Supplemental Report

ICR: 17029282 **Last Modified:** 12-05-2017 1230

Title: Lynx **Created By:** David Schottenbauer

Took a call from (b) (6), (b) (7)(C) stating that he had accidentally gotten a lynx in a snare. I told him not to touch it, and I would come to the site to retrieve the lynx.

That evening I met (b) (6), (b) (7)(C) and we went to the site. I found the lynx in the tagged snare (Appeared to be legally set). (b) (6), (b) (7)(C) and I had spoken of Lynx Zone rules for snaring prior to his setting snares.

Lynx was seized and snare was returned to (b) (6), (b) (7)(C).

Per policy a Lynx Trapping Incident Form was completed and included in this ICR.

Lynx is stored at Enforcement freezer in Two Harbors, and Wildlife has been notified. Wildlife has requested DNA samples, and they will have access for those.
