmental Management: Biodiversity Act, 2004 (Act 10 of 2004): Threatened or Protected Species Regulations, and;
- 3) This permit is also a "Registration Certificate", as defined in Chapter 1 and issued in terms of Chapter 3, Regulation 33(1) and (2) of the National Environmental Management: Biodiversity Act, 2004 (Act 10 of 2004): Threatened or Protected Species Regulations.

GAME FARM STANDING PERMIT

- 1) The property mentioned on this "Game Farm Standing Permit", is considered to be adequately enclosed as defined in Chapter 1 Section 2 and issued in terms of Chapter 4 Section 25 of the Nature and Environmental Conservation Ordinance 19 of 1974.
- 2) The property mentioned on this "Game Farm Standing Permit", is considered to be a "Registered Game Farm", as defined of Chapter 1 and in compliance with Chapter 3 of the National Environmental Management: Biodiversity Act, 2004 (Act 10 of 2004): Threatened or Protected Species Regulations.
- 3) The property mentioned on this "Game Farm Standing Permit", is considered to be a "Registered Wildlife Trader", as defined of Chapter 1 and in compliance with Chapter 3 of the National Environmental Management: Biodiversity Act, 2004 (Act 10 of 2004): Threatened or Protected Species Regulations.
- 4) If any of the following species appear on the "Game Farm Standing Permit", then the lifting of restricted activities is not applicable and such species is only listed for record purposes namely; Scimitar-horned Oryx, Arabian Oryx, Addax, Cape Mountain Zebra, Black-and White Rhinoceros, Oribi, African wild dog, Cheetah, Lion and Hyaenas. Please note that according to the departments approved translocation policy exotic animals can only be hunted or exported back to its country of origin.
- 5) No exemption for any restricted activity is applicable for the species as mentioned in paragraph three (3).
- 6) The permit holder must with sufficient notice to the Director, before any activity commences, apply on the prescribed application form, for a normal "ORDINARY Permit" to use any prohibited instrument or method or conduct any restricted activity with the species as mentioned in paragraph three (3). Such permit applications will be handled on ad hoc basis in compliance with new national legislation and policy guidelines.
- 7) The "Game Farm Standing Permit" authorizes the permit holder:
 - 7.1) to issue a "Game Farm Hunting Permit / Permission" to a hunter;
 - 7.2) to allow the hunter to hunt the applicable species on such property;
 - 7.3) to sell the applicable species to a hunter.

GAME FARM HUNTING PERMIT / PERMISSION

- 1) The document herein referred to as a "Game Farm Hunting Permit / Permission" will be considered to be a "Game Farm Hunting Permit" as defined in Chapter 1 and 3 of the National Environmental Management Biodiversity Act, 2004 (Act 10 of 2004); Threatened or Protected Species Regulations as well as a "Written Permission" and "Donation Document" as stipulated Section 39 and 41 of the Nature and Environmental Conservation Ordinance 19 of 1974.
- 2) The "Game Farm Hunting Permit / Permission" is only applicable for the particular species and specific property, as specified on the "Game Farm Standing Permit".
- 3) The permit holder is authorized to copy the "Game Farm Hunting Permit / Permission" document, as and when he / she may find need thereof.
- 4) The permit holder must allocate a series number for each "Game Farm Hunting Permit / Permission" issued by him / her, starting at number 0001 followed by the applicable year, e.g. 0001/2008.
- 5) The permit holder must keep record of all "Game Farm Hunting Permit / Permission" documents issued by him / her, in a file or register, according to the series numbers allocated per year.
- 6) The permit holder must BEFORE the hunt / selling / donation:
 - 6.1) complete the hunter's or recipients particulars;
 - 6.2) complete the species, sex and number of animals to be hunted / sold or donated;
 - 6.3) sign and date each "Game Farm Hunting Permit / Permission" document that he / she issues;
 - 6.4) hand over the original of such document to the hunter or recipient;
 - 6.5) maintain a copy for record purposes.
- 7) The permit holder must AFTER the hunt / sale / donation:
 - 7.1) indicate on the original document that was issued and all copies thereof, the species, sex and number of animals successfully hunted / wounded or lost / sold or donated;
 - 7.2) sign and date the declaration as indicated on the "Game Farm Hunting Permit / Permission".
- 8) If the hunter is not a South African citizen (i.e. foreign client) then the permit holder must also complete the particulars of the Hunting Contractor and Professional Hunter involved.
- 9) The permit holder must on an annual basis, at the end of December of each year, submit to the Director, a copy of each "Game Farm Hunting Permit / Permission" issued by him / her.
- 10) If the permit holder fails to comply with any of these conditions the privilege to issue "Game Farm Hunting Permit / Permission" will be withdrawn immediately.
- 11) The "Game Farm Hunting Permit / Permission" authorizes the hunter or recipient:
 - 11.1) to buy and or hunt the animal, and subsequent to the hunt / purchase or receipt;
 - 11.2) to field dress, process, and transport the carcass;
 - 11.3) to temporarily possess the dead specimen or derivative thereof, for a maximum period of 1 (one) year calculated from the day of the hunt / purchase / receipt.
- 12) The hunter or recipient must, at least 3 (three) months before the expiry of the 1 (one) year period, apply for a POSSESSION Permit, from the Director or applicable provincial department's issuing authority, in his / her province of residence, if still in possession of any carcass, derivative, part, specimen or trophy of the animal successfully hunted / purchased / received. The hunter or recipient must return the original document together with his application for a possession permit.
- 13) The holder of such possession permit must on an ad hoc basis, apply for an ORDINARY Permit to carry out any additional / other restricted activity with any such specimen.

PERSONAL EFFECTS PERMIT / PERMISSION

- 1) The document herein referred to as a "Game Farm Hunting Permit / Permission" will be considered to be a "Personal Effects Permit / Permission" as defined in Chapter 1 and 3 of the National Environmental Management Biodiversity Act, 2004 (Act 10 of 2004); Threatened or Protected Species Regulations as well as a "Written Permission" and "Donation Document" as stipulated Section 39 and 41 of the Nature and Environmental Conservation Ordinance 19 of 1974.
- 2) The permit holder may only issue a "Personal Effects Permit / Permission" to a hunter or recipient for dead specimens originating from his / her property..

Ratelfontein Private Game Reserve

Client, Arrival, Departure, Hunting Outfitter, Professional Hunter, Hunting Weapon, Hunting Method, Species Hunted, Hunting Period table

DECLARATION BY LANDOWNER / PERMIT HOLDER:

- a) I hereby certify that the above mentioned hunter, legally hunted on the above mentioned farm or property, during the above mentioned period, the animal/s as specified in the table above.
b) I hereby authorize the above mentioned hunter to buy, to remove, to convey or transport the carcass / specimen from the above mentioned farm or property, to his / her residential / physical address.
c) I hereby donate / give the carcass / specimen to the above mentioned hunter / client.

Signature - Landowner / Permit Holder and Date

DECLARATION BY HUNTER:

- I hereby take note of the following:
a) that I can buy and hunt the above mentioned animals from the landowner.
b) that I am allowed to field dress, process, and transport the carcass and to temporarily possess the dead specimen or derivative thereof, for a maximum period of 1 (one) year calculated from the day of the hunt.
c) that I must at least 3 (three) months before the expiry of the 1 (one) year period, apply for a POSSESSION permit, from the Director or applicable provincial department issuing authority, in my province of residence, if still in possession of any carcass, derivative, part, specimen or trophy of the animal successfully hunted.
d) that I will return the original "Game Farm Hunting Permit / Permission" together with my application for a possession permit.

Re: Applications for Permits to Import Sport-Hunted Trophies

Dear Chief Cogliano:

Enclosed please find three applications for permits to import sport-hunted trophies:

- The first applicant is hunting a lion in Zambia with Mulimo Safaris. In this 3,600 km² concession in a Game Management Area (GMA), hunting revenues are used to pay scout salaries to protect the habitat and prey, and to fund community projects. The lion population and prey species are increasing due to the operator's anti-poaching. Patrols occur year-round, include a staff of >20, and average >\$50,000 per year in salaries, equipment, rewards, and other expenses. Poaching incidents have declined since this operator leased the concession. The operator also invests in education, healthcare, construction, water infrastructure, and more to improve the livelihoods of 1,000 people living in the GMA. Please see attached information from Mulimo Safaris and consider this information, and information in the DMA's files regarding the benefits of lion hunting in Zambia including information previously submitted by Conservation Force and Zambia's Department of National Parks and Wildlife (DNPW), in making a positive enhancement finding for this applicant.
- The second applicant is hunting a lion with Impanga Safaris in the Lumimba GMA in Zambia. This operator protects a 2,000 km² concession subject to a written agreement with the DNPW and the local Community Resource Board (CRB). Thirty-five percent of the concession fee and half the trophy fees are distributed to the CRB. These funds are used for wildlife protection and livelihood improvement. The operator pledges \$14,000 in projects to the CRB per year. Further, 80% of this operator's staff is from the local community. The operator also invests heavily in anti-poaching and recorded 283 patrol days in 2016. Scouts successfully arrested ten poachers, among other results. Please see the report from Impanga Safaris and consider this information, and information in the DMA's files regarding the benefits of lion hunting in Zambia including information previously submitted by Conservation Force and the DNPW, in making a positive enhancement finding for this applicant.
- The third applicant is hunting an elephant with Charlton McCallum Safaris (CMS) in Zimbabwe. We have previously provided extensive information about CMS and their anti-poaching unit, the Dande Anti-Poaching Unit (DAPU). Attached please find two recent DAPU reports. Please consider all information regarding CMS and DAPU, as well as the extensive information and responses to DMA information requests submitted by Zimbabwe's Parks and Wildlife Management Authority, in making a positive enhancement finding for this applicant.

Please do not hesitate to contact us if you have questions about these applicants or need further information.

Sincerely,

Regina Lennox

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my application for a permit to import a threatened-listed, wild-managed African Elephant.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my elephant trophy at the following address:

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name Evans		1.b. First Name Milton		1.c. Middle Name/Initial (b) (6)	1.d. Suffix
2. Date of Birth (mm/dd/yyyy) (b) (6)		3. Telephone Number		3.a. Alternate Telephone Number	
4. E-mail address					

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)			
2. Tax identification no.		3. Description of business, agency, Tribe, or institution			
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/Initial	4.d. Suffix		
5. Principal officer title		6. Primary contact name			
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address		

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (b) (6)					
1.b. City Waxahachie	1.c. State Texas	1.d. Zip code/Postal code (b) (6)	1.e. County/Province	1.f. Country USA	
2.a. Mailing address (include if different than physical address, include name of contact person if applicable) (b) (6)					
2.b. City Waxahachie	2.c. State Texas	2.d. Zip code/Postal code (b) (6)	2.e. County/Province	2.f. Country USA	

Section D: All applicants MUST complete

<p>1. Attach the nonrefundable application processing fee in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee--attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].</p> <p>2. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50 Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.</p>

E. IMPORT OF SPORT-HUNTED TROPHIES (*Appendix I of CITES and/or ESA*)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least 90 days for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Same as on page 1

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Milton (b) Evans
(b) (6)

Conservation Force 504-837-1233
CF@conservationforce.org

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Loxodonta Africana *African elephant*

b. Sex (if known). Male

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Zimbabwe, Dande North Hunting Concession, (no nearby city)

b. Date wildlife is to be hunted:

05/17/2018 to 05/30/2018

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Charlton McCallum Safaris, PH Myles McCallum

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

b. Date wildlife was hunted:

- c. Name of hunting outfitter, safari company, or professional hunter you hunted with:
- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:

Business Name:

Address:

City:

State/Province:

Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.
- a. Do you have any information regarding the population status or trend data on the species hunted?
- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

Daily rates of US \$1200.00 per day, trophy fee if successful of \$15,000.

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

Charlton McCallum Safaris provided local villages over 36,000 pounds of corn in March and April 2018 to compensate for crop destruction by elephants, to help prevent villagers from killing the marauding elephants.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

- 10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

- 11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: Mr. [REDACTED] Evans Date: 5/10/18

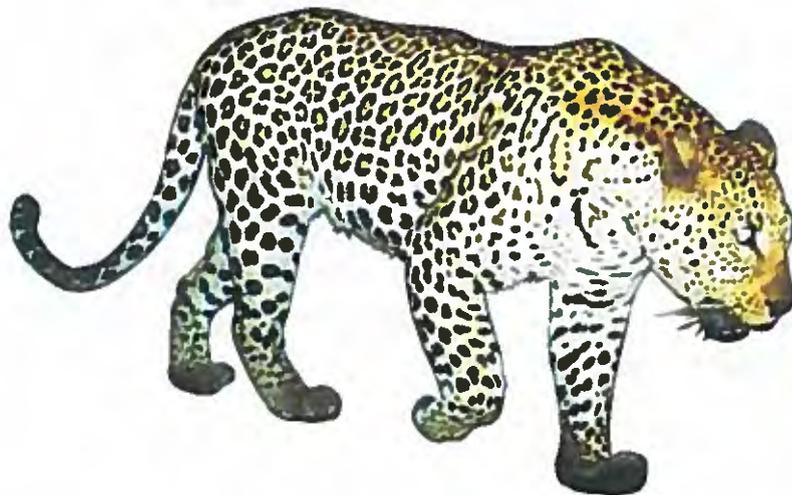

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

- 12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

DAPU End of year Newsletter 2017

Charlton McCallum Safaris

10 January 2018

DAPU
DANDE ANTI POACHING UNIT

visit us at www.dapuzim.com

Dear Friends,

Thank you all so much for your unwavering support. DAPU has continued to build and evolve consistently throughout 2017. Total recorded snare yields, elephant poaching and illegal netting for the year 2017 are the lowest since the inception of DAPU. To be precise, since 2014 snaring has been reduced by 70% and poached elephants by 66%. We have recorded poached elephants since 2010, and whilst our 2010 and 2011 numbers are not perfectly accurate Elephant poaching has been reduced by 92% or from a high of 40 lost in 2010 and a low of 3 lost in 2017.

We are now in the wet season, and rainfall has been scarce and late. Unfortunately that means unless we get good late rains, then 2018 could be a busy year for DAPU simply because local villagers could be very hungry indeed.

We have continued to meticulously document all of our support, deployments, wins and losses and here we share a summary with everyone who so graciously and generously supported all of our efforts both financially and in kind. As we grow from strength to strength we look forward to your continued support.

With Regards,

Myles E. McCallum
James D. Charlton

1. Changes

As mentioned in previous reports, we have added Peter Solomon and Owen Zwiwanza to the management side of DAPU. Both go on patrols regularly in order to keep everyone honest.

CMS did a fair number of hunts in the Charara Safari Area in 2017 and we hope that we will continue with this into the future. Charara is a truly beautiful area with great promise and we have committed to a long-term plan for the area.

We had the one disciplinary issue in second period, and none other of any significance. Buzz and I feel that it is overdue for a one week re-training exercise for all DAPU scouts and supervisors and we hope to have this done by April 2018.

3. Peter Stewart fine art

We'll know artist Peter Stewart has created the "DAPU collection"

<http://www.cmsafaris.com/dapu/DAPU-COLLECTION-2017.pdf>.

Peter has undertaken (very graciously) to donate 40% of the proceeds of any of the works in the collection to DAPU. In addition to that, two outstanding oils of Peters were auctioned in 2017 generating over \$4,000 for DAPU. So a HUGE thank you to Peter and our two highest bidders!

***** Auction # 1 *****

***** Auction # 2 *****

visit us at www.dapuzim.com

4. The dry season. Fires, Water, and Poaching

As I am sure most of you are aware, the 2017 rainy season was very kind indeed – in fact one of the best on record. So much so, that we had to get an extension to allow early burning a month late than normal. So luckily we had lots of water all year in Dande North. The East almost made it all year but not quite. DAPU patrols successfully patrolled the big water sources as often as possible to keep on top of the snaring.

One of our goals in 2017 was to improve on fire management as a whole. Starting a bushfire in Zimbabwe is an offence and in 2017 we began treating it as such. Several arrests were made and lots of fines and warnings issued.

Whilst official government figures are yet to be released, we have no doubt what so ever that in Dande, hectares lost to fires in 2017 is the lowest in more than 10 years – in fact probably 20 years.

5. Snaring & general poaching

September to end of December of 2017 was much, much quieter than the same period of 2015 and 2016. In terms of snares picked up and meat poachers arrested the yield is drastically reduced.

This is beginning to prove to be a motivational challenge for DAPU scouts – simply put - we have paid out less \$ in rewards. Buzz and I are now exploring ways to index work done to a reward or bonus system.

2017 first second, and third period baseline comparisons.

Month	No. of snares	Dogs shot	Meat Poachers convicted	Elephant poachers	Weapons retrieved	Rewards paid
January	71	0	3	0	2	US\$784
February	0	0	1	0	0	US\$150

Total YTD	701	1	6	5	7	US\$4,669

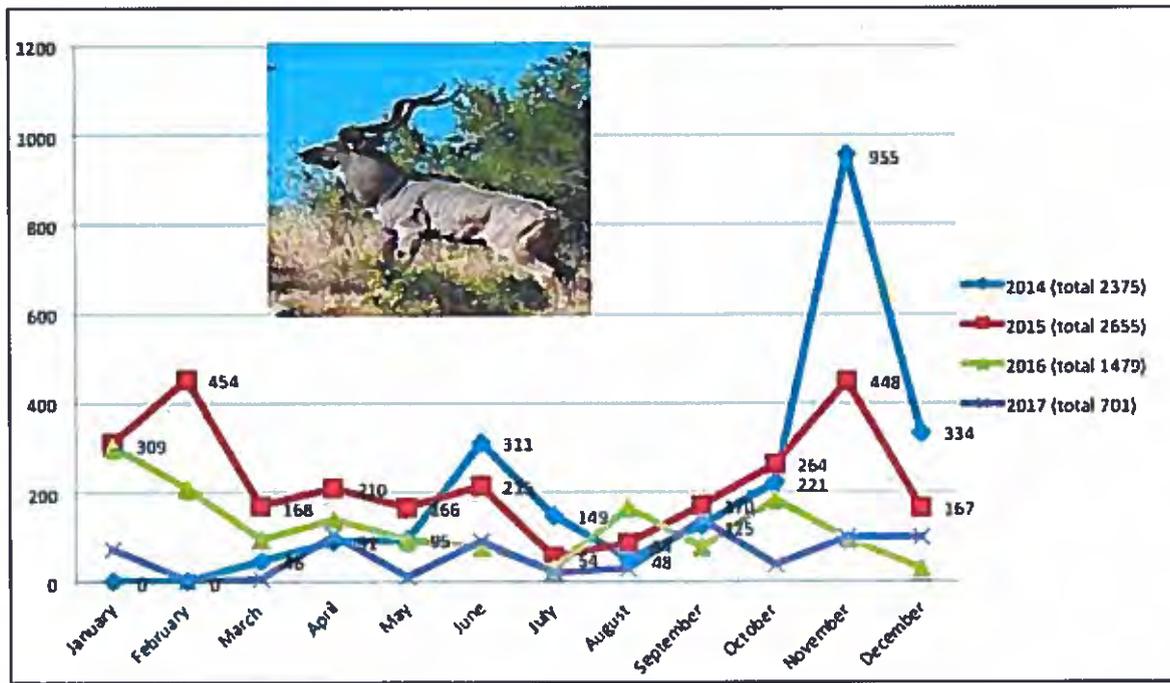

2016 first, second and third period baseline comparisons

Month	No. of snares	Dogs shot	Meat Poachers convicted	Elephant poachers	Weapons retrieved	Rewards paid
January	300	0	3	0	0	US\$821
February	208	0	0	2	0	US\$978
March	95	0	0	0	0	US\$97
April	137	0	1	0	2	US\$321
	740	0	4	2	2	US\$2,217
May	94	0	5	0	4	US\$1,310
June	75	0	0	0	0	US\$83
July	27	0	0	0	2	US\$67
August	164	1	0	0	0	US\$254
	360	1	5	0	6	US\$1,714
September	78	0	0	0	1	US\$97
October	181	0	1	0	1	US\$447
November	92	0	2	0	0	US\$442
December	28	0	0	0	0	US\$532
	379	0	3	0	2	US\$1,518
Total YTD	1479	1	12	2	10	US\$5,449

visit us at www.dapuzim.com

One of the most pleasing things about these trends is that we are getting on top of the “spikes” in poaching. DAPU has worked smarter and harder at the right time, in the danger areas, to counter increased poaching.

2015, 2016 and 2017
Full year snare yields compared

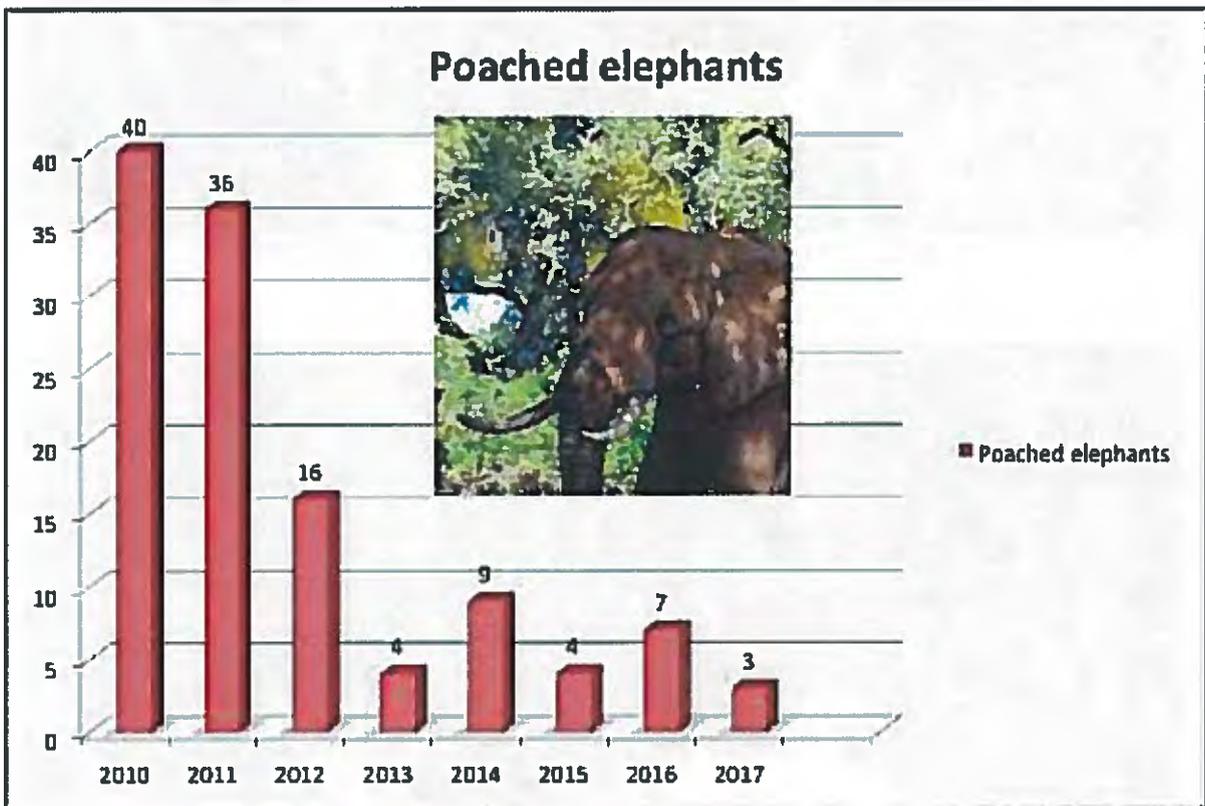

5. Elephant poaching

There were NO elephants poached in the third period of 2017 in the whole of Dande North and East. Therefore with the two lost in the Iira area (ward 2) and one in Chapoto (ward 1) we lost a total of three elephants in 2017. This is a figure that we can be extremely proud of. Obviously zero losses would be even better, but, considering Dande has + 100km’s of border with Mozambique and a further 12km’s with Zambia... probably we should be very happy indeed.

visit us at www.dapuzim.com

It must be mentioned that two elephant poachers were arrested and convicted in September and a further three in December 2017. One x AK47 taken out of circulation. We had heard about this AK47 for years and it was especially good news to get this weapon out of the system.

Traditionally as the hunting season slows down, and the presence of hunters also decreases – elephant poaching increases. The most dangerous months for our elephants are January – April, so we will need to be extra vigilant over the next few months until our hunters come back and help us out!

*** Graph showing 8 year elephant carcass count***

**** Parks, DAPU and the Accused (later "the guilty")****

****Bongi with seized ivory N.B. it all looks old ie they were "picked up" – not freshly poached.****

visit us at www.dapuzim.com

7. Problem Animal Control

Duties for DAPU scouts also include attending to Problem Animal reports (PAC). Obviously “the peak season” for PAC is the cropping season. That said there are cases all year long.

7.1.1 Elephant

None shot in 2017 BUT there have been and will always be sporadic raids by (mostly) young bulls into riverside vegetable gardens and fields. We treat every report as serious and the DAPU teams really react as strongly as they can early on. This normally saves us shooting. Our DAPU crews go onto full time elephant PAC rosters from February through to the end of April.

7.1.2 Lion

One old lioness killed and ate an old man from Kanyemba. He was on his way to the Zambezi to go fishing for his family. The very unfortunate scene was attended to by DAPU and she was shot, close to where she killed. Sporadic killing of livestock persists especially in ward 4 (8 cattle killed in November / December - but no lions shot in that area.

*** Skin and bones***

*** This picture clearly shows the tooth wear –she is an old cat***

visit us at www.dapuzim.com

7.1.3 Buffalo

Only the one blind old buffalo cow in Pedza villages was destroyed. Buffalo spend allot of time in the villagers gardens at night – normally the villages chase them or fence of gardens as required. In the rainy season they love to eat corn and cotton, which is grown in bigger fields, so that is more problematic as they cannot be fenced.

7.1.4 Crocodile

No one killed or injured that we know of.

7.1.5 Hippo

Hippos continue to generally make a nuisance of themselves along the Mwantanda River in ward 1 and in ward 16 (where the Manyame comes into the Zambezi Valley). Two badly behaved hippo were shot in March by Council but that was all.

7.1.6 Snake bites

Nothing to report.

8. Netting on the Zambezi

DAPU will continue to contribute 200 liters of petrol per month toward efforts to eliminate all illegal fishing in a 50km stretch of the Zambezi River. In 2017 National Parks achieved the following:

8	Banana boats.
10	Makoros.
14,340m	Nets burnt.
6	Basket traps.
33	Arrests.
19	Escaped.

Only when we added up the season's haul of nets, boats and poachers did we realize:

1. The scale of the problem.
2. How much work the National Parks crews have done.

We estimate that 85% of all illegal Netting has been stopped. Fisherman reported much improved catches as a whole, with lots of small tiger and bream caught – this can only bode well for all parties in the future.

Obviously lots of illegal fisherman also lay snares and much worse, so this effort is well worth supporting. Please see attached a separate report from National Parks.

visit us at www.dapuzim.com

***Measuring nets – note the fine gauge ***

Fish traps – Zambezi River 2017

(Funnily enough large gauge holes & eco friendly - just placed in wrong country!

9. Goals for 2017

1	Continue with anti-poaching patrols	Patrols have done well - we have had the quietest year in our history.
2	Early burning will start in May as soon as it is dry enough.	Complete – our most intensive effort in 8 years and surely best in 20 years.
3	Repair firearms where possible or replace	Delivered!!!
4	New boots (on the way).	Stuck in Durban.
5	New uniforms – paid for not delivered.	Delivered.
6	If possible trade in one of the older DAPU vehicles for a newer one.	DSC-F has funded DAPU to the tune of 24,000 dollars towards a new pick up. Delivery expected end of January 2018.
7.	Install New solar pump in East by end of September	Done and pumping!

Aimguard shotguns x 6 per kind favor of a young Harare based hunter

11. Flying for wildlife and others.

We must extend our thanks to:

1. Flying for Wildlife for their aerial patrols that are conducted on request. These are volunteer pilots in their own machines and they help us at NO cost to DAPU, which is tremendous.
3. Pieter Gertenbach and Charl Grobelaar – farmers in the Harare area that are always helping out with mealie meal, fertilizers, soap and other ration items. We use this to supplement the DAPU rations and it is always very well received by the DAPU teams!
4. Trackit (Richard Tennant and Hannes Scholtz) who provide free, real time satellite monitoring of the two DAPU vehicles. This has really saved significantly on fuel and vehicle costs. Also of course we have been able to be much smarter with servicing, and positioning of vehicles.

02 May 2018

DAPU
DANDE ANTI POACHING UNIT

visit us at www.dapuzim.com

Dear Friends,

Thank you all so much for your unwavering support. DAPU has gotten off to a strong start in 2018. I must say that it has been a different "season" in that it almost seems like the lions and elephant's have declared war on the villagers. We cannot remember a season with quite this intensity of conflict and tragedy.

Summarily, DAPU scouts have all been posted to their home camps (the DAPU camp in the area which they come from) so that they are able to react strongly to any PAC. Our reasoning (which is correct) is that the scouts will work hardest in their home villages protecting lives and crops. When the crops are safely harvested we will begin once again to mix the units so that no one works in their home ward.

We have continued to meticulously document all of our support, deployments, wins and losses and here we share a summary with everyone who so graciously and generously supported all of our efforts both financially and in kind. As we grow from strength to strength we look forward to your continued support.

With Regards,

Myles E. McCallum
James D. Charlton
Charles Nondo

Harare, Zimbabwe
02nd May 2018

1. Changes

As mentioned in previous reports, we have added Peter Solomon and Owen Zwiwanza to the management side of DAPU. In the PAC season (which is especially dangerous), Bonggi, Muno, Peter and Owen all go on regular patrols in order to keep everyone honest and safe.

Ward 1 (Kanyemba) has decided to retrench all six of their DAPU scouts as of 1st April 2018 for reasons of their own. Buzz and I have had to let the process play out in the hope that in the end we will achieve some capacity building i.e. all Wards need to be more responsible for their wildlife, which obviously includes having some control of their own scouts. Ultimately DAPU was created to support the ward scouts – which it continues to do very successfully indeed.

The decision has caused some confusion for sure, and we think has been a warning to other wards not to act too hastily!

The outcome is that six new scouts have been hired, and are awaiting training before deployment in June. Bonggi, Muno and Owen have personally been doing all the patrols on their own so that no enforcement gaps appeared.

Two homemade muzzleloaders picked up in April.

2. Peter Stewart fine art

Peter is a young contemporary painter who has who has developed a reputation for his highly representational art. Growing up in South African bush he became interested in the wildlife from an early age. He has a deep respect for the knowledge and sensitivities of the past and has spent time visiting museums as well as establishing relationships with contemporary realist painters in the USA. His paintings emote, and convey a care and sensitivity that is only achieved from knowing the subject matter intimately. Utilising subtle value and temperature shifts, fine draughtsmanship and pure intuition, Peter weaves a world of breathable air and tactile forms.

Peter Stewart has painted "The Warrior"– (16 x 24 inches) on Belgian canvas in support of DAPU. The male lion is the king of beasts, the top of the food chain and the most dominant force in the African Bush. Male lions are viewed as this majestic, regal creature that is protector, a father and warrior. The one that will put his life on the line for the pride.

This painting is on sale through <http://dapuzim.com/support.html>

visit us at www.dapuzim.com

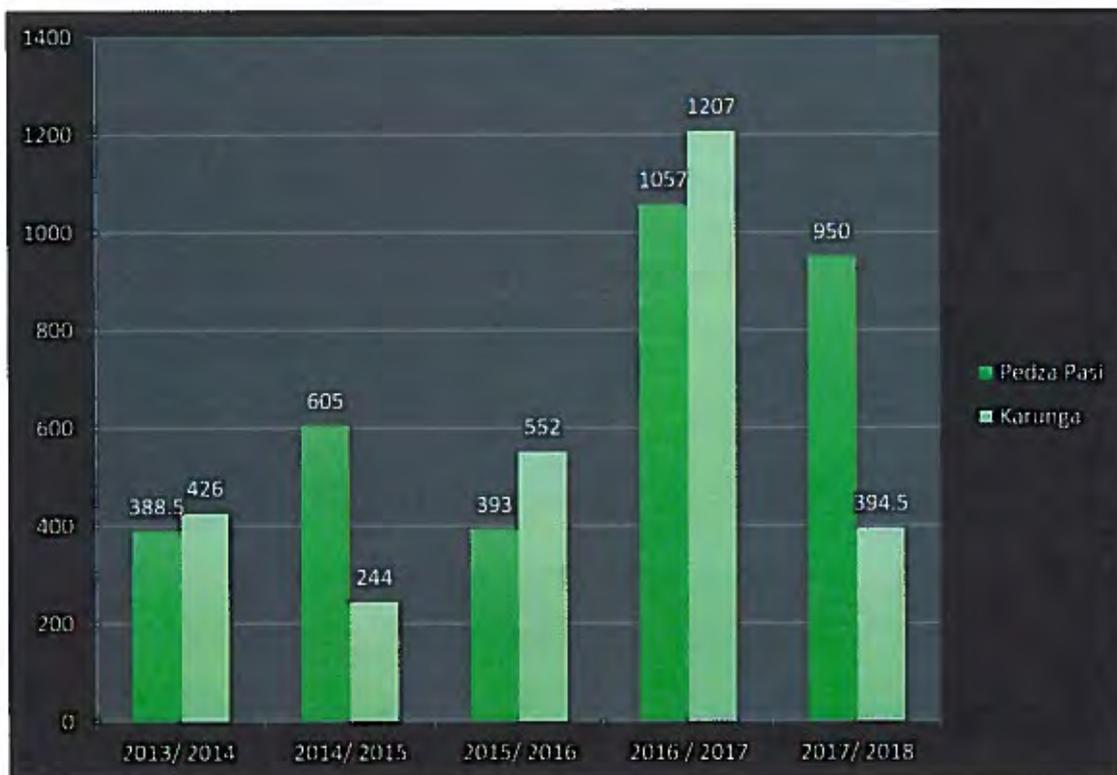

3. The wet season. "Rain, crops, and poaching"

The 2018 rainy season has been erratic and late. The crops – have in general been very poor in Dande, so there is no doubt that we can expect heavy poaching September 2018 – March 2019. There was decent late rain in March and April so there will be a small harvest, but certainly not enough to see families through the year.

This is a reminder to us all that Dande:

- a. Is in "agro ecological region 5" which is at best marginal for agriculture BUT is perfectly suited to wildlife.
- b. Wildlife needs water in some areas, so especially, in the East (and in ward 1) we need to re double our efforts, at getting water. Some rivers systems are now settled by people, leaving game competing with humans for water – which typically does not work well!!!

Seasonal rainfall.

visit us at www.dapuzim.com

The ward 1 (Kanyemba community) was really hard hit by NO rain until February, followed by floods, so crop loss was close to 100%. They drew down on 2018 hunting proceeds, in order to purchase 30kg of mealie meal for each of the 1,125 families and 33,750kg's was subsequently delivered. Obviously stories like this are extremely important in the big picture and help DAPU's efforts immensely.

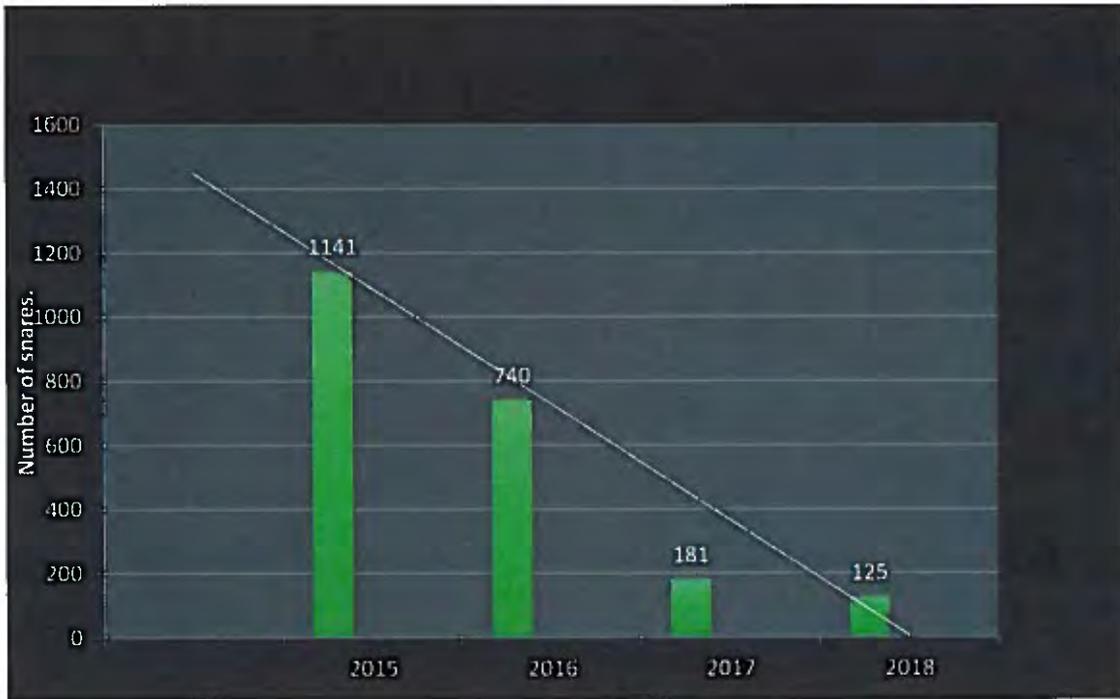

4. Snaring & general poaching.

January to end of April 2018 has been much, much quieter than the same periods in 2014, 2015, 2016 and 2017. In terms of snares picked up and meat poachers arrested the yield has been drastically reduced. Buzz and I are of course thrilled and believe the reasons to be a combination of the below:

- a. DAPU.
- b. Buy into our programs from communities.
- c. Equitable sharing of income.
- d. Government of Zimbabwe.
- e. Employment.
- f. Meat distribution.

visit us at www.dapuzim.com

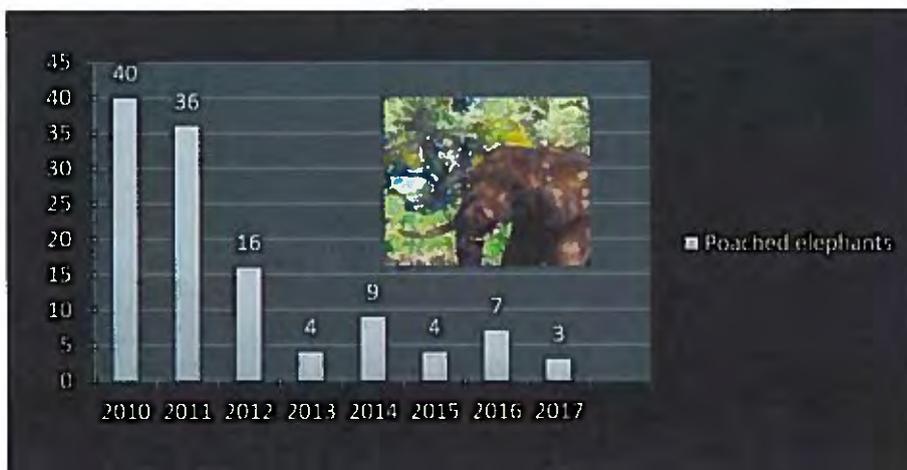

Snares - 2014, 2015, 2016, 2017 and 2018 first period baseline comparisons

5. Elephant poaching.

There are NO CONFIRMED reports of elephants poached in Dande thus far in 2018, BUT we have had reports of shots in the Irira area, so we know for sure that we will be picking up a carcass or two in that area.

An exceptional National Parks Investigations officer (with a little help from DAPU) was able to make two arrests in Dande this year.

visit us at www.dapuzim.com

26th March 2018

"One accused male, aged 29 married with 3 wives and 6 kids. Recovered 1 x elephant tusk weighing 11.6kg valued at \$2900 and 1 x fake wooden carved tusk".

Later sentenced to 9 years imprisonment.

20th April 2018

The above believed to be from an elephant cow poached in Ward 1 in January 2018. The accused is now the "convicted" – he is a repeat offender and is currently serving out his 9-year term.

6. Cyanide poaching

DAPU assisted National Parks to arrest a man selling cyanide to poachers. He was tried and pleaded guilty and sentenced to 12 months in jail which is the maximum sentence allowed.

This case has links back to a case where 3 years ago DAPU arrested a poacher who killed a warthog by poisoning it with cyanide. The below was his supplier. The net eventually closes!

We must compliment the investigations from National Parks - they are doing a fantastic job and poaching has been taken very seriously. It has been a pleasure for DAPU to help in these arrests.

visit us at www.dapuzim.com

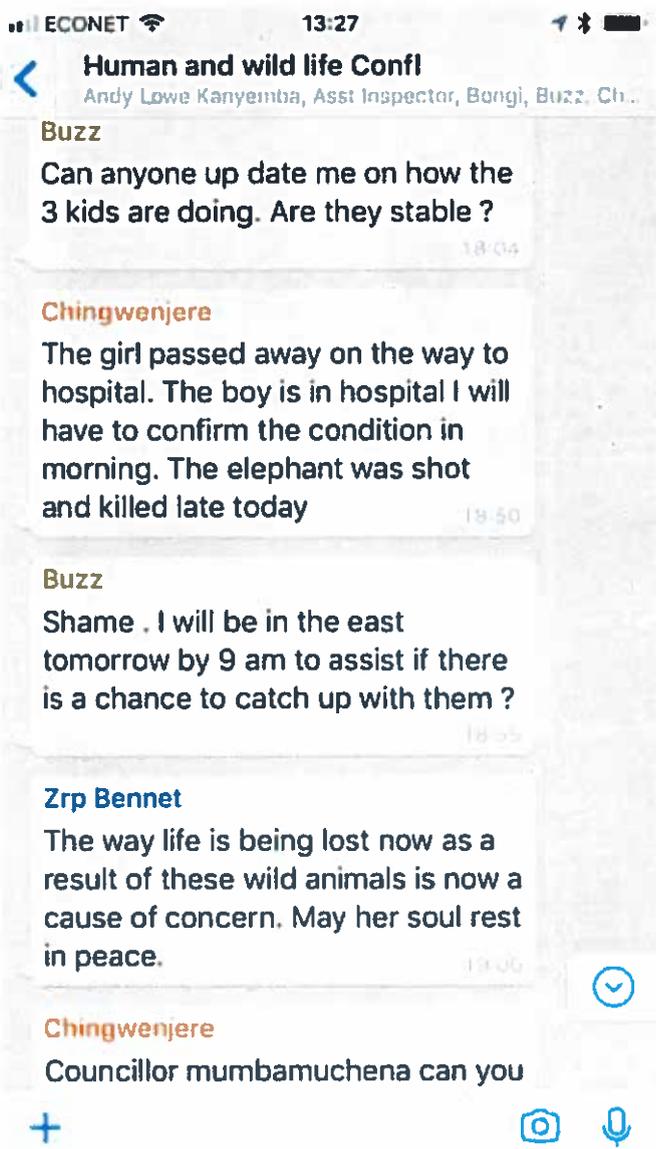

7. Problem Animal Control

Duties for DAPU scouts also include attending to Problem Animal reports (PAC). Obviously “the peak season” for PAC is the cropping season. The

7.1.1 Elephant.

Two people (kids killed), two people hospitalized and two elephants shot in 2018. Our DAPU crews have been on full time elephant PAC rosters from February through to the end of April, and look to continue into May.

visit us at www.dapuzim.com

A screen shot of our Human wildlife conflict Chat group. Every single day February to end of April we have had incidents to attend to.

A nine-year-old boy, died trying to protect his families fields.

This is what 100% crop loss looks like.

7.1.2 Lion

Four lions shot after communities lost 64 sheep (in one night), 12 goats and 24 cattle to these cats. With the trophy bans and resultant loss of incomes to communities, attitudes have hardened.

7.1.3 Buffalo

No reported serious problems to date in 2018.

7.1.4 Crocodile

No one killed or injured that we know of so far in 2018.

7.1.5 Hippo

One hippo was wounded (muzzle loader) and had to be shot. Hippos continue to generally make a nuisance of themselves along the Mwantanda River in ward 1 and in ward 16 but Muno and Owen have been able to keep them at bay.

7.1.6 Snakes

Nothing to report.

visit us at www.dapuzim.com

8. Netting on the Zambezi

DAPU will continue to contribute 200 liters of petrol per month toward efforts to eliminate all illegal fishing in a 50km stretch of the Zambezi River. Due to heavy rains, and flooding, in February and March, netting has been slow. We expect that illegal netting will pick up soon.

9. Goals for 2018

1.	Continue with anti-poaching patrols	Patrols have done well - we have had the quietest year in our history.
2.	Early burning will start in May or June, as soon as it is dry enough.	.
3.	Schedule re – training of scouts.	Anytime June to August.
4.	2018 uniforms and boots – paid for not delivered.	
5.	If possible trade in one of the older DAPU vehicles for a newer one.	
6.	Install second solar pump in East by end of May.	
7.	Carry out leopard and lion survey – buy 10 more trail cams.	
8.	Sell two old tractors and get one new one (vital for new pipelines, firebreaks amongst other things)	Done.
9.	6 new GPS's required preferably with sat tracking.	

10. Other News

Myles was invited to Seville in Spain to make a presentation to experts, scientific authorities, governments and NGO's on:

"The best management practices in hunting and the role of Professional Hunters in Conservation"

It was a four day workshop and it's aim, was in particular, to foster close collaboration between Scientific Authorities from both exporting and importing countries in relation to the formulation of CITES Non-Detriment Findings (NDFs) for hunting trophies of certain African species.

Certainly one of the primary reasons Charlton McCallum Safaris was invited was because of DAPU and the success that it has enjoyed!

"I think I am less nervous facing a wounded buffalo!"

visit us at www.dapuzim.com

11. Dallas Safari Club – Foundation – Land cruisers

DAPU # 1

DAPU # 2

Due to an extremely generous \$24,000 donation from the Lubbock Sportsman's Club via the Dallas Safari Club Foundation, Buzz and I were able to purchase a new Toyota Hilux, which has allowed us to dedicate two more suitable land cruisers 100% full time to DAPU. The Hilux will do both DAPU and general duties.

visit us at www.dapuzim.com

11. Flying for wildlife and others

We must also extend our profound thanks to:

1. Flying for Wildlife for their aerial patrols that are conducted on request. These are volunteer pilots in their own machines and they help us at NO cost to DAPU, which is tremendous. Richard Tennant, Hannes Scholtz and Edward Whitfield have all given extremely generously of their time and machines to DAPU.

"A huge thanks to FLYING FOR WILDLIFE and Edward Whitfield who came down to the Dande to help DAPU fly the complete area looking for any signs of poaching.

Ed is a wonderful pilot and his Savannah was a real eye opener. What we achieved in 7 hours of flying was incredible. I am happy to say that from what we can see the area is nice and quiet. We did see some fish poachers based in the Irira area. These are the Vadoma people and it is part of their culture. There are times that one should turn a blind eye, which is what we did. There was an old elephant carcass from well over a year ago that we were not aware of.

We did see a lot of elephant buffalo was well as some impala zebra bushbuck and sable despite the very thick bush. Once again a huge thanks to Ed as well as FLYING FOR WILDLIFE- if any organisation deserves financial support then FFW certainly do as they do an amazing job and are becoming essential in the controlling of poaching in remote areas"

visit us at www.dapuzim.com

2. Pieter Gertenbach and Charl Grobelaar – farmers in the Harare area, that are always helping out with mealie meal, fertilizers, soap and other ration items. We use this to supplement the DAPU rations and it is always very well received by the DAPU teams!

3. Trackit (Richard Tennant and Hannes Scholtz) who provide free, real time satellite monitoring of the two DAPU vehicles. This has really saved significantly on fuel and vehicle costs. Also of course we have been able to be much smarter with servicing, and positioning of vehicles.

A nice looking solution – GPS, and satellite Text messages for game scouts. They can send distress calls and we can also track their patrols.

12. Conservation Force

We continue to work hand in hand with John and Chrissie Jackson of Conservation Force. John and Chrissie are proud hunters and legends in the fight for our way of life and the wild places that we all love.

Conservation Force is a registered non – profit 501(c)(3) public foundation.

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1 a. Last Name Abbott	1 b. First Name Marsha	1 c. Middle Name/Initial (b) (6)	1 d. Suffix
2. Date of Birth (mm/dd/yyyy) (b) (6)	3. Telephone Number	3 a. Alternate Telephone Number	4. E-mail address

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1 a. Name of business, agency, Tribe, or institution		1 b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4 a. Principal officer Last name	4 b. Principal officer First Name	4 c. Principal officer Middle name/initial	4 d. Suffix
5. Principal officer title		6. Primary contact name	
7 a. Business telephone number	7 b. Alternate telephone number	7 c. Business fax number	7 d. Business e-mail address

Section C: All applicants complete address information

1 a. Physical address (Street address, Apartment #, Suite #, or Room #, no P.O. Boxes) (b) (6)				
1 b. City McGehee	1 c. State Arkansas	1 d. Zip code/Postal code (b) (6)	1 e. County/Province	1 f. Country USA
2 a. Mailing address (include if different than physical address, include name of contact person if applicable) (b) (6)				
2 b. City McGehee	2 c. State Arkansas	2 d. Zip code/Postal code (b) (6)	2 e. County/Province	2 f. Country USA

Section D: All applicants MUST complete

1. Attach the nonrefundable application processing fee in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].	
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in <i>Title 50 Part 13 of the Code of Federal Regulations</i> and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.	
<div style="display: flex; justify-content: space-between;"> <div style="width: 60%;"> <p><i>Marsha Abbott</i></p> <p>Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures)</p> </div> <div style="width: 35%;"> <p>05/18/2018</p> <p>Date of signature (mm/dd/yyyy)</p> </div> </div>	
Please continue to next page	

E. IMPORT OF SPORT-HUNTED TROPHIES (*Appendix I of CITES and/or ESA*)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least 90 days for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at [50 CFR 23.74](#) as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Conservation Force, 504-837-1233, cf@conservationforce.org

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Panthera leo melanochaita, African lion

b. Sex (if known). *male*

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

*Zambia, Chanzuzi GMA, Eastern Province.
nearest city is Lusaka, nearest town is Lundazi*

b. Date wildlife is to be hunted: *June 3-July 4, 2018*

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Muchinga Outfitters, Impanga Safaris Ltd. Lusaka, Zambia

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

b. Date wildlife was hunted:

- c. Name of hunting outfitter, safari company, or professional hunter you hunted with:
- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:

Business Name: *Impanga Safaris*

Address: *P.O. Box 31012*

City: *Lusaka*

State/Province: *

Country, Postal Code: *Zambia*

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.
- a. Do you have any information regarding the population status or trend data on the species hunted?
- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?
- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: Mauda Abbott Date: 5/18/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from [the list of designated ports](#). If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Enhancement Finding
Applicant: Marsha (b) (6) Abbott (PRT-93468C)

Marsha (b) (6) Abbott submitted an application on June 1, 2018, for the importation of one male African lion (*Panthera leo melanochaita*) from Lusaka, Zambia for the purpose of enhancing the propagation and survival of the species in the wild. After evaluating the available information submitted with the application, information provided by the government of Zambia, other information available to the Service, and comments received from interested parties, the U.S. Fish & Wildlife Service (Service) has determined that the importation of the sport-hunted trophy taken July 3, 2018, or July 4, 2018, from this wild lion (*P. l. melanochaita*) population within Zambia meets the enhancement criteria under 50 CFR 17.32.

Governance of the Lion in the United States:

On October 29, 2014, the Service published in the Federal Register a finding that listing the African lion subspecies (*Panthera leo leo*) as a threatened species under the Endangered Species Act (Act or ESA) was warranted and proposed a rule under Section 4(d) of the Act to provide conservation measures for the African lion. (79 Fed. Reg. 64472.) On December 23, 2015, after fully considering the comments from the public and the peer reviewers on the proposed rule, the Service published in the Federal Register the final rule in which the taxonomic classification of the Asiatic lion (previously classified as *P. l. persica* and listed as an endangered species under the Act) was changed to *P. l. leo* (Asia and western, central and northern Africa) and listed as an endangered species, and the *P. l. melanochaita* (southern and eastern Africa) subspecies was listed as a threatened species with a rule under Section 4(d) of the Act, which is set forth at 50 CFR 17.40(r). 80 Fed. Reg. 79999. The effective date of this listing was January 22, 2016. Therefore, as of January 22, 2016, the lion subspecies *Panthera leo melanochaita*, whose range includes Zambia, is listed as threatened under the Act and is regulated under an ESA Section 4(d) special rule [50 CFR 17.40(r)].

Section 9 of the Act and our implementing regulations at 50 CFR 17.21 and 50 CFR 17.31 set forth a series of general prohibitions that apply to all endangered and threatened wildlife, respectively, except where a 4(d) rule applies to threatened wildlife, in which case the 4(d) rule contains all the

applicable prohibitions and exceptions. Under the 4(d) rule for *P. l. melanochaita*, all of the prohibitions under 50 CFR 17.31 apply to *P. l. melanochaita* specimens. These prohibitions, at 50 CFR 17.21 and 17.31, in part, make it illegal for any person subject to the jurisdiction of the United States to “take” (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or to attempt any of these) within the United States or upon the high seas; import or export; deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever, in the course of commercial activity; or sell or offer for sale in interstate or foreign commerce any lion specimens. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken in violation of the Act. Permits may be issued to carry out otherwise prohibited activities involving endangered and threatened wildlife species under certain circumstances. Regulations governing permits for endangered species, such as *P. l. leo*, are codified at 50 CFR 17.22. Regulations governing permits for threatened species, such as *P. l. melanochaita*, are codified at 50 CFR 17.32.

In sum, under paragraph 17.40(r)(1), all the prohibitions and exceptions under 50 CFR 17.31 and 50 CFR 17.32 apply to *P. l. melanochaita*. Accordingly, the Service may authorize the import of a sport-hunted lion trophy from Zambia, but only if it first makes a finding that permitting import of a trophy would enhance the survival of the species in the wild.

As we explained when finalizing the 4(d) rule for *P. l. melanochaita*, any person wishing to conduct an otherwise prohibited activity, including all imports of *P. l. melanochaita* specimens, must first obtain a permit under 50 CFR 17.32. As with all permit applications submitted under 50 CFR 17.32, the individual requesting authorization to import a sport-hunted trophy of *P. l. melanochaita* bears the burden of providing information in their application showing that the activity meets the requirements for issuance criteria under 50 CFR 17.32. In some cases, such as for import of sport-hunted trophies, it is not always possible for the applicant to provide all of the necessary information needed by the Service to make a positive determination under the Act to authorize the activity. In such cases, the Service may consult with the range country and other interested parties to the extent practicable to obtain necessary information. The Service will make the required findings on sport-hunted trophy imports of *P. l. melanochaita* on an individual application basis, however information obtained for the country as a whole will continue to be considered as it contains information pertinent to the Service’s evaluation. Any new information obtained or submitted to the Service will be evaluated and considered in all future findings for sport-hunted trophies of *P. l. melanochaita* taken in Zambia.

General considerations:

As we also explained when finalizing the 4(d) rule, our threatened species permitting regulations at 50 CFR 17.32 provide issuance criteria for threatened species permits [(50 CFR 17.32(a)(2))], but do not specify what would constitute the enhancement of propagation or survival with regard to authorizing the import of parts or products of *P. l. melanochaita*, including sport-hunted trophies. Therefore, when making a determination of whether an otherwise prohibited activity enhances the propagation or survival of *P. l. melanochaita*, the Service examines the overall conservation and management of the subspecies in the country where the specimen originated and whether that management of the subspecies addresses the threats to the subspecies (*i.e.*, that it is based on sound scientific principles and that the management program is actively addressing the current and longer term threats to the subspecies). In this review, we evaluate whether the import of a sport-hunted lion trophy taken in Zambia contributes to the overall conservation of the species

by considering whether the biological, social, and economic aspects of a program from which the specimen was obtained provide a net benefit to the subspecies and its ecosystem.

The Service has evaluated Ms. Abbott's application involving a *P. l. melanochaita* sport-hunted trophy taken in Chanjuz GMA, Zambia, in the context of enhancement of propagation or survival in accordance with our threatened species permitting regulations at 50 CFR 17.32 and issuance criteria for threatened species permits [(50 CFR 17.32(a)(2))]. These include, in addition to the general permitting criteria in 50 CFR 13.21(b):

- (i) Whether the purpose for which the permit is required is adequate to justify removing from the wild or otherwise changing the status of the wildlife sought to be covered by the permit;
- (ii) The probable direct and indirect effect that issuing the permit would have on the wild populations of the wildlife sought to be covered by the permit;
- (iii) Whether the permit, if issued, would in any way, directly or indirectly, conflict with any known program intended to enhance the survival probabilities of the population from which the wildlife sought to be covered by the permit was or would be removed;
- (iv) Whether the purpose for which the permit is required would be likely to reduce the threat of extinction facing the species of wildlife sought to be covered by the permit;
- (v) The opinions or views of scientists or other persons or organizations having expertise concerning the wildlife or other matters germane to the application; and
- (vi) Whether the expertise, facilities, or other resources available to the applicant appear adequate to successfully accomplish the objectives stated in the application.

In addition to these factors, particularly in relation to sport hunting, we find the *IUCN Species Survival Commission (SSC) Guiding Principles on Trophy Hunting as a Tool for Creating Conservation Incentives, Ver. 1.0* (IUCN SSC 2012), to provide useful principles, which, considered in conjunction with our threatened species issuance criteria, will aid the Service when making this enhancement finding for the importation of a sport-hunted trophy of *P. l. melanochaita* from Lusaka, Zambia. This document sets out guidance from experts in the field on the use of trophy hunting as a tool for "creating incentives for the conservation of species and their habitats and for the equitable sharing of the benefits of use of natural resources" (IUCN SSC 2012, p. 2) and recognizes that recreational hunting, particularly trophy hunting, can contribute to biodiversity conservation and more specifically, the conservation of the hunted species.

The SSC document lays out five guiding principles that, considered in conjunction with our threatened species issuance criteria, will aid the Service in making this enhancement finding for importation of a sport-hunted trophy of *P. l. melanochaita*:

- (a) *Biological sustainability*: The hunting program cannot contribute to the long-term decline of the hunted species. It should not alter natural selection and ecological function of the hunted species or any other species that share the habitat. The program should not inadvertently facilitate poaching or illegal trade in wildlife by acting as a cover for such illegal activities.

The hunting program should also not manipulate the ecosystem or its component elements in a way that alters the native biodiversity.

(b) *Net Conservation Benefit*: The biologically sustainable hunting program should be based on laws, regulations, and scientifically based quotas, established with local input, that are transparent and periodically reviewed. The program should produce income, employment, and other benefits to create incentives for reducing the pressure on the target species. The program should create benefits for local residents to co-exist with the target species and other species. It is also imperative that the program is part of a legally recognized governance system that supports conservation.

(c) *Socio-Economic-Cultural Benefit*: A well-managed hunting program can serve as a conservation tool when it respects the local cultural values and practices. It should be accepted by most members of the community, involving and benefiting local residents in an equitable manner. The program should also adopt business practices that promote long-term economic sustainability.

(d) *Adaptive Management: Planning, Monitoring, and Reporting*: Hunting can enhance the species when it is based on appropriate resource assessments and monitoring (e.g., population counts, trend data), upon which specific science-based quotas and hunting programs can be established. Resource assessments should be objective, well documented, and use the best science available. Adaptive management of quotas and programs based on the results of resource assessments and monitoring is essential. The program should monitor hunting activities to ensure that quotas and sex/age restrictions of harvested animals are met. The program should also generate reliable documentation of its biological sustainability and conservation benefits.

(e) *Accountable and Effective Governance*: A biologically sustainable trophy-hunting program should be subject to a governance structure that clearly allocates management responsibilities. The program should account for revenues in a transparent manner and distribute net revenues to conservation and community beneficiaries according to properly agreed decisions. All necessary steps to eliminate corruption should be taken and to ensure compliance with all relevant national and international requirements and regulations by relevant bodies such as administrators, regulators and hunters.

This approach to enhancement findings for the importation of a sport-hunted trophy of *P. l. melanochaita* is consistent with the purpose and intent of the Act. As such, before the Service will authorize the importation of a sport-hunted trophy, we must determine that the trophy-hunting program is managed to ensure the long-term survival of the species. As part of this evaluation, we recognize that in many parts of the world, wildlife exists outside of protected areas and must share the same habitat and compete with humans living in these areas for space and resources. As identified in the *IUCN SSC Guiding Principle on Trophy Hunting as a Tool for Creating Conservation Incentive*, if communities that share these resources with wildlife do not perceive any benefits from the presence of wildlife, they may be less willing to tolerate the wildlife. However, under certain circumstances, trophy hunting can address this problem by making wildlife more valuable to the local communities, thus encouraging community support for managing and conserving the hunted species, as well as other species.

In evaluating whether the importation of Ms. Abbott's trophy of *P. l. melanochaita* would be authorized pursuant to 50 CFR 17.32, in accordance with our threatened species issuance criteria, we examined how Zambia's management program for lions addresses the three main threats that have led to the decline of the subspecies: habitat loss, loss of prey base, and human-lion conflict. When examining a management program and whether this trophy taken as part of that program meets the issuance criteria, we study a number of factors. Some of the factors we considered include whether the program is based on sound scientific information and identifies mechanisms that would arrest the loss of habitat or increase available habitat (*i.e.*, by establishing protected areas and ensuring adequate protection from human encroachment). We considered whether the management program actively addresses the loss of the lion's prey base by addressing poaching or unsustainable offtake within the country. Several components of a management plan from which trophy imports could meet the issuance criteria would be whether there are government incentives in place that encourage habitat protection by private landowners and communities, and incentives provided to local communities to reduce the incursion of livestock into protected areas or to actively manage livestock to reduce conflicts with lions. We examined if the hunting component of the management program supports all of these efforts by looking at whether hunting concessions/tracts are managed to ensure the long-term survival of the lion, its prey base, and habitat. Hunting, if properly conducted and well managed, can generate significant economic benefits that may contribute to the conservation of lions. In looking at whether we are able to authorize the import of a trophy under the issuance criteria at 50 CFR 17.32(a)(2), we examined if the trophy hunting provides financial assistance to the wildlife department to carry out elements of the management program, and if there is a compensation scheme or other incentives to benefit local communities that may be impacted by lion predation. We also considered how the U.S. hunter's, in this case, Ms. Abbott's, participation in the hunting program contributes to the overall management of lions within the country.

The management program in Zambia for *P. l. melanochaita* is expected to address, but is not limited to, evaluating population levels and trends; the biological needs of the species; quotas; management practices; legal protection; local community involvement; and use of hunting fees for conservation. In evaluating these factors, we work closely with the range countries and interested parties to obtain the information. By allowing entry into the United States of *P. l. melanochaita* trophies from range countries that have science-based management programs, we anticipate that other range countries would be encouraged to adopt and financially support the sustainable management of lions that benefits both the species and local communities. In addition to addressing the biological needs of the subspecies, a scientifically based management program will provide economic incentives for local communities to protect and expand *P. l. melanochaita* habitat.

Basis for Finding:

On February 2, 2016, the Service sent a letter to Zambia's Wildlife Authority with a list of questions that would aid the Service in evaluating the overall conservation and management of the subspecies, *P. l. melanochaita*, in Zambia and whether that management addressed the three main threats that have been identified as the reason for the decline of the species: habitat loss, loss of prey base, and human-lion conflict. Additionally, in the letter the Service referenced the *IUCN Species Survival Commission (SSC) Guiding Principles on Trophy Hunting as a Tool for Creating Conservation Incentives, Ver. 1.0* (IUCN SSC 2012), as it provides useful principles, which when

considered in conjunction with the Service's permit issuance criteria, would aid when making the required enhancement findings for permitting importation of sport-hunted lion trophies.

In response to our February 2, 2016, letter, Zambia's Department of National Parks and Wildlife (DNPA), herein referred to as DNPW (DNPW 2016), provided a binder of documentation describing Zambia's lion population and management plans. In addition, the Service met with representatives of Zambia's DNPW during the 17th Meeting of the Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) in Johannesburg in late September 2016. The DNPW binder documents, dated May 5, 2017, along with the Service's final rule on the lion listing under the Act, relevant information obtained separately through open sources such as IUCN documents, relevant information from DNPW, comments received from interested parties, and Ms. Abbott's application were the basis of this finding.

Governance of Lions in Zambia:

The responsibility for implementing wildlife conservation laws in Zambia dates back to the 1930s or 1940s with the establishment of the Department of Tsetse, Fisheries, and Wildlife. In the late 1950s, this agency became the Department of Game and Fisheries and operated under this designation until the mid-1970s, when it became the Department of National Parks Wildlife Service (DNPWS) who was responsible for the protected area network. In 1999, the Government of Zambia transformed this agency into Zambia's Wildlife Authority (ZAWA), creating a semi-autonomous agency responsible for the management and protection of this network, with statutory powers derived through the Zambia Wildlife Act No. 12 of 1998. However, this agency, due partly to its semi-autonomy, had a low funding capability, relying primarily on revenue from tourism, which also included sport hunting. Between 1999 and 2005, ZAWA struggled with their law enforcement capabilities due to inadequate resources. The costs associated with transforming DNPWS to ZAWA continued to affect the financial and staff allocations for law enforcement activities. Large sums of money that could have been utilized by law enforcement were apparently channeled into tasks involved in the transformation process.

Since 2005, in partnership with the Zambia Lion Project (ZLP), ZAWA (now DNPW) established a voluntary program to assess and age lions taken as trophies (DNPW 2016). From 2006 through 2012, DNA samples were taken from teeth of both live and trophy lions in order to estimate the age of lions taken as trophies (DNPW 2016). The results from these past sampling efforts helped demonstrate the performance of the hunting sector during this time. It has also provided a baseline for comparing future performance.

By 2010, Zambia developed a ten-year Conservation Strategy and Action Plan for the African lion. Since the approval of this strategy, research has begun and management actions have been taken to address local community benefits, human-lion conflict, land use planning and zoning, trade, and monitoring (DNPW 2016). Some of the lion-related studies that were initiated are the Zambia Carnivore Programme (ZCP), Kafue Lion Project, and Zambia Lion Project (ZLP) (DNPW, 2106). The development of this strategy also led to the employment of 12 ecologists, with three committed to spending 70% of their work time on lion-related issues (DNPW 2016).

In 2015, ZAWA was disbanded and reincorporated as a government department, the Department of National Parks and Wildlife (DNPW). In addition, the Zambia Wildlife Act No. 12 of 1998 was

repealed. However, the Wildlife Act No. 14 of 2015 (Wildlife Act) is still the principle legislation guiding the management of wildlife in Zambia through a system implemented and enforced by DNPW with assistance from stakeholders (DNPW 2016).

The Wildlife Act is administered by DNPW under the Ministry of Tourism. DNPW is headed by a Director, with assistant directors who command 4 elements of the department: Principal Warden-Operations Wildlife Law Enforcement Unit, Principal Warden-Conservation Unit, Principal Engineer Infrastructure Development Unit, and Principal Natural Resource Management Officer Community-based Natural Resource Management Unit. *The Wildlife Law Enforcement Unit* is comprised of 1,250 Wildlife Police Officers who are responsible for investigating and enforcing wildlife crimes within 236,376 km² of wildlife area (average 189 km² per officer). The Zambian government has also committed to adding an additional 850 officers by 2018 (600 new officers were reportedly added in 2016). *The Wildlife Conservation Unit* is responsible for mitigating human-wildlife conflict, facilitating wildlife officer trainings, regulating private wildlife estate operations, managing ecosystems, managing landscape conservation of certain species, and both developing and implementing park regulations. *The Infrastructure Development Unit* is responsible for construction and maintenance of infrastructures and machinery within protected areas. *The Community-based Natural Resource Management Unit* is responsible for co-managing Game Management Areas (GMAs) with local communities. Duties include providing technical support to Community Resource Boards regarding the management of human-natural resources in GMAs and open areas. This unit facilitates the election of the Community Resources Board members and the election of Village Action Groups. Responsibilities also include monitoring the use of funds disbursed to Community Resources Boards and training village scouts and Community Resources Board members.

The lion is a protected species under the Wildlife Act. It is a criminal offense to hunt, kill, capture, or possess a lion without a license. The lion is also protected under private wildlife estate legislation and statutory instruments implemented with the (now repealed) Wildlife Act of 1998 and carried over to the Wildlife Act. Additionally, in 2016, four new statutory regulations were reportedly enacted to address various aspects of lion management to complement the operation of the new Wildlife Act. They included the Zambia wildlife regulations for granting of hunting concessions, lion sport hunting, keeping of big cats in captivity, and conducting ecological or research wildlife assessments (DNPW 2016).

In addition to Zambia's domestic laws, it is also a Party CITES. The lion is listed in Appendix II of the Convention. As an Appendix-II species, certain criteria must be met before such species can be exported, including findings from the exporting country's CITES Management Authority that the specimen was legally acquired and the country's Scientific Authority that the export will not be detrimental to the survival of the species in the wild. In their reply to our inquiry, Zambia provided a copy of their May 5, 2016, non-detriment finding for lions. This finding states that "(t)he CITES Scientific authority of Zambia has considered the population of lion in Zambia; the quota-setting system and current precautionary quota of only 24 lions; the newly implemented age-based harvest policy; the limited offtake; the adaptive management of lion; and the substantial revenues generated for DNPW operations, anti-poaching, and community development." They further explain that their positive finding was based on three pillars that include a "precautionary" quota, age-based harvesting, and community benefits.

Current Lion Status in Zambia

Lion Range:

According to DNPW, the lion range in Zambia covers about 63% of Zambia's protected areas, which is about 145,000 km² (DNPW 2016). Historically, lions occurred in the West Lunga complex, although, recently, populations have not been found in this complex (DNPW 2016). The majority of lions are found in three main clusters throughout Kafue, Luangwa, and the Lower Zambezi region. Luangwa and Lower Zambezi are connected through GMAs. Smaller populations of lions are also present in Liuwa Plains, Sioma Ngwezi, Nsumbus, and the Lavushi Manda National Parks. In addition, Kazungula and Siavonga open areas have lion populations that roam between Zambia and other countries (DNPW 2016).

The 2016 IUCN Red List Assessment stated that lions are now extinct in 15 countries in Africa (including Western Sahara, which is technically a disputed territory), are possibly extinct in another seven countries, and now occur in only 24 countries (Macdonald 2016). The latest IUCN estimates suggest a population of 23,000 - 39,000 lions throughout their current range on the African continent (IUCN 2016), representing a decline of at least 43% between 1993 and 2014. Lions are now considered to have been extirpated from at least 92% of their historic range (Macdonald 2016). Therefore, in assessing the population of lions in Zambia, we must also consider the significance of the diminishing total population of lions remaining in the wild. This is in part because the southern and eastern African lion populations include Zambia (DNPW 2016). DNPW presented a study conducted by the Zambia Lion project (ZLP) in which DNA analysis of Zambian lions was undertaken during 2004 - 2012. The study concluded that southern African and eastern African lions were integrated among the Zambian lions. The study also determined that the genetic diversity of Zambian lions is much greater than comparable areas in southern and eastern Africa.

Population Status:

Data provided by Macdonald (2016) indicate that Zambia contains approximately 1,200 free-ranging lions in an estimated range of 135,000 km² (approximately 10,000 km² less range than identified by the Zambian government). DNPW explains that previous lion estimates were determined, in large part, through expert opinion (DNPW 2016). They also confirm that no intensive research has been conducted in the corridor area, consisting of West Petauke, Chisomo and Luano GMAs, and surrounding Open Areas (DNPW 2016).

In addition to the population status determined by Macdonald (2016), the Zambian Carnivore Programme (ZCP) studied the population of lions in Zambia. In 2013, the ZCP monitored 13 prides and 13 coalitions, comprised of 141 lions with 3 adjacent sites of 20 lions each, totaling over 200 lions. In 2014, the ZCP monitored 15 prides and 13 coalitions, with a total of 166 individual lions. In 2015, the ZCP's partial data indicated that 15 prides and 15 coalitions of lions exist throughout Zambia.

In acknowledging their need for more complete and current lion population data, DNPW has begun working with partners on monitoring studies in the Luangwa and Kafue ecosystems. Surveys were conducted in the later part of 2016 (DNPW 2016). The Service has not seen the results, but will request them for consideration in future enhancement determinations. In addition, dependent on funding availability, DNPW has identified that a survey would be conducted of the corridor

between South Luangwa National Park and Lower Zambezi National Park and the GMAs surrounding the eastern part of North Luangwa National Park.

A report by the Democratic staff of the House Committee on Natural Resources concludes that Zambia lion populations may show signs of stabilizing or even recovery, but strict controls on additional mortality are necessary to prevent further decline (Grijalva 2016).

Threats:

Habitat Loss, Population Growth, and Human-Lion Conflicts:

Lion populations throughout Africa have decreased in correlation with their habitat. Currently only 10 stable populations with more than 500 lions still exist throughout the continent of Africa (Creel *et al.* 2016). Africa has the fastest human population growth rate in the world, with projections estimating a population tripling across 27 African states by 2100, leading to a continental estimate of 4 billion. Eight lion range states are estimated to have a five-fold increase in human population by 2100 (Macdonald 2016), and Zambia has not steered clear of Africa's population and development growth (DNPW 2016). Human population growth has increased in Mfuwe, the gateway town to South Luangwa National Park, largely due to increased infrastructure development and an increasing number of economic opportunities created through tourist lodges (DNPW 2016). Habitat loss, population growth, human-lion conflicts, poverty, poaching, diseases, uncontrolled hunting, and the importation of captive-bred lions into Zambia are all threats to the long-term survival of lion populations in Zambia.

DNPW stated that human-lion conflicts are not uncommon in Zambia. From the years 2008 through 2015, a total of 327 livestock animals were recorded as being killed by lions; since 2002, at least 70 lions were reported killed as a result of human lion conflicts (DNPW 2016). The number of Zambian lions killed as a result of human-lion conflict is shown in the table below.

Year	Lions Killed
2002	2
2003	4
2004	1
2005	0
2006	5
2007	8
2008	2
2009	5
2010	3
2011	8
2012	5
2013	10
2014	14
2015	1
2016	2

Poverty, Poaching, and Disease:

Prey base depletion is partly linked to habitat loss, but more importantly to poaching and bush meat trade (Becker *et al.* 2013). Poaching of lions for the trade in bones and other body parts for traditional medicine is an emerging threat within Africa (Macdonald 2016). Within Zambia, another more widely occurring threat believed to be facilitated by high levels of poverty is poaching of lions for bush meat (DNPW 2016). DNPW acknowledges that bush meat poaching occurs widely in Zambia (DNPW 2016). They also acknowledge that the amount of illegal use of lion parts in Zambia is currently unknown (DNPW 2016). However, DNPW has indicated it will establish an investigation into the illegal trade and use of lion parts.

Zambia has addressed the need to monitor the health of their lions by creating the Infrastructure Development Unit (IDU). The IDU subsequently established a veterinary unit of DNPW whose responsibility is to regularly sample lion specimens for diseases. This unit also assists law enforcement officers in the treatment of injured lions due to illegal activities such as snaring (DNPW 2016).

Trophy Hunting:

Di Minn *et al.* (2016) estimated that 37.8% of Zambia is covered by terrestrial protected areas, with 21.3% in Open Game Ranches. According to a 2012 article, lion hunting in Africa generates 5–17% of gross trophy hunting income on national levels, with the proportional significance highest in Mozambique, Tanzania, and Zambia (Lindsey *et al.* 2012). A more recent paper published by Macdonald, however, asserted that Zambia generated very little revenue from trophy hunting (Macdonald 2016). It should be noted, however, that Macdonald based the paper on data obtained in the years before 2016 (the moratorium was between 2013 and 2015), and the formation of DNPW and newer regulations were not implemented until after Zambia imposed a moratorium on lion hunting for the years 2013 through 2015. According to DNPW, Zambia's total hunting revenue (all hunting, not just lions) accounted for 32% of the revenue that ZAWA (now DNPW) received during the years 2010 through 2012 (DNPW 2016). They also affirm that the average revenue generated for hunting in Zambia was reduced to 4% during the lion hunting moratorium in 2013 and 2014 (DNPW 2016).

IUCN has only examined the lion population in Luangwa, Zambia. Their findings indicate that trophy hunting in Luangwa contributed to a decline in the lion population by 28% between 1993 and 2014 (Macdonald 2016). However, this assessment was done prior to Zambia's 2013-2015 hunting ban and therefore, it will need to be re-assessed now that Zambia's lion hunting ban has been lifted and new regulations have been implemented.

Importation of Captive-bred lions:

Captive-bred lions from South Africa and Zimbabwe are being imported into Zambia for lion walks (DNPW 2016). DNPW believes that the importation of captive-bred lions is a result of a growing photo-tourism market in the Livingstone area of southern Zambia (DNPW 2016). Since 2008, a total of 54 captive-bred lions have been imported into Zambia, but the Zambian government has imposed a condition that the captive-bred lions will not be introduced into the wild (DNPW 2016). In order to ensure that Zambia's captive-bred lions do not negatively impact their wild lion

populations, Zambia is currently working on the preparation of a statutory instrument that will regulate the importation and captive uses of lions. Other than for temporary veterinary purposes, the holding of, breeding, and commercial use (i.e. walking and petting) of captive-bred lions will be banned (DNPW 2016). Lions that are currently held in captivity will be required to be castrated or spayed, and eventually all commercial uses of captive-held lions will be phased out (DNPW 2016). DNPW states that "particular care will be taken to avoid the dumping of captive-held cats into wild areas for any reason, especially for hunting or 'release' as means for the owners to avoid the penalties or costs associated with the authorized disposition of their animals (DNPW 2016)."

Partners/Non-governmental Organizations (NGOs):

DNPW has partnered with several NGOs in an effort to obtain lion population survey data and to conduct other lion-related research studies. The Zambia Lion Project (ZLP) has conducted research on the presence/absence of lion surveys throughout Zambia (DNPW 2016). They have also assisted with DNA collection studies. The Zambia Carnivore programme (ZCP) has been documenting population trends and demographic vital rates of lions in the key areas of South Luangwa National Park, Kafue National Park, and Liuwa Plain National Park. Through their research efforts, the ZCP has also contributed to aerial support that has assisted DNPW with enforcement actions.

Although their research focus has been on elephants, the Frankfurt Zoological Society has been active in North Luangwa ecosystem for over 20 years. Conservation South Luangwa (CLS) has been active in South Luangwa National Park and surrounding GMAs. Game Rangers International has been active in the Kafue ecosystem since 2010. Conservation Lower Zambezi (CLZ) is also active in the Lower Zambezi national park and surrounding GMAs.

Supplemental revenue sources are also gained with the support of several NGOs. NGOs can provide functions that include anti-poaching units and/or aerial support. One such example is the Frankfurt Zoological Society (FZS), which has been active in North Luangwa National Park for over 20 years. FZS established a partnership with DNPW in order to help preserve black rhino and elephant populations through the establishment of The North Luangwa Conservation Programme (NLCP).

Lion Management in Zambia

History of Lion trophy exports:

During 2008 - 2012, DNPW authorized the export of 289 lion trophies (50, 40, 89, 37, and 73 respectfully). During 2013 - 2015, the Zambian government established a lion hunting moratorium (some trophies apparently taken before the moratorium were exported during this time, however). The moratorium was established to allow time to restructure Zambia's governance of lions and to allow a period of time for lion recovery (DNPW 2016). Data comparing the lion population status before and after the moratorium are currently unavailable; hence, the success of the moratorium cannot be fully assessed.

Lion Hunting and Concessions:

Zambia lion hunting occurs in *Game Management Areas (GMAs)* and *Open Game Ranches (OGRs)*. OGRs are unfenced private lands reserved for the wildlife conservation management of an individual or local community. They are buffered by GMAs. DNPW issues annual non-resident

hunting quotas to the OGRs in exchange for managing the wildlife; although all animals remain the property of the State (DNPW 2016).

All 20 of Zambia's national parks are surrounded by GMAs, but currently, lion hunting only occurs within hunting blocks located in the GMAs that surround the National parks in the Luangwa, Kafue, and Lower Zambezi ecosystems. GMAs are primarily designated for safari (tourist) and resident hunting, but some GMAs also include photographic tourism. All GMAs allow settlement. There are 36 GMAs in Zambia covering 177,404 km² (DNPW 2016). Most, but not all, GMAs have General Management Plans outlining basic management practices. Community-Based Natural Resource Management (CBNRM) is implemented within GMAs through Community Resource Boards (CRBs) (DNPW 2016). The CRBs focus on the economic and social well-being of local communities. There are currently 75 registered CRBs within Zambia that employ approximately 750 community scouts and 79 support staff.

DNPW, in consultation with the local community, is mandated to grant hunting concessions within specific hunting blocks within GMAs. Hunting concessions must be registered in Zambia, have a tourism enterprise license, have a valid tax clearance certificate, provide proof that the company is not bankrupt, and they must meet any additional conditions set by an evaluation committee (DNPW 2016). Leases are stated to range from 7 - 15 years, with the length of lease time dependent on the abundance of species classified within the individual hunting block (DNPW 2016). Prime hunting blocks have greater species abundance and are generally awarded shorter lease agreements in comparison to secondary hunting blocks. Secondary hunting blocks are generally given longer lease periods in an effort to provide incentives for the concessionaire to invest greater resources, allowing wildlife populations to increase before offering hunting (DNPW 2016).

Hunting block concessions are awarded through a bid process in accordance with the Zambia Public Procurement Act No 12 of 2008. Bids are taken from companies through a "two envelop system." The bids consist of a technical proposal and a financial proposal being placed in separate clearly marked envelopes. The technical bid is required to be evaluated by criteria outlined in Zambia's Wildlife Act before the envelope containing the financial bid is opened. Financial envelopes will only be opened for bidders that meet a specific technical expertise (e.g., a score of over 80 on the established criteria). The lease is awarded to the bidder that qualified with a minimum technical rating of 80 and whom submitted the highest financial bid (DNPW 2016).

