---

Hi Tam -

This is a bit odd to be coming at this time but just noticed it. I was looking back at the official diagnostic lynx necropsy report (regarding the lynx that died in the catchpole when we attempted to release it from a trap) for something else I'm working on and noticed that the "Event Date" in the official report is incorrect. The lynx died on 10/28/11 but the report says 9/20/11. Just FYI.

Hope you're doing well,  
Shannon

---

fyi - See the attached updated necropsy report from Jennifer Bradsby (USGS National Wildlife Health Center) regarding the lynx that died during catchpole release in St. Louis County this fall.

Thanks,  
Tam

NWHC case 23814\_Diagnostic Update  
Subject

Attached, please find the most recent diagnostic findings for your submission to the National Wildlife Health Center. The Pathologist assigned to this case is out of the office for two weeks due to (b) (6). He will hopefully be finalizing the case when he returns. I haven't had a chance to discuss these latest lab results with him so I will need to get his interpretation on the ChE findings.

If you have any questions regarding this case, please do not hesitate to contact me.

All best,  
Jennifer
