Yes, he does currently have a receiver, but does not have the channels for specific wolves. Jess receiver is one of the older ones and he sometimes scans through all of the channels to figure out what channel a particular wolf is on. Thus, we should at a minimum get this receiver back.

Subject pls review Catron Co letter

All: Attached is the draft letter (with assistance from John) to Catron County. However, I'm confused on the issue of whether Jess already has a receiver. Please review and provide feedback.

thx