Successful bidders must address statutory obligations to communities and provide enforcement contributions when developing Concessionary Agreements. Concessionary Agreements are developed through a partnership between the communities, safari operators, professional hunters, and DNPW. As such, a hunting concession agreement is not valid without the signature of the Chief(s) or CRB associated with the hunting block (DNPW 2016). Concessionaires are required to use collected fees to support resource protection by providing community scouts, vehicles, fuel, patrols, and equipment. They must provide infrastructure development to local communities and also offer resource monitoring and fire management. Some concessionaires further benefit community development by supporting the employment of teachers and nurses, purchasing ambulances, building classrooms and clinics, and providing houses for teachers and health personnel. Moreover, they are mandated to provide 50% of the meat from hunted animals to the local community. Concessionaires are evaluated annually and those that do not comply with their obligations can have their concession terminated before the end of the agreement's term (DNPW 2016).

Hunting Quotas:

From 2005 - 2012, Zambia had quotas that totaled 683 lion in 21 GMAs and 5 OGRs, with the highest annual quota set at 117 lions and the lowest at 55 lions (DNPW 2016). The quotas were generally based on the previous year's lion quotas and, in some cases, the quotas were a fixed part of a concession agreement (DNPW 2016). However, DNPW did not completely identify the basis for these quotas or how they were distributed. Currently, quotas are based primarily on lion populations determined through aerial surveys (DNPW 2016). However, information obtained from ground counts, patrol sightings, local and expert opinion, and hunting monitoring is also used. CRBs use the information they have collected to determine what the GMA quota should be. Their proposal is submitted to DNPW for approval. Once a proposal is received, DNPW accepts feedback from field staff and safari hunting outfitters, as well as the hunting guidelines (below), before the quotas are approved by the Wildlife Conservation and Management Unit and distributed by their Licensing Unit. The quotas are then distributed to the CRBs and hunting companies. DNPW is required to share the approved quotas with other government agencies, including the Auditors General Office and Anti-Corruption Commission. For 2016, Zambia established a quota of one lion per hunting concession, for a total quota of 24 lions (2 hunted on OGRs and 22 hunted in GMAs). Quotas are set for individual hunting blocks within the GMAs.

Hunting Guidelines:

The Zambia's Conservation Strategy and Action Plan for the African lion was developed in 2010 and designed with a 10-year plan (DNPW 2016). The purpose of the plan is to gain stakeholder participation while using adaptive management practices when addressing concerns regarding scientific management, habitat protection, and human-lion conflicts. Based on the principles of the Action Plan, following the three-year moratorium, in 2016, DNPW consulted independent lion experts and held a workshop that resulted in the creation of hunting guidelines (DNPW 2016). The guidelines are considered part of an adaptive process to manage lion hunting in Zambia. DNPW is in the process of transforming the guidelines into a statutory law that will include provisions for monitoring lion hunting through an age-based system (DNPW 2016). The lion hunting guidelines include, but are not limited to, the following recommendations:

1. No hunting of female lions.
2. No hunting of any lion born or held in captivity.
3. No use of pre-recorded sounds in lion hunting.
4. No lion hunting on fenced game ranches.
5. Lions should only be hunted in Prime and Secondary areas and Open Game Ranches known to be rich in lion and prey.
6. Establishment of a place for trophy measurements of hunted lions for exports should be established.
7. DNPW shall establish a lion aging evaluation committee that will include representatives from the Professional Hunters Association, the Safari Operator Association, the Wildlife Producers Association, and officers from DNPW that are nominated by the director. Prior to issuing CITES permits, the committee shall meet once a year to establish the age of hunted lions.

DNPW has established age-based categories that divide lion hunting into four age-based categories: Category 1 consists of male lions between five and six years old and above; Category 2 consists of male lions older than four years old, but younger than five years old; Category 3 consists of male lions that are younger than four years old; and Category 4 consists of male lions seven years old or older. DNPW has determined that only male lions that are five years and older should be hunted. However, DNPW may authorize the export of Category 2 male lions so as not to penalize the hunter. Lions that are less than four years old will be confiscated and may not be exported. In cases where lions under five years old are taken, however, the professional hunter and the safari outfitter may be penalized (Becker 2017 per. comm.).

Wildlife officers must also accompany hunters on all hunts (DNPW 2016). The officer is responsible for recording hunt activities on specified forms such as the Safari Hunting Monitoring form and Trophy Measurement form. The officer endorses licenses to ensure that they are not used more than once and the officer also ensures that all harvested trophies are registered (DNPW 2016).

Hunting-generated Revenue:

DNPW receives revenue by charging GMA fees per lion hunt. They also receive funds from annual professional hunter fees, certificate of valuation of trophies fees, certificate of ownership of trophies fees, permit fees, handling fees, and CITES security stamp fees. Hunting license fees in Zambia are statutory. The foreign hunter looking to take a lion must pay the fee directly to the outfitter, with the minimum amount currently set at \$4,200. DNPW collects these fees from the outfitter/concession and does not deal with the foreign hunter directly. Therefore, the outfitter may choose to charge the foreign hunter any amount greater than \$4,200. The revenue generated from license fees (also referred to as Animal fees by DNPW) is mandated to be shared with CRBs under the Zambia Wildlife Act No. 14 of 2015. The fees are shared with CRBs and DNPW as follows:

License fees (animal fees):

- 5% of funds go to the CRB chief/leader.
- 45% of funds go to CRB community funds.
 - According to Zambia's "Guideline on the use of Community funds accrued from wildlife management", 45% of these community funds should go to wildlife protections and patrols, 35% should go to community projects such as constructing clinics, roads, schools, and wells, and 20% of the funds should go towards CRB administration costs.
- 50% of funds go to DNPW (mandated under the Zambia Wildlife Act No. 12 of 1998 and continued in the Wildlife Act) in the form of conservation funds, including, but are not limited to: scout/wildlife officer salaries, resource protection, consultancy and legal fees, animal surveys, staff training, administrative and operational expenses, repair and maintenances, and other conservation expenses.

According to Zambia's hunting guidelines, hunts involving lions are required to be a minimum of 16 days (DNPW 2016). A daily conservation fee of \$150 per hunter and \$100 per observer is collected for monitoring purposes (DNPW 2016). These daily hunt fees typically cover combined hunt packages that include hunting lion, along with other species such as hippos and impalas. The fees are allocated by percentages to CRBs and DNPW as follows:

Daily fees (Concession fees):

- 5% of funds go to the CRB chief/leader.
- 15% of funds go to CRB community funds.
 - Based on recommended guidelines, 45% of these community funds go to wildlife protections and patrols, 35% goes to community projects such as constructing clinics, roads, schools, and wells, and 20% of the funds go to CRB administration costs.
- 80% of funds go to DNPW in the form of conservation funds, including, but are not limited to: scout/wildlife officer salaries, resource protection, consultancy and legal fees, animal surveys, staff training, administrative and operational expenses, repair and maintenances, and other conservation expenses.

Hunting fees for all species accounted for 32% of revenues that DNPW received during 2010 - 2012. However, that amount was reduced to about 4% during the 2013 and 2014 moratorium (DNPW 2016). Safari hunting also creates other revenue for Zambia, through activities such as tipping, eating in restaurants, staying at lodges, purchasing souvenirs, and paying for taxidermy.

Evaluation:

As stated earlier, the Service will evaluate any application in accordance with our threatened species permitting regulations at 50 CFR 17.32 and issuance criteria for endangered species permits (50 CFR 17.32(a)(2)). In evaluating each of these criteria on the basis of information available to the Service, we have been able to determine that this import of the wild lion trophy would qualify for the issuance of the required import permit.

17.32(a)(2)(i): Whether the purpose for which the permit is required is adequate to justify removing from the wild or otherwise changing the status of the wildlife sought to be covered by the permit:

In evaluating this criterion, the Service assesses whether the hunting program established for lions has demonstrated the ability to contribute toward positive conservation outcomes that mitigate or improve the status of lions throughout their range within Zambia, while addressing the main threats of habitat loss, human-lion-livestock conflict, and prey depletion.

The IUCN's 2012 Guiding principles on trophy hunting support the concept that hunting can provide a conservation benefit if it is part of a governance system that provides both implementation and enforcement at a level that adequately supports conservation. The Service also believes that conservation hunting can assist the wild lion populations if managed well. Lion hunting, if managed properly, could meet the Service's enhancement criteria under the Act. There must be adequate information and data clearly showing that removing lions from the wild for trophy hunting will be done at a level and with sufficient oversight such that it improves the current status of lions in the wild (50 CFR 17.32).

Zambia has demonstrated their desire to maintain the long-term conservation of their lion population with their 2013-2015 moratorium on lion hunting. When the Zambian government realized that population numbers were declining to an unsustainable level, they applied the

moratorium for 3 years, until they determined that their lion population increased enough to tolerate limited offtakes (DNPW 2016).

As mentioned in the sections above, the Zambian government has clarified that they have established block quotas by surveying lion populations through a combination of aerial surveys and information obtained from ground counts, patrol sightings, local and expert opinion, and hunting monitoring. Because surveys are continually being carried out on the current population of lions in Zambia, future findings will consider updated population data. Therefore, the Service will need to continue to monitor the effectiveness of new lion surveys that contribute to determining the population status of lions in correlation with hunting block quotas.

The difference in male turnover between hunting/non-hunting periods is apparent from cub survival rates. Macdonald (2016) reports that in the absence of hunting, 80% of cubs survived to one year of age, during the trophy hunting period, 66% of cubs survived to one year of age. The principle behind restricting trophies to older males is that their tenure in the pride should have been long enough to raise at least one generation of cubs to adulthood. However, lion experts have come to varying conclusions regarding the minimum age recommended for sustainable lion hunting. Creel *et al.* (2016), not only state that the minimum hunting age should be 7-8 years old, but they also conclude that age-restricted harvesting is not sufficient to yield sustainability by itself. However, other experts believe that the sustainable age of lions is five years and older, provided that proper identification/aging can occur before the animal is harvested. Nonetheless, lion experts are in consensus that hunting lions younger than five years old may not be sustainable. Zambia's recommended hunting guidelines are in line with the minimum age of five-year-old lions, but the Service is concerned that allowing for the export of lions under this age (Zambia allows export of four-year-old lions, but not less than four years old) may not be sustainable. Zambia will need to closely monitor the number of exports of "under age" trophies to determine if there are sufficient disincentives to discourage taking such animals.

The Zambian government has done a good job of identifying how resources from hunting-generated revenue would be shared with communities. The local communities receive funds from concessions and license (animal) hunting fees. As outlined in the license fee distribution above, 35% of the funds allocated to CRBs help support community projects such as constructing clinics, roads, schools, and wells, thereby providing incentives for the local community to ensure the long-term conservation of the lions. In addition, 45% of the CRB license fees go to wildlife management, including resource protection and patrols.

Zambia's human population growth has contributed to conflicts within the GMAs. As clarified above, DNPW contributes 50% of the license fees (animal fees) and 20% of the Concession fees to local communities. These financial benefits received from living in a GMA have provided incentives for newcomers to illegally squat in the GMAs looking to capitalize on the financial benefits. Consequently, the illegal squatting has caused enough conflict with local people to trigger action to be taken by the Zambian government. In August of 2015, over 2,000 squatter households within the Mumbwa GMA were evicted so that the registered local communities could receive the full benefits of living within a conservation area (DNPW 2016). The long-term impacts of the eviction will need to be considered in future findings, as the information becomes available.

Therefore, based on the information available to the Service and considering that the lion to be imported was harvested in compliance with Zambian laws and regulations, we conclude that the

purpose for which a permit is being requested is adequate to justify removing the sport-hunted trophy lion from the wild or otherwise changing its status.

17.32(a)(2)(ii): The probable direct and indirect effect that issuing the permit would have on the wild populations of the wildlife sought to be covered by the permit:

As described under Current Lion Status in Zambia above, Zambia has taken great strides to address the major threats facing lions through their hunting program and updated regulations. In 2010, Zambia developed a ten-year Conservation Strategy and Action Plan for the African lion. Since the establishment of the Action Plan, the Zambian government has cooperated with partners to implement the strategy (DNPW 2016). Monitoring, local community benefits, human lion-conflict, and land use planning are only some of the benefits of the Action Plan (DNPW 2016). The development of the Community-Based Natural Resource Management Unit has helped facilitate Zambia's economic and social well-being by providing technical support to CRBs, training of village scouts and CRB members, and monitoring the use of funds disbursed to the CRBs. An investigative unit also carries out investigations related to wildlife crimes. Furthermore, the President of the Republic of Zambia has also directed the Defense and security wings in the country to join in the fight against poaching.

Taking into account that the off-take of wild lions is currently being monitored by the Zambian government, that the government of Zambia is implementing an age-based harvest strategy and a precautionary quota, and that the government of Zambia's management of lions provides community benefits, Ms. Abbott's hunting and subsequent import of this lion provides an indirect benefit to wild populations by helping to support the reserves where lions are found. Therefore, based on the information available to the Service, the probable direct and indirect effect that issuing an import permit for this legally hunted lion would have on the species would be positive.

17.32(a)(2)(iii): Whether the permit, if issued, would in any way, directly or indirectly, conflict with any known program intended to enhance the survival probabilities of the population from which the wildlife sought to be covered by the permit was or would be removed:

We are not aware of any programs intending to enhance the survival of lions in Zambia that would conflict with Zambia's management plan. However, we are aware of the Zambian Carnivore Programme (ZCP), which is a non-profit Zambian registered trust that is dedicated to conserving large carnivore species and the ecosystems they reside in. The program works to build capacity within local Zambian organizations and government bodies for the sustainable conservation of large carnivores and herbivores, their ecological functions, and their habitats. Therefore, based on the information available to the Service, the issuance of an import permit for this legally hunted wild lion would not conflict with any known conservation program for the species.

17.32(a)(2)(iv): Whether the purpose for which the permit is required would be likely to reduce the threat of extinction facing the species of wildlife sought to be covered by the permit:

In evaluating this criterion, the Service assesses whether the hunting program established for lions is subject to a governance structure that clearly allocates management responsibilities and supports regulatory pathways in support of positive conservation outcomes. Zambia's lion management

program is based on a precautionary quota, an age-based harvest with monitoring of off-takes, and direct community benefits (DNPW 2016).

Currently, per Zambia's approved budget, DNPW retains all revenue from sport hunting. 50% of animal fees and 80% of concession fees are allotted to DNPW as conservation funds. This funding source is vital to lion conservation because it supports on-the-ground conservation, protected area management, and enforcement efforts. Additionally, 45% of animal fees and 15% of concession fees go to communities where the hunts take place. As long as communities continue to benefit from the sport hunting of lions through job opportunities, funded community projects, and sharing of meat derived from hunting, they may have the incentive to protect it.

Given that lion management in Zambia allows limited, controlled off-take of lions in a manner that mimics natural processes and provides community benefits, the legal hunt undertaken by Ms. Abbott will contribute to reducing the threat of extinction of lions in Zambia. The utilization of hunters, such as Ms. Abbott in managing the lion populations in GMAs and OGRs is an important element of the success of lion management in Zambia.

Therefore, based on the information available to the Service, the purposes for which this import permit would be issued would likely reduce the threat of extinction facing lions in Zambia.

17.32(a)(2)(v): The opinions or views of scientists or other persons or organizations having expertise concerning the wildlife or other matters germane to the application:

As with any discussion of hunting, there are numerous opinions on the impact that hunting has on a species. From reviewing comments made during the listing process for lions, as well as information obtained through personal conversations and literature, there is general agreement that hunting, done properly and well managed, would not have an adverse effect on lion populations. Mimicking natural processes within the management program, such as maintaining pride hierarchy for as long as possible by leaving the alpha male in place, will better ensure the long-term survival of the species. Numerous researchers have stated that, while they may not support hunting in general, they see that benefits can be obtained through a science-based hunting program for lions. There have been a large number of comments from some NGOs and the public opposing hunting any lions, but particularly captive-bred lions. This opposition, however, is primarily based on the perceived ethics of hunting. While these comments are an indication of concerns from some members of the public over hunting, they are not germane to our review process.

Therefore, based on the information available to the Service, there is general support from scientists and other persons or organizations having expertise concerning lions that the legal well managed, science-based harvest of lions, and the subsequent import of these trophies, would not have an adverse effect on the species, but would further efforts to conserve the species in the wild into the future.

17.32(a)(2)(vi): Whether the expertise, facilities, or other resources available to the applicant appear adequate to successfully accomplish the objectives stated in the application:

Examining whether adequate resources exist, the Service relied primarily on information provided by Zambia (DNPW 2016). The long-term survival of lions in Zambia, is directly tied to the economic and ecological success of the country. When ZAWA became a semi-autonomous agency,

they struggled with funding to provide for adequate staffing and fulfillment of lion conservation objectives. However, after transforming back to a government agency, DNPW (formerly ZAWA) has been able to ensure that staff are adequately resourced and paid by Zambia's government, while retaining funding generated from sport hunting, as per the approved budget for the country. This ability to deliver on conservation objectives is improved with funding provided by U.S. sport hunters such as Ms. Abbot.

Therefore, based on the information available to the Service, the applicant undertook a legal, authorized hunt, abiding by management practices in accordance with the government of Zambia's laws and regulations, having the expertise, facilities, and other resources available to her to successfully accomplish the objective stated in the application.

Conclusion

Given the current status of lions within Zambia and the level of management and oversight provided to lions, it appears that the harvest and import of this lion as a sport-hunted trophy meet the purposes of the Act. Zambia's ongoing adaptive management and limited off-take of lions is important to the survival of lions in Zambia.

Therefore, with the information currently available to the Service and in accordance with the issuance criteria laid out above, the Service is able to make a determination that the import of this wild lion will enhance the propagation or survival of the species. Therefore, the Service is able to authorize the import of one male wild lion trophy taken in Zambia, to Marsha (b) (6) Abbot.

Permit Number: MA93468C-0
Effective: 06/08/2018 Expires: 06/07/2019

Issuing Office:

Department of the Interior
U.S. FISH AND WILDLIFE SERVICE
DIVISION OF MANAGEMENT AUTHORITY
BRANCH OF PERMITS, MS: IA
5275 LEESBURG PIKE
FALLS CHURCH VA 22041-3803

Mary Coghlan
CHIEF, BRANCH OF PERMITS, DMA

Permittee:

MARSHA (b) ABBOTT
(b) (6) (6)
MCGEHEE, AR (b) (6)
U.S.A.

Authority: Statutes and Regulations: 50 CFR 17.40(r).

Location where authorized activity may be conducted:
IMPORT THROUGH ANY PORT LISTED IN 50 CFR 14.12

Reporting requirements: Not applicable

Authorizations and Conditions:

- A. Authorized to import the sport-hunted trophy of one male African lion (*Panthera leo melanochaita*), taken in Zambia for the purpose of enhancement of the survival of the species.
- B. Specimen may not be sold or transferred for any financial remuneration.
- C. Trophy must have been taken during the 2018 hunting season.
- D. Trophy must be accompanied by valid hunting authorization issued by the government of Zambia for the 2018 season.
- E. Trophy must be accompanied by a valid Convention on International Trade in Endangered Species (CITES) Appendix II export permit/re-export certificate, source code "W", issued by the Management Authority of the exporting/re-exporting country.
- F. General conditions set out in Subpart D of 50 CFR 13, and specific conditions contained in Federal regulations cited above, are hereby made a part of this permit. All activities authorized herein must be carried out in accord with and for the purposes described in the application submitted. Continued validity, or renewal of this permit is subject to complete and timely compliance with all applicable conditions, including the filing of all required information and reports.
- G. The validity of this permit is also conditioned upon strict observance of all applicable foreign, state, local, tribal, or other federal law. This permit can be photocopied.
- H. Valid for use by permittee named above.
- I. Acceptance of this permit serves as evidence that the permittee understands and agrees to abide by the "General Permit Conditions" (copy attached).

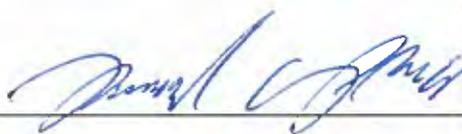

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted African Lion (*Panthera Leo Melanochiata*) trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Conservation Force
3240 S. I-10 Service Road W., Suite 200
Metairie, Louisiana 70001 USA

Type of Activity

**IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of
the Convention on International Trade in Endangered
Species (CITES) and/or U.S. Endangered Species Act (ESA)**

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1 a. Last Name Papapietro		1 b. First Name Richard		1 c. Middle Name/Initial (b) (6)	1 d. Suffix
2. Date of Birth (mm/dd/yyyy) (b) (6)	3. Telephone Number	3 a. Alternate Telephone Number			

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1 a. Name of business/agency, Tribe, or institution		1 b. Doing business as (DBA)			
2. Tax identification no.		3. Description of business/agency, Tribe, or institution			
4 a. Principal officer Last name	4 b. Principal officer First Name	4 c. Principal officer Middle name/initial		4 d. Suffix	
5. Principal officer title		5. Primary contact name			
7 a. Business telephone number	7 b. Alternate telephone number	7 c. Business fax number	7 d. Business e-mail address		

Section C: All applicants complete address information

1 a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (b) (6)				
Henderson	NV	1 d. Zip code/Postal code (b) (6)	1 e. County/Province	1 f. Country USA
2 a. Mailing address (include if different than physical address, include name of business/person if applicable) Same				
2 b. City	2 c. State	2 d. Zip code/Postal code	2 e. County/Province	2 f. Country

Section D: All applicants MUST complete

1. Attach the nonrefundable application processing fee in the form of a check or money order payable to the U S FISH AND WILDLIFE SERVICE in the amount of \$100. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].	
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in <i>Title 50 Part 13 of the Code of Federal Regulations</i> and the other applicable parts in subchapter B of Chapter I of Title 50. (b) (6) the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that the information herein may subject me to the criminal penalties of 18 U.S.C. 1001.	
Signature of applicant/Principal Officer for permit (No photocopied signatures)	Date of signature (mm/dd/yyyy) 05/15/2019

E. IMPORT OF SPORT-HUNTED TROPHIES (*Appendix I of CITES and/or ESA*)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Conservation Force, 504-837-1233, cf@conservationforce.org

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

- a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Panthera leo melanochaita (African lion)

- b. Sex (if known). Male

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Zambia - Sichifulo GMA. Nearest Town: Mulobezi. Latitude: 16.82944 Longitude: 25.49640

- b. Date wildlife is to be hunted:

July 25 - August 11, 2018

- c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Mulimo Safaris, Sichifulo GMA. Professional Hunter Greg Street

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

- b. Date wildlife was hunted:

- c. Name of hunting outfitter, safari company, or professional hunter you hunted with:
- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Michael Borman
Business Name: Bangweulu Taxidermy, Ltd.
Address: 4142/Chifwema Road
City: New Kasama
State/Province: Lusaka, Zambia.
Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted?

Please see attached.

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

Please see attached.

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

Please see attached.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

- 10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

- 11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year. (b) (6)

Applicant's signature:  _____ Date: 5/15/19

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

- 12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Conservation Force
Operator Enhancement Questionnaire

v.5/3/18

1. Name of area operator: MULIMO SAFARIS
- a. Years in business: 5
- b. Name of company conducting hunt: MULIMO SAFARIS
2. Name of concession: SICHIFULO GMA Size in km²: 3600
- a. Land tenure: Government lease Community Private ranch Private conservancy
- b. Length of concession agreement: 10 YEARS Can it be renewed? Yes No
- c. Are there any special obligations under the concession agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain:
YES. ANTI POACHING, COMMUNITY OBLIGATIONS, EMPLOYMENT
- d. Please provide the concession location and nearest city. Please attach a map or maps with the boundaries marked and showing the nearest city:

- e. If the concession borders a national park, please provide the park name: KAFUE NATIONAL PARK.
- f. Description of general and distinctive habitat features and any water features:
MIOMBO WOODLAND AND PLAIN.
3. Are there any communities living in the concession? Yes No
- a. If so, estimated number of people or villages in the concession? 1000
4. Are there communities bordering this concession? Yes No
- a. If so, estimated number of people or villages around the concession? 5000
5. Relevant game populations in the concession:¹

Species name	Relative Abundance (dense/avg./sparse)	Est. population	3-Year trend (up/down/stable)	How monitored?
Elephant	AVG		UP	SIGHTINGS
Lion	AVG		UP	SIGHTINGS
Leopard	RARE		UP	SIGHTINGS
Prey species	AVG		UP	SIGHTINGS

6. Total employment number: 30
- a. Please identify the number and type of all employees:

Type	Total number of this type	Number of this type who are local/from nearby communities
Professional Hunters	1	1

¹ The new FWS import permit application form asks the applicant: "9. a. Do you have any information regarding the population status or trend on the species hunted?"

Enhancement Finding

Applicant: Richard (b) (6) Papapietro (b) (6) (PRT- 93474C)

Richard (b) (6) Papapietro (b) (6) submitted an application on June 1, 2018, for the importation of one male African lion (*Panthera leo melanochaita*) from Lusaka, Zambia for the purpose of enhancing the propagation and survival of the species in the wild. After evaluating the available information submitted with the application, information provided by the government of Zambia, other information available to the Service, and comments received from interested parties, the U.S. Fish & Wildlife Service (Service) has determined that the importation of the sport-hunted trophy taken from July 25, 2018, through August 11, 2018, from this wild lion (*P. l. melanochaita*) population within Zambia meets the enhancement criteria under 50 CFR 17.32.

Governance of the Lion in the United States:

On October 29, 2014, the Service published in the Federal Register a finding that listing the African lion subspecies (*Panthera leo leo*) as a threatened species under the Endangered Species Act (Act or ESA) was warranted and proposed a rule under Section 4(d) of the Act to provide conservation measures for the African lion. (79 Fed. Reg. 64472.) On December 23, 2015, after fully considering the comments from the public and the peer reviewers on the proposed rule, the Service published in the Federal Register the final rule in which the taxonomic classification of the Asiatic lion (previously classified as *P. l. persica* and listed as an endangered species under the Act) was changed to *P. l. leo* (Asia and western, central and northern Africa) and listed as an endangered species, and the *P. l. melanochaita* (southern and eastern Africa) subspecies was listed as a threatened species with a rule under Section 4(d) of the Act, which is set forth at 50 CFR 17.40(r). 80 Fed. Reg. 79999. The effective date of this listing was January 22, 2016. Therefore, as of January 22, 2016, the lion subspecies *Panthera leo melanochaita*, whose range includes Zambia, is listed as threatened under the Act and is regulated under an ESA Section 4(d) special rule [50 CFR 17.40(r)].

Section 9 of the Act and our implementing regulations at 50 CFR 17.21 and 50 CFR 17.31 set forth a series of general prohibitions that apply to all endangered and threatened wildlife, respectively,

except where a 4(d) rule applies to threatened wildlife, in which case the 4(d) rule contains all the applicable prohibitions and exceptions. Under the 4(d) rule for *P. l. melanochaita*, all of the prohibitions under 50 CFR 17.31 apply to *P. l. melanochaita* specimens. These prohibitions, at 50 CFR 17.21 and 17.31, in part, make it illegal for any person subject to the jurisdiction of the United States to “take” (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or to attempt any of these) within the United States or upon the high seas; import or export; deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever, in the course of commercial activity; or sell or offer for sale in interstate or foreign commerce any lion specimens. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken in violation of the Act. Permits may be issued to carry out otherwise prohibited activities involving endangered and threatened wildlife species under certain circumstances. Regulations governing permits for endangered species, such as *P. l. leo*, are codified at 50 CFR 17.22. Regulations governing permits for threatened species, such as *P. l. melanochaita*, are codified at 50 CFR 17.32.

In sum, under paragraph 17.40(r)(1), all the prohibitions and exceptions under 50 CFR 17.31 and 50 CFR 17.32 apply to *P. l. melanochaita*. Accordingly, the Service may authorize the import of a sport-hunted lion trophy from Zambia, but only if it first makes a finding that permitting import of a trophy would enhance the survival of the species in the wild.

As we explained when finalizing the 4(d) rule for *P. l. melanochaita*, any person wishing to conduct an otherwise prohibited activity, including all imports of *P. l. melanochaita* specimens, must first obtain a permit under 50 CFR 17.32. As with all permit applications submitted under 50 CFR 17.32, the individual requesting authorization to import a sport-hunted trophy of *P. l. melanochaita* bears the burden of providing information in their application showing that the activity meets the requirements for issuance criteria under 50 CFR 17.32. In some cases, such as for import of sport-hunted trophies, it is not always possible for the applicant to provide all of the necessary information needed by the Service to make a positive determination under the Act to authorize the activity. In such cases, the Service may consult with the range country and other interested parties to the extent practicable to obtain necessary information. The Service will make the required findings on sport-hunted trophy imports of *P. l. melanochaita* on an individual application basis, however information obtained for the country as a whole will continue to be considered as it contains information pertinent to the Service’s evaluation. Any new information obtained or submitted to the Service will be evaluated and considered in all future findings for sport-hunted trophies of *P. l. melanochaita* taken in Zambia.

General considerations:

As we also explained when finalizing the 4(d) rule, our threatened species permitting regulations at 50 CFR 17.32 provide issuance criteria for threatened species permits [(50 CFR 17.32(a)(2))], but do not specify what would constitute the enhancement of propagation or survival with regard to authorizing the import of parts or products of *P. l. melanochaita*, including sport-hunted trophies. Therefore, when making a determination of whether an otherwise prohibited activity enhances the propagation or survival of *P. l. melanochaita*, the Service examines the overall conservation and management of the subspecies in the country where the specimen originated and whether that management of the subspecies addresses the threats to the subspecies (*i.e.*, that it is based on sound scientific principles and that the management program is actively addressing the current and longer term threats to the subspecies). In this review, we evaluate whether the import

of a sport-hunted lion trophy taken in Zambia contributes to the overall conservation of the species by considering whether the biological, social, and economic aspects of a program from which the specimen was obtained provide a net benefit to the subspecies and its ecosystem.

The Service has evaluated Mr. Papapietro's application involving a *P. l. melanochaita* sport-hunted trophy taken in Sichifulo GMA, Zambia, in the context of enhancement of propagation or survival in accordance with our threatened species permitting regulations at 50 CFR 17.32 and issuance criteria for threatened species permits [(50 CFR 17.32(a)(2)]. These include, in addition to the general permitting criteria in 50 CFR 13.21(b):

- (i) Whether the purpose for which the permit is required is adequate to justify removing from the wild or otherwise changing the status of the wildlife sought to be covered by the permit;
- (ii) The probable direct and indirect effect that issuing the permit would have on the wild populations of the wildlife sought to be covered by the permit;
- (iii) Whether the permit, if issued, would in any way, directly or indirectly, conflict with any known program intended to enhance the survival probabilities of the population from which the wildlife sought to be covered by the permit was or would be removed;
- (iv) Whether the purpose for which the permit is required would be likely to reduce the threat of extinction facing the species of wildlife sought to be covered by the permit;
- (v) The opinions or views of scientists or other persons or organizations having expertise concerning the wildlife or other matters germane to the application; and
- (vi) Whether the expertise, facilities, or other resources available to the applicant appear adequate to successfully accomplish the objectives stated in the application.

In addition to these factors, particularly in relation to sport hunting, we find the *IUCN Species Survival Commission (SSC) Guiding Principles on Trophy Hunting as a Tool for Creating Conservation Incentives, Ver. 1.0* (IUCN SSC 2012), to provide useful principles, which, considered in conjunction with our threatened species issuance criteria, will aid the Service when making this enhancement finding for the importation of a sport-hunted trophy of *P. l. melanochaita* from Lusaka, Zambia. This document sets out guidance from experts in the field on the use of trophy hunting as a tool for "creating incentives for the conservation of species and their habitats and for the equitable sharing of the benefits of use of natural resources" (IUCN SSC 2012, p. 2) and recognizes that recreational hunting, particularly trophy hunting, can contribute to biodiversity conservation and more specifically, the conservation of the hunted species.

The SSC document lays out five guiding principles that, considered in conjunction with our threatened species issuance criteria, will aid the Service in making this enhancement finding for importation of a sport-hunted trophy of *P. l. melanochaita*:

- (a) *Biological sustainability*: The hunting program cannot contribute to the long-term decline of the hunted species. It should not alter natural selection and ecological function of the hunted species or any other species that share the habitat. The program should not inadvertently facilitate poaching or illegal trade in wildlife by acting as a cover for such illegal activities.

The hunting program should also not manipulate the ecosystem or its component elements in a way that alters the native biodiversity.

(b) *Net Conservation Benefit*: The biologically sustainable hunting program should be based on laws, regulations, and scientifically based quotas, established with local input, that are transparent and periodically reviewed. The program should produce income, employment, and other benefits to create incentives for reducing the pressure on the target species. The program should create benefits for local residents to co-exist with the target species and other species. It is also imperative that the program is part of a legally recognized governance system that supports conservation.

(c) *Socio-Economic-Cultural Benefit*: A well-managed hunting program can serve as a conservation tool when it respects the local cultural values and practices. It should be accepted by most members of the community, involving and benefiting local residents in an equitable manner. The program should also adopt business practices that promote long-term economic sustainability.

(d) *Adaptive Management: Planning, Monitoring, and Reporting*: Hunting can enhance the species when it is based on appropriate resource assessments and monitoring (e.g., population counts, trend data), upon which specific science-based quotas and hunting programs can be established. Resource assessments should be objective, well documented, and use the best science available. Adaptive management of quotas and programs based on the results of resource assessments and monitoring is essential. The program should monitor hunting activities to ensure that quotas and sex/age restrictions of harvested animals are met. The program should also generate reliable documentation of its biological sustainability and conservation benefits.

(e) *Accountable and Effective Governance*: A biologically sustainable trophy-hunting program should be subject to a governance structure that clearly allocates management responsibilities. The program should account for revenues in a transparent manner and distribute net revenues to conservation and community beneficiaries according to properly agreed decisions. All necessary steps to eliminate corruption should be taken and to ensure compliance with all relevant national and international requirements and regulations by relevant bodies such as administrators, regulators and hunters.

This approach to enhancement findings for the importation of a sport-hunted trophy of *P. l. melanochaita* is consistent with the purpose and intent of the Act. As such, before the Service will authorize the importation of a sport-hunted trophy, we must determine that the trophy-hunting program is managed to ensure the long-term survival of the species. As part of this evaluation, we recognize that in many parts of the world, wildlife exists outside of protected areas and must share the same habitat and compete with humans living in these areas for space and resources. As identified in the *IUCN SSC Guiding Principle on Trophy Hunting as a Tool for Creating Conservation Incentive*, if communities that share these resources with wildlife do not perceive any benefits from the presence of wildlife, they may be less willing to tolerate the wildlife. However, under certain circumstances, trophy hunting can address this problem by making wildlife more valuable to the local communities, thus encouraging community support for managing and conserving the hunted species, as well as other species.

In evaluating whether the importation of Mr. Papapietro's trophy of *P. l. melanochaita* would be authorized pursuant to 50 CFR 17.32, in accordance with our threatened species issuance criteria, we examined how Zambia's management program for lions addresses the three main threats that have led to the decline of the subspecies: habitat loss, loss of prey base, and human-lion conflict. When examining a management program and whether this trophy taken as part of that program meets the issuance criteria, we study a number of factors. Some of the factors we considered include whether the program is based on sound scientific information and identifies mechanisms that would arrest the loss of habitat or increase available habitat (*i.e.*, by establishing protected areas and ensuring adequate protection from human encroachment). We considered whether the management program actively addresses the loss of the lion's prey base by addressing poaching or unsustainable offtake within the country. Several components of a management plan from which trophy imports could meet the issuance criteria would be whether there are government incentives in place that encourage habitat protection by private landowners and communities, and incentives provided to local communities to reduce the incursion of livestock into protected areas or to actively manage livestock to reduce conflicts with lions. We examined if the hunting component of the management program supports all of these efforts by looking at whether hunting concessions/tracts are managed to ensure the long-term survival of the lion, its prey base, and habitat. Hunting, if properly conducted and well managed, can generate significant economic benefits that may contribute to the conservation of lions. In looking at whether we are able to authorize the import of a trophy under the issuance criteria at 50 CFR 17.32(a)(2), we examined if the trophy hunting provides financial assistance to the wildlife department to carry out elements of the management program, and if there is a compensation scheme or other incentives to benefit local communities that may be impacted by lion predation. We also considered how the U.S. hunter's, in this case, Mr. Papapietro's, participation in the hunting program contributes to the overall management of lions within the country.

The management program in Zambia for *P. l. melanochaita* is expected to address, but is not limited to, evaluating population levels and trends; the biological needs of the species; quotas; management practices; legal protection; local community involvement; and use of hunting fees for conservation. In evaluating these factors, we work closely with the range countries and interested parties to obtain the information. By allowing entry into the United States of *P. l. melanochaita* trophies from range countries that have science-based management programs, we anticipate that other range countries would be encouraged to adopt and financially support the sustainable management of lions that benefits both the species and local communities. In addition to addressing the biological needs of the subspecies, a scientifically based management program will provide economic incentives for local communities to protect and expand *P. l. melanochaita* habitat.

Basis for Finding:

On February 2, 2016, the Service sent a letter to Zambia's Wildlife Authority with a list of questions that would aid the Service in evaluating the overall conservation and management of the subspecies, *P. l. melanochaita*, in Zambia and whether that management addressed the three main threats that have been identified as the reason for the decline of the species: habitat loss, loss of prey base, and human-lion conflict. Additionally, in the letter the Service referenced the *IUCN Species Survival Commission (SSC) Guiding Principles on Trophy Hunting as a Tool for Creating Conservation Incentives, Ver. 1.0* (IUCN SSC 2012), as it provides useful principles, which when

considered in conjunction with the Service's permit issuance criteria, would aid when making the required enhancement findings for permitting importation of sport-hunted lion trophies.

In response to our February 2, 2016, letter, Zambia's Department of National Parks and Wildlife (DNPA), herein referred to as DNPW (DNPW 2016), provided a binder of documentation describing Zambia's lion population and management plans. In addition, the Service met with representatives of Zambia's DNPW during the 17th Meeting of the Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) in Johannesburg in late September 2016. The DNPW binder documents, dated May 5, 2017, along with the Service's final rule on the lion listing under the Act, relevant information obtained separately through open sources such as IUCN documents, relevant information from DNPW, comments received from interested parties, and Mr. Papapietro's application were the basis of this finding.

Governance of Lions in Zambia:

The responsibility for implementing wildlife conservation laws in Zambia dates back to the 1930s or 1940s with the establishment of the Department of Tsetse, Fisheries, and Wildlife. In the late 1950s, this agency became the Department of Game and Fisheries and operated under this designation until the mid-1970s, when it became the Department of National Parks Wildlife Service (DNPWS) who was responsible for the protected area network. In 1999, the Government of Zambia transformed this agency into Zambia's Wildlife Authority (ZAWA), creating a semi-autonomous agency responsible for the management and protection of this network, with statutory powers derived through the Zambia Wildlife Act No. 12 of 1998. However, this agency, due partly to its semi-autonomy, had a low funding capability, relying primarily on revenue from tourism, which also included sport hunting. Between 1999 and 2005, ZAWA struggled with their law enforcement capabilities due to inadequate resources. The costs associated with transforming DNPWS to ZAWA continued to affect the financial and staff allocations for law enforcement activities. Large sums of money that could have been utilized by law enforcement were apparently channeled into tasks involved in the transformation process.

Since 2005, in partnership with the Zambia Lion Project (ZLP), ZAWA (now DNPW) established a voluntary program to assess and age lions taken as trophies (DNPW 2016). From 2006 through 2012, DNA samples were taken from teeth of both live and trophy lions in order to estimate the age of lions taken as trophies (DNPW 2016). The results from these past sampling efforts helped demonstrate the performance of the hunting sector during this time. It has also provided a baseline for comparing future performance.

By 2010, Zambia developed a ten-year Conservation Strategy and Action Plan for the African lion. Since the approval of this strategy, research has begun and management actions have been taken to address local community benefits, human-lion conflict, land use planning and zoning, trade, and monitoring (DNPW 2016). Some of the lion-related studies that were initiated are the Zambia Carnivore Programme (ZCP), Kafue Lion Project, and Zambia Lion Project (ZLP) (DNPW, 2106). The development of this strategy also led to the employment of 12 ecologists, with three committed to spending 70% of their work time on lion-related issues (DNPW 2016).

In 2015, ZAWA was disbanded and reincorporated as a government department, the Department of National Parks and Wildlife (DNPW). In addition, the Zambia Wildlife Act No. 12 of 1998 was

repealed. However, the Wildlife Act No. 14 of 2015 (Wildlife Act) is still the principle legislation guiding the management of wildlife in Zambia through a system implemented and enforced by DNPW with assistance from stakeholders (DNPW 2016).

The Wildlife Act is administered by DNPW under the Ministry of Tourism. DNPW is headed by a Director, with assistant directors who command 4 elements of the department: Principal Warden-Operations Wildlife Law Enforcement Unit, Principal Warden-Conservation Unit, Principal Engineer Infrastructure Development Unit, and Principal Natural Resource Management Officer Community-based Natural Resource Management Unit. *The Wildlife Law Enforcement Unit* is comprised of 1,250 Wildlife Police Officers who are responsible for investigating and enforcing wildlife crimes within 236,376 km² of wildlife area (average 189 km² per officer). The Zambian government has also committed to adding an additional 850 officers by 2018 (600 new officers were reportedly added in 2016). *The Wildlife Conservation Unit* is responsible for mitigating human-wildlife conflict, facilitating wildlife officer trainings, regulating private wildlife estate operations, managing ecosystems, managing landscape conservation of certain species, and both developing and implementing park regulations. *The Infrastructure Development Unit* is responsible for construction and maintenance of infrastructures and machinery within protected areas. *The Community-based Natural Resource Management Unit* is responsible for co-managing Game Management Areas (GMAs) with local communities. Duties include providing technical support to Community Resource Boards regarding the management of human-natural resources in GMAs and open areas. This unit facilitates the election of the Community Resources Board members and the election of Village Action Groups. Responsibilities also include monitoring the use of funds disbursed to Community Resources Boards and training village scouts and Community Resources Board members.

The lion is a protected species under the Wildlife Act. It is a criminal offense to hunt, kill, capture, or possess a lion without a license. The lion is also protected under private wildlife estate legislation and statutory instruments implemented with the (now repealed) Wildlife Act of 1998 and carried over to the Wildlife Act. Additionally, in 2016, four new statutory regulations were reportedly enacted to address various aspects of lion management to complement the operation of the new Wildlife Act. They included the Zambia wildlife regulations for granting of hunting concessions, lion sport hunting, keeping of big cats in captivity, and conducting ecological or research wildlife assessments (DNPW 2016).

In addition to Zambia's domestic laws, it is also a Party CITES. The lion is listed in Appendix II of the Convention. As an Appendix-II species, certain criteria must be met before such species can be exported, including findings from the exporting country's CITES Management Authority that the specimen was legally acquired and the country's Scientific Authority that the export will not be detrimental to the survival of the species in the wild. In their reply to our inquiry, Zambia provided a copy of their May 5, 2016, non-detriment finding for lions. This finding states that "(t)he CITES Scientific authority of Zambia has considered the population of lion in Zambia; the quota-setting system and current precautionary quota of only 24 lions; the newly implemented age-based harvest policy; the limited offtake; the adaptive management of lion; and the substantial revenues generated for DNPW operations, anti-poaching, and community development." They further explain that their positive finding was based on three pillars that include a "precautionary" quota, age-based harvesting, and community benefits.

Current Lion Status in Zambia

Lion Range:

According to DNPW, the lion range in Zambia covers about 63% of Zambia's protected areas, which is about 145,000 km² (DNPW 2016). Historically, lions occurred in the West Lunga complex, although, recently, populations have not been found in this complex (DNPW 2016). The majority of lions are found in three main clusters throughout Kafue, Luangwa, and the Lower Zambezi region. Luangwa and Lower Zambezi are connected through GMAs. Smaller populations of lions are also present in Liuwa Plains, Sioma Ngwezi, Nsumbus, and the Lavushi Manda National Parks. In addition, Kazungula and Siavonga open areas have lion populations that roam between Zambia and other countries (DNPW 2016).

The 2016 IUCN Red List Assessment stated that lions are now extinct in 15 countries in Africa (including Western Sahara, which is technically a disputed territory), are possibly extinct in another seven countries, and now occur in only 24 countries (Macdonald 2016). The latest IUCN estimates suggest a population of 23,000 - 39,000 lions throughout their current range on the African continent (IUCN 2016), representing a decline of at least 43% between 1993 and 2014. Lions are now considered to have been extirpated from at least 92% of their historic range (Macdonald 2016). Therefore, in assessing the population of lions in Zambia, we must also consider the significance of the diminishing total population of lions remaining in the wild. This is in part because the southern and eastern African lion populations include Zambia (DNPW 2016). DNPW presented a study conducted by the Zambia Lion project (ZLP) in which DNA analysis of Zambian lions was undertaken during 2004 - 2012. The study concluded that southern African and eastern African lions were integrated among the Zambian lions. The study also determined that the genetic diversity of Zambian lions is much greater than comparable areas in southern and eastern Africa.

Population Status:

Data provided by Macdonald (2016) indicate that Zambia contains approximately 1,200 free-ranging lions in an estimated range of 135,000 km² (approximately 10,000 km² less range than identified by the Zambian government). DNPW explains that previous lion estimates were determined, in large part, through expert opinion (DNPW 2016). They also confirm that no intensive research has been conducted in the corridor area, consisting of West Petauke, Chisomo and Luano GMAs, and surrounding Open Areas (DNPW 2016).

In addition to the population status determined by Macdonald (2016), the Zambian Carnivore Programme (ZCP) studied the population of lions in Zambia. In 2013, the ZCP monitored 13 prides and 13 coalitions, comprised of 141 lions with 3 adjacent sites of 20 lions each, totaling over 200 lions. In 2014, the ZCP monitored 15 prides and 13 coalitions, with a total of 166 individual lions. In 2015, the ZCP's partial data indicated that 15 prides and 15 coalitions of lions exist throughout Zambia.

In acknowledging their need for more complete and current lion population data, DNPW has begun working with partners on monitoring studies in the Luangwa and Kafue ecosystems. Surveys were conducted in the later part of 2016 (DNPW 2016). The Service has not seen the results, but will request them for consideration in future enhancement determinations. In addition, dependent on funding availability, DNPW has identified that a survey would be conducted of the corridor

between South Luangwa National Park and Lower Zambezi National Park and the GMAs surrounding the eastern part of North Luangwa National Park.

A report by the Democratic staff of the House Committee on Natural Resources concludes that Zambia lion populations may show signs of stabilizing or even recovery, but strict controls on additional mortality are necessary to prevent further decline (Grijalva 2016).

Threats:

Habitat Loss, Population Growth, and Human-Lion Conflicts:

Lion populations throughout Africa have decreased in correlation with their habitat. Currently only 10 stable populations with more than 500 lions still exist throughout the continent of Africa (Creel *et al.* 2016). Africa has the fastest human population growth rate in the world, with projections estimating a population tripling across 27 African states by 2100, leading to a continental estimate of 4 billion. Eight lion range states are estimated to have a five-fold increase in human population by 2100 (Macdonald 2016), and Zambia has not steered clear of Africa's population and development growth (DNPW 2016). Human population growth has increased in Mfuwe, the gateway town to South Luangwa National Park, largely due to increased infrastructure development and an increasing number of economic opportunities created through tourist lodges (DNPW 2016). Habitat loss, population growth, human-lion conflicts, poverty, poaching, diseases, uncontrolled hunting, and the importation of captive-bred lions into Zambia are all threats to the long-term survival of lion populations in Zambia.

DNPW stated that human-lion conflicts are not uncommon in Zambia. From the years 2008 through 2015, a total of 327 livestock animals were recorded as being killed by lions; since 2002, at least 70 lions were reported killed as a result of human lion conflicts (DNPW 2016). The number of Zambian lions killed as a result of human-lion conflict is shown in the table below.

Year	Lions Killed
2002	2
2003	4
2004	1
2005	0
2006	5
2007	8
2008	2
2009	5
2010	3
2011	8
2012	5
2013	10
2014	14
2015	1
2016	2

Poverty, Poaching, and Disease:

Prey base depletion is partly linked to habitat loss, but more importantly to poaching and bush meat trade (Becker *et al.* 2013). Poaching of lions for the trade in bones and other body parts for traditional medicine is an emerging threat within Africa (Macdonald 2016). Within Zambia, another more widely occurring threat believed to be facilitated by high levels of poverty is poaching of lions for bush meat (DNPW 2016). DNPW acknowledges that bush meat poaching occurs widely in Zambia (DNPW 2016). They also acknowledge that the amount of illegal use of lion parts in Zambia is currently unknown (DNPW 2016). However, DNPW has indicated it will establish an investigation into the illegal trade and use of lion parts.

Zambia has addressed the need to monitor the health of their lions by creating the Infrastructure Development Unit (IDU). The IDU subsequently established a veterinary unit of DNPW whose responsibility is to regularly sample lion specimens for diseases. This unit also assists law enforcement officers in the treatment of injured lions due to illegal activities such as snaring (DNPW 2016).

Trophy Hunting:

Di Minn *et al.* (2016) estimated that 37.8% of Zambia is covered by terrestrial protected areas, with 21.3% in Open Game Ranches. According to a 2012 article, lion hunting in Africa generates 5–17% of gross trophy hunting income on national levels, with the proportional significance highest in Mozambique, Tanzania, and Zambia (Lindsey *et al.* 2012). A more recent paper published by Macdonald, however, asserted that Zambia generated very little revenue from trophy hunting (Macdonald 2016). It should be noted, however, that Macdonald based the paper on data obtained in the years before 2016 (the moratorium was between 2013 and 2015), and the formation of DNPW and newer regulations were not implemented until after Zambia imposed a moratorium on lion hunting for the years 2013 through 2015. According to DNPW, Zambia's total hunting revenue (all hunting, not just lions) accounted for 32% of the revenue that ZAWA (now DNPW) received during the years 2010 through 2012 (DNPW 2016). They also affirm that the average revenue generated for hunting in Zambia was reduced to 4% during the lion hunting moratorium in 2013 and 2014 (DNPW 2016).

IUCN has only examined the lion population in Luangwa, Zambia. Their findings indicate that trophy hunting in Luangwa contributed to a decline in the lion population by 28% between 1993 and 2014 (Macdonald 2016). However, this assessment was done prior to Zambia's 2013-2015 hunting ban and therefore, it will need to be re-assessed now that Zambia's lion hunting ban has been lifted and new regulations have been implemented.

Importation of Captive-bred lions:

Captive-bred lions from South Africa and Zimbabwe are being imported into Zambia for lion walks (DNPW 2016). DNPW believes that the importation of captive-bred lions is a result of a growing photo-tourism market in the Livingstone area of southern Zambia (DNPW 2016). Since 2008, a total of 54 captive-bred lions have been imported into Zambia, but the Zambian government has imposed a condition that the captive-bred lions will not be introduced into the wild (DNPW 2016). In order to ensure that Zambia's captive-bred lions do not negatively impact their wild lion

populations, Zambia is currently working on the preparation of a statutory instrument that will regulate the importation and captive uses of lions. Other than for temporary veterinary purposes, the holding of, breeding, and commercial use (i.e. walking and petting) of captive-bred lions will be banned (DNPW 2016). Lions that are currently held in captivity will be required to be castrated or spayed, and eventually all commercial uses of captive-held lions will be phased out (DNPW 2016). DNPW states that "particular care will be taken to avoid the dumping of captive-held cats into wild areas for any reason, especially for hunting or 'release' as means for the owners to avoid the penalties or costs associated with the authorized disposition of their animals (DNPW 2016)."

Partners/Non-governmental Organizations (NGOs):

DNPW has partnered with several NGOs in an effort to obtain lion population survey data and to conduct other lion-related research studies. The Zambia Lion Project (ZLP) has conducted research on the presence/absence of lion surveys throughout Zambia (DNPW 2016). They have also assisted with DNA collection studies. The Zambia Carnivore programme (ZCP) has been documenting population trends and demographic vital rates of lions in the key areas of South Luangwa National Park, Kafue National Park, and Liuwa Plain National Park. Through their research efforts, the ZCP has also contributed to aerial support that has assisted DNPW with enforcement actions.

Although their research focus has been on elephants, the Frankfurt Zoological Society has been active in North Luangwa ecosystem for over 20 years. Conservation South Luangwa (CLS) has been active in South Luangwa National Park and surrounding GMAs. Game Rangers International has been active in the Kafue ecosystem since 2010. Conservation Lower Zambezi (CLZ) is also active in the Lower Zambezi national park and surrounding GMAs.

Supplemental revenue sources are also gained with the support of several NGOs. NGOs can provide functions that include anti-poaching units and/or aerial support. One such example is the Frankfurt Zoological Society (FZS), which has been active in North Luangwa National Park for over 20 years. FZS established a partnership with DNPW in order to help preserve black rhino and elephant populations through the establishment of The North Luangwa Conservation Programme (NLCP).

Lion Management in Zambia

History of Lion trophy exports:

During 2008 - 2012, DNPW authorized the export of 289 lion trophies (50, 40, 89, 37, and 73 respectfully). During 2013 - 2015, the Zambian government established a lion hunting moratorium (some trophies apparently taken before the moratorium were exported during this time, however). The moratorium was established to allow time to restructure Zambia's governance of lions and to allow a period of time for lion recovery (DNPW 2016). Data comparing the lion population status before and after the moratorium are currently unavailable; hence, the success of the moratorium cannot be fully assessed.

Lion Hunting and Concessions:

Zambia lion hunting occurs in *Game Management Areas (GMAs)* and *Open Game Ranches (OGRs)*. OGRs are unfenced private lands reserved for the wildlife conservation management of an individual or local community. They are buffered by GMAs. DNPW issues annual non-resident

hunting quotas to the OGRs in exchange for managing the wildlife; although all animals remain the property of the State (DNPW 2016).

All 20 of Zambia's national parks are surrounded by GMAs, but currently, lion hunting only occurs within hunting blocks located in the GMAs that surround the National parks in the Luangwa, Kafue, and Lower Zambezi ecosystems. GMAs are primarily designated for safari (tourist) and resident hunting, but some GMAs also include photographic tourism. All GMAs allow settlement. There are 36 GMAs in Zambia covering 177,404 km² (DNPW 2016). Most, but not all, GMAs have General Management Plans outlining basic management practices. Community-Based Natural Resource Management (CBNRM) is implemented within GMAs through Community Resource Boards (CRBs) (DNPW 2016). The CRBs focus on the economic and social well-being of local communities. There are currently 75 registered CRBs within Zambia that employ approximately 750 community scouts and 79 support staff.

DNPW, in consultation with the local community, is mandated to grant hunting concessions within specific hunting blocks within GMAs. Hunting concessions must be registered in Zambia, have a tourism enterprise license, have a valid tax clearance certificate, provide proof that the company is not bankrupt, and they must meet any additional conditions set by an evaluation committee (DNPW 2016). Leases are stated to range from 7 - 15 years, with the length of lease time dependent on the abundance of species classified within the individual hunting block (DNPW 2016). Prime hunting blocks have greater species abundance and are generally awarded shorter lease agreements in comparison to secondary hunting blocks. Secondary hunting blocks are generally given longer lease periods in an effort to provide incentives for the concessionaire to invest greater resources, allowing wildlife populations to increase before offering hunting (DNPW 2016).

Hunting block concessions are awarded through a bid process in accordance with the Zambia Public Procurement Act No 12 of 2008. Bids are taken from companies through a "two envelop system." The bids consist of a technical proposal and a financial proposal being placed in separate clearly marked envelopes. The technical bid is required to be evaluated by criteria outlined in Zambia's Wildlife Act before the envelope containing the financial bid is opened. Financial envelopes will only be opened for bidders that meet a specific technical expertise (e.g., a score of over 80 on the established criteria). The lease is awarded to the bidder that qualified with a minimum technical rating of 80 and whom submitted the highest financial bid (DNPW 2016).

Successful bidders must address statutory obligations to communities and provide enforcement contributions when developing Concessionary Agreements. Concessionary Agreements are developed through a partnership between the communities, safari operators, professional hunters, and DNPW. As such, a hunting concession agreement is not valid without the signature of the Chief(s) or CRB associated with the hunting block (DNPW 2016). Concessionaires are required to use collected fees to support resource protection by providing community scouts, vehicles, fuel, patrols, and equipment. They must provide infrastructure development to local communities and also offer resource monitoring and fire management. Some concessionaires further benefit community development by supporting the employment of teachers and nurses, purchasing ambulances, building classrooms and clinics, and providing houses for teachers and health personnel. Moreover, they are mandated to provide 50% of the meat from hunted animals to the local community. Concessionaires are evaluated annually and those that do not comply with their obligations can have their concession terminated before the end of the agreement's term (DNPW 2016).

Hunting Quotas:

From 2005 - 2012, Zambia had quotas that totaled 683 lion in 21 GMAs and 5 OGRs, with the highest annual quota set at 117 lions and the lowest at 55 lions (DNPW 2016). The quotas were generally based on the previous year's lion quotas and, in some cases, the quotas were a fixed part of a concession agreement (DNPW 2016). However, DNPW did not completely identify the basis for these quotas or how they were distributed. Currently, quotas are based primarily on lion populations determined through aerial surveys (DNPW 2016). However, information obtained from ground counts, patrol sightings, local and expert opinion, and hunting monitoring is also used. CRBs use the information they have collected to determine what the GMA quota should be. Their proposal is submitted to DNPW for approval. Once a proposal is received, DNPW accepts feedback from field staff and safari hunting outfitters, as well as the hunting guidelines (below), before the quotas are approved by the Wildlife Conservation and Management Unit and distributed by their Licensing Unit. The quotas are then distributed to the CRBs and hunting companies. DNPW is required to share the approved quotas with other government agencies, including the Auditors General Office and Anti-Corruption Commission. For 2016, Zambia established a quota of one lion per hunting concession, for a total quota of 24 lions (2 hunted on OGRs and 22 hunted in GMAs). Quotas are set for individual hunting blocks within the GMAs.

Hunting Guidelines:

The Zambia's Conservation Strategy and Action Plan for the African lion was developed in 2010 and designed with a 10-year plan (DNPW 2016). The purpose of the plan is to gain stakeholder participation while using adaptive management practices when addressing concerns regarding scientific management, habitat protection, and human-lion conflicts. Based on the principles of the Action Plan, following the three-year moratorium, in 2016, DNPW consulted independent lion experts and held a workshop that resulted in the creation of hunting guidelines (DNPW 2016). The guidelines are considered part of an adaptive process to manage lion hunting in Zambia. DNPW is in the process of transforming the guidelines into a statutory law that will include provisions for monitoring lion hunting through an age-based system (DNPW 2016). The lion hunting guidelines include, but are not limited to, the following recommendations:

1. No hunting of female lions.
2. No hunting of any lion born or held in captivity.
3. No use of pre-recorded sounds in lion hunting.
4. No lion hunting on fenced game ranches.
5. Lions should only be hunted in Prime and Secondary areas and Open Game Ranches known to be rich in lion and prey.
6. Establishment of a place for trophy measurements of hunted lions for exports should be established.
7. DNPW shall establish a lion aging evaluation committee that will include representatives from the Professional Hunters Association, the Safari Operator Association, the Wildlife Producers Association, and officers from DNPW that are nominated by the director. Prior to issuing CITES permits, the committee shall meet once a year to establish the age of hunted lions.

DNPW has established age-based categories that divide lion hunting into four age-based categories: Category 1 consists of male lions between five and six years old and above; Category 2 consists of male lions older than four years old, but younger than five years old; Category 3 consists of male lions that are younger than four years old; and Category 4 consists of male lions seven years old or older. DNPW has determined that only male lions that are five years and older should be hunted. However, DNPW may authorize the export of Category 2 male lions so as not to penalize the hunter. Lions that are less than four years old will be confiscated and may not be exported. In cases where lions under five years old are taken, however, the professional hunter and the safari outfitter may be penalized (Becker 2017 per. comm.).

Wildlife officers must also accompany hunters on all hunts (DNPW 2016). The officer is responsible for recording hunt activities on specified forms such as the Safari Hunting Monitoring form and Trophy Measurement form. The officer endorses licenses to ensure that they are not used more than once and the officer also ensures that all harvested trophies are registered (DNPW 2016).

Hunting-generated Revenue:

DNPW receives revenue by charging GMA fees per lion hunt. They also receive funds from annual professional hunter fees, certificate of valuation of trophies fees, certificate of ownership of trophies fees, permit fees, handling fees, and CITES security stamp fees. Hunting license fees in Zambia are statutory. The foreign hunter looking to take a lion must pay the fee directly to the outfitter, with the minimum amount currently set at \$4,200. DNPW collects these fees from the outfitter/concession and does not deal with the foreign hunter directly. Therefore, the outfitter may choose to charge the foreign hunter any amount greater than \$4,200. The revenue generated from license fees (also referred to as Animal fees by DNPW) is mandated to be shared with CRBs under the Zambia Wildlife Act No. 14 of 2015. The fees are shared with CRBs and DNPW as follows:

License fees (animal fees):

- 5% of funds go to the CRB chief/leader.
- 45% of funds go to CRB community funds.
 - According to Zambia's "Guideline on the use of Community funds accrued from wildlife management", 45% of these community funds should go to wildlife protections and patrols, 35% should go to community projects such as constructing clinics, roads, schools, and wells, and 20% of the funds should go towards CRB administration costs.
- 50% of funds go to DNPW (mandated under the Zambia Wildlife Act No. 12 of 1998 and continued in the Wildlife Act) in the form of conservation funds, including, but are not limited to: scout/wildlife officer salaries, resource protection, consultancy and legal fees, animal surveys, staff training, administrative and operational expenses, repair and maintenances, and other conservation expenses.

According to Zambia's hunting guidelines, hunts involving lions are required to be a minimum of 16 days (DNPW 2016). A daily conservation fee of \$150 per hunter and \$100 per observer is collected for monitoring purposes (DNPW 2016). These daily hunt fees typically cover combined hunt packages that include hunting lion, along with other species such as hippos and impalas. The fees are allocated by percentages to CRBs and DNPW as follows:

Daily fees (Concession fees):

- 5% of funds go to the CRB chief/leader.
- 15% of funds go to CRB community funds.
 - Based on recommended guidelines, 45% of these community funds go to wildlife protections and patrols, 35% goes to community projects such as constructing clinics, roads, schools, and wells, and 20% of the funds go to CRB administration costs.
- 80% of funds go to DNPW in the form of conservation funds, including, but are not limited to: scout/wildlife officer salaries, resource protection, consultancy and legal fees, animal surveys, staff training, administrative and operational expenses, repair and maintenances, and other conservation expenses.

Hunting fees for all species accounted for 32% of revenues that DNPW received during 2010 - 2012. However, that amount was reduced to about 4% during the 2013 and 2014 moratorium (DNPW 2016). Safari hunting also creates other revenue for Zambia, through activities such as tipping, eating in restaurants, staying at lodges, purchasing souvenirs, and paying for taxidermy.

Evaluation:

As stated earlier, the Service will evaluate any application in accordance with our threatened species permitting regulations at 50 CFR 17.32 and issuance criteria for endangered species permits (50 CFR 17.32(a)(2)). In evaluating each of these criteria on the basis of information available to the Service, we have been able to determine that this import of the wild lion trophy would qualify for the issuance of the required import permit.

17.32(a)(2)(i): Whether the purpose for which the permit is required is adequate to justify removing from the wild or otherwise changing the status of the wildlife sought to be covered by the permit:

In evaluating this criterion, the Service assesses whether the hunting program established for lions has demonstrated the ability to contribute toward positive conservation outcomes that mitigate or improve the status of lions throughout their range within Zambia, while addressing the main threats of habitat loss, human-lion-livestock conflict, and prey depletion.

The IUCN's 2012 Guiding principles on trophy hunting support the concept that hunting can provide a conservation benefit if it is part of a governance system that provides both implementation and enforcement at a level that adequately supports conservation. The Service also believes that conservation hunting can assist the wild lion populations if managed well. Lion hunting, if managed properly, could meet the Service's enhancement criteria under the Act. There must be adequate information and data clearly showing that removing lions from the wild for trophy hunting will be done at a level and with sufficient oversight such that it improves the current status of lions in the wild (50 CFR 17.32).

Zambia has demonstrated their desire to maintain the long-term conservation of their lion population with their 2013-2015 moratorium on lion hunting. When the Zambian government realized that population numbers were declining to an unsustainable level, they applied the

moratorium for 3 years, until they determined that their lion population increased enough to tolerate limited offtakes (DNPW 2016).

As mentioned in the sections above, the Zambian government has clarified that they have established block quotas by surveying lion populations through a combination of aerial surveys and information obtained from ground counts, patrol sightings, local and expert opinion, and hunting monitoring. Because surveys are continually being carried out on the current population of lions in Zambia, future findings will consider updated population data. Therefore, the Service will need to continue to monitor the effectiveness of new lion surveys that contribute to determining the population status of lions in correlation with hunting block quotas.

The difference in male turnover between hunting/non-hunting periods is apparent from cub survival rates. Macdonald (2016) reports that in the absence of hunting, 80% of cubs survived to one year of age, during the trophy hunting period, 66% of cubs survived to one year of age. The principle behind restricting trophies to older males is that their tenure in the pride should have been long enough to raise at least one generation of cubs to adulthood. However, lion experts have come to varying conclusions regarding the minimum age recommended for sustainable lion hunting. Creel *et al.* (2016), not only state that the minimum hunting age should be 7-8 years old, but they also conclude that age-restricted harvesting is not sufficient to yield sustainability by itself. However, other experts believe that the sustainable age of lions is five years and older, provided that proper identification/aging can occur before the animal is harvested. Nonetheless, lion experts are in consensus that hunting lions younger than five years old may not be sustainable. Zambia's recommended hunting guidelines are in line with the minimum age of five-year-old lions, but the Service is concerned that allowing for the export of lions under this age (Zambia allows export of four-year-old lions, but not less than four years old) may not be sustainable. Zambia will need to closely monitor the number of exports of "under age" trophies to determine if there are sufficient disincentives to discourage taking such animals.

The Zambian government has done a good job of identifying how resources from hunting-generated revenue would be shared with communities. The local communities receive funds from concessions and license (animal) hunting fees. As outlined in the license fee distribution above, 35% of the funds allocated to CRBs help support community projects such as constructing clinics, roads, schools, and wells, thereby providing incentives for the local community to ensure the long-term conservation of the lions. In addition, 45% of the CRB license fees go to wildlife management, including resource protection and patrols.

Zambia's human population growth has contributed to conflicts within the GMAs. As clarified above, DNPW contributes 50% of the license fees (animal fees) and 20% of the Concession fees to local communities. These financial benefits received from living in a GMA have provided incentives for newcomers to illegally squat in the GMAs looking to capitalize on the financial benefits. Consequently, the illegal squatting has caused enough conflict with local people to trigger action to be taken by the Zambian government. In August of 2015, over 2,000 squatter households within the Mumbwa GMA were evicted so that the registered local communities could receive the full benefits of living within a conservation area (DNPW 2016). The long-term impacts of the eviction will need to be considered in future findings, as the information becomes available.

Therefore, based on the information available to the Service and considering that the lion to be imported was harvested in compliance with Zambian laws and regulations, we conclude that the

purpose for which a permit is being requested is adequate to justify removing the sport-hunted trophy lion from the wild or otherwise changing its status.

17.32(a)(2)(ii): The probable direct and indirect effect that issuing the permit would have on the wild populations of the wildlife sought to be covered by the permit:

As described under Current Lion Status in Zambia above, Zambia has taken great strides to address the major threats facing lions through their hunting program and updated regulations. In 2010, Zambia developed a ten-year Conservation Strategy and Action Plan for the African lion. Since the establishment of the Action Plan, the Zambian government has cooperated with partners to implement the strategy (DNPW 2016). Monitoring, local community benefits, human lion-conflict, and land use planning are only some of the benefits of the Action Plan (DNPW 2016). The development of the Community-Based Natural Resource Management Unit has helped facilitate Zambia's economic and social well-being by providing technical support to CRBs, training of village scouts and CRB members, and monitoring the use of funds disbursed to the CRBs. An investigative unit also carries out investigations related to wildlife crimes. Furthermore, the President of the Republic of Zambia has also directed the Defense san security wings in the country to join in the fight against poaching.

Taking into account that the off-take of wild lions is currently being monitored by the Zambian government, that the government of Zambia is implementing an age-based harvest strategy and a precautionary quota, and that the government of Zambia's management of lions provides community benefits, Mr. Papapietro's hunting and subsequent import of this lion provides an indirect benefit to wild populaitons by helping to support the reserves where lions are found. Therefore, based on the information available to the Service, the probable direct and indirect effect that issuing an import permit for this legally hunted lion would have on the species would be positive.

17.32(a)(2)(iii): Whether the permit, if issued, would in any way, directly or indirectly, conflict with any known program intended to enhance the survival probabilities of the population from which the wildlife sought to be covered by the permit was or would be removed:

We are not aware of any programs intending to enhance the survival of lions in Zambia that would conflict with Zambia's management plan. However, we are aware of the Zambian Carnivore Programme (ZCP), which is a non-profit Zambian registered trust that is dedicated to conserving large carnivore species and the ecosystems they reside in. The program works to build capacity within local Zambian organizations and government bodies for the sustainable conservation of large carnivores and herbivores, their ecological functions, and their habitats. Therefore, based on the information available to the Service, the issuance of an import permit for this legally hunted wild lion would not conflict with any known conservation program for the species.

17.32(a)(2)(iv): Whether the purpose for which the permit is required would be likely to reduce the threat of extinction facing the species of wildlife sought to be covered by the permit:

In evaluating this criterion, the Service assesses whether the hunting program established for lions is subject to a governance structure that clearly allocates management responsibilities and supports

regulatory pathways in support of positive conservation outcomes. Zambia's lion management program is based on a precautionary quota, an age-based harvest with monitoring of off-takes, and direct community benefits (DNPW 2016).

Currently, per Zambia's approved budget, DNPW retains all revenue from sport hunting. 50% of animal fees and 80% of concession fees are allotted to DNPW as conservation funds. This funding source is vital to lion conservation because it supports on-the-ground conservation, protected area management, and enforcement efforts. Additionally, 45% of animal fees and 15% of concession fees go to communities where the hunts take place. As long as communities continue to benefit from the sport hunting of lions through job opportunities, funded community projects, and sharing of meat derived from hunting, they may have the incentive to protect it.

Given that lion management in Zambia allows limited, controlled off-take of lions in a manner that mimics natural processes and provides community benefits, the legal hunt undertaken by Mr. Papapietro will contribute to reducing the threat of extinction of lions in Zambia. The utilization of hunters, such as Mr. Papapietro, in managing the lion populations in GMAs and OGRs is an important element of the success of lion management in Zambia.

Therefore, based on the information available to the Service, the purposes for which this import permit would be issued would likely reduce the threat of extinction facing lions in Zambia.

17.32(a)(2)(v): The opinions or views of scientists or other persons or organizations having expertise concerning the wildlife or other matters germane to the application:

As with any discussion of hunting, there are numerous opinions on the impact that hunting has on a species. From reviewing comments made during the listing process for lions, as well as information obtained through personal conversations and literature, there is general agreement that hunting, done properly and well managed, would not have an adverse effect on lion populations. Mimicking natural processes within the management program, such as maintaining pride hierarchy for as long as possible by leaving the alpha male in place, will better ensure the long-term survival of the species. Numerous researchers have stated that, while they may not support hunting in general, they see that benefits can be obtained through a science-based hunting program for lions. There have been a large number of comments from some NGOs and the public opposing hunting any lions, but particularly captive-bred lions. This opposition, however, is primarily based on the perceived ethics of hunting. While these comments are an indication of concerns from some members of the public over hunting, they are not germane to our review process.

Therefore, based on the information available to the Service, there is general support from scientists and other persons or organizations having expertise concerning lions that the legal well managed, science-based harvest of lions, and the subsequent import of these trophies, would not have an adverse effect on the species, but would further efforts to conserve the species in the wild into the future.

17.32(a)(2)(vi): Whether the expertise, facilities, or other resources available to the applicant appear adequate to successfully accomplish the objectives stated in the application:

Examining whether adequate resources exist, the Service relied primarily on information provided by Zambia (DNPW 2016). The long-term survival of lions in Zambia, is directly tied to the

they struggled with funding to provide for adequate staffing and fulfillment of lion conservation objectives. However, after transforming back to a government agency, DNPW (formerly ZAWA) has been able to ensure that staff are adequately resourced and paid by Zambia's government, while retaining funding generated from sport hunting, as per the approved budget for the country. This ability to deliver on conservation objectives is improved with funding provided by U.S. sport hunters such as Mr. Papapietro.

Therefore, based on the information available to the Service, the applicant undertook a legal, authorized hunt, abiding by management practices in accordance with the government of Zambia's laws and regulations, having the expertise, facilities, and other resources available to him to successfully accomplish the objective stated in the application.

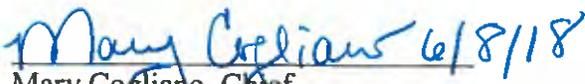

Conclusion

Given the current status of lions within Zambia and the level of management and oversight provided to lions, it appears that the harvest and import of this lion as a sport-hunted trophy meet the purposes of the Act. Zambia's ongoing adaptive management and limited off-take of lions is important to the survival of lions in Zambia.

Therefore, with the information currently available to the Service and in accordance with the issuance criteria laid out above, the Service is able to make a determination that the import of this wild lion will enhance the propagation or survival of the species. Therefore, the Service is able to authorize the import of one male wild lion trophy taken in Zambia, to Richard (b) (6) Papapietro.

Location where authorized activity may be conducted:
IMPORT THROUGH ANY PORT LISTED IN 50 CFR 14.12

Reporting requirements: Not applicable

Authorizations and Conditions:

- A. Authorized to import the sport-hunted trophy of one male African lion (*Panthera leo melanochaita*), taken in Zambia for the purpose of enhancement of the survival of the species.
- B. Specimen may not be sold or transferred for any financial remuneration
- C. Trophy must have been taken during the 2018 hunting season.
- D. Trophy must be accompanied by valid hunting authorization issued by the government of Zambia for the 2018 season.
- E. Trophy must be accompanied by a valid Convention on International Trade in Endangered Species (CITES) Appendix II export permit/re-export certificate, source code "W", issued by the Management Authority of the exporting/re-exporting country.
- F. General conditions set out in Subpart D of 50 CFR 13, and specific conditions contained in Federal regulations cited above, are hereby made a part of this permit. All activities authorized herein must be carried out in accord with and for the purposes described in the application submitted. Continued validity, or renewal of this permit is subject to complete and timely compliance with all applicable conditions including the filing of all required information and reports.
- G. The validity of this permit is also conditioned upon strict observance of all applicable foreign, state, local, tribal, or other federal law. This permit can be photocopied.
- H. Valid for use by permittee named above.
- I. Acceptance of this permit serves as evidence that the permittee understands and agrees to abide by the "General Permit Conditions" (copy attached).

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual			
1.a. Last name Elder	1.b. First name Chris	1.c. Middle name or initial (b) (6)	1.d. Suffix
2. Date of birth (mm/dd/yyyy) (b) (6)	3. Occupation	4. Affiliation/ Doing business as (see instructions)	
5.a. Telephone number (b) (6)	5.b. Alternate telephone number	5.c. Fax number	5.d. E-mail address (b) (6)

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution			
1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (dba)	
2. Tax identification no.	3. Description of business, agency, Tribe, or institution		
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
5. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information					
1.a. Physical address (Street address, Apartment #, Suite #, or Room #, no P.O. Boxes) (b) (6)					
1.b. City Springdale	1.c. State AR	1.d. Zip code/Postal code: (b) (6)	1.e. County/Province	1.f. Country USA	
2.a. Mailing Address (include if different than physical address, include name of contact person if applicable)					
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country	

D. All applicants MUST complete	
1.	Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – attach documentation of fee exempt status as outlined in instructions. (50 CFR 13.11(d))
2.	Do you currently have or have you ever had any Federal Fish and Wildlife permits? Yes <input type="checkbox"/> If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: _____ No <input checked="" type="checkbox"/>
3.	Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001. Signature of applicant/person responsible for permit (No photocopied or stamped signatures) <u>Chris Elder</u> Date of signature (mm/dd/yyyy) <u>5-29-18</u>

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- (1) Is raw, processed, or manufactured;
- (2) Was legally obtained by the hunter through hunting for his or her personal use;
- (3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- (4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: 1 (Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import is limited to two per hunter per calendar year)

Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:

- a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

South Luangwa, Zambia in Nyamvu & West Petauke Game Mgmt Areas, Nyimba being closest town, operators and lease holders Nyamvu & Mopane Safaris Ltd.

- b. Date wildlife is to be hunted:

July 27,2018 - August 17,2018

- c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

All parts including skin, teeth, skull, and claws

3. **IF THE ANIMAL IS DEAD**, please enter the following:

- a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild:

b. Date wildlife was hunted: n/a

- c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

n/a

- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

n/a

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business Michael Borman
Name: Address: Bangweulu Taxidermy
Address: 4142K Chifwema Road, New Kasama
City: Lusaka
State/Province: Southern Zambia
Country, Postal Code: 50100

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

Please see information submitted by Conservation Force, range state authorities, safari hunting operators, and others.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. ~~If you are a broker or taxidermist applying on behalf of a foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.~~

~~I acknowledge that the sport hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.~~

~~Taxidermist/Broker's signature: _____ Date: _____~~

7. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: _____ Date: _____

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Applicant or John J. Jackson, III or Regina Lennox of Conservation Force, 504-837-1233,
cf@conservationforce.org

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit to the address on page one. *N/A*

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form. *N/A*

Note 3: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 4: Certain hunting trophies, including leopard and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

- Complete all questions on the application.
- Mark questions that are not applicable with "N/A".
- If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.
- If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Please send via Enclosed fed ex. to the name and address listed on page 1.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Howard (b) (6) Carter or (b) (6)

- 3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

- 4. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

- a. Leopard (*Panthera pardus*) Quantity: 1 (Limited to the import of two per calendar year). If you wish to import a leopard taken in northern or western Africa, please use form 3-200-20.
- b. Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use Form 3-200-20).

- 5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, Please enter the following information:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
N/A
- b. Date wildlife is to be hunted: N/A
- c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:
N/A

- 6. IF THE ANIMAL HAS ALREADY BEEN TAKEN, please enter the following:

- d. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
Farm Okanjanga #54, Okahandja District
Namibia
- e. Date wildlife is to be hunted: Sept. 21, 2017

f. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

MR. Jacobus Blaauw

g. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Brakwater Plot #43, Windhoek, Namibia

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). Hunt Permit: 174392

Tag No. NAPP 193/250 2017

See attached copy of Hunt Permit

8. Complete name and address of overseas person or business shipping the trophy to you.

a. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Mr. Jacobus Blaauw

Business Name:

Address: Box 11908

Address:

City: Windhoek

State/Province:

Country, Postal Code: Namibia, 9000

CERTIFICATION STATEMENT (original signature must be provided for either 9 or 10 below)

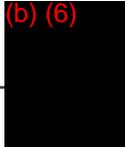

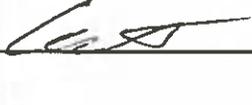

9. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ N/A _____ Date: _____

10. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature:    Date: 02/28/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

11. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from [the list of designated ports](#). If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 2: The U.S. FWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during a sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handcraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: 1 (Limited to the import of two per calendar year)

African elephant (*Loxodonta africana*) Quantity: _____ (Import permit is not required for trophies harvested in Botswana, Namibia, South Africa, or Zimbabwe). **Note: once imported, ivory cannot be re-exported.**

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
 - a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:
 - b. Date wildlife is to be hunted:
 - c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).
3. **IF THE ANIMAL IS DEAD**, please enter the following:
 - a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild: Buby Valley Conservancy, Masvingo Province, Zimbabwe
 - b. Date wildlife was hunted:

1st September 2017

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from . If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Ed. (b) (6) SWANSON (b) (6)
(b) (6)

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

Full mount skin including the claws and the skull

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

TROPHY CONSULTANTS INTERNATIONAL, 4 JOSIAH CHINAMANO ROAD, BELMONT, BULAWAYO, ZIMBABWE

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:

Business Name: TROPHY CONSULTANTS INTERNATIONAL

Address: 4 JOSIAH CHINAMANO ROAD

Address: BELMONT

City: BULAWAYO

State/Province: ZIMBABWE

Country, Postal Code:

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. If you are a broker or taxidermist applying on behalf of a foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that my client may only import two leopard trophies in one calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that I may only import two leopard trophies in one calendar year (if applicable). In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature:  Date: 5/26/2013

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

Attached are applications to amend and replace Permit US1755670C/9.

Please feel free to contact me if you have any question regarding this request. I can be reached at

(b) (6)

Thank you!

If you are requesting an amendment to an issued permit that is still valid, then please submit application form 3-200-52.

If you are requesting a replacement for an issued permit that is still valid, then please submit application form 3-200-66.

If you are requesting an amendment to an issued permit that is still valid and has also been lost, then please submit application form 3-200-52, and page two of application form 3-200-66.

On your cover letter please explain what you are requesting so that both the data entry staff and the LIE are clear for what you are applying.

If the permit has expired, has been lost, and you need to amend the permit, then please submit application form 3-200-52, and in your cover letter explain that the permit has both expired and been lost.

Respectfully,

Federal Fish and Wildlife Permit Application Form

Return to: U.S. Fish and Wildlife Service
(Enter address from pages 5 and 6 of application)

Type of Activity:
REISSUANCE, RENEWAL, OR AMENDMENT OF A PERMIT
(For this application, all permits, registrations, and certificates are referred to as a permit.)

