Hello Alyssa and Lesli,

Hope you all are having a great Friday. Some folks in Catron County have reached out regarding the progress on dealing with the problem wolf Brady mentioned during our briefing that is causing so many problems for (b) (6).

I know FWS has issued a permit to Jess Carey, but I have told that permit is very restrictive and only allows him to carry it out on private land. The County is wondering if it would be possible for them to given the authority to carry out the order?

Any information on this is appreciated, hope you all have a great weekend!
