Hi Tam -

I'm sorry I don't have the answer to the question but John Velsvaag interviewed the trapper and he should have that info. John's email is john.velsvaag@state.mn.us

Also, if John doesn't have the answer you could contact Peter McClelland who was the one who first called us (the trapper works for him so could get you the info through Peter I think). Peter's email is peter@whitewilderness.com

I know it was in there at least since the morning when he trapped it and we didn't get to it until afternoon - but I'm not sure how often the trapper was checking his traps.

Thanks,
Shannon

Subject: trapped lynx -one additional question

Hi Shannon,

This is just a quick question regarding the lynx incident and the email I just sent... Jennifer Bradsby (Nat'l Health Center) had one additional question regarding the lynx necropsy - do you know how much time the lynx had spent in the trap?

Thanks,
Tam