Complete Sections A or B, C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual			
1 a Last name SPENCER	1 b First name FRANK	1 c Middle name or initial (b) (6)	1 d Suffix
2 Date of birth (mm/dd/yyyy) (b) (6)	3 Social Security No. (b) (6)	4 Occupation (b) (6)	5 Affiliation/ Doing business as (see instructions)
6 a Telephone number (b) (6)	6 b Alternate telephone number (b) (6)	6 c Fax number (b) (6)	6 d E-mail address (b) (6)

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution			
1 a Name of business, agency, Tribe, or institution		1 b Doing business as (dba)	
2 Tax identification no	3 Description of business, agency, Tribe, or institution		
4 a Principal officer Last name	4 b Principal officer First name	4 c Principal officer Middle name/ initial	4 d Suffix
5 Principal officer title		6 Primary contact name	
7 a Business telephone number	7 b Alternate telephone number	7 c Business fax number	7 d Business e-mail address

C. All applicants complete address information			
1 a Physical address (Street address; Apartment #, Suite #, or Room #, no P O Boxes) (b) (6)			
1 b City EL PASO	1 c State TEXAS	1 d Zip code/Postal code (b) (6)	1 e County/Province (b) (6)
1 f Country USA			
2 a Mailing Address (include if different than physical address; include name of contact person if applicable)			
2 b City	2 c State	2 d Zip code/Postal code	2 e County/Province
2 f Country			

D. All applicants MUST complete	
1	Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount indicated on pages 6 and 7. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – attach documentation of fee exempt status as outlined in instructions. (50 CFR 13.11(d))
2	Do you currently have or have you ever had any Federal Fish and Wildlife permits? Yes <input checked="" type="checkbox"/> If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: <u>17US55670C/9</u> No <input type="checkbox"/>
3	Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001. Signature (in blue ink) of applicant/person responsible for permit (No photocopied or stamped signatures) <u>[Signature]</u> Date of signature (mm/dd/yyyy) <u>05/31/18</u>

E. REISSUANCE, RENEWAL, OR AMENDMENT OF A PERMIT (For this application, all permits, registrations, and certificates are referred to as a permit.)

NOTE 1: If you are renewing your Designated Port Exemption permit, use form 3-200-2 (<http://www.fws.gov/forms/3-200-2.pdf>) and submit to appropriate Office of Law Enforcement address. If you are renewing your Import/Export license (required for commercial activities), use form 3-200-3 (<http://www.fws.gov/forms/3-200-3.pdf>) and submit to appropriate Office of Law Enforcement address.

NOTE 2: This form **cannot** be used for lost or damaged permit. If you need to replace a lost or damaged permit, please use form 3-200-66, <http://www.fws.gov/international/pdf/permit-application-form-3-200-66-replacement-document.pdf>. The application **must** be submitted to the office that issued the initial permit. Lost or damaged permit

NOTE 3: Some activities, such as all master files for multiple shipments, Certificate of Scientific Exchange (COSE), circus/traveling exhibits, and artificially propagated plants, can only be re-issued, renewed, or amended by submitting a new application for permits for those activities. Please refer to <http://www.fws.gov/international/permits/by-form-number/index.html> to determine if another application form would be more appropriate or contact the Division of Management Authority for more information.

1. **Permit number.** Enter the permit number to be reissued/renewed/amend 17US55670C/9.
2. Submit the original permit with this application.
3. **Past activities.**
 - a. Provide copies of all cleared documents and form 3-177 (FWS declaration of wildlife) associated with this permit.
 - b. Provide a summary detailing activities conducted under this permit, as well as a brief statement of why you are seeking reissuance/renewal.
4. **Annual Report.** If required by your permit, provide an annual report as conditioned (Please disregard if you have already submitted your annual report.)
5. **Sport-hunted trophies:** If you did not hunt during the hunting season stated in your original application, you are not eligible for a renewal. Please submit a new application form.

6. **Certification** - Complete one of the statements below and supply any additional documentation requested: (original signature is required)

a. For **NO CHANGES** to original application:

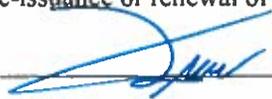

I certify that the information submitted in support of my original application for the permit indicated above has not changed and is still currently correct. I hereby request reissuance or renewal of this permit.

Permittee's signature: _____ Date: _____

b. For **CHANGES** to original application:

On an attached page(s), provide a complete description of any changes (e.g., change in principal officer, personnel, address, location of activities, types of activities). Please sign each attached page. Also note that we need to request additional information regarding the changes after reviewing your initial request.

I certify that the information submitted in support of my original application for the permit indicated above is still currently correct EXCEPT for the changes noted on the attached, signed page(s). I hereby request re-issuance or renewal of this permit with the indicated changes.

Permittee's signature:  _____ Date: 05-21-18

7. All international shipment(s) must be through a designated port, unless otherwise authorized. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact either the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2) or the Division of Management Authority.

8. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

9. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 8. I understand that you will contact me for my credit card information once the application has been processed.

RE: Form 3-200-52

Pg: 3 of 10

Section b

Request to change the country of shipper to the address below:

EMIAC MOZ LDA

COMPLEXO TEXTAFRICA

BARRIO DA SDALPO CHIMOIO MOZAMBIQUE

Permittee's Signature:

Date:

05/31/16

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

FRANK (b) SPENCER
(b) (6)

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. [50 CFR 13.21(c)]. Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

E. REPLACEMENT DOCUMENT (CITES/ESA/MMPA/WBCA/LACEY ACT)

NOTE 1: Use this application to request a replacement document if your currently valid permit has been lost or misplaced (for this application, all permits, registrations, and certificates are referred to as a permit).

NOTE 2: The application **must** be submitted to the office that issued the initial permit.

Provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you submit, indicate the application question number you are addressing.

1. Identify the permit number (found in the upper right corner) of the permit needing replacement, if known:
US1755670C/9

2. Current location of specimen (include address and country):
EMIAC MOZ LDA
COMPLEXO TEXTAFRICA
BARRIO DA SDALPO CHIMOIO MOZAMBIQUE

3. If the shipment has already occurred (i.e., the document was lost or damaged in transit), provide copies of:
 - a. Cancelled CITES export or re-export document validated by OLE;
 - b. For wildlife, cleared Declaration for Importation or Exportation of Fish or Wildlife (Form 3-177); **AND**
 - c. Any correspondence you had with the shipper or importing country's Management Authority concerning the shipment.

*Please be aware that if the permit was lost in transit, the issued permit will be forwarded to the Management Authority of the foreign country.

4. If the shipment has **not** occurred and the original permit no longer exists, submit a signed, dated, and notarized statement that:
 - a. Refers to the permit number and describes the circumstances that resulted in the loss or destruction of the original permit;
 - b. Includes a statement that affirms the shipment did not occur;
 - c. You are requesting a replacement U.S. CITES permit;
 - d. If found, the original permit will be returned to the Division of Management Authority.

5. If the shipment has **not** occurred and the original permit exists but has been damaged, submit the original damaged permit and a signed, dated, and notarized statement that:
 - a. Describes the circumstances that resulted in the permit being damaged;
 - b. Includes a statement that affirms the shipment did not occur;
 - c. You are requesting a replacement U.S. CITES permit.

6. Address where you wish permit mailed (if different from page 1):

A. Complete if applying as an individual			
1 a Last name SPENCER	1 b First name FRANK	1 c Middle name or initial (b) (6)	1 d Suffix
2 Date of birth (mm/dd/yyyy) (b) (6)	3 Social Security No. (b) (6)	4 Occupation (b) (6)	5 Affiliation/ Doing business as (see instructions)
6 a Telephone number (b) (6)	6 b Alternate telephone number (b) (6)	6 c Fax number (b) (6)	6 d E-mail address (b) (6)

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution			
1 a Name of business, agency, Tribe, or institution		1 b Doing business as (dba)	
2 Tax identification no	3 Description of business, agency, Tribe, or institution		
4 a Principal officer Last name	4 b Principal officer First name	4 c Principal officer Middle name/ initial	4 d Suffix
5 Principal officer title		6 Primary contact name	
7 a Business telephone number	7 b Alternate telephone number	7 c Business fax number	7 d Business e-mail address

C. All applicants complete address information			
1 a Physical address (Street address; Apartment #, Suite #, or Room #, no P O Boxes) (b) (6)			
1 b City EL PASO	1 c State TEXAS	1 d Zip code/Postal code (b) (6)	1 e County/Province (b) (6)
1 f Country USA			
2 a Mailing Address (include if different than physical address; include name of contact person if applicable)			
2 b City	2 c State	2 d Zip code/Postal code	2 e County/Province
2 f Country			

D. All applicants MUST complete	
1	Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount indicated on pages 6 and 7. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee - attach documentation of fee exempt status as outlined in instructions. (50 CFR 13.11(d))
2	Do you currently have or have you ever had any Federal Fish and Wildlife permits? Yes <input checked="" type="checkbox"/> If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: 17US55670C/9 No <input type="checkbox"/>
3	Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.
Signature (in blue ink) of applicant/person responsible for permit (No photocopied or stamped signatures) _____ Date of signature (mm/dd/yyyy) 05/31/18	

E. REISSUANCE, RENEWAL, OR AMENDMENT OF A PERMIT (For this application, all permits, registrations, and certificates are referred to as a permit.)

NOTE 1: If you are renewing your Designated Port Exemption permit, use form 3-200-2 (<http://www.fws.gov/forms/3-200-2.pdf>) and submit to appropriate Office of Law Enforcement address. If you are renewing your Import/Export license (required for commercial activities), use form 3-200-3 (<http://www.fws.gov/forms/3-200-3.pdf>) and submit to appropriate Office of Law Enforcement address.

NOTE 2: This form **cannot** be used for lost or damaged permit. If you need to replace a lost or damaged permit, please use form 3-200-66, <http://www.fws.gov/international/pdf/permit-application-form-3-200-66-replacement-document.pdf>. The application **must** be submitted to the office that issued the initial permit. Lost or damaged permit

NOTE 3: Some activities, such as all master files for multiple shipments, Certificate of Scientific Exchange (COSE), circus/traveling exhibits, and artificially propagated plants, can only be re-issued, renewed, or amended by submitting a new application for permits for those activities. Please refer to <http://www.fws.gov/international/permits/by-form-number/index.html> to determine if another application form would be more appropriate or contact the Division of Management Authority for more information.

1. **Permit number.** Enter the permit number to be reissued/renewed/amend 17US55670C/9.
2. Submit the original permit with this application.
3. **Past activities.**
 - a. Provide copies of all cleared documents and form 3-177 (FWS declaration of wildlife) associated with this permit.
 - b. Provide a summary detailing activities conducted under this permit, as well as a brief statement of why you are seeking reissuance/renewal.
4. **Annual Report.** If required by your permit, provide an annual report as conditioned (Please disregard if you have already submitted your annual report.)
5. **Sport-hunted trophies:** If you did not hunt during the hunting season stated in your original application, you are not eligible for a renewal. Please submit a new application form.

6. **Certification** - Complete one of the statements below and supply any additional documentation requested: (original signature is required)

a. For **NO CHANGES** to original application:

I certify that the information submitted in support of my original application for the permit indicated above has not changed and is still currently correct. I hereby request reissuance or renewal of this permit.

Permittee's signature: _____ Date: _____

b. For **CHANGES** to original application:

On an attached page(s), provide a complete description of any changes (e.g., change in principal officer, personnel, address, location of activities, types of activities). Please sign each attached page. Also note that we need to request additional information regarding the changes after reviewing your initial request.

I certify that the information submitted in support of my original application for the permit indicated above is still currently correct EXCEPT for the changes noted on the attached, signed page(s). I hereby request re-issuance or renewal of this permit with the indicated changes.

Permittee's signature:  _____ Date: 05-21-18

7. All international shipment(s) must be through a designated port, unless otherwise authorized. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact either the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2) or the Division of Management Authority.

8. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

9. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please **DO NOT** include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 8. I understand that you will contact me for my credit card information once the application has been processed.

RE: Form 3-200-52

**IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of
the Convention on International Trade in Endangered
Species (CITES) and/or U.S. Endangered Species Act (ESA)**

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1 a. Last Name Kirsch	1 b. First Name Patrick	1 e. Middle Initial (b) (6)	1 d. Suffix
2. Date of Birth (mm/dd/yyyy) (b) (6)	3. Telephone Number	3 a. Alternate Telephone Number	4. E-mail address

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1 a. Name of business, agency, Tribe, or institution		1 b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4 a. Principal officer Last name	4 b. Principal officer First Name	4 c. Principal officer Middle name/initial	4 d. Suffix
5. Principal officer title		6. Primary contact name	
7 a. Business telephone number	7 b. Alternate telephone number	7 c. Business fax number	7 d. Business e-mail address

Section C: All applicants complete address information

1 a. Physical address (Street address; Apartment #, Suite # or Room # no P O Boxes) (b) (6)				
1 b. City Waconia	1 c. State MN	1 d. Zip code/Postal code (b) (6)	1 e. County/Province	1 f. Country USA
2 a. Mailing address (include if different than physical address. include name of contact person if applicable)				
2 b. City	2 c. State	2 d. Zip code/Postal code	2 e. County/Province	2 f. Country

Section D: All applicants MUST complete

<p>1. Attach the nonrefundable application processing fee in the form of a check or money order payable to the U S FISH AND WILDLIFE SERVICE in the amount of \$100. Federal, Tribal, State, and local government agencies and those acting on behalf of such agencies are exempt from the processing fee-- attach documentation of fee exempt status as outlined in instructions (50 CFR 13.11(d)).</p> <p>2. Certification: I hereby certify that I have read and am familiar with the regulations contained in <i>Title 50 Part 13 of the Code of Federal Regulations</i> and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U S C 1001</p>	
Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)

E. IMPORT OF SPORT-HUNTED TROPHIES (*Appendix I of CITES and/or ESA*)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Same as Page 1

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Patrick Kirsch

(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Lion, [REDACTED]

b. Sex (if known). Male

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Tanzania, East Africa. Hunting Block: M'barangandu Wildlife Management Area

b. Date wildlife is to be hunted:

August 28, 2018 thru September 17, 2018

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Game Frontiers of Tanzania
Plot 23, Kasanga Street
Dar es Salaam, Tanzania

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

Not hunted yet

b. Date wildlife was hunted:

Not hunted yet

- c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Not hunted yet

- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Not hunted yet

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). *Have not hunted yet*
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:

Business Name: *Game Frontiers of Tanzania*

Address: *Plot 23, Kasanga Street*

City:

State/Province: *Dar es Salaam, Tanzania*

Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted?

The professional hunter through whom I am hunting has hunted this area every year for the past 8 years and reports seeing a number of male lions above the age of 6 years. He credits this to the thoughtful and successful game management practices introduced in 2012. The benefits of which we see today.

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

It is my understanding the govt. is paid \$30,000.00 each year by Game Frontiers for access to the hunting block with an additional \$30,000 paid each year to local game department who manages and controls the hunting. In addition, the hunting company employs workers from the village (cont

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the ^{outfit} safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

The hunting company each and every year improves the hunting area by grading roads, select and careful burning, construction of watering points, maintenance and expansion of springs, anti-poaching patrols and radio communication with government personnel and by conducting game surveys. It is essential to the (continued

Question 9B. Continued

and makes significant purchases of goods and services. The benefit to the local economy is substantial. Lastly, the hunting company gives the community much needed protein in the form of meat from trophies shot and paid for by the client.

Question 9C. Continued

Success of the hunting business that sound ^{game} management practices are followed at all times.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

- 10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

NA → Taxidermist/Broker's signature: _____ Date: _____

- 11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: Patrick (b)(6) Kirsch Date: 5/21/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

- 12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Re: Five Applications for Permits to Import Sport-Hunted Trophies

Dear Chief Cogliano:

Enclosed please find one application for a permit to import a sport-hunted elephant trophy from the Save Valley Conservancy (SVC) in Zimbabwe. This elephant was hunted in April 2018. Conservation Force and Zimbabwe's Parks and Wildlife Management Authority (ZPWMA) have submitted extensive information about the healthy elephant population in SVC and the benefits generated by regulated hunting for the protection of elephant, lion, rhino, and a range of other species. Please refer to that information, including the October 2016 Non-Detriment Finding, January 2016 report related to the African lion, June 20, 2015 response to the Fish and Wildlife Service's information request, and other submissions on the African elephant.

Please also see the attached excerpt from the African Elephant Status Report and declaration from Wilfried Pabst. These documents reflect the healthy elephant population at SVC. We respectfully request that you consider all information submitted in making a positive enhancement finding for this applicant.

Enclosed please also find an application for a permit to import a lion trophy to be hunted with Charlton McCallum Safaris (CMS) in Dande, Zimbabwe. We have previously provided extensive information about CMS and their anti-poaching unit, the Dande Anti-Poaching Unit (DAPU). Attached please find two recent DAPU reports. Please consider all information regarding CMS and DAPU, as well as the extensive information and responses to DMA information requests submitted by Zimbabwe's Parks and Wildlife Management Authority, in making a positive enhancement finding for this applicant.

Enclosed please also find an application for a permit to import a sport-hunted lion trophy to be hunted in the Nyaminga Game Management Area in Zambia. An enhancement report for this area/operator is attached. The operator spends \$10,000 per year to sustain a 28-person anti-poaching team, which heavily patrols the concession and protects the habitat for healthy populations of lion, leopard, hippo, and many other species. In addition, the operator has installed four boreholes and constructed a medical clinic, teacher's house, and dormitory for the local community. Please consider this information and information provided by Conservation Force and Zambia's Department of National Parks and Wildlife, in making a positive enhancement finding for this applicant.

Finally, enclosed please find two applications (father and son) for permits to import elephant trophies to be hunted in the Bwabwata West concession in Namibia. This concession, like the rest of Namibia, boasts a dense population of elephant. Please see the attached operator report and excerpt from the African Elephant Status Report (2016). The operator employs a 20-person anti-poaching team and invests heavily in the nearby communities (almost \$300,000 in the last three years). Please consider this information and information in the DMA's files and previously provided by Conservation Force and

Namibia's Ministry of Environment and Tourism in making a positive enhancement finding for this applicant.

Please do not hesitate to contact us if you have questions about these applications or need further information.

Sincerely,

Regina Lennox

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted ___Elephant___ trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name Stinger		1.b. First Name Ross		1.c. Initial (b) (6)	1.d. Suffix
Date of Birth (mm/dd/yyyy) 05/24/1964		3. Telephone Number (b) (6)		4. E-mail address (b) (6)	

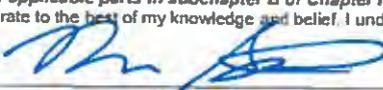

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

2. Tax identification no. (b) (6)		1.b. Doing business as (DBA)			
4.a. Principal officer Last name		4.b. Principal officer First Name		4.c. Principal officer Middle name/initial	
4.d. Suffix		3. Description of business, agency, Tribe, or institution			
5. Principal officer title			6. Primary contact name		
7.a. Business telephone number		7.b. Alternate telephone number		7.c. Business fax number	
7.d. Business e-mail address					

Section C: All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room #; no P.O. Boxes) (b) (6)					
1.b. City San Antonio		1.c. State TX		1.d. Country USA	
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)					
2.b. City		2.c. State		2.d. Country	

Section D: All applicants MUST complete

1. Attach the nonrefundable application processing fee in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].	
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50 Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.	
Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures)  Date of signature (mm/dd/yyyy) 06/08/2018

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least 90 days for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handcraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.
2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?
- No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:
- a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
Loxodonta Africana
- b. Sex (if known). Male
5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:
- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
Namibia, Bwabwata West National Park, S 18 09' C 162 E 021 42'C 495, Caprivi Area, Rundu Town
- b. Date wildlife is to be hunted:
July 1st to July 21st, 2018
- c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:
Hunt Africa Namibia, Professional Hunter: Jacobus Hugo Pienaar (Junior)
PO Box 1100 Gobabis Omaheke Namibia, Farm Hester 407, Gobabis, Namibia
6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:
- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
- b. Date wildlife was hunted:

- c. Name of hunting outfitter, safari company, or professional hunter you hunted with:
- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). Not Hunted Yet
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Mr. Louw Nel
 Business Name: Tropaendienste Taxidermy
 Address: PO Box 21068, Windhoek, Namibia
 City:
 State/Province:
 Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted?

Population growth of herds up to 500 at a time. Last game count was in Oct 2017 and estimated resident elephant in the area of more than 2000

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

40% of the trophy fees go to the Namibia government to the Game Products Trust Fund. The funds are used for repairs, maintenance and salaries for government game rangers in areas where there are Elephant roaming. Another 40% go to the community that is used to pay game guards and for the uplifting of the KWE people.

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

The outfitter pays informers in the area to help with anti poaching activities.

The outfitter / Professional Hunter is a trustee on HUAP (Hunters United Against Poaching) Trust

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: Ms. Acker Date: 6/11/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from [the list of designated ports](#). If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Type of Activity:

**IMPORT OF SPORT-HUNTED TROPHIES
(Appendix I of CITES and/or ESA)**

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual			
1.a. Last name MONSEN	1.b. First name PAUL	1.c. Middle name or initial (b) (6)	1.d. Suffix
2. Date of birth (mm/dd/yyyy) (b) (6)	3. Telephone number	3.a. Alternate telephone number	4. E-mail address

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution			
1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (dba)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information				
1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (if Broker or Taxidermist is applying on behalf of a foreign national, provide Broker or Taxidermist's name and address in this block; U.S. hunters must provide their U.S. address) (b) (6)				
1.b. City SALT LAKE CITY	1.c. State UT	1.d. Zip code/Postal code (b) (6)	1.e. County/Province	1.f. Country
2.a. Mailing Address (include if different than physical address, include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

D. All applicants MUST complete	
1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100, nonrefundable processing fee. Federal Tribal, State, and local government agencies, and those acting on behalf of such agencies are exempt from the processing fee – attach documentation of fee exempt status as outlined in instructions. (50 CFR 13.11(d))	
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001. <div style="display: flex; justify-content: space-between;"> <div style="width: 60%;"> <p><i>Paul Monson</i> (b) (6)</p> </div> <div style="width: 30%;"> <p>05/11/2018</p> </div> </div>	
Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures)	Date of signature (mm/dd/yyyy)

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least 90 days for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- (1) Is raw, processed, or manufactured;
- (2) Was legally obtained by the hunter through hunting for his or her personal use;
- (3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- (4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)? PAUL MON
(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No x Yes _____

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

- a. Scientific name (genus, species, and, if applicable, subspecies) and common name. ELEPHANT
LOXODONTA AFRICANA, COMMON NAME: ELEPHANT
- b. Sex (if known). MALE

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
- b. Date wildlife is to be hunted:
- b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
SANJE, SANJE VALLEY CONSERVANCY
PROVINCE: MASINGO. NEAREST TOWN MASINGO
- b. Date wildlife was hunted: APRIL 16, 2018 thru april 26,2018
- b. Name of hunting outfitter, safari company, or professional hunter you hunted with:
IVORY TRAILS SAFARI / ZAMBEZI HUNTERS
PHILLIP SMYTHE
- c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
TROPHY CONSULTANTS INTERNATIONAL
4 JOSIAH CHYAMANO ROAD
BELMONT, BULAWAYO, ZIMBABWE

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: TROPHY CONSULTANTS INTERNATIONAL
Business Name: 43091AH CHINAMANO ROAD, BELMONT
Address: BULAWAYO
City: ZIMBABWE
State/Province: ZIMBABWE
Country, Postal Code: ZIMBABWE

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted?

Please see information previously
submitted by ZPLWA +
Conservation Force

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that my client may only import two leopard trophies and two elephant trophies within the same calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that I may only import two leopard trophies and two elephant trophies within the same calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: Paul (b) (6) Morrison Date: 05/11/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Conservation Force
Operator Enhancement Questionnaire

v.5/8/18

- a. Does the company contribute money or goods/services to local communities? Yes No
- b. If so, what percentage or amount is shared, how often, and why (e.g., required by law, required by contract, voluntary contribution)? VOLUNTARY MAINTENANCE OF BOREHOLES
SCHOOL SUPPORT
- c. Does the company provide game meat to nearby communities? Yes No
- d. If so, please estimate the amount and/or value of meat contributed in prior year and describe the meat contribution program: USD 10,000
- e. If the company performs problem animal activities for surrounding communities (e.g., patrolling fields during the harvest, chasing away problem animals, conducting PAC hunts or PAC killings), please describe. NIL
- f. Please describe any consolation payments made to local residents damaged by game species. What currency are the expenditures reported in? _____

Species	Damage caused	Consolation paid 2015	Consolation paid 2016	Consolation paid 2017
Elephant				
Lion				NIL
Leopard				PAID
Other				

- g. Please describe any community projects paid for by the company. What currency are the expenditures reported in? USD

Type of project	Spending 2015	Spending 2016	Spending 2017	Remarks
Education (e.g., classrooms, offices)			2000	MAINTENANCE, DESKS, CHAIRS
Education (e.g., school fees, supplies)			1000	EXERCISE BOOKS PEN, PENCILS
Health (e.g., clinics, offices)			1000	ROOFING, REPAIRS
Health (e.g., medical salaries, equipment)			NIL	
Community scout salaries			NIL	
Other community anti-poaching			NIL	
Local government activities			NIL	
Water infrastructure improvements			5000	BOREHOLE MAINTENANCE

Biologists	1	
Others: _____	60	

7. Number of staff employed in the off-season: 130

a. Please identify the number and type of staff that are engaged when the season is not open:

Type	Total number of this type	Number of locals/from nearby communities	When employed?
Anti-poaching staff			
Managers			
Maintenance			
Road opening/construction			
Community relations personnel			
Others: _____			

AS ABOVE

8. Anti-poaching efforts:²

a. Number of anti-poaching staff: 44

b. Are anti-poaching patrols conducted during the hunting season, off-season, or both? BOTH

c. Months during which anti-poaching patrols are conducted: ALL YEAR

d. Number of anti-poaching patrols per month: ± 460/MONTH

e. Description of anti-poaching equipment, vehicles, etc.: VEHICLES, RADIOS x 16, SHOTGUNS x 30

f. Who is responsible for organizing and coordinating anti-poaching from prevention through successful prosecution? ANTI POACHING MANAGER

g. Do you offer rewards to poaching informants leading to arrest? Yes No

² The new FWS import permit application asks for activities that provide a "conservation benefit" to the species. The FWS considers anti-poaching a "conservation benefit."

Conservation Force
Operator Enhancement Questionnaire

v.5/8/18

1. Name of area operator: ZAMBEZI HUNTERS
- a. Years in business: 40 YRS
- b. Name of company conducting hunt: ZAMBEZI HUNTERS
2. Name of concession: SANKO Size in km²: 600
- a. Land tenure: Government lease Community Private ranch Private conservancy
- b. Length of concession agreement: N/A Can it be renewed? Yes No N/A
- c. Are there any special obligations under the concession agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain:
STANDARD OPERATING PROCEDURE
- d. Please provide the concession location and nearest city. Please attach a map or maps with the boundaries marked and showing the nearest city:
ZIMBABWE MASVINGO
- e. If the concession borders a national park, please provide the park name: N/A
- f. Description of general and distinctive habitat features and any water features:
SAVE RIVER; MOKOCE RIVER; 9 BIOMES IN AREA
3. Are there any communities living in the concession? Yes No
- a. If so, estimated number of people or villages in the concession? N/A
4. Are there communities bordering this concession? Yes No
- a. If so, estimated number of people or villages around the concession? _____
5. Relevant game populations in the concession:¹

Species name	Relative Abundance (dense/avg./sparse)	Est. population	3-Year trend (up/down/stable)	How monitored?
Elephant	DENSE	684	UP	AERIAL COUNT
Lion	DENSE	120	UP	"
Leopard	DENSE	147	UP	"

TOTALS		7000		

11. How many U.S. clients did the company have in the past three years, and what percentage of the company's clients were from the U.S.?

	2015 (number and percentage of U.S. clients)	2016 (number and percentage of U.S. clients)	2017 (number and percentage of U.S. clients)
U.S. clients (total)	23 75%	20 60%	20 60%
-- hunting lion	2 100%	2 100%	1 100%
-- hunting elephant	2 100%	1 50%	1 50%
-- hunting leopard	5 100%	4 80%	3 80%

12. Dollar amount and percentage of the company's revenue from U.S. clients: 550,000 - 62%

13. Other information: Please provide a narrative of other enhancement information about the company, such as any special hunting policies (e.g., aging, size, resting areas), concession improvements (e.g., digging and maintaining boreholes, restocking), management activities, research, etc.

14. I declare that the foregoing is true and correct.

Signature: 

Name: W.G. TAYLOR

Title: REPRESENTING ZAMBESI HUNTERS

each property is separately owned, internal fences have been removed to create the conservancy's contiguous protected area, and wildlife management decisions are taken at the conservancy level.

5. SVC was a cattle ranch for seven decades before it converted to wildlife habitat and came together as one conservancy in the 1990's. Approximately 4,000 animals of 14 species were reintroduced, including elephants in the largest translocation undertaken to date (~685 elephants). Given the extent of habitat and the owners' commitment to conservation, wildlife populations grew rapidly. SVC developed into a conservation area of global significance. A portion of SVC was re-settled in 2000-2001. Villages remain in a few areas otherwise committed to wildlife. Although human-wildlife conflicts can arise in this situation, conflicts are mitigated by benefits-sharing and intensive anti-poaching.

6. Regulated hunting was essential for the successful transition from cattle to wildlife, because it generated income to restock game and improve security. One property sought to attract non-consumptive photographic safaris through an up-market lodge offering game drives and bush walks. Occupancy rose from 0% in 1996 to 62% by the end of 1999; however, following the land reform program and resultant political instability, the photo-tourism industry collapsed. The lodge experienced a 98%-cancellation of confirmed bookings. Regulated hunting was, and remains, the only economically viable land use. After four years of seeking alternative markets, the lodge could achieve no higher than 17% occupancy, and moved back into a hunting-based operation. Now, all of SVC's revenues come from regulated hunting.

7. SVC conducts annual aerial surveys and road strip counts to determine population trends, distribution, and social organization of large herbivores, keeps track of annual rainfall, and monitors vegetation and soil conditions to guide management decisions and quota setting. A yearly

predator spoor count is conducted as well. A Technical Advisory Committee recommends evolving best wildlife management practices.

8. SVC's anti-poaching efforts are extensive. Approximately 200 game scouts patrol the various ranches to pick up snares and keep meat poaching under control. A special team of 30 to 40 highly-trained scouts, the Special Species Protection Unit (SSPU), combats elephant and rhino poaching specifically. Annual anti-poaching expenses (ranger salaries, training, vehicles, equipment, petrol, and other necessities) are almost \$500,000. We hope to expand the SSPU to 50 individuals at the cost of another \$100,000 per year.

9. In the past 25 years, SVC's elephant population has quadrupled from the original, translocated individuals. The population is estimated at 2,200. Elephant management is guided by an adaptively-implemented plan incorporating regulated hunting to achieve management targets. The annual hunting quota is seven elephants, representing only 0.3% of the population. Those few hunts generate significant revenue that is reinvested in management and protection, including for the large black rhino population, which is not currently hunted.

10. After SVC was established and as ungulate populations increased, lion began to re-colonize the conservancy and thirteen lions were reintroduced, including ten on Sango ranch. After an initial lag period, the population has flourished. Annual monitoring began in 1999. Since 2007, annual monitoring is conducted using track index surveys in a research project co-sponsored with the African Wildlife Conservation Fund. In 2011, those survey results were verified using a baited call-up. Prey availability models suggest SVC's carrying capacity for lion is approximately 271. The 2015 population was estimated at 284. This suggests lion have reached the ecological carrying capacity, even though responsibly hunted.

11. Lion are managed under an adaptive, science-based plan adopted in 2011. The plan specifically incorporates regulated hunting as a management conservation tool. Quotas are set at a low percentage of the total population; from 2009 to 2015, the annual quota was seven lion and, as a result of full compliance with the age-based system implemented in 2013, the quota was raised to ten lion for 2016.

12. Both Conservation Force and Dallas Safari Club have funded conservation activities within SVC. For example, Conservation Force co-funded our lion management plan.

13. On behalf of SVC, I provided information to Conservation Force to evidence the benefits of elephant and lion hunting on the Conservancy, which I understood would be used for comments in response to the U.S. Fish and Wildlife Service suspension of elephant trophy imports from Zimbabwe and in support of applications for elephant and lion trophy import permits.

14. Revenues from regulated elephant and lion hunting is essential to supporting ranch owners' investment in habitat management, poaching control, water provision, fence maintenance, and community support, which benefit the elephant and lion. These revenues are extensive. For the period 2005 to 2011, Dr. Rosemary Groom on behalf of SVC estimated that net income from lion hunting (< 4 lion per year) amounted to over \$1.36 million in bed nights and \$260,000 in trophy fees. Dr. Groom also calculated the "significant cost" lion "impose on conservancy landowners through predation on valuable prey species that could otherwise be sold as trophies or meat." The calculated loss of 8% relative to gross income in 2009 was \$494,776. If this loss is not offset with regulated hunting income, it is difficult for landowners to bear the expense of the large and growing lion population.

15. SVC invests over \$100,000 in community infrastructure and game meat donations to reduce conflicts and increase tolerance among local villages: drilling boreholes, building clinics

and schools, providing computer equipment, etc. SVC entered into an agreement with local Chiefs to share revenues from regulated hunting and sales of game meat.

16. Over 90% of SVC's hunting clients are U.S. citizens—and this percentage is 100% on some properties. SVC relies on these U.S. clients to fund its extensive anti-poaching efforts and science-based elephant and lion management. At least three U.S. hunters have applied for permits to import lion or elephant trophies hunted in SVC in 2015, 2016, and 2017.

17. SVC's revenues will decline if elephant and lion trophies are not importable into the U.S. Consequently, its excellent management efforts will suffer. The quotas will not change (and did not change when the U.S. Fish and Wildlife Service suspended the import of elephant trophies from Zimbabwe or listed the lion as threatened under the U.S. Endangered Species Act). However, the willingness of U.S. citizens to pay premium prices was reduced by these policy decisions, and in turn, SVC's revenues were reduced. These revenues will be cut further if imports remain closed. Unfortunately, the conservancy's elephant, lion, rhino, and other wildlife populations will pay the price if anti-poaching efforts and community investment and conflict mitigation expenditures must be reduced as well.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

CURRENT ISSUES

Poaching of elephants for ivory has escalated in the past ten years and has become a major problem in Zimbabwe. A worrying recent development has been the emergence of poisoning as a poaching technique. Just over 100 elephants were killed in a single cyanide poisoning incident in Hwange National Park in late 2013 (Muboko et al., 2014). The impact of poaching has been highest in the north of the country, particularly in the Sebungwe Region to the south of Lake Kariba, and the Lower Zambezi Region (Dunham et al., 2015c). Although elephant numbers have increased in Gonarezhou National Park, it too experienced an increase in poaching in 2015 (Dunham & van der Westhuizen, 2015).

Concern has been expressed about the impact of high numbers of elephants on vegetation and other biodiversity in Zimbabwe's protected areas. Despite the increase in poaching, this remains a problem in protected areas such as Hwange NP, where the provision of artificial water supplies has led to high elephant densities (ZPWMA, 2015).

Zimbabwe published a national elephant management plan covering the period 2015 to 2020 (ZPWMA, 2015).

In 2008, Zimbabwe undertook an approved one-off sale of 3,764 kg of ivory to Japan and China, at a price of USD \$487,162 (Wijnstekers, 2011).

Zimbabwe's annual declared export quota of elephant trophies remains unchanged since 2007 at 1,000 (tusks as hunting trophies from 500 animals) (CITES, n.d.-b). In 2015, the US Fish and Wildlife Service removed its 'non-detriment' finding, thus banning the import of elephant trophies into the USA (USFWS, 2015a).

NUMBERS AND DISTRIBUTION

The estimated number of elephants in areas surveyed in the last ten years in Zimbabwe is $82,630 \pm 8,589$ at the time of the last survey for each area. There may be an additional 1,635 to 1,805 elephants in areas not systematically surveyed. These guesses likely represent a minimum number, and actual numbers could be higher than those reported. Together, this estimate and guess apply to 78,839 km², which is 97% of the estimated known and possible elephant range. There remains an additional 3% of the estimated range for which no elephant population estimates are available.

There has been a decline of just over 10,000 elephants from surveyed populations since the AESR 2007 and an increase of about 1,000 in guesses, mostly from previously unsurveyed areas in North West Matabeleland. Although there have been large losses from the Sebungwe and Lower Zambezi populations, these have been partially compensated by increases in Gonarezhou and North West Matabeleland.

The major populations of the Lower Zambezi Valley (including Mana Pools National Park), Sebungwe (including Matusadona and Chizarira National Parks), North-west Matabeleland (including Hwange and Zambezi National Parks) and the south-east Lowveld (including Gonarezhou NP) were surveyed in 2014 using aerial sample counts (including block counts in hilly areas) as part of the Great Elephant Census.

The estimate from the Lower Zambezi Valley in 2014 was $11,656 \pm 2,259$ (Dunham et al., 2015c). The previous comparable estimate was $19,297 \pm 2,527$ in 2001 (Mackie, 2002). The 2014 figure replaces an estimate from the AESR 2007 of $19,981 \pm 2,392$ from 2003 (Dunham, 2004). This survey was less comparable than the 2001 one because it covered a slightly smaller area. There was an approximately 40% decline in the 13 years between 2001 and 2014. The observed carcass ratio of 6% is not as high as one would expect given the rate of population reduction and might suggest that the level of poaching has reduced in recent years. The corridor between the Mavuradonha Wilderness Area and the rest of the Zambezi Valley range has been changed to possible range (Packenham quoting Varden, pers. comm., 2016).

The 2014 estimate for Sebungwe was $3,407 \pm 1,215$ (Dunham et al., 2015b) which replaces an estimate of $15,024 \pm 2,133$ from a 2006 survey (Dunham et al., 2006a). The observed carcass ratio of 30% indicates an unsustainably high offtake of elephants. There were almost no elephants left in the communal areas, with the main surviving sub-populations in Matusadona and Chizarira National Parks and the Chirisa Safari Area. Wildlife scouts reported 70-100 elephants in Kavira Forest Land at the western end of Sebungwe (M. Sebele pers. comm. in Dunham et al., 2015b).

The 2014 estimate for North-west Matabeleland was $53,991 \pm 7,711$ (Dunham et al., 2015a), which replaces an estimate of $49,310 \pm 7,051$ from 2001 (Dunham & Mackie, 2002). There was no significant difference between the totals although the increased carcass ratio of 7% from 3% in 2001 is a worrying sign. Other aerial sample counts were carried out in 2006 and 2007 but they were not

suitable for comparative purposes (Dunham et al., 2007; Dunham et al., 2006b). Since the 2014 Botswana survey was carried out a month earlier than the north-west Matabeleland survey there is a possibility of double-counting or missing animals that had moved from Hwange into Botswana. There was a surprisingly large number of elephants seen in the Ngwasho/Sepako stratum in Botswana adjoining the southern half of Hwange NP (estimate 11,744) (Chase et al., 2015) and evidence from radio-tracking shows that elephants do move out of Hwange into adjoining areas of Botswana (Chamaillé-Jammes, pers. comm., 2016; Ferguson & Chase, 2010).

Elephant range in North-west Matabeleland has probably increased. Water hole counts and scout reports indicated 308 elephants in the Fuller Forest Land, 165 in Gwaai, Bembezi and Umguza Forest Lands (which has been marked as new **known range**) and 150 in Gwampa/Lake Alice Forest Reserves (M. Sebele pers. comm in Dunham et al., 2015a) which are all recorded as **new populations**. I. Du Preez (pers. comm. in Dunham et al., 2015a) reported an **informed guess** of 36 elephants in the privately owned Stanley & Livingstone Game Reserve (Nakavango).

The estimate for Gonarezhou NP from the 2014 survey was $11,120 \pm 2,709$ (Dunham & van der Westhuizen, 2015). This replaces an estimate of $4,987 \pm 1,577$ from a comparable 2001 survey. Another survey in 2009 gave an estimate of $9,123 \pm 1,898$ (Dunham et al., 2010). The elephant population of Gonarezhou NP is continuing to increase, and is at its highest level since surveys started in 1980. There was a relatively low carcass ratio of 4%. There are limited movements of elephants from Gonarezhou into adjoining parts of Mozambique, and one radio-collared elephant moved from Kruger to Gonarezhou (Henley, 2011).

The 2014 survey of the south east Lowveld included some neighbouring areas. No elephants were observed in the Malapati Safari Area immediately south-west of Gonarezhou but there was an estimate of 332 ± 519 in the Mahenye communal land to the north-east of Gonarezhou, which replaces a zero estimate from the 2001 survey. The 2014 survey gave an estimate of $1,585 \pm 1,295$ for the Savé Valley Conservancy. This replaces an estimate of 527 ± 310 (Dunham, 2003). There is no statistical difference between the two results. Aerial total counts were carried out in 2013 and 2015 (Jooste & Lenton, 2015; Joubert & Joubert, 2013), which did not cover the entire area: 1,538 and 1,490 elephants were counted respectively. Sengwe, further to the south-west, adjoining the northern boundary of Kruger National Park in South Africa, was not counted in the 2014 survey, but there was an estimate of 35 ± 99 in 2013 (Dunham et al., 2013). In the Malilangwe Conservancy 272 elephants were counted using a helicopter in 2013 (Clegg, 2013). This replaces an estimate of 116 from an aerial total count in 2001 (Dunham, 2002). There was an estimate of 55 in 2014 for the Chiredzi River Conservancy (Warth in Dunham & van der Westhuizen, 2015) compared to 28 in 2001 (Dunham, 2002). Although Chipinge Safari Area is marked as possible elephant range, this is now highly unlikely.

There are a number of small isolated populations in other parts of Zimbabwe, which have updated estimates for 2014. There is an informed guess of 150 elephants for Chegutu Safari Area (Mwale, pers. comm. in Dunham, 2015), formerly Hartley Safari Area, west of Harare and this replaces a guess of 100 from 2001 (Dunham & Mackie, 2002). Some 30 elephants reportedly move from the Nyatana Wildlife Management Area in the north east of the country into Mozambique and this replaces a guess of 150 from 2001 (Dunham & Mackie, 2002).

Some 20 bull elephants were photographed, and there was a further unverified report of 40 elephants, near Mangwe Dam in the vicinity of Home Farm and Greystone Ranches, across the border from Francistown in Botswana (Robertson and Winch, pers. comm. in Dunham, 2015) replacing a guess of three from 2002 (Dunham & Mackie, 2002). A helicopter total count enumerated 174 elephants on Shangani Ranch near Bulawayo (Edwards, pers. comm. in Dunham, 2015) and this replaces a guess of 60 from 2001 (Dunham & Mackie, 2002).

There was a **total aerial count** of 212 elephants in 2014 in the Zimbabwe section of the Mapungubwe Transfrontier Conservation Area which includes Tuli Safari Area, Sentinel, Nottingham and River Ranches (Selier & Page, 2015). This replaces an estimate of 82 from 2001 (Dunham & Mackie, 2002).

There were **informed guesses** in 2014 of 500-600 in Buby Valley (Leathem & English pers. comm. in Dunham, 2015), and 100 on Bubiana Conservancy (Drummond pers. comm. in Dunham, 2015) in the south of Zimbabwe, replacing guesses of 53 and 50 respectively (Dunham & Mackie, 2002). An old estimate of ten elephants in the Mambali Communal Lands on the Botswana border has been retained from the AESR 2007 (Dunham & Mackie, 2002). A report of 54 elephants on Nuanetsi Ranch is recorded as a **new population**.

KEY TO REASONS FOR CHANGE

DA: Different Area; DD: Data Degraded; DT: Different Technique; NA: New Analysis; NG: New Guess; NP: New population; PL: Population Lost; RS: Repeat Survey (RS denotes a repeat survey that is not statistically comparable for reasons such as different season); - : No Change

PFS

Priority for Future Surveys (PFS) is ranked from 1 to 5 (highest to lowest). Based on the precision of estimates and the proportion of national range accounted for by the site in question, PFS is a measure of the importance and urgency for future population surveys. All areas of unassessed range have a priority of 1. See Introduction for details on how the PFS is derived.

KEY TO SURVEY REPORT

AS: Aerial Sample Count; AT: Aerial Total Count; DC: Dung Count; GD: Genetic Dung Count; GS: Ground Sample Count; GT: Ground Total Count; IG: Informed Guess; IR: Individual Registration; OG: Other Guess. Survey Reliability is keyed A-E (best to worst)

**Department of Interior
U.S. Fish and Wildlife Service
Federal Fish and Wildlife Permit Application Form**

U.S. Fish and Wildlife Service
Division of Management Authority
Branch of Permits, MS: IA
5275 Leesburg Pike
Falls Church, VA 22041-3803
1-800-358-2104 or 703-358-2104

Type of Activity

**IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN
AFRICAN LEOPARD AND NAMIBIAN SOUTHERN WHITE
RHINOCEROS**

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name KNOBELOCK	1.b. First Name TORREY	1.c. Middle Name/Initial —	1.d. Suffix —
2. Date of Birth (mm/dd/yyyy)			

Section B: Complete if applying as an organization, corporation, partnership, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Using business or agency	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Business fax number	7.c. Business e-mail address	7.d. Business website

Section C: All applicants complete address information

1.a. Physical address (include apartment, suite, or P.O. Box)				
1.b. City RICHMOND	1.c. State TX	1.d. Zip code/Postal code	1.f. Country USA	
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach the nonrefundable application processing fee in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – attach documentation of fee exempt status as outlined in Instructions [50 CFR 13.11(d)].
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50 Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.
Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)
<div style="display: flex; justify-content: space-between;"> <i>Torrey Knoblock</i> 6-11-18 </div> <p align="center">Please continue to next page</p>

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit to the address on page one.

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 4: Certain hunting trophies, including leopard and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

- Complete all questions on the application.
- Mark questions that are not applicable with "N/A".
- If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.
- If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

PRO CARBO USA ATTN CINDI RULON
15619 MORALES ROAD HOUSTON, TX 77032

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

CINDI RULON - PRO CARBO 281-220-3176
CINDI.RULON@PROCARBOUSA.COM

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):
- a. Leopard (*Panthera pardus*) Quantity: 1 (Limited to the import of two per calendar year). If you wish to import a leopard taken in northern or western Africa, please use form 3-200-20.
 - b. Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia
Quantity: (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use Form 3-200-20).

~~5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, Please enter the following information:~~

- ~~a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:~~
- ~~b. Date wildlife is to be hunted:~~
- ~~c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:~~

6. IF THE ANIMAL HAS ALREADY BEEN TAKEN, please enter the following:

d. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

FARM OKATJERU #53 WINDHOEK, NAMIBIA

e. Date wildlife was hunted: 6/18/2016

f. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

OMUJEVE HUNTING SAFARI
ROYSTON WRIGHT
FARM DN6OMBO WEST SECTION 2 No 56 WINDHOEK 9000
NAMIBIA

g. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

FARM OKATJERU 53
PO BOX 9658
WINDHOEK, NAMIBIA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you.

a. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: ROYSTON WRIGHT
Business Name:
Address: FARM OKATJERU #53
Address: PO BOX 9658
City: WINDHOEK
State/Province: NAMIBIA
Country, Postal Code:

CERTIFICATION STATEMENT (original signature must be provided for either 9 or 10 below)

9. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

10. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

X Applicant's signature: Tourey Kulechuk Date: 6-11-2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

11. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Re: Application for a Permits to Import a Sport-Hunted Elephant Trophy

Dear Chief Cogliano:

Enclosed please find one application for a permit to import a sport-hunted elephant trophy from the N#a Jaqna Conservancy in Namibia. An enhancement report from this operator will follow. We are also enclosing information from the African Elephant Status Report (2016) about Namibia's growing elephant population, a study on the benefits of elephant hunting to community conservancies in Namibia and a study on the views of Namibian conservancy members towards hunting, and information from the Namibian Association of CBNRM Support Organizations (NACSO) about this area. Elephant hunting in Namibia and in this area generates significant benefits for the species and the rural communities that rely on hunting revenues and meat distributions. Please consider this information, as well as information in the DMA's files and submitted by Conservation Force and Namibia's Ministry of Environment and Tourism, in making a positive enhancement finding for this applicant.

Please do not hesitate to contact us if you have questions about these applications or need further information.

Sincerely,

Regina Lennox

Encl:

- AfESG Status Report (2016)

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted African bush Elephant trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Conservation Force
3240 S. I-10 Service Road W., Suite 200
Metairie, Louisiana 70001 USA
T: (504) 837-1233
F: (504) 837-1145
E: cf@conservationforce.org

Signed: Amy [REDACTED] Dement
Name: Amy [REDACTED] Dement
Date: 05/10/2018

E. IMPORT OF SPORT-HUNTED TROPHIES (*Appendix I of CITES and/or ESA*)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form ([3-200-52](#)) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at [50 CFR 23.74](#) as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- (1) Is raw, processed, or manufactured;
- (2) Was legally obtained by the hunter through hunting for his or her personal use;
- (3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- (4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, **if different from page 1**. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Conservation Force, 504-837-1233, cf@conservationforce.org

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No X Yes _____

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

African bush Elephant; *Loxodonta africana*

b. Sex (if known). Male

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Country - Namibia; Area - N/a Jagna Conservancy; Region - Bushmanland region of Namibia
Nearest Town - Tsumkwe; Nearest City - Windhoek

b. Date wildlife is to be hunted: 06-16-18 to 07-04-18

b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Name of Hunting Outfitter - Peter Thormahlen; Name of Safari Company - Thormahlen & Cochran
Safaris Namibia Pty Ltd.; Name of Professional Hunter - Anton Mynhardt Alberts

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

b. Date wildlife was hunted:

b. Name of hunting outfitter, safari company, or professional hunter you hunted with:

c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

SHIPPING COMPANY:
Name: Rainer Sentefoll
Business Name: African Shipping Services CC
Address: 46 TV Moore Street Southern Industrial
City: Windhoek
State/Province:
Country, Postal Code: Namibia
Rainer@africanshippingsservices.com
Tel: +264 61 305821

PROFESSIONAL HUNTER:
Anton Mynhardt Alberts
92 Nelson Mandela Ave.
Stillwater #5
Klein Windhoel
Windhoek
Namibia

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted? The Namibian Government (Ministry of Environment & Tourism-MET) has this information and forwarded it to the USF&W.

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

Funds Paid: Trophy Fee-\$15,000; Community Fee-\$22,500; License Fee-\$1,000;
Daily Rates-\$4,400 per day; Operator Conservation Fee-\$5,000

The Operator Conservation Fee Funds are used to develop the concession, which will be explained in the Concession Report answer to question 9c.

Usage of Funds by Community: Funds going to the N/a Jagna Community is being managed by and audited by the Naye Naye Development Foundation (NNDP), which is a non-profit organization that works hand in hand with the WWF in Namibia. Monies were used to buy a Toyota Hilux Pick-up plus a number of community development programs were funded.

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

GENERAL STATISTICS

Country Area	825,418 km ²
Range Area	164,069 km ² (20%)
Protected Range	18 %
Information Quality Index (IQI)	0.43
CITES Appendix	II
Listing Year	1997

CURRENT ISSUES

Namibia's elephants occur across the northern region of the country, mostly in national parks and community areas. Their range encompasses a wide variety of habitats, from the extremely arid north-west Kunene Region to the well-watered Zambezi (formerly Caprivi) Region, where the elephants form part of the KAZA transfrontier population. Although poaching has increased in the Zambezi Region in the past ten years, it is not seen as a significant threat in Etosha National Park or for populations in Khaudum National Park and Kunene Region.

Elephant hunting takes place in Namibia, and the revenue generated provides significant income to community conservancies (Naidoo et al., 2006). From 2007 to 2015, Namibia declared an annual export quota of elephant hunting trophies of 180, defined as tusks from 90 animals (CITES, n.d.-a).

Namibia's elephant management plan was published in 2007 (Ministry of Environment and Tourism, 2007).

In 2008, Namibia undertook an approved one-off sale of 7,503 kg of ivory to Japan and China, at a price of USD \$1,147,369 (Wijnstekers, 2011).

NUMBERS AND DISTRIBUTION

The estimated number of elephants in areas surveyed in the last ten years in Namibia is 22,754 \pm 4,305 at the time of the last survey for each area. There may be an additional 90 elephants in areas not systematically surveyed. These guesses likely represent a minimum number, and actual numbers could be higher than those reported. Together, this estimate and guess apply to 84,283 km², which is 52% of the estimated known and possible elephant range. There remains an additional 48% of the estimated range for which no elephant population estimates are available.

The elephant population of Namibia has continued to increase although, with wide confidence limits in aerial surveys and elephants moving across international borders, it is not possible to be precise about how great the increase in the national population has been.

There are four main populations, the transfrontier population (with Zambia, Angola, Botswana and Zimbabwe) in the Zambezi Region, in Khaudum National Park in the north-east, the Etosha National Park population, and the Kunene population in the north-west which includes the "desert" elephants.

There has been an increasing trend in elephant numbers in the Zambezi Region since surveys started in the 1980s. This is likely to have been a result of both natural growth and movement from neighbouring countries. **Aerial sample counts** were carried out in 2007, 2011, 2013, 2014, and 2015, giving estimates of 8,380, 10,847 \pm 3,580, 9,165 \pm 2,016, 14,097 \pm 2,678 and 13,116 \pm 3,413 (Chase, 2007; Craig & Gibson, 2013b, 2014; Craig, 2011b; Gibson & Craig, 2015a). The previous estimate in the AESR 2007 was 8,725 \pm 2,206 (Kolberg, 2004). There was also a total count carried out in 2007 (Chase, 2007) and a sample count in 2008 (Kolberg, 2008). However the latter was carried out with an inexperienced crew and the results were thought to be a considerable underestimate (Kolberg, 2008).

The elephant population of Khaudum NP and the neighbouring community conservancies of Nyae Nyae and N#a Jaqna have been established since the 1980s, with the provision of artificial water and movements across the border from Botswana. Three **aerial sample counts** were carried out in 2011, 2013 and 2015 giving estimates of 4,731 \pm 1,940, 3,638 \pm 1,164, and 6,413 \pm 2,566 (Craig & Gibson, 2013a; Gibson & Craig, 2015b; MET, 2012). The 2015 figure replaces an estimate of 3,758 \pm 2,289 for Khaudum, 61 \pm 115 for N#a Jaqna (Kolberg, 2004) and 967 \pm 481 for Nyae Nyae (Stander, 2004). None of these are significant differences.

There is a limited movement of elephants between Angola and the Kavango region to the north-west of Khaudum (Terblanche, 2016).

There is a small elephant population in the Mangetti area between Khaudum and Etosha. The AESR 2007 indicated that they occupy the Mangetti Game Reserve, whereas their range is actually concentrated around the Mangetti Cattle Ranch to the west, and also probably extends into the Ukwuqali communal area to the north. Ninety individuals were observed in Mangetti in 2015 (Lindeque, pers. comm., 2016). This **informed guess** replaces one of 20 from 2005 (Ministry of Environment and Tourism, 2005).

Etosha National Park in northern Namibia has an increasingly isolated elephant population, since the perimeter fencing has been upgraded in recent years. There has been a gradual increase in elephant numbers, moderated by deaths from anthrax and poaching. Aerial sample counts were carried out in 2011 and 2012, giving estimates of $3,378 \pm 1,756$ and 2,810 (confidence limits not available) (Kolberg, 2012; MET, 2012). The most recent **aerial sample count** from 2015 gave an estimate of $2,911 \pm 637$ (Kilian, 2015) and replaces an estimate of $2,057 \pm 598$ from 2004 (Kilian & Kolberg, 2004).

It is technically very difficult to count the widely scattered elephant population in the Kunene Region, which includes the 'desert elephants' in the dry, western extremity of the range and there has been controversy about the numbers in this area. A combined sample block count and **aerial total count** was carried out by helicopter in 2011, giving an estimate of 314 ± 154 (MET, 2012). This replaces an estimate of 210 ± 157 from a 2005 survey (Ministry of Environment and Tourism, 2005). It should be noted that the count did not include the extreme northern part of the range around Opuwo, nor the farms to the south of Etosha. There **has** been some range expansion to both the south and north, with elephants now being resident in the Ugab river basin and about ten elephants resident in the northern Etanga area (Owen-Smith, pers. comm., 2014). The area of **known range** has been changed, and the Etanga group is shown as a point record on the map. The Kunene population appears to have been increasing in numbers and range, despite evidence that the 'desert elephant' sub-population in the Houanib and Houarusib dry riverbeds reduced from 42 to 31 between 2002 and 2015 (Ramey & Brown, 2015).

There are occasional sightings of elephants in livestock ranching areas to the south of their normal range in the area north and east of Windhoek. These are shown as point records on the range map (Hartman, 2014; The Namibian, 2014).

KEY TO REASONS FOR CHANGE

DA: Different Area; DD: Data Degraded; DT: Different Technique; NA: New Analysis; NG: New Guess; NP: New population; PL: Population Lost; RS: Repeat Survey (RS denotes a repeat survey that is not statistically comparable for reasons such as different season); —: No Change

PFS

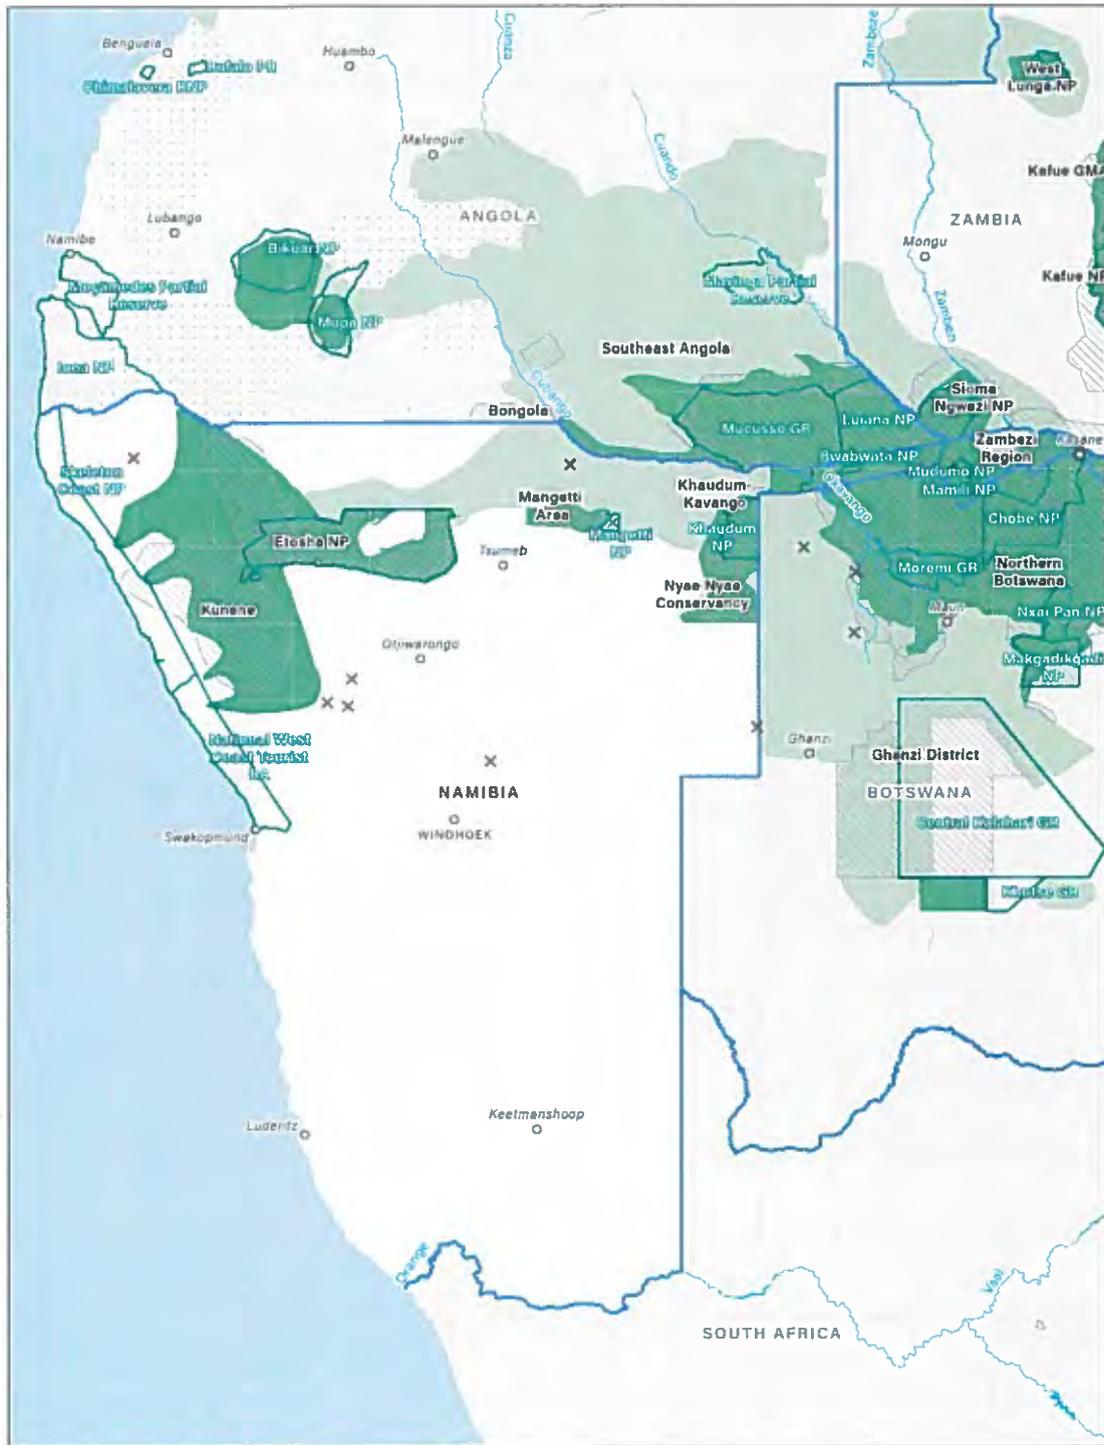

Priority for Future Surveys (PFS) is ranked from 1 to 5 (highest to lowest). Based on the precision of estimates and the proportion of national range accounted for by the site in question, PFS is a measure of the importance and urgency for future population surveys. All areas of unassessed range have a priority of 1. See Introduction for details on how the PFS is derived.

KEY TO SURVEY REPORT

AS: Aerial Sample Count; AT: Aerial Total Count; DC: Dung Count; GD: Genetic Dung Count; GS: Ground Sample Count; GT: Ground Total Count; IG: Informed Guess; IR: Individual Registration; OG: Other Guess. Survey Reliability is keyed A-E (best to worst).

Complementary benefits of tourism and hunting to communal conservancies in Namibia

Robin Naidoo,* L. Chris Weaver,† Richard W. Diggle,† Greenwell Matongo,† Greg Stuart-Hill,† and Chris Thouless† ‡

*WWF-US, 1250 24th Street NW, Washington, D.C. 20037, U.S.A., email robin.naidoo@wwfus.org

†WWF in Namibia, P.O. Box 9681, Windhoek, Namibia

Abstract: *Tourism and hunting both generate substantial revenues for communities and private operators in Africa, but few studies have quantitatively examined the trade-offs and synergies that may result from these two activities. We evaluated financial and in-kind benefit streams from tourism and hunting on 77 communal conservancies in Namibia from 1998 to 2013, where community-based wildlife conservation has been promoted as a land-use that complements traditional subsistence agriculture. We used data collected annually for all communal conservancies to characterize whether benefits were derived from hunting or tourism. We classified these benefits into 3 broad classes and examined how benefits flowed to stakeholders within communities under the status quo and under a simulated ban on hunting. Across all conservancies, total benefits from hunting and tourism increased at roughly the same rate, although conservancies typically started generating benefits from hunting within 3 years of formation as opposed to after 6 years for tourism. Disaggregation of data revealed that the main benefits from hunting were income for conservancy management and food in the form of meat for the community at large. The majority of tourism benefits were salaried jobs at lodges. A simulated ban on trophy hunting significantly reduced the number of conservancies that could cover their operating costs, whereas eliminating income from tourism did not have as severe an effect. Given that the benefits generated from hunting and tourism typically begin at different times in a conservancy's life-span (earlier vs. later, respectively) and flow to different segments of local communities, these 2 activities together may provide the greatest incentives for conservation on communal lands in Namibia. A singular focus on either hunting or tourism would reduce the value of wildlife as a competitive land-use option and have grave repercussions for the viability of community-based conservation efforts in Namibia, and possibly other parts of Africa.*

Keywords: communal lands, community-based conservation, financial benefits, hunting ban, in-kind benefits, stakeholders

Resumen: *El turismo y la caza generan ingresos públicos sustanciales para las comunidades y los operadores privados en África, pero pocos estudios han examinado cuantitativamente las compensaciones y las sinergias que pueden resultar de estas dos actividades. Evaluamos las oleadas de beneficios financieros y de pago en especie provenientes del turismo y la caza en 77 zonas de conservación comunal en Namibia desde 1998 a 2013, donde la conservación de vida silvestre basada en la comunidad ha sido promovida como un uso de suelo que complementa la agricultura tradicional de subsistencia. Usamos datos colectados anualmente de todas las zonas comunales para caracterizar si los beneficios se derivaron de la caza o el turismo. Clasificamos estos beneficios en tres categorías generales y examinamos cómo los beneficios fluyeron hacia los accionistas dentro de las comunidades bajo el status quo y bajo una prohibición simulada de la caza. En todas las zonas de conservación comunal, los beneficios totales de la caza y el turismo incrementaron aproximadamente a la misma tasa, aunque en estas zonas se comenzaron a generar beneficios de la caza normalmente dentro de los 3 años de formación, en contraste con del turismo que se generaron después de 6 años. La desagregación de los datos reveló que los principales beneficios de la caza fueron los ingresos para*

el manejo de la conservación y la comida en forma de carne para la mayoría de la comunidad. La mayoría de los beneficios del turismo fueron trabajos a sueldo en hospedajes. Una prohibición simulada sobre la caza de trofeos redujo significativamente el número de zonas de conservación que podrían cubrir sus gastos de operación, mientras que la eliminación del ingreso por el turismo no tuvo un efecto severo. Dado que los beneficios generados por la caza y el turismo comienzan comúnmente a tiempos distintos en la duración total de la conservación (más temprano que más tarde, respectivamente) y fluyen a segmentos diferentes de las comunidades locales, estas dos actividades juntas pueden proporcionar incentivos más grandes para la conservación en las tierras comunales de Namibia. Un foco único sobre la caza o el turismo puede reducir el valor de la vida silvestre como opción de uso de suelo competitivo y tener repercusiones graves sobre la viabilidad de los esfuerzos de conservación basada en comunidades de Namibia, y posiblemente de otras partes de África.

Palabras Clave: accionistas, beneficios financieros, beneficios de pago en especie, conservación basada en la comunidad, prohibición de la caza, tierras comunales

Introduction

Current paradigms in conservation increasingly emphasize the utilitarian aspect of safeguarding biodiversity (Daily et al. 2009; Redford & Adams 2009; Guerry et al. 2015), as opposed to more traditional strategies such as protected areas and strict land-use zoning. Ecosystem service approaches and payments for environmental services (PES) schemes are based on the assumption that ensuring a supply of environmental benefits to people will result in the conservation of biodiversity and of natural areas (Tallis et al. 2009; Tallis & Polasky 2009). However, this increasing emphasis on a utilitarian approach to conservation has spawned much debate and criticism. Some contend this new conservation diverts efforts away from ensuring the persistence of biodiversity and puts too much focus on human needs and well-being (Soule 2013; Doak et al. 2014). Others argue that PES programs and partnerships with corporations are resulting in the commodification of nature and that market-based approaches are likely to favor the rich, powerful, and foreign at the expense of local communities and the poor (Sullivan 2006; Igoe et al. 2010).

Although approaches to natural resource management and biodiversity conservation in southern Africa have long been grounded in similar utilitarian perspectives (Child 2004; Carruthers 2008), few approaches to conservation are currently as controversial as the hunting of large and charismatic species as a means of generating benefits and incentives for conservation in this part of the world (Lindsey et al. 2006; Lindsey et al. 2007). Heightened concerns surrounding animal rights and the ethics of hunting, often inflamed by images on social media of trophy hunters posing with dead animals, have led to an increasingly vocal Western opposition to trophy hunting in Africa. This opposition is contributing to tangible policy changes, including the banning of trophy hunting in Botswana (Pabst 2013), restrictions on imports of trophies of certain species to countries such as the United States and Australia (Milman 2015), and the barring of trophies from being transported on some major com-

mercial airlines (Wieczner 2015). Ironically, this Western opposition to trophy hunting comes despite the fact that hunting benefits were one of the early motivations for conservation in North America (Geist et al. 2001), and even today proceeds from hunting licenses in the United States (via the Pittman-Robertson Act) and Canada continue to generate hundreds of millions of dollars every year for wildlife management and habitat protection (Arnett & Southwick 2015).

The impact that changes in hunting policies may have on the conservation of wildlife and on the incentives for African people to coexist with wildlife is not well understood (Buckley & Mossaz 2015). There has been little examination of how benefits from hunting compare with benefits from nonconsumptive nature-based tourism in terms of incentives for local people to conserve species and wildlife habitat, although others have suggested the two may be complementary, rather than substitutive, activities (Leader-Williams et al. 2001; Lindsey et al. 2006). A major limitation is that data on the variety of financial benefits that wildlife generate are typically not systematically collected, especially across different temporal and spatial scales. Yet understanding who benefits, and how, from wildlife as a land use is a critical prerequisite to designing effective policies and programs that support conservation as a sustainable alternative to other, less biodiversity friendly, land uses.

Despite the above knowledge gaps, it is clear that for wildlife to survive outside (and perhaps even inside) protected areas in Africa, people must have strong incentives to tolerate, or ideally embrace, wildlife as a land use (Roc et al. 2009; Dickman et al. 2011; Child et al. 2012). Given that strict protected areas comprise a small and unrepresentative fraction of the African continent, and that even within protected areas wildlife is declining (Western et al. 2009; Craigie et al. 2010), approaches that seek to capture multiple benefits from wildlife conservation on state, private, and communal lands in Africa are indispensable. This principle is especially important when considering the diverse relationships between local communities and wildlife. Communities living with wildlife

are not monolithic entities; rather, they are composed of different groups of people who will experience different costs and benefits from wildlife conservation (Agrawal & Gibson 1999; Roe et al. 2009). For example, wealthy cattle owners and poor subsistence farmers will have different perceptions of wildlife conservation given the particular costs and benefits they are likely to experience. Diversifying benefit streams from wildlife conservation so that the variety of stakeholders within local communities are incentivized to promote or at minimum tolerate living with wildlife will provide the greatest likelihood that conservation as a land use will ultimately prove more attractive than wildlife-unfriendly alternatives. Because communal lands comprise a large fraction of rural Africa (up to 500% more than state-managed forest reserves and national parks [Alden Wily 2011]), management of these lands will play a huge role in determining the success or failure of biodiversity conservation efforts across the continent.

We focused on how different types of benefits provided by wildlife vary over time, space, and community stakeholder groups in communal conservancies in Namibia. Namibia's Community-Based Natural Resource Management (CBNRM) program began in the mid-1990s, when progressive legislation for the devolution of conditional rights to natural resources allowed communities to register areas of customary landholding as "communal conservancies." Registering these conservancies (involving developing zoning and sustainable resource management plans and a constitution) allows local communities to manage and benefit from wildlife and other natural resources on their traditional lands. Prior to the legislation, natural resources were the sole property of the state. Although wildlife has been used by people for millennia in the region that is now Namibia, the last century was characterized by declines in various species, starting with the rinderpest outbreak at the end of the 19th century, followed by overhunting of big game species by colonial hunters, and more recently by a major drought combined with a poaching increase in the 1980s (Owen-Smith 2010). Namibia's CBNRM program is widely recognized as having contributed to a strong recovery of wildlife in large parts of the country, through the creation of social and economic incentives for the sustainable coexistence of wildlife and people on communal lands (Owen-Smith 2010; Naidoo et al. 2011b; NACSO 2013). Additionally, the principles used to incentivize communities to steward wildlife across very large spatial scales are already being adopted by numerous other countries in Africa and beyond (NACSO 2013). We examined how changes in benefits over time generated on communal conservancies in Namibia vary according to whether they were derived from tourism or hunting (the 2 most significant benefits derived from wildlife). We also assessed how these benefits flow to different stakeholders within local communities and how factors such as time of establishment

and changes in resource management policies affect such benefit flows on communal lands.

Methods

We used data from 77 communal conservancies registered by 2012 in Namibia to examine benefit flows associated with hunting and photographic tourism. The first four of these conservancies were established in 1998, and we used data through the 2013 calendar year for all of them. For both hunting and tourism, conservancies negotiate agreements with private operators. The agreements between conservancies and operators specify the portion of income the conservancy receives (typically 8–12% of total lodge revenue and from 30–75% of trophy price, depending on the species) and jobs to be offered to community members with the operation (from 20–50 for tourism lodges, depending on factors such as size and location, and 8–10 for hunting camps). In addition, community members hunt for subsistence and allow local sales of meat from wildlife through game cropping. Information on fees paid to conservancy management committees; salaries of community members employed in the tourism or hunting industry; and nonfinancial benefits (primarily meat from hunting, but also meals, training, human-wildlife conflict compensation, and other donations to the community at large) is compiled annually by every conservancy. Financial reporting of conservancies is supported by various nongovernmental organizations, is ground-truthed, and is double-checked against analogous reports from tourism and hunting operators.

We used these data and categorized each source of benefit as to whether it was derived from tourism or from hunting. The CBNRM program uses the price of buying alternative meat as the value of wild meat distributed from animals that were hunted (replacement-cost shadow price approach). In 2013, it was 18 Namibian dollars/kg of meat (NACSO 2013). This shadow price can vary and is adjusted from year to year to reflect supply and demand, but the same rate is applied across the country in order to maintain comparability of meat benefits generated in different regions. We used a consumer price index produced by the Bank of Namibia to standardize benefit figures from all years into constant 2013 Namibian dollars. We subsequently expressed all figures in 2013 U.S. dollars (U.S.\$) based on the average monthly exchange rate in 2013 of U.S.\$1 = N\$9.64.

We divided benefits into the 3 classes (described above) because each represented a different type of gain that is channeled to different parts of a conservancy and has different implications for the sustainability of the conservancy and for its livelihood value to members. Income (i.e., fees from lodge and hunting concessions) to management committees is used by conservancies to cover operational and management costs

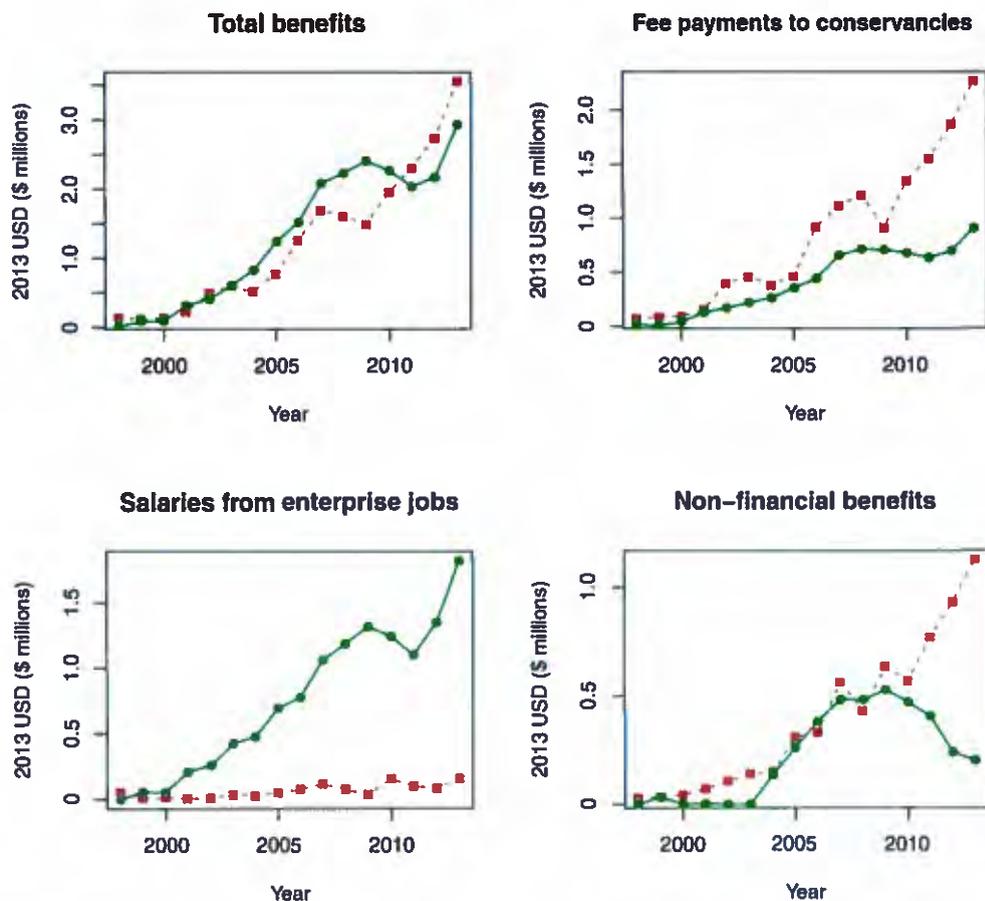

Figure 1. Benefits generated across all conservancies in Namibia's Community-Based Natural Resource Management program, 1998–2013, from hunting (squares) and tourism (circles): (a) total benefits, (b) fee payments to conservancies, (c) salaries from enterprise jobs, and (d) nonfinancial benefits.

(including paying the salaries of community game guards and other conservancy staff members, vehicle fuel costs and maintenance, and office upkeep expenses) and is also distributed as cash and funds for development projects within the community. Individual conservancy members who are salaried employees at tourism lodges or hunting camps clearly benefit financially from conservation, and this linkage should result in strong incentives for promoting wildlife as a land use in their households and among their families and social networks within the community. Conservancy members also benefit individually from the consumption of wild meat that is distributed throughout the community from hunted animals. This benefit, although nonfinancial, is typically viewed as a strong and very direct link between the value of having wildlife on communal lands and the members' livelihoods and well-being (NACSO 2013). To quantify the magnitude of these financial flows from hunting and tourism to stakeholders within communities, we used a subset of conservancy data from 2011 to 2013, during which time detailed financial accounting statements were used to track incoming conservancy revenue.

To simulate how a trophy hunting ban would affect the viability of communal conservancies in Namibia, we used detailed financial statements that were available for a subset of 50 conservancies in 2013 (all but two of the 52 conservancies that generated some level of benefits in 2013) and tabulated the operating costs each conservancy accrued. We then simulated the effects of a ban by removing all cash income that conservancies earned from trophy hunting in 2013 (assuming this cash income could not be substituted by increases in tourism) and calculated the difference in the proportion of conservancies that were able to cover their operating costs based on conservancy income under the status quo versus under a trophy-hunting ban. For comparison's sake, we removed all conservancy income from tourism and assessed how this changed financial viability of conservancies. We also used data on harvested animals and nationally averaged trophy prices to estimate the contribution of individual wildlife species to trophy hunting income.

Finally, for each conservancy we split total benefits over time into 2 series, one for hunting and one for tourism (Supporting Information). We characterized

these financial time series by calculating 4 metrics per conservancy: temporal trend (slope from a linear regression of benefits on year); volatility (root mean square error from the linear regression); end point (magnitude of benefits in 2013); and lag time between year conservancy registered and year the first benefits were generated.

We used *t* tests on these metrics to assess whether temporal flows of benefits to conservancies were significantly different between hunting and tourism.

Results

Of the 77 conservancies established by 2012, 25 reported not generating any benefits from either hunting or tourism. Considering all conservancies in Namibia's CB-NRM program, aggregate benefits increased over time (Fig. 1). Total benefits from tourism and hunting were similar in the early years of the program, but tourism benefits exceeded those from hunting from 2003 to 2010, whereas from 2011 to 2013 the benefits from hunting were greater than tourism benefits (Fig. 1a). Although fee payments to conservancies and nonfinancial benefits (primarily meat) from hunting accumulated at higher levels than those from tourism (Figs. 1b and d), total salaries from tourism enterprise jobs increased 10 times faster than salaries from hunting jobs (Fig. 1c). Nonfinancial benefits from tourism dropped sharply from 2011–2013 relative to continued increasing nonfinancial benefits from hunting (Fig. 1d), a result that may have coincided with the worldwide economic downturn in 2008 and fewer available resources for tourism companies to make additional contributions to conservancies.

Conservancies were formed in roughly 4 cohorts that coincided with (1) initial heavy donor investment (1998–2001, 15 conservancies), (2) a period of declining donor investment (2003–2005, 29 conservancies), (3) an upturn in investment peaking in 2009 (2006–2009, 15 conservancies), and (4) a further increased-investment phase (2011–2013, including 18 conservancies registered by the end of 2012). The earliest conservancies, in cohort 1, had similar levels of total benefits for the first 6 years after registration, after which benefits from both hunting and tourism continued to increase but at a faster rate for tourism (Fig. 2a). Conservancies in cohort 2 (Fig. 2b) had roughly similar rates of growth in total benefits from tourism and hunting, whereas cohorts 3 (Fig. 2c) and 4 (Fig. 2d) earned virtually no benefits from tourism and had either moderate (cohort 3) or low (cohort 4) benefits from hunting.

Disaggregating the national-level data revealed that pathways for generating benefits over time varied substantially among conservancies (Supporting Information). Of the 52 conservancies that derived some level of benefits from wildlife, 28 derived all or almost all of their total benefits from hunting, 6 derived all or almost

all benefits from tourism, and 18 had substantial levels of benefits from both hunting and tourism.

Although there was a tendency for the total benefits from tourism to be higher than those from hunting, there were no significant differences for any of the conservancy time series metrics (Table 1). The only exception to this was the lag time between conservation formation and the beginning of benefits generation. After their formation, conservancies derived benefits from hunting approximately twice as quickly as they derived benefits from tourism (Table 1). On average, conservancies started generating benefits from hunting about 3 years after their formation, whereas it took 6 years, on average, after conservancy formation to start generating benefits from tourism.

In addition to temporal and spatial differentiation, there were differences in how benefits from tourism and trophy hunting flowed to the different constituencies contained within communal conservancies (Fig. 3). Based on detailed financial accounting data from 2011–2013, 58.3% of the financial benefits from tourism were in the form of jobs to conservancy members at joint-venture lodges, whereas 30.3% of the benefits were lodge contractual fees used for conservancy management and 11.5% were nonfinancial benefits to the community at large less.

