Subject: Request for wolf nuisance data collected in Catron County
Date: Thursday, August 29, 2013 5:00:19 PM

Hello Mr. Carey:

It was a pleasure speaking with you a few days ago.

As you requested, I am sending you an email with the request for any information you can provide the US Fish and Wildlife Service (USFWS) regarding nuisance or Health and Human Safety investigations involving wolf reports that you have compiled in Catron County since 1998.

Jon Olson is the EIS and NEPA Environmental Consultant who is interested in looking at all data relating to human safety and nuisance reports collected by counties within the BRWRA for the EIS. He can be contacted at the email above or at his office number (505) 761-4733 should you have any data that you could send his way, or if you have any questions about the data we are requesting.

From our recent conversation, I understand that you have these reports in hard copy format. The Alpine Wolf Office may be able to assist in scanning these forms for you. Please let me know if I can assist with arranging this. While I will be out of the office in September, you can reach me on my cell phone.

Thanks again, Liz
