Subject: RE: Mexican wolf EIS preliminary draft Ch 3: Human Health/Public Safety Section; Catron County inputs
Date: Monday, June 2, 2014 1:21:03 PM

Alex,

I appreciated the discussion I had with Jess Carey, Catron County Wolf Interaction investigator last August following the EIS Kick-off meeting. We have the June 06, 2012 report "Problem Wolves in Catron County, NM, A County in Crisis..." We're also aware of the information on this website: http://www.catroncounty.net/wolfhotline/pets.htm#_pets. Any additional data that you can provide would be helpful in revising the preliminary draft of the HH/PS section of Ch 3 and writing the Ch 4 analysis of effects from the proposed action and alternatives. Best, Jon

I would simply tell USFWS that the two counties have more accurate and precise data, and that we would like to share the data to provide full disclosure per 40 CFR 1506.2 (c), and as recommended in our draft MOU.

I'd check with Joe Young first, as well as the status of the two county letter to USFWD.

Alex

All, I left the date to provide feedback to us on this section open ended but realize that may be the first thought you will have after reading the email. To clarify: We're rolling out these preliminary draft sections of Ch 3 as they are ready. This one was the first out of the starting gate. The other sections in Ch 3 (Bio Resources, Economic Activity, Land Use and Environmental Justice) to follow to specific subsets of the IPT members who have experience or expertise in that area (i.e. we've been working with the state wildlife agencies on the bio resources section). If you can get comments on this preliminary draft section back to us by mid-June that would be great but if not we'll use them as part of the review/comment on the DEIS. Best, Jon

Subject: Mexican wolf EIS preliminary draft Ch 3: Human Health/Public Safety Section; For review and comment by Interdisciplinary Project Team (IPT)

All,
Attached for your review and comment is the preliminary draft of the Human Health/Public Safety Section of Chapter 3(Affected Environment) of the Mexican wolf EIS with an appendix. This chapter describes the existing affected environment. Chapter 4 of the EIS will address the potential impacts from the proposed action and alternatives. We are sending this section of Ch 3 to those agencies, tribes and counties that have been involved with the reintroduction project for the Mexican wolf. Not all are cooperating agencies however we ask that this and other preliminary draft

documents that we may provide to you for review be treated as just that: preliminary drafts that are not ready for distribution to the public or the media. Please provide your review, comment and feedback on this section by email. You can use the attached matrix or if you prefer the Word version of the document is provided so that you can use track changes and insert comments directly into it and then return the file as an email attachment. Best regards, Jon Olson