In contrast, the majority (64.3%) of the benefits from hunting were in the form of cash for the operation of the conservancy, and a substantial fraction went to the community at large in the form of meat from hunted animals (32.0%, or approximately 1.4 million kg over the 3 years). Conservancies used income from trophy hunting and tourism in a variety of ways that benefited the entire community (Fig. 3), most importantly for the salaries of conservancy employees and for other conservancy operating costs, but also for compensation for wildlife conflict, payments to traditional authority structures, direct cash dividends, community-level projects, and infrastructure development. Our data suggest that operational costs, conservancy employee salaries, and the various benefits to the community at large were mostly derived from hunting because hunting operators paid fees from 2011–2013 of \$5.41 million (72% of the total), whereas tourism operators paid \$2.13 million (28%).

Currently, many conservancies cover their operating costs with income derived from trophy hunting and from tourism that is directed to conservancy management. Simulation of a trophy hunting ban showed a reduction in the number of conservancies with incomes greater than operating costs in 2013, from 74% (37 of 50) under the status quo to 16% (8 of 50) when conservancy income from hunting was eliminated. If this reduction were to occur throughout the country, it would cover nearly 50,000 km² (Fig. 4). When conservancy income from tourism was removed, the effect was again negative but

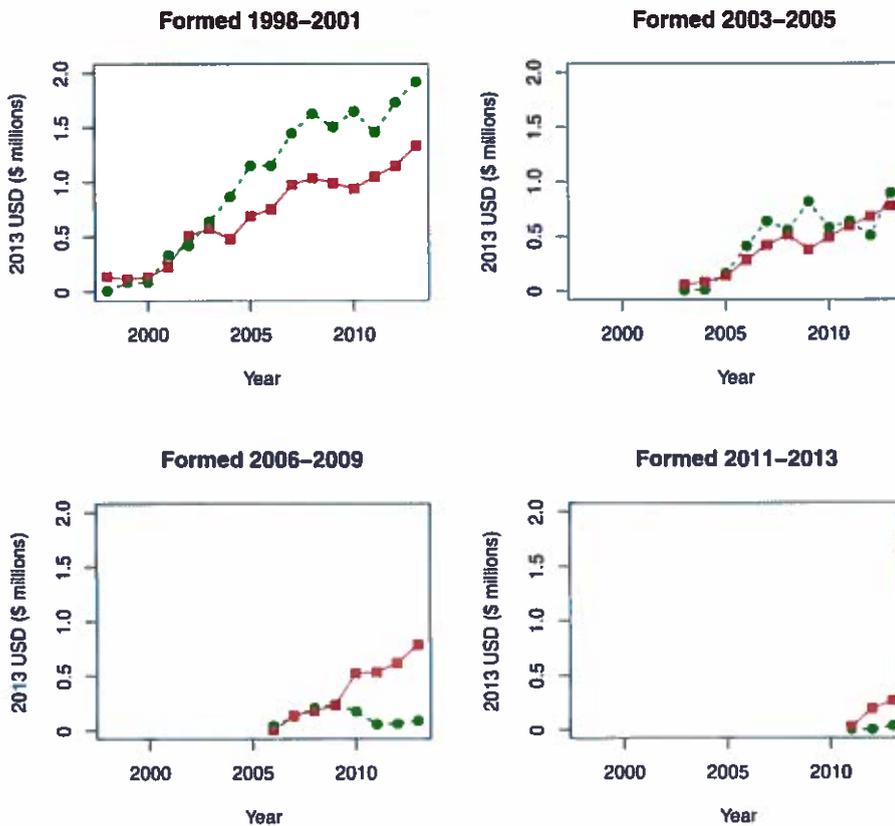

Figure 2. Total benefits from 1998-2013 for hunting (squares) and tourism (circles) across conservancies formed in 4 periods: (a) 1998-2001 (n = 15), (b) 2003-2005 (n = 29), (c) 2006-2009 (n = 15), and (d) 2011-2013 (n = 18).

Table 1. Statistical differences among time series of different metrics of total benefits (In U.S. 2013 dollars) generated from trophy hunting versus tourism on communal conservancies (n = 52) in Namibia.*

Variable	Hunting	Tourism	t	P
Benefits in 2013 (U.S.\$ 2013)	41,453	56,255	-0.91	0.36
Trend (linear regression) of annual change (U.S.\$ 2013)	2458	3954	-1.39	0.17
Volatility (root mean square error) of change over time (U.S.\$ 2013)	79,192	82,501	-0.16	0.83

Maximum annual gain (U.S.\$ 2013)	47,420	68,694	-1.19	0.23
Lag (years) between conservancy formation and first benefits	2.81	5.71	-3.29	0.001
Number of conservancies specializing in hunting or tourism	28	6	—	—

* Excluding conservancies that had not generated any benefits from either hunting or tourism.

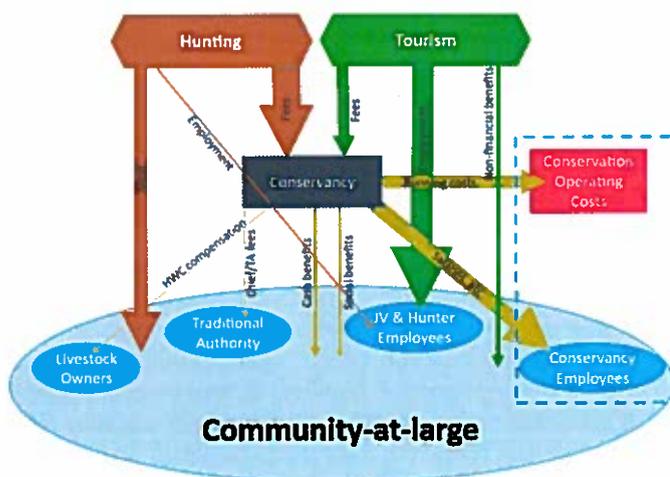

Figure 3. The flow of benefits to various sectors of a stylized local community in Namibia (widths of arrows proportional to dollar values of flows to conservancies from 2011 to 2013; brown, hunting benefit; green, tourism benefit; olive green, flows with a mix of hunting and tourism benefits; dashed rectangle, reinvestment of income into conservation activities; JV, joint venture tourism; HWC, human wildlife conflict; TA, traditional authority). Specific stakeholders (blue ovals) and the overall community at large receive the benefit flows indicated by the arrows ending in those ovals. Income to the conservancy committee (black rectangle) comes from both sectors and is redistributed as indicated, including to cover conservation operating costs (red square).

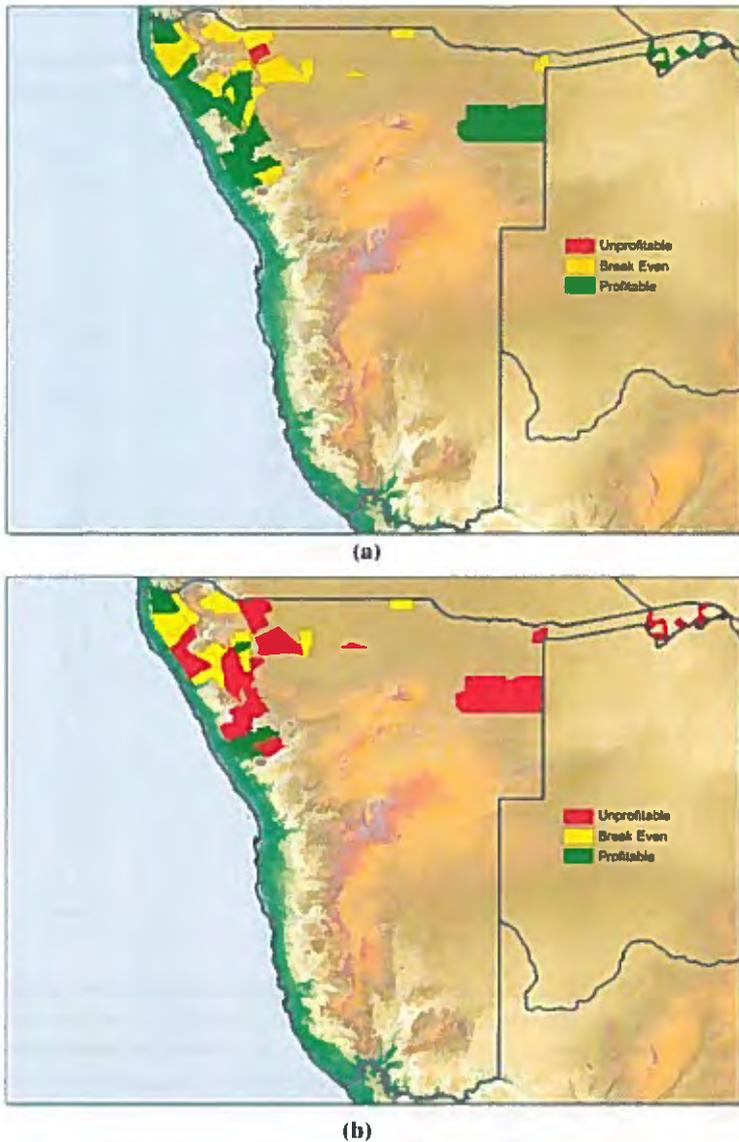

Figure 4. Revenues minus operating costs for 50 communal conservancies for which detailed management cost data were available in 2013 under (a) the status quo and (b) a simulated trophy hunting ban. Break-even conservancies indicate those for which revenues and operating costs are within \$5000 of one another.

less marked; 59% of conservancies remained able to cover their operating costs.

Finally, of the 303 animals harvested by trophy hunters in 2013, individuals from 2 of the Big-5 (buffalo [*Syncerus caffer*], elephant [*Loxodonta africana*], lion [*Panthera leo*], leopard [*Panthera pardus*], rhinoceros [*Diceros bicornis* and *Ceratotherium simum*]) species hunted in Africa, buffalo and elephant, accounted for 78.3% of hunting revenue; over 55% was attributable just to elephants (Table 2).

Discussion

Despite the importance of both tourism and hunting to conservation, and the debate surrounding their implementation, we are the first study to use detailed quantitative data across multiple jurisdictions and over a lengthy

time span to directly compare the financial performance of these two activities. Our data from 77 Namibian conservancies from 1998 to 2013 showed that trophy hunting and tourism reached similar aggregate levels but began to generate benefits at different times (earlier vs. later in a conservancy's life-span) and flowed to different beneficiaries (community management committees and the community at large vs. individual employees). Previous work in Namibia has demonstrated that benefits from hunting and tourism are also spatially differentiated; conservancies are more likely to generate benefits from hunting in areas with diverse wildlife and Big-5 species, whereas the presence of black rhinoceros (*Diceros bicornis*) and broader environmental conditions (distance to tourist routes, topographical diversity, and rainfall) are correlated with higher benefits from tourism (Naidoo et al. 2011b). In addition, the first conservancies established were typically those with the highest potential to

Table 2. Number of animals killed by trophy hunters in 2013, by species; average payment made per animal; and the estimated overall contribution of each species to trophy hunting income on communal conservancies in Namibia.

<i>Species</i>	<i>Animals bunted</i>	<i>Payment per animal (2013 U.S.\$)</i>	<i>Revenue (2013 U.S.\$)</i>	<i>Percentage of total</i>

generate benefits from wildlife, and, as with our cohort results, older conservancies generate higher levels of aggregate benefits than younger ones (Naidoo et al. 2011a; Humavindu & Stage 2015).

We found that tourism and hunting both made substantial and separate contributions to the economic welfare of rural communal residents; the former was weighted toward employment and wages and the latter toward governance structures and management costs. A focus on either one or the other would lead to substantial reductions in overall benefit generation and incentives for wildlife conservation throughout Namibia. For much of Africa and other parts of the world, Westerners tend to view tourism as the dominant wildlife-based development paradigm for delivering a sustainable flow of benefits to local communities living with wildlife or near protected areas (Kiss 2004; Hawkins & Mann 2007). Similar to the results of studies of private landholders (Lindsey et al. 2013b) and national economies (Barnes et al. 2002; Lindsey et al. 2007), our results showed it is important to recognize that the direct benefits of hunting are roughly similar in magnitude to those of tourism for communal conservancies in Namibia.

Beyond this aggregate overall similarity between the benefits of hunting and tourism, there are important dif-

ferences in scale and sequencing between the two activities. For the typical conservancy, benefits from hunting are generated quickly, within a few years of formation. In these early years of a conservancy, income from trophy hunting is critical for the management of the area, and the meat from hunted animals makes tangible the economic benefits that wildlife conservation can deliver to conservancy members. Benefits from tourism take twice as long to develop, due to the time needed for the recovery of wildlife populations, and the investments in both physical (i.e., lodges and other infrastructure) and human capital required to host high-end tourism in communal areas. Few conservancies (12%) specialized in tourism; most conservancies generating benefits from tourism also generated benefits from hunting. In contrast, over half (54%) of the conservancies generating benefits in Namibia did so from hunting alone, because hunting can be sustained in areas with relatively low densities or visibilities of wildlife, and in landscapes that are unappealing or inaccessible for photographic tourism (Lindsey et al. 2006). Because these conditions characterize much of the African protected- (in the widest sense) area estate, it follows that preventing or discouraging trophy hunting would remove possible incentives for conservation across a large swathe of the continent

where nature-based tourism is not viable (e.g., Blom 2004).

Benefits from trophy hunting and tourism also accrue to different stakeholders within communal conservancies. Benefits from tourism were mainly in the form of employment income to conservancy members who are hired to work at lodges built on conservancy land. Although these employees normally come from among a group of conservancy members nominated by the conservancy, ultimately staff are hired based on their knowledge, communication skills, and potential. Jobs of any kind are extremely rare in remote rural areas and thus highly sought after; therefore, tourism is viewed very favorably by local residents who are employed in the industry (Suich 2010; Silva & Motzer 2015). In contrast, agreements between communities and hunting operators provide significantly higher levels of income for conservancy management, as well as greater nonfinancial benefits (largely from meat) distributed directly to the community at large.

The income to management committees is essential; without it, most communal conservancies in Namibia would be unable to cover their operating costs (which three-quarters of the 50 conservancies we assessed were doing). Conservancies unable to cover their operating costs will likely cease to pursue conservation as a viable land use because without conservancy income, game guards cannot be paid, management and monitoring plans cannot be developed and instituted, the sense of local ownership over natural resources dissipates, and wildlife becomes much more vulnerable to declines from poaching and overharvest. This link between income from hunting and the conditions and incentives that permit wildlife to persist as an economically viable land use is critical but often unrecognized. Our data also show that almost 80% of hunting benefits are delivered by two species (elephant and buffalo); elephants alone generate over 50% of all hunting benefits from an increasing population base (7500 individuals in 1995 to over 20,000 in 2012 [Craig 1999; Ministry of Environment and Tourism 2012]). Therefore, even a targeted hunting ban on elephants or an import ban such as those that currently prevent the import of elephant trophies from Tanzania and Zimbabwe into the United States is likely to have a very negative impact on Namibia's CBNRM program by severely undermining conservancy governance structures and incentives for conservation. Anecdotal accounts of the impact of Botswana's 2014 hunting ban suggests that similar negative consequences (an increase in poaching for meat and trade and increased collaboration of local communities with international poaching gangs) may be occurring there (Somerville 2015).

Although we found there were impressive financial gains from trophy hunting, the sustainability (both ecological and economic) of these operations on communal lands in Namibia is rightly of major concern. As such, it is regulated via annual estimates of species' popula-

tions and harvest quotas derived in agreement with local communities and the Ministry of Environment and Tourism (NACSO 2013). Although data from the various conservancy landscapes within the country indicate populations in these areas have generally increased since the advent of Namibia's CBNRM program (Naidoo et al. 2011b), evidence on possible negative impacts of trophy hunting on wildlife populations in other parts of Africa (Packer et al. 2010; Lindsey et al. 2013a) means that trophy hunting must be carefully monitored in Namibia to ensure the same does not happen. There have been no assessments on how trophy size or quality in particular species may be changing over time, a concern that has been raised for trophy hunting in Africa (Crosmarty et al. 2013) and that may result in undesirable genetic changes within hunted populations (Coltman et al. 2003). It is therefore critical that data on the size and quality of trophy exports be analyzed for Namibia's CBNRM program to inform monitoring, evaluation, and management of the trophy-hunting industry. High-profile, apparently illegal hunts such as of lions on the borders of national parks in Zimbabwe, and ethically dubious practices, such as canned hunting of captive animals, also illustrate that the industry itself must play a greater role in addressing issues that throw the sector into dispute. Finally, growing human populations and a tremendous increase in elephant poaching for the international ivory market may eventually result in reduced quotas of elephants and therefore threaten the financial benefits communal conservancies have generated through trophy hunting.

The sustainability of photographic nature-based tourism in Africa and beyond has also come under scrutiny (Buckley 2004; Newsome et al. 2012). In Namibia relevant issues for ecological sustainability include impacts of intense wildlife viewing on animal behavior, localized environmental implications of the development of tourism infrastructure (lodges, campsites, roads, disposal facilities, etc.) in sensitive arid environments, and climate-change impacts from the carbon emissions of increasing numbers of international visitors. As with trophy hunting, there are few studies, particularly for the first two considerations, that have evaluated the sustainability of tourism initiatives on communal conservancies in Namibia. Furthermore, from a socioeconomic point of view nature-based tourism on communal lands in Namibia has been criticized as having power imbalances or elite capture issues that render communities unable to secure significant shares of the benefits (Hoole 2010; Lapeyre 2011), even though residents of conservancies with high benefit levels are themselves strongly supportive of tourism (Silva & Motzer 2015). Finally, to assess more fully the overall costs and benefits of wildlife conservation on communal lands in Namibia, there is a need for greater investigation of both human-wildlife conflict costs and who bears them, as well as the opportunity

costs of pursuing wildlife conservation as a land use versus alternative uses.

Despite these caveats, our results show that hunting and tourism generated similar aggregate levels of benefits for local communities in Namibia. Because these benefits occur at different times, in different places, and reach different sections of local communities, each are essential to the successful functioning of community-based natural resource management in Namibia. As with other contexts (Sandbrook & Adams 2012), recognizing that benefits from conservation to local communities take various pathways has important implications for conservation and the development of effective incentives. Further investigation is therefore desperately needed to examine the relative impacts of hunting and tourism in many others areas of conservation importance in sub-Saharan Africa.

Conservation policy

ABSTRACT

Trophy hunting in Africa is currently under pressure as some countries explore various policies that aim to put a halt to an activity that many people in the Western developed world view as unpalatable or unethical. However, in the debate over trophy hunting policy the voices of local communities, who in many instances allow wildlife to persist on the lands they control because of the tangible benefits they derive from it, have been largely unheard. Here, we report on an opportunistic survey of 160 rural residents of Namibia from 32 communal conservancies that generate varying levels of livelihood benefits from wildlife uses, including trophy hunting. About three quarters of these community members were employed in some manner by the conservancy. We used a mixed methods approach to assess community members' perceptions on trophy hunting, the benefits it generates, whether it was "good" or "bad", and how they would respond if trophy hunting were halted. 91% stated they were not in favour of a ban on trophy hunting, and only 11% of respondents would support wildlife on communal lands if a ban were in fact enacted. Most respondents (90%) were happy with trophy hunting occurring on communal lands due to the benefits it provides. These responses were consistent across respondent demographic categories, although those who stand to lose the most (i.e., those employed by or managing a conservancy), viewed trophy hunting in an even more favourable light. Our results suggest that in Namibia, a trophy hunting ban would be viewed very poorly by conservancy residents, and would seriously weaken their support for wildlife conservation. The imposition of trophy hunting policies by countries far from where rural land managers are conserving wildlife would not only restrict communities' livelihood options, but may have perverse, negative impacts on wildlife conservation.

1. Introduction

In the debate over trophy hunting that is currently playing out in public and policy spheres (di Minin et al., 2016; Macdonald et al., 2016a, 2016b), the voices of local communities have been conspicuously absent. Local communities are the land managers who will dictate the fate of conservation efforts in large parts of Africa that are outside of protected areas (Roe et al., 2009), therefore policy changes that are likely to impact their wildlife conservation decisions should proceed cautiously and on the basis of the best available scientific information. Yet despite having little understanding of how communities perceive the issue, and of how they may change their land use and wildlife management practices should a major source of livelihood benefits be removed, countries such as Kenya and recently Botswana have banned trophy hunting (Pabst, 2013) while governments of countries in Europe and Australia have stopped or are considering banning the import of trophies of various species (Milman, 2015).

Increasing public opposition to trophy hunting from people living in many developed Western countries may eventually result in the industry being shut down. Yet, a failure to understand how trophy hunting of wildlife and its benefits and costs are perceived by local communities may result in conservation policies that achieve the exact opposite of the intended effect, i.e., a reduction in biodiversity and in the amount of area under wildlife management (di Minin et al., 2016).

To address this gap, we present in this research note the results of a preliminary survey of 160 rural residents across 32 communal conservancies in Namibia, a country in which trophy hunting is a common activity pursued on private, state, and communal lands (Lindsey et al., 2013; Naidoo et al., 2016). Communal conservancies are areas of customary landholdings whose natural resources are managed by local communities for their own benefit, with trophy hunting and nature based tourism being the dominant wildlife-based enterprises that generate livelihood returns (Naidoo et al., 2011a; Naidoo et al., 2011b). These activities, and the communal conservancy program more

Name of conservancy: Sesfontein Conservancy

Age < 25 years 26 to 35 years 40 to 49 years 50+ years

Gender Man Woman

• Are you employed by the conservancy? Yes No

• If yes, as what? Game Guard Manager Secretary Finance Other (please specify) Camp Manager

• Are you a Committee Member? Yes No

• Are you employed by the lodge? Yes No

• Does trophy hunting provide benefits to you or to your Conservancy?
 1 2 3 4 5

• Are you happy that trophy hunting takes place in the Conservancy?
 1 2 3 4 5

Why is trophy hunting Good?
It generates income for the conservancy.

Why is trophy hunting Bad?
It is not bad, but the income generated is not a lot.

• Should trophy hunting be banned? Yes No

• Is trophy hunting bad for wildlife? Yes No

• Which is best:
 Tourism only
 Trophy Hunting only
 Both Tourism and Hunting

• How strongly would the community support wildlife if hunting was not allowed?
 1 2 3 4 5

• What do you want to say to people who want to ban trophy hunting?
We rely on trophy hunting for the successful operation of our conservancy, do not ban trophy hunting.

Fig. 1. A completed questionnaire on attitudes towards trophy hunting and a possible ban that was administered to 160 rural residents of communal conservancies in Namibia.

broadly, are recognized as having contributed to dramatic recovery of wildlife populations across the country as well as significant improvements in rural livelihoods (Roe et al., 2009). Trophy hunting can generate substantial benefits for local communities (Naidoo et al., 2016). These include revenues for conservancy management (typically between 30 and 75% of a trophy price), jobs for local community members at hunting camps, and perhaps most importantly, meat distribution to all community members. However, less positive aspects of trophy hunting can include low or inequitable distribution of benefits from hunting operators to local communities, poor skills among community members to fully participate in the hunting industry, and questions about the ecological sustainability of hunting (Suich, 2010; Yitbarek et al., 2013; Lindsey et al., 2006a, 2006b).

2. Materials and methods

We employed a mixed methods survey approach (Johnson et al., 2007), using an in-person interview comprising both closed and open-ended questions that asked community members for their feelings on trophy hunting (Fig. 1), for reasons why hunting is either “good” or “bad” for themselves or their communities, and their thoughts on a possible trophy hunting ban. Using a 1-to-5 Likert scale (colour-coded and represented by “smiley” faces to facilitate understanding by rural residents), we asked conservancy members to rate their support for trophy hunting, the level of benefits it provides to themselves or the local community, and what their degree of support for wildlife conservation would be if trophy hunting were banned on their lands. Open-ended questions allowed respondents to voice why they thought hunting was good or bad, and whether it should or should not be

banned. We additionally collected basic demographic and livelihood information from respondents. These short surveys were deployed opportunistically in January and February 2016, at which time communal conservancies were holding annual audits that involved conservancy members and staff gathering to discuss the management of their lands and wildlife. During this time, we approached conservancy employees (game guards and management committee) and non-employees (those not directly employed by the conservancy) to participate in the survey. All participants approached took part willingly and without any refusals. The 32 communal conservancies that were surveyed represent a wide geographic spread across the western (Kunene) and eastern (Zambezi) regions of Namibia, and also span conservancies that derive various levels of livelihood benefits from trophy hunting ($n = 13$ conservancies), nature-based tourism ($n = 3$), both activities ($n = 12$), or neither ($n = 4$).

We modelled the degree of agreement with the question "Does trophy hunting provide benefits to you or your conservancy?" as a function of region (dummy variable "Zambezi" in Tables 2–4), respondent age (4 levels, with reference category over 50 years old, and dummy variables for less than 25 - "age25", 26 to 39 years old - "age26_39", and 40–49 years old, - "age40_49", sex ("male" dummy variable), occupation (dummy variables for committee member - "committee", game guard - "game.guard", or general conservancy employee - "employee"), and whether they lived in a conservancy that currently hosts trophy hunting operations ("some.hunt.inc" dummy variable). Because the data were dominated by responses in the "agree" and "strongly agree" categories (i.e., categories 4 and 5), we collapsed these two categories into an "agree" category, with categories 1 to 3 folding into a 0 or "do not agree" category. We then conducted Bayesian logistic regression, with this agree/do not agree variable as our dependent variable, uninformative priors on the independent variables, and using two chains with 500 warm up samples and 1500 posterior samples each. This analysis was conducted using package brms (Buerkner, 2016) in the statistical computing software R (R Development Core Team, 2008). For consistency, we used the same procedure to model responses to the questions "Are you happy that trophy hunting takes places in the conservancy?" and "How strongly would the community support wildlife if hunting was not allowed?". For all three models, we evaluated the strength of evidence of independent variables using 95% Bayesian credible intervals, where intervals that do not overlap with zero are taken as strong evidence of a variable's impact on the dependent variable in question.

3. Results

Across all respondents ($n = 160$), an overwhelming majority (91%) of respondents stated they would not be in favour of a ban on trophy hunting, and only 11% of respondents believe their community would continue to support or strongly support wildlife on communal lands if a ban were in fact enacted. In response to the open-ended question "What would you say to those who want to ban trophy hunting", two-thirds (65%) stated that 'this would be depriving them of income or employment that is critical for their livelihoods' (Table 1). Smaller fractions mentioned 'the loss of meat' (14%), 'a resulting increase in human-wildlife conflict' and retaliatory killing of wildlife (6%), and an increase in poaching (6%) as possible outcomes of a trophy hunting ban. A small percentage (13%) were open to a trophy hunting ban, but did not see what other alternatives could replace the lost benefits that a ban would entail.

Most respondents strongly agreed that trophy hunting provides benefits to communities and were happy with it taking place on communal lands (Fig. 2), although 18% ($n = 28$) of respondents are concerned that trophy hunting is in fact bad for wildlife. The most common reason given by these respondents for why trophy hunting was bad (see also Table 1) was "the potential for wildlife declines" (mentioned by $n = 12$ people), followed by "few actual benefits" ($n = 5$), and

Table 1

Statements to open-ended questions on why trophy hunting is good, why trophy hunting is bad, and response to a possible ban on trophy hunting.

What would you like to say to people who want to ban trophy hunting?
"Trophy hunting is lifting us from poverty. It creates employment opportunities for us. We also give meat benefits to our members".
"We want to conserve our wildlife and use it in a sustainable manner, but the benefits need to go to the general members".
"Please give us a reason for wanting to take us back to being poor and with no benefits from our wildlife. I need an explanation of why it is good for photographers to benefit but not for us".
"Why do you want to take away my job? Why do you want me to suffer from elephants destroying my crops without any benefits, just so you can satisfy your needs of looking at these animals? Trophy hunting is well managed and beneficial for us, we cannot ban it".
"Trophy hunting is our means of conservation and survival. Our members benefit, our wildlife is well guarded against poaching, why ban a good thing?"
"If hunting stops, we will be left with nothing (no money, jobs or meat to the people). Then poaching will escalate".
"Trophy hunting improved our living conditions, it helps alleviate poverty. If it is banned, the community will revert to illegal hunting".
"We suffer a lot from conflict with wildlife, especially with Hippos. Trophy hunting helps reduce this conflict while investing back into the community".
"If we are to stop trophy hunting, what alternatives would we have? Trophy hunting is our only source of income at the moment".
"Yes, please ban trophy hunting, tourism is better. Our grandchildren will not find wildlife outside national parks if we continue hunting".
Why is trophy hunting good/bad?
"It brings income into our community and also creates employment opportunities".
"It brings money and meat to our conservancy, this prevents poaching".
"It generates income which allows for the operation of our conservancy".
"It brings income into our conservancy, creates employment for the people, pays salaries and gives the meat to the people".
"It brings income to our association, enabling us to install water pumps for the communities and support local schools".
"It benefits people which helped in curbing poaching and retaliatory killing of wildlife. It is selective, only takes out old and post-reproductive male animals".
"It is a beneficial way of controlling wildlife numbers especially problem animals. We benefit greatly from trophy hunting, both from meat and money".
"Trophy hunting chases animals away from the people and from the area. It will also reduce our wildlife numbers in the near future".
"It is taking place every single year, this will reduce our wildlife in the long run".
"The benefits are only enjoyed by a few individuals within the community"

"possible negative effects on tourism" ($n = 2$). One person mentioned "wounding of animals" as an issue and one person mentioned that "hunting makes animals more aggressive towards people". Importantly, the ethical concerns of hunting individual animals for sport that are mentioned by wealthy people living in developed western countries as justification to stop trophy hunting were not mentioned at all by local community members living with wildlife.

A strong majority of respondents, were happy with trophy hunting operating on their communal lands, whether actually occurring at present or not (Fig. 2). 90% of respondents either agreed or strongly agreed with the question "Are you happy that trophy hunting takes place in the conservancy?". The dominant reason given by respondents for why trophy hunting was good (see also Table 1) was that it generated income or employment for themselves or community members (85%). Other reasons for why hunting was good was the meat it provides (46%), the fact that it is well managed and has little impact on wildlife (5%) and the removal of problem animals (3%).

Parsing out the dependent variables by employed versus non-employed at the conservancy (Fig. 3), we find that strong majorities of employees (89%) ($n = 110/118$) and non-employees (88%) ($n = 35/40$) believe their community would not support wildlife on communal lands if a ban were enacted. An overwhelming majority of both employees (93%) and non-employees (88%) are happy with trophy hunting taking place in the conservancy while 91% of employees and 58% of non-employees agreed that trophy hunting provides benefits to communities. Although non-employees do not view benefits from trophy hunting as highly as do conservancy employees, they

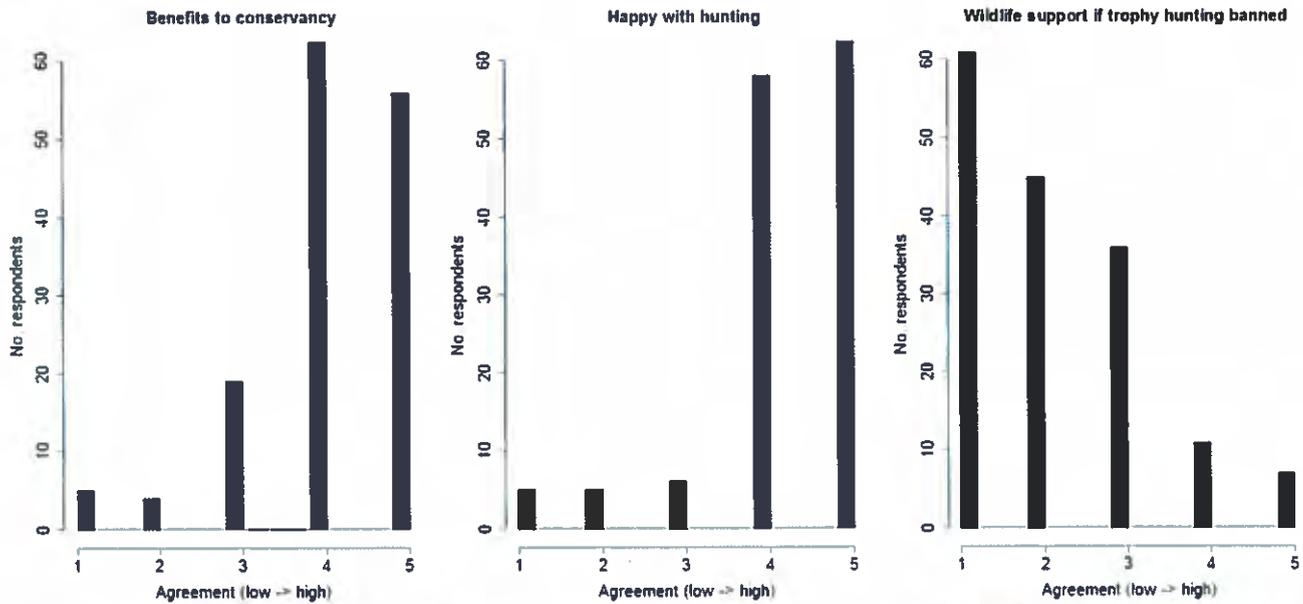

Fig. 2. Histogram of responses to the questions "Does trophy hunting provide benefits to you or to your conservancy?" (left panel), "Are you happy that trophy hunting takes place in a conservancy?" (middle panel), and "How strongly would the community support wildlife if hunting was not allowed?" (right panel).

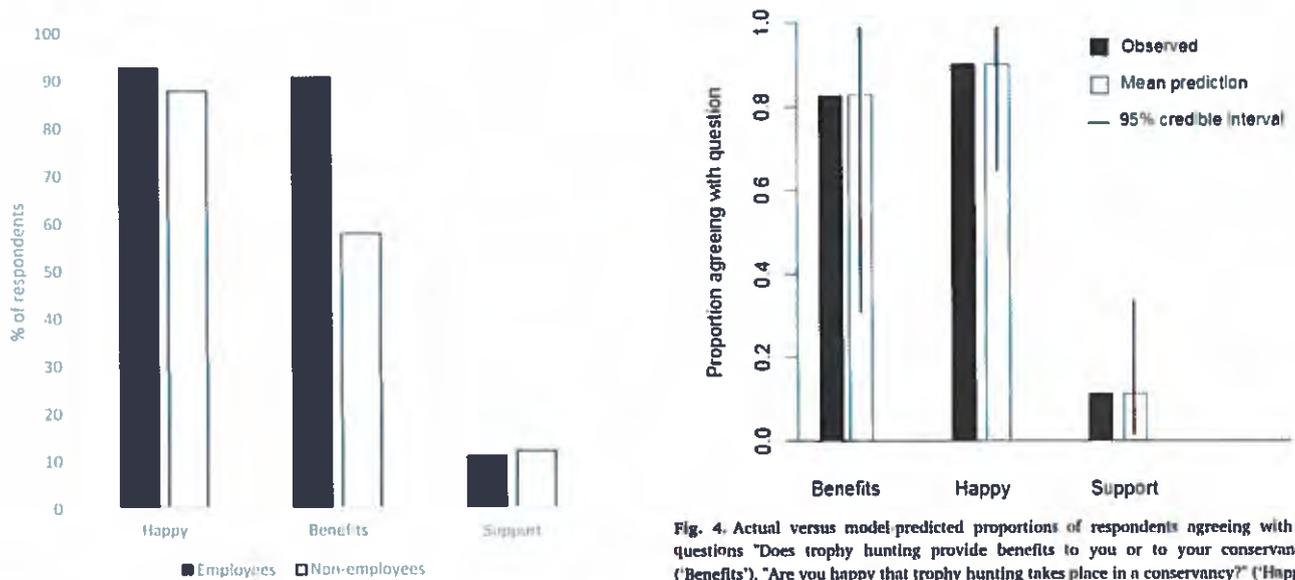

Fig. 3. Employed versus non-employed responses to the questions "Are you happy that trophy hunting takes place in a conservancy", "Does trophy hunting provide benefits to you or to your conservancy?" and "How strongly would the community support wildlife if hunting was not allowed?".

nevertheless support trophy hunting at a similar level, and are similarly pessimistic about future support for wildlife conservation if trophy hunting were ever to be banned.

All of the Bayesian regression models converged appropriately and posterior predictive checking showed that they were able to generate predicted values that looked similar to the actual data (Fig. 4). The model for trophy hunting benefits generation correctly classified 70% of the respondents who did not agree that trophy hunting produced benefits, and 82% of those who did agree. For happiness with trophy hunting operations, the model correctly classified 67% of those who were happy and 56% of those who were not happy with hunting on conservancy lands. Finally, for continued support of wildlife

conservation, 69% of individuals who would no longer support wildlife were correctly classified, while 56% of those would support wildlife conservation were correctly classified.

Demographic variables (age and gender) and the type of conservancy (those currently generating benefits from trophy hunting versus not) were not important factors predicting how favourable respondents' views were on the benefits that trophy hunting can generate for themselves or their community (Table 2). However, employees of conservancies and committee members ($n = 120$) were more likely to agree that trophy hunting produces benefits for themselves or their community than those not employed by a conservancy (Table 2). In addition, respondents from the Zambezi region were more likely to agree that trophy hunting provided benefits to the community, probably because hunting operations are more widespread there than in the Kunene region.

Age and gender variables were again not important predictors of responses to the questions on happiness with trophy hunting operations, however employees and committee members were more likely to be happy with trophy hunting than those not employed by the conservancy (Table 3). For support of wildlife conservation, gender and the type of conservancy were not important in explaining community support for wildlife in the event of a trophy ban, but the few respondents who would continue to support wildlife were more likely to be in the 26–39 age range rather than older than 50. In addition, respondents in conservancies with current trophy hunting operations would be even less likely to continue to support wildlife conservation in the event of a trophy ban than respondents in conservancies where hunting is not currently taking place (Table 4).

4. Discussion

This preliminary work suggests strong support for trophy hunting among conservancy members, especially those employed by or managing the conservancy. The data also suggest a large drop-off in support

for wildlife conservation in the event of a hunting ban, a result which appears particularly acute in those conservancies currently realizing livelihood gains, in the form of meat and income for conservancy management, from trophy hunting operations. Most respondents believed that trophy hunting was “good”, listing the immediate livelihood gains they realize as a result of hunting, and that would be lost due to a ban. Smaller fractions mentioned the potential negative effects on wildlife of a trophy hunting ban, including increases in poaching and retaliatory killings of problem animals. Fewer than 1 in 5 respondents felt trophy hunting was “bad”, and while these respondents expressed concern for potential population declines of wildlife due to hunting, they did not mention concerns for the welfare of individual animals. This contrasts sharply with views in wealthy Western countries, where outrage over the killing of individual animals, illustrated vividly by the response to the shooting of Cecil the lion in Zimbabwe, appear to be driving policies that are making trophy hunting in Africa more difficult (Macdonald et al., 2016a, 2016b; di Minin et al., 2016; Novelli et al., 2006).

Results from elsewhere in Africa also suggest that where tangible benefits are received, either via nature-based tourism or from hunting, local communities have more favourable attitudes towards wildlife. In central Kenya, where trophy hunting has been banned since 1977, a majority of local community members would support the return of trophy hunting, and benefits derived from trophy hunting or tourism was the most-cited reason given for how they could better co-exist with predators (Romanach et al., 2007). The likelihood or not of receiving benefits was also the primary concern of residents asked for their opinion on elephant reintroduction to group ranches in Kenya (Browne-Nunez et al., 2013). In both Zambia and Zimbabwe, where community-based conservation programs have relied heavily on trophy hunting as a source of benefits for impoverished rural communities, the major conservation outcome of these programs was that community attitudes became more favourably predisposed towards wildlife (Leader-Williams and Hutton, 2005; Lewis and Alpert, 1997; Loveridge et al., 2006). And in Tanzania, respondents who received more meat from hunted animals were more likely to have positive conservation attitudes than those who received less meat (Gillingham and Lee, 1999). Given that large areas of Africa are outside of protected areas and unsuitable for nature-based tourism (Lindsey et al., 2006a, 2006b), it is imperative that communities who control natural resources in these areas and who benefit from well-managed trophy hunting operations are encouraged, rather than dis-incentivized, to support wildlife conservation.

Our survey was conducted opportunistically during community meetings and was restricted to conservancy members. A large number of respondents were employed in some manner by the conservancy, and employment-related variables were significant predictors of responses on benefits generated from, and satisfaction towards, trophy hunting. Given that our sample is biased towards respondents who are associated with conservancies, future work should sample a broader sample of rural residents to determine whether rural communities at large in Namibia share these same views.

5. Conclusion

Our data gives a voice to the viewpoints of local communities on the trophy hunting debate, a debate in which they have been almost entirely ignored even as policy decisions made overseas threaten substantial negative impacts on their livelihood options. They also support research, both from Namibia and from other parts of Africa, that emphasizes the importance of benefits from hunting for local communities, which leads to economic incentives for conservation in communal lands outside of formal protected areas (Störmer, 2016; Hoole, 2008; Loveridge et al., 2006; Naidoo et al., 2016; White and Belant, 2015). Imposing policies in rich, Western countries that cut off these livelihood gains, without an in-depth understanding of how local community land managers may react, risks generating unintended consequences that

could result in negative conservation outcomes.

N#a-Jaqna Conservancy

Named after the Buffalo Thorn Tree

Quick facts

Registered:	July 2003
Region:	Otjozondjupa
Area:	9,120 km ²
Approximate population:	3,698
Geographical features:	Average annual rainfall of 400-450 mm. Kalahari sands cover flat landscape of broadleaf and acacia woodland.

Conservancy chairpersons' forum

Name: N#a-Jaqna
Registered: July 2003
Size: 9120 km²
Region: Otjozondjupa
Members: 782
Annual rainfall: 400 – 500 mm
Landscape: Kalahari Sandveld.
Biome: Savanna.
Vegetation type: Northern Kalahari.
Key wildlife species: Elephant, eland, kudu, oryx, leopard.
Terrestrial diversity: Moderately low to average.
Terrestrial endemism: Very low.

Non-wildlife poulation densities in and around N#a-Jaqna conservancy. State protected areas are outlined in blue, conservancies in purple.

Not all data or species are shown on this report; use your Event Book for more information

monitoring numbers and trends for a healthy conservancy...

Wildlife Status

Count trend – gives the species status in the conservancy based on game count trend data.

National guideline – gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) – there should be less;
light green (common) – the desired number is reached;
yellow (uncommon) – there should be more;
light orange (rare) – there should be more than double;
dark orange (very rare) – there should be more than triple;
red (extinct) – the species needs to be reintroduced.

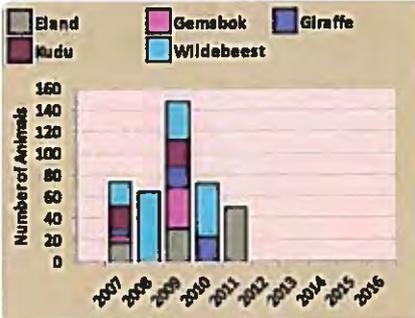

Locally rare species

Sightings Indicator 2014 2015 2016

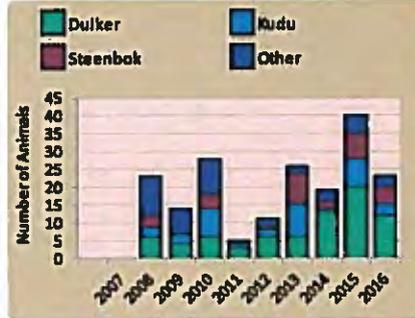

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

(Appendix I of CITES and/or ESA)**

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details
You may find instructions on how to make your application complete and help avoid unnecessary delays at the following link: .

Section A: Complete if applying as an individual

1.a. Last Name MESTOUSIS	1.b. First Name PANTELI'S	(b) (6)
(b) (6)	3.a. Alternate Telephone Number	(b) (6)

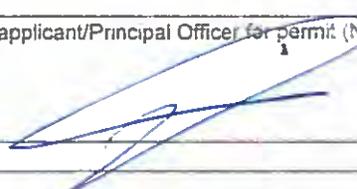

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last Name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
4. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite # or Room #, no P.O. Boxes) (b) (6)				
1.b. City Pelham	1.c. State NY	1.d. Zip code/Postal code (b) (6)	1.e. County/Province	1.f. Country USA
2.a. Mailing address (include if different than physical address, include name of organization)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1.	Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount identified on page 2, nonrefundable processing fee Federal, Tribal, State and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)]
2.	Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50 Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50 and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001
Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) Date of signature (mm/dd/yyyy)  5/4/18	
Please continue to next page	

E. IMPORT OF SPORT-HUNTED TROPHIES (*Appendix I of CITES and/or ESA*)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.
2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

PETER MESTOJIS,

(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No

Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

b. Sex (if known).

elephant

male

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

South Africa, Kwalata wilderness

200 km North of Pretoria, 90 km north-west of Naboomspruit and
353k Due North of Vaalwater in Waterberg Mtns of the northern province
of South Africa

b. Date wildlife is to be hunted: 01 August 2018 Thru 14 August 2018

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Numzaan Safaris out of Thabazimbi, South Africa

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

b. Date wildlife was hunted:

- c. Name of hunting outfitter, safari company, or professional hunter you hunted with:
- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). *HAVE NOT HUNTED YET. PERMIT HAS BEEN APPLIED FOR.*
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:

Business Name: *SAFARI CARGO SYSTEMS*

Address: *Holding 34, 5TH AVE. Bredel, P.O. Box 30093 Jet Park Witfield 1467*

City:

State/Province: *Gauteng*

Country, Postal Code: *1623, SA*

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted?

** SEE ATTACHED*

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

** SEE ATTACHED*

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

** SEE ATTACHED*

ATT: USFWS & NUMZAAN SAFARIS - Mr. Mestousis

ELEPHANT CITES EXPORT TO U.S. IMPLICATIONS OF THE ELEPHANT HUNT ON THE PROPERTY KWALATA WILDERNESS.

In response to No 9 of the USFWS document and the requested import of the elephant trophy into the USA:

- The elephant bull to be hunted by Mr. Mestousis with Numzaan Safaris is currently on a property where the herd population is too great for the 6 000 hectares on which the herd roams. Bio-diversity and Nature Conservation, South Africa, under the Norms and Standards require that Kwalata Wilderness purchases more land to sustain the 20 odd herd. This is not financially an option for us and in the current political climate it is even less attractive to own land in South Africa.
- Thus according to the Norms and Standards the elephants must be culled as the number of females alone exceeds the carrying capacity of 7 elephants the prescribed number for the land. In the interim before they issue the final cull permit we have been given permission to hunt elephant bulls to reduce the population and preserve the environment.
- We are also looking to find a home for these elephant cows and juveniles in Mozambique however funding, transport and available areas are limited. South African land available to elephant is currently at capacity and South Africa has little or no need for animals to be relocated internally.
- The bull in question needs to be removed as the new bull brought in 5 years ago from another blood line must mate with the females to change the genetic of this 27 year old herd (on Kwalata).
- We have attached along with this letter the Management Plan showing the amount of research that is required to have elephant on a property as well as the letter from Nature Conservation stating their requirement to cull.

No 9a: SA Population Status:

South African land that can carry elephant is at its capacity hence the only possibility that elephant can be relocated is to Mozambique to the newer parks that they are trying to establish there.

According to the available CITES document the elephant population in South Africa have increased from 120 in 1920 to 12 000 currently (there is no date on the available CITES document). It also states that "the elephant population in SA in protected areas is under no major threat".

According to the EWT "Elephant numbers in South Africa increased by approximately 26.8% between 2002 (14,071 elephants) and 2006 (17,847 elephants). Since 2006 there has been an approximate increase of 41% in South Africa's elephant population.

No 9b: Distribution of funds.

The funds from the elephant hunt will be used in part to recuperate and rejuvenate the property from elephant damage. 23/5/2018 a 4-bay thatched roof garage and entrance to the lodge was destroyed by an elephant bull. We have a 4 000 dollar insurance bill from the damage to a guests vehicle as well as numerous other damages to roofs, water tanks etc by the elephant. Funds will be used to continue to preserve the wilderness that forms Kwalata Wilderness and safeguard the future of its employees and other wildlife. Meat is also sent to two local orphanages namely the Bushveld Mission and The Fold which are home to mostly AIDS orphans.

No 9c: Conservation benefit.

As previously mentioned the carrying capacity and prescribed number of elephants that can be sustained by the property is 7 adult elephants. Thus the 20 strong herd has been listed to be culled. In the interim while we hope to sell the property to a new owner who may have the financial resources to increase the land or to relocate the cows and juveniles to Mozambique (new genetics in bulls would be best for the herd) are the best options in the interim before the cull permit is finally issued.

The land in the interim needs to be protected from the devastation of the bulls particularly when they are in musth (at their most aggressive and destructive) and the general feeding requirements of the herd. Already the species of Paper Bark Tree and most Aloe species have been removed by the elephant from this 6 000 hectare property.

We hope that you will assist Numzaan safaris client with the importation of his trophy harvested out of the necessity of land and law and in the interests of economic sustainability.

Many thanks
Yours sincerely

Reinhard Heuser

RHINOCEROS**

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1. a. Last Name BUNNEY	1. b. First Name RAYMOND	1. c. Middle Name/Initial (b) (6)	1. d. Suffix
2. Date of Birth (mm/dd/yyyy) (b) (6)	3. Telephone Number	3. a. Alternate Telephone Number	

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1. a. Name of business, agency, Tribe, or institution		1. b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4. a. Principal officer Last name	4. b. Principal officer First Name	4. c. Principal officer Middle name/initial	4. d. Suffix
5. Principal officer title		6. Primary contact name	
7. a. Business telephone number	7. b. Alternate telephone number	7. c. Business fax number	7. d. Business e-mail address

Section C: All applicants complete address information

1. a. Physical address (Street address, Apartment #, Suite #, or P.O. Boxes) (b) (6)				
1. b. City LIBERTY LAKE	1. c. State WA	1. d. Zip code (b) (6)	1. e. Country U.S.A.	
2. a. Mailing address (include if different than physical address; include name of contact person if applicable)				
2. b. City	2. c. State	2. d. Zip code/Postal code	2. e. County/Province	2. f. Country

Section D: All applicants MUST complete

1. Attach the nonrefundable application processing fee in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100. Federal, Tribal, State, and local government agencies and those acting on behalf of such agencies, are exempt from the processing fee – attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].	
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50 Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

**E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND
NAMIBIAN SOUTHERN WHITE RHINOCEROS**

Note 1: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit to the address on page one.

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: *Sport-hunted trophy* is defined at [50 CFR 23.74](#) as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 4: Certain hunting trophies, including leopard and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

- Complete all questions on the application.
- Mark questions that are not applicable with "N/A".
- If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.
- If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):
- a. Leopard (*Panthera pardus*) Quantity: 1 (Limited to the import of two per calendar year). If you wish to import a leopard taken in northern or western Africa, please use form 3-200-20.
 - b. Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia
Quantity: _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use Form 3-200-20).
5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, Please enter the following information:
- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
 - b. Date wildlife is to be hunted:
 - c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE ANIMAL HAS ALREADY BEEN TAKEN, please enter the following:

- d. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

M'BARAGANDU BLOCK - SOUTH of Sibus Game Reserve
TANZANIA EAST AFRICA, TRANSPORTED to DAR ES SALAAM,
TANZANIA

- e. Date wildlife was hunted:

OCT 20, 2017 / NOV 9, 2017

- f. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

MARK SULLIVAN - NITRO EXPRESS SAFARI'S

- g. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

GAME FRONTIERS TANZANIA
PO BOX 20965
DAR ES SALAAM, TANZANIA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you.

- a. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: SHENI LALI
Business Name: GAME FRONTIERS TANZANIA
Address: PO BOX 20965
Address:
City: DAR ES SALAAM
State/Province:
Country, Postal Code: TANZANIA EAST AFRICA

E. IMPORT OF SPORT-HUNTED TROPHIES (*Appendix I of CITES and/or ESA*)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

MATT MAYERS 161-15 ROCKAWAY BLVD, JAMICA, NY 11434

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

MATT 718-7900216 MATT@GENUSLOGISTICS.COM

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

LOXODONTA AFRICANA

b. Sex (if known). MALE

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

NAMIBIA NYAE CONSERVANCY,

b. Date wildlife was hunted:

NOV 8, 2017

11/8/2017

- c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

S.M JACOBS

- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

STEPHEN M JACOBS
PO BOX 601
GROOSRIEN, NAMIBIA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). 175910 CITES
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

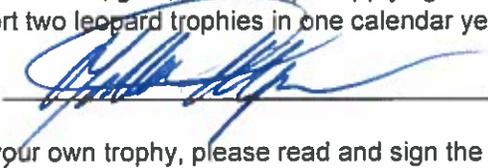

Name: STEPHAN M JACOBS
Business Name:
Address: PO BOX 601
City: GROOSRIEN
State/Province: NAMIBIA
Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.
- a. Do you have any information regarding the population status or trend data on the species hunted?
- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?
- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

Customs Rules on Discharge of Importers Liability for Duties

The U.S. Customs Service has issued a final amendment of the regulations to provide an alternative procedure for an importer record to pay duties on imported merchandise through a licensed customhouse broker. Present rules provide for the payment of duties to Customs by a broker on behalf of the importer. Under the alternative procedure, the importer may elect to submit to the broker a separate check or bank draft for the duties payable to the "U.S. Customs Service". The broker would then deliver the importer's check or bank draft to Customs. The new rule also requires brokers to provide written notification to their clients, advising that if the client is an importer of record, payment to the broker will not relieve the client of liability for Customs charges in the event that the charges are not paid by the broker. Brokers will be required to provide this notification to all active clients annually during the month of February. Additionally, brokers will be required to provide such information on a power of attorney executed on or after the effective date of the new rule. These amendments are effective as of September 27, 1982.

KNOW ALL MEN BY THESE PRESENTS: That, Anthony Gaglio (Full Name of person, partnership, corporation, or sole proprietorship (Identify)) a corporation doing business under the laws of the State of, _____ or a _____ doing business as _____ residing at (b) (6), Stamford CT (b) (6) having an office and place of business at _____ hereby

constitutes and appoints each of the following persons Genus Logistics Inc. may act through any of its offices or any employees with Power of Attorney on file with this licensed broker as required by the Regional Commission of Customs as a true and lawful agent and attorney of the grantor named above for and in the name, place, stead of said grantor from this date and in all Customs Districts, and in no other name, to make, endorse, sign, declare, or swear to any entry, withdrawal, declaration, certificate, bill of lading, or other document required by law or regulation in connection with the importation, transportation, or exportation of any merchandise shipped or consigned by or to said grantor; to perform any act or condition which may be required by law or regulation in connection with such merchandise, to receive any merchandise deliverable to said grantor: To make endorsements on bills of lading conferring authority to transfer title, make entry or collect drawback, and to make, sign, declare, or swear to any statement, supplemental statement, schedule, supplemental schedule, certificate of delivery, certificate of manufacture, certificate, and delivery abstract of manufacturing records, declaration of proprietor on drawback entry, declaration of exporter on drawback entry, or any other affidavit or document which may be required by law or regulation for drawback purposes, regardless of whether such bill of lading, sworn statement, schedule, certificate, abstract, declaration, or other affidavit or document is intended for filing in any customs district. To sign, seal, and deliver for and as the act of said grantor any bond required by law or regulation in connection with the entry or withdrawal of imported merchandise or merchandise exported with or without benefit of drawback, or in connection with the entry, clearance, lading, unloading or navigation of any vessel or other means of conveyance owned or operated by said grantor, and any and all bonds which may be voluntarily given and accepted under applicable laws and regulations, consignee's and owners declarations provided for in section 485, Tariff Act of 1930, as amended, or affidavits in connection with the entry of merchandise: To sign and swear to any document, and to perform any act that may be necessary or required by law or regulation in connection with the entering, clearing, lading, unloading, or operation of any vessel or other means of conveyance owned or operated said grantor. To authorize other Customs Brokers to act as grantor's agent; to receive, endorse and collect checks issued for Customs duty refunds in grantor's name drawn on the Treasurer of the United States; if the grantor is a nonresident of the United States, to accept service of process on behalf of the grantor. And generally to transact at the customhouses in said district any and all customs business, including making, signing, and filing of protests under section 514 of the Tariff Act of 1930. In which said grantor is or may or may be concerned or interested and which may properly be transacted or performed by an agent and attorney, giving to said agent attorney full power and authority to do anything whatever requisite and necessary to be done in the premises as fully as said grantor could do if present and acting, hereby ratifying and confirming all that the said agent and attorney shall lawfully do by virtue of these presents; the forgoing power of attorney to remain in full force and effect until notice of revocation in writing is duly given to and received by the District Director of customs of the district aforesaid. If the donor of this power of attorney is a partnership, the said power shall in no case have any force or effect after the expiration of 2 years from the date of its execution. Or until revoked. Pursuant to 19 CFR 111.36(a), election is made waiving the right to receive invoices, supporting documents and correspondences from Genus Logistics Inc., who is directed to forward all documents and inquiries concerning our imports to their customs brokerage services, to our freight forwarder, who will pay Genus Logistics Inc., for duties, and services performed on our behalf. It is understood the right to revoke said waiver is continuing.

IN WITNESS WHERE OF, the said (Print name) Anthony Gaglio has caused these presents to be sealed and signed:

IMPORT OF SPORT-HUNTED BONTEBOK TROPHIES from South Africa

Note 1: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit to the address on page one.

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: The bontebok is listed as endangered under the Endangered Species Act. Applications for endangered species permits must be published in the Federal Register for a 30-day public comment period. Allow at least 90 days for the application to be processed.

Note 4: This application can only be used if you have hunted/will be hunting in South Africa. If you have or will be hunting in a different country, please use form 3-200-20

Note 5: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Same as page 1

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Michael Stein

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

N/A

4. How many Bontebok (*Damaliscus pygargus pygargus*) are you applying to import? Quantity: 1

a. At the time of the application, the specimen(s) is:

Alive

Dead

b. What is the approximate date of proposed take? N/A

c. What is the date you took the animal? 6/1/2018

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

10 Crichton Street, Korsten Port Elizabeth 6001 South Africa

5. ENTER the name and address of the landowner on whose property the bontebok was or will be taken:

Owners name: A.F. Van Niekerk
Farm Name: Roberts Krall
District: Bedford
Address: P.O. Box 171
City: Bedford
State/Province: South Africa
Country, Postal Code: 5780

Please be aware that the bontebok is listed in Appendix II of CITES. As such, you must obtain a CITES export permit from South Africa. If you are not exporting the trophy from South Africa directly to the United States, you will need to obtain a CITES Re-export certificate from the re-exporting country.

6. Attach a signed statement from the landowner giving you permission to cull a bontebok from their captive herd.

Attached

7. If available, provide a copy of the landowner's Certification of Registration for the bontebok herd. (Note: this is not a copy of the export permit or certificate issued by a South African province.) In order to meet the criteria for a permit under the Endangered Species Act, the bontebok must be culled from a ranch that has been certified by the Government of South Africa under their bontebok program. If the ranch is not registered, we may be unable to issue an import permit.

Attached

8. Complete name and address of overseas person or business shipping the trophy to you (this name will appear on the face of the permit).

Name: Paul Smith
Business Name: Relive Africa Taxidermy
Address: 10 Crichton Street
Address:
City: Korstein
State/Province: Port Elizabeth
Country, Postal Code: 6001

CERTIFICATION STATEMENT (original signature must be provided for either 9 or 10 below)

9. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit).

Taxidermist/Broker's signature: _____ Date: _____

10. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit).

Applicant's signature:  _____ Date: 6-14-2019

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Mr.A.F. van Niekerk
 P.O.Box 171
 Robertskraal
 Bedford
 5780

Dear Mr.van Niekerk

REGISTRATION OF BONTEBOK.

It is my pleasure to inform you that your Bontebok herd on the property Robertskraal, in the Bedford district has been registered as a pure herd. Congratulations!

The registration is done, based on the declaration received from you on the 1 May 2003 and the confirmation again on the 14th April 2009, which state, that since the introduction of this herd, no contamination by any Blesbuck, took place and that the Bontebok originates from a registered pure bred herd. The registration is done for the property Robertskraal, in the Bedford Magisterial district of the Eastern Cape.

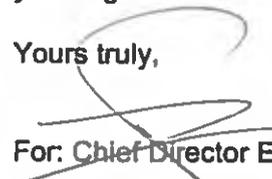

This certification is extremely valuable and you should do everything possible to retain the purity of your herd. In future, export permits for sport-hunted bontebok trophies and permits to capture sell and transport bontebok, will only be issued in respect of registered herds.

Periodic re-inspections of registered herds will be carried out in future and it is in your own interest to ensure that no contamination of your valuable herd occurs. In the case of any possible contamination, this office must immediately be informed.

Once again, congratulations and thanks for your contribution towards Environmental Conservation.

A formal certificate will be send to you soon. In the meanwhile, this letter serves as the official proof of your registration.

Yours truly,

 For: Chief Director Environmental Affairs; Eastern Cape

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND NAMIBIAN SOUTHERN WHITE RHINOCEROS *And South African Elephant.*

Note 1: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit to the address on page one.

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 4: Certain hunting trophies, including leopard and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

- Complete all questions on the application.
- Mark questions that are not applicable with "N/A".
- If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.
- If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Same AS page 1. A self-addressed envelope is enclosed.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Jared Whitworth

(b) (6)

- 3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

- 4. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

- a. ~~Leopard (*Panthera pardus*)~~ ^{Elephant (*Loxodonta Africana*)} Quantity: 1 (Limited to the import of two per calendar year). If you wish to import a ~~leopard~~ ^{elephant} taken in ~~northern or western~~ ^{South} Africa, please use form 3-200-20.
- b. Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia
Quantity: (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use Form 3-200-20).

- 5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, Please enter the following information:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

N/A

- b. Date wildlife is to be hunted:

N/A

- c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

N/A

6. IF THE ANIMAL HAS ALREADY BEEN TAKEN, please enter the following:

d. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

South Africa
Associated Private Nature Reserves - Umbabat Private Nature Reserve
Hoedspruit

e. Date wildlife was hunted: May 26th 2018 to June 07th 2018

f. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Graham Sales Safaris

g. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Life-Form Taxidermy
No 7 Aluminum Road / PO Box 763
White River
Mpumalanga South Africa 1240

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

Please see Attached.

8. Complete name and address of overseas person or business shipping the trophy to you.

a. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:
Business Name: Life-Form Taxidermy
Address: No 7 Aluminum Road / PO Box 763
Address:
City: White River
State/Province: Mpumalanga
Country, Postal Code: South Africa 1240

CERTIFICATION STATEMENT (original signature must be provided for either 9 or 10 below)

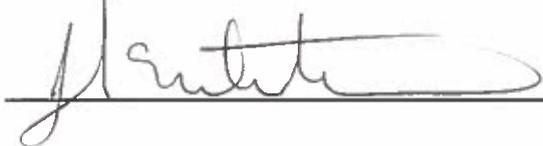

9. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement. N/A

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

10. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature:  Date: 06/14/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

11. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from [the list of designated ports](#). If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- (1) Is raw, processed, or manufactured;
- (2) Was legally obtained by the hunter through hunting for his or her personal use;
- (3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- (4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: N/A (Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import is limited to two per hunter per calendar year)

Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: N/A (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

- c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:

- a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild: **Lupane, Zimbabwe**

- b. Date wildlife was hunted: **03/22/2018**

- c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

1.Processed goods made out of my Elephant skin(Finished products like Belts, Carry case,Tail, Feet)
2.Ivory

- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

4 Josiah Chinamano Road, Belmont, Bulawayo, ZIMBABWE

- 4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business Trophy Consultants International (T.C.I.)(Formerly - Taxidermy Enterprises (Pvt) Ltd).
Name: Address: 4 Josiah Chinamano Road,
Address: Belmont,
City: Bulawayo,
State/Province: ZIMBABWE
Country, Postal Code:

- 5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

- 6. **If you are a broker or taxidermist applying on behalf of a foreign national**, provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ **Date:** _____

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: Wasif Hussain Date: 06/12/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, **if** different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

Ashar (b) (6) Lateef
(b) (6) Westlake Village, CA (b) (6) USA.

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please **DO NOT** include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Ashar (b) (6) Lateef,
(b) (6)

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

(b) (6) Signature (in ink) of applicant/person responsible for permit (No photocopied or stamped signatures) 06/13/08 Date of signature (mm/dd/yyyy)

E. IMPORT OF SPORT-HUNTED BONTEBOK TROPHIES from South Africa

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form, (3-200-52), <http://www.fws.gov/international/permits/by-form-number/index.html> and return your original permit with that form.

Note 2: The bontebok is listed as endangered under the Endangered Species Act. Applications for endangered species permits must be published in the Federal Register for a 30-day public comment period. Allow at least **90 days** for the application to be processed.

Note 3: This application can only be used if you have hunted/will be hunting in **South Africa**. If you have or will be hunting in a different country, please use form 3-200-20: <http://www.fws.gov/international/permits/by-form-number/index.html>

Note 4: USFWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during a sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you submit, indicate the application question number you are addressing. If applying for more than one trophy, be sure to indicate which trophy is addressed in each response.

1. How many Bontebok (*Damaliscus pygargus pygargus*) are you applying to import? Quantity: 1

2. At the time of the application, if bontebok is:

Alive, a. What is the approximate date of proposed take? October 20-25 2018

Dead, b. What is the **date** you took the animal? _____

c. Description of the trophy and parts you intend to import (e.g. skin, skull, shoulder mount, life size mount, claws, horn tusks).

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export documents]:

3. ENTER the name and address of the **landowner** on whose property the bontebok was or will be taken:

Name: Mr. J. J. Pretorius
Business Name: Spring Valley
Address:
Address:
City: Tarkastad district
State/Province: Eastern Cape
Country, Postal Code: South Africa

Please be aware that the bontebok is listed in Appendix II of CITES. As such, you must obtain a CITES export permit from South Africa. If you are not exporting the trophy from South Africa directly to the United States, you will need to obtain a CITES Re-export certificate from the re-exporting country.

4. a. Attach a signed statement from the **landowner** giving you permission to cull a bontebok from their captive herd.
- b. If available, provide a copy of the landowner's Certification of Registration for the bontebok herd. (Note: this is **not** a copy of the export permit or certificate issued by a South African province.) In order to meet the criteria for a permit under the Endangered Species Act, the bontebok must be culled from a ranch that has been certified by the Government of South Africa under their bontebok program. If the ranch is not registered, we may be unable to issue an import permit.
5. **Complete name and address** of overseas person or business shipping the trophy to you (this name will appear on the face of the permit).

Name: *Sean Kelly*
Business Name: *Garry Kelly Safaris*
Address: *Beverly Lodge*
Address: *Dargle*
City: *Dargle KZN 3265*
State/Province:
Country, Postal Code: *South Africa*

CERTIFICATION STATEMENT (original signature **must** be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national**, provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy(ies) to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**).

Taxidermist/Broker's signature: _____ Date: _____

7. **If you are the hunter applying to import your own trophy**, please read and sign the following statement.

I acknowledge that the sport-hunted trophy(ies) to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**).

Applicant's signature:  _____ Date: *6-13-18*

Be aware that there may be additional permitting or approval requirements by your local or state government, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist you, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish permit mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please state check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email): *Rich Cabada* 

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

E. IMPORT OF SPORT-HUNTED TROPHIES (*Appendix I of CITES and/or ESA*)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least 90 days for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

FEDEX ENVELOP ATTACHED

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

LYNETTE LILLEY
281-606-2400
EMAIL: llilley@well-usa.com

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

ELEPHANT: LOXODONTA AFRICANA

b. Sex (if known). MALE

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

NAMIBIA: EISEB CONSERVANCY

b. Date wildlife was hunted:

JUNE 25, 2017

- c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

JJN WASSERFALL
P.O. BOX 1677
WINDHOEK, NAMIBIA

- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

REISER TAXIDERM
BRAKWATER
WINDHOEK, NAMIBIAA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). ATTACHED
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: J.N. BLAAUW
Business Name: P.O. BOX 11908
Address: WINDHOEK NAMIBIA
City:
State/Province:
Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted?

NONE

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

THEY WERE USED FOR CONSERVATION

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

NO

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: _____ Date: _____

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from [the list of designated ports](#). If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

KNOW ALL MEN BY THESE PRESENTS: That (b) (6) (b) (6) (b) (6) (b) (6) (Grantor)

being resident at _____ under the laws of the State of (4) _____
home address (b) (6) College Station, TX (b) (6)

hereby constitutes and appoints _____ which are duly authorized by said Grantor by power of attorney

As a true and lawful agent and attorney of the Grantor named above for and in the name, place and stead of said Grantor from this date and in all Customs Districts, and in no other name to make, endorse, sign, declare, or swear to any entry, withdrawal declaration, certificate, bill of lading, or other document required by law or regulation in connection with such merchandise; to receive any merchandise deliverable to said Grantor;

And generally to transact all the customs business, including making, sign section 514 of the Tariff Act of 1930, in concerned or interested and which performed by an agent and attorney of power and authority to do anything what done in the premises as fully as said acting, hereby ratifying and confirming shall lawfully do by virtue of these presents, the foregoing power of attorney to remain in full force and effect until.

To make endorsements on bills of lading conferring authority to transfer bills; to make entry and collect drawback; and to make, sign, declare, or swear to any statement, supplemental statement, schedule, supplemental schedule, certificate of delivery, certificate of manufacture, certificate of manufacture and delivery, abstract of manufacturing records, declaration of proprietor on drawback entry, declaration of exporter on drawback entry, or any other affidavit or document which may be required by law or regulation for drawback purposes, regardless of whether such bill of lading, sworn statement, schedule, certificate, abstract, declaration, or other affidavit or document is intended for filing in any other Customs District;

(b) Revoked
If Grantor is a partnership or LLC, signatory certifies that before this full authority to execute this instrument on behalf of Grantor and shall state the names of all members and/or directors on a separate addendum to this document, and said the power shall in no case have any force or effect beyond two years from the date of its execution.

To sign, seal and deliver for and as the act of said Grantor any bond required by law or regulation in connection with the entry or withdrawal of imported merchandise exposed with or without benefit of drawback or in connection with the entry, clearance, lading, unloading or navigation of any vessel or other means of conveyance owned or operated by said Grantor, and any and all bonds of which may be voluntarily given and accepted under applicable laws and regulations, consignee's and owner's declaration provided for in section 485 Tariff Act of 1930 amended or affidavits in connection with the entry or merchandise;

Grantor further authorizes Grantor to act as its agent in signing or endorsing export documents, i.e. commercial invoices, shipper's export declarations, Automated Export System records, bills of lading, insurance certificates, drafts and any other documents necessary to the successful completion of any export transaction on its behalf.

To sign and swear to any document and to perform any act that may be necessary or required by law or regulation in connection with the entering, clearing, lading, unloading, or operation of any vessel or other means of conveyance owned or operated by Grantor;

If Grantor is a U.S. Principal Party in Interest (USPPI) in an export transaction then the Grantor/USPPI hereby certifies that all statements and information contained in the documentation provided to Grantor relating to exportation are true and correct. Furthermore, Grantor/USPPI understands that civil and criminal penalties may be imposed for making false or fraudulent statements or for the violation of any United States laws or regulation on exportation. Grantor/USPPI undertakes to determine any export license requirements and to obtain, for export purposes, any export license or other official authorization.

To grant powers of attorney on behalf of said Grantor to other Customs Brokers to act as said Grantor's agent; to receive, endorse and collect checks issued for Customs duty refunds in said Grantor's name drawn on the Treasurer of the United States;

All services and transactions are subject to WELL's Terms and Conditions of Service (NCSFFA 85M) which are included in this document for which Grantor expressly acknowledges receiving a written copy. To the extent provided by law, WELL's liability as a Customs Broker is limited to \$50.00 (19 USC 1647(f)).

IN WITNESS WHEREOF, the said Grantor has caused these presents to be sealed and signed:

IMPORT OF SPORT-HUNTED BONTEBOK TROPHIES from South Africa

Note 1: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit to the address on page one.

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: The bontebok is listed as endangered under the Endangered Species Act. Applications for endangered species permits must be published in the Federal Register for a 30-day public comment period. Allow at least **90 days** for the application to be processed.

Note 4: This application can only be used if you have hunted/will be hunting in **South Africa**. If you have or will be hunting in a different country, please use form 3-200-20

Note 5: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

FEDEX ENVELOPE ATTACHED

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?
LYNETTE LILLEY, 281-606-2400
EMAIL: llilley@well-usa.com
3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. How many Bontebok (*Damaliscus pygargus pygargus*) are you applying to import? Quantity: 1
- a. At the time of the application, the specimen(s) is:
- Alive Dead
- b. What is the approximate date of proposed take? _____
- c. What is the date you took the animal? MAY 14, 2017
- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
HOLDING 34, 5TH AVENUE, BREDELL, 1623, GAUTENG, SOUTH AFRICA
5. ENTER the name and address of the landowner on whose property the bontebok was or will be taken:
- Owners name: OTTERSKLOOF SAFARIS
Farm Name: OTTERSKLOOF SAFARIS
District: FREE STATE
Address: P.O. BOX 44
City: PHILIPPOLIS
State/Province: FREE STATE
Country, Postal Code: SOUTH AFRICA 9970
- Please be aware that the bontebok is listed in Appendix II of CITES. As such, you must obtain a CITES export permit from South Africa. If you are not exporting the trophy from South Africa directly to the United States, you will need to obtain a CITES Re-export certificate from the re-exporting country.
6. Attach a signed statement from the landowner giving you permission to cull a bontebok from their captive herd.
7. If available, provide a copy of the landowner's Certification of Registration for the bontebok herd. (Note: this is not a copy of the export permit or certificate issued by a South African province.) In order to meet the criteria for a permit under the Endangered Species Act, the bontebok must be culled from a ranch that has been certified by the Government of South Africa under their bontebok program. If the ranch is not registered, we may be unable to issue an import permit.

8. **Complete name and address of overseas person or business shipping the trophy to you (this name will appear on the face of the permit).**

Name: NICOLENE LENTON
 Business Name: SAFARI CARGO SYSTEMS
 Address: HOLDING 34
 Address: 5TH AVENUE
 City: BREDELL
 State/Province: GAUTENG
 Country, Postal Code: SOUTH AFRICA, 1623

CERTIFICATION STATEMENT (original signature must be provided for either 9 or 10 below)

9. **If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.**

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit).

Taxidermist/Broker's signature: *Ronette Leiby* Date: *06/08/2018*

WELL Worldwide, Any In fact

10. **If you are the hunter applying to import your own trophy, please read and sign the following statement.**

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit).

Applicant's signature: _____ Date: _____

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Re: No objection to the import of Bontebok from the Free State Province

The Free State permit office hereby states that the bontebok to be exported to your country from Otterskloof Private Game Reserve were tested and declared as pure herds. After the confirmation of the approval of the positive genetic status, the reserve has declared that they have taken strict measures to prevent any contamination by separating their bontebok population into separate camps.

Any further correspondences may be directed to the writer.

Yours sincerely

C. Erasmus

PERMIT CONDITIONS FOR THE INTERNATIONAL IMPORT, EXPORT OR RE-EXPORT OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; NON-CITES LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH

OR Tambo international Airport is the only port designated for International Imports, Exports and Re-Exports of CITES and Non-CITES species and any products thereof; live wild animals, live exotic animals, hunting trophies, wild animal products, protected plants and live fish by aircraft within the Gauteng Province.

Import permits are not valid unless the Imported consignment is accompanied by a valid (original) export permit from the country of origin (if required), which must be handed to the authorized Environmental Management Inspector on inspection.

THE FOLLOWING CONDITIONS ARE APPLICABLE TO:

(A) ALL INTERNATIONAL IMPORTS, EXPORTS AND RE-EXPORTS OF CITES AND NON-CITES SPECIES AND ANY PRODUCTS THEREOF; LIVE WILD ANIMALS, LIVE EXOTIC ANIMALS, HUNTING TROPHIES, WILD ANIMAL PRODUCTS, PROTECTED PLANTS AND LIVE FISH (INCLUDING AIR, RAIL, RAIL, ROAD, AND SEA)

THIS PERMIT:

- 1. Shall not be transferable; Shall be invalid until the signature of the holder thereof been appended thereto; This permit is not valid unless it has been endorsed and released by an authorized Environmental Management Inspectorate official prior to the import, export or re-export taking place. In cases of importation of live animals, which are to be quarantined at OR Tambo International Airport's Quarantine Station, the permit must be released prior to the animals leaving quarantine. Original import permits to be inserted into a sealed envelope and placed in the Environmental Management Inspectorate box that's provided at the quarantine station, no more than 14 working days after import; Shall be subject to the provisions of any other law and or regulation; Shall be valid for one consignment only; This permit is subject to the compliance of Veterinary and Agricultural requirements; and to the compliance of IATA Live Animal Regulations.
2. The permit holder or his delegated agent must contact one of the authorized Environmental Management Inspectorate officials, per telephone and confirm per fax a minimum of 48 hours prior to the import, export or re-export taking place to book an inspection (the inspection booking must be requested a minimum of 48 hours prior to the intended inspection), applicable for shipments done over weekends and public holidays, with the following information: Name / Company Name of Importer / Exporter; Name of Airline and Warehouse where intended inspection will take place; Date and Time of Import / Export / Re-Export; Date and Time of intended inspection (subject to approval); Agents particulars (if applicable), Carrier Name, Flight Number, Flight Time and Waybill Number; The applicable permit number/s and relevant expiry dates; and Detailed packing list as per condition 7.
3. Inspections are by appointment only and early booking is necessary. An authorized Environmental Management Inspectorate official may be contacted at the following telephone numbers during office hours (07:00 - 15:30): Office: +27 (11) 390-3687/ 2311 Fax: +27 (11) 390-1720
4. All relevant documentation, including original permit/s (CITES permits must include original and coloured copy), Packing List/s, Waybill/s and Bill of entry/s (SAD/ DA 550) must be presented for inspection. A photo copy of all these documents must also be handed to the Environmental Management Inspectorate officer on inspection. The original permit/s, these conditions and packing list/s must accompany the consignment/s.
5. All transport containers must be numbered and the numbers must coincide with the numbers on the packing list/s. The country of destination as shown on the containers must coincide with the country of destination as on the permit. The details on the packing list/s must coincide with the details on the permit/s and Waybill/s.
6. Detailed packing list/s, that are signed and dated must accompany the consignment/s, with the following information: Details of Importer and Exporter (Names, addresses and contact numbers); Waybill number/s and name of carrier, flight number, date and time; Transport container number/s; Scientific name of species (in full) with relevant transporter / tag / ring numbers; a detailed description of specimen / product and the origin thereof; Common name of species (in full); Number per species per container (actual number exported / imported); and Applicable permit number/s
7. If this permit is not used, the original permit (CITES permits must include coloured copy) must be returned to the issuing authority within 14 working days after expiry thereof. Import permits must be returned to the issuing authority within 14 working days after use. Export permits must be handed to a Management Authority of the importing country within 14 working days after use.
8. The permit holder must make and retain photo copies of permit/s for audit inspections. Copies of import permits must be made and retained after endorsement, for Re-export permit applications. When applying for a Re-export permit, a copy of the endorsed import permit must be submitted to the Permit office with the application.
9. A person authorized thereto by the Premier may only make any alteration on the permit.
10. Failure to comply with any of the permit conditions renders the permit invalid and may result in criminal proceedings, cancellation of the permit/s and seizure of the consignment/s.
11. The holder of the permit and / or his delegated agent will be held responsible for any legal costs; costs incurred for delays and / or storage fees due to irregularities and / or due to the consignment being withheld due to incorrect documentation, and / or incorrect consignment/s and / or failure to comply with permit conditions.
12. Permit holders of their delegated agents must inform the Environmental Management Inspectorate official if an inspection is cancelled, or if they are to be late for an inspection within a reasonable time before the inspection is due to take place.

13. Signature of Issuing Officer: L.F. GOOSEY, Date: 18 October 2017, Signature of Recipient: [Signature], Date: [Blank], Full Name: [Blank], Full Name: [Blank]. Conditions to this permit have been issued in accordance with The National Environmental Management: Biodiversity Act 10 of 2004, CITES Regulations 2010.

WELL Worldwide Energy Logistics Inc.
17401 Aldine Westfield Road, Houston, Texas, 77073, USA.

Social Security No: (b) (6) Phone No: (b) (6)

CUSTOMS POWER OF ATTORNEY Acceptance of Terms and Conditions Know all men by these presents: That,
Wyatt (b) (6) Norman (PRINT NAME), an individual residing at
(b) (6) Corpus Christi, TX (b) (6)
(ADDRESS AS ON DRIVERS LICENSE)

hereby constitutes and appoints WELL Worldwide Energy Logistics, Inc. ("Broker"), its officers and employees, and or specifically authorized agents, to act for and on its behalf as a true and lawful agent and attorney of the grantor for and in the name, place, and stead of said grantor, from this date, in the United States (the "territory") either in writing, electronically, or by other authorized means, to: Make, endorse, sign, declare, or swear to any Customs entry, withdrawal, declaration, certificate, bill of lading, carnet or any other documents required by law or regulation in connection with the importation, exportation, transportation, of any merchandise in or through the customs territory, shipped or consigned by or to said grantor; Perform any act or condition which may be required by law or regulation in connection with such merchandise deliverable to said grantor; to receive any merchandise; Make endorsements on bills of lading conferring authority to transfer title; make entry or collect drawback; and to make, sign, declare, or swear to any statement or certificate required by law or regulation for drawback purposes, regardless of whether such document is intended for filing with Customs; Sign, seal, and deliver for and as the act of said grantor any bond required by law or regulation in connection with the entry or withdrawal of imported merchandise or merchandise exported with or without benefit of drawback, or in connection with the entry, clearance, lading, unloading or navigation of any vessel or other means of conveyance owned or operated by said grantor; and any and all bonds which may be voluntarily given and accepted under applicable laws and regulations, consignee's and owner's declarations provided for in section 485, Tariff Act of 1930, as amended, or affidavits or statements in connection with the entry of merchandise; Sign and swear to any document and to perform any act that may be necessary or required by law or regulation in connection with the entering, clearing, lading, unloading, or operation of any vessel or other means of conveyance owned or operated by said grantor; Authorize other Customs Brokers duly licensed within the territory to act as grantor's agent; to receive, endorse and collect checks issued for Customs duty refunds in grantor's name drawn on the Treasurer of the United States; If the grantor is a nonresident of the United States, to accept service of process on behalf of the grantor; And generally to transact Customs business, including filing of claims or protests under section 514 of the Tariff

Act of 1930, or pursuant to other laws of the territories, in which said grantor is or may be concerned or interested and which may properly be transacted or performed by an agent and attorney; Giving to said agent and attorney full power and authority to do anything whatever requisite and necessary to be done in the premises as fully as said grantor could do if present and acting, hereby ratifying and confirming all that the said agent and attorney shall lawfully do by virtue of these presents; This power of attorney to remain in full force until revocation in writing is duly given to and received by grantee (if the donor of this power of attorney is a partnership, the said power shall in no case have any force or effect in the United States after the expiration of two years from the date of its execution); Appointment as

Forwarding Agent: Grantor authorizes the above Grantee to act within the territory as a lawful agent and sign or endorse export documents (i.e. commercial invoices, bill of lading, insurance certificates, drafts and any other document) necessary for the completion of an export on grantor's behalf as may be required under law and regulation in the territory and to appoint forwarding agents on grantor's behalf; if the Grantor is a Limited Liability Company, the signatory certifies that he/she has full authority to execute this power on behalf of the Grantor.

