---

Hi Brady,

Thank you for talking with me this afternoon. Attached is a scanned copy of the handwritten letter that Jess Carey handed to me at an FWS public hearing on Mexican wolves in Reserve, New Mexico 18 years ago with instructions to give it to the Center for Biological Diversity's executive director, Kieran Suckling.

Also, just so you know the attitudes openly expressed by the ranching community towards illegal killing of wolves, please see the attached back cover of the New Mexico Cattle Growers' magazine from last year.

Michael