Grantor acknowledges receipt and acceptance of these Terms and Conditions of Service of Broker governing all transactions between all the Parties. This Power of Attorney constitutes authorization for you to forward all Customs entries, bills and related documents in care of our Forwarding Agent, Safari Specialty Importers, who arranges for the importing and international carriage of our merchandise pursuant to the executed Authorization to Import with them. This clause is intended to allow all parties to insure compliance with 19 CFR 111.36. We acknowledge that as importer of record payment to the broker will not relieve us of liability for Customs charges (duties, taxes or other debts owed Customs) in the event that the charges are not paid by the Broker/Forwarding Agent. We further acknowledge that Customs charges may be paid with a separate check payable to the "U.S. Customs" which shall be delivered to Customs by the broker.

In witness whereof, the said individual,

Wyatt (b) (6) Norman (PRINT NAME)
has caused these presents to be sealed and signed:

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but are unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 2: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 3: USFWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Note 4: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-5 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. For each trophy to be imported, provide:
 - a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
P.I. melanochaita African Lion
 - b. Sex (if known).
Male
2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
 - a. Country and PLACE (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:
Zambia, Mafunta GMA, Western Province, S15°49'028; E025°15'474, Kaoma
 - b. Date wildlife is to be hunted:
06/01/2018-06/21/2018
 - c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks).
Skull, Skin, Claws
3. **IF THE ANIMAL IS DEAD**, please enter the following:
 - a. Country and PLACE (area, region, GIS coordinates, ranch AND nearest city) where wildlife was removed from the wild (provide a map if possible):
N/A
 - b. Date wildlife was hunted:
N/A

- c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks).

N/A

- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export documents]:

N/A

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will also appear on your Namibian export permit and must match the U.S. import permit].

Name: MVU Safaris
Business Name: MVU Safaris
Address: Plot # 6980 Katanga Road Lusaka
Address: P.O. Box 35225 Lusaka
City: Lusaka
State/Province: Zambia
Country, Postal Code: Zambia, 1010

5. Please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., population status or trend data; how the funds from license/trophy fees will be spent; what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. If you are a broker or taxidermist applying on behalf of a foreign national, provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year (if applicable). In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: _____ Date: _____

Be aware that there may be additional permitting or approval requirements by your local or state government, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist you, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish permit mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

David Asai (b) (6)

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

MVU SAFARIS, LTD.
Address, 6980 KATANGA ROAD LUSAKA
Operator email: m1saeed@hotmail.com

I. DESCRIPTION OF COMPANY AND CONCESSION

Mvu Safaris Zambia Limited has been operating in Mufunta Concession since April 2011. The concession provides habitat for a range of species including Lion, Leopard, Antelopes, Hartebeest and Plains Game. The concession is on the Western boundary of the Kafue National Park. Mvu Safaris has entered into a ten year lease agreement with the wildlife authority and communities and is renewable subject to conducting successful conservation records of the Ecological system.

Our company is a Limited Company and maintains one resident Professional Hunter who also provides the duties of a Camp Manager. Other employees include four game trackers, eighteen anti-poaching scouts, and six camp staff (cooks, cleaning, miscellaneous). Altogether our operations support 152 dependents in local Villages. These beneficiaries come from the local community.

Safari hunting therefore helps not only meet some financial needs of these communities but also prevents them from illegal hunting activities which have adverse effects on the population of the animals. It therefore follows that most of the revenue for Safari Hunting is derived from hunting of Lion and Leopard. With this in mind Mvu Safaris, the Community and the Wildlife Authorities have an enormous task to prevent the Cats from going into extinction by providing a more robust anti-poaching system to prevent the extinction of cats in these concessions.

II. ANTI-POACHING COMPONENT

Mvu Safaris maintains six groups of anti-poaching teams. Each team consists of three men per team and is equipped with a 4x4 Land cruiser, uniforms and boots, tents, rations, and a satellite phone. The patrols are done in conjunction with the wildlife scouts. We supply rations at least twice per month to both the government game scouts and our village scouts to ensure they are sufficiently equipped for the patrols.

In 2017, Mvu Safaris spent almost \$28,000 in Mufunta on anti-poaching patrols, equipment, and assistance to the Wildlife Authority and community scouts, including by providing 450 liters of diesel for patrol vehicles. We recorded 228 patrol days and well above 1600 patrol hours. We also made over \$3000 in payments of rewards to leads helping in the abduction of poachers. A breakdown of spending on anti-poaching is below.

Item	Spend (USD)	Notes
Scout salaries	\$5900	Directly paid and some subsidies to WA
Scout equipment	\$5000	Clothing, vehicles, rations, phones, tents, etc.
Diesel / petrol	\$6300	For scouts and WA
Rations for WA and community scouts	\$7800	
Rewards	\$3000	For information and arrests
TOTAL	\$28000	

The concession agreement has a clause which requires Mvu Safaris to submit annual reports on the anti-poaching activities and patrols done in each particular year to the wildlife authorities. This report will be taken into account in 2021 whether to renew the concession or not.

Bicycles and firearms recovered from poachers

III. COMMUNITY PARTICIPATION

A. Community Assistance Component

We make contributions to the Community Resource Boards (CRB) of about Forty Thousand Dollars (\$40,000) annually as per agreement which was entered into in 2011 by Mvu Safaris, the Community and the Wildlife Authorities.

In addition to these direct contributions, we pledge to distribute at least 50% of game meat harvested to the villages.

In the picture above members of the community waiting to receive Game meat which was legally hunted from Safari

B. Conflict Control

We have very few Human Animal Conflicts and in most cases they are not serious in nature.

IV. HABITAT PROTECTION AND CONSERVATION DEVELOPMENT

We have developed the water infrastructure for the exclusive use of wildlife in our concession. The infrastructure developed so far is natural pans and boreholes which costs approximately Seventeen Thousand Five Hundred Dollars Only (\$17500) to maintain annually respectively. The increased water supply increases the carrying capacity of the concession and the lion's prey base due to more game residing in the concession by finding water resource.

V. OTHER INFORMATION

A. Prey Base

Mvu Safaris in Mufunta is still monitoring the population growth of the Lion and Leopard which will result from efforts done so far such as anti-poaching efforts, water provision, and fire management. Mvu Safaris will further engage the wildlife Authorities in monitoring the resources on the ground by positioning cameras in strategic areas so as to monitor the Activities of the Lion and Leopard. We will work extra hard to grow the population of the Species by at least 15% per year. This will be done by introducing a deliberate approach where only old animals will be harvested for trophies and work on very careful allocated quota utilization per year in the block.

We will also engage the wildlife authorities to regulate resident hunting by proposing that animals hunted for food purposes should be female so as to balance the Eco system. We further wish to propose that resident hunting should be closely monitored and supervised because we have had reports in the past where resident hunters would not conduct proper ethical hunting methods in the hunting concession where they get allocated hunting rights per year for their own personal hunting opportunities as residents of Zambia and we wish to bring this anomaly to an end.

B. Lion Population Tracking

Lion is not easy to track and as such we are still developing tools which we will use to study the population of Lion in our area better. As at now we use Lion tracks and foot prints. Sightings by individuals and the cameras which we used this year to monitor the size and age for the Lion and keep records of the same.

C. Lion Aging Approach

Like other Safari Companies we have been following an age-based policy for African Lion trophies since 2015, after adopting a mutual aging agreement with our wildlife Authorities, and to be conservative in estimating age.

A number of potential Lion Trophy were not hunted this year because of our selectiveness.

Our approach as a company is to hunt lion which has reached an advanced and mature age only of minimum seven (7) years and above.

D. U.S. Hunters

Our largest clientele is from the United States of America (USA). We are happy to report that we have had very good relations with most of these clients who are willing to get out of their way and spend extra in terms of donations to communities and towards anti-poaching programs. Their approach to Safari Hunting has been that of maintaining high ethics of sustainability so as to improve the numbers of species in these concessions.

CONCLUSION

Mvu Safaris regulated, sustainable-use based hunting program enhances the survival of the Lion/Leopard. Our program helps to preserve and improve available Lion/Leopard habitat. Our anti-poaching program serves to protect and grow the cats prey base and reduces incidental off take by meat poachers. And our community participation and assistance program demonstrates the potential value of wildlife (especially Lion) to local communities'. Mvu Safaris has anti-poaching awareness campaign programs also which are done through funding sporting activities. This has helped improve the awareness on poaching in the community and how poaching robs them of the much needed finances generated from these natural resources. We can confirm that the communities in our concession are fully aware of the benefits that Safari Hunting comes along with and the dangers that are posed to this resource if poaching is left to escalate at higher levels. The community is now more than willing to bring to our attention any suspicious activities by some members of the communities.

Subject: 63880C / Lion Trophy Import

Good morning Mr. Asal,

Ref: 63880C

Your referenced application request to import **one male** African lion trophy from **MVU Safaris, Lusaka, Zambia**, is under review. However, in order to complete processing your application, we need additional information. Therefore, please provide the following:

1. Provide documentation showing that the lion referenced in your application will be legally hunted within Mafunta GMA, Zambia.
2. Provide documentation that shows the age of the lion you are requesting to import.
3. If you are able to, please provide a signed copy of the MVU Safaris, LTD document enclosed in your application package.

In accordance with 50 CFR 13.11(e), if the requested information is not received by this office by July 22, 2018, (45 calendar days of the date of this email), your application will be abandoned and administratively closed. Once a file is closed, you will need to submit a new application, and all required fees, for the Service to consider your proposed activity.

R
respectfully,

RCVD JUL 17 2018

4th July, 2018

The Director,
USFWS
United States of America

Dear Sir/Madam,

RE: AGE LIMIT FOR LIONS HUNTED IN ZAMBIA

We hereby wish to confirm that as per requirements by the Zambian government through the Department of National Parks and Wildlife Services, all Lions that are to be exported out of Zambia which were legally hunted are supposed to be five (5) years and above.

Any trophy that fails to meet this requirement is not permitted to be exported and the Professional Hunter together with the Safari outfitter will be punished accordingly.

Please do not hesitate to contact the Wildlife Authorities in Zambia for any further clarifications.

Yours faithfully

**MUHAMMAD SAEED ESSA
DIRECTOR**

MVU SAFARIS, LTD.

Address, 6980 KATANGA ROAD LUSAKA
Operator email: m1saeed@hotmail.com

I. DESCRIPTION OF COMPANY AND CONCESSION

Mvu Safaris Zambia Limited has been operating in Mufunta Concession since April 2011. The concession provides habitat for a range of species including Lion, Leopard, Antelopes, Hartebeest and Plains Game. The concession is on the Western boundary of the Kafue National Park. Mvu Safaris has entered into a ten year lease agreement with the wildlife authority and communities and is renewable subject to conducting successful conservation records of the Ecological system.

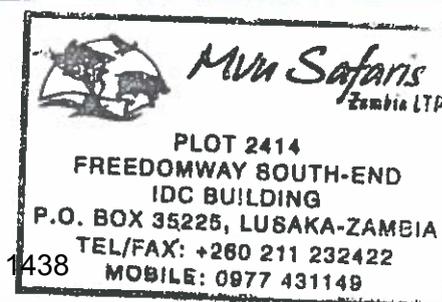

Our company is a Limited Company and maintains one resident Professional Hunter who also provides the duties of a Camp Manager. Other employees include four game trackers, eighteen anti-poaching scouts, and six camp staff (cooks, cleaning, miscellaneous). Altogether our operations support 152 dependents in local Villages. These beneficiaries come from the local community.

Safari hunting therefore helps not only meet some financial needs of these communities but also prevents them from Illegal hunting activities which have adverse effects on the population of the animals. It therefore follows that most of the revenue for Safari Hunting is derived from hunting of Lion and Leopard. With this in mind Mvu Safaris, the Community and the Wildlife Authorities have an enormous task to prevent the Cats from going into extinction by providing a more robust anti-poaching system to prevent the extinction of cats in these concessions.

II. ANTI-POACHING COMPONENT

Mvu Safaris maintains six groups of anti-poaching teams. Each team consists of three men per team and is equipped with a 4x4 Land cruiser, uniforms and boots, tents, rations, and a satellite phone. The patrols are done in conjunction with the wildlife scouts. We supply rations at least twice per month to both the government game scouts and our village scouts to ensure they are sufficiently equipped for the patrols.

In 2017, Mvu Safaris spent almost \$28,000 in Mufunta on anti-poaching patrols, equipment, and assistance to the Wildlife Authority and community scouts, including by providing 450 liters of diesel for patrol vehicles. We recorded 228 patrol days and well above 1600 patrol hours. We also made over \$3000 in payments of rewards to leads helping in the abduction of poachers. A breakdown of spending on anti-poaching is below.

Item	Spend (USD)	Notes
Scout salaries	\$5900	Directly paid and some subsidies to WA
Scout equipment	\$5000	Clothing, vehicles, rations, phones, tents, etc.
Diesel / petrol	\$6300	For scouts and WA
Rations for WA and community scouts	\$7800	
Rewards	\$3000	For information and arrests
TOTAL	\$28000	

The concession agreement has a clause which requires Mvu Safaris to submit annual reports on the anti-poaching activities and patrols done in each particular year to the wildlife authorities. This report will be taken into account in 2021 whether to renew the concession or not.

FWS/AIA/DMA/PRT-63880C

Enhancement Finding
Applicant: David (b) (6) Asal (PRT-63880C)

David (b) (6) Asal submitted an application on November 21, 2017, for the importation of one male African lion (*Panthera leo melanochaita*) from Lusaka, Zambia for the purpose of enhancing the propagation and survival of the species in the wild. After evaluating the available information submitted with the application, information provided by the government of Zambia, other information available to the Service, and comments received from interested parties, the U.S. Fish & Wildlife Service (Service) has determined that the importation of the sport-hunted trophy taken June 1, 2018, through June 21, 2018, from this wild lion (*P. l. melanochaita*) population within Zambia meets the enhancement criteria under 50 CFR 17.32.

Governance of the Lion in the United States:

On October 29, 2014, the Service published in the Federal Register a finding that listing the African lion subspecies (*Panthera leo leo*) as a threatened species under the Endangered Species Act (Act or ESA) was warranted and proposed a rule under Section 4(d) of the Act to provide conservation measures for the African lion. (79 Fed. Reg. 64472.) On December 23, 2015, after fully considering the comments from the public and the peer reviewers on the proposed rule, the Service published in the Federal Register the final rule in which the taxonomic classification of the Asiatic lion (previously classified as *P. l. persica* and listed as an endangered species under the Act) was changed to *P. l. leo* (Asia and western, central and northern Africa) and listed as an endangered species, and the *P. l. melanochaita* (southern and eastern Africa) subspecies was listed as a threatened species with a rule under Section 4(d) of the Act, which is set forth at 50 CFR 17.40(r). 80 Fed. Reg. 79999. The effective date of this listing was January 22, 2016. Therefore, as of January 22, 2016, the lion subspecies *Panthera leo melanochaita*, whose range includes Zambia, is listed as threatened under the Act and is regulated under an ESA Section 4(d) special rule [50 CFR 17.40(r)].

Section 9 of the Act and our implementing regulations at 50 CFR 17.21 and 50 CFR 17.31 set forth a series of general prohibitions that apply to all endangered and threatened wildlife, respectively, except where a 4(d) rule applies to threatened wildlife, in which case the 4(d) rule contains all the

applicable prohibitions and exceptions. Under the 4(d) rule for *P. l. melanochaita*, all of the prohibitions under 50 CFR 17.31 apply to *P. l. melanochaita* specimens. These prohibitions, at 50 CFR 17.21 and 17.31, in part, make it illegal for any person subject to the jurisdiction of the United States to “take” (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or to attempt any of these) within the United States or upon the high seas; import or export; deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever, in the course of commercial activity; or sell or offer for sale in interstate or foreign commerce any lion specimens. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken in violation of the Act. Permits may be issued to carry out otherwise prohibited activities involving endangered and threatened wildlife species under certain circumstances. Regulations governing permits for endangered species, such as *P. l. leo*, are codified at 50 CFR 17.22. Regulations governing permits for threatened species, such as *P. l. melanochaita*, are codified at 50 CFR 17.32.

In sum, under paragraph 17.40(r)(1), all the prohibitions and exceptions under 50 CFR 17.31 and 50 CFR 17.32 apply to *P. l. melanochaita*. Accordingly, the Service may authorize the import of a sport-hunted lion trophy from Zambia, but only if it first makes a finding that permitting import of a trophy would enhance the survival of the species in the wild.

As we explained when finalizing the 4(d) rule for *P. l. melanochaita*, any person wishing to conduct an otherwise prohibited activity, including all imports of *P. l. melanochaita* specimens, must first obtain a permit under 50 CFR 17.32. As with all permit applications submitted under 50 CFR 17.32, the individual requesting authorization to import a sport-hunted trophy of *P. l. melanochaita* bears the burden of providing information in their application showing that the activity meets the requirements for issuance criteria under 50 CFR 17.32. In some cases, such as for import of sport-hunted trophies, it is not always possible for the applicant to provide all of the necessary information needed by the Service to make a positive determination under the Act to authorize the activity. In such cases, the Service may consult with the range country and other interested parties to the extent practicable to obtain necessary information. The Service will make the required findings on sport-hunted trophy imports of *P. l. melanochaita* on an individual application basis, however information obtained for the country as a whole will continue to be considered as it contains information pertinent to the Service’s evaluation. Any new information obtained or submitted to the Service will be evaluated and considered in all future findings for sport-hunted trophies of *P. l. melanochaita* taken in Zambia.

General considerations:

As we also explained when finalizing the 4(d) rule, our threatened species permitting regulations at 50 CFR 17.32 provide issuance criteria for threatened species permits [(50 CFR 17.32(a)(2))], but do not specify what would constitute the enhancement of propagation or survival with regard to authorizing the import of parts or products of *P. l. melanochaita*, including sport-hunted trophies. Therefore, when making a determination of whether an otherwise prohibited activity enhances the propagation or survival of *P. l. melanochaita*, the Service examines the overall conservation and management of the subspecies in the country where the specimen originated and whether that management of the subspecies addresses the threats to the subspecies (*i.e.*, that it is based on sound scientific principles and that the management program is actively addressing the current and longer term threats to the subspecies). In this review, we evaluate whether the import of a sport-hunted lion trophy taken in Zambia contributes to the overall conservation of the species

by considering whether the biological, social, and economic aspects of a program from which the specimen was obtained provide a net benefit to the subspecies and its ecosystem.

The Service has evaluated Mr. Asal's application involving a *P. l. melanochaita* sport-hunted trophy taken in the Mafunta GMA, in the context of enhancement of propagation or survival in accordance with our threatened species permitting regulations at 50 CFR 17.32 and issuance criteria for threatened species permits [(50 CFR 17.32(a)(2)]. These include, in addition to the general permitting criteria in 50 CFR 13.21(b):

- (i) Whether the purpose for which the permit is required is adequate to justify removing from the wild or otherwise changing the status of the wildlife sought to be covered by the permit;
- (ii) The probable direct and indirect effect that issuing the permit would have on the wild populations of the wildlife sought to be covered by the permit;
- (iii) Whether the permit, if issued, would in any way, directly or indirectly, conflict with any known program intended to enhance the survival probabilities of the population from which the wildlife sought to be covered by the permit was or would be removed;
- (iv) Whether the purpose for which the permit is required would be likely to reduce the threat of extinction facing the species of wildlife sought to be covered by the permit;
- (v) The opinions or views of scientists or other persons or organizations having expertise concerning the wildlife or other matters germane to the application; and
- (vi) Whether the expertise, facilities, or other resources available to the applicant appear adequate to successfully accomplish the objectives stated in the application.

In addition to these factors, particularly in relation to sport hunting, we find the *IUCN Species Survival Commission (SSC) Guiding Principles on Trophy Hunting as a Tool for Creating Conservation Incentives, Ver. 1.0* (IUCN SSC 2012), to provide useful principles, which, considered in conjunction with our threatened species issuance criteria, will aid the Service when making this enhancement finding for the importation of a sport-hunted trophy of *P. l. melanochaita* from Lusaka, Zambia. This document sets out guidance from experts in the field on the use of trophy hunting as a tool for "creating incentives for the conservation of species and their habitats and for the equitable sharing of the benefits of use of natural resources" (IUCN SSC 2012, p. 2) and recognizes that recreational hunting, particularly trophy hunting, can contribute to biodiversity conservation and more specifically, the conservation of the hunted species.

The SSC document lays out five guiding principles that, considered in conjunction with our threatened species issuance criteria, will aid the Service in making this enhancement finding for importation of a sport-hunted trophy of *P. l. melanochaita*:

- (a) *Biological sustainability*: The hunting program cannot contribute to the long-term decline of the hunted species. It should not alter natural selection and ecological function of the hunted species or any other species that share the habitat. The program should not inadvertently facilitate poaching or illegal trade in wildlife by acting as a cover for such illegal activities.

The hunting program should also not manipulate the ecosystem or its component elements in a way that alters the native biodiversity.

(b) *Net Conservation Benefit*: The biologically sustainable hunting program should be based on laws, regulations, and scientifically based quotas, established with local input, that are transparent and periodically reviewed. The program should produce income, employment, and other benefits to create incentives for reducing the pressure on the target species. The program should create benefits for local residents to co-exist with the target species and other species. It is also imperative that the program is part of a legally recognized governance system that supports conservation.

(c) *Socio-Economic-Cultural Benefit*: A well-managed hunting program can serve as a conservation tool when it respects the local cultural values and practices. It should be accepted by most members of the community, involving and benefiting local residents in an equitable manner. The program should also adopt business practices that promote long-term economic sustainability.

(d) *Adaptive Management: Planning, Monitoring, and Reporting*: Hunting can enhance the species when it is based on appropriate resource assessments and monitoring (e.g., population counts, trend data), upon which specific science-based quotas and hunting programs can be established. Resource assessments should be objective, well documented, and use the best science available. Adaptive management of quotas and programs based on the results of resource assessments and monitoring is essential. The program should monitor hunting activities to ensure that quotas and sex/age restrictions of harvested animals are met. The program should also generate reliable documentation of its biological sustainability and conservation benefits.

(e) *Accountable and Effective Governance*: A biologically sustainable trophy-hunting program should be subject to a governance structure that clearly allocates management responsibilities. The program should account for revenues in a transparent manner and distribute net revenues to conservation and community beneficiaries according to properly agreed decisions. All necessary steps to eliminate corruption should be taken and to ensure compliance with all relevant national and international requirements and regulations by relevant bodies such as administrators, regulators and hunters.

This approach to enhancement findings for the importation of a sport-hunted trophy of *P. l. melanochaita* is consistent with the purpose and intent of the Act. As such, before the Service will authorize the importation of a sport-hunted trophy, we must determine that the trophy-hunting program is managed to ensure the long-term survival of the species. As part of this evaluation, we recognize that in many parts of the world, wildlife exists outside of protected areas and must share the same habitat and compete with humans living in these areas for space and resources. As identified in the *IUCN SSC Guiding Principle on Trophy Hunting as a Tool for Creating Conservation Incentive*, if communities that share these resources with wildlife do not perceive any benefits from the presence of wildlife, they may be less willing to tolerate the wildlife. However, under certain circumstances, trophy hunting can address this problem by making wildlife more valuable to the local communities, thus encouraging community support for managing and conserving the hunted species, as well as other species.

In evaluating whether the importation of Mr. Asal's trophy of *P. l. melanochaita* would be authorized pursuant to 50 CFR 17.32, in accordance with our threatened species issuance criteria, we examined how Zambia's management program for lions addresses the three main threats that have led to the decline of the subspecies: habitat loss, loss of prey base, and human-lion conflict. When examining a management program and whether this trophy taken as part of that program meets the issuance criteria, we study a number of factors. Some of the factors we considered include whether the program is based on sound scientific information and identifies mechanisms that would arrest the loss of habitat or increase available habitat (*i.e.*, by establishing protected areas and ensuring adequate protection from human encroachment). We considered whether the management program actively addresses the loss of the lion's prey base by addressing poaching or unsustainable offtake within the country. Several components of a management plan from which trophy imports could meet the issuance criteria would be whether there are government incentives in place that encourage habitat protection by private landowners and communities, and incentives provided to local communities to reduce the incursion of livestock into protected areas or to actively manage livestock to reduce conflicts with lions. We examined if the hunting component of the management program supports all of these efforts by looking at whether hunting concessions/tracts are managed to ensure the long-term survival of the lion, its prey base, and habitat. Hunting, if properly conducted and well managed, can generate significant economic benefits that may contribute to the conservation of lions. In looking at whether we are able to authorize the import of a trophy under the issuance criteria at 50 CFR 17.32(a)(2), we examined if the trophy hunting provides financial assistance to the wildlife department to carry out elements of the management program, and if there is a compensation scheme or other incentives to benefit local communities that may be impacted by lion predation. We also considered how the U.S. hunter's, in this case, Mr. Asal's, participation in the hunting program contributes to the overall management of lions within the country.

The management program in Zambia for *P. l. melanochaita* is expected to address, but is not limited to, evaluating population levels and trends; the biological needs of the species; quotas; management practices; legal protection; local community involvement; and use of hunting fees for conservation. In evaluating these factors, we work closely with the range countries and interested parties to obtain the information. By allowing entry into the United States of *P. l. melanochaita* trophies from range countries that have science-based management programs, we anticipate that other range countries would be encouraged to adopt and financially support the sustainable management of lions that benefits both the species and local communities. In addition to addressing the biological needs of the subspecies, a scientifically based management program will provide economic incentives for local communities to protect and expand *P. l. melanochaita* habitat.

Basis for Finding:

On February 2, 2016, the Service sent a letter to Zambia's Wildlife Authority with a list of questions that would aid the Service in evaluating the overall conservation and management of the subspecies, *P. l. melanochaita*, in Zambia and whether that management addressed the three main threats that have been identified as the reason for the decline of the species: habitat loss, loss of prey base, and human-lion conflict. Additionally, in the letter the Service referenced the *IUCN Species Survival Commission (SSC) Guiding Principles on Trophy Hunting as a Tool for Creating Conservation Incentives, Ver. 1.0* (IUCN SSC 2012), as it provides useful principles, which when

considered in conjunction with the Service's permit issuance criteria, would aid when making the required enhancement findings for permitting importation of sport-hunted lion trophies.

In response to our February 2, 2016, letter, Zambia's Department of National Parks and Wildlife (DNPA), herein referred to as DNPW (DNPW 2016), provided a binder of documentation describing Zambia's lion population and management plans. In addition, the Service met with representatives of Zambia's DNPW during the 17th Meeting of the Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) in Johannesburg in late September 2016. The DNPW binder documents, dated May 5, 2017, along with the Service's final rule on the lion listing under the Act, relevant information obtained separately through open sources such as IUCN documents, relevant information from DNPW, comments received from interested parties, and Mr. Asal's application were the basis of this finding.

Governance of Lions in Zambia:

The responsibility for implementing wildlife conservation laws in Zambia dates back to the 1930s or 1940s with the establishment of the Department of Tsetse, Fisheries, and Wildlife. In the late 1950s, this agency became the Department of Game and Fisheries and operated under this designation until the mid-1970s, when it became the Department of National Parks Wildlife Service (DNPWS) who was responsible for the protected area network. In 1999, the Government of Zambia transformed this agency into Zambia's Wildlife Authority (ZAWA), creating a semi-autonomous agency responsible for the management and protection of this network, with statutory powers derived through the Zambia Wildlife Act No. 12 of 1998. However, this agency, due partly to its semi-autonomy, had a low funding capability, relying primarily on revenue from tourism, which also included sport hunting. Between 1999 and 2005, ZAWA struggled with their law enforcement capabilities due to inadequate resources. The costs associated with transforming DNPWS to ZAWA continued to affect the financial and staff allocations for law enforcement activities. Large sums of money that could have been utilized by law enforcement were apparently channeled into tasks involved in the transformation process.

Since 2005, in partnership with the Zambia Lion Project (ZLP), ZAWA (now DNPW) established a voluntary program to assess and age lions taken as trophies (DNPW 2016). From 2006 through 2012, DNA samples were taken from teeth of both live and trophy lions in order to estimate the age of lions taken as trophies (DNPW 2016). The results from these past sampling efforts helped demonstrate the performance of the hunting sector during this time. It has also provided a baseline for comparing future performance.

By 2010, Zambia developed a ten-year Conservation Strategy and Action Plan for the African lion. Since the approval of this strategy, research has begun and management actions have been taken to address local community benefits, human-lion conflict, land use planning and zoning, trade, and monitoring (DNPW 2016). Some of the lion-related studies that were initiated are the Zambia Carnivore Programme (ZCP), Kafue Lion Project, and Zambia Lion Project (ZLP) (DNPW, 2106). The development of this strategy also led to the employment of 12 ecologists, with three committed to spending 70% of their work time on lion-related issues (DNPW 2016).

In 2015, ZAWA was disbanded and reincorporated as a government department, the Department of National Parks and Wildlife (DNPW). In addition, the Zambia Wildlife Act No. 12 of 1998 was

repealed. However, the Wildlife Act No. 14 of 2015 (Wildlife Act) is still the principle legislation guiding the management of wildlife in Zambia through a system implemented and enforced by DNPW with assistance from stakeholders (DNPW 2016).

The Wildlife Act is administered by DNPW under the Ministry of Tourism. DNPW is headed by a Director, with assistant directors who command 4 elements of the department: Principal Warden-Operations Wildlife Law Enforcement Unit, Principal Warden-Conservation Unit, Principal Engineer Infrastructure Development Unit, and Principal Natural Resource Management Officer Community-based Natural Resource Management Unit. *The Wildlife Law Enforcement Unit* is comprised of 1,250 Wildlife Police Officers who are responsible for investigating and enforcing wildlife crimes within 236,376 km² of wildlife area (average 189 km² per officer). The Zambian government has also committed to adding an additional 850 officers by 2018 (600 new officers were reportedly added in 2016). *The Wildlife Conservation Unit* is responsible for mitigating human-wildlife conflict, facilitating wildlife officer trainings, regulating private wildlife estate operations, managing ecosystems, managing landscape conservation of certain species, and both developing and implementing park regulations. *The Infrastructure Development Unit* is responsible for construction and maintenance of infrastructures and machinery within protected areas. *The Community-based Natural Resource Management Unit* is responsible for co-managing Game Management Areas (GMAs) with local communities. Duties include providing technical support to Community Resource Boards regarding the management of human-natural resources in GMAs and open areas. This unit facilitates the election of the Community Resources Board members and the election of Village Action Groups. Responsibilities also include monitoring the use of funds disbursed to Community Resources Boards and training village scouts and Community Resources Board members.

The lion is a protected species under the Wildlife Act. It is a criminal offense to hunt, kill, capture, or possess a lion without a license. The lion is also protected under private wildlife estate legislation and statutory instruments implemented with the (now repealed) Wildlife Act of 1998 and carried over to the Wildlife Act. Additionally, in 2016, four new statutory regulations were reportedly enacted to address various aspects of lion management to complement the operation of the new Wildlife Act. They included the Zambia wildlife regulations for granting of hunting concessions, lion sport hunting, keeping of big cats in captivity, and conducting ecological or research wildlife assessments (DNPW 2016).

In addition to Zambia's domestic laws, it is also a Party CITES. The lion is listed in Appendix II of the Convention. As an Appendix-II species, certain criteria must be met before such species can be exported, including findings from the exporting country's CITES Management Authority that the specimen was legally acquired and the country's Scientific Authority that the export will not be detrimental to the survival of the species in the wild. In their reply to our inquiry, Zambia provided a copy of their May 5, 2016, non-detriment finding for lions. This finding states that "(t)he CITES Scientific authority of Zambia has considered the population of lion in Zambia; the quota-setting system and current precautionary quota of only 24 lions; the newly implemented age-based harvest policy; the limited offtake; the adaptive management of lion; and the substantial revenues generated for DNPW operations, anti-poaching, and community development." They further explain that their positive finding was based on three pillars that include a "precautionary" quota, age-based harvesting, and community benefits.

Current Lion Status in Zambia

Lion Range:

According to DNPW, the lion range in Zambia covers about 63% of Zambia's protected areas, which is about 145,000 km² (DNPW 2016). Historically, lions occurred in the West Lunga complex, although, recently, populations have not been found in this complex (DNPW 2016). The majority of lions are found in three main clusters throughout Kafue, Luangwa, and the Lower Zambezi region. Luangwa and Lower Zambezi are connected through GMAs. Smaller populations of lions are also present in Liuwa Plains, Sioma Ngwezi, Nsumbus, and the Lavushi Manda National Parks. In addition, Kazungula and Siavonga open areas have lion populations that roam between Zambia and other countries (DNPW 2016).

The 2016 IUCN Red List Assessment stated that lions are now extinct in 15 countries in Africa (including Western Sahara, which is technically a disputed territory), are possibly extinct in another seven countries, and now occur in only 24 countries (Macdonald 2016). The latest IUCN estimates suggest a population of 23,000 - 39,000 lions throughout their current range on the African continent (IUCN 2016), representing a decline of at least 43% between 1993 and 2014. Lions are now considered to have been extirpated from at least 92% of their historic range (Macdonald 2016). Therefore, in assessing the population of lions in Zambia, we must also consider the significance of the diminishing total population of lions remaining in the wild. This is in part because the southern and eastern African lion populations include Zambia (DNPW 2016). DNPW presented a study conducted by the Zambia Lion project (ZLP) in which DNA analysis of Zambian lions was undertaken during 2004 - 2012. The study concluded that southern African and eastern African lions were integrated among the Zambian lions. The study also determined that the genetic diversity of Zambian lions is much greater than comparable areas in southern and eastern Africa.

Population Status:

Data provided by Macdonald (2016) indicate that Zambia contains approximately 1,200 free-ranging lions in an estimated range of 135,000 km² (approximately 10,000 km² less range than identified by the Zambian government). DNPW explains that previous lion estimates were determined, in large part, through expert opinion (DNPW 2016). They also confirm that no intensive research has been conducted in the corridor area, consisting of West Petauke, Chisomo and Luano GMAs, and surrounding Open Areas (DNPW 2016).

In addition to the population status determined by Macdonald (2016), the Zambian Carnivore Programme (ZCP) studied the population of lions in Zambia. In 2013, the ZCP monitored 13 prides and 13 coalitions, comprised of 141 lions with 3 adjacent sites of 20 lions each, totaling over 200 lions. In 2014, the ZCP monitored 15 prides and 13 coalitions, with a total of 166 individual lions. In 2015, the ZCP's partial data indicated that 15 prides and 15 coalitions of lions exist throughout Zambia.

In acknowledging their need for more complete and current lion population data, DNPW has begun working with partners on monitoring studies in the Luangwa and Kafue ecosystems. Surveys were conducted in the later part of 2016 (DNPW 2016). The Service has not seen the results, but will request them for consideration in future enhancement determinations. In addition, dependent on funding availability, DNPW has identified that a survey would be conducted of the corridor

between South Luangwa National Park and Lower Zambezi National Park and the GMAs surrounding the eastern part of North Luangwa National Park.

A report by the Democratic staff of the House Committee on Natural Resources concludes that Zambia lion populations may show signs of stabilizing or even recovery, but strict controls on additional mortality are necessary to prevent further decline (Grijalva 2016).

Threats:

Habitat Loss, Population Growth, and Human-Lion Conflicts:

Lion populations throughout Africa have decreased in correlation with their habitat. Currently only 10 stable populations with more than 500 lions still exist throughout the continent of Africa (Creel *et al.* 2016). Africa has the fastest human population growth rate in the world, with projections estimating a population tripling across 27 African states by 2100, leading to a continental estimate of 4 billion. Eight lion range states are estimated to have a five-fold increase in human population by 2100 (Macdonald 2016), and Zambia has not steered clear of Africa's population and development growth (DNPW 2016). Human population growth has increased in Mfuwe, the gateway town to South Luangwa National Park, largely due to increased infrastructure development and an increasing number of economic opportunities created through tourist lodges (DNPW 2016). Habitat loss, population growth, human-lion conflicts, poverty, poaching, diseases, uncontrolled hunting, and the importation of captive-bred lions into Zambia are all threats to the long-term survival of lion populations in Zambia.

DNPW stated that human-lion conflicts are not uncommon in Zambia. From the years 2008 through 2015, a total of 327 livestock animals were recorded as being killed by lions; since 2002, at least 70 lions were reported killed as a result of human lion conflicts (DNPW 2016). The number of Zambian lions killed as a result of human-lion conflict is shown in the table below.

Year	Lions Killed
2002	2
2003	4
2004	1
2005	0
2006	5
2007	8
2008	2
2009	5
2010	3
2011	8
2012	5
2013	10
2014	14
2015	1
2016	2

Poverty, Poaching, and Disease:

Prey base depletion is partly linked to habitat loss, but more importantly to poaching and bush meat trade (Becker *et al.* 2013). Poaching of lions for the trade in bones and other body parts for traditional medicine is an emerging threat within Africa (Macdonald 2016). Within Zambia, another more widely occurring threat believed to be facilitated by high levels of poverty is poaching of lions for bush meat (DNPW 2016). DNPW acknowledges that bush meat poaching occurs widely in Zambia (DNPW 2016). They also acknowledge that the amount of illegal use of lion parts in Zambia is currently unknown (DNPW 2016). However, DNPW has indicated it will establish an investigation into the illegal trade and use of lion parts.

Zambia has addressed the need to monitor the health of their lions by creating the Infrastructure Development Unit (IDU). The IDU subsequently established a veterinary unit of DNPW whose responsibility is to regularly sample lion specimens for diseases. This unit also assists law enforcement officers in the treatment of injured lions due to illegal activities such as snaring (DNPW 2016).

Trophy Hunting:

Di Minn *et al.* (2016) estimated that 37.8% of Zambia is covered by terrestrial protected areas, with 21.3% in Open Game Ranches. According to a 2012 article, lion hunting in Africa generates 5–17% of gross trophy hunting income on national levels, with the proportional significance highest in Mozambique, Tanzania, and Zambia (Lindsey *et al.* 2012). A more recent paper published by Macdonald, however, asserted that Zambia generated very little revenue from trophy hunting (Macdonald 2016). It should be noted, however, that Macdonald based the paper on data obtained in the years before 2016 (the moratorium was between 2013 and 2015), and the formation of DNPW and newer regulations were not implemented until after Zambia imposed a moratorium on lion hunting for the years 2013 through 2015. According to DNPW, Zambia's total hunting revenue (all hunting, not just lions) accounted for 32% of the revenue that ZAWA (now DNPW) received during the years 2010 through 2012 (DNPW 2016). They also affirm that the average revenue generated for hunting in Zambia was reduced to 4% during the lion hunting moratorium in 2013 and 2014 (DNPW 2016).

IUCN has only examined the lion population in Luangwa, Zambia. Their findings indicate that trophy hunting in Luangwa contributed to a decline in the lion population by 28% between 1993 and 2014 (Macdonald 2016). However, this assessment was done prior to Zambia's 2013-2015 hunting ban and therefore, it will need to be re-assessed now that Zambia's lion hunting ban has been lifted and new regulations have been implemented.

Importation of Captive-bred lions:

Captive-bred lions from South Africa and Zimbabwe are being imported into Zambia for lion walks (DNPW 2016). DNPW believes that the importation of captive-bred lions is a result of a growing photo-tourism market in the Livingstone area of southern Zambia (DNPW 2016). Since 2008, a total of 54 captive-bred lions have been imported into Zambia, but the Zambian government has imposed a condition that the captive-bred lions will not be introduced into the wild (DNPW 2016). In order to ensure that Zambia's captive-bred lions do not negatively impact their wild lion

populations, Zambia is currently working on the preparation of a statutory instrument that will regulate the importation and captive uses of lions. Other than for temporary veterinary purposes, the holding of, breeding, and commercial use (i.e. walking and petting) of captive-bred lions will be banned (DNPW 2016). Lions that are currently held in captivity will be required to be castrated or spayed, and eventually all commercial uses of captive-held lions will be phased out (DNPW 2016). DNPW states that "particular care will be taken to avoid the dumping of captive-held cats into wild areas for any reason, especially for hunting or 'release' as means for the owners to avoid the penalties or costs associated with the authorized disposition of their animals (DNPW 2016)."

Partners/Non-governmental Organizations (NGOs):

DNPW has partnered with several NGOs in an effort to obtain lion population survey data and to conduct other lion-related research studies. The Zambia Lion Project (ZLP) has conducted research on the presence/absence of lion surveys throughout Zambia (DNPW 2016). They have also assisted with DNA collection studies. The Zambia Carnivore programme (ZCP) has been documenting population trends and demographic vital rates of lions in the key areas of South Luangwa National Park, Kafue National Park, and Liuwa Plain National Park. Through their research efforts, the ZCP has also contributed to aerial support that has assisted DNPW with enforcement actions.

Although their research focus has been on elephants, the Frankfurt Zoological Society has been active in North Luangwa ecosystem for over 20 years. Conservation South Luangwa (CLS) has been active in South Luangwa National Park and surrounding GMAs. Game Rangers International has been active in the Kafue ecosystem since 2010. Conservation Lower Zambezi (CLZ) is also active in the Lower Zambezi national park and surrounding GMAs.

Supplemental revenue sources are also gained with the support of several NGOs. NGOs can provide functions that include anti-poaching units and/or aerial support. One such example is the Frankfurt Zoological Society (FZS), which has been active in North Luangwa National Park for over 20 years. FZS established a partnership with DNPW in order to help preserve black rhino and elephant populations through the establishment of The North Luangwa Conservation Programme (NLCP).

Lion Management in Zambia

History of Lion trophy exports:

During 2008 - 2012, DNPW authorized the export of 289 lion trophies (50, 40, 89, 37, and 73 respectfully). During 2013 - 2015, the Zambian government established a lion hunting moratorium (some trophies apparently taken before the moratorium were exported during this time, however). The moratorium was established to allow time to restructure Zambia's governance of lions and to allow a period of time for lion recovery (DNPW 2016). Data comparing the lion population status before and after the moratorium are currently unavailable; hence, the success of the moratorium cannot be fully assessed.

Lion Hunting and Concessions:

Zambia lion hunting occurs in *Game Management Areas (GMAs)* and *Open Game Ranches (OGRs)*. OGRs are unfenced private lands reserved for the wildlife conservation management of an individual or local community. They are buffered by GMAs. DNPW issues annual non-resident

hunting quotas to the OGRs in exchange for managing the wildlife; although all animals remain the property of the State (DNPW 2016).

All 20 of Zambia's national parks are surrounded by GMAs, but currently, lion hunting only occurs within hunting blocks located in the GMAs that surround the National parks in the Luangwa, Kafue, and Lower Zambezi ecosystems. GMAs are primarily designated for safari (tourist) and resident hunting, but some GMAs also include photographic tourism. All GMAs allow settlement. There are 36 GMAs in Zambia covering 177,404 km² (DNPW 2016). Most, but not all, GMAs have General Management Plans outlining basic management practices. Community-Based Natural Resource Management (CBNRM) is implemented within GMAs through Community Resource Boards (CRBs) (DNPW 2016). The CRBs focus on the economic and social well-being of local communities. There are currently 75 registered CRBs within Zambia that employ approximately 750 community scouts and 79 support staff.

DNPW, in consultation with the local community, is mandated to grant hunting concessions within specific hunting blocks within GMAs. Hunting concessions must be registered in Zambia, have a tourism enterprise license, have a valid tax clearance certificate, provide proof that the company is not bankrupt, and they must meet any additional conditions set by an evaluation committee (DNPW 2016). Leases are stated to range from 7 - 15 years, with the length of lease time dependent on the abundance of species classified within the individual hunting block (DNPW 2016). Prime hunting blocks have greater species abundance and are generally awarded shorter lease agreements in comparison to secondary hunting blocks. Secondary hunting blocks are generally given longer lease periods in an effort to provide incentives for the concessionaire to invest greater resources, allowing wildlife populations to increase before offering hunting (DNPW 2016).

Hunting block concessions are awarded through a bid process in accordance with the Zambia Public Procurement Act No 12 of 2008. Bids are taken from companies through a "two envelop system." The bids consist of a technical proposal and a financial proposal being placed in separate clearly marked envelopes. The technical bid is required to be evaluated by criteria outlined in Zambia's Wildlife Act before the envelope containing the financial bid is opened. Financial envelopes will only be opened for bidders that meet a specific technical expertise (e.g., a score of over 80 on the established criteria). The lease is awarded to the bidder that qualified with a minimum technical rating of 80 and whom submitted the highest financial bid (DNPW 2016).

Successful bidders must address statutory obligations to communities and provide enforcement contributions when developing Concessionary Agreements. Concessionary Agreements are developed through a partnership between the communities, safari operators, professional hunters, and DNPW. As such, a hunting concession agreement is not valid without the signature of the Chief(s) or CRB associated with the hunting block (DNPW 2016). Concessionaires are required to use collected fees to support resource protection by providing community scouts, vehicles, fuel, patrols, and equipment. They must provide infrastructure development to local communities and also offer resource monitoring and fire management. Some concessionaires further benefit community development by supporting the employment of teachers and nurses, purchasing ambulances, building classrooms and clinics, and providing houses for teachers and health personnel. Moreover, they are mandated to provide 50% of the meat from hunted animals to the local community. Concessionaires are evaluated annually and those that do not comply with their obligations can have their concession terminated before the end of the agreement's term (DNPW 2016).

Hunting Quotas:

From 2005 - 2012, Zambia had quotas that totaled 683 lion in 21 GMAs and 5 OGRs, with the highest annual quota set at 117 lions and the lowest at 55 lions (DNPW 2016). The quotas were generally based on the previous year's lion quotas and, in some cases, the quotas were a fixed part of a concession agreement (DNPW 2016). However, DNPW did not completely identify the basis for these quotas or how they were distributed. Currently, quotas are based primarily on lion populations determined through aerial surveys (DNPW 2016). However, information obtained from ground counts, patrol sightings, local and expert opinion, and hunting monitoring is also used. CRBs use the information they have collected to determine what the GMA quota should be. Their proposal is submitted to DNPW for approval. Once a proposal is received, DNPW accepts feedback from field staff and safari hunting outfitters, as well as the hunting guidelines (below), before the quotas are approved by the Wildlife Conservation and Management Unit and distributed by their Licensing Unit. The quotas are then distributed to the CRBs and hunting companies. DNPW is required to share the approved quotas with other government agencies, including the Auditors General Office and Anti-Corruption Commission. For 2016, Zambia established a quota of one lion per hunting concession, for a total quota of 24 lions (2 hunted on OGRs and 22 hunted in GMAs). Quotas are set for individual hunting blocks within the GMAs.

Hunting Guidelines:

The Zambia's Conservation Strategy and Action Plan for the African lion was developed in 2010 and designed with a 10-year plan (DNPW 2016). The purpose of the plan is to gain stakeholder participation while using adaptive management practices when addressing concerns regarding scientific management, habitat protection, and human-lion conflicts. Based on the principles of the Action Plan, following the three-year moratorium, in 2016, DNPW consulted independent lion experts and held a workshop that resulted in the creation of hunting guidelines (DNPW 2016). The guidelines are considered part of an adaptive process to manage lion hunting in Zambia. DNPW is in the process of transforming the guidelines into a statutory law that will include provisions for monitoring lion hunting through an age-based system (DNPW 2016). The lion hunting guidelines include, but are not limited to, the following recommendations:

1. No hunting of female lions.
2. No hunting of any lion born or held in captivity.
3. No use of pre-recorded sounds in lion hunting.
4. No lion hunting on fenced game ranches.
5. Lions should only be hunted in Prime and Secondary areas and Open Game Ranches known to be rich in lion and prey.
6. Establishment of a place for trophy measurements of hunted lions for exports should be established.
7. DNPW shall establish a lion aging evaluation committee that will include representatives from the Professional Hunters Association, the Safari Operator Association, the Wildlife Producers Association, and officers from DNPW that are nominated by the director. Prior to issuing CITES permits, the committee shall meet once a year to establish the age of hunted lions.

DNPW has established age-based categories that divide lion hunting into four age-based categories: Category 1 consists of male lions between five and six years old and above; Category 2 consists of male lions older than four years old, but younger than five years old; Category 3 consists of male lions that are younger than four years old; and Category 4 consists of male lions seven years old or older. DNPW has determined that only male lions that are five years and older should be hunted. However, DNPW may authorize the export of Category 2 male lions so as not to penalize the hunter. Lions that are less than four years old will be confiscated and may not be exported. In cases where lions under five years old are taken, however, the professional hunter and the safari outfitter may be penalized (Becker 2017 per. comm.).

Wildlife officers must also accompany hunters on all hunts (DNPW 2016). The officer is responsible for recording hunt activities on specified forms such as the Safari Hunting Monitoring form and Trophy Measurement form. The officer endorses licenses to ensure that they are not used more than once and the officer also ensures that all harvested trophies are registered (DNPW 2016).

Hunting-generated Revenue:

DNPW receives revenue by charging GMA fees per lion hunt. They also receive funds from annual professional hunter fees, certificate of valuation of trophies fees, certificate of ownership of trophies fees, permit fees, handling fees, and CITES security stamp fees. Hunting license fees in Zambia are statutory. The foreign hunter looking to take a lion must pay the fee directly to the outfitter, with the minimum amount currently set at \$4,200. DNPW collects these fees from the outfitter/concession and does not deal with the foreign hunter directly. Therefore, the outfitter may choose to charge the foreign hunter any amount greater than \$4,200. The revenue generated from license fees (also referred to as Animal fees by DNPW) is mandated to be shared with CRBs under the Zambia Wildlife Act No. 14 of 2015. The fees are shared with CRBs and DNPW as follows:

License fees (animal fees):

- 5% of funds go to the CRB chief/leader.
- 45% of funds go to CRB community funds.
 - According to Zambia's "Guideline on the use of Community funds accrued from wildlife management", 45% of these community funds should go to wildlife protections and patrols, 35% should go to community projects such as constructing clinics, roads, schools, and wells, and 20% of the funds should go towards CRB administration costs.
- 50% of funds go to DNPW (mandated under the Zambia Wildlife Act No. 12 of 1998 and continued in the Wildlife Act) in the form of conservation funds, including, but are not limited to: scout/wildlife officer salaries, resource protection, consultancy and legal fees, animal surveys, staff training, administrative and operational expenses, repair and maintenances, and other conservation expenses.

According to Zambia's hunting guidelines, hunts involving lions are required to be a minimum of 16 days (DNPW 2016). A daily conservation fee of \$150 per hunter and \$100 per observer is collected for monitoring purposes (DNPW 2016). These daily hunt fees typically cover combined hunt packages that include hunting lion, along with other species such as hippos and impalas. The fees are allocated by percentages to CRBs and DNPW as follows:

Daily fees (Concession fees):

- 5% of funds go to the CRB chief/leader.
- 15% of funds go to CRB community funds.
 - Based on recommended guidelines, 45% of these community funds go to wildlife protections and patrols, 35% goes to community projects such as constructing clinics, roads, schools, and wells, and 20% of the funds go to CRB administration costs.
- 80% of funds go to DNPW in the form of conservation funds, including, but are not limited to: scout/wildlife officer salaries, resource protection, consultancy and legal fees, animal surveys, staff training, administrative and operational expenses, repair and maintenances, and other conservation expenses.

Hunting fees for all species accounted for 32% of revenues that DNPW received during 2010 - 2012. However, that amount was reduced to about 4% during the 2013 and 2014 moratorium (DNPW 2016). Safari hunting also creates other revenue for Zambia, through activities such as tipping, eating in restaurants, staying at lodges, purchasing souvenirs, and paying for taxidermy.

Evaluation:

As stated earlier, the Service will evaluate any application in accordance with our threatened species permitting regulations at 50 CFR 17.32 and issuance criteria for endangered species permits (50 CFR 17.32(a)(2)). In evaluating each of these criteria on the basis of information available to the Service, we have been able to determine that this import of the wild lion trophy would qualify for the issuance of the required import permit.

17.32(a)(2)(i): Whether the purpose for which the permit is required is adequate to justify removing from the wild or otherwise changing the status of the wildlife sought to be covered by the permit:

In evaluating this criterion, the Service assesses whether the hunting program established for lions has demonstrated the ability to contribute toward positive conservation outcomes that mitigate or improve the status of lions throughout their range within Zambia, while addressing the main threats of habitat loss, human-lion-livestock conflict, and prey depletion.

The IUCN's 2012 Guiding principles on trophy hunting support the concept that hunting can provide a conservation benefit if it is part of a governance system that provides both implementation and enforcement at a level that adequately supports conservation. The Service also believes that conservation hunting can assist the wild lion populations if managed well. Lion hunting, if managed properly, could meet the Service's enhancement criteria under the Act. There must be adequate information and data clearly showing that removing lions from the wild for trophy hunting will be done at a level and with sufficient oversight such that it improves the current status of lions in the wild (50 CFR 17.32).

Zambia has demonstrated their desire to maintain the long-term conservation of their lion population with their 2013-2015 moratorium on lion hunting. When the Zambian government realized that population numbers were declining to an unsustainable level, they applied the

moratorium for 3 years, until they determined that their lion population increased enough to tolerate limited offtakes (DNPW 2016).

As mentioned in the sections above, the Zambian government has clarified that they have established block quotas by surveying lion populations through a combination of aerial surveys and information obtained from ground counts, patrol sightings, local and expert opinion, and hunting monitoring. Because surveys are continually being carried out on the current population of lions in Zambia, future findings will consider updated population data. Therefore, the Service will need to continue to monitor the effectiveness of new lion surveys that contribute to determining the population status of lions in correlation with hunting block quotas.

The difference in male turnover between hunting/non-hunting periods is apparent from cub survival rates. Macdonald (2016) reports that in the absence of hunting, 80% of cubs survived to one year of age, during the trophy hunting period, 66% of cubs survived to one year of age. The principle behind restricting trophies to older males is that their tenure in the pride should have been long enough to raise at least one generation of cubs to adulthood. However, lion experts have come to varying conclusions regarding the minimum age recommended for sustainable lion hunting. Creel *et al.* (2016), not only state that the minimum hunting age should be 7-8 years old, but they also conclude that age-restricted harvesting is not sufficient to yield sustainability by itself. However, other experts believe that the sustainable age of lions is five years and older, provided that proper identification/aging can occur before the animal is harvested. Nonetheless, lion experts are in consensus that hunting lions younger than five years old may not be sustainable. Zambia's recommended hunting guidelines are in line with the minimum age of five-year-old lions, but the Service is concerned that allowing for the export of lions under this age (Zambia allows export of four-year-old lions, but not less than four years old) may not be sustainable. Zambia will need to closely monitor the number of exports of "under age" trophies to determine if there are sufficient disincentives to discourage taking such animals.

The Zambian government has done a good job of identifying how resources from hunting-generated revenue would be shared with communities. The local communities receive funds from concessions and license (animal) hunting fees. As outlined in the license fee distribution above, 35% of the funds allocated to CRBs help support community projects such as constructing clinics, roads, schools, and wells, thereby providing incentives for the local community to ensure the long-term conservation of the lions. In addition, 45% of the CRB license fees go to wildlife management, including resource protection and patrols.

Zambia's human population growth has contributed to conflicts within the GMAs. As clarified above, DNPW contributes 50% of the license fees (animal fees) and 20% of the Concession fees to local communities. These financial benefits received from living in a GMA have provided incentives for newcomers to illegally squat in the GMAs looking to capitalize on the financial benefits. Consequently, the illegal squatting has caused enough conflict with local people to trigger action to be taken by the Zambian government. In August of 2015, over 2,000 squatter households within the Mumbwa GMA were evicted so that the registered local communities could receive the full benefits of living within a conservation area (DNPW 2016). The long-term impacts of the eviction will need to be considered in future findings, as the information becomes available.

Therefore, based on the information available to the Service and considering that the lion to be imported was harvested in compliance with Zambian laws and regulations, we conclude that the

purpose for which a permit is being requested is adequate to justify removing the sport-hunted trophy lion from the wild or otherwise changing its status.

17.32(a)(2)(ii): The probable direct and indirect effect that issuing the permit would have on the wild populations of the wildlife sought to be covered by the permit:

As described under Current Lion Status in Zambia above, Zambia has taken great strides to address the major threats facing lions through their hunting program and updated regulations. In 2010, Zambia developed a ten-year Conservation Strategy and Action Plan for the African lion. Since the establishment of the Action Plan, the Zambian government has cooperated with partners to implement the strategy (DNPW 2016). Monitoring, local community benefits, human lion-conflict, and land use planning are only some of the benefits of the Action Plan (DNPW 2016). The development of the Community-Based Natural Resource Management Unit has helped facilitate Zambia's economic and social well-being by providing technical support to CRBs, training of village scouts and CRB members, and monitoring the use of funds disbursed to the CRBs. An investigative unit also carries out investigations related to wildlife crimes. Furthermore, the President of the Republic of Zambia has also directed the Defense security wings in the country to join in the fight against poaching.

Taking into account that the off-take of wild lions is currently being monitored by the Zambian government, that the government of Zambia is implementing an age-based harvest strategy and a precautionary quota, and that the government of Zambia's management of lions provides community benefits, Mr. Asal's hunting and subsequent import of this lion provides an indirect benefit to wild populations by helping to support the reserves where lions are found. Therefore, based on the information available to the Service, the probable direct and indirect effect that issuing an import permit for this legally hunted lion would have on the species would be positive.

17.32(a)(2)(iii): Whether the permit, if issued, would in any way, directly or indirectly, conflict with any known program intended to enhance the survival probabilities of the population from which the wildlife sought to be covered by the permit was or would be removed:

We are not aware of any programs intending to enhance the survival of lions in Zambia that would conflict with Zambia's management plan. However, we are aware of the Zambian Carnivore Programme (ZCP), which is a non-profit Zambian registered trust that is dedicated to conserving large carnivore species and the ecosystems they reside in. The program works to build capacity within local Zambian organizations and government bodies for the sustainable conservation of large carnivores and herbivores, their ecological functions, and their habitats. Therefore, based on the information available to the Service, the issuance of an import permit for this legally hunted wild lion would not conflict with any known conservation program for the species.

17.32(a)(2)(iv): Whether the purpose for which the permit is required would be likely to reduce the threat of extinction facing the species of wildlife sought to be covered by the permit:

In evaluating this criterion, the Service assesses whether the hunting program established for lions is subject to a governance structure that clearly allocates management responsibilities and supports regulatory pathways in support of positive conservation outcomes. Zambia's lion management

program is based on a precautionary quota, an age-based harvest with monitoring of off-takes, and direct community benefits (DNPW 2016).

Currently, per Zambia's approved budget, DNPW retains all revenue from sport hunting. 50% of animal fees and 80% of concession fees are allotted to DNPW as conservation funds. This funding source is vital to lion conservation because it supports on-the-ground conservation, protected area management, and enforcement efforts. Additionally, 45% of animal fees and 15% of concession fees go to communities where the hunts take place. As long as communities continue to benefit from the sport hunting of lions through job opportunities, funded community projects, and sharing of meat derived from hunting, they may have the incentive to protect it.

Given that lion management in Zambia allows limited, controlled off-take of lions in a manner that mimics natural processes and provides community benefits, the legal hunt undertaken by Mr. Asal will contribute to reducing the threat of extinction of lions in Zambia. The utilization of hunters, such as Mr. Asal, in managing the lion populations in GMAs and OGRs is an important element of the success of lion management in Zambia.

Therefore, based on the information available to the Service, the purposes for which this import permit would be issued would likely reduce the threat of extinction facing lions in Zambia.

17.32(a)(2)(v): The opinions or views of scientists or other persons or organizations having expertise concerning the wildlife or other matters germane to the application:

As with any discussion of hunting, there are numerous opinions on the impact that hunting has on a species. From reviewing comments made during the listing process for lions, as well as information obtained through personal conversations and literature, there is general agreement that hunting, done properly and well managed, would not have an adverse effect on lion populations. Mimicking natural processes within the management program, such as maintaining pride hierarchy for as long as possible by leaving the alpha male in place, will better ensure the long-term survival of the species. Numerous researchers have stated that, while they may not support hunting in general, they see that benefits can be obtained through a science-based hunting program for lions. There have been a large number of comments from some NGOs and the public opposing hunting any lions, but particularly captive-bred lions. This opposition, however, is primarily based on the perceived ethics of hunting. While these comments are an indication of concerns from some members of the public over hunting, they are not germane to our review process.

Therefore, based on the information available to the Service, there is general support from scientists and other persons or organizations having expertise concerning lions that the legal well managed, science-based harvest of lions, and the subsequent import of these trophies, would not have an adverse effect on the species, but would further efforts to conserve the species in the wild into the future.

17.32(a)(2)(vi): Whether the expertise, facilities, or other resources available to the applicant appear adequate to successfully accomplish the objectives stated in the application:

Examining whether adequate resources exist, the Service relied primarily on information provided by Zambia (DNPW 2016). The long-term survival of lions in Zambia, is directly tied to the economic and ecological success of the country. When ZAWA became a semi-autonomous agency,

they struggled with funding to provide for adequate staffing and fulfillment of lion conservation objectives. However, after transforming back to a government agency, DNPW (formerly ZAWA) has been able to ensure that staff are adequately resourced and paid by Zambia's government, while retaining funding generated from sport hunting, as per the approved budget for the country. This ability to deliver on conservation objectives is improved with funding provided by U.S. sport hunters such as Mr. David Asal.

Therefore, based on the information available to the Service, the applicant undertook a legal, authorized hunt, abiding by management practices in accordance with the government of Zambia's laws and regulations, having the expertise, facilities, and other resources available to him to successfully accomplish the objective stated in the application.

Conclusion

Given the current status of lions within Zambia and the level of management and oversight provided to lions, it appears that the harvest and import of this lion as a sport-hunted trophy meet the purposes of the Act. Zambia's ongoing adaptive management and limited off-take of lions is important to the survival of lions in Zambia.

Therefore, with the information currently available to the Service and in accordance with the issuance criteria laid out above, the Service is able to make a determination that the import of this wild lion will enhance the propagation or survival of the species. Therefore, the Service is able to **authorize the import of one male wild lion trophy taken in Zambia, to David Asal.**

FARMVILLE, VA (b) (6)
U.S.A.

Authority: Statutes and Regulations: 50 CFR 17.40(r).

Location where authorized activity may be conducted:
IMPORT THROUGH ANY PORT LISTED IN 50 CFR 14.12

Reporting requirements: Not applicable

Authorizations and Conditions:

- A. Authorized to import the sport-hunted trophy of one male African lion (*Panthera leo melanochaita*), taken in Zambia for the purpose of enhancement of the survival of the species.
- B. Specimen may not be sold or transferred for any financial remuneration.
- C. Trophy must have been taken during the 2018 hunting season.
- D. Trophy must be accompanied by valid hunting authorization issued by the government of Zambia for the 2018 season.
- E. Trophy must be accompanied by a valid Convention on International Trade in Endangered Species (CITES) Appendix II export permit/re-export certificate, source code "W", issued by the Management Authority of the exporting/re-exporting country.
- F. General conditions set out in Subpart D of 50 CFR 13, and specific conditions contained in Federal regulations cited above, are hereby made a part of this permit. All activities authorized herein must be carried out in accord with and for the purposes described in the application submitted. Continued validity, or renewal of this permit is subject to complete and timely compliance with all applicable conditions, including the filing of all required information and reports.
- G. The validity of this permit is also conditioned upon strict observance of all applicable foreign, state, local, tribal, or other federal law. This permit can be photocopied.
- H. Valid for use by permittee named above.
- I. Acceptance of this permit serves as evidence that the permittee understands and agrees to abide by the "General Permit Conditions" (copy attached).

Type of Activity

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1 a. Last Name <i>Costa</i>	1 b. First Name <i>Lawrence</i>	1 c. Middle Initial (b) (6)	1 d. Suffix
2. Date of Birth (mm/dd/yyyy) (b) (6)	3. Telephone Number	3 a. Alternate Telephone Number	4. E-mail Address

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1 a. Name of business, agency, Tribe, or institution		1 b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4 a. Principal officer Last name	4 b. Principal officer First Name	4 c. Principal officer Middle name/initial	4 d. Suffix
5. Principal officer title		6. Primary contact name	
7 a. Business telephone number	7 b. Alternate telephone number	7 c. Business fax number	7 d. Business e-mail address

Section C: All applicants complete address information

1 a. (b) (6)				
1 b. City <i>Nottingham</i>	1 c. State <i>NH</i>	1 d. Zip code/Postal code (b) (6)	1 e. County/Province	1 f. Country <i>USA</i>
2 a. Mailing Address (include if different than physical address, include name of company) (b) (6)				
2 b. City <i>Nottingham</i>	2 c. State <i>NH</i>	2 d. Zip code/Postal code (b) (6)	2 e. County/Province	2 f. Country <i>USA</i>

Section D: All applicants MUST complete

<p>1. Attach the nonrefundable application processing fee in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies are exempt from the processing fee-- attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].</p> <p>2. Certification: I hereby certify that I have read and am familiar with the regulations contained in <i>Title 50 Part 13 of the Code of Federal Regulations</i> and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.</p>	<p><i>[Signature]</i> Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures)</p> <p><i>4/18/2018</i> Date of signature (mm/dd/yyyy)</p>
<p>Please continue to next page</p>	

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least 90 days for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Lawrence Costa
(b) (6)

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Rumford, ME (b) (6)
(b) (6)

- 3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

NA

- 4. For each trophy to be imported, provide:

- a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
 - b. Sex (if known).
- African Elephant - *Loxodonta africana*

- 5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

NA

- b. Date wildlife is to be hunted:

NA

- c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

NA

- 6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

Bwabwata National Park East GPS S 17° 41.998
Kongolia Tanzania E 023° 22.041

- b. Date wildlife was hunted:

8/31/17 - 9/12/17

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

*Ndumo Lodge, Kalambozo, Zambezi Region Namibia
Poot Hunter Karl Stompke*

d. The current location of the trophy (address and country) (the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document):

*Titus Schmidt
The Yellow Shark Holdings (PTY) LTD Olympia - Windhoek
Managing Director PO Box 81413 +264 (0)61 304030
Republic of Namibia*

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). *see Attached*

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: *Titus Schmidt*
Business Name: *The Yellow Shark Holdings (PTY) LTD*
Address: *PO Box 81413*
City: *Olympia - Windhoek*
State/Province: *Namibia*
Country, Postal Code: *Namibia*

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

NO

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

see attached

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

NO

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

- 10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

- 11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature:  Date: 9/18/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

- 12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Signature (in blue ink) of applicant/person responsible for permit (No photocopied or stamped signatures) Lisa J. Penner	Date of signature (mm dd/yyyy) 2/25/2018

E. IMPORT OF SPORT-HUNTED BONTEBOK TROPHIES from South Africa

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form, (3-200-52), <http://www.fws.gov/international/permits/by-form-number/index.html> and return your original permit with that form.

Note 2: The bontebok is listed as endangered under the Endangered Species Act. Applications for endangered species permits must be published in the Federal Register for a 30-day public comment period. Allow at least **90 days** for the application to be processed.

Note 3: This application can only be used if you have hunted/will be hunting in **South Africa**. If you have or will be hunting in a different country, please use form 3-200-20: <http://www.fws.gov/international/permits/by-form-number/index.html>

Note 4: USFWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during a sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you submit, indicate the application question number you are addressing. If applying for more than one trophy, be sure to indicate which trophy is addressed in each response.

1. How many Bontebok (*Damaliscus pygargus pygargus*) are you applying to import? Quantity: 1

2. At the time of the application, if bontebok is:

Alive, a. What is the approximate date of proposed take? n/A

Dead, b. What is the date you took the animal? 5/24/2017

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks). fullskin & skull

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export documents]:

3. ENTER the name and address of the landowner on whose property the bontebok was or will be taken:

Name

Street address

City/Province

Country, Postal Code

Universal Trophies
Platt 114, Bashewar
Pretoria, South Africa
Julian Petrus Theron
Jules of the Karoo Sabie
P.O. Box 683
De Aar South Africa

Please be aware that the bontebok is listed in Appendix II of CITES. As such, you must obtain a CITES export permit from South Africa. If you are not exporting the trophy from South Africa directly to the United States, you will need to obtain a CITES Re-export certificate from the re-exporting country.

4. a. Attach a signed statement from the landowner giving you permission to cull a bontebok from their captive herd. *see attached*
- b. If available, provide a copy of the landowner's Certification of Registration for the bontebok herd. (Note: this is not a copy of the export permit or certificate issued by a South African province.) In order to meet the criteria for a permit under the Endangered Species Act, the bontebok must be culled from a ranch that has been certified by the Government of South Africa under their bontebok program. If the ranch is not registered, we may be unable to issue an import permit.

5. Complete name and address of overseas person or business shipping the trophy to you (this name will appear on the face of the permit).

Name

Street address

City/Province

Country, Postal Code

*Universal Trophies
Plot 116
Bashewa
Preterea South Africa*

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. If you are a broker or taxidermist applying on behalf of a foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy(ies) to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit).

Taxidermist/Broker's signature:

Sisa Jant

Date:

2/25/2018

7. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy(ies) to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit).

Applicant's signature: _____

Date: _____

Be aware that there may be additional permitting or approval requirements by your local or state government, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist you, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Chicago

AE

9. Name and address where you wish permit mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

1500 Midway Crt, Ste W201 Elk Grove Village IL 60007

DHL CAA

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please state check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

*Lisa Jamnik lisaj@dchb.com
847-690-0699*

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

KNOW ALL MEN BY THESE PRESENTS: That, Ray Penner doing business as an INDIVIDUAL under the laws of the State of Kansas residing or having a principal place of business at [redacted] No. Newton, Ks hereby constitutes and appoints D&L CHB, LLC its officers, employees, and/or specifically authorized agents, to act for and on its behalf as a true and lawful agent and attorney of the grantor for and in the name, place and stead of said grantor, from this date, in the United States (the "territory") either in writing, electronically, or by other authorized means, to:

Make, endorse, sign, declare, or swear to any customs entry, withdrawal, declaration, certificate, bill of lading, carnet or any other documents required by law or regulation in connection with the importation, exportation, transportation, of any merchandise in or through the customs territory, shipped or consigned by or to said grantor;

Perform any act or condition which may be required by law or regulation in connection with such merchandise deliverable to said grantor; to receive any merchandise;

Make endorsements on bills of lading conferring authority to transfer title; make entry or collect drawback; and to make, sign, declare, or swear to any statement or certificate required by law or regulation for drawback purposes, regardless of whether such document is intended for filing with U.S. Customs and Border Protection;

Sign, seal, and deliver for and as the act of said grantor any bond required by law or regulation in connection with the entry or withdrawal of imported merchandise or merchandise exported with or without benefit of drawback, or in connection with the entry, clearance, lading, unloading or navigation of any vessel or other means of conveyance owned or operated by said grantor, and any and all bonds which may be voluntarily given and accepted under applicable laws and regulations, consignee's and owner's declarations provided for in section 485, Tariff Act of 1930, as amended, or affidavits or statements in connection with the entry of merchandise;

Sign and swear to any document and to perform any act that may be necessary or required by law or regulation in connection with the entering, clearing, lading, unloading, or operation of any vessel or other means of conveyance owned or operated by said grantor;

Authorize other Customs Brokers duly licensed within the territory to act as grantor's agent; to receive, endorse and collect checks issued for CBP duty refunds in grantor's name drawn on the Treasurer of the United States; if the grantor is a nonresident of the United States, to accept service of process on behalf of the grantor;

And generally to transact Customs business, including filing of claims or protests under section 514 of the Tariff Act of 1930, or pursuant to other laws of the territories, in which said grantor is or may be concerned or interested and which may properly be transacted or performed by an agent and attorney;

Giving to said agent and attorney full power and authority to do anything whatever requisite necessary to be done in the premises as fully as said grantor could do if present and acting, hereby ratifying and confirming all that the said agent and attorney shall lawfully do by virtue of these presents;

This power of attorney to remain full force and effect until revocation in writing is duly given to and received by grantee (if the donor of this power of attorney is a partnership, the said power shall in no case have any force or effect in the United States after the expiration 2 years from the dates of its execution);

Grantor acknowledges receipt of D&L CHB, LLC Terms and Conditions of Service governing all transactions between the Parties.

If the Grantor is a Limited Liability Company, the signatory certifies that he/she has full authority to execute this power on behalf of the Grantor.

IN WITNESS WHEREOF, the said Ray Penner caused these presents to be sealed and signed: (Signature) Ray Penner

(Capacity) N/A Date: 12/5/11

Witness: (if required) N/A

If you are the importer of record, payment to the broker will not relieve you of liability for CBP charges (duties, taxes or other debts owed CBP) in the event the charges are not paid by the broker. Therefore, if you pay by check, CBP charges may be paid with a separate check payable to "U.S. Customs and Border Protection" which shall be delivered to CBP by the broker. Importers who wish to utilize this procedure must contact our office in advance to arrange timely receipt of duty checks.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit to the address on page one.**

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form ([3-200-52](#)) and return your original permit with that form.

Note 3: *Sport-hunted trophy* is defined at [50 CFR 23.74](#) as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 4: Certain hunting trophies, including leopard and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

- **Complete all questions on the application.**
- **Mark questions that are not applicable with "N/A".**
- **If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.**
- **If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.**

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Cherish Senrud

(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

a. Leopard (*Panthera pardus*) Quantity: _____ (Limited to the import of two per calendar year). If you wish to import a leopard taken in northern or western Africa, please use form 3-200-20.

b. Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia
Quantity: _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use Form 3-200-20).

c. African Elephant from Zimbabwe Quantity: 1 (2 tusks)

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, Please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE ANIMAL HAS ALREADY BEEN TAKEN, please enter the following:

d. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Makuti Pool, Mashonaland West
Harare, Zimbabwe

e. Date wildlife is to be hunted:

09-01-2014 to 09-14-2014 (animal already harvested)

f. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Warren Thorn

g. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

National Parks (ZPWMA)
P.O. Box CY 140, Causeway, Harare, Zimbabwe

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you.

- a. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: National Parks (ZPWMA)
Business Name:
Address: P.O. Box CY 140 Causeway
Address:
City: Harare, Zimbabwe
State/Province:
Country, Postal Code:

CERTIFICATION STATEMENT (original signature must be provided for either 9 or 10 below)

9. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

10. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature:  (b) (6) Date: 4-03-2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

11. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from [the list of designated ports](#). If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but are unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 2: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 3: USFWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Note 4: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-5 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Panthera Pardus/ African Leopard

b. Sex (if known).

Male

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:

a. Country and PLACE (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

NA

b. Date wildlife is to be hunted:

NA

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks).

NA

3. **IF THE ANIMAL IS DEAD**, please enter the following:

a. Country and PLACE (area, region, GIS coordinates, ranch AND nearest city) where wildlife was removed from the wild (provide a map if possible):

Muanza, Mozambique

b. Date wildlife was hunted:

September 10, 2016

- c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks).

Skin, Skull

- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export documents]:

BULL'S EYE TAXIDERMY, Open season farm, Corner Melkrivier and Sterkstroom road, Vaalwater 0530, South Africa

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will also appear on your Namibian export permit and must match the U.S. import permit].

Name: BULL'S EYE TAXIDERMY, Open season farm, Corner Melkrivier and Sterkstroom road,
Business Name: Vaalwater 0530, South Africa
Address:
Address:
City:
State/Province:
Country, Postal Code:

5. Please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., population status or trend data; how the funds from license/trophy fees will be spent; what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. If you are a broker or taxidermist applying on behalf of a foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year (if applicable). In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature:  _____ Date: 12/20/2017

Be aware that there may be additional permitting or approval requirements by your local or state government, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist you, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish permit mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Cap Jones (b) (6)

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at **50 CFR 23.74** as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- (1) Is raw, processed, or manufactured;
- (2) Was legally obtained by the hunter through hunting for his or her personal use;
- (3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- (4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: 1 (Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: n/a (Import is limited to two per hunter per calendar year)
Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: n/a (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
 - a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

 - b. Date wildlife is to be hunted:

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild:

Tanzania GIS coordinates S. 04deg 18.116 E.031 deg 38.943 Sept 23, 2017

b. Date wildlife was hunted:

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

Skin, skull, claws for life size mount

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

East Africa Trophy Hunters Ltd Farm 604 Kirani, Arumeru Dist Arusha Tanzania

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business East Africa Trophy Hunters Ltd
Name: Address: P.O. Box 34169
Address: Dar es Salaam
City: Tanzania
State/Province:
Country, Postal Code:

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national**, provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ **Date:** _____

7. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: Steven Travis Date: 11/2/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your proposed activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):
Steven Travis 713-494-9929 steven.travis@gmail.com

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

Re: Applications for Permits to Import Sport-Hunted Trophies

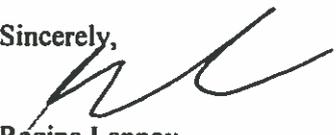

Dear Acting Chief:

Enclosed please find three applications for permits to import sport-hunted trophies.

- The first applicant is hunting an elephant on a Game Management Area in Zambia. Funds from the hunting are used for community support and anti-poaching. Fifty percent of the animal fees are directly shared with the resident community, and at least 50% of the harvested game meat is shared with the community. This area maintains healthy populations of elephant and other species. Please consider the enclosed information and information in the DMA's files regarding the benefits of elephant hunting in Zambia, including the Non-Detriment Findings and responses to information requests, in making a positive enhancement finding for this applicant.
- The second applicant is hunting a lion in the Lower Lupande Game Management Area in Zambia, with Werner van Noordwyk/Kwalata Safaris. That area has a healthy lion population. The company invests extensively in anti-poaching (>\$57,000/year), pays the salaries of community game scouts, and distributed \$27,500 in game meat to the community, among other things. The company is contractually bound to fund community projects of at least \$15,000/year. Please see the attached report, which was previously provided to the DMA. We will send an updated report soon. Please consider this report and other information received from Conservation Force and Zambian authorities and operators in making a positive enhancement finding for this applicant.
- The third applicant hunted an elephant at the Save Valley Conservancy in Zimbabwe. Conservation Force and Zimbabwe's Parks and Wildlife Management Authority have submitted extensive documentation about the healthy elephant population in SVC and the benefits generated by regulated hunting. Please refer to that information, including the October 2016 Non-Detriment Finding and January 2016 report (related to the African lion) and describing the SVC's strong wildlife management. Please also see the attached declaration from Wilfried Pabst. This declaration ended up not being submitted in court, but it remains a sworn statement that reflects the healthy elephant population at SVC. Please consider all this information in making a positive enhancement finding for this applicant.

Please do not hesitate to contact us if you have questions about these applicants or need further information.

Sincerely,

Regina Lennox

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my application for a permit to import a threatened-listed, wild-managed African Elephant.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my elephant trophy at the following address:

John J. Jackson, III
Regina Lennox

Type of Activity

IMPORT OF SPORT-HUNTED
TROPHIES
(Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. You may find instructions on how to make your application complete and help avoid unnecessary delays at the following link: .

Section A: Complete if applying as an individual

1.a. Last Name LESSIG	1.b. First Name JAMES	1.c. Middle Name/Initial (b) (6)	1.d. Suffix
2. Date of Birth (mm/dd/yyyy) (b) (6)	3. Telephone Number	3.a. Alternate Telephone Number	4. E-mail address

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax Identification No.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer last name	4.b. Principal officer first name	4.c. Principal officer middle name/initial	4.d. Suffix
5. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (b) (6)				
1.b. City LITTLETON	1.c. State COLORADO	1.d. Zip code/Postal code (b) (6)	1.e. County/Province	1.f. Country USA
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount identified on page 2, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee - attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)]	
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50 Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001	
Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures)	Date of signature (mm/dd/yyyy) 3/21/2018

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least 90 days for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

SAME

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

JIM LESSIG

(b) (6)

(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No

Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

LOXODONTA AFRICANA

b. Sex (if known).

MALE

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

ZAMBIA - LUAWATA HUNTING BLOCK
GPS CO-ORDINATES S12.40783 E032.17170

b. Date wildlife is to be hunted:

JULY 7, 2018 - JULY 20, 2018

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

SITATUNGA RANCHING & SAFARIS LIMITED

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

b. Date wildlife was hunted:

- c. Name of hunting outfitter, safari company, or professional hunter you hunted with:
- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: **ADIL DAYA**
 Business Name: **SITATUNGA RANCHING & SAFARIS LIMITED**
 Address: **P.O. BOX 39498, PLOT #7301, KAMBALA ROAD, LIGHT INDUSTRIAL A1**
 City: **LUSAKA**
 State/Province:
 Country, Postal Code: **ZAMBIA**

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted?

350-800 ELEPHANTS

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

? AMOUNT. THE COMMUNITY & GOVERNMENT RECEIVE PART OF THE FUNDS. COMMUNITY USES FUNDS TOWARDS IMPROVING SCHOOLS, CLINICS, ETC. GOVERNMENT & SAFARI OPERATOR USE FUNDS TOWARDS GAME MANAGEMENT, SCOUT SALARIES, REHAB OF ROADS & ANTI-POACHING.

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

THE SAFARI OPERATOR HAS EMPLOYED ADDITIONAL GAME SCOUTS FOR ANTI-POACHING & IS SOLELY FUNDED BY OPERATOR. THE OPERATOR SINKS BOREHOLES FOR THE COMMUNITY IN STRATEGIC LOCATIONS WITHIN THE COMMUNITY. THE OPERATOR GIVES MEALIE MEAL, CLOTHING & BLANKETS TO ABOUT 3,000 FAMILIES PER YEAR

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

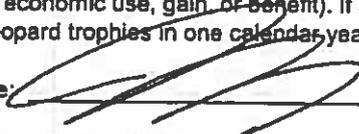

- 10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

- 11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature:  _____ Date: 3/21/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

- 12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from the list of designated ports. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted Lion trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

**IMPORT OF SPORT-HUNTED TROPHIES
(Appendix I of CITES and/or ESA)**

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual			
1.a. Last name Lines	1.b. First name James	1.c. Middle name or initial (b) (6)	1.d. Suffix
2. Date of birth (mm/dd/yyyy) (b) (6)	3. Telephone number	3.a. Alternate telephone number	4. E-mail address

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution			
1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (dba)	
2. Tax identification no.	3. Description of business, agency, Tribe, or institution		
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information					
1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (If Broker or Taxidermist is applying on behalf of a foreign national, provide Broker or Taxidermist's name and address in this block, U.S. hunters must provide their U.S. address) (b) (6)					
1.b. City Colleyville	1.c. State TX	1.d. Zip code/Postal code (b) (6)	1.e. County/Province	1.f. Country U.S.A.	
2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)					
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country	

D. All applicants MUST complete	
1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – attach documentation of fee exempt status as outlined in instructions. (50 CFR 13.11(d))	
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in <i>Title 50, Part 13 of the Code of Federal Regulations</i> and the other <i>applicable parts in subchapter B of Chapter I of Title 50</i> , and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.	
 Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures)	April 2, 2018 Date of signature (mm/dd/yyyy)

E. IMPORT OF SPORT-HUNTED TROPHIES (*Appendix I of CITES and/or ESA*)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least 90 days for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- (1) Is raw, processed, or manufactured;
- (2) Was legally obtained by the hunter through hunting for his or her personal use;
- (3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- (4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

-
1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

 2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?
James Lines (b) (6)

 3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No X Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Panthera, Panthera leo, P. l. melanochaita, Lion

b. Sex (if known). Male

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Lower Lupande Game Management Area, Mfuwe, Eastern Province, Luangwa Valley, Zambia

b. Date wildlife is to be hunted: August 6 - August 13, 2018

b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

WH van Noordwyk

6. **IF THE TROPHY HAS ALREADY BEEN TAKEN**, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

b. Date wildlife was hunted:

b. Name of hunting outfitter, safari company, or professional hunter you hunted with:

c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). This animal has not been hunted yet.

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Sando Sinkala

Business Name: BRIDGE SHIPPING ZAMBIA LIMITED

Address: VILLA PARK, PLOT 177/178 UNIT C3 LUANSHYA, ROAD

City: LUSAKA

State/Province: LUSAKA PROVINCE

Country, Postal Code: ZAMBIA 10101

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted?

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

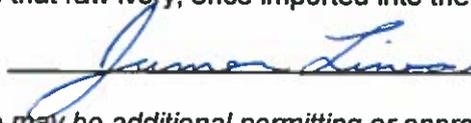

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that my client may only import two leopard trophies and two elephant trophies within the same calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that I may only import two leopard trophies and two elephant trophies within the same calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature:  Date: April 2, 2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

KWALATA SAFARIS, LTD.
Address, 6980 KATANGA ROAD LUSAKA
Operator email: kwalatapeter@yahoo.com

I. DESCRIPTION OF COMPANY AND CONCESSION

Kwalata Safari Company, Ltd. has been operating in Lower Lupande Concession since April 2002. The concession provides habitat for a range of species including buffalo, lion, hippo, kudu, leopard, elephant, impala, bushbuck, hyena, warthog, zebra, giraffe, and waterbuck. Our concession is about 1511 kilometer squared and is in the South Luangwa Safari Area. Lower Lupande is rated under Zambia Government Legislation as one of the Prime Hunting Blocks in Zambia due to the abundance of wild life and cats. We have a lease with the Wildlife Authority for seven years renewable which started in 2015 after the new allocations of hunting blocks in Zambia with the new Government.

The company is a partnership between Peter Chipman and Zaeed Patel and has been operational for more than fourteen years. We employ three professional hunters, four game trackers, ten anti-poaching scouts and eight camp staff (cooks, cleaning, miscellaneous). Altogether our operations support at least 100 dependents in local villages apart from the local employed camp staff and scouts.

We have a written concession plan with anti-poaching and community components.

II. ANTI-POACHING COMPONENT

Kwalata Safari Company maintains two five-man anti-poaching teams at an annual cost of over \$ 25000. Each team is equipped with a four-by-four vehicle, a motorbike, uniforms and boots, tents, rations, and a satellite phone. Our teams closely cooperate with the Wildlife Authority to conduct almost daily patrols of the concession and the border of the South Luangwa National Park. We supply rations at least twice per month to the government game scouts to ensure they are sufficiently equipped for the patrols as well as transport support and more over and above the above mentioned amount per year.

Our contract with the local community requires that part of the revenues paid to the community be used to fund at least six community game scouts, and additionally we supply rations at least twice per month to these scouts.

We heavily patrol our area, conducting approximately one patrol per day by vehicle and foot. In the past year, our teams picked up about 1000 snares, 40 gin traps, and two poisoned licks. Removing snares protects the lion and wildlife population by reducing incidental snaring. Over the past year we arrested more than ten poachers, confiscated three bicycles and five muzzle loaders from them, as well as recovered 14 weapons total. We found two elephant carcasses each having tusks removed, the bones of one impala, some evidence of illegal logging, and a Leopard with a snare wound.

If needed, we subsidize the government game scouts. Every month we provide one week's rations to support a dozen Wildlife Authority scouts and contribute \$ 500 in petrol to the Wildlife Authority.

We also send out road crews approximately every two weeks to check the condition of the roads in the concession, to ensure we are able to patrol effectively.

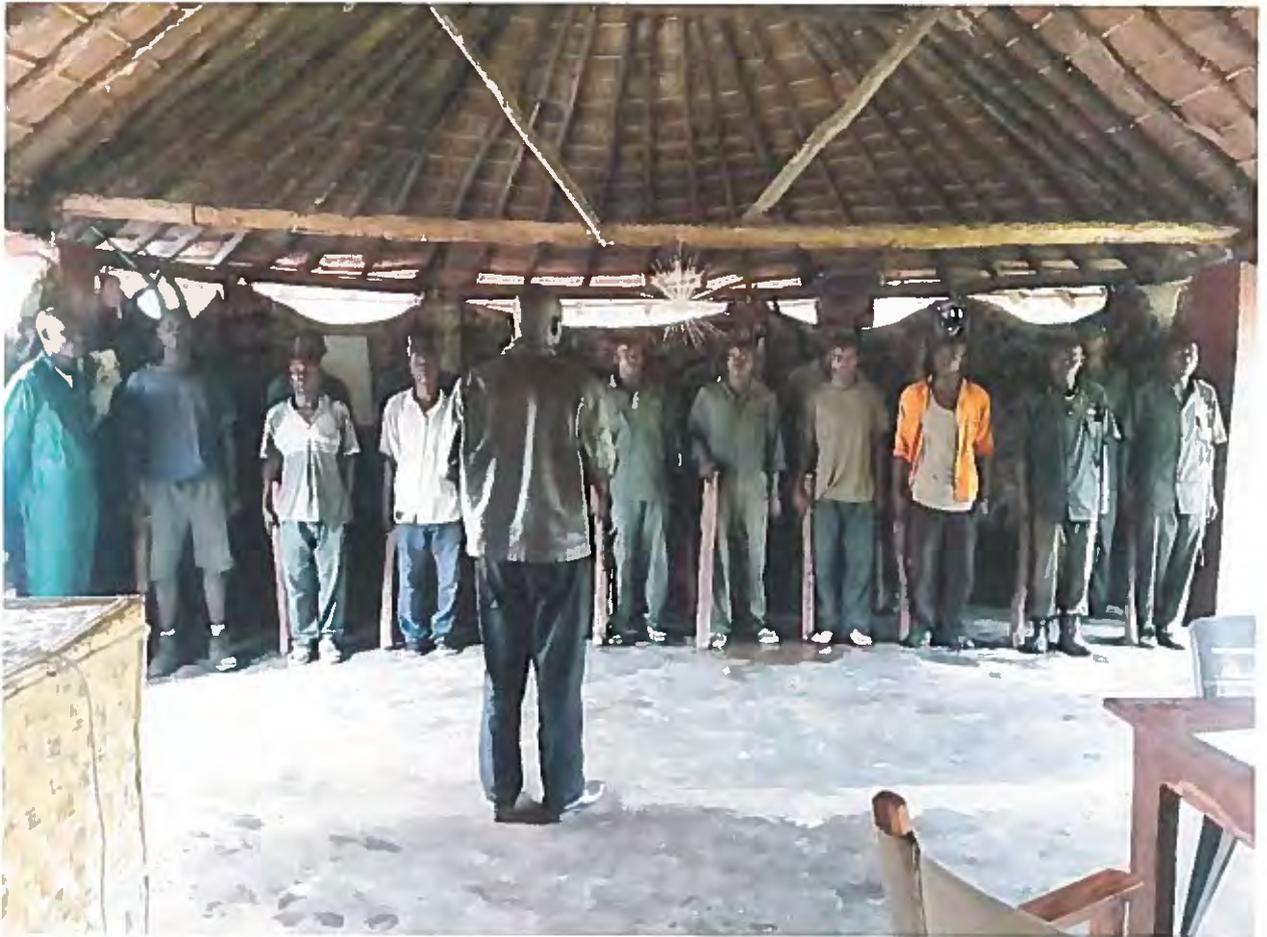

In the picture above wire snares recovered from poachers

In the picture above an elephant which was poached had its tusks removed

In the picture above a Leopard skin recovered from poachers by our vigilant game scouts.

In the picture above our Scouts being prepared to go on Patrols

In 2015 Kwalata Safari Company spent almost \$ 57400 in our blocks on anti-poaching patrols, equipment, and assistance to the Wildlife Authority and community scouts, including by providing 6000 liters of diesel for patrol vehicles. We recorded 363 patrol days and well above 2000 patrol hours. And made over \$ 4200 in payments of rewards. A breakdown of spending on anti-poaching is below.

Item	Spend (USD)	Notes
Scout salaries	18000	Directly paid and some subsidies to WA
Scout equipment	5000	Clothing, vehicles, rations, phones, tents, etc.
Diesel / petrol	7700	For scouts and WA
Rations for WA and community scouts	6500	
Micro light rental and fuel	16000	Including time donated to WA
Rewards	4200	For information and arrests
TOTAL	\$ 57400	

Our concession agreement requires that we have an anti-poaching program/plan and report about it to the Wildlife Authority. The Wildlife Authority considers our contributions in determining whether to renew the concession.

III. COMMUNITY PARTICIPATION

A. Community Assistance Component

We make contributions to the two closest villages which are Malama and Kakumbi.

We pledge an annual contribution of at least \$ 15000 in projects to each of two villages. And in return ask for a list of preferred projects of which we develop a work-plan in consultation with village leaders and citizens to fund and supply projects and require a measure of community contribution to each project either through a council donation or more frequently, through donations of time by workers. In 2015 we funded and supplied the following projects at each village's choice:

Village	Projects	Amounts (USD)
Village 1	Renovations of schools	18100
Village 2	Designing and constructing village office	3100
	Funding youth sports league including transport	1900
	Providing new equipment for village game scouts	800
	Paying teacher salary and school fees for poor children	6100
	Digging new borehole and building pump station	3500
		15400
	TOTAL	\$ 33500

In addition to these direct contributions, we pledge to distribute at least 50% of game meat harvested to the villages. The villages have the choice to eat the meat or sell it. In 2011 the value of this meat was \$ 30000. 2012 the value was \$ 33000. 2015 the value was \$ 27500.

Our concession agreement requires we have a community assistance program/plan and report on the program to the Wildlife Authority. The Wildlife Authority considers these contributions in determining whether to renew our lease.

B. Conflict Control

We also take reports from villagers about problem animals and do our best to keep elephant out of community gardens during harvest. We also maintain an approximately \$ 12000 fund of client donations which we use for community compensation. In 2015 we received 82 reports of problem animals and we made it through the entire season without a problem animal kill. We paid out \$ 2650 in compensation for lost livestock and crops.

IV. HABITAT PROTECTION AND CONSERVATION DEVELOPMENT

We have enhanced water infrastructure for wildlife in our concession by maintaining four pans to increase water supply and carrying capacity of the concession which gives allot of Antelope Species for Lion/Leopard food chain and habitat for their sustainable and healthy survival.

V. OTHER INFORMATION

A. Prey Base

Kwalata Safari Company's anti-poaching efforts, water provision, and fire management have allowed the lion prey base in our concession to grow over the past five years. We estimate that our Buffalo and Plains Game populations have shown an increase of 15-20% per annum. In 2014 our Wildlife Authorities flew over the Game Management Areas in a large-mammal survey and counted more than 1000 buffalo on average.

B. Lion Population Tracking

Lion are notoriously difficult to survey or census. To track the lion population trend in our concession, Kwalata Safari Company maintains a lion sightings record in form of camera pictures taken as well as trail camera pictures, sightings, spoor and footprints on individual, groups and passing through cats. Because we keep tabs on the lion in our concession, we are assured that the regulated, limited off take is sustainable. Our wildlife Authorities have also provided us with a data recording sheet to use on all Lion/Leopard Safaris as off 2015 to take record of sightings and record the activities on the specific safari being done. We have a 100% success on all our hunts.

C. Lion Aging Approach

Kwalata Safari Company has been following an age-based policy for African lion trophies since 2015, when we adopted this Policy after a mutual agreement with our wildlife Authorities and to be conservative in estimating age.

As a result of this, Lions have been passed up by a number of potential Lion before allowing a client to harvest a specimen that we have any doubt is of on age. We also don't allow any client to shoot a lion of which there is any doubt on the age limit if the lion looks anything less than 5 years of age but rather try and shoot a lion that looks more the like of more than 6 years of age.

In 2016, we successfully harvested mature (aged six or older) male lion up to our quota (of two). We have been able to harvest our full quota this year because our selectivity has resulted in more lion reaching an advanced age.

D. ELEPHANT HUNTING

Our Wildlife Authorities have put up a policy not to Harvest any Elephant that has its tusks weighing less than 15 kilograms. In view of this our Professional Hunters are instructed to not harvest an Elephant with weight in tusks of less than 20 kilograms at a minimum and to be very selective when Hunting Elephant by ensuring that they comply with this agreement. The wildlife authorities have put up stringent measures to any Professional Hunter who goes against this rule which may even include withdrawing his Professional Hunting License.

E. U.S. Hunters

Most of our clients are from the United States. These hunters have a conservation ethic and usually contribute above their fees to anti-poaching or our community compensation fund or community assistance programs.

CONCLUSION

Kwalata Safari Company's regulated, confirm that our sustainable-use based hunting program enhances the survival of the Lion and Elephant and we recognize that the Cat and Elephant hunts bought and booked by our American Clients contribute a higher percentage of income in the Safari Hunting and it is our obligation to share these finances with the communities who have played an important role to conserve this resource. We also realize that these species are a renewable resource and as such we will endeavor to provide suitable conditions for the reproduction and sustainability of these species with the allowance of our American Clients to keep coming and hunting the different species in Africa

Enhancement Finding
Applicant: James (b) (6) Lines (PRT-85336C)

James (b) (6) Lines submitted an application on April 10, 2018, for the importation of one male African lion (*Panthera leo melanochaita*) from Lusaka, Zambia for the purpose of enhancing the propagation and survival of the species in the wild. After evaluating the available information submitted with the application, information provided by the government of Zambia, other information available to the Service, and comments received from interested parties, the U.S. Fish & Wildlife Service (Service) has determined that the importation of the sport-hunted trophy taken August 6, 2018, through August 13, 2018, from this wild lion (*P. l. melanochaita*) population within Zambia meets the enhancement criteria under 50 CFR 17.32.

Governance of the Lion in the United States:

On October 29, 2014, the Service published in the Federal Register a finding that listing the African lion subspecies (*Panthera leo leo*) as a threatened species under the Endangered Species Act (Act or ESA) was warranted and proposed a rule under Section 4(d) of the Act to provide conservation measures for the African lion. (79 Fed. Reg. 64472.) On December 23, 2015, after fully considering the comments from the public and the peer reviewers on the proposed rule, the Service published in the Federal Register the final rule in which the taxonomic classification of the Asiatic lion (previously classified as *P. l. persica* and listed as an endangered species under the Act) was changed to *P. l. leo* (Asia and western, central and northern Africa) and listed as an endangered species, and the *P. l. melanochaita* (southern and eastern Africa) subspecies was listed as a threatened species with a rule under Section 4(d) of the Act, which is set forth at 50 CFR 17.40(r). 80 Fed. Reg. 79999. The effective date of this listing was January 22, 2016. Therefore, as of January 22, 2016, the lion subspecies *Panthera leo melanochaita*, whose range includes Zambia, is listed as threatened under the Act and is regulated under an ESA Section 4(d) special rule [50 CFR 17.40(r)].

Section 9 of the Act and our implementing regulations at 50 CFR 17.21 and 50 CFR 17.31 set forth

a series of general prohibitions that apply to all endangered and threatened wildlife, respectively, except where a 4(d) rule applies to threatened wildlife, in which case the 4(d) rule contains all the applicable prohibitions and exceptions. Under the 4(d) rule for *P. l. melanochaita*, all of the prohibitions under 50 CFR 17.31 apply to *P. l. melanochaita* specimens. These prohibitions, at 50 CFR 17.21 and 17.31, in part, make it illegal for any person subject to the jurisdiction of the United States to “take” (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or to attempt any of these) within the United States or upon the high seas; import or export; deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever, in the course of commercial activity; or sell or offer for sale in interstate or foreign commerce any lion specimens. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken in violation of the Act. Permits may be issued to carry out otherwise prohibited activities involving endangered and threatened wildlife species under certain circumstances. Regulations governing permits for endangered species, such as *P. l. leo*, are codified at 50 CFR 17.22. Regulations governing permits for threatened species, such as *P. l. melanochaita*, are codified at 50 CFR 17.32.

In sum, under paragraph 17.40(r)(1), all the prohibitions and exceptions under 50 CFR 17.31 and 50 CFR 17.32 apply to *P. l. melanochaita*. Accordingly, the Service may authorize the import of a sport-hunted lion trophy from Zambia, but only if it first makes a finding that permitting import of a trophy would enhance the survival of the species in the wild.

As we explained when finalizing the 4(d) rule for *P. l. melanochaita*, any person wishing to conduct an otherwise prohibited activity, including all imports of *P. l. melanochaita* specimens, must first obtain a permit under 50 CFR 17.32. As with all permit applications submitted under 50 CFR 17.32, the individual requesting authorization to import a sport-hunted trophy of *P. l. melanochaita* bears the burden of providing information in their application showing that the activity meets the requirements for issuance criteria under 50 CFR 17.32. In some cases, such as for import of sport-hunted trophies, it is not always possible for the applicant to provide all of the necessary information needed by the Service to make a positive determination under the Act to authorize the activity. In such cases, the Service may consult with the range country and other interested parties to the extent practicable to obtain necessary information. The Service will make the required findings on sport-hunted trophy imports of *P. l. melanochaita* on an individual application basis, however information obtained for the country as a whole will continue to be considered as it contains information pertinent to the Service’s evaluation. Any new information obtained or submitted to the Service will be evaluated and considered in all future findings for sport-hunted trophies of *P. l. melanochaita* taken in Zambia.

General considerations:

As we also explained when finalizing the 4(d) rule, our threatened species permitting regulations at 50 CFR 17.32 provide issuance criteria for threatened species permits [(50 CFR 17.32(a)(2))], but do not specify what would constitute the enhancement of propagation or survival with regard to authorizing the import of parts or products of *P. l. melanochaita*, including sport-hunted trophies. Therefore, when making a determination of whether an otherwise prohibited activity enhances the propagation or survival of *P. l. melanochaita*, the Service examines the overall conservation and management of the subspecies in the country where the specimen originated and whether that management of the subspecies addresses the threats to the subspecies (*i.e.*, that it is based on sound scientific principles and that the management program is actively addressing the

current and longer term threats to the subspecies). In this review, we evaluate whether the import of a sport-hunted lion trophy taken in Zambia contributes to the overall conservation of the species by considering whether the biological, social, and economic aspects of a program from which the specimen was obtained provide a net benefit to the subspecies and its ecosystem.

The Service has evaluated Mr. Lines' application involving a *P. l. melanochaita* sport-hunted trophy taken in the **Lower Lupande GMA**, in the context of enhancement of propagation or survival in accordance with our threatened species permitting regulations at 50 CFR 17.32 and issuance criteria for threatened species permits [(50 CFR 17.32(a)(2)]. These include, in addition to the general permitting criteria in 50 CFR 13.21(b):

- (i) Whether the purpose for which the permit is required is adequate to justify removing from the wild or otherwise changing the status of the wildlife sought to be covered by the permit;
- (ii) The probable direct and indirect effect that issuing the permit would have on the wild populations of the wildlife sought to be covered by the permit;
- (iii) Whether the permit, if issued, would in any way, directly or indirectly, conflict with any known program intended to enhance the survival probabilities of the population from which the wildlife sought to be covered by the permit was or would be removed;
- (iv) Whether the purpose for which the permit is required would be likely to reduce the threat of extinction facing the species of wildlife sought to be covered by the permit;
- (v) The opinions or views of scientists or other persons or organizations having expertise concerning the wildlife or other matters germane to the application; and
- (vi) Whether the expertise, facilities, or other resources available to the applicant appear adequate to successfully accomplish the objectives stated in the application.

In addition to these factors, particularly in relation to sport hunting, we find the *IUCN Species Survival Commission (SSC) Guiding Principles on Trophy Hunting as a Tool for Creating Conservation Incentives, Ver. 1.0* (IUCN SSC 2012), to provide useful principles, which, considered in conjunction with our threatened species issuance criteria, will aid the Service when making this enhancement finding for the importation of a sport-hunted trophy of *P. l. melanochaita* from Lusaka, Zambia. This document sets out guidance from experts in the field on the use of trophy hunting as a tool for "creating incentives for the conservation of species and their habitats and for the equitable sharing of the benefits of use of natural resources" (IUCN SSC 2012, p. 2) and recognizes that recreational hunting, particularly trophy hunting, can contribute to biodiversity conservation and more specifically, the conservation of the hunted species.

The SSC document lays out five guiding principles that, considered in conjunction with our threatened species issuance criteria, will aid the Service in making this enhancement finding for importation of a sport-hunted trophy of *P. l. melanochaita*:

- (a) *Biological sustainability*: The hunting program cannot contribute to the long-term decline of the hunted species. It should not alter natural selection and ecological function of the hunted species or any other species that share the habitat. The program should not inadvertently

facilitate poaching or illegal trade in wildlife by acting as a cover for such illegal activities. The hunting program should also not manipulate the ecosystem or its component elements in a way that alters the native biodiversity.

(b) *Net Conservation Benefit*: The biologically sustainable hunting program should be based on laws, regulations, and scientifically based quotas, established with local input, that are transparent and periodically reviewed. The program should produce income, employment, and other benefits to create incentives for reducing the pressure on the target species. The program should create benefits for local residents to co-exist with the target species and other species. It is also imperative that the program is part of a legally recognized governance system that supports conservation.

(c) *Socio-Economic-Cultural Benefit*: A well-managed hunting program can serve as a conservation tool when it respects the local cultural values and practices. It should be accepted by most members of the community, involving and benefiting local residents in an equitable manner. The program should also adopt business practices that promote long-term economic sustainability.

(d) *Adaptive Management: Planning, Monitoring, and Reporting*: Hunting can enhance the species when it is based on appropriate resource assessments and monitoring (e.g., population counts, trend data), upon which specific science-based quotas and hunting programs can be established. Resource assessments should be objective, well documented, and use the best science available. Adaptive management of quotas and programs based on the results of resource assessments and monitoring is essential. The program should monitor hunting activities to ensure that quotas and sex/age restrictions of harvested animals are met. The program should also generate reliable documentation of its biological sustainability and conservation benefits.

(e) *Accountable and Effective Governance*: A biologically sustainable trophy-hunting program should be subject to a governance structure that clearly allocates management responsibilities. The program should account for revenues in a transparent manner and distribute net revenues to conservation and community beneficiaries according to properly agreed decisions. All necessary steps to eliminate corruption should be taken and to ensure compliance with all relevant national and international requirements and regulations by relevant bodies such as administrators, regulators and hunters.

This approach to enhancement findings for the importation of a sport-hunted trophy of *P. l. melanochaita* is consistent with the purpose and intent of the Act. As such, before the Service will authorize the importation of a sport-hunted trophy, we must determine that the trophy-hunting program is managed to ensure the long-term survival of the species. As part of this evaluation, we recognize that in many parts of the world, wildlife exists outside of protected areas and must share the same habitat and compete with humans living in these areas for space and resources. As identified in the *IUCN SSC Guiding Principle on Trophy Hunting as a Tool for Creating Conservation Incentive*, if communities that share these resources with wildlife do not perceive any benefits from the presence of wildlife, they may be less willing to tolerate the wildlife. However, under certain circumstances, trophy hunting can address this problem by making wildlife more valuable to the local communities, thus encouraging community support for managing and conserving the hunted species, as well as other species.

In evaluating whether the importation of Mr. Lines' trophy of *P. l. melanochaita* would be authorized pursuant to 50 CFR 17.32, in accordance with our threatened species issuance criteria, we examined how Zambia's management program for lions addresses the three main threats that have led to the decline of the subspecies: habitat loss, loss of prey base, and human-lion conflict. When examining a management program and whether this trophy taken as part of that program meets the issuance criteria, we study a number of factors. Some of the factors we considered include whether the program is based on sound scientific information and identifies mechanisms that would arrest the loss of habitat or increase available habitat (*i.e.*, by establishing protected areas and ensuring adequate protection from human encroachment). We considered whether the management program actively addresses the loss of the lion's prey base by addressing poaching or unsustainable offtake within the country. Several components of a management plan from which trophy imports could meet the issuance criteria would be whether there are government incentives in place that encourage habitat protection by private landowners and communities, and incentives provided to local communities to reduce the incursion of livestock into protected areas or to actively manage livestock to reduce conflicts with lions. We examined if the hunting component of the management program supports all of these efforts by looking at whether hunting concessions/tracts are managed to ensure the long-term survival of the lion, its prey base, and habitat. Hunting, if properly conducted and well managed, can generate significant economic benefits that may contribute to the conservation of lions. In looking at whether we are able to authorize the import of a trophy under the issuance criteria at 50 CFR 17.32(a)(2), we examined if the trophy hunting provides financial assistance to the wildlife department to carry out elements of the management program, and if there is a compensation scheme or other incentives to benefit local communities that may be impacted by lion predation. We also considered how the U.S. hunter's, in this case, Mr. Lines', participation in the hunting program contributes to the overall management of lions within the country.

The management program in Zambia for *P. l. melanochaita* is expected to address, but is not limited to, evaluating population levels and trends; the biological needs of the species; quotas; management practices; legal protection; local community involvement; and use of hunting fees for conservation. In evaluating these factors, we work closely with the range countries and interested parties to obtain the information. By allowing entry into the United States of *P. l. melanochaita* trophies from range countries that have science-based management programs, we anticipate that other range countries would be encouraged to adopt and financially support the sustainable management of lions that benefits both the species and local communities. In addition to addressing the biological needs of the subspecies, a scientifically based management program will provide economic incentives for local communities to protect and expand *P. l. melanochaita* habitat.

Basis for Finding:

On February 2, 2016, the Service sent a letter to Zambia's Wildlife Authority with a list of questions that would aid the Service in evaluating the overall conservation and management of the subspecies, *P. l. melanochaita*, in Zambia and whether that management addressed the three main threats that have been identified as the reason for the decline of the species: habitat loss, loss of prey base, and human-lion conflict. Additionally, in the letter the Service referenced the *IUCN Species Survival Commission (SSC) Guiding Principles on Trophy Hunting as a Tool for Creating Conservation Incentives, Ver. 1.0* (IUCN SSC 2012), as it provides useful principles, which when

considered in conjunction with the Service's permit issuance criteria, would aid when making the required enhancement findings for permitting importation of sport-hunted lion trophies.

In response to our February 2, 2016, letter, Zambia's Department of National Parks and Wildlife (DNPA), herein referred to as DNPW (DNPW 2016), provided a binder of documentation describing Zambia's lion population and management plans. In addition, the Service met with representatives of Zambia's DNPW during the 17th Meeting of the Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) in Johannesburg in late September 2016. The DNPW binder documents, dated May 5, 2017, along with the Service's final rule on the lion listing under the Act, relevant information obtained separately through open sources such as IUCN documents, relevant information from DNPW, comments received from interested parties, and Mr. Lines' application were the basis of this finding.

Governance of Lions in Zambia:

The responsibility for implementing wildlife conservation laws in Zambia dates back to the 1930s or 1940s with the establishment of the Department of Tsetse, Fisheries, and Wildlife. In the late 1950s, this agency became the Department of Game and Fisheries and operated under this designation until the mid-1970s, when it became the Department of National Parks Wildlife Service (DNPWS) who was responsible for the protected area network. In 1999, the Government of Zambia transformed this agency into Zambia's Wildlife Authority (ZAWA), creating a semi-autonomous agency responsible for the management and protection of this network, with statutory powers derived through the Zambia Wildlife Act No. 12 of 1998. However, this agency, due partly to its semi-autonomy, had a low funding capability, relying primarily on revenue from tourism, which also included sport hunting. Between 1999 and 2005, ZAWA struggled with their law enforcement capabilities due to inadequate resources. The costs associated with transforming DNPWS to ZAWA continued to affect the financial and staff allocations for law enforcement activities. Large sums of money that could have been utilized by law enforcement were apparently channeled into tasks involved in the transformation process.

Since 2005, in partnership with the Zambia Lion Project (ZLP), ZAWA (now DNPW) established a voluntary program to assess and age lions taken as trophies (DNPW 2016). From 2006 through 2012, DNA samples were taken from teeth of both live and trophy lions in order to estimate the age of lions taken as trophies (DNPW 2016). The results from these past sampling efforts helped demonstrate the performance of the hunting sector during this time. It has also provided a baseline for comparing future performance.

By 2010, Zambia developed a ten-year Conservation Strategy and Action Plan for the African lion. Since the approval of this strategy, research has begun and management actions have been taken to address local community benefits, human-lion conflict, land use planning and zoning, trade, and monitoring (DNPW 2016). Some of the lion-related studies that were initiated are the Zambia Carnivore Programme (ZCP), Kafue Lion Project, and Zambia Lion Project (ZLP) (DNPW, 2106). The development of this strategy also led to the employment of 12 ecologists, with three committed to spending 70% of their work time on lion-related issues (DNPW 2016).

In 2015, ZAWA was disbanded and reincorporated as a government department, the Department of National Parks and Wildlife (DNPW). In addition, the Zambia Wildlife Act No. 12 of 1998 was

repealed. However, the Wildlife Act No. 14 of 2015 (Wildlife Act) is still the principle legislation guiding the management of wildlife in Zambia through a system implemented and enforced by DNPW with assistance from stakeholders (DNPW 2016).

The Wildlife Act is administered by DNPW under the Ministry of Tourism. DNPW is headed by a Director, with assistant directors who command 4 elements of the department: Principal Warden-Operations Wildlife Law Enforcement Unit, Principal Warden-Conservation Unit, Principal Engineer Infrastructure Development Unit, and Principal Natural Resource Management Officer Community-based Natural Resource Management Unit. *The Wildlife Law Enforcement Unit* is comprised of 1,250 Wildlife Police Officers who are responsible for investigating and enforcing wildlife crimes within 236,376 km² of wildlife area (average 189 km² per officer). The Zambian government has also committed to adding an additional 850 officers by 2018 (600 new officers were reportedly added in 2016). *The Wildlife Conservation Unit* is responsible for mitigating human-wildlife conflict, facilitating wildlife officer trainings, regulating private wildlife estate operations, managing ecosystems, managing landscape conservation of certain species, and both developing and implementing park regulations. *The Infrastructure Development Unit* is responsible for construction and maintenance of infrastructures and machinery within protected areas. *The Community-based Natural Resource Management Unit* is responsible for co-managing Game Management Areas (GMAs) with local communities. Duties include providing technical support to Community Resource Boards regarding the management of human-natural resources in GMAs and open areas. This unit facilitates the election of the Community Resources Board members and the election of Village Action Groups. Responsibilities also include monitoring the use of funds disbursed to Community Resources Boards and training village scouts and Community Resources Board members.

The lion is a protected species under the Wildlife Act. It is a criminal offense to hunt, kill, capture, or possess a lion without a license. The lion is also protected under private wildlife estate legislation and statutory instruments implemented with the (now repealed) Wildlife Act of 1998 and carried over to the Wildlife Act. Additionally, in 2016, four new statutory regulations were reportedly enacted to address various aspects of lion management to complement the operation of the new Wildlife Act. They included the Zambia wildlife regulations for granting of hunting concessions, lion sport hunting, keeping of big cats in captivity, and conducting ecological or research wildlife assessments (DNPW 2016).

In addition to Zambia's domestic laws, it is also a Party CITES. The lion is listed in Appendix II of the Convention. As an Appendix-II species, certain criteria must be met before such species can be exported, including findings from the exporting country's CITES Management Authority that the specimen was legally acquired and the country's Scientific Authority that the export will not be detrimental to the survival of the species in the wild. In their reply to our inquiry, Zambia provided a copy of their May 5, 2016, non-detriment finding for lions. This finding states that "(t)he CITES Scientific authority of Zambia has considered the population of lion in Zambia; the quota-setting system and current precautionary quota of only 24 lions; the newly implemented age-based harvest policy; the limited offtake; the adaptive management of lion; and the substantial revenues generated for DNPW operations, anti-poaching, and community development." They further explain that their positive finding was based on three pillars that include a "precautionary" quota, age-based harvesting, and community benefits.

Current Lion Status in Zambia

Lion Range:

According to DNPW, the lion range in Zambia covers about 63% of Zambia's protected areas, which is about 145,000 km² (DNPW 2016). Historically, lions occurred in the West Lunga complex, although, recently, populations have not been found in this complex (DNPW 2016). The majority of lions are found in three main clusters throughout Kafue, Luangwa, and the Lower Zambezi region. Luangwa and Lower Zambezi are connected through GMAs. Smaller populations of lions are also present in Liuwa Plains, Sioma Ngwezi, Nsumbus, and the Lavushi Manda National Parks. In addition, Kazungula and Siavonga open areas have lion populations that roam between Zambia and other countries (DNPW 2016).

The 2016 IUCN Red List Assessment stated that lions are now extinct in 15 countries in Africa (including Western Sahara, which is technically a disputed territory), are possibly extinct in another seven countries, and now occur in only 24 countries (Macdonald 2016). The latest IUCN estimates suggest a population of 23,000 - 39,000 lions throughout their current range on the African continent (IUCN 2016), representing a decline of at least 43% between 1993 and 2014. Lions are now considered to have been extirpated from at least 92% of their historic range (Macdonald 2016). Therefore, in assessing the population of lions in Zambia, we must also consider the significance of the diminishing total population of lions remaining in the wild. This is in part because the southern and eastern African lion populations include Zambia (DNPW 2016). DNPW presented a study conducted by the Zambia Lion project (ZLP) in which DNA analysis of Zambian lions was undertaken during 2004 - 2012. The study concluded that southern African and eastern African lions were integrated among the Zambian lions. The study also determined that the genetic diversity of Zambian lions is much greater than comparable areas in southern and eastern Africa.

Population Status:

Data provided by Macdonald (2016) indicate that Zambia contains approximately 1,200 free-ranging lions in an estimated range of 135,000 km² (approximately 10,000 km² less range than identified by the Zambian government). DNPW explains that previous lion estimates were determined, in large part, through expert opinion (DNPW 2016). They also confirm that no intensive research has been conducted in the corridor area, consisting of West Petauke, Chisomo and Luano GMAs, and surrounding Open Areas (DNPW 2016).

In addition to the population status determined by Macdonald (2016), the Zambian Carnivore Programme (ZCP) studied the population of lions in Zambia. In 2013, the ZCP monitored 13 prides and 13 coalitions, comprised of 141 lions with 3 adjacent sites of 20 lions each, totaling over 200 lions. In 2014, the ZCP monitored 15 prides and 13 coalitions, with a total of 166 individual lions. In 2015, the ZCP's partial data indicated that 15 prides and 15 coalitions of lions exist throughout Zambia.

In acknowledging their need for more complete and current lion population data, DNPW has begun working with partners on monitoring studies in the Luangwa and Kafue ecosystems. Surveys were conducted in the later part of 2016 (DNPW 2016). The Service has not seen the results, but will request them for consideration in future enhancement determinations. In addition, dependent on funding availability, DNPW has identified that a survey would be conducted of the corridor

between South Luangwa National Park and Lower Zambezi National Park and the GMAs surrounding the eastern part of North Luangwa National Park.

A report by the Democratic staff of the House Committee on Natural Resources concludes that Zambia lion populations may show signs of stabilizing or even recovery, but strict controls on additional mortality are necessary to prevent further decline (Grijalva 2016).

Threats:

Habitat Loss, Population Growth, and Human-Lion Conflicts:

Lion populations throughout Africa have decreased in correlation with their habitat. Currently only 10 stable populations with more than 500 lions still exist throughout the continent of Africa (Creel *et al.* 2016). Africa has the fastest human population growth rate in the world, with projections estimating a population tripling across 27 African states by 2100, leading to a continental estimate of 4 billion. Eight lion range states are estimated to have a five-fold increase in human population by 2100 (Macdonald 2016), and Zambia has not steered clear of Africa's population and development growth (DNPW 2016). Human population growth has increased in Mfuwe, the gateway town to South Luangwa National Park, largely due to increased infrastructure development and an increasing number of economic opportunities created through tourist lodges (DNPW 2016). Habitat loss, population growth, human-lion conflicts, poverty, poaching, diseases, uncontrolled hunting, and the importation of captive-bred lions into Zambia are all threats to the long-term survival of lion populations in Zambia.

DNPW stated that human-lion conflicts are not uncommon in Zambia. From the years 2008 through 2015, a total of 327 livestock animals were recorded as being killed by lions; since 2002, at least 70 lions were reported killed as a result of human lion conflicts (DNPW 2016). The number of Zambian lions killed as a result of human-lion conflict is shown in the table below.

Year	Lions Killed
2002	2
2003	4
2004	1
2005	0
2006	5
2007	8
2008	2
2009	5
2010	3
2011	8
2012	5
2013	10
2014	14
2015	1
2016	2

Poverty, Poaching, and Disease:

Prey base depletion is partly linked to habitat loss, but more importantly to poaching and bush meat trade (Becker *et al.* 2013). Poaching of lions for the trade in bones and other body parts for traditional medicine is an emerging threat within Africa (Macdonald 2016). Within Zambia, another more widely occurring threat believed to be facilitated by high levels of poverty is poaching of lions for bush meat (DNPW 2016). DNPW acknowledges that bush meat poaching occurs widely in Zambia (DNPW 2016). They also acknowledge that the amount of illegal use of lion parts in Zambia is currently unknown (DNPW 2016). However, DNPW has indicated it will establish an investigation into the illegal trade and use of lion parts.

Zambia has addressed the need to monitor the health of their lions by creating the Infrastructure Development Unit (IDU). The IDU subsequently established a veterinary unit of DNPW whose responsibility is to regularly sample lion specimens for diseases. This unit also assists law enforcement officers in the treatment of injured lions due to illegal activities such as snaring (DNPW 2016).

Trophy Hunting:

Di Minn *et al.* (2016) estimated that 37.8% of Zambia is covered by terrestrial protected areas, with 21.3% in Open Game Ranches. According to a 2012 article, lion hunting in Africa generates 5–17% of gross trophy hunting income on national levels, with the proportional significance highest in Mozambique, Tanzania, and Zambia (Lindsey *et al.* 2012). A more recent paper published by Macdonald, however, asserted that Zambia generated very little revenue from trophy hunting (Macdonald 2016). It should be noted, however, that Macdonald based the paper on data obtained in the years before 2016 (the moratorium was between 2013 and 2015), and the formation of DNPW and newer regulations were not implemented until after Zambia imposed a moratorium on lion hunting for the years 2013 through 2015. According to DNPW, Zambia's total hunting revenue (all hunting, not just lions) accounted for 32% of the revenue that ZAWA (now DNPW) received during the years 2010 through 2012 (DNPW 2016). They also affirm that the average revenue generated for hunting in Zambia was reduced to 4% during the lion hunting moratorium in 2013 and 2014 (DNPW 2016).

IUCN has only examined the lion population in Luangwa, Zambia. Their findings indicate that trophy hunting in Luangwa contributed to a decline in the lion population by 28% between 1993 and 2014 (Macdonald 2016). However, this assessment was done prior to Zambia's 2013-2015 hunting ban and therefore, it will need to be re-assessed now that Zambia's lion hunting ban has been lifted and new regulations have been implemented.

Importation of Captive-bred lions:

Captive-bred lions from South Africa and Zimbabwe are being imported into Zambia for lion walks (DNPW 2016). DNPW believes that the importation of captive-bred lions is a result of a growing photo-tourism market in the Livingstone area of southern Zambia (DNPW 2016). Since 2008, a total of 54 captive-bred lions have been imported into Zambia, but the Zambian government has imposed a condition that the captive-bred lions will not be introduced into the wild (DNPW 2016). In order to ensure that Zambia's captive-bred lions do not negatively impact their wild lion

populations, Zambia is currently working on the preparation of a statutory instrument that will regulate the importation and captive uses of lions. Other than for temporary veterinary purposes, the holding of, breeding, and commercial use (i.e. walking and petting) of captive-bred lions will be banned (DNPW 2016). Lions that are currently held in captivity will be required to be castrated or spayed, and eventually all commercial uses of captive-held lions will be phased out (DNPW 2016). DNPW states that "particular care will be taken to avoid the dumping of captive-held cats into wild areas for any reason, especially for hunting or 'release' as means for the owners to avoid the penalties or costs associated with the authorized disposition of their animals (DNPW 2016)."

Partners/Non-governmental Organizations (NGOs):

DNPW has partnered with several NGOs in an effort to obtain lion population survey data and to conduct other lion-related research studies. The Zambia Lion Project (ZLP) has conducted research on the presence/absence of lion surveys throughout Zambia (DNPW 2016). They have also assisted with DNA collection studies. The Zambia Carnivore programme (ZCP) has been documenting population trends and demographic vital rates of lions in the key areas of South Luangwa National Park, Kafue National Park, and Liuwa Plain National Park. Through their research efforts, the ZCP has also contributed to aerial support that has assisted DNPW with enforcement actions.

Although their research focus has been on elephants, the Frankfurt Zoological Society has been active in North Luangwa ecosystem for over 20 years. Conservation South Luangwa (CLS) has been active in South Luangwa National Park and surrounding GMAs. Game Rangers International has been active in the Kafue ecosystem since 2010. Conservation Lower Zambezi (CLZ) is also active in the Lower Zambezi national park and surrounding GMAs.

Supplemental revenue sources are also gained with the support of several NGOs. NGOs can provide functions that include anti-poaching units and/or aerial support. One such example is the Frankfurt Zoological Society (FZS), which has been active in North Luangwa National Park for over 20 years. FZS established a partnership with DNPW in order to help preserve black rhino and elephant populations through the establishment of The North Luangwa Conservation Programme (NLCP).

Lion Management in Zambia

History of Lion trophy exports:

During 2008 - 2012, DNPW authorized the export of 289 lion trophies (50, 40, 89, 37, and 73 respectfully). During 2013 - 2015, the Zambian government established a lion hunting moratorium (some trophies apparently taken before the moratorium were exported during this time, however). The moratorium was established to allow time to restructure Zambia's governance of lions and to allow a period of time for lion recovery (DNPW 2016). Data comparing the lion population status before and after the moratorium are currently unavailable; hence, the success of the moratorium cannot be fully assessed.

Lion Hunting and Concessions:

Zambia lion hunting occurs in *Game Management Areas (GMAs)* and *Open Game Ranches (OGRs)*. OGRs are unfenced private lands reserved for the wildlife conservation management of an individual or local community. They are buffered by GMAs. DNPW issues annual non-resident

hunting quotas to the OGRs in exchange for managing the wildlife; although all animals remain the property of the State (DNPW 2016).

All 20 of Zambia's national parks are surrounded by GMAs, but currently, lion hunting only occurs within hunting blocks located in the GMAs that surround the National parks in the Luangwa, Kafue, and Lower Zambezi ecosystems. GMAs are primarily designated for safari (tourist) and resident hunting, but some GMAs also include photographic tourism. All GMAs allow settlement. There are 36 GMAs in Zambia covering 177,404 km² (DNPW 2016). Most, but not all, GMAs have General Management Plans outlining basic management practices. Community-Based Natural Resource Management (CBNRM) is implemented within GMAs through Community Resource Boards (CRBs) (DNPW 2016). The CRBs focus on the economic and social well-being of local communities. There are currently 75 registered CRBs within Zambia that employ approximately 750 community scouts and 79 support staff.

DNPW, in consultation with the local community, is mandated to grant hunting concessions within specific hunting blocks within GMAs. Hunting concessions must be registered in Zambia, have a tourism enterprise license, have a valid tax clearance certificate, provide proof that the company is not bankrupt, and they must meet any additional conditions set by an evaluation committee (DNPW 2016). Leases are stated to range from 7 - 15 years, with the length of lease time dependent on the abundance of species classified within the individual hunting block (DNPW 2016). Prime hunting blocks have greater species abundance and are generally awarded shorter lease agreements in comparison to secondary hunting blocks. Secondary hunting blocks are generally given longer lease periods in an effort to provide incentives for the concessionaire to invest greater resources, allowing wildlife populations to increase before offering hunting (DNPW 2016).

Hunting block concessions are awarded through a bid process in accordance with the Zambia Public Procurement Act No 12 of 2008. Bids are taken from companies through a "two envelop system." The bids consist of a technical proposal and a financial proposal being placed in separate clearly marked envelopes. The technical bid is required to be evaluated by criteria outlined in Zambia's Wildlife Act before the envelope containing the financial bid is opened. Financial envelopes will only be opened for bidders that meet a specific technical expertise (e.g., a score of over 80 on the established criteria). The lease is awarded to the bidder that qualified with a minimum technical rating of 80 and whom submitted the highest financial bid (DNPW 2016).

Successful bidders must address statutory obligations to communities and provide enforcement contributions when developing Concessionary Agreements. Concessionary Agreements are developed through a partnership between the communities, safari operators, professional hunters, and DNPW. As such, a hunting concession agreement is not valid without the signature of the Chief(s) or CRB associated with the hunting block (DNPW 2016). Concessionaires are required to use collected fees to support resource protection by providing community scouts, vehicles, fuel, patrols, and equipment. They must provide infrastructure development to local communities and also offer resource monitoring and fire management. Some concessionaires further benefit community development by supporting the employment of teachers and nurses, purchasing ambulances, building classrooms and clinics, and providing houses for teachers and health personnel. Moreover, they are mandated to provide 50% of the meat from hunted animals to the local community. Concessionaires are evaluated annually and those that do not comply with their obligations can have their concession terminated before the end of the agreement's term (DNPW 2016).

Hunting Quotas:

From 2005 - 2012, Zambia had quotas that totaled 683 lion in 21 GMAs and 5 OGRs, with the highest annual quota set at 117 lions and the lowest at 55 lions (DNPW 2016). The quotas were generally based on the previous year's lion quotas and, in some cases, the quotas were a fixed part of a concession agreement (DNPW 2016). However, DNPW did not completely identify the basis for these quotas or how they were distributed. Currently, quotas are based primarily on lion populations determined through aerial surveys (DNPW 2016). However, information obtained from ground counts, patrol sightings, local and expert opinion, and hunting monitoring is also used. CRBs use the information they have collected to determine what the GMA quota should be. Their proposal is submitted to DNPW for approval. Once a proposal is received, DNPW accepts feedback from field staff and safari hunting outfitters, as well as the hunting guidelines (below), before the quotas are approved by the Wildlife Conservation and Management Unit and distributed by their Licensing Unit. The quotas are then distributed to the CRBs and hunting companies. DNPW is required to share the approved quotas with other government agencies, including the Auditors General Office and Anti-Corruption Commission. For 2016, Zambia established a quota of one lion per hunting concession, for a total quota of 24 lions (2 hunted on OGRs and 22 hunted in GMAs). Quotas are set for individual hunting blocks within the GMAs.

Hunting Guidelines:

The Zambia's Conservation Strategy and Action Plan for the African lion was developed in 2010 and designed with a 10-year plan (DNPW 2016). The purpose of the plan is to gain stakeholder participation while using adaptive management practices when addressing concerns regarding scientific management, habitat protection, and human-lion conflicts. Based on the principles of the Action Plan, following the three-year moratorium, in 2016, DNPW consulted independent lion experts and held a workshop that resulted in the creation of hunting guidelines (DNPW 2016). The guidelines are considered part of an adaptive process to manage lion hunting in Zambia. DNPW is in the process of transforming the guidelines into a statutory law that will include provisions for monitoring lion hunting through an age-based system (DNPW 2016). The lion hunting guidelines include, but are not limited to, the following recommendations:

1. No hunting of female lions.
2. No hunting of any lion born or held in captivity.
3. No use of pre-recorded sounds in lion hunting.
4. No lion hunting on fenced game ranches.
5. Lions should only be hunted in Prime and Secondary areas and Open Game Ranches known to be rich in lion and prey.
6. Establishment of a place for trophy measurements of hunted lions for exports should be established.
7. DNPW shall establish a lion aging evaluation committee that will include representatives from the Professional Hunters Association, the Safari Operator Association, the Wildlife Producers Association, and officers from DNPW that are nominated by the director. Prior to issuing CITES permits, the committee shall meet once a year to establish the age of hunted lions.

DNPW has established age-based categories that divide lion hunting into four age-based categories: Category 1 consists of male lions between five and six years old and above; Category 2 consists of male lions older than four years old, but younger than five years old; Category 3 consists of male lions that are younger than four years old; and Category 4 consists of male lions seven years old or older. DNPW has determined that only male lions that are five years and older should be hunted. However, DNPW may authorize the export of Category 2 male lions so as not to penalize the hunter. Lions that are less than four years old will be confiscated and may not be exported. In cases where lions under five years old are taken, however, the professional hunter and the safari outfitter may be penalized (Becker 2017 per. comm.).

Wildlife officers must also accompany hunters on all hunts (DNPW 2016). The officer is responsible for recording hunt activities on specified forms such as the Safari Hunting Monitoring form and Trophy Measurement form. The officer endorses licenses to ensure that they are not used more than once and the officer also ensures that all harvested trophies are registered (DNPW 2016).

Hunting-generated Revenue:

DNPW receives revenue by charging GMA fees per lion hunt. They also receive funds from annual professional hunter fees, certificate of valuation of trophies fees, certificate of ownership of trophies fees, permit fees, handling fees, and CITES security stamp fees. Hunting license fees in Zambia are statutory. The foreign hunter looking to take a lion must pay the fee directly to the outfitter, with the minimum amount currently set at \$4,200. DNPW collects these fees from the outfitter/concession and does not deal with the foreign hunter directly. Therefore, the outfitter may choose to charge the foreign hunter any amount greater than \$4,200. The revenue generated from license fees (also referred to as Animal fees by DNPW) is mandated to be shared with CRBs under the Zambia Wildlife Act No. 14 of 2015. The fees are shared with CRBs and DNPW as follows:

License fees (animal fees):

- 5% of funds go to the CRB chief/leader.
- 45% of funds go to CRB community funds.
 - According to Zambia's "Guideline on the use of Community funds accrued from wildlife management", 45% of these community funds should go to wildlife protections and patrols, 35% should go to community projects such as constructing clinics, roads, schools, and wells, and 20% of the funds should go towards CRB administration costs.
- 50% of funds go to DNPW (mandated under the Zambia Wildlife Act No. 12 of 1998 and continued in the Wildlife Act) in the form of conservation funds, including, but are not limited to: scout/wildlife officer salaries, resource protection, consultancy and legal fees, animal surveys, staff training, administrative and operational expenses, repair and maintenances, and other conservation expenses.

According to Zambia's hunting guidelines, hunts involving lions are required to be a minimum of 16 days (DNPW 2016). A daily conservation fee of \$150 per hunter and \$100 per observer is collected for monitoring purposes (DNPW 2016). These daily hunt fees typically cover combined hunt packages that include hunting lion, along with other species such as hippos and impalas. The fees are allocated by percentages to CRBs and DNPW as follows:

Daily fees (Concession fees):

- 5% of funds go to the CRB chief/leader.
- 15% of funds go to CRB community funds.
 - Based on recommended guidelines, 45% of these community funds go to wildlife protections and patrols, 35% goes to community projects such as constructing clinics, roads, schools, and wells, and 20% of the funds go to CRB administration costs.
- 80% of funds go to DNPW in the form of conservation funds, including, but are not limited to: scout/wildlife officer salaries, resource protection, consultancy and legal fees, animal surveys, staff training, administrative and operational expenses, repair and maintenances, and other conservation expenses.

Hunting fees for all species accounted for 32% of revenues that DNPW received during 2010 - 2012. However, that amount was reduced to about 4% during the 2013 and 2014 moratorium (DNPW 2016). Safari hunting also creates other revenue for Zambia, through activities such as tipping, eating in restaurants, staying at lodges, purchasing souvenirs, and paying for taxidermy.

Evaluation:

As stated earlier, the Service will evaluate any application in accordance with our threatened species permitting regulations at 50 CFR 17.32 and issuance criteria for endangered species permits (50 CFR 17.32(a)(2)). In evaluating each of these criteria on the basis of information available to the Service, we have been able to determine that this import of the wild lion trophy would qualify for the issuance of the required import permit.

17.32(a)(2)(i): Whether the purpose for which the permit is required is adequate to justify removing from the wild or otherwise changing the status of the wildlife sought to be covered by the permit:

In evaluating this criterion, the Service assesses whether the hunting program established for lions has demonstrated the ability to contribute toward positive conservation outcomes that mitigate or improve the status of lions throughout their range within Zambia, while addressing the main threats of habitat loss, human-lion-livestock conflict, and prey depletion.

The IUCN's 2012 Guiding principles on trophy hunting support the concept that hunting can provide a conservation benefit if it is part of a governance system that provides both implementation and enforcement at a level that adequately supports conservation. The Service also believes that conservation hunting can assist the wild lion populations if managed well. Lion hunting, if managed properly, could meet the Service's enhancement criteria under the Act. There must be adequate information and data clearly showing that removing lions from the wild for trophy hunting will be done at a level and with sufficient oversight such that it improves the current status of lions in the wild (50 CFR 17.32).

Zambia has demonstrated their desire to maintain the long-term conservation of their lion population with their 2013-2015 moratorium on lion hunting. When the Zambian government realized that population numbers were declining to an unsustainable level, they applied the

moratorium for 3 years, until they determined that their lion population increased enough to tolerate limited offtakes (DNPW 2016).

As mentioned in the sections above, the Zambian government has clarified that they have established block quotas by surveying lion populations through a combination of aerial surveys and information obtained from ground counts, patrol sightings, local and expert opinion, and hunting monitoring. Because surveys are continually being carried out on the current population of lions in Zambia, future findings will consider updated population data. Therefore, the Service will need to continue to monitor the effectiveness of new lion surveys that contribute to determining the population status of lions in correlation with hunting block quotas.

The difference in male turnover between hunting/non-hunting periods is apparent from cub survival rates. Macdonald (2016) reports that in the absence of hunting, 80% of cubs survived to one year of age, during the trophy hunting period, 66% of cubs survived to one year of age. The principle behind restricting trophies to older males is that their tenure in the pride should have been long enough to raise at least one generation of cubs to adulthood. However, lion experts have come to varying conclusions regarding the minimum age recommended for sustainable lion hunting. Creel *et al.* (2016), not only state that the minimum hunting age should be 7-8 years old, but they also conclude that age-restricted harvesting is not sufficient to yield sustainability by itself. However, other experts believe that the sustainable age of lions is five years and older, provided that proper identification/aging can occur before the animal is harvested. Nonetheless, lion experts are in consensus that hunting lions younger than five years old may not be sustainable. Zambia's recommended hunting guidelines are in line with the minimum age of five-year-old lions, but the Service is concerned that allowing for the export of lions under this age (Zambia allows export of four-year-old lions, but not less than four years old) may not be sustainable. Zambia will need to closely monitor the number of exports of "under age" trophies to determine if there are sufficient disincentives to discourage taking such animals.

The Zambian government has done a good job of identifying how resources from hunting-generated revenue would be shared with communities. The local communities receive funds from concessions and license (animal) hunting fees. As outlined in the license fee distribution above, 35% of the funds allocated to CRBs help support community projects such as constructing clinics, roads, schools, and wells, thereby providing incentives for the local community to ensure the long-term conservation of the lions. In addition, 45% of the CRB license fees go to wildlife management, including resource protection and patrols.

Zambia's human population growth has contributed to conflicts within the GMAs. As clarified above, DNPW contributes 50% of the license fees (animal fees) and 20% of the Concession fees to local communities. These financial benefits received from living in a GMA have provided incentives for newcomers to illegally squat in the GMAs looking to capitalize on the financial benefits. Consequently, the illegal squatting has caused enough conflict with local people to trigger action to be taken by the Zambian government. In August of 2015, over 2,000 squatter households within the Mumbwa GMA were evicted so that the registered local communities could receive the full benefits of living within a conservation area (DNPW 2016). The long-term impacts of the eviction will need to be considered in future findings, as the information becomes available.

Therefore, based on the information available to the Service and considering that the lion to be imported was harvested in compliance with Zambian laws and regulations, we conclude that the

purpose for which a permit is being requested is adequate to justify removing the sport-hunted trophy lion from the wild or otherwise changing its status.

17.32(a)(2)(ii): The probable direct and indirect effect that issuing the permit would have on the wild populations of the wildlife sought to be covered by the permit:

As described under Current Lion Status in Zambia above, Zambia has taken great strides to address the major threats facing lions through their hunting program and updated regulations. In 2010, Zambia developed a ten-year Conservation Strategy and Action Plan for the African lion. Since the establishment of the Action Plan, the Zambian government has cooperated with partners to implement the strategy (DNPW 2016). Monitoring, local community benefits, human lion-conflict, and land use planning are only some of the benefits of the Action Plan (DNPW 2016). The development of the Community-Based Natural Resource Management Unit has helped facilitate Zambia's economic and social well-being by providing technical support to CRBs, training of village scouts and CRB members, and monitoring the use of funds disbursed to the CRBs. An investigative unit also carries out investigations related to wildlife crimes. Furthermore, the President of the Republic of Zambia has also directed the Defense security wings in the country to join in the fight against poaching.

Taking into account that the off-take of wild lions is currently being monitored by the Zambian government, that the government of Zambia is implementing an age-based harvest strategy and a precautionary quota, and that the government of Zambia's management of lions provides community benefits, Mr. Lines' hunting and subsequent import of this lion provides an indirect benefit to wild populations by helping to support the reserves where lions are found. Therefore, based on the information available to the Service, the probable direct and indirect effect that issuing an import permit for this legally hunted lion would have on the species would be positive.

17.32(a)(2)(iii): Whether the permit, if issued, would in any way, directly or indirectly, conflict with any known program intended to enhance the survival probabilities of the population from which the wildlife sought to be covered by the permit was or would be removed:

We are not aware of any programs intending to enhance the survival of lions in Zambia that would conflict with Zambia's management plan. However, we are aware of the Zambian Carnivore Programme (ZCP), which is a non-profit Zambian registered trust that is dedicated to conserving large carnivore species and the ecosystems they reside in. The program works to build capacity within local Zambian organizations and government bodies for the sustainable conservation of large carnivores and herbivores, their ecological functions, and their habitats. Therefore, based on the information available to the Service, the issuance of an import permit for this legally hunted wild lion would not conflict with any known conservation program for the species.

17.32(a)(2)(iv): Whether the purpose for which the permit is required would be likely to reduce the threat of extinction facing the species of wildlife sought to be covered by the permit:

In evaluating this criterion, the Service assesses whether the hunting program established for lions is subject to a governance structure that clearly allocates management responsibilities and supports regulatory pathways in support of positive conservation outcomes. Zambia's lion management

program is based on a precautionary quota, an age-based harvest with monitoring of off-takes, and direct community benefits (DNPW 2016).

Currently, per Zambia's approved budget, DNPW retains all revenue from sport hunting. 50% of animal fees and 80% of concession fees are allotted to DNPW as conservation funds. This funding source is vital to lion conservation because it supports on-the-ground conservation, protected area management, and enforcement efforts. Additionally, 45% of animal fees and 15% of concession fees go to communities where the hunts take place. As long as communities continue to benefit from the sport hunting of lions through job opportunities, funded community projects, and sharing of meat derived from hunting, they may have the incentive to protect it.

Given that lion management in Zambia allows limited, controlled off-take of lions in a manner that mimics natural processes and provides community benefits, the legal hunt undertaken by Mr. Lines will contribute to reducing the threat of extinction of lions in Zambia. The utilization of hunters, such as Mr. Lines, in managing the lion populations in GMAs and OGRs is an important element of the success of lion management in Zambia.

Therefore, based on the information available to the Service, the purposes for which this import permit would be issued would likely reduce the threat of extinction facing lions in Zambia.

17.32(a)(2)(v): The opinions or views of scientists or other persons or organizations having expertise concerning the wildlife or other matters germane to the application:

As with any discussion of hunting, there are numerous opinions on the impact that hunting has on a species. From reviewing comments made during the listing process for lions, as well as information obtained through personal conversations and literature, there is general agreement that hunting, done properly and well managed, would not have an adverse effect on lion populations. Mimicking natural processes within the management program, such as maintaining pride hierarchy for as long as possible by leaving the alpha male in place, will better ensure the long-term survival of the species. Numerous researchers have stated that, while they may not support hunting in general, they see that benefits can be obtained through a science-based hunting program for lions. There have been a large number of comments from some NGOs and the public opposing hunting any lions, but particularly captive-bred lions. This opposition, however, is primarily based on the perceived ethics of hunting. While these comments are an indication of concerns from some members of the public over hunting, they are not germane to our review process.

Therefore, based on the information available to the Service, there is general support from scientists and other persons or organizations having expertise concerning lions that the legal well managed, science-based harvest of lions, and the subsequent import of these trophies, would not have an adverse effect on the species, but would further efforts to conserve the species in the wild into the future.

17.32(a)(2)(vi): Whether the expertise, facilities, or other resources available to the applicant appear adequate to successfully accomplish the objectives stated in the application:

Examining whether adequate resources exist, the Service relied primarily on information provided by Zambia (DNPW 2016). The long-term survival of lions in Zambia, is directly tied to the economic and ecological success of the country. When ZAWA became a semi-autonomous agency,

they struggled with funding to provide for adequate staffing and fulfillment of lion conservation objectives. However, after transforming back to a government agency, DNPW (formerly ZAWA) has been able to ensure that staff are adequately resourced and paid by Zambia's government, while retaining funding generated from sport hunting, as per the approved budget for the country. This ability to deliver on conservation objectives is improved with funding provided by U.S. sport hunters such as Mr. Lines.

Therefore, based on the information available to the Service, the applicant undertook a legal, authorized hunt, abiding by management practices in accordance with the government of Zambia's laws and regulations, having the expertise, facilities, and other resources available to her to successfully accomplish the objective stated in the application.

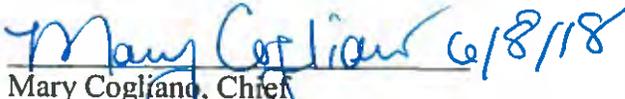

Conclusion

Given the current status of lions within Zambia and the level of management and oversight provided to lions, it appears that the harvest and import of this lion as a sport-hunted trophy meet the purposes of the Act. Zambia's ongoing adaptive management and limited off-take of lions is important to the survival of lions in Zambia.

Therefore, with the information currently available to the Service and in accordance with the issuance criteria laid out above, the Service is able to make a determination that the import of this wild lion will enhance the propagation or survival of the species. Therefore, the Service is able to authorize the import of one male wild lion trophy taken in Zambia, to Kevin (b) (6) Lines.

FALLS CHURCH VA 22041-3803

CHIEF, BRANCH OF PERMITS, DMA

Permittee:

JAMES (b) (6) LINES
(b) (6)
COLLEYVILLE, TX (b) (6)
U.S.A.

Authority: Statutes and Regulations: 50 CFR 17.40(r).

Location where authorized activity may be conducted:
IMPORT THROUGH ANY PORT LISTED IN 50 CFR 14.12

Reporting requirements: Not applicable

Authorizations and Conditions:

- A. Authorized to import the sport-hunted trophy of one male African lion (*Panthera leo melanochaita*) taken in Zambia for the purpose of enhancement of the survival of the species.
- B. Specimen may not be sold or transferred for any financial remuneration.
- C. Trophy must have been taken during the 2018 hunting season.
- D. Trophy must be accompanied by valid hunting authorization issued by the government of Zambia for the 2018 season.
- E. Trophy must be accompanied by a valid Convention on International Trade in Endangered Species (CITES) Appendix II export permit/re-export certificate, source code "W", issued by the Management Authority of the exporting/re-exporting country.
- F. General conditions set out in Subpart D of 50 CFR 13, and specific conditions contained in Federal regulations cited above, are hereby made a part of this permit. All activities authorized herein must be carried out in accord with and for the purposes described in the application submitted. Continued validity, or renewal of this permit is subject to complete and timely compliance with all applicable conditions, including the filing of all required information and reports.
- G. The validity of this permit is also conditioned upon strict observance of all applicable foreign, state, local, tribal, or other federal law. This permit can be photocopied.
- H. Valid for use by permittee named above.
- I. Acceptance of this permit serves as evidence that the permittee understands and agrees to abide by the "General Permit Conditions" (copy attached).

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted ELEPHANT trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Conservation Force

Type of Activity:
IMPORT OF SPORT-HUNTED TROPHIES
(Appendix I of CITES and/or ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual			
1.a. Last name <i>OTTMERS</i>	1.b. First name <i>BRYAN</i>	1.c. Middle name or initial <i>(b) (6)</i>	1.d. Suffix
2. Date of birth (mm/dd/yyyy) <i>(b) (6)</i>	3. Telephone number	3.a. Alternate telephone number	4. E-mail address

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution			
1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (dba)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information			
1.a. Physical address (Street address, Apartment #, Suite #, or Room #; no P.O. Boxes) (If Broker or Taxidermist is applying on behalf of a foreign national, provide Broker or Taxidermist's name and address in this block; U.S. hunters must provide their U.S. address) <i>(b) (6)</i>			
1.b. City <i>BOERNE</i>	1.c. State <i>TEXAS</i>	1.d. Zip code/Postal code <i>(b) (6)</i>	1.e. County/Province <i>(b) (6)</i>
1.f. Country <i>USA</i>			
2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)			
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province
2.f. Country			

D. All applicants MUST complete	
1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – <i>attach documentation of fee exempt status as outlined in instructions.</i> (50 CFR 13.11(d))	
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.	
<i>[Signature]</i>	<i>03/19/2018</i>
Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures)	Date of signature (mm/dd/yyyy)

E. IMPORT OF SPORT-HUNTED TROPHIES (*Appendix I of CITES and/or ESA*)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- (1) Is raw, processed, or manufactured;
- (2) Was legally obtained by the hunter through hunting for his or her personal use;
- (3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- (4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.
2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?
Applicant page one.
3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

ELEPHANT

b. Sex (if known). MALE / BULL

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted: 08/01/2015 - 08/14/2015

b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

ZIMBABWE

SAVE CONSERVANCY

SANGO LODGE, MASUNGO PROVINCE

b. Date wildlife was hunted: 08/01/2015 - 08/14/2015

b. Name of hunting outfitter, safari company, or professional hunter you hunted with:

ZAMBEZI HUNTERS, THIERRY LABAT, PH.

c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:

Business Name: ZAMBEZI HUNTERS

Address: 2 PECKHAM RD. NEW LANDS ~~DEL~~

City: NEW LANDS, ~~DEL~~ HARARE ZIMBABWE

State/Province: MASVINGO

Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted?

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies and two elephant trophies within the same calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies and two elephant trophies within the same calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature:  Date: 5.20.2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

**DECLARATION OF SAVÉ VALLEY CONSERVANCY
IN SUPPORT OF MOTION TO INTERVENE**

I, Wilfried Pabst make the following declaration in support of the attached Motion to Intervene.

1. I make this declaration based upon my personal, first-hand knowledge.
2. I make this declaration on behalf of Savé Valley Conservancy ("SVC"). I own the Sango Ranch, one of the properties that together form the conservancy. I am involved in all aspects of operating SVC and decision-making related to the management of habitat and wildlife, poaching control, community investment, research, and similar issues.
3. SVC is one of the largest private game reserves in Africa. It is in the South East Lowveld of Zimbabwe and provides approximately 3,500 km² of diverse wildlife habitat for healthy populations of elephant, lion, leopard, buffalo, rhino, and rare African Wild Dogs.
4. SVC consists of privately-, government-, and community-owned properties aligned under a constitution to manage animal populations on a landscape scale. Each property operates its own tourist lodges offering different types of accommodations in varied ecological settings. While

predator spoor count is conducted as well. A Technical Advisory Committee recommends evolving best wildlife management practices.

8. SVC's anti-poaching efforts are extensive. Approximately 200 game scouts patrol the various ranches to pick up snares and keep meat poaching under control. A special team of 30 to 40 highly-trained scouts, the Special Species Protection Unit (SSPU), combats elephant and rhino poaching specifically. Annual anti-poaching expenses (ranger salaries, training, vehicles, equipment, petrol, and other necessities) are almost \$500,000. We hope to expand the SSPU to 50 individuals at the cost of another \$100,000 per year.

9. In the past 25 years, SVC's elephant population has quadrupled from the original, translocated individuals. The population is estimated at 2,200. Elephant management is guided by an adaptively-implemented plan incorporating regulated hunting to achieve management targets. The annual hunting quota is seven elephants, representing only 0.3% of the population. Those few hunts generate significant revenue that is reinvested in management and protection, including for the large black rhino population, which is not currently hunted.

10. After SVC was established and as ungulate populations increased, lion began to re-colonize the conservancy and thirteen lions were reintroduced, including ten on Sango ranch. After an initial lag period, the population has flourished. Annual monitoring began in 1999. Since 2007, annual monitoring is conducted using track index surveys in a research project co-sponsored with the African Wildlife Conservation Fund. In 2011, those survey results were verified using a baited call-up. Prey availability models suggest SVC's carrying capacity for lion is approximately 271. The 2015 population was estimated at 284. This suggests lion have reached the ecological carrying capacity, even though responsibly hunted.

and schools, providing computer equipment, etc. SVC entered into an agreement with local Chiefs to share revenues from regulated hunting and sales of game meat.

16. Over 90% of SVC's hunting clients are U.S. citizens—and this percentage is 100% on some properties. SVC relies on these U.S. clients to fund its extensive anti-poaching efforts and science-based elephant and lion management. At least three U.S. hunters have applied for permits to import lion or elephant trophies hunted in SVC in 2015, 2016, and 2017.

17. SVC's revenues will decline if elephant and lion trophies are not importable into the U.S. Consequently, its excellent management efforts will suffer. The quotas will not change (and did not change when the U.S. Fish and Wildlife Service suspended the import of elephant trophies from Zimbabwe or listed the lion as threatened under the U.S. Endangered Species Act). However, the willingness of U.S. citizens to pay premium prices was reduced by these policy decisions, and in turn, SVC's revenues were reduced. These revenues will be cut further if imports remain closed. Unfortunately, the conservancy's elephant, lion, rhino, and other wildlife populations will pay the price if anti-poaching efforts and community investment and conflict mitigation expenditures must be reduced as well.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Type of Activity

Import of Sport-hunted Trophies of Southern African Leopard and Namibian Southern White Rhinoceros

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. You may find instructions on how to make your application complete and help avoid unnecessary delays at the following link: .

Section A: Complete if applying as an individual

1.a. Last Name Bastien	1.b. First Name Thomas	1.c. Middle Name/Initial (b) (6)	1.d. Suffix
----------------------------------	----------------------------------	--	-------------

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix
5. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

Section C: All applicants complete address information

1. Physical address (include street name, street no., or Room #; no P.O. Boxes)				
(b) (6)				
1.b. City Yuma	1.c. State AZ	1.d. Zip code/Postal code (b) (6)	1.f. Country U.S.A.	
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
(b) (6)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount identified on page 2, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – attach documentation of fee exempt status as outlined in instructions. [50 CFR 13.11(d)]	
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50 Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit to the address on page one.

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form () and return your original permit with that form.

Note 3: *Sport-hunted trophy* is defined at as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 4: Certain hunting trophies, including leopard and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

- Complete all questions on the application.
- Mark questions that are not applicable with "N/A".
- If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.
- If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Tom Bastien
(b) (6)
Yuma, AZ (b) (6)

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Tom Bastien
(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No

Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

- a. Leopard (*Panthera pardus*) Quantity: 1 (Limited to the import of two per calendar year). If you wish to import a leopard taken in northern or western Africa, please use form 3-200-20.
- b. Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia
Quantity: _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use Form 3-200-20).

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, Please enter the following information:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
- b. Date wildlife is to be hunted:
- c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE ANIMAL HAS ALREADY BEEN TAKEN, please enter the following:

- d. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:
Namibia, Khomas, Hochland Mountains
Borodino # 179
- e. Date wildlife is to be hunted: N/A 11/14/2017

- f. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Alpha Pride Safaris Christo van der Venster &
Namibia Safari Corp

- g. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Namibia

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you.

- a. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: JS Van der Merwe
Business Name: Namibia Safari Corp
Address: Farm Botodino # 179
Address: PO Box 336
City: Windhoek
State/Province: Windhoek 9000
Country, Postal Code: Namibia

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- (1) Is raw, processed, or manufactured;
- (2) Was legally obtained by the hunter through hunting for his or her personal use;
- (3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- (4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: 1 (Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: _____ (Import is limited to two per hunter per calendar year)

Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
 - a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

 - b. Date wildlife is to be hunted:

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild:

ZIMBABWE, DANDE NORTH SAFARI AREA, MATOMOBO CAMP

b. Date wildlife was hunted:

MAY 13TH 2017 - MAY 31ST 2017

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

SKIN, LIFE SIZE MOUNT, CLAWS, SKULL

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

ZIMBABWE DIP + PACK WITH ANDY HUNTER
8 RIVUJIA DRIVE
MOUNT PLEASANT, HARARE, ZIMBABWE

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business CHARLTON MCCALLUM SAFARIS
Name: Address: 15 A YELLOW WOOD LANE
Address: KAMBANJI HARARE
City:
State/Province:
Country, Postal Code:

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national**, provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: _____ (b) (6) _____ Date: 11-20-17

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

MATTHEW (b) (6) BOYEN
(b) (6)

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted ___Elephant___ trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Conservation Force
3240 S. I-10 Service Road W., Suite 200
Metairie, Louisiana 70001 USA
T: (504) 837-1233
F: (504) 837-1145

GENERAL STATISTICS

Country Area	825,418 km ²
Range Area	164,069 km ² (20%)
Protected Range	18 %
Information Quality Index (IQI)	0.43
CITES Appendix	II
Listing Year	1997

CURRENT ISSUES

Namibia's elephants occur across the northern region of the country, mostly in national parks and community areas. Their range encompasses a wide variety of habitats, from the extremely arid north-west Kunene Region to the well-watered Zambezi (formerly Caprivi) Region, where the elephants form part of the KAZA transfrontier population. Although poaching has increased in the Zambezi Region in the past ten years, it is not seen as a significant threat in Etosha National Park or for populations in Khaudum National Park and Kunene Region.

Elephant hunting takes place in Namibia, and the revenue generated provides significant income to community conservancies (Naidoo et al., 2006). From 2007 to 2015, Namibia declared an annual export quota of elephant hunting trophies of 180, defined as tusks from 90 animals (CITES, n.d.-a).

Namibia's elephant management plan was published in 2007 (Ministry of Environment and Tourism, 2007).

In 2008, Namibia undertook an approved one-off sale of 7,503 kg of ivory to Japan and China, at a price of USD \$1,147,369 (Wijnstekers, 2011).

NUMBERS AND DISTRIBUTION

The estimated number of elephants in areas surveyed in the last ten years in Namibia is 22,754 \pm 4,305 at the time of the last survey for each area. There may be an additional 90 elephants in areas not systematically surveyed. These guesses likely represent a minimum number, and actual numbers could be higher than those reported. Together, this estimate and guess apply to 84,283 km², which is 52% of the estimated known and possible elephant range. There remains an additional 48% of the estimated range for which no elephant population estimates are available.

The elephant population of Namibia has continued to increase although, with wide confidence limits in aerial surveys and elephants moving across international borders, it is not possible to be precise about how great the increase in the national population has been.

There are four main populations, the transfrontier population (with Zambia, Angola, Botswana and Zimbabwe) in the Zambezi Region, in Khaudum National Park in the north-east, the Etosha National Park population, and the Kunene population in the north-west which includes the "desert" elephants.

There has been an increasing trend in elephant numbers in the Zambezi Region since surveys started in the 1980s. This is likely to have been a result of both natural growth and movement from neighbouring countries. **Aerial sample counts** were carried out in 2007, 2011, 2013, 2014, and 2015, giving estimates of 8,380, 10,847 \pm 3,580, 9,165 \pm 2,016, 14,097 \pm 2,678 and 13,116 \pm 3,413 (Chase, 2007; Craig & Gibson, 2013b, 2014; Craig, 2011b; Gibson & Craig, 2015a). The previous estimate in the AESR 2007 was 8,725 \pm 2,206 (Kolberg, 2004). There was also a total count carried out in 2007 (Chase, 2007) and a sample count in 2008 (Kolberg, 2008). However the latter was carried out with an inexperienced crew and the results were thought to be a considerable underestimate (Kolberg, 2008).

The elephant population of Khaudum NP and the neighbouring community conservancies of Nyae Nyae and N \ne a Jaqna have been established since the 1980s, with the provision of artificial water and movements across the border from Botswana. Three **aerial sample counts** were carried out in 2011, 2013 and 2015 giving estimates of 4,731 \pm 1,940, 3,638 \pm 1,164, and 6,413 \pm 2,566 (Craig & Gibson, 2013a; Gibson & Craig, 2015b; MET, 2012). The 2015 figure replaces an estimate of 3,758 \pm 2,289 for Khaudum, 61 \pm 115 for N \ne a Jaqna (Kolberg, 2004) and 967 \pm 481 for Nyae Nyae (Stander, 2004). None of these are significant differences.

There is a limited movement of elephants between Angola and the Kavango region to the north-west of Khaudum (Terblanche, 2016).

There is a small elephant population in the Mangetti area between Khaudum and Etosha. The AESR 2007 indicated that they occupy the Mangetti Game Reserve, whereas their range is actually concentrated around the Mangetti Cattle Ranch to the west, and also probably extends into the Ukwuagali communal area to the north. Ninety individuals were observed in Mangetti in 2015 (Lindeque, pers. comm., 2016). This **informed guess** replaces one of 20 from 2005 (Ministry of Environment and Tourism, 2005).

Etosha National Park in northern Namibia has an increasingly isolated elephant population, since the perimeter fencing has been upgraded in recent years. There has been a gradual increase in elephant numbers, moderated by deaths from anthrax and poaching. Aerial sample counts were carried out in 2011 and 2012, giving estimates of $3,378 \pm 1,756$ and 2,810 (confidence limits not available) (Kolberg, 2012; MET, 2012). The most recent **aerial sample count** from 2015 gave an estimate of $2,911 \pm 637$ (Kilian, 2015) and replaces an estimate of $2,057 \pm 598$ from 2004 (Kilian & Kolberg, 2004).

It is technically very difficult to count the widely scattered elephant population in the Kunene Region, which includes the 'desert elephants' in the dry, western extremity of the range and there has been controversy about the numbers in this area. A combined sample block count and **aerial total count** was carried out by helicopter in 2011, giving an estimate of 314 ± 154 (MET, 2012). This replaces an estimate of 210 ± 157 from a 2005 survey (Ministry of Environment and Tourism, 2005). It should be noted that the count did not include the extreme northern part of the range around Opuwo, nor the farms to the south of Etosha. There has been some range expansion to both the south and north, with elephants now being resident in the Ugab river basin and about ten elephants resident in the northern Etanga area (Owen-Smith, pers. comm., 2014). The area of **known range** has been changed, and the Etanga group is shown as a point record on the map. The Kunene population appears to have been increasing in numbers and range, despite evidence that the 'desert elephant' sub-population in the Houanib and Houarusib dry riverbeds reduced from 42 to 31 between 2002 and 2015 (Ramey & Brown, 2015).

There are occasional sightings of elephants in livestock ranching areas to the south of their normal range in the area north and east of Windhoek. These are shown as point records on the range map (Hartman, 2014; The Namibian, 2014).

SUMMARY TOTALS

RANGE OF INFORMED GUESS

KEY TO REASONS FOR CHANGE

DA: Different Area; DD: Data Degraded; DT: Different Technique; NA: New Analysis; NG: New Guess; NP: New population; PL: Population Lost; RS: Repeat Survey (RS denotes a repeat survey that is not statistically comparable for reasons such as different season); - : No Change

PFS

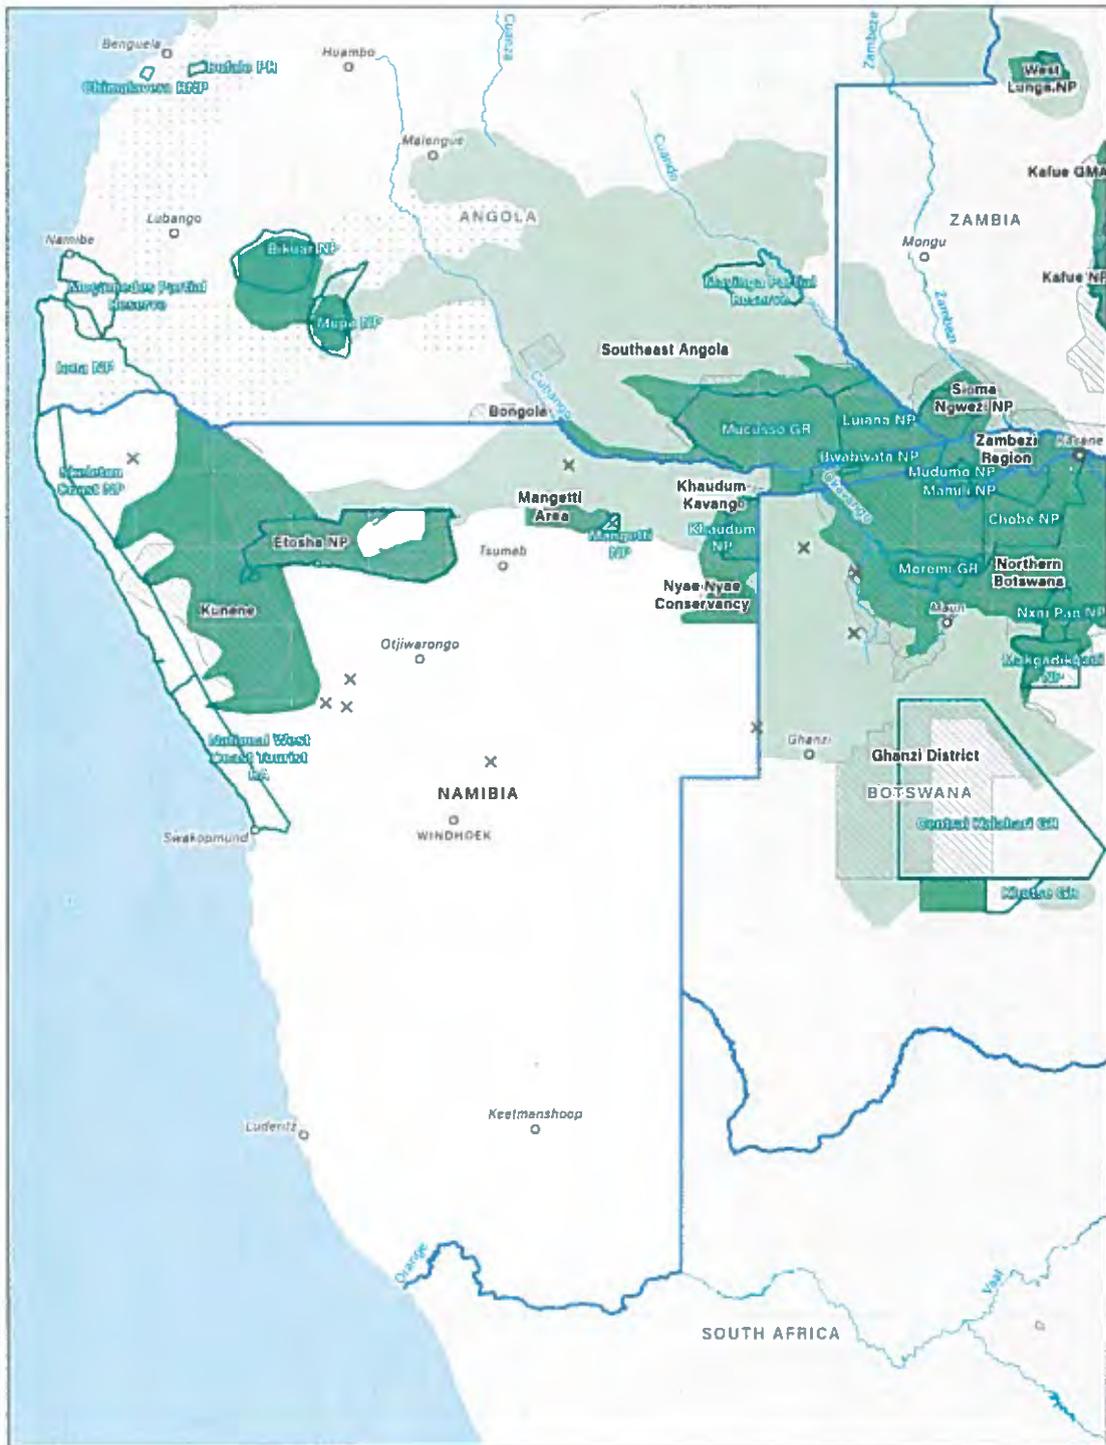

Priority for Future Surveys (PFS) is ranked from 1 to 5 (highest to lowest). Based on the precision of estimates and the proportion of national range accounted for by the site in question, PFS is a measure of the importance and urgency for future population surveys. All areas of unassessed range have a priority of 1. See Introduction for details on how the PFS is derived.

KEY TO SURVEY REPORT

AS: Aerial Sample Count; AT: Aerial Total Count; DC: Dung Count; GD: Genetic Dung Count; GS: Ground Sample Count; GT: Ground Total Count; IG: Informed Guess; IR: Individual Registration; OG: Other Guess. Survey Reliability is keyed A-E (best to worst).

**IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of
the Convention on International Trade in Endangered
Species (CITES) and/or U.S. Endangered Species Act (ESA)**

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1.a. Last Name Studer		1.b. First Name Stanley		1.c. Middle Name/Initial (b) (6)	1.d. Suffix
2. Date of Birth (mm/dd/yyyy) (b) (6)		3. Telephone Number		3.a. Alternate Telephone Number	
4. E-mail address					

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)			
2. Tax identification no.		3. Description of business, agency, Tribe, or institution			
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix		
5. Principal officer title		6. Primary contact name			
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address		

Section C: All applicants complete address information

1.a. Physical address (Street address, Apartment #, Suite #, or Room #, no P.O. Boxes) (b) (6)				
1.b. City San Antonio	1.c. State TX	1.d. Zip code/Postal code (b) (6)	1.e. County/Province	1.f. Country USA
2.a. Mailing address (include if different than physical address; include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

Section D: All applicants MUST complete

<p>1. Attach the nonrefundable application processing fee in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee-- attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].</p> <p>2. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50 Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.</p>

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least 90 days for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

- 3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

- 4. For each trophy to be imported, provide:

- a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

Loxodonta Africana

- b. Sex (if known). Male

- 5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Namibia, Bwabwata West National Park, S 18 09' C 162 E 021 42'C 495, Caprivi Area, Rundu Town

- b. Date wildlife is to be hunted:

July 1st to July 21st, 2018

- c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

Hunt Africa Namibia, Professional Hunter: Jacobus Hugo Pienaar (Senior)
PO Box 1100 Gobabis Omaheke Namibia, Farm Hester 407, Gobabis, Namibia

- 6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

- b. Date wildlife was hunted:

- c. Name of hunting outfitter, safari company, or professional hunter you hunted with:
- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). Not Hunted Yet
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Mr. Louw Nel
 Business Name: Tropaendienste Taxidermy
 Address: PO Box 21068, Windhoek, Namibia
 City:
 State/Province:
 Country, Postal Code: .

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted?

Population growth of herds up to 500 at a time. Last game count was in Oct 2017 and estimated resident elephant in the area of more than 2000

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

40% of the trophy fees go to the Namibia government to the Game Products Trust Fund.
 The funds are used for repairs, maintenance and salaries for government game rangers in areas where there are Elephant roaming. Another 40% go to the community that is used to pay game guards and for the uplifting of the KWE people.

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

The outfitter pays informers in the area to help with anti poaching activities.

The outfitter / Professional Hunter is a trustee on HUAP (Hunters United Against Poaching) Trust

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

- 10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

- 11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: Stan Shultz (b) (6) _____ Date: 6/11/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

- 12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from [the list of designated ports](#). If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

**Conservation Force
Operator Enhancement Questionnaire**

v.5/8/18

1. Name of area operator: Huntafrica Namibia Safaris
 - a. Years in business: 31 years
 - b. Name of company conducting hunt: Huntafrica Namibia Safaris
 2. Name of concession: Bwabwata West National park Size in km²: 3800
 - a. Land tenure: Government lease
 - b. Length of concession agreement: 5 years Can it be renewed? Yes
 - c. Are there any special obligations under the concession agreement such as annual reporting, poaching control, community investment, community employment, etc.? If so, please explain:
 1. Yes, Annual Reporting: Detailed report to the Ministry of Environment and Tourism of each client and every animal that was hunted.
 2. Poaching control. Yes. By the government as well as the Namibia Defense force and the community rangers
 3. Community employment – all staff employed out of the community
 4. Training - the operator provide training in different fields. Eg -drivers, teachers, computer courses, building of training center etc.
 - d. Please provide the concession location and nearest city. Please attach a map or maps with the boundaries marked and showing the nearest city: Rundu (bigger town) Divundu(very small town)
 - e. If the concession borders a national park, please provide the park name: Inside the Bwabwata National Park
 - f. Description of general and distinctive habitat features and any water features:
Bushveld . The Okavango River forms the Western border.
 3. Are there any communities living in the concession? Yes
 - a. If so, estimated number of people or villages in the concession? One village Omega 1000 people
 4. Are there communities bordering this concession? Yes
 - a. If so, estimated number of people or villages around the concession? Muchiko area 500

**Conservation Force
Operator Enhancement Questionnaire**

v.5/8/18

5. Relevant game populations in the concession:¹

Species name	Relative Abundance (dense/avg./sparse)	Est. population	3-Year trend (up/down/ stable)	How monitored?
Elephant	Dense 2500		Stable	By counts
Lion	Sparse		Up	
Leopard	Dense		Stable	
Prey species	Buffalo, Sable, Roan, Kudu, Impala, Warthog, Waterbuck, Reedbuck, Buschbuck & Duiker			

6. Total employment number: 40

a. Please identify the number and type of all employees:

Type	Total number of this type	Number of this type who are local/from nearby communities
Professional Hunters	2	
Trackers	11	11
Anti-poaching scouts/rangers	20	20
Other anti-poaching	NDF	
Cooks/housekeepers	4	4
Community coordinators	2	2
Managers	1	
Biologists	1	
Others: _____		

7. Number of staff employed in the off-season: 11

a. Please identify the number and type of staff that are engaged when the season is not open:

Type	Total number of this type	Number of locals/from nearby communities	When employed?
Anti-poaching staff	Full staff		
Managers	1		
Maintenance	0		
Road opening/construction	30 people		
Community relations personnel	1		
Others: _____			

8. Anti-poaching efforts:²

Re: Application for Import of a Sport-Hunted Lion Trophy

Dear Chief Van Norman:

Enclosed please find one application to import a sport-hunted lion trophy taken in Zambia in 2017. This lion was hunted with Andrew Baldry of Royal Kafue Safaris. Conservation Force provided specific enhancement information regarding Royal Kafue and we respectfully request that this permit be approved upon consideration of the information previously submitted by Conservation Force and the Department of National Parks and Wildlife in Zambia.

Please do not hesitate to contact us if you have questions.

Sincerely,

Regina Lennox

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my application for a permit to import a leopard and a threatened-listed lion trophy from Africa.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my lion trophy at the following address:

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual
1.a. Last name: Park
1.b. First name: Mance
1.c. Middle name or initial: (b) (6)
1.d. Suffix:
2. Date of birth: (b) (6)
3. Social Security No.: (b) (6)
4. Occupation:
5. Attainment/Doing business as: N/A
6.a. Telephone number: (b) (6)
6.b. Alternate telephone number:
6.c. Fax number:
6.d. E-mail address:

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution
1.a. Name of business, agency, Tribe, or institution: N/A
1.b. Doing business as (dba):
2. Tax identification no.:
3. Description of business, agency, Tribe, or institution:
4.a. Principal officer Last name:
4.b. Principal officer First name:
4.c. Principal officer Middle name/initial:
4.d. Suffix:
5. Principal officer title:
6. Primary contact name:
7.a. Business telephone number:
7.b. Alternate telephone number:
7.c. Business fax number:
7.d. Business e-mail address:

C. All applicants complete address information
1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes): (b) (6)
1.b. City: Huntsville
1.c. State: TX
1.d. Zip code/Postal code: (b) (6)
1.e. County/Province:
1.f. Country: USA
2.a. Mailing Address (include if different than physical address; include name of contact person if applicable): (b) (6)
2.b. City: Huntsville
2.c. State: TX
2.d. Zip code/Postal code: (b) (6)
2.e. County/Province:
2.f. Country: USA

D. All applicants MUST complete
1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100, nonrefundable processing fee.
2. Do you currently have or have you ever had any Federal Fish and Wildlife permits? Yes [X]
3. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Part 13 of Title 50, Code of Federal Regulations. I understand that I am subject to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but are unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 2: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 3: USFWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Note 4: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-5 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. For each trophy to be imported, provide:
 - a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
Panthera Leo
African Lion
 - b. Sex (if known).
Male
2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
 - a. Country and PLACE (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:
 - b. Date wildlife is to be hunted:
 - c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks).
3. **IF THE ANIMAL IS DEAD**, please enter the following:
 - a. Country and PLACE (area, region, GIS coordinates, ranch AND nearest city) where wildlife was removed from the wild (provide a map if possible):
Lundu, Musalangu, Zambia
See coordinates on attached permit
 - b. Date wildlife was hunted:
06/26/2017

- c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks).

Skin, floating bones, skull, claws, any parts needed for life-size mount

- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export documents]:

4142K Chifwema Road
New Kasama, Lusaka, Zambia

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will also appear on your Namibian export permit and must match the U.S. import permit].

Name: Mike Borman
Business Name: Bangweulu Taxidermy
Address: 4142K Chifwema Road
Address:
City: New Kasama, Lusaka, Zambia
State/Province:
Country, Postal Code:

5. Please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., population status or trend data; how the funds from license/trophy fees will be spent; what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. If you are a broker or taxidermist applying on behalf of a foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that my client may only import two leopard trophies in one calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that I may only import two leopard trophies in one calendar year (if applicable). In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: Mance Park (b) (6) Date: 02/06/2018

Be aware that there may be additional permitting or approval requirements by your local or state government, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist you, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish permit mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

John J. Jackson III 504/837-1233
jjj@conservationforce.org

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

Royal Kafue and the Kaindu Natural Resources Trust

By Jim Wojciehowski

The year was 2007. The noise echoing across the water carried a disturbing message.

The mixture of human voices and cattle, coupled with rising smoke from campfires and drying racks, explained the complete lack of wildlife.

PH Andrew Baldry witnessed the spectacle from across the river in the Langa Luswishi Game Management Area (GMA). He watched a piece of wild Africa rapidly being depleted of its resources with no plan for the future.

The land was owned by the Kaindu community and the title held by a trust – the Kaindu Natural Resources Trust, initially formed by the Danish International Development Agency; but the project floundered when the donors pulled out. The squatters that Baldry observed were not from the community.

Baldry, a fully licensed professional hunter for over 15 years, was very aware of the African adage: "If it pays, it stays." If the local game did not produce a sustained income for the local community, little could be done to stem the poaching and the rapid depletion of the area's wildlife resources.

Andrew made a plan to revive the once flourishing Eden. With the backing of the local community and chief, the concept eventually evolved into Royal Kafue, which would host its first-ever safari in June 2012.

With adequate financial backing, at least for the start-up, Andrew entered into a lease agreement with the community Trust, and instituted anti-poaching patrols by hiring local scouts who would be led by an infamous ex-commercial bush poacher, Green. Who is better suited to outwit a poacher than someone who knows all the tricks of the trade? Green's amazing tracking skills and knowledge of the local habitat also qualified him as head tracker once the safari camp opened for operation.

I first contacted Andrew about hunting together in the Luangwa Valley in 2010. The topic of what would become Royal Kafue came up via e-mail.

Royal Kafue was already in the works, but

After allowing the game in the "Kafue Royal" area several years to recover, in 2012 PH Andrew Baldry (L) successfully hunted lion with Jim Wojciehowski (R), generating income from hunting for the Kaindu Natural Resources Trust.

Andrew felt it would take at least four years for the area to begin to rebound; initially, he didn't want to inject any hunting pressure into the mix. But he was delighted with the rapid returning of game. He knew cats wouldn't return unless ample prey and cover existed.

He'd secured a lion and a leopard on quota, plus a limited number of plains game. His assessment of the conditions was totally honest: "Expect game to be difficult to see in June and July. I plan on leaving the majority of the tall grass to give the cats cover."

I sent my money, including a sizable amount to cover trophy fees. It was obvious this start-up was financially taxing with no large financial backers. The many Skype conversations with Andrew gave me a feeling of trust in this man, as well as a drive to be part of this project, myself.

A partnership of need brought together PH Andrew Baldry, my wife Joyce, and me; but the true benefactor of this alliance is the wildlife of Royal Kafue and the community of Kaindu.

By the time we arrived in camp in June 2012, the game had returned in numbers far exceeding the hopes of Andrew and Green. They had prepared the area perfectly by selective burning, interspersing these areas with lush grass cover. Even the once transient buffalo population remained resident for our entire 21-day safari. And

with the buffalo came the lion.

We heard lion regularly calling at night, and on the 15th morning in camp, while enjoying coffee in the predawn coolness, we heard them as they moved toward camp. As the light increased, the sound became louder.

We quickly grabbed our rifles and headed down the road on foot to try and intercept the moving chorus. The calls came from a hunting coalition of four mature lions – three males and a female. The group had decimated one of our baits; on their way to water, they were now approaching camp.

The lions hid as we passed on foot. The sound of brush moving behind our group made us turn in time to see two large, heavy-maned mature males and a lioness emerge from cover. The cats deemed us to be insignificant and crossed an open area into the tall grass. A fourth lion revealed himself to be a brute of a male and, with Andrew's challenging grunt, he stopped to evaluate the source of the call.

My frontal shot buckled the cat, and he spun to retreat noisily into cover. We found him dead 100 yards on, in deep cover, after a tense side-by-side follow-up on foot.

Luckily, the chairman and treasurer of the Kaindu Trust, Boniface and Joshua, were in camp and able to join the celebration. Later, they privately thanked me for helping to finance the start-up and contributing to its success. I assured them PH Andrew Baldry alone had earned their gratitude for the implementation of his vision.

Two months after the hunt, Andrew told me of his plans to sink boreholes to provide permanent water for the game. He is looking to attract like-minded investors to further the cause of Royal Kafue for the benefit of the game and the people of Kaindu.

Jim Wojciehowski is a physician assistant living in Alaska. An avid hunter/conservationist, he discovered the magic of Africa on his first trip in 2010. This was his third safari. ♡

2012 SAFARI HUNTING REPORT

KAINDU NATURAL RESOURCES TRUST

Natural Resources Manager Green Kabinda

In the first year of safari operation Kaindu Natural Resources Trust in conjunction with the private sector and ZAWA realizes profits from Zambia's first community owned game ranch.

The results from the first year of operation have been unsurpassed in Zambia's game ranching history.

Not only has the Kaindu Game Ranch utilized over 90% of their allocated quota the trophy quality has only been matched by Zambia's prime hunting concessions. The continual support from ZAWA Research Department has to be commended as to the community scouts and Kaindu representatives who have diligently managed their natural resources.

It was recorded in the 2009 survey that only a handful of wild animals survived on the titled KNRT farm 10145 and that most indigenous species were absent. Illegal fishing and poaching was commonplace in the region.

In 2010 the KNRT entertained a partnership with the private sector in wildlife management and the company Royal Kafue Ltd was formed. The Kaindu community retains a significant shareholding in the development company and receives dividends from private sector investments in tourism.

Royal Kafue loaned the community equipment and the human resources in order to conduct safari hunting at an international standard and have attracted clientele from across the globe. The quality of hunting and the abundant wildlife has resulted in advanced bookings for both 2013 and 2014 with an estimated turnover ZK800,000,000 per annum.

From the first hunt alone the community realized a sum of ZK25,000,000, which was dedicated to social services. In addition safari licenses in excess of ZK15,000,000 were purchased and donated to the community for ceremonial purposes.

These communal lands have now become a valuable asset of which sustainable incomes can now be earned from the protection of the wildlife resource.

Green Kabinda.

KNRT NATURAL RESOURCES MANAGER.

The community game ranch saw 100% utilization of quota on trophy Lion, Buffalo, Sable, Roan, Hartebeest, Sitatunga and a host of other lesser species.

Hunting clients stated that it was without doubt one of Zambia's finest hunting destinations. Subsequent favorable reports have been posted on Internet hunting sites and YouTube. Without exception every client harvested their desired species and all of the animals were of record book class.

Two Sable measured in excess of 45 inches and the Lion was the biggest taken in the region in recent years. Two Roan in excess of 26 inches, and Buffalo of 40 inches were commonplace. The renowned professional hunter Andrew Baldry remarked that the

hunting was beyond expectations and has managed to fully book his clients into the game ranch for 2013 and 2014.

The increase in wildlife and especially the more sought after species will warrant an increase in quotas across the board. Some species such as a Zebra that were previously in low numbers and can be included on the quota. Species such as Elephant and Hippopotamus are now resident and often seen within the vicinity of camp. Important grasslands and woodland have been preserved from fire and logging. Whilst illegal fishing persists it is envisaged that the community will control and profit from this activity as a separate project for 2013.

Sitatunga, Black Lechwe and Tsessebe were also taken in Bangweulu swamps.

The increase in wildlife has reduced the annual livestock conflicts with Lion.

The sale of one successful Lion safari earned sufficient funds to establish the safari camp and infrastructure required for 2012 hunting season. It provided funds that enabled scouts to implement systems that reduced human and wildlife conflicts. Important species such as Lion and other fragile predator populations have increased dramatically under an intensive management program.

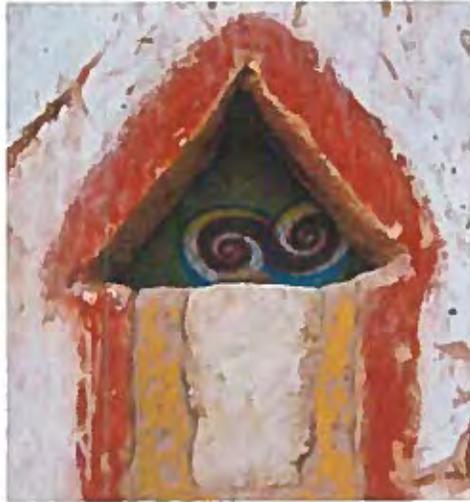

A special thank you must be extended to the Natural Resources Scouts who have worked tirelessly in the training in the protective management of their communal lands.

It is the community themselves with the full support of His Royal Highness Chief Kalindu who is to be commended for their desire to realize incomes from both their land and natural resources.

The cattle killing Lion (see photo bottom right) taken by client first client Jim Wojohowski from Alaska was one of the largest taken in recent years and proves that the community game ranch retains a healthy population of the specie.

It is envisaged that what with the increase in game populations and that research would conclude that the Lion numbers will follow suit. However as a conservation measure the KNRT feels the game ranch can sustain the off take of one mature male if proven problematic to the community.

KNRT

The Ka'indu Natural Resources Trust has pursued this project since 2005. The model was initially supported by DANIDA and GRZ as Ka'indu was identified as a Kafue community that did not derive benefit from safari hunting.

In 2010 the opportunity to partner the community was tendered and the successful applicants formed the development company Royal Kafue Ltd of which the community are shareholders. Safari hunting is but the first of a number of tourism activities earmarked for our lands. Profits from managed land use, tourism, game ranching and agriculture are already making a favorable impact on our society.

Our thanks to ZAWA and especially Mr. Siamakonda who has worked tirelessly to see this project launched

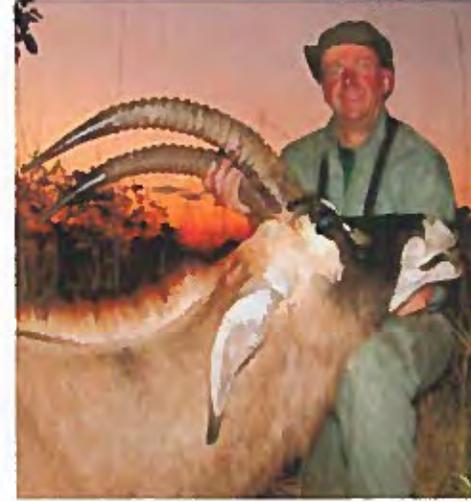

ROYAL KAFUE

A permanent 4 bed camp of international standards was constructed and equipped for the 2012 safari season. All staff were employed from the Ka'indu community and trained in wildlife management and safari procedures by Mr. Green Kabinda and resident professional hunter Mr. Andrew Baldry.

The development company Royal Kafue Ltd loaned vehicles and auxiliary equipment.

Roads were cut and boundaries cleared. Natural resource management was implemented and staffed. Community scouts were equipped and communications installed courtesy of Mushingashi Conservancy.

The camp and the facilities are to be extended for the 2013 season

Enhancement Finding
Applicant: Mance (b) (6) Park (PRT-76149C)

Mance (b) (6) Park submitted an application on February 12, 2018, for the importation of one male African lion (*Panthera leo melanochaita*) from Lusaka, Zambia for the purpose of enhancing the propagation and survival of the species in the wild. After evaluating the available information submitted with the application, information provided by the government of Zambia, other information available to the Service, and comments received from interested parties, the U.S. Fish & Wildlife Service (Service) has determined that the importation of the sport-hunted trophy taken June 26, 2017, from this wild lion (*P. l. melanochaita*) population within Zambia meets the enhancement criteria under 50 CFR 17.32.

Governance of the Lion in the United States:

On October 29, 2014, the Service published in the Federal Register a finding that listing the African lion subspecies (*Panthera leo leo*) as a threatened species under the Endangered Species Act (Act or ESA) was warranted and proposed a rule under Section 4(d) of the Act to provide conservation measures for the African lion. (79 Fed. Reg. 64472.) On December 23, 2015, after fully considering the comments from the public and the peer reviewers on the proposed rule, the Service published in the Federal Register the final rule in which the taxonomic classification of the Asiatic lion (previously classified as *P. l. persica* and listed as an endangered species under the Act) was changed to *P. l. leo* (Asia and western, central and northern Africa) and listed as an endangered species, and the *P. l. melanochaita* (southern and eastern Africa) subspecies was listed as a threatened species with a rule under Section 4(d) of the Act, which is set forth at 50 CFR 17.40(r). 80 Fed. Reg. 79999. The effective date of this listing was January 22, 2016. Therefore, as of January 22, 2016, the lion subspecies *Panthera leo melanochaita*, whose range includes Zambia, is listed as threatened under the Act and is regulated under an ESA Section 4(d) special rule [50 CFR 17.40(r)].

Section 9 of the Act and our implementing regulations at 50 CFR 17.21 and 50 CFR 17.31 set forth a series of general prohibitions that apply to all endangered and threatened wildlife, respectively, except where a 4(d) rule applies to threatened wildlife, in which case the 4(d) rule contains all the

applicable prohibitions and exceptions. Under the 4(d) rule for *P. l. melanochaita*, all of the prohibitions under 50 CFR 17.31 apply to *P. l. melanochaita* specimens. These prohibitions, at 50 CFR 17.21 and 17.31, in part, make it illegal for any person subject to the jurisdiction of the United States to “take” (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or to attempt any of these) within the United States or upon the high seas; import or export; deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever, in the course of commercial activity; or sell or offer for sale in interstate or foreign commerce any lion specimens. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken in violation of the Act. Permits may be issued to carry out otherwise prohibited activities involving endangered and threatened wildlife species under certain circumstances. Regulations governing permits for endangered species, such as *P. l. leo*, are codified at 50 CFR 17.22. Regulations governing permits for threatened species, such as *P. l. melanochaita*, are codified at 50 CFR 17.32.

In sum, under paragraph 17.40(r)(1), all the prohibitions and exceptions under 50 CFR 17.31 and 50 CFR 17.32 apply to *P. l. melanochaita*. Accordingly, the Service may authorize the import of a sport-hunted lion trophy from Zambia, but only if it first makes a finding that permitting import of a trophy would enhance the survival of the species in the wild.

As we explained when finalizing the 4(d) rule for *P. l. melanochaita*, any person wishing to conduct an otherwise prohibited activity, including all imports of *P. l. melanochaita* specimens, must first obtain a permit under 50 CFR 17.32. As with all permit applications submitted under 50 CFR 17.32, the individual requesting authorization to import a sport-hunted trophy of *P. l. melanochaita* bears the burden of providing information in their application showing that the activity meets the requirements for issuance criteria under 50 CFR 17.32. In some cases, such as for import of sport-hunted trophies, it is not always possible for the applicant to provide all of the necessary information needed by the Service to make a positive determination under the Act to authorize the activity. In such cases, the Service may consult with the range country and other interested parties to the extent practicable to obtain necessary information. The Service will make the required findings on sport-hunted trophy imports of *P. l. melanochaita* on an individual application basis, however information obtained for the country as a whole will continue to be considered as it contains information pertinent to the Service’s evaluation. Any new information obtained or submitted to the Service will be evaluated and considered in all future findings for sport-hunted trophies of *P. l. melanochaita* taken in Zambia.

General considerations:

As we also explained when finalizing the 4(d) rule, our threatened species permitting regulations at 50 CFR 17.32 provide issuance criteria for threatened species permits [(50 CFR 17.32(a)(2))], but do not specify what would constitute the enhancement of propagation or survival with regard to authorizing the import of parts or products of *P. l. melanochaita*, including sport-hunted trophies. Therefore, when making a determination of whether an otherwise prohibited activity enhances the propagation or survival of *P. l. melanochaita*, the Service examines the overall conservation and management of the subspecies in the country where the specimen originated and whether that management of the subspecies addresses the threats to the subspecies (*i.e.*, that it is based on sound scientific principles and that the management program is actively addressing the current and longer term threats to the subspecies). In this review, we evaluate whether the import of a sport-hunted lion trophy taken in Zambia contributes to the overall conservation of the species

by considering whether the biological, social, and economic aspects of a program from which the specimen was obtained provide a net benefit to the subspecies and its ecosystem.

The Service has evaluated Mr. Park's application involving a *P. l. melanochaita* sport-hunted trophy taken in Musalangu GMA, Lundu, Zambia, in the context of enhancement of propagation or survival in accordance with our threatened species permitting regulations at 50 CFR 17.32 and issuance criteria for threatened species permits [(50 CFR 17.32(a)(2))]. These include, in addition to the general permitting criteria in 50 CFR 13.21(b):

- (i) Whether the purpose for which the permit is required is adequate to justify removing from the wild or otherwise changing the status of the wildlife sought to be covered by the permit;
- (ii) The probable direct and indirect effect that issuing the permit would have on the wild populations of the wildlife sought to be covered by the permit;
- (iii) Whether the permit, if issued, would in any way, directly or indirectly, conflict with any known program intended to enhance the survival probabilities of the population from which the wildlife sought to be covered by the permit was or would be removed;
- (iv) Whether the purpose for which the permit is required would be likely to reduce the threat of extinction facing the species of wildlife sought to be covered by the permit;
- (v) The opinions or views of scientists or other persons or organizations having expertise concerning the wildlife or other matters germane to the application; and
- (vi) Whether the expertise, facilities, or other resources available to the applicant appear adequate to successfully accomplish the objectives stated in the application.

In addition to these factors, particularly in relation to sport hunting, we find the *IUCN Species Survival Commission (SSC) Guiding Principles on Trophy Hunting as a Tool for Creating Conservation Incentives, Ver. 1.0* (IUCN SSC 2012), to provide useful principles, which, considered in conjunction with our threatened species issuance criteria, will aid the Service when making this enhancement finding for the importation of a sport-hunted trophy of *P. l. melanochaita* from Lusaka, Zambia. This document sets out guidance from experts in the field on the use of trophy hunting as a tool for "creating incentives for the conservation of species and their habitats and for the equitable sharing of the benefits of use of natural resources" (IUCN SSC 2012, p. 2) and recognizes that recreational hunting, particularly trophy hunting, can contribute to biodiversity conservation and more specifically, the conservation of the hunted species.

The SSC document lays out five guiding principles that, considered in conjunction with our threatened species issuance criteria, will aid the Service in making this enhancement finding for importation of a sport-hunted trophy of *P. l. melanochaita*:

- (a) *Biological sustainability*: The hunting program cannot contribute to the long-term decline of the hunted species. It should not alter natural selection and ecological function of the hunted species or any other species that share the habitat. The program should not inadvertently facilitate poaching or illegal trade in wildlife by acting as a cover for such illegal activities.

The hunting program should also not manipulate the ecosystem or its component elements in a way that alters the native biodiversity.

(b) *Net Conservation Benefit*: The biologically sustainable hunting program should be based on laws, regulations, and scientifically based quotas, established with local input, that are transparent and periodically reviewed. The program should produce income, employment, and other benefits to create incentives for reducing the pressure on the target species. The program should create benefits for local residents to co-exist with the target species and other species. It is also imperative that the program is part of a legally recognized governance system that supports conservation.

(c) *Socio-Economic-Cultural Benefit*: A well-managed hunting program can serve as a conservation tool when it respects the local cultural values and practices. It should be accepted by most members of the community, involving and benefiting local residents in an equitable manner. The program should also adopt business practices that promote long-term economic sustainability.

(d) *Adaptive Management: Planning, Monitoring, and Reporting*: Hunting can enhance the species when it is based on appropriate resource assessments and monitoring (e.g., population counts, trend data), upon which specific science-based quotas and hunting programs can be established. Resource assessments should be objective, well documented, and use the best science available. Adaptive management of quotas and programs based on the results of resource assessments and monitoring is essential. The program should monitor hunting activities to ensure that quotas and sex/age restrictions of harvested animals are met. The program should also generate reliable documentation of its biological sustainability and conservation benefits.

(e) *Accountable and Effective Governance*: A biologically sustainable trophy-hunting program should be subject to a governance structure that clearly allocates management responsibilities. The program should account for revenues in a transparent manner and distribute net revenues to conservation and community beneficiaries according to properly agreed decisions. All necessary steps to eliminate corruption should be taken and to ensure compliance with all relevant national and international requirements and regulations by relevant bodies such as administrators, regulators and hunters.

This approach to enhancement findings for the importation of a sport-hunted trophy of *P. l. melanochaita* is consistent with the purpose and intent of the Act. As such, before the Service will authorize the importation of a sport-hunted trophy, we must determine that the trophy-hunting program is managed to ensure the long-term survival of the species. As part of this evaluation, we recognize that in many parts of the world, wildlife exists outside of protected areas and must share the same habitat and compete with humans living in these areas for space and resources. As identified in the *IUCN SSC Guiding Principle on Trophy Hunting as a Tool for Creating Conservation Incentive*, if communities that share these resources with wildlife do not perceive any benefits from the presence of wildlife, they may be less willing to tolerate the wildlife. However, under certain circumstances, trophy hunting can address this problem by making wildlife more valuable to the local communities, thus encouraging community support for managing and conserving the hunted species, as well as other species.

In evaluating whether the importation of Mr. Park's trophy of *P. l. melanochaita* would be authorized pursuant to 50 CFR 17.32, in accordance with our threatened species issuance criteria, we examined how Zambia's management program for lions addresses the three main threats that have led to the decline of the subspecies: habitat loss, loss of prey base, and human-lion conflict. When examining a management program and whether this trophy taken as part of that program meets the issuance criteria, we study a number of factors. Some of the factors we considered include whether the program is based on sound scientific information and identifies mechanisms that would arrest the loss of habitat or increase available habitat (*i.e.*, by establishing protected areas and ensuring adequate protection from human encroachment). We considered whether the management program actively addresses the loss of the lion's prey base by addressing poaching or unsustainable offtake within the country. Several components of a management plan from which trophy imports could meet the issuance criteria would be whether there are government incentives in place that encourage habitat protection by private landowners and communities, and incentives provided to local communities to reduce the incursion of livestock into protected areas or to actively manage livestock to reduce conflicts with lions. We examined if the hunting component of the management program supports all of these efforts by looking at whether hunting concessions/tracts are managed to ensure the long-term survival of the lion, its prey base, and habitat. Hunting, if properly conducted and well managed, can generate significant economic benefits that may contribute to the conservation of lions. In looking at whether we are able to authorize the import of a trophy under the issuance criteria at 50 CFR 17.32(a)(2), we examined if the trophy hunting provides financial assistance to the wildlife department to carry out elements of the management program, and if there is a compensation scheme or other incentives to benefit local communities that may be impacted by lion predation. We also considered how the U.S. hunter's, in this case, Mr. Park's, participation in the hunting program contributes to the overall management of lions within the country.

The management program in Zambia for *P. l. melanochaita* is expected to address, but is not limited to, evaluating population levels and trends; the biological needs of the species; quotas; management practices; legal protection; local community involvement; and use of hunting fees for conservation. In evaluating these factors, we work closely with the range countries and interested parties to obtain the information. By allowing entry into the United States of *P. l. melanochaita* trophies from range countries that have science-based management programs, we anticipate that other range countries would be encouraged to adopt and financially support the sustainable management of lions that benefits both the species and local communities. In addition to addressing the biological needs of the subspecies, a scientifically based management program will provide economic incentives for local communities to protect and expand *P. l. melanochaita* habitat.

Basis for Finding:

On February 2, 2016, the Service sent a letter to Zambia's Wildlife Authority with a list of questions that would aid the Service in evaluating the overall conservation and management of the subspecies, *P. l. melanochaita*, in Zambia and whether that management addressed the three main threats that have been identified as the reason for the decline of the species: habitat loss, loss of prey base, and human-lion conflict. Additionally, in the letter the Service referenced the *IUCN Species Survival Commission (SSC) Guiding Principles on Trophy Hunting as a Tool for Creating Conservation Incentives, Ver. 1.0* (IUCN SSC 2012), as it provides useful principles, which when

considered in conjunction with the Service's permit issuance criteria, would aid when making the required enhancement findings for permitting importation of sport-hunted lion trophies.

In response to our February 2, 2016, letter, Zambia's Department of National Parks and Wildlife (DNPA), herein referred to as DNPW (DNPW 2016), provided a binder of documentation describing Zambia's lion population and management plans. In addition, the Service met with representatives of Zambia's DNPW during the 17th Meeting of the Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) in Johannesburg in late September 2016. The DNPW binder documents, dated May 5, 2017, along with the Service's final rule on the lion listing under the Act, relevant information obtained separately through open sources such as IUCN documents, relevant information from DNPW, comments received from interested parties, and Mr. Park's application were the basis of this finding.

Governance of Lions in Zambia:

The responsibility for implementing wildlife conservation laws in Zambia dates back to the 1930s or 1940s with the establishment of the Department of Tsetse, Fisheries, and Wildlife. In the late 1950s, this agency became the Department of Game and Fisheries and operated under this designation until the mid-1970s, when it became the Department of National Parks Wildlife Service (DNPWS) who was responsible for the protected area network. In 1999, the Government of Zambia transformed this agency into Zambia's Wildlife Authority (ZAWA), creating a semi-autonomous agency responsible for the management and protection of this network, with statutory powers derived through the Zambia Wildlife Act No. 12 of 1998. However, this agency, due partly to its semi-autonomy, had a low funding capability, relying primarily on revenue from tourism, which also included sport hunting. Between 1999 and 2005, ZAWA struggled with their law enforcement capabilities due to inadequate resources. The costs associated with transforming DNPWS to ZAWA continued to affect the financial and staff allocations for law enforcement activities. Large sums of money that could have been utilized by law enforcement were apparently channeled into tasks involved in the transformation process.

Since 2005, in partnership with the Zambia Lion Project (ZLP), ZAWA (now DNPW) established a voluntary program to assess and age lions taken as trophies (DNPW 2016). From 2006 through 2012, DNA samples were taken from teeth of both live and trophy lions in order to estimate the age of lions taken as trophies (DNPW 2016). The results from these past sampling efforts helped demonstrate the performance of the hunting sector during this time. It has also provided a baseline for comparing future performance.

By 2010, Zambia developed a ten-year Conservation Strategy and Action Plan for the African lion. Since the approval of this strategy, research has begun and management actions have been taken to address local community benefits, human-lion conflict, land use planning and zoning, trade, and monitoring (DNPW 2016). Some of the lion-related studies that were initiated are the Zambia Carnivore Programme (ZCP), Kafue Lion Project, and Zambia Lion Project (ZLP) (DNPW, 2106). The development of this strategy also led to the employment of 12 ecologists, with three committed to spending 70% of their work time on lion-related issues (DNPW 2016).

In 2015, ZAWA was disbanded and reincorporated as a government department, the Department of National Parks and Wildlife (DNPW). In addition, the Zambia Wildlife Act No. 12 of 1998 was

repealed. However, the Wildlife Act No. 14 of 2015 (Wildlife Act) is still the principle legislation guiding the management of wildlife in Zambia through a system implemented and enforced by DNPW with assistance from stakeholders (DNPW 2016).

The Wildlife Act is administered by DNPW under the Ministry of Tourism. DNPW is headed by a Director, with assistant directors who command 4 elements of the department: Principal Warden-Operations Wildlife Law Enforcement Unit, Principal Warden-Conservation Unit, Principal Engineer Infrastructure Development Unit, and Principal Natural Resource Management Officer Community-based Natural Resource Management Unit. *The Wildlife Law Enforcement Unit* is comprised of 1,250 Wildlife Police Officers who are responsible for investigating and enforcing wildlife crimes within 236,376 km² of wildlife area (average 189 km² per officer). The Zambian government has also committed to adding an additional 850 officers by 2018 (600 new officers were reportedly added in 2016). *The Wildlife Conservation Unit* is responsible for mitigating human-wildlife conflict, facilitating wildlife officer trainings, regulating private wildlife estate operations, managing ecosystems, managing landscape conservation of certain species, and both developing and implementing park regulations. *The Infrastructure Development Unit* is responsible for construction and maintenance of infrastructures and machinery within protected areas. *The Community-based Natural Resource Management Unit* is responsible for co-managing Game Management Areas (GMAs) with local communities. Duties include providing technical support to Community Resource Boards regarding the management of human-natural resources in GMAs and open areas. This unit facilitates the election of the Community Resources Board members and the election of Village Action Groups. Responsibilities also include monitoring the use of funds disbursed to Community Resources Boards and training village scouts and Community Resources Board members.

The lion is a protected species under the Wildlife Act. It is a criminal offense to hunt, kill, capture, or possess a lion without a license. The lion is also protected under private wildlife estate legislation and statutory instruments implemented with the (now repealed) Wildlife Act of 1998 and carried over to the Wildlife Act. Additionally, in 2016, four new statutory regulations were reportedly enacted to address various aspects of lion management to complement the operation of the new Wildlife Act. They included the Zambia wildlife regulations for granting of hunting concessions, lion sport hunting, keeping of big cats in captivity, and conducting ecological or research wildlife assessments (DNPW 2016).

In addition to Zambia's domestic laws, it is also a Party CITES. The lion is listed in Appendix II of the Convention. As an Appendix-II species, certain criteria must be met before such species can be exported, including findings from the exporting country's CITES Management Authority that the specimen was legally acquired and the country's Scientific Authority that the export will not be detrimental to the survival of the species in the wild. In their reply to our inquiry, Zambia provided a copy of their May 5, 2016, non-detriment finding for lions. This finding states that "(t)he CITES Scientific authority of Zambia has considered the population of lion in Zambia; the quota-setting system and current precautionary quota of only 24 lions; the newly implemented age-based harvest policy; the limited offtake; the adaptive management of lion; and the substantial revenues generated for DNPW operations, anti-poaching, and community development." They further explain that their positive finding was based on three pillars that include a "precautionary" quota, age-based harvesting, and community benefits.

Current Lion Status in Zambia

Lion Range:

According to DNPW, the lion range in Zambia covers about 63% of Zambia's protected areas, which is about 145,000 km² (DNPW 2016). Historically, lions occurred in the West Lunga complex, although, recently, populations have not been found in this complex (DNPW 2016). The majority of lions are found in three main clusters throughout Kafue, Luangwa, and the Lower Zambezi region. Luangwa and Lower Zambezi are connected through GMAs. Smaller populations of lions are also present in Liuwa Plains, Sioma Ngwezi, Nsumbus, and the Lavushi Manda National Parks. In addition, Kazungula and Siavonga open areas have lion populations that roam between Zambia and other countries (DNPW 2016).

The 2016 IUCN Red List Assessment stated that lions are now extinct in 15 countries in Africa (including Western Sahara, which is technically a disputed territory), are possibly extinct in another seven countries, and now occur in only 24 countries (Macdonald 2016). The latest IUCN estimates suggest a population of 23,000 - 39,000 lions throughout their current range on the African continent (IUCN 2016), representing a decline of at least 43% between 1993 and 2014. Lions are now considered to have been extirpated from at least 92% of their historic range (Macdonald 2016). Therefore, in assessing the population of lions in Zambia, we must also consider the significance of the diminishing total population of lions remaining in the wild. This is in part because the southern and eastern African lion populations include Zambia (DNPW 2016). DNPW presented a study conducted by the Zambia Lion project (ZLP) in which DNA analysis of Zambian lions was undertaken during 2004 - 2012. The study concluded that southern African and eastern African lions were integrated among the Zambian lions. The study also determined that the genetic diversity of Zambian lions is much greater than comparable areas in southern and eastern Africa.

Population Status:

Data provided by Macdonald (2016) indicate that Zambia contains approximately 1,200 free-ranging lions in an estimated range of 135,000 km² (approximately 10,000 km² less range than identified by the Zambian government). DNPW explains that previous lion estimates were determined, in large part, through expert opinion (DNPW 2016). They also confirm that no intensive research has been conducted in the corridor area, consisting of West Petauke, Chisomo and Luano GMAs, and surrounding Open Areas (DNPW 2016).

In addition to the population status determined by Macdonald (2016), the Zambian Carnivore Programme (ZCP) studied the population of lions in Zambia. In 2013, the ZCP monitored 13 prides and 13 coalitions, comprised of 141 lions with 3 adjacent sites of 20 lions each, totaling over 200 lions. In 2014, the ZCP monitored 15 prides and 13 coalitions, with a total of 166 individual lions. In 2015, the ZCP's partial data indicated that 15 prides and 15 coalitions of lions exist throughout Zambia.

In acknowledging their need for more complete and current lion population data, DNPW has begun working with partners on monitoring studies in the Luangwa and Kafue ecosystems. Surveys were conducted in the later part of 2016 (DNPW 2016). The Service has not seen the results, but will request them for consideration in future enhancement determinations. In addition, dependent on funding availability, DNPW has identified that a survey would be conducted of the corridor

between South Luangwa National Park and Lower Zambezi National Park and the GMAs surrounding the eastern part of North Luangwa National Park.

A report by the Democratic staff of the House Committee on Natural Resources concludes that Zambia lion populations may show signs of stabilizing or even recovery, but strict controls on additional mortality are necessary to prevent further decline (Grijalva 2016).

Threats:

Habitat Loss, Population Growth, and Human-Lion Conflicts:

Lion populations throughout Africa have decreased in correlation with their habitat. Currently only 10 stable populations with more than 500 lions still exist throughout the continent of Africa (Creel *et al.* 2016). Africa has the fastest human population growth rate in the world, with projections estimating a population tripling across 27 African states by 2100, leading to a continental estimate of 4 billion. Eight lion range states are estimated to have a five-fold increase in human population by 2100 (Macdonald 2016), and Zambia has not steered clear of Africa’s population and development growth (DNPW 2016). Human population growth has increased in Mfuwe, the gateway town to South Luangwa National Park, largely due to increased infrastructure development and an increasing number of economic opportunities created through tourist lodges (DNPW 2016). Habitat loss, population growth, human-lion conflicts, poverty, poaching, diseases, uncontrolled hunting, and the importation of captive-bred lions into Zambia are all threats to the long-term survival of lion populations in Zambia.

DNPW stated that human-lion conflicts are not uncommon in Zambia. From the years 2008 through 2015, a total of 327 livestock animals were recorded as being killed by lions; since 2002, at least 70 lions were reported killed as a result of human lion conflicts (DNPW 2016). The number of Zambian lions killed as a result of human-lion conflict is shown in the table below.

Year	Lions Killed
2002	2
2003	4
2004	1
2005	0
2006	5
2007	8
2008	2
2009	5
2010	3
2011	8
2012	5
2013	10
2014	14
2015	1
2016	2

Poverty, Poaching, and Disease:

Prey base depletion is partly linked to habitat loss, but more importantly to poaching and bush meat trade (Becker *et al.* 2013). Poaching of lions for the trade in bones and other body parts for traditional medicine is an emerging threat within Africa (Macdonald 2016). Within Zambia, another more widely occurring threat believed to be facilitated by high levels of poverty is poaching of lions for bush meat (DNPW 2016). DNPW acknowledges that bush meat poaching occurs widely in Zambia (DNPW 2016). They also acknowledge that the amount of illegal use of lion parts in Zambia is currently unknown (DNPW 2016). However, DNPW has indicated it will establish an investigation into the illegal trade and use of lion parts.

Zambia has addressed the need to monitor the health of their lions by creating the Infrastructure Development Unit (IDU). The IDU subsequently established a veterinary unit of DNPW whose responsibility is to regularly sample lion specimens for diseases. This unit also assists law enforcement officers in the treatment of injured lions due to illegal activities such as snaring (DNPW 2016).

Trophy Hunting:

Di Minn *et al.* (2016) estimated that 37.8% of Zambia is covered by terrestrial protected areas, with 21.3% in Open Game Ranches. According to a 2012 article, lion hunting in Africa generates 5–17% of gross trophy hunting income on national levels, with the proportional significance highest in Mozambique, Tanzania, and Zambia (Lindsey *et al.* 2012). A more recent paper published by Macdonald, however, asserted that Zambia generated very little revenue from trophy hunting (Macdonald 2016). It should be noted, however, that Macdonald based the paper on data obtained in the years before 2016 (the moratorium was between 2013 and 2015), and the formation of DNPW and newer regulations were not implemented until after Zambia imposed a moratorium on lion hunting for the years 2013 through 2015. According to DNPW, Zambia's total hunting revenue (all hunting, not just lions) accounted for 32% of the revenue that ZAWA (now DNPW) received during the years 2010 through 2012 (DNPW 2016). They also affirm that the average revenue generated for hunting in Zambia was reduced to 4% during the lion hunting moratorium in 2013 and 2014 (DNPW 2016).

IUCN has only examined the lion population in Luangwa, Zambia. Their findings indicate that trophy hunting in Luangwa contributed to a decline in the lion population by 28% between 1993 and 2014 (Macdonald 2016). However, this assessment was done prior to Zambia's 2013-2015 hunting ban and therefore, it will need to be re-assessed now that Zambia's lion hunting ban has been lifted and new regulations have been implemented.

Importation of Captive-bred lions:

Captive-bred lions from South Africa and Zimbabwe are being imported into Zambia for lion walks (DNPW 2016). DNPW believes that the importation of captive-bred lions is a result of a growing photo-tourism market in the Livingstone area of southern Zambia (DNPW 2016). Since 2008, a total of 54 captive-bred lions have been imported into Zambia, but the Zambian government has imposed a condition that the captive-bred lions will not be introduced into the wild (DNPW 2016).

In order to ensure that Zambia's captive-bred lions do not negatively impact their wild lion populations, Zambia is currently working on the preparation of a statutory instrument that will regulate the importation and captive uses of lions. Other than for temporary veterinary purposes, the holding of, breeding, and commercial use (i.e. walking and petting) of captive-bred lions will be banned (DNPW 2016). Lions that are currently held in captivity will be required to be castrated or spayed, and eventually all commercial uses of captive-held lions will be phased out (DNPW 2016). DNPW states that "particular care will be taken to avoid the dumping of captive-held cats into wild areas for any reason, especially for hunting or 'release' as means for the owners to avoid the penalties or costs associated with the authorized disposition of their animals (DNPW 2016)."

Partners/Non-governmental Organizations (NGOs):

DNPW has partnered with several NGOs in an effort to obtain lion population survey data and to conduct other lion-related research studies. The Zambia Lion Project (ZLP) has conducted research on the presence/absence of lion surveys throughout Zambia (DNPW 2016). They have also assisted with DNA collection studies. The Zambia Carnivore programme (ZCP) has been documenting population trends and demographic vital rates of lions in the key areas of South Luangwa National Park, Kafue National Park, and Liuwa Plain National Park. Through their research efforts, the ZCP has also contributed to aerial support that has assisted DNPW with enforcement actions.

Although their research focus has been on elephants, the Frankfurt Zoological Society has been active in North Luangwa ecosystem for over 20 years. Conservation South Luangwa (CLS) has been active in South Luangwa National Park and surrounding GMAs. Game Rangers International has been active in the Kafue ecosystem since 2010. Conservation Lower Zambezi (CLZ) is also active in the Lower Zambezi national park and surrounding GMAs.

Supplemental revenue sources are also gained with the support of several NGOs. NGOs can provide functions that include anti-poaching units and/or aerial support. One such example is the Frankfurt Zoological Society (FZS), which has been active in North Luangwa National Park for over 20 years. FZS established a partnership with DNPW in order to help preserve black rhino and elephant populations through the establishment of The North Luangwa Conservation Programme (NLCP).

Lion Management in Zambia

History of Lion trophy exports:

During 2008 - 2012, DNPW authorized the export of 289 lion trophies (50, 40, 89, 37, and 73 respectfully). During 2013 - 2015, the Zambian government established a lion hunting moratorium (some trophies apparently taken before the moratorium were exported during this time, however). The moratorium was established to allow time to restructure Zambia's governance of lions and to allow a period of time for lion recovery (DNPW 2016). Data comparing the lion population status before and after the moratorium are currently unavailable; hence, the success of the moratorium cannot be fully assessed.

Lion Hunting and Concessions:

Zambia lion hunting occurs in *Game Management Areas (GMAs)* and *Open Game Ranches (OGRs)*. OGRs are unfenced private lands reserved for the wildlife conservation management of an

individual or local community. They are buffered by GMAs. DNPW issues annual non-resident hunting quotas to the OGRs in exchange for managing the wildlife; although all animals remain the property of the State (DNPW 2016).

All 20 of Zambia's national parks are surrounded by GMAs, but currently, lion hunting only occurs within hunting blocks located in the GMAs that surround the National parks in the Luangwa, Kafue, and Lower Zambezi ecosystems. GMAs are primarily designated for safari (tourist) and resident hunting, but some GMAs also include photographic tourism. All GMAs allow settlement. There are 36 GMAs in Zambia covering 177,404 km² (DNPW 2016). Most, but not all, GMAs have General Management Plans outlining basic management practices. Community-Based Natural Resource Management (CBNRM) is implemented within GMAs through Community Resource Boards (CRBs) (DNPW 2016). The CRBs focus on the economic and social well-being of local communities. There are currently 75 registered CRBs within Zambia that employ approximately 750 community scouts and 79 support staff.

DNPW, in consultation with the local community, is mandated to grant hunting concessions within specific hunting blocks within GMAs. Hunting concessions must be registered in Zambia, have a tourism enterprise license, have a valid tax clearance certificate, provide proof that the company is not bankrupt, and they must meet any additional conditions set by an evaluation committee (DNPW 2016). Leases are stated to range from 7 - 15 years, with the length of lease time dependent on the abundance of species classified within the individual hunting block (DNPW 2016). Prime hunting blocks have greater species abundance and are generally awarded shorter lease agreements in comparison to secondary hunting blocks. Secondary hunting blocks are generally given longer lease periods in an effort to provide incentives for the concessionaire to invest greater resources, allowing wildlife populations to increase before offering hunting (DNPW 2016).

Hunting block concessions are awarded through a bid process in accordance with the Zambia Public Procurement Act No 12 of 2008. Bids are taken from companies through a "two envelop system." The bids consist of a technical proposal and a financial proposal being placed in separate clearly marked envelopes. The technical bid is required to be evaluated by criteria outlined in Zambia's Wildlife Act before the envelope containing the financial bid is opened. Financial envelopes will only be opened for bidders that meet a specific technical expertise (e.g., a score of over 80 on the established criteria). The lease is awarded to the bidder that qualified with a minimum technical rating of 80 and whom submitted the highest financial bid (DNPW 2016).

Successful bidders must address statutory obligations to communities and provide enforcement contributions when developing Concessionary Agreements. Concessionary Agreements are developed through a partnership between the communities, safari operators, professional hunters, and DNPW. As such, a hunting concession agreement is not valid without the signature of the Chief(s) or CRB associated with the hunting block (DNPW 2016). Concessionaires are required to use collected fees to support resource protection by providing community scouts, vehicles, fuel, patrols, and equipment. They must provide infrastructure development to local communities and also offer resource monitoring and fire management. Some concessionaires further benefit community development by supporting the employment of teachers and nurses, purchasing ambulances, building classrooms and clinics, and providing houses for teachers and health personnel. Moreover, they are mandated to provide 50% of the meat from hunted animals to the local community. Concessionaires are evaluated annually and those that do not comply with their

obligations can have their concession terminated before the end of the agreement's term (DNPW 2016).

Hunting Quotas:

From 2005 - 2012, Zambia had quotas that totaled 683 lion in 21 GMAs and 5 OGRs, with the highest annual quota set at 117 lions and the lowest at 55 lions (DNPW 2016). The quotas were generally based on the previous year's lion quotas and, in some cases, the quotas were a fixed part of a concession agreement (DNPW 2016). However, DNPW did not completely identify the basis for these quotas or how they were distributed. Currently, quotas are based primarily on lion populations determined through aerial surveys (DNPW 2016). However, information obtained from ground counts, patrol sightings, local and expert opinion, and hunting monitoring is also used. CRBs use the information they have collected to determine what the GMA quota should be. Their proposal is submitted to DNPW for approval. Once a proposal is received, DNPW accepts feedback from field staff and safari hunting outfitters, as well as the hunting guidelines (below), before the quotas are approved by the Wildlife Conservation and Management Unit and distributed by their Licensing Unit. The quotas are then distributed to the CRBs and hunting companies. DNPW is required to share the approved quotas with other government agencies, including the Auditors General Office and Anti-Corruption Commission. For 2016, Zambia established a quota of one lion per hunting concession, for a total quota of 24 lions (2 hunted on OGRs and 22 hunted in GMAs). Quotas are set for individual hunting blocks within the GMAs.

Hunting Guidelines:

The Zambia's Conservation Strategy and Action Plan for the African lion was developed in 2010 and designed with a 10-year plan (DNPW 2016). The purpose of the plan is to gain stakeholder participation while using adaptive management practices when addressing concerns regarding scientific management, habitat protection, and human-lion conflicts. Based on the principles of the Action Plan, following the three-year moratorium, in 2016, DNPW consulted independent lion experts and held a workshop that resulted in the creation of hunting guidelines (DNPW 2016). The guidelines are considered part of an adaptive process to manage lion hunting in Zambia. DNPW is in the process of transforming the guidelines into a statutory law that will include provisions for monitoring lion hunting through an age-based system (DNPW 2016). The lion hunting guidelines include, but are not limited to, the following recommendations:

1. No hunting of female lions.
2. No hunting of any lion born or held in captivity.
3. No use of pre-recorded sounds in lion hunting.
4. No lion hunting on fenced game ranches.
5. Lions should only be hunted in Prime and Secondary areas and Open Game Ranches known to be rich in lion and prey.
6. Establishment of a place for trophy measurements of hunted lions for exports should be established.
7. DNPW shall establish a lion aging evaluation committee that will include representatives from the Professional Hunters Association, the Safari Operator Association, the Wildlife Producers Association, and officers from DNPW that are nominated by the director. Prior to issuing CITES permits, the committee shall meet once a year to establish the age of hunted lions.

DNPW has established age-based categories that divide lion hunting into four age-based categories: Category 1 consists of male lions between five and six years old and above; Category 2 consists of male lions older than four years old, but younger than five years old; Category 3 consists of male lions that are younger than four years old; and Category 4 consists of male lions seven years old or older. DNPW has determined that only male lions that are five years and older should be hunted. However, DNPW may authorize the export of Category 2 male lions so as not to penalize the hunter. Lions that are less than four years old will be confiscated and may not be exported. In cases where lions under five years old are taken, however, the professional hunter and the safari outfitter may be penalized (Becker 2017 per. comm.).

Wildlife officers must also accompany hunters on all hunts (DNPW 2016). The officer is responsible for recording hunt activities on specified forms such as the Safari Hunting Monitoring form and Trophy Measurement form. The officer endorses licenses to ensure that they are not used more than once and the officer also ensures that all harvested trophies are registered (DNPW 2016).

Hunting-generated Revenue:

DNPW receives revenue by charging GMA fees per lion hunt. They also receive funds from annual professional hunter fees, certificate of valuation of trophies fees, certificate of ownership of trophies fees, permit fees, handling fees, and CITES security stamp fees. Hunting license fees in Zambia are statutory. The foreign hunter looking to take a lion must pay the fee directly to the outfitter, with the minimum amount currently set at \$4,200. DNPW collects these fees from the outfitter/concession and does not deal with the foreign hunter directly. Therefore, the outfitter may choose to charge the foreign hunter any amount greater than \$4,200. The revenue generated from license fees (also referred to as Animal fees by DNPW) is mandated to be shared with CRBs under the Zambia Wildlife Act No. 14 of 2015. The fees are shared with CRBs and DNPW as follows:

License fees (animal fees):

- 5% of funds go to the CRB chief/leader.
- 45% of funds go to CRB community funds.
 - According to Zambia's "Guideline on the use of Community funds accrued from wildlife management", 45% of these community funds should go to wildlife protections and patrols, 35% should go to community projects such as constructing clinics, roads, schools, and wells, and 20% of the funds should go towards CRB administration costs.
- 50% of funds go to DNPW (mandated under the Zambia Wildlife Act No. 12 of 1998 and continued in the Wildlife Act) in the form of conservation funds, including, but are not limited to: scout/wildlife officer salaries, resource protection, consultancy and legal fees, animal surveys, staff training, administrative and operational expenses, repair and maintenances, and other conservation expenses.

According to Zambia's hunting guidelines, hunts involving lions are required to be a minimum of 16 days (DNPW 2016). A daily conservation fee of \$150 per hunter and \$100 per observer is collected for monitoring purposes (DNPW 2016). These daily hunt fees typically cover combined hunt packages that include hunting lion, along with other species such as hippos and impalas. The fees are allocated by percentages to CRBs and DNPW as follows:

Daily fees (Concession fees):

- 5% of funds go to the CRB chief/leader.
- 15% of funds go to CRB community funds.
 - Based on recommended guidelines, 45% of these community funds go to wildlife protections and patrols, 35% goes to community projects such as constructing clinics, roads, schools, and wells, and 20% of the funds go to CRB administration costs.
- 80% of funds go to DNPW in the form of conservation funds, including, but are not limited to: scout/wildlife officer salaries, resource protection, consultancy and legal fees, animal surveys, staff training, administrative and operational expenses, repair and maintenances, and other conservation expenses.

Hunting fees for all species accounted for 32% of revenues that DNPW received during 2010 - 2012. However, that amount was reduced to about 4% during the 2013 and 2014 moratorium (DNPW 2016). Safari hunting also creates other revenue for Zambia, through activities such as tipping, eating in restaurants, staying at lodges, purchasing souvenirs, and paying for taxidermy.

Evaluation:

As stated earlier, the Service will evaluate any application in accordance with our threatened species permitting regulations at 50 CFR 17.32 and issuance criteria for endangered species permits (50 CFR 17.32(a)(2)). In evaluating each of these criteria on the basis of information available to the Service, we have been able to determine that this import of the wild lion trophy would qualify for the issuance of the required import permit.

17.32(a)(2)(i): **Whether the purpose for which the permit is required is adequate to justify removing from the wild or otherwise changing the status of the wildlife sought to be covered by the permit:**

In evaluating this criterion, the Service assesses whether the hunting program established for lions has demonstrated the ability to contribute toward positive conservation outcomes that mitigate or improve the status of lions throughout their range within Zambia, while addressing the main threats of habitat loss, human-lion-livestock conflict, and prey depletion.

The IUCN's 2012 Guiding principles on trophy hunting support the concept that hunting can provide a conservation benefit if it is part of a governance system that provides both implementation and enforcement at a level that adequately supports conservation. The Service also believes that conservation hunting can assist the wild lion populations if managed well. Lion hunting, if managed properly, could meet the Service's enhancement criteria under the Act. There must be adequate information and data clearly showing that removing lions from the wild for trophy hunting will be done at a level and with sufficient oversight such that it improves the current status of lions in the wild (50 CFR 17.32).

Zambia has demonstrated their desire to maintain the long-term conservation of their lion population with their 2013-2015 moratorium on lion hunting. When the Zambian government realized that population numbers were declining to an unsustainable level, they applied the

moratorium for 3 years, until they determined that their lion population increased enough to tolerate limited offtakes (DNPW 2016).

As mentioned in the sections above, the Zambian government has clarified that they have established block quotas by surveying lion populations through a combination of aerial surveys and information obtained from ground counts, patrol sightings, local and expert opinion, and hunting monitoring. Because surveys are continually being carried out on the current population of lions in Zambia, future findings will consider updated population data. Therefore, the Service will need to continue to monitor the effectiveness of new lion surveys that contribute to determining the population status of lions in correlation with hunting block quotas.

The difference in male turnover between hunting/non-hunting periods is apparent from cub survival rates. Macdonald (2016) reports that in the absence of hunting, 80% of cubs survived to one year of age, during the trophy hunting period, 66% of cubs survived to one year of age. The principle behind restricting trophies to older males is that their tenure in the pride should have been long enough to raise at least one generation of cubs to adulthood. However, lion experts have come to varying conclusions regarding the minimum age recommended for sustainable lion hunting. Creel *et al.* (2016), not only state that the minimum hunting age should be 7-8 years old, but they also conclude that age-restricted harvesting is not sufficient to yield sustainability by itself. However, other experts believe that the sustainable age of lions is five years and older, provided that proper identification/aging can occur before the animal is harvested. Nonetheless, lion experts are in consensus that hunting lions younger than five years old may not be sustainable. Zambia's recommended hunting guidelines are in line with the minimum age of five-year-old lions, but the Service is concerned that allowing for the export of lions under this age (Zambia allows export of four-year-old lions, but not less than four years old) may not be sustainable. Zambia will need to closely monitor the number of exports of "under age" trophies to determine if there are sufficient disincentives to discourage taking such animals.

The Zambian government has done a good job of identifying how resources from hunting-generated revenue would be shared with communities. The local communities receive funds from concessions and license (animal) hunting fees. As outlined in the license fee distribution above, 35% of the funds allocated to CRBs help support community projects such as constructing clinics, roads, schools, and wells, thereby providing incentives for the local community to ensure the long-term conservation of the lions. In addition, 45% of the CRB license fees go to wildlife management, including resource protection and patrols.

Zambia's human population growth has contributed to conflicts within the GMAs. As clarified above, DNPW contributes 50% of the license fees (animal fees) and 20% of the Concession fees to local communities. These financial benefits received from living in a GMA have provided incentives for newcomers to illegally squat in the GMAs looking to capitalize on the financial benefits. Consequently, the illegal squatting has caused enough conflict with local people to trigger action to be taken by the Zambian government. In August of 2015, over 2,000 squatter households within the Mumbwa GMA were evicted so that the registered local communities could receive the full benefits of living within a conservation area (DNPW 2016). The long-term impacts of the eviction will need to be considered in future findings, as the information becomes available.

Therefore, based on the information available to the Service and considering that the lion to be imported was harvested in compliance with Zambian laws and regulations, we conclude that the

purpose for which a permit is being requested is adequate to justify removing the sport-hunted trophy lion from the wild or otherwise changing its status.

17.32(a)(2)(ii): The probable direct and indirect effect that issuing the permit would have on the wild populations of the wildlife sought to be covered by the permit:

As described under Current Lion Status in Zambia above, Zambia has taken great strides to address the major threats facing lions through their hunting program and updated regulations. In 2010, Zambia developed a ten-year Conservation Strategy and Action Plan for the African lion. Since the establishment of the Action Plan, the Zambian government has cooperated with partners to implement the strategy (DNPW 2016). Monitoring, local community benefits, human lion-conflict, and land use planning are only some of the benefits of the Action Plan (DNPW 2016). The development of the Community-Based Natural Resource Management Unit has helped facilitate Zambia's economic and social well-being by providing technical support to CRBs, training of village scouts and CRB members, and monitoring the use of funds disbursed to the CRBs. An investigative unit also carries out investigations related to wildlife crimes. Furthermore, the President of the Republic of Zambia has also directed the Defense security wings in the country to join in the fight against poaching.

Taking into account that the off-take of wild lions is currently being monitored by the Zambian government, that the government of Zambia is implementing an age-based harvest strategy and a precautionary quota, and that the government of Zambia's management of lions provides community benefits, Mr. Park's hunting and subsequent import of this lion provides an indirect benefit to wild populations by helping to support the reserves where lions are found. Therefore, based on the information available to the Service, the probable direct and indirect effect that issuing an import permit for this legally hunted lion would have on the species would be positive.

17.32(a)(2)(iii): Whether the permit, if issued, would in any way, directly or indirectly, conflict with any known program intended to enhance the survival probabilities of the population from which the wildlife sought to be covered by the permit was or would be removed:

We are not aware of any programs intending to enhance the survival of lions in Zambia that would conflict with Zambia's management plan. However, we are aware of the Zambian Carnivore Programme (ZCP), which is a non-profit Zambian registered trust that is dedicated to conserving large carnivore species and the ecosystems they reside in. The program works to build capacity within local Zambian organizations and government bodies for the sustainable conservation of large carnivores and herbivores, their ecological functions, and their habitats. Therefore, based on the information available to the Service, the issuance of an import permit for this legally hunted wild lion would not conflict with any known conservation program for the species.

17.32(a)(2)(iv): Whether the purpose for which the permit is required would be likely to reduce the threat of extinction facing the species of wildlife sought to be covered by the permit:

In evaluating this criterion, the Service assesses whether the hunting program established for lions is subject to a governance structure that clearly allocates management responsibilities and supports regulatory pathways in support of positive conservation outcomes. Zambia's lion management

program is based on a precautionary quota, an age-based harvest with monitoring of off-takes, and direct community benefits (DNPW 2016).

Currently, per Zambia's approved budget, DNPW retains all revenue from sport hunting. 50% of animal fees and 80% of concession fees are allotted to DNPW as conservation funds. This funding source is vital to lion conservation because it supports on-the-ground conservation, protected area management, and enforcement efforts. Additionally, 45% of animal fees and 15% of concession fees go to communities where the hunts take place. As long as communities continue to benefit from the sport hunting of lions through job opportunities, funded community projects, and sharing of meat derived from hunting, they may have the incentive to protect it.

Given that lion management in Zambia allows limited, controlled off-take of lions in a manner that mimics natural processes and provides community benefits, the legal hunt undertaken by Mr. Park will contribute to reducing the threat of extinction of lions in Zambia. The utilization of hunters, such as Mr. Park, in managing the lion populations in GMAs and OGRs is an important element of the success of lion management in Zambia.

Therefore, based on the information available to the Service, the purposes for which this import permit would be issued would likely reduce the threat of extinction facing lions in Zambia.

17.32(a)(2)(v): The opinions or views of scientists or other persons or organizations having expertise concerning the wildlife or other matters germane to the application:

As with any discussion of hunting, there are numerous opinions on the impact that hunting has on a species. From reviewing comments made during the listing process for lions, as well as information obtained through personal conversations and literature, there is general agreement that hunting, done properly and well managed, would not have an adverse effect on lion populations. Mimicking natural processes within the management program, such as maintaining pride hierarchy for as long as possible by leaving the alpha male in place, will better ensure the long-term survival of the species. Numerous researchers have stated that, while they may not support hunting in general, they see that benefits can be obtained through a science-based hunting program for lions. There have been a large number of comments from some NGOs and the public opposing hunting any lions, but particularly captive-bred lions. This opposition, however, is primarily based on the perceived ethics of hunting. While these comments are an indication of concerns from some members of the public over hunting, they are not germane to our review process.

Therefore, based on the information available to the Service, there is general support from scientists and other persons or organizations having expertise concerning lions that the legal well managed, science-based harvest of lions, and the subsequent import of these trophies, would not have an adverse effect on the species, but would further efforts to conserve the species in the wild into the future.

17.32(a)(2)(vi): Whether the expertise, facilities, or other resources available to the applicant appear adequate to successfully accomplish the objectives stated in the application:

Examining whether adequate resources exist, the Service relied primarily on information provided by Zambia (DNPW 2016). The long-term survival of lions in Zambia, is directly tied to the economic and ecological success of the country. When ZAWA became a semi-autonomous agency,

they struggled with funding to provide for adequate staffing and fulfillment of lion conservation objectives. However, after transforming back to a government agency, DNPW (formerly ZAWA) has been able to ensure that staff are adequately resourced and paid by Zambia's government, while retaining funding generated from sport hunting, as per the approved budget for the country. This ability to deliver on conservation objectives is improved with funding provided by U.S. sport hunters such as Mr. Park.

Therefore, based on the information available to the Service, the applicant undertook a legal, authorized hunt, abiding by management practices in accordance with the government of Zambia's laws and regulations, having the expertise, facilities, and other resources available to him to successfully accomplish the objective stated in the application.

Conclusion

Given the current status of lions within Zambia and the level of management and oversight provided to lions, it appears that the harvest and import of this lion as a sport-hunted trophy meet the purposes of the Act. Zambia's ongoing adaptive management and limited off-take of lions is important to the survival of lions in Zambia.

Therefore, with the information currently available to the Service and in accordance with the issuance criteria laid out above, the Service is able to make a determination that the import of this wild lion will enhance the propagation or survival of the species. Therefore, the Service is able to authorize the import of one male wild lion trophy taken in Zambia, to Mance (b) (6) Park.

Authority: Statutes and Regulations: 50 CFR 17.40(r)

Location where authorized activity may be conducted:
IMPORT THROUGH ANY PORT LISTED IN 50 CFR 14.12

Reporting requirements: Not applicable

Authorizations and Conditions:

- A. Authorized to import the sport-hunted trophy of one male African lion (*Panthera leo melanochaita*), taken in Zambia for the purpose of enhancement of the survival of the species.
- B. Specimen may not be sold or transferred for any financial remuneration.
- C. Trophy must have been taken during the 2017 hunting season and in accordance with government of Zambia hunting laws and regulations.
- D. Trophy must be accompanied by valid hunting authorization issued by the government of Zambia for the 2017 season.
- E. Trophy must be accompanied by a valid Convention on International Trade in Endangered Species (CITES) Appendix II export permit/re-export certificate, source code "W", issued by the Management Authority of the exporting/re-exporting country.
- F. General conditions set out in Subpart D of 50 CFR 13, and specific conditions contained in Federal regulations cited above, are hereby made a part of this permit. All activities authorized herein must be carried out in accord with and for the purposes described in the application submitted. Continued validity, or renewal of this permit is subject to complete and timely compliance with all applicable conditions, including the filing of all required information and reports.
- G. The validity of this permit is also conditioned upon strict observance of all applicable foreign, state, local, tribal, or other federal law. This permit can be photocopied.
- H. Valid for use by permittee named above.
- I. Acceptance of this permit serves as evidence that the permittee understands and agrees to abide by the "General Permit Conditions" (copy attached).

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual			
1.a. Last name PISHKO	1.b. First name JOHN	1.c. Middle name or initial (b) (6)	1.d. Suffix
2. Date of birth (mm/dd/yyyy) (b) (6)	3. Occupation		
4. Affiliation/ Doing business as (see instructions)			
5.a. Telephone number (b) (6)	5.b. Alternate telephone number	5.c. Fax number	5.d. E-mail address

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution			
1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (dba)	
2. Tax identification no.		3. Description of business, agency, Tribe, or institution	
4.a. Principal officer Last name	4.b. Principal officer First name	4.c. Principal officer Middle name/ initial	4.d. Suffix
5. Principal officer title		6. Primary contact name	
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address

C. All applicants complete address information				
1.a. Physical address (Street address; Apartment #, Suite #, or Room #; no P.O. Boxes) (b) (6)				
1.b. City EXPORT	1.c. State PA	1.d. Zip code/Postal code: (b) (6)	1.e. County/Province	1.f. Country USA
2.a. Mailing Address (include if different than physical address; include name of contact person if applicable)				
2.b. City	2.c. State	2.d. Zip code/Postal code:	2.e. County/Province	2.f. Country

D. All applicants MUST complete	
1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100, nonrefundable processing fee Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee - attach documentation of fee exempt status as outlined in instructions. (50 CFR 13.11(d))	
2. Do you currently have or have you ever had any Federal Fish and Wildlife permits? Yes <input type="checkbox"/> If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: _____ No <input checked="" type="checkbox"/>	
3. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter Chapter 1 of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001. Signature of applicant responsible for permit (No photocopied or stamped signatures) _____ Date of signature (mm/dd/yyyy) <u>March 9, 2018</u>

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- (1) Is raw, processed, or manufactured;
- (2) Was legally obtained by the hunter through hunting for his or her personal use;
- (3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- (4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: 1 (Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: 0 (Import is limited to two per hunter per calendar year)
Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: 0 (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

- c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:

- a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild:
- b. Date wildlife was hunted: (a) NIASSA GAME RESERVE, BLOCK L2, S12.73382/E36.76317, MOZAMBIQ
(b) OCTOBER 30, 2017
- c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

SKULL, FULL SKIN

- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

EMIAC Moz Lda., Complexo Textafrica, Bairro Da Soalpo, Chimoio, Mozambique
Tel +258 251 24661 - Fax +258 251 24657 - mozinfo@emiac.com

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business JONATHAN HULME
Name: Address JOHAN CALITZ SAFARIS
Address: MOZAMBIQUE RUA NWAMITHIMBA, NO. 1008 MATOLA
City:
State/Province: NIASSA
Country, Postal Code: MOZAMBIQUE

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. If you are a broker or taxidermist applying on behalf of a foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: _____

Date: MARCH 9, 2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/lc/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

JOHN PISHKO

(b) (6)

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit to the address on page one.

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 4: Certain hunting trophies, including leopard and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

- Complete all questions on the application.
- Mark questions that are not applicable with "N/A".
- If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.
- If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Randall Smith / NorthCoast Inc.

(b) (6)

Hayden Idaho

(b) (6)

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Randall Smith

(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):
- a. Leopard (*Panthera pardus*) Quantity: 1 (Limited to the import of two per calendar year). If you wish to import a leopard taken in northern or western Africa, please use form 3-200-20. (1) LEOPARD SKIN & SKULL
- b. Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use Form 3-200-20).

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, Please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild: N/A

b. Date wildlife is to be hunted: N/A

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with: N/A

6. IF THE ANIMAL HAS ALREADY BEEN TAKEN, please enter the following:

d. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Mozambique - Zumbo, TETE

e. Date wildlife is to be hunted:

06/30/17

- f. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

*Russell Lovemore - Chawalo Safaris
Zumbo, TETE Mozambique*

- g. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

*EMIAAC MOZ Lda
Complexo Textafalca, Bairro Da Soalpo, Chimoino, Mozambique
TEL +258 251 24661 - Fax +258 251 24657 - mozinfo@Emiac.com*

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).
8. Complete name and address of overseas person or business shipping the trophy to you.
- a. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: *RUSSELL LOVEMORE*
Business Name: *CHAWALO SAFARIS*
Address: *CHAWALO SAFARI LODGE*
Address:
City: *Zumbo*
State/Province: *TETE*
Country, Postal Code: *Mozambique*

CERTIFICATION STATEMENT (original signature must be provided for either 9 or 10 below)

9. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

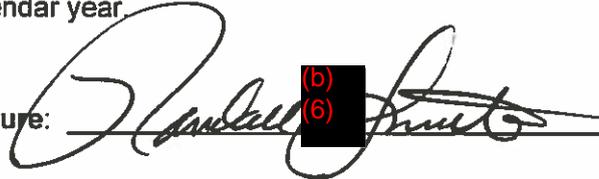

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: *N/A* Date:

10. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). Re: Application for Importation of Namibian Sport Hunted Elephant on August 1, 2016

Date: April 3, 2018

Dear Mr. Villavicencio,

Please find my enclosed application 3-200-20 as well as my \$100 Application fee.

As noted, I harvested the bull elephant on August 1, 2016 in the Zambezi region of Namibia.

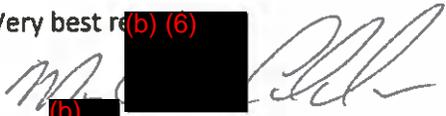

I have attached the CITES export permit from Namibia to Denmark.

My taxidermist (First Class Trophy Taxidermy) is located in Denmark but their tanning and taxidermy technicians are on Hungary. First Class Trophy has indicated that when they apply for Re-export on the CITES permit that they will ship from Hungary to Chicago USA where I will use Coppersmith.

Depending upon the timing of the tanning process I may have some of the tanned hide made into a personal gun case, belt, etc. while in Hungary. These will be indicated on Re-export CITES permit. Please let me know if you need any additional information on this topic.

Thank you very much for your attention and time.

Very best regards (b) (6)

Max (b) (6) Caldwell

E. IMPORT OF SPORT-HUNTED TROPHIES (*Appendix I of CITES and/or ESA*)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

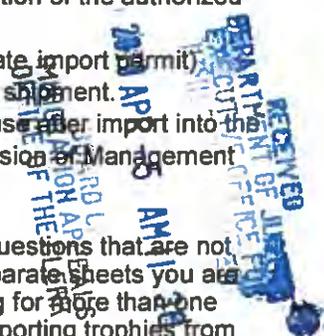

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at [50 CFR 23.74](#) as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Page 1 address and name is ok.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

MAX (b) (6) CALDWELL
(b) (6)
(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

- a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
Loxodonta africana African elephant
- b. Sex (if known). MALE

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, hunting block, AND nearest city) where wildlife is to be taken from the wild:

N/A

b. Date wildlife is to be hunted:

N/A

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

N/A

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

Namibia, Wuparo Conservancy, Zambezi Region
Nearest city is Sangwali

b. Date wildlife was hunted:

Harvested August 1, 2016

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

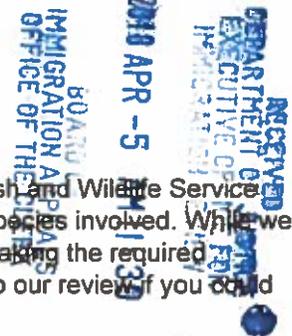

Dawid Muller, Professional Hunter
Dagga boy Hunting Safaries

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

The elephant is currently with First Class Trophy Taxidermy in Hungary. It will be re-exported to USA from Hungary.

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). I have included CITES permit to export from Namibia to Denmark. Elephant was then transferred to Hungary by Taxidermist for processing.
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:
Business Name: First Class Trophy Taxidermy AARHUS
Address: Randersvej 397
City: Trige
State/Province:
Country, Postal Code: Denmark, 8380

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted?
During the hunt we saw between 200-500 elephants each day. Each day was different herds. Caprivi is free range, Namibian elephant numbers have risen from 7,600 in 1995 to almost 30,000 in 2018.
- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?
More than 50% of trophy fees go to community funds, as well as all of the meat went to community. In addition, salaries, camp monies, donations, etc. go to community from PH and hunters. Elephant hunting generated roughly 59% of all cash generated by hunting and massive amounts of meat. We saw this first hand.
- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted
Outfitter/PH provides 3 waterholes with solar installations for the community. Also installed water tanks for the whole area and villages. Transport, school fees, medical, and massive amount of anti-poaching efforts through the Namibian Professional Hunting Association. Outfitter donates hunts for anti-poaching fundraiser.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

- 10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement. N/A

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

- 11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in any calendar year.

Applicant's signature:  Date: 4/3/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

- 12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from [the list of designated ports](#). If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

My importer is Coppersmith in Chicago. I have attached contact information. I have also attached First Class Trophy Contact information.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit to the address on page one.

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52); (<http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 3: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- (1) Is raw, processed, or manufactured;
- (2) Was legally obtained by the hunter through hunting for his or her personal use;
- (3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- (4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 4: Certain hunting trophies, including leopard and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Note 5:

- (a) Complete all questions on the application.
- (b) Mark questions that are not applicable with "N/A".
- (c) If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.
- (d) If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, **if different from page 1**. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Same

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Samuel James Cunningham scunningham@quailcreekent.com 806-282-6889

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

a. No Yes

- b. If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

NA

4. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):
- a. Leopard (*Panthera pardus*) Quantity: 1 (Limited to the import of two per calendar year). If you wish to import a leopard taken in northern or western Africa, please use form 3-200-20.
- b. Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: 1 (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use Form 3-200-20).

5. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, Please enter the following information:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

na

- b. Date wildlife is to be hunted:

na

- c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

na

6. **IF THE ANIMAL HAS ALREADY BEEN TAKEN**, please enter the following:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

Nyacolwe Conservancy, Eastern Province, Nyimba, and Petauke Town

- b. Date wildlife was hunted:

August 14, 2016

- c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

WH van Noordwyk, Ebony Safaris

- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Spl. Hing Image Taxidermy, The Budget Building, 14 Uitenhage Road
Sydenham, 6001, Port Elizabeth, RSA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you.
- a. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Douglas Cockroft
 Business Name: Splitting Image Taxidermy
 Address: The Budget Building
 Address: 14 Ultenhas Road, Sydenham, 6001
 City: Port Elizabeth
 State/Province: East Cape
 Country, Postal Code: RSA

CERTIFICATION STATEMENT (original signature must be provided for either 9 or 10 below)

9. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

10. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature:  _____ Date: 03/07/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

11. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual			
1 a. Last name Lines	1 b. First name James	1 c. (b) (6) initial	1 d. Suffix
2. Date of birth (mm/dd/yyyy) (b) (6)	3. Social Security No. (b) (6)	4. Occupation (b) (6)	
5. Affiliation/ Doing business as (see instructions)	6 a. Telephone number (b) (6)	6 b. Alternate telephone number	6 c. Fax number (b) (6)

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution			
1 a. Name of business, agency, Tribe, or institution		1 b. Doing business as (dba)	
2. Tax identification no	3. Description of business, agency, Tribe, or institution		
4 a. Principal officer Last name	4 b. Principal officer First name	4 c. Principal officer Middle name/ initial	4 d. Suffix
5. Principal officer title		6. Primary contact name	
7 a. Business telephone number	7 b. Alternate telephone number	7 c. Business fax number	7 d. Business e-mail address

C. All applicants complete address information				
1 a. Physical address (Street address, Apartment #, Suite #, or Room #, no P.O. Boxes) (b) (6)				
1 b. City Colleyville	1 c. State TX	1 d. (b) (6)	1 f. Country USA	
2 a. Mailing Address (include if different than physical address, include name of contact person if applicable)				
2 b. City	2 c. State	2 d. Zip code/Postal code	2 e. County/Province	2 f. Country

D. All applicants MUST complete	
1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – attach documentation of fee exempt status as outlined in instructions. (50 CFR 13.11(d))	
2. Do you currently have or have you ever had any Federal Fish and Wildlife permits? Yes <input checked="" type="checkbox"/> If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue: MA34431L-0 No <input type="checkbox"/>	
3. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter 1 of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 2: The U.S. FWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during a sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: 1 (Limited to the import of two per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import permit is not required for trophies harvested in Botswana, Namibia, South Africa, or Zimbabwe). **Note: once imported, ivory cannot be re-exported.**

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: N/A (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
 - a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:
 - b. Date wildlife is to be hunted:
 - c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:
 - a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild:

Leopard - Farm Moedhou (Kleeberg) # 112, Okahandja, Okahandja, Otjozondjupa of Namibia; Elephant - Mahango National Park, Divundu, Rundu, Kavango East

- b. Date wildlife was hunted: June 1 - 12, 2017

- c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks): Skin, skull, claws, tusks, horn
- d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

The Yellow Shark Holdings (Pty) Ltd.
P.O. Box 81413
Olympia - Windhoek, Republic of Namibia

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

	Elephant	Leopard
Name:	Abiliu Hihuilepo Snr	Brink Grobler
Business Name:		
Address:	3674 Vinetta	92 Nelson Mandela Avenue
Address:		Stillwater # 5
City:		
State/Province:	Swakopmund	Klein Windhoek
Country, Postal Code:	Namibia	Namibia

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. If you are a broker or taxidermist applying on behalf of a foreign national, provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ **Date:** _____

7. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year (if applicable). In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: James Lines **Date:** 2/28/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

James Lines

(b) (6)

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

IMPORT OF SPORT-HUNTED TROPHIES under Appendix I of the Convention on International Trade in Endangered Species (CITES) and/or U.S. Endangered Species Act (ESA)

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. Instructions on how to make your application complete and help avoid unnecessary delays are attached.

Section A: Complete if applying as an individual

1 a. Last Name COLLIER		1 b. First Name WILLIAM		1 c. Middle Name/Initial (b) (6)	1 d. Suffix
2. Date of Birth (mm/dd/yyyy) (b) (6)	3. Telephone Number	3 a. Alternate Telephone Number	4. E-mail address		

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)			
2. Tax identification no		3. Description of business, agency, Tribe, or institution			
4.a. Principal officer Last name	4.b. Principal officer First Name	4.c. Principal officer Middle name/initial	4.d. Suffix		
5. Principal officer title		6. Primary contact name			
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address		

Section C: All applicants complete address information

1 a. Physical address (Street address, Apartment #, Suite # or Room #; no P.O. Boxes) (b) (6)				
1 b. City Virginia Beach	1 c. State VA	1 d. Zip code/Postal code (b) (6)	1 e. County/Province	1 f. Country USA
2 a. Mailing address (include if different than physical address, include name of contact person if applicable) [As above]				
2 b. City	2 c. State	2 d. Zip code/Postal code	2 e. County/Province	2 f. Country

Section D: All applicants MUST complete

1	Attach the nonrefundable application processing fee in the form of a check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100. Federal, Tribal, State, and local government agencies and those acting on behalf of such agencies, are exempt from the processing fee—attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)].
2	Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50 Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Bubiana Conservancy, hunter's assessment. The following information was assembled through pre-hunt investigation and interviews with the property owner during the hunt.

Bubiana Conservancy is a wildlife and game conservancy consisting of approximately 55,000 acres owned by Drummond Ranching. In the late twentieth century, in cooperation with neighboring families, the Drummond family repurposed the property from commercial farming to wildlife management, restoring all but 500 acres to its natural state and laying infrastructure for drought-tolerant artificial watering holes. They reintroduced (at their own expense) all native species except Lion. The remaining 500 acres are reserved for commercial farming, producing large quantities of fresh produce for Bulawayo. The farm area is protected by high fence and gates. The remaining property is low-fenced and free-range, maintaining in cooperation with neighboring land-owners a large free-range wildlife management zone spanning multiple properties.

Bubiana specifically hosts—and this hunter personally observed or observed sign of—the full gamut of southern African plains game (from klipspringer to eland), leopard, elephant, and hyena (both spotted and the endangered brown hyena), plus a herd of cape buffalo, a small herd of hippo, multiple lakes and rivers with native fish and aquatic fauna including crocodile, and a wide assortment of bird species, including migratory birds such as doves and Egyptian geese and many species of raptors. This hunter was not pursuing leopard, but observed leopard sign daily, and observed one leopard mid-day and heard leopard calls mid-day as well as nocturnally. This hunter also observed prolific elephant spore and elephant-browsed trees (these are unmistakable) daily, and we encountered mature young bull elephant on two separate occasions while scouting for plains game.

The elephant taken was an old bull, estimated four to five decades in age, and was the only elephant harvest authorized by the land owner, Mr. Drummond, on his property that year. All trophy fees (including \$12000 USD for the elephant) were paid directly to Drummond Ranching. With the exception of national taxes, all such proceeds go to the business, which maintains the extensive watering hole system, full-time private anti-poaching patrols, full-time private game scouts, a permanent national police detachment for anti-poaching enforcement, and hospitality facilities, including lodge, staff, and guides for wildlife viewing/photography and other non-hunting activities. The Bubiana trophy management project also synergizes with the Drummonds' commercial farm. The farm employs several hundred local persons, including a large contingent who reside on the farm permanently or seasonally (specifically, safe employment and residence for a large number of local women). The farm operates on a principle of maximum self-sufficiency, harvesting as much of its material as possible from within the Drummond property for construction, maintenance, and sustainment. Portions of game animals not claimed by the client are rendered into rations and resources for the farm or are sold as material to the local artisan/curio market in Bulawayo. Our elephant provided a measured 1250 kg of edible meat to be rendered into biltong for the farm workforce. All parts of the elephant were harvested as described above, with the exception of the ribs, and entrails, and two choice long bones, which the property owner selected to leave behind to support carrion-eating species—especially spotted and brown hyena. (This was a particular surprise to the hunter, but it is not a joke. Mr. Drummond came down personally and selected the carcass parts which would be left behind for his hyena population.) All ivory has been claimed by the hunter for personal use as a family heirloom, and is awaiting export.

An appeal from this hunter: The overall profitability of any private wildlife operation also helps to placate government investors, winning patronage and staving off government land confiscation. In Zimbabwe, lands confiscated by the government are used for unethical hunting and ivory harvest or are razed and converted to agriculture which is then catastrophically mismanaged, consistently rendering the land barren within a few years. The Drummonds have already seen over 20,000 acres of their original holdings confiscated and destroyed in this manner, as have a number of their neighbors. It is worth noting that the collective of neighboring farms which allied to create the broad wildlife sanctuary described previously did so at their own expense without government directive, and now maintain it as best they can against government pressure. They are permitted to exist as long as they remain sufficiently profitable. Private operations like Drummond Ranch are the beleaguered last bastion of both wildlife conservation and efficient agriculture in Zimbabwe, until such time as significant regime change brings improved government policy. If the private game preserves fail, the wildlife will be exterminated and the people of Zimbabwe will starve.

Type of Activity:
**Import of Sport-hunted Trophies of
Southern African Leopard, African Elephant, and
Namibian Southern White Rhinoceros**

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details.
See attached instruction pages for information on how to make your application complete and help avoid unnecessary delays.

A. Complete if applying as an individual				
1 a. Last name Aldridge	1 b. First name Randall	1 c. Middle name or initial (b) (6)	1 d. Suffix	
2. Date of birth (mm/dd/yyyy) (b) (6)	3. Social Security No. (b) (6)	4. Occupation (b) (6)		5. Affiliation/ Doing business as (see instructions)
6. Other information (b) (6)				

B. Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution				
1 a. Name of business, agency, Tribe, or institution		1 b. Doing business as (dba)		
2. Tax identification no.		3. Description of business, agency, Tribe, or institution		
4 a. Principal officer Last name	4 b. Principal officer First name	4 c. Principal officer Middle name/ initial	4 d. Suffix	
5. Principal officer title		6. Primary contact name		
7.a. Business telephone number	7.b. Alternate telephone number	7.c. Business fax number	7.d. Business e-mail address	

C. All applicants complete address information				
1.a. Physical address (Street address, Apartment #, Suite #, or Room #, no P.O. Boxes) (b) (6)				
1.b. City Florence	1.c. State Alabama	1.d. Zip code/Postal code (b) (6)	1.e. County/Province	1.f. Country USA
2 a. Mailing Address (include if different than physical address; include name of contact person if applicable) Same				
2.b. City	2.c. State	2.d. Zip code/Postal code	2.e. County/Province	2.f. Country

D. All applicants MUST complete	
1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount of \$100, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee – attach documentation of fee exempt status as outlined in Instructions. (50 CFR 13.11(d))	
2. Do you currently have or have you ever had any Federal Fish and Wildlife permits? Yes <input type="checkbox"/> If yes, list the number of the most current permit you have held or that you are applying to renew/re-issue _____ No <input checked="" type="checkbox"/>	
3. Certification. I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter (b) (6) of Chapter I of Title 50, and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 2: The U.S. FWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during a sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: ¹ _____ (Limited to the import of two per calendar year)

African elephant (*Loxodonta africana*) Quantity: ⁰ _____ (Import permit is not required for trophies harvested in Botswana, Namibia, South Africa, or Zimbabwe). **Note: once imported, ivory cannot be re-exported.**

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: ⁰ _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
 - a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:
 - b. Date wildlife is to be hunted:
 - c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).
3. **IF THE ANIMAL IS DEAD**, please enter the following:
 - a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild: Near West Nicholson (Matabeleland South Province) Zimbabwe
 - b. Date wildlife was hunted:
June 10, 2016 through June 19, 2016

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

Life Size Map

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

SBS LOGISTICS PTY LIMITED , UNIT # 9 RUSTIVIA IND VILLAGE, 6 ROVER ROAD , RUSTIVIA GAUTENG SOUTH AFRICA.

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: COLLEEN STANLEY
Business Name: SBS LOGISTICS PTY LIMITED
Address: UNIT # 9 RUSTIVIA IND VILLAGE
Address: 6 ROVER ROAD
City: RUSTIVIA ,
State/Province: GAUTENG
Country, Postal Code: SOUTH AFRICA

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

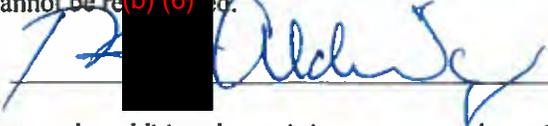

6. If you are a broker or taxidermist applying on behalf of a foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that my client may only import two leopard trophies in one calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that I may only import two leopard trophies in one calendar year (if applicable). In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature:  _____ Date: 2/13/18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

Same

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

Randall (b) Aldridge (b) (6)
(b) (6)

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least 90 days for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

same

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

John (b) Lott (b) (6)
)
(6
)

- 3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

~~XXXX~~
~~XXXX~~ Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

- 4. For each trophy to be imported, provide:
 - a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
Loxodonta Africana African elephant
 - b. Sex (if known). Male

- 5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:
 - a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

NA

- b. Date wildlife is to be hunted:

NA

- c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

NA

- 6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:
 - a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:
country NAMIBIA, place Dzoti Conservancy, Zambezi Region(Conservancy Office GIS coord.:S18 16'48.97"/E23 47'42.93")
nearest city Katima Mulillo GIS coord.: S 18 19'33.45" / E 23 43'14.05"

- b. Date wildlife was hunted:

September 10, 2017

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

outfitter : Ondjou Safaris cc

Professional Hunter : Barend Hendrik van Heerden

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Postal Address: P.O. Box 21068 Windhoek, NAMIBIA

Residential address: Kappsfam, Plot # 16, Khomas Region, NAMIBIA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). see attachments
8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Barend Hendrick van Heerden

Business Name: Ondjou Safaris cc

Address: P.O. Box 30208 Pionierspark, Windhoek, NAMIBIA / residential(office) Farm Augeigas # 34 Portion of Plot 17

City: Windhoek

State/Province: Khomas Region

Country, Postal Code: NAMIBIA

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted? **yes**
regional game counts taken twice yearly. For Dzoli the first game counts were done in 2010 and ever since two per year.

The game guards have monthly patrols were game encountered are recorded and the population trend is stable. I encountered several different herds of thirty plus elephants.

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?
Daily rate total USD 24,000, trophy fee elephant USD 28,000. Yes, a big portion of the funds were used for conservancy, staff, salaries, anti-poaching effort(transport, wages, etc.), drill multiple wells(waterholes) for wildlife as well for the community, supporting local schools, soccer and sports teams, and the funding of the local game guards

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

yes, they made donations toward carnivore census in the region, constant support and donation towards ongoing research in the region and environmental awareness campaigns at the local schools (see pictures)

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

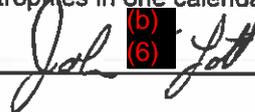

- 10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: NA Date:

- 11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature:  Date: 3-14-2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

- 12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from [the list of designated ports](#). **E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND
NAMIBIAN SOUTHERN WHITE RHINOCEROS**

Note 1: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit to the address on page one.

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 4: Certain hunting trophies, including leopard and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

- Complete all questions on the application.
- Mark questions that are not applicable with "N/A".
- If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.
- If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

D&L COYS LLC
1500 Midway Crt. Ste W201
Elk Grove Village, IL 60007

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Lisa Jamnik
lisaj@d1chb.com
847-690-0690

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

a. Leopard (*Panthera pardus*) Quantity: 1 (Limited to the import of two per calendar year). If you wish to import a leopard taken in northern or western Africa, please use form 3-200-20.

b. Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia
Quantity: (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use Form 3-200-20).

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, Please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE ANIMAL HAS ALREADY BEEN TAKEN, please enter the following:

d. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

Namibia; Hanoelkrans 100, Outjo District

e. Date wildlife is to be hunted:

10/14/2017

f. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

JJN Wassertall
P.O. Box 1677 Academia
Windhoek, Namibia

g. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Reiser
Brakwater
Windhoek, Namibia

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you.

a. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name:
Business Name:
Address:
Address:
City:
State/Province:
Country, Postal Code:

**Re: Application for a permit to import a sport-hunted elephant trophy
BY FEDERAL EXPRESS**

Dear Acting Chief:

Enclosed please find one application for a permit to import the trophy of an African elephant to be hunted in the N#a Jagna Conservancy in Namibia. Please see the enclosed information about this conservancy, as well as information in the DMA's files from the Namibian Association of CBNRM Support Organizations (NACSO), Namibia's Ministry of Environment and Tourism, Conservation Force, and others. This information demonstrates that elephant hunting in Namibia is well-managed, sustainable, and beneficial for the rural communities that rely on the revenue from elephant hunting most of all to maintain the >180,000 km² of habitat set aside in conservancies. Please consider this information in making an enhancement finding for this applicant.

Thank you for your courtesy and attention to this application.

Sincerely,

Conservation Force

Namibian Association of CBNRM Support Organisations

NOTICE OF REPRESENTATION

This is a notice to the U.S. Fish and Wildlife Service that I have appointed John J. Jackson, III and Regina Lennox of the non-profit firm Conservation Force as my attorneys and legal representatives for all matters concerning my applications for a permit to import a lawfully hunted Elephant trophy.

This authority is inclusive and extends to all applications and filings, whether administrative or judicial, including but not limited to any request for reconsideration, appeal, and litigation.

I also request that these attorneys, through the address for Conservation Force below, be copied with all correspondence, acknowledgements, notices and decisions concerning my application to import my trophy at the following address:

Conservation Force

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form ([3-200-52](#)) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least **90 days** for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at [50 CFR 23.74](#) as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- (1) Is raw, processed, or manufactured;
- (2) Was legally obtained by the hunter through hunting for his or her personal use;
- (3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- (4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, **if different from page 1**. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via regular mail through the U.S. Postal Service.

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

(b) (6) BENTZ (b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the

application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No X Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. For each trophy to be imported, provide:

a. Scientific name (genus, species, and, if applicable, subspecies) and common name.

LOXODONTA AFRICANA - AFRICAN ELEPHANT

b. Sex (if known). *MALE*

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

*NAMIBIA, N#A JAGWA CONSERVANCY
BUSHMANLAND CLOSEST TOWN: TSUMKWE*

b. Date wildlife is to be hunted: *AUGUST 1-18, 2018*

b. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

THORMAHLEN & COCHRAN SAFARIS, PHB PETER THORMAHLEN

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

N/A

b. Date wildlife was hunted:

b. Name of hunting outfitter, safari company, or professional hunter you hunted with:

c. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

NOT YET AVAILABLE

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: AFRICAN SHIPPING SERVICES CC
Business Name: RAINER SENTFOL
Address: 46 TV MOOLE STREET
City: SOUTHERN INDUSTRIAL,
State/Province: WINDHOK, NAMIBIA
Country, Postal Code:

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

- a. Do you have any information regarding the population status or trend data on the species hunted?

SEE REPORT
FROM OPERATOR

- b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

U

- c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted?

U

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies and two elephant trophies within the same calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ **Date:** _____

11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies and two elephant trophies within the same calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: _____ **Date:** 3-30-18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

All international shipment(s) must be imported through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

Equator Initiative Case Studies

Local sustainable development solutions for people, nature, and resilient communities

UNDP EQUATOR INITIATIVE CASE STUDY SERIES

Local and indigenous communities across the world are advancing innovative sustainable development solutions that work for people and for nature. Few publications or case studies tell the full story of how such initiatives evolve, the breadth of their impacts, or how they change over time. Fewer still have undertaken to tell these stories with community practitioners themselves guiding the narrative.

To mark its 10-year anniversary, the Equator Initiative aims to fill this gap. The following case study is one in a growing series that details the work of Equator Prize winners – vetted and peer-reviewed best practices in community-based environmental conservation and sustainable livelihoods. These cases are intended to inspire the policy dialogue needed to take local success to scale, to improve the global knowledge base on local environment and development solutions, and to serve as models for replication. Case studies are best viewed and understood with reference to [‘The Power of Local Action: Lessons from 10 Years of the Equator Prize’](#), a compendium of lessons learned and policy guidance that draws from the case material.

Click on the map to visit the Equator Initiative's searchable case study database.

N≠A JAQNA CONSERVANCY

Namibia

PROJECT SUMMARY

With 912,000 ha of communal land, N≠a Jaqna Conservancy combines the sustainable management of endemic wildlife and natural resources with the empowerment of Namibia's !Kung San people. (Symbols '≠' and '!' represent distinct click sounds unique to Khoisan languages.) Established as a conservancy in 2003, the organization trains local !Kung San as wildlife managers, committee members and game guards. Objectives include ret-establishing game populations and sustainable forest management through sound planning, management and monitoring.

The governance structure for the conservancy, is prescribed by Namibian law as part of its successful Community Based Natural Resource Management Programme. In addition, the N≠a Jaqna Conservancy has evolved a highly consultative governance model that matches the unique leadership system of the !Kung San people.

KEY FACTS

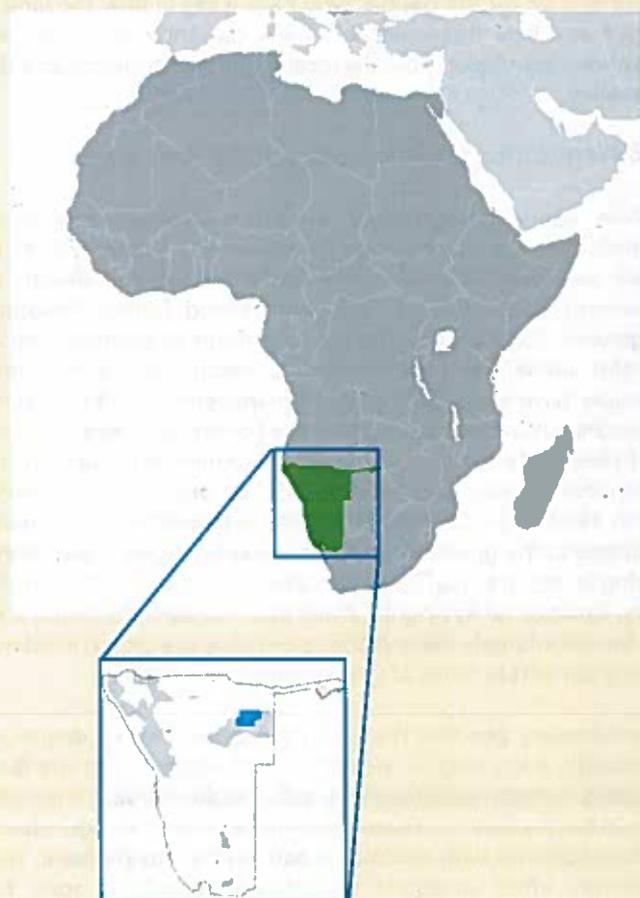

EQUATOR PRIZE WINNER: 2008

FOUNDED: 2003

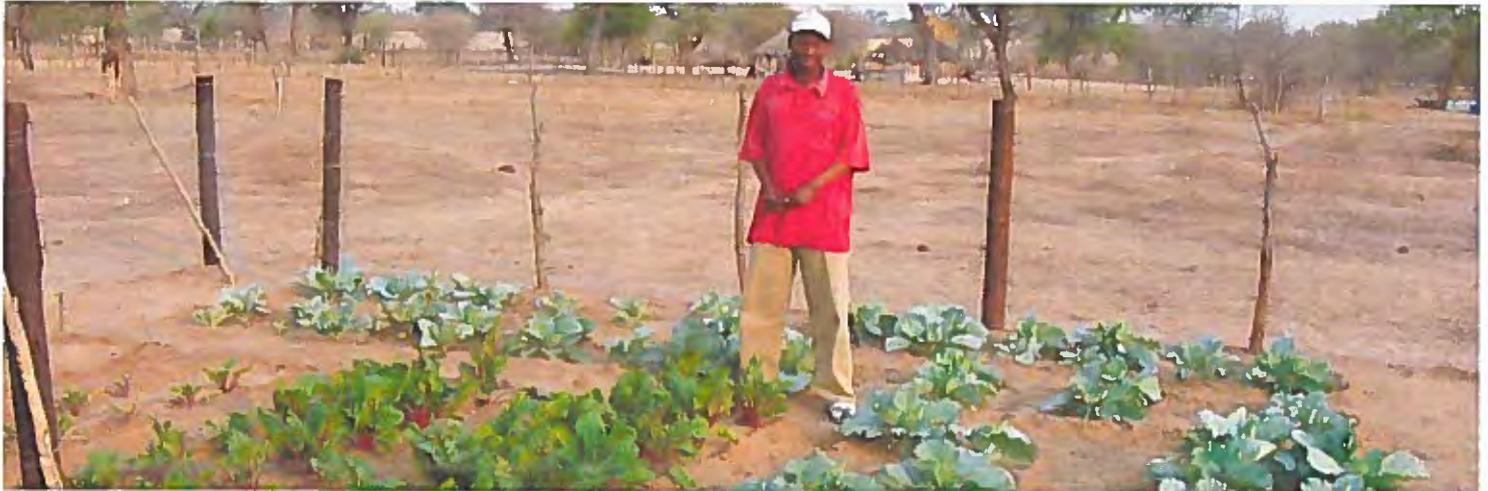

LOCATION: Otjozondjup, northeastern Namibia

BENEFICIARIES: Over 2,650 community members

BIODIVERSITY: 9,120 sq. km. community conservancy

Background and Context

Namibian land policy allows for the creation of conservancies within existing communal areas in which traditional leaders enter into collaborative land management agreements with the state. The conservancy management structure gives members of the conservancy shared rights to that land, while the government holds the land in trust for the people, who have a say in how the land is managed and how it is used. No others can enter or occupy the land without permission from the local traditional authority and the conservancy.

CBNRM legislation and the history of the N=ǀa Jaqna

The N=ǀa Jaqna Conservancy in the north-east region of Otjozondjupa, one of only two San-governed Conservancies in Namibia, was gazetted in December of 2003 under the Ministry of Environment and Tourism's Community-based Natural Resource Management (CBNRM) Programme as a result of peoples' lack of land rights and fear of lack of ownership. Because of this, the !Kung San people have since been granted management and utilization rights to the natural resources within the Conservancy and exclusive rights to benefit from the development of tourism in the area. While the conservancy was gazetted in 2003, the process began much earlier in 1998 when 1,850 members of the largely San community first applied to the government for conservancy rights. Many of the San living in the area had been relocated during the conflict in the country, some as far as Angola. While this increased the number of San in the area (largely those of the same language group) it did not bring any benefits in terms of land security or investment.

The Conservancy provides the !Kung San people with a degree of land security; it is a way for people to earn income from the land by utilizing natural resources in a sustainable manner. They can engage in trophy hunting if game is plentiful, small-scale agriculture, and other activities with minimal impact on the environment. This arrangement offers an equitable option for people to apply for formal rights to the land – a process not often available to local communities.

Creating a community management plan

Though the Conservancy is a government program, all decisions – from measuring and designating boundaries to the allocation of responsibility within the Conservancy – require the support of the entire community (estimates range from 2,000 to 5,000 people) many of whom are illiterate or minimally educated. The founding of the conservancy required the vast majority of the people to be in favor of the management plan, and though it took nearly five years, the necessary support was eventually procured.

N=ǀa Jaqna is currently the largest registered conservancy in Namibia to date, with an area of more than 9,120km². Kalahari sands cover a flat landscape of broadleaf and acacia woodland which receives a paltry 400-450mm of rainfall in an average year. The vast majority of Conservancy inhabitants rely on the land and resources of this environment for bush foods, medicines, grass and wood for building, fuel in the form of firewood, as well as grazing and cropping. The Conservancy is host to a vast amount of biodiversity as well as high-value game species and commercially viable plants utilized for their medicinal value. The large size of the area provides ample areas well suited to wildlife habitat. The large size also means that many villages are isolated and the costs of operating the Conservancy are higher than in other conservancies due to the scattered nature of settlement and resources.

For the purposes of management, the Conservancy has been divided into four districts. A comprehensive participatory planning exercise in all the settlements of the Conservancy has resulted in a resource-zoning scheme that has been agreed to by the Conservancy membership, the local !Kung Traditional Authority, as well as governmental and non-governmental stakeholders. This zoning plan is reflected in the Constitution of the Conservancy and the official Management and Utilization Plan. Business and tourism development strategies are now in place and are being implemented in concert with these guiding community-based management plans.

Key Activities and Innovations

The management and utilization plan of the conservancy, agreed to by the inhabitants of the area, provide for the following central objectives: to re-establish optimum game populations in the Conservancy through sound management and careful, responsible planning; to ensure that the benefits derived by membership through the utilization of wildlife are sustainable and that these benefits are delivered to all members of the Conservancy; to prevent conflict between segments of the Conservancy membership and between the Conservancy membership and wildlife; and to improve the livelihoods of all members of the Conservancy through the distribution of benefits from viable tourism operations in the Conservancy.

Due to poaching and the over-harvesting of local flora within the surrounding areas, plant and wildlife populations had declined in the years leading up to the conservancy's creation. Concerned by the decline in biodiversity, the conservancy, with the help of donors, has been able to reverse this trend to some degree, through the

mixed use of careful conservation and sustainable tourism practices. One of the main activities has been the introduction of more wildlife into the area through partner support.

Over 2,650 community members currently belong to the conservancy and hold decision-making power on how their land is developed and managed. Tourism, gaming contracts and the sustainable collection of indigenous plant species (such as the Devil's Claw, or *Harpagophytum procumbens*) are sources of income for the otherwise economically marginalized !Kung San people. Conservation is bolstered by indigenous knowledge and traditional land management practices. In addition to a Community Forest Programme, the group is engaged in tour guide and game guard training, has supported two successful community-run tourism initiatives, and actively pursues partnerships with commercial tour companies and private hunting contractors.

Sustainable wildlife management

Once game animals were brought to the area, the conservancy was able to form an anti-poaching unit—game guards—who run patrols under the employ of the Conservancy. Working not only to secure the safety of the animals, but also to help enhance the health of the ecosystem, the game guards engage in practices such as digging out water holes to increase the volume of water available to both the animals and the human inhabitants.

The increased abundance of game animals has given rise to a very successful tourism practice as well. The N=Ja Conservancy has a contract with a trophy hunting agency that in turn imports game animals each year. The acceptable quota for trophy hunters is quite specific in order to only take what can be easily recovered within the population of animals in the area, and the rules governing the quota are strict: for instance, during breeding periods it is forbidden to shoot near water holes, while pregnant animals may not be killed. Tourists pay high prices to hunt in the area and a good portion of that money goes back into the conservancy, enabling it to sustain

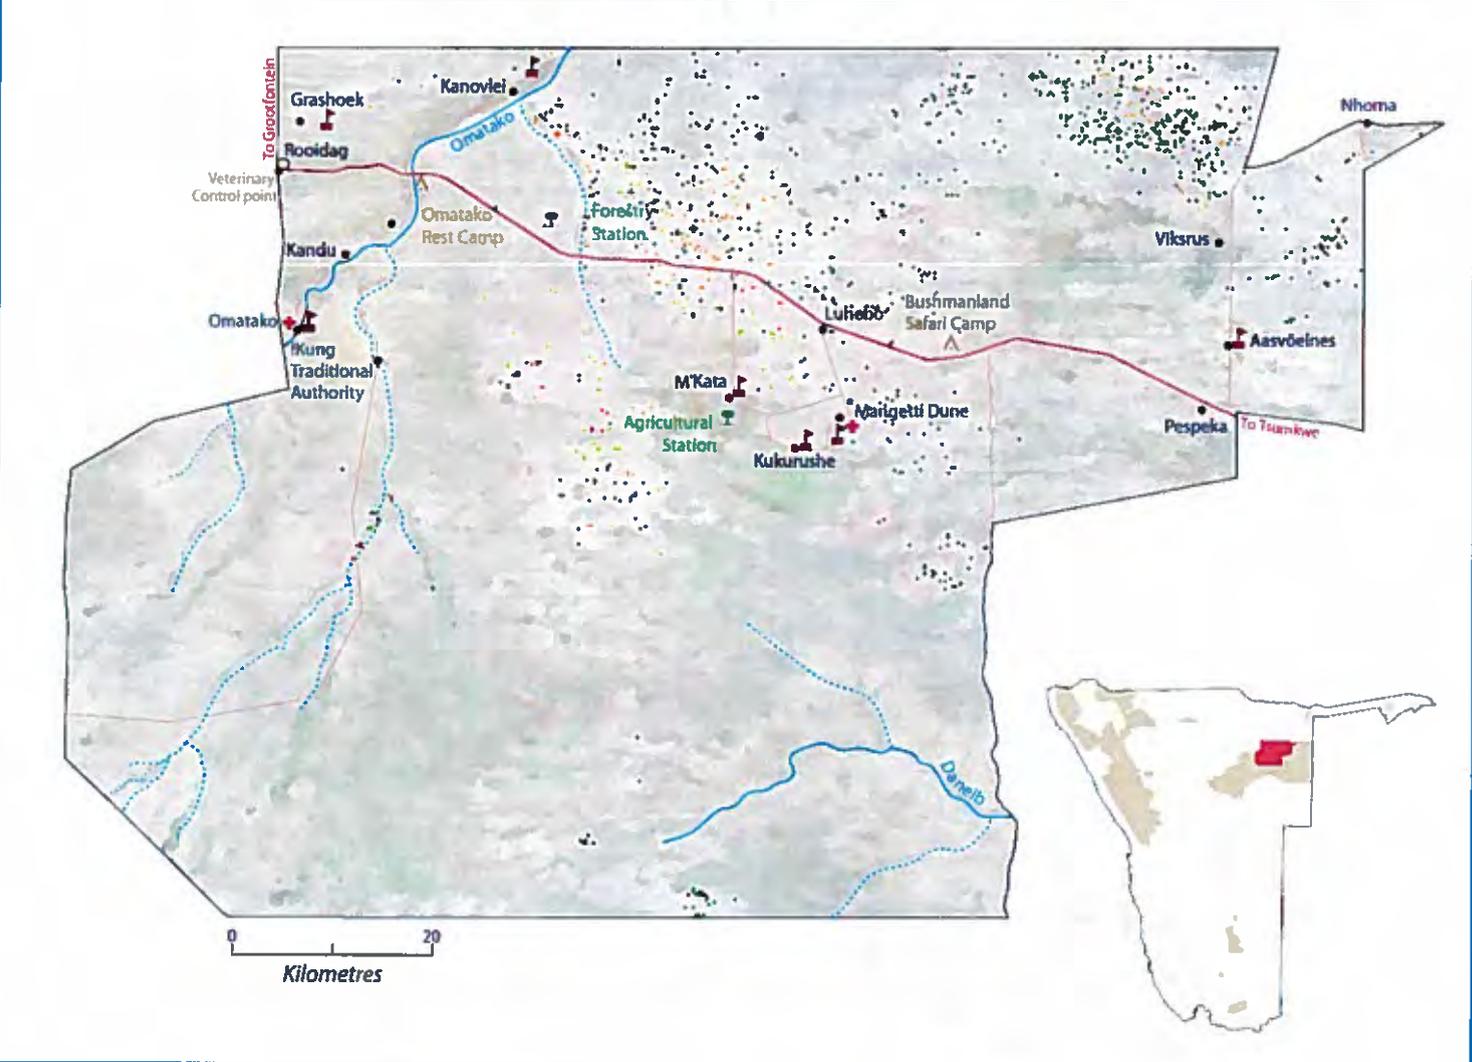

itself in terms of managing the water supply and future generations of game animals. When trophy hunters make a kill, they are not allowed to take the whole animal; the hunter is allowed to remove the head or another small part of the animal (designated by law), but the main part of the animal goes to the conservancy as meat. The people receive not only money, but food from this arrangement as well, and it is also a way of reducing poaching. The !Kung San lack a great deal of food security, so the provision of a regular meat source – one that also provides monetary income – helps to stigmatize and thus reduce instances of poaching.

Use of indigenous plants and traditional knowledge

Another important activity to monitor is plant use. Historically, the conservancy enjoys a substantial income from harvesting Devil's Claw, a plant used for treating arthritis and rheumatism. When the market for Devil's Claw first emerged, there was a drive to harvest

as much of the plant as possible and sell it at the highest possible price, potentially limiting or even eliminating a resource necessary to the economy of the area. Devil's Claw takes approximately 2-4 years to grow to maturity, and so the conservancy was motivated to become extremely proactive in the management of harvesting. The harvesting of Devil's Claw is now carefully monitored: the number of harvesters certified by the Ministry of Environment and Tourism is limited and the season available for people to harvest has been reduced substantially. Additionally, the Conservancy's crop of Devil's Claw has been certified organic on a South African regional level, and the area is regularly surveyed to ensure appropriate re-growth and abundance. If the levels of Devil's Claw are insufficient, the organic certification can be revoked. Having the organic certification also raises the price of the produce, giving the people of the conservancy about 15% more in profits than they would otherwise receive.

Impacts

BIODIVERSITY IMPACTS

Through the contract with the trophy hunting agency, around 250 new game animals are introduced into the conservancy each year. In addition, there is evidence that the animals currently living within the conservancy are reproducing in good numbers, based on reports from the game guards. This demonstrates the Conservancy's clear net gain in terms of wildlife population.

Increases in key wildlife species

The conservancy has seen resurgences in elephant, giraffe, wild dog and roan antelope populations. Commonly spotted species include eland, caracal, blackback, jackal, kudu, duiker, steenbok, warthog, porcupine, shrub hare, bat-eared fox, brown hyena (listed as vulnerable) and spotted hyena.

Due to the remote location and lack of infrastructure, few large scale reviews have been done. However, the number of game introduced between 2006 and 2009 totaled 399 animals, including blue wildebeest, eland, giraffe, oryx and kudu, as well as a few ostrich.

There have also been camera trap placements at one water hole which shows a very active population, including leopards, wild dogs (listed as endangered), brown hyena and elephants.

N=̂a Jaqna recently had their community game guards, who carry out anti-poaching patrols over the Conservancy's vast area, rated as one of the best such groups in Namibia by the Ministry of Environment and Tourism (who rewarded them with horses to increase the guards' ranges). Alongside this approach is a focus on reducing human-wildlife conflict – for instance by investigating and promoting rangeland management techniques which allow cattle-grazing and wildlife to co-exist.

Sustainable harvesting of Devil's Claw

As for the Devil's Claw harvest, much has been done to manage and sustain this critical component of the area's indigenous genetic diversity. Conservancy leaders go to each village and train individuals within the conservancy on how to harvest the Devil's Claw. After training, a limited number of certified harvesters are registered for the four-month harvest period. During the harvest, the registered individuals continue to be monitored. If conservancy leaders find that they are not practising sustainable harvesting techniques, their permit is cancelled and they are no longer able to harvest. This practice is supported by the Ministry of Environment and Tourism, which issues the permit.

Throughout Namibia, there is a clear set of best practices for the Devil's Claw harvest, and N=̂a Jaqna conservancy has adapted those best practices to fit the practices of individual and family-based harvesting groups. For example, there are specific measurements in terms of the size of the plants and tubers that people are taking, and as long as harvesters keep the main taproot intact, the plant will regenerate on its own. By adhering to these guidelines, it is clear which plants are damaged and which ones will regenerate, and the conservancy, by controlling the purchase and shipment of Devil's Claw within and outside of the area, has been able to greatly increase the amount of economic and social benefits that the harvesters receive as well.

Participatory land use planning and monitoring

In terms of human interaction with biodiversity, the conservancy engaged in a scheme of participatory resource zoning in each of the 19 villages in the conservancy. The villages were surveyed in order to learn which areas have higher concentrations of various foods (both flora and fauna) and medicines that people are utilizing – the end goal being to protect those areas where biodiversity exists and where it could potentially flourish. The conservancy has set apart areas for human settlement, for mixed farming, cropping, cattle keeping, and

small stock rearing, as well as for undisturbed wildlife. In this way, the !Kung San have made efforts to keep these at times conflicting land uses separate so that the biowealth of the conservancy may continue to exist and expand.

The Conservancy's policies have limited destruction of the fragile ecosystem of Nꞑa Jaqna, much of which is still untouched wilderness. Specific risks which the Conservancy deals with include overgrazing by the few farmers within the area (and a much bigger risk of farmers from the surrounding area), associated bush clearance, illegal deforestation (especially the cutting and selling of protected hard wood trees), over harvesting and illegal trade in Devils Claw, and poaching. The projects and policies of the Conservancy, and the monitoring provided by community game guards counteract these risks.

Certain plant and animal species are monitored by the Ministry of Environment and Tourism, and community game guards keep "event books" which log sightings and activities. Over time it will be possible to build up an assessment of impacts from these records, but in the nine years the Conservancy has been operating this has not yet been collated.

Instead, impacts are measured from feedback by community game guards and the local population. Whilst this might be presumed to be unscientific, the vast experience of most Conservancy members in bush and wildlife knowledge – most of them having lived their lives in wildlife rich areas with very close interactions with the surrounding environment, not to mention the traditional knowledge passed down in San culture – has ensured the collation of a rich body of knowledge on ecosystem management.

SOCIOECONOMIC IMPACTS

The target beneficiaries are the residents of Nꞑa Jaqna Conservancy, the majority of whom (~85%) are indigenous San people, and nearly all of whom are poor rural dwellers with low education, surviving on subsistence farming, wild food collection and drought relief supplies.

Economic benefits from sustainable harvesting

After 2007, when the monitored Devil's Claw harvest began in Nꞑa Jaqna under the auspices of the conservancy, the membership of the conservancy received approximately N\$1.2 million in direct economic benefit from the harvest. Devils Claw harvest generated over N\$200,000 in revenue for the community in 2007, with this amount increasing to N\$950,000 in 2009. This increase was due not only to a larger harvest, but also from increased prices from organic certification, increased quality and improved negotiations with the supplier.

The conservancy as an institution is also generating some income for people who are members but are not directly involved with the harvesting, thanks to an additional premium from the buyer to the conservancy on each kilo of Devil's Claw harvested. The conservancy is a major worldwide player in the Devil's Claw market, particularly

in the organically certified market; in 2008, Nꞑa Jaqna was the single largest Namibian producer of organically certified Devil's Claw. The money generated from the Devil's Claw harvest is substantial, and according to the Conservancy's benefit distribution plan, the first priority for its investment is pre-schools.

Improved incomes, food security, and gender equality

There are other sources of jobs and income from the tourism arrangement with the trophy hunting organization, and the resulting meat brings additional food security. In addition, there are further job opportunities in terms of game guards, conservancy staff, and people involved in various projects that the conservancy runs.

Though there is not much in the way of infrastructure in the conservancy area, there have been economic indicators that the jobs and additional income are having a positive effect; for example, there is an increase in cattle ownership – which requires considerable investment on the part of the individual. Trophy hunting partners provide between 20 and 30 carcasses per year from their farm as meat distributed to the community, which is an important addition in an area with low food security.

Though there continues to be an educational disparity between men and women in the conservancy, many of the projects in Nꞑa Jaqna focus especially on gender inclusion. Women are in charge of the Devil's Claw harvest and the training of new harvesters. Each village has a female team leader for the harvest who is responsible for making sure that the harvest is conducted in a sustainable manner, maintaining a position of authority over all harvesters.

Overall, the role of women in the conservancy is very strong; Nꞑa Jaqna's constitution guarantees 50/50 representation in the Conservancy's village leadership committee structure—generally a man and a woman from each village. In some cases, there may be two women from one village and two men from another, but the leadership structure is held equal overall. In the management committee, which is comprised of 4 people, there are two women and two men.

Enterprise development, education, and health

Very few people had access to cash income or employment before the Conservancy was established. The Conservancy now employs 12 local people full time, and members enjoy cash incomes from the sale of Devil's Claw, various wood products, craft and increased tourism revenue. A number of conservancy-run projects also provide livelihood opportunities including: chicken and melon growing projects in two villages; vegetable gardens in nine villages; two tourism sites; and a pilot ostrich farm to provide egg shell to craft makers (San jewelry is traditionally made from ostrich eggshell).

The Annual General Meeting decided in 2010 to invest a portion of profits into education, specifically early childhood development in the region. The increased frequency of transport due to the Conservancy activities means that their vehicle frequently serves as an ambulance in the area, providing much needed access to the only operational health clinic.

POLICY IMPACTS

There are now quite a few wildlife conservancies in Namibia, but Nꞛa Jaqna is one of the most well-known and well-respected, particularly with the Ministry of Environment and Tourism. After winning the Equator Prize in 2008, Nꞛa Jaqna's success lent credibility to the entire conservancy scheme, and promoted environmental awareness within Namibia as a whole. It has also served to strengthen community-based natural resource management; in terms of land security and in terms of the conservancy, members of the !Kung San have earned income, causing both policymakers and the general public to see them as more productive members of Namibian society, which in turn makes it very difficult for them to challenge the legitimacy of the conservancy both in terms of its land area and as a legal body.

Historically, the !Kung San are a very non-combative people, and have generally moved from the area when challenged. Because of this lack of confidence in their land rights, over the last 1,000 years,

they have ended up with occupying some of the worst areas of land in Southern Africa. Owning a project and managing the land in which this project operates – and wanting to continue to operate that project – is part of the process of interacting with the state, which requires a confidence and a political voice that had traditionally escaped the !Kung San.

Highly democratic governance processes

The people of Nꞛa Jaqna are also extremely engaged in the management of their conservancy. Though the area is still fairly lean in terms of infrastructure, conservancy leaders actually drive from village to village to have the management plans discussed with and endorsed by the entire membership of several thousand. In this way, there is a true democracy of management.

“Conservancy leaders literally travel village by village to gain the endorsement of the conservancy’s membership. They either round everybody up into one place, or work with three or four villages in a day: having one meeting, driving three or four hours, having another meeting. They just carry on - sleeping in the villages and going through the conservancy until they’re done with the full consultation.”

Ben Begbie-Clench, Namibia Support Unit Manager at the Working Group of Indigenous Minorities in Southern Africa (WIMSA)

Because the !Kung San do not have a hierarchically-structured leadership system, their leaders are really more akin to chairmen who oversee debate between the villagers. Each member over the age of 18 is given his or her voice in making conservancy decisions.

Strengthening local rights to land

In some areas of practice, Nꞛa Jaqna has become a role model for other conservancies, and exchange visits have resulted. However in terms of national policy there has been much less influence, and some of this should be put down the San's marginalized social status within the country and region, which inhibits state interaction. An exception is the defense of land rights in Nꞛa Jaqna where planned small scale farms which would dispossess the San of land and destroy environmentally sensitive areas have been opposed through Nꞛa Jaqna Conservancy by the community. Whilst this is not policy change, it has promoted adherence to national law and a respect for democratic processes which was not previously the case. This action vastly strengthened the community's knowledge of their rights and ability to interact with the state.

Sustainability and Replication

SUSTAINABILITY

The sustainability of the Nǀa Jaqna Conservancy depends on the people seeing the benefits of the project and wanting to be a part of it, and the highly democratic nature of its governance is a huge factor in its desirability. This degree of participation is perhaps not the most cost-effective (so much travel requires fuel and vehicle upkeep), but in the end, sacrificing the high level of democracy would prove a greater barrier to sustainability than the increased monetary costs. In addition, the Conservancy's management has worked hard to build lasting relationships with their partners. As an example, the Conservancy does not increase their contract price annually or open a yearly bid for partnership with other trophy hunting companies; though in the short run, this may result in less of a profit for the !Kung San, the mutually beneficial agreement will, over the next ten years, provide a greater and more reliable profit in the long run.

There are certainly challenges to the Conservancy's sustainability, however. Though Nǀa Jaqna is becoming more financially independent through its trophy hunting contract and the sale of Devil's Claw, true independence from current donors would bring a level of financial responsibility as yet unseen. The !Kung San, however, are in a unique position for success, owing to the desirability of the pristine quality of their beautiful and remote area as a destination for eco-tourism.

Threats to sustainability will only increase as time goes on; the need for farmland and grazing area only increases with Namibia's growing population, and changes in behavior and migration routes of game animals could occur under the influence of global climate change – a major threat in such an arid region. Luckily, the !Kung San of Nǀa Jaqna are strongly committed to success, for they understand the consequences of damaging their fragile ecosystem; they understand that there will likely be no second chance. Community participation and private partnerships have been the key components to Nǀa Jaqna's ongoing success, combining a democratic approach with

economic benefits. Another contributing factor is the knowledge of the land and environment held by the participants, which has been adapted to new ends.

REPLICATION

There has already been replication and knowledge exchange between Nǀa Jaqna and other communities and conservancies throughout Namibia, sharing best practices in tourism activities and land management techniques. Nǀa Jaqna is one of the most successful and well-known conservancies in Namibia, lending weight to the conservancy approach. Additionally, there is a great deal of knowledge exchange with not only other communities, but with Namibian society as a whole. Learning about and understanding the needs of tourists and visitors to the Conservancy has enabled the !Kung San of Nǀa Jaqna to adapt their methods in ways that are both beneficial to their community and appealing to visitors – further encouraging the sustainability of the project. In exchange, when tourists and non-community members visit the conservancy, they are exposed to an often unseen land of largely undisturbed ecosystem filled with native plants and animal species, rather than cattle or larger-scale agriculture. This exposure further underlines the importance and effectiveness of community land management, encouraging the growth and acceptance of the conservancy scheme on a wider level.

There have been a number of exchange partners, including mutual exchanges with Nyae Nyae Conservancy, other Namibian Conservancies and a San group from Botswana. Nǀa Jaqna staff have visited a number of Conservancies in northern Namibia, and even San groups in Angola.

There are barriers to knowledge exchange, primarily in the realm of educational level and the steep learning curve associated with successful conservancy management. However, the !Kung San community members who have a greater degree of education

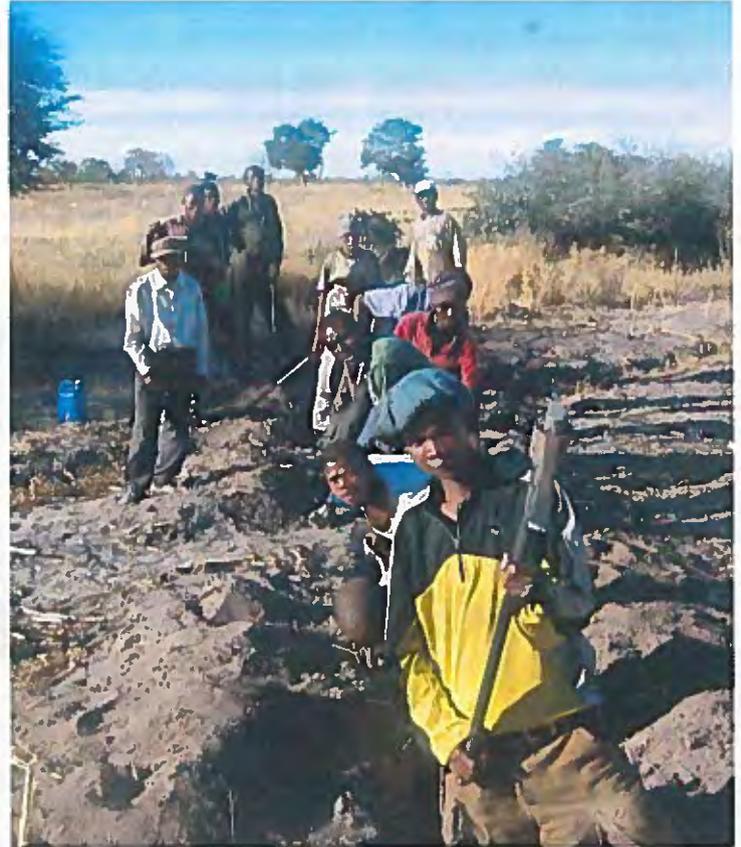

have been indispensable in the process of adapting and training the community as a whole. They have become essential leaders who possess a cultural and traditional knowledge base lacking in outsiders and the know-how to instruct and manage the Conservancy successfully.

PARTNERS

The Nꞛa Jaqna Conservancy is a unique partnership between the Namibian government, the World Bank, international NGOs, and private business. This diverse partnership arrangement is critical for the continued success of the project, bringing stakeholders together from many different sectors around the world. In this way, global expertise melds with local on-the-ground knowledge to create a sustainable and replicable initiative.

Most critical in this partnership is the support of the Namibian government, the UNDP GEF-Small Grants Program, international NGOs, and Eden Trophy Hunting (a privately-owned business). Other partners include:

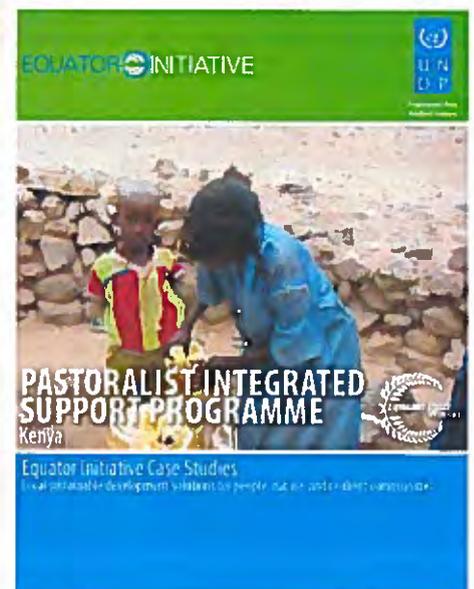

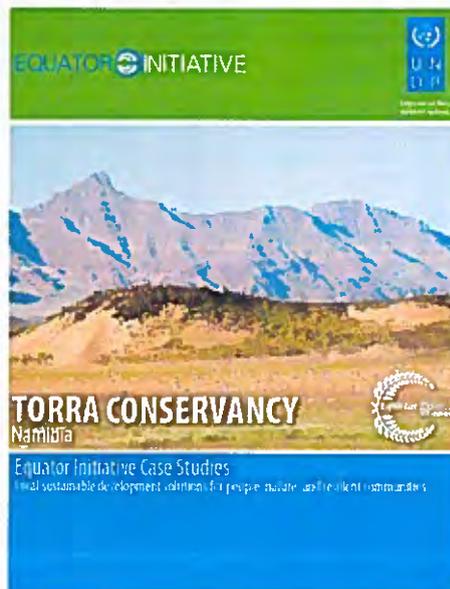

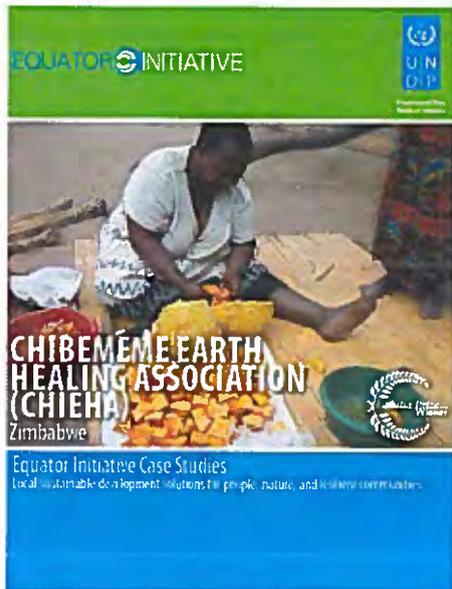

- Working Group of Indigenous Minorities in Southern Africa (WIMSA)
- Ministry of Environment and Tourism
- World Wildlife Fund
- DED (German Development Service; now GIZ)
- Namibian Association of Norway (NAMAS)

Federal Fish and Wildlife Permit Application Form

Dear Sir or Madam:

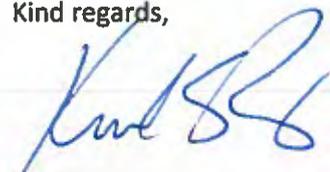

In August of 2013 I participated in a hunting safari in Namibia. Specifically, the safari took place in the Kwando Concession in the Bwabwata National Park in the Caprivi Strip of northeaster Namibia. I hunted with Allan Cilliers Hunting Safaris, a reputable and renowned company run by Allan, a long time figure in the anti-poaching and wildlife conservation efforts in Namibia. His son, Wayne Cilliers, was my professional hunter for the trip.

During this hunt I successfully obtained a bull elephant. At the time I was living in Paris, France on assignment for my company, and arranged for shipment of the tusks to my residence in Paris. The tusks were successfully exported from Namibia and imported to France (related CITES documents included in this application). Shortly thereafter I moved again, this time to Brussels, Belgium. In July of 2017, my assignment in Europe ended and I repatriated back to the US and am now living in Princeton, NJ.

This application is related to obtaining authorization from the US Fish and Wildlife Department to import the tusks. They currently are stored in a warehouse in Machelen, Belgium with Compas International Movers. I have received CITES re-export permits (included in this application) from Belgium.

Thank you for your attention to this application. If you should have any questions, please do not hesitate to contact me.

Kind regards,

Kenneth Shives

Complete Sections A or B, and C, D, and E of this application. U.S. address may be required in Section C, see instructions for details. You may find instructions on how to make your application complete and help avoid unnecessary delays at the following link: .

Section A: Complete if applying as an individual

1 a. Last Name Shives		1 b. First Name Kenneth		1 c. Middle Name (b) (6)		1 d. Suffix -	
2. Date of Birth (mm/dd/yyyy) (b) (6)		3. Telephone Number (b) (6)		3 a. Alternate Telephone Number (b) (6)		4. E-mail address (b) (6)	

Section B: Complete if applying on behalf of a business, corporation, public agency, Tribe, or institution

1.a. Name of business, agency, Tribe, or institution		1.b. Doing business as (DBA)					
2. Tax identification no.		3. Description of business, agency, Tribe, or institution					
4.a. Principal officer Last name		4.b. Principal officer First Name		4.c. Principal officer Middle name/initial		4.d. Suffix	
5. Principal officer title			6. Primary contact name				
7.a. Business telephone number		7.b. Alternate telephone number		7.c. Business fax number		7.d. Business e-mail address	

Section C: All applicants complete address information

1 a. Physical address (Street address, Apartment #, Suite #, or Room #, no P.O. Boxes) (b) (6)				
1 b. City Princeton	1 c. State NJ	1 d. Zip code/Postal code (b) (6)	1 e. County/Province (b) (6)	1 f. Country USA
2 a. Mailing address (include if different than physical address, include name of contact person if applicable) Same as above				
2 b. City	2 c. State	2 d. Zip code/Postal code	2 e. County/Province	2 f. Country

Section D: All applicants MUST complete

1. Attach check or money order payable to the U.S. FISH AND WILDLIFE SERVICE in the amount identified on page 2, nonrefundable processing fee. Federal, Tribal, State, and local government agencies, and those acting on behalf of such agencies, are exempt from the processing fee - attach documentation of fee exempt status as outlined in instructions [50 CFR 13.11(d)]	
2. Certification: I hereby certify that I have read and am familiar with the regulations contained in Title 50 Part 13 of the Code of Federal Regulations and the other applicable parts in subchapter B of Chapter I of Title 50 and I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to the criminal penalties of 18 U.S.C. 1001. (b) (6)	
Signature of applicant/Principal Officer for permit (No photocopied or stamped signatures) [Handwritten Signature]	Date of signature (mm/dd/yyyy) 04/16/2018

E. IMPORT OF SPORT-HUNTED TROPHIES (Appendix I of CITES and/or ESA)

Note 1: This form should be used to request authorization to import trophies of species listed on Appendix I of CITES and/or as threatened or endangered under the ESA (examples include elephants, lions, cheetahs, wood bison, and markhor).

PLEASE USE FORM 3-200-19 FOR SOUTHERN AFRICAN LEOPARD TROPHIES AND SOUTHERN WHITE RHINOCEROS TROPHIES TAKEN IN NAMIBIA.

Note 2: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: Applications for species listed as endangered under the U.S. Endangered Species Act are published in the Federal Register for a 30-day public comment period. Please allow at least 90 days for the application to be processed.

Note 4: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 5: Certain hunting trophies, including elephants, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If needed, use a separate sheet of paper. On all attachments or separate sheets you are submitting; please indicate the application question number you are addressing. If applying for more than one trophy, be sure to answer questions 1-6 for each trophy addressed in this application. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

Same as on page 1

(b) (6)

Princeton, NJ (b) (6) USA

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

Kenneth Shives

(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

N/A

4. For each trophy to be imported, provide:

- a. Scientific name (genus, species, and, if applicable, subspecies) and common name.
Loxodonta Africana - African Elephant
- b. Sex (if known).
Male

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, please enter the following information: *N/A*

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

N/A

b. Date wildlife is to be hunted:

N/A

c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

N/A

6. IF THE TROPHY HAS ALREADY BEEN TAKEN, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where trophy was removed from the wild:

*Namibia, Caprivi strip, Kwando River Concession
Bwabwata National Park, Bwabwata East
Concession*

b. Date wildlife was hunted:

August 2013

c. Name of hunting outfitter, safari company, or professional hunter you hunted with:

Allan Cilliers Hunting Safaris
Wayne Cilliers - Professional Hunter

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Compas International Movers
(b) (6)
(b) (6)
BELGIUM

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so). *See attached*

8. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: *Kenneth Shives*
Business Name: *Compas International Movers*
Address: (b) (6)
City: (b) (6)
State/Province: (b) (6)
Country, Postal Code: *BELGIUM B-1830*

9. For species listed under the Endangered Species Act, please be aware that the U.S. Fish and Wildlife Service must make a finding that your activities will enhance or benefit wild populations of the species involved. While we will communicate with the range country for the species you will hunt or hunted when making the required findings, if you have any information that could support this finding, it would be helpful to our review if you could provide it. Please submit such information on a separate page with your application.

a. Do you have any information regarding the population status or trend data on the species hunted?

Reports in significant increase in elephant populations by Namibian government (7,500 in 1995 to 20,000 in 2016). Some areas over populated - using sport hunting to manage and generate revenue.

b. In order to hunt, you likely paid for licenses or trophy fees. What were those fees and do you have any information on how those funds were used by either the landowner, community, or government?

Daily rates of \$35,000 and trophy fee of \$26,000. Trophy fees paid to Namibian government for conservation. Significant portion of daily rates go to community of villages and anti-poaching measures.

c. Do you have information on other funding activities that are being carried out, or were carried out, by the safari outfitter, professional hunter, concession holder, or land owner that provide a conservation benefit to the species being hunted/species hunted

Significant conservation efforts by outfitter, mostly related to government concession fees and employing supporting anti-poaching activities/individuals. We came across anti-poaching teams in the field.

CERTIFICATION STATEMENT (original signature must be provided for either 10 or 11 below)

- 10. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying for the import of a leopard trophy, I understand that my client may only import two leopard trophies in one calendar year.

Taxidermist/Broker's signature: _____ Date: _____

- 11. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). If applying to import a leopard trophy, I understand that I may only import two leopard trophies in one calendar year.

Applicant's signature: Date: 4/16/2018

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

- 12. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from **the list of designated ports**. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at [50 CFR 23.74](#) as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- (1) Is raw, processed, or manufactured;
- (2) Was legally obtained by the hunter through hunting for his or her personal use;
- (3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- (4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: 2 (Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: _____ (Import is limited to two per hunter per calendar year)

Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
 - a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

b. Date wildlife is to be hunted:

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild: *Area between Selous and Lunda Tanzania*

b. Date wildlife was hunted: *July 18th 2017*

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

Full skin/Hide, skull, claws

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Selous Game Reserve, Dar Es Salaam, Tanzania

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business *Ahmed Huzel*

Name: Address: *MKWAWA*

Address: *Selous Game Reserve*

City: *Dar es Salaam*

State/Province: *Tanzania*

Country, Postal Code:

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. **If you are a broker or taxidermist applying on behalf of a foreign national**, provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: _____

Jay [Redacted]

Date: 2-14-18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

*Link's Wild Safaris
701 Houston Street
Minong, WI 54855
ATTN: Tommy*

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

*Tommy Thompson
(715) 558-8116 Tommy@linkswildsafaris.com*

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

FOR SECURITY PURPOSES, THE FACE OF THIS DOCUMENT CONTAINS A TWO-TONED COLORED BACKGROUND AND MICROPRINTING IN THE BORDER

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at [50 CFR 23.74](#) as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- (1) Is raw, processed, or manufactured;
- (2) Was legally obtained by the hunter through hunting for his or her personal use;
- (3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- (4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: 1 (Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: _____ (Import is limited to two per hunter per calendar year)

Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
 - a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild:

 - b. Date wildlife is to be hunted:

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

3. **IF THE ANIMAL IS DEAD**, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild: *Area between Selous and Lunda Tanzania.*

b. Date wildlife was hunted: *July 18th 2017*

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks): *Full SK.in/Hide, Skull, Claws.*

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

Selous Game Reserve, Dar es Salaam, Tanzania

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you **must** provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business *Ahmed Huzel*

Name: Address: *MKWAWA*

Address: *Selous Game Reserve*

City: *Dar es Salaam*

State/Province: *Tanzania*

Country, Postal Code:

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. If you are a broker or taxidermist applying on behalf of a foreign national, provide documentation to show you have a **Power of Attorney** to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

*Link's Wild Safaris
701 Houston Street
Minneg WI 54859
ATTN: Tommy*

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have questions about the application? (Include name, phone number, and email):

*Tommy Thompson
(715) 558-8116 Tommy@linkswildsafaris.com*

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for a trophy/trophies that you did not use, please return the unused original permit. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 2: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- (1) Is raw, processed, or manufactured;
- (2) Was legally obtained by the hunter through hunting for his or her personal use;
- (3) Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- (4) Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - (i) Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - (ii) The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - (iii) The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.

If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: 1 (Import is limited to two per hunter per calendar year)

African elephant (*Loxodonta africana*) Quantity: N/A (Import is limited to two per hunter per calendar year)
Note: once imported, ivory cannot be re-exported.

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: N/A (An import permit is not required for trophies harvested in South Africa or Swaziland. If you wish to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
 - a. Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild: N/A

b. Date wildlife is to be hunted: DEC. 2017

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).

SKIN, SKULL

3. IF THE ANIMAL IS DEAD, please enter the following:

a. Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild:

TANZANIA, AFRICA, NORTH EAST REGION

b. Date wildlife was hunted:

12-25-2017

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

SKIN, SKULL

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

TANZANIA, AFRICA
AFRICAN BUFFALO SAFARIS TRACKERS

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Business AFRICAN BUFFALO SAFARI TRACKERS
Name: Address: P.O. BOX 22758.

Address:

City: DAR ES SALAAM

State/Province: TANZANIA

Country, Postal Code: TANZANIA, AFRICA, 255 27 250 7496

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

6. If you are a broker or taxidermist applying on behalf of a foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit). I understand that my client may only import two leopard trophies in one calendar year. I understand that my client may only import two African elephant trophies in one calendar year. In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: _____ Date: _____

7. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year. I understand that I may only import two African elephant trophies in one calendar year. In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Applicant's signature: Mike Fejes Date: 2-12-18

Be aware that there may be additional permitting or approval requirements by your local or state governments, as well as required by other Federal agencies or foreign government to conduct your propose activity. While the Service will attempt to assist where possible, it is your responsibility to obtain such approval.

8. All international shipment(s) must be through a designated port. A list of designated ports (where an inspector is posted) is available from <http://www.fws.gov/le/designated-ports.html>. If you wish to use a port not listed, please contact the Office of Law Enforcement for a Designated Port Exemption Permit (form 3-200-2).

9. Name and address where you wish the permit to be mailed, if different from page 1 (All permits will be mailed via the U.S. Postal Service, unless you identify an alternative means below):

10. If you wish the permit to be delivered by means other than USPS regular mail, provide an air bill, pre-paid envelope, or billing information. If you do not have a pre-paid envelope or air bill and wish to pay for a courier service with your credit card, please check the box below. Please DO NOT include credit card number or other information; you will be contacted for this information.

If a permit is issued, please send it via a courier service to the address on page 1 or question 9. I understand that you will contact me for my credit card information once the application has been processed.

11. Who should we contact if we have any questions about the application? (Include name, phone number, and email):
MIKE FEJES (b) (6)

12. **Disqualification Factor.** A conviction, or entry of a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act disqualifies any such person from receiving or exercising the privileges of a permit, unless such disqualification has been expressly waived by the Service Director in response to a written petition. (50 CFR 13.21(c)) Have you or any of the owners of the business, if applying as a business, been convicted, or entered a plea of guilty or nolo contendere, forfeited collateral, or are currently under charges for any violations of the laws mentioned above?

Yes No If you answered "Yes" provide: a) the individual's name, b) date of charge, c) charge(s), d) location of incident, e) court, and f) action taken for each violation.

E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD, AFRICAN ELEPHANT, AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please **return the unused original permit**. If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52; <http://www.fws.gov/international/permits/by-form-number/index.html>) and return your original permit with that form.

Note 2: The U.S. FWS has determined that a trophy consists of raw or tanned parts of a specimen taken by a hunter during a sport hunt for personal use. It may include the bones, claws, hair, head, hide, hooves, horns, meat, skull, teeth, tusks, or any taxidermied part, including, but not limited to, a rug or taxidermied head, shoulder, or full mount. It does not include articles made from a trophy, such as worked, manufactured, or handicraft items for use as clothing, curios, ornamentation, jewelry, or other utilitarian items. If you wish to import such products, please contact the Division of Management Authority for the proper application form.

Note 3: Certain hunting trophies, including leopard, elephant, and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

Please provide the following information. Complete all questions on the application. Mark questions that are not applicable with "N/A". If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy. If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

- 1: ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):

Leopard (*Panthera pardus*) Quantity: _____ (Limited to the import of two per calendar year)

African elephant (*Loxodonta africana*) Quantity: 1 (Import permit is not required for trophies harvested in Botswana, Namibia, South Africa, or Zimbabwe). **Note: once imported, ivory cannot be re-exported.**

Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia Quantity: _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use form 3-200-37).

2. **IF ANIMAL IS CURRENTLY LIVING IN THE WILD**, please enter the following:
- Country and place (area, region, GIS coordinates, ranch AND nearest city) where wildlife is to be taken from the wild: Zimbabwe, Matabeleland South, Buby Valley Conservancy, Beit Bridge (nearest town)
 - Date wildlife is to be hunted:
May 20, 2018 thru June 4, 2018
 - Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horns, tusks).
skull, Tusks and skin
3. **IF THE ANIMAL IS DEAD**, please enter the following:
- Country and place (area, region, GIS coordinates, ranch, and/or AND nearest city) where trophy was removed from the wild: N/A
 - Date wildlife was hunted:

c. Description of the trophy and parts you intend to import (e.g., skin, skull, shoulder mount, life size mount, claws, horn, tusks):

N/A

d. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:

N/A

4. Complete name and address of overseas person or business shipping the trophy to you. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: Mazunga Safaris

Business Name:

Address: 8 Norfolk Road Hillside

Address:

City: Bulawayo

State/Province: Zimbabwe

Country, Postal Code: Africa

5. Please be aware that the U.S. Fish and Wildlife Service may need to make a finding that your activities will enhance or benefit wild populations of the species involved. If you have any information that could support this finding (e.g., how the funds from license/trophy fees will be spent, what portion of the hunting fee will support conservation), please submit such information on a separate page with your application.

CERTIFICATION STATEMENT (original signature must be provided for either 6 or 7 below)

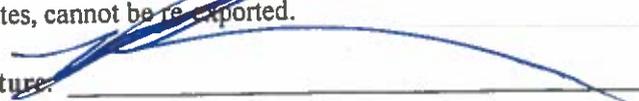

6. If you are a broker or taxidermist applying on behalf of a foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by my client and is being imported only for my client's personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that my client may only import two leopard trophies in one calendar year (if applicable). In addition, I have advised my client that raw ivory, once imported into the United States, cannot be re-exported.

Taxidermist/Broker's signature: N/A Date: _____

7. If you are the hunter applying to import your own trophy, please read and sign the following statement.

I acknowledge that the sport-hunted trophy/trophies to be imported has been/will be personally hunted by me and is being imported only for my personal use (i.e., **not for sale, transfer, donation, or exchange that is reasonably likely to result in economic use, gain, or benefit**). I understand that I may only import two leopard trophies in one calendar year (if applicable). In addition, I understand that raw ivory, once imported into the United States, cannot be re-exported.

Good morning Kara,
Thank you for calling me back the other day. I've enclosed the first page of a letter from my elephant hunt in Zimbabwe (more documentation to aquire CITIES).
The second page will be in a second Email as I can't figure out how to get both attachments in one Email.
Please let me know that you've received both Emails.

Thank you,
Michael (b) Benben

Good morning Kara
File #830 88C
I'm just following up on the status of my Elephant CITIES permit. Hopefully the 2 page letter from The BUBYE VALLEY CONSERVANCY helped my case.
I'm currently holding up my Africa shipment waiting on the Elephant CITIES.
Sitting on pins and needles!

Thanks so much,
Michael (b) Benben

US Fish & Wildlife Authorities.

To Whom it May Concern.

Benefits of Elephant Hunting : Bubye Valley Conservancy , Zimbabwe

The Bubye Valley Conservancy (BVC) is one of the most amazing conservation successes of recent times. Up until the 1990s this former cattle ranching area had systematically eradicated wildlife for competing with, transmitting disease to, and preying on the livestock. However, BVC is now dedicated to conservation; and since its formation only 23 years ago, currently boasts one of the world's largest black rhino populations, Zimbabwe's largest lion population, and a flourishing elephant population of an estimated 700 +.

The 3,440 km² conservancy is situated in the lowveld region of southern Zimbabwe. Although the annual rainfall is low, BVC represents a high nutrient ecosystem that supports large numbers of medium sized herbivores, and as a result, high densities of predators can potentially be sustained. Although the entire conservancy is surrounded by an electrified game fence, to prevent human / wildlife conflict, there is still an annual influx of elephant from the surrounding Communal Lands as the electric fences are only on the inner side of the fence – i.e. designed to control animals that are inside the conservancy. The elephant that 'break-in' are predominantly young bulls that have been harassed by dogs and villagers that live around the conservancy boundaries. This continual influx of elephant bulls over the years has resulted in a sex skew in the BVC elephant population, with bias towards young bulls.

To help address this we apply for a small quota of N/T elephant bulls annually – animals with less than 25 lbs aside. The BVC policy insists that only lone bulls are hunted to negate any disturbance.

Unfortunately the high concentration of rhino and elephant has made BVC a magnet for poaching, with the international illegal market for ivory, rhino horn and pangolin scales at an all time high. Counter-poaching is a high risk, dangerous and demanding endeavor that requires excellent law enforcement tactics and techniques as well as the critical requirement to stay ahead of poachers, and this funded from the conservancies hunt earnings.

**E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND
NAMIBIAN SOUTHERN WHITE RHINOCEROS**

Note 1: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit to the address on page one.

Note 2: If you are requesting reissuance of a permit because you have taken a trophy, but were unable to import it prior to the expiration of the permit, please use the renewal form (3-200-52) and return your original permit with that form.

Note 3: *Sport-hunted trophy* is defined at 50 CFR 23.74 as follows: *Sport-hunted trophy* means a whole dead animal or a readily recognizable part or derivative of an animal specifically identified on the accompanying CITES document that meets the following criteria:

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and
- Includes worked, manufactured, or handicraft items made from the sport-hunted animal only when:
 - i. Such items are contained in the same shipment as raw or tanned parts of the sport-hunted animal and are for the personal use of the hunter;
 - ii. The quantity of such items is no more than could reasonably be expected given the number of animals taken by the hunter as shown on the license or other documentation of the authorized hunt accompanying the shipment; and
 - iii. The accompanying CITES documents (export document and, if appropriate, import permit) contain a complete itemization and description of all items included in the shipment.

Note 4: Certain hunting trophies, including leopard and rhinoceros hunting trophies, are subject to restrictions on their use after import into the United States. Please see 50 CFR 23.55 for more information or contact the Division of Management Authority.

- Complete all questions on the application.
- Mark questions that are not applicable with "N/A".
- If applying for more than one trophy, be sure to answer questions 2 and 3 for each trophy.
- If importing trophies from more than one country, you must submit a separate application for each shipment in order to obtain separate import permits.

1. Name and address where you wish the permit to be mailed, if different from page 1. If you would like expedited shipping, please enclose a self-addressed, pre-paid, computer-generated, courier service airway bill. If unspecified, all documents will be mailed via the U.S. Postal Service.

SAME

2. Who should we contact if we have questions about the application (name, phone number, and e-mail)?

DOUGLAS (b) (6) SWICK 817-994-9436

(b) (6)

3. Have you or your client (if a broker applying on behalf of your client), been assessed a civil penalty or convicted of any criminal provision of any statute or regulation relating to the activity for which the application is filed; been convicted, or entered a plea of guilty or nolo contendere, for a felony violation of the Lacey Act, the Migratory Bird Treaty Act, or the Bald and Golden Eagle Protection Act; forfeited collateral; OR are currently under charges for any violation of the laws mentioned above?

No

Yes

If you answered "Yes" to Question 3, provide: a) the individual's name; b) date of charge; c) charge(s); d) location of incident; e) court, and f) action taken for each violation. Please be aware that a "Yes" response does not automatically disqualify you from getting a permit.

4. ENTER the quantity next to the name of the species you are applying to import (you may apply to import specimens of more than one species provided they have been/are being hunted in the same country):
- Leopard (*Panthera pardus*) Quantity: 1 (Limited to the import of two per calendar year). If you wish to import a leopard taken in northern or western Africa, please use form 3-200-20.
 - Southern white rhinoceros (*Ceratotherium simum simum*) from Namibia
Quantity: _____ (An import permit is not required for trophies harvested in South Africa or Swaziland. If you are looking to import from a different country, please use Form 3-200-20).

5. IF ANIMAL IS CURRENTLY LIVING IN THE WILD, Please enter the following information:

- a. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

N/A

- b. Date wildlife is to be hunted:

- c. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:

6. IF THE ANIMAL HAS ALREADY BEEN TAKEN, please enter the following:

- d. Country and place (area, region, GIS coordinates, ranch, conservancy, management area, or hunting block, AND nearest city) where wildlife is to be taken from the wild:

WELGEMOED # 248 OTJIWARONGO, NAMIBIA

- e. Date wildlife is to be hunted:

SEPTEMBER 1, 2017

f. Name of hunting outfitter, safari company, or professional hunter you will be hunting with:
JOHN CILLIERS

g. The current location of the trophy (address and country) [the U.S. import permit will identify this country as the country of export/re-export and must match with the export/re-export document]:
PRONTO GLOBAL AIR + OCEAN FREIGHT
B1 HIGHWAY NORTH, PLOT # 48
BRAKWATER, WINDHOEK, NAMIBIA

7. Please provide a copy of any applicable foreign government permits or licenses that were required to remove this animal from the wild (if you have not hunted yet and do not currently hold any such permits or licenses, please indicate so).

8. Complete name and address of overseas person or business shipping the trophy to you.

a. If you are applying to import a trophy directly from Namibia, you must provide the name and address of the professional hunter listed on your Namibian hunting permit [this name will appear on the face of the export permit].

Name: JOHN CILLIERS
Business Name: OMUJEVE HUNTING SAFARIS PTY. LTD
Address: FARM ONGOMBO WEST SECTION 2 NUMBER 56
City: WINDHOEK
State/Province: NAMIBIA
Country, Postal Code: PO BOX 9456

CERTIFICATION STATEMENT (original signature must be provided for either 9 or 10 below)

9. If you are a broker or taxidermist applying on behalf of a U.S. hunter or foreign national, provide documentation to show you have a Power of Attorney to act on your client's behalf and sign the following statement.
